1. Business and Summary of Significant Accounting Policies

Business

Partnership Capital Growth, LLC (the "Company") is a Delaware limited liability company formed on February 24, 2006. The Company is registered with the Securities and Exchange Commission as a securities broker-dealer and is a member of the Financial Industry Regulatory Authority. The Company primarily engages in private placement transactions executed in the healthy and active living marketplace.

As a limited liability company, the member's liability is limited to amounts reflected in the member's capital account.

Cash

The Company maintains its cash in bank deposit accounts which at times may exceed federally insured limits. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk on cash.

Non-Marketable Securities

Non-marketable securities are carried at fair value as determined by management.

Furniture, Equipment, and Leasehold Improvements

Furniture, equipment, and leasehold improvements are recorded at cost, net of accumulated depreciation of \$27,752. Depreciation is computed under the straight-line method using estimated useful lives of three to seven years.

Income Taxes

No provision for federal or state income taxes has been made since the Company is treated as a single member limited liability corporation for income tax purposes and its income is allocated to the member for inclusion in the member's income tax returns.

Use of Estimates

The process of preparing financial statements in conformity with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions regarding certain types of assets and liabilities. Such estimates primarily relate to unsettled transactions and events as of the date of the financial statements. Accordingly, upon settlement, actual results may differ from estimated amounts.

2. Fair Value Measurement

The Company's investments are presented at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various valuation approaches. SFAS No. 157 establishes a fair value hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Company. Unobservable inputs reflect the Company's assumption about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy is categorized into three levels based on the inputs as follows:

Level 1 — Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Valuation adjustments and block discounts are not applied to Level 1 securities. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant degree of judgment.

Level 2 — Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 — Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The Company's investments measured at fair value on a recurring basis are categorized as Level 3 based upon the lowest level of significant input to the valuations.

The following summarizes the change in carrying values associated with Level 3 investments for the year ended December 31, 2009:

Balance at December 31, 2008	\$ 400,834
Securities received as transaction fee revenue	122,500
Unrealized loss	<u>(231,672)</u>
Balance at December 31, 2009	<u>\$ 291,662</u>

At December 31, 2009, the Company had net capital of \$2,054,292 which was \$2,029,942 in excess of its required net capital of \$24,350. The Company's aggregate indebtedness to net capital ratio was 0.17 to 1.

4. Lease Obligation

Under the terms of the expense-sharing agreement, the Affiliate allocated to the Company 80% of the total monthly rent paid by the Affiliate.

The future minimum lease payments allocable to the Company are as follows:
