### **Skanska's investment in New Karolinska Solna to amount to approximately SEK 600 M – construction contract to amount to approximately SEK 14.5 billion**

The Board of Stockholm County Council has revised the allocation decision of May 4, which entails that Skanska has secured the assignment to design and construct the New Karolinska Solna, amounting to approximately SEK 14.5 billion. The new allocation decision means that Skanska's investment will be brought forward and will amount to approximately SEK 600 M, instead of the SEK 650 M calculated earlier.

The project is the first in health and medical care in Sweden to be conducted as a Public Private Partnership (PPP). Skanska and Innisfree each own 50 percent of the consortium that will be responsible for the financing, design, construction, operation and maintenance of the new hospital until 2040. All health and medical care provided in the new hospital will be conducted by the County Council as previously.

The design and construction contract will be included in order bookings when the allocation decision takes force and the final financing agreement has been signed. This is expected to occur in June and will be announced then in a separate press release.

A more detailed description of the project can be found on the project's website [www.nyakarolinskasolna.se](http://www.nyakarolinskasolna.se) and Skanska's website [www.skanska.com/nks](http://www.skanska.com/nks)

## **Skanska to expand hospital in California for USD 73 M,<sup>110</sup> approximately SEK 570 M**

Skanska has secured the assignment to assume responsibility for construction management in the expansion of a hospital in Napa County, California. The contract amount totals USD 73 M, corresponding to approximately SEK 570 M, which will be included in order bookings for the second quarter.

The contract pertains to an approximately 6,500 square-meter expansion that will house six surgical suites, 20 intensive-care beds and a clinical laboratory section.

The building will be designed to enable environmental certification in accordance with the LEED (Leadership in Energy and Environmental Design) international environmental classification systems. Implementation and planning will be conducted using Lean Construction practices and Building Information Modeling technology (BIM).

Work on the site will begin this summer and is scheduled for completion at the end of 2012.

Skanska USA is one of the leading development and construction companies in the country, consisting of four business units: Skanska USA Building, which specializes in building construction; Skanska USA Civil, specialized in civil infrastructure; Skanska Infrastructure Development, which develops public-private partnerships; and Skanska Commercial Development, which develops commercial development projects in select U.S. markets. Headquartered in New York, Skanska USA has approximately 7,000 employees and its 2009 revenues were SEK 44 billion.
