SUPPL

The Parbec Gold Property consisting of 7 claims is located in Malartic Township, adjoining to the west of the East Amphi gold deposit owned by Osisko Mining Corporation. The property has been subjected to several drill programs which have indicated a historical series of gold zones. A 580 metre ramp was excavated to allow bulk sampling of one of the areas of gold mineralization but the company ran out of money before being able to access the gold zone.

The property, which straddles the world famous gold localizing Cadillac fault, is 6 kilometres northwest of Osisko Mining Corporation's Canadian Malartic gold project and within the same geological formations where Osisko recently announced a new gold resource estimate, "total in-pit M&I resource is now 9.12 million ounces" (Osisko Press Release, December 14, 2009).
