Introduction

Fox Chase Bancorp, Inc., a Maryland corporation, is offering shares of common stock for sale in connection with the conversion of Fox Chase Bank from the mutual holding company form of organization to the stock form of organization. Upon completion of the conversion and the offering, all of the common stock of Fox Chase Bancorp, Inc. will be owned by public stockholders. This report represents FinPro, Inc.'s ("FinPro") independent appraisal of the estimated pro forma market value of the common stock (the "Common Stock") of Fox Chase Bancorp, Inc. (hereafter referred to on a consolidated basis as the "Bank").

In compiling the pro formas, FinPro relied upon the assumptions provided by the Bank and its agents. The pro forma assumptions are as follows:

- 59.9% of the total shares will be sold to the depositors and public,
- the stock will be issued at \$10.00 per share,
- the conversion expenses will be \$4.5 million at the midpoint,
- there will be an ESOP equal to 4% of the shares issued funded internally, amortized over 15 years straight-line,
- there will be an MRP equal to 3.15% of the shares issued, amortized over 5 years straight-line,
- there will be a Stock Option Plan equal to 7.87% of the shares issued, expensed at \$2.92 per option over 5 years straight-line,
- the tax rate is assumed at 34.00% and,
- the net proceeds will be invested at the three-year Treasury Note rate of 1.66%, pre-tax.

It is our understanding that the Bank will offer its stock in a subscription and community offering to Eligible Account Holders, to the Employee Plans, and to Supplemental Eligible Account Holders of the Bank. This appraisal has been prepared in accordance with Regulation 563b.7 and the "Guidelines for Appraisal Reports for the Valuation of Savings and Loan Associations Converting from Mutual to Stock Form of Organization" of the Office of Thrift Supervision ("OTS") which have been adopted in practice by the Federal Deposit Insurance Corporation ("FDIC"), including the most recent revisions as of October 21, 1994, and applicable regulatory interpretations thereof.

In the course of preparing our report, we reviewed the Bank's audited financials for the years ended December 31, 2008 and December 31, 2009. We also reviewed the registration statement on Form S-1 as filed with the Securities and Exchange Commission ("SEC"). We have conducted due diligence analysis of the Bank and held due diligence related discussions with the Bank's Management and Board, Stifel, Nicolaus & Company, Incorporated, (the Bank's underwriter), and Kilpatrick Stockton LLP (the Bank's special counsel). The valuation parameters set forth in the appraisal were predicated on these discussions but all conclusions related to the valuation were reached and made independent of such discussions.

Where appropriate, we considered information based upon other publicly available sources, which we believe to be reliable; however, we cannot guarantee the accuracy or completeness of such information. We visited the Bank's primary market area and reviewed the market area's economic condition. We also reviewed the competitive environment in which the Bank operates and its relative strengths and weaknesses. We compared the Bank's performance with selected publicly traded thrift institutions. We reviewed conditions in the securities markets in general and in the market for savings institutions in particular. Our analysis included a review of the estimated effects of the Conversion of the Bank on the operations and expected financial performance as they related to the Bank's estimated pro forma value.

In preparing our valuation, we relied upon and assumed the accuracy and completeness of financial and other information provided to us by the Bank and its independent accountants. We did not independently verify the financial statements and other information provided by the Bank and its independent accountants, nor did we independently value any of the Bank's assets or liabilities. This estimated valuation considers the Bank only as a going concern and should not be considered as an indication of its liquidation value.

Our valuation is not intended, and must not be construed, to be a recommendation of any kind as the advisability of purchasing shares of Common Stock in the stock issuance. Moreover, because such valuation is necessarily based upon estimates and projections of a number of matters, all of which are subject to change from time to time, no assurance can be given that persons who purchase shares of Common Stock in the stock issuance will thereafter be able to sell such shares at prices related to the foregoing valuation of the pro forma market value thereof. FinPro is not a seller of securities within the meaning of any federal or state securities laws. Any report prepared by FinPro shall not be used as an offer or solicitation with respect to the purchase or sale of any securities.

The estimated valuation herein will be updated as appropriate. These updates will consider, among other factors, any developments or changes in the Bank's financial condition, operating performance, management policies and procedures and current conditions in the securities market for thrift institution common stock. Should any such developments or changes, in our opinion, be material to the estimated pro forma market value of the Bank, appropriate adjustments to the estimated pro forma market value will be made. The reasons for any such adjustments will be explained at that time.

1. Overview and Financial Analysis

GENERAL OVERVIEW

As of December 31, 2009, the Bank had \$1.2 billion in total assets, \$858.3 million in deposits, \$631.3 million in net loans and \$123.6 million in equity. The following table sets forth information with respect to the Bank's full-service banking offices. The data shown below is the most recently available public data with regard to branch deposits.

HISTORY AND OVERVIEW

FOX CHASE BANK

Fox Chase Bank is headquartered in Hatboro, Pennsylvania and has provided community banking services to customers for over 142 years. The Bank currently operates eleven full-service locations in Bucks, Chester, Delaware, Montgomery and Philadelphia counties in Pennsylvania and Atlantic and Cape May counties in the southern New Jersey area. At December 31, 2009, the Bank exceeded all regulatory capital requirements and was not a participant in any of the U.S. Treasury's capital raising programs for financial institutions.

The Bank is a full service retail banking institution. The Company's primary business lines involve generating funds from deposits or borrowings and investing such funds in loans and investment securities. The principal focus is to become the leading relationship-based business and consumer bank in our market areas. The Bank currently operates eleven retail banking locations and ten automated teller machines throughout the Philadelphia metropolitan area and in the southern New Jersey area.

The Company's principal executive offices are located at 4390 Davisville Road, Hatboro, Pennsylvania 19040.

STRATEGIC DIRECTION

The Bank's business strategy is to grow and improve profitability by:

- remaining a community-oriented financial institution;
- improve earnings through asset diversification and growth;
- improve asset quality;
- improve the funding mix by focusing on core deposits;
- grow through geographic expansion;
- maintain strong capital levels; and
- continue expense control.

BALANCE SHEET TRENDS

The Bank's balance sheet declined by \$24.3 million between December 31, 2005 and December 31, 2006, but assets increased \$55.9 million between December 31, 2006 and December 31, 2007. The balance sheet grew by \$118.4 million from December 31, 2007 to December 31, 2008 and grew by \$242.5 million between December 31, 2008 and December 31, 2009.

Equity was \$123.6 million as of December 31, 2009 and the equity to assets ratio was 10.53% at December 31, 2009.

INVESTMENTS AND MORTGAGE- BACKED SECURITIES
--

The following table sets forth the amortized cost and fair values of the Bank's securities portfolio at the dates indicated. All of the securities were classified as available-for-sale at the dates indicated. The portfolio is predominately agency sponsored MBS. As a result of negative trends for the Company's private label residential mortgage security, management's analysis during the second quarter 2009 indicated that the security was other-than-temporary impaired in the amount of \$605 thousand, \$157 thousand of which was recognized on the Statement of Operations and \$448 thousand in other comprehensive income (before taxes). There was no additional other-than-temporary credit impairment charge on this investment in the third or fourth quarter of 2009.

ASSET QUALITY

The Bank’s nonperforming assets increased to \$33.7 million at December 31, 2009 from \$5.2 million at December 31, 2005. The Bank’s nonperforming asset to total assets ratio increased from 0.67% at December 31, 2005 to 2.87% at December 31, 2009.

The increase in NPAs between December 31, 2008 and December 31, 2009 was primarily attributable to a \$12.2 million increase in nonaccrual construction loans, a \$6.2 million increase in nonaccrual 1-4 family mortgages and a \$4.1 million increase in real estate owned.

The increase on nonaccrual construction loans relates to weak sales of new construction properties. The increase in nonaccrual 1-4 family mortgages was attributable to higher unemployment among other things.

FIGURE 10 - ASSET QUALITY CHART

Source: Offering Prospectus

At December 31, 2009, the Company's nonperforming loans to total loan ratio was 4.62% and the nonperforming assets to total assets ratio was 2.87%. The largest increases in the portfolio were construction loans, one-to-four family real estate, and multi-family and commercial real estate and the construction categories. Nonperforming one-to-four-family real estate loans increased by \$6.2 million from December 31, 2008 to December 31, 2009. Nonperforming multi-family and commercial real estate increased by \$4.1 million from December 31, 2008 to December 31, 2009. Nonperforming construction loans increased \$12.2 million from December 31, 2008 to December 31, 2009.

FUNDING COMPOSITION

Following two years of declines, the Bank experienced deposit growth of \$272.7 million between December 31, 2007 and December 31, 2009. Borrowings trended upward between December 31, 2006 and December 31, 2009 due to the Bank implementing leverage strategies. As of December 31, 2009, the Bank had outstanding borrowings of \$187.2 million.

ASSET/LIABILITY MANAGEMENT

The following table, which is based on information that the Bank provided to the Office of Thrift Supervision, presents the change in the net portfolio value of the Bank at September 30, 2009 (the latest date for which the information is available) that would occur in the event of an immediate change in interest rates based on Office of Thrift Supervision assumptions, with no effect given to any steps that the Bank might take to counteract that change. The Bank's interest rate risk position is considered to be "Minimum Risk" according to TB-13a.

PROFITABILITY TRENDS

Net income trended downward between the twelve months ended December 31, 2005 and the twelve months ended December 31, 2009. The decline of over this time period was primarily attributable to higher provision expense. Provision recoveries were \$6.0 million and \$5.9 million for the twelve months ended December 31, 2005 and December 31, 2006, respectively. Provision expense increased to \$425 thousand for the twelve months ended December 31, 2007 and increased to \$2.9 million and \$9.1 million for the twelve months ended December 31, 2008 and December 31, 2009, respectively.

The adverse change in profitability between December 31, 2008 and December 31, 2009 was primarily attributable to a \$6.2 million increase in provision expense and a \$1.4 million increase in noninterest expense. The increased provision expense was largely attributable to the \$4.7 million in charge-offs and the rise in NPAs.

FIGURE 17 - NET INCOME CHART

Source: Offering Prospectus

The net interest spread and margin decreased between the twelve months ended December 31, 2008 and the twelve months ended December 31, 2009. The decline was primarily attributable to the yield on earning assets declining more than the cost of funding.

Spread and margin trended downward between December 31, 2007 and December 31, 2009, due in large part to declining yield.

The net interest spread and margin both decreased between the twelve months ended December 31, 2008 and December 31, 2009 due to yields declining more than the cost of funding.

FIGURE 19 - SPREAD AND MARGIN CHART

Source: Offering Prospectus

Net income trended downward between the twelve months ended December 31, 2005 and the twelve months ended December 31, 2009. The decline over this time period was primarily attributable to higher provision expenses. Net interest income and noninterest income increased between the twelve months ended December 31, 2008 and the twelve months ended December 31, 2009. This increase was offset by higher provision expense and higher noninterest expense during the period between the twelve months ended December 31, 2008 and the twelve months ended December 31, 2009.

- (1) Net income for 2006 reflects a charge of \$1.5 million for the contribution made to the Fox Chase Bank Charitable Foundation in connection with our initial public offering.

LEGAL PROCEEDINGS

At December 31, 2009, the Bank was not involved in any legal proceedings the outcome of which it believes would be material to its financial condition or results of operations. Periodically, there have been various claims and lawsuits against the Bank, such as claims to enforce liens, condemnation proceedings on properties in which the Bank holds security interests, claims involving the making and servicing of real property loans and other issues incident to the Bank's business. The Bank is currently not a party to any pending legal proceedings that the Bank believes would have a material adverse effect on the financial condition, results of operations or cash flows.

SUBSIDIARIES

Fox Chase Bank established Fox Chase Financial, Inc. in 1999. As a Delaware-chartered corporation investment company, Fox Chase Financial manages and holds investment securities.

In February 2009, Fox Chase Bank established Fox Chase Service Corporation as a wholly-owned subsidiary. A Pennsylvania-chartered corporation, Fox Chase Service Corporation made and manages the Bank's investment in Philadelphia Mortgage Advisors, Inc.

2. Market Area Analysis

New Jersey Market Area. The economy of Atlantic County is dominated by the gaming industry in nearby Atlantic City as the primary employer. The economy of Cape May County is primarily geared towards tourism. According to published statistics, Atlantic County's population in 2009 was approximately 279,000 and Cape May County's population was approximately 101,000. The economy in Atlantic County, while strong in recent years as new and expanding casinos in Atlantic City were being developed, began deteriorating as gaming revenues fell in 2008 and 2009. Cape May County also generally benefits from the growth in and around Atlantic City, as many residents commute to that area for employment. Although the economy in this market area has been strong in recent years, during 2008 and 2009 gaming revenues and casino development has declined, resulting in a significant deterioration in development and employment. Additionally, median household and per capita income in Atlantic and Cape May Counties are lower than the comparable figures for New Jersey as a whole. The southern New Jersey market is located outside of a major metropolitan area, resulting in lower average income levels and a smaller portion of higher-paying, professional jobs.

Philadelphia Market Area. The economy of the Philadelphia market area is primarily dominated by the service sector. According to published statistics, the population of the five-county area served by the Bank's branches totaled approximately 3.9 million in 2008. The economy in the Philadelphia market area contains a highly-educated workforce and a diverse local economy as traditional employers in the manufacturing and financial services industry have been bolstered by growth in the life sciences and health care industries as well as the information technology and communication sectors. The median household and per capita income in Bucks, Chester, Delaware and Montgomery Counties significantly exceeds the comparable figures for Pennsylvania as a whole, while the median household and per capita income in Philadelphia County trailed the comparable figures for Pennsylvania.

The following tables provide deposit and demographic data for the Bank's market area.

3. Comparisons with Publicly Traded Thrifts

INTRODUCTION

This section presents an analysis of the Bank's operations against a selected group ("Comparable Group") of publicly traded thrifts. The Comparable Group was selected based upon similarity of characteristics to the Bank. The Comparable Group multiples provide the basis for the valuation of the Bank.

Factors that influence the Bank's value such as balance sheet structure and size, profitability, income and expense trends, capital levels, credit risk, and recent operating results can be measured against the Comparable Group. The Comparable Group's current market pricing, coupled with the appropriate aggregate adjustment for differences between the Bank and the Comparable Group, will then be utilized as the basis for the pro forma valuation of the Bank's to-be-issued common stock.

SELECTION CRITERIA

The goal of the selection criteria process is to find those institutions with characteristics that most closely match those of the Bank. In an ideal world, all of the Comparable Group would contain the exact characteristics of the Bank. However, none of the Comparables selected will be exact clones of the Bank.

As of the date of this appraisal, there are a total of 256 thrifts that trade on public exchanges. There are 147 traded on the NYSE, NASDAQ or AMEX. FinPro limited the Comparable Group to institutions whose common stock is listed on a major exchange, (defined as the NYSE, NASDAQ or AMEX) since these companies tend to trade regularly. FinPro believes that thrifts that trade over-the-counter or as pink sheets are inappropriate for the Comparable Group, due to irregular trading activity and wide bid/ask spreads, which may skew the trading value and make trading multiples less reliable as an indicator of value.

Institutions that were structured as Mutual Holding Companies (MHC's) were eliminated. 38 institutions were eliminated due to the MHC structure, leaving 109 remaining institutions.

Institutions outside of the Mid-Atlantic and Northeast region were eliminated. 59 institutions were eliminated due to being outside the target region.

Of the 50 remaining institutions, 37 institutions were eliminated due to their size. An institution was eliminated if total assets were below \$800 million or above \$1.9 billion.

After narrowing the list down for the size range, 13 institutions remained. One institution was then eliminated due to insufficient data. One institution was eliminated due to being located in New Hampshire, which was viewed being too far removed from the target region. One institution was removed due to the institution serving a specific ethnic mix.

The remaining 10 institutions were deemed acceptable Comparables.

Using the criteria established, the Comparable Group was created. It is important to note that none of the Comparables will be identical clones of the Bank and as such subjective adjustments will have to be made. A variance to the Comparable median was established for each data field.

OVERVIEW OF THE COMPARABLES

The members of the Comparable Group were reviewed against the Bank to ensure comparability based upon the following criteria:

1. Asset size
2. Profitability
3. Capital Level
4. Balance Sheet Mix
5. Operating Strategy
6. Date of conversion

1. Asset Size Ideally, the Comparable Group should have a similar asset size to the Bank. The Comparable Group ranged in size from \$806.6 million to \$1.5 billion in total assets with a median of \$1.1 billion. The Bank's asset size was \$1.2 billion as of December 31, 2009. At the pro forma midpoint of the offering range, the Bank is expected to have assets of \$1.3 billion.

2. Profitability The Comparable Group had a median core ROAA of 0.54% and a median core ROAE of 3.35% for the last twelve months. The Bank had a core ROAA of -0.21% and a core ROAE of -1.92% for the twelve months ended December 31, 2009. On a pro forma basis, the Bank's core ROAA and core ROAE are -0.19% and -1.08%, respectively.

3. Capital Level The Comparable Group had a median tangible equity to tangible assets ratio of 10.11% with a high of 20.47% and a low of 6.13%. At December 31, 2009, the Bank had a tangible equity to tangible assets ratio of 10.53%. On a pro forma basis, at the midpoint, the Bank would have a tangible equity to tangible assets ratio of 16.93%.

4. Balance Sheet Mix At December 31, 2009, the Bank had a net loan to asset ratio of 53.78%. The median loan to asset ratio for the Comparables was 68.96%, ranging from a low of 38.96% to a high of 77.95%. On the liability side, the Bank's deposit to asset ratio was 73.12% at December 31, 2009 while the Comparable median was 66.83%, ranging from 45.58% to 71.45%. The Bank's borrowing to asset ratio of 15.94% is below the Comparable median of 23.12%.

5. Operating Strategy An institution's operating characteristics are important because they determine future performance. Operational strategy also affects expected rates of return and investors' general perception of the quality, risk and attractiveness of a given company. Specific operating characteristics include profitability, balance sheet growth, asset quality, capitalization and non-financial factors such as management strategies and lines of business.

6. Date of Conversion Recent conversions, those completed on or after March 2, 2009, were excluded since the earnings of a newly converted institution do not reflect the reinvestment of conversion proceeds. Additionally, new issues tend to trade at a discount to the market averages.

The following table represents key financial indicators for the Bank and the Comparable Group.

FIGURE 30 - KEY FINANCIAL INDICATORS

4. Market Value Determination

MARKET VALUE ADJUSTMENTS

The estimated pro forma market value of the Bank, along with certain adjustments to its value relative to market values for the Comparable Group are delineated in this section. The adjustments are made from potential investors' viewpoint and are adjustments necessary when comparing the Bank to the Comparable Group. The adjustment factors are subjectively assessed using the appraiser's knowledge and expertise and an aggregate adjustment is determined. Potential investors include depositors holding subscription rights and unrelated parties who may purchase stock in the community offering and who are assumed to be aware of all relevant and necessary facts as they pertain to the value of the Bank relative to other publicly traded thrift institutions and relative to alternative investment opportunities.

There are numerous criteria on which the market value adjustments are based. The major criteria utilized for purposes of this report include:

Adjustments Relative to the Comparable Group:

- Financial Condition
- Balance Sheet Growth
- Earnings Quality, Predictability and Growth
- Market Area
- Cash Dividends
- Liquidity of the Issue
- Recent Regulatory Matters

Adjustments for Other Factors:

- Management
- Subscription Interest
- Other than Temporary Impairment Charge

To ascertain the market value of the Bank, the median trading multiple values for the Comparable Group are utilized as the starting point. The adjustment, up or down, to the Comparable Group median multiple values is made based on the comparison of the Bank to the Comparable Group.

FINANCIAL CONDITION

The balance sheet strength of an institution is an important market value determinant, as the investment community considers such factors as cash liquidity, capitalization, asset composition, funding mix, intangible levels and interest rate risk in assessing the attractiveness of investing in the common stock of a thrift. The following figures summarize the key financial elements of the Bank measured against the Comparable Group.

FIGURE 31 - KEY BALANCE SHEET DATA

Sources: SNL and Offering Circular Data, FinPro Computations

Asset Size – The Bank’s assets, at \$1.2 billion, are moderately above the Comparable Group median of \$1.1 billion. At the pro forma midpoint of the offering range, the Bank is expected to have assets of \$1.3 billion.

Asset Composition - The Bank’s loans to assets ratio of 53.78% is below the Comparable Group median of 68.96%. The Bank has a higher level of securities as a percentage of assets.

Funding Mix – The Bank funds itself through deposits, 73.12% of assets, and borrowings, 15.94% of assets. The Comparable Group has a deposits to assets ratio of 66.83% and a borrowing to asset ratio of 23.12%.

Cash Liquidity - The cash liquidity of the Bank and the Comparable Group appear to be sufficient to meet funding requirements and regulatory guidelines.

Interest Rate Risk - The Bank's interest rate risk position is illustrated on page 18. The Bank's interest rate risk position is considered to be "Minimum Risk". The pro forma increase in capital is expected to reduce the institution's interest rate risk. No similar data is available for the Comparable Group.

Sources: SNL and Offering Circular Data, FinPro Computations

Capitalization - The Comparable Group's median tangible equity to tangible assets ratio of 10.11% is inline with the Bank's ratio of 10.53%. The Bank's pro forma equity to assets ratio is projected to be 16.93% at the midpoint of the valuation range.

The asset quality of an institution is an important determinant of market value. The investment community considers levels of nonperforming loans, Real Estate Owned (“REO”) and levels of Allowance for Loan and Lease Losses (“ALLL”) in assessing the attractiveness of investing in the common stock of an institution.

The Bank's NPA to asset ratio of 2.87% was above the Comparable Group NPA to asset ratio of 1.29%. The Bank's reserve level, 1.65% to total loans, is above the Comparable median of 1.21% of loans. The Bank's level of reserves to NPLs, at 35.73%, is below the Comparable Group median of 59.77%. The Bank's level of NPAs and NPLs increased substantially in the quarter ended December 31, 2009.

Positive	Neutral	Negative
Higher Pro forma Capital	Similar Capital	Higher NPLs and NPAs
Lower Borrowings to Assets		Lower ALLL to NPLs
Higher Deposits		Lower Loan to assets
Higher ALLL to Loans		

The Bank's asset mix is weaker than the Comparable Group's mix. The Bank has a higher level of deposits and lower level of borrowings as a percentage of assets relative to the Comparable Group. The Bank has similar tangible capital levels, but at the midpoint of the range will have higher tangible capital levels after the conversion. The higher pro forma capital levels will provide the ability for the Bank to grow earning assets. The Bank has a higher level of NPLs and NPAs and the increase came in the quarter ending December 31, 2009. The Bank has a higher level of reserves as a percentage of loans relative to the Comparable levels. The investment community is carefully scrutinizing asset quality. Taken collectively, a downward adjustment is warranted for financial condition.

BALANCE SHEET GROWTH

The Bank's assets, loans and deposits have all increased. Relative to the Comparable Group median, the Bank's asset, loan and deposit growth is significantly higher. The additional capital raised as part of the offering will provide the Bank with the opportunity to grow its balance sheet at a time when the industry is lacking capital.

Higher Asset, Loan and
Deposit Growth

An upward adjustment is warranted.

<p>EARNINGS QUALITY, PREDICTABILITY AND GROWTH</p>

The earnings quality, predictability and growth are critical components in the establishment of market values for thrifts. Thrift earnings are primarily a function of:

- net interest income
- loan loss provision
- non-interest income
- non-interest expense

The quality and predictability of earnings is dependent on both internal and external factors. Some internal factors include the mix of the balance sheet, the interest rate sensitivity of the balance sheet, the asset quality, and the infrastructure in place to deliver the assets and liabilities to the public. External factors include the competitive market for both assets and liabilities, the global interest rate scenario, local economic factors and regulatory issues.

Investors are focusing on earnings sustainability as interest rate volatility has caused a wide variation in income levels. With the intense competition for both assets and deposits, banks cannot easily replace lost spread and margin with balance sheet growth.

Each of these factors can influence the earnings of an institution, and each of these factors is volatile. Investors prefer stability and consistency. As such, solid, consistent earnings are preferred to high but risky earnings. Investors also prefer earnings to be diversified and not entirely dependent on interest income.

Net income trended downward between the twelve months ended December 31, 2005 and the twelve months ended December 31, 2009. The decline over this time period was primarily attributable to higher provision expenses. Net interest income and noninterest income increased between the twelve months ended December 31, 2008 and the twelve months ended December 31, 2009. This increase was offset by higher provision expense and higher noninterest expense for the same periods.

FIGURE 35 - NET INCOME CHART

Source: Offering Prospectus

The Bank's core ROAA and core ROAE are below the Comparable Group medians. The Bank's higher capitalization and benefit plan expenses following the offering are expected to reduce return on equity for the near term. On a pro forma basis at the midpoint of the range, the Bank's core ROAA and core ROAE are -0.19% and -1.08%, respectively.

Note: The cost of funds and the net interest spread medians are less reliable due to the lack of five data points.

The Bank has a 78 basis point disadvantage in net margin and 27 basis point disadvantage in noninterest income as a percentage of average assets relative to the Comparable Group. This disadvantage was partially offset by a 16 basis point advantage in noninterest expense as a percentage of average assets.

The Bank's efficiency ratio of 79.90% is above the Comparable median of 66.02%.

On a forward looking basis, after the conversion the Bank's operating expenses are expected to rise as a result of the stock benefit plans and additional costs of being a public company. At the same time, the Bank will have additional capital to deploy and leverage.

Positive	Neutral	Negative
Conversion Proceeds can be Leveraged to Generate Addition Earnings		Lower Core ROAA and Lower Core ROAE
Lower Noninterest Expense		Lower Noninterest Income Lower Margin

The Bank's profitability is below the Comparables on an ROAA and ROAE basis. The Bank's earnings composition is mixed compared to the Comparable Group as the Bank has a lower margin and lower noninterest income, but lower noninterest expense. The Bank's historical earnings have been trending downward. After the conversion, the Bank will have capital that can be leveraged to enhance future earnings. Taken collectively, a moderate downward adjustment is warranted for this factor.

MARKET AREA

The market area that an institution serves has a significant impact on value, as future success is interrelated with the economic, demographic and competitive aspects of the market. The location of an institution will have an impact on the trading value of an institution, as many analysts compare the pricing of institutions relative to a state or regional multiples in investor presentations.

The following figure compares the demographic and competitive data for the counties serviced by the Bank, to the county data of the Comparable Group members.

FIGURE 38 – MARKET AREA DATA

Sources: SNL Securities

The Bank’s population per branch in its market area is higher than the Comparable Group median as well as Pennsylvania, New Jersey and national statistics. Historical population growth was higher for the state and national figures as well as the Comparable median compared to the Bank’s market area’s population growth. Projected population growth for the Bank’s market area is projected to be below all other benchmarks. The Bank’s market area median household income was above the Comparable Group median and Pennsylvania State and national figures, but below the New Jersey State median. Household income in the Bank’s market area is projected to outpace household income growth of the Comparable Group median as well as the state and national figures. The Bank’s market area unemployment percentage was above all other benchmarks, primarily driven by the relatively high unemployment rate in the Philadelphia, Pennsylvania marketplace. Due to the various strengths and weaknesses of the Bank’s market area, no adjustment was given.

CASH DIVIDENDS

The industry has typically not disclosed dividend policies concurrent with conversion. Recently, a number of financial institutions have cut dividend rates in an effort to conserve capital.

All but one of the Comparable institutions had declared cash dividends. The median dividend payout ratio for the Comparable Group was 41.14%, ranging from a high of 263.16% to a low of 0.00%. The Bank, on a pro forma basis at the mid point of the value range will have a tangible equity to tangible assets ratio of 16.90%. The Bank will have adequate capital to pay cash dividends, but may not have sufficient earnings.

As such, no adjustment is warranted for this factor. The earning adjustment was made previously.

LIQUIDITY OF THE ISSUE

The Comparable Group is by definition composed only of companies that trade in the public markets with all of the Comparables trading on NASDAQ. Typically, the number of shares outstanding and the market capitalization provides an indication of how much liquidity there will be in a given stock. The actual liquidity can be measured by volume traded over a given period of time.

Sources: SNL and Offering Circular Data, FinPro Computations

The market capitalization values of the Comparable Group range from a low of \$54.8 million to a high of \$273.4 million with a median market capitalization of \$89.2 million. The Bank expects to have \$170.3 million of market capital at the midpoint on a pro forma basis. It is expected that the Bank will trade on NASDAQ along with all of the Comparables.

No adjustment for this factor appears warranted as both the Bank and the Comparables are expected to be liquidly traded.

RECENT REGULATORY MATTERS

Regulatory matters influence the market for thrift conversions. It is expected that industry regulation will increase as a result of the current crisis and there is a lack of clarity to the resulting regulatory framework. Both the Bank and the Comparable Group are expected to operate in substantially the same regulatory environment.

No adjustment for this factor is warranted as both the Bank and the Comparables will operate in the same ownership structure and will be supervised in the same regulatory environment.

5. Other Factors

MANAGEMENT

The current team has considerable banking experience and has held similar positions in other financial institutions. The Bank's organizational chart is reasonable for an institution of its size and complexity.

The Board is active and oversees and advises on all key strategic and policy decisions.

As such, no adjustment appears to be warranted for this factor.

SUBSCRIPTION INTEREST

There have been four second step conversions since January 1, 2008. The median price to tangible book value of these conversions was 73.1%. Northwest's price to pro forma tangible book value was above the others and is partially attributable to the size of the institution. Eagle completed its second step earlier this month at 81.2% of tangible book.

FIGURE 41 - SECOND STEP CONVERSIONS (SINCE 1/1/08) PRO FORMA DATA

VALUATION ADJUSTMENTS

Relative to the Comparables the following adjustments need to be made to the Bank's pro forma market value.

Valuation Factor	Valuation Adjustment
Financial Condition	Downward
Balance Sheet Growth	Upward
Earnings Quality, Predictability and Growth	Moderate Downward
Market Area	No Adjustment
Dividends	No Adjustment
Liquidity of the Issue	No Adjustment
Recent Regulatory Matters	No Adjustment

Additionally, the following adjustment should be made to the Bank's market value.

Valuation Factor	Valuation Adjustment
Management	No Adjustment
Subscription Interest	No Adjustment

6. Valuation

In applying the accepted valuation methodology promulgated by the regulators, i.e., the pro forma market value approach, three key pricing multiples were considered. The four multiples include:

Price to core earnings (“P/E”)

Price to book value (“P/B”) / Price to tangible book value (“P/TB”)

Price to assets (“P/A”)

All of the approaches were calculated on a pro forma basis including the effects of the conversion proceeds. All of the assumptions utilized are presented in Exhibit 11.

<p>DISCUSSION OF WEIGHT GIVEN TO VALUATION MULTIPLES</p>

To ascertain the pro forma estimated market value of the Bank, the market multiples for the Comparable Group were utilized. As a secondary check, all publicly traded thrifts and the recent and historical conversions were assessed. The multiples for the Comparable Group, all publicly traded thrifts are shown in Exhibit 9.

Price to Earnings – According to the Appraisal Guidelines: “When both the converting institution and the comparable companies are recording “normal” earnings. A P/E approach may be the simplest and most direct method of valuation. When earnings are low or negative, however, this approach may not be appropriate and the greater consideration should be given to the P/BV approach.” In this particular case, the Bank’s earnings are skewed by credit costs. As such, this approach was given limited consideration in this appraisal.

In the pro forma figures for the Bank, FinPro incorporated the impact of SFAS 123, which requires the expensing of stock options. In preparing the fully converted pro forma figures for the Comparable Group, FinPro also incorporated the impact of SFAS 123.

Price to Book/Price to Tangible Book - According to the Appraisal Guidelines: “The P/BV approach works best when the converting institution and the Comparables have a normal amount of book value. The P/BV approach could seriously understate the value of an institution that has almost no book value but has an outstanding future earnings potential. For converting institutions with high net worth, the appraiser may have difficulty in arriving at a pro forma market value because of pressure placed on the P/E multiple as higher P/BV levels are required to reflect a similar P/BV ratio as the peer group average. The P/BV approach also suffers from the use of historical cost accounting data.”

Since thrift earnings in general have had a high degree of volatility, the P/B is utilized frequently as the benchmark for market value. A better approach is the P/TB approach. In general, investors tend to price financial institutions on a tangible book basis, because it incorporates the P/B approach adjusted for intangibles. Initially following conversion, FinPro believes that thrifts often trade on a price to tangible book basis.

Price to Assets - According to the Appraisal Guidelines: “This approach remedies the problems of a small base that can occur with the P/BV approach, but the approach has many of the other limitations of the latter approach (the P/BV approach).” FinPro places little weight on this valuation approach due to the lack of consideration of asset and funding mixes and the resulting earnings impact.

FULL OFFERING VALUE IN RELATION TO COMPARABLES

Based upon the adjustments defined in the previous section, the Bank is pricing at the midpoint as a standard conversion is estimated to be \$171,181,280. Based upon a range below and above the midpoint value, the respective values are \$145,504,090 at the minimum and \$196,858,470 at the maximum respectively. At the super maximum of the range, the offering value would be \$226,387,240.

At the various levels of the estimated value range, the full offering would result in the following offering data:

FIGURE 43 - VALUE RANGE

Conclusion	Total Shares Shares	Price Per Share	Total Value
Appraised Value - Midpoint	17,118,128	\$ 10.00	\$ 171,181,280

VALUE AND STOCK PRICE**

FIGURE 50 – COMPARISON OF THE EXCHANGE VALUE PER MINORITY SHARE AND STOCK PRICE

Source: SNL data, FinPro Calculations

As Figure 50 demonstrates, the Bank’s stock price is currently between the minimum and the midpoint of the range.

VALUATION CONCLUSION

We believe that the discount on a tangible book basis at the midpoint is appropriate relative to the Comparable Group. The resulting pro forma multiples are inline with other pending offerings.

It is, therefore, FinPro's opinion that as of April 29, 2010, the estimated pro forma market value of the Bank in a full offering was \$171,181,280 at the midpoint of a range with a minimum of \$145,504,090 to a maximum of \$196,858,470 at 15% below and 15% above the midpoint of the range respectively. Assuming an adjusted maximum value of 15% above the maximum value, the adjusted maximum value or super maximum value in a full offering is \$226,387,240.

The document represents an initial valuation for the Bank. Due to the duration of time that passes between the time this document is compiled and the time the offering closes, numerous factors could lead FinPro to update or revise the appraised value of the Bank. Some factors that could lead FinPro to adjust the appraised value include: (1) changes in the Bank's operations and financial condition; (2) changes in the market valuation or financial condition of the Comparable Group; (3) changes in the broader market; and (4) changes in the market for thrift conversions. Should there be material changes to any of these factors, FinPro will prepare an appraisal update to appropriately adjust the value of the Bank. At the time of closing, FinPro will prepare a final appraisal to determine if the valuation range is still appropriate and determine the exact valuation amount appropriate for the Bank.

Exhibit 1.

Profile of FinPro and the Author

About the Firm . . .

- FinPro, Inc. was established in 1987 as a full service financial advisory and management consulting firm specializing in providing advisory services to the financial institutions industry. FinPro is not a transaction oriented firm. This approach uniquely positions FinPro as an objective third party willing to explore all strategic alternatives rather than focus solely on transaction oriented strategies. FinPro believes that a client deserves to be presented with all alternatives. Careful consideration is given to the associated benefits and drawbacks of each alternative so decisions can be made on the merits of these alternatives.
- FinPro principals are frequent speakers and presenters at financial institution trade association functions. FinPro teaches:
 - strategic planning and mergers and acquisitions at the Stonier School of Banking;
 - strategic planning to examiners from the Federal Deposit Insurance Corporation, Office of Thrift Supervision and several State Banking Departments;
 - various capital market and finance courses at the Graduate School of Bank Investments and Financial Management at the University of South Carolina; and
 - an online mergers and acquisitions course for the American Bankers Association.
- FinPro maintains a library of databases encompassing bank and thrift capital markets data, census data, branch deposit data, national peer data, market research data along with many other related topics. As such, FinPro can provide quick, current and precise analytical assessments based on timely data. In addition, FinPro's geographic mapping capabilities give it a unique capability to thematically illustrate multiple issues and to provide targeted marketing opportunities to its clients.

About the Author . . .

Dennis joined FinPro in June of 1996.

Dennis manages all of the firm's capital markets engagements including mergers and acquisitions, stock valuations and fairness opinions. Competitive analysis, strategic analysis and branch divestitures/acquisitions are other areas of expertise.

Dennis has worked on the appraisal of over \$3.0 billion in thrift conversion IPOs, the most notable being Roslyn Bancorp, Inc. and TFS Financial Corporation (MHC). He has also prepared expert witness testimony for litigation involving corporate appraisal methodology. In 2003, Dennis taught the American Bankers Association's Merger and Acquisition Course.

Prior to joining the firm, Dennis received broad-based experience in the securities industry. He worked as an Allocations Specialist for Merrill Lynch & Company, supporting their mortgage-backed securities trading desk in New York and for Sandler O'Neill & Partners.

Dennis graduated Magna Cum Laude from Babson College with a triple-major in Finance, Investments and Economics. He is a CFA Charterholder and a member of the New York Society of Security Analysts.

Dennis E. Gibney, CFA

Earnings Multiple			12

(1) Net income for the twelve months ended December 31, 2009.

(2) Net Return assumes a reinvestment rate of 1.66 percent (the 1 year Treasury at December 31, 2009), and a tax rate of 34%.

(3) Conversion expenses reflect estimated expenses as presented in the offering document.

(4) Includes Stock from ESOP and MRP.

(5) Assumes ESOP is amortized straight line over 15 years.

(6) Assumes MRP is amortized straight line over 5 years.

(7) Not applicable.

(8) Not Applicable.

(9) The amount to be offered to public.

Pro Forma Calculation

Calculation of Estimated Value (V) at Midpoint Value

$$\begin{aligned}
 3. \quad V &= \frac{P/E * Y}{1 - P/E * PCT * ((1 - X - E - M - F) * R - (1 - TAX) * E / T - (1 - TAX) * M / N)} = \$171,181,280 \\
 2. \quad V &= \frac{P/B * (B + Z)}{1 - P/B * PCT * (1 - X - E - M - F)} = \$171,181,280 \\
 1. \quad V &= \frac{P/A * A}{1 - P/A * PCT * (1 - X - E - M - F)} = \$171,181,280
 \end{aligned}$$

The appraisal was performed on a market basis and not on the above formulas.

* The totals for the per share data are actual figures rounded to two decimals. The component parts may not add to the total due to rounding.

- (1) ESOP Borrowings are deducted from net worth and assets, and amortized over 15 years.
- (2) MRP is omitted from net worth and assets, and amortized over 5 years.
- (3) Consists of ESOP and MRP amortization.
- (4) The ESOP loan is from the Holding Company and therefore, there are no costs.
- (5) Not applicable.
- (6) tax impacted at 34%.
- (7) ESOP and MRP are amortized over 15 and 5 years respectively, and tax impacted at 34%.
- (8) All EPS computations are done in accordance with SOP 93-6.
- (9) Not applicable.
- (10) Assumed option expense in accordance with SFAS No. 123.
