

THE EXPERIENCE YOU WANT • THE SERVICE YOU EXPECT • THE VALUE YOU DESERVE

13000004

Beacon Roofing Supply, Inc.

2012 ANNUAL REPORT

CORPORATE PROFILE

Beacon Roofing Supply, Inc. has grown to be the second largest distributor of roofing materials and complementary building products in North America. With approximately 42,000 customers, Beacon is the largest or second largest distributor in many of the regions we serve (see map below). We have a well-known reputation for quality people who provide our customers with "The Experience You Want, The Service You Expect, The Value You Deserve." Our people are supported by a strong, values-oriented corporate culture. We are in our 84th year! We originated with Beacon Sales Company, founded in Charlestown, Mass. in 1928.

Our local branches stock a comprehensive product line that caters to the local market. In addition to residential and commercial roofing, our extensive product categories include windows, siding, decking, doors, waterproofing and other exterior products.

BEACON TODAY: 224 branches in 38 states and across Canada

Beacon distributes the roofing and complementary products of brand-name manufacturers. These manufacturers understand that our branch staffs' expertise and quality service will ensure the successful application of their premium products.

Our knowledgeable and experienced sales and marketing team includes outside sales and business development specialists, inside sales/customer service representatives, manufacturer/architectural representatives and product specialists. Contractors trust the product knowledge and application expertise of Beacon's staff. They rely on this expertise, along with on-time delivery and product availability, to deliver successful, profitable and on-time projects.

As a result, successful partnerships that go beyond the industry norm are formed between Beacon branches and our customers. We have grown through strategic acquisitions, the opening of new branches, and the expansion of product and service offerings in our branches. Our business is well-balanced, with non-discretionary re-roofing applications and discretionary new construction and remodeling in both the residential and commercial markets. We have a solid foundation for continued growth based on a highly scalable platform, a proven business model, results-oriented management, a strong people-focused corporate culture and a company-wide enterprise resource planning system.

BEACON'S GROWTH

- 1928** Beacon Sales Company is established in Charlestown, Massachusetts.
- 1984** Andrew Logie buys a majority interest in Beacon Sales Company.
- 1984-1997** Beacon grows in sales and reputation, opening four new branches in New England.
- 1997** Equity firm Code, Hennessy & Simmons III, L.P. purchases a majority interest, and Beacon Roofing Supply is formed.
- 1998** Quality Roofing Supply in Pennsylvania becomes Beacon's first acquisition.
- 1999-2000** Best Distributing in the Carolinas joins Beacon. Groupe Bedard and Exeltherm Supply are acquired and become Beacon Canada.
- 2001** The Roof Center in Maryland/Virginia and West End Lumber in Texas are acquired.
- 2004** Beacon goes public with its IPO (NASDAQ: BECN). JGA Corp. in Georgia and Florida becomes part of Beacon.
- 2005** Shelter Distribution with more than 50 branches in 14 Midwestern and Southern states is acquired. Beacon gains a presence on the West Coast with Pacific Supply.
- 2006-2007** North Coast Commercial Roofing Systems, Roof Depot and RSM Supply are acquired totaling 22 branches.
- 2011** Beacon acquires Enercon Products with six branches in Western Canada.
- 2012** Beacon acquires Fowler & Peth, Cassidy Pierce and Structural Materials totaling 20 branches.

Beacon's complete history can be found at beaconroofingsupply.com/about-us/history/default.html.

2012 ACCOMPLISHMENTS

RECORD SALES AND PROFIT

Sales were \$2.04 billion and net income was \$75.6 million. Diluted net income per share was \$1.58.

MAJOR ACQUISITIONS

Fowler & Peth, Cassidy Pierce and Structural Materials were acquired.

NEW CREDIT FACILITY

\$565 million five-year senior facility completed with debt paydown.

DEAR SHAREHOLDERS AND FRIENDS

We are proud to report that Beacon is now a \$2 billion company with a market cap of almost \$1.5 billion. It is our pleasure to share that growth accomplishment with you, along with the rest of our success and achievements in 2012. We also want to use this letter to again recognize our team for their continued dedicated performance, and update you on a couple of important industry trends as well.

Our total sales increased 12.5% to \$2.04 billion in 2012 from \$1.82 billion in 2011. Existing market sales increased 6.3%. In existing markets, residential roofing product sales increased 11.8% and non-residential roofing product sales increased 2.3%, while complementary product sales (windows, siding, decking and other) declined 0.4%. Our 2012 sales were favorably affected by increases in re-roofing and remodeling activities. This included the impact from storm business in several markets, especially in the first half of the year. Higher average selling prices also favorably affected our 2012 sales.

Net income was \$75.6 million in 2012 compared to \$59.2 million in 2011, an increase of 28%. The higher net income was chiefly due to the higher sales and a higher gross margin rate, which was boosted by a higher percentage of residential roofing sales. Our balance sheet remains strong. Even after the cash used for the acquisitions discussed below, we were able to reduce our outstanding debt by almost \$50 million.

As you can see, our growth accelerated in 2012. We opened four new branches in existing markets and successfully completed some major acquisitions. Our acquisition growth strategy is to acquire businesses that add to or fill in our geographic footprint, have a history of profitability and growth, are well managed and have a good reputation. We are aggressively seeking such attractive partners. Like us, our recently acquired companies have successfully weathered the last few challenging economic years. We have waited patiently at times for the right opportunities to present themselves. This year our patience and discipline were rewarded with the successful acquisitions of the following suppliers:

- The Roofing Connection founded in 2001 with one location in Dartmouth, Nova Scotia;
- Fowler & Peth founded in 1948 with six locations in Colorado, two in Wyoming and one in Nebraska;

- Cassidy Pierce founded in 1947 and headquartered in Pittsburgh, Pennsylvania with six locations in that area;
- Structural Materials founded in 1948 with six locations in Southern California;
- Contractors Roofing & Supply Co. with one location near St. Louis; and
- McClure-Johnston this fall, in the first quarter of our fiscal year 2013, founded in 1914 with 14 locations in Pennsylvania, West Virginia, Western Maryland and Georgia.

We are working diligently to assimilate these new businesses into Beacon in order to bring out their full potential as soon as possible. In early 2012, we expanded our capacity for assimilating new businesses into Beacon by establishing executive level sponsorship of the team charged with integrating new businesses and promoting the adoption of best practices across our company. The prompt and efficient assimilation of our best practices by our newly acquired branches, including daily disciplines and controls, enables those businesses to leverage the best of Beacon and to bring out their full potential as soon as possible, while expanding the company's ability to absorb other acquisitions. This new team is making a significant impact and permitting our other operational executives to maintain their focus on their existing markets and further growth plans.

Also in 2012, we entered into a new, five-year, \$565 million senior secured credit facility with Wells Fargo. The new credit facility provides attractive interest rates, reasonable financial covenants, and substantial liquidity and financial flexibility to aggressively pursue acquisitions and grow our company. The timing for us to refinance was ideal because interest rates are at historical low levels. Our strong balance sheet and excellent credit standing helped us to obtain this new larger facility. We believe this sets us up with a terrific platform for long-term growth.

Recent industry predictions remain very positive. According to roofing industry sources, the U.S. roofing market is projected to grow 7.8% annually through 2015 to \$24.4 billion. Growing consumer and home builder confidence, along with new residential single-family and multi-housing construction, could contribute to Beacon's sales in 2013. According to the National Association of Home Builders/Wells Fargo Housing Market Index, home builder confidence rose five points in November 2012, increasing the overall index to 46. That was its highest point since May 2006 and was up 27 points from 19 in 2011.

We are ready with an experienced team and strategic focus to continue to recognize and take full advantage of the opportunities presented to us by the favorable long-term growth factors in our industry. We continue to grow through acquisitions, the opening of new branches, and the expansion of product and service offerings in our branches. To support this growth, we work hard to constantly deliver value to our customers. We are known for having quality employees who provide our customers with "The Experience You Want, The Service You Expect, The Value You Deserve" every day.

We are proud to recognize our team for their consistent and dedicated performance in 2012. We believe our people are well trained and highly motivated. We measure branch performance daily. Using local knowledge and expertise, our people aspire to

satisfy all of our customer needs while targeting new sales and achievement of timely inventory management and effective cost controls. With their experience and close customer relationships, our people reflect the Beacon way of achieving greater sales with careful management of resources.

We also want to take this opportunity to thank our retiring CFO David Grace for his many years of dedicated service to Beacon. Dave joined the company when Beacon operated just three branches. He has been a key part of the company's tremendous growth and success, including the completion of our 2004 IPO, a secondary offering in 2005, and many debt financings and acquisitions. He has built strong finance and IT teams and a disciplined financial culture that will serve the company well in the years ahead.

Today, as a \$2 billion and growing company, we will strive to leverage our larger size to further improve margins and strengthen our relationships with our customers and vendors. Our stewardship remains true to our long-term plan for profitability and growth, as well as to our company values, such as honesty, integrity and teamwork, that benefit us at every one of our branch and office locations.

We thank you for your continued support.

COMPANY VALUES

Our personal values are based upon these foundational principles:

- Honesty and integrity in everything we do.
- Loyalty to each other and our company.
- Caring and compassionate regarding each other.
- Pride in a job well done.
- Morality in dealing with each other, our customers, vendors and other constituents.

Our business values encompass these traits and characteristics:

- Results oriented – It's important to deliver on our promises.
- Strong work ethic – Something to be admired.
- Perseverance – Setbacks will occur, but this value will keep us focused on achieving our goals.
- Passion – We love our business and our people. Passion for one's work is key to our success.
- Frugality – We take care of the resources entrusted to us. Waste is not fair to those who trust us.
- Credibility – We deliver on our commitments. We can be counted on!
- Teamwork – We recognize that we depend on each other in all we do.
- Discipline – No shortcuts. Before decisions are made, we have the discipline to research all the facts. We seek good advice before moving ahead.

The Best Environment

- No fear
- No politics
- No secrets
- Lean and clean
- Cherish people
- Honesty and integrity
- When one hurts, we all help

Forward-looking statements

The matters discussed in this Form 10-K that are forward-looking statements are based on current management expectations that involve substantial risks and uncertainties, which could cause actual results to differ materially from the results expressed in, or implied by, these forward-looking statements. These statements can be identified by the fact that they do not relate strictly to historical or current facts. They use words such as “aim,” “anticipate,” “believe,” “could,” “estimate,” “expect,” “intend,” “may,” “plan,” “project,” “should,” “will be,” “will continue,” “will likely result,” “would” and other words and terms of similar meaning in conjunction with a discussion of future operating or financial performance. You should read statements that contain these words carefully, because they discuss our future expectations, contain projections of our future results of operations or of our financial position or state other “forward-looking” information.

We believe that it is important to communicate our future expectations to our investors. However, there are events in the future that we are not able to accurately predict or control. The factors listed under Item 1A, Risk Factors, as well as any cautionary language in this Form 10-K, provide examples of risks, uncertainties and events that may cause our actual results to differ materially from the expectations we describe in our forward-looking statements. Although we believe that our expectations are based on reasonable assumptions, actual results may differ materially from those in the forward looking statements as a result of various factors, including, but not limited to, those described under Item 1A, Risk Factors and elsewhere in this Form 10-K.

Forward-looking statements speak only as of the date of this Form 10-K. Except as required under federal securities laws and the rules and regulations of the SEC, we do not have any intention, and do not undertake, to update any forward-looking statements to reflect events or circumstances arising after the date of this Form 10-K, whether as a result of new information, future events or otherwise. As a result of these risks and uncertainties, readers are cautioned not to place undue reliance on the forward-looking statements included in this Form 10-K or that may be made elsewhere from time to time by or on behalf of us. All forward-looking statements attributable to us are expressly qualified by these cautionary statements.

PART I

ITEM 1. BUSINESS

Overview

We are one of the largest distributors of residential and non-residential roofing materials in the United States and Canada. We also distribute other complementary building materials, including siding, windows, specialty lumber products and waterproofing systems for residential and nonresidential building exteriors. We currently operate 224 branches in 38 states and 6 Canadian provinces, carrying up to 11,000 SKUs and serving approximately 42,000 customers. We are a leading distributor of roofing materials in key metropolitan markets in the Northeast, Mid-Atlantic, Midwest, Central Plains, South and Southwest regions of the United States and across Canada.

For the fiscal year ended September 30, 2012 (“fiscal year 2012” or “2012”), residential roofing products comprised 50% of our sales, non-residential roofing products accounted for 37% of our sales, and siding, waterproofing systems, windows, specialty lumber and other exterior building products provided the remaining 13% of our sales. Approximately 93% of our net sales were in the United States.

We also provide our customers a comprehensive array of value-added services, including:

- advice and assistance to contractors throughout the construction process, including product identification, specification and technical support;
- job site delivery, rooftop loading and logistical services;
- tapered insulation design and layout services;
- metal fabrication and related metal roofing design and layout services;
- trade credit; and
- marketing support, including project leads for contractors.

We believe the additional services we provide strengthen our relationships with our customers and distinguish us from our competition. The vast majority of orders require at least some of these services. Our ability to provide these services efficiently and reliably can save contractors time and money. We also believe that our value-added services enable us to achieve attractive gross profit margins on our product sales. We have earned a reputation for a high level of product availability and experienced and professional employees who provide high-quality service, including timely, accurate and safe delivery of products.

Our diverse customer base generally includes a significant portion of the residential and non-residential roofing contractors in most of the markets in which we operate. These roofing contractors are typically involved on a local basis in the replacement, or re-roofing, component of the roofing industry. We utilize a branch-based operating model in which branches maintain local customer relationships but benefit from our centralized functions such as information technology, accounting, financial reporting, credit, purchasing, legal and tax services. This business model allows us to provide customers with specialized products and personalized local services tailored to a geographic region, while benefiting from the resources and scale efficiencies of a national distributor.

We have achieved our growth through a combination of twenty-two strategic and complementary acquisitions between fiscal years 2002 and 2012, opening new branch locations, acquiring branches and broadening our product offering. We have grown from \$549.9 million in sales in fiscal year 2002 to \$2.044 billion in sales in fiscal year 2012, which represents a ten-year compound annual growth rate of 14.0%. Our internal growth, which includes growth from existing and newly opened branches but excludes growth from acquired branches, averaged 4.7% per annum over the same period. Acquired branches are excluded from internal growth measures until they have been under our ownership for at least four full fiscal quarters at the start of the reporting period. During this period, we opened thirty-seven new branch locations (of which we have only closed three), while our same store sales increased an average of 1.5% per annum. Same store sales are defined as the aggregate sales from branches open for the entire comparable annual periods. Income from operations has increased from \$29.4 million in fiscal year 2002 to \$143.7 million in

fiscal year 2012, which represents a compound annual growth rate of 17.2%. We believe that our proven business model can continue to deliver industry-leading growth and operating profit margins.

In fiscal year 2012, our sales and income from operations increased 12.5% and 38.5%, respectively, over fiscal year 2011. We had 251 business days in fiscal year 2012, while fiscal year 2011 had 254 days. We acquired twenty-two branches, opened four new branches and closed two branches during fiscal year 2012.

Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 are available free of charge on our website at www.beaconroofingsupply.com as soon as reasonably practical after we electronically file such reports with, or furnish them to, the Securities and Exchange Commission.

History

Our predecessor, Beacon Sales Company, Inc., was founded in Charlestown, Massachusetts (part of Boston) in 1928. In 1984, when our former Chairman Andrew Logie acquired Beacon Sales Company with other investors, Beacon operated three distribution facilities and generated approximately \$16 million in annual revenue. In August 1997, Code, Hennessy & Simmons III, L.P., a Chicago-based private equity fund, and certain members of management, purchased Beacon Sales Company to use it as a platform to acquire leading regional roofing materials distributors throughout the United States and Canada. At the time of the purchase by Code Hennessy and management, Beacon Sales Company operated seven branches in New England and generated approximately \$72 million of annual revenue, primarily from the sale of non-residential roofing products. Since 1997 and through fiscal year 2012, we made twenty-eight strategic and complementary acquisitions and opened forty-one new branches (of which we only closed three). We have also expanded our product offerings to offer more residential roofing products and complementary exterior building materials and related services. Our strategic acquisitions, new branch openings, and product line extensions have increased the diversity of both our customer base and our local market focus, while generating cost savings through increased purchasing power and lower overhead expenses as a percentage of net sales. We completed an initial public offering ("IPO") and became a public company in September 2004, and completed a follow-on stock offering in December 2005.

We were incorporated in Delaware in 1997. Our principal executive offices are located at One Lakeland Park Drive, Peabody, MA 01960 and our telephone number is (978) 535-7668. Our Internet website address is www.beaconroofingsupply.com.

U.S. Industry Overview

The U.S. roofing market, based upon a 2011 industry report, the latest available to us, and based upon manufacturer sales to distributors and others, was estimated to be approximately \$16.8 billion in 2010 and is projected to grow 7.8% annually through 2015 to \$24.4 billion. We believe this rate of growth is above the range of the stable long-term growth rates in the industry over the past 40 years.

The U.S. roofing market can be separated into two categories: the residential roofing market and the non-residential roofing market. The residential roofing market accounted for approximately 54.8% of the total U.S. market by unit volume (44.6% of total dollar demand) in 2010. Through 2015, residential roofing construction in dollars is expected to grow at 11.4%, which is much faster than the non-residential roofing construction growth rate of 4.4%, as new residential construction is projected to rebound from recent low levels.

Traditionally, over 70% of expenditures in the roofing market are for re-roofing projects, with the balance being for new construction. Due to the slowdown in both residential and non-residential new construction in recent years, it is estimated that re-roofing represented over 85% of the expenditures for roofing in 2010. Re-roofing projects are generally considered maintenance and repair expenditures and are less likely than new construction projects to be postponed during periods of recession or slow economic growth. As a result, demand for roofing products is less volatile than overall demand for construction products.

Regional variations in economic activity influence the level of demand for roofing products across the United States. Of particular importance are regional differences in the level of new home construction and

renovation, since the residential market for roofing products accounts for approximately 55% of unit demand. Demographic trends, including population growth and migration, contribute to the regional variations through their influence on regional housing starts and existing home sales.

Roofing distributors

Wholesale distribution is the dominant distribution channel for both residential and nonresidential roofing products. Wholesale roofing product distributors serve the important role of facilitating the purchasing relationships between roofing materials manufacturers and thousands of contractors. Wholesale distributors can maintain localized inventories, extend trade credit, give product advice and provide delivery and logistics services.

Despite some recent consolidation, the roofing materials distribution industry remains highly fragmented. The industry is characterized by a large number of small and local regional participants. As a result of their small size, many of these distributors lack the corporate, operating and IT infrastructure required to compete effectively.

Residential roofing market

Within the residential roofing market, the re-roofing market is currently more than six times the size of the new roofing market, accounting for approximately 86% of the residential roofing unit demand in 2010 compared to a historic long-term rate of about 67%. Over the next five years, new roofing unit demand is expected to increase from 14% of total demand in 2010 to approximately 24% in 2015, indicating a 21% growth rate, while annual re-roofing demand is expected to grow at a 6% rate.

Driving the demand for re-roofing is an aging U.S. housing stock. Over 60% of the U.S. housing stock was built prior to 1980, with the median age of U.S. homes being over 35 years old. Asphalt shingles dominate the residential roofing market, with an approximate 84% share, and historically have had an expected average useful life of 15 to 20 years. A number of other factors can also generate re-roofing demand, including one-time weather damage (such as the frequent and damaging hail storms in 2011) and homeowners looking to upgrade their homes. In addition, sales of existing homes can affect re-roofing demand, as some renovation decisions are made by sellers preparing their houses for sale and others are made by new owners within the first two years of occupancy.

Within the new construction portion of the residential roofing market, housing starts together with larger average roof sizes have supported prior growth in new residential roofing demand. Although new housing starts were up slightly in 2010 and 2012, they declined during 2006 through 2009, and again in 2011, and the pace could continue at the current historically low levels.

Non-residential roofing market

Demand in dollars for roofing products used on non-residential buildings is forecast to continue to grow at about historical average rates. The challenging economic conditions in recent years, including tighter credit markets, caused a slowdown in new commercial projects and, to a lesser extent, re-roofing projects, and may continue to influence expenditures for non-residential roofing in the near term.

In 2010, re-roofing projects represented approximately 84% of the total non-residential demand. As with residential re-roofing, non-residential re-roofing activity tends to be less cyclical than new construction and depends, in part, upon the types of materials on existing roofs, their expected lifespan and intervening factors such as wind or water damage.

The non-residential roofing market includes an office and commercial market, an industrial market, and an institutional market. Office and commercial roofing projects is the single largest component of the non-residential roofing market at 51%. Industrial roofing projects represent 23% of non-residential roofing product sales, while institutional projects and others make up the remaining 26% of non-residential roofing demand.

Complementary building products

Demand for complementary building products such as siding, windows and doors for both the residential and non-residential markets has been at historically low levels in recent years, consistent with the downturns

in the new construction markets and in the overall economy. Unlike the roofing industry, demand for these products is more discretionary and influenced much greater by the new construction markets.

These complementary products are a major component of the overall building products market. The U.S. siding market was approximately \$7.0 billion in 2011, while the U.S. window and door industry was approximately \$26 billion in 2011, the most recent information available to us. Both of these markets have been negatively impacted by the low level of new housing starts in recent years, but are expected to grow at an annual rate of approximately 10% over the next five years.

Our Strengths

We believe the sales and earnings growth we have achieved over time has been and will continue to be driven by our primary competitive strengths, which include the following:

- ***National scope combined with regional expertise.*** We believe we are the second largest roofing materials distributor in the United States and Canada. We utilize a branch-based operating model in which branches maintain local customer relationships but benefit from centralized functions such as information technology, accounting, financial reporting, credit, purchasing, legal and tax services. This allows us to provide customers with specialized products and personalized local services tailored to a geographic region, while benefiting from the resources and scale efficiencies of a national distributor.
- ***Diversified business model that reduces impact of economic downturns.*** We believe that our business is meaningfully protected in an economic downturn because of a high concentration of non-discretionary re-roofing business; the mix of our sales between residential and non-residential products; our geographic and customer diversity; and our financial and operational ability to expand our business and obtain market share.
- ***Superior customer service.*** We believe that our high level of customer service and support differentiates us from our competitors. We employ experienced salespeople who provide technical advice and assistance in properly identifying products for various applications. We also provide services such as safe and timely job site delivery, logistical support and marketing assistance. We believe that the services provided by our employees improve our customers' efficiency and profitability which, in turn, strengthens our customer relationships.
- ***Strong platform for growth and acquisition.*** Over the period from 1997 through 2012, we increased revenue at rates well in excess of the overall growth in the roofing materials distribution industry. We have expanded our business through strategic acquisitions, new branch openings, and the diversification of our product offering. We have generally improved the financial and operating performance of our acquired companies and helped them to grow their businesses following acquisition.
- ***Sophisticated IT platform.*** All of our locations, except for one fabrication facility, operate on the same management information systems. We have made a significant investment in our information systems, which we believe are among the most advanced in the roofing distribution industry. These systems provide us with a consistent platform across all of our operations and help us to achieve operating efficiencies in purchasing, pricing and inventory management and a high level of customer service. Our systems have substantial capacity to handle our future growth plans without requiring significant additional investment.
- ***Industry-leading management team.*** We believe that our key personnel, including branch managers, regional vice presidents and executive officers, are among the most experienced members of the roofing industry.
- ***Extensive product offering and strong supplier relationships.*** We have a product offering of approximately 11,000 SKUs, representing an extensive assortment of high-quality branded products. We believe that this product offering has been a significant factor in attracting and retaining many of

our customers. Because of our significant scale, product expertise and reputation in the markets that we serve, we have established strong ties to the major roofing materials manufacturers and are able to achieve substantial volume discounts.

Growth Strategies

Our objective is to become the preferred supplier of roofing and other exterior building product materials in the U.S. and Canadian markets while continuing to increase our revenue base and maximize our profitability. We plan to attain these goals by executing the following strategies:

- ***Pursue acquisitions of regional market-leading roofing materials distributors.*** Acquisitions are an important component of our growth strategy. We believe there are significant opportunities to further grow our business through disciplined, strategic acquisitions. With only a few large, well-capitalized competitors in the industry, we believe we can continue to build on our distribution platform by successfully acquiring additional roofing materials distributors. Between 1998 and 2012, we successfully integrated twenty-eight strategic and complementary acquisitions and there has been an additional acquisition since the end of fiscal year 2012.
- ***Expand through new branch openings.*** Significant opportunities exist to expand or intensify our geographic focus by opening additional branches in contiguous or existing regions. Since 1997, we have successfully entered numerous markets through greenfield expansion. Our typical strategy with respect to greenfield opportunities is to open branches: (1) within our existing markets; (2) where existing customers have expanded into new markets; or (3) in areas that have limited or no acquisition candidates and are a good fit with our business model. At times, we have acquired small distributors with one to three branches to fill in existing regions.
- ***Expand product and service offerings.*** We believe that continuing to increase the breadth of our product line and customer services are effective methods of increasing sales to current customers and attracting new customers. We work closely with customers and suppliers to identify new building products and services, including varieties of windows, siding, waterproofing systems, insulation and metal fabrication. In addition, we believe we can expand our business by introducing products currently only sold in certain of our markets into some of our other markets. We also believe we can expand particular product sales that are stronger in certain of our markets into markets where those products have not sold as well (e.g., expanding nonresidential roofing sales into markets that sell mostly residential roofing).

Products and Services

Products

The ability to provide a broad range of products is essential in roofing materials distribution. We carry one of the most extensive arrays of high-quality branded products in the industry, enabling us to deliver a wide variety of products to our customers on a timely basis. We are able to fulfill approximately 98% of our warehouse orders through our in-stock inventory as a result of the breadth and depth of our inventory at our branches. Our product portfolio includes residential and non-residential roofing products as well as complementary building products such as siding, windows and specialty lumber products. Our product lines are designed primarily to meet the requirements of both residential and non-residential roofing contractors.

| Product Portfolio | | | |
|------------------------------|---|------------------------------------|-------------------------|
| Residential roofing products | Non-residential roofing products | Complementary building products | |
| | | Siding | Windows/Doors |
| Asphalt shingles | Single-ply roofing | Vinyl siding | Vinyl windows |
| Synthetic slate and tile | Asphalt | Red, white and yellow cedar siding | Aluminum windows |
| Clay tile | Metal | Fiber cement siding | Wood windows |
| Concrete tile | Modified bitumen | Soffits | Wood doors |
| Slate | Built-up roofing | House wraps | Patio doors |
| Nail base insulation | Cements and coatings | Vapor barriers | Skylights |
| Metal roofing | Insulation – flat stock and tapered | Stone veneer | |
| Felt | Commercial fasteners | | |
| Wood shingles and shakes | Metal edges and flashings | | |
| Nails and fasteners | Skylights, smoke vents and roof hatches | | |
| Metal edgings and flashings | Sheet metal, including copper, aluminum and steel | | |
| Prefabricated flashings | Other accessories | | |
| Ridges and soffit vents | | | |
| Gutters and downspouts | | | |
| Other accessories | | | |
| | | Other | Specialty Lumber |
| | | Waterproofing systems | Redwood |
| | | Building insulation | Red cedar decking |
| | | Air barrier systems | Pressure treated lumber |
| | | Gypsum | Fire treated plywood |
| | | Moldings | Synthetic decking |
| | | Patio covers | PVC trim boards |
| | | Cultured stone | Synthetic railing |
| | | | Millwork |
| | | | Custom millwork |

The products that we distribute are supplied by the industry's leading manufacturers of high-quality roofing materials and related products, such as Alcoa, Atlas, BPCO, Carlisle, CertainTeed, Continental Materials, Dow, Firestone, GAF Materials, IKO, James Hardie, Johns Manville, Mid-States Asphalt, Owens Corning, Simonton, Tamko and Revere Copper.

In the residential market, asphalt shingles comprise the largest share of the products we sell. We believe that we have also developed a specialty niche in the residential roofing market by distributing products such as high-end shingles, copper gutters and metal roofing products, as well as specialty lumber products for residential applications, including redwood, white and red cedar shingles, and red cedar siding. Additionally, we distribute gutters, downspouts, tools, nails, vinyl siding, windows, decking and related exterior shelter products to meet the needs of our roofing customers.

In the non-residential market, single-ply roofing systems comprise the largest share of our products. Our single-ply roofing systems consist primarily of Ethylene Propylene Diene Monomer (synthetic rubber) or EPDM and Thermoplastic Olefin or TPO, along with other roofing materials and related components. In addition to the broad range of single-ply roofing components, we sell the insulation required in most non-residential roofing applications, such as the popular tapered insulation. Our remaining non-residential products include metal roofing and flashings, fasteners, fabrics, coatings, roof drains, modified bitumen, built-up roofing and asphalt.

Services

We emphasize superior value-added services to our customers. We employ a knowledgeable staff of salespeople. Our sales personnel possess in-depth knowledge of roofing materials and applications and are capable of providing technical advice and assistance to contractors throughout the re-roofing and construction process. In particular, we support our customers with the following value-added services:

- advice and assistance on product identification, specification and technical support;
- timely job site delivery, rooftop loading and logistical services;
- tapered insulation design and related layout services;
- metal fabrication and related metal roofing design and layout services;
- trade credit; and
- marketing support, including project leads for contractors.

Customers

Our diverse customer base consists of approximately 42,000 contractors, home builders, building owners, and other resellers primarily in the Northeast, Mid-Atlantic, Southeast, Southwest, Mid-West and West regions of the United States, as well as across Canada. Our typical customer base varies by end market, with relatively small contractors in the residential market and small to large-sized contractors in the non-residential market. To a lesser extent, our customer base in a market can include general contractors, retailers and building materials suppliers.

As evidenced by the fact that a significant number of our customers have relied on us or our predecessors as their vendor of choice for decades, we believe that we have strong customer relationships that our competitors cannot easily displace or replicate. No single customer accounts for more than 2% of our revenues.

Sales and Marketing

Sales strategy

Our sales strategy is to provide a comprehensive array of high-quality products and superior value-added services to residential and non-residential roofing contractors reliably, accurately and on time. We fulfill approximately 98% of our warehouse orders through our in-stock inventory as a result of the breadth and depth of our inventory maintained at our local branches. We believe that our focus on providing both superior value-added services and accurate and rapid order fulfillment enables us to attract and retain customers.

Sales organization

We have attracted and retained an experienced sales force of about 1,120 people who are responsible for generating revenue at the local branch level. The expertise of our salespeople helps us to increase sales to existing customers and add new customers.

Each of our branches is headed by a branch manager, who also functions as the branch's sales manager. In addition, each branch generally employs one to four outside salespeople and one to five inside salespeople who report to their branch manager. Branches that focus primarily on the residential market typically staff a larger number of outside salespeople.

The primary responsibilities of our outside salespeople are to prospect for new customers and increase sales to existing customers. One of the ways our outside salespeople accomplish these objectives is by

reviewing information from our proprietary LogicTrack software system, which extracts job and bid information from construction reports and other industry news services. The system extracts information on construction projects in our local markets from those industry services. Once a construction project is identified, our design and estimating team creates job quotes, which, along with pertinent bid and job information, are readily available to our salespeople through LogicTrack. Our outside salespeople then contact potential customers in an effort to solicit their interest in participating with us in the identified project. Throughout this process, LogicTrack maintains a record of quoting activity, due dates, and other data to allow tracking of the projects and efficient follow-up. By seeking a contractor to “partner with” on a bid, we increase the likelihood that such contractor will purchase their roofing materials and related products from us in the event that the contractor is selected for the project.

To complement our outside sales force, we have built an experienced and technically proficient inside sales staff that provides vital product expertise to our customers. Our inside sales force is responsible for fielding incoming orders, providing pricing quotations and responding to customer inquiries.

In addition to our outside and inside sales forces, we represent certain manufacturers for particular manufacturers’ products. Currently, we have developed relationships with Carlisle, Johns Manville, Owens Corning and Firestone on this basis and employ 38 representatives who act as liaisons (on behalf of property owners, architects, specifiers and consultants) between these roofing materials manufacturers and professional contractors.

Marketing

In order to capitalize on established customer relationships and locally developed brands, we have maintained the trade names of most of the businesses that we have acquired. These trade names — such as Alabama Roofing Supply, Beacon Roofing Supply Canada Company, Beacon Sales Company, Best Distributing Company, Coastal Metal Service, Dealer’s Choice, GLACO, Groupe Bedard, Entrepot de la Toiture, JGA Beacon, Lafayette Wood Works, North Coast Commercial Roofing Systems, Mississippi Roofing Supply, Pacific Supply Company, Quality Roofing Supply Company, Roof Depot, RSM Supply, Roofing and Sheet Metal Supply, Shelter Distribution, Southern Roof Center, The Roof Center, West End Roofing Siding and Windows, West End Lumber Company, Louisiana Roofing Supply, Posi-Slope, Posi-Pentes, Wholesale Roofing Supply, Enercon Products, The Roofing Connection, Fowler & Peth, Cassidy Pierce Company, Structural Materials and Contractors Roofing & Supply Co. — are well-known in the local markets in which the respective branches compete and are associated with high-quality products and customer service.

As a supplement to the efforts of our sales force, each of our branches communicates with residential and non-residential contractors in their local markets through newsletters, direct mail and the Internet. In order to build and strengthen relationships with customers and vendors, we sponsor and promote our own regional trade shows, which feature general business and roofing seminars for our customers and product demonstrations by our vendors. In addition, we attend numerous industry trade shows throughout the regions in which we compete, and we are an active member of the National Roofing Contractors Association, as well as certain regional contractors’ associations.

Purchasing and Suppliers

Our status as a leader in our core geographic markets, as well as our reputation in the industry, has allowed us to forge strong relationships with numerous manufacturers of roofing materials and related products, including Alcoa, Atlas, BPCO, Carlisle, CertainTeed, Continental Materials, Dow, Firestone, GAF Materials, IKO, James Hardie, Johns Manville, Mid-States Asphalt, Owens Corning, Simonton, Tamko and Revere Copper.

We are viewed by our suppliers as a key distributor due to our industry expertise, past growth and profitability, significant market share, financial strength, and the substantial volume of products that we distribute. We have significant relationships with more than 150 suppliers and maintain multiple supplier relationships for each product line.

We manage the procurement of products through our national headquarters and regional offices, allowing us to take advantage of both our scale and local market conditions. We believe this enables us to purchase products more economically than most of our competitors. Product is shipped directly by the manufacturers to our branches or customers.

Operations

Facilities

Our network of 224 branches serves metropolitan areas in 38 states and 6 Canadian provinces. This network has enabled us to effectively and efficiently serve a broad customer base and to achieve a leading market position in each of our core geographic markets.

Operations

Our branch-based model provides each location with a significant amount of autonomy to operate within the parameters of our overall business model. Operations at each branch are tailored to meet local customer needs. Depending on the market, branches carry from about 2,000 to 11,000 SKUs.

Branch managers are responsible for sales, pricing and staffing activities, and have full operational control of customer service and deliveries. We provide our branch managers with significant incentives that allow them to share in the profitability of their respective branches as well as in the company as a whole. Personnel at our regional and corporate operations assist the branches with, among other things, product procurement, credit and safety services, fleet management, information systems support, contract management, accounting, treasury and legal services, human resources, benefits administration and sales and use tax services.

Distribution fulfillment process

Our distribution fulfillment process is initiated upon receiving a request for a contract job order or direct product order from a contractor. Under a contract job order, a contractor typically requests roofing or other construction materials and technical support services. The contractor discusses the project's requirements with a salesperson and the salesperson provides a price quotation for the package of products and services. Subsequently, the salesperson processes the order and we deliver the products to the customer's job site.

Fleet

Our distribution infrastructure supports over 500,000 deliveries annually. To accomplish this, we maintained a dedicated owned fleet of 723 straight trucks, 262 tractors and 580 trailers as of September 30, 2012. Nearly all of our delivery vehicles are equipped with specialized equipment, including 813 truck-mounted forklifts, cranes, hydraulic booms and conveyors, which are necessary to deliver products to rooftop job sites in an efficient and safe manner and in accordance with our customers' requirements.

Our branches typically focus on providing materials to customers who are located within a two-hour radius of their respective facilities. Our branches generally make deliveries each business day.

Management information systems

We have fully integrated management information systems across our locations. Acquired businesses are moved to our IT platform as soon as feasible following acquisition. Our systems support every major internal operational function, except payroll, providing complete integration of purchasing, receiving, order processing, shipping, inventory management, sales analysis and accounting. The same databases are shared within the systems, allowing our branches to easily acquire products from other branches or schedule deliveries by other branches, greatly enhancing our customer service. Our systems also include a sophisticated pricing matrix which allows us to refine pricing by region, branch, customer and customer type, or even a specific customer project. In addition, our systems allow us to centrally monitor all branch and regional performance as often as daily. We have centralized many functions to leverage our growing size, including accounts payable, insurance, payroll, employee benefits, vendor relations, and banking.

All of our branches are connected to our IBM AS400 computer network by secure Internet connections or private data lines. We maintain a second IBM AS400 as a disaster recovery system, and information is

backed up to this system throughout each business day. We have the capability of electronically switching our domestic operations to the disaster recovery system.

We have financial reporting packages for branches and regions that allow them to compare branch by branch financial performance, which we believe is essential to operating each branch efficiently and more profitably. We also utilize a monthly benchmarking report that enables comparison of all of our branches' and regions' performance in 12 critical areas.

We place purchase orders electronically with some of our major vendors. The vendors then transmit their invoices electronically to us. Our system automatically matches these invoices with the related purchase orders and then schedules the associated payment. We also have the capability to handle customer processing electronically, although most customers prefer ordering through our sales force.

We completed a "paperless copy" process in 2012 whereby we scan or receive many financial, credit and other documents into a database for purposes of internal approvals, online viewing and auditing. Also in 2012, we initiated an Internet portal that allows customers to access their invoice history and make online payments.

Government Regulations

We are subject to regulation by various federal, state, provincial and local agencies. These agencies include the Environmental Protection Agency, Department of Transportation, Interstate Commerce Commission, Occupational Safety and Health Administration and Department of Labor and Equal Employment Opportunity Commission. We believe we are in compliance in all material respects with existing applicable statutes and regulations affecting environmental issues and our employment, workplace health and workplace safety practices.

In 2012, the U.S. Supreme Court upheld the majority of the provisions in the Patient Protection and Affordable Care Act (the "Act"). The Act places requirements on employers to provide a minimum level of benefits to employees and assesses penalties on employers if the benefits do not meet the required minimum level or if the cost of coverage to employees exceeds affordability thresholds specified in the Act. The minimum benefits and affordability requirements take effect in 2014. The Act also imposes an excise tax beginning in 2018 on plans whose average cost exceeds specified amounts. We have analyzed the effects on us from the provisions of the Act and we do not currently anticipate a significant financial impact.

Competition

Although we are one of the two largest roofing materials distributors in the United States and Canada, the U.S. roofing supply industry is highly competitive. The vast majority of our competition comes from local and regional roofing supply distributors, and, to a much lesser extent, other building supply distributors and "big box" retailers. Among distributors, we compete against a small number of large distributors and many small and local privately-owned distributors. The principal competitive factors in our business include, but are not limited to, the availability of materials and supplies; technical product knowledge and expertise; advisory or other service capabilities; pricing of products; and availability of credit and capital. We generally compete on the basis of the quality of our services, product quality and, to a lesser extent, price. We compete not only for customers within the roofing supply industry but also for personnel.

Employees

As of September 30, 2012, we had 2,712 employees, consisting of 806 in sales and marketing, 314 in branch management, including supervisors, 1,216 warehouse workers, helpers and drivers, and 376 general and administrative personnel. Approximately 338 employees were added in 2012 from our acquisitions. We believe that our employee relations are good. Thirty-four employees were represented by labor unions as of September 30, 2012.

Order Backlog

Order backlog is not a material aspect of our business and no material portion of our business is subject to government contracts.

Seasonality

In general, sales and net income are highest during our first, third and fourth fiscal quarters, which represent the peak months of construction and re-roofing, especially in our branches in the northern and mid-western regions of the U.S. and in Canada. Our sales are substantially lower during the second quarter, when we usually incur net losses. These quarterly fluctuations have diminished as we have diversified further into the southern and western regions of the U.S.

Geographic Data

For geographic data about our business, please see Note 15 to our Consolidated Financial Statements included elsewhere in this Form 10-K.

ITEM 1A. RISK FACTORS

You should carefully consider the risks and uncertainties described below and other information included in this Form 10-K in evaluating us and our business. If any of the events described below occur, our business and financial results could be adversely affected in a material way. This could cause the trading price of our common stock to decline, perhaps significantly.

We may not be able to effectively integrate newly acquired businesses into our operations or achieve expected profitability from our acquisitions.

Our growth strategy includes acquiring other distributors of roofing materials and complementary products. Acquisitions involve numerous risks, including:

- unforeseen difficulties in integrating operations, technologies, services, accounting and personnel;
- diversion of financial and management resources from existing operations;
- unforeseen difficulties related to entering geographic regions where we do not have prior experience;
- potential loss of key employees;
- unforeseen liabilities associated with businesses acquired; and
- inability to generate sufficient revenue to offset acquisition or investment costs.

As a result, if we fail to evaluate and execute acquisitions properly, we might not achieve the anticipated benefits of such acquisitions and we may incur costs in excess of what we anticipate. These risks would likely be greater in the case of larger acquisitions.

We may not be able to successfully identify acquisition candidates, which would slow our growth rate.

We continually seek additional acquisition candidates in selected markets and from time to time engage in exploratory discussions with potential candidates. If we are not successful in finding attractive acquisition candidates whom we can acquire on satisfactory terms, or if we cannot complete acquisitions that we identify, it is unlikely that we will sustain the historical growth rates of our business.

An inability to obtain the products that we distribute could result in lost revenues and reduced margins and damage relationships with customers.

We distribute roofing and other exterior building materials that are manufactured by a number of major suppliers. Although we believe that our relationships with our suppliers are strong and that we would have access to similar products from competing suppliers should products be unavailable from current sources, any disruption in our sources of supply, particularly of the most commonly sold items, could result in a loss of revenues and reduced margins and damage relationships with customers. Supply shortages may occur as a result of unanticipated demand or production or delivery difficulties. When shortages occur, roofing material suppliers often allocate products among distributors.

Loss of key personnel or our inability to attract and retain new qualified personnel could hurt our ability to operate and grow successfully.

Our future success is highly dependent upon the services of Robert Buck, Executive Chairman of the Board, and Paul Isabella, President and Chief Executive Officer. Our CFO, David Grace, is retiring for health reasons on December 31, 2012 and we are actively seeking a replacement. Although we are confident that our search will yield a highly qualified replacement, in the event that Mr. Grace's successor is not named by December 31, 2012, we plan to name our Chief Accounting Officer Rick Welker as Acting Chief Financial Officer until Mr. Grace's successor is named. Our success will continue to depend to a significant extent on our executive officers and key management personnel, including our regional vice presidents. We do not have key man life insurance covering any of our executive officers. We may not be able to retain our executive officers and key personnel or attract additional qualified management. The loss of any of our executive officers or other key management personnel, or our inability to recruit and retain qualified personnel, could hurt our ability to operate and make it difficult to execute our acquisition and internal growth strategies.

A change in vendor rebates could adversely affect our income and gross margins.

The terms on which we purchase product from many of our vendors entitle us to receive a rebate based on the volume of our purchases. These rebates effectively reduce our costs for products. If market conditions change, vendors may adversely change the terms of some or all of these programs. Although these changes would not affect the net recorded costs of product already purchased, it may lower our gross margins on products we sell and therefore the income we realize on such sales in future periods.

Cyclical in our business could result in lower revenues and reduced profitability.

We sell a portion of our products for new residential and non-residential construction. The strength of these markets depends on new housing starts and business investment, which are a function of many factors beyond our control, including credit and capital availability, interest rates, employment levels and consumer confidence. Economic downturns in the regions and markets we serve could result in lower revenues and, since many of our expenses are fixed, lower profitability. Although new housing starts were up slightly in 2010 and 2012, they declined during 2006 through 2009, and again in 2011, and the pace could continue at the current historically low levels. Commercial construction activity declined in 2009 and 2011 while increasing in 2010 and slightly in 2012. The challenging economic conditions in recent years, including tighter credit markets, influenced new commercial projects and, to a lesser extent, re-roofing projects, and may continue to negatively affect expenditures for non-residential roofing in the near term.

Seasonality in the construction and re-roofing industry generally results in second quarter losses.

Our second quarter is typically affected adversely by winter construction cycles and cold weather patterns as the levels of activity in the new construction and re-roofing markets decrease. Because many of our expenses remain relatively fixed throughout the year, we generally record a loss during our second quarter. We expect that these seasonal variations will continue in the near future.

If we encounter difficulties with our management information systems, we could experience problems with inventory, collections, customer service, cost control and business plan execution.

We believe our management information systems are a competitive advantage in maintaining our leadership position in the roofing distribution industry. However, if we experience problems with our management information systems, we could experience, among other things, product shortages and/or an increase in accounts receivable aging. Any failure by us to properly maintain and protect our management information systems could adversely impact our ability to attract and serve customers and could cause us to incur higher operating costs and experience delays in the execution of our business plan.

Since we rely heavily on information technology both in serving our customers and in our enterprise infrastructure in order to achieve our objectives, we may be vulnerable to damage or intrusion from a variety of cyber-attacks including computer viruses, worms or other malicious software programs that access our systems. Despite the precautions we take to mitigate the risks of such events, an attack on our enterprise information technology system could result in theft or disclosure of our proprietary or confidential information or a breach of confidential customer or employee information. Such events could have an adverse impact on revenue, harm our reputation, and cause us to incur legal liability and costs, which could be significant, to address and remediate such events and related security concerns.

An impairment of goodwill and/or other intangible assets could reduce net income.

Acquisitions frequently result in the recording of goodwill and other intangible assets. At September 30, 2012, goodwill represented approximately 36% of our total assets. Goodwill is not amortized for financial reporting purposes and is subject to impairment testing at least annually using a fair-value based approach. The identification and measurement of goodwill impairment involves the estimation of the fair value of our reporting units. Our accounting for impairment contains uncertainty because management must use judgment in determining appropriate assumptions to be used in the measurement of fair value. We determine the fair values of our reporting units by using both a market and income approach.

We evaluate the recoverability of goodwill for impairment in between our annual tests when events or changes in circumstances indicate that the carrying amount of goodwill may not be recoverable. Any impairment of goodwill will reduce net income in the period in which the impairment is recognized.

We might need to raise additional capital, which may not be available, thus limiting our growth prospects.

We may require additional future equity or further debt financing in order to consummate an acquisition; for additional working capital for expansion; or if we suffer more than seasonally expected losses. In the event such additional equity or debt financing is unavailable to us, we may be unable to expand or make acquisitions and our stock price may decline as a result of the perception that we have more limited growth prospects.

Major disruptions in the capital and credit markets may impact both the availability of credit and business conditions.

If the financial institutions that have extended credit commitments to us are adversely affected by major disruptions in the capital and credit markets, they may become unable to fund borrowings under those credit commitments. This could have an adverse impact on our financial condition since we need to borrow funds at times for working capital, acquisitions, capital expenditures and other corporate purposes.

Major disruptions in the capital and credit markets could also lead to broader economic downturns, which could result in lower demand for our products and increased incidence of customers' inability to pay their accounts. Additional customer bankruptcies or similar events caused by such broader downturns may result in a higher level of bad debt expense than we have historically experienced. Also, our suppliers may potentially be impacted, causing potential disruptions or delays of product availability. These events would adversely impact our results of operations, cash flows and financial position.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We lease 211 facilities as of November 1, 2012, including our headquarters and other support facilities, throughout the United States and Canada. These leased facilities range in size from approximately 2,000 square feet to 137,000 square feet. In addition, we own thirteen sales/warehouse facilities located in Manchester, New Hampshire; Reading, Pennsylvania; Montreal, Quebec (2); Sainte-Foy, Quebec; Delson, Quebec; Salisbury, Maryland; Hartford, Connecticut; Cranston, Rhode Island; Lancaster, Pennsylvania; Jacksonville, Florida; Easton, Maryland; and Manassas, Virginia. These owned facilities range in size from 11,500 square feet to 68,000 square feet. We also own a parcel of land in Trois Rivieres, Quebec, on which we plan to construct a branch in 2013. All of the owned properties are mortgaged to our senior lenders. We believe that our properties are in good operating condition and adequately serve our current business operations.

As of November 1, 2012, our 224 branches, a few with multiple leased facilities or combined facilities, and 7 other facilities were located in the following states and provinces:

| State | Number of Branches | Other |
|---------------------------|-----------------------|----------|
| Alabama | 4 | |
| Arkansas | 4 | |
| California | 10 | |
| Colorado | 7 | 2 |
| Connecticut | 2 | 1 |
| Delaware | 2 | |
| Florida | 6 | |
| Georgia | 8 | |
| Illinois | 7 | |
| Indiana | 6 | |
| Iowa | 1 | |
| Kansas | 4 | |
| Kentucky | 4 | |
| Louisiana | 5 | 1 |
| Maine | 1 | |
| Maryland | 14 | 1 |
| Massachusetts | 9 | |
| Michigan | 2 | |
| Minnesota | 2 | |
| Mississippi | 2 | |
| Missouri | 7 | |
| Nebraska | 4 | |
| New Hampshire | 1 | |

| New Mexico | 1 | |
| New York | 1 | |
| North Carolina | 11 | |
| Ohio | 4 | |
| Oklahoma | 3 | |
| Pennsylvania | 27 | |
| Rhode Island | 1 | |
| South Carolina | 5 | |
| Tennessee | 5 | |
| Texas | 19 | |
| Vermont | 1 | |
| Virginia | 9 | 1 |
| West Virginia | 5 | |
| Wyoming | 2 | |
| <i>Subtotal – U.S.</i> | <u>207</u> | <u>6</u> |
| Canadian Provinces | | |
| Alberta | 2 | |
| Saskatoon | 2 | |
| British Columbia | 2 | |
| Ontario | 4 | 1 |
| Quebec | 6 | |
| Nova Scotia | 1 | |
| <i>Subtotal – Canada</i> | <u>17</u> | <u>1</u> |
| Total | <u>224</u> | <u>7</u> |

ITEM 3. LEGAL PROCEEDINGS

From time to time, we are involved in lawsuits that are brought against us in the normal course of business. We are not currently a party to any legal proceedings that would be expected, either individually or in the aggregate, to have a material adverse effect on our business or financial condition.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock trades on The NASDAQ Global Select Market under the symbol "BECN". The following table lists quarterly information on the price range of our common stock based on the high and low reported sale prices for our common stock as reported by NASDAQ for the periods indicated below:

| | <u>High</u> | <u>Low</u> |
|---------------------------------------|-------------|------------|
| Year ended September 30, 2011: | | |
| First quarter | \$18.30 | \$14.22 |
| Second quarter | \$21.70 | \$17.87 |
| Third quarter | \$22.82 | \$19.35 |
| Fourth quarter | \$23.24 | \$14.89 |
| Year ended September 30, 2012: | | |
| First quarter | \$20.84 | \$15.34 |
| Second quarter | \$26.93 | \$20.23 |
| Third quarter | \$27.29 | \$22.93 |
| Fourth quarter | \$30.41 | \$24.09 |

There were 58 holders of record of our common stock as of November 1, 2012.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

No purchases of our equity securities were made by us or any affiliated entity during the fourth quarter of the year ended September 30, 2012.

Recent Sales of Unregistered Securities

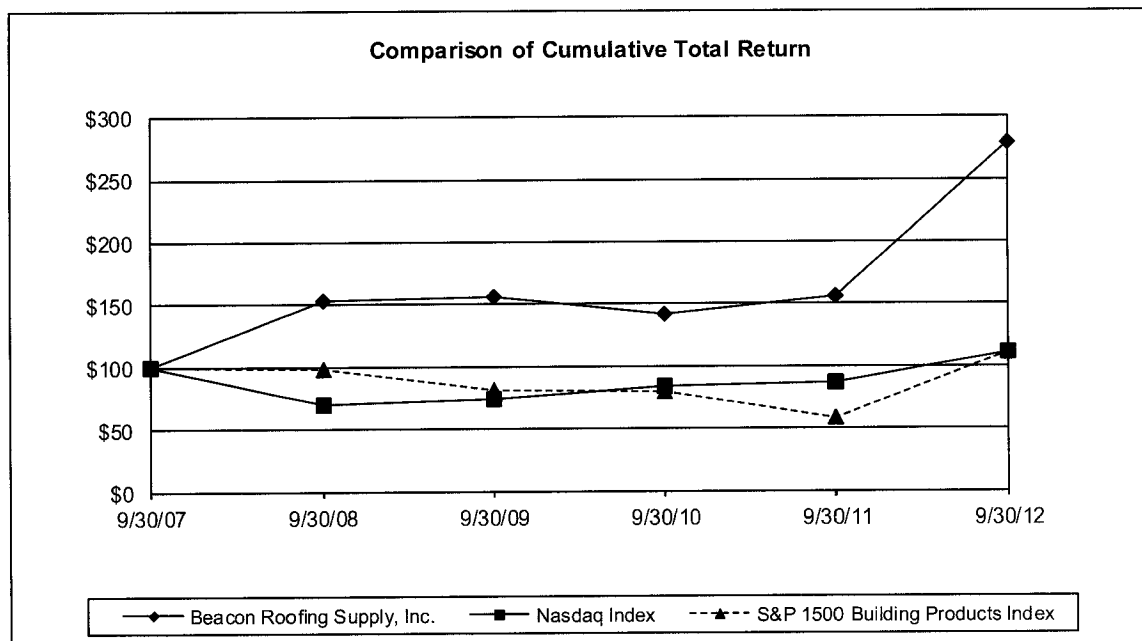

None.

Dividends

We have not paid cash dividends on our common stock and do not anticipate paying dividends in the foreseeable future. Our board of directors currently intends to retain any future earnings for reinvestment in our growing business. Our revolving credit facilities currently prohibit the payment of dividends without the prior written consent of our lenders. Any future determination to pay dividends will also be at the discretion of our board of directors and will be dependent upon our results of operations and cash flows, our financial position and capital requirements, general business conditions, legal, tax, regulatory and any contractual restrictions on the payment of dividends, and any other factors our board of directors deems relevant.

Performance Graph

The following graph compares the cumulative total shareholder return (including reinvestment of dividends) of Beacon Roofing Supply, Inc.'s common stock based on its market prices, beginning with the start of fiscal year 2008 and each fiscal year thereafter, with (i) the Nasdaq Index and (ii) the S&P 1500 Building Products Index.

The line graph assumes that \$100 was invested in our common stock, the Nasdaq Index and the S&P 1500 Building Products Index on September 30, 2007. The closing price of our common stock on September 30, 2012 was \$28.48. The stock price performance of Beacon Roofing Supply, Inc.'s common stock depicted in the graph above represents past performance only and is not necessarily indicative of future performance.

ITEM 6. SELECTED FINANCIAL DATA

You should read the following selected financial information together with our financial statements and related notes and "Management's discussion and analysis of financial condition and results of operations" also included in this Form 10-K. We have derived the statement of operations data for the years ended September 30, 2012, September 30, 2011 and September 30, 2010, and the balance sheet information at September 30, 2012 and September 30, 2011, from our audited financial statements included in this Form 10-K. We have derived the statements of operations data for the years ended September 30, 2009 and September 30, 2008, and the balance sheet data at September 30, 2010, September 30, 2009 and September 30, 2008, from our audited financial statements not included in this Form 10-K.

Statement of operations data

| (Dollars in Thousands) | Fiscal year ended September 30, | | | | |
|---|---------------------------------|--------------|--------------|--------------|--------------|
| | 2012 | 2011 | 2010 | 2009 | 2008 |
| Net sales | \$ 2,043,658 | \$ 1,817,423 | \$ 1,609,969 | \$ 1,733,967 | \$ 1,784,495 |

| Capital expenditures (excluding acquisitions) | \$ 17,404 | \$ 14,433 | \$ 10,268 | \$ 14,277 | \$ 5,739 |
| Number of branches at end of period | 209 | 185 | 179 | 172 | 175 |

Note: Earnings in 2012 were impacted by the following charges: \$2.6 million (\$1.6 million net of tax), or \$0.03 diluted earnings per share, for the recognition of the fair value of certain interest rate derivatives in interest expense and other financing costs; \$1.2 million (\$0.7 million net of tax), or \$0.02 diluted earnings per share, resulting from our April 2012 refinancing; and \$3.0 million of termination benefits (\$1.8 million net of tax), or \$0.04 diluted earnings per share, associated with our July 2012 acquisition of Structural Materials Co. and the announced retirement of our CFO. Earnings in 2011 included the beneficial impact of \$5.1 million, or \$0.11 diluted earnings per share, from the reversal of a net deferred tax liability associated with a change in the tax status of our Canadian operations.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our consolidated financial statements and related notes and other financial information appearing elsewhere in this Form 10-K. In addition to historical information, the following discussion and other parts of this Form 10-K contain forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated by this forward-looking information due to the factors discussed under "Risk factors," "Forward-looking statements" and elsewhere in this Form 10-K. Certain tabular information will not foot due to rounding.

Overview

We are one of the largest distributors of residential and non-residential roofing materials in the United States and Canada. We are also a distributor of other building materials, including siding, windows, specialty lumber products and waterproofing systems for residential and nonresidential building exteriors. We purchase products from a large number of manufacturers and then distribute these goods to a customer base consisting of contractors and, to a lesser extent, general contractors, retailers and building material suppliers.

We currently carry up to 11,000 SKUs through 224 branches in the United States and Canada. In fiscal year 2012, approximately 92% of our net sales were in the United States. We stock one of the most extensive assortments of high-quality branded products in the industry, enabling us to deliver products to our customers on a timely basis.

Execution of the operating plan at each of our branches drives our financial results. Revenues are impacted by the relative strength of the residential and non-residential roofing markets we serve. We strive for an appropriate mix of residential, non-residential and complementary product sales in all of our regions but allow each of our branches to influence its own marketing plan and mix of products based upon its local market. We differentiate ourselves from the competition by providing many customer services such as job site delivery, tapered insulation layouts and design and metal fabrication, and by providing credit. We consider customer relations and our employees' knowledge of roofing and exterior building materials to be important to our ability to increase customer loyalty and maintain customer satisfaction. We invest significant resources in training our employees in sales techniques, management skills and product knowledge. While we consider these attributes important drivers of our business, we also continually pay close attention to controlling operating costs.

Our growth strategy includes both internal growth (opening new branches, growing sales with existing customers, adding new customers and introducing new products) and acquisition growth. Our main acquisition strategy is to target market leaders in geographic areas that we do not service. Our May 2011 acquisition of Enercon Products Inc. ("Enercon") is one example of this approach. Enercon is a roofing distributor with six locations in Western Canada. Headquartered within its branch in Edmonton, Enercon also has branches in Calgary, Regina and Saskatoon and two branches in Vancouver, with no branch overlap with our existing operations. In addition, we also acquire smaller companies to supplement branch openings within existing markets. Our July 2012 acquisition of Structural Materials Co. ("Structural"), a distributor of residential and commercial roofing products and related accessories headquartered in Santa Ana, CA, is an example of this second approach. Structural has six locations in Los Angeles and Orange Counties and in the surrounding areas, which we integrated into our existing Pacific Supply region in Southern California.

General

We sell all materials necessary to install, replace and repair residential and non-residential roofs, including:

- shingles;
- single-ply roofing;
- metal roofing and accessories;
- modified bitumen;
- built up roofing;

- insulation;
- slate and tile;
- fasteners, coatings and cements; and
- other roofing accessories.

We also sell complementary building products such as:

- vinyl siding;
- doors, windows and millwork;
- wood and fiber cement siding;
- residential insulation; and
- waterproofing systems.

The following is a summary of our net sales by product group (in thousands) for the last three full fiscal years (“2012”, “2011” and “2010”). Percentages may not total due to rounding.

| | Year Ended September 30, | | | | | |
|--|--------------------------|---------------|--------------------|---------------|--------------------|---------------|
| | 2012 | | 2011 | | 2010 | |
| | Net Sales | Mix | Net Sales | Mix | Net Sales | Mix |
| Residential roofing products | \$1,023,547 | 50.1% | \$ 849,970 | 46.8% | \$ 748,007 | 46.5% |
| Non-residential roofing products | 757,906 | 37.1% | 718,145 | 39.5% | 619,348 | 38.5% |
| Complementary building products | 262,205 | 12.8% | 249,308 | 13.7% | 242,614 | 15.1% |
| | <u>\$2,043,658</u> | <u>100.0%</u> | <u>\$1,817,423</u> | <u>100.0%</u> | <u>\$1,609,969</u> | <u>100.0%</u> |

We have over 40,000 customers, none of which represents more than 2% of our net sales. Many of our customers are small to mid-size contractors with relatively limited capital resources. We maintain strict credit review and approval policies, which has helped to keep losses from uncollectible customer receivables within our expectations. Bad debts in 2012 were within our normal historical levels at approximately 0.2% of net sales, while bad debts in 2011 were slightly higher than normal levels at 0.4% of net sales but still within our tolerance in consideration of the challenging economic and credit climate.

Our expenses consist primarily of the cost of products purchased for resale, labor, fleet, occupancy, and selling and administrative expenses. We compete for business and may respond to competitive pressures at times by lowering prices in order to maintain our market share.

We opened four new branches in 2012, three in 2011 and none in 2010. We slowed the pace of new branch openings since 2007, mostly as a result of the economic downturn, but expect to increase the pace in 2013. Typically, when we open a new branch, we transfer a certain level of existing business from an existing branch to the new branch. This allows the new branch to commence with a base business and also allows the existing branch to target other growth opportunities.

In managing our business, we consider all growth, including the opening of new branches, to be internal growth unless it is a result of an acquisition. When we refer to growth in existing markets in our discussion and analysis of financial condition and results of operations, we include growth from existing and newly-opened branches but exclude growth from acquired branches until they have been under our ownership for at least four full fiscal quarters at the start of the reporting period. Our average annual internal sales growth over the eight fiscal years since our IPO has been 3.7%. When we refer to our net product costs, we are referring to our invoice cost less the impact of short-term buying programs (also referred to as “special buys” given the manner in which they are offered).

Results of operations

The following discussion compares our results of operations for 2012, 2011 and 2010.

The following table shows, for the periods indicated, information derived from our consolidated statements of operations expressed as a percentage of net sales for the periods presented. Percentages may not total due to rounding.

| | Year ended September 30, | | |
|--|--------------------------|--------|--------|
| | 2012 | 2011 | 2010 |
| Net sales | 100.0% | 100.0% | 100.0% |
| Cost of products sold | 75.5 | 76.9 | 77.6 |
| Gross profit | 24.5 | 23.1 | 22.4 |
| Operating expenses | 17.5 | 17.4 | 17.8 |
| Income from operations | 7.0 | 5.7 | 4.6 |
| Interest expense and other financing costs | (0.8) | (0.7) | (1.1) |
| Income before income taxes | 6.2 | 5.0 | 3.4 |
| Income taxes | (2.5) | (1.7) | (1.3) |
| Net income | 3.7% | 3.3% | 2.1% |

2012 compared to 2011

The following table shows a summary of our results of operations for 2012 and 2011, broken down by existing markets and acquired markets.

| (in thousands) | Existing Markets | | Acquired Markets | | Consolidated | |
|--|------------------|-------------|------------------|----------|--------------|-------------|
| | 2012 | 2011 | 2012 | 2011 | 2012 | 2011 |
| Net sales | \$1,905,441 | \$1,792,391 | \$138,217 | \$25,032 | \$2,043,658 | \$1,817,423 |
| Gross profit | 464,149 | 413,227 | 37,255 | 6,398 | 501,404 | 419,625 |
| Gross margin | 24.4% | 23.1% | 27.0% | 25.6% | 24.5% | 23.1% |
| Operating expenses | 321,057 | 311,347 | 36,675 | 4,536 | 357,732 | 315,883 |
| Operating expenses as a % of net sales | 16.8% | 17.4% | 26.5% | 18.1% | 17.5% | 17.4% |
| Operating income (loss) | \$ 143,092 | \$ 101,880 | \$ 580 | \$ 1,862 | \$ 143,672 | \$ 103,742 |
| Operating margin | 7.5% | 5.7% | 0.4% | 7.4% | 7.0% | 5.7% |

Net Sales

Consolidated net sales increased \$226.2 million, or 12.5%, to \$2,043.7 million in 2012 from \$1,817.4 million in 2011. Existing market sales increased \$113.0 million or 6.3% (7.6% based on the same number of business days). Acquired market sales increased \$113.2 million due to a full year's sales impact from the 2011 acquisitions and the partial year impact from our 2012 acquisitions. We attribute the existing market sales increase primarily to the following factors:

- better weather conditions in the first half of this year allowed for an increase in roofing activities, especially residential roofing;
- strong growth in the first half of this year in the markets affected by last year's storms;
- strong growth in non-residential roofing activity in most of our regions through the second quarter; and
- industry-wide price increases in our roofing product groups since last year's second quarter.

partially offset by:

- less roofing activity in the back half of this year in the markets affected by last spring's hail storms; and
- a slowdown in non-residential roofing activity during the back half of this year.

In 2012, we acquired twenty-two branches, opened four new branches, and closed two branches. In 2012, we have estimated the impact of inflation or deflation on our sales and gross profit by looking at changes in our average selling prices and gross margins (discussed below). Average selling prices were up overall 3 – 4% in 2012 compared to 2011, with price increases of non-residential products at 8 – 9%. Residential roofing product prices were up slightly at 1%, while complementary product prices were up 3 – 4%. The higher gross margins in 2012 are an indicator that the inflation in our net product costs was less than the impact from the increase in our average selling prices. Existing market net sales by geographical region increased (decreased) as follows: Northeast 6.3%; Mid-Atlantic 10.9%; Southeast 13.9%; Southwest 10.3%; Midwest (3.0%); West 2.8%; and Canada 3.1%. These variations were primarily caused by short-term factors such as local economic conditions, weather conditions and storm activity that influence the comparisons of a single geographical region. We had 251 business days in 2012 compared to 254 in 2011.

The product group sales for our existing markets were as follows:

For the Fiscal Years Ended

| (dollars in millions) | 2012 | | 2011 | | Change | % Change Based On Average Sales Per Business Day |
|----------------------------------|------------------|---------------|------------------|---------------|----------------|--|
| | Net Sales | Mix | Net Sales | Mix | | |
| Residential roofing products | \$ 923.5 | 48.5% | \$ 826.2 | 46.1% | \$ 97.3 | 11.8% |
| Non-residential roofing products | 734.0 | 38.5% | 717.4 | 40.0% | 16.6 | 2.3% |
| Complementary building products | 247.9 | 13.0% | 248.8 | 13.9% | (0.9) | -0.4% |
| | <u>\$1,905.4</u> | <u>100.0%</u> | <u>\$1,792.4</u> | <u>100.0%</u> | <u>\$113.0</u> | <u>6.3%</u> |

For 2012, our acquired markets recognized sales of \$100.1, \$23.9 and \$14.2 million in residential roofing products, non-residential roofing products and complementary building products, respectively. The 2012 existing market sales of \$1,905.4 million plus the total sales from acquired markets of \$138.2 million agrees (rounded) to our reported total 2012 sales of \$2,043.7 million. For 2011, our acquired markets recognized sales of \$23.8, \$0.7 and \$0.5 million in residential roofing products, non-residential roofing products and complementary building products, respectively. The 2011 existing market sales of \$1,792.4 million plus the sales from acquired markets of \$25.0 million agrees to our reported total 2011 sales of \$1,817.4 million. Prior year sales by product group are presented in a manner consistent with the current year's product classifications. We believe the existing market information is useful to investors because it helps explain organic growth or decline.

Gross Profit

| | 2012 | 2011 | Change | |
|------------------|---------|-----------------------|--------|-------|
| | | (dollars in millions) | | |
| Gross profit | \$501.4 | \$419.6 | \$81.8 | 19.5% |
| Existing markets | 464.1 | 413.2 | 50.9 | 12.3% |
| Gross margin | 24.5% | 23.1% | 1.4% | |
| Existing markets | 24.4% | 23.1% | 1.3% | |

Our existing market gross profit increased \$50.9 million or 12.3% in 2012, while our acquired market gross profit increased \$30.9 million. Our overall and existing market gross margins increased to 24.5% and 24.4% in 2012, respectively, from 23.1% in 2011. The higher gross margins in 2012 were due primarily to improved gross margins in residential roofing product sales and an increase in our mix of those residential product sales, which generally have higher gross margins than our other products.

Direct sales (products shipped by our vendors directly to our customers), which typically have substantially lower gross margins than our warehouse sales, represented 17.7% and 20.4% of our net sales in 2012 and 2011, respectively. This decrease was primarily attributable to the lower mix of non-residential

roofing product sales, which are more commonly facilitated by direct shipment. There were no material divisional impacts from changes in the direct sales mix of our geographical regions.

Operating Expenses

| | <u>2012</u> | <u>2011</u> | <u>Change</u> | |
|--|-------------|--------------------------|---------------|-------|
| | | (dollars in millions) | | |
| Operating expenses | \$357.7 | \$315.9 | \$41.8 | 13.2% |
| Existing markets | 321.1 | 311.3 | 9.7 | 3.1% |
| Operating expenses as a % of sales | 17.5% | 17.4% | 0.1% | |
| Existing markets | 16.8% | 17.4% | -0.5% | |

Operating expenses in our existing market increased \$9.7 million or 3.1% in 2012 to \$321.1 million, compared to \$311.3 million in 2011, while our acquired market expenses increased by \$32.1 million to \$36.7 million. The following factors were the leading causes of the higher operating expenses in our existing markets:

- increased payroll and related costs of \$12.3 million primarily due to higher incentive-based pay, overtime pay, certain benefits and payroll taxes;
- increased selling expenses of \$1.4 million from higher fuel and transportation costs and credit card fees; and
- increases in general and administrative costs of \$3.6 million principally from higher professional fees, severance costs, general insurance costs and travel expenses;

partially offset by

- decreased depreciation and amortization expense of \$4.3 million from lower amortization of intangibles and reduced depreciation from the impact of low capital expenditures in recent years; and
- decreased bad debts of \$3.9 million due primarily to a lower percentage of past-due accounts as improvement in the roofing industry enabled more of our customers to stay current with their required payments.

In 2012 and 2011, we expensed a total of \$9.4 million and \$8.6 million, respectively, for the amortization of intangible assets recorded under purchase accounting, including the impact from acquired markets. Our existing market operating expenses as a percentage of the related net sales decreased to 16.8% in 2012 from 17.4% in 2011 due to the positive impact from the higher sales, partially offset by the impact from the above increases.

Interest Expense and Other Financing Costs

Interest expense and other financing costs were \$17.2 million in 2012 compared to \$13.4 million in 2011. The 2012 expense includes a charge of \$2.6 million for the recognition of the fair value of certain interest rate derivatives and \$1.2 million resulting from the refinancing of our debt. These negative factors on interest expense and other financing costs in 2012 were partially offset by the benefit from lower outstanding total debt. Interest expense and other financing costs would have been \$7.5 and \$5.1 million lower in 2012 and 2011, respectively, without the impact of our interest rate derivatives.

Income Taxes

Income tax expense was \$50.9 million in 2012, an effective tax rate of 40.3%, compared to \$31.2 million in 2011, which was an effective tax rate of 34.5%. The 2011 income tax expense includes the beneficial impact of \$5.1 million, \$0.11 diluted earnings per share, from the reversal of the net deferred tax liability associated with a change in the tax status of our Canadian operations as discussed below. Without that benefit, our effective tax rate would have been approximately 40.1% in 2011. We expect our future annual income tax rate to average approximately 39.5% to 40.5%, excluding any discrete items.

2011 compared to 2010

The following table shows a summary of our results of operations for 2011 and 2010, broken down by existing markets and acquired markets.

| (in thousands) | Existing Markets | | Acquired Markets | | Consolidated | |
|---|------------------|-------------|------------------|------------|--------------|-------------|
| | 2011 | 2010 | 2011 | 2010 | 2011 | 2010 |
| Net sales | \$1,730,267 | \$1,583,687 | \$87,156 | \$26,282 | \$1,817,423 | \$1,609,969 |
| Gross profit | 399,262 | 355,000 | 20,363 | 5,080 | 419,625 | 360,080 |
| Gross margin | 23.1% | 22.4% | 23.4% | 19.3% | 23.1% | 22.4% |
| Operating expenses . . | 296,666 | 280,342 | 19,217 | 6,221 | 315,883 | 286,563 |
| Operating expenses as a % of net sales . . | 17.1% | 17.7% | 22.0% | 23.7% | 17.4% | 17.8% |
| Operating income (loss) | \$ 102,596 | \$ 74,658 | \$ 1,146 | \$ (1,141) | \$ 103,742 | \$ 73,517 |
| Operating margin . . . | 5.9% | 4.7% | 1.3% | -4.3% | 5.7% | 4.6% |

Net Sales

Consolidated net sales increased \$207.5 million, or 12.9%, to \$1.82 billion in 2011 from \$1.61 billion in 2010. Existing market sales increased \$146.6 million or 9.3% (8.8% based on the same number of business days), while acquired market sales increased \$60.9 million due to a full year's sales impact from the 2010 acquisitions and the impact from the May 2011 Enercon acquisition. We attribute the existing market sales increase primarily to the following factors:

- strong growth in the markets affected by the spring of 2011's hail storms;
- continued strong growth in non-residential roofing activity in most of the other regions; and
- industry-wide increases in asphalt shingle and other prices;

partially offset by:

- volume declines in residential re-roofing activity in a few regions.

In 2011, we acquired six branches, opened three new branches, and closed three branches. In 2011, we estimated the impact of inflation or deflation on our sales and gross profit by looking at changes in our net product costs and invoiced gross margins, and since 2010 we experienced an approximate 4% increase in residential roofing product costs and approximately 4-7% increases in non-residential and complementary product costs. The net impact of these factors increased our overall net product costs by approximately 5%, although we believe average sales prices may have increased at a slightly higher rate as mentioned in the discussion of gross profit below. We had 254 business days in 2011 compared to 253 in 2010. Net sales, excluding acquired branches, increased in every geographical region as follows: Northeast 9.9%; Mid-Atlantic 8.5%; Southeast 1.0%; Southwest 6.0%; Midwest 15.8%; West 18.7%; and Canada 1.3%. These variations were primarily caused by short-term factors such as local economic conditions, weather conditions and storm activity.

The product group sales for our existing markets were as follows:

For the Fiscal Years Ended

| (dollars in millions) | 2011 | | 2010 | | Change | | % Change Based On Average Sales Per Business Day |
|---|------------------|---------------|------------------|---------------|----------------|-------------|--|
| | Net Sales | Mix | Net Sales | Mix | | | |
| Residential roofing products . . . | \$ 801.7 | 46.3% | \$ 736.9 | 46.5% | \$ 64.8 | 8.8% | 8.4% |
| Non-residential roofing products | 683.9 | 39.5% | 606.3 | 38.3% | 77.6 | 12.8% | 12.4% |
| Complementary building products | 244.7 | 14.1% | 240.5 | 15.2% | 4.2 | 1.7% | 1.3% |
| | <u>\$1,730.3</u> | <u>100.0%</u> | <u>\$1,583.7</u> | <u>100.0%</u> | <u>\$146.6</u> | <u>9.3%</u> | <u>8.8%</u> |

For 2011, our acquired markets recognized sales of \$43.9, \$39.7 and \$3.6 million in residential roofing products, non-residential roofing products and complementary building products, respectively. The 2011 existing market sales of \$1,730.3 million plus the sales from acquired markets of \$87.2 million agrees (rounded) to our reported total 2011 sales of \$1,817.4 million. For 2010, our acquired markets recognized sales of \$11.1, \$13.1 and \$2.1 million in residential roofing products, non-residential roofing products and complementary building products, respectively. The 2010 existing market sales of \$1,583.7 million plus the sales from acquired markets of \$26.3 million agrees to our reported total 2011 sales of \$1,610.0 million. Sales by product group for 2010 are presented in a manner consistent with the 2011 product classifications. We believe the existing market information is useful to investors because it helps explain organic growth or decline.

Gross Profit

| | 2011 | 2010 | Change | |
|----------------------------|-----------------------|---------|--------|-------|
| | (dollars in millions) | | | |
| Gross profit | \$419.6 | \$360.1 | \$59.5 | 16.5% |
| Existing markets | 399.3 | 355.0 | 44.3 | 12.5% |
| Gross margin | 23.1% | 22.4% | 0.7% | |
| Existing markets | 23.1% | 22.4% | 0.7% | |

Our existing market gross profit increased \$44.3 million or 12.5% in 2011, while our acquired market gross profit increased \$15.3 million. Our overall and existing market gross margins increased to 23.1% from 22.4% in 2011 from 2010. The 2010 margin rate was lower than the historical average rate due to a more competitive market and low demand in 2010. In 2011, there was more storm demand and average selling prices increased in most of our markets, which allowed us to generate gross margins more consistent with our historical results. In addition, we were able to increase our inventory levels ahead of certain vendor price increases. However, our mix of non-residential product sales, which generally have lower gross margins, increased slightly in 2011.

Direct sales (products shipped by our vendors directly to our customers), which typically have substantially lower gross margins than our warehouse sales, represented 20.4% and 20.3% of our net sales in 2011 and 2010, respectively. This slight increase in the percentage of direct sales was primarily attributable to the slightly higher mix of non-residential roofing product sales, which are more commonly facilitated by direct shipment. There were no material regional impacts from changes in the direct sales mix of our geographical regions.

Operating Expenses

| | 2011 | 2010 | Change | |
|------------------------------------|---------|---------|-----------------------|-------|
| | | | (dollars in millions) | |
| Operating expenses | \$315.9 | \$286.6 | \$29.3 | 10.2% |
| Existing markets | 296.7 | 280.3 | 16.3 | 5.8% |
| Operating expenses as a % of sales | 17.4% | 17.8% | -0.4% | |
| Existing markets | 17.1% | 17.7% | -0.6% | |

Operating expenses in our existing markets increased by \$16.3 million or 5.8% in 2011 to \$296.7 million from \$280.3 million in 2010, while our acquired market expenses increased \$13.0 million. The following factors were the leading causes of the higher operating expenses in our existing markets:

- increased payroll and related costs of \$12.0 million due to higher incentive-based and overtime pay, primarily associated with our higher sales and operating results, along with higher related payroll taxes and certain benefits;
- increased selling expenses of \$5.4 million principally from higher fuel costs, outsourced trucking expenses, credit card fees and other selling expenses; and
- increased bad debt expense of \$3.3 million mainly due to an increased estimated allowance for potential bad debts;

partially offset by

- decreased depreciation and amortization expense of \$3.8 million from lower amortization of intangibles and reduced depreciation from the impact of low capital expenditures in recent years; and
- savings in warehouse expenses of \$0.5 million mainly from lower maintenance costs.

In 2011, we expensed a total of \$8.6 million for the amortization of intangible assets recorded under purchase accounting compared to \$9.9 million in 2010. Our existing market operating expenses as a percentage of net sales decreased to 17.1% in 2011 from 17.7% in 2010 due to the positive impact from the higher sales, partially offset by the impact from the above increases.

Interest Expense and Other Financing Costs

Interest expense and other financing costs decreased \$4.8 million to \$13.4 million in 2011 from \$18.2 million in 2010. This decrease was primarily due to lower debt and the expiration of certain interest rate derivatives in April 2010 that carried higher interest rates than the rates on our current derivatives. In addition, we benefited from low interest rates on the portion of our debt no longer hedged. Interest expense and other financing costs would have been \$5.1 and \$8.9 million less in 2011 and 2010, respectively, without the impact of our derivatives.

Income Taxes

Income tax expense was \$31.2 million in 2011, an effective tax rate of 34.5%, compared to \$20.8 million in 2010, which was an effective tax rate of 37.6%. This year's income tax expense includes the beneficial impact of \$5.1 million, \$0.11 diluted earnings per share, from the reversal of the net deferred tax liability associated with a change in the tax status of our Canadian operations as discussed below. Without that benefit, our effective tax rate would have been approximately 40.1% in 2011. The 2010 effective rate included benefits totaling \$1.4 million from reversals of certain discrete tax reserves and releases of valuation allowances on certain deferred tax assets.

During the fourth quarter of 2011, our request to have our Canadian subsidiary (Beacon Roofing Supply Canada Company or "BRSCC") treated as a Controlled Foreign Corporation ("CFC"), retroactive to October 1, 2009, was approved by the IRS. BRSCC was previously treated as a "pass-through" or disregarded entity for U.S. federal income tax purposes. Subsequent to October 1, 2009, BRSCC's taxable income, which reflects all of our Canadian operations, is being taxed only in Canada and would generally be taxed in the U.S. only upon an actual or deemed distribution. We expect to indefinitely reinvest BRSCC's

earnings and therefore no U.S. deferred tax asset or liability for the differences between the book basis and the tax basis of BRSCC will be recorded in the foreseeable future. Unremitted earnings of \$25.4 million were considered permanently reinvested at September 30, 2012. A quantification of the associated deferred tax liability on those unremitted earnings of BRSCC has not been made, as the determination of such liability is not practicable.

ASC 740 provides that the effect of an election for a voluntary change in tax status is recognized for accounting purposes on the approval date. Therefore all of the associated adjustments to our income tax accounts for the above approved election were recorded in the fourth quarter of 2011, including the adjustments resulting from a lower Canadian tax rate compared to the U.S. tax rate in 2011 and 2010. Deferred assets and liabilities that were recorded over the time BRSCC was treated as a pass-through entity were derecognized and the resulting impact of \$5.1 million was included in income from continuing operations, including the reversal of a deferred tax liability of \$3.2 million previously reported as a component of other comprehensive income. The reversal was recorded in current year earnings, as backwards tracing of such amounts to other comprehensive income is prohibited.

Seasonality and quarterly fluctuations

In general, sales and net income are highest during our first, third and fourth fiscal quarters, which represent the peak months of construction and re-roofing, especially in our branches in the northern and mid-western U.S. and in Canada. We have historically incurred low net income levels or net losses during the second quarter when our sales are substantially lower.

We generally experience an increase in inventory, accounts receivable and accounts payable during the third and fourth quarters of the year as a result of the seasonality of our business. Our peak cash usage generally occurs during the third quarter, primarily because accounts payable terms offered by our suppliers typically have due dates in April, May and June, while our peak accounts receivable collections typically occur from June through November.

We generally experience a slowing of our accounts receivable collections during our second quarter, mainly due to the inability of some of our customers to conduct their businesses effectively in inclement weather in certain of our divisions. We continue to attempt to collect those receivables, which require payment under our standard terms. We do not provide material concessions to our customers during this quarter of the year.

Our vendors are also affected by the seasonality in the industry and are more likely to provide seasonal incentives in our second quarter as a result of the lower level of roofing activity. We generally experience our peak working capital needs during the third quarter after we build our inventories following the Winter season but before we begin collecting on most of our Spring receivables.

Certain quarterly financial data

The following table sets forth certain unaudited quarterly data for the fiscal years 2012 and 2011 which, in the opinion of management, reflect all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation of this data. Results of any one or more quarters are not necessarily indicative of results for an entire fiscal year or of continuing trends. Totals may not total due to rounding.

| | Fiscal year 2012 | | | | Fiscal year 2011 | | | |
|---|--|---------|---------|---------|------------------|-----------|---------|---------|
| | Qtr 1 | Qtr 2 | Qtr 3 | Qtr 4 | Qtr 1 | Qtr 2 | Qtr 3 | Qtr 4 |
| | (dollars in millions, except per share data) | | | | | | | |
| | (unaudited) | | | | | | | |
| Net sales | \$489.9 | \$395.2 | \$560.5 | \$598.1 | \$404.8 | \$296.3 | \$540.7 | \$575.6 |
| Gross profit | 117.3 | 93.7 | 140.7 | 149.6 | 94.8 | 65.2 | 126.7 | 132.9 |
| Income (loss) from operations | 34.3 | 9.8 | 51.3 | 48.3 | 19.8 | (6.8) | 43.1 | 47.6 |
| Net income (loss) | \$ 19.1 | \$ 3.1 | \$ 25.4 | \$ 27.9 | \$ 10.1 | \$ (6.2) | \$ 24.1 | \$ 31.3 |
| Earnings (loss) per share – basic | \$ 0.41 | \$ 0.07 | \$ 0.54 | \$ 0.59 | \$ 0.22 | \$ (0.13) | \$ 0.52 | \$ 0.68 |
| Earnings (loss) per share – fully diluted | \$ 0.41 | \$ 0.07 | \$ 0.53 | \$ 0.58 | \$ 0.22 | \$ (0.13) | \$ 0.51 | \$ 0.67 |
| Quarterly sales as % of year's sales | 24.0% | 19.3% | 27.4% | 29.3% | 22.3% | 16.3% | 29.8% | 31.7% |
| Quarterly gross profit as % of year's gross profit | 23.4% | 18.7% | 28.1% | 29.8% | 22.6% | 15.5% | 30.2% | 31.7% |
| Quarterly income (loss) from operations as % of year's income from operations | 23.9% | 6.8% | 35.7% | 33.6% | 19.1% | -6.6% | 41.6% | 45.9% |

Earnings in the first quarter of fiscal 2012 included the beneficial impact of \$1.0 million, or \$0.02 diluted earnings per share, from the reduction in the liability for Enercon Products' contingent consideration.

Earnings in the third quarter of fiscal 2012 were impacted by the following charges: \$3.7 million (\$2.2 million net of tax), or \$0.05 diluted earnings per share, for the recognition of the fair value of certain interest rate derivatives in interest expense and other financing costs; \$1.2 million (\$0.7 million net of tax), or \$0.02 diluted earnings per share, resulting from the refinancing; and \$1.3 million, or \$0.03 diluted earnings per share, from the increase in the liability for Enercon Products' contingent consideration.

Earnings in the fourth quarter of fiscal 2012 included: a charge of \$3.0 million (\$1.8 million net of tax) for termination benefits, or \$0.04 diluted earnings per share, associated with the July 2012 acquisition of Structural Materials Co. and the retirement of one of our officers; and a benefit of \$1.1 million (\$0.7 million net of tax), or \$0.01 diluted earnings per share, for the recognition of the fair value of certain interest rate derivatives in interest expense and other financing costs.

Earnings in the fourth quarter of fiscal 2011 included the beneficial impact of \$5.1 million, \$0.11 diluted earnings per share, from the reversal of a net deferred tax liability associated with a change in the tax status of our Canadian operations. The calculation of the net loss per share for the second quarter of 2011 does not include the effects of outstanding stock awards since the impact would have been anti-dilutive.

Impact of inflation

We believe that our results of operations are not materially impacted by moderate changes in the inflation rate. In general, we have been able to pass on price increases from our vendors to our customers in a timely manner. Although we experienced fluctuations in average inventory prices that were consistent throughout the industry during 2012 and 2011, inflation and changing prices did not have a material impact on our net operating results in 2012 or 2011.

Liquidity and capital resources

We had cash and cash equivalents of \$40.2 million at September 30, 2012 compared to \$143.0 million at September 30, 2011. Our net working capital was \$334.8 million at September 30, 2012 compared to \$410.8 million at September 30, 2011.

2012 compared to 2011

Our net cash provided by operating activities was \$85.4 million in 2012 compared to \$79.3 million in 2011. The higher cash from operations was due to the increase in net income of \$16.3 million and higher non-cash adjustments of \$13.3 million, mostly offset by more cash used by working capital changes of \$23.6 million, net of the impact of businesses acquired. Changes in working capital in 2012 included decreases in accounts receivable and inventories of \$19.8 and \$13.3 million, respectively. The positive impact from those changes, however, were more than offset by a decrease in accounts payable and accrued expenses of \$44.2 million and a decrease in prepaid expenses and other assets of \$22.4 million. The decrease in accounts receivable was due to improved collections from customers in 2012 as compared to 2011. Our days sales outstanding (calculated based on the ending accounts receivable balance and the most recent quarter's sales) were down slightly due to the improvement in collections from our customers and more residential sales, which generally have shorter payment terms. Inventory turns were relatively flat year over year, as the impact of a higher inventory level was offset by the positive impact of higher sales. The higher level of inventory was primarily due to our acquisitions during 2012. The decrease in accounts payable and accrued expenses was primarily due to a lower level of inventory purchases during the fourth quarter of 2012 compared to 2011. Lastly, the increase in prepaid expenses and other assets was mostly due to an increase in amounts due from vendors for incentives.

Net cash used by investing activities was \$157.0 million in 2012 compared to \$47.8 million used in 2011. Capital expenditures were \$17.4 million in 2012 compared to \$14.4 million in 2011. In addition, we spent \$141.0 million on acquisitions in 2012 compared to \$34.9 million in 2011. We currently expect fiscal year 2013 capital expenditures to total between 1.0% to 1.2% of net sales, mostly dependent upon our sales volume and exclusive of the impact of new branch openings.

Net cash used by financing activities was \$31.8 million in 2012 compared to \$5.0 million used in 2011. In 2012, there were \$91.8 million of loan repayments, net of proceeds of \$225.0 million from our new term loan and \$4.0 million from new loans under our equipment financing facility. We borrowed \$41.3 million under our new revolving lines of credit. We also received \$24.1 million of proceeds from exercises of stock options and paid \$5.4 million in deferred financing costs in 2012. The financing activities in 2011 primarily reflected repayments under our credit and equipment financing facilities, net of proceeds of \$3.2 million from new loans under our equipment financing facility, and proceeds from exercises of stock options.

2011 compared to 2010

Our net cash provided by operating activities was \$79.3 million in 2011 compared to \$73.9 million in 2010. The higher cash from operations was due to the increase in net income of \$24.7 million, mostly offset by cash used by working capital changes, net of the impact of businesses acquired. Changes in working capital provided a favorable increase in accounts payable and accrued expenses of \$53.0 million and a favorable decrease in prepaid expenses and other assets of \$7.5 million. These were more than offset by unfavorable increases in accounts receivable and inventories of \$35.3 and \$35.0 million, respectively. The increase in accounts payable and accrued expenses was primarily due to a higher level of inventory purchases later this year and higher accrued income taxes. The increase in accounts receivable was due to stronger fourth quarter sales in 2011 as compared to 2010. Our days sales outstanding (calculated based on the ending accounts receivable balance and the most recent quarter's sales) were down slightly due to the stronger fourth quarter sales and a lower fourth-quarter mix of non-residential sales this year, which generally have longer payment terms. Inventory turns were relatively flat year over year, as the impact of this year's larger build-up of inventory was offset by the impact of the higher sales. The higher level of inventory was primarily due to more normal purchasing levels in the fourth quarter of 2011 compared to the prior year, when we curtailed fourth-quarter purchases. We also maintained higher levels of inventories in the branches that serviced storm demand in 2011. In addition, we have seen average overall product costs increase approximately 5% from 2010 to 2011. Lastly, the decrease in prepaid expenses and other assets was mostly due to declines in prepaid income taxes and amounts due from vendors for incentives.

Net cash used in investing activities was \$47.8 million in 2011 compared to \$28.8 million in 2010. This increase was due to the cost of our acquisitions and higher capital spending for transportation and material handling equipment.

Net cash used by financing activities was \$5.0 million in 2011 compared to \$10.8 million in 2010. These amounts primarily reflected repayments under our credit facilities, partially offset by proceeds from new equipment financings (\$3.2 million) in 2011 and from the exercise of stock options.

Capital Resources

Our principal source of liquidity at September 30, 2012 was our cash and cash equivalents of \$40.2 million and our available borrowings of \$258.4 million under revolving lines of credit, which takes into account all of the debt covenants under the Credit Facility (see below), including the maximum consolidated total leverage ratio and minimum consolidated interest coverage ratio. Borrowings outstanding under the revolving lines of credit in the accompanying balance sheet at September 30, 2012 and September 30, 2011 were classified as short-term debt. This was because there is no current expectation of a minimum level of outstanding revolver borrowings in the twelve months following 2012 and we paid off the September 30, 2011 borrowings in 2012.

Liquidity is defined as the current amount of readily available cash and the ability to generate adequate amounts of cash to meet the current needs for cash. We assess our liquidity in terms of our cash and cash equivalents on hand and the ability to generate cash to fund our operating activities, taking into consideration the seasonal nature of our business. Our cash equivalents are comprised of highly liquid money market funds which invest primarily in commercial paper or bonds with a rating of A-1 or better, and bank certificates of deposit.

Significant factors which could affect future liquidity include the following:

- the adequacy of available bank lines of credit;
- the ability to attract long-term capital with satisfactory terms;
- cash flows generated from operating activities;
- acquisitions; and
- capital expenditures.

Our primary capital needs are for working capital obligations and other general corporate purposes, including acquisitions and capital expenditures. Our primary sources of working capital are cash from operations and cash equivalents, supplemented by bank borrowings. In the past, we have paid for acquisitions from cash on hand or financed them initially through increased bank borrowings, the issuance of common stock and/or other borrowings. We then repay any such borrowings with cash flows from operations. We have funded our past capital expenditures through increased bank borrowings, including equipment financing, or through capital leases, and then have reduced these obligations with cash flows from operations.

We believe we have adequate current liquidity and availability of capital to fund our present operations, meet our commitments on our existing debt and fund anticipated growth, including expansion in existing and targeted market areas. We continually seek potential acquisitions and from time to time hold discussions with acquisition candidates. If suitable acquisition opportunities or working capital needs arise that would require additional financing, we believe that our financial position and earnings history provide a strong base for obtaining additional financing resources at competitive rates and terms, as we have in the past. We may also issue additional shares of common stock to raise funds, which we last did in December 2005, or we may issue preferred stock.

Monitoring and Assessing Collectability of Accounts Receivable

We perform periodic credit evaluations of our customers and typically do not require collateral, although we typically obtain payment and performance bonds for any type of public work and have the ability to lien projects under certain circumstances. Consistent with industry practices, we require payment from most customers within 30 days, except for sales to our commercial roofing contractors, which we typically require to pay in 60 days.

As our business is seasonal in certain geographic regions, our customers' businesses are also seasonal. Sales are lowest in the winter months and our past due accounts receivable balance as a percentage of total

receivables generally increases during this time. Throughout the year, we closely monitor our receivables and record estimated reserves based upon our judgment of specific customer situations, aging of accounts and our historical write-offs of uncollectible accounts.

Our regional credit offices are staffed to manage and monitor our receivable aging balances and our systems allow us to enforce pre-determined credit approval levels and properly leverage new business. The credit pre-approval process denotes the maximum requested credit amount that each level of management can approve, with the highest credit amount requiring approval by our CEO and CFO. There are daily communications with branch and field staff. Our regional offices conduct periodic reviews with their branch managers, various regional management staff and the VP-Credit. Depending on the state of the respective region's receivables, these reviews can be weekly, bi-weekly or monthly. Additionally, the regions are required to submit a monthly receivable forecast to the VP-Credit. On a monthly basis, the VP-Credit will review and discuss these forecasts, as well as a prior month recap, with the CEO and CFO.

Periodically, we perform a specific analysis of all accounts past due and write off account balances when we have exhausted reasonable collection efforts and determined that the likelihood of collection is remote based upon the following factors:

- aging statistics and trends;
- customer payment history;
- review of the customer's financial statements when available;
- independent credit reports; and
- discussions with customers.

We still pursue collection of amounts written off in certain circumstances and credit the allowance for any subsequent recoveries. In the past, annual bad debts typically averaged approximately 0.3% of net sales. In 2012, bad debts declined to only 0.2% of net sales. In 2011, bad debts increased slightly to 0.4% of net sales, which was still within our tolerance in consideration of the challenging economic and credit climate.

Indebtedness

We currently have the following credit facilities:

- a senior secured credit facility in the U.S.;
- a Canadian senior secured credit facility; and
- an equipment financing facility.

Senior Secured Credit Facility

On April 5, 2012, we replaced the Prior Credit Facility (see below) with a new five-year senior secured credit facility that includes a \$550 million U.S. credit facility and a C\$15 million (\$14.7 million) Canadian credit facility with Wells Fargo Bank, National Association, and a syndicate of other lenders (combined, the "Credit Facility"). We paid off debt of \$304.0 million that was outstanding under the Prior Credit Facility with the proceeds from the Credit Facility and from approximately \$79 million of cash on hand. The \$550 million U.S. credit facility consists of a revolving credit facility of \$325 million (the "U.S. Revolver"), which includes a sub-facility of \$20 million for letters of credit, and a \$225 million term loan (the "Term Loan"). The Term Loan has required amortization of 5% per year that is payable in quarterly installments, with the balance due on March 31, 2017. We may increase the Credit Facility by up to \$200 million under certain conditions. There was \$41.3 and \$219.4 million outstanding under the U.S. Revolver and Term Loan, respectively, at September 30, 2012. There were \$5.5 million of outstanding standby letters of credit at September 30, 2012.

Interest

Borrowings under the Credit Facility carry interest at a margin above the LIBOR Rate. The margin is currently 1.75% per annum and can range from 1.50% to 2.50% per annum depending upon our Consolidated Total Leverage Ratio, as defined in the Credit Facility. The Credit Facility also provides for a US base rate,

defined in the agreement as the higher of the Prime Rate, or the Federal Funds Rate plus 0.50%, plus a margin above that rate. In addition, the Canadian credit facility permits borrowings under a base rate, defined in the agreement as the higher of the Canadian Prime Rate, or the annual rate of interest equal to the sum of the CDOR rate plus 1.0%, plus a margin above that rate. The margin for both base rates is currently 0.75% per annum and can range from 0.50% to 1.50% per annum depending upon our Consolidated Total Leverage Ratio, as defined in the Credit Facility. Current unused commitment fees on the revolving credit facilities are 0.375% per annum. The unused commitment fees can range from 0.35% to 0.50% per annum, again depending upon our Consolidated Total Leverage Ratio.

Our outstanding borrowings under the U.S. Revolver at September 30, 2012 carried an interest rate of LIBOR plus 1.75% (2.0% at September 30, 2012) for \$35.0 million and the remainder at the base rate (4.0%). There were no outstanding borrowings under the Canada revolver. The Term Loan balance carried an interest rate of LIBOR plus 1.75% (2.0% at September 30, 2012).

Financial covenants under the Credit Facility are as follows:

Maximum Consolidated Total Leverage Ratio

On the last day of each fiscal quarter, our Consolidated Total Leverage Ratio (the ratio of our outstanding debt to our trailing twelve-month earnings before interest, income taxes, depreciation, amortization and stock-based compensation), as more fully defined in the Credit Facility, must not be greater than 3.50:1.0, or 4.00:1.0 under a one-time request by us subsequent to an acquisition that meets the requirements under the Credit Facility. At September 30, 2012, this ratio was 1.55:1.

Minimum Consolidated Interest Coverage Ratio

On the last day of each fiscal quarter, our Consolidated Interest Coverage Ratio (the ratio of our trailing twelve-month earnings before interest, income taxes, depreciation, amortization and stock-based compensation to our cash interest expense for the same period), as more fully defined in the Credit Facility, must not be less than 3.00:1.0. At September 30, 2012, this ratio was 15.14:1.

As of September 30, 2012, we were in compliance with these covenants. Substantially all of our assets, including the capital stock and assets of wholly-owned subsidiaries, secure obligations under the Credit Facility.

Prior Credit Facility

On November 2, 2006, we entered into an amended and restated seven-year \$500 million U.S. senior secured credit facility and a C\$15 million senior secured Canadian credit facility with GE Antares Capital (“GE Antares”) and a syndicate of other lenders (combined, the “Prior Credit Facility”). The Prior Credit Facility provided for a cash receipts lock-box arrangement that gave us sole control over the funds in lock-box accounts, unless excess availability was less than \$10 million or an event of default occurred, in which case the senior secured lenders would have had the right to take control over such funds and to apply such funds to repayment of the senior debt.

The Prior Credit Facility consisted of a U.S. revolving credit facility providing up to \$150 million, which included a sub-facility of \$20 million for letters of credit, and a term loan with an initial principal amount of \$350 million term loan (the “Prior Term Loan”). The Prior Credit Facility also included a C\$15 million senior secured revolving credit facility provided by GE Canada Finance Holding Company. The Prior Term Loan required amortization of 1% per year, payable in quarterly installments of approximately \$0.8 million, and the remainder was scheduled to be due in 2013. The Prior Credit Facility could have also been expanded by up to an additional \$200 million under certain conditions. There were \$4.6 million of outstanding standby letters of credit at September 30, 2011. There were mandatory prepayments under the Prior Credit Facility under certain conditions, including the following cash flow condition:

Excess Cash Flow

By May 15 of each fiscal year, we were required to pay an amount equal to 50% of the Excess Cash Flow (as defined in the Prior Credit Facility) for the prior fiscal year, not to exceed \$7.0 million with respect to any fiscal year. Based on our results for fiscal year 2011, a required payment of \$7.0 million was due by

May 2012 and was paid in January 2012. A payment of \$7.0 million was also made in January 2011 for fiscal year 2010. The amount payable under this provision as of September 30, 2011 was classified as short-term debt.

Equipment Financing Facilities

As of September 30, 2012, there was a total of \$11.2 million outstanding under prior equipment financing facilities, with fixed interest rates ranging from 3.3% to 7.1% and payments due through September 2017.

Subsequent to September 30, 2012, we entered into a new equipment financing facility that provides financing for up to \$30 million of purchased transportation and material handling equipment through October 1, 2014. The applicable interest rate at the time of the advances will be approximately 1.26% above the 3-year term swap rate for 5-year loans and 1.21% above the 4-year term swap rate for 7-year loans.

Contractual Obligations

At September 30, 2012, contractual obligations were as follows (in millions):

| | Fiscal years | | | | | |
|--|---------------|---------------|---------------|---------------|----------------|--------------|
| | 2013 | 2014 | 2015 | 2016 | 2017 | Thereafter |
| Senior bank debt and revolver | \$52.5 | \$11.3 | \$11.3 | \$11.3 | \$174.3 | \$ — |
| Equipment financing | 4.4 | 3.4 | 1.5 | 1.1 | 0.8 | — |
| Operating leases | 28.5 | 26.2 | 20.5 | 13.8 | 6.8 | 3.7 |
| Interest ⁽¹⁾ | 7.1 | 7.7 | 7.2 | 6.8 | 3.3 | — |
| Non-cancelable purchase obligations ⁽²⁾ | — | — | — | — | — | — |
| Total | <u>\$92.5</u> | <u>\$48.6</u> | <u>\$40.5</u> | <u>\$33.0</u> | <u>\$185.2</u> | <u>\$3.7</u> |

(1) Interest payments reflect all currently scheduled amounts along with projected amounts to be paid under the senior bank debt using a LIBOR Curve to estimate the future interest rates and considering our current interest rate hedges.

(2) In general, we purchase products under purchase obligations that are cancelable by us without cost or expire after 30 days.

Capital Expenditures

We incurred capital expenditures of \$17.4, \$14.4 and \$10.3 million in 2012, 2011 and 2010, respectively. Typically, over 80% of our capital expenditures have generally been made for transportation and material handling equipment. In 2010, we incurred a lower spend rate (with capital expenditures at 0.6% of sales) as we reduced capital expenditures due to the business slowdown. We currently expect future annual capital expenditures to be approximately 1% of net sales, exclusive of the impact of new branch openings and assuming improved economic and industry conditions.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Critical accounting policies

Critical accounting policies are those that are both important to the accurate portrayal of a company's financial condition and results and require subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

In order to prepare financial statements that conform to accounting principles generally accepted in the United States, commonly referred to as U.S. GAAP, we make estimates and assumptions that affect the amounts reported in our financial statements and accompanying notes. Certain estimates are particularly sensitive due to their significance to the financial statements and the possibility that future events may be significantly different from our expectations.

We have identified the following accounting policies that require us to make the most subjective or complex judgments in order to fairly present our consolidated financial position and results of operations.

Stock-Based Compensation

We account for employee and non-employee director stock-based compensation using the fair value method of accounting. Compensation cost arising from stock options and restricted stock awards granted to employees and non-employee directors is recognized using the straight-line method over the vesting period, which represents the requisite service or performance period. In calculating the expense related to stock-based compensation, we estimate option forfeitures and project the number of restricted shares and units that are expected to vest based on the related performance measures. In addition, we report the benefits of tax deductions in excess of recognized compensation cost as both a financing cash inflow and an operating cash outflow. The excess tax benefit classified as a financing activity would have been classified as an operating inflow if we did not use the fair value method.

Interest Rate Swaps

We enter into interest rate swaps to minimize the risks and costs associated with financing activities, as well as to maintain an appropriate mix of fixed-and floating-rate debt. The swap agreements are contracts to exchange variable-rate for fixed-interest rate payments over the life of the agreements. For derivative instruments designated as cash flow hedges, we record the effective portions of changes in their fair value, net of taxes, in other comprehensive income. The effectiveness of the hedges is periodically assessed by management during the lives of the hedges by 1) comparing the current terms of the hedges with the related hedged debt to assure they continue to coincide and 2) through an evaluation of the ability of the counterparties to the hedges to honor their obligations under the hedges. Any ineffective portions of the hedges are recognized in earnings through interest expense and other financing costs.

Our refinancing transaction on April 5, 2012, resulted in hedge ineffectiveness on the derivative instruments that expire in April 2013, as the underlying term debt being hedged was repaid before the expiration of the derivative instruments. This resulted in a charge to interest expense and other financing costs in the third quarter of 2012 for the fair value of the derivative instruments previously recorded as a component of comprehensive loss. Subsequent changes in the fair value of those swaps are also being recognized in interest expense and other financing costs. Our new derivative instrument entered into in 2012 is designated as a cash flow hedge, for which we record the effective portions of changes in its fair value, net of tax, in other comprehensive income.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts for estimated losses due to the failure of our customers to make required payments. We charge write-offs against our allowance for doubtful accounts, although we still pursue collection in certain circumstances and credit the allowance for any subsequent recoveries.

Inventory Valuation

Product inventories represent one of our largest assets and are recorded at net realizable value. Our goal is to manage our inventory so that we minimize out of stock positions. To do this, we maintain an adequate inventory of SKUs at each branch based on sales history. At the same time, we continuously strive to better manage our slower moving classes of inventory. We monitor our inventory levels by branch and record provisions for excess inventories based on slower moving inventory. We define potential excess inventory as the amount of inventory on hand in excess of the historical usage, excluding items purchased in the last three months. We then review our most recent history of sales and adjustments of such excess inventory and apply our judgment as to forecasted demand and other factors, including liquidation value, to determine the required adjustments to net realizable value. In addition, at the end of each year, we evaluate our inventory at each branch and write off and dispose of obsolete products. Our inventories are generally not susceptible to technological obsolescence.

During the year, we perform periodic cycle counts and write off excess or damaged inventory as needed. At year-end, we take a physical inventory and record any necessary additional write-offs.

Vendor Rebates

Our typical rebate arrangements with our vendors provide for us to receive a rebate of a specified amount, payable to us after we make a special purchase or after we achieve any of a number of measures

generally related to the volume of our purchases over a period of time, usually quarterly or annually. We account for these rebates as a reduction of the prices of the related vendors' products, which reduces the inventory cost until the period in which we sell the product, at which time these rebates reduce cost of sales in our income statement. Throughout the year, we estimate the amount of rebates receivable for the periodic programs based upon the expected level of purchases. We continually revise these estimates to reflect actual rebates earned based on actual purchase levels. Historically, our actual rebates have been within our expectations used for our estimates. If we fail to achieve a measure which is required to obtain a vendor rebate, we will have to record a charge in the period that we determine the criteria or measure for the vendor rebate will not be met to the extent the vendor rebate was estimated and included as a reduction to cost of sales.

If market conditions were to change, vendors may change the terms of some or all of these programs. Although these changes would not affect the amounts which we have recorded related to products already purchased, it may impact our gross margin on products we sell or revenues earned in future periods.

Revenue Recognition

We recognize revenue when the following four basic criteria are met:

- persuasive evidence of an arrangement exists;
- delivery has occurred or services have been rendered;
- the price to the buyer is fixed or determinable; and
- collectability is reasonably assured.

We generally recognize revenue at the point of sale or upon delivery to the customer's site. For goods shipped by third party carriers, we recognize revenue upon shipment since the terms are FOB shipping point. Approximately 82% of our revenues are for products delivered by us or picked up by our customers at our facilities, which provides for timely and accurate revenue recognition.

We also ship certain products directly from the manufacturer to the customer. Revenues are recognized upon notifications of deliveries from our vendors. Delays in receiving delivery notifications could impact our financial results, although it has not been material to our consolidated results of operations in the past.

We also provide certain job site delivery services, which include crane rentals and rooftop deliveries of certain products, for which the associated revenues are recognized upon completion of the services. These revenues represent less than 1% of our net sales.

All revenues recognized are net of sales taxes collected, allowances for discounts and estimated returns, which are provided for at the time of pick up or delivery. In the past, customer returns have not been material to our consolidated results of operations. All sales taxes collected are subsequently remitted to the appropriate government authorities.

Income Taxes

We account for income taxes using the liability method, which requires us to recognize a current tax liability or asset for current taxes payable or refundable and a deferred tax liability or asset for the estimated future tax effects of temporary differences between the financial statement and tax reporting bases of assets and liabilities to the extent that they are realizable. Deferred tax expense (benefit) results from the net change in deferred tax assets and liabilities during the year. See the "2011 compared to 2010" income taxes discussion above and Note 12 for a discussion of the impact from a change in the tax status of our Canadian operations in 2011.

FASB ASC Topic 740, Income Taxes ("ASC 740") prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Based on this guidance, we analyze our filing positions in all of the federal and state jurisdictions where we are required to file income tax returns, as well as all open tax years in these jurisdictions. Tax benefits from uncertain tax positions are recognized if it is more likely than not that the position is sustainable based solely on its technical merits.

Goodwill

We test goodwill for impairment in the fourth quarter of each fiscal year or at any other time when impairment indicators exist. Examples of such indicators include a significant change in the business climate, unexpected competition, loss of key personnel or a decline in our market capitalization below our net book value.

As discussed below, we adopted guidance in 2011 that permits companies to perform a qualitative assessment based on economic, industry and company-specific factors as the initial step in the annual goodwill impairment test for all or selected reporting units. Based on the results of the qualitative assessment, companies are only required to perform Step 1 of the annual impairment test for a reporting unit if the company concludes that it is more likely than not that the unit's fair value is less than its carrying amount.

To the extent we conclude it is more likely than not that a reporting unit's fair value is less than its carrying amount, the two-step approach is applied. The first step would require a comparison of each reporting unit's fair value to the respective carrying value. If the carrying value exceeds the fair value, a second step is performed to measure the amount of impairment loss, if any.

We assess goodwill for impairment at the reporting unit level, which is defined as an operating segment or one level below an operating segment, referred to as a component (i.e. a business for which discrete financial information is available and regularly reviewed by component managers). We currently have five components which we evaluate for aggregation.

We evaluate the distribution methods, sales mix, and operating results of each of our components to determine if these characteristics have or will be sustained over a long-term basis. For purposes of this evaluation, we would expect our components to exhibit similar economic characteristics 3 – 5 years after events such as an acquisition within our core roofing business or management/business restructuring. This evaluation also considers major storm activity or local economic challenges that may impact the short term operations of an individual component. Components that exhibit similar economic characteristic are subsequently aggregated into a single reporting unit.

Based on our evaluation at August 31, 2012, one of the five components did not exhibit similar economic characteristics and therefore was individually evaluated for goodwill impairment as a separate reporting unit (the "Individual Reporting Unit"). This was primarily due to the fact that this component had an above-average concentration of residential business that provided gross margin and operating income rates well above the Company average. The remaining components were aggregated into a second reporting unit (the "Aggregated Reporting Unit"). The Individual Reporting Unit represents approximately 11% of the consolidated operating income, while the Aggregated Reporting Unit comprises the remaining 89%.

We concluded that the fair values for both the Aggregated and Individual Reporting Unit more likely than not exceeded their respective carrying values at the goodwill measurement date. This position is consistent with the 2012 operating results in which sales and operating income for the Aggregated Reporting Unit exceeded those in the prior year by 16% and 51%, respectively. In addition, sales and operating income for the Individual Reporting Unit exceeded those in the prior year by 4% and 2%, respectively. We further expect both the Aggregated and Individual Reporting units to experience moderate growth in the near future. Our analysis further noted the total market capitalization exceeded the Company's carrying value by approximately 105% at August 31, 2012. This compares to 62% for that same measure at August 31, 2011. In addition, we did not identify any macroeconomic or industry conditions or cost related factors that would indicate the fair values of the two reporting units were more likely than not to be less than their respective carrying values.

Lastly, there have been no events or circumstances since the date of the above assessments that would change our conclusion. If circumstances change or events occur to indicate it is more likely than not that the fair values of any of our reporting units (under the guidelines discussed above) have fallen below their carrying values, we would test such reporting units for impairment.

Adoption of Recent Accounting Pronouncements

In July 2012, the FASB issued Accounting Standards No. 2012-02, *Intangibles — Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment*, which permits an entity the option first

to assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount in accordance with Subtopic 350-30. An entity also has the option to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to performing the quantitative impairment test. An entity will be able to resume performing the qualitative assessment in any subsequent period. The amendments are effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. We early adopted this Update for our review of our other intangible assets for 2012.

In September 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards No. 2011-08, *Intangibles — Goodwill and Other (Topic 350): Testing Goodwill for Impairment*, which permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. Previous guidance under Topic 350 required an entity to test goodwill for impairment, on at least an annual basis, by comparing the fair value of a reporting unit with its carrying amount, including goodwill (step one). If the fair value of a reporting unit is less than its carrying amount, then the second step of the test must be performed to measure the amount of the impairment loss, if any. Under the amendments in this Update, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. This Update is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if an entity's financial statements for the most recent annual or interim period have not yet been issued. We early adopted this Update for our goodwill impairment testing for 2011 as described under "Goodwill" above.

In December 2010, the FASB issued Accounting Standards No. 2010-29, an amendment to *Business Combinations (Topic 805) — Disclosure of Supplementary Pro Forma Information for Business Combinations*, which specifies that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendments in this Update also expand the supplemental pro forma disclosures under Topic 805 to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The Update is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. Our adoption of this Update in 2012 did not have an impact on the financial statements.

In December 2010, the FASB issued Accounting Standards No. 2010-28 an amendment to *Intangibles-Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts* (a consensus of the FASB Emerging Issues Task Force). The new guidance modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The qualitative factors are consistent with the existing guidance and examples in paragraph 350-20-35-30, which require that goodwill of a reporting unit be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. The amendment is effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. Our adoption of this amendment in 2012 did not have an impact on the financial statements.

In October 2009, the FASB issued ASU 2009-13, *Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements*, which amends the criteria for allocating a contract's consideration to individual services or products in multiple deliverable arrangements. This guidance was effective for us beginning in 2011 but did not have an impact on the financial statements.

In June 2009, the FASB issued Financial Accounting Statement (FAS) 166, *Accounting for Transfers of Financial Assets*, and FAS 167, *Amendments to FASB Interpretation No. 46(R)*, codified as Accounting Standards Update No. 2009-17 (ASU 2009-17), which changes the way entities account for securitizations and special purpose entities. Both statements were effective for us beginning in 2011 but did not have an impact on the financial statements.

Other Recent Accounting Pronouncements

In October 2012, the FASB issued Accounting Standards No. 2012-04 — *Technical Corrections and Improvements*, which includes certain corrections to the Accounting Standards Codification and amendments that identify when the use of fair value should be linked to the definition of fair value in Topic 820, *Fair Value Measurement*. This Update contains conforming amendments to the Codification to reflect the measurement and disclosure requirements of Topic 820. The amendments in this Update that will not have transition guidance are effective for us upon issuance. The amendments that are subject to the transition guidance will be effective for fiscal years beginning after December 15, 2012. This new guidance may only affect the way in which we reference and report accounting and reporting standards.

In December 2011, the FASB issued Accounting Standards No. 2011-11, *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities*, which requires an entity to disclose certain information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. An entity is required to apply the amendments in this Update for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. We do not expect the adoption of this Update to have an impact on the financial statements. The FASB has clarified the scope of ASU 2011-11 and proposed to limit the disclosures to derivatives, sale and repurchase agreements and reverse sale and repurchase agreements, and securities borrowing and lending arrangements.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, which provides an entity with the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In a single continuous statement, the entity is required to present the components of net income and total net income, the components of other comprehensive income and a total for other comprehensive income, along with the total of comprehensive income in that statement. In the two-statement approach, an entity is required to present components of net income and total net income in the statement of net income. The statement of other comprehensive income should immediately follow the statement of net income and include the components of other comprehensive income and a total for other comprehensive income, along with a total for comprehensive income. These changes apply to both annual and interim financial statements. The amendments in ASU 2011-05 should be applied retrospectively. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, however Accounting Standards No. 2011-12, issued by the FASB in December 2011, has deferred the effective date of the portions of this Update that relate to the presentation of reclassification adjustments. Early adoption is permitted. We do not currently expect the adoption of ASU 2011-05 to have a significant impact on our financial position and results of operations.

In May 2011, the FASB issued ASU 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*, which changes the wording used to describe the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. ASU 2011-04 is effective for interim and annual periods beginning after December 15, 2011, and should be applied prospectively. We do not currently expect the adoption of this standard to have a significant impact on the financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to certain market risks as part of our on-going business operations. Our primary exposure includes changes in interest rates and foreign exchange rates.

Interest Rate Risk

Our interest rate risk relates primarily to the variable-rate borrowings under our Credit Facility. The following discussion of our interest rate swaps (see “Financial Derivatives” below) is based on a 10% change in interest rates. These changes are hypothetical scenarios used to calibrate potential risk and do not represent our view of future market changes. As the hypothetical figures discussed below indicate, changes in fair value based on the assumed change in rates generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. The effect of a variation in a particular assumption is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another, which may magnify or counteract the sensitivities.

At September 30, 2012, we had \$219.4 and \$41.3 million of outstanding term loans and revolver borrowings, respectively, under our Credit Facility, and \$11.2 million of equipment financing outstanding. Our weighted-average effective interest rate was 2.12% on total debt at September 30, 2012 compared to 4.01% on total debt outstanding at September 30, 2011. At September 30, 2012, a hypothetical 10% increase in interest rates in effect at that date would have increased annual interest expense by \$0.5 million.

We enter into interest rate swaps to minimize the risks and costs associated with financing activities, as well as to maintain an appropriate mix of fixed-and floating-rate debt. The swap agreements discussed below are contracts to exchange variable-rate for fixed-interest rate payments over the life of the agreements. The aggregate fair value of these swaps represented an unrealized loss of \$8.6 million at September 30, 2012. A hypothetical increase (or decrease) of 10% in interest rates from the level in effect at September 30, 2012, would result in an aggregate realized gain or (loss) in value of the swaps of less than \$0.1 million or (\$0.1) million, respectively, and an aggregate unrealized gain or (loss) in value of the swaps of approximately \$0.8 million or (\$0.8) million, respectively.

Financial Derivatives

We use derivative financial instruments to manage its exposure related to fluctuating cash flows from changes in interest rates. Use of derivative financial instruments in hedging programs subjects us to certain risks, such as market and credit risks. Market risk represents the possibility that the value of the derivative instrument will change. In a hedging relationship, the change in the value of the derivative is offset to a great extent by the change in the value of the underlying hedged item. Credit risk related to derivatives represents the possibility that the counterparty will not fulfill the terms of the contract. The notional, or contractual, amount of our derivative financial instruments is used to measure interest to be paid or received and does not represent our exposure due to credit risk. Our current derivative instruments are with large financial counterparties rated highly by nationally recognized credit rating agencies.

We use interest rate derivative instruments to manage the risk related to fluctuating cash flows from interest rate changes by converting a portion of its variable-rate borrowings into fixed-rate borrowings. As of September 30, 2012, our outstanding interest rate derivative instruments included: a) a \$100 million interest rate swap with interest payments at a fixed rate of 2.72%; b) a \$50 million interest rate swap with interest payments at a fixed rate of 3.12%; and c) a \$50 million interest rate swap with interest payments at a fixed rate of 3.11%. These interest rate swaps expire in April 2013 and, as discussed further below, were designated as cash flow hedges until our refinancing. In addition, on April 9, 2012, we entered into a new interest rate derivative instrument consisting of a \$213.8 million interest rate swap with interest payments at a fixed rate of 1.38%, commencing on June 28, 2013. This new interest rate swap is designated as a cash flow hedge and amortizes at \$2.8 million per quarter beginning on June 28, 2013 and expires on March 31, 2017.

For derivative instruments designated as cash flow hedges, we record the effective portions of changes in their fair value, net of taxes, in other comprehensive income. The effectiveness of the hedges is periodically assessed by management during the lives of the hedges by 1) comparing the current terms of the hedges with the related hedged debt to assure they continue to coincide and 2) through an evaluation of the ability of the counterparties to the hedges to honor their obligations under the hedges. Any ineffective portions of the

hedges are recognized in earnings through interest expense and other financing costs. Our refinancing transaction on April 5, 2012 resulted in hedge ineffectiveness on the derivative instruments that expire in April 2013, as the underlying term debt being hedged was repaid before the expiration of the derivative instruments. This resulted in a \$4.9 million charge to interest expense and other financing costs in the third quarter of 2012 for the fair value of the derivative instruments previously recorded as a component of comprehensive loss. Subsequent changes in the fair value of those swaps are also being recognized in interest expense and other financing costs and there was a decline of \$2.3 million in the fair value of the ineffective swaps in the second half of 2012 that was recognized as a reduction to interest expense and other financing costs.

We record any differences paid or received on its interest rate hedges as adjustments to interest expense. The table below presents the combined fair values of the interest rate derivative instruments:

| Instrument | Location on Balance Sheet | Unrealized Losses | | Fair Value Hierarchy |
|--|---------------------------|--------------------|--------------------|----------------------|
| | | September 30, 2012 | September 30, 2011 | |
| (Dollars in thousands) | | | | |
| Designated interest rate swaps (effective) . . . | Accrued expenses | \$6,005 | \$7,235 | |
| Non-designated interest rate swaps (ineffective) | Accrued expenses | 2,621 | — | |
| | | <u>\$8,626</u> | <u>\$7,235</u> | Level 2 |

The fair values of the interest rate hedges were determined through the use of pricing models, which utilize verifiable inputs such as market interest rates that are observable at commonly quoted intervals (generally referred to as the “LIBOR Curve”) for the full terms of the hedge agreements. These values reflect a Level 2 measurement under the applicable fair value hierarchy.

The table below presents the amounts of gain (loss) on the interest rate derivative instruments recognized in other comprehensive income (OCI):

| (Dollars in thousands) | 2012 | 2011 |
|--|-----------|-----------|
| Amount of Gain (Loss) Recognized in OCI (net of tax) | | |
| Designated interest rate swaps | \$(3,660) | \$(4,408) |
| Non-designated interest rate swaps (reclassified from accumulated OCI) | 2,984 | — |

The table below presents the amounts of gain (loss) on the interest rate derivative instruments recognized in interest expense and other financing costs:

| | | |
|--|-------------------|------------|
| Amount of Gain (Loss) Recognized in Interest Expense | | |
| Non-designated interest rate swaps | \$ 2,311 | \$— |
| Non-designated interest rate swaps (reclassified from accumulated OCI) | <u>(4,932)</u> | <u>—</u> |
| | <u>\$ (2,621)</u> | <u>\$—</u> |

Foreign Currency Exchange Rate Risk

We have exposure to foreign currency exchange rate fluctuations for revenues generated by our operations outside the United States, which can adversely impact our net income and cash flows. Approximately 7% of our revenues in 2012 were derived from sales to customers in Canada. This business is primarily conducted in the local currency. This exposes us to risks associated with changes in foreign currency that can adversely affect revenues, net income and cash flows. We do not enter into financial instruments to manage this foreign currency exchange risk.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of
Beacon Roofing Supply, Inc.

We have audited the accompanying consolidated balance sheets of Beacon Roofing Supply, Inc. (the Company) as of September 30, 2012 and 2011 and the related consolidated statements of operations, stockholders' equity and comprehensive income, and cash flows for each of the three years in the period ended September 30, 2012. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Beacon Roofing Supply, Inc. at September 30, 2012 and 2011, and the consolidated results of its operations and its cash flows for each of the three years in the period ended September 30, 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Beacon Roofing Supply, Inc.'s internal control over financial reporting as of September 30, 2012, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated November 29, 2012 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

Boston, Massachusetts

Beacon Roofing Supply, Inc.

Notes to Consolidated Financial Statements Year Ended September 30, 2012

(dollars in thousands, except per share data or as otherwise indicated)

1. The Company

Business

Beacon Roofing Supply, Inc. (the “Company”), which was formed on August 22, 1997, distributes roofing materials and other complementary building materials to customers in 38 states and six provinces in Canada and is incorporated in Delaware. The Company operates its business under regional and local trade names. The Company’s current subsidiaries are Beacon Sales Acquisition, Inc., Beacon Canada, Inc. and Beacon Roofing Supply Canada Company.

Estimates

The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities, at the date of the consolidated financial statements. Actual amounts could differ from those estimates.

Adoption of Recent Accounting Pronouncements

In July 2012, the FASB issued Accounting Standards No. 2012-02, *Intangibles — Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment*, which permits an entity the option first to assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount in accordance with Subtopic 350-30. An entity also has the option to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to performing the quantitative impairment test. An entity will be able to resume performing the qualitative assessment in any subsequent period. The Company early adopted this Update for the review of other intangible assets for fiscal year 2012 as described under “Amortizable and Other Intangible Assets” in Note 2.

In September 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards No. 2011-08, *Intangibles — Goodwill and Other (Topic 350): Testing Goodwill for Impairment*, which permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. Previous guidance under Topic 350 required an entity to test goodwill for impairment, on at least an annual basis, by comparing the fair value of a reporting unit with its carrying amount, including goodwill (step one). If the fair value of a reporting unit is less than its carrying amount, then the second step of the test must be performed to measure the amount of the impairment loss, if any. Under the amendments in this Update, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. The Company early adopted this Update for goodwill impairment testing for fiscal year 2011 as described under “Goodwill” in Note 2.

In December 2010, the FASB issued Accounting Standards No. 2010-29, an amendment to *Business Combinations (Topic 805) — Disclosure of Supplementary Pro Forma Information for Business Combinations*, which specifies that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendments in this Update also expand the supplemental pro forma disclosures under Topic 805 to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to

Beacon Roofing Supply, Inc.

Notes to Consolidated Financial Statements Year Ended September 30, 2012

(dollars in thousands, except per share data or as otherwise indicated)

1. The Company – (continued)

the business combination included in the reported pro forma revenue and earnings. The Company adopted this Update for fiscal year 2012 but it did not have an impact on the financial statements.

In December 2010, the FASB issued Accounting Standards No. 2010-28 an amendment to *Intangibles-Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts* (a consensus of the FASB Emerging Issues Task Force). The new guidance modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The qualitative factors are consistent with the existing guidance and examples in paragraph 350-20-35-30, which require that goodwill of a reporting unit be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. The Company's adoption of this amendment for fiscal year 2012 did not have an impact on the financial statements.

In October 2009, the FASB issued ASU 2009-13, *Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements*, which amends the criteria for allocating a contract's consideration to individual services or products in multiple deliverable arrangements. This guidance was effective for the Company beginning in fiscal year 2011 but did not have an impact on the financial statements.

In June 2009, the FASB issued Financial Accounting Statement (FAS) 166, *Accounting for Transfers of Financial Assets*, and FAS 167, *Amendments to FASB Interpretation No. 46(R)*, codified as Accounting Standards Update No. 2009-17 (ASU 2009-17), which changes the way entities account for securitizations and special purpose entities. Both statements were effective for the Company beginning in fiscal year 2011 but did not have an impact on the financial statements.

2. Summary of Significant Accounting Policies

Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All inter-company transactions have been eliminated. Certain reclassifications have been made to the prior year information to conform to the current year presentation.

Fiscal Year

The fiscal years presented are the years ended September 30, 2012 ("2012"), September 30, 2011 ("2011"), and September 30, 2010 ("2010"). Each of the Company's first three quarters ends on the last day of the calendar month.

Industry Segment Information

Based on qualitative and quantitative criteria, the Company has determined that it operates within one reportable segment, which is the wholesale distribution of building materials. Please refer to the "Goodwill" summary below for discussion of the Company's reporting units and the related impairment review.

Cash and Cash Equivalents

The Company considers all highly liquid investments with maturities of three months or less when purchased to be cash equivalents. Cash and cash equivalents also include unsettled credit card transactions. Cash equivalents are comprised of money market funds which invest primarily in commercial paper or bonds with a rating of A-1 or better, and bank certificates of deposit.

Beacon Roofing Supply, Inc.

Notes to Consolidated Financial Statements Year Ended September 30, 2012

(dollars in thousands, except per share data or as otherwise indicated)

2. Summary of Significant Accounting Policies – (continued)

Inventories and Rebates

Inventories, consisting substantially of finished goods, are valued at the lower of cost or market (net realizable value). Cost is determined using the moving weighted-average cost method.

The Company's arrangements with vendors typically provide for rebates after we make a special purchase and/or monthly, quarterly and/or annual rebates of a specified amount of consideration payable when a number of measures have been achieved, generally related to a specified cumulative level of calendar-year purchases. The Company accounts for such rebates as a reduction of the inventory value until the product is sold, at which time such rebates reduce cost of sales in the consolidated statements of operations. Throughout the year, the Company estimates the amount of the periodic rebates based upon the expected level of purchases. The Company continually revises these estimates to reflect actual rebates earned based on actual purchase levels. Amounts due from vendors under these arrangements as of September 30, 2012 and September 30, 2011 totaled \$37.4 and \$31.8 million, respectively, and are included in "Prepaid expenses and other current assets" in the accompanying consolidated balance sheets.

Property and Equipment

Property and equipment acquired in connection with acquisitions are recorded at fair value as of the date of the acquisition and depreciated utilizing the straight-line method over the remaining lives. All other additions are recorded at cost, and depreciation is computed using the straight-line method over the following estimated useful lives:

| Asset | Estimated Useful Life |
|----------------------------|--|
| Buildings and improvements | 10 to 40 years |
| Equipment | 3 to 10 years |
| Furniture and fixtures | 5 to 10 years |
| Leasehold improvements | Shorter of the estimated useful life or the term of the lease, considering renewal options expected to be exercised. |

Revenue Recognition

The Company recognizes revenue when the following four basic criteria are met:

- persuasive evidence of an arrangement exists;
- delivery has occurred or services have been rendered;
- the price to the buyer is fixed or determinable; and
- collectability is reasonably assured.

Based on these criteria, the Company generally recognizes revenue at the point of sale or upon delivery to the customer site. For goods shipped by third party carriers, the Company recognizes revenue upon shipment since the terms are generally FOB shipping point. The Company also arranges for certain products to be shipped directly from the manufacturer to the customer. The Company recognizes the gross revenue for these sales upon notifications of deliveries from the vendors.

The Company also provides certain job site delivery services, which include crane rentals and rooftop deliveries of certain products, for which the associated revenues are recognized upon completion of the services. These revenues represent less than 1% of the Company's sales.

All revenues recognized are net of sales taxes collected, allowances for discounts and estimated returns. Sales taxes collected are subsequently remitted to the appropriate government authorities.

Beacon Roofing Supply, Inc.

Notes to Consolidated Financial Statements Year Ended September 30, 2012

(dollars in thousands, except per share data or as otherwise indicated)

2. Summary of Significant Accounting Policies – (continued)

Shipping and Handling Costs

The Company classifies shipping and handling costs, consisting of driver wages and vehicle expenses, as operating expenses in the accompanying consolidated statements of operations. Shipping and handling costs were approximately \$85,888 in 2012, \$75,172 in 2011, and \$67,528 in 2010.

Financial Derivatives

The Company enters into interest rate swaps to minimize the risks and costs associated with financing activities, as well as to maintain an appropriate mix of fixed-rate and floating-rate debt. The swap agreements are contracts to exchange variable-rate for fixed-interest rate payments over the life of the agreements. The Company's current derivative instruments are designated as cash flow hedges, for which the Company records the effective portions of changes in their fair value, net of tax, in other comprehensive income. The Company recognizes any ineffective portion of the hedges in earnings through interest expense and other financing costs. The Company's refinancing transaction in April 2012 resulted in hedge ineffectiveness on the derivative instruments that expire in April 2013, as the underlying term debt being hedged was repaid before the expiration of the derivative instruments.

Concentrations of Risk

Financial instruments, which potentially subject the Company to concentration of credit risk, consist principally of accounts receivable. The Company's accounts receivable are primarily from customers in the building industry located in the United States and Canada. Concentration of credit risk with respect to accounts receivable is limited due to the large number of customers comprising the Company's customer base. The Company performs credit evaluations of its customers; however, the Company's policy is not to require collateral. At September 30, 2012 and 2011, the Company had no significant concentrations of credit risk.

The Company purchases a major portion of its products from a small number of vendors. Approximately two-thirds of the Company's total cost of inventory purchases was from 12 vendors in 2012, 9 vendors in 2011, and 10 vendors in 2010. In addition, more than 10% of the total cost of purchases was made from each of three vendors in 2012, 2011 and 2010.

Impairment of Long-Lived Assets

Impairment losses are required to be recorded on long-lived assets when indicators of impairment are present and the undiscounted cash flows estimated to be generated by those assets are less than the assets' carrying value. If such assets are considered to be impaired, the impairment to be recognized is the total by which the carrying value exceeds the fair value of the assets.

Amortizable and Other Intangible Assets

The Company amortizes its identifiable intangible assets, currently consisting of non-compete agreements, customer relationships and deferred financing costs, because these assets have finite lives. Non-compete agreements are amortized on a straight-line basis over the terms of the associated contractual agreements; customer relationship assets are amortized on an accelerated basis based on the expected cash flows generated by the existing customers; and deferred financing costs are amortized over the lives of the associated financings. Trademarks are not amortized because they have indefinite lives. The Company evaluates its trademarks for impairment on an annual basis based on the fair value of the underlying assets.

As disclosed in Note 1, in 2012 the Company adopted Accounting Standards No. 2012-02, *Intangibles — Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment*, which permits an entity the option first to assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangible asset is impaired.

Beacon Roofing Supply, Inc.

Notes to Consolidated Financial Statements Year Ended September 30, 2012

(dollars in thousands, except per share data or as otherwise indicated)

2. Summary of Significant Accounting Policies – (continued)

Based on management's 2012 year-end review, the Company concluded that there were no indicators of impairment and therefore it was more likely than not that the fair value of the other intangible assets exceeded the net carrying amount and there was no reason to perform the two-step impairment test as of September 30, 2012. For the evaluation of trademarks, the main factor reviewed was the revenue base, which was relied upon in applying the royalty savings method at inception, to be derived from covered product sales made under the trademarks. The Company also reviewed the latest projected revenues. In addition, there have been no specific events or circumstances that management believes have negatively affected the value of the trademarks.

Goodwill

The Company tests goodwill for impairment in the fourth quarter of each fiscal year or at any other time when impairment indicators exist. Examples of such indicators include a significant change in the business climate, unexpected competition, loss of key personnel or a decline in the Company's market capitalization below the Company's net book value.

As discussed in Note 1, the Company adopted guidance effective for 2011 that permits companies to perform a qualitative assessment based on economic, industry and company-specific factors as the initial step in the annual goodwill impairment test for all or selected reporting units. Based on the results of the qualitative assessment, companies are only required to perform Step 1 of the annual impairment test for a reporting unit if the company concludes that it is more likely than not that the unit's fair value is less than its carrying amount.

To the extent the Company concludes it is more likely than not that a reporting unit's fair value is less than its carrying amount, the two-step approach is applied. The first step would require a comparison of each reporting unit's fair value to the respective carrying value. If the carrying value exceeds the fair value, a second step is performed to measure the amount of impairment loss, if any.

The Company assesses goodwill for impairment at the reporting unit level, which is defined as an operating segment or one level below an operating segment, referred to as a component (i.e. a business for which discrete financial information is available and regularly reviewed by component managers). The Company currently has five components which it evaluates for aggregation.

The Company evaluates the distribution methods, sales mix, and operating results of each of its components to determine if these characteristics have or will be sustained over a long-term basis. For purposes of this evaluation, the Company would expect its components to exhibit similar economic characteristics 3 – 5 years after events such as an acquisition within the Company's core roofing business or management/business restructuring. This evaluation also considers major storm activity or local economic challenges that may impact the short term operations of an individual component. Components that exhibit similar economic characteristic are subsequently aggregated into a single reporting unit. Based on the Company's evaluation at August 31, 2012, one of the five components did not exhibit similar economic characteristics and therefore was individually evaluated for goodwill impairment as a separate reporting unit (the "Individual Reporting Unit"). This was primarily due to the fact that this component had an above-average concentration of residential business that provided gross margin and operating income rates well above the Company average. The remaining components were aggregated into a second reporting unit (the "Aggregated Reporting Unit"). The Individual Reporting Unit represented approximately 11% of the 2012 consolidated operating income, while the Aggregated Reporting Unit comprised the remaining 89%.

The Company concluded that the fair values for both the Aggregated and Individual Reporting Unit more likely than not exceeded their respective carrying values at the goodwill measurement date. This position is consistent with the 2012 operating results in which sales and operating income for the Aggregated Reporting

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements
Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

2. Summary of Significant Accounting Policies – (continued)

Unit exceeded those in the prior year by 16% and 51%, respectively. In addition, sales and operating income for the Individual Reporting Unit exceeded those in the prior year by 4% and 2%, respectively. The Company further expects both the Aggregated and Individual Reporting units to experience moderate growth in the near future. The Company's analysis further noted the total market capitalization exceeded the Company's carrying value by approximate 105% at August 31, 2012. This compares to 62% for that same measure at August 31, 2011. In addition, the Company did not identify any macroeconomic or industry conditions or cost related factors that would indicate the fair values of the two reporting units were more likely than not to be less than their respective carrying values.

Lastly, there have been no events or circumstances since the date of the above assessments that would change the Company's conclusion. If circumstances change or events occur to indicate it is more likely than not that the fair values of any of its reporting units (under the guidelines discussed above) have fallen below their carrying values, the Company would test such reporting units for impairment.

Stock-Based Compensation

The Company accounts for employee and non-employee director stock-based compensation using the fair value method of accounting. Compensation cost arising from stock options and restricted stock awards granted to employees and non-employee directors is recognized using the straight-line method over the vesting period, which represents the requisite service or performance period. In calculating the expense related to stock-based compensation, the Company estimates option forfeitures and projects the number of restricted shares and units that are expected to vest based on the related performance measures.

The Company recorded stock-based compensation expense of \$7.9 million (\$4.8 million net of tax) or \$0.10 per basic share and per diluted share in 2012, \$6.1 million (\$3.7 million net of tax) or \$0.08 per basic share and per diluted share in 2011, and \$5.0 million (\$3.0 million net of tax) or \$0.07 per basic share and per diluted share in 2010. At September 30, 2012, the Company had \$19.0 million of excess tax benefits available for potential deferred tax write-offs related to previously recognized stock-based compensation.

Comprehensive Gain (Loss)

Accumulated other comprehensive gain (loss) consisted of the following:

| | September 30, 2012 | September 30, 2011 |
|---|-----------------------|-----------------------|
| Foreign currency translation adjustment | \$ 9,535 | \$ 4,251 |
| Tax effect | <u>(3,249)</u> | <u>(3,249)</u> |
| Foreign currency translation adjustment, net | 6,286 | 1,002 |
| Unrealized loss on financial derivatives | (6,004) | (7,235) |
| Tax effect | <u>2,344</u> | <u>2,827</u> |
| Unrealized loss on financial derivatives, net | <u>(3,660)</u> | <u>(4,408)</u> |
| Accumulated other comprehensive gain (loss) | <u>\$ 2,626</u> | <u>\$(3,405)</u> |

See also Note 12 for discussion of the Company's CFC election and the impact on the comprehensive loss in 2011.

Net Income per Share

Basic net income per common share is computed by dividing net income by the weighted average number of common shares outstanding. Diluted net income per common share is computed by dividing net income by the weighted average number of common shares and dilutive common share equivalents then outstanding using the treasury stock method. Common equivalent shares consist of the incremental common shares issuable upon the exercise of stock options.

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements
Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

2. Summary of Significant Accounting Policies – (continued)

The following table reflects the calculation of weighted average shares outstanding for each period presented:

| | Year Ended September 30, | | |
|---|--------------------------|------------|------------|
| | 2012 | 2011 | 2010 |
| Weighted-average common shares outstanding | | | |
| for basic | 46,718,948 | 45,919,198 | 45,480,922 |
| Dilutive effect of stock options | 1,122,019 | 833,954 | 550,671 |
| Weighted-average shares assuming dilution | 47,840,967 | 46,753,152 | 46,031,593 |

Fair Value of Financial Instruments

Financial instruments consist mainly of cash and cash equivalents, accounts receivable, accounts payable, borrowings under the Company’s revolving lines of credit and long-term debt. Except for the long-term debt, these instruments are short-term in nature, and there is currently no known trading market for the Company’s debt. Therefore, at September 30, 2012 and 2011, the Company believes the carrying amounts of its financial instruments approximated their fair values. Please refer to Note 17 for disclosures of the Company’s financial derivatives that are recorded at fair value. The Company recorded the estimated fair value of contingent consideration as reported in Note 4 based on expected likelihood of such payments under various scenarios. Subsequent changes in fair value were recorded in the Company’s consolidated statements of operations.

Income Taxes

The Company accounts for income taxes using the liability method, which requires it to recognize a current tax liability or asset for current taxes payable or refundable and a deferred tax liability or asset for the estimated future tax effects of temporary differences between the financial statement and tax reporting bases of assets and liabilities to the extent that they are realizable. Deferred tax expense (benefit) results from the net change in deferred tax assets and liabilities during the year. See Note 12 for a discussion of the 2011 impact from a change in the tax status of the Company’s Canadian operations.

FASB ASC Topic 740 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Based on this guidance, the Company analyzes its filing positions in all of the federal and state jurisdictions where it is required to file income tax returns, as well as all open tax years in these jurisdictions. Tax benefits from uncertain tax positions are recognized if it is more likely than not that the position is sustainable based solely on its technical merits.

Foreign Currency Translation

The assets and liabilities of the Company’s foreign regions, Beacon Roofing Supply Canada Company (“BRSCC”) and Enercon Products (“Enercon”), are translated into U.S. dollars at current exchange rates as of the balance sheet date, and revenues and expenses are translated at average monthly exchange rates. Net unrealized translation gains or losses associated with the Canadian net assets are recorded directly to a separate component of stockholders’ equity, net of the related deferred taxes prior to 2011 (see Note 12). Realized gains and losses from foreign currency transactions were not material for any of the periods presented. The Company has inter-company receivables from both BRSCC and Enercon, for which the short-term portion is marked to market each period with a corresponding entry recorded as a component of the consolidated statement of operations. Since repayment of the long-term portion is not planned or anticipated in the foreseeable future, the long-term balances are marked to market each period with a corresponding entry recorded as a separate component of stockholders’ equity.

2. Summary of Significant Accounting Policies – (continued)

Recent Accounting Pronouncements

In October 2012, the FASB issued Accounting Standards No. 2012-04 — *Technical Corrections and Improvements*, which includes certain corrections to the Accounting Standards Codification and amendments that identify when the use of fair value should be linked to the definition of fair value in Topic 820, *Fair Value Measurement*. This Update contains conforming amendments to the Codification to reflect the measurement and disclosure requirements of Topic 820. The amendments in this Update that will not have transition guidance are effective upon issuance. The amendments that are subject to the transition guidance will be effective for fiscal years beginning after December 15, 2012. This new guidance may only affect the way in which the Company references and reports accounting and reporting standards.

In December 2011, the FASB issued Accounting Standards No. 2011-11, *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities*, which requires an entity to disclose certain information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. An entity is required to apply the amendments in this Update for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. The Company does not expect the adoption of this Update to have an impact on the financial statements.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, which provides an entity with the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In a single continuous statement, the entity is required to present the components of net income and total net income, the components of other comprehensive income and a total for other comprehensive income, along with the total of comprehensive income in that statement. In the two-statement approach, an entity is required to present components of net income and total net income in the statement of net income. The statement of other comprehensive income should immediately follow the statement of net income and include the components of other comprehensive income and a total for other comprehensive income, along with a total for comprehensive income. These changes apply to both annual and interim financial statements. The amendments in ASU 2011-05 should be applied retrospectively. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, however Accounting Standards No. 2011-12, issued by the FASB in December 2011, has deferred the effective date of the portions of this Update that relate to the presentation of reclassification adjustments. Early adoption is permitted. The Company does not currently expect the adoption of ASU 2011-05 to have a significant impact on its financial position and results of operations.

In May 2011, the FASB issued ASU 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*, which changes the wording used to describe the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. ASU 2011-04 is effective for interim and annual periods beginning after December 15, 2011, and should be applied prospectively. Early adoption is not permitted. The Company does not currently expect the adoption of this standard to have a significant impact on the financial statements.

3. Goodwill, Intangibles and Other Assets

Goodwill was \$443,161 and \$380,916 at September 30, 2012 and 2011, respectively, of which \$300,772 and \$235,582 can be amortized for income tax purposes, respectively. The Company's goodwill increased by \$62,242 in 2012, due to goodwill associated with acquisitions of \$59,943 and a gain from foreign currency translation of \$2,299, after increases of \$17,752 due to acquisitions and a decline of \$1,897 from foreign currency translation in 2011.

Intangibles and other assets, included in other long-term assets, consisted of the following:

| | September 30, 2012 | September 30, 2011 |
|--|-----------------------|-----------------------|
| Amortizable intangible assets | | |
| Non-compete agreements | \$ 8,062 | \$ 6,847 |
| Customer relationships | 138,473 | 98,538 |
| Beneficial lease arrangements | 610 | 610 |
| Deferred financing costs | 5,886 | 7,510 |
| | 153,031 | 113,505 |
| Less: accumulated amortization | 81,008 | 76,105 |
| | 72,023 | 37,400 |
| Unamortizable trademarks | 9,750 | 9,750 |
| Other assets | 3,897 | 2,606 |
| Total other assets, net | \$ 85,670 | \$ 49,756 |

Amortization expense related to intangible assets amounted to approximately \$9,829, \$9,442, and \$10,696 in 2012, 2011, and 2010, respectively. The intangible lives range from one to fifteen years and the weighted average remaining life was 12.2 years at September 30, 2012. Estimated future annual amortization for the above intangible assets as of September 30, 2012 is as follows:

| Year ending September | Future Amortization |
|-------------------------------------|------------------------|
| 2013 | \$12,074 |
| 2014 | 11,971 |
| 2015 | 10,292 |
| 2016 | 8,514 |
| 2017 | 6,601 |
| Thereafter | 22,571 |
| Total future amortization | \$72,023 |

4. Acquisitions

In 2012, the Company acquired twenty-two branches from the five following acquisitions at a total cost of \$141.1 million, with resulting goodwill of \$59.9 million:

- In August 2012, the Company purchased certain assets of Contractors Roofing & Supply Co. ("CRS"), a distributor of residential roofing products and related accessories. CRS has one location in the St. Louis suburb of O'Fallon, MO and recent annual sales of approximately \$14 million.

Beacon Roofing Supply, Inc.

Notes to Consolidated Financial Statements Year Ended September 30, 2012

(dollars in thousands, except per share data or as otherwise indicated)

4. Acquisitions – (continued)

- In July 2012, the Company purchased certain assets of Structural Materials Co. (“Structural”), a distributor of residential and commercial roofing products and related accessories headquartered in Santa Ana, CA. Structural has six locations in Los Angeles and Orange Counties and in the surrounding areas, with recent annual sales of approximately \$81 million in 2011. Shortly after the Structural acquisition, the Company terminated two members of Structural’s management, with whom the Company had entered into employment agreements, and established a liability for the resulting termination benefits and related payroll taxes that are being paid over five years. The associated charge of approximately \$2 million was recorded in the fourth quarter of 2012 and included in operating expenses.
- In June 2012, the Company purchased certain assets of Cassady Pierce Company (“Cassady Pierce”), a distributor of residential and commercial roofing products and related accessories headquartered in Pittsburgh, Pa. Cassady Pierce has six locations in the Pittsburgh area and recent annual sales of approximately \$52 million.
- In November 2011, the Company purchased all of the stock of Fowler & Peth, Inc. (“F&P”), a distributor of residential and commercial roofing products and related accessories. F&P has five branches in Colorado, two in Wyoming and one in Nebraska, with recent annual sales of approximately \$60 million. The Company and the selling stockholders mutually agreed to file a Section 338 election with the Internal Revenue Service to treat the transaction for tax purposes as an asset purchase.
- In October 2011, the Company purchased all of the stock of CCP Atlantic Specialty Products, Inc. d/b/a The Roofing Connection, a distributor of mostly residential roofing products and related accessories with one location in Dartmouth, Nova Scotia, a suburb of Halifax.

In connection with the above acquisitions, the Company incurred legal fees of approximately \$1 million that were included in operating expenses in 2012. The total aggregate impact of the above acquisitions on the 2012 operating results was not considered material for the reporting of pro forma financial information.

In May 2011, the Company purchased all of the stock of Enercon Products (“Enercon”) for \$39.8 million, including an earn-out amount of \$4.9 million discussed herein. The purchase allocation resulted in goodwill of \$17.1 million. Enercon is a roofing distributor with six locations in Western Canada. Headquartered within its branch in Edmonton, Enercon also has branches in Calgary, Regina and Saskatoon and two branches in Vancouver and generated annual sales of approximately \$45 million in 2010. The purchase price included an additional payout of up to approximately \$5.5 million if certain earn-out targets (based on defined EBITDA) were met for the twelve-month period ended in May 2012. An earn-out payout of \$4.9 million, \$0.3 million in excess of the September 30, 2011 liability, was made in July 2012. The additional expense was included in operating expenses.

A total of \$7.5 million of the acquisition prices for the above acquisitions remained in escrow at September 30, 2012, primarily for purchase price adjustments and post-closing indemnification claims, with \$4.9 million included in other current assets and accrued expenses and \$2.6 million included in other long-term assets and liabilities.

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements
Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

5. Prepaid Expenses and Other Current Assets

The significant components of prepaid expenses and other current assets were as follows:

| | <u>September 30, 2012</u> | <u>September 30, 2011</u> |
|-----------------------------------|-------------------------------|-------------------------------|
| Vendor rebates | \$37,398 | \$31,811 |
| Refundable income taxes | 12,314 | — |
| Other | <u>10,575</u> | <u>5,762</u> |
| | <u>\$60,287</u> | <u>\$37,573</u> |

6. Property and Equipment, net

Property and equipment, net, consisted of the following:

| | <u>September 30, 2012</u> | <u>September 30, 2011</u> |
|---|-------------------------------|-------------------------------|
| Land | \$ 3,317 | \$ 3,051 |
| Buildings and leasehold improvements | 24,066 | 20,948 |
| Equipment | 132,715 | 117,566 |
| Furniture and fixtures | <u>12,370</u> | <u>11,567</u> |
| | 172,468 | 153,132 |
| Less: accumulated depreciation and amortization | <u>115,092</u> | <u>105,705</u> |
| | <u>\$ 57,376</u> | <u>\$ 47,427</u> |

Depreciation and amortization of property and equipment totaled \$14,524, \$15,618 and \$17,077 in 2012, 2011 and 2010, respectively.

7. Accrued Expenses

The significant components of accrued expenses were as follows:

| | <u>September 30, 2012</u> | <u>September 30, 2011</u> |
|--|-------------------------------|-------------------------------|
| Uninvoiced inventory receipts | \$ 9,307 | \$12,635 |
| Employee-related accruals | 26,752 | 21,082 |
| Income taxes payable | — | 2,624 |
| Unrealized loss on financial derivatives | 8,626 | 7,235 |
| Other | <u>26,942</u> | <u>26,330</u> |
| | <u>\$71,627</u> | <u>\$69,906</u> |

8. Financing Arrangements

Senior Secured Credit Facility

On April 5, 2012, the Company replaced the Prior Credit Facility (see below) with a new five-year senior secured credit facility that includes a \$550 million U.S. credit facility and a C\$15 million (\$14.7 million) Canadian credit facility with Wells Fargo Bank, National Association, and a syndicate of other lenders (combined, the “Credit Facility”). The Company paid off the outstanding debt of \$304.0 million under the Prior Credit Facility with the proceeds from the Credit Facility and from approximately \$79 million of cash on hand. In the third quarter of 2012, the Company recorded a charge of approximately \$1.2 million (\$0.7 million net of tax), included in interest expense and other financing costs, associated with this transaction. In addition, this transaction impacted the effectiveness of the Company’s interest rate swaps existing as of the refinancing date as discussed in Note 17.

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements
Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

8. Financing Arrangements – (continued)

The \$550 million U.S credit facility consists of a revolving credit facility of \$325 million (the “U.S. Revolver”), which includes a sub-facility of \$20 million for letters of credit, and a \$225 million term loan (the “Term Loan”). The Term Loan has required amortization of 5% per year that is payable in quarterly installments, with the balance due in full on March 31, 2017. We may increase the Credit Facility by up to \$200 million under certain conditions. There was \$41.3 and \$219.4 million outstanding under the U.S. Revolver and Term Loan, respectively, at September 30, 2012. There were \$5.5 million of outstanding standby letters of credit at September 30, 2012.

Interest

Borrowings under the Credit Facility carry interest at a margin above the LIBOR Rate. The current margin is 1.75% per annum and can range from 1.50% to 2.50% per annum depending upon our Consolidated Total Leverage Ratio, as defined in the Credit Facility. The Credit Facility also provides for a US base rate, defined in the agreement as the higher of the Prime Rate, or the Federal Funds Rate plus 0.50%, plus a margin above that rate. In addition, borrowings are permitted under the Canadian credit facility under a base rate, defined in the agreement as the higher of the Canadian Prime Rate, or the annual rate of interest equal to the sum of the CDOR rate plus 1.0%, plus a margin above that rate. The current margin for both base rates is 0.75% per annum and can range from .50% to 1.50% per annum depending upon our Consolidated Total Leverage Ratio, as defined in the Credit Facility. Current unused commitment fees on the revolving credit facilities are 0.375% per annum. The unused commitment fees can range from 0.35% to 0.50% per annum, again depending upon our Consolidated Total Leverage Ratio.

The outstanding borrowings under the U.S. Revolver at September 30, 2012 carried an interest rate of LIBOR plus 1.75% (2.0% at September 30, 2012) for \$35.0 million and the remainder at the base rate (4.0%). There were no outstanding borrowings under the Canadian revolver. The Term Loan balance carried an interest rate of LIBOR plus 1.75% (2.0% at September 30, 2012).

Financial covenants under the Credit Facility are as follows:

Maximum Consolidated Total Leverage Ratio

On the last day of each fiscal quarter, the Company’s Consolidated Total Leverage Ratio (the ratio of our outstanding debt to our trailing twelve-month earnings before interest, income taxes, depreciation, amortization and stock-based compensation), as more fully defined in the Credit Facility, must not be greater than 3.50:1.0 or 4.00:1.0 under a one-time request subsequent to an acquisition. At September 30, 2012, this ratio was 1.55:1.

Minimum Consolidated Interest Coverage Ratio

On the last day of each fiscal quarter, the Company’s Consolidated Interest Coverage Ratio (the ratio of our trailing twelve-month earnings before interest, income taxes, depreciation, amortization and stock-based compensation to our cash interest expense for the same period), as more fully defined in the Credit Facility, must not be less than 3.00:1.0. At September 30, 2012, this ratio was 15.74:1.

As of September 30, 2012, the Company was in compliance with these covenants. Substantially all of the Company’s assets, including the capital stock and assets of wholly-owned subsidiaries, secure obligations under the Credit Facility.

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements
Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

8. Financing Arrangements – (continued)

Senior Notes Payable

Senior notes payable under the Term Loan consisted of the following:

| | <u>September 30, 2012</u> | <u>September 30, 2011</u> |
|--|-------------------------------|-------------------------------|
| Senior notes payable to commercial lenders, due in equal quarterly payments of principal of \$0.8 million with the remainder due in 2013, plus required prepayment amounts and interest at the base rate, as defined, plus 0.75% or LIBOR plus 2.0% (approximately 2.24% at September 30, 2011) through September 2013 | \$ — | \$311,826 |
| Senior notes payable to commercial lenders, due in equal quarterly payments of principal of \$2.8 million with the remainder due in 2017, plus interest at the higher of the prime rate or the Federal Funds Rate plus 0.50%, plus a margin rate (4.00% at September 30, 2012) or LIBOR plus 1.75% (1.97% at September 30, 2012) | 219,375 | — |
| Less current portion | <u>11,250</u> | <u>10,282</u> |
| | <u>\$208,125</u> | <u>\$301,544</u> |

Prior Credit Facility

On November 2, 2006, the Company entered into an amended and restated seven-year \$500 million U.S. senior secured credit facility and a C\$15 million senior secured Canadian credit facility with GE Antares Capital (“GE Antares”) and a syndicate of other lenders (combined, the “Prior Credit Facility”). The Prior Credit Facility provided for a cash receipts lock-box arrangement that gave the Company sole control over the funds in lock-box accounts, unless excess availability was less than \$10 million or an event of default occurred, in which case the senior secured lenders would have had the right to take control over such funds and to apply such funds to repayment of the senior debt.

The Prior Credit Facility consisted of a U.S. revolving credit facility providing up to \$150 million, which included a sub-facility of \$20 million for letters of credit, and a term loan with an initial principal amount of \$350 million term loan (the “Prior Term Loan”). The Prior Credit Facility also included a C\$15 million senior secured revolving credit facility provided by GE Canada Finance Holding Company. The Prior Term Loan required amortization of 1% per year, payable in quarterly installments of approximately \$0.8 million, and the remainder was scheduled to be due in 2013. The Prior Credit Facility could have also been expanded by up to an additional \$200 million under certain conditions. There were \$4.6 million of outstanding standby letters of credit at both September 30, 2011 and September 30, 2010.

There were mandatory prepayments under the Prior Credit Facility under certain conditions, including the following cash flow condition:

Excess Cash Flow

By May 15 of each fiscal year, the Company was required to pay an amount equal to 50% of the Excess Cash Flow (as defined in the Prior Credit Facility) for the prior fiscal year, not to exceed \$7.0 million with respect to any fiscal year. Based on results for fiscal year 2011, a required payment of \$7.0 million was due by May 2012 and was paid in January 2012. A payment of \$7.0 million was also made in January 2011 for fiscal year 2010. The amount payable under this provision as of September 30, 2011 was classified as short-term debt.

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements
Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

8. Financing Arrangements – (continued)

Equipment Financing Facilities

As of September 30, 2012, there was a total of \$11.2 million outstanding under prior equipment financing facilities, with fixed interest rates ranging from 3.3% to 7.1% and payments due through September 2017.

Subsequent to September 30, 2012, the Company entered into a new two-year equipment financing facility that provides financing for up to \$30 million of purchased transportation and material handling equipment through October 1, 2014. The applicable interest rate at the time of the advances will be approximately 1.26% above the 3-year term swap rate for 5-year loans and 1.21% above the 4-year term swap rate for 7-year loans.

Other Information

Annual principal payments for all outstanding borrowings for each of the next five years and thereafter as of September 30, 2012 were as follows:

| Fiscal year | Senior Secured Credit Facility | Equipment Financing | Revolving Lines of Credit | Total |
|----------------------|--------------------------------|---------------------|---------------------------|------------------|
| 2013 | \$ 11,250 | \$ 4,382 | \$41,300 | \$ 56,932 |
| 2014 | 11,250 | 3,386 | — | 14,636 |
| 2015 | 11,250 | 1,542 | — | 12,792 |
| 2016 | 11,250 | 1,062 | — | 12,312 |
| 2017 | 174,375 | 860 | — | 175,235 |
| Thereafter | — | — | — | — |
| Subtotal | 219,375 | 11,232 | 41,300 | 271,907 |
| Less current portion | 11,250 | 4,382 | 41,300 | 56,932 |
| Total long-term debt | <u>\$208,125</u> | <u>\$ 6,850</u> | <u>\$ —</u> | <u>\$214,975</u> |

9. Leases

The Company mostly operates in leased facilities, which are accounted for as operating leases. The leases typically provide for a base rent plus real estate taxes. Certain of the leases provide for escalating rents over the lives of the leases and rent expense is recognized over the terms of those leases on a straight-line basis. The Company leases two buildings from a limited liability entity that is partly owned by one of the Company's former directors (Note 13) who retired during 2012.

At September 30, 2012, the minimal rental commitments under all non-cancelable operating leases with initial or remaining terms of more than one year were as follows:

| Year ending September | Operating Leases |
|------------------------------|------------------|
| 2013 | 28,549 |
| 2014 | 26,178 |
| 2015 | 20,542 |
| 2016 | 13,787 |
| 2017 | 6,845 |
| Thereafter | 3,717 |
| Total minimum lease payments | <u>\$99,618</u> |

Rent expense was \$28,860 in 2012, \$26,049 in 2011 and \$25,227 in 2010. Sublet income was immaterial for these years.

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements
Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

10. Stock Options and Restricted Stock Awards

The Company is currently making stock-based awards under its 2004 Stock Plan, which was adopted on September 21, 2004 and most recently amended and restated on February 8, 2011 (the “Plan”). The Plan allows for the granting of up to 7,800,000 shares of Common Stock in the form of stock options or stock awards to key employees and members of the Board of Directors. The key terms of the grants are determined by the Company’s Board of Directors. As of September 30, 2012, there were 2,134,515 shares of common stock available for awards under the Plan.

The 1998 Stock Plan allowed for the granting of options to purchase up to 3,100,000 shares of Common Stock. These options were generally allowed to be exercised beginning 18 months after the date of grant and terminate ten years from the grant date. No further awards will be made under the 1998 Stock Plan.

Stock Options

As of September 30, 2012, there was \$6.3 million of total unrecognized compensation cost related to unvested stock options. That cost is expected to be recognized over a weighted-average period of 2.0 years. Except under certain conditions, the options are subject to continued employment and vest in one-third increments over a three-year period following the grant dates.

The fair values of the options were estimated on the dates of grants using the Black-Scholes option-pricing model with the following weighted-average assumptions:

| | Year Ended September 30, | | |
|--|--------------------------|---------|---------|
| | 2012 | 2011 | 2010 |
| Dividend yield | — | — | — |
| Expected life in years | 6.5 | 7.0 | 7.0 |
| Risk-free interest rate | 0.94% | 1.51% | 2.45% |
| Expected volatility | 47.00% | 48.00% | 48.00% |
| Weighted average fair value of options granted | \$ 8.78 | \$ 7.82 | \$ 7.60 |

Expected lives of the options granted are based primarily on historical activity, while expected volatilities are based on historical volatilities of the Company’s stock and consideration of comparable public companies’ stock. Estimated forfeiture rates vary by grant and range up to 8.0% as of September 30, 2012.

In the event of a change in control of the Company, all outstanding options are immediately vested.

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements

(dollars in thousands, except per share data or as otherwise indicated)

10. Stock Options and Restricted Stock Awards – (continued)

Information regarding the Company's stock options is summarized below (not in thousands):

| | Number of Shares | Weighted- Average Exercise Price | Weighted- Average Remaining Contractual Life | Aggregate Intrinsic Value |
|--|---------------------|---|--|---------------------------------|
| | | | | (in Millions) |
| Outstanding at September 30, 2009 | 3,417,754 | \$13.70 | | |
| Granted | 862,114 | 14.64 | | |
| Exercised | (419,021) | 8.50 | | |
| Canceled | (87,115) | 17.47 | | |
| Outstanding at September 30, 2010 | 3,773,732 | 14.41 | | |
| Granted | 701,249 | 15.57 | | |
| Exercised | (490,249) | 10.81 | | |
| Canceled | (89,149) | 14.91 | | |
| Outstanding at September 30, 2011 | 3,895,583 | 15.06 | | |
| Granted | 789,332 | 18.78 | | |
| Exercised | (1,508,544) | 14.24 | | |
| Canceled | (109,291) | 16.65 | | |
| Outstanding at September 30, 2012 | <u>3,067,080</u> | \$16.36 | 6.7 | \$37.2 |
| Vested or Expected to Vest at September 30, 2012 | <u>2,965,126</u> | \$16.34 | 6.6 | \$36.0 |
| Exercisable at September 30, 2012 | <u>1,639,927</u> | \$15.73 | 5.1 | \$20.9 |

The aggregate intrinsic values above include only in-the-money options. The intrinsic values of stock options exercised during 2012 and 2011 were \$17.1 million and \$4.5 million, respectively.

Details regarding options to purchase common stock outstanding as of September 30, 2012 were as follows:

| Options Outstanding | Range of Exercise Prices | Weighted- Average Remaining Contractual Life in Years | Options Exercisable |
|------------------------|-----------------------------|---|------------------------|
| 16,105 | \$1.87 – \$2.33 | 1.1 | 16,105 |
| 45,000 | 8.04 | 5.1 | 45,000 |

| 7,500 | \$19.02 – \$21.74 | 8.1 | 3,334 |
| 373,295 | \$21.74 – \$24.45 | 3.9 | 373,295 |
| 30,750 | \$24.45 – \$27.17 | 5.0 | 23,250 |
| <u>3,067,080</u> | | | <u>1,639,927</u> |

Special CEO Options Grant

The Company granted stock options to its former President and Chief Executive Officer (CEO) in October 2003 under an executive securities agreement. The grant, as amended, included options to purchase

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements
Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

10. Stock Options and Restricted Stock Awards – (continued)

612,366 shares of common stock at the then fair value and was scheduled to vest over two years. These options were not granted under the Company's 1998 Stock Plan or 2004 Stock Plan. Options to purchase 42,366 shares under this grant were exercised in 2010 and 570,000 shares prior to 2010, leaving none outstanding under the special CEO grant at September 30, 2012 or 2011.

Restricted Stock Awards

As of September 30, 2012, there was \$2.7 million of total unrecognized compensation cost related to unvested restricted stock awards. That cost is expected to be recognized over a weighted-average period of 1.9 years.

The total fair values of the restricted stock awards were determined based upon the number of shares or units and the closing prices of the Company's common stock on the dates of the grants. The restricted stock awards granted to management are subject to continued employment, except under certain conditions, and will vest if the Company attains a targeted rate of return on invested capital at the end of a three-year period. The actual number of shares or units that will vest can range from 0% to 125% of the management grants depending upon actual Company performance below or above the target level and the Company estimates that performance in determining the projected number of shares or units that will vest and the related compensation cost. The restricted stock awards granted to non-employee directors are also subject to continued service, vest at the end of one year (except under certain conditions) and the underlying common shares will not be distributed until six months after the director separates from the Company.

Information regarding the Company's restricted shares and units is summarized below (not in thousands):

| | Number of Shares | Weighted- Average Grant Price | Weighted- Average Remaining Contractual Life (in Years) | Aggregate Intrinsic Value (in Millions) |
|--|---------------------|-------------------------------------|--|--|
| Outstanding at September 30, 2010 | — | | | |
| Granted | 135,009 | \$16.70 | | |
| Vested | — | | | |
| Canceled | — | | | |
| Outstanding at September 30, 2011 | 135,009 | 16.70 | | |
| Granted | 148,100 | 20.26 | | |
| Vested | (4,496) | 20.02 | | |
| Canceled | — | — | | |
| Outstanding at September 30, 2012 | <u>278,613</u> | \$18.54 | 2.9 | \$7.9 |
| Vested or Expected to Vest at September 30, 2012 | <u>278,613</u> | \$18.54 | 2.9 | \$7.9 |

The Company granted 654,232 additional options and 109,017 restricted stock units under the Plan to management in November 2012.

11. Benefit Plans

The Company maintains defined contribution plans covering all full-time employees of the Company who have 90 days of service and are at least 21 years old. An eligible employee may elect to make a before-tax contribution of between 1% and 100% of his or her compensation through payroll deductions, not to exceed the annual limit set by law. The Company currently matches the first 50% of participant contributions limited to 6% of a participant's gross compensation (maximum Company match is 3%). Additional amounts associated with profit sharing were contributed in the three years presented and are scheduled to be

Beacon Roofing Supply, Inc.

Notes to Consolidated Financial Statements
Year Ended September 30, 2012

(dollars in thousands, except per share data or as otherwise indicated)

11. Benefit Plans – (continued)

contributed in fiscal year 2013 for 2012 as well. All Company contributions are subject to the discretion of management and the board of directors. The combined total expense for this plan and a similar plan for Canadian employees was \$7,094, \$6,165 and \$4,172 in 2012, 2011 and 2010, respectively.

The Company also contributes to an external pension fund for certain of its employees who belong to a local union. Annual contributions were \$125, \$146 and \$91 in 2012, 2011, and 2010, respectively.

12. Income Taxes

The income tax provision consisted of the following:

| | Fiscal year | | |
|---------------|-----------------|-----------------|-----------------|
| | 2012 | 2011 | 2010 |
| Current: | | | |
| Federal | \$34,070 | \$24,919 | \$13,369 |
| Foreign | 860 | 1,523 | 1,615 |
| State | 8,304 | 5,181 | 2,737 |
| | <u>43,234</u> | <u>31,623</u> | <u>17,721</u> |
| Deferred: | | | |
| Federal | 6,166 | (296) | 2,153 |
| Foreign | 471 | — | (17) |
| State | 1,063 | (169) | 925 |
| | <u>7,700</u> | <u>(465)</u> | <u>3,060</u> |
| | <u>\$50,934</u> | <u>\$31,158</u> | <u>\$20,781</u> |

The following table shows the principal reasons for the differences between the effective income tax rate and the statutory federal income tax rate:

| | Fiscal Year | | |
|--|---------------|---------------|---------------|
| | 2012 | 2011 | 2010 |
| Federal income taxes at statutory rate | 35.00% | 35.00% | 35.00% |
| State income taxes, net of federal benefit | 4.84 | 4.42 | 3.42 |
| Foreign income taxes | (0.09) | (0.33) | (0.17) |
| Change in tax status of foreign entity | — | (6.11) | — |
| Non-deductible meals and entertainment | 0.27 | 0.27 | 0.41 |
| Tax reserves | — | (0.28) | (1.41) |
| Other | 0.24 | 1.50 | 0.34 |
| Total | <u>40.26%</u> | <u>34.47%</u> | <u>37.57%</u> |

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements
Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

12. Income Taxes – (continued)

The components of the Company’s deferred taxes were as follows:

| | September 30, 2012 | September 30, 2011 |
|--|-----------------------|-----------------------|
| Deferred tax liabilities: | | |
| Excess tax over book depreciation and amortization | \$55,413 | \$48,288 |
| Other | 600 | 553 |
| | 56,013 | 48,841 |
| Deferred tax assets: | | |
| Deferred compensation | 8,365 | 9,848 |
| Allowance for doubtful accounts | 5,337 | 5,306 |
| Accrued vacation & other | 3,439 | 2,223 |
| Unrealized loss on financial derivatives | 3,373 | 2,827 |
| Inventory valuation | 3,390 | 5,113 |
| | 23,904 | 25,318 |
| Net deferred income tax liabilities | \$32,109 | \$23,523 |

In 2011, the Company’s request to have its Canadian subsidiary (Beacon Roofing Supply Canada Company or “BRSCC”) treated as a Controlled Foreign Corporation (“CFC”), retroactive to October 1, 2009, was approved by the IRS. BRSCC was previously treated as a “pass-through” or disregarded entity for U.S. federal income tax purposes. Subsequent to October 1, 2009, BRSCC’s taxable income, which reflects all of the Company’s Canadian operations, is being taxed only in Canada and would generally be taxed in the U.S. only upon an actual or deemed distribution. The Company expects that BRSCC’s earnings, which includes the earnings of Enercon Products for tax purposes, will be indefinitely reinvested for the foreseeable future and therefore no U.S. deferred tax asset or liability for the differences between the book basis and the tax basis of BRSCC has been recorded at September 30, 2012. In connection with this change in the indefinite reinvestment assertion, the Company recorded a reversal of a deferred tax liability of \$3.2 million in 2011 previously reported as a component of other comprehensive income. The reversal was recorded in that year’s earnings as backwards tracing of such amounts to other comprehensive income is prohibited. Unremitted earnings of \$31.0 million were considered permanently reinvested at September 30, 2012. These earnings were previously taxed in the U.S. and remittance would not generate additional US tax.

ASC 740 provides that the effect of an election for a voluntary change in tax status is recognized for accounting purposes on the approval date. Therefore all of the associated adjustments to the Company’s income tax accounts for the above approved election were recorded in the fourth quarter of 2011, including the adjustments resulting from a lower Canadian tax rate compared to the U.S. tax rate in 2011 and 2010. Deferred assets and liabilities that were recorded over the time BRSCC was treated as a pass-through entity were derecognized and the resulting impact was included in income from continuing operations, including items previously reported in other financial statement components (such as in other comprehensive income as noted above).

As of September 30, 2012, there were available tax benefits totaling \$288 related to foreign tax credit carryforwards, most of which expire in fiscal year 2019. The Company has recorded a valuation allowance to fully reserve for this amount since it is more likely than not that this deferred tax asset will not be realized due to the change discussed above. As of September 30, 2011, there were available tax benefits totaling \$466 related to foreign tax credit carryforwards and there was a valuation allowance to fully reserve for that amount.

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements
Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

12. Income Taxes – (continued)

As of September 30, 2012, there were no uncertain tax positions which, if recognized, would affect the Company's effective tax rate. The Company's continuing practice is to recognize any interest and penalties related to income tax matters in income tax expense in the consolidated statements of operations. There were no accrued interest and penalty amounts resulting from unrecognized tax benefits at September 30, 2012. A reconciliation of the beginning and ending amounts of the gross unrecognized income tax benefits is as follows:

| | <u>2012</u> | <u>2011</u> |
|---|-------------|--------------|
| Balance, beginning of year | \$ 57 | \$ 432 |
| Current year uncertain tax positions | — | — |
| Expiration of statutes of limitations | (57) | (375) |
| Balance, end of year | <u>\$ —</u> | <u>\$ 57</u> |

In 2012, 2011, and 2010, the Company had reductions in income taxes payable of \$6,698, \$1,782 and \$1,559, respectively, as a result of stock option exercises.

The Company has operations in 38 U.S. states and six provinces in Canada and is subject to tax audits in each of these jurisdictions and federally in both the United States and Canada. These audits may involve complex issues, which may require an extended period of time to resolve. The Company has provided for its estimate of taxes payable in the accompanying financial statements. Additional taxes are reasonably possible, however the amounts cannot be estimated at this time. The Company is no longer subject to U.S. federal tax examinations for fiscal years prior to 2009. For the majority of states, the Company is also no longer subject to tax examinations for fiscal years before 2009. In Canada, the Company is no longer subject to tax examinations for fiscal years prior to 2007. For the Canadian provinces, the Company is no longer subject to tax examinations for fiscal years before 2009.

13. Related-Party Transactions

The Company leases two buildings from a limited liability entity that is partly owned by one of the Company's former directors for an aggregate expense of approximately \$0.4 million in 2012, 2011 and 2010. This director retired during 2012. The former director's interest in the dollar value of these lease arrangements was approximately 32% at September 30, 2011, prior to his retirement.

14. Contingencies

The Company is subject to loss contingencies pursuant to various federal, state and local environmental laws and regulations; however, the Company is not aware of any reasonably possible losses that would have a material impact on its results of operations, financial position, or liquidity. Potential loss contingencies include possible obligations to remove or mitigate the effects on the environment of the placement, storage, disposal or release of certain chemical or other substances by the Company or by other parties. In connection with its acquisitions, the Company has been indemnified for any and all known environmental liabilities as of the respective dates of acquisition. Historically, environmental liabilities have not had a material impact on the Company's results of operations, financial position or liquidity.

The Company is subject to litigation from time to time in the ordinary course of business; however the Company does not expect the results, if any, to have a material adverse impact on its results of operations, financial position or liquidity.

Beacon Roofing Supply, Inc.

15. Geographic and Product Data

The Company's geographic and product information was as follows:

| | Year Ended September 30, | | | | | | | | |
|------------------------|--------------------------|---------------------|-----------------------------|--------------------|---------------------|-----------------------------|--------------------|---------------------|-----------------------------|
| | 2012 | | | 2011 | | | 2010 | | |
| | Net Revenues | Income before taxes | Property and Equipment, net | Net Revenues | Income before taxes | Property and Equipment, net | Net Revenues | Income before taxes | Property and Equipment, net |
| U.S. | \$1,873,584 | \$122,836 | \$49,782 | \$1,676,072 | \$85,171 | \$40,667 | \$1,501,748 | \$50,338 | \$41,900 |
| Canada | 170,074 | 3,663 | 7,594 | 141,351 | 5,207 | 6,760 | 108,221 | 4,969 | 5,851 |
| Total | \$2,043,658 | \$126,499 | \$57,376 | \$1,817,423 | \$90,378 | \$47,427 | \$1,609,969 | \$55,307 | \$47,751 |

Net revenues from external customers by product group were as follows:

| | Year Ended | | |
|--|--------------------|--------------------|--------------------|
| | September 30, 2012 | September 30, 2011 | September 30, 2010 |
| Residential roofing products | \$1,023,547 | \$ 849,970 | \$ 748,007 |
| Non-residential roofing products | 757,906 | 718,145 | 619,348 |
| Complementary building products | 262,205 | 249,308 | 242,614 |
| Total | \$2,043,658 | \$1,817,423 | \$1,609,969 |

Prior year revenues by product group are presented in a manner consistent with the current year's product classifications.

16. Allowance for Doubtful Accounts

The activity in the allowance for doubtful accounts consisted of the following:

| Fiscal Year | Balance at beginning of year | Provision Additions | Write-offs | Balance at end of year |
|------------------------------|------------------------------|---------------------|------------|------------------------|
| September 30, 2012 | \$13,816 | \$4,619 | \$(4,971) | \$13,464 |
| September 30, 2011 | \$11,817 | \$7,960 | \$(5,960) | \$13,816 |
| September 30, 2010 | \$13,442 | \$4,622 | \$(6,247) | \$11,817 |

17. Financial Derivatives

The Company uses derivative financial instruments to manage its exposure related to fluctuating cash flows from changes in interest rates. Use of derivative financial instruments in hedging programs subjects the Company to certain risks, such as market and credit risks. Market risk represents the possibility that the value of the derivative instrument will change. In a hedging relationship, the change in the value of the derivative is offset to a great extent by the change in the value of the underlying hedged item. Credit risk related to derivatives represents the possibility that the counterparty will not fulfill the terms of the contract. The notional, or contractual, amount of our derivative financial instruments is used to measure interest to be paid or received and does not represent the Company's exposure due to credit risk. The Company's current derivative instruments are with large financial counterparties rated highly by nationally recognized credit rating agencies.

As of September 30, 2012, the outstanding interest rate derivative instruments included: a) a \$100 million interest rate swap with interest payments at a fixed rate of 2.72%; b) a \$50 million interest rate swap with interest payments at a fixed rate of 3.12%; and c) a \$50 million interest rate swap with interest payments at a fixed rate of 3.11%. These interest rate swaps expire in April 2013 and were designated as effective cash flow hedges until the Company's refinancing discussed below. In addition, in 2012 the Company entered into a new

Beacon Roofing Supply, Inc.

**Notes to Consolidated Financial Statements
Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

17. Financial Derivatives – (continued)

interest rate derivative instrument consisting of a \$213.8 million interest rate swap with interest payments at a fixed rate of 1.38%, commencing on June 28, 2013. This new interest rate swap has been designated as an effective cash flow hedge and amortizes at \$2.8 million per quarter beginning on June 28, 2013 and expires on March 31, 2017.

For derivative instruments designated as cash flow hedges, the Company records the effective portions of changes in their fair value, net of taxes, in other comprehensive income. The effectiveness of the hedges is periodically assessed by the Company during the lives of the hedges by 1) comparing the current terms of the hedges with the related hedged debt to assure they continue to coincide and 2) through an evaluation of the ability of the counterparties to the hedges to honor their obligations under the hedges. Any ineffective portions of the hedges are recognized in earnings through interest expense and other financing costs. The Company's refinancing transaction in 2012 resulted in hedge ineffectiveness on the derivative instruments that expire in April 2013, as the underlying term debt being hedged was repaid before the expiration of the derivative instruments. This resulted in a \$4.9 million charge to interest expense and other financing costs in the third quarter of 2012 for the fair value of the derivative instruments previously recorded as a component of comprehensive loss. Subsequent changes in the fair value of those swaps are also being recognized in interest expense and other financing costs. There was a decline of \$2.3 million in the fair value of the ineffective swaps in the second half of 2012 that was recognized as a reduction to interest expense and other financing costs.

The Company records any differences paid or received on its interest rate hedges as adjustments to interest expense. The table below presents the combined fair values of the interest rate derivative instruments:

| Instrument | Location on Balance Sheet | Unrealized Losses | | Fair Value Hierarchy |
|--|---------------------------|--------------------|--------------------|----------------------|
| | | September 30, 2012 | September 30, 2011 | |
| (Dollars in thousands) | | | | |
| Designated interest rate swaps (effective) | Accrued expenses | \$6,005 | \$7,235 | |
| Non-designated interest rate swaps (ineffective) | Accrued expenses | <u>2,621</u> | <u>—</u> | |
| | | <u>\$8,626</u> | <u>\$7,235</u> | Level 2 |

The fair values of the interest rate hedges were determined through the use of pricing models, which utilize verifiable inputs such as market interest rates that are observable at commonly quoted intervals (generally referred to as the "LIBOR Curve") for the full terms of the hedge agreements. These values reflect a Level 2 measurement under the applicable fair value hierarchy.

The table below presents the amounts of gain (loss) on the interest rate derivative instruments recognized in other comprehensive income (OCI):

| (Dollars in thousands) | 2012 | 2011 |
|--|-----------|-----------|
| Amount of Gain (Loss) Recognized in OCI (net of tax) | | |
| Designated interest rate swaps | \$(3,660) | \$(4,408) |
| Non-designated interest rate swaps (reclassified from accumulated OCI) | 2,984 | — |

Beacon Roofing Supply, Inc.

Year Ended September 30, 2012**

(dollars in thousands, except per share data or as otherwise indicated)

17. Financial Derivatives – (continued)

The table below presents the amounts of gain (loss) on the interest rate derivative instruments recognized in interest expense and other financing costs:

| | <u>2012</u> | <u>2011</u> |
|---|-------------------------|-------------------|
| Amount of Gain (Loss) Recognized in Interest Expense | | |
| Non-designated interest rate swaps | \$ 2,311 | \$— |
| Non-designated interest rate swaps (reclassified from accumulated OCI) | <u>(4,932)</u> | <u>—</u> |
| | <u><u>\$(2,621)</u></u> | <u><u>\$—</u></u> |

18. Subsequent Events

On November 1, 2012, the Company announced that it had acquired McClure-Johnston Company (“McClure-Johnston”), a distributor of residential and commercial roofing products and related accessories headquartered in the Pittsburgh suburb of Braddock, Pa. McClure-Johnston has 14 locations with eight in Pennsylvania, three in West Virginia, one in Western Maryland and two in Georgia. Annual sales are approximately \$85 million.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

1. Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of September 30, 2012. Based on this evaluation, our chief executive officer and chief financial officer concluded that, as of September 30, 2012, our disclosure controls and procedures were (1) designed to ensure that material information relating to Beacon Roofing Supply, Inc., including its consolidated subsidiaries, is made known to our chief executive officer and chief financial officer by others within those entities, particularly during the period in which this report was being prepared and (2) designed to be effective, and were effective, in that they provide reasonable assurance of achieving their objectives, including that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is (a) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (b) accumulated and communicated to management, including our chief executive officer and chief financial officer, to allow timely decisions regarding required disclosures.

2. Internal Control over Financial Reporting

(a) Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Securities Exchange Act of 1934 as a process designed by, or under the supervision of, the company's principal executive and principal financial officers, and effected by the company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Our internal control system was designed to provide reasonable assurance to our management and Board of Directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations which may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal controls over financial reporting as of September 30, 2012. In making this assessment, we used the criteria set forth in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on our assessment, we believe that, as of September 30, 2012, our internal control over financial reporting is effective at the reasonable assurance level based on those criteria.

Our Independent Registered Public Accounting Firm has issued a report on the Company's internal control over financial reporting. This report appears below.

(b) Attestation Report of the Independent Registered Public Accounting Firm

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of
Beacon Roofing Supply, Inc.

We have audited Beacon Roofing Supply, Inc.'s internal control over financial reporting as of September 30, 2012, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Beacon Roofing Supply, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Beacon Roofing Supply, Inc. maintained, in all material respects, effective internal control over financial reporting as of September 30, 2012, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Beacon Roofing Supply, Inc. as of September 30, 2012 and 2011 and the related consolidated statements of operations, stockholders' equity and comprehensive income, and cash flows for each of the three years in the period ended September 30, 2012 and our report dated November 29, 2012 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

Boston, Massachusetts
November 29, 2012

(c) Changes in Internal Control Over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) occurred during the fiscal quarter ended September 30, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

We have no information to report pursuant to Item 9B.

PART III

This part of our Form 10-K, which includes Items 10 through 14, is omitted because we will file definitive proxy material pursuant to Regulation 14A not more than 120 days after the close of our year-end, which proxy material will include the information required by Items 10 through 14 and is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) (1) Financial Statements

The following financial statements of our Company and Report of the Independent Registered Public Accounting Firm are included in Part II, Item 8 of this Report:

- Report of Independent Registered Public Accounting Firm
- Consolidated Balance Sheets as of September 30, 2012 and 2011
- Consolidated Statements of Operations for the years ended September 30, 2012, 2011 and 2010
- Consolidated Statements of Stockholders' Equity for the years ended September 30, 2012, 2011 and 2010
- Consolidated Statements of Cash Flows for the years ended September 30, 2012, 2011 and 2010
- Notes to Consolidated Financial Statements

(2) Financial Statement Schedules

Financial statement schedules have been omitted because they are either not applicable or the required information has been disclosed in the financial statements or notes thereto.

(3) Exhibits

Exhibits are set forth on the attached exhibit index.

Beacon Roofing Supply, Inc.

July 17, 2012

Mr. David R. Grace
34 Holly Street
Gloucester, MA 01930

Re: Severance Agreement and General Release

Dear Dave:

This letter when signed by you, will constitute the full agreement between you and Beacon Roofing Supply, Inc. and Beacon Sales Acquisition, Inc. (together, "the Company") on the terms of your continued employment with, and eventual retirement because of disability from, the Company (the "Agreement").

1. Your employment with the Company will continue until the close of business on December 31, 2012 (the "Separation Date"). Through your Separation Date, you will continue to devote your best efforts to faithfully discharge your duties to the Company as its Chief Financial Officer, and you will take reasonable and appropriate actions to cooperatively and smoothly transition the duties of Chief Financial Officer to your successor.
 - (a) Through September 30, 2012, you will continue to be provided with your current base salary and management cash bonus opportunity pursuant to your compensation letter signed by Paul Isabella on March 21, 2012, and you will continue to participate in the Company's employee benefits plans in accordance with their terms. Notwithstanding anything to the contrary in the management cash bonus plan, if you die before the bonus payment is paid, the payment will be made to your spouse or, if she is not alive at such time, to your estate.
 - (b) From October 1, 2012 through the Separation Date, you will be paid a base salary equal to 70% of your current base salary, and you will continue to participate in the Company's employee benefit plans (including the short-term and long-term disability plans) in accordance with their terms; provided, however, that you will not be entitled to participate in the management cash bonus plan for the fiscal year beginning October 1, 2012, and you will not be entitled to any future equity grants under the Company's Stock Plan. If you die at any time prior to the Separation Date, the Company will continue to pay your salary to your spouse or, if she is not alive at such time, to your estate.
2. Your employment with the Company will terminate on the Separation Date. Your final paycheck will include any unpaid base salary earned through the Separation Date, any accrued but unused vacation in accordance with the Company's paid time off policy and expense reimbursements in accordance with Company policy.
3. In consideration of your acceptance of this Agreement and the execution and non-revocation of the Release of Claims ("Release") at Exhibit A within the time specified in the Release, you will be entitled to the following payments and benefits after the Separation Date:
 - (a) The Company will provide you with continued pay for 25 months of \$41,075 per month, paid on regularly scheduled pay dates beginning January 1, 2013, and less ordinary and necessary payroll deductions ("Continued Pay"); provided, however, because you are considered a "Key Employee" under Treas. Reg. §1.409A-1(i), payments of Continued Pay will be deferred for six months, with payments for January 1, 2013 through June 30, 2103 being included with the July, 2013 payment. If you die before or during the Continued Pay period, the Company will continue to make the monthly payments of Continued Pay to your spouse or, if she is not alive at such time, to your estate (and if you die prior to July 1, 2013, payments of Continued Pay, including any deferred payments, will resume).

- (b) The Company will continue to provide group medical, dental and vision benefits (collectively the “Benefits”) to you and, if applicable, your spouse and covered dependents, at the same cost it charges its active employees. Assuming you continue to pay the required premiums at the rate required for the Company’s active employees, the continued Benefits will cease on the date you become eligible for Medicare because of age or if earlier, the date you become eligible for coverage under another employer-provided group health plan that provides medical, dental and vision coverage. The Company reserves the right to change the Benefits provided or your portion of the premium amount, consistent with changes applicable to the Company’s employees generally. The Company will reflect the Company-paid portion of the premiums on a Form W-2 provided to you each year. If you die while Benefits are being provided, the date of your death will be considered a “qualifying event” for purposes of COBRA, entitling your spouse and covered dependents to elect continued Benefits for up to 36 months from the date of your death, in accordance with the terms of the applicable plans and COBRA, and if COBRA is elected, your spouse and covered dependents will continue to be charged premiums at the rate required for the Company’s active employees. You acknowledge that the provision of these Benefits pursuant to this Paragraph 3(b) is in lieu of any COBRA coverage to which you and your spouse and dependents would otherwise be entitled upon your Separation Date.
 - (c) Your termination is considered a termination due to “disability” as defined in your Stock Option, Restricted Stock and Restricted Stock Unit Agreements and affirmed by the Company’s Board of Directors. Accordingly, as of the date the revocation period for the Release expires:
 - (i) all of your outstanding stock options that are not yet vested on such date will be fully vested on such date, and all outstanding stock options will expire on the first anniversary of such date; and
 - (ii) all restrictions on your Restricted Stock and Restricted Unit Awards will lapse on such date, and the target number of shares of common stock subject to the Awards will be distributed to you after such date in accordance with the Award Agreements.
 - (d) Except as stated above, all other benefits and compensation end on the Separation Date. However, this Agreement does not affect any existing rights that you may have under the Company’s retirement plans and welfare plans. You will receive, under separate cover, information regarding your rights and options, if any, under any such plans.
 - (e) You acknowledge that no other payments outside this Agreement are due and owing to you.
4. Beginning January 1, 2013 and continuing until February 28, 2015, you will make yourself reasonably available to the Company to provide consulting advice, for no additional compensation, from time to time if and as needed by the Company upon reasonable notice by Paul Isabella, CEO. During this period, you will be an independent contractor and not an employee of the Company.
5. You agree that as the Company’s Chief Financial Officer, you have gained competitive, confidential, trade secret and proprietary information relating to the Company and its business in all 50 states. You further agree that disclosure or use of this information by you or by any other entity would lead to irreparable harm to the Company. Accordingly:
- (a) You agree that except in your capacity as an employee of the Company, you will not, without the prior written consent of the Company (which may be withheld in its sole discretion), until December 31, 2017:
 - (i) engage or participate in, anywhere in the United States, as an employee, owner, partner, shareholder, officer, director, member, manager, advisor, consultant, lender, lessor, agent or otherwise, or permit your name to be used by or render services of any type for, any business that is in whole or in part, directly or indirectly, competitive with the business of the Company as conducted as of the Separation Date; provided, however, that nothing in this Agreement shall prevent you from acquiring or owning, but solely as a passive investment, up to five percent of any class of voting securities registered under the Securities Exchange Act of 1934, as amended, of any issuer engaged in a competing business;

- (ii) take any action which could reasonably be expected to divert from the Company any opportunity which would be within the scope of the Company's business;
 - (iii) solicit or attempt to solicit any person or entity who is or has been (A) a customer of the Company at any time within one year prior to the Separation Date to purchase any product or service which may be provided by the Company, or (B) a customer, supplier, licensor, licensee or other business relation conducting business with the Company at any time within one year prior to the Separation Date, to cease doing business with, or to alter or limit its business relationship with, the Company; or
 - (iv) solicit attempt to solicit, or assist anyone else to solicit any employee, representative, consultant or agent of the Company to terminate his, her or its association with the Company or recruit, solicit, hire or otherwise retain the services of any such person, whether on a full-time basis, part-time basis or otherwise and whether as an employee, independent contractor, consultant, advisor or in another capacity.
 - (b) You hereby acknowledge and agree that:
 - (i) the restrictions provided in this section are reasonable in time and scope in light of the necessity for the protection of the business and good will of the Company and the consideration provided to you under this Agreement; and
 - (ii) your ability to work and earn a living will not be unreasonably restrained by the application of these restrictions.
 - (c) You acknowledge that should you fail to comply and do not cure such failure within 30 days' written notice by the Company of such failure, with the restrictions set forth above, (i) all cash payments under this Agreement shall cease immediately; (ii) all then unexercised stock options whose vesting was accelerated as a result of your termination of employment due to disability shall expire immediately; (iii) you will be obligated to remit to the Company, within 30 days of written demand, all Continued Pay previously paid to you and, in the event you have exercised any stock options whose vesting was accelerated as a result of your termination of employment due to disability, an amount equal to the difference between the exercise price of such stock options and the fair market value of the stock of the Company at the time of such exercise, multiplied by the number of options exercised; and (iv) the Benefits will cease. You also agree that the Company will be entitled, in addition to any other rights or remedies available to it, to seek injunctive relief.
 - (d) In the event the enforceability of any of the covenants in this Paragraph are challenged in court, the applicable time period as to such covenant shall be deemed tolled upon the filing of the lawsuit challenging such enforceability until the dispute is finally resolved and all periods of appeal have expired.
6. You agree to not make any disparaging or negative statements about the Company or its affiliated companies and its and their officers, directors and employees. The Company agrees not to make any disparaging or negative statements about you.
 7. You agree to return to the Company all of the Company's property, including, without limit, any electronic or paper documents and records and copies thereof that you received or acquired during your employment regarding the Company's practices, procedures, trade secrets, customer lists, or product marketing, and that you will not use the same for your own purpose.
 8. You acknowledge and agree that this Agreement, including the Release set forth in Exhibit A and the applicable stock and option agreements and plans, sets forth the entire understanding between the parties concerning the matters discussed herein, that no promise or inducement has been offered to you to enter into this Agreement except as expressly set forth herein, and that the provisions of this Agreement are severable such that if any part of the Agreement is found to be unenforceable, the other parts shall remain fully valid and enforceable.

9. Until December 31, 2017 you agree to notify the Company no later than four business days after accepting new employment, and thereafter you agree to notify the Company no later than four business days after accepting new employment that provides group medical, dental and vision benefits.
10. Except to the extent preempted by federal law, this Agreement is made and entered into in the State of Massachusetts and the rights and obligations of the parties will be interpreted, enforced, and governed in accordance with the laws of the State of Massachusetts which are applicable to contracts made and to be performed in that state and without regard to the principles of conflict of laws. Any legal actions or proceedings against either party arising out of this Agreement or your employment with the Company will be brought in any court of appropriate jurisdiction sitting in the State of Massachusetts. Each party submits to and accepts the exclusive jurisdiction of such courts for the purpose of legal actions or proceedings and waives any objection to this choice of venue.
11. Each monthly payment described in Paragraph 3(a) will be considered a separate payment for purposes of Section 409A of the Internal Revenue Code. You and the Company agree that all payments and Benefits to be made or provided to you under this Agreement either will be exempt from, or will be paid or provided in compliance with, all applicable requirements of Section 409A of the Internal Revenue Code of 1986, as amended, the regulations issued thereunder and all notices, rulings and other guidance issued by the Internal Revenue Service interpreting the same and that the provisions of this Agreement shall be construed and administered in accordance with such intent.
12. You warrant, after conferring with counsel, that as of the date of this Agreement, you are not a Medicare beneficiary, and no conditional payments have been made by Medicare on your behalf.
13. Notwithstanding any of the foregoing, in no event will any payment or benefits be provided pursuant to this Agreement if, and only if, your employment is terminated by the Company prior to the Separation Date for cause (cause means, as determined by the Compensation Committee of the Board of Directors in its reasonable judgment, your gross negligence or willful misconduct in the performance of your duties or your commission of any act of fraud, embezzlement or material dishonesty against the Company or of any felony; provided, however, that cause will not include your inability to perform your duties for the Company due to health issues).

IN WITNESS WHEREOF, the parties have executed this Agreement as of the 17th day of July, 2012.

Exhibit A

In consideration of the payments and benefits provided to you above, to which you are not otherwise entitled and the sufficiency of which you acknowledge, you do, on behalf of yourself and your heirs, administrators, executors and assigns, hereby fully, finally and unconditionally release and forever discharge the Company and its parent, subsidiary and affiliated entities and all their former and present officers, directors, shareholders, employees, trustees, fiduciaries, administrators, attorneys, consultants, agents, and other representatives, and all their respective predecessors, successors and assigns (collectively "Released Parties"), in their corporate, personal and representative capacities, from any and all obligations, rights, claims, damages, costs, attorneys' fees, suits and demands, of any and every kind, nature and character, known or unknown, liquidated or unliquidated, absolute or contingent, in law and in equity, enforceable under any local, state or federal common law, constitution, statute or ordinance, which arise from or relate to your past employment with the Company or the termination thereof, or any past actions or omissions of the Company or any of the Released Parties, including without limitation, rights and claims arising under the Family and Medical Leave Act, Title VII of the Civil Rights Act, the Americans with Disabilities Act of 1990, the Age Discrimination in Employment Act, the Older Worker Benefits Protection Act, the Worker's Adjustment and Retraining Notification Act, the Employee Retirement Income Security Act, or any other federal, state or local law or regulation. Subject to applicable law, you also warrant that you have not filed or sued and will not sue or file any actions against the Company or any of the Released Parties with respect to claims covered by this release.

You recognize and understand that the foregoing is a general release by which you are giving up the opportunity to obtain compensation, damages, and other forms of relief for yourself. This Agreement, however, is not intended to and does not interfere with the right of any governmental agency to enforce laws or to seek relief that may benefit the general public, or your right to assist with or participate in that process. By signing this Agreement, however, you waive any right to personally recover against the Released Parties, and you give up the opportunity to obtain compensation, damages or other forms of relief for you other than that provided in this Agreement.

You represent that you are not aware of any facts on which a claim under the Fair Labor Standards Act, the Attorney Fees in Wage Action Act, or under applicable state minimum wage, wage payment or leave laws, could be brought.

Notwithstanding the foregoing, this release does not include and will not preclude: (a) non-termination related claims under the Massachusetts Workers Compensation Act (M.G.L. c. 152) or any disability insurance plans; (b) rights to vested benefits under the Company's benefit plans; (c) rights to defense and indemnification, if any, from the Company for actions or inactions taken by you in the course and scope of your employment with the Company; and (d) claims, actions or rights arising under or to enforce the terms of the Severance Agreement.

If you accept the terms of this Release, please date and sign below and return it to Ross Cooper on December 31, 2012. Once you execute this Release, you have seven (7) days in which to revoke in writing your acceptance by providing the same to me, and such revocation will render this Release null and void. If you do not revoke your acceptance in writing and provide it to me by midnight on the seventh day, this Release shall be effective the day after the seven-day revocation period has elapsed.

Sincerely,

BEACON ROOFING SUPPLY, INC.

Name:

Title:

By signing this letter, I represent and warrant that I have not been the victim of age or other discrimination or wrongful treatment in my employment and the termination thereof. I further acknowledge that the Company advised me in writing to consult with an attorney, that I had at least twenty-one (21) days to consider this Release, that I received all information necessary to make an informed decision and I had the opportunity to request and receive additional information, that I understand and agree to the terms of this Release, that I have seven (7) days in which to revoke my acceptance of this Release, and that I am signing this Release voluntarily with full knowledge and understanding of its contents.

REGISTRANT'S SUBSIDIARIES

The following table sets forth, at November 29, 2012, the Registrant's significant operating subsidiaries and other associated companies and their respective incorporation jurisdictions. The Registrant owns 100% of the voting securities of each of the subsidiaries listed below. There are no subsidiaries not listed in the table, which would, in the aggregate, be considered significant.

| Active Subsidiaries | State of Incorporation |
|--------------------------------------|-----------------------------------|
| Beacon Sales Acquisition, Inc. | Delaware |
| Beacon Canada, Inc. | Delaware |
| Beacon Roofing Supply Canada Company | Nova Scotia |

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We consent to the incorporation by reference in the Registration Statements (Form S-8 Nos. 333-172142, 333-128379, 333-119747 and 333-150773) of Beacon Roofing Supply, Inc. of our reports dated November 29, 2012 with respect to the consolidated financial statements of Beacon Roofing Supply, Inc. and the effectiveness of internal control over financial reporting of Beacon Roofing Supply, Inc., included in the Annual Report (Form 10-K) for the year ended September 30, 2012.

/s/ ERNST & YOUNG LLP

Boston, Massachusetts
November 29, 2012

CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Paul M. Isabella, certify that:

1. I have reviewed this annual report on Form 10-K of Beacon Roofing Supply, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
