# Re: GGL Resources Corp. (formerly GGL Diamond Corp.) - Exemption No. 82-1209

<u>.</u>

We are solicitors for GGL Resources Corp. which was issued an exemption pursuant to Rule 12(g)3-2(b) under the United States Securities Exchange Act of 1934. We enclose the following for filing with you:

- 1. Index to the documents enclosed; and
- 2. copies of the documents listed on the Index in the same order with the exemption number noted thereon.

If you have any further requirements, please let us know.

Yours truly, DAVIS LLP Per:

Notes to Consolidated Financial Statements May 31, 2010 (Unaudited)

These notes should be read in conjunction with the Audited Consolidated Financial Statements for the year ended November 30, 2009.

#### 1. Nature and Continuance of Operations

The Company changed its name from GGL Diamond Corp. to GGL Resources Corp. to better represent the Company's variety of assets. Trading under the new name began on September 8, 2009. There were no changes to the number of shares issued and outstanding or to the trading symbol.

The Company is in the exploration stage and, on the basis of information to date, does not yet have economically recoverable reserves. The underlying value of the mineral properties and related deferred costs is entirely dependent upon the existence of such reserves, the ability of the Company to obtain the necessary financing to develop the reserves and upon future profitable production.

The Company intends to continue its exploration programs. In light of negative cash flows from operating activities, operating losses accrued in the past years of \$23,636,395 and a negative working capital, the Company's ability to continue its exploration programs is dependent on its ability to secure additional financing. While it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. Management is actively pursuing such additional sources of financing.

These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP") applicable to a going concern which assumes that the Company will realize its assets and discharge its liabilities in the normal course of business. Realization values may be substantially different from the carrying values as shown and these consolidated financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern.

#### 2. Adoption of New Accounting Policies

#### Future Changes in Accounting Policies

#### International Financial Reporting Standards ("IFRS")

In 2006, the Canadian Accounting Standards Board ("AcSB") published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008 the AcSB announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own GAAP. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of December 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended November 30, 2011. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

#### 3. Unproven Mineral Interests, continued

- (a) Doyle Lake, Northwest Territories, Canada
  - (i) Under the De Beers Agreement ("the Agreement") dated May 25, 1995, De Beers has earned a 60% interest in the Doyle Lake Properties, which consist of 5 claims and 3 fractional claims (12,972 acres); and

1.

- (ii) in addition, the Company holds 17 claims (16,206 acres) in the Doyle Lake area that are not subject to the Agreement. 16 of these claims are leases.
- (b) Fishback Lake, Northwest Territories, Canada

The Company owns 7 claims (13,301 acres). One of these claims is a mining lease.

(c) CH, Northwest Territories, Canada

In 2009 the Company signed an exploration and option agreement on 73 of its 121 CH claims in the Northwest Territories (10 of these claims (23,477 acres) were written off in 2009). Rio Tinto Exploration Canada Inc. (formerly, Kennecott Canada Exploration Inc.) must make payments totalling \$1,000,000 and incur cumulative expenditures of \$10,000,000 in order to earn a 100% interest, subject to a gross overriding royalty of 1.5% of the appraised value of all gem and industrial diamonds recovered, sorted and graded from the property and a 1.5% net smelter returns royalty on the net value of all ores, minerals, metals and materials except diamonds, mined and removed from the property and sold or deemed to have been sold. The payments and both royalties are payable to the Company. The Company received the first payment of \$25,000 in 2009.

During the period, 7 claims (16,657 acres) were allowed to lapse and the related costs of \$606,508 were written off.

(d) Providence Greenstone Belt, Northwest Territories, Canada

The Company owns 117 claims (259,739 acres) in the Providence Greenstone Belt area of the Northwest Territories. These claims lie within an extensive belt of rocks previously identified by a mapping project funded by the Geological Survey of Canada and reported as having the potential for hosting magmatic nickel mineralization. During the period, 13 claims (26,250 acres) were allowed to lapse and the related costs of \$140,178 were written off.

During the period, the Company sold some of its fuel inventory and core boxes for \$54,689.

(e) McConnell Creek, British Columbia, Canada

The Company owns 2 mineral tenures (4,878 hectares) in the Omineca Mining Division of British Columbia.

#### 3. Unproven Mineral Interests, continued

(f) General exploration, Northwest Territories, Canada

In 2009 the Company signed a non-exclusive licence agreement for the use of its Slave Geological Province data set for diamond exploration for 100,000 and would provide 500 hours of technical support at a price of 50,000 prepaid. As at May 31, 2010, the amount of 44,700 presented as deferred revenues represents the remaining hours of technical support. See Note 14(f).

The Company is involved in mineral exploration and development activities, which are conducted in Canada. The Company is in the exploration stage and, accordingly, has no reportable segment revenues or operating results for each of the six months ended May 31, 2010 and 2009.

# Financial Instruments and Risk Management 10.

aa ka ba babaa Fair value estimates of financial instruments are made at the balance sheet date, based on relevant market information and other information about the financial instruments.

and the second second second

The second s

The Company's activities potentially expose it to a variety of financial risks, including credit risk, foreign exchange risk (currency), interest rate risk, and liquidity risk.

#### Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist of cash and amounts receivable. The maximum credit risk represented by the Company's financial assets is represented by their carrying amounts. The Company deposits the majority of its cash with high credit quality financial institutions in Canada.

#### Currency risk

The Company operates in Canada and transacts business with foreign vendors and is therefore exposed to foreign exchange risk arising from transactions denominated in foreign currencies.

Notes to Consolidated Financial Statements May 31, 2010 (Unaudited)

#### 10. Financial Instruments and Risk Management, continued

#### Interest rate risk

Interest rate risk is the risk that the fair value of a financial instrument will fluctuate due to changes in market interest rates. The Company is not exposed to interest rate risk.

化碱化 化碱酸盐

#### Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial liabilities. The Company manages liquidity by monitoring carefully its operating requirements.

#### 11. Supplementary Cash Flow Information

Non-cash operating, financing, and investing activities were conducted by the Company during the periods ended May 31, 2010 and 2009 as follows:

A second s

#### 12. Management of Capital

Cash paid for income taxes

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

\$

In the management of capital, the Company includes the components of shareholders' equity as well as cash and cash equivalents.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust its capital structure, the Company may attempt to issue new shares, issue new debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents.

In order to maximize ongoing development efforts, the Company does not pay dividends.

# MANAGEMENT'S DISCUSSION AND ANALYSIS

May 31,2 010

(formerly, GGL Diamond Corp.)

#### **Management's Discussion and Analysis**

## FOR THE SIX MONTHS ENDED MAY 31, 2010 INFORMATION AS OF JULY 27, 2010 UNLESS OTHERWISE STATED

The following discussion of the results and financial position of the Company for the period ended May 31, 2010 should be read in conjunction with the November30, 2009, February 28, 2010 and May 31, 2010 Consolidated Financial Statements and related notes. The information reported here includes events taking place subsequent to the end of the period, up to and including July 27, 2010.

#### DISCUSSION AND ANALYSIS

GGL Resources Corp. ("GGL") is a diversified mineral exploration company. GGL holds mineral claims and leases in the Northwest Territories of Canada ("NT") prospective for gold, silver, nickel, base metals and diamonds. All of the NT holdings are wholly owned by GGL except for the Doyle Diamond Project where De Beers Canada Inc. ("De Beers")h as a 60% interest and GGL a 40% carried interest in mineral leases adjacent to the Gahcho Kue diamond property owned by the joint venture partners, De Beers and Mountain Province Diamonds Inc., presently the subject of a feasibility study; and the CH Diamond Project optioned by GGL to Rio Tinto Exploration Canada Inc. ("Rio"). In British Columbia, Canada, GGL owns a 100% interest in the McConnell Creek gold and copper-gold property.

i galegen van en gebruik gebruik gebruik waarde gebruik waarde aan gebruik an internet af de seren gebruik of o

The financial collapse in late 2008 has reatly affected the tolerance for risk and the availability of risk capital. Projects brought to the drilling stage by the expenditure of the highest risk dollars are now hindered and in need of capital. Our exploration projects fall into this category. Share prices for junior exploration companies have fallen to new lows in many cases and now even fail to respond positively to good exploration results. These conditions have limited our options to finance further exploration. We know our projects have outstanding merit and we are actively seeking joint venture partners.

and the second second

#### **GOLD PROJECTS:**

#### **PROVIDENCE GREENSTONE BELT ("PGB") NT:**

GGL owns a 100% interest in mineral claims that cover 120 x 20 km of a greenstone belt that research has shown has the right geology to host the Timmins and Red Lake type of high grade world class gold deposits. The PGB is also similar tot he Abitibi greenstone belt inits potential for large Volcanogenic Massive Sulphide ("VMS") (copper, zinc, lead, silver and gold bearing) deposits.

GGL made new discoveries of gold ats urface in 2007 and again in 2008. In late 2009 our consultants Aurora Geosciences Ltd. ("Aurora") of Yellowknife, NT, were commissioned to examine, evaluate and report on three of the gold prospects. Aurora has proposed additional detailed ground geophysics and diamond drilling on all three properties: the King John, Lord Cache and the Noble Count properties.

and the state of about the state of about the state

The King John property is located in the south central part of the claim group. The geology is similar to that of the Red Lake camp. In an area that has scarce rock outcrops the gold values, up to 27.8 gpt, occur intermittently over a distance of 500 m. Of note is the fact that the airborne EM geophysical anomaly that ed to the area being examined extends for a length of ne kilometre and is coincident with an airborne magnetic anomaly. One half kilometre south of this geophysical anomaly is a second similar coincident geophysical anomaly 1.5 km long. No rock exposures have been found in this area.

Detailed ground geophysical surveys n late 2009 indicate a shear zone, which may represent the main gold target, that lies20 m to the west of the gold samples. Additional detailed ground geophysical surveys have been proposed in this area as well as a drill program to explore the gold mineralization.

The Lord Cache property is located 10 km northeasterly from the King John property. Gold is found within basic volcanics on the limb of an anticline near the contact with sediments – a favoured conceptual geologic model in the Abitibi Greenstone Belt. Grab samples have assayed up to 42.7 gpt gold and a channel sample assayed 19.9 gpt gold over 0.55 m within an area of limited rock exposure. Across a lake 120 m from the previouss amplesa grab sample assayed 5.99 gpt gold. Geochemically anomalous gold values continue for 600 m along the volcanic/sediment contact.

A winter program of detailed ground geophysics extending over the lake and along the contact area has been recommended. The potential to trench the area of high grade gold samples is being considered as well as the proposed exploratory drill program.

- 43 - 5

The Noble Count property is located 20 km north of the King John property and is a gold discovery in and near a banded iron formation ("BIF") made by Noranda in the 1980s. Noranda described the banded iron formation, mainly traced by geophysics as being 4 km in length and 25-40 m in width. Gold values were found adjacent to and within the BIF (up to 17.93 gpt gold). Work by GGL has returned assays up to 5.11 gpt gold over a strike length of 1.5 km. Aurora has proposedt oc ontinue the high resolution ground geophysics, started in late 2009, and begin a program of drilling along the structure.

A drill program has previously been designed by our consultants for one of the VMS targets on the PGB.

# Diamond Exploration: a set because of freedwards of the set and the first set of the set

Rio is preparing to begin a program of kimberlitic indicator mineral sampling this summer as well as surveying selected mineral claims in preparation for converting them to mineral leases.

De Beers appears to have no plans for exploration on the Doyle Project at this time.

#### **McConnell Property, British Columbia:**

A comprehensive exploration program isb eing prepared for both the extensive shear-zone hosted gold zone (12 km x 1 km) and the adjacent copper-gold potential within the Jurassic rockso f the Toodoggone – Mt. Milligan Belt that hosts the Kemess, Serengeti (Kwanika), and Terrane (Mt. Milligan)c opper- gold deposits. This work will form the basis of an application for an exploration permit. Ith as to be noted that permitting in British Columbia can be a long process, in part, as the Provincial and Federal Governments have not completed their duty to consult with the First Nations, as mandated by the Supreme Court of Canada.

# Limited Operating History: Losses on the structure of the structure of the structure of the structure of the

There can be no assurance that the Company will operate profitably in the future, if at all. As at May 31, 2010, the Company's deficit was \$23,636,395.

a contraction device post on the contract of the contract

# Price Fluctuations: Share Price Volatility and table and add to the State of the second defense

an each an the second second

In recent years, the securities markets in the United States and Canada have experienced a high levelo f price and volume volatility, and the market price of securities of many mineral exploration companies have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur.

#### Shares Reserved for Future Issuance: Dilution

As at July 27, 2010, there were 14,250,000 stock options and 5,783,334 share purchase warrants outstanding pursuant to which a total of 20,033,334 shares may be issued in the future, all of which will result in further dilution to the Company's shareholders and pose a dilutive risk to potential investors.

#### Stock Option Plan

In 2006, the Company amended its Stock Option Plan to a 10% rolling plan whereby the Company may grant stock optionst o purchase up to 10% of the issued capital of the Company at the time of the grant of any option. Under the policies of the TSX Venture Exchange, options granted under the 10% rolling plan will not be required to include the mandatory vesting provisions required by the Exchange for fixed number stock option plans, except for stock options granted to investor relations consultants. Awarded stock options are exercisable over a period not exceeding five years at exercise prices determined by the Board of Directors.

Under this plan, the number of shares available for grant increases as the issued capital of the Company increases.

#### **Corporate Governance**

The Company has a Corporate Disclosure Policy, an Insider Trading Policy and a Whistle Blower Policy. To view a copy of these policies, please go to <u>www.gglresourcescorp.com</u>.

# Overall performance/results of operations the adaptive subtherefore a device sector and the sector of the sector o

#### Period ended May 31, 2010 compared to period ended May 31, 2009

As at May 31, 2010, the Company had incurred exploration costs on mineral properties of \$24,472 (sampling \$636; licences, recording fees and lease payments \$18,548; salaries and wages \$716; technical and professional services \$53,310; transportation \$624 and project supplies of \$(49,362)). Exploration costs for the period ended May 31, 2010 are lower than 2009 by \$202,466 a decrease of 89 %. Exploration costs were lower in 2010 than 2009 for all categories of expenditures except sampling. The large decrease is due partly to the \$54,689 sale of some fuela nd core boxes from the Company's inventory that was netted against costs.

During the period ended May 31, 2010, the Company was unable to secure financing and this has necessitated a slower start to the year for exploration work.

On a perp roject basis, the Company spent \$24,472 exploration costs as follows: \$5,394 on the CH project; \$17,053 on the Doyle Lake project; \$19,492 on the McConnell Creek project, \$2,394 on the Fishback Lake Property and \$(19,861) on the Providence Greenstone Belt net of the sale of \$54,689 of fuel and core boxes from inventory.

The Company reported a net loss of \$860,595 fort he period ended May 31, 2010 compared to a net loss of \$1,852,243 for the period ended May 31, 2009 (a decrease of 54% from previous year). General administration and exploration expenses for the period ended May 31, 2010 were \$156,400 compared to \$269,191 for the period ended May 31, 2009 (a decrease of 42% from 2009 to 2010). The change in general administration and exploration expenses was due to a decrease in thef ollowing expenditures during the period: offices ervices and expenses (2010-\$47,362; 2009-\$89,018); legal and audit (2010-\$(371); 2009-\$4,826); shareholders' meetings and reports (2010-\$1,615; 2009-\$1,760); exploration costs – general (2010-\$38,963; 2009-\$101,359) and stock-based compensation (2010-\$ nil; 2009-\$28,940). There was an increase in the other expenditures such as: consulting fees (2010-\$56,251; 2009-\$33,741); licences, taxes, insurance and fees (2010-\$10,122; 2009-\$8,494); corporate relations (2010-\$1,010; 2009-\$nil); and travel (2010-\$690; 2009-\$nil).

Office services and expenses were lowera t the end of May 31, 2010 due to the downsizing of the Vancouver office in September 2009 and the elimination of a full time administrative assistant in June 2009. Legal and audit fees were lower due to an error in estimating the audit fee for 2009 and minimal legal fees during the period ended May 31, 2010. Generale xploration costs were lower during the period ended May 31, 2010 due to the sale of the Yellowknife house in 2009 which reduced office and house expenses such as heating and electricity.

Consulting fees increased during the period ended May 31, 2010 due to management spending more time actively pursuing sources of financing for the Company. Licences, taxes, insurance and fees had a slight increase in the period ended May 31, 2010 due to the increase in the TSX annual sustaining fee which is based on the closing price of the Company's shares on December 31 (2009-\$0.05; 2008-\$0.03). Travel expendituresi nereased in the period ended May 31, 2010 due to various meetings relating to the pursuit of  $(1 + \frac{1}{2})^{-1} = \frac{1}{2} \left[ \frac{1}{2} \left[$ financing.

Revenue for the period ended May 31, 2010 was \$43,336 (\$152 of interest income, \$1,479 gain on sale of equipment and \$41,705 in operator's fees). Revenue for the period ended May 31, 2009 was \$335,947 (\$729 of interest income; \$104,850 from the sale of ad atas et and technical support and ag ain on the sale of property and equipment of \$230,368).

#### **Critical Accounting Policies**

No new accounting policies were introduced in 2010.

#### Adoption of New Accounting Policies

#### **Future Changes in Accounting Policies**

(a) Business combinations, consolidated f inancial statements and non-controlling interests - Sections 1582, 1601 and 1602:

The CICA issued three new accounting standards in January 2009: Section 1582, Business Combinations, Section 1601, Consolidated Financial Statements, and Section 1602, Non-Controlling Interests. These new standards will be effective for fiscal years beginning on or after January 1, 2011. The Company is in the process of evaluating the requirements of the new standards.

Section 1582 replaces Section 1581, Business Combinations, and establishes standards for the accounting for a business combination. The section applies prospectively to business combinations for whicht he acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2011. Sections 1601 and 1602 together replace Section 1600, Consolidated Financial Statements. Section 1601 establishes standards for the preparation of consolidated financial statements. Section 1601 applies to interim and annual consolidated financial statements of a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. The section applies to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011. Section applies to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011. Section applies to interim and annual consolidated financial statements relating to a business combination.

(b) International Financial Reporting Standards ("IFRS")

In 2006, the Canadian Accounting Standards Board ("AcSB") published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008 the AcSB announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own GAAP. The date is fori nterim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of December 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the yeare nded November30, 2011. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

See . 1

During the year 2009, the Company started the scoping and planning phase of its changeover plan. The Company has identified the following fourp hases of its conversion plan: scoping and planning, detailed assessment, operations implementation and post implementation. The Company expects to have the scoping and planning phase completed during the 2010 fiscaly ear. The detailed assessment phase will include (a) identifying accounting policy choices under IFRS1- First Time Adoption of International Financial Reporting Standards and other IFRS standards that affect the Company; (b) quantifying the impact of the choices on the financial statements and identifying the business processes and resources impacted; and (c) preparing templates for the financial statements. The operations implementation phase will include the design of business, reporting and system processes to support the IFRS compliant financial data fort he opening balance sheet at December 1, 2010 and thereafter and testing of the internal control environment and updated processes for disclosure controls and procedures. The final phase involves maintaining IFRS compliant financial data and processes for the first fiscal reporting year 2011 and in future.

Please see Notes 2 and 3 of the Consolidated FinancialS tatements for the year ended November 30, 2009 for a complete listing of accounting policies followed by the Company.

#### **Summary of Quarterly Information**

The following table sets forth a comparison of revenues and earnings for the previous eight quarters ending with May 31, 2010. Financial information is prepared according to GAAP and is reported in Canadian \$.

Note: la state a la constagado de came 1967 e alectado e de la gradesta tribe a la constante.

(1) For the quarter ended May 31, 2010, revenue is comprised of \$145 of interest income, \$1,479 gain on the sale of equipmenta nd \$37,894 of operator's fees. In the year 2009, revenue is comprised of \$744 of interest income, \$7,526 of operators' fees, \$105,300 from the sale of the data set and technical support and a gain of \$230,368 on the sale of property and equipment. In 2008 revenue is from interest income.

(2) Income (loss) before discontinued operations and extraordinary items is the same as Net Income (Loss) as there are no discontinued operations or extraordinary items in 2010, 2009 or 2008. Fully diluted earnings (loss) per share is not presented as the exercise of warrants and stock options would be anti-dilutive:

During the year, management decides which properties will be retained and which properties will be abandoned based on results from work performed during the field season and the analysis ofs ample assays. Properties that will be abandoned are written off when management makes its decision to cease any further work which will increase the Net Loss.

a construction of Course of Star for the Mar 1285 of construction of

The Company does not have operating revenues and must finance its exploration activity by raising funds through joint ventures r equity financing. The exploration and subsequent development of the Company's properties depend on the Company's ability to obtain required financing. There is no assurance that additional funding will be available to allow the company to fully explore ts existing properties. The Company requires sufficient funds to complete further exploration work (see Management of Capital). Failure to obtain financing could result in delays r indefinite postponement of further exploration and the possible, partial or total loss of the Company's interest in certain properties.

a ser per ser a subsective de la préside louvignero sando groupe qui a subsective servi-

The Company is dependent on raising funds by the issuance of shares or disposing of interests inits unproven mineral interests (by options, joint wentures or outright sales) in order to finance further acquisitions, undertake exploration and development of mineral interests and meet general and administrative expenses in the immediate and long terms. There can be no assurance that the Company will be successful in raising its required financing.

The second and a sharehold the second second the fi

The Company's financial performance is dependent on many external factors. The Company expects hat any revenues it may earn from its operations in the future will be from the sale of minerals. Both prices and markets for metals and minerals are cyclical, difficult to predict, volatile, subject to government price fixing and controls and respond to changes in domestic and international, political, social and economic environments. In addition, the availability and cost of funds for exploration, development and production costs are difficult to predict. These changes in events could materially affect the financial performance of the Company.

The Company had a working capital deficiency at May 31, 2010 of \$315,762 compared to a deficiency of \$199,462 as atN ovember 30, 2009. The Company's currentl iabilities exceeded its currenta ssets atM ay 31, 2010. The Company has no material income from operations and any improvement in working capital results primarily from the issuance of share capital.

As at May 31, 2010 and 2009, the Company had no long term debt.

For the period ended May31, 2010, the Company experienced negative cash flow of \$95,828 (2009 - \$110,395) (before allowing for changes in non-cash operating working capital balances) from operating activities. Changes in operating activities resulted primarily from 2009 activities: the sale of the Company's data set and higher general exploration costs and higher office services and expenses. (See Overall performance/results of operations for further information.)

The Company's cash position as at May 31, 2010 was 50,984 (November 30, 2009 - 162,962). The decrease in cash position compared to November 30, 2009 was due principally to expenses incurred and the lack of financing raised during the period ended May 31, 2010. See Notes 5 and 6 – Share Capital and Stock Options in the Notes to the Consolidated Financial Statements.

1.1.1.1.1.1

February 28, 2010

## (formerly, GGL Diamond Corp.)

#### Management's Discussion and Analysis

### FOR THE THREE MONTHS ENDED FEBRUARY 28, 2010 INFORMATION AS OF APRIL 26, 2010 UNLESS OTHERWISE STATED

The following discussion of the results and financial position of the Company for the period ended February 28, 2010should be read in conjunction with the November 30, 2009 and February 28, 2010 Consolidated Financial Statements and related notes. The information reported here includes events taking place subsequent to the end of the fiscal period, up to and including April 26, 2010.

#### DISCUSSION AND ANALYSIS

GGL Resources Corp. ("GGL") is a diversified mineral exploration company holding mineral claims and leases in the Northwest Territories ("NT"), (gold, silver, nickel, base metals & diamonds) and mineral claims in the Province of British Columbia Canada (gold, copper-gold-silver).

In the NT the Company has a 100% interest in claims that extend for 120 km along the Providence Greenstone Belt ("PGB"). The geology of the PGB is similar and of the same age bracket as the highly mineralized and economically productive greenstone belts of Ontario and Western Australia. The mineral potential of the PGB is also similar to these known belts, but with a greater chance for new and exciting discoveries.

Three new gold discoveries (quartz-shear zone-arsenopyrite) were made by GGL in 2007 and 2008. GGL's consultants have examined the areas and prepared a budget to drill two of the prospects.

A banded iron sulfide formation discovered in the 1970's by Noranda and traced by geophysics for over three kilometres has also been examined and a drill program recommended.

A VTEM (airborne Electro Magnetic geophysical survey) flown for GGL has located a cluster of volcanogenic massive sulphide (VMS) targets (copper-zinc-lead-silver-gold) in addition to two previously known VMS surface discoveries.

The Company's prime focus is to continue the exploration of the PGB and is pursuing a financing and/or joint venture in this regard.

Also in the NT the Company has a joint venture for diamonds with De Beers Canada Inc. ("De Beers") at the Doyle Property adjoining Mountain Province Diamonds Inc. and De Beers' Gahcho Kue diamond project presently undergoing a feasibility study.

The Company is the operator, under an agreement with Rio Tinto Exploration Canada Inc. ("Rio") (formerly, Kennecott Canada Exploration Inc.)., of a diamond exploration program, the CH Project, presently in progress.

In British Columbia the Company has a 100% interest in the McConnell Creek Property located 400 km northwest of Prince George. The Property has road access and is located 20 km southeast of the Kemess South copper mine. Gold shoots have been located and indicated within a northwest-trending shear zone over a length of 12 km and a width of up to 1 km. The shear zone is mainly within a roof pendant of amphibolite gneiss. A ground geophysical VLF-EM survey has mapped a total of 35 km of conductors within the shear system and of this 1.5 km has been tested by trenching and/or drilling. Within this tested area a series of trenches have located two gold shoots. One is 145 m long and from 0.8 m to 7 m wide averaging 1.71 m in width and grades averaging 7.23 g/t gold. Drilling here has traced the gold zone 250 m down plunge. The other has been traced by trenching for 33 m, before the overburden was too deep to trench;

averages 6.79 g/t gold over an average width of 1 m. Along the 12 km length of the shear zone new targets for exploration have been identified by gold bearing soil samples coincident with VLF-EM conductors.

#### 2010 CH PROJECT DIAMOND EXPLORATION

In February 2009, GGL and Rio signed an Exploration and Option Agreement which gave Rio the sole and exclusive right and option to acquire, subject to Royalties, a 100% interest in the CH Project Area ("Property") about 250 kilometres north of Yellowknife, by incurring expenditures of \$10,000,000 on or before December 31, 2016, of which \$900,000 is a commitment and must be spent on or before December 31, 2011. In order to exercise the option Rio must pay GGL additional yearly payments beginning in 2013, to total \$1,000,000 on or before December 31, 2016.

As directed by Rio, GGL began exploration in 2009 completing a ground gravity survey that was drill tested this year. To date in 2010 three more ground gravity surveys have been completed. Gravity anomalies were identified on all three surveys. These new results are preliminary, based on the final report, Rio's diamond exploration team will assess the data and make their recommendations.

A drill program started in early April and has now been completed. In the area of the Bishop Kimberlite four holes were drilled. A triangle of three drill holes each 100 m apart was completed to test a coincident magnetic/gravity geophysical anomaly. Two of the drill holes intersected kimberlite-granite breccia dykes over core lengths of 2 m and 13 m respectively.

The fourth drill hole was a vertical hole drilled directly over the known Bishop kimberlite, 200 m south of the triangle of three holes. This hole confirmed that the kimberlite pipe subcrops, covered by 15 m of overburden. Drilling in the Bishop pipe was terminated in kimberlite at 35 m depth due to freezing problems with the drill and a high risk of losing the drill rods. The drilling results, in combination with the complex magnetic and gravity signatures possibly associated with the Bishop Kimberlite suggest that further drilling will be required in order to confirm the extent of the body.

44 samples comprising 890 kg of material are enroute to the Rio Laboratory in Thunder Bay for further analysis and microdiamond extraction.

Previous work on the Bishop Kimberlite by Mineral Services based on core drilled by GGL confirmed that the kimberlite had a potential diamond component and the presence of wood fragments in the kimberlite may indicate similarity to known diamond pipes in the area.

Three geophysical targets in the area of the 2009 ground gravity survey were each tested by one drill hole. No kimberlite was intersected despite quality kimberlite indicator mineral samples in the area.

#### Limited Operating History: Losses

The Company has experienced, on a consolidated basis, losses in all years of its operations and expects to incur losses for the foreseeable future. There can be no assurance that the Company will operate profitably in the future, if at all. As at February 28, 2010, the Company's deficit was \$22,994,762.

#### Price Fluctuations: Share Price Volatility

In recent years, the securities markets in the United States and Canada have experienced a high level of price and volume volatility, and the market price of securities of many mineral exploration companies have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur.

# Shares Reserved for Future Issuance: Dilution

As at April 26, 2010, there were 13,933,333 stock options and 5,783,334 share purchase warrants outstanding pursuant to which a total of 19,716,667 shares may be issued in the future, all of which will result in further dilution to the Company's shareholders and pose a dilutive risk to potential investors.

#### Stock Option Plan

In 2006, the Company amended its Stock Option Plan to a 10% rolling plan whereby the Company may grant stock options to purchase up to 10% of the issued capital of the Company at the time of the grant of any option. Under the policies of the TSX Venture Exchange, options granted under the 10% rolling plan will not be required to include the mandatory vesting provisions required by the Exchange for fixed number stock option plans, except for stock options granted to investor relations consultants. Awarded stock options are exercisable over a period not exceeding five years at exercise prices determined by the Board of Directors.

Under this plan, the number of shares available for grant increases as the issued capital of the Company increases.

#### **Corporate Governance**

The Company has a Corporate Disclosure Policy, an Insider Trading Policy and a Whistle Blower Policy. To view a copy of these policies, please go to www.gglresourcescorp.com.

# **Overall performance/results of operations**

#### Period ended February 28, 2010 compared to period ended February 28, 2009

As at February 28, 2010, the Company had incurred exploration costs on mineral properties of (4,434) (sampling \$636; licences, recording fees and lease payments \$10,965; salaries and wages \$305; technical and professional services \$24,192; transportation \$295 and project supplies of \$(40,827)). Exploration costs for the period ended February 28, 2010 are lower than 2009 by \$78,346 a decrease of 106 %. Exploration costs were lower in 2010 than 2009 for all categories of expenditures except sampling. The large decrease is due to the \$45,869 sale of some fuel from the Company's cache.

During the period ended February 28, 2010 the Company was unable to secure financing and this has necessitated an usually slower start to the year for exploration work.

On a per project basis, the Company spent \$(4,434) exploration costs as follows: \$4,211 on the CH project; \$9,280 on the Doyle Lake project; \$8,969 on the McConnell Creek project, \$2,394 on the Fishback Lake Property and \$(29,288) on the Providence Greenstone Belt net of the sale of \$45,869 of fuel from inventory.

The Company reported a net loss of \$218,962 for the period ended February 28, 2010 compared to a net loss of \$197,767 for the period ended February 28, 2009 (an increase of 10.7 % from 2009 to 2010). General administration and exploration expenses for the period ended February 28, 2010 were \$82,204 compared to \$138,935 for the period ended February 28, 2009 (a decrease of 40.8% from 2009 to 2010). The change in general administration and exploration expenses was due to a decrease in the following expenditures during the period: office services and expenses (2010-\$23,829; 2009-\$45,434); legal and audit (2010-\$(2037); 2009-\$2,786); and general exploration costs (2010-\$16,870; 2009-\$66,631). There was a slight increase in the other expenditures such as: consulting fees (2010-\$32,813; 2009-\$14,062); licences, taxes, insurance and fees (2010-\$8,983; 2009-\$8,771); shareholders' meetings and reports (2010-\$757; 2009-\$725); and travel (2010-\$610; 2009-\$nil).

Office services and expenses were lower at the end of February 28, 2010 due to the downsizing of the Vancouver office in September 2009 and the elimination of a full time administrative assistant in June 2009.

Legal and audit fees were lower due to an error in estimating the audit fee for 2009 and almost no legal fees (\$55) during the period ended February 28, 2010. General exploration costs were lower during the period ended February 28, 2010 due to the sale of the Yellowknife house in 2009 which reduced office and house expenses such as heating and electricity.

Consulting fees increased during the period ended February 28, 2010 due to management spending more time actively pursuing sources of financing for the Company. Licences, taxes, insurance and fees had a slight increase in the period ended February 28, 2010 due to the increase in the TSX annual sustaining fee which is based on the closing price of the Company's shares on December 31 (2009-\$0.05; 2008-\$0.03). Shareholders meetings and reports had a slight increase due to a longer news release in 2010 than in 2009. Travel expenditures increased in the period ended February 28, 2010 due to various meetings relating to the pursuit of financing.

Revenue for the period ended February 28, 2010 was \$3,818 (\$7 of interest income and \$3,811 in operator's fees). Revenue for the period ended February 28, 2009 was \$335,302 (\$84 of interest income; \$104,850 from the sale of the data set and technical support and a gain on the sale of property and equipment of \$230,368).

# Acquisition and Disposition of Resource Properties and Write offs

During the period ended February 28, 2010 the Company wrote off 8 Providence Greenstone Belt claims (16,078 acres) and the related costs of \$140,178 were written off.

## **Related Party Transactions**

During the three months ended February 28, 2010, the Company was billed 37,500 (2009 - 37,500) by a director, including 32,813 (February 28, 2009 - 14,063) for consulting fees and 4,687 (February 28, 2009 - 23,437) for technical and professional services. Included in the February 28, 2010 accounts payable is 244,947 (2009 - 113,330) owed by the Company to the director. Transactions with related parties are measured at the exchange amount which is the amount agreed to by transacting parties.

## **Commitments**

The Company has no commitments. Its office space is rented on a month to month basis.

## Management of Capital

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

In the management of capital, the Company includes the components of shareholders' equity as well as cash and cash equivalents.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust its capital structure, the Company may attempt to issue new shares, issue new debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents.

In order to maximize ongoing development efforts, the Company does not pay dividends.

# Critical Accounting Policies

No new accounting policies were introduced in 2010.

# Adoption of New Accounting Policies

# **Future Changes in Accounting Policies**

(a) Business combinations, consolidated financial statements and non-controlling interests - Sections 1582, 1601 and 1602

The CICA issued three new accounting standards in January 2009: Section 1582, Business Combinations, Section 1601, Consolidated Financial Statements, and Section 1602, Non-Controlling Interests. These new standards will be effective for fiscal years beginning on or after January 1, 2011. The Company is in the process of evaluating the requirements of the new standards.

Section 1582 replaces Section 1581, Business Combinations, and establishes standards for the accounting for a business combination. The section applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2011. Sections 1601 and 1602 together replace Section 1600, Consolidated Financial Statements. Section 1601 establishes standards for the preparation of consolidated financial statements. Section 1601 applies to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011. Section 1602 establishes standards of accounting for a non-controlling interest in a subsidiary in consolidated financial statements relating to a business combination. The section applies to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011.

(b) International Financial Reporting Standards ("IFRS")

In 2006, the Canadian Accounting Standards Board ("AcSB") published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008 the AcSB announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own GAAP. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of December 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended November 30, 2011. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

During the year 2009, the Company started the scoping and planning phase of its changeover plan. The Company has identified the following four phases of its conversion plan: scoping and planning, detailed assessment, operations implementation and post implementation. The Company expects to have the scooping and planning phase completed during the 2010 fiscal year. The detailed assessment phase will include (a) identifying accounting policy choices under IFRS1- First Time Adoption of International Financial Reporting Standards and other IFRS standards that affect the Company; (b) quantifying the impact of the choices on the financial statements and identifying the business processes and resources impacted; and (c) preparing templates for the financial statements. The operations implementation phase will include the design of business, reporting and system processes to support the IFRS compliant financial data for the opening balance sheet at December 1, 2010 and thereafter and testing of the internal control environment and updated processes for disclosure controls and procedures. The final phase involves maintaining IFRS compliant financial data and processes for the first fiscal reporting year 2011 and in future.

Please see Notes 2 and 3 of the Consolidated Financial Statements for the year ended November 30, 2009 for a complete listing of accounting policies followed by the Company.

#### Summary of Quarterly Information

Quarter Ended:	February 28, 2010 (\$)	November 30, 2009 (\$)	August 31, 2009 (\$)	May 31, 2009 (\$)	February 28, 2009 (\$)	November 30, 2008 (\$)	August 31, 2008 (\$)	May 31, 2008 (\$)
Total Revenues <sup>(1)</sup>	3,818	7,976	15	645	335,302	14,681	8,440	21,144
Net Income (Loss) <sup>(2)</sup>	(218,962)	(573,938)	(1,477,109)	(1,654,476)	(197,767)	(176,302)	359,815	(1,463,445)
Net income (loss) per share	(0.001)	(0.008)	(0.010)	(0.011)	(0.001)	(0.000)	0.003	(0.011)

The following table sets forth a comparison of revenues and earnings for the previous eight quarters ending with February 28, 2010. Financial information is prepared according to GAAP and is reported in Canadian \$.

Note:

(1) In 2010, revenue is comprised of \$7 of interest income and \$3,811 of operator's fees. In 2009, revenue is comprised of \$744 of interest income, \$7,526 of operators' fees, \$105,300 from the sale of the data set and technical support and a gain of \$230,368 on the sale of property and equipment. In 2008 revenue is from interest income.

(2) Income (loss) before discontinued operations and extraordinary items is the same as Net Income (Loss) as there are no discontinued operations or extraordinary items in 2010, 2009 or 2008. Fully diluted earnings (loss) per share is not presented as the exercise of warrants and stock options would be anti-dilutive.

During the year, management decides which properties will be retained and which properties will be abandoned based on results from work performed during the field season and the analysis of sample assays. Properties that will be abandoned are written off when management makes its decision to cease any further work which will increase the Net Loss.

## **Liquidity and Capital Resources**

The Company does not have operating revenues and must finance its exploration activity by raising funds through joint ventures or equity financing. The exploration and subsequent development of the Company's properties depend on the Company's ability to obtain required financing. There is no assurance that additional funding will be available to allow the Company to fully explore its existing properties. The Company requires sufficient funds to complete further exploration work (see Management of Capital). Failure to obtain financing could result in delays or indefinite postponement of further exploration and the possible, partial or total loss of the Company's interest in certain properties.

The Company is dependent on raising funds by the issuance of shares or disposing of interests in its unproven mineral interests (by options, joint ventures or outright sales) in order to finance further acquisitions, undertake exploration and development of mineral interests and meet general and administrative expenses in the immediate and long term. There can be no assurance that the Company will be successful in raising its required financing.

The Company's financial performance is dependent on many external factors. The Company expects that any revenues it may earn from its operations in the future will be from the sale of minerals. Both prices and markets for metals and minerals are cyclical, difficult to predict, volatile, subject to government price fixing and controls and respond to changes in domestic and international, political, social and economic environments. In addition, the availability and cost of funds for exploration, development and production costs are difficult to predict. These changes in events could materially affect the financial performance of the Company. The Company had a working capital deficiency at February 28, 2010 of \$263,843 compared to a deficiency of \$199,462 as at November 30, 2009. The Company's current liabilities exceeded its current assets at February 28, 2010. The Company has no material income from operations and any improvement in working capital results primarily from the issuance of share capital.

As at February 28, 2010 and 2009, the Company had no long term debt.

For the period ended February 28, 2010, the Company experienced negative cash flow of \$68,815 (2009 - \$21,731) (before allowing for changes in non-cash operating working capital balances) from operating activities. Changes in operating activities resulted primarily from 2009 activities: the sale of the Company's data set and higher general exploration costs and higher office services and expenses. (See Overall performance/results of operations for further information.)

The Company's cash position as at February 28, 2010 was \$112,871 (November 30, 2009 - \$162,962). The decrease in cash position compared to November 30, 2009 was due principally to expenses incurred and the lack of financing raised in the three months ended February 28, 2010. See Notes 4 and 5 – Share Capital and Stock Options in the Notes to the Consolidated Financial Statements.

During the period ended February 28, 2010, 200,000 options expired unexercised.

At February 28, 2010, the Co	mpany had the	following share	purchase warra	nts outstanding:

Number	<b>Exercise Price</b>	Expiry Date
2,855,000	\$0.40	Aug.13, 2010
20,000	\$0.40	Aug.18, 2010
710,000	\$0.10	Sept. 21, 2010
888,000	\$0.10/ \$0.20/\$0.30	Aug. 20, 2012
1,310,334	\$0.10/ \$0.20/\$0.30	Sept. 21, 2012
5,783,334		

See Notes 4 and 5 of the Consolidated Financial Statements for February 28, 2010.

## Subsequent Event

No subsequent events.

## Outstanding Share data as at April 26, 2010:

(a) Authorized and issued share capital:

Class	Par Value	Authorized	Issued Number
Common	No par value	Unlimited	150,423,693

# (b) Summary of options outstanding:

Security	Number	Exercise Price	<b>Expiry Date</b>
Options	300,000	\$0.20	May 12, 2010
Options	50,000	\$0.20	June 7, 2010
Options	210,000	\$0.20	July 8, 2010
Options	50,000	\$0.63	July 20, 2010
Options	3,333	\$0.20	July 20, 2010
Options	10,000	\$0.26	July 29, 2010
Options	50,000	\$0.20	July 29, 2010
Options	150,000	\$0.10	July 29, 2010
Options	25,000	\$0.20	October 28, 2010

The Company's web site address is <u>www.gglresourcescorp.com</u>. Other information relating to the Company may be found on SEDAR at www.sedar.com.

# **Forward Looking Statements**

This discussion includes certain statements that may be deemed "forward-looking statements." All statements in this discussion, other than statements of historical facts, which address future production, reserve potential, exploration drilling, exploration activities and events or developments that the Company expects, are forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "advance", "expects", "plans", "anticipates", "believes", "intends", "allocated", "estimates", "projects", "potential" and similar expressions, or that events

or conditions "will", "would", "may", "could", "should" or are "subject to" occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and those actual results or developments may differ materially from those projected in the forward-looking statements. Forward-looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. The Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.

The accompanying notes are an integral part of these consolidated financial statements.

Notes to Consolidated Financial Statements February 28, 2010

These notes should be read in conjunction with the Audited Consolidated Financial Statements for the year ended November 30, 2009.

# 1. Nature of Operations

The Company changed its name from GGL Diamond Corp. to GGL Resources Corp. to better represent the Company's variety of assets. Trading under the new name began on September 8, 2009. There were no changes to the number of shares issued and outstanding or to the trading symbol.

The Company is in the exploration stage and, on the basis of information to date, does not yet have economically recoverable reserves. The underlying value of the mineral properties and related deferred costs is entirely dependent upon the existence of such reserves, the ability of the Company to obtain the necessary financing to develop the reserves and upon future profitable production.

The Company intends to continue its exploration programs. In light of negative cash flows from operating activities, operating losses accrued in the past years and a negative working capital, the Company's ability to continue its exploration programs is dependent on its ability to secure additional financing. While it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. Management is actively pursuing such additional sources of financing.

These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP") applicable to a going concern which assumes that the Company will realize its assets and discharge its liabilities in the normal course of business. Realization values may be substantially different from the carrying values as shown and these consolidated financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern.

## 2. Adoption of New Accounting Policies

## **Future Changes in Accounting Policies**

International Financial Reporting Standards ("IFRS")

In 2006, the Canadian Accounting Standards Board ("AcSB") published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008 the AcSB announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own GAAP. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of December 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended November 30, 2011. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

# 3. Unproven Mineral Interests, continued

- (a) Doyle Lake, Northwest Territories, Canada
  - (i) Under the De Beers Agreement ("the Agreement") dated May 25, 1995, De Beers has earned a 60% interest in the Doyle Lake Properties ("the Properties"), which consist of 5 claims and 3 fractional claims (12,972 acres); and
  - (ii) in addition, the Company holds 17 claims (16,206 acres) in the Doyle Lake area that are not subject to the Agreement. 16 of these claims are leases.
- (b) Fishback Lake, Northwest Territories, Canada

The Company owns 7 claims (13,301 acres). One of these claims is a mining lease.

(c) CH, Northwest Territories, Canada

In 2009 the Company signed an exploration and option agreement on 73 of its 121 CH claims in the Northwest Territories (10 of these claims (23,477 acres) were written off in 2009). Rio Tinto Exploration Canada Inc. (formerly, Kennecott Canada Exploration Inc.) must make payments totalling \$1,000,000 and incur cumulative expenditures of \$10,000,000 in order to earn a 100% interest, subject to a gross overriding royalty of 1.5% of the appraised value of all gem and industrial diamonds recovered, sorted and graded from the property and a 1.5% net smelter returns royalty on the net value of all ores, minerals, metals and materials except diamonds, mined and removed from the property and sold or deemed to have been sold. The payments and both royalties are payable to the Company. The Company received the first payment of \$25,000 in 2009.

(d) Providence Greenstone Belt, Northwest Territories, Canada

The Company owns 123 claims (269,811 acres) in the Providence Greenstone Belt area of the Northwest Territories. These claims lie within an extensive belt of rocks previously identified by a mapping project funded by the Geological Survey of Canada and reported as having the potential for hosting magmatic nickel mineralization. During the period, 8 claims (16,078 acres) were allowed to lapse and the related costs of \$140,178 were written off.

During the period, the Company sold some of its fuel inventory for \$45,689.

(e) McConnell Creek, British Columbia, Canada

The Company owns 2 mineral tenures (4,878 hectares) in the Omineca Mining Division of British Columbia.

(f) General exploration, Northwest Territories, Canada

In 2009 the Company signed a non-exclusive licence agreement for the use of its Slave Geological Province data set for diamond exploration for \$100,000 and would provide 500 hours of technical support at a price of \$50,000 prepaid. As at February 28, 2010, the amount of \$44,700 presented as deferred revenues represents the remaining hours of technical support.

Notes to Consolidated Financial Statements February 28, 2010

# 4. Share Capital

- (a) Authorized: unlimited common shares without par value;
- (b) 150,423,693 common shares issued (no changes during the period);
- (c) During the quarter ended February 28, 2010, 200,000 stock options expired unexercised;
- (d) At February 28, 2010, the Company had the following share purchase warrants outstanding:

Number of warrants	Exercise Price	Expiry Date
2,855,000	\$0.40	Aug. 13, 2010
20,000	\$0.40	Aug. 18, 2010
710,000	\$0.10	Sept. 21, 2010
888,000	\$0.10/ \$0.20/ \$0.30	Aug. 20, 2012
1,310,334	\$0.10/ \$0.20/ \$0.30	Sept. 21, 2012
5,783,334	-	

No changes in warrants during the period ended February 28, 2010.

# 5. Stock Options

In 2006, the Company amended its Stock Option Plan to a 10% rolling plan whereby the Company may grant stock options to purchase up to 10% of the issued capital of the Company at the time of the grant of any option. Under the policies of the TSX Venture Exchange, options granted under the 10% rolling plan will not be required to include the mandatory vesting provisions required by the Exchange for fixed number stock option plans, except for stock options granted to investor relations consultants. Awarded stock options are exercisable over a period not exceeding five years at exercise prices determined by the Board of Directors.

Under this plan, the number of shares available for grant increases as the issued capital of the Company increases.

	Shares	Weighted Average Exercise Price
Options outstanding as at Nov. 30, 2009	14,133,333	\$0.21
Expired	(200,000)	\$0.10
Options outstanding as at February 28, 2010	13,933,333	\$0.22
2010 options exercisable	13,933,333	\$0.22
2009 options exercisable	10,288,333	\$0.35

Stock options outstanding as at February 28, 2010:

# 6. Contributed Surplus

No changes in contributed surplus for the period ended February 28, 2010.

# 7. Related Party Transactions

During the three months ended February 28, 2010, the Company was billed 37,500 (2009 - 337,500) by a director, including 32,813 (February 28, 2009 - 14,063) for consulting fees and 4,687 (February 28, 2009 - 23,437) for technical and professional services. Included in the February 28, 2010 accounts payable is 244,947 (2009 - 113,330) owed by the Company to the director. Transactions with related parties are measured at the exchange amount which is the amount agreed to by transacting parties.

# 8. Segmented information

The Company is involved in mineral exploration and development activities, which are conducted in Canada. The Company is in the exploration stage and, accordingly, has no reportable segment revenues or operating results for each of the three months ended February 28, 2010 and 2009.

# 9. Supplementary Cash flow information

Non-cash operating, financing, and investing activities were conducted by the Company during the fiscal quarters ended February 28, 2010 and 2009 as follows:

	<u>2010</u>	<u>2009</u>
Operating activities Accounts payable for deferred exploration costs	\$ <u>183,699</u>	\$
Financing activities Issuance of common shares as finder's fee	\$	\$ <u> </u>
Investing activities Accounts payable for deferred exploration costs	\$ <u>(183,699)</u>	\$(201,116)
Other supplementary cash flow information:		
Cash paid for interest charges Cash paid for income taxes	\$ <u>191</u> \$	\$ <u>165</u> \$

Notes to Consolidated Financial Statements February 28, 2010

# 10. Comparative Figures

Certain 2009 figures have been reclassified to conform to the presentation used in the current period.

# 11. Management of Capital

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

In the management of capital, the Company includes the components of shareholders' equity as well as cash and cash equivalents.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust its capital structure, the Company may attempt to issue new shares, issue new debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents.

In order to maximize ongoing development efforts, the Company does not pay dividends.
