Skanska to construct railway in Norway for NOK 392 M, SEK 470 M

Skanska has been contracted to expand the railway network in Norway. The contract amount is NOK 392 M, about SEK 470 M, which will be included in third-quarter order bookings. The customer is the Norwegian National Rail Administration.

The contract relates to a 3.4-kilometer expansion of double track railway in Vestfold, southwest of Oslo. A 1.8-kilometer section will comprise tunneling, and about 800 meter associated service tunnels.

Work will commence immediately and is scheduled for completion in June 2014.

The project is part of a 12-kilometer expansion of the Vestfold Line, which will be carried out in five phases. The Vestfold Line tunnel will be the first in Norway that is designed for train speeds of up to 250 kilometers per hour.

Skanska Norway focuses on construction and civil engineering operations. The unit has approximately 4,100 employees. In 2009, Skanska Norway reported revenue of about SEK 11 billion. In Norway, Skanska is also active in the development of housing projects and public-private partnerships.

Skanska secures renovation contract in Norway for NOK 264 M, or SEK 320 M

Skanska has secured a major renovation contract in Stavanger, Norway. The contract amount is NOK 264 M, or about SEK 320 M, which has been included in order bookings for the second quarter. The customer is the property company Entra and the tenant is the regulatory body for the Norwegian oil industry.

The contract is for the total renovation of a 17,000-square-meter office building and the construction of a new 420-square-meter extension.

One of the aims of the project, which has a strong environmental focus, is to reduce the building's energy consumption to a level that is 25 percent below that stipulated in Norwegian building standards for offices.

Preparatory work has been initiated and construction work, which is scheduled to start in February 2011, is scheduled to be completed in December 2012.

Skanska Norway focuses on construction and civil engineering operations. The unit has approximately 4,100 employees. In 2009, Skanska Norway reported revenue of about SEK 11 billion. In Norway, Skanska is also active in the development of housing projects and public-private partnerships.

Financial close for New Karolinska Solna – Skanska's construction contract amounts to approximately SEK 14.5 billion and investment to about SEK 600 M

Skanska has signed a financing agreement to design and construct the new university hospital New Karolinska Solna. This will mean that the construction contract totaling approximately SEK 14.5 billion will be included in second-quarter order bookings 2010 and that Skanska will invest about SEK 600 M, corresponding to a 50-percent shareholding in the project company.

The interest rate hedge has now been fully executed on a private placement basis.

The New Karolinska Solna is the first project in health and medical care in Sweden to be conducted as a Public-Private Partnership (PPP).

The design and build contract – which is Skanska's largest assignment in its history – will be jointly carried out by the Swedish and British construction units. Skanska Sweden has 70 percent of the contract amount and Skanska UK 30 percent. Construction work will start during summer.

Skanska Infrastructure Development and Innisfree each own 50 percent of the project company Swedish Hospital Partners, which is responsible for financing, design, construction, and operation and maintenance of the new hospital until 2040. As previously, all care in the new hospital will be conducted by the Stockholm County Council.

A more detailed description of the project can be found on the project's website www.nyakarolinskasolna.se and Skanska's website www.skanska.com/newkarolinskasolna.

Skanska sells office project in Wrocław in Poland for EUR 76.5 M, or SEK 735 M, with a capital gain of EUR 12.5 M, about SEK 120 M

Skanska has sold its Grunwaldzki Center office property in Wrocław in southern Poland. The sales price amounted to EUR 76.5 M, approximately SEK 735 M, and the capital gain to EUR 12.5 M, about SEK 120 M. The buyer is the German investment fund RREEF with immediate transfer.

Grunwaldzki Center comprises approximately 27,000 square meters and is nearly fully leased. The tenants include Credit Suisse, Santander Consumer Bank and Hewlett-Packard. The project commenced in 2007 and was completed in 2009.

The property is the first in Wrocław to fulfill the requirements for environmental certification in accordance with the EU GreenBuilding program. The energy consumption is at least 30 percent below the requirements in the Polish norms.

"We are very glad that RREEF has chosen Grunwaldzki Center for its first regional investment in Poland" says Nicklas Lindberg, Managing Director of Skanska Property Poland. "As a matter of fact, this is the first office transaction outside Warsaw this year, which proves that there is a market for core assets in regional cities."

Skanska's second commercial development property in Wrocław was started earlier this year. The Green Towers office project in central Wrocław will include two ten-story buildings comprising a total of 25,000 square meters. Green Towers is also being designed to meet the requirements for LEED certification.

Skanska Commercial Development Europe initiates and develops property projects in office, logistics and commercial buildings. The company's operations are concentrated in metropolitan areas in Hungary, the Czech Republic and Poland and are conducted in three local units: Skanska Property Czech Republic, Skanska Property Hungary and Skanska Property Poland.

Skanska to develop and build Swedish Security Service's headquarters in Solna – sells ongoing project, which generates construction assignment for approximately SEK 1 billion

Skanska is to sell the land and development project for the Swedish Security Service's new head office in Solna to the state-owned Specialfastigheter Sverige AB, which owns and manages buildings for special purposes like correctional facilities, police stations and reformatories.

Skanska Sweden's design and construction assignment amounts to approximately SEK 1 billion, which will be included in order bookings for the third quarter.

The undeveloped land sold to Specialfastigheter comprises about 9,000 square meters. In accordance with Skanska's information policy, the sales profit for commercial development projects under execution is not disclosed.

The office property, which includes a total of 44,000 square meters, will be developed and built in the new area, Ingenting, in Solna in the Stockholm region. In addition to offices for about 800 people, the building will also house health and training premises, shooting range and auto-repair workshop.

The project will be developed jointly by Specialfastigheter, Skanska Commercial Development Nordic and Skanska Sweden, in collaboration with Solna City.

"This will be the start for the new Ingenting area, with workplaces and housing in a fantastic central location," says Lars-Erik Salminen, Chairman of the Municipal Executive Board of Solna.

The property is designed so that energy consumption will be at least 25 percent lower than the standard for the National Board of Housing, Building and Planning, which is the requirement for EU GreenBuilding label.

"It is highly valuable that we were able to create an environmentally sound property, both for us as the long-term owner and for our tenants," says Peter Karlström, President of Specialfastigheter i Sverige AB.

The construction work will commence immediately and is scheduled for completion in 32 months. Skanska will implement the work according to the Green Workplace concept, which is Skanska Sweden's own environmental label for construction sites.

Within the Ingenting area, Skanska has additional building rights for 15,000 square meters of offices and about 550 apartments. The first housing phase will commence in the autumn with 36 apartments.

Skanska is one of Sweden's largest construction companies with operations involving housing and civil engineering, as well as development of residential units and commercial premises. In Sweden, the company has about 10,000 employees, and revenues for construction operations amounted to about SEK 25 billion in 2009. During 2009, residential development operations sold about 1,000 new homes. Skanska also offers services within public/private partnerships.

Skanska to construct a new prison in London for GBP 100 M, or approximately SEK 1.2 billion

Skanska has been awarded the contract to design and construct a new prison in London. The contract amount is GBP 100 M, or about SEK 1.2 billion, which will be included in second-quarter order bookings. The contract was signed with BWP Project Services Ltd, an investment vehicle 100 percent managed by Barclays Infrastructure Funds Management Limited, and the prison will be operated by Serco Group plc on behalf of the British Ministry of Justice.

The contract relates to the Belmarsh West, which will comprise a 600-cell four-story building and a number of associated buildings to provide such services as education, rehabilitation, training, healthcare, administration works, visits and security.

In addition to the construction of the buildings, Skanska will also undertake the structural and civil design, piling works and the installation of mechanical and electrical facilities. The new prison will target a rating of Excellent in the international environmental system BREEAM.

Construction is scheduled to commence immediately, with completion in the first half of 2012.

Serco Group plc, Skanska and Barclays Infrastructure Funds Management Limited have cooperated on several similar projects, including the expansion of HMP Lowdham Grange and HMP Dovegate. Both of these prisons were also originally constructed by Skanska in 1997 and 2001, respectively.

Skanska UK reported revenues of SEK 18 billion in 2009, with about 4,800 employees. The company is active in building and civil construction, utilities and building services.
