Pricer rolls out ESL with leading Italian hypermarket chain Il Gigante

Il Gigante, a major food retailer chain in Italy operating 43 hypermarkets, made a rollout decision for Pricer ESL to speed up price change execution and reduce operational costs.

Il Gigante is characterized by hypermarkets ranging from 3,000 m² to 9,000 m² and mostly located in the Milan region. The first five Il Gigante hypermarkets will be equipped with the Pricer ESL system before June 2010. The rollout program is to be completed by end 2011 for a total value of over 20 MSEK. "The fact that yet another leading Italian retailer chooses the Pricer system in this highly competitive region is a great success for us," says Charles Jackson, CEO at Pricer. Pricer is, with its master distributor Nicolis Project, in Italy since 2005 and has more than 350 store installations with major food and non-food retail banners.

The rollout decision follows a successful pilot installation in Milan in October 2009. "ESL will build price reactivity to increase customer satisfaction and support and improve operations," says Stefano Nicolis, CEO at Nicolis Project.

Central monitoring was a key part of the decision. Pricer's two-way system allows central IT and store managers to monitor and support store employees and limit shrinkage. Il Gigante IT have implemented a full stock support function displayed at the shelf edge by Pricer's segment-based Continuum ESL. Continuum offer multiple page registers to store and display all the product information on the ESL allowing store managers to check at the shelf edge the article turnover, inventory and re-ordering decision thus bringing decision making and analysis where it should be, on the shop floor. Il Gigante has looked at using the ESL to its full potential and has even adapted ESL to their own operations such as using it to monitor from head office the presence of discontinued articles.. Il Gigante today is using eleven + four pages on Continuum ESLs.

Pricer's segment-based ESL range also provides a unique feature named ADS (Automated Display price Scenarios), PowerPoint-like* communication at the shelf edge. ADS enable to display animations and transitions, such as bundle packs, loyalty card price, promotional sequence messaging, providing more flexibility to product promotion. "Il Gigante implemented ADS to communicate easily with their customers and support a dynamic pricing policy," adds M. Nicolis.

Pricer rolls out ESL at one of North America's top 50 retailers

A North American food chain operating over 250 grocery stores has signed an agreement to equip 40 stores with Pricer ESL in its home market. The retailer is ranked in the annual Deloitte market survey of the 250 top retailers worldwide. This first phase of deployment will start in March and be completed within a year for an order value to Pricer of nearly 30M SEK. Pricer's reseller will ensure system implementation and support services.

"We are proud to have been chosen by this chain to supply the tools and systems to enable electronic shelf pricing," says Charles Jackson, CEO at Pricer. "It is a significant ESL decision in this important market and reflects the increasing relevance of ESL in today's food retailing," says Mr. Jackson. "I would like to thank all those involved in the project for the enormous efforts which have gone into the evaluation program."

The retailer started the initial 9 store evaluation program in 2007. Price automation will enable significant time-savings on price reactivity and free up more time to serve customers. "The Key factor in the decision was to increase customer and employee goodwill," says Oron Branitzky, VP Sales at Pricer. Compared to the rest of the industry, Pricer ESL couples the highest system performance with long term investment protection and future proof architecture that is robust and scalable.
