**QUARTERLY REPORT
FOR THE QUARTER ENDING 30 JUNE 2010**

Maari FPSO

**QUARTERLY REPORT
FOR THE QUARTER ENDING 30 JUNE 2010**

HIGHLIGHTS:

- **Cash up ~24% to A\$29.4 million**
- **Additional cash increase forecast for next quarter**
 - **including US\$5 million for WA-389-P back costs**
 - **and US\$5.14 million from sale of Kimu field**
- **Revenue up ~19% to A\$16.4 million**
- **Hedging receipts for May A\$.317 million**
- **Maari oil production increasing**
- **Oyong oil production 85% above forecast**
- **Wortel development and several high potential wells in the pipeline**

SUMMARY

FINANCIAL AND CORPORATE

- **Quarterly revenue**

Revenue increased 19% over last quarter to A\$16.4 million on sales of 158,504 barrels of oil and 742.7 million cubic feet of gas.

- **Cash at end of quarter**

Cash increased 24% over last quarter to A\$29.4 million.

- **Hedging**

CUE has hedged approximately 15,000 barrels of oil per month or approximately one quarter of its forecast oil production for the period May to December 2010 at a price of US\$86 per barrel. Proceeds of the hedge for May was A\$0.317 million.

OPERATIONS

PNG

- **Barikewa Gas Field**

- Interpretation of the 60km 2D seismic survey over the Barikewa gas field supports the drilling of a Barikewa -3 appraisal well, most likely in 2Q 2011.

- **SE Gobe Field**

- Negotiations to sell SE Gobe gas to the PNG LNG project neared completion during the quarter with a final draft of a Memorandum of Understanding for the sale being negotiated.

- **Kimu Gas Field**

- CUE sold the subsidiary company holding its interest in the Kimu gas field for US\$5.14 million.

New Zealand

- **Maari Field**

- At the end of the quarter 8.6 million barrels of oil had been produced.
- Installation of the permanent workover rig was completed and various well workovers commenced.
- The New Zealand government extended the Maari production mining permit PMP38160 to include the Manaia discovery.

- **Exploration**

- Acquisition of the 200sqkm Matariki 3D seismic survey was completed.

Indonesia

- **Wortel Field**

A joint venture development decision is expected around the end of the third quarter.

- **Oyong Field**

Oil production continued at around 84% higher than forecast rates due to better than forecast reservoir performance.

Australia

- **WA-389-P**

During the quarter, CUE announced that Woodside had agreed to farm-in to the permit to obtain a 65% interest in return for paying CUE US\$5 million in back costs, acquiring 1440sqkm of new 3D seismic, reprocessing existing 3D seismic data and drilling one exploration well. CUE will retain a 35% interest and will be free carried through the farm-in work programme.

ACTIVITY REPORT

(1) PRODUCTION / DEVELOPMENT ACTIVITY

PAPUA NEW GUINEA

PDL 3 – SE Gobe Field, PNG (5.568892% interest)

Operator: Santos

SE Gobe Unit, PNG (3.285646% interest)

Operator: Oil Search

CUE's received oil production revenue during the quarter from the SE Gobe field was A\$0.72 million which equated to 7,980 barrels of oil.

The SE Gobe field average oil production rate for the quarter was approximately 2,900 barrels of oil per day (CUE share approximately 95 barrels of oil per day).

INDONESIA

Sampang PSC – Oyong Field – Madura Strait, East Java, Indonesia (15% interest)

Operator: Santos

Oyong Field

CUE's received oil production revenue during the quarter from the field was A\$7.23 million which equated to 79,400 barrels of oil.

CUE's received gas production revenue during the quarter from the field was A\$2.3 million which equated to 742.7 million cubic feet of sales gas.

The average oil production rate for the quarter was approximately 4,250 barrels of oil per day, approximately 84% above the forecast rate due to better than expected reservoir performance and the average gas production rate for the quarter was 63.1 million cubic feet per day.

Wortel Field

At the end of May, Front End Engineering and Development (FEED) studies were 68% completed and gas marketing discussions were continuing. A development decision for the field is expected around the end of the third quarter 2010, with first gas expected in the fourth quarter 2011.

NEW ZEALAND

PMP 38160 (Granted from December 2005, for 22 years)

Taranaki Basin – New Zealand (5% interest)

Operator: OMV New Zealand

Maari Field

Oil production revenue received during the quarter was A\$6.12 million which equated to 71,124 barrels.

Installation of the permanent workover rig on the Maari platform was completed during the quarter and the defective electric submersible pump in the MR5 oil production well was replaced. The MR7 water injection well had additional perforations made to enhance water injectivity and hence reservoir pressure. Repair of the defective electric submersible pump in the MR3 oil production well has been completed and replacement of the MR1 pump is almost completed.

The field oil production rate which has been constrained by the defective pumps is increasing and is expected to increase further in the next quarter.

The New Zealand government has extended the Maari production mining permit PMP38160 to include the Manaia discovery. The permit will expire in 2027.

HEDGING

CUE has hedged 15,000 barrels of oil per month for the period May through December 2010 at a price of US\$86 per barrel. This represents a quarter of what CUE's forecast oil production for the period. Total hedging receipts for the month of May was A\$0.317 million.

(2) EXPLORATION AND APPRAISAL ACTIVITIES

PAPUA NEW GUINEA

PRL -8 – Papuan Basin, PNG (10.72% interest)

Operator: Oil Search

CUE has signed an agreement to sell its 100% owned subsidiary Omati Oil Pty Ltd, which contains CUE's interest in the Kimu field, for US\$5.14 million. The sale is subject to joint venture preemptive rights. The sale is expected to be finalised in the next quarter.

PRL -9 – Papuan Basin, PNG (14.894% interest)

Operator: Santos

Interpretation of the new 60km Barikewa 2D seismic survey was undertaken during the quarter. The data supports the drilling of a Barikewa -3 appraisal well and the well is likely to be drilled in the second quarter of 2011. A location for the well remains to be chosen.

NEW ZEALAND

PEP51313 – Taranaki Basin (20% interest)

Operator: Todd Exploration Limited

Acquisition of the 200sqkm 3D seismic survey over the Matariki prospect was completed during the quarter using the Reflect Resolution seismic vessel.

Two reconnaissance 2D seismic lines were also acquired over the Te Whatu and Pukeko leads. Processing of the data is proceeding

AUSTRALIA

WA-359-P and WA-409-P Carnarvon Basin –Western Australia (50% interest)

Operator: Cue Energy Resources Limited

CUE is seeking to farmout in both permits and is in discussions with several companies.

WA-360-P Carnarvon Basin – Western Australia (15% interest)

Operator: MEO Australia Limited

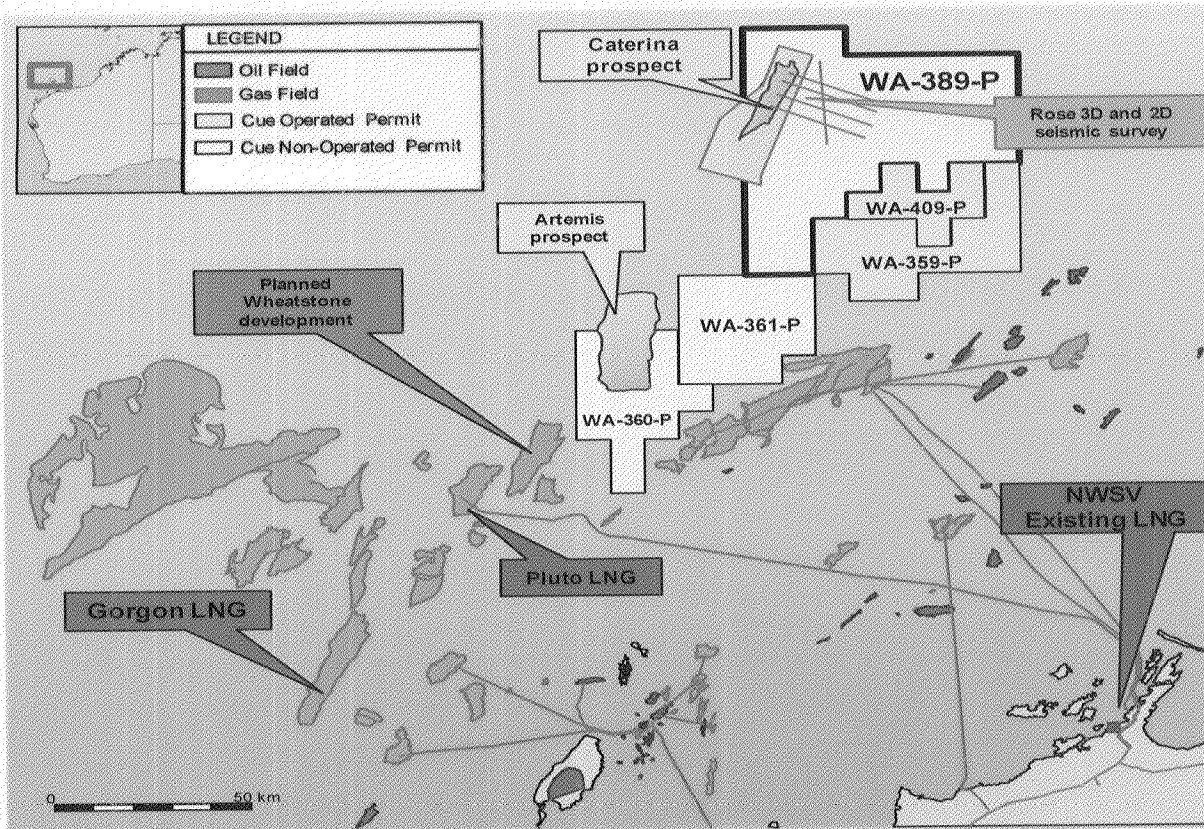

During the quarter, MEO announced a farmout to Petrobras International Braspetro BV to drill the Artemis -1 well in late 2010. CUE will be free carried for its 15% interest in the well.

WA-389-P Carnarvon Basin – Western Australia (100% interest)

Operator: Cue Energy Resources Limited

Woodside has agreed to farmin to the permit and will obtain a 65% interest and become operator. Woodside will pay CUE US\$5 million in back costs and fund the acquisition of a 1440sqkm 3D seismic survey, the reprocessing of existing 3D seismic data and the drilling of the first exploration well. Farmin documents have been signed by CUE and Woodside.

CUE will retain a 35% free carry through the farmin work programme.

By Order of the Board

Andrew Knox
Public Officer

Various statements in this report constitute statements relating to intentions, future acts and events. Such statements are generally classified as forward looking statements and involve know risks expectations, uncertainties and other important factors that could cause those future acts, events and circumstances to differ from the way or manner in which they are expressly or impliedly portrayed herein.

Some of the more important of these risks, expectations and uncertainties are pricing and production levels from the properties in which the Company has interests and the extent of the recoverable reserves at those properties. In addition, the Company has a large number of exploration permits. Exploration for oil and gas is expensive, speculative and subject to a wide range of risks. Individual investors should consider these matters in light of their personal circumstances (including financial and taxation affairs) and seek professional advice from their accountant, lawyer or other professional adviser as to the suitability for them of an investment in the Company.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
