## Report of Independent Registered Public Accounting Firm

Plan Administrator of the Sandia Corporation  
Savings and Security Plan and the Sandia  
Corporation Investment Committee

We have audited the accompanying statements of net assets available for benefits of the Sandia Corporation Savings and Security Plan (the "Plan") as of December 31, 2009 and 2008, and the related statement of changes in net assets available for benefits for the year ended December 31, 2009. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Plan's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purposes of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan at December 31, 2009 and 2008 and the changes in its net assets available for benefits for the year ended December 31, 2009, in conformity with US generally accepted accounting principles.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The accompanying supplemental schedule of assets (held at end of year) as of December 31, 2009, is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedule is the responsibility of the Plan's management. The supplemental schedule has been subjected to the auditing procedures applied in our audits of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole.

# Sandia Corporation Savings and Security Plan

## Notes to Financial Statements

December 31, 2009

### 1. Description of Plan

#### General

The Sandia Corporation Savings and Security Plan (the Plan) was adopted June 1, 1993, as a defined contribution plan offered to all employees in a bargaining unit represented by a union of Sandia Corporation (the Corporation) who are eligible for the Sandia Corporation Pension Security Plan. The Corporation is a wholly owned subsidiary of Lockheed Martin Corporation (Lockheed Martin). A complete description of the Plan is contained in the Summary Plan Description that is provided to all participants. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The Plan generally transfers assets to the Sandia Corporation Savings and Income Plan as employees in a bargaining unit represented by a union transfer into a regular nonunion employment position with Sandia Corporation. Transfers of assets also occur from the Sandia Corporation Savings and Income Plan when an employee in a nonunion employment position transfers to a union position.

#### Contributions

Annually participants may contribute from 2% to 18% of their eligible earnings, as defined in the Plan Document, in 1% increments, on a pre-tax, Roth and after-tax basis. The total allotment of pre-tax, Roth and after-tax basic and supplemental contributions can not exceed the maximum amount permitted under the Internal Revenue Code.

In addition, the Corporation, each payroll, contributes  $66 \frac{2}{3}\%$  of the sum of each participant's pretax, Roth and after-tax basic contribution up to the first 6% of eligible earnings. The Plan allows for catch-up contributions for participants age 50 or older as permitted by the provisions of the Economic Growth and Tax Relief Reconciliation Act of 2001.

Office and Professional Employee's International Union (OPEIU) members hired on or after July 1, 2009 are eligible for Enhanced Contributions, which are contributions made by the Corporation in the amount of up to 6% of eligible earnings per pay period until 15 years of service and then up to 7% is contributed thereafter.

# Sandia Corporation Savings and Security Plan

## Notes to Financial Statements (continued)

December 31, 2009

### 1. Description of Plan (continued)

#### **Benefit Payments**

The Plan provides for the payment of benefits upon termination, death, disability, or retirement based on the balance in the participant's vested account. Lump-sum or annual payment elections may be made as provided for in the Plan Document. Hardship and in-service withdrawals are also permitted, if certain conditions are met, as outlined in the Summary Plan Description.

#### **Vesting**

All participants are immediately vested in their regular contributions, the Corporation match and actual earnings thereon. Enhanced Contributions are 100% vested after the completion of 3 years of vesting service.

#### **Investment Elections**

The assets of the Plan are held in the Sandia Corporation Master Savings Plan Trust ("Master Trust" or "Trust") along with the assets of the Sandia Corporation Savings and Income Plan. Participants may elect to have their contributions and the Corporation matching contributions invested in any of the current 22 available funds including 7 mutual funds, 12 commingled funds, a common/collective trust, an Interest Income Fund and the Company Common Stock Fund. The Company Common Stock Fund consists primarily of Lockheed Martin common stock.

Primarily as a result of the Master Trust's participation in certain commingled funds, Plan assets may be invested from time to time in derivative financial instruments. These financial instruments are generally used for liquidity purposes. The Master Trust's exposure to such securities is limited to its proportional interest in these commingled funds. At December 31, 2009 and 2008, the financial exposure related to derivative financial instruments of the Master Trust was not material.

#### **Participant Loans**

Participants may borrow from their accounts a minimum of \$1,000 up to a maximum of the lesser of \$50,000 less the highest loan balance in the past 12 months or 50% of their vested account balance. Loan terms range from one year to 56 months. The loans are secured by the balance in the participant's account and bear interest at the prime rate at the date of the loan. Principal and interest are paid ratably through payroll deductions. A maximum of two loans are permitted at one time.

# Sandia Corporation Savings and Security Plan

## Notes to Financial Statements (continued)

December 31, 2009

### 1. Description of Plan (continued)

#### Administrative Expenses

The Plan is administered by the Corporation. Fidelity Management Trust Company (Fidelity) serves as trustee, and Fidelity Investments Institutional Operations Company, Inc. serves as record-keeper.

The Corporation pays substantially all administrative expenses of the Plan, except for investment-related expenses, which are paid by the Plan.

#### Plan Termination

While it has not expressed any intent to do so, the Corporation may terminate the Plan at any time upon submission of written notice to the investment custodian, subject to the provisions of ERISA and any applicable collective bargaining agreements. In the event of the Plan's termination, participants will receive a payment equal to the total value of their accounts.

### 2. Significant Accounting Policies

#### Basis of Accounting

The financial statements are prepared on the accrual basis of accounting. Benefit payments are recorded when paid.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Plan invests in investment contracts through the Master Trust. The Statements of Net Assets Available for Benefits present the fair value of the interest in the Master Trust relating to fully benefit-responsive investment contracts as well as the adjustment of the interest in the Master Trust relating to fully benefit-responsive investment contracts from fair value to contract value. The Statement of Changes in Net Assets Available for Benefits is prepared on a contract value basis.

# Sandia Corporation Savings and Security Plan

## Notes to Financial Statements (continued)

December 31, 2009

### 2. Significant Accounting Policies (continued)

#### Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

#### Investment Valuation and Income Recognition

The Plan's interest in the Master Trust is stated at the fair value of the underlying net assets of the Master Trust, except for the Interest Income Fund (as described below). Investments by the Master Trust in shares of mutual funds, commingled funds, and common/collective trusts are stated at fair value. See Note 5 for discussion of fair value measurements.

The Master Trust is invested in certain synthetic guaranteed investment contracts (GICs) with insurance companies and other third parties through the Interest Income Fund. The investment manager of these investment contracts is Fidelity. Since the synthetic GICs are fully benefit-responsive, contract value is the most relevant measurement attribute for that portion of net assets available for benefits attributable to synthetic GICs. Contract value represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value. There are no reserves against the contract value for credit risk of the contract issuer or otherwise.

A synthetic GIC is a wrap contract paired with an underlying investment or investments, usually a portfolio, owned by the Master Trust, of high-quality, intermediate term fixed income securities. The Master Trust purchases wrapper contracts from certain financial services institutions. A synthetic GIC credits a stated interest rate for a specified period of time. Investment gains and losses are amortized over the expected duration through the calculation of the interest rate applicable to the Master Trust on a prospective basis. Synthetic GICs provide for a variable crediting rate and the issuer of the wrap contract provides assurance that future adjustments to the crediting rate can not result in a crediting rate less than zero. The crediting rate is primarily based on the current yield-to-maturity of the covered investments, plus or minus amortization of the difference between the market value and

# Sandia Corporation Savings and Security Plan

## Notes to Financial Statements (continued)

December 31, 2009

### 2. Significant Accounting Policies (continued)

contract value of the covered investments over the duration of the covered investments at the time of computation. The crediting rate is most impacted by the change in the annual effective yield to maturity of the underlying securities, but is also affected by the differential between the contract value and the market value of the covered investments. This difference is amortized over the duration of the covered investments. Depending on the change in duration from reset period to reset period, the magnitude of the impact to the crediting rate of the contract to market difference is heightened or lessened. The crediting rate is adjusted monthly.

Certain events limit the ability of the Plan to transact at contract value. Upon the occurrence of certain events, such as the Plan's failure to maintain its tax qualified status, market value of the investment in the GICs (if lower than its book value) may be repaid. No such events are currently known to have occurred, nor are any such events contemplated as probable by management of the Plan.

Under certain circumstances investment contracts may be terminated. Settlement upon termination will be at contract value unless the terms of the contract were not met or other events as described above trigger payment at market value.

The Master Trust owns the assets underlying the synthetic GICs, which consist primarily of U.S. government securities, corporate debt obligations, and mortgage-backed and other asset-backed securities. For purposes of calculating the fair value of the synthetic GICs, fair value is determined considering the fair value, representative of quoted market prices, of the underlying assets of the synthetic investment contract. The value of the wrapper contracts were not deemed material. The average yield earned on the synthetic GIC's was approximately 2.97% and 4.49% for the years ended December 31, 2009 and 2008, respectively. The average yield credited to participants' accounts was approximately 2.50% and 3.75% for the years ended December 31, 2009 and 2008, respectively.

The Master Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.

Purchases and shares of investments are recorded on a trade-date basis. Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis.

# Sandia Corporation Savings and Security Plan

## Notes to Financial Statements (continued)

December 31, 2009

### 3. Tax Status

The Internal Revenue Service has determined and informed the Corporation by letter dated April 7, 2009, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan administrator and the Plan's counsel believe that the Plan is designed and is currently being operated in compliance with the applicable provisions of the IRC.

### 4. Master Trust

The assets of the Plan are held in the Master Trust along with the assets of the Sandia Corporation Savings and Income Plan. The Plan's interest in the Master Trust's net assets is adjusted for certain plan-specific transactions, including contributions and benefit payments. The assets, realized and unrealized gains and losses, and investment income of the Master Trust are allocated to each plan based on the number of participant units outstanding at each month-end during the year for the Interest Income Fund and the Company Common Stock Fund, and on a pro rata basis for all other funds. The Plan's interest in the Master Trust's net assets as of December 31, 2009 and 2008 was approximately 2.7% and 2.8%, respectively.

The following table presents the fair value of investments of the Master Trust as of December 31, 2009 and 2008:

	<u>2009</u>	<u>2008</u>
Investments at fair value:		
Company Common Stock Fund	\$ 46,168,904	\$ 55,022,577
Mutual funds	897,400,571	713,193,452
Common/collective trusts	310,680,601	243,865,251
Commingled funds	214,030,440	110,967,834
Guaranteed investment contracts	464,284,830	480,054,047
Net assets at fair value	<u>1,932,565,346</u>	<u>1,603,103,161</u>
Adjustment from fair value to contract value relating to fully benefit-responsive investment contracts	<u>(9,403,049)</u>	<u>(1,959,613)</u>
Net assets	<u>\$ 1,923,162,297</u>	<u>\$ 1,601,143,548</u>

# Sandia Corporation Savings and Security Plan

## Notes to Financial Statements (continued)

December 31, 2009

### 4. Master Trust (continued)

The investment gain of the Master Trust for the year ended December 31, 2009, was as follows:

Net appreciation in fair value:

Company Common Stock Fund	\$ (4,480,239)
Mutual funds	195,978,952
Common/collective trusts	47,490,739
Commingled funds	41,455,087
	<hr/>
	280,444,539
Interest and dividend income	28,068,921
Total investment gain	<hr/> <u>\$ 308,513,460</u>

### 5. Fair Value Measurements

The accounting standard for fair value measurements defines fair value, establishes a market-based framework or hierarchy for measuring fair value, and expands disclosures about fair value measurements. The standard is applicable whenever assets and liabilities are measured and included in the financial statements at fair value.

The fair value hierarchy established in the standard prioritizes the inputs in valuation techniques into three levels as follows:

Level 1 – Observable inputs – quoted prices in active markets for identical assets and liabilities;

Level 2 – Observable inputs other than the quoted prices in active markets for identical assets and liabilities – includes quoted prices for similar instruments, quoted prices for identical or similar instruments in inactive markets, and amounts derived from valuation models where all significant inputs are observable in active markets; and

Level 3 – Unobservable inputs – includes amounts derived from valuation models where one or more significant inputs are unobservable and require us to develop relevant assumptions.

At December 31, 2009 and 2008, the Master Trust had no financial assets or liabilities that are categorized as Level 3. During 2009, the Master Trust had no financial assets or liabilities that were transferred in or out of the Level 3 category.

# Sandia Corporation Savings and Security Plan

## Notes to Financial Statements (continued)

December 31, 2009

### 5. Fair Value Measurements (continued)

The following is a description of the valuation methodologies used for assets measured at fair value:

*Mutual funds:* Valued at the net asset value of shares held by the Master Trust at year end reported on the active market on which the individual securities are traded.

*Common/collective trusts and commingled funds:* Valued at the net asset value of units/shares held by the Master Trust as the end of the year.

*Guaranteed investment contracts:* Individual assets of the synthetic GIC are valued at representative quoted market prices.

*Company Common Stock Fund:* The fair value of the fund is combined fair value of the underlying common stock and short-term cash position of the fund. The fair value of the common stock portion of the fund is based on the closing price of the common stock on its primary exchange. The short-term cash portion of the fund is recorded at cost, which approximates fair value.

The following table sets forth by level within the fair value hierarchy the Master Trust's investment assets at fair value as of December 31, 2009:

	Level 1	Level 2	Total
Mutual funds	\$897,400,571	\$ -	\$897,400,571
Common/collective trusts	-	310,680,601	310,680,601
Commingled funds	-	214,030,440	214,030,440
Guaranteed Investment contracts	-	464,284,830	464,284,830
Company Common Stock Fund	46,168,904	-	46,168,904
Total investment assets at fair value	\$943,569,475	\$988,995,871	\$1,932,565,346

# Sandia Corporation Savings and Security Plan

## Notes to Financial Statements (continued)

December 31, 2009

### 5. Fair Value Measurements (continued)

The following table sets forth by level within the fair value hierarchy the Master Trust's investment assets at fair value as of December 31, 2008:

	Level 1	Level 2	Total
Mutual funds	\$ 713,193,452	-	\$ 713,193,452
Common/collective trusts	-	243,865,251	243,865,251
Commingled funds	-	110,967,834	110,967,834
Guaranteed investment contracts	-	480,054,047	480,054,047
Company Common Stock Fund	55,022,577	-	55,022,577
Total investment assets at fair value	\$ 768,216,029	\$ 834,887,132	\$ 1,603,103,161

Participant loans represent an asset of the Plan and, therefore, are not included in the above summary of investment assets of the Master Trust. Participant loans totaled \$2,030,778 and \$2,034,171 as of December 31, 2009 and 2008, respectively. Participant loans are valued at amortized cost, which approximates fair value, and are considered to be Level 3 within the fair value hierarchy.

The table below sets forth a summary of changes in the fair value of the Plan's Level 3 assets for the year ended December 31, 2009:

Level 3 Assets	
Year ended December 31, 2009	
Participant Loans	
Balance, beginning of year	\$2,034,171
Realized gains/ (losses)	-
Unrealized gains/ (losses) relating to instruments still held at the reporting date	-
Purchases, sales, issuances and settlements (net)	<u>(3,393)</u>
Balance, end of year	<u><u>\$2,030,778</u></u>

## Sandia Corporation Savings and Security Plan

### Notes to Financial Statements (continued)

December 31, 2009

#### **5. Fair Value Measurements (continued)**

The valuation methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes the valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

#### **6. Parties-in-Interest Transactions**

The transactions between the following parties are considered to be party-in-interest transactions for which a statutory exemption from the prohibited transaction regulations exist:

The Master Trust invests in common stock of Lockheed Martin, which owns the Corporation. The Master Trust held 612,726 and 646,782 shares of Lockheed Martin common stock as of December 31, 2009 and 2008, respectively. Dividends earned by the Master Trust on Lockheed Martin common stock were \$1,484,576 for the year ended December 31, 2009.

The Recordkeeper, Fidelity Investments Institutional Operations Company, Inc., and the Trustee are related parties for which a statutory exemption exists. The total dollar amount of transactions paid from the Plan to the Trustee was \$15,401 for the year ended December 31, 2009.

In addition, participant loans are considered to be party-in-interest transactions for which a statutory exemption from the prohibited transaction regulation exists.
