Elementis PLC

21 January 2010

Today's closing auction call period has been extended in this security by 5 minutes.

Auction call extensions give London Stock Exchange electronic order book users a further opportunity to review the prices and sizes of orders entered in an individual security during the initial auction call before the execution occurs. A price monitoring extension is activated when the matching process would have otherwise resulted in an execution price that is a pre-determined percentage above or below the price of the last automated execution today.

The applicable percentage is set by reference to a security's Tradelect sector. This is set out in the Sector Breakdown tab of the Tradelect Parameters document at www.londonstockexchange.com/en-gb/products/membershiptrading/tradingservices
