# CHALLENGES & OPPORTUNITIES

BALDWIN TECHNOLOGY COMPANY, INC. | FISCAL 2010 REPORT TO SHAREHOLDERS AND FORM 10-K

## ABOUT BALDWIN

Baldwin has been a leading global supplier of process automation equipment for many years. Our leadership in the graphic arts marketplace is a direct result of our steadfast presence and our ability to listen to and respond to the critical needs of press manufacturers, commercial printers, newspaper publishers and packaging companies, all of whom use our equipment to add value to their businesses. Baldwin combines its broad range of technology and support solutions with those of key alliance partners to provide current and future customers with proven ways to increase the productivity and profitability of their printing operations. In fact, since the founding of our Company more than 90 years ago, we have always emphasized that "We Listen to Printers" and we encourage our customers more than ever to "Just Ask" Baldwin whenever they see an unmet need or opportunity to enhance print quality, reduce waste and lower pressroom VOCs.

## DEAR SHAREHOLDERS

The character of a company in demanding economic times is defined by its ability to anticipate challenges, act to avoid both known and unknown consequences and position itself to succeed in a changed environment. On October 1, the Board appointed me to the role of President and Chief Executive Officer, and with the continued support and commitment of the leadership team, I take on this challenge enthusiastically.

Your company began resetting its cost structure and adjusting its business model in the fall of 2008 when a combination of financial-world missteps expanded into a steep global recession that affected almost every industry. The contraction had a severe effect on demand for printed product and on our customer base—total-year orders and revenues for some of our major customers during this period declined by as much as 40%. In anticipation of the contraction, we acted quickly and consistently to reduce cost and investment.

During the 2009 and 2010 fiscal years, the Company eliminated over \$15 million (26%) of operating expenses, over \$20 million (42%) from accounts and notes receivable and \$11 million (34%) from inventory to establish a cost and capital structure that can continue to generate profits and cash flow in a smaller universe. Our margin improvement initiatives have enabled us to maintain reasonable margins in spite of the pressure on revenues. We also seized the opportunity to settle the long-outstanding patent infringement lawsuit with our German competitor and to acquire a company with new technology at attractive terms. As a result, in fiscal 2010 the Company reported \$5 million net income for the year, or \$.32 per share, and operating cash flow of \$11.5 million.

The patent infringement settlement provided \$9.6 million in cash which was used to repay \$7.7 million of the Company's term loan. As a result of that repayment and additional term loan payments from the Company's operating cash flow, total debt with the Company's banks was reduced to \$18.4 million from \$28 million at June 30, 2009. We added \$2.5 million of subordinated debt payable to the seller for the acquisition of the Nordson UV business. Thus, net debt decreased from \$14.2 million at June 30 last year to \$5.3 million at June 30, 2010.

In addition to the effects of the global recession, the graphic arts industry has undergone a level of secular retrenchment due to increased use of other media for advertisement. Karl Puehringer's guidance during this time brought the Company through that repositioning period, and we are ready to transition into the next phase of growth with new leadership.

We believe that printed communication is integral and complementary to other—traditional and new—media and will continue to be an essential and powerful component of the integrated communication mix. In the context of that challenge, we recognize that industry growth is an inadequate engine for Company growth. To supplement market share gains, the Company has been resourceful in identifying strategic growth opportunities in the graphic arts industry. We are extending our press cleaning offerings into the flexographic printing sector, which is predominant in the growing packaging sector of print and represents a new growth area using adaptations of the Company's proven superior cleaning capabilities. We anticipate successful results from two installations where our new flexo press cleaning products are undergoing production testing, with exciting growth prospects for future installations.

Our acquisition on June 30 of the UV drying business of Nordson Corporation accomplished two things: it brought a new technology to the Company's broad product portfolio, and it provided an entry for the Company into the fast-growing digital printing sector. As an ancillary benefit, because we acquired the company at attractive terms, we were able to record a \$3 million gain on the purchase. We have renamed the company Baldwin UV and have fully integrated it into the Baldwin group.

Baldwin UV designs, builds and installs systems and the related parts and UV (ultraviolet) lamps that cure inks designed to react upon exposure to the lamps. Printers and publishers use UV inks to provide special effects on a variety of substrates, such as glossy finish, highlights and special textures on the printed surface with little effect on the environment. The global Baldwin organization and our relationships with OEMs and printers and publishers around the world provide attractive package-selling opportunities for the UV products with the Baldwin traditional IR (infra-red) drying systems and other process improvement products. We are very excited about the attractive growth potential of this addition to the Baldwin line.

**TO SUPPLEMENT MARKET SHARE GAINS, THE COMPANY HAS BEEN RESOURCEFUL IN IDENTIFYING STRATEGIC GROWTH OPPORTUNITIES IN THE GRAPHIC ARTS INDUSTRY.**

Baldwin UV has also developed a LED curing system that is being prototype tested in the market. This system will provide instant curing of special inks with even less heat and far less energy consumption than conventional drying and UV curing systems. Both systems are used in the digital printing sector and have introduced Baldwin to digital press OEMs that were previously not in the Baldwin universe. We have high expectations for the products' contributions to Baldwin's revenues and profitability and look forward to developing additional opportunities with our new partners in the digital printing space.

Print has been forecast to grow at healthy levels in developing countries, albeit tempered by slower to negative growth in developed countries. Baldwin anticipated the healthier growth in emerging markets, and to capitalize on that demand, we started a subsidiary in India earlier this decade that is now making inroads in this market. In China, our assembly plant commenced operations in 2008 to supplement our sales and service locations there. With those operations as a base, we have worked closely with OEM press manufacturers in those countries to develop our COBRA line of spray dampening and cleaning products specific to their presses. We are also moving some of our product manufacturing to India and China to leverage lower production costs, as well as increasing the amount of product sourced from those countries to maintain and improve margins in an increasingly competitive market environment. We believe we are well-positioned with our global organization to move with the market as it develops, and we anticipate robust growth both from our local operations in those markets, as well as through the traditional OEMs who are also reporting increasing sales into those markets.

Our product portfolio mix of approximately 50% recurring revenues and the distribution of our customer base among OEMs and printers and publishers positions us to weather capital equipment cyclicalities. Our proprietary PREPAC® products form the core of that strategy, supplemented with revenues from service, parts and our Food Blends operations. The Baldwin UV business, with a similar ratio of recurring revenues, further strengthens the recurring revenues balance, and our new Clean-Pac™ products for hand cleaning and press cleaning are an extension using the patented PREPAC® technology. The Clean-Pac products have been well-received in the market and will make a modest additional contribution to recurring revenues.

The dynamics of the market over the past two years have challenged the Company's liquidity management. We have responded with working capital and cash management disciplines and have worked with our lenders to modify the Company's credit agreement to address our operating requirements in the current market conditions. We are confident that our current cash balances and the availability under the credit agreement will be adequate to support our current business plan. Discussions are underway to put into place a longer term lending agreement, as our current agreement expires in November, 2011.

Recent reports from the major printing press manufacturers and our recent order trends indicate that the lowest point on the demand curve may have been reached during the last few months. If demand increases from its current level, we should be able to deliver healthier operating income margins and net income by leveraging our lean cost structure, and thereby create added value for our shareholders.

Our employees have endured the pressure of the last two years with resilience and tenacity. They have made the personal and financial sacrifices to help the Company persevere and succeed during a very challenging time, and we understand and appreciate everything they do for the team. This Company is able to provide the superior market leading products and services to its customers and deliver value to its shareholders because of their efforts. We are grateful to them.

The market challenge has also brought our customers and vendors together with us to collaborate on delivering superior products within tight market constraints. We appreciate their willingness to partner with us to that end.

In closing, I want to emphasize that I am looking forward to working with our customers, investors, employees and suppliers in profitably leading Baldwin Technology in its next phase of growth.

Mark T. Becker  
*President and Chief Executive Officer*

October 1, 2010

## BALDWIN AT A GLANCE

★ Corporate Headquarters ● Manufacturing Locations ● Sales & Service Operations

### BALDWIN'S GLOBAL FOOTPRINT

The Company has operations in strategic geographic locations that enable it to monitor and participate in all important print markets. With our broad global footprint, we can introduce new products, or adapt existing ones, to meet the printing equipment and consumable requirements of specific local markets throughout the world.

# BALDWIN AWARD WINNERS

CUSTOMER SATISFACTION AWARD

INNOVATION AWARD

Innovation and Customer Satisfaction have been the corner stones of Baldwin's culture and strategic business plan for over 90 years. Through exceptional customer service/support and product innovation, we set a high standard when it comes to delivering service and quality products to our customers.

Baldwin has established an annual practice that recognizes and rewards its employees who demonstrate excellence in the areas of customer service and product innovation. Our Global Customer Satisfaction Award recognizes employee efforts in servicing internal/external customers and demonstrating an exceptional commitment to the Company's long standing objective of "Customer First." Our Global Innovation Award recognizes excellence in the development and/or improvement of Baldwin products that have been placed and accepted in the market and have improved quality and efficiency for our customers.

Matthias Knoch, Key Account Manager at Baldwin Germany GmbH, was awarded the Global Customer Satisfaction Award for his outstanding customer relations with KBA, the Company's largest customer, as well as his ongoing strategic internal partnerships with new developments such as the successful Combiliner eco and COBRA product lines. Matthias's function as the "daily voice" of customers within Baldwin Germany GmbH garnered A-supplier status for the Company. The Global Innovation Award was presented to the project team of Jorgen Gramh, Michael Ridell, Lars and Joacim Wellander from Baldwin Jimek, Samir Gupta from Baldwin India and Alfred Chan from Baldwin China for their work on the development and market introduction of the LithoSpray COBRA system that has been successfully placed and accepted in the marketplace and has resulted in the sales of several units in China and India, as well as attracting serious interest from other customers globally.

Congratulations to our Fiscal Year 2010 award recipients and all nominees for their accomplishments, hard work and contributions to the success of Baldwin!

CAUTIONARY STATEMENT — This Annual Report on Form 10-K may contain “forward-looking” statements as that term is defined in the Private Securities Litigation Reform Act of 1995 or by the Securities and Exchange Commission (“SEC”) in its rules, regulations and releases. Baldwin Technology Company, Inc. (the “Company”) cautions investors that any such forward-looking statements made by the Company are not guarantees of future performance and that actual results may differ materially from those in the forward-looking statements. Some of the factors that could cause actual results to differ materially from estimates contained in the Company’s forward-looking statements are set forth in Item 1A “Risk Factors” to this Annual Report on Form 10-K for the fiscal year ended June 30, 2010.

## PART I

### Item 1. *Business*

Baldwin Technology Company, Inc. (“Baldwin” or the “Company”) is a leading global supplier of process automation equipment for the printing and publishing industry. The Company offers its customers a broad range of products designed to enhance the product quality and the productivity and cost-efficiency of the print manufacturing process, while addressing safety issues and reducing the environmental impact from the printing process. Baldwin’s products include cleaning systems and related consumables, fluid management and ink control systems, web press protection systems, drying and curing systems, blending and packaging services, and related services and parts.

The Company sells its products both to printing press manufacturers who incorporate the Company’s products into their own printing press systems for sale to printers and publishers and directly to printers and publishers to upgrade the quality and capability of their existing and new printing presses. The Company does not consider its business to be seasonal. However, customer order patterns and delivery schedules could cause revenue in select periods to fluctuate. The Company has product development and production facilities, and sales and service operations, in strategic markets worldwide.

### **Industry Overview**

The Company defines its business as that of providing process automation equipment for the printing and publishing industry. The Company believes that, as an independent company, it produces one of the most complete lines of process automation products in the printing industry.

The Company’s products are used by printers engaged in all commercial and newspaper printing processes including lithography, flexography and digital printing. The largest share of its business is in offset (lithographic) printing. Offset printing is the largest segment of the domestic and international printing market and is used primarily for general commercial printing as well as printing books, magazines, business forms, catalogs, greeting cards, packaging and newspapers. The Company’s products are designed to improve the printing process in terms of quality, effect on the environment, safety, productivity and reduction of waste.

While offset printing represents the largest segment of the U.S. printing industry, it is also the dominant technology in the international printing market. The Company believes that the future growth of its products in international markets will be attributable in part to the increased use of its products in emerging markets. The Company has established operations in strategic geographic locations to take advantage of growth opportunities in those markets. Baldwin’s worldwide operations enable it to closely monitor market and new product developments in different printing markets and to introduce new products, or adapt existing ones, to meet the printing equipment requirements of specific local markets throughout the world.

### **Principal Products**

The Company produces and sells many different products and systems to printers and printing press manufacturers. Thus, its product development efforts are focused on the needs of printers and the printing press manufacturers. Typically, it takes a new product several years after its introduction to make a significant contribution to the Company’s net sales. As a product progresses through its life cycle, the percentage of sales to printing press manufacturers generally increases as the product’s acceptance by the printing industry increases and printers begin to specify certain of the Company’s products as part of the process automation equipment package selected when ordering new printing presses. Historically, the Company’s products have had a long life cycle as the Company continually upgrades and refines its product lines to meet customer needs and changes in printing press technology. Baldwin’s principal products are described below:

*Cleaning Systems.* The Company’s Cleaning Systems and related consumable products clean the rollers, cylinders and paper of a printing press and include the Press Washer, Automatic Blanket Cleaner, Newspaper Blanket Cleaner, Chill Roll Cleaner, Digital Plate Cleaner, Guide Roll Cleaner and Web Paper Cleaner, all of which reduce paper waste, volatile organic compound (“VOC”) emissions and press downtime, as well as improve

productivity, print quality and safety of operation for the press operator. In the fiscal years ended June 30, 2010, 2009 and 2008, net sales of Cleaning Systems represented approximately 52.7%, 49.6% and 50.8% of the Company's net sales, respectively.

*Fluid Management Systems.* The Company's Fluid Management Systems measure and control the supply, temperature, cleanliness, chemical balance and certain other characteristics of the fluids used in the printing process. Among the most important of these products are the Company's Refrigerated Circulators and Spray Dampening Systems. In the fiscal years ended June 30, 2010, 2009 and 2008, net sales of Fluid Management Systems represented approximately 17.0%, 19.0% and 18.9% of the Company's net sales, respectively.

*Other Process Automation Products, Parts, Services and Miscellaneous Products.* The Company's Web Press Protection Systems (web severers and web catchers), designed in response to the increasing number of web leads used in printing today's colorful newspapers as well as to the growing demand for high speed commercial web presses, provide an auto-arming electronic package offering high quality press protection in the event of a web break. The Company's Ink Control Systems regulate many aspects of the ink feed systems on a printing press. These products include Ink Agitators, Ink Mixers and Ink Level Systems, which reduce ink and paper waste. Other products include Ultraviolet and Infrared Dryers, Gluing Systems and service and parts. In addition, the Company provides customized dry ingredient blending and packaging services to the food industry and offers a variety of anti-offset spray powders to the graphic arts industry. In the fiscal years ended June 30, 2010, 2009 and 2008, net sales of Other Products represented approximately, 30.3%, 31.4% and 30.2% of the Company's net sales, respectively.

## Worldwide Operations

The Company believes that it is one of the few providers of process automation products for the printing and publishing industry that has product development, manufacturing and marketing capabilities in the Americas, Europe, Asia and Australia. The Company, as an international business, is subject to various changing competitive, economic, political, legal and social conditions. The Company currently has subsidiaries in 11 countries, and the results of operations may be adversely or positively affected by currency fluctuations. The results of the operations and financial positions of the Company's subsidiaries outside of the United States are reported in the relevant foreign currencies and then translated into U.S. dollars at the applicable exchange rates for inclusion in the Company's Consolidated Financial Statements. The exchange rates between the currencies and the U.S. dollar may fluctuate substantially. Because the Company generates a significant percentage of its revenues and operating expenses in currencies other than the U.S. dollar, fluctuations in the value of the U.S. dollar against other currencies may have a material effect on the Company's operating income. The Company's results and financial condition are particularly affected by changes in the value of the U.S. dollar in relation to the euro, Japanese yen and Swedish krona. Since the Company's foreign subsidiaries primarily manufacture, incur expenses and earn revenue in the local countries in which they operate, the impact of cross currency fluctuations is somewhat mitigated.

The following table sets forth the percentages of the Company's net sales attributable to its geographic regions for the fiscal years ended June 30, 2010, 2009 and 2008:

	<u>Years Ended June 30,</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
Americas . . . . .	22%	23%	21%
Europe . . . . .	47%	48%	53%
Asia/Australia . . . . .	<u>31%</u>	<u>29%</u>	<u>26%</u>
Total . . . . .	<u>100%</u>	<u>100%</u>	<u>100%</u>

In North, Central and South America, the Company operates through its U.S. subsidiaries and throughout Central and South America through dealers. In Europe, the Company operates through its subsidiaries in Germany, Sweden, France, England and the Netherlands. In Asia, the Company operates through its subsidiaries in India, Japan, China and Singapore. The Company also operates in Australia through its Australian subsidiary. All of the Company's subsidiaries are wholly owned except for two subsidiaries, one in which the Company holds a 90% interest, and another in which the Company holds an 80% interest.

## **Acquisition Strategy**

As part of its growth strategy, the Company investigates potential strategic acquisitions of companies and product lines in related business areas. This strategy involves: (i) acquiring entities that will strengthen the Company's position in the field of process automation equipment and related consumables for the printing and publishing industry and whose products can be sold through the Company's existing distribution network; (ii) acquiring entities allowing entry to new end-user market segments and extending existing markets; and (iii) acquiring companies which contribute new products to the Company and which can benefit from the Company's manufacturing and marketing expertise and financial support. Subsequent to an acquisition, the Company's intention would be to integrate the processes and controls of the acquired company with those of the Company with the objective of enhancing sales, productivity and operating results.

## **Marketing, Sales and Support**

*Marketing and Sales.* While the Company markets its products in most countries throughout the world, the product mix and distribution channels vary from country to country. The Company has approximately 95 employees devoted to marketing and sales activities in its three principal markets and more than 124 dealers, distributors and representatives worldwide. The Company markets its products throughout the world through these direct sales representatives, distributors and dealer networks to printing press manufacturers ("OEMs"), newspaper publishers, and commercial printers. For the fiscal year ended June 30, 2010, approximately 34% of the Company's net sales were to OEMs and approximately 66% were directly to printers.

*Support.* The Company is committed to after-sales service and support of its products throughout the world. Baldwin employs approximately 101 service technicians, who are complemented by product engineers, to provide field service for the Company's products on a global basis.

*Backlog.* The Company's backlog represents unfilled product orders which Baldwin has received from its customers under valid contracts or purchase orders. The Company's backlog was \$29,880,000, including \$4,365,000 associated with the acquisition of Nordson UV Ltd. and Horizon Lamps, Inc. ("Nordson UV"), as of June 30, 2010, \$38,693,000 as of June 30, 2009 and \$48,420,000 as of June 30, 2008.

*Customers.* For the fiscal year ended June 30, 2010, one customer accounted for more than 10% of the Company's net sales and trade accounts receivable. Koenig and Bauer Aktiengesellschaft ("KBA") accounted for approximately 14% of the Company's net sales and trade accounts receivable. The ten largest customers of Baldwin (including KBA) accounted for approximately, 39%, 48% and 46%, respectively, of the Company's net sales for the fiscal years ended June 30, 2010, 2009 and 2008. Sales of Baldwin's products are not considered seasonal.

## **Engineering and Development**

The Company believes its engineering and development, including research, efforts have been an important factor in establishing and maintaining its leadership position in the field of process automation equipment for the printing and publishing industry. Baldwin has devoted substantial efforts to adapt its products to almost all models and sizes of printing presses in use worldwide.

The Company's product development takes place at its centers of competence for commercial printing located in Germany and for newspaper printing located in Sweden. The Company believes that this approach to engineering and development has helped the Company to target the needs of its customers quicker and more precisely and coordinate the Company's product development activities. The Company's engineering and development organization focuses attention on opportunities within the respective markets, while avoiding duplicative efforts within the Company.

Baldwin employs approximately 101 persons whose primary function is new product development, application engineering or modification of existing products. The Company's total expenditures for engineering and development for the fiscal years ended June 30, 2010, 2009 and 2008 were approximately 8.9%, 8.4% and 7.9% of the Company's net sales in each such fiscal year, respectively.

## **Patents**

The Company owns a number of patents and patent applications relating to a substantial number of Baldwin's products; and patented products represent a significant portion of the Company's net sales for all periods presented. The Company's patents expire at different times during the next twenty years. The expiration of patents in the near future is not expected to have a material adverse effect on the Company's net sales. The Company has also relied upon and intends to continue to rely upon unpatented proprietary technology, including the proprietary engineering required to adapt its products to a wide range of models and sizes of printing presses. The Company believes its rights under, and interests in, its patents and patent applications, as well as its proprietary technology, are sufficient for its business as currently conducted.

## **Manufacturing**

The Company conducts its operations, primarily assembly and quality control, through a number of operating subsidiaries. In North America, the Company has facilities in Kansas, Illinois and Pennsylvania. In Europe, the Company has facilities in Germany, Sweden and the U.K. In Asia, Baldwin has facilities in India, Japan and China.

In general, materials required in the Company's business can be obtained from various sources in the quantities desired. The Company has no long-term supply contracts and does not consider itself dependent on any individual supplier. In addition, the Company uses various subcontractors to provide required services, but is not dependent on any individual subcontractor.

The nature of the Company's operations is such that there is little, if any, negative effect upon the environment, and the Company has not experienced any substantive problems in complying with environmental protection laws and regulations.

## **Competition**

Within the diverse market for process automation equipment for the printing and publishing industry, the Company produces and markets what it believes to be the most complete line of process automation equipment. Numerous companies, including vertically integrated printing press manufacturers, manufacture and sell products which compete with one or more of the Company's products. The printing press manufacturers generally have larger staffs and greater financial resources than the Company.

The Company competes by offering customers a broad, technologically advanced product line, combined with a well-known reputation for the reliability of its products and its commitment to service and after-sale support. The Company's ability to compete effectively in the future will depend upon the continued reliability of its products, its after-sale support, its ability to keep its market position with new proprietary technology and its ability to develop innovative new products which meet the changing demands of the printing and publishing industry.

## **Employees**

At June 30, 2010, the Company employed 592 persons (plus 78 temporary and part-time employees) of which 206 are production employees, 95 are marketing, sales and customer service employees, 202 are development, engineering and technical service employees and 89 are management and administrative employees. In Europe, some employees are represented by various unions under contracts with indefinite terms: in Sweden, approximately 71 of the Company's 88 employees are represented by the Ledarna (SALF), Metall, or Svenska Industritjänstemanna Forbundet unions. The Company considers relations with its employees and with its unions to be good.

## **Item 1A. Risk Factors**

Set forth below and elsewhere in this Annual Report on Form 10-K and in other documents that the Company files with the SEC are risks that should be considered in evaluating the Company's stock, as well as risks and uncertainties that could cause the actual future results of the Company to differ from those expressed or implied in the forward-looking statements contained in this Report and in other public statements the Company makes. Additionally, because of the following risks and uncertainties, as well as other variables affecting the Company's

operating results, the Company's past financial performance should not be considered an indicator of future performance.

## Company Risks

Intellectual property and proprietary technology are important to the continued success of the Company's business. Failure to protect or defend this proprietary technology may impair the Company's competitive position. The Company's success and ability to compete depend to a certain extent on the Company's innovative proprietary technology since that is one of the methods by which the Company persuades customers to buy its products, both present and future. The Company currently relies on copyright and trademark laws, trade secrets, confidentiality procedures, contractual provisions and patents to protect its innovative proprietary technologies. The Company may have to engage in litigation to protect patents and other intellectual property rights, or to determine the validity or scope of the proprietary rights claimed by others. This kind of litigation can be time-consuming and expensive, regardless of whether the Company wins or loses. Because it is important to the Company's success that the Company is able to prevent competitors from copying the Company's innovations, the Company will usually seek patent and trade secret protection for the Company's technologies. The process of seeking patent protection can be long and expensive and the Company cannot be certain that any currently pending or future applications will actually result in issued patents, or that, even if patents are issued, they will be of sufficient strength and scope to provide it with meaningful protection or commercial advantage. Further, others may develop technologies that are similar or superior to the Company's technology or design around the Company's patents. The Company also relies on trade secret protection for its technology, in part through confidentiality agreements with the Company's employees, consultants and third parties. These agreements may be breached, and if they are, depending upon the circumstance, the Company may not have adequate remedies. In any case, others may come to know about the Company's trade secrets in various ways. In addition, the laws of some countries in which the Company manufactures or sells products may not protect the Company's intellectual property rights to the same extent as the laws of the United States.

Despite the Company's efforts, intellectual property rights, particularly existing or future patents, may be invalidated, circumvented, challenged, rendered unenforceable or infringed or required to be licensed to others. Furthermore, others may develop technologies that are similar or superior to the Company's, duplicate or reverse engineer the Company's technology or design around patents owned or licensed by the Company. If the Company fails to protect its technology so that others may not use or copy it, the Company would be less able to differentiate its products and revenues could decline.

The Company's operating results are subject to fluctuations from period-to-period, which could cause it to miss expectations about these results and, consequently, could adversely affect the trading price of the Company's stock. The results of the Company's operations for any quarter are not necessarily indicative of results to be expected in future periods. The Company's operating results have in the past been, and will continue to be, subject to quarterly fluctuations as a result of factors such as the impact of continuing economic difficulties, increased competition in the printing equipment industry, the introduction and market acceptance of new and alternative printing and information distribution technologies and standards, changes in general economic conditions and changes in economic conditions specific to the Company's industry. Further, the Company's revenues may vary significantly from quarter to quarter as a result of, among other factors, the timing of shipments by customers, changes in demand and mix for the Company's products and consumables, and the timing of new product announcements and releases by the Company or its competitors. Finally, the operating results of the Company are dependent upon management's ability to control manufacturing costs as well as operating expenses in view of the Company's business environment.

The Company relies on subcontractors to help manufacture its products and if they are unable to adequately supply components and products, the Company may be unable to deliver products to customers on time or without defects. The Company employs a number of unaffiliated subcontractors to manufacture components for the Company's products. Because the Company relies on subcontractors, however, the Company cannot be sure that it will be able to maintain an adequate supply of components or products. Moreover, the Company cannot be sure that the components the Company purchases will satisfy the Company's quality standards and be delivered on time. The

Company's business could suffer if it fails to maintain its relationships with its subcontractors or fails to develop sufficient alternative sources for its purchased components.

*The Company's business is subject to risks as a result of its international operations.* A significant portion of the Company's business is conducted internationally. Accordingly, future results could be materially adversely affected by a variety of uncontrollable and changing factors including, among others, regulatory, political and economic conditions in a specific country or region, trade protection measures and other regulatory requirements, business and government spending patterns, and natural disasters. Because the Company generates revenues and expenses in various currencies, including the U.S. dollar, euro, Swedish krona and Japanese yen, the Company's financial results are subject to the effects of fluctuations of currency exchange rates. The Company cannot predict, however, when exchange rates or price controls or other restrictions on the conversion of foreign currencies could impact the Company's business. Any or all of these factors could have an adverse impact on the Company's business and results of operations.

*The Company's growth strategy may include alliances and/or licenses or acquisitions of technologies or businesses, which entail a number of risks.* As part of the Company's strategy to grow its business, the Company may pursue alliances and/or licenses of technologies from third parties or acquisitions of complementary product lines or companies, and such transactions could entail a number of risks. The Company may expend significant costs in investigating and pursuing such transactions, and such transactions may not be consummated. If such transactions are consummated, the Company may not be successful in integrating the acquired technology or business into the Company's existing business to achieve the desired synergies. Integrating acquired technologies or businesses may also require a substantial commitment of the Company's management's time and attention. The Company may expend significant funds to implement an alliance and/or acquire such technologies or businesses, and may incur unforeseen liabilities in connection with any alliance and/or acquisition of a technology or business. Any of the foregoing risks could result in an adverse effect on the Company's business, results of operations and financial conditions.

*The Company's ability to maintain its competitive position depends to a certain extent on the efforts and abilities of its senior management and the ability to attract highly skilled employees.* The Company's senior management possesses significant managerial, technical and other expertise in the printing industry. Their expertise would be difficult to quickly replace, and if the Company loses the services of one or more of its executive officers, or if one or more of them decided to join a competitor or otherwise compete directly or indirectly with the Company, the Company's business could be seriously harmed. In addition, the Company's ability to develop, market and sell its products and services and to maintain its competitive position depends on its ability to attract, retain and motivate highly skilled technical, sales and marketing and other personnel. If the Company fails to recruit these personnel, its ability to develop new products and provide service could suffer.

*Reliance on significant customers.* In fiscal 2010, the Company had one significant customer that individually accounted for 14% of net sales. The Company anticipates, but cannot assure, that this customer will continue to be significant in fiscal 2011. The loss of, or a significant decrease in sales to, this customer would have a material adverse effect on the Company's financial condition and results of operation. In addition, the Company's ten largest customers accounted for approximately 39% of the Company's net sales for the fiscal year ended June 30, 2010.

*Banking and financing relationships.* The Company's continued effective operating presence in the marketplace is dependent upon its financing arrangements with its banks. The Company cannot predict if those relationships will always be supportive.

## **Industry Risks**

*If the United States and other significant global economies remain in recession, the demand for the Company's products could remain lower and the Company's revenue may be materially adversely affected.* The demand for the Company's products is dependent upon various factors, many of which are beyond the Company's control. For example, general economic conditions may affect or delay expenditures for advertising and printing, which may in turn affect the overall capital spending by publishers and printers, particularly for capital equipment such as printing presses. If, as a result of general economic uncertainty or otherwise, companies reduce their capital spending levels,

such a decrease in spending could reduce demand for the Company's products and have a material adverse effect on the Company's business.

Since 2008, financial markets throughout the world have been experiencing disruption, including volatility in securities prices, diminished liquidity and credit availability, failure and potential failures of major financial institutions and unprecedented government support of financial institutions. These developments and the continuing economic downturn have and will adversely impact the Company's business and financial condition in a number of ways, including impacts beyond those typically associated with other recent downturns in the U.S. and foreign economies. As the slowdown continues, reduced capital spending by OEMs and end users has already adversely affected and may continue to adversely affect the Company's product sales. The impact from the slowdown could necessitate further testing for impairment of goodwill, other intangible assets, and long-lived assets and may negatively impact the valuation allowance with respect to the Company's deferred tax assets. In addition, cost reduction actions may be necessary which would lead to additional restructuring charges. As credit in financial markets tightens, the general economic downturn has adversely affected the ability of the Company's customers and suppliers to obtain financing for significant purchases. The tightening could result in a decrease in or cancellation of orders for the Company's products and services, could negatively impact the Company's ability to collect its accounts receivable on a timely basis, could result in additional reserves for uncollectible accounts receivable being required, and in the event of continued contraction in the Company's sales, could lead to dated inventory and require additional reserves for obsolescence.

*The Company may not be able to adequately respond to changes in technology affecting the printing industry.* The Company's continuing product development efforts have focused on refining and improving the performance of the Company's products as they relate to printing, and the Company anticipates that it will continue to focus its efforts in this area. The printing and publishing industry has been characterized in recent years by rapid and significant technological changes and frequent new product introductions. Current competitors or new market entrants could introduce new or enhanced products with new features or with features incorporating the Company's technologies which could render the Company's technologies obsolete or less marketable. The Company's future success will depend, in part, on the Company's ability to:

- use leading technologies effectively;
- continue to develop the Company's technical expertise and patented position;
- enhance the Company's current products and develop new products that meet changing customer needs;
- time new product introductions in a way that minimizes the impact of customers delaying purchases of existing products in anticipation of new product releases;
- adjust the prices of the Company's existing products to increase customer demand;
- successfully advertise and market the Company's products;
- influence and respond to emerging industry standards and other technological changes; and
- adjust products and services to accommodate substitution of non-traditional digital technologies for traditional print on paper.

The Company may not be successful in effectively using new technologies, developing new products or enhancing its existing products and technology on a timely basis. The Company's new technologies or enhancements may not achieve market acceptance. The Company's pursuit of new technologies may require substantial time and expense. The Company may need to license new technologies to respond to technological change. These licenses may not be available to the Company on terms that the Company can accept. Finally, the Company may not succeed in adapting the Company's products to new technologies as they emerge. Any of these factors, either individually or collectively, could have an adverse impact on the Company's business and results of operation.

## Investment Risks

Failure to achieve and maintain effective internal controls could adversely affect the Company's ability to report its financial condition and results of operations accurately or on a timely basis. As a result, current and potential stockholders could lose confidence in the Company's financial reporting, which could harm its business and the trading price of its stock. As required by Section 404 of the Sarbanes-Oxley Act of 2002, management is required to periodically evaluate the design and effectiveness of disclosure controls and procedures and assess the effectiveness of internal controls over financial reporting. Management has concluded that internal controls and procedures over financial reporting were effective as to design and effectiveness as of June 30, 2010. Management has further concluded that the identified and reported material weakness as of June 30, 2009 has been effectively remediated. Failure to maintain existing effective controls could have an adverse effect on the Company's business, operating results and stock price. For a more detailed discussion of the Company's disclosure controls and procedures and internal control over financial reporting, see Item 9A of this Annual Report on Form 10-K.

The Company's stock price has been and could continue to be volatile. The market price of the Company's stock has been subject to significant fluctuations. The securities markets have experienced, and are likely to experience in the future, significant price and volume fluctuations that could adversely affect the market price of the Company's stock without regard to the Company's operating performance. In addition, the trading price of the Company's stock could be subject to significant fluctuations in response to:

- actual or anticipated variations in the Company's quarterly operating results;
- significant announcements by industry participants;
- changes in national or regional economic conditions;
- changes in securities analysts' estimates for the Company, the Company's competitors or the Company's industry, or the Company's failure to meet analysts' expectations; and
- general market conditions.

These factors may materially and adversely affect the Company's stock price, regardless of the Company's operating performance.

## Risks associated with indebtedness

The Company has indebtedness. As of June 30, 2010, the Company's total indebtedness was \$20,980,000 including \$13,933,000 under its secured credit facility. Borrowings under the Company's Credit Agreement are secured by the assets of the Company. Under the terms of the Credit Agreement, the Company is required to satisfy certain financial covenants. At June 30, 2010, the Company was in compliance with the financial covenants contained in its Credit Agreement pursuant to the terms of the Waiver and Amendment No. 7 to the Credit Agreement dated June 9, 2010.

On September 28, 2010, the Company entered into Amendment #8 to the Credit Agreement (the "Amendment #8") with Bank of America. The terms of the Amendment #8 provide covenants through the term of the Credit Agreement. The Company expects to be in compliance with the covenants in the Amendment #8, but a decline in the Company's financial performance could have a material adverse effect on the Company, including the Company's ability to retain its existing financing or obtain additional financing; or any such financing may not be available on terms favorable to the Company. The Company's ability to make expected repayments of borrowings under its Credit Agreement and to meet its other debt or contractual obligations (including compliance with applicable financial covenants) will depend upon the Company's future performance and its cash flows from operations, both of which are subject to prevailing economic conditions and financial, business, and other known and unknown risks and uncertainties, certain of which are beyond the Company's control.

The Company's Credit Facility matures November 21, 2011, and the Company may be unable to renew or replace this financing. The Company has significantly reduced the carrying value of its Credit Facility and is, and has been, in compliance with all debt covenants, as amended. The Company has begun preliminary discussions

regarding renewal of its Credit Facility and anticipates finalizing a renewal or replacement Credit Agreement although there are no assurances that such agreement will be completed by the loan maturity date.

**Item 1B. *Unresolved Staff Comments***

None

**Item 2. *Properties* —**

The Company owns and leases various manufacturing and office facilities aggregating approximately 491,000 square feet at June 30, 2010. The table below presents the locations and ownership of these facilities: (in thousands)

	<u>Square Feet Owned</u>	<u>Square Feet Leased</u>	<u>Total Square Feet</u>
United States .....	0	179	179
Germany .....	0	144	144
Sweden .....	13	53	66
Japan .....	0	24	24
All other, foreign .....	<u>0</u>	<u>78</u>	<u>78</u>
Total square feet owned and leased .....	<u>13</u>	<u>478</u>	<u>491</u>

The Company believes that its facilities are adequate to carry on its business as currently conducted.

**Item 3. *Legal Proceedings***

Baldwin is involved from time to time in various legal proceedings, including actions with respect to commercial, intellectual property and employment matters. The Company believes that it has meritorious defenses against the claims currently asserted against it and intends to defend them vigorously. However, the outcome of litigation is inherently uncertain, and the Company cannot be sure that it will prevail in any of the cases currently in litigation. The Company believes that the ultimate outcome of any such cases will not have a material adverse effect on its results of operations, financial position or cash flows; however, there can be no assurances that an adverse determination would not have a material adverse effect on the Company.

Additionally, information regarding legal proceedings is included in the Notes to Consolidated Financial Statements (see Note 19) and is incorporated herein by reference.

**Item 4. *Reserved***

## PART II

### Item 5. *Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*

#### Price Range of Class A Common Stock

The Company's Class A Common Stock was traded on the American Stock Exchange ("AMEX") until October 1, 2008, when the AMEX was acquired by the NYSE Euronext. Since October 1, 2008, the Company's Class A Common Stock has been traded on the New York Stock Exchange ("NYSE Amex") under the symbol "BLD". The following chart sets forth, for the calendar year periods indicated, the range of closing prices for the Company's Class A Common Stock on the consolidated market, as reported by the AMEX during the period prior to October 1, 2008, and as reported by the NYSE Amex since October 1, 2008.

	<u>High</u>	<u>Low</u>
<b>2008 (calendar year)</b>		
First Quarter . . . . .	\$4.70	\$2.18
Second Quarter . . . . .	\$3.19	\$2.24
Third Quarter . . . . .	\$3.21	\$2.19
Fourth Quarter . . . . .	\$2.54	\$1.57
<b>2009 (calendar year)</b>		
First Quarter . . . . .	\$1.80	\$0.73
Second Quarter . . . . .	\$1.31	\$0.87
Third Quarter . . . . .	\$1.63	\$0.96
Fourth Quarter . . . . .	\$2.00	\$1.15
<b>2010 (calendar year)</b>		
First Quarter . . . . .	\$1.38	\$1.02
Second Quarter . . . . .	\$1.57	\$1.17
Third Quarter (through September 10, 2010) . . . . .	\$1.38	\$1.14

#### Class B Common Stock

The Company's Class B Common Stock has no established public trading market. However, Class B shares are convertible, one-for-one, into Class A shares, upon demand. During the fiscal year ended June 30, 2010, one holder of the Company's Class B Common Stock converted 50,000 shares into shares of the Company's Class A Common Stock.

#### Approximate Number of Equity Security Holders

As of September 10, 2010, the number of record holders of the Company's Class A and Class B Common Stock totaled 217 and 17, respectively. The Company believes, however, that there are approximately 1,500 beneficial owners of its Class A Common Stock.

**Dividends**

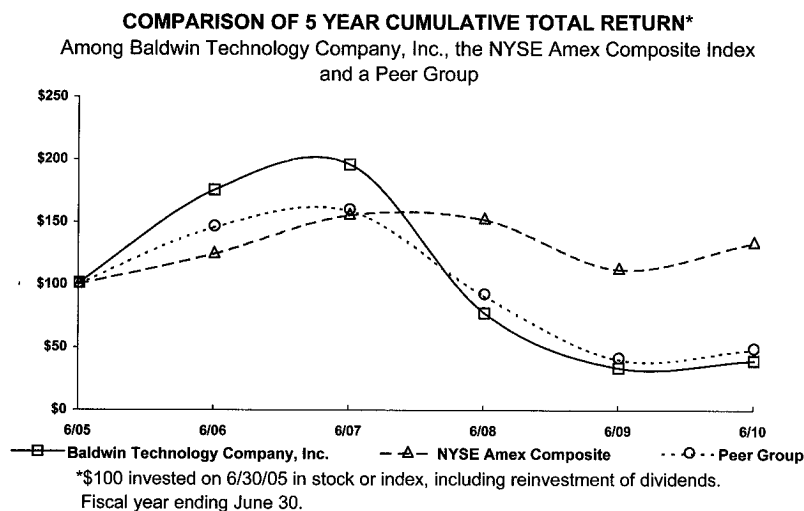

Declarations of dividends depend upon the earnings and financial position of the Company and are within the discretion of the Company's Board of Directors. However, the Company's Credit Agreement prohibits the payment of dividends. Under the Company's Certificate of Incorporation, no dividend in cash or property also permitted to be declared or paid on shares of the Company's Class B Common Stock unless simultaneously therewith there is declared or paid, as the case may be, a dividend in cash or property on shares of Class A Common Stock of at least 105% of the dividend on the shares of Class B Common Stock (see Note 10 to the Consolidated Financial Statements).

**Purchases of Equity Securities by Issuer and Affiliated Purchasers**

There was no activity under the Company's stock repurchase program during the quarter ended June 30, 2010.

## Performance Graph

The following Performance Graph compares the Company's cumulative total stockholder return on its Class A Common Stock for the five fiscal years ended June 30, 2010 with the cumulative total return of the NYSE Amex Composite Index, and a peer group composed of publicly traded companies (customers and competitors) in the printing equipment business. The companies included in the peer group are: Baldwin Technology Company, Inc., Heidelberger Druckmaschinen, Koenig & Bauer AG, Komori Corporation, Presstek, Inc. and technotrans AG (the currencies of all foreign listed companies were converted to USD for the time periods indicated). The comparison assumes \$100 was invested on June 30, 2005 in the Company's Class A Common Stock and in each of the foregoing indices and assumes reinvestment of all dividends. Total stockholder return is calculated using the closing price of the stock on the last trade date of each fiscal year. The stock price performance shown is not intended to forecast or be indicative of the possible future performance of the Company's Class A Common Stock.

## Unregistered Sales of Equity Securities

On July 8, 2010, the Company entered into an advisory agreement (the "Advisory Agreement") with OBX Partners LLC ("OBX"), a Florida limited liability company, under which OBX will act as a financial advisor and strategic consultant to the Ad Hoc Advisory Committee of the Board of Directors of the Company. As part of the consideration for the services to be rendered pursuant to the Advisory Agreement, the Company granted to OBX an option (the "Option") to purchase 300,000 shares of the Company's Class A Common Stock (the "Shares") at an exercise price per share of \$1.26, exercisable on or after October 1, 2011. The Option will terminate on November 16, 2010 if OBX has not substantially completed the engagement; if not previously terminated, the Option will terminate on September 30, 2020. Neither the Option nor the Shares to be issued upon exercise of the Option have been registered under the Securities Act of 1933 in reliance upon the exemption from registration afforded by Section 4(2) of the Securities Act of 1933, as amended.

## Item 6. Selected Financial Data

(amounts in thousands except per share data)

The Company's statement of operations and balance sheet data have been derived from the Company's audited, Consolidated Financial Statements (including the Consolidated Balance Sheets of the Company at June 30, 2010 and 2009 and the related Consolidated Statements of Operations of the Company for the fiscal years ended June 30, 2010, 2009 and 2008 appearing elsewhere herein). Certain transactions have affected comparability: Fiscal year 2010 results continued to be negatively affected by the impact of the ongoing global economic downturn on the printing and publishing marketplace and tightening in credit markets. As a result, during the fourth quarter of fiscal year ended June 30, 2010 the Company recorded a restructuring charge of \$540. In addition, during the fourth quarter of the fiscal year ended June 30, 2010, the Company concluded the acquisition of Nordson UV. The acquisition resulted in a gain of \$2,960, and the acquired company is included in the financial statements from the date of acquisition. During the first quarter of the fiscal year ended June 30, 2010, the Company received \$9,600 in

cash and recorded a gain on the settlement of a long standing patent infringement lawsuit of \$9,266 and incurred \$911 of costs related to an investigation of violations of the Company's internal control policies and procedures and \$1,183 of costs associated with an amendment to its credit facility. During the fiscal year ended June 30, 2009, as the global economic climate continued to deteriorate and the market for printing equipment faced significant challenges, the Company implemented cost reduction and restructuring programs and recorded \$4,747 of charges associated with the restructuring. In addition, during the third quarter of fiscal year 2009, the Company recorded a goodwill impairment charge of \$5,658 and additional inventory and accounts receivable reserves totaling \$4,715. During the fiscal year ended June 30, 2008, the Company released approximately \$1,640 of the valuation allowance for net deferred tax assets associated with its U.S. operations. In addition, fiscal year ended June 30, 2008 reflects a full year of ownership of both the Oxy-Dry group of companies ("Oxy-Dry") and Hildebrand Systeme GmbH ("Hildebrand"). During the fiscal year ended June 30, 2007, the Company acquired Oxy-Dry and Hildebrand. The results of the acquired companies are included in the financial statements from the dates of acquisition. Also, during fiscal year 2007, the Company released approximately \$2,500 of the valuation allowance for net deferred tax assets associated with its U.S. operations.

The following information should be read in conjunction with the aforementioned financial statements and with "Management's Discussion and Analysis of Financial Condition and Results of Operations."

**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**

(amounts in thousands except share and per share data)

*General.* The following is management's discussion and analysis of certain factors which have affected the Consolidated Financial Statements of Baldwin Technology Company, Inc. ("Baldwin" or the "Company").

**Forward-looking Statements**

Except for the historical information contained herein, the following statements and certain other statements contained herein are based on current expectations. Similarly, the press releases issued by the Company and other public statements made by the Company from time to time may contain language that is forward-looking. These forward-looking statements may be identified by the use of forward-looking words or phrases such as "forecast," "believe," "expect," "intend," "anticipate," "should," "plan," "estimate," and "potential," among others. Such statements are forward-looking statements that involve a number of risks and uncertainties. The Company cautions investors that any such forward-looking statements made by the Company are not guarantees of future performance and that actual results may differ materially from those in the forward-looking statements. Some of the factors that could cause actual results to differ materially include, but are not limited to the following: (i) the ability to comply with requirements of credit agreements; the availability of funding under such agreements; the ability to maintain adequate liquidity in declining and challenging economic conditions impacting the Company as well as customers, (ii) general economic conditions in the U.S. and other foreign locations, (iii) the ability to obtain, maintain and defend challenges against valid patent protection of certain technology, primarily as it relates to the Company's cleaning systems, (iv) material changes in foreign currency exchange rates versus the U.S. Dollar, (v) changes in the mix of products and services comprising revenues, (vi) a decline in the rate of growth of the installed base of printing press units and the timing of new press orders, (vii) the ultimate realization of certain trade receivables and the status of ongoing business levels with the Company's large OEM customers, and (viii) competitive market influences. Additional factors are set forth in Item 1A "Risk Factors" in this Annual Report on Form 10-K for the fiscal year ended June 30, 2010, which should be read in conjunction herewith.

**Critical Accounting Policies and Estimates**

Baldwin's discussion and analysis of its financial condition and results of operations are based on the Company's Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires Baldwin to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. Baldwin continually evaluates its estimates, including those related to bad debts, inventories, investments, asset impairments, intangible assets, income taxes, warranty obligations, pensions and other post-retirement benefits, contingencies and litigation. Baldwin bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

The following critical accounting policies affect the more significant judgments and estimates used in the preparation of the Company's Consolidated Financial Statements.

Revenue Recognition. The Company's products are sold with terms and conditions that vary depending on the nature of the product sold and the cultural and business environments in which the Company operates.

The Company recognizes revenue based on the type of product sold and the obligations under the contract. Revenue is recognized on contracts for design, manufacture and delivery of equipment without installation (equipment sales) and parts, service and consumables at the time of transfer of title or rendering of services. The Company considers revenue realized on equipment sales when it has persuasive evidence of an arrangement, delivery has occurred, the sales price is fixed or determinable and collectability is reasonably assured. In contracts that include additional services, including installation, start-up and/or commissioning (system sales), the Company recognizes revenue on each element of the contract as appropriate. Installation services are provided to the customer on an as-needed basis and may be contracted for separately or included in the same contract as the equipment sale. Revenue is recognized for installation services at the completion of the contractually required services.

Contracts for system sales may include multiple-element revenue arrangements. When the Company enters into multiple-element revenue arrangements, which may include installation services as a contractual element, along with the purchase price of the product as a contractual element, the arrangement is separated into its stand-alone elements for revenue recognition purposes. When the delivered item has value to the customer on a stand alone basis, there is objective and reliable evidence of the fair value of the undelivered item and the arrangement does not include a general right of return, revenue is recognized on each element as separate units of accounting. If these criteria are not met, the arrangement is accounted for as one unit of accounting which would result in revenue being deferred until the last undelivered contractual element is fulfilled.

Standard payment terms may include a deposit to be received with the customer order, progress payments until equipment is shipped and a portion of the balance due within a set number of days following shipment. In those cases when the Company renders invoices prior to performance of the service, the Company records deferred revenue until completion of the services, whereupon revenue is fully recognized.

Freight terms are generally FOB shipping dock with risk of loss passing to the purchaser at the time of shipment. If a loss should occur in transit, the Company is not responsible for and does not administer insurance claims unless the terms are FOB destination or special terms and conditions of the sale require the Company to administer such insurance claims. The customer is not contractually eligible for any refund of the purchase price or right of return of the contracted product, unless the product fails to meet published product specifications and the Company fails to perform its obligations under product warranty terms.

The terms of sale are generally recited in purchase orders, which may contain formal product acceptance clauses. Occasionally, clauses may be included in a contract or purchase order that require acceptance related to certain specifications as outlined in the contract or purchase order. In these instances, the nature of the acceptance is evaluated to ensure that the Company has met the applicable criteria concurrent with the shipment of equipment to the customer to ensure that revenue recognition is appropriate in the circumstances.

The Company sometimes uses distributors to assist in the sales function. In these cases, the Company does not recognize revenue until title for the equipment and risk of loss have passed to the ultimate customer, who then becomes obligated to pay with no right of return. In addition, the Company reviews all alliance agreements to determine whether revenue should be recognized on a gross or net basis and recognizes revenue as appropriate.

Baldwin maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of Baldwin's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances could be required.

Baldwin provides for the estimated cost of product warranties at the time revenue is recognized. While Baldwin engages in extensive product quality programs and processes, including actively monitoring and evaluating the quality of its component suppliers, Baldwin's warranty obligation is affected by product failure rates, material usage and service delivery costs incurred in correcting a product failure. Should actual product failure

rates, material usage or service delivery costs differ from Baldwin's estimates, revisions to the estimated warranty liability would be required.

Baldwin provides reserves for estimated obsolescence in inventory or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. If actual market conditions are less favorable than those projected by management, additional inventory reserves may be required. Due to the continued deteriorating macro-economic environment, a decision to transfer equipment manufacturing from the U.S. to Germany, general restructuring of the U.S. operations and the inability of the U.S. operation to reach target goals for inventory utilization, the Company recorded a \$4,250 additional reserve for obsolescence during the third quarter of fiscal year 2009 for its U.S. inventories.

Baldwin records a valuation allowance to reduce its net deferred tax assets to the amount that is more likely than not to be realized. Baldwin has considered future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance. In the event Baldwin were to determine that it would be able to realize its deferred tax assets in the future in excess of the net recorded amount, an adjustment to the deferred tax asset valuation allowance would increase income in the period such determination is made. Likewise, should Baldwin determine that it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax asset valuation allowance would be recorded through a charge to income in the period such determination is made. Deferred tax assets and liabilities are determined using statutory tax rates for temporary differences between book and tax bases of assets and liabilities, as well as the effects of net operating losses carried forward in certain tax jurisdictions in which the Company operates that may be utilized to offset future taxable income and similar tax credits carried forward that may be utilized to reduce future taxes payable. The Company records valuation allowances on deferred tax assets when appropriate to reflect the expected future tax benefits to be realized. In determining the appropriate valuation allowances, certain judgments are made by management relating to recoverability of deferred tax assets, use of tax loss and tax credit carryforwards, levels of expected future taxable income and available tax planning strategies. The assumptions in making these judgments are updated periodically by management based on overall economic conditions and current business conditions that affect the Company. These management judgments are therefore subject to change based on factors that include, but are not limited to (1) changes in the profitability of the Company's subsidiaries as well as for the Company as a whole, (2) the ability of the Company to successfully execute its tax planning strategies, and (3) the accuracy of the Company's estimate of the potential effect that changes in tax legislation in the jurisdictions where the Company operates may have on the Company's future taxable profits. Failure by the Company to achieve forecasted taxable income or to execute its tax planning strategies may affect the ultimate realization of certain deferred tax assets. Factors that may affect the Company's ability to achieve sufficient forecasted taxable income or successfully execute its tax planning strategies include, but are not limited to, increased competition, general economic conditions, a decline in sales or earnings, loss of market share, delays in product availability and changes in tax legislation.

The Company tests goodwill for impairment at the reporting unit level at least annually in May of each fiscal year. The Company has identified seven reporting units in accordance with ASC 350-20-35 as the lowest level of an entity that is a business, that can be distinguished from other activities, operations, and assets of the entity and for which discrete financial information is available and regularly reviewed by management.

The fair value of each reporting unit is determined utilizing an equal weighting of a combination of income and market approaches of the reporting unit and comparing the fair value with its recorded book value. The income approach applies a discounted cash flow methodology to the Company's future period projections, and a market approach compares the Company's multiples of revenues and earnings with those of comparable companies. The Company considers the combination of valuation techniques, which utilizes internal analysis and external valuations and utilizes both income and market approach to determine fair value, provides a better estimate of the fair value of the reporting unit as opposed to reliance on one valuation technique. Significant estimates and assumptions are inherent in the valuations that reflect a consideration of other marketplace participants, the amount and timing of future cash flows (including expected growth rates and profitability) and the discount rate applied to cash flows. Unanticipated market or macroeconomic events or circumstances may occur that could affect the accuracy or validity of the estimates and assumptions used in the determination of fair value. A significant reduction

in the estimated fair values could result in impairment charges that could materially affect financial statements in any given year.

If, during the annual impairment review, the book value of the reporting unit exceeds the fair value, the implied fair value of the reporting unit's goodwill would be compared with the carrying amount of the unit's goodwill. If the carrying amount exceeds the implied fair value, goodwill is written down to its implied fair value. ASC 350 requires management to estimate the fair value of each reporting unit, as well as the fair value of the assets and liabilities of each reporting unit, other than goodwill. The implied fair value of goodwill is determined as the difference between the fair value of a reporting unit, taken as a whole, and the fair value of the assets and liabilities of such reporting unit.

At June 30, 2010 the annual impairment test for goodwill indicated that all reporting unit fair values exceeded their respective recorded values. However, the estimated fair value of the German reporting unit which exceeded carrying value by approximately 20% has been disproportionately impacted by the economic downturn. The current valuation has the reporting unit returning to sales and earnings more consistent with long term business plans, failure to achieve the plans, further or continued deterioration of macro economic conditions could result in a valuation that could trigger impairment of goodwill. The amount of goodwill at the German reporting unit is approximately \$13 million.

During fiscal year ended June 30, 2009 as a result of the deteriorating macro-economic environment, the continued market volatility and the Company's decreased market capitalization, the Company assessed the recoverability of its goodwill carrying value as required. A two-step process was used to test goodwill impairment. The first step was to determine if there was an indication of impairment by comparing the estimated fair value of each reporting unit to its carrying value including goodwill. Goodwill is considered impaired if the carrying value of a reporting unit exceeds the estimated fair value. Upon indication of impairment, a second step would be performed to determine the amount of the impairment by comparing the implied fair value of the reporting unit's goodwill with its carrying value.

As a result of the assessment, and the impact of the deteriorating economic and market conditions that led to a reduced demand for the Company's products supplied by its Japan reporting unit, the Company recorded a non-cash goodwill impairment charge of \$5,658 related to its Japan reporting unit during the third quarter of fiscal year 2009.

*Other long-lived assets are reviewed for impairment* whenever events or circumstances indicate that the carrying amount of an asset may not be recoverable. Events which could trigger an impairment review include, among others, a decrease in the market value of an asset, the asset's inability to generate income from operations and positive cash flow in future periods, a decision to change the manner in which an asset is used, a physical change to the asset and a change in business climate. Baldwin calculates estimated future undiscounted cash flows, before interest and taxes, of the related operation and compares it to the carrying value of the asset in determining whether impairment potentially exists. If a potential impairment exists, a calculation is performed to determine the fair value of the long-lived asset. This calculation is based upon a valuation model and discount rate commensurate with the risks involved. Third party appraised values may also be used in determining whether impairment potentially exists. Future adverse changes in market conditions or poor operating results of a related reporting unit may require the Company to record an impairment charge in the future.

The impairment review process requires management to make significant estimates and judgments regarding the future cash flows expected to result from the use and, if applicable, the eventual disposition of the respective assets. The key variables that management must estimate in determining these expected future cash flows include sales volumes, sales prices, sales growth, production and operating costs, capital expenditures, working capital requirements, market conditions and other economic factors. Significant management judgment is involved in estimating these variables, and such estimates are inherently uncertain; however, the assumptions used are reasonable and consistent with the Company's internal planning. Management periodically evaluates and updates the estimates based on conditions that influence these variables.

The assumptions and conditions for determining impairments of property, plant and equipment, goodwill and other intangible assets reflect management's best assumptions and estimates, but these items involve inherent uncertainties as described above, many of which are not under management's control. As a result, the accounting for

such items could result in different estimates or amounts if management used different assumptions or if different conditions occur in future accounting periods.

*Pension* obligations and the related benefits costs are determined based upon actuarial assumptions regarding mortality, discount rates, long-term return on assets, salary increases, and other factors. Changes in these assumptions can result in changes to the recognized pension expense and recorded liabilities.

For *Stock-Based Compensation*, the Company uses the Black-Scholes option pricing model to determine the fair value of stock options issued as compensation to key employees and non-employee directors. The model determines a fair value based on a number of key variables including the grant date price of the Company's common stock and the related exercise or strike price, estimated dividend yield, estimated term of the option prior to exercise, risk free rate of interest over the estimated term and a measure of the volatility of the Company's common stock over the estimated term. Certain of these variables encompass a degree of subjectivity whose variability could result in significantly different values for the grant date fair value of stock option awards. In addition, the Company recognizes share-based compensation cost based upon the number of awards that are expected to vest. This method implicitly includes an estimate for forfeitures based on employee turnover, reductions in force and other factors specific to the award recipient population. The Company has a policy to review its estimate of award forfeitures on an annual basis or when specific facts and circumstances warrant additional review.

## Results of Operations

The following table sets forth certain of the items (expressed as a percentage of net sales) included in the Selected Financial Data and should be read in connection with the Consolidated Financial Statements of the Company, including the notes thereto, presented elsewhere in this report.

	<u>Years Ended June 30,</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
Net sales . . . . .	100.0%	100.0%	100.0%
Cost of goods sold . . . . .	70.3	69.7	68.4
Inventory reserve . . . . .	—	2.4	—
Gross profit . . . . .	29.7	27.9	31.6
Selling, general and administrative expenses . . . . .	21.7	20.6	18.7
Engineering and development expenses . . . . .	8.9	8.4	7.9
Restructuring charges . . . . .	0.4	2.7	.4
Impairment of goodwill . . . . .	—	3.2	—
Legal settlement income, net of expense . . . . .	6.2	—	—
Operating income (loss) . . . . .	4.9	(7.0)	4.6

Net income . . . . .	<u>3.3%</u>	<u>(6.7)%</u>	<u>2.7%</u>

## Overview

Baldwin is a leading global supplier of process automation equipment for the commercial and newspaper printing industries. The Company offers its customers a broad range of market-leading technologies, products and systems that enhance the quality of printed products and improve the economic and environmental efficiency of printing presses. Headquartered in Shelton, Connecticut, the Company has sales and service centers and product development and manufacturing operations in the Americas, Asia, Australia and Europe. Baldwin's technology and

products include cleaning systems and related consumables, fluid management and ink control systems, web press protection systems and drying systems, blending and packaging services, and related services and parts.

The Company manages its business as one reportable business segment built around its core competency in process automation equipment.

The market for printing equipment faced and continues to face significant challenges in the current economic environment. Several of the Company's largest customers (major OEM press manufacturers) have reported weakness in orders and sales, particularly for commercial presses. These events translated into a lower level of business activity for the Company and were reflected in lower order intake and reduced shipment levels of the Company's equipment. As a result of the slowing global economy, the Company has implemented cost reduction and restructuring programs designed to mitigate the impact of the continuing weak market for printing equipment.

### **Highlights for Fiscal Year ended June 30, 2010**

- Revenues declined 14%, versus the year ago comparable period.
- Backlog of \$29,880 at June 30, 2010 decreased 25% versus June 30, 2009.
- Order intake was down 18% versus the comparable year ago period.
- Cash flow provided by operations during the year ended June 30, 2010 of \$11,507 reflects cash generated from operations supplemented by cash received from settlement of a long standing patent infringement lawsuit.
- The Company recorded additional restructuring charges of \$540.
- On June 30, 2010 the Company successfully completed the previously announced acquisition of Nordson UV, a manufacturer of ultraviolet curing systems, lamps and parts.

See discussion below related to consolidated results of operations, liquidity and capital resources.

### **Fiscal Year Ended June 30, 2010 versus Fiscal Year Ended June 30, 2009**

#### ***Consolidated Results***

*Net Sales.* Net sales for the fiscal year ended June 30, 2010, decreased \$24,754, or 14% to \$151,818 from \$176,572 for the year ended June 30, 2009. Currency rate fluctuations effecting the Company's overseas operations increased net sales for the current period by \$4,784. The revenue decrease primarily reflects weakness in demand for the Company's equipment offerings.

In Europe, net sales decreased approximately \$12,852, including \$1,313 of favorable effects from exchange rate fluctuations. The decrease was attributable to reduced demand for the Company's products as a result of the global economic contraction and lack of available financing sources for equipment purchases by customers. OEM press manufacturers in Germany experienced reduced orders and sales, and printers and publishers have deferred purchases of the Company's equipment until final demand and liquidity return to the market.

In Asia, particularly Japan, net sales decreased approximately \$5,665, including \$3,469 of favorable effects from exchange rate fluctuations. The decrease reflects the impact of the slowing Asian economies in the commercial and newspaper markets in Japan for the Company's cleaning equipment.

Net Sales in the Americas decreased \$6,237, primarily reflecting lower demand in the U.S. commercial market for cleaning systems.

*Gross Profit.* Gross profit for the fiscal year ended June 30, 2010 decreased to \$45,136 (29.7% of sales) versus \$49,179 (27.9% of sales) for the fiscal year ended June 30, 2009. Fiscal year 2009 gross profit was negatively impacted by an inventory write-off in the U.S. of \$4,250 or 2.4% associated with a deteriorating macro-economic environment, a decision to transfer equipment manufacturing from the U.S. to Germany, a general restructuring of the U.S. operations and the inability of the U.S. operation to reach target goals for inventory utilization. Currency rate fluctuations increased gross profit by \$1,585 in the current fiscal year. Gross profit as a percentage of net sales

decreased after giving effect to the inventory write-off, (to 29.7% from 30.3%) primarily as a result of continued pricing pressures from OEM and end users and unfavorable overhead absorption related to the reduced volumes. Partially offsetting these impacts were lower costs associated with announced restructuring and cost saving initiatives resulting in lower direct and indirect labor and associated fringe benefits, lower subcontractor and lower technical service costs.

*Selling, General and Administrative Expenses.* Selling, general and administrative expenses (“SG&A”) of \$32,881 for the fiscal year ended June 30, 2010 decreased \$3,328, or 9% versus the fiscal year ended June 30, 2009. Currency rate fluctuations effecting the Company’s overseas operations increased SG&A expenses for fiscal year 2010 by \$898.

G&A expenses for the fiscal year ended June 30, 2010, decreased \$1,629 or 8% including unfavorable exchange effects of \$427 compared to the fiscal year ended June 30, 2009. This decrease primarily reflects cost reduction actions leading to reductions in compensation, benefit costs, outside service costs, insurance, travel, annual meeting and investor relations costs, together with reduced cash discounts and lower bad debt expense. These reductions were partially offset by approximately \$900 of costs related to a special investigation into violation of the Company’s internal control procedures, expenses associated with the Nordson UV acquisition of \$330 and bank amendment fees of \$250.

Selling expenses for the fiscal year ended June 30, 2010 decreased \$1,698, or 11%, including unfavorable exchange effects of \$471 compared to the fiscal year ended June 30, 2009. The decrease in selling expenses reflects reduced salary, benefit and other associated employee costs commensurate with reductions in headcount, cost reduction actions and the lower level of sales activity.

*Engineering and Development Expenses.* Engineering and development expenses for the fiscal year ended June 30, 2010 decreased \$1,522, or 10%, including \$412 of unfavorable exchange effects versus the fiscal year ended June 30, 2009 and reflects reduced salary, benefit and other associated employee costs commensurate with reductions in headcount. Engineering and development expenses were approximately 8% of sales for each of the fiscal years ended June 30, 2010 and June 30, 2009.

*Restructuring.* The Company recorded \$540 of restructuring costs during the fourth quarter of fiscal year ended June 30, 2010 versus \$4,747 in the comparable prior year period. The current year restructuring plan is designed to achieve operational efficiencies in Germany and consists of employee terminations. The fiscal year 2009 plan consisted primarily of reductions in employment levels and the consolidation of production facilities in Germany in response to continued weak market conditions.

*Impairment of Goodwill.* The Company’s annual impairment testing of goodwill for the fiscal year ended June 30, 2010 indicated no impairment. In fiscal year 2009, as a result of the deteriorating macro-economic environment, the continued market volatility and the Company’s decreased market capitalization, the Company’s goodwill impairment assessment indicated an impairment of goodwill and the Company recorded a non-cash goodwill impairment charge of \$5,658 related to its Japan reporting unit during the third quarter of fiscal year 2009.

*Legal Settlement.* During the fiscal year ended June 30, 2010, the Company recorded a net gain on the settlement of a patent infringement lawsuit of \$9,266. Please refer to Note 19 in Notes to Consolidated Financial Statements for further discussion of this settlement.

*Interest, Net and Other.* Interest expense, net, of \$3,058 for the fiscal year ended June 30, 2010 increased \$790 versus the fiscal year ended June 30, 2009. Interest expense includes costs incurred during the first quarter of fiscal year 2010 related to an amendment to the Company’s Credit Agreement. Certain costs associated with the amendment, together with legacy deferred financing costs aggregating approximately \$1,183, were charged to expense during the quarter ended September 30, 2009. The increase was partially offset by \$423 resulting from lower average debt and lower interest rates in the current year versus the year ended June 30, 2009. Currency rate fluctuations had no impact in the current fiscal year.

Other income and expense, net, was an expense of \$418 versus income of \$878 for the periods ended June 30, 2010 and 2009, respectively, and primarily reflects net foreign exchange gains and losses.

*Gain on Bargain Purchase.* During the fourth quarter of fiscal year ended June 30, 2010, the Company completed the previously announced acquisition of Nordson UV and recorded a net gain of \$2,960 on the bargain purchase, representing the excess of net assets acquired over consideration paid. Please refer to Note 14 to Consolidated Financial Statements for further discussion.

*Income (Loss) Before Income Taxes.* Income before income taxes for the fiscal year ended June 30, 2010 was \$7,006 compared to loss before income taxes of \$13,824 for the fiscal year ended June 30, 2009. The income before income taxes includes the aforementioned gain on legal settlement of \$9,266 and the gain on bargain purchase of \$2,960. The loss before income taxes for the fiscal year ended June 30, 2009 includes the aforementioned goodwill impairment charge of \$5,658, restructuring charges of \$4,747 and additional inventory reserve totaling \$4,250.

*Income Taxes.* The Company recorded an income tax expense of \$1,978 for the fiscal year ended June 30, 2010 versus a benefit of \$2,013 during the fiscal year ended June 30, 2009. The effective tax rates of 28.2% and 14.6% for the fiscal years ended June 30, 2010 and 2009, respectively, differ from the statutory rate. In fiscal year 2010 the tax rate benefited by release of foreign contingency reserves, gain on bargain purchase and foreign rate differential offset by negative impacts of adjustments to valuation allowance related to foreign tax credit and net operating loss utilization. In fiscal year 2009 the tax rate has been negatively impacted by: (a) no benefit recognized for losses incurred in certain countries as the realization of such benefits was not more likely than not, and (b) foreign and domestic permanent items including the non-deductibility of the fiscal year 2009 goodwill impairment charge. The Company continues to assess the need for its deferred tax asset valuation allowance in the jurisdictions in which it operates. Any adjustment to the deferred tax asset valuation allowance would be recorded in the income statement of the period that the adjustment is determined to be required.

*Net Income (Loss).* The Company's net income was \$5,028 for the fiscal year ended June 30, 2010 compared to net loss of \$11,811 for the fiscal year ended June 30, 2009.

*Non-GAAP Financial Measures.* Consolidated EBITDA is a non-GAAP financial measure within the meaning of Regulation G promulgated by the Securities and Exchange Commission. This non-GAAP measure is provided because management of the Company uses this financial measure as an indicator of business performance in maintaining and evaluating the Company's on-going financial results and trends. The Company believes that both management and investors benefit from referring to this non-GAAP measure in assessing the performance of the Company's ongoing operations and liquidity and when planning and forecasting future periods. This non-GAAP measure also facilitates management's internal comparisons to the Company's historical operating results and liquidity. The following is a reconciliation of the net income (loss) as reported to Consolidated EBITDA.

	<u>2010</u>	<u>2009</u>
	(In thousands)	
Net income (loss) as reported . . . . .	\$ 5,028	\$(11,811)
Provision for income taxes . . . . .	1,978	(2,013)
Interest, net . . . . .	3,058	2,268
Depreciation and amortization . . . . .	<u>2,665</u>	<u>2,773</u>
EBITDA . . . . .	<u>\$12,729</u>	<u>\$ (8,783)</u>

**Fiscal Year Ended June 30, 2009 versus Fiscal Year Ended June 30, 2008**

***Highlights for Fiscal Year ended June 30, 2009***

- Revenues, excluding currency effects, declined 23%, versus the year ago comparable period.
- Backlog of \$38,693 at June 30, 2009 decreased 20% versus June 30, 2008.
- Order intake was down 27% versus the comparable year ago period.
- Cash flow provided by operations during the year ended June 30, 2009 was \$2,631.
- The Company recorded restructuring charges of \$4,747 and implemented cost saving initiatives that will result in benefits in excess of \$24,000.

- The Company completed its analysis of the recoverability of goodwill and the net realizable value of inventory and recorded a non-cash goodwill impairment charge of \$5,658 and an inventory reserve adjustment of \$4,250 during the third quarter of fiscal year 2009.
- Due to the charges taken by the Company during the third quarter ended March 31, 2009, the Company was not in compliance with certain provisions of its Credit Agreement. In July 2009, the Company successfully concluded an amendment to its Credit Agreement with its lenders covering the period through November 21, 2011.
- The effective tax rate for the period ended June 30, 2009 differs from the statutory rate, reflecting the effect of the following factors: (i) no tax benefit recognized for losses incurred in certain jurisdictions, as the realization of any such benefit was not more likely than not; and (ii) the impairment of goodwill which has no associated tax benefit.

See discussion below related to consolidated results of operations, liquidity and capital resources.

### **Consolidated Results**

*Net Sales.* Net sales for the fiscal year ended June 30, 2009, decreased \$59,758, or 25% to \$176,572 from \$236,330 for the year ended June 30, 2008. Currency rate fluctuations effecting the Company's overseas operations decreased net sales for the current period by \$6,518. Excluding the effects of currency translation, net sales for fiscal year 2009 decreased \$53,240 or 23% when compared with fiscal year 2008. The decrease primarily reflects diminished demand for the Company's cleaning equipment.

In Europe, net sales (excluding the effects of currency translations) decreased approximately \$30,193. Reduced order and sales activity for new printing equipment with by OEM press manufacturers, primarily in Germany, and lower level demand from end user customers primarily account for the decline in sales in the commercial market.

In Asia, particularly Japan, net sales decreased approximately \$13,351 (excluding the effects of currency translations). The decrease reflects the impact of reduced demand for the Company's cleaning equipment in the Asian commercial and newspaper markets.

Net Sales in the Americas decreased \$9,696, primarily reflecting lower demand for cleaning systems in the U.S. newspaper market.

*Gross Profit.* Gross profit for the fiscal year ended June 30, 2009 decreased to \$49,179 (27.9% of sales) versus \$74,831 (31.7% of sales) for the fiscal year ended June 30, 2008. Due to the continued deteriorating macro-economic environment, a decision to transfer equipment manufacturing from the U.S. to Germany, a general restructuring of the U.S. operations and the inability of the U.S. operation to reach target goals for inventory utilization, the Company recorded a \$4,250 write down of inventory in the U.S., negatively impacting gross profit. Excluding the adjustment for inventory, gross profit for the fiscal year ended June 30, 2009, was \$53,429 (30.3% of net sales). Currency rate fluctuations decreased gross profit by \$2,780 in the current period. Gross profit excluding the inventory write down as a percentage of net sales decreased primarily as a result of the effect of the lower volume noted above on overhead absorption, partially offset by lower warranty costs.

*Selling, General and Administrative Expenses.* Selling, general and administrative expenses ("SG&A") of \$36,209 for the fiscal year ended June 30, 2009, including a \$465 additional reserve of a customer account receivable, decreased \$7,996, or 18% versus the fiscal year ended June 30, 2008. Currency rate fluctuations effecting the Company's overseas operations decreased SG&A expenses for fiscal year 2009 by \$1,285. Excluding the effects of currency translation, SG&A expenses for fiscal year 2009 decreased \$6,711 or 15% when compared with the corresponding year ago period.

G&A expenses, excluding the effects of currency translations of \$643 for the fiscal year ended June 30, 2009, decreased \$3,935 or 15% compared to the fiscal year ended June 30, 2008. This decrease primarily reflects reduced salary, benefit and other associated employee costs commensurate with reductions in headcount (approximately \$1,400), reduced incentive compensation accruals (approximately \$1,700), and lower outside professional services and consultant cost (approximately \$1,600).

Selling expenses excluding the effects of currency translations of \$642 for the fiscal year ended June 30, 2009 decreased \$2,776 or 15% versus the fiscal year ended June 30, 2008. The decrease in selling expenses reflects reduced salary, benefit and other associated employee costs commensurate with reductions in headcount and the lower level of sales activity of approximately \$1,300, coupled with reduced trade show/advertising costs of approximately \$1,500.

*Engineering and Development Expenses.* Engineering and development expenses excluding the effects of currency translations of \$648 for the fiscal year ended June 30, 2009 decreased \$3,003 or 16% versus the fiscal year ended June 30, 2008 and reflects reduced salary, benefit and other associated employee costs commensurate with reductions in headcount. Engineering and development expenses were approximately 8% of sales for each of the fiscal years ended June 30, 2009 and June 30, 2008.

*Restructuring.* The Company recorded \$4,747 of restructuring costs during the fiscal year ended June 30, 2009 versus \$960 in the comparable prior year period. The current year restructuring plan, adopted in response to continued weak market conditions, is designed to achieve operational efficiencies in Germany and consists primarily of employee terminations and the consolidation of production facilities in Germany. The fiscal year 2008 Plan consisted primarily of reductions in employment levels in Germany in an effort to achieve operational efficiencies.

*Impairment of Goodwill.* As a result of the deteriorating macro-economic environment, the continued market volatility and the Company's decreased market capitalization, the Company assessed the recoverability of its goodwill carrying value. As a result of the assessment, the Company recorded a non-cash goodwill impairment charge of \$5,658 related to its Japan reporting unit during the third quarter of fiscal year 2009.

*Interest and Other.* Interest expense of \$2,305 for the fiscal year ended June 30, 2009 decreased \$822 versus the fiscal year ended June 30, 2008. This decrease reflects lower average debt levels and lower average interest rates during the fiscal year ended June 30, 2009 versus the fiscal year ended June 30, 2008. Currency rate fluctuations decreased interest expense \$137 in the current period.

Interest income declined \$146, while other income and expense, net, amounted to income of \$868 versus income of \$271 for the periods ended June 30, 2009 and 2008, respectively, and primarily reflects net foreign exchange gains.

*(Loss) Income Before Income Taxes.* Loss before income taxes for the fiscal year ended June 30, 2009 was \$13,824 compared to income before income taxes of \$8,353 for the fiscal year ended June 30, 2008. The loss before income taxes reflects the aforementioned goodwill impairment charge of \$5,658, restructuring charges of \$4,747, and additional inventory and accounts receivable reserves totaling \$4,715. For the current fiscal year, currency rate fluctuations increased the loss before income taxes by \$886.

*Income Taxes.* The Company recorded an income tax benefit of \$2,013 for the fiscal year ended June 30, 2009 versus a provision of \$1,862 during the fiscal year ended June 30, 2008. During the year ended June 30, 2008, the Company reversed approximately \$1,642 (\$1,225 in the third quarter and \$415 in the fourth quarter) of its valuation allowance for net deferred tax assets associated with its U.S. operations. This reversal of a portion of the U.S. operations deferred tax valuation allowance is based upon i) prudent and feasible tax planning strategies, ii) the U.S. operations historical and projected operating performance, and iii) management's expectation that its operations will generate sufficient taxable income in future periods to realize a portion of the tax benefits associated with its deferred tax assets. The effective tax rates of 14.6% and 22.2% for the fiscal years ended June 30, 2009 and 2008, respectively, differ from the statutory rate, because the expected benefit in fiscal year 2009 and benefit associated with the reversal of a portion of the U.S. valuation allowance in fiscal year 2008 were partially offset by (a) foreign income taxed at rates different than the U.S. statutory rate, (b) no benefit recognized for losses incurred in certain countries as the realization of such benefits was not more likely than not, and (c) foreign and domestic permanent items including the non-deductibility of the fiscal year 2009 goodwill impairment charge. The Company continues to assess the need for its deferred tax asset valuation allowance in the jurisdictions in which it operates. Any adjustment to the deferred tax asset valuation allowance would be recorded in the income statement of the period that the adjustment is determined to be required.

*Net (Loss) Income.* The Company's net loss amounted to \$11,811 for the fiscal year ended June 30, 2009 compared to net income of \$6,491 for the fiscal year ended June 30, 2008. Currency translation unfavorably impacted net income by approximately \$764.

### Impact of Inflation

The Company's results are affected by the impact of inflation on manufacturing and operating costs. Historically, the Company has used selling price adjustments, cost containment programs and improved operating efficiencies to offset the otherwise negative impact of inflation on its operations.

### Liquidity and Capital Resources

The Company's cash flow from operating, investing and financing activities as reflected in the Consolidated Statement of Cash Flows are summarized in the tables below.

	Years Ended June 30,		
	2010	2009	2008
	(In thousands)		
Cash flow from operating activities:			
Net cash provided by operating activities . . . . .	\$11,507	\$2,631	\$7,632

Net cash from operating activities for the year ended June 30, 2010 increased \$8,876 compared to fiscal year 2009. The increase in cash provided reflects: (i) receipt of the proceeds from the legal settlement, (ii) lower compensation payments associated with management incentives and lower utilization of vacation accruals, (iii) timing of payment of accounts and notes payable and (iv) lower restructuring payments. Partially offsetting these increases were lower collections on accounts/notes receivable and customer deposits. Net cash from operating activities for the year ended June 30, 2009 decreased \$5,001 compared to fiscal year 2008. The decrease reflects reduced profitability combined with lower levels of accounts/notes payable due to the timing of vendor payments, lower accrued compensation, as bonus payments in fiscal 2009 for fiscal year 2008 performance exceeded those in fiscal 2008 for fiscal year 2007 performance, charges to vacation accruals during extended facility shut downs, higher restructuring payments and warranty related payments. Partially offsetting these decreases were lower balances of accounts/notes receivable and inventory and an increase in customer deposits. The decreased balances in accounts/notes receivable and inventory reflect the lower revenue in fiscal 2009 versus fiscal 2008 as well as the Company's continued focus on working capital management.

	Years Ended June 30,		
	2010	2009	2008
	(In thousands)		
Cash flow from investing activities:			
Property and intangibles . . . . .	\$(763)	\$(1,997)	\$(3,545)
Cash received in acquisition . . . . .	728	—	—
Purchase of Oxy-Dry, net of cash acquired . . . . .	—	—	(298)
Purchase of Hildebrand, net of cash acquired . . . . .	—	—	(148)
Net cash (used in) investing activities . . . . .	\$ (35)	\$(1,997)	\$(3,991)

In fiscal year 2010, the Company utilized \$763 for investing activities primarily for additions to property, plant and equipment and intangibles (primarily patents). In addition, the Company received \$728 of cash associated with the Nordson UV acquisition.

In fiscal years 2009 and 2008, the Company utilized \$1,997 and \$3,991, respectively, for investing activities primarily for additions to property, plant and equipment and intangibles (primarily patents).

	Years Ended June 30,		
	2010	2009	2008
	(In thousands)		
Cash flow from financing activities:			
Long and short-term debt borrowings . . . . .	\$ 693	\$ 16,764	\$ 13,414
Long and short-term debt repayments . . . . .	(10,207)	(12,365)	(23,992)
Payment of debt financing costs . . . . .	(816)	—	—
Repurchase of Common Stock . . . . .	—	(157)	(760)
Advances received in acquisition . . . . .	650	—	—
Other . . . . .	(533)	(628)	(111)
Net cash (used in) provided by financing activities . . . . .	<u>\$ (10,213)</u>	<u>\$ 3,614</u>	<u>\$ (11,449)</u>

The Company's primary source of external financing is its Credit Agreement, as amended (the "Credit Agreement"), with Bank of America ("BofA") which has a term that ends on November 21, 2011. Borrowings under the Credit Agreement are secured in the U.S. by a pledge of substantially all of the Company's domestic assets (approximately \$18,000) and in Europe by a pledge of the Company's European assets and the stock of the Company's European subsidiaries and certain Asian subsidiaries.

Cash used by financing activities of \$10,213 for the period ended June 30, 2010 primarily reflects the use of net cash proceeds from the legal settlement of a long standing patent infringement lawsuit of approximately \$7,700 to repay the term loan under the Credit Agreement in accordance with the provisions of the July 31, 2009 amendment to the Credit Agreement. In addition, cash used for financing activities reflects the scheduled term loan payments of approximately \$2,507 and payment of debt financing costs of \$818. These payments were partially offset by borrowings under the revolving loan under the Credit Agreement of \$693 and advances associated with the financing of the Nordson UV acquisition.

During fiscal year 2009, cash from financing activities of \$3,614 primarily reflected borrowings in excess of repayments of \$4,399. In addition, the Company utilized \$602 to meet long-term obligations under its capital lease and assumed liabilities obligations and \$183 of cash to purchase shares of its Class A Common Stock under its share repurchase program. At June 30, 2009, approximately \$2.4 million remained available for use under the share repurchase program. Repurchases were restricted by the terms of the Credit Agreement amendment on July 31, 2009; and no repurchases were made during fiscal year 2010.

During fiscal year 2008, the Company utilized cash in financing activities of \$11,449. The Company used its operating cash flow to make net debt repayments against its external credit facilities of \$10,578. In addition, the Company utilized \$760 of cash to purchase shares of its Class A Common Stock under its share repurchase program. At June 30, 2008, approximately \$2.5 million remained available for use under the share repurchase program.

On July 31, 2009, the Company concluded an amendment to its Credit Agreement with BofA. The amendment modified the Credit Agreement as follows: (i) USD and Euro borrowings bear interest at LIBOR plus 4.50%, or in the case of U.S. dollar loans at the option of the Company, at the prime rate plus 3.00%, (ii) reduced the amount of revolving commitment from \$35,000 to \$25,000 provided that the aggregate of all revolving loans outstanding plus \$7,900 not exceed \$25,000, and (iii) increased collateral.

The Credit Agreement as amended on July 31, 2009 required the Company to satisfy minimum EBITDA, Fixed Charge Coverage Ratio, Total Funded Debt Ratio, Minimum Currency Adjusted Net Sales, Capital Expenditures, and Minimum Liquidity tests. Minimum EBITDA, as defined, must not be less than i) \$1,100 for the six month period ending December 31, 2009, ii) \$2,300 for the three Fiscal Quarters ending March 31, 2010, iii) \$4,100 for the fiscal year ending June 30, 2010, and iv) \$12,000 for each Four Fiscal Quarter computation period ending on or after September 30, 2010. The Fixed Charge Coverage Ratio, as defined, must not be less than 1.25 to 1.00 for the Four Fiscal Quarter Computation Period ending on and after September 30, 2010. The Leverage Ratio must not exceed 3.00 to 1.00 for the Four Fiscal Quarter Computation Period ending on and after September 30, 2010. Currency Adjusted Net Sales must not be less than certain defined levels for the fifteen reporting periods consisting of three consecutive three-month periods commencing with the first reporting period ending on July 31, 2009 and the final

reporting period ending on September 30, 2010. Capital expenditures must not exceed \$1,000 for the fiscal year ending June 30, 2010. Minimum Liquidity, as defined as the U.S. Dollar Equivalent of consolidated cash and cash equivalents of the Parent, Domestic and European Subsidiaries shall not be less than \$300. The Company may not permit borrowings under the Revolving Loan or request issuance or increase in any Letters of Credit if the sum of all Dollar Equivalent Revolving Outstandings, Letters of Credit and Specified Availability exceeds \$25,000.

On May 12, 2010, the Company entered into Waiver and Amendment No. 6 to the Credit Agreement (the "Waiver and Amendment") with BofA. The Waiver and Amendment provided a waiver by the lenders of the Company's failure to meet the Currency Adjusted Net Sales covenant for the consecutive three-month period ending April 30, 2010 and amended the Credit Agreement to change the date for delivery of the Company's financial projections for the Fiscal Year commencing July 1, 2010.

On June 9, 2010, the Company entered into Waiver and Amendment No. 7 to Credit Agreement (the "Amendment") with BofA. The Amendment provided for a waiver by the lenders of the Company's failure to meet the Currency Adjusted Net Sales covenant for the consecutive three-month period ended May 31, 2010. The Amendment also amended the Credit Agreement to make certain modifications to the required currency adjusted net sales covenant and EBITDA financial covenants. Currency Adjusted Net Sales must not be less than certain defined levels for the periods consisting of two consecutive months ending June 30, 2010. The minimum EBITDA covenant to provide that minimum EBIDTA (as defined) must not be less than \$2,769 for the fiscal year ending June 30, 2010 and \$12,000 for each Four Fiscal Quarter computation period ending on and after September 30, 2010. The Amendment also permitted the Company to acquire Nordson UV and incur certain debt in connection with the acquisition. At June 30, 2010 the Company was in compliance with all financial covenants under the amended Credit Agreement.

On September 28, 2010, the Company entered into Amendment #8 to the Credit Agreement (the "Amendment #8") with BofA. Under the terms of the Amendment #8, the total commitment under the revolving credit agreement was reduced from \$25 million to \$20 million; certain adjustments were made to the interest payment provisions; and the Company provided the lenders warrants with a term of 10 years to purchase 352,671 shares of common stock in the Company for \$0.01 per share. The Warrants also contain a put provision that enables the Holder after September 28, 2012 to request a cash settlement of the then fair market value of the Warrants in an amount not to exceed \$1.50 per share. The Amendment #8 sets new covenants for currency adjusted net sales, establishes minimum EBITDA levels and sets a limit on capital expenditures for the fiscal year ended June 30, 2011.

### **Restructuring and Cost Saving Initiatives**

During each of the fiscal years ended June 30, 2010 and 2009, the Company announced a restructuring initiative in response to the significant challenges facing the market for printing equipment due to the current economic environment. These restructuring initiatives were designed to reduce the Company's worldwide cost base and strengthen its competitive position. The Company made cash payments against these plans of \$1,899 in fiscal year 2010 and \$3,051 in fiscal 2009 and anticipates a total of approximately \$897 in addition to be paid through the second quarter of fiscal year 2011. The restructuring actions, combined with other initiatives implemented during the fiscal years 2009 and 2010, eliminated in Europe, the U.S. and Japan a total of approximately 113 full-time positions (18% of the workforce).

In addition, the Company eliminated merit increases for all of the Company's workforce (except those covered by existing union contracts), temporarily suspended the Company's matching contribution to the U.S. 401(k) plan, reduced U.S. based healthcare contributions and has entered into voluntary salary reduction agreements from senior managers. The Company estimates that annual savings from all of the above restructuring and cost saving initiatives will be approximately \$10,540.

The Company has also instituted cost reduction initiatives involving a reduction in overtime, the implementation of short-time work weeks, the reduction of external service providers and the extension of holiday shut downs, the reduced use of subcontractors and temporary labor and related travel costs, and the management of other variable costs, all of which have combined to provide additional annual savings of approximately \$13,900.

The Company maintains relationships with foreign and domestic banks, which combined, have extended credit facilities totaling \$32,256 at June 30, 2010. As of June 30, 2010, the Company had \$19,535 outstanding (including Letters of Credit and Guarantees) under these facilities. The amount available under these facilities at June 30, 2010 was \$4,521.

The Company believes that its cash flow from operations, along with its available bank lines of credit is sufficient to finance its operations and other capital requirements over the term of the Credit Agreement. However, the Company believes that, if needed, other available sources of liquidity could be limited.

At June 30, 2010 and 2009, the Company did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As such, the Company is not exposed to any financing, liquidity, market or credit risk that could arise if the Company had engaged in such relationships.

### Contractual Obligations

The Company's contractual obligations as of June 30, 2010 are summarized below:

	Fiscal Years Ending June 30,						2016 and Thereafter
	Total at June 30, 2010	2011	2012	2013	2014	2015	
	(In thousands)						
Loans payable . . . . .	\$ 4,525	\$ 4,525	\$ —	\$ —	\$ —	\$ —	\$ —
Capital lease obligations . . . . .	102	99	3	—	—	—	—
Long-term debt . . . . .	16,455	389	14,376	499	561	630	—
Non-cancelable operating lease obligations . . . . .	23,121	6,376	4,594	3,537	2,339	1,892	4,383
Purchase commitments (materials) . . . . .	8,111	7,283	828	—	—	—	—
Supplemental compensation(1) . . . . .	8,978	1,345	804	1,030	813	613	4,373
Restructuring payments . . . . .	897	897	—	—	—	—	—
Interest expense . . . . .	1,440	852	388	96	68	36	—
Total contractual cash obligations . . . . .	<u>\$63,629</u>	<u>\$21,766</u>	<u>\$20,993</u>	<u>\$5,162</u>	<u>\$3,781</u>	<u>\$3,171</u>	<u>\$8,756</u>

(1) the amount includes estimated benefit payments as well as estimated contributions for fiscal year 2010 (See Note 12).

### Recent Accounting Pronouncements

#### *Revenue Arrangements with Multiple Deliverables*

In October 2009, the FASB issued ASC Update No. 2009-13, "Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements." The consensus in Update No. 2009-13 supersedes certain guidance in Topic 605 (formerly EITF Issue No. 00-21, Multiple-Element Arrangements) and requires an entity to allocate arrangement consideration at the inception of an arrangement to all of its deliverables based on their relative selling prices. The consensus eliminates the use of the residual method of allocation and requires the use of the relative-selling-price method in all circumstances in which an entity recognizes revenue for an arrangement with multiple deliverables subject to ASC 605-25. The Company is required to adopt Update No. 2009-13 as of July 1, 2010. The Company does not believe adoption of Update No. 2009-13 will have a material effect on its future results of operations and financial position.

#### *Codification*

In June 2009, the FASB issued SFAS No 168 "The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles" ("SFAS 168"). SFAS 168 establishes the FASB

Accounting Standards Codification™ (“Codification” or “ASC”) as the sole source of authoritative GAAP recognized by the FASB for nongovernmental entities. Rules and interpretive releases issued by the SEC under federal securities laws are also sources of authoritative GAAP for SEC registrants. SFAS 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009 (effective September 30, 2009 for the Company). The adoption of SFAS 168 did not have a material effect on the Company’s Consolidated Financial Statements.

#### *Fair Value Measurements*

On July 1, 2008, the Company adopted certain provisions of a new accounting standard which defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. On July 1, 2009, the Company adopted the remaining provisions of this accounting standard as it relates to nonfinancial assets and liabilities that are not recognized or disclosed at fair value on a recurring basis. The adoption of this standard as it related to certain nonfinancial assets and liabilities did not impact the Company’s consolidated financial statements in any material respect.

On July 1, 2009, the Company adopted the accounting pronouncement that provides additional guidance for estimating fair value in accordance with the accounting standard for fair value measurements when the volume and level of activity for the asset or liability has significantly decreased. This pronouncement stated that when quoted market prices may not be determinative of fair value, a reporting entity shall consider the reasonableness of a range of fair value estimates. The adoption of this standard as it related to inactive markets did not impact the Company’s consolidated financial statements in any material respect.

#### *Business Combinations*

On July 1, 2009, the Company adopted the accounting pronouncements relating to business combinations, including assets acquired and liabilities assumed arising from contingencies. These pronouncements established principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree as well as provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. In addition, these pronouncements eliminate the distinction between contractual and noncontractual contingencies, including the initial recognition and measurement criteria and require an acquirer to develop a systematic and rational basis for subsequently measuring and accounting for acquired contingencies depending on their nature. The adoption of these pronouncements did have an impact on the manner in which the Company accounts for acquisitions. See Note 14 to the Consolidated Financial Statements.

### **Item 7A. *Quantitative and Qualitative Disclosures About Market Risk***

#### **(amounts in thousands)**

The Company operates internationally and is exposed to certain market risks arising from transactions that in the normal course of business include fluctuations in interest rates and currency exchange rates. While the Company occasionally uses derivative financial instruments in order to manage or reduce these risks, typically currency futures contracts and interest rate swap agreements, the Company does not enter into derivative or other financial instruments for trading or speculative purposes.

#### **Interest Rate and Debt Sensitivity**

As of June 30, 2010, the Company had debt totaling \$20,980, most of which bears interest at floating rates.

The Company performed a sensitivity analysis as of June 30, 2010, assuming a hypothetical one percentage point increase in interest rates. Holding other variables constant (such as foreign exchange rates and debt levels), a one percentage point increase in interest rates would affect the Company’s pre-tax income by approximately \$210. However, actual increases or decreases in earnings in the future could differ materially from this analysis based on the timing and amount of both interest rate changes and amounts borrowed by the Company.

### **Currency Exchange Rate Sensitivity**

The Company derived approximately 78% of its revenues from countries outside of the Americas for the fiscal year ended June 30, 2010. Results were and continue to be affected by fluctuations in foreign currency exchange rates. The Company's policy is to hedge the impact of currency rate fluctuations, which could have a material impact on the Company's financial results. The Company utilizes foreign currency exchange forward contracts to hedge certain of these exposures. The Company also maintains certain levels of cash denominated in various currencies, which acts as a natural hedge against adverse variations in individual currencies.

The Company performed a sensitivity analysis as of June 30, 2010 assuming a hypothetical 10% adverse change in foreign currency exchange rates. Holding all other variables constant, the analysis indicated that such a market movement would affect the Company's pre-tax income by approximately \$730. However, actual gains and losses in the future could differ materially from this analysis based on the timing and amount of both foreign currency exchange rate movements and the Company's actual exposures and hedges.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of  
Baldwin Technology Company, Inc.

We have audited the accompanying consolidated balance sheets of Baldwin Technology Company, Inc. (a Delaware corporation) and subsidiaries as of June 30, 2010 and 2009, and the related consolidated statements of operation, changes in shareholders' equity, and cash flows for each of the three years in the period ended June 30, 2010. Our audits of the consolidated financial statements included the financial statement schedule listed in the index appearing under Item 15(a)(2). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Baldwin Technology Company, Inc. and subsidiaries as of June 30, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended June 30, 2010 in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statement taken as a whole, present fairly, in all material respects, the information set forth, therein.

The accompanying notes to Consolidated Financial Statements are an integral part of these statements.

**BALDWIN TECHNOLOGY COMPANY, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**(in thousands except for share and per share data)**

**Note 1 — Organization of Business:**

Baldwin Technology Company, Inc. and its subsidiaries (“Baldwin” or the “Company”) are engaged primarily in the development, manufacture and sale of process automation equipment and related consumables for the printing and publishing industry. Headquartered in Shelton, Connecticut, the Company has sales and service centers and product development and manufacturing operations in the Americas, Asia, Australia and Europe. The Company manages its business as one reportable business segment built around its core competency in process automation and equipment.

**Note 2 — Summary of Significant Accounting Policies:**

The following are the significant accounting policies followed by the Company:

*Consolidation.* The Consolidated Financial Statements include the accounts of Baldwin, its wholly owned subsidiaries, one 90% owned subsidiary and an 80% owned subsidiary. The minority interest amounts are not material to the Consolidated Financial Statements and therefore are not disclosed.

*Cash and cash equivalents.* The Company considers all highly liquid instruments (cash and short-term securities) with original maturities of three months or less to be cash equivalents.

*Accounts Receivable, Notes Receivable/Payable.* Accounts receivable are recorded at their net realizable value after deducting an allowance for doubtful accounts. Such allowance is estimated based on a combination of write-off history, aging analysis and specific account evaluation. When a receivable balance is known to be uncollectable, it is written off against the allowance for doubtful accounts. Notes receivable, trade reflect promissory notes issued by customers of the Company’s Japanese subsidiary. Notes payable, trade reflect obligations of the Company’s Japanese subsidiary to suppliers.

*Translation of Foreign Currencies.* All assets and liabilities of foreign subsidiaries are translated into dollars at the fiscal year-end (current) exchange rates, and revenue and expense are translated at average rates for the fiscal year. The resulting translation adjustments are included in shareholders’ equity. Gains and losses on foreign currency exchange transactions are reflected in the statement of operations. Net transaction gains and losses credited or charged to “Other expense (income), net” for the fiscal years ended June 30, 2010, 2009 and 2008 were \$412, (\$1,025) and (\$66), respectively.

*Hedging.* The Company operates internationally and is exposed to certain market risks arising from transactions that in the normal course of business include fluctuations in interest rates and currency exchange rates. While the Company occasionally uses derivative financial instruments in order to manage or reduce these risks, typically currency futures contracts and interest rate swap agreements, the Company does not enter into derivative or other financial instruments for trading or speculative purposes. The Company’s policy is to hedge the impact of currency rate fluctuations, which could have a material impact on the Company’s financial results. The Company utilizes foreign currency forward contracts to hedge these exposures.

If a derivative is designated as a fair value hedge, the changes in the fair value of the derivative and the underlying hedged item attributable to the hedged risk are recognized in earnings. If the derivative is designated as a cash flow hedge, the effective portions of changes in fair value of the derivative are recorded in Other Comprehensive Income (“OCI”) and are recognized in the statement of operations when the underlying hedged item affects earnings. Ineffectiveness related to cash flow hedges is recognized in earnings and is included in “Other expense (income), net”. The Company did not enter into any cash flow hedges for the period ended June 30, 2010, 2009 and 2008, and the effect of fair value hedge activities is not material to the Consolidated Financial Statements for the periods ending June 30, 2010, 2009 or 2008.

*Concentration of Credit Risk.* Financial instruments, which potentially subject the Company to concentrations of credit risk, consist principally of trade accounts and notes receivable and cash and cash equivalents. The

## BALDWIN TECHNOLOGY COMPANY, INC.

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Company controls this risk through credit approvals, customer limits and monitoring procedures. For the fiscal years ended June 30, 2010, 2009 and 2008, one customer accounted for more than 10% of the Company's net sales and trade accounts receivable. Koenig and Bauer Aktiengesellschaft ("KBA") accounted for approximately 14%, 13% and 15%, of the Company's net sales for the fiscal years ended June 30, 2010, 2009 and 2008, respectively, and 14% and 12% of trade accounts receivable at June 30, 2010 and 2009, respectively. The Company's ten largest customers accounted for approximately 39%, 48% and 46% of the Company's net sales for each of the fiscal years ended June 30, 2010, 2009 and 2008, respectively. Foreign cash balances at June 30, 2010 and 2009 were \$13,288 and \$12,090, respectively.

*Marketable Securities.* The Company classifies all of its marketable securities as available-for-sale securities. Available-for-sale securities are carried at fair value based on quoted market prices, with the unrealized gains and losses net of income taxes, reported as a component of other comprehensive income (loss) included within shareholders' equity. Cost is determined using the average cost method.

*Inventories.* Inventories are stated at the lower of cost or market. Cost is determined on the first-in, first-out (FIFO) method. Baldwin writes down its inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions.

*Property, Plant and Equipment.* The Company depreciates its assets over their estimated useful lives. The estimated useful lives range from 27 to 30 years for buildings, 7 to 10 years for machinery and equipment, 3 to 7 years for furniture and fixtures, the shorter of the lease term or the life of the lease for leasehold improvements and 5 to 7 years for capital leases. Property, plant and equipment are carried at historical cost and are depreciated using primarily the straight-line method. Repair and maintenance expenditures are expensed as incurred. Depreciation expense amounted to \$1,412, \$1,346 and \$1,645 for the fiscal years ended June 30, 2010, 2009 and 2008, respectively.

*Long-lived Assets.* Whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable, the Company evaluates the basis of its long-lived assets based on expectations of undiscounted cash flows related to those assets. In accordance with Accounting Standards Codification ("ASC") ASC 360, Property, Plant and Equipment, the Company believes that no impairment of its long-lived assets existed at June 30, 2010 or at June 30, 2009.

*Stock Based Compensation.* Stock-based compensation represents the cost related to stock-based awards granted to employees and directors. The Company measures stock-based compensation cost at grant date, based on the estimated fair value of the award, and recognizes the cost as expense on a straight-line basis (net of estimated forfeitures) over the employee requisite service period. The Company estimates the fair value of stock options using a Black-Scholes valuation model. The Company typically issues new shares upon share option exercise. The Company records deferred tax assets for awards that will result in deductions on the Company's income tax returns, based on the amount of compensation cost recognized and the Company's statutory tax rate in the jurisdiction in which it will receive a deduction. Differences between the deferred tax assets recognized for financial reporting purposes and the actual tax deduction reported on the Company's income tax return are recorded in Additional Paid-in Capital (if the tax deduction exceeds the deferred tax asset) or in the Consolidated Statement of Operations (if the deferred tax asset exceeds the tax deduction and no additional paid-in capital exists from previous awards).

*Goodwill and Other Intangible Assets.* Goodwill is tested for impairment at the reporting unit level at least annually, (May 31) by determining the fair value utilizing a combination of income and market approaches of the reporting unit and comparing the fair value with its recorded book value. The income approach applies a discounted cash flow methodology to the Company's future period projections and a market approach compares the Company's multiples of revenues and earnings with those of comparable companies. A reporting unit is the lowest level of an entity that is a business and can be distinguished from other activities, operations, and assets of the entity. If, during the annual impairment review, the book value of the reporting unit exceeds the fair value, the implied fair value of

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

the reporting unit's goodwill is compared with the carrying amount of the unit's goodwill. If the carrying amount exceeds the implied fair value, goodwill is written down to its implied fair value. ASC 350, Intangibles — Goodwill and Other, requires management to estimate the fair value of each reporting unit, as well as the fair value of the assets and liabilities of each reporting unit, other than goodwill. The implied fair value of goodwill is determined as the difference between the fair value of a reporting unit, taken as a whole, and the fair value of the assets and liabilities of such reporting unit.

As a result of the deteriorating macro-economic environment, the continued market volatility and the Company's decreased market capitalization, the Company assessed the recoverability of its goodwill carrying value as required. A two-step process was used to test goodwill impairment. The first step was to determine if there is an indication of impairment by comparing the estimated fair value of each reporting unit to its carrying value including goodwill. Goodwill is considered impaired if the carrying value of a reporting unit exceeds the estimated fair value. Upon indication of impairment, a second step is performed to determine the amount of the impairment by comparing the implied fair value of the reporting unit's goodwill with its carrying value. As a result of the assessment, the Company recorded a non-cash goodwill impairment charge of \$5,658, primarily related to its Japan reporting unit during the third quarter of fiscal year 2009. The Company concluded based on its annual impairment test that there was no goodwill impairment during fiscal year 2010.

Other intangible assets include patents, trademarks and engineering drawings, which are amortized on a straight-line basis over the estimated useful lives of the related assets, generally 15 to 30 years. Amortization expense amounted to \$1,253, \$1,427 and \$1,182 for the fiscal years ended June 30, 2010, 2009 and 2008, respectively.

*Income Taxes.* Deferred taxes are determined under the asset and liability approach. Deferred tax assets and liabilities are recognized on differences between the book and tax basis of assets and liabilities using presently enacted tax rates. Further, deferred tax assets are recognized for the expected benefits of available net operating loss carryforwards, capital loss carryforwards and foreign tax credit carryforwards. Valuation allowances are recognized to reduce deferred tax assets to the amount that will more likely than not be realized. In assessing the need for a valuation allowance, management considers all available evidence including past operating results, estimates of future taxable income scheduled reversal of temporary differences and the feasibility of ongoing tax planning strategies. When the Company changes its determination as to the amount of deferred tax assets that can be realized, the valuation allowance is adjusted with a corresponding impact to income tax expense in the period in which such determination is made.

*Fair Value Disclosure of Financial Instruments.* The Company's financial instruments consist of cash and cash equivalents, short-term securities, accounts receivable, notes receivable, marketable securities, capital lease obligations, accounts payable, notes payable, other short and long-term borrowings, and derivative financial instruments. The carrying amount of the short term instruments approximate fair market value due to their short term nature. The carrying amount of marketable securities approximates market value based on quoted market prices. The carrying amount of long term borrowings and capital lease obligations approximates fair value as their interest rate is current market rate.

*Fair Value Measurements.* Effective July 1, 2008, the Company adopted ASC 820, "Fair Value Measurements and Disclosures" which establishes a framework for fair value and expands disclosures about financial instruments.

ASC 820 requires the use of valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Observable inputs consist of market data obtained from independent sources while unobservable inputs reflect the Company's own market assumptions. These inputs create the following fair value hierarchy:

- Level 1 — Quoted prices in active markets for identical assets or liabilities

## BALDWIN TECHNOLOGY COMPANY, INC.

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

- Level 2 — Valuations based on quoted prices in markets that are not active, quoted prices for similar assets or liabilities or all other inputs that are observable
- Level 3 — Unobservable inputs for which there is little or no market data which require the Company to develop its own assumptions

If the inputs used to measure the fair value of a financial instrument fall within different levels of the hierarchy, the financial instrument is categorized based upon the lowest level input that is significant to the fair value measurement.

Whenever possible, the Company uses quoted market prices to determine fair value. In the absence of quoted market prices, the Company uses independent sources and data to determine fair value.

At June 30, 2010, the Company's financial assets and financial liabilities that are measured at fair value on a recurring basis, consistent with the fair value hierarchy provisions, and valued as Level 1 are comprised of marketable securities of \$500. At June 30, 2010, the Company did not have any assets or liabilities at fair value on a recurring basis using significant unobservable inputs (Level 3) in the Consolidated Financial Statements.

In addition to items that are measured as fair value on a recurring basis, there are also assets and liabilities that are measured at fair value on a non-recurring basis. Assets and liabilities that are measured at fair value on a non-recurring basis include certain long-lived assets (see Note 15, "Goodwill and Other Intangible Assets"). The Company determined that the fair value measurements included in each of these assets and liabilities rely primarily on its assumptions as unobservable inputs that are not publicly available. As such, the Company has determined that each of these fair value measurements reside within Level 3 of the fair value hierarchy.

*Warranty.* The Company's standard contractual warranty provisions are to repair or replace, at the Company's option, a product that is proven to be defective. The Company estimates its warranty costs as a percentage of revenues on a product-by-product basis, based on actual historical experience for each product. Hence, the Company accrues estimated warranty costs at the time of sale and includes that cost in "Cost of goods sold". In addition, should the Company become aware of a specific potential warranty claim, a specific charge is recorded and accounted for separately from and in addition to the percentage of revenue discussed above. The Company has accrued estimated future warranty and customer support obligations of \$1,999 and \$2,626 at June 30, 2010 and 2009, respectively, which are included in "Other accounts payable and accrued liabilities" (see Note 18).

*Revenue Recognition.* The Company's products are sold with terms and conditions that vary depending on the nature of the product sold and the cultural and business environments in which the Company operates.

The Company recognizes revenue based on the type of product sold and the obligations under the contract. Revenue is recognized on contracts for design, manufacture and delivery of equipment without installation (equipment sales) and parts, service and consumables at the time of transfer of title or rendering of services. The Company considers revenue to be realized on equipment sales when it has persuasive evidence of an arrangement, delivery has occurred, the sales price is fixed or determinable and collectability is reasonably assured. In contracts that include additional services, including installation, start-up and/or commissioning (system sales), the Company recognizes revenue on each element of the contract as appropriate. Installation services are provided to the customer on an as-needed basis and may be contracted for separately or included in the same contract as the equipment sale. Revenue is recognized for installation services at the completion of the contractually required services.

Contracts for system sales may include multiple-element revenue arrangements. When the Company enters into multiple-element revenue arrangements, which may include installation services as a contractual element, together with the purchase price of the product as a contractual element, the arrangement is separated into its stand-alone elements for revenue recognition purposes. When the delivered item has value to the customer on a stand alone basis, there is objective and reliable evidence of the fair value of the undelivered item and the arrangement does not include a general right of return, revenue is recognized on each element as separate units of accounting. If

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

these criteria are not met, the arrangement is accounted for as one unit of accounting which would result in revenue being deferred until the last undelivered contractual element is fulfilled.

Standard payment terms may include a deposit to be received with the customer order, progress payments until equipment is shipped and a portion of the balance due within a set number of days following shipment. In those cases when the Company renders invoices prior to performance of the service, the Company records deferred revenue until completion of the services, whereupon revenue is fully recognized.

Freight terms are generally FOB shipping dock with risk of loss passing to the purchaser at the time of shipment. If a loss should occur in transit, the Company is not responsible for, and does not administer insurance claims unless the terms are FOB destination. The customer is not contractually eligible for any refund of the purchase price or right of return of the contracted product, unless the product fails to meet published product specifications and the Company fails to perform its obligations under product warranty terms.

Products are generally ordered on purchase orders, which may contain formal product acceptance clauses. Occasionally, clauses may be included in a contract or purchase order that require acceptance related to certain specifications as outlined in the contract or purchase order. In these instances, the nature of the acceptance is evaluated to ensure that the Company has met the applicable criteria concurrent with the shipment of equipment to the customer.

The Company sometimes uses distributors to assist in the sales function. In these cases, the Company does not recognize revenue until title for the equipment and risk of loss have passed to the ultimate customer, who then becomes obligated to pay with no right of return. In addition, the Company reviews all alliance agreements to determine whether revenue should be recognized on a gross or net basis and recognizes revenue as appropriate in the circumstances.

*Shipping and Handling, Advertising.* Costs related to shipping and handling are included in cost of goods sold in the Consolidated Statement of Operations. The Company expenses advertising costs when incurred. Advertising expense was \$141, \$147 and \$222 for the fiscal years ended June 30, 2010, 2009 and 2008, respectively.

*Deferred Financing Costs.* The Company capitalizes costs associated with the issuance of debt, including bank, legal, investment advisor and accounting fees and other expenses. Deferred financing costs are amortized on a straight line basis over the term of the related financing transaction and are included in interest expense.

*Engineering and Development.* Engineering and development (including research) costs are expensed as incurred.

*Earnings Per Share.* Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share is similar to basic earnings per share except that it reflects the potential dilution that could occur if dilutive securities, such as stock options, were exercised or converted into common shares or resulted in the issuance of common shares.

*Comprehensive Income (Loss).* As shown in the Statement of Changes in Shareholders' Equity, comprehensive income (loss) is a measure of net income (loss) and all other changes in equity of the Company that result from recognized transactions and other events of the period other than transactions with shareholders.

*Use of Estimates.* The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The most significant assumptions and estimates relate to the determination of accrued expenses including warranty, accounts receivable and inventory valuations, revenue recognition, useful lives of assets, deferred tax asset valuations, stock option valuation, and goodwill and intangible valuations. Actual results could differ from those estimates.

## BALDWIN TECHNOLOGY COMPANY, INC.

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

#### Recent Accounting Pronouncements.

##### *Revenue Arrangements with Multiple Deliverables*

In October 2009, the FASB issued ASC Update No. 2009-13, "Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements." The consensus in Update No. 2009-13 supersedes certain guidance in Topic 605 (formerly EITF Issue No. 00-21, Multiple-Element Arrangements) and requires an entity to allocate arrangement consideration at the inception of an arrangement to all of its deliverables based on their relative selling prices. The consensus eliminates the use of the residual method of allocation and requires the use of the relative-selling-price method in all circumstances in which an entity recognizes revenue for an arrangement with multiple deliverables subject to ASC 605-25. The Company was required to adopt Update No. 2009-13 as of July 1, 2010. The Company does not believe adoption of Update No. 2009-13 will have a material effect on its future results of operations and financial position.

##### *Codification*

In June 2009, the FASB issued SFAS No. 168, "The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles" ("SFAS 168"). SFAS 168 establishes the FASB Accounting Standards Codification™ ("Codification" or "ASC") as the sole source of authoritative GAAP recognized by the FASB for nongovernmental entities. Rules and interpretive releases issued by the SEC under federal securities laws are also sources of authoritative GAAP for SEC registrants. SFAS 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009 (effective September 30, 2009 for the Company). The adoption of SFAS 168 did not have a material effect on the Company's Consolidated Financial Statements.

##### *Fair Value Measurements*

On July 1, 2008, the Company adopted certain provisions of a new accounting standard which defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. On July 1, 2009, the Company adopted the remaining provisions of this accounting standard as it relates to nonfinancial assets and liabilities that are not recognized or disclosed at fair value on a recurring basis. The adoption of this standard as it related to certain nonfinancial assets and liabilities did not impact the Company's consolidated financial statements in any material respect.

On July 1, 2009, the Company adopted the accounting pronouncement issued in April 2009 that provides additional guidance for estimating fair value in accordance with the accounting standard for fair value measurements when the volume and level of activity for the asset or liability has significantly decreased. This pronouncement stated that when quoted market prices may not be determinative of fair value, a reporting entity shall consider the reasonableness of a range of fair value estimates. The adoption of this standard as it related to inactive markets did not impact the Company's consolidated financial statements in any material respect.

##### *Business Combinations*

On July 1, 2009, the Company adopted the accounting pronouncements relating to business combinations, including assets acquired and liabilities assumed arising from contingencies. These pronouncements established principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree as well as provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. In addition, these pronouncements eliminate the distinction between contractual and non-contractual contingencies, including the initial recognition and measurement criteria and require an acquirer to develop a systematic and rational basis for subsequently measuring and accounting for acquired

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

contingencies depending on their nature. The adoption of these pronouncements will have an impact on the manner in which the Company accounts for acquisitions.

**Note 3 — Accumulated Other Comprehensive Income (Loss):**

Accumulated Other Comprehensive Income (Loss) (“OCI”) is comprised of various items, which affect equity that result from recognized transactions and other economic events other than transactions with owners in their capacities as owners. OCI consists of the following:

	For the Years Ended June 30,	
	2010	2009
	(In thousands)	
Cumulative translation adjustment . . . . .	\$1,484	\$3,009
Unrealized gain (loss) on investments, net of tax benefit of \$121 (benefit of \$70 at June 30, 2009) . . . . .	(166)	(96)
Pension funded status, net of tax benefit of \$768 (benefit of \$577 at June 30, 2009) . . . . .	(993)	(882)
	\$ 325	\$2,031

**Note 4 — Earnings per Share:**

The following represents a reconciliation from basic earnings per share to diluted earnings per share. Options to purchase 1,460,233, 1,386,401 and 657,334 shares of common stock were outstanding at June 30, 2010, June 30, 2009 and June 30, 2008, respectively, but were not included in the computation of diluted earnings per share because the effect would be antidilutive.

	<u>\$389</u>	<u>\$16,066</u>	<u>\$3,534</u>	<u>\$20,300</u>

(a) The Company's primary source of external financing is its Credit Agreement, as amended with certain lenders (the "Lenders") and Bank of America ("BofA") as Agent (the "Credit Agreement"), which has a term that ends on November 21, 2011. The borrowings under the Credit Agreement (approximately \$18,000 at June 30, 2010) are secured in the U.S. by a pledge of substantially all of the Company's domestic assets and in Europe by a pledge of the Company's European assets and the stock of the Company's European subsidiaries and certain of the Company's Asian subsidiaries.

On July 31, 2009, the Company entered into an amendment to the Credit Agreement (the "July 31, 2009 Amendment") pursuant to which (i) euro borrowings bear interest at LIBOR plus 4.50%, or in the case of U.S. dollar loans, at the prime rate plus 3.00%, (ii) the amount of the revolving commitment was reduced from \$35,000 to

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

\$25,000 provided that the aggregate of all revolving loans outstanding plus \$7,900 do not exceed \$25,000 and (iii) the collateral was increased.

The Credit Agreement, as amended, by the July 31, 2009 Amendment, requires the Company to satisfy certain minimum EBITDA, Fixed Charge Coverage Ratio, Total Funded Debt Ratio, Minimum Currency Adjusted Net Sales, Capital Expenditures, and Minimum Liquidity tests. Minimum EBITDA, as defined, must not be less than i) \$1,100 for the six month period ending December 31, 2009, ii) \$2,300 for the three Fiscal Quarters ending March 31, 2010, iii) \$4,100 for the fiscal year ending June 30, 2010 and iv) \$12,000 for each Four Fiscal Quarter Computation Period ending on or after September 30, 2010. The Fixed Charge Coverage Ratio, as defined, must not be less than 1.25 to 1.00 for the Four Fiscal Quarter Computation Period ending September 30, 2010. The Leverage Ratio must not exceed 3.00 to 1.00 for the Four Fiscal Quarter Computation Period ending September 30, 2010. Currency Adjusted Net Sales must not be less than certain defined levels for the fifteen reporting periods consisting of three consecutive three-month periods commencing with the first reporting period ending on July 31, 2009 and the final reporting period ending on September 30, 2010. Capital expenditures must not exceed \$1,000 for the fiscal year ending June 30, 2010. Minimum Liquidity, as defined as the U.S. Dollar Equivalent of consolidated cash and cash equivalents of the Company and its U.S. and European Subsidiaries shall not be less than \$300 and not permit borrowings under the Revolving Loan or request issuance or increase in any Letters of Credit if the sum of all Dollar Equivalent Revolving Outstandings, Letters of Credit and Specified Availability exceeds \$25,000. In addition the July 31, 2009 Credit Agreement Amendment required that the net proceeds related to the settlement of the patent infringement lawsuit be used to repay a portion of the Company's long-term obligation. A payment of approximately \$7,700 was made on October 15, 2009 as a result of the settlement. In May 2010 the Company made the final payment on the term loan.

The Company incurred cash costs of approximately \$1,224 associated with the July 31, 2009 Amendment. Certain of these costs, along with legacy deferred financing costs, were required to be charged to expense and the Company recorded a charge of \$1,183 during the first quarter of fiscal year 2010. Certain of these costs coupled with legacy deferred financing costs, totaling approximately \$1,279, will be amortized over the remaining term of the amended agreement.

On May 12, 2010, the Company entered into Waiver and Amendment No. 6 to Credit Agreement which waived the Company's failure to satisfy the Currency Adjusted Net Sales covenant for the consecutive three-month period ended April 30, 2010 and amended the Credit Agreement to change the date for delivery of the Company's financial projections for the Fiscal Year commencing July 1, 2010.

On June 9, 2010, the Company entered into Waiver and Amendment No. 7 to Credit Agreement which waived the Company's failure to meet the Currency Adjusted Net Sales covenant for the consecutive three-month period ended May 31, 2010 and amended the Credit Agreement to make certain modifications to (i) the required Currency Adjusted Net Sales covenant for the periods consisting of two consecutive months ending June 30, 2010, three consecutive months ending July 31, 2010, three consecutive months ending August 31, 2010 and three consecutive months ending September 30, 2010, (2) the EBITDA financial covenants, (iii) the Minimum EBITDA covenant to provide that minimum EBITDA (as defined), must not be less than \$2,769 for the fiscal year ending June 30, 2010 and \$12,000 for each Four Fiscal Quarter Computation Periods ending on or after September 30, 2010 and (iv) to permit the Company to acquire Nordson UV Ltd. and Horizon Lamps, Inc. ("Nordson UV") and incur certain debt in connection with the acquisition. At June 30, 2010 the Company was in compliance with all financial covenants under the amended Credit Agreement.

On September 28, 2010, the Company entered into Amendment #8 to the Credit Agreement (the "Amendment #8") with BofA. Under the terms of the Amendment #8, the total commitment under the revolving credit agreement was reduced from \$25 million to \$20 million; certain adjustments were made to the interest payment provisions; and the Company provided the lenders warrants with a term of 10 years to purchase 352,671 shares of common stock in the Company for \$0.01 per share. The Warrants also contain a put provision that enables the Holder after September 28, 2012 to request a cash settlement of the then fair market value of the Warrants in an

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

amount not to exceed \$1.50 per share. The Amendment #8 sets new covenants for currency adjusted net sales, establishes minimum EBITDA levels and sets a limit on capital expenditures for the fiscal year ended June 30, 2011.

(b) \$2,521 five year subordinated promissory note with principal and interest payments due and payable in five annual installments.

The Company maintains relationships with both foreign and domestic banks, which combined have extended short- and long-term credit facilities to the Company totaling \$32,256. As of June 30, 2010, the Company had \$19,535 outstanding (including Letters of Credit). The amount available under these credit facilities at June 30, 2010 was \$4,521.

Maturities of long-term debt in each fiscal year ending after June 30, 2010 are as follows:

<u>Fiscal Year Ending June 30,</u>	<u>(In thousands)</u>
2011 .....	\$ 389
2012 .....	14,376
2013 .....	499
2014 .....	561

Total income tax provision .....	<u>\$ 1,978</u>	<u>\$ (2,013)</u>	<u>\$ 1,862</u>

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

Deferred income taxes are provided on temporary differences between the financial reporting basis and tax basis of the Company's assets and liabilities. The principal temporary differences which give rise to deferred tax assets and liabilities at June 30, 2010 and 2009 are as follows:

	<u>June 30, 2010</u>	<u>June 30, 2009</u>
<b>Deferred tax assets (liabilities):</b>		
Foreign tax credit carryforwards . . . . .	\$ 3,853	\$ 6,325
Foreign net operating loss carryforwards . . . . .	8,525	10,575
Domestic net operating loss carryforwards . . . . .	2,432	—
Capital loss carryforwards . . . . .	164	181
Inventories . . . . .	1,426	2,408
Pension/deferred compensation . . . . .	2,962	2,745
Identifiable intangibles . . . . .	(2,721)	(1,830)
Other deferred tax assets, individually less than 5% . . . . .	2,293	1,848
Other deferred tax liabilities, individually less than 5% . . . . .	<u>(15)</u>	<u>(71)</u>
Net deferred tax asset . . . . .	18,919	22,181
Valuation allowance . . . . .	<u>(10,232)</u>	<u>(12,687)</u>
Total net deferred tax assets . . . . .	<u>\$ 8,687</u>	<u>\$ 9,494</u>

At June 30, 2010, net operating loss carryforwards of \$40,430 may be available to reduce future foreign taxable income. The majority of the Company's foreign net operating loss ("NOL") carry-forwards have an indefinite carry-forward period. In addition, as of June 30, 2010, the Company has indefinite foreign capital loss carry-forwards available in the amount of \$586. At June 30, 2010 the Company had U.S. NOL carryforwards of \$6,856, of which \$1,790 will expire in 2020 and \$5,066 which will expire in 2030. Foreign tax credits of \$3,853 expire in 2013 through 2019.

The Company establishes valuation allowances in accordance with the provisions of ASC 740, Income Taxes. The change in the valuation allowance for the period ended June 30, 2010 primarily reflects the expiration of fully reserved foreign tax credits and valuation allowance provided on certain foreign NOL and foreign tax credits.

The Company has not had to provide for income taxes on \$25,739 of cumulative undistributed earnings of subsidiaries outside the United States because of the Company's intention to indefinitely reinvest those earnings.

On June 30, 2010, the Company's unrecognized tax benefits totaled \$4,102, including \$3,726 of unrecognized tax benefits which, if recognized, would reduce the annual effective income tax rate. Approximately \$1,469 of the reduction would be in the form of foreign tax credits that would likely attract a valuation allowance.

Where applicable, the Company recognizes potential accrued interest and penalties related to unrecognized tax benefits from its global operations in income tax expense. During the fiscal years ending June 30, 2010 and 2009, the Company accrued \$18 and \$39, respectively, in potential interest and penalties associated with uncertain tax positions. To the extent interest and penalties are accrued in the Company's income tax expense, such amounts, if reversed, will reduce the effective income tax rate. At June 30, 2010 the Company had \$267 of accrued interest and penalty.

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

A reconciliation of the beginning and ending amount of unrecognized tax benefits, excluding interest and penalties associated with uncertain tax positions is as follows:

	<b>Year Ended June 30,</b>	
	<b>2010</b>	<b>2009</b>
	<b>(In thousands)</b>	
Balance as of July 1 . . . . .	\$4,999	\$4,855
Additions based on tax positions related to the current year . . . . .	90	144
Reductions for tax positions related to prior years . . . . .	(113)	—
Decrease from lapse of statute of limitation . . . . .	(874)	—
Balance as of June 30 . . . . .	<u>\$4,102</u>	<u>\$4,999</u>

The Company conducts its business globally and, as a result, the Company or one or more of its subsidiaries files income tax returns in the U.S. and various state and foreign jurisdictions. The Company is subject to ongoing tax examinations and assessments in such major jurisdictions as the U.S., Germany, Sweden and Japan. The earliest year for which the Company or its affiliates are subject to examination by tax authorities is the tax year 2000. It is reasonable possible that in the next 12 months, because of changes in facts and circumstances, the unrecognized tax benefits for tax positions taken for related to previously filed tax returns may decrease. In fiscal year 2010 the Company finalized a tax audit in the U.S. for fiscal year 2008 and in early fiscal year 2011 is expected to finalize a tax audit in Germany for the fiscal years 2000 through 2004. The range of possible decrease related to the potential settled adjustments and expiration of the statute of limitations is zero to \$2.4 million.

The reconciliation of the computed “expected” provision (determined by applying the United States Federal statutory income tax rate of 34% to income before income taxes) to the actual tax provision is as follows:

	<b>For the Years Ended June 30,</b>		
	<b>2010</b>	<b>2009</b>	<b>2008</b>
	<b>(In thousands)</b>		
Computed “expected” tax provision . . . . .	\$ 2,381	\$(4,700)	\$ 2,811

**Note 10 — Common Stock:**

Except with respect to the election or removal of Directors, and certain other matters with respect to which Delaware law requires each class to vote as a separate class, the holders of the Company’s Class A Common Stock (“Class A”) and Class B Common Stock (“Class B”) vote as a single class on all matters, with each share of Class A having one vote per share and each share of Class B having ten votes per share.

With respect to the election of Directors, the holders of Class A, voting as a separate class, are entitled to elect 25% of the total number of Directors (or the nearest higher whole number) constituting the entire Board of Directors. The holders of Class B, voting as a separate class, are entitled to elect the remaining Directors, so long as the number of outstanding shares of Class B is equal to at least 12.5% of the number of outstanding shares of both classes of Common Stock as of the record date of the meeting of stockholders. If the number of outstanding shares

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

of Class B is less than 12.5% of the total number of outstanding shares of both classes of Common Stock as of the record date of the meeting of stockholders, the remaining directors are elected by the holders of both classes of Common Stock voting together as a single class, with the holders of Class A having one vote per share and the holders of Class B having ten votes per share. As of June 30, 2010, the number of outstanding shares of Class B constituted approximately 7% of the total number of outstanding shares of both classes of Common Stock.

Class A has no conversion rights; however, shares of Class B are convertible into shares of Class A on a one-for-one basis. In addition, no dividend in cash or property may be declared or paid on shares of Class B without a dividend being declared or paid on shares of Class A of at least 105% of the dividend declared or paid on shares of Class B. The Company's current Credit Agreement prohibits the payment of dividends.

In November 1999, the Company initiated its most recent stock repurchase program. Under the program, the Company is authorized to utilize up to \$5,000 to repurchase Class A shares. As of June 30, 2010, 1,192,760 shares of Class A had been repurchased for \$2,638. During the fiscal year ended June 30, 2010 no shares of Class A were repurchased. Repurchases are restricted under the terms of the Credit Agreement.

**Note 11 — Stock Based Compensation:**

Stock based incentive awards are provided under the terms of the Company's plans:

The 1996 Stock Option Plan, as amended and restated (the "1996 Plan") allowed for the granting, at fair market value on the date of grant, of incentive stock options, non-qualified stock options, and tandem SARS to employees and Eligible Directors for up to a total of 1,875,000 shares of Class A. All options became exercisable in three equal annual installments commencing on the second anniversary of the date of grant. Unexercised options terminate no later than ten years from the date of grant. The 1996 Plan terminated on November 18, 2006; however, outstanding options under the 1996 Plan continue to be subject to the terms thereof.

The 1998 Non-Employee Directors' Stock Option Plan provided for the granting, at fair market value on the date of grant, of options to Eligible Directors to purchase up to an aggregate of 250,000 shares of Class A Common Stock. Under the 1998 Plan, each year, each Eligible Director received a grant of options to purchase 3,000 shares of Class A Common Stock. The options vested one-third per year on each succeeding anniversary of the date of grant. Unexercised options terminate no later than ten years from the date of grant. The 1998 Plan was terminated on November 21, 2002; however, outstanding options under the 1998 Plan continue to be subject to the terms thereof.

The 2005 Equity Compensation Plan (the "2005 Plan") was approved by the Company's Board of Directors in October 2005 and by its stockholders in November 2005. The 2005 Plan was amended in August 2008 to increase by 1,000,000 shares the number of shares of Class A Common Stock that may be subject to awards outstanding under the 2005 Plan from 1,200,000 to 2,200,000. This amendment was approved by the stockholders on November 11, 2008. The 2005 Plan provides for the granting of a variety of awards to the Company's employees, non-employee directors, and others who provide services to the Company, including stock-based incentives and cash-based incentives. The maximum aggregate number of shares that may be delivered to participants or their beneficiaries pursuant to all awards granted under the 2005 Plan is now 2,200,000. During fiscal year 2010, an aggregate of 408,440 shares were granted as restricted shares/share units, long term incentive performance awards and stock options under the 2005 Plan. Canceled awards during fiscal year 2010 totaled 25,167, and will become available for future grants. Unless otherwise set forth in an award agreement, awards granted as an option to purchase shares shall vest in three equal annual installments commencing on the second anniversary of the date of such grant. Awards granted as restricted shares/share units have restrictions that generally lapse in three equal annual installments commencing on the first anniversary of the date of such award.

At June 30, 2010, the aggregate number of shares available for future grants under the 2005 Plan is 839,946.

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

Compensation expense recorded for all of the Company's share-based compensation plans for the fiscal years, 2010, 2009 and 2008 was \$829, \$1,092 and \$1,031, respectively. The tax benefit related to this compensation expense for the fiscal years 2010, 2009 and 2008 was \$274, \$373 and \$336, respectively.

**Stock Options**

The aggregate intrinsic value of options exercised during the fiscal year ended June 30, 2010 was \$15.

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

The following table summarizes information regarding stock options outstanding and exercisable at June 30, 2010:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number of Outstanding Options	Weighted Average Remaining Contractual Life	Weighted Average Outstanding Price	Number of Exercisable Options	Weighted Average Exercise Price
\$0.58 — \$1.50	133,167	1.5 years	\$1.01	126,167	\$1.00
\$1.82 — \$3.25	390,834	4.6 years	\$2.03	173,334	\$2.08
\$3.41 — \$4.90	346,668	4.8 years	\$4.00	320,000	\$3.93
\$4.95 — \$5.49	121,333	7.1 years	\$5.45	44,659	\$5.41

The aggregate intrinsic value of both outstanding and exercisable options at June 30, 2010 was \$24.

Total unrecognized compensation costs related to non-vested stock option awards at June 30, 2010 is \$251 and is expected to be recognized over the weighted average period of approximately 2.1 years.

The Company estimates the fair value of stock options at the date of grant using a Black-Scholes valuation model. Key inputs and assumptions used to estimate the fair value of stock options include the grant price of the award, the expected option term, volatility of the Company's stock, the risk free rate and the Company's dividend yield.

The following table presents the weighted average assumptions used for options granted.

	For the Years Ended June 30,		
	2010	2009	2008
	(In thousands)		
Option term(1) . . . . .	5	5	5
Volatility(2) . . . . .	50.51	49.85	63.57
Risk free rate . . . . .	2.31	3.18	4.77
Dividend yield . . . . .	—	—	—
Weighted average fair value . . . . .	\$ 0.84	\$ 1.04	\$ 3.18

- (1) The option term is the number of years that the Company estimates, based on history, that options will be outstanding prior to exercise.
- (2) Prior to fiscal 2006, expected volatility was based on historical volatilities over the expected terms. With the adoption of SFAS 123(R) the Company continues to determine expected volatility based on historical volatilities but has incorporated adjustments associated with an unusually volatile period from its mean-reversion analysis for fiscal years commencing with 2006.

**Restricted Stock**

During the years ended June 30, 2010 and 2009, the Company issued restricted shares/share units under the 2005 Plan. Awards granted as restricted shares/share units have restrictions that generally lapse in three equal annual installments commencing on the first anniversary of the date of each such award. Compensation expense of \$655 and \$884 was recognized during the periods ended June 30, 2010 and 2009, respectively. The aggregate unrecognized compensation costs related to the non-vested restricted grants at June 30, 2010 was \$443 and is expected to be recognized over a weighted-average period of approximately 1.5 years.

**BALDWIN TECHNOLOGY COMPANY, INC.**

***Long Term Incentive Performance Share Awards***

During the fiscal years ended June 30, 2010 and 2009, the Company issued long term incentive performance share awards (“PSAs”) under the 2005 Plan. PSAs are stock awards where the number of shares ultimately received by the employee depends on the Company’s performance against specified targets and typically vest during a three-year period. The fair value of each PSA is determined on the grant date, based on the Company’s stock price. Over the performance period, the number of shares of stock that will be issued and the associated compensation expense is adjusted upward or downward based upon the probability of achievement of performance targets. The ultimate number of shares issued and the related compensation cost recognized as expense will be based on a comparison of the final performance metrics to the specified targets. The fair value of PSAs granted during the fiscal years ended June 30, 2010 and 2009, was \$183 and \$87, respectively. Total fair value of PSAs vested and compensation expense during the year ended June 30, 2010 and 2009 was \$0, based on the current assessment of the probability of achievement.

**BALDWIN TECHNOLOGY COMPANY, INC.**

**Note 12 — Supplemental Compensation:**

In the U.S., the Company maintains the Baldwin Technology Profit Sharing and Savings Plan. The Company typically matched up to 5% of eligible compensation and the participants' interests in the Company's contributions vest immediately. During fiscal years 2009 and 2010, the Company suspended its matching contributions to the plan. Participant contributions are made on a weekly basis, while the Company's matching contributions are made on a quarterly basis. Employer contributions charged to income were \$0, \$154 and \$254, respectively, for the fiscal years ended June 2010, 2009 and 2008. The assets of the plan are invested primarily in mutual funds, money market funds, and Class A Common Stock of the Company. The Class A Common Stock constituted approximately 1% of the total assets of the Plan at June 30, 2010.

Certain subsidiaries within Europe maintain defined contribution and/or profit sharing plans. Amounts expensed under these plans based upon the age, salary and years of service of employees covered by the plans were as follows:

	<u>For the Years Ended June 30,</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
	(In thousands)		
Baldwin Germany GmbH .....	\$213	\$218	\$221
Baldwin IVT AB .....	44	48	59
Baldwin Jimek AB .....	75	67	77

Baldwin Globaltec Ltd. ....	<u>8</u>	<u>8</u>	<u>10</u>
Total expense .....	<u>\$392</u>	<u>\$401</u>	<u>\$446</u>

In Germany, there is one pension plan covering one former employee, and the Company's Japanese subsidiary maintains a retirement plan covering all of its employees. These defined benefit plans provide for benefits, at maturity age, in lump sum payments on retirement or death or as a disability pension in case of disability. The fair value of 100% of plan assets are represented by insurance contracts and the expected return on plan assets is determined based on the expected long term rate of return on plan assets. The Company also has a non-qualified Supplemental Executive Retirement Plans (SERPs). The SERPs provides benefits to eligible executives, based on average earnings, years of service and age at retirement or separation of employment. The Company has established a Trust to provide a potential source of funds to pay benefits under the SERPs. The amount held in trust at June 30, 2010 and 2009 was \$1,253 and \$1,156, respectively, which represents the market value of the trust assets measured

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

as a Level 1 type valuation as of June 30, 2010 and 2009, respectively. The Company uses a measurement date of June 30 for its defined benefits plans.

The following tables set forth the components of net periodic benefit costs, the funded status and key actuarial assumptions, and reconciliations of projected benefit obligations and fair values of plan assets of the defined benefit plans:

Undiscounted benefit amounts expected to be paid for each of the next five successive fiscal years and for the aggregate next five years thereafter are as follows:

<u>Fiscal Years Ending June 30,</u>	<u>Amount</u> (In thousands)
2011 .....	\$1,058
2012 .....	804
2013 .....	1,030
2014 .....	813
2015 .....	613
Aggregate for 2016 through 2020 .....	4,373

The amount expected to be contributed by the Company to its defined benefit pension plans during fiscal year 2011 is approximately \$287.

**Note 13 — Restructuring:**

**October FY 2009 Plan:**

On October 29, 2008, the Company committed to the principal features of a plan to restructure and achieve operational efficiencies in its operations in Germany. Actions under the Plan commenced during October 2008 and were substantially completed by December 31, 2008. No non-cash charges were contemplated in connection with the Plan. Payments made under the plan were completed by September 30, 2009.

**Quarter 3 FY 2009 Plans:**

In January and March 2009, the Company committed to the principal features of plans to restructure some of its existing operations. These plans included the consolidation of production facilities in Germany, as well as employee reductions in Germany, Sweden, Italy and the U.S. The actions were taken in response to sustained weak market conditions. Actions under the plan commenced during the third quarter of Fiscal 2009; and the Company substantially completed the actions by June 30, 2009.

**BALDWIN TECHNOLOGY COMPANY, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

**Quarter 4 FY 2010 Plan:**

In June 2010 the Company committed to the principal features of a plan to additionally restructure its operation in Germany. Actions under the plan commenced and were completed by June 30, 2010. All costs associated with the plan are cash payments related to employee reductions. Payments will continue through the second quarter of fiscal 2011.

	<b>Initial Reserve</b>	<b>Payments against Reserve</b>	<b>Balance at June 30, 2010</b>

**Note 14 — Business Acquisition:**

On June 30, 2010, the Company concluded its acquisition of 100% of the outstanding shares of Nordson UV. The acquired business provides UV (ultraviolet) curing systems to the graphic arts markets, as well as a line of parts and consumables (ultraviolet lamps). The acquisition introduces the Company to delivery of UV curing systems as well as expanding opportunities in UV applications and the digital (ink jet) market sector.

In conjunction with the acquisition, the Company executed a five-year purchase note payable to Nordson Corporation, the seller. The original amount of the note payable was \$2,150. Due to a subsequent net working capital adjustment, the note will be revised to \$2,521 of which \$1,871 represents the purchase price and \$650 represents costs of the transaction funded by the seller to be repaid to the seller over the period of the note.

The following summarizes the allocation of purchase price, based on a management's valuation study, to the fair value of assets acquired and liabilities assumed at the date of acquisition.

Assets acquired:	
Accounts Receivable . . . . .	\$1,875
Inventory . . . . .	2,740
Property, plant and equipment . . . . .	1,174

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

**Note 15 — Goodwill and Other Intangible Assets:**

The changes in the carrying amount of goodwill for each of the fiscal years ended June 30, 2010 and 2009 are as follows:

Activity in the fiscal year ended June 30, 2010 was as follows:

	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>	<u>Net Book Value</u>
	(In thousands)		
Balance as of July 1, 2009 .....	<u>\$22,170</u>	<u>\$1,462</u>	<u>\$20,708</u>
Effects of currency translation .....	<u>(643)</u>	<u>(37)</u>	<u>(606)</u>
Balance as of June 30, 2010 .....	<u>\$21,527</u>	<u>\$1,425</u>	<u>\$20,102</u>

Activity in the fiscal year ended June 30, 2009 was as follows:

	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>	<u>Net Book Value</u>
	(In thousands)		
Balance as of July 1, 2008 .....	<u>\$31,516</u>	<u>\$ 3,765</u>	<u>\$27,751</u>
Impairment* .....	(8,037)	(2,379)	(5,658)
Oxy-Dry price adjustment .....	(164)	—	(164)
Effects of currency translation .....	<u>(1,145)</u>	<u>76</u>	<u>(1,221)</u>
Balance as of June 30, 2009 .....	<u>\$22,170</u>	<u>\$ 1,462</u>	<u>\$20,708</u>

\* The Company recorded a goodwill impairment charge mainly related to its Japan reporting unit during the third quarter of fiscal year 2009.

Intangible assets subject to amortization were comprised of the following:

<u>Intangible Assets:</u>	<u>Amortization Period (Years)</u>	<u>As of June 30, 2010</u>		<u>As of June 30, 2009</u>	
		<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>
		(In thousands)		(In thousands)	
Patents and Trademarks .....	12-20	\$11,372	\$ 7,155	\$10,998	\$6,830

Total .....		<u>\$21,671</u>	<u>\$10,572</u>	<u>\$20,607</u>	<u>\$9,397</u>

The weighted average life for intangible assets at June 30, 2010 was 13 years. Amortization expense was \$1,253 for the fiscal year ended June 30, 2010, \$1,427 for the fiscal year ended June 30, 2009 and \$1,182 for the fiscal year ended June 30, 2008. The net carrying amount of intangible assets decreased \$111 for the year ended June 30, 2010 primarily due to amortization of \$1,253 and effects of currency translation of \$563, offset by intangibles created as a result of the Nordson acquisition of \$1,560 and the costs of retaining and obtaining future economic benefits of patents of \$147.

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

Estimated amortization expense for each of the five fiscal years is as follows:

<u>Fiscal Years Ending June 30,</u>	<u>Amount</u> <u>(In thousands)</u>
2011 .....	\$1,312
2012 .....	\$1,217
2013 .....	\$1,106
2014 .....	\$1,052
2015 .....	\$1,014

**Note 16 — Commitments and Contingencies:**

Future minimum annual lease payments under capital leases are as follows at June 30, 2010:

<u>Fiscal Years Ending June 30,</u>	<u>Amount</u> <u>(In thousands)</u>
2011 .....	99
2012 .....	3
2013 .....	—
2014 .....	—
2015 .....	—
Present value of minimum lease payments (net of \$2 with interest) .....	<u>\$102</u>

At June 30, 2010, \$3 (\$90 at June 30, 2009) was included in “Other long-term liabilities” representing the long-term portion of the present value of minimum lease payments, and \$99 (\$137 at June 30, 2009) was included in “Other accounts payable and accrued liabilities” representing the current portion of the present value of minimum lease payments. At June 30, 2010, the gross asset totaled \$95, with accumulated depreciation of \$69.

Rental expense under operating leases amounted to approximately \$7,316, \$6,697 and \$6,696 for the years ended June 30, 2010, 2009 and 2008, respectively. Aggregate future annual rentals under noncancellable operating leases for periods of more than one year at June 30, 2010 are as follows:

<u>Fiscal Years Ending June 30,</u>	<u>Amount</u> <u>(In thousands)</u>
2011 .....	\$6,376
2012 .....	\$4,594
2013 .....	\$3,537
2014 .....	\$2,339
2015 .....	\$1,892
2016 and thereafter .....	\$4,383

**Note 17 — Related Parties:**

Samuel B. Fortenbaugh III, a Director of the Company since 1987, has rendered legal services to the Company since September 2002. During the fiscal years ended June 30, 2010, 2009 and 2008, the Company paid \$139, \$95 and \$171, respectively to Mr. Fortenbaugh for legal services rendered.

Akira Hara, a Director of the Company from 1989 through 2008, is currently a strategic advisor to the Company and Chairman of Baldwin Japan Limited, a wholly-owned subsidiary of the Company. Mr. Hara, as strategic advisor, receives compensation of approximately \$40 per year through September 30, 2010. In addition, Mr. Hara receives benefits under a non-qualified supplemental executive retirement plan, which expires in 2015 or

**BALDWIN TECHNOLOGY COMPANY, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

upon his death whichever occurs later. The estimated annual benefit payable to him under this supplemental plan is approximately \$183.

**Note 18 — Warranty Costs:**

The Company's standard contractual warranty provisions are to repair or replace product that is proven to be defective. The Company estimates its warranty costs as a percentage of revenues on a product by product basis, based on the actual historical experience. The Company accrues estimated warranty costs, reported in "other accounts payable and accrued liabilities", at the time of sale. In addition, should the Company become aware of a specific potential warranty claim, a specific charge is recorded and accounted for separate from and in addition to the percentage of revenue discussed above.

	<u>Warranty Amount</u> (In thousands)
Warranty reserve at June 30, 2008. . . . .	\$ 5,421
Additional warranty expense accruals . . . . .	2,708
Payments against reserve. . . . .	(4,817)
Effects of currency rate fluctuations. . . . .	<u>(686)</u>
Warranty reserve at June 30, 2009. . . . .	\$ 2,626
Additional warranty expense accruals . . . . .	2,271
Additional warranty reserve related to Nordson acquisition. . . . .	240
Payments against reserve. . . . .	(3,085)
Effects of currency rate fluctuations. . . . .	<u>(53)</u>
Warranty reserve at June 30, 2010. . . . .	<u>\$ 1,999</u>

**Note 19 — Legal Proceedings:**

Baldwin is involved in various legal proceedings from time to time, including actions with respect to commercial, intellectual property and employment matters. The Company believes that it has meritorious defenses against the claims currently asserted against it and intends to defend them vigorously. However, the outcome of litigation is inherently uncertain, and the Company cannot be sure that it will prevail in any of the cases currently in litigation. The Company believes that the ultimate outcome of any such cases will not have a material adverse effect on its results of operations, financial position or cash flows; however, there can be no assurances that an adverse determination would not have a material adverse effect on the Company.

On September 24, 2009, the Company and technotrans AG ("Technotrans") agreed to an out-of-court settlement to terminate proceedings that have been continuing for a number of years in connection with the infringement of a Baldwin patent. Under the agreement, technotrans paid to the Company Euro 6.5 million (approximately \$9.6 million) to the Company and the Company agreed to dismiss its claim for damages.

**Note 20: — Subsequent Event:**

On July 8, 2010, the Company entered into an advisory agreement (the "Advisory Agreement") with OBX Partners LLC ("OBX"), a Florida limited liability company, under which OBX will act as a financial advisor and strategic consultant to the Ad Hoc Advisory Committee of the Board of Directors of the Company, with regard to any transactions being contemplated by the Company during the term of the engagement, the Company's budget and business plans and the Company's financing needs and liquidity. A copy of the Advisory Agreement was filed as Exhibit 10.1 to the Company's Report on Form 8-K filed July 14, 2010. As part of the consideration for the services to be rendered pursuant to the Advisory Agreement, the Company granted to OBX an option (the "Option") to purchase 300,000 shares of the Company's Class A Common Stock (the "Shares") at an exercise price per share

**BALDWIN TECHNOLOGY COMPANY, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

of \$1.26, exercisable on or after October 1, 2011. The Option will terminate on November 16, 2010 if OBX shall not have substantially completed the engagement. If not previously terminated, the Option shall terminate on September 30, 2020. Neither the Option nor the Shares to be issued upon exercise of the Option have been registered under the Securities Act of 1933 in reliance upon the exemption from registration afforded by Section 4(2) of the Securities Act of 1933, as amended.

On September 28, 2010, the Company entered into Amendment #8 to the Credit Agreement (the “Amendment #8”) with BofA. Under the terms of the Amendment #8, the total commitment under the revolving credit agreement was reduced from \$25 million to \$20 million; certain adjustments were made to the interest payment provisions; and the Company provided the lenders warrants with a term of 10 years to purchase 352,671 shares of common stock in the Company for \$0.01 per share. The Warrants also contain a put provision that enables the Holder after September 28, 2012 to request a cash settlement of the then fair market value of the Warrants in an amount not to exceed \$1.50 per share. The Amendment #8 sets new covenants for currency adjusted net sales, establishes minimum EBITDA levels and sets a limit on capital expenditures for the fiscal year ended June 30, 2011.

- (4) Third quarter reflects a goodwill impairment charge related to the Company's Japan reporting unit

## **Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures**

None.

### **Item 9A. Controls and Procedures**

#### **(a) Evaluation of disclosure controls and procedures**

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's reports under the Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. The Company's management, with participation of the Company's Chief Executive Officer and Chief Financial Officer, has conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in the Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this annual report on Form 10-K. Based upon this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2010.

#### **(b) Management's report on internal controls over financial reporting**

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation and effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures of the Company may deteriorate.

Management has conducted an evaluation of the effectiveness of internal control over financial reporting as of June 30, 2010 based on the framework in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Management's assessment included an evaluation of the design of the Company's internal control over financial reporting and testing the effectiveness of the Company's internal control over financial reporting.

Based on our evaluation, we concluded that our internal control over financial reporting was effective as of June 30, 2010.

#### **(c) Changes in internal controls over financial reporting — Remediation Plan**

Management had previously concluded that the Company did not maintain effective internal control over financial reporting as of June 30, 2009. Subsequent to the Company's August 20, 2009 publication of its earnings for the year ended June 30, 2009, the Company discovered that certain shipments made by its Lenexa, Kansas facility prior to June 30, 2009 did not conform to internal control policies and procedures. This resulted in adjustments for improperly recorded revenue and the collectability of certain accounts receivable.

During fiscal year 2010, management took various actions to strengthen internal controls over financial reporting at its Lenexa, Kansas facility according to the remediation plan previously disclosed. The following remediation activities were performed:

- Terminated the General Manager and Controller of the Lenexa, Kansas facility and hired new highly qualified executives to fill those positions
- Hired an internal auditor to regularly review conformance to internal control policies and procedures globally
- Provided additional training in the Company's ethics and whistleblower policies, as well as the Company operating policies, procedures and internal controls, primarily in areas related to revenue.

As a result of the execution of our remediation plan and testing of the effectiveness of internal controls over financial reporting, the Company has strengthened internal controls at our Lenexa, Kansas facility and concluded that its internal control over financial reporting was effective as of June 30, 2010.

#### **(d) Changes in Internal Control over Financial Reporting**

There was no change in the Company's internal control over financial reporting that occurred in the fourth quarter ended June 30, 2010, that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

#### **Item 9B. Other Information**

On September 28, 2010, the Company entered into Amendment No. 8 to the Credit Agreement (the "Amendment #8") with Bank of America and the other Lenders parties thereto. Under the terms of the Amendment #8, the total commitment under the revolving credit agreement was reduced from \$25 million to \$20 million; certain adjustments were made to the interest payment provisions; and the Company provided the lenders warrants as described below. The Amendment #8 sets new covenants for currency adjusted net sales, establishes minimum EBITDA levels and sets a limit on capital expenditures for the fiscal year ended June 30, 2011.

On September 28, 2010, the Company issued to Bank of America, N.A., RBS Citizens, North America and Webster Bank, N.A. a Warrant with a term of ten (10) years to purchase an aggregate of 352,671 shares of Class A Common Stock of the Company for \$0.01 per share. If not previously exercised, the Warrant will become void on September 28, 2020. The Warrants also contain a put provision that enables the Holder after September 28, 2012 to request a cash settlement of the then fair market value of the Warrants in an amount not to exceed \$1.50 per share. Neither the Warrants nor the Shares acquirable upon the exercise thereof have been registered under the Securities Act of 1933, as Amended, or under the securities laws of any state, in reliance upon an exemption from such registration.

### **PART III**

#### **Items 10, 11, 12, 13, 14**

Information required under these items is contained in the Company's 2010 Proxy Statement, which will be filed with the Securities and Exchange Commission within 120 days after the close of the Company's fiscal year-end; accordingly, this information is therefore incorporated herein by reference.

**PART IV**

**Item 15. Exhibits, Financial Statement Schedules**

(a)(1) Financial statements required by Item 15 are listed in the index included in Item 8 of Part II.

(a)(2) The following is a list of financial statement schedules filed as part of this Report:

	<u>Page</u>
Schedule II — Valuation and Qualifying Accounts . . . . .	71

All other schedules are omitted because they are not applicable or the required information is shown in the financial statements or notes thereto.

(a)(3) The following is a list of all exhibits filed as part of this Report:

**INDEX TO EXHIBITS**
