

Our Vision

3M Technology Advancing Every Company

3M Products Enhancing Every Home

3M Innovation Improving Every Life

Received SEC

MAR 28 2013

Washington, DC 20549

Inge G. Thulin
Chairman of the Board, President and
Chief Executive Officer

To our shareholders

2012 was another strong year for the people of 3M. In an uncertain economic environment, we kept our promises to our customers and investors while building an even stronger future for 3M. For me personally as the chief executive officer of 3M, it was a year in which I grew to appreciate more than ever the many strengths of the company and the tremendous talents of our people.

Early in the year we introduced a new vision for 3M, a vision for the entire company to inspire our employees and position us positively with our customers. We set out to capture the essence of 3M with a clear vision that is both timely and timeless.

I shared it with the leadership team on my first day as CEO and with all employees worldwide a few days later. We introduced it early to connect immediately with employees and to send a very clear message about 3M's direction, purpose and future. You can see it on the cover of this year's annual report.

3M Technology Advancing Every Company
3M Products Enhancing Every Home
3M Innovation Improving Every Life

Our vision captures well the essence of 3M: *technology, products and innovation*. It describes what we do for our customers every day: *advance, enhance and improve*. And, it sets a stretch goal for all of us: we have the capability to reach every company, every home and every life all around the world.

From a performance standpoint, if we can make good progress toward realizing our vision, we can look forward to many more good quarters and many more years of increasing value for our shareholders.

The vision has inspired and excited our employees, and it was especially encouraging to see how our customers have responded. Whenever I meet with customers I make a special point to share our vision. Not only does it resonate very well with them, it generates even more interest in our technologies and products.

Concurrent with the vision, we introduced six strategies to propel the company forward. While top-down at launch, the strategies were developed and enhanced through a process involving literally hundreds of 3M leaders. In less than six months from introduction, our people transformed the strategies from concept into clarity, credibility and confidence.

- Expand Relevance to our Customers and our Presence in the Marketplace
- Gain Profitable Market Share and Accelerate Market Penetration Everywhere
- Invest in Innovation: Invigorate Existing Market Opportunities and Focus on Emerging Megatrends
- Intensify Capabilities to Achieve Regional Self-Sufficiency
- Build High Performing and Diverse Global Talent
- Drive Consistent Superior Levels of Operational Excellence

The strategies formed the basis of a great deal of 2012 progress across the company. For example, we aligned the organization to become more relevant and responsive to our customers. We recommitted the company to increased funding of innovation. We improved our ability to drive growth through new capabilities in marketing, sales, and e-platforms. We strengthened our operational excellence through more focus on

acquisition integration and Lean Six Sigma. We expanded our global footprint through continued investments around the world. And we did all of this with the high level of business conduct, integrity and character that others expect of us, and that we expect of ourselves.

In addition, we brought portfolio prioritization into the forefront of how we manage the company. This is important for long-term success and we are using the process to improve short-term results as well.

Finally, we set out financial goals for the next five years. We now have targets that are both realistic and aggressive, and that provide a real possibility of upside.

The five-year goals are as follows:

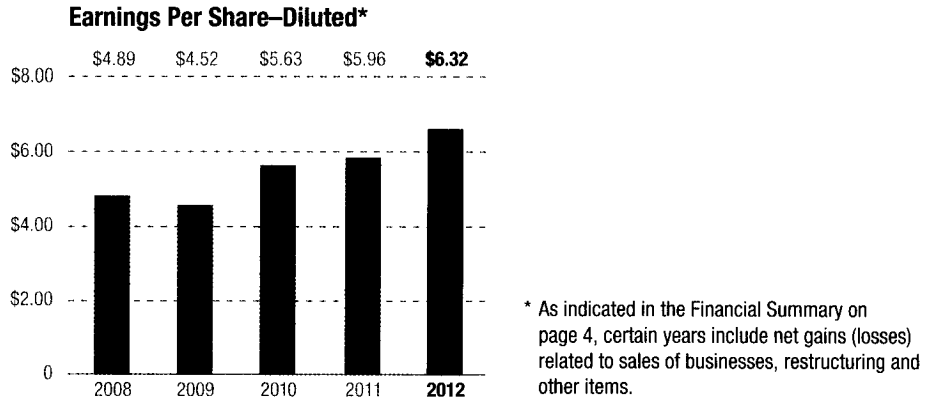

- Grow earnings per share 9-11 percent per year, on average
- Grow organic sales 4-6 percent per year, on average
- Maintain return on invested capital above 20 percent
- Free cash flow conversion of 100 percent

All in all, I am very pleased with our actions to improve the business and with our progress in so many areas of the company. At the same time, the company performed very well in 2012.

For the year, earnings per share were up 6 percent to \$6.32.

Operating income rose to \$6.5 billion, a 5 percent increase.

We maintained outstanding operating income margins of 21.7 percent, with five of our six business segments delivering above 21 percent.

Sales for the year were nearly \$30 billion. In organic local currency terms, sales increased 2.6 percent, with particular strength in Latin America/Canada which was up 11 percent, and the United States, which was up 4 percent for the year.

Asia Pacific was flat for the year in organic local currency, impacted heavily by a soft global consumer electronics industry. Europe/Middle East/Africa was down 1 percent.

Currency impacts reduced worldwide sales by 2.4 percent ... and acquisitions added nearly a point.

We returned \$3.8 billion in cash to shareholders through dividends and share repurchases ... which was 86 percent of net income for the year.

And finally, return on invested capital for the year was 20 percent.

In summary, it was a year of solid results during uncertain economic times, and as a result of our actions last year, the 3M team is well-aligned and the company well-positioned to win in 2013 and beyond.

Inge G. Thulin

Chairman of the Board, President and Chief Executive Officer

2010 results included a one-time income tax charge of \$84 million resulting from the March 2010 enactment of the Patient Protection and Affordable Care Act, including modifications made in the Health Care and Education Reconciliation Act of 2010.

2009 results included net losses that decreased operating income by \$194 million and net income attributable to 3M by \$119 million. This included restructuring actions, which were partially offset by a gain on sale of real estate.

2008 results included net losses that decreased operating income by \$269 million and net income attributable to 3M by \$194 million. This included restructuring actions, exit activities and losses related to the sale of businesses, which were partially offset by a gain on sale of real estate.

2007 results included net gains that increased operating income by \$681 million and net income attributable to 3M by \$448 million. This included gains related to the sale of businesses and a gain on sale of real estate, which were partially offset by increases in environmental liabilities, restructuring actions and exit activities.

3M COMPANY
ANNUAL REPORT ON FORM 10-K
For the Year Ended December 31, 2012
PART I

Item 1. Business.

3M Company was incorporated in 1929 under the laws of the State of Delaware to continue operations begun in 1902. The Company's ticker symbol is MMM. As used herein, the term "3M" or "Company" includes 3M Company and its subsidiaries unless the context indicates otherwise. In this document, for any references to Note 1 through Note 17, refer to the Notes to Consolidated Financial Statements in Item 8.

Available Information

The SEC maintains a website that contains reports, proxy and information statements, and other information regarding issuers, including the Company, that file electronically with the SEC. The public can obtain any documents that the Company files with the SEC at <http://www.sec.gov>. The Company files annual reports, quarterly reports, proxy statements and other documents with the Securities and Exchange Commission (SEC) under the Securities Exchange Act of 1934 (Exchange Act). The public may read and copy any materials that the Company files with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330.

3M also makes available free of charge through its website (<http://investor.3M.com>) the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and, if applicable, amendments to those reports filed or furnished pursuant to the Exchange Act as soon as reasonably practicable after the Company electronically files such material with, or furnishes it to, the SEC.

General

3M is a diversified technology company with a global presence in the following businesses: Industrial and Transportation; Health Care; Consumer and Office; Safety, Security and Protection Services; Display and Graphics; and Electro and Communications. 3M is among the leading manufacturers of products for many of the markets it serves. Most 3M products involve expertise in product development, manufacturing and marketing, and are subject to competition from products manufactured and sold by other technologically oriented companies.

At December 31, 2012, the Company employed 87,677 people (full-time equivalents), with 34,746 employed in the United States and 52,931 employed internationally.

Business Segments

In 2012, 3M managed its operations in six operating business segments: Industrial and Transportation; Health Care; Consumer and Office; Safety, Security and Protection Services; Display and Graphics; and Electro and Communications. 3M's six business segments bring together common or related 3M technologies, enhancing the development of innovative products and services and providing for efficient sharing of business resources. These segments have worldwide responsibility for virtually all 3M product lines. Certain small businesses and lab-sponsored products, as well as various corporate assets and expenses, are not attributed to the business segments. Financial information and other disclosures relating to 3M's business segments and operations in major geographic areas are provided in the Notes to Consolidated Financial Statements.

Consistent with 3M's strategy of building relevance and presence in the marketplace, the Company announced in October 2012 that it was immediately beginning to align resources and management toward a new structure comprised of five business groups: Consumer; Industrial; Health Care; Safety and Graphics; and Electronics and Energy. The company's operating results were managed on the basis of its existing segment structure through 2012, with the intention that results be managed under the new alignment once it is fully effective in the first quarter of 2013.

Industrial and Transportation Business: The Industrial and Transportation segment serves a broad range of markets, such as automotive original equipment manufacturer (OEM) and automotive aftermarket (auto body shops and retail), renewable energy, electronics, paper and packaging, food and beverage, and appliance. Industrial and Transportation products include tapes, a wide variety of coated and non-woven abrasives, adhesives, specialty materials, filtration products, energy control products, closure systems for personal hygiene products, acoustic systems products, and

components and products that are used in the manufacture, repair and maintenance of automotive, marine, aircraft and specialty vehicles. In the fourth quarter of 2012, 3M acquired Ceradyne, Inc., which develops and produces advanced technical ceramics for demanding applications in the automotive, oil and gas, solar, industrial, electronics and defense industries. In 2011, 3M acquired Winterthur Technologie AG, a leading global supplier of precision grinding technology serving customers in the area of hard-to-grind precision applications in industrial, automotive, aircraft and cutting tools.

Major industrial products include vinyl, polyester, foil and specialty industrial tapes and adhesives; Scotch® Masking Tape, Scotch® Filament Tape and Scotch® Packaging Tape; packaging equipment; 3M™ VHB™ Bonding Tapes; conductive, low surface energy, hot melt, spray and structural adhesives; reclosable fasteners; label materials for durable goods; and coated, nonwoven and microstructured surface finishing and grinding abrasives for the industrial market. 3M Purification Inc. provides a comprehensive line of filtration products for the separation, clarification and purification of fluids and gases. Other industrial products include fluoroelastomers for seals, tubes and gaskets in engines; and engineering fluids. In addition, this segment provides 3M™ Scotchtint™ Window Film for buildings; 3M™ Ultra Safety and Security Window Film for property and personal protection during destructive weather conditions; closure systems for personal hygiene products; and acoustic systems products.

Major transportation products include insulation components, including components for catalytic converters; functional and decorative graphics; abrasion-resistant films; masking tapes; fasteners and tapes for attaching nameplates, trim, moldings, interior panels and carpeting; coated, nonwoven and microstructured finishing and grinding abrasives; structural adhesives; and other specialty materials. In addition, 3M provides paint finishing and detailing products, including a complete system of cleaners, dressings, polishes, waxes and other products.

Health Care Business: The Health Care segment serves markets that include medical clinics and hospitals, pharmaceuticals, dental and orthodontic practitioners, health information systems, and food manufacturing and testing. Products and services provided to these and other markets include medical and surgical supplies, skin health and infection prevention products, inhalation and transdermal drug delivery systems, dental and orthodontic products (oral care), health information systems, and food safety products.

In the medical and surgical areas, 3M is a supplier of medical tapes, dressings, wound closure products, orthopedic casting materials, electrodes and stethoscopes. In infection prevention, 3M markets a variety of surgical drapes, masks and preps, as well as sterilization assurance equipment. Other products include drug delivery systems, such as metered-dose inhalers, transdermal skin patches and related components. In addition, in the fourth quarter of 2010, 3M acquired Arizant Inc., a manufacturer of patient warming solutions designed to prevent hypothermia in surgical settings. Dental and orthodontic products include restoratives, adhesives, finishing and polishing products, crowns, impression materials, preventive sealants, professional tooth whiteners, prophylaxis and orthodontic appliances. In health information systems, 3M develops and markets computer software for hospital coding and data classification, and provides related consulting services. 3M provides food safety products that make it faster and easier for food processors to test the microbiological quality of food.

Consumer and Office Business: The Consumer and Office segment serves markets that include consumer retail, office retail, home improvement, building maintenance and other markets. Products in this segment include office supply products, stationery products, construction and home improvement products (do-it-yourself), home care products, protective material products, certain consumer retail personal safety products, and consumer health care products.

Major consumer and office products include Scotch® brand products, such as Scotch® Magic™ Tape, Scotch® Glue Stick and Scotch® Cushioned Mailer; Post-it® Products, such as Post-it® Flags, Post-it® Note Pads, Post-it® Labeling & Cover-up Tape, and Post-it® Pop-up Notes and Dispensers; construction and home improvement products, including surface-preparation and wood-finishing materials, Command™ Adhesive Products and Filtrete™ Filters for furnaces and air conditioners; home care products, including Scotch-Brite® Scour Pads, Scotch-Brite® Scrub Sponges, Scotch-Brite™ Microfiber Cloth products, O-Cel-O™ Sponges and Scotchgard™ Fabric Protectors; protective material products; certain maintenance-free respirators; certain consumer retail personal safety products, including safety glasses and hearing protectors; Nexcare™ Adhesive Bandages; and ACE® branded (and related brands) elastic bandage, supports and thermometer product lines.

Safety, Security and Protection Services Business: The Safety, Security and Protection Services segment serves a broad range of markets that increase the safety, security and productivity of workers, facilities and systems. Major product offerings include personal protection products, cleaning and protection products for commercial establishments, safety and security products (including border and civil security solutions), roofing granules for asphalt shingles, infrastructure protection products used in the oil and gas pipeline markets, and track and trace solutions. In the fourth quarter of 2010, 3M acquired Cogent Inc. and Attenti Holdings S.A. Cogent Inc. is a provider of finger, palm, face and iris biometric

systems for governments, law enforcement agencies, and commercial enterprises. Attenti Holdings S.A. is a supplier of remote people-monitoring technologies used for offender-monitoring applications and to assist eldercare facilities in monitoring and enhancing the safety of patients.

This segment's products include personal protection products, such as certain maintenance-free and reusable respirators, personal protective equipment, head and face protection, body protection, hearing protection and protective eyewear. In addition, this segment provides electronic surveillance products, films that protect against counterfeiting, and reflective materials that are widely used on apparel, footwear and accessories, enhancing visibility in low-light situations. 3M's Track and Trace Solutions business utilizes radio frequency identification (RFID) technology to provide a growing array of solutions. Other products include spill-control sorbents; 3M™ Thinsulate™ Insulation and 3M™ Thinsulate™ Lite Loft™ Insulation; nonwoven abrasive materials for floor maintenance and commercial cleaning; floor matting; natural and color-coated mineral granules for asphalt shingles; and infrastructure protection products.

Display and Graphics Business: The Display and Graphics segment serves markets that include electronic display, traffic safety and commercial graphics. This segment includes optical film solutions for LCD electronic displays; reflective sheeting for transportation safety; commercial graphics sheeting and systems; architectural surface and lighting solutions; and mobile interactive solutions, including mobile display technology, visual systems products, and computer screen films.

The optical film business provides films that serve numerous market segments of the electronic display industry. 3M provides distinct products for five market segments, including products for: 1) LCD computer monitors, 2) LCD televisions, 3) hand-held devices such as cellular phones and tablets, 4) notebook PCs and 5) automotive displays. In traffic safety systems, 3M provides reflective sheeting used on highway signs, vehicle license plates, construction work-zone devices, trucks and other vehicles, and also provides pavement marking systems. Major commercial graphics products include films, inks, digital signage systems and related products used to produce graphics for vehicles, signs and interior surfaces. The mobile interactive solutions business focuses on bringing technology to the projection market, including mobile display technology in addition to its visual communication products that serve the world's office and education markets with overhead projectors and transparency films, as well as equipment and materials for electronic and multimedia presentations. In addition, this business includes desktop and notebook computer screen filters that address needs for light control, privacy viewing and glare reduction.

Electro and Communications Business: The Electro and Communications segment serves the electrical, electronics and communications industries, including electrical utilities; electrical construction, maintenance and repair; original equipment manufacturer (OEM) electrical and electronics; computers and peripherals; consumer electronics; telecommunications central office, outside plant and enterprise; as well as aerospace, military, automotive and medical markets; with products that enable the efficient transmission of electrical power and speed the delivery of information. Products include electronic and interconnect solutions, microinterconnect systems, high-performance fluids, high-temperature and display tapes, telecommunications products, electrical products, and touch screens and touch monitors.

Major electronic and electrical products include packaging and interconnection devices; high-performance fluids used in the manufacture of computer chips, and for cooling electronics and lubricating computer hard disk drives; high-temperature and display tapes; insulating materials, including pressure-sensitive tapes and resins; and related items. 3M™ Flexible Circuits use electronic packaging and interconnection technology, providing more connections in less space, and are used in ink-jet printer cartridges, cell phones and electronic devices. This segment serves the world's telecommunications companies with a wide array of products for fiber-optic and copper-based telecommunications systems for rapid deployment in fixed and wireless networks. The 3M™ Aluminum Conductor Composite Reinforced (ACCR) electrical power cable, with an aluminum-based metal matrix at its core, increases transmission capacity for existing power lines. The touch systems business includes touch screens and touch monitors.

Distribution

3M products are sold through numerous distribution channels, including directly to users and through numerous wholesalers, retailers, jobbers, distributors and dealers in a wide variety of trades in many countries around the world. Management believes the confidence of wholesalers, retailers, jobbers, distributors and dealers in 3M and its products — a confidence developed through long association with skilled marketing and sales representatives — has contributed significantly to 3M's position in the marketplace and to its growth.

Research and Patents

Research and product development constitutes an important part of 3M's activities and has been a major driver of 3M's sales growth. Research, development and related expenses totaled \$1.634 billion in 2012, \$1.570 billion in 2011 and \$1.434 billion in 2010. Research and development, covering basic scientific research and the application of scientific advances in the development of new and improved products and their uses, totaled \$1.079 billion in 2012, \$1.036 billion in 2011 and \$919 million in 2010. Related expenses primarily include technical support provided by 3M to customers who are using existing 3M products; internally developed patent costs, which include costs and fees incurred to prepare, file, secure and maintain patents; and amortization of acquired patents.

The Company's products are sold around the world under various trademarks. The Company also owns, or holds licenses to use, numerous U.S. and foreign patents. The Company's research and development activities generate a steady stream of inventions that are covered by new patents. Patents applicable to specific products extend for varying periods according to the date of patent application filing or patent grant and the legal term of patents in the various countries where patent protection is obtained. The actual protection afforded by a patent, which can vary from country to country, depends upon the type of patent, the scope of its coverage and the availability of legal remedies in the country.

The Company believes that its patents provide an important competitive advantage in many of its businesses. In general, no single patent or group of related patents is in itself essential to the Company as a whole or to any of the Company's business segments. The importance of patents in the Display and Graphics segment is described in "Performance by Business Segment" — "Display and Graphics Business" in Part II, Item 7, of this Form 10-K.

Raw Materials

In 2012, the Company experienced stable to declining cost for most raw material categories and transportation fuel costs. This was driven by year-on-year cost decreases in many feedstock categories, including petroleum based materials, minerals, metals and wood pulp based products. To date, the Company is receiving sufficient quantities of all raw materials to meet its reasonably foreseeable production requirements. It is impossible to predict future shortages of raw materials or the impact any such shortages would have. 3M has avoided disruption to its manufacturing operations through careful management of existing raw material inventories and development and qualification of additional supply sources. 3M manages commodity price risks through negotiated supply contracts, price protection agreements and forward physical contracts.

Environmental Law Compliance

3M's manufacturing operations are affected by national, state and local environmental laws around the world. 3M has made, and plans to continue making, necessary expenditures for compliance with applicable laws. 3M is also involved in remediation actions relating to environmental matters from past operations at certain sites. Refer to the "Environmental Matters and Litigation" section in Note 13, Commitments and Contingencies, for more detail.

Environmental expenditures relating to existing conditions caused by past operations that do not contribute to current or future revenues are expensed. Reserves for liabilities related to anticipated remediation costs are recorded on an undiscounted basis when they are probable and reasonably estimable, generally no later than the completion of feasibility studies or the Company's commitment to a plan of action. Environmental expenditures for capital projects that contribute to current or future operations generally are capitalized and depreciated over their estimated useful lives.

In 2012, 3M invested about \$27 million in capital projects to protect the environment. This amount excludes expenditures for remediation actions relating to existing matters caused by past operations that do not contribute to current or future revenues, which are expensed. Capital expenditures for environmental purposes have included pollution control devices — such as wastewater treatment plant improvements, scrubbers, containment structures, solvent recovery units and thermal oxidizers — at new and existing facilities constructed or upgraded in the normal course of business. Consistent with the Company's policies stressing environmental responsibility, capital expenditures (other than for remediation projects) for known projects are presently expected to be about \$36 million over the next two years for new or expanded programs to build facilities or modify manufacturing processes to minimize waste and reduce emissions.

While the Company cannot predict with certainty the future costs of such cleanup activities, capital expenditures or operating costs for environmental compliance, the Company does not believe they will have a material effect on its capital expenditures, earnings or competitive position.

Executive Officers

Following is a list of the executive officers of 3M, and their age, present position, the year elected to their present position and other positions they have held during the past five years. No family relationships exist among any of the executive officers named, nor is there any undisclosed arrangement or understanding pursuant to which any person was selected as an officer. This information is presented in the table below as of the date of the 10-K filing (February 14, 2013).

| <u>Name</u> | <u>Age</u> | <u>Present Position</u> | <u>Year Elected to Present Position</u> | <u>Other Positions Held During 2008-2012</u> |
|-----------------------|------------|---|---|---|
| Inge G. Thulin | 59 | Chairman of the Board, President and Chief Executive Officer | 2012 | President and Chief Executive Officer, 2012 Executive Vice President and Chief Operating Officer, 2011-2012 Executive Vice President, International Operations, 2004-2011 |
| Julie L. Bushman | 51 | Executive Vice President, Safety and Graphics | 2012 | Executive Vice President, Safety Security and Protection Services Business, 2011-2012 Vice President and General Manager, Occupational Health and Environmental Safety Division, 2007-2011 |
| Joaquin Delgado | 53 | Executive Vice President, Health Care | 2012 | Executive Vice President, Electro and Communications Business, 2009-2012 Vice President and General Manager, Electronics Markets Materials Division, 2007-2009 |
| Ivan K. Fong | 51 | Senior Vice President, Legal Affairs and General Counsel | 2012 | General Counsel, U.S. Department of Homeland Security, 2009-2012 Chief Legal Officer and Secretary, Cardinal Health Inc., 2005-2009 |
| Ian F. Hardgrove | 62 | Senior Vice President, Marketing, Sales and Communications | 2011 | Senior Vice President, Marketing and Sales, 2011 Vice President and General Manager, Automotive Aftermarket Division, 2007-2011 |
| Christopher D. Holmes | 53 | Senior Vice President, Corporate Supply Chain Operations | 2012 | Executive Vice President, Industrial and Transportation Business, 2011-2012 Vice President and General Manager, Abrasives Systems Division, 2007-2011 |
| Michael A. Kelly | 56 | Executive Vice President, Electronics and Energy | 2012 | Executive Vice President, Display and Graphics Business, 2006-2012 |
| Roger H.D. Lacey | 62 | Senior Vice President, Strategy and Corporate Development | 2010 | Vice President, Corporate Strategy and Marketing Development, 2007-2009 |

Executive Officers (continued)

| <u>Name</u> | <u>Age</u> | <u>Present Position</u> | <u>Year Elected to Present Position</u> | <u>Other Positions Held During 2008-2012</u> |
|-----------------------|------------|---|---|--|
| Marlene M. McGrath | 50 | Senior Vice President, Human Resources | 2012 | Senior Vice President, Human Resources and Interim General Counsel, 2012 Vice President, Human Resources, International Operations, 2010-2012 Director, Human Resources, International Operations, 2006-2010 |
| David W. Meline | 55 | Senior Vice President and Chief Financial Officer | 2011 | Vice President, Corporate Controller and Chief Accounting Officer, 2008-2011 Chief Financial Officer, North America, General Motors Corp., 2007-2008 |
| Frederick J. Palensky | 63 | Executive Vice President, Research and Development and Chief Technology Officer | 2006 | |

Cautionary Note Concerning Factors That May Affect Future Results

This Annual Report on Form 10-K, including “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Item 7, contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The Company may also make forward-looking statements in other reports filed with the Securities and Exchange Commission, in materials delivered to shareholders and in press releases. In addition, the Company’s representatives may from time to time make oral forward-looking statements.

Forward-looking statements relate to future events and typically address the Company’s expected future business and financial performance. Words such as “plan,” “expect,” “aim,” “believe,” “project,” “target,” “anticipate,” “intend,” “estimate,” “will,” “should,” “could” and other words and terms of similar meaning, typically identify such forward-looking statements. In particular, these include, among others, statements relating to the Company’s

- strategy for growth, future revenues, earnings, cash flow, uses of cash and other measures of financial performance, and market position,
- worldwide economic and capital markets conditions, such as interest rates, foreign currency exchange rates, financial conditions of our suppliers and customers, and natural and other disasters affecting the operations of the Company or our suppliers and customers,
- new business opportunities, product development, and future performance or results of current or anticipated products,
- the scope, nature or impact of acquisition, strategic alliance and divestiture activities,
- the outcome of contingencies, such as legal and regulatory proceedings,
- future levels of indebtedness, common stock repurchases and capital spending,
- future availability of and access to credit markets,
- pension and postretirement obligation assumptions and future contributions, asset impairments, tax liabilities, information technology security, and
- the effects of changes in tax, environmental and other laws and regulations in the United States and other countries in which we operate.

The Company assumes no obligation to update or revise any forward-looking statements.

Forward-looking statements are based on certain assumptions and expectations of future events and trends that are subject to risks and uncertainties. Actual future results and trends may differ materially from historical results or those reflected in any such forward-looking statements depending on a variety of factors. Important information as to these factors can be found in this document, including, among others, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” under the headings of “Overview,” “Critical Accounting Estimates” and “Financial Condition and Liquidity.” Discussion of these factors is incorporated by reference from Part I, Item 1A, “Risk Factors,” of this document, and should be considered an integral part of Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” For additional information concerning factors that may cause actual results to vary materially from those stated in the forward-looking statements, see our reports on Form 10-K, 10-Q and 8-K filed with the SEC from time to time.

Item 1A. Risk Factors.

Provided below is a cautionary discussion of what we believe to be the most important risk factors applicable to the Company. Discussion of these factors is incorporated by reference into and considered an integral part of Part II, Item 7, “Management’s Discussion and Analysis of Financial Conditions and Results of Operations.”

** Results are impacted by the effects of, and changes in, worldwide economic and capital markets conditions.* The Company operates in more than 70 countries and derives approximately two-thirds of its revenues from outside the United States. The Company’s business is subject to global competition and may be adversely affected by factors in the United States and other countries that are beyond its control, such as disruptions in financial markets, economic downturns in the form of either contained or widespread recessionary conditions, elevated unemployment levels, sluggish or uneven recovery, in specific countries or regions, or in the various industries in which the Company operates; social, political or labor conditions in specific countries or regions; natural and other disasters affecting the operations of the Company or its customers and suppliers; or adverse changes in the availability and cost of capital, interest rates, tax rates, or regulations in the jurisdictions in which the Company operates.

** The Company’s credit ratings are important to 3M’s cost of capital.* The major rating agencies routinely evaluate the Company’s credit profile and assign debt ratings to 3M. The Company currently has an AA- credit rating, with a stable

outlook, from Standard & Poor's and an Aa2 credit rating, with a stable outlook, from Moody's Investors Service. This evaluation is based on a number of factors, which include financial strength, business and financial risk, as well as transparency with rating agencies and timeliness of financial reporting. The Company's current ratings have served to lower 3M's borrowing costs and facilitate access to a variety of lenders. Failure to maintain the current ratings level would adversely affect the Company's cost of funds and could adversely affect liquidity and access to capital markets.

** The Company's results are affected by competitive conditions and customer preferences.* Demand for the Company's products, which impacts revenue and profit margins, is affected by (i) the development and timing of the introduction of competitive products; (ii) the Company's response to downward pricing to stay competitive; (iii) changes in customer order patterns, such as changes in the levels of inventory maintained by customers and the timing of customer purchases which may be affected by announced price changes, changes in the Company's incentive programs, or the customer's ability to achieve incentive goals; and (iv) changes in customers' preferences for our products, including the success of products offered by our competitors, and changes in customer designs for their products that can affect the demand for some of the Company's products.

** Foreign currency exchange rates and fluctuations in those rates may affect the Company's ability to realize projected growth rates in its sales and earnings.* Because the Company's financial statements are denominated in U.S. dollars and approximately two-thirds of the Company's revenues are derived from outside the United States, the Company's results of operations and its ability to realize projected growth rates in sales and earnings could be adversely affected if the U.S. dollar strengthens significantly against foreign currencies.

** The Company's growth objectives are largely dependent on the timing and market acceptance of its new product offerings, including its ability to continually renew its pipeline of new products and to bring those products to market.* This ability may be adversely affected by difficulties or delays in product development, such as the inability to identify viable new products, obtain adequate intellectual property protection, or gain market acceptance of new products. There are no guarantees that new products will prove to be commercially successful.

** The Company's future results are subject to fluctuations in the costs and availability of purchased components, compounds, raw materials and energy, including oil and natural gas and their derivatives, due to shortages, increased demand, supply interruptions, currency exchange risks, natural disasters and other factors.* The Company depends on various components, compounds, raw materials, and energy (including oil and natural gas and their derivatives) supplied by others for the manufacturing of its products. It is possible that any of its supplier relationships could be interrupted due to natural and other disasters and other events, or be terminated in the future. Any sustained interruption in the Company's receipt of adequate supplies could have a material adverse effect on the Company. In addition, while the Company has a process to minimize volatility in component and material pricing, no assurance can be given that the Company will be able to successfully manage price fluctuations or that future price fluctuations or shortages will not have a material adverse effect on the Company.

** Acquisitions, strategic alliances, divestitures, and other unusual events resulting from portfolio management actions and other evolving business strategies, and possible organizational restructuring could affect future results.* The Company monitors its business portfolio and organizational structure and has made and may continue to make acquisitions, strategic alliances, divestitures and changes to its organizational structure. With respect to acquisitions, future results will be affected by the Company's ability to integrate acquired businesses quickly and obtain the anticipated synergies.

** The Company's future results may be affected if the Company generates fewer productivity improvements than estimated.* The Company utilizes various tools, such as Lean Six Sigma, to improve operational efficiency and productivity. There can be no assurance that all of the projected productivity improvements will be realized.

** The Company employs information technology systems to support its business, including ongoing phased implementation of an enterprise resource planning (ERP) system on a worldwide basis over the next several years.* Security breaches and other disruptions to the Company's information technology infrastructure could interfere with the Company's operations, compromise information belonging to the Company and its customers and suppliers, and expose the Company to liability which could adversely impact the Company's business and reputation. In the ordinary course of business, the Company relies on information technology networks and systems, some of which are managed by third parties, to process, transmit and store electronic information, and to manage or support a variety of business processes and activities. Additionally, the Company collects and stores sensitive data, including proprietary business information. Despite security measures and business continuity plans, the Company's information technology networks and infrastructure may be vulnerable to damage, disruptions or shutdowns due to attack by hackers or breaches, employee error or malfeasance, power outages, computer viruses, telecommunication or utility failures, systems failures, natural disasters or other catastrophic events. There may be other challenges and risks as the Company upgrades and

standardizes its ERP system on a worldwide basis. Any such events could result in legal claims or proceedings, liability or penalties under privacy laws, disruption in operations, and damage to the Company's reputation, which could adversely affect the Company's business.

** The Company's future results may be affected by various legal and regulatory proceedings and legal compliance risks, including those involving product liability, antitrust, environmental, the U.S. Foreign Corrupt Practices Act and other anti-bribery, anti-corruption, or other matters.* The outcome of these legal proceedings may differ from the Company's expectations because the outcomes of litigation, including regulatory matters, are often difficult to reliably predict. Various factors or developments can lead the Company to change current estimates of liabilities and related insurance receivables where applicable, or make such estimates for matters previously not susceptible of reasonable estimates, such as a significant judicial ruling or judgment, a significant settlement, significant regulatory developments or changes in applicable law. A future adverse ruling, settlement or unfavorable development could result in future charges that could have a material adverse effect on the Company's results of operations or cash flows in any particular period. For a more detailed discussion of the legal proceedings involving the Company and the associated accounting estimates, see the discussion in Note 13 "Commitments and Contingencies" within the Notes to Consolidated Financial Statements.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

3M's general offices, corporate research laboratories, and certain division laboratories are located in St. Paul, Minnesota. The Company operates 93 manufacturing facilities in 30 states. The Company operates 133 manufacturing and converting facilities in 40 countries outside the United States.

3M owns the majority of its physical properties. 3M's physical facilities are highly suitable for the purposes for which they were designed. Because 3M is a global enterprise characterized by substantial intersegment cooperation, properties are often used by multiple business segments.

Item 3. Legal Proceedings.

Discussion of legal matters is incorporated by reference from Part II, Item 8, Note 13, "Commitments and Contingencies," of this document, and should be considered an integral part of Part I, Item 3, "Legal Proceedings."

Item 4. Mine Safety Disclosures.

Pursuant to Section 1503 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Act"), the Company is required to disclose, in connection with the mines it operates, information concerning mine safety violations or other regulatory matters in its periodic reports filed with the SEC. For the year 2012, the information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Act is included in Exhibit 95 to this annual report.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Equity compensation plans' information is incorporated by reference from Part III, Item 12, "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters," of this document, and should be considered an integral part of Item 5. At January 31, 2013, there were 96,263 shareholders of record. 3M's stock is listed on the New York Stock Exchange, Inc. (NYSE), the Chicago Stock Exchange, Inc., and the SWX Swiss Exchange. Cash dividends declared and paid totaled 59 cents per share for each quarter of 2012, and 55 cents per share for each quarter of 2011. Stock price comparisons follow:

Stock price comparisons (NYSE composite transactions)

| (Per share amounts) | First Quarter | Second Quarter | Third Quarter | Fourth Quarter | Total |
|---------------------|-----------------|-----------------|-----------------|-----------------|-----------------|
| 2012 High | \$ 90.00 | \$ 89.95 | \$ 94.30 | \$ 95.46 | \$ 95.46 |
| 2012 Low | 82.70 | 81.99 | 85.34 | 86.74 | 81.99 |
| 2011 High | \$ 94.16 | \$ 97.95 | \$ 98.19 | \$ 83.10 | \$ 98.19 |
| 2011 Low | 85.63 | 90.19 | 71.71 | 68.63 | 68.63 |

Issuer Purchases of Equity Securities

Repurchases of 3M common stock are made to support the Company's stock-based employee compensation plans and for other corporate purposes. In February 2011, 3M's Board of Directors authorized the repurchase of up to \$7.0 billion of 3M's outstanding common stock, with no pre-established end date. In February 2013, 3M's Board of Directors replaced the Company's existing repurchase program with a new repurchase program. This new program authorizes the repurchase of up to \$7.5 billion of 3M's outstanding common stock, with no pre-established end date.

Issuer Purchases of Equity Securities (registered pursuant to Section 12 of the Exchange Act)

| Period | Total Number of Shares Purchased (1) | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2) | Maximum Approximate Dollar Value of Shares that May Yet Be Purchased under the Plans or Programs (Millions) |
|-----------------------------------|--------------------------------------|------------------------------|--|---|
| January 1-31, 2012 | 1,263,561 | \$ 84.83 | 1,252,356 | \$ 4,483 |
| February 1-29, 2012 | 2,396,317 | \$ 87.73 | 1,745,000 | \$ 4,330 |
| March 1-31, 2012 | 2,466,062 | \$ 87.94 | 2,433,944 | \$ 4,116 |
| Total January 1-March 31, 2012 | 6,125,940 | \$ 87.22 | 5,431,300 | \$ 4,116 |
| April 1-30, 2012 | 2,452,708 | \$ 87.24 | 2,434,773 | \$ 3,904 |
| May 1-31, 2012 | 2,654,275 | \$ 85.98 | 2,363,345 | \$ 3,701 |
| June 1-30, 2012 | 2,218,795 | \$ 85.99 | 2,212,897 | \$ 3,511 |
| Total April 1-June 30, 2012 | 7,325,778 | \$ 86.41 | 7,011,015 | \$ 3,511 |
| July 1-31, 2012 | 1,588,973 | \$ 88.99 | 1,584,376 | \$ 3,370 |
| August 1-31, 2012 | 1,087,478 | \$ 92.11 | 1,066,823 | \$ 3,271 |
| September 1-30, 2012 | 807,242 | \$ 92.39 | 796,874 | \$ 3,198 |
| Total July 1-September 30, 2012 | 3,483,693 | \$ 90.75 | 3,448,073 | \$ 3,198 |
| October 1-31, 2012 | 1,050,152 | \$ 90.27 | 1,044,517 | \$ 3,104 |
| November 1-30, 2012 | 3,942,165 | \$ 89.12 | 3,941,600 | \$ 2,752 |
| December 1-31, 2012 | 3,126,478 | \$ 92.98 | 3,091,056 | \$ 2,465 |
| Total October 1-December 31, 2012 | 8,118,795 | \$ 90.76 | 8,077,173 | \$ 2,465 |
| Total January 1-December 31, 2012 | 25,054,206 | \$ 88.62 | 23,967,561 | \$ 2,465 |

- (1) The total number of shares purchased includes: (i) shares purchased under the Board's authorizations described above, and (ii) shares purchased in connection with the exercise of stock options.
- (2) The total number of shares purchased as part of publicly announced plans or programs includes shares purchased under the Board's authorizations described above.

Item 6. Selected Financial Data.

| <u>(Dollars in millions, except per share amounts)</u> | <u>2012</u> | <u>2011</u> | <u>2010</u> | <u>2009</u> | <u>2008</u> |
|--|------------------|-------------|-------------|-------------|-------------|
| Years ended December 31: | | | | | |
| Net sales | \$ 29,904 | \$ 29,611 | \$ 26,662 | \$ 23,123 | \$ 25,269 |
| Net income attributable to 3M | 4,444 | 4,283 | 4,085 | 3,193 | 3,460 |
| Per share of 3M common stock: | | | | | |
| Net income attributable to 3M — basic | 6.40 | 6.05 | 5.72 | 4.56 | 4.95 |
| Net income attributable to 3M — diluted | 6.32 | 5.96 | 5.63 | 4.52 | 4.89 |
| Cash dividends declared and paid per 3M common share | 2.36 | 2.20 | 2.10 | 2.04 | 2.00 |
| At December 31: | | | | | |
| Total assets | \$ 33,876 | \$ 31,616 | \$ 30,156 | \$ 27,250 | \$ 25,793 |
| Long-term debt (excluding portion due within one year) and long-term capital lease obligations | 4,987 | 4,563 | 4,277 | 5,204 | 5,224 |

Items included in the preceding table which had a significant impact on results are summarized as follows. 2010 included a one-time, non-cash income tax charge of \$84 million, or 12 cents per diluted share, resulting from the March 2010 enactment of the Patient Protection and Affordable Care Act, including modifications made in the Health Care and Education Reconciliation Act of 2010. 2009 results included net losses that decreased operating income by \$194 million and net income attributable to 3M by \$119 million. 2009 included restructuring actions (\$209 million pre-tax, \$128 million after tax and noncontrolling interest), which were partially offset by a gain on sale of real estate (\$15 million pre-tax, \$9 million after tax). 2008 results included net losses that decreased operating income by \$269 million and net income attributable to 3M by \$194 million. 2008 included restructuring actions (\$229 million pre-tax, \$147 million after-tax and noncontrolling interest), exit activities (\$58 million pre-tax, \$43 million after-tax) and losses related to the sale of businesses (\$23 million pre-tax, \$32 million after-tax), which were partially offset by a gain on sale of real estate (\$41 million pre-tax, \$28 million after-tax).

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is designed to provide a reader of 3M's financial statements with a narrative from the perspective of management. 3M's MD&A is presented in eight sections:

- Overview
- Results of Operations
- Performance by Business Segment
- Performance by Geographic Area
- Critical Accounting Estimates
- New Accounting Pronouncements
- Financial Condition and Liquidity
- Financial Instruments

OVERVIEW

3M is a diversified global manufacturer, technology innovator and marketer of a wide variety of products. In 2012, 3M managed its operations in six operating business segments: Industrial and Transportation; Health Care; Consumer and Office; Safety, Security and Protection Services; Display and Graphics; and Electro and Communications.

Consistent with 3M's strategy of building relevance and presence in the marketplace, the Company announced in October 2012 that it was immediately beginning to align resources and management toward a new structure comprised of five business groups: Consumer; Industrial; Health Care; Safety and Graphics; and Electronics and Energy. The company's operating results were managed on the basis of its existing segment structure through 2012, with the intention that results be managed under the new alignment once it is fully effective in the first quarter of 2013.

Fourth-quarter 2012 net income attributable to 3M was \$991 million, or \$1.41 per diluted share, compared to \$954 million, or \$1.35 per diluted share, in the fourth quarter of 2011. Fourth-quarter 2012 sales totaled \$7.4 billion, an increase of 4.2 percent from the fourth quarter of 2011. Organic local-currency sales (which include organic volume and selling price impacts) grew 4.3 percent, acquisitions added 0.9 percent to sales, and currency effects reduced sales by 1.0 percent year-on-year. From a business segment perspective, Consumer and Office led with organic local-currency sales growth of 8.7 percent, driven by consumer health care, construction and home improvement markets, and stationery and office supplies. Display and Graphics organic local-currency sales growth was 8.3 percent, led by optical systems, with sales also increasing in architectural markets, traffic safety systems and commercial graphics. Health Care organic local-currency sales grew 5.9 percent, with sales growth in all businesses, led by food safety, health information systems, skin and wound care, and oral care. Industrial and Transportation organic local-currency sales grew 3.9 percent, led by liquid filtration, aerospace, industrial adhesives and tapes, abrasives and automotive OEM. Both the advanced materials and renewable energy businesses declined year-on-year. Electro and Communications organic local-currency sales growth was 1.8 percent, with sales increases in electrical and telecommunication markets partially offset by a decline in consumer electronics-related businesses. Organic local-currency sales declined 1.7 percent in Safety, Security and Protection Services, as sales growth in infrastructure protection, personal safety and roofing granules was more than offset by a year-on-year decline in security systems.

From a geographic area perspective, fourth-quarter 2012 organic local-currency sales growth was 9.7 percent in Latin America/Canada, 5.8 percent in Asia Pacific, and 5.2 percent in the United States. Europe, Middle East and Africa (EMEA) organic local-currency sales declined 1.0 percent, impacted by a weak economy in Western Europe. Latin America/Canada sales growth was broad-based, with all six of our business segments generating positive organic local-currency sales growth, led by Health Care; Safety, Security and Protection Services; Consumer and Office; and Electro and Communications. Organic local-currency sales growth increased 11 percent in Brazil, in the face of a still-recovering economy, and Mexico grew nearly 10 percent. In Asia Pacific, Japan declined year-on-year, reflecting continued challenging economic conditions. Organic local-currency sales in the rest of Asia Pacific grew nearly 10 percent, with China up over 16 percent. Organic local-currency sales growth in the United States was led by Consumer and Office.

For total year 2012, net income attributable to 3M was \$4.444 billion, or \$6.32 per diluted share, compared to \$4.283 billion, or \$5.96 per diluted share, in 2011, an increase of 6.0 percent on a per diluted share basis. Sales totaled \$29.9 billion, an increase of 1.0 percent from 2011. Organic local-currency sales grew 2.6 percent, acquisitions added 0.8 percent to sales and currency effects reduced sales by 2.4 percent year-on-year. From a business segment perspective, organic local-currency sales growth was 4.7 percent in Health Care, 4.5 percent in Industrial and Transportation,

3.8 percent in Consumer and Office, and 2.2 percent in Safety, Security and Protection Services. Local-currency sales declined 0.8 percent in Electro and Communications and 2.4 percent in Display and Graphics. From a geographic area perspective, 2012 organic local-currency sales growth was 10.9 percent in Latin America/Canada, 4.2 percent in the United States, and 0.1 percent in Asia Pacific. Asia Pacific was impacted by a soft global consumer electronics industry. EMEA organic local-currency sales declined 0.6 percent, impacted by a weak economy in Western Europe.

Operating income in 2012 was 21.7 percent of sales, compared to 20.9 percent of sales in 2011, an improvement of 0.8 percentage points. The primary benefit (as discussed in the Results of Operations section) related to the combination of selling price increases and raw material cost decreases. Currency effects reduced diluted earnings per share by an estimated 15 cents. Net insurance recoveries in 2012 related to the 2011 earthquake and tsunami in Japan increased earnings by approximately 4 cents per diluted share. In 2011, the impact of natural disasters, net of insurance recoveries, reduced earnings by approximately 6 cents per diluted share (discussed further below). Early retirement/restructuring costs for 2012 totaled approximately 8 cents per diluted share, which included the first quarter 2012 charge of approximately 3 cents per diluted share related to a voluntary early retirement program in the United States.

The most significant non-operating items that impacted earnings were diluted shares outstanding and income taxes. Average diluted shares outstanding declined 2.2 percent to 703.3 million, which increased earnings per diluted share by approximately 14 cents. The income tax rate for 2012 was 29.0 percent compared to 27.8 percent in 2011, which decreased earnings per diluted share by approximately 11 cents.

Fourth-quarter 2011 sales totaled \$7.1 billion, an increase of 5.7 percent from the fourth quarter of 2010. Net income attributable to 3M was \$954 million, or \$1.35 per diluted share, in the fourth quarter of 2011, compared to \$928 million, or \$1.28 per diluted share, in the fourth quarter of 2010. 3M's sales growth was led by its industrial-oriented businesses, along with steady growth in consumer and health care. The business environment remained challenging, impacted by deteriorating demand in Western Europe and slower consumer electronics activity. While sales grew across much of the portfolio, sales of optical films for LCD TVs remained weak and momentum also slowed in other parts of electronics. Four of the Company's six business segments showed growth in sales, led by Industrial and Transportation at 14.3 percent, Safety, Security and Protection Services at 9.4 percent, Consumer and Office at 6.1 percent, and Health Care at 5.4 percent. A slowdown in electronics-related businesses negatively impacted both the Electro and Communications and Display and Graphics business segments. Electro and Communications sales decreased 2.7 percent and Display and Graphics sales declined 8.8 percent. Sales declined 17 percent in optical systems, which is part of Display and Graphics, impacted by end-market weakness and lower attachment rates in LCD TVs.

Fourth-quarter 2011 sales increased in every major geographic region, with Latin America/Canada up 9.7 percent, the U.S. up 7.4 percent, EMEA up 4.4 percent, and Asia Pacific up 2.8 percent. Excluding optical systems, Asia Pacific sales increased 7.6 percent. Of the 5.7 percent worldwide sales growth, 3.3 points was from the combined impact of higher organic volume of 1.3 points and selling price growth of 2.0 points, 2.3 points was from acquisitions, and 0.1 points was from favorable currency effects. Organic volume growth of 1.3 percent reflected slower growth in Asia Pacific, partially due to weakness across the electronics market and slower growth in China, in addition to weakness in Western Europe.

For total year 2011, sales increased 11.1 percent to \$29.6 billion, led by Industrial and Transportation, Safety, Security and Protection Services, and Health Care. All major geographic regions showed improvement, led by Latin America/Canada. The increase in global sales reflected improved market penetration and new product flow along with significant growth in important end-markets such as general industrial and personal safety. Net income attributable to 3M was \$4.283 billion, or \$5.96 per diluted share in 2011, compared to \$4.085 billion, or \$5.63 per diluted share, in 2010 (including the first-quarter 2010 special item discussed below).

During 2011, 3M was impacted by the first-quarter earthquake and tsunami in Japan and by the fourth-quarter flooding in Thailand. Automobile and electronic manufacturers were most impacted; thus, 3M's automotive OEM and electronics-related businesses were most affected. 3M estimates that combined direct and indirect business disruption resulting from the 2011 Japan natural disaster, net of the benefit from sales of 3M products used in the reconstruction efforts and initial insurance recoveries, plus the impact of Thailand flooding, reduced 2011 sales growth by an estimated 0.8 percentage points and earnings by approximately 6 cents per diluted share, with most of this impact in the first half of 2011. In the fourth quarter of 2011, the flooding in Thailand reduced sales growth by an estimated \$35 million and operating income by \$20 million, with this operating income effect offset by \$23 million in insurance recoveries related to the earthquake and tsunami in Japan. Japan represented approximately 9 percent of total 3M sales for total year 2011. Related to these natural disasters, no material asset or investment impairments were recorded. In addition, 3M did not have any significant issues related to these natural disasters concerning inventories, customer receivables, lease terminations, environmental exposures, guarantees, indemnifications, debt covenant compliance, or significant tax issues. 3M does have certain

insurance coverage which limited its exposure and resulted in some initial recovery in the fourth quarter of 2011 (as discussed above).

In 2010, 3M recorded a one-time, non-cash income tax charge of \$84 million, or 12 cents per diluted share, resulting from the March 2010 enactment of the Patient Protection and Affordable Care Act, including modifications made in the Health Care and Education Reconciliation Act of 2010. Refer to the special items discussion at the end of this overview section for more detail.

The following table contains sales and operating income results by business segment for the years ended December 31, 2012 and 2011. In addition to the discussion below, refer to the section entitled "Performance by Business Segment" and "Performance by Geographic Area" later in MD&A for a more detailed discussion of the sales and income results of the Company and its respective business segments (including Corporate and Unallocated). Refer to Note 15 for additional information on business segments, including Elimination of Dual Credit.

| (Dollars in millions) | 2012 | | | 2011 | | | 2012 vs. 2011 % change | |
|--|------------------|----------------|-----------------|------------------|----------------|-----------------|---------------------------|--------------|
| | Net Sales | % of Total | Oper. Income | Net Sales | % of Total | Oper. Income | Net Sales | Oper. Income |
| Business Segments | | | | | | | | |
| Industrial and Transportation | \$ 10,346 | 34.6 % | \$ 2,258 | \$ 10,073 | 34.0 % | \$ 2,057 | 2.7 % | 9.8 % |
| Health Care | 5,158 | 17.3 % | 1,646 | 5,031 | 17.0 % | 1,489 | 2.5 % | 10.6 % |
| Consumer and Office | 4,316 | 14.4 % | 930 | 4,153 | 14.0 % | 840 | 3.9 % | 10.8 % |
| Safety, Security and Protection Services | 3,802 | 12.7 % | 847 | 3,821 | 12.9 % | 814 | (0.5)% | 4.1 % |

| Elimination of Dual Credit | (511) | (1.7)% | (113) | (458) | (1.5)% | (101) | — | — |
| Total Company | \$ 29,904 | 100.0 % | \$ 6,483 | \$ 29,611 | 100.0 % | \$ 6,178 | 1.0 % | 4.9 % |

Sales in 2012 increased 1.0 percent, led by Consumer and Office at 3.9 percent, Industrial and Transportation at 2.7 percent and Health Care at 2.5 percent. Sales declined 0.5 percent in Safety, Security and Protection Services, 2.4 percent in Electro and Communications and 3.1 percent in Display and Graphics. Total company organic local-currency sales growth (which includes organic volume and selling price impacts) was 2.6 percent, acquisitions added 0.8 percent, and foreign currency impacts reduced sales by 2.4 percent. Five of 3M's six business segments posted operating income margins in excess of 21 percent in 2012. Worldwide operating income margins for 2012 were 21.7 percent, compared to 20.9 percent for 2011.

Sales in 2011 increased 11.1 percent, led by Industrial and Transportation at 19.5 percent, Safety, Security and Protection Services at 15.2 percent, and Health Care at 11.5 percent. Electro and Communications sales increased 8.6 percent and Consumer and Office sales increased 7.8 percent. Sales declined 5.4 percent in Display and Graphics, due to fewer orders for optical films. Total company organic local-currency sales growth was 4.7 percent, acquisitions added 3.3 percent, and foreign currency impacts added 3.1 percent. 3M's six business segments all posted operating income margins in excess of 20 percent in 2011 and 2010. Worldwide operating income margins for 2011 were 20.9 percent, compared to 22.2 percent for 2010.

3M generated \$5.3 billion of operating cash flow in 2012, an increase of \$16 million when compared to 2011. This followed an increase of \$110 million when comparing 2011 to 2010. Refer to the section entitled "Financial Condition and Liquidity" later in MD&A for a discussion of items impacting cash flows. In February 2013, 3M's Board of Directors authorized the repurchase of up to \$7.5 billion of 3M's outstanding common stock, which replaced the Company's previous repurchase program. This new program has no pre-established end date. In 2012, the Company purchased \$2.204 billion of treasury stock, compared to \$2.701 billion in 2011 and \$854 million in 2010. In February 2013, 3M's Board of Directors authorized a dividend increase of 7.6 percent for 2013, marking the 55th consecutive year of dividend increases for 3M. 3M's debt to total capital ratio (total capital defined as debt plus equity) was 25 percent at December 31, 2012, 2011 and 2010. 3M has an AA- credit rating with a stable outlook from Standard & Poor's and an Aa2 credit rating with a stable outlook from Moody's Investors Service. The Company has significant cash on hand and sufficient additional access to capital markets to meet its funding needs.

In 2012, the Company experienced stable to declining cost for most raw material categories and transportation fuel costs. This was driven by year-on-year cost decreases in many feedstock categories, including petroleum based materials,

minerals, metals and wood pulp based products. To date the Company is receiving sufficient quantities of all raw materials to meet its reasonably foreseeable production requirements. It is impossible to predict future shortages of raw materials or the impact any such shortages would have. 3M has avoided disruption to its manufacturing operations through careful management of existing raw material inventories and development and qualification of additional supply sources. 3M manages commodity price risks through negotiated supply contracts, price protection agreements and forward physical contracts.

On a worldwide basis, 3M's pension and postretirement plans were 87 percent funded at year-end 2012. The U.S. qualified plans, which are approximately 67 percent of the worldwide pension obligation, were 96 percent funded, the international pension plans were 81 percent funded, and the U.S. non-qualified pension plan is not funded. Asset returns in 2012 for the U.S. qualified plan were 13.6%. For the U.S. qualified pension plan, the expected long-term rate of return on an annualized basis for 2013 is 8.00%, a decrease of 0.25 percentage points from 2012. The U.S. qualified plan year-end 2012 discount rate was 4.14%, down 0.01 percentage points from the year-end 2011 discount rate of 4.15%.

3M expects to contribute approximately \$400 million to \$600 million of cash to its global pension and postretirement plans in 2013. The Company does not have a required minimum cash pension contribution obligation for its U.S. plans in 2013. 3M expects pension and postretirement benefit expense in 2013 to decrease by approximately \$100 million pre-tax, or approximately 10 cents per diluted share, when compared to 2012. Refer to "Critical Accounting Estimates" within MD&A and Note 10 (Pension and Postretirement Benefit Plans) for additional information concerning 3M's pension and post-retirement plans.

There are a few major items that will impact earnings in 2013. As discussed further above, 3M expects that a decrease in pension and postretirement expense will increase 2013 earnings, when compared to 2012, by approximately 10 cents per diluted share. 3M currently expects that its effective tax rate for 2013 will be approximately 29.5 to 30.0 percent, compared to 29.0 percent for 2012. 3M expects to incur restructuring and one-time acquisition costs of approximately \$30 million in the first quarter of 2013. Currency effects are not expected to have a material impact on earnings in 2013. Considering these items, 3M currently expects that sales growth and related incremental income, in addition to other benefits, should more than offset the items that will negatively impact earnings.

Forward-looking statements in Item 7 may involve risks and uncertainties that could cause results to differ materially from those projected (refer to the section entitled "Cautionary Note Concerning Factors That May Affect Future Results" in Item 1 and the risk factors provided in Item 1A for discussion of these risks and uncertainties).

Special Items:

Special items represent significant charges or credits that are important to understanding changes in the Company's underlying operations.

In 2010, 3M recorded a one-time, non-cash income tax charge of \$84 million, or 12 cents per diluted share, resulting from the March 2010 enactment of the Patient Protection and Affordable Care Act, including modifications made in the Health Care and Education Reconciliation Act of 2010 (collectively, the "Act"). The charge is due to a reduction in the value of the company's deferred tax asset as a result of the Act's change to the tax treatment of Medicare Part D reimbursements. This item is discussed in more detail in Note 7 (Income Taxes).

RESULTS OF OPERATIONS

Net Sales:

| | 2012 | | | 2011 | | |
|---------------------------------|-----------|-----------|-----------|-----------|-----------|-----------|
| | U.S. | Intl. | Worldwide | U.S. | Intl. | Worldwide |
| Net sales (millions) | \$ 10,528 | \$ 19,376 | \$ 29,904 | \$ 10,028 | \$ 19,583 | \$ 29,611 |
| % of worldwide sales | 35.2 % | 64.8 % | | 33.9 % | 66.1 % | |
| Components of net sales change: | | | | | | |
| Volume — organic | 2.1 % | 0.8 % | 1.2 % | 4.0 % | 3.5 % | 3.7 % |
| Price | 2.1 | 0.9 | 1.4 | 1.9 | 0.5 | 1.0 |
| Organic local-currency sales | 4.2 | 1.7 | 2.6 | 5.9 | 4.0 | 4.7 |
| Acquisitions | 0.8 | 0.8 | 0.8 | 3.0 | 3.5 | 3.3 |
| Translation | — | (3.6) | (2.4) | — | 4.7 | 3.1 |
| Total sales change | 5.0 % | (1.1)% | 1.0 % | 8.9 % | 12.2 % | 11.1 % |

In 2012, organic local-currency sales increased 2.6 percent. Organic local-currency sales growth was led by Latin America/Canada and the United States, while Asia Pacific was flat, and EMEA was down slightly. Worldwide organic local-currency sales grew 4.7 percent in Health Care, 4.5 percent in Industrial and Transportation, 3.8 percent in Consumer and Office, and 2.2 percent in Safety, Security and Protection Services. Organic local-currency sales declined 0.8 percent in Electro and Communications and 2.4 percent in Display and Graphics. Acquisitions added 0.8 percent to worldwide growth and currency impacts reduced 2012 worldwide sales growth by 2.4 percent. Worldwide selling prices rose 1.4 percent in 2012, despite selling price declines in 3M's optical systems business, where prices typically decline each year, which is common for the electronics industry.

In 2011, organic local-currency sales increased 4.7 percent. All major geographic areas showed organic local-currency sales increases, led by Latin America/Canada and the United States. Worldwide organic local-currency sales grew 10.0 percent in Industrial and Transportation, 7.1 percent in Safety, Security and Protection Services, 5.2 percent in Electro and Communications, 4.6 percent in Health Care, and 4.0 percent in Consumer and Office. Organic local-currency sales declined 7.5 percent in Display and Graphics. Acquisitions added 3.3 percent to worldwide growth and currency impacts benefited 2011 worldwide sales growth by 3.1 percent. Worldwide selling prices rose 1.0 percent in 2011, despite selling price declines in 3M's optical systems business.

Refer to the sections entitled "Performance by Business Segment" and "Performance by Geographic Area" later in MD&A for additional discussion of sales change.

Operating Expenses:

| (Percent of net sales) | 2012 | 2011 | 2010 | 2012 Versus 2011 | 2011 Versus 2010 |
|--|--------|--------|--------|------------------|------------------|
| Cost of sales | 52.4 % | 53.0 % | 51.9 % | (0.6)% | 1.1 % |
| Selling, general and administrative expenses | 20.4 | 20.8 | 20.5 | (0.4) | 0.3 |
| Research, development and related expenses | 5.5 | 5.3 | 5.4 | 0.2 | (0.1) |
| Operating income | 21.7 % | 20.9 % | 22.2 % | 0.8 % | (1.3)% |

Pension and postretirement expense increased in both 2012 and 2011. The year-on-year increases for 2012 compared to 2011, and 2011 compared to 2010, were \$95 million and \$233 million, respectively. The year-on-year increase in 2012 includes a \$26 million charge related to the first-quarter 2012 voluntary early retirement incentive program (discussed in Note 10). These increases negatively impacted cost of sales; selling, general and administrative expenses (SG&A); and research, development and related expenses (R&D).

Cost of Sales:

Cost of sales includes manufacturing, engineering and freight costs. Cost of sales, measured as a percent of net sales, was 52.4 percent in 2012, a decrease of 0.6 percentage points from 2011. The net impact of selling price/raw material cost changes was the primary factor that decreased cost of sales as a percent of sales, as selling prices increased 1.4 percent and raw material costs decreased approximately 2 percent. This benefit was partially offset by higher pension and postretirement costs.

Cost of sales, measured as a percent of net sales, was 53.0 percent in 2011, an increase of 1.1 percentage points from 2010. On a dollar basis, selling price increases largely offset raw material inflation for total year 2011, as selling prices increased 1 percent year-on-year and raw material prices increased approximately 4 percent year-on-year. However, measured as a percent of sales, selling price/raw material impacts accounted for approximately 0.5 percentage points of the cost of sales increase. Cost of sales as a percent of net sales was also negatively impacted by higher pension and postretirement costs. These impacts were partially offset by organic sales volume growth of 3.7 percent.

Selling, General and Administrative Expenses:

Selling, general and administrative (SG&A) expenses decreased \$68 million, or 1.1 percent, in 2012 when compared to 2011. In addition to cost-control and other productivity efforts, 3M experienced some savings from its first-quarter 2012 voluntary early retirement incentive program and other restructuring actions. These benefits more than offset increases related to acquisitions, higher year-on-year pension and postretirement expense, and restructuring expenses. SG&A in 2012 included increases from acquired businesses which were not in 3M's full-year 2011 base spending, primarily related to the 2011 acquisitions of Winterthur Technologie AG and the do-it-yourself and professional business of GPI Group, in addition to SG&A spending related to the 2012 acquisitions of Ceradyne, Inc., Federal Signal Technologies Group, and CodeRyte, Inc. SG&A, measured as a percent of sales, was 20.4 percent in 2012, a decrease of 0.4 percentage points when compared to 2011.

SG&A expenses increased 13 percent in 2011 when compared to 2010, due to several factors. Approximately 5 percentage points of this growth in SG&A was due to increases from acquired businesses not in 3M's full year 2010 base spending, which primarily related to SG&A spending for the Winterthur Technologie AG, Arizant Inc., Cogent Inc. and Attenti Holdings S.A. acquisitions. Another 3 percentage points of growth in 2011 SG&A was due to foreign exchange effects, which resulted in higher translated costs from 3M's non-U.S. subsidiaries. Finally, 2011 SG&A increased in part due to higher year-on-year pension and postretirement expense and continued investments to support future growth, such as sales representatives, advertising and promotional investments. SG&A expenses, measured as a percent of net sales, increased 0.3 percentage points in 2011 compared to 2010.

Research, Development and Related Expenses:

Research, development and related expenses (R&D) increased 4.1 percent in 2012 compared to 2011 and increased 9.5 percent in 2011 compared to 2010, as 3M continued to support its key growth initiatives. In 2012, these investments, along with higher pension and postretirement expense, were partially offset by cost-control efforts and savings from 3M's first-quarter 2012 voluntary early retirement incentive program. In 2011, R&D expense increased versus 2010 due to R&D related to businesses acquired in the last 12 months, foreign exchange effects, and higher pension and postretirement expense, in addition to 3M's continued investment in new products. R&D, measured as a percent of sales, was 5.5 percent in 2012, compared to 5.3 percent in 2011 and 5.4 percent in 2010.

Operating Income:

3M uses operating income as one of its primary business segment performance measurement tools. Operating income was 21.7 percent of sales in 2012, compared to 20.9 percent of sales in 2011, an improvement of 0.8 percentage points. The improvement was driven by a 1.6 percentage point benefit from the combination of selling price increases and raw material cost decreases. This was partially offset by increased pension/postretirement benefit costs and acquisition impacts, each of which reduced margins by 0.3 percentage points, and other net impacts, which decreased margins by 0.2 percentage points. Operating income was 20.9 percent of sales in 2011, compared to 22.2 percent of sales in 2010, primarily due to higher cost of sales (as a percent of sales) in 2011 when compared to 2010.

Interest Expense and Income:

| <u>(Millions)</u> | <u>2012</u> | <u>2011</u> | <u>2010</u> |
|-------------------|---------------|---------------|---------------|
| Interest expense | \$ 171 | \$ 186 | \$ 201 |
| Interest income | (39) | (39) | (38) |
| Total | <u>\$ 132</u> | <u>\$ 147</u> | <u>\$ 163</u> |

Interest Expense: Interest expense decreased in both 2012 and 2011. The 2012 decrease was driven by lower average international debt balances, while the 2011 decrease was attributable to lower U.S. debt balances. Both years were favorably impacted by lower interest rates on U.S. debt.

Interest Income: In 2012, lower U.S. cash balances and lower interest rates internationally were offset by higher international cash balances and higher interest rates in the U.S. In 2011, interest income increased slightly, as higher international cash balances and better investment yields were largely offset by a lower U.S. cash balance.

Provision for Income Taxes:

| <u>(Percent of pre-tax income)</u> | <u>2012</u> | <u>2011</u> | <u>2010</u> |
|------------------------------------|---------------|---------------|---------------|
| Effective tax rate | <u>29.0 %</u> | <u>27.8 %</u> | <u>27.7 %</u> |

The effective tax rate for 2012 was 29.0 percent, compared to 27.8 percent in 2011, an increase of 1.2 percentage points. Various factors increased or decreased the effective tax rate when compared to the same periods last year. The primary factors that increased the Company's effective tax rate year-on-year include international taxes, specifically with respect to the corporate reorganization of a wholly owned international subsidiary (which benefited 2011), state income taxes, lower domestic manufacturer's deduction, and the lapse of the U.S. research and development credit. These and other factors, when compared to 2011, increased the 2012 effective tax rate by 2.1 percentage points. Factors that decreased the Company's effective tax rate year-on-year include international taxes as a result of changes to the geographic mix of income before taxes and adjustments to its income tax reserves. These factors, when compared to last year, decreased the effective tax rate 0.9 percentage points.

The effective tax rate for 2011 was 27.8 percent, compared to 27.7 percent in 2010, an increase of 0.1 percentage points. The year-on-year change in international income taxes increased the effective tax rate for 2011 when compared to 2010 by approximately 2.5 percentage points, which includes a partial offsetting benefit from the corporate reorganization of a wholly owned international subsidiary in 2011. This 2.5 percentage point net increase was due primarily to certain 2010 tax benefits, which did not repeat in 2011, related to net operating losses partially offset by a valuation allowance resulting from the 2010 corporate alignment transactions that allowed the Company to increase its ownership of a foreign subsidiary. These transactions are described in the section of Note 5 entitled "Purchase and Sale of Subsidiary Shares and Transfers of Ownership Interest Involving Non-Wholly Owned Subsidiaries". Other significant items impacting the year-on-year comparison include a one-time 2010 income tax charge of \$84 million, which benefited the 2011 tax rate when compared to 2010 by 1.5 percentage points, as this charge did not repeat in 2011. The Company's effective tax rate also benefited during 2011 when compared to 2010 by approximately 0.7 percentage points from adjustments to its income tax reserves.

On January 2, 2013, the American Taxpayer Relief Act of 2012 was signed into law. Included in this Act was the extension of the research and development credit for years 2012 and 2013. As this Act was enacted during 2013, the impacts of this law are not included in the 2012 financial results. The Company anticipates a beneficial impact on the effective tax rate in 2013 for both the 2012 and 2013 research and development credit.

The Company currently expects that its effective tax rate for total year 2013 will be approximately 29.5 to 30.0 percent. The rate can vary from quarter to quarter due to discrete items, such as the settlement of income tax audits and changes in tax laws, as well as recurring factors, such as the geographic mix of income before taxes.

Refer to Note 7 for further discussion of income taxes.

Net Income Attributable to Noncontrolling Interest:

| <u>(Millions)</u> | <u>2012</u> | <u>2011</u> | <u>2010</u> |
|--|--------------|--------------|--------------|
| Net income attributable to noncontrolling interest | <u>\$ 67</u> | <u>\$ 74</u> | <u>\$ 78</u> |

Net income attributable to noncontrolling interest represents the elimination of the income or loss attributable to non-3M ownership interests in 3M consolidated entities. The changes in noncontrolling interest amounts are primarily related to Sumitomo 3M Limited (Japan), which is 3M's most significant consolidated entity with non-3M ownership interests. As of December 31, 2012, 3M's effective ownership in Sumitomo 3M Limited is 75 percent.

Currency Effects:

3M estimates that year-on-year currency effects, including hedging impacts, decreased net income attributable to 3M by approximately \$103 million in 2012 and increased net income attributable to 3M by approximately \$154 million in 2011. These estimates include the effect of translating profits from local currencies into U.S. dollars; the impact of currency fluctuations on the transfer of goods between 3M operations in the United States and abroad; and transaction gains and losses, including derivative instruments designed to reduce foreign currency exchange rate risks and the negative impact of swapping Venezuelan bolivars into U.S. dollars. 3M estimates that year-on-year derivative and other transaction gains and losses increased net income attributable to 3M by approximately \$49 million in 2012 and had an immaterial impact on net income attributable to 3M in 2011.

PERFORMANCE BY BUSINESS SEGMENT

Disclosures relating to 3M's business segments are provided in Item 1, Business Segments. Financial information and other disclosures are provided in the Notes to the Consolidated Financial Statements. The reportable segments are Industrial and Transportation; Health Care; Consumer and Office; Safety, Security and Protection Services; Display and Graphics; and Electro and Communications. Information related to 3M's business segments is presented in the tables that follow. Organic local-currency sales include both organic volume impacts plus selling price impacts. Acquisition impacts are measured separately for the first twelve months of the acquisition. The acquisition and divestiture impacts, if any, foreign currency translation impact and total sales change are also provided for each business segment. Any references to EMEA relate to Europe, Middle East and Africa on a combined basis.

In addition to these six operating business segments, 3M assigns certain costs to "Corporate and Unallocated," which is presented separately in the preceding business segments table and in Note 15. Corporate and unallocated includes a variety of miscellaneous items, such as corporate investment gains and losses, certain derivative gains and losses, certain insurance-related gains and losses, certain litigation and environmental expenses, corporate restructuring charges and certain under- or over-absorbed costs (e.g. pension, stock-based compensation) that the Company may choose not to allocate directly to its business segments. Because this category includes a variety of miscellaneous items, it is subject to fluctuation on a quarterly and annual basis. The primary items driving higher expenses in Corporate and Unallocated in 2012 when compared to 2011 were pension and postretirement expense, as a portion of the 2012 increase in these expenses were not allocated directly to the six operating business segments (\$63 million), and the impact of an increase in other environmental insurance receivables, which benefited 2012 by \$15 million (as discussed in Note 13). The impacts of changes in respirator mask/asbestos liabilities and receivables netted to a \$32 million charge in 2012, which was similar to 2011, resulting in a minimal year-on-year effect. The primary item driving higher 2011 expenses when compared to 2010 relates to pension and postretirement expense, as a portion of the 2011 increase in these expenses was not allocated directly to the six operating business segments.

The following discusses total year results for 2012 compared to 2011, and also discusses 2011 compared to 2010, for each business segment.

Industrial and Transportation Business (34.6% of consolidated sales):

| | 2012 | 2011 | 2010 |
|-----------------------------|-----------|-----------|----------|

The Industrial and Transportation segment serves a broad range of markets, such as automotive original equipment manufacturer (OEM) and automotive aftermarket (auto body shops and retail), renewable energy, electronics, paper and packaging, food and beverage, and appliance. Industrial and Transportation products include tapes, a wide variety of coated and non-woven abrasives, adhesives, specialty materials, filtration products, energy control products, closure systems for personal hygiene products, acoustic systems products, and components and products that are used in the manufacture, repair and maintenance of automotive, marine, aircraft and specialty vehicles.

Year 2012 results:

Sales in Industrial and Transportation totaled \$10.3 billion, up 2.7 percent in U.S. dollars. Organic local-currency sales increased 4.5 percent, acquisitions added 1.1 percent, and foreign currency translation reduced sales by 2.9 percent. Acquisitions growth was primarily driven by Winterthur Technologie AG (Winterthur) in the abrasives market, Ceradyne, Inc. (Ceradyne) in the advanced technical ceramics market, and Alpha Beta Enterprise Co. Ltd. (Alpha Beta) in industrial tapes, all of which are discussed further below. On an organic local-currency basis, sales growth was strongest in automotive OEM, aerospace, abrasives and filtration. On an organic local-currency basis, sales declined in renewable energy, impacted by weak end market demand.

Geographically, organic local-currency sales increased 7 percent in both the United States and Latin America/Canada, 3.5 percent in Asia Pacific, and 1 percent in EMEA.

Operating income was \$2.3 billion in 2012, 9.8 percent higher than 2011, with the primary benefit related to the combination of selling price increases and raw material cost decreases. Operating income growth was led by the United States. Operating income margins increased by 1.4 percentage points to 21.8 percent.

As disclosed in Note 2, in November 2012, 3M acquired Ceradyne, Inc. (Ceradyne), which is headquartered in Costa Mesa, California. Ceradyne is involved in the development and production of advanced technical ceramics for demanding applications in the automotive, oil and gas, solar, industrial, electronics and defense industries.

Year 2011 results:

Sales in Industrial and Transportation increased 19.5 percent to \$10.1 billion, with 10.0 percent of this increase attributable to organic local-currency growth. Acquisitions increased sales by 5.9 percent, primarily driven by Winterthur and Alpha Beta (discussed below). Foreign currency impacts added 3.6 percent to 2011 sales growth. Geographically, sales increased in all major regions, led by Asia Pacific and Europe. Organic local-currency sales growth was broad-based across the portfolio, led by renewable energy, aerospace and aircraft maintenance, energy and advanced materials, abrasives systems, and industrial adhesives and tapes. In addition, despite the Japan and Thailand natural disasters, 3M also achieved growth in its automotive aftermarket and automotive OEM businesses.

3M continued to invest in its Industrial and Transportation business. In March 2011, 3M acquired a controlling interest in Winterthur via completion of a public tender offer. Winterthur, based in Zug, Switzerland, is a leading global supplier of precision grinding technology serving customers in the area of hard-to-grind precision applications in industrial, automotive, aircraft, and cutting tools. In addition, in February 2011, 3M completed its acquisition of the tape-related assets of Alpha Beta, a leading manufacturer of box sealing tape and masking tape headquartered in Taipei, Taiwan.

Operating income was \$2.1 billion in 2011, 17.3 percent higher than 2010. 3M achieved operating income margins of 20.4 percent, even with continued investments to support growth.

Investment:

In March 2005, 3M's automotive business completed the purchase of 19 percent of TI&M Beteiligungsgesellschaft mbH (TI&M) for approximately \$55 million. TI&M is the parent company of I&T Innovation Technology Entwicklungsund Holding Aktiengesellschaft (I&T), an Austrian maker of flat flexible cable and circuitry. Pursuant to a Shareholders Agreement, 3M marketed I&T's flat flexible wiring systems for automotive interior applications to the global automotive market. I&T filed a petition for bankruptcy protection in August 2006. As part of its agreement to purchase the shares of TI&M, the Company was granted a put option that gave the Company the right to sell back its entire ownership interest in TI&M to the other investors from whom the Company acquired its 19 percent interest. The put option became exercisable January 1, 2007. The Company exercised the put option and recovered approximately \$25 million of its investment from one of the investors based in Belgium in February 2007. The other two TI&M investors from whom the Company purchased its shares filed a bankruptcy petition in Austria in January 2007. The Company has recovered approximately 6.7 million Euros through the Austrian bankruptcy process. The Company then pursued recovery from the bank that held the 3M purchase price paid to the two bankrupt investors, and in March 2012 recovered 4.5 million Euros, leaving a balance of 7.4 million Euros (approximately \$10 million). In September 2012, 3M Austria commenced proceedings in the Commercial Court of Vienna against the co-sellers of the shares to recover the remaining balance plus accrued interest pursuant to the terms of the Share Purchase Agreement and Austrian law. The Company believes collection of its remaining investment is probable and, as a result, no impairment reserve has been recorded.

Health Care Business (17.3% of consolidated sales):

| | <u>2012</u> | <u>2011</u> | <u>2010</u> |
|-----------------------------|---------------|---------------|---------------|
| Sales (millions) | \$ 5,158 | \$ 5,031 | \$ 4,513 |
| Sales change analysis: | | | |
| Organic local currency | 4.7 % | 4.6 % | 4.1 % |
| Acquisitions | 0.3 | 3.8 | 1.2 |
| Divestitures | — | — | (0.2) |
| Translation | (2.5) | 3.1 | 0.3 |
| Total sales change | <u>2.5 %</u> | <u>11.5 %</u> | <u>5.4 %</u> |
| Operating income (millions) | \$ 1,646 | \$ 1,489 | \$ 1,362 |
| Percent change | 10.6 % | 9.3 % | 1.1 % |
| Percent of sales | <u>31.9 %</u> | <u>29.6 %</u> | <u>30.2 %</u> |

The Health Care segment serves markets that include medical clinics and hospitals, pharmaceuticals, dental and orthodontic practitioners, health information systems, and food manufacturing and testing. Products and services provided to these and other markets include medical and surgical supplies, skin health and infection prevention products, inhalation and transdermal drug delivery systems, dental and orthodontic products (oral care), health information systems, and food safety products.

Year 2012 results:

Health Care sales totaled \$5.2 billion, an increase of 2.5 percent in U.S. dollars. Organic local-currency sales increased 4.7 percent, led by food safety, health information systems, and skin/wound care. Sales declined year-on-year in drug delivery systems. Acquisitions added 0.3 percent, as 3M further strengthened its health information systems business in April 2012 by acquiring CodeRyte, Inc., which provides clinical natural language processing technology and computer-assisted coding solutions for outpatient providers. Foreign currency translation reduced sales by 2.5 percent.

On a geographic basis, organic local-currency sales increased 12.5 percent in Latin America/Canada, 10 percent in Asia Pacific, 4 percent in the United States, and 1 percent in EMEA.

Operating income increased 10.6 percent to \$1.6 billion. Operating income margins were 31.9 percent in 2012 compared to 29.6 percent in 2011, driven by strong manufacturing cost control, improved utilization and production efficiencies. Operating income grew in all major geographic areas.

Year 2011 results:

Health Care sales increased 11.5 percent to \$5.0 billion. Organic local-currency sales increased 4.6 percent and acquisition added 3.8 percent. Acquisition growth primarily related to Arizant Inc., a leading manufacturer of patient warming solutions designed to prevent hypothermia in surgical settings. Currency impacts increased sales by 3.1 percent in Health Care. On a geographic basis, all regions posted positive sales growth. Asia Pacific, Latin America/Canada, and Europe all reported sales growth of 10 percent or more, while the U.S. grew at 9 percent. Organic local-currency sales growth increased in the food safety, health information systems, infection prevention, skin and wound care, and oral care businesses. Sales in the drug-delivery systems business increased in the fourth quarter of 2011 compared to the same period in 2010, but were down slightly for total-year 2011 when compared to 2010.

Operating income in Health Care increased 9.3 percent in 2011 to \$1.5 billion. Operating income margins were 29.6 percent, compared to 30.2 percent in 2010, with this decrease due in part to growth investments in the health information systems and infection prevention businesses. 3M also invested in emerging markets to improve market penetration levels. The year-on-year decline in operating income margins was also due in part to sales declines in drug delivery systems.

Consumer and Office Business (14.4% of consolidated sales):

| | <u>2012</u> | <u>2011</u> | <u>2010</u> |
|-----------------------------|---------------|---------------|---------------|
| Sales (millions) | \$ 4,316 | \$ 4,153 | \$ 3,853 |
| Sales change analysis: | | | |
| Organic local currency | 3.8 % | 4.0 % | 7.1 % |
| Acquisitions | 2.0 | 1.4 | 2.9 |
| Translation | (1.9) | 2.4 | 1.0 |
| Total sales change | <u>3.9 %</u> | <u>7.8 %</u> | <u>11.0 %</u> |
| Operating income (millions) | \$ 930 | \$ 840 | \$ 840 |
| Percent change | 10.8 % | — % | 12.3 % |
| Percent of sales | <u>21.6 %</u> | <u>20.2 %</u> | <u>21.8 %</u> |

The Consumer and Office segment serves markets that include consumer retail, office retail, home improvement, building maintenance and other markets. Products in this segment include office supply products, stationery products, construction and home improvement products (do-it-yourself), home care products, protective material products, certain consumer retail personal safety products, and consumer health care products.

Year 2012 results:

Sales in Consumer and Office totaled \$4.3 billion, up 3.9 percent in U.S. dollars. Organic local-currency sales increased 3.8 percent, acquisitions added 2.0 percent, and foreign currency translation reduced sales by 1.9 percent. Organic local-currency sales growth was led by the consumer health care and construction and home improvement businesses. Organic local-currency sales increased slightly in stationery and office supplies, impacted by continued softness in the office wholesale and retail markets. Acquisition growth was largely due to the October 2011 acquisition of the do-it-yourself and professional business of GPI Group. GPI is a manufacturer and marketer of home improvement products such as tapes, hooks, insulation and floor protection products and accessories. The addition of GPI's products expands 3M's product portfolio in core and complementary categories in the construction and home improvement markets.

On a geographic basis, organic local-currency sales increased 9.5 percent in Latin America/Canada, 5 percent in Asia Pacific, and 4 percent in the United States. EMEA organic local-currency sales decreased 2 percent.

Consumer and Office operating income increased 10.8 percent to \$930 million. Operating income margins were 21.6 percent, compared to 20.2 percent in 2011, as all businesses and major geographic areas posted operating income increases. Consumer and Office benefited from the combination of selling price increases and raw material cost decreases, in addition to cost-control efforts.

In December 2011, 3M (Consumer and Office Business) entered into a definitive agreement to acquire the Office and Consumer Products business of Avery Dennison Corp. (Avery). 3M and Avery withdrew from the regulatory approval process for this acquisition in September 2012 and subsequently announced that they had terminated this agreement in October 2012.

Year 2011 results:

Sales in Consumer and Office increased 7.8 percent in 2011 to \$4.2 billion, with all businesses posting positive sales growth. Organic local-currency sales increased 4.0 percent and acquisitions added 1.4 percent. Acquisition growth was largely due to the October 2011 acquisition of the do-it-yourself and professional business of GPI Group and the April 2010 acquisition of the A-One branded label business and related operations. A-One is the largest branded label business in Asia and the second largest worldwide. 3M also acquired Hybrivet Systems Inc. in the first quarter of 2011, a provider of instant-read products to detect lead and other contaminants and toxins. Foreign currency impacts contributed 2.4 percent to sales growth in the Consumer and Office segment.

On a geographic basis, sales increased in all regions, led by Asia Pacific, Latin America/Canada and Europe, which all had sales growth rates in excess of 10 percent. U.S. sales also grew, albeit at a slower rate.

Consumer and Office operating income was flat when comparing 2011 to 2010, reflecting continued ongoing investments in developing economies in brand development and marketing and sales coverage. Even with these investments, Consumer and Office generated operating income margins of 20.2 percent.

Safety, Security and Protection Services Business (12.7% of consolidated sales):

| | 2012 | 2011 | 2010 |
|-----------------------------|----------|----------|----------|
| Sales (millions) | \$ 3,802 | \$ 3,821 | \$ 3,316 |
| Sales change analysis: | | | |
| Organic local currency | 2.2 % | 7.1 % | 6.1 % |
| Acquisitions | — | 4.7 | 1.2 |
| Translation | (2.7) | 3.4 | 0.5 |
| Total sales change | (0.5)% | 15.2 % | 7.8 % |
| Operating income (millions) | \$ 847 | \$ 814 | \$ 709 |
| Percent change | 4.1 % | 14.9 % | (2.6)% |
| Percent of sales | 22.3 % | 21.3 % | 21.4 % |

The Safety, Security and Protection Services segment serves a broad range of markets that increase the safety, security and productivity of workers, facilities and systems. Major product offerings include personal protection products, cleaning and protection products for commercial establishments, safety and security products (including border and civil security solutions), roofing granules for asphalt shingles, infrastructure protection products used in the oil and gas pipeline markets, and track and trace solutions.

Year 2012 results:

Safety, Security and Protection Services sales totaled \$3.8 billion, down 0.5 percent in U.S. dollars. Organic local-currency sales grew 2.2 percent and foreign currency translation reduced sales by 2.7 percent. Organic local-currency sales growth was led by infrastructure protection and personal safety, with growth also in building and commercial services and roofing granules.

2012 organic local-currency sales declined 18 percent in security systems, as government spending for security solutions has been declining over the last few years. As discussed later in the "Critical Accounting Estimates" section, 3M will continue to monitor this business to assess whether long-term expectations have been significantly impacted such that an asset or goodwill impairment test would be required. The Company completed its annual goodwill impairment test in the fourth quarter of 2012, with no impairment indicated.

Geographically, organic local-currency sales increased 19 percent in Latin America/Canada. Organic local-currency sales were flat in Asia Pacific and the United States, and declined 2 percent in EMEA.

The combination of selling price increases and raw material cost reductions, plus factory efficiencies, drove a 4.1 percent increase in operating income. Operating income margins increased 1.0 percentage points to 22.3 percent.

Year 2011 results:

Safety, Security and Protection Services sales increased 15.2 percent in 2011. H1N1-related comparisons reduced 2011 sales growth by 2.5 percent, as 3M generated sales related to the H1N1 virus in the first three quarters of 2010. Even with this difficult comparison, organic local-currency sales growth was 7.1 percent. Acquisitions added 4.7 percent, with this benefit primarily related to Attenti Holdings S.A. and Cogent Inc., which were acquired in the fourth quarter of 2010. Attenti Holdings S.A. is a supplier of remote people-monitoring technologies used for offender-monitoring applications and to assist eldercare facilities in monitoring and enhancing the safety of patients. Cogent Inc. is a provider of finger, palm, face and iris biometric systems for governments, law enforcement agencies, and commercial enterprises. Foreign currency effects added 3.4 percent to 2011 sales. All geographic regions posted positive sales growth, with sales growth led by Asia Pacific, Latin America/Canada, and the U.S. These three regions all had sales growth in excess of 15 percent.

Sales increased in all businesses. Sales dollar increases were largest in personal protection products, security systems, building and commercial services, and infrastructure protection. Sales growth in personal protection products, or more specifically, respiratory products, was hampered by H1N1-related comparisons, partially offset by some modest additional sales of personal protective equipment related to the cleanup efforts in Japan.

Operating income for 2011 rose 14.9 percent to \$814 million. 3M achieved a 21.3 percent operating income margin, despite H1N1-related comparisons that negatively impacted results.

Display and Graphics Business (11.9% of consolidated sales):

| | 2012 | 2011 | 2010 |
|-----------------------------|----------|----------|----------|
| Sales (millions) | \$ 3,560 | \$ 3,674 | \$ 3,884 |
| Sales change analysis: | | | |
| Organic local currency | (2.4)% | (7.5)% | 23.0 % |
| Acquisitions | 0.9 | 0.1 | — |
| Translation | (1.6) | 2.0 | 1.0 |
| Total sales change | (3.1)% | (5.4)% | 24.0 % |
| Operating income (millions) | \$ 693 | \$ 788 | \$ 946 |
| Percent change | (12.1)% | (16.6)% | 60.3 % |
| Percent of sales | 19.5 % | 21.5 % | 24.4 % |

The Display and Graphics segment serves markets that include electronic display, traffic safety and commercial graphics. This segment includes optical film solutions for LCD electronic displays; reflective sheeting for transportation safety; commercial graphics sheeting and systems; architectural surface and lighting solutions; and mobile interactive solutions, including mobile display technology, visual systems products, and computer screen films. The optical film business provides films that serve numerous market segments of the electronic display industry. 3M provides distinct products for five market segments, including products for: 1) LCD computer monitors 2) LCD televisions 3) handheld devices such as cellular phones and tablets 4) notebook PCs and 5) automotive displays. The optical business includes a number of different products that are protected by various patents and groups of patents. These patents provide varying levels of exclusivity to 3M for a number of such products. As some of 3M's optical film patents expire at the end of 2013 and over several years thereafter, 3M will likely see more competition in these products. 3M continues to innovate in the area of optical films and files patents on its new technology and products. 3M's proprietary manufacturing technology and know-how also provide a competitive advantage to 3M independent of its patents.

Year 2012 results:

Sales in Display and Graphics were \$3.6 billion, down 3.1 percent in U.S. dollars. Organic local-currency sales decreased 2.4 percent, as optical systems sales declined 10 percent, driven by lower optical film volumes for LCD TVs. Organic local-currency sales increased in both commercial graphics and architectural markets and were up slightly in traffic safety systems. Acquisitions added 0.9 percent to sales growth. This related to the September 2012 purchase of assets that comprised the business of Federal Signal Technologies Group from Federal Signal Corp. This business focuses on electronic toll collection and parking management hardware and software services. Foreign currency translation reduced sales by 1.6 percent.

Organic local-currency sales increased 11 percent in Latin America/Canada and 6 percent in the United States. Organic local-currency sales declined 4 percent in EMEA and 6 percent in Asia Pacific, where the decrease in optical systems sales was a major factor.

Operating income in 2012 totaled \$693 million, down 12.1 percent. Operating income margins were 19.5 percent of sales, compared to 21.5 percent in 2011. The year-on-year decline was largely attributable to the decline in optical systems, along with softness in traffic safety systems, which has been impacted by lower government spending.

Year 2011 results:

Sales in Display and Graphics were \$3.7 billion in 2011, a decline of 5.4 percent in U.S. dollars. Organic local-currency sales declined 7.5 percent. Acquisitions added 0.1 percent to sales growth and foreign currency impacts increased sales by 2.0 percent. Optical Systems sales decreased 17 percent due to lower year-on-year LCD TV-related sales over the last three quarters of 2011. Sales grew in commercial graphics and architectural markets. Traffic safety systems also posted sales growth, which was all currency related. Sales increased in Latin America/Canada and the U.S., but declined in Europe. Sales also declined in Asia Pacific, where the decline in optical systems sales was a major factor.

Operating income in 2011 totaled \$788 million, down 16.6 percent from 2010. 3M achieved 21.5 percent operating income margins in this business segment, as productivity improvements helped to partially offset negative impacts from lower sales of optical films for LCD TVs, impacted by LCD TV volume reductions, as well as continued LCD selling price declines.

Electro and Communications Business (10.8% of consolidated sales):

| | <u>2012</u> | <u>2011</u> | <u>2010</u> |
|-----------------------------|---------------|---------------|---------------|
| Sales (millions) | \$ 3,228 | \$ 3,306 | \$ 3,043 |
| Sales change analysis: | | | |
| Organic local currency | (0.8)% | 5.2 % | 26.1 % |
| Acquisitions | — | 0.1 | — |
| Divestitures | — | — | (0.4) |
| Translation | (1.6) | 3.3 | 1.8 |
| Total sales change | <u>(2.4)%</u> | <u>8.6 %</u> | <u>27.5 %</u> |
| Operating income (millions) | \$ 691 | \$ 712 | \$ 670 |
| Percent change | (2.8)% | 6.2 % | 90.6 % |
| Percent of sales | <u>21.4 %</u> | <u>21.5 %</u> | <u>22.0 %</u> |

The Electro and Communications segment serves the electrical, electronics and communications industries, including electrical utilities; electrical construction, maintenance and repair; original equipment manufacturer (OEM) electrical and electronics; computers and peripherals; consumer electronics; telecommunications central office, outside plant and enterprise; as well as aerospace, military, automotive and medical markets; with products that enable the efficient transmission of electrical power and speed the delivery of information. Products include electronic and interconnect solutions, micro interconnect systems, high-performance fluids, high-temperature and display tapes, telecommunications products, electrical products, and touch screens and touch monitors.

Year 2012 results:

Electro and Communications sales totaled \$3.2 billion, down 2.4 percent in U.S. dollars. Organic local-currency sales declined 0.8 percent and foreign currency translation reduced sales by 1.6 percent. Organic local-currency sales declined in the consumer electronics-related businesses and telecommunications markets business. Organic local-currency sales increased in 3M's touch systems and electrical markets businesses.

On a geographic basis, organic local-currency sales increased 12 percent in Latin America/Canada and 5 percent in the United States. Organic local-currency sales declined 4 percent in both EMEA and Asia Pacific.

Operating income decreased 2.8 percent to \$691 million in 2012. Operating income margins were 21.4 percent, similar to the 21.5 percent operating income margins achieved in 2011.

Year 2011 results:

Electro and Communications sales were \$3.3 billion in 2011, an increase of 8.6 percent in U.S. dollars. Organic local-currency sales increased 5.2 percent and acquisitions added 0.1 percent to sales growth. Foreign currency impacts added 3.3 percent to 2011 sales growth. Sales expanded in all geographic regions, led by greater than 10 percent sales increases in both Europe and Latin America/Canada. From a business standpoint, sales growth was led by 3M's electronics markets materials business and the electrical markets business. The telecom business also posted solid sales growth, while sales declined in the electronic solutions business.

Operating income increased 6.2 percent to \$712 million in 2011, driven by higher year-on-year sales growth. Operating income margins were 21.5 percent, slightly lower than 2010.

PERFORMANCE BY GEOGRAPHIC AREA

While 3M manages its businesses globally and believes its business segment results are the most relevant measure of performance, the Company also utilizes geographic area data as a secondary performance measure. Export sales are generally reported within the geographic area where the final sales to 3M customers are made. A portion of the products or components sold by 3M's operations to its customers are exported by these customers to different geographic areas. As customers move their operations from one geographic area to another, 3M's results will follow. Thus, net sales in a particular geographic area are not indicative of end-user consumption in that geographic area. Financial information related to 3M operations in various geographic areas is provided in Note 16.

A summary of key information and discussion related to 3M's geographic areas follow:

| | 2012 | | | | | |
|---------------------------------|---------------|--------------|------------------------------|----------------------|-------------------|-----------|
| | United States | Asia Pacific | Europe, Middle East & Africa | Latin America/Canada | Other Unallocated | Worldwide |
| Net sales (millions) | \$ 10,528 | \$ 9,092 | \$ 6,730 | \$ 3,572 | \$ (18) | \$ 29,904 |
| % of worldwide sales | 35.2 % | 30.4 % | 22.5 % | 11.9 % | — | 100.0 % |
| Components of net sales change: | | | | | | |
| Volume — organic | 2.1 % | 1.3 % | (2.8)% | 6.9 % | — | 1.2 % |
| Price | 2.1 | (1.2) | 2.2 | 4.0 | — | 1.4 |

| Percent change | 18.4 % | (2.9)% | 1.2 % | 5.5 % | — | 4.9 % |

For total year 2012, as shown in the preceding table, sales rose 1.0 percent, with organic volume increases of 1.2 percent and selling price increases of 1.4 percent. Acquisitions added 0.8 percent, while foreign currency effects reduced sales by 2.4 percent. Organic local-currency sales growth was led by Latin America/Canada at 10.9 percent and the United States at 4.2 percent. Organic local-currency sales increased in Asia Pacific by 0.1 percent and declined in EMEA by 0.6 percent. For 2012, international operations represented 64.8 percent of 3M's sales.

| | 2011 | | | | | |
|---------------------------------|---------------|--------------|------------------------------|----------------------|-------------------|-----------|
| | United States | Asia Pacific | Europe, Middle East & Africa | Latin America/Canada | Other Unallocated | Worldwide |

| Latin America and Canada | 14,083 | 12,942 | 12,658 | 111 | 102 | 81 | 573 | 529 |
| Total Company | 87,677 | 84,198 | 80,057 | \$ 1,484 | \$ 1,379 | \$ 1,091 | \$ 8,378 | \$ 7,666 |

Employment:

Employment increased by 3,479 positions in 2012 and 4,141 positions in 2011. Acquisitions increased employment by approximately 2,500 and 2,250 full-time equivalents for 2012 and 2011, respectively. In addition, the other primary factor that increased employment in both years was additions in developing economies to support growth.

Capital Spending/Net Property, Plant and Equipment:

Investments in property, plant and equipment enable growth across many diverse markets, helping to meet product demand and increasing manufacturing efficiency. Capital spending was \$1.484 billion in 2012, compared to \$1.379 billion in 2011 and \$1.091 billion in 2010. The Company expects 2013 capital spending to be approximately \$1.6 to \$1.8 billion, as 3M continues to invest in its businesses. In 2012, 3M expanded manufacturing capacity in key growth markets, particularly with respect to international and emerging market countries. This included investments in China, Turkey and Poland, in addition to investments in Singapore and the U.S. 3M also increased investments in IT systems and infrastructure and made strategic investments in research/development infrastructure and manufacturing sites to lay the foundation for future growth. In 2011, a large portion of the capital investment was used to address supply constraints in a number of businesses with significant growth potential, such as renewable energy, traffic signage in developing economies, and optically clear adhesives and glass bubbles. In addition, some of the following 2010 capital projects carried forward into 2011. In 2010, in the U.S., 3M invested in film manufacturing assets for optical systems and other non-optical businesses which use similar technology. Also, in 2010, 3M increased capacity at its multi-purpose manufacturing facility in Singapore and invested in optical film capacity in Korea. Lastly, in 2010, investments in the Industrial and Transportation business included solar energy in the U.S. and industrial adhesives and tapes in China.

3M is striving to increase its manufacturing and sourcing capacity, particularly in developing economies, in order to more closely align its production capability with its sales in major geographic regions. The initiative is expected to help improve customer service, lower transportation costs, and reduce working capital requirements. 3M will continue to make investments in critical emerging markets, such as China and India, including plans to establish and begin production in a new wholly-owned manufacturing entity in India to serve as a source of supply to 3M's business in India and in other countries.

CRITICAL ACCOUNTING ESTIMATES

Information regarding significant accounting policies is included in Note 1. As stated in Note 1, the preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. Management bases its estimates on historical experience and on various assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The Company believes its most critical accounting estimates relate to legal proceedings, the Company's pension and postretirement obligations, asset impairments and income taxes. Senior management has discussed the development, selection and disclosure of its critical accounting estimates with the Audit Committee of 3M's Board of Directors.

Legal Proceedings:

The categories of claims for which the Company has a probable and estimable liability, the amount of its liability accruals, and the estimates of its related insurance receivables are critical accounting estimates related to legal proceedings. Please refer to the section entitled "Process for Disclosure and Recording of Liabilities and Insurance Receivables Related to Legal Proceedings" (contained in "Legal Proceedings" in Note 13) for additional information about such estimates.

Pension and Postretirement Obligations:

3M has various company-sponsored retirement plans covering substantially all U.S. employees and many employees outside the United States. The U.S. defined-benefit pension plan was closed to new participants effective January 1, 2009. The Company accounts for its defined benefit pension and postretirement health care and life insurance benefit plans in accordance with Accounting Standard Codification (ASC) 715, *Compensation — Retirement Benefits*, in measuring plan assets and benefit obligations and in determining the amount of net periodic benefit cost. ASC 715 requires employers to recognize the underfunded or overfunded status of a defined benefit pension or postretirement plan as an asset or liability in its statement of financial position and recognize changes in the funded status in the year in which the changes occur through accumulated other comprehensive income, which is a component of stockholders' equity. While the company believes the valuation methods used to determine the fair value of plan assets are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Pension benefits associated with these plans are generally based primarily on each participant's years of service, compensation, and age at retirement or termination. Two critical assumptions, the discount rate and the expected return on plan assets, are important elements of expense and liability measurement. See Note 10 for additional discussion of actuarial assumptions used in determining pension and postretirement health care liabilities and expenses.

The Company determines the discount rate used to measure plan liabilities as of the December 31 measurement date for its pension and postretirement benefit plans. The discount rate reflects the current rate at which the associated liabilities could be effectively settled at the end of the year. The Company sets its rate to reflect the yield of a portfolio of high quality, fixed-income debt instruments that would produce cash flows sufficient in timing and amount to settle projected future benefits. Using this methodology, the Company determined a discount rate of 4.14% for U.S. pension and 4.00% for U.S. postretirement benefits to be appropriate as of December 31, 2012, which represents a decrease from the 4.15% and 4.04% rates, respectively, used as of December 31, 2011. The weighted average discount rate for international pension plans as of December 31, 2012 was 3.78%, a decrease from the 4.58% rate used as of December 31, 2011.

A significant element in determining the Company's pension expense in accordance with ASC 715 is the expected return on plan assets, which is based on historical results for similar allocations among asset classes. For the U.S. pension plan, the 2013 expected long-term rate of return on an annualized basis for 2013 is 8.00%, a 0.25% decrease from 2012. Refer to Note 10 for information on how the 2013 rate was determined. Return on assets assumptions for international pension and other post-retirement benefit plans are calculated on a plan-by-plan basis using plan asset allocations and expected long-term rate of return assumptions. The weighted average expected return for the international pension plan is 5.87% for 2013, compared to 6.38% for 2012.

For the year ended December 31, 2012, the Company recognized total consolidated pre-tax pension and postretirement expense (after settlements, curtailments and special termination benefits) of \$650 million, up from \$555 million in 2011. Pension and postretirement expense (before settlements, curtailments and special termination benefits) is anticipated to decrease to approximately \$550 million in 2013, a decrease of \$100 million compared to 2012. For the pension plans, holding all other factors constant, a 0.25 percentage point increase/decrease in the expected long-term rate of return on plan assets would decrease/increase 2013 pension expense by approximately \$33 million for U.S. pension plans and approximately \$13 million for international pension plans. Also, holding all other factors constant, a 0.25 percentage point increase in the discount rate used to measure plan liabilities would decrease 2013 pension expense by approximately \$37 million for U.S. pension plans and approximately \$19 million for international pension plans. In addition, a 0.25 percentage point decrease in the discount rate used to measure plan liabilities would increase 2013 pension expense by approximately \$39 million for U.S. pension plans and approximately \$21 million for international pension plans.

Asset Impairments:

As of December 31, 2012, net property, plant and equipment totaled \$8.4 billion and net identifiable intangible assets totaled \$1.9 billion. Management makes estimates and assumptions in preparing the consolidated financial statements for which actual results will emerge over long periods of time. This includes the recoverability of long-lived assets employed in the business, including assets of acquired businesses. These estimates and assumptions are closely monitored by management and periodically adjusted as circumstances warrant. For instance, expected asset lives may be shortened or an impairment recorded based on a change in the expected use of the asset or performance of the related asset group.

3M goodwill totaled approximately \$7.4 billion as of December 31, 2012. 3M's annual goodwill impairment testing is performed in the fourth quarter of each year. Impairment testing for goodwill is done at a reporting unit level, with all goodwill assigned to a reporting unit. Reporting units are one level below the business segment level (3M has six business segments at December 31, 2012), but can be combined when reporting units within the same segment have similar economic characteristics. At 3M, reporting units generally correspond to a division. 3M did not combine any of its reporting units for impairment testing.

An impairment loss generally would be recognized when the carrying amount of the reporting unit's net assets exceeds the estimated fair value of the reporting unit. The estimated fair value of a reporting unit is determined using earnings for the reporting unit multiplied by a price/earnings ratio for comparable industry groups, or by using a discounted cash flow analysis. 3M typically uses the price/earnings ratio approach for stable and growing businesses that have a long history and track record of generating positive operating income and cash flows. 3M uses the discounted cash flow approach for start-up, loss position and declining businesses, but also uses discounted cash flow as an additional tool for businesses that may be growing at a slower rate than planned due to economic or other conditions.

As discussed in Note 3 to the Consolidated Financial Statements, effective in the first quarter of 2012, 3M made certain product moves across divisions within its business segments, but none were across business segments. For any product moves that resulted in reporting unit changes, the Company applied the relative fair value method to determine the impact to reporting units. During the first quarter of 2012, the Company completed its assessment of any potential goodwill impairment for reporting units impacted by this new structure and determined that no impairment existed. The discussion that follows relates to the separate fourth quarter 2012 annual impairment test and is in the context of the segment structure that existed at that time.

As of September 30, 2012, 3M had 36 primary reporting units, with ten reporting units accounting for approximately 77 percent of the goodwill. These ten reporting units were comprised of the following divisions: 3M Purification Inc., Occupational Health and Environmental Safety, Optical Systems, Security Systems, Infection Prevention, 3M ESPE, Industrial Adhesives and Tapes, Communication Markets, Health Information Systems, and Abrasive Systems. The fair values for all these significant reporting units were in excess of carrying value by approximately 50 percent or more.

In 2012, 3M primarily used an industry price-earnings ratio approach, but also used a discounted cash flows approach for certain reporting units, to determine fair values. Where applicable, 3M used a weighted-average discounted cash flow analysis for certain divisions, using projected cash flows that were weighted based on different sales growth and terminal value assumptions, among other factors. The weighting was based on management's estimates of the likelihood of each scenario occurring.

Based on fourth-quarter 2012 testing, 3M's estimated fair value when valuing each reporting unit individually would aggregate to approximately \$77 billion, implying a control premium of 21 percent when compared to 3M's market value of approximately \$64 billion at both September 30, 2012 and December 31, 2012. The control premium is defined as the sum of the individual reporting units estimated market values compared to 3M's total Company estimated fair value, with the sum of the individual values typically being larger than the value for the total Company. 3M's market value at both September 30, 2012 and December 31, 2012 was significantly in excess of its equity of approximately \$18 billion. 3M is an integrated materials enterprise, thus many of 3M's businesses could not easily be sold on a stand-alone basis. 3M's focus on research and development has resulted in a portion of 3M's value being comprised of internally developed businesses that have no goodwill associated with them. Based on its annual test in the fourth quarter of 2012, no goodwill impairment was indicated for any of the reporting units.

Factors which could result in future impairment charges include, among others, changes in worldwide economic conditions, changes in competitive conditions and customer preferences, and fluctuations in foreign currency exchange rates. These risk factors are discussed in Item 1A, "Risk Factors," of this document. In addition, changes in the weighted average cost of capital could also impact impairment testing results. Given the current overall economic and other conditions in markets served by certain reporting units and asset groups within these reporting units (particularly Security

Systems Division), 3M will continue to monitor conditions to assess whether long term expectations have been significantly impacted such that future interim impairment tests would be required. As of December 31, 2012, 3M had approximately \$600 million of goodwill and approximately \$300 million of long-lived assets related to Security Systems. Long-lived assets with a definite life are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset (asset group) may not be recoverable. If future non-cash asset impairment charges are taken, 3M would expect that only a portion of the long-lived assets or goodwill would be impaired. 3M will continue to monitor its reporting units and asset groups in 2013 for any triggering events or other indicators of impairment.

Income Taxes:

The extent of 3M's operations involves dealing with uncertainties and judgments in the application of complex tax regulations in a multitude of jurisdictions. The final taxes paid are dependent upon many factors, including negotiations with taxing authorities in various jurisdictions and resolution of disputes arising from federal, state, and international tax audits. The Company recognizes potential liabilities and records tax liabilities for anticipated tax audit issues in the United States and other tax jurisdictions based on its estimate of whether, and the extent to which, additional taxes will be due. The Company follows guidance provided by ASC 740, *Income Taxes*, regarding uncertainty in income taxes, to record these liabilities (refer to Note 7 for additional information). The Company adjusts these reserves in light of changing facts and circumstances; however, due to the complexity of some of these uncertainties, the ultimate resolution may result in a payment that is materially different from the Company's current estimate of the tax liabilities. If the Company's estimate of tax liabilities proves to be less than the ultimate assessment, an additional charge to expense would result. If payment of these amounts ultimately proves to be less than the recorded amounts, the reversal of the liabilities would result in tax benefits being recognized in the period when the Company determines the liabilities are no longer necessary.

NEW ACCOUNTING PRONOUNCEMENTS

Information regarding new accounting pronouncements is included in Note 1 to the Consolidated Financial Statements.

FINANCIAL CONDITION AND LIQUIDITY

As indicated in the following table, at December 31, 2012, 3M had \$5.693 billion of cash, cash equivalents, and marketable securities and \$6.001 billion of debt. Debt included \$4.916 billion of long-term debt, \$986 million related to the current portion of long-term debt and short-term borrowings of \$99 million. The current portion of long-term debt includes \$850 million (principal amount) of medium-term notes due in August 2013. 3M repaid \$500 million (principal amount) of medium term notes that matured in December 2012. As discussed in Note 9, in June 2012, 3M issued \$650 million aggregate principal amount of five-year fixed rate notes due 2017 and \$600 million aggregate principal amount of ten-year fixed rate notes due 2022. The strength of 3M's capital structure and consistency of its cash flows provide 3M reliable access to capital markets. Additionally, the Company's maturity profile is staggered to ensure refinancing needs in any given year are reasonable in proportion to the total portfolio. The Company has an AA- credit rating, with a stable outlook, from Standard & Poor's and an Aa2 credit rating, with a stable outlook, from Moody's Investors Service.

The Company generates significant ongoing operating cash flow, which has been used, in part, to pay dividends on 3M common stock, for acquisitions, and to fund share repurchase activities. As discussed in Note 2, in 2012 3M acquired Ceradyne, Inc. and other acquisitions for approximately \$1 billion. In 2011, 3M acquired Winterthur Technologie AG and other acquisitions for approximately \$700 million (including purchases of noncontrolling interest). 3M was able to complete these acquisitions while maintaining a strong net debt position, as shown in the table below.

At December 31
(Millions)

| | 2012 | 2011 |
|---|-----------------|-------------|
| Total Debt | \$ 6,001 | \$ 5,166 |
| Less: Cash and cash equivalents and marketable securities | 5,693 | 4,576 |
| Net Debt | \$ 308 | \$ 590 |

The Company defines net debt as total debt less cash, cash equivalents and current and long-term marketable securities. 3M considers net debt to be an important measure of liquidity and its ability to meet ongoing obligations. This measure is not defined under U.S. generally accepted accounting principles and may not be computed the same as similarly titled measures used by other companies.

Cash, cash equivalents and marketable securities at December 31, 2012 totaled approximately \$5.7 billion, helped by cash flows from operating activities of \$5.3 billion. The Company has sufficient liquidity to meet currently anticipated growth plans, including capital expenditures, working capital investments and acquisitions. At December 31, 2012 and 2011, cash, cash equivalents and marketable securities held internationally totaled \$3.7 billion and \$2.7 billion, respectively, and in the United States totaled \$2.0 billion and \$1.9 billion, respectively. Cash available in the United States has historically been sufficient to fund dividend payments to shareholders and share repurchases, in addition to funding U.S. acquisitions, U.S. capital spending, U.S. pension/other postemployment benefit contributions, and other items as needed. For those international earnings planned to be reinvested indefinitely, the Company currently has no intention to repatriate these funds. If these international funds are needed for operations in the U.S., 3M would be required to accrue and pay U.S. taxes to repatriate these funds. However, for the international funds considered to be reinvested indefinitely, 3M's current plans do not indicate a need to repatriate these funds for U.S. operations. Refer to Note 7 for additional information on unremitted earnings attributable to international companies that have been considered to be reinvested indefinitely.

The Company's financial condition and liquidity are strong. Various assets and liabilities, including cash and short-term debt, can fluctuate significantly from month to month depending on short-term liquidity needs. Working capital (defined as current assets minus current liabilities) totaled \$7.430 billion at December 31, 2012, compared with \$6.799 billion at December 31, 2011, an increase of \$631 million. Working capital increases in cash, cash equivalents, current marketable securities, inventories and accounts receivable were partially offset by increases in all major current liability accounts, especially short-term borrowings and current portion of long-term debt.

Primary short-term liquidity needs are met through cash on hand, U.S. commercial paper and euro commercial paper issuances. The Company maintains a commercial paper program that allows 3M to have a maximum of \$3 billion outstanding with a maximum maturity of 397 days from date of issuance. As of December 31, 2012 and 2011, 3M had no outstanding commercial paper. The Company believes it is unlikely that its access to the commercial paper market will be restricted.

The Company has an AA- credit rating, with a stable outlook, from Standard & Poor's and an Aa2 credit rating, with a stable outlook, from Moody's Investors Service. In September 2012, 3M entered into a \$1.5 billion, five-year multi-currency revolving credit agreement, which amended the existing agreement that was entered into in August 2011. This amended agreement extended the expiration date from August 2016 to September 2017. This credit agreement includes a provision under which 3M may request an increase of up to \$500 million, bringing the total facility up to \$2 billion (at the lenders' discretion). This facility was undrawn at December 31, 2012. In August 2012, 3M entered into a \$150 million, one-year committed letter of credit facility with HSBC Bank USA, which replaced the one-year \$200 million committed credit facility that was entered into in August 2011. As of December 31, 2012, 3M letters of credit issued under this \$150 million committed facility totaled \$121 million. In December 2012, 3M entered into a three-year 66 million British Pound (approximately \$106 million) committed credit agreement with JP Morgan Chase Bank, which is fully drawn as of December 31, 2012. Apart from the committed facilities, an additional \$100 million in stand-alone letters of credit are also issued and outstanding at December 31, 2012. The Company also utilized \$37 million in international lines of credit and \$6 million in U.S. lines of credit with other banking partners as of December 31, 2012. These letters of credit are utilized in connection with normal business activities. Under both the \$1.5 billion and \$150 million credit agreements, the Company is required to maintain its EBITDA to Interest Ratio as of the end of each fiscal quarter at not less than 3.0 to 1. This is calculated (as defined in the agreement) as the ratio of consolidated total EBITDA for the four consecutive quarters then ended to total interest expense on all funded debt for the same period. At December 31, 2012, this ratio was approximately 45 to 1. Debt covenants do not restrict the payment of dividends.

The Company has a "well-known seasoned issuer" shelf registration statement, effective August 5, 2011, which registers an indeterminate amount of debt or equity securities for future sales. In September 2011, in connection with this August 5, 2011 shelf registration statement, 3M established a \$3 billion medium-term notes program (Series F), from which 3M issued \$1 billion aggregate principal amount of five-year fixed rate medium-term notes with a coupon rate of 1.375%. In June 2012, 3M issued \$650 million aggregate principal amount of five-year fixed rate medium-term notes due 2017 with a coupon rate of 1.000% and \$600 million aggregate principal amount of ten-year fixed rate medium-term notes due 2022 with a coupon rate of 2.000%, which were both issued from this \$3 billion medium-term notes program (Series F). The designated use of these proceeds is for general corporate purposes.

3M's cash and cash equivalents balance at December 31, 2012 totaled \$2.883 billion, with an additional \$2.810 billion in current and long-term marketable securities. 3M's strong balance sheet and liquidity provide the Company with significant flexibility to take advantage of numerous opportunities going forward. The Company will continue to invest in its operations to drive growth, including continual review of acquisition opportunities. 3M paid dividends of \$1.635 billion in 2012, and has a long history of dividend increases. In February 2013, 3M's Board of Directors increased the quarterly

dividend on 3M common stock by 7.6 percent to 63.5 cents per share, equivalent to an annual dividend of \$2.54 per share. In February 2013, 3M's Board of Directors also authorized the repurchase of up to \$7.5 billion of 3M's outstanding common stock, replacing the Company's existing repurchase program. This authorization has no pre-established end date.

In 2013, the Company plans to contribute an amount in the range of \$400 million to \$600 million of cash to its U.S. and international pension and postretirement plans. The Company does not have a required minimum cash pension contribution obligation for its U.S. plans in 2013. Therefore, the amount of the anticipated discretionary contribution could vary significantly depending on the U.S. qualified plans' funded status as of the 2013 measurement date and the anticipated tax deductibility of the contribution. Future contributions will also depend on market conditions, interest rates and other factors. 3M believes its strong cash flow and balance sheet will allow it to fund future pension needs without compromising growth opportunities.

The Company uses various working capital measures that place emphasis and focus on certain working capital assets and liabilities. These measures are not defined under U.S. generally accepted accounting principles and may not be computed the same as similarly titled measures used by other companies. One of the primary working capital measures 3M uses is a combined index, which includes accounts receivable, inventories and accounts payable. This combined index (defined as quarterly net sales — fourth quarter at year-end — multiplied by four, divided by ending net accounts receivable plus inventories less accounts payable) was 4.8 at December 31, 2012, a decline from 5.0 at December 31, 2011. Receivables increased \$194 million, or 5.0 percent, compared with December 31, 2011, driven by a year-on-year increase in fourth quarter sales. Acquisitions increased accounts receivable by \$84 million and currency translation decreased accounts receivable by \$23 million. Inventories increased \$421 million, or 12.3 percent, compared with December 31, 2011, with the increases partially attributable to an increase in demand in the fourth-quarter of 2012 when compared to the fourth quarter of 2011. Acquisitions increased inventories by \$125 million, while currency translation increased inventories by \$46 million. Accounts payable increased \$119 million compared with December 31, 2011. Acquisitions increased the accounts payable balance by \$26 million, while currency translation increased accounts payable by \$13 million.

Cash flows from operating, investing and financing activities are provided in the tables that follow. Individual amounts in the Consolidated Statement of Cash Flows exclude the effects of acquisitions, divestitures and exchange rate impacts on cash and cash equivalents, which are presented separately in the cash flows. Thus, the amounts presented in the following operating, investing and financing activities tables reflect changes in balances from period to period adjusted for these effects.

Cash Flows from Operating Activities:

| Years Ended December 31 (Millions) | 2012 | 2011 | 2010 |
|--|----------|----------|----------|
| Net income including noncontrolling interest | \$ 4,511 | \$ 4,357 | \$ 4,163 |
| Depreciation and amortization | 1,288 | 1,236 | 1,120 |
| Company pension contributions | (1,079) | (517) | (556) |
| Company postretirement contributions | (67) | (65) | (62) |
| Company pension expense | 534 | 449 | 271 |
| Company postretirement expense | 116 | 106 | 51 |
| Stock-based compensation expense | 223 | 253 | 274 |
| Income taxes (deferred and accrued income taxes) | 123 | 132 | 85 |
| Excess tax benefits from stock-based compensation | (62) | (53) | (53) |
| Accounts receivable | (133) | (205) | (189) |
| Inventories | (251) | (196) | (404) |
| Accounts payable | 72 | (83) | 146 |
| Product and other insurance receivables and claims | (32) | 9 | 49 |
| Other — net | 57 | (139) | 279 |
| Net cash provided by operating activities | \$ 5,300 | \$ 5,284 | \$ 5,174 |

Cash flows from operating activities can fluctuate significantly from period to period, as pension funding decisions, tax timing differences and other items can significantly impact cash flows.

In 2012, cash flows provided by operating activities increased \$16 million compared to 2011. The main positive contribution to operating cash flows related to year-on-year increases in net income including noncontrolling interest. 3M was able to achieve this growth in operating cash flow despite contributing an additional \$564 million in its pension and postretirement plans when compared to 2011. The combination of accounts receivable, inventories and accounts payable increased \$312 million in 2012, compared to increases of \$484 million in 2011. Additional discussion on working capital changes is provided earlier in the “Financial Condition and Liquidity” section.

In 2011, cash flows provided by operating activities increased \$110 million compared to 2010. The main positive contribution to operating cash flows related to year-on-year increases in net income including noncontrolling interest. Two primary items reduced operating cash flows. First, 3M invested in working capital in support of its growth. The combination of accounts receivable, inventories and account payable increased \$484 million in 2011, compared to increases of \$447 million in 2010, with higher fourth-quarter 2011 sales compared to fourth-quarter 2010 sales contributing to this increase. Second, “Other-net” decreased cash flows by \$139 million in 2011 compared to an increase of \$279 million in 2010. The category, “Other-net,” in the preceding table reflects changes in other asset and liability accounts, such as a decrease in accrued payroll amounts in 2011 related to certain annual incentives, which reduced liabilities.

Free Cash Flow (non-GAAP measure):

In addition, to net cash provided by operating activities, 3M uses free cash flow as a useful measure of performance and as an indication of the strength of the Company and its ability to generate cash. 3M defines free cash flow as net cash provided by operating activities less purchases of property, plant and equipment (which is classified as an investing activity). Free cash flow is not defined under U.S. generally accepted accounting principles (GAAP). Therefore, it should not be considered a substitute for income or cash flow data prepared in accordance with U.S. GAAP and may not be comparable to similarly titled measures used by other companies. It should not be inferred that the entire free cash flow amount is available for discretionary expenditures. Below find a recap of free cash flow for 2012, 2011 and 2010.

| Years ended December 31 (Millions) | 2012 | 2011 | 2010 |
|---|----------|----------|----------|
| Net cash provided by operating activities | \$ 5,300 | \$ 5,284 | \$ 5,174 |
| Purchases of property, plant and equipment (PP&E) | (1,484) | (1,379) | (1,091) |
| Free Cash Flow | \$ 3,816 | \$ 3,905 | \$ 4,083 |

Cash Flows from Investing Activities:

Years ended December 31

| (Millions) | 2012 | 2011 | 2010 |
|--|------------|------------|------------|
| Purchases of property, plant and equipment (PP&E) | \$ (1,484) | \$ (1,379) | \$ (1,091) |
| Proceeds from sale of PP&E and other assets | 41 | 55 | 25 |
| Acquisitions, net of cash acquired | (1,046) | (649) | (1,830) |
| Purchases and proceeds from sale or maturities of marketable securities and investments, net | (211) | (745) | 273 |

| Net cash used in investing activities | \$ (2,686) | \$ (2,718) | \$ (2,626) |

Investments in property, plant and equipment enable growth across many diverse markets, helping to meet product demand and increasing manufacturing efficiency. Capital spending was \$1.484 billion in 2012, compared to \$1.379 billion in 2011 and \$1.091 billion in 2010. The Company expects 2013 capital spending to be approximately \$1.6 to \$1.8 billion, as 3M continues to invest in its businesses. In 2012, 3M expanded manufacturing capacity in key growth markets, particularly with respect to international and emerging market countries. This included investments in China, Turkey and Poland, in addition to investments in Singapore and the U.S. 3M also increased investments in IT systems and infrastructure and made strategic investments in research/development infrastructure and manufacturing sites to lay the foundation for future growth. In 2011, a large portion of the capital investment was used to address supply constraints in a number of businesses with significant growth potential, such as renewable energy, traffic signage in developing economies, and optically clear adhesives and glass bubbles. In addition, some of the following 2010 capital projects carried forward into 2011. In 2010, in the U.S., 3M invested in film manufacturing assets for optical systems and other non-optical businesses which use similar technology. Also, in 2010, 3M increased capacity at its multi-purpose manufacturing facility in Singapore and invested in optical film capacity in Korea. Lastly, in 2010, investments in the Industrial and Transportation business included solar energy in the U.S. and industrial adhesives and tapes in China.

Refer to Note 2 for information on acquisitions. The Company is actively considering additional acquisitions, investments and strategic alliances, and from time to time may also divest certain businesses.

Purchases of marketable securities and investments and proceeds from sale (or maturities) of marketable securities and investments are primarily attributable to asset-backed securities, agency securities, corporate medium-term note securities and other securities, which are classified as available-for-sale. Interest rate risk and credit risk related to the underlying collateral may impact the value of investments in asset-backed securities, while factors such as general conditions in the overall credit market and the nature of the underlying collateral may affect the liquidity of investments in asset-backed securities. The coupon interest rates for asset-backed securities are either fixed rate or floating. Floating rate coupons reset monthly or quarterly based upon the corresponding monthly or quarterly LIBOR rate. Each individual floating rate security has a coupon based upon the respective LIBOR rate +/- an amount reflective of the credit risk of the issuer and the underlying collateral on the original issue date. Terms of the reset are unique to individual securities. Fixed rate coupons are established at the time the security is issued and are based upon a spread to a related maturity treasury bond. The spread against the treasury bond is reflective of the credit risk of the issuer and the underlying collateral on the original issue date. 3M does not currently expect risk related to its holdings in asset-backed securities to materially impact its financial condition or liquidity. Refer to Note 8 for more details about 3M's diversified marketable securities portfolio, which totaled \$2.810 billion as of December 31, 2012. Additional purchases of investments include additional survivor benefit insurance and equity investments.

Cash Flows from Financing Activities:

Years Ended December 31

| (Millions) | 2012 | 2011 | 2010 |
|--|-------------------|-------------------|-------------------|
| Change in short-term debt — net | \$ (36) | \$ 11 | \$ (24) |
| Repayment of debt (maturities greater than 90 days) | (612) | (1,429) | (556) |
| Proceeds from debt (maturities greater than 90 days) | 1,370 | 1,111 | 108 |

| Purchases of treasury stock | (2,204) | (2,701) | (854) |
| Proceeds from issuances of treasury stock pursuant to stock option and benefit plans | 1,012 | 902 | 666 |
| Dividends paid to stockholders | (1,635) | (1,555) | (1,500) |
| Excess tax benefits from stock-based compensation | 62 | 53 | 53 |
| Other — net | (15) | (67) | (77) |
| Net cash used in financing activities | <u>\$ (2,058)</u> | <u>\$ (3,675)</u> | <u>\$ (2,184)</u> |

Total debt at December 31, 2012 was \$6.0 billion, compared to \$5.2 billion at year-end 2011 and \$5.5 billion at year-end 2010. Total debt was 25 percent of total capital (total capital is defined as debt plus equity) at year-end 2012, 2011 and 2010. In 2012, repayment of debt included \$500 million (principal amount) of medium-term notes and repayment of debt acquired, primarily Ceradyne, Inc. Proceeds from debt in 2012 related to the June 2012 issuance of \$650 million aggregate principal amount of five-year fixed rate medium-term notes due 2017 and \$600 million aggregate principal amount of ten-year fixed rate medium-term notes due 2022, in addition to 66 million GBP (approximately \$106 million) in UK borrowings (refer to Note 9 for further detail on these items). In 2011, major items in repayment of debt (maturities greater than 90 days) included redemption of \$800 million (principal amount) of medium-term notes in November 2011, redemption of Convertible Notes, repayment of debt related to the 11.6 billion Japanese Yen note (installments paid in March and September 2011), repayment of the remainder of the Canadian Dollar loan, and repayment of a portion of debt that was acquired, primarily related to the Winterthur acquisition. In 2011, proceeds from debt (maturities greater than 90 days) primarily related to the issuance of a \$1 billion medium term note and an amendment to a Canada loan agreement which increased the principal amount of the loan by 100.5 million Canadian Dollars. In 2010, major items in repayment of debt (maturities greater than 90 days) included repayment of \$350 million in Dealer Remarketable Securities, which matured in December 2010, and repayment of a portion of debt related to the 5.8 billion Japanese Yen installment paid on September 30, 2010. In addition, approximately \$105 million in acquired debt related to 2010 acquisitions was subsequently repaid. In 2010, proceeds from debt primarily include a 100.5 million Canadian Dollar loan.

Repurchases of common stock are made to support the Company's stock-based employee compensation plans and for other corporate purposes. In February 2013, 3M's Board of Directors authorized the repurchase of up to \$7.5 billion of 3M's outstanding common stock, replacing the Company's existing repurchase program. This authorization has no pre-established end date. The Company purchased \$2.204 billion in shares in 2012, \$2.701 billion in shares in 2011, and \$854 million in shares in 2010. For more information, refer to the table titled "Issuer Purchases of Equity Securities" in Part II, Item 5. The Company does not utilize derivative instruments linked to the Company's stock.

Cash dividends paid to shareholders totaled \$1.635 billion (\$2.36 per share) in 2012, \$1.555 billion (\$2.20 per share) in 2011 and \$1.500 billion (\$2.10 per share) in 2010. 3M has paid dividends since 1916. In February 2013, the Board of Directors increased the quarterly dividend on 3M common stock by 7.6 percent to 63.5 cents per share, equivalent to an annual dividend of \$2.54 per share. This marked the 55th consecutive year of dividend increases.

In addition to the items described below, other cash flows from financing activities may include various other items, such as distributions to or sales of noncontrolling interests, changes in cash overdraft balances, and principal payments for capital leases.

In 2011, as discussed in Note 5, subsequent to acquiring a controlling interest in Winterthur, 3M purchased additional outstanding shares of its Winterthur subsidiary for \$57 million, increasing 3M's ownership interest from approximately 86 percent to 100 percent as of December 31, 2011. These additional purchases are reflected as other financing activities in the statement of cash flows. In addition, during 2011, 3M sold a noncontrolling interest in a newly formed subsidiary for an immaterial amount, which was also classified as other financing activity in the consolidated statement of cash flows.

During the quarter ended March 31, 2010, as discussed in Note 5, the Company's majority owned Sumitomo 3M Limited entity (Sumitomo 3M) purchased a portion of its shares held by its noncontrolling interest, Sumitomo Electric Industries, Ltd. (SEI), by paying cash of 5.8 billion Japanese Yen and entering into a note payable to SEI of 17.4 billion

Japanese Yen (approximately \$63 million and \$188 million, respectively, based on applicable exchange rates at that time). The cash paid of approximately \$63 million during the quarter ended March 31, 2010 as a result of the purchase of Sumitomo 3M shares from SEI is classified as "Other financing activities" in the consolidated statement of cash flows. The remainder of the purchase financed by the note payable to SEI is considered non-cash financing activity in the first quarter of 2010. As discussed in Note 2, during the second quarter of 2010, 3M recorded a financed liability of 1.7 billion Japanese yen (approximately \$18 million based on applicable exchange rates at that time) related to the A-One acquisition, which is also considered a non-cash financing activity.

Off-Balance Sheet Arrangements and Contractual Obligations:

As of December 31, 2012, the Company has not utilized special purpose entities to facilitate off-balance sheet financing arrangements. Refer to the section entitled "Warranties/Guarantees" in Note 13 for discussion of accrued product warranty liabilities and guarantees.

In addition to guarantees, 3M, in the normal course of business, periodically enters into agreements that require the Company to indemnify either major customers or suppliers for specific risks, such as claims for injury or property damage arising out of the use of 3M products or the negligence of 3M personnel, or claims alleging that 3M products infringe third-party patents or other intellectual property. While 3M's maximum exposure under these indemnification provisions cannot be estimated, these indemnifications are not expected to have a material impact on the Company's consolidated results of operations or financial condition.

A summary of the Company's significant contractual obligations as of December 31, 2012, follows:

Contractual Obligations

| (Millions) | Total | Payments due by year | | | | | After 2017 |
|--|-----------------|----------------------|-----------------|---------------|-----------------|---------------|-----------------|
| | | 2013 | 2014 | 2015 | 2016 | 2017 | |
| Long-term debt, including current portion (Note 9) | \$ 5,902 | \$ 986 | \$ 1,481 | \$ 107 | \$ 994 | \$ 648 | \$ 1,686 |
| Interest on long-term debt | 1,721 | 189 | 152 | 97 | 96 | 79 | 1,108 |
| Operating leases (Note 13) | 735 | 194 | 158 | 119 | 77 | 68 | 119 |
| Capital leases (Note 13) | 96 | 22 | 21 | 8 | 7 | 4 | 34 |
| Unconditional purchase obligations and other | 1,489 | 1,060 | 209 | 111 | 48 | 33 | 28 |
| Total contractual cash obligations | <u>\$ 9,943</u> | <u>\$ 2,451</u> | <u>\$ 2,021</u> | <u>\$ 442</u> | <u>\$ 1,222</u> | <u>\$ 832</u> | <u>\$ 2,975</u> |

Long-term debt payments due in 2013 and 2014 include floating rate notes totaling \$132 million (classified as current portion of long-term debt) and \$97 million, respectively, as a result of put provisions associated with these debt instruments.

Unconditional purchase obligations are defined as an agreement to purchase goods or services that is enforceable and legally binding on the Company. Included in the unconditional purchase obligations category above are certain obligations related to take or pay contracts, capital commitments, service agreements and utilities. These estimates include both unconditional purchase obligations with terms in excess of one year and normal ongoing purchase obligations with terms of less than one year. Many of these commitments relate to take or pay contracts, in which 3M guarantees payment to ensure availability of products or services that are sold to customers. The Company expects to receive consideration (products or services) for these unconditional purchase obligations. Contractual capital commitments are included in the preceding table, but these commitments represent a small part of the Company's expected capital spending in 2013 and beyond. The purchase obligation amounts do not represent the entire anticipated purchases in the future, but represent only those items for which the Company is contractually obligated. The majority of 3M's products and services are purchased as needed, with no unconditional commitment. For this reason, these amounts will not provide a reliable indicator of the Company's expected future cash outflows on a stand-alone basis.

Other obligations, included in the preceding table within the caption entitled "Unconditional purchase obligations and other," include the current portion of the liability for uncertain tax positions under ASC 740, which is expected to be paid out in cash in the next 12 months. The Company is not able to reasonably estimate the timing of the long-term payments or the amount by which the liability will increase or decrease over time; therefore, the long-term portion of the net tax liability of \$170 million is excluded from the preceding table. Refer to Note 7 for further details.

As discussed in Note 10, the Company does not have a required minimum cash pension contribution obligation for its U.S. plans in 2013 and Company contributions to its U.S. and international pension plans are expected to be largely discretionary in future years; therefore, amounts related to these plans are not included in the preceding table.

FINANCIAL INSTRUMENTS

The Company enters into foreign exchange forward contracts, options and swaps to hedge against the effect of exchange rate fluctuations on cash flows denominated in foreign currencies and certain intercompany financing transactions. The Company manages interest rate risks using a mix of fixed and floating rate debt. To help manage borrowing costs, the Company may enter into interest rate swaps. Under these arrangements, the Company agrees to exchange, at specified intervals, the difference between fixed and floating interest amounts calculated by reference to an agreed-upon notional principal amount. The Company manages commodity price risks through negotiated supply contracts, price protection agreements and forward physical contracts.

Refer to Item 7A, "Quantitative and Qualitative Disclosures About Market Risk", for further discussion of foreign exchange rates risk, interest rates risk, commodity prices risk and value at risk analysis.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

In the context of Item 7A, 3M is exposed to market risk due to the risk of loss arising from adverse changes in foreign currency exchange rates, interest rates and commodity prices. Changes in those factors could cause fluctuations in earnings and cash flows. Senior management provides oversight for risk management and derivative activities, determines certain of the Company's financial risk policies and objectives, and provides guidelines for derivative instrument utilization. Senior management also establishes certain associated procedures relative to control and valuation, risk analysis, counterparty credit approval, and ongoing monitoring and reporting.

The Company is exposed to credit loss in the event of nonperformance by counterparties in interest rate swaps, currency swaps, commodity price swaps, and forward and option contracts. However, the Company's risk is limited to the fair value of the instruments. The Company actively monitors its exposure to credit risk through the use of credit approvals and credit limits, and by selecting major international banks and financial institutions as counterparties. The Company does not anticipate nonperformance by any of these counterparties.

Foreign Exchange Rates Risk:

Foreign currency exchange rates and fluctuations in those rates may affect the Company's net investment in foreign subsidiaries and may cause fluctuations in cash flows related to foreign denominated transactions. 3M is also exposed to the translation of foreign currency earnings to the U.S. dollar. The Company enters into foreign exchange forward and option contracts to hedge against the effect of exchange rate fluctuations on cash flows denominated in foreign currencies and certain intercompany financing transactions. These transactions are designated as cash flow hedges. Generally, 3M dedesignates these cash flow hedge relationships in advance of the occurrence of the forecasted transaction. The maximum length of time over which 3M hedges its exposure to the variability in future cash flows for a majority of the forecasted transactions is 12 months and, accordingly, at December 31, 2012, the majority of the Company's open foreign exchange forward and option contracts had maturities of one year or less. In addition, 3M enters into foreign currency forward contracts that are not designated in hedging relationships to offset, in part, the impacts of certain intercompany activities (primarily associated with intercompany licensing arrangements). As circumstances warrant, the Company also uses cross currency swaps, forwards and foreign currency denominated debt as hedging instruments to hedge portions of the Company's net investments in foreign operations. The dollar equivalent gross notional amount of the Company's foreign exchange forward and option contracts designated as cash flow hedges and those not designated as hedging instruments were \$5.8 billion and \$1.0 billion, respectively, at December 31, 2012. As of December 31, 2012, the Company had no cross currency swap and foreign currency forward contracts designated as net investment hedges, but had designated certain of 3M's foreign currency denominated debt as nonderivative hedging instruments in certain net investment hedges as discussed in Note 11 in the "Net Investment Hedges" section.

Interest Rates Risk:

The Company may be impacted by interest rate volatility with respect to existing debt and future debt issuances. 3M manages interest expense using a mix of fixed and floating rate debt. To help manage borrowing costs, the Company may enter into interest rate swaps that are designated and qualify as fair value hedges. Under these arrangements, the Company agrees to exchange, at specified intervals, the difference between fixed and floating interest amounts calculated by reference to an agreed-upon notional principal amount. The dollar equivalent (based on inception date foreign currency exchange rates) gross notional amount of the Company's interest rate swaps at December 31, 2012 was \$342 million. Additional details about 3M's long-term debt can be found in Note 9, including references to information regarding derivatives and/or hedging instruments associated with the Company's long-term debt.

Commodity Prices Risk:

Certain commodities the Company uses in the production of its products are exposed to market price risks. 3M manages commodity price risks through negotiated supply contracts, price protection agreements and forward physical contracts. The Company uses commodity price swaps relative to natural gas as cash flow hedges of forecasted transactions to manage price volatility. Generally, the length of time over which 3M hedges its exposure to the variability in future cash flows for its forecasted natural gas transactions is 12 months. 3M also enters into commodity price swaps that are not designated in hedge relationships to offset, in part, the impacts of fluctuations in costs associated with the use of certain precious metals.

The dollar equivalent gross notional amount of the Company's natural gas commodity price swaps designated as cash flow hedges and precious metal commodity price swaps not designated in hedge relationships were \$18 million and \$1 million, respectively, at December 31, 2012.

Value At Risk:

The value at risk analysis is performed annually. A Monte Carlo simulation technique was used to test the Company's exposure to changes in currency rates, interest rates, and commodity prices and assess the risk of loss or benefit in after-tax earnings of financial instruments (primarily debt), derivatives and underlying exposures outstanding at December 31, 2012. The model (third-party bank dataset) used a 95 percent confidence level over a 12-month time horizon. The exposure to changes in currency rates model used 18 currencies, interest rates related to four currencies, and commodity prices related to five commodities. This model does not purport to represent what actually will be experienced by the Company. This model does not include certain hedge transactions, because the Company believes their inclusion would not materially impact the results. Foreign exchange rate risk of loss or benefit decreased in 2012, primarily due to decreases in exposures, which is one of the key drivers in the valuation model. Interest rate volatility remained stable in 2012 because interest rates are currently very low and are projected to remain low, based on forward rates. The following table summarizes the possible adverse and positive impacts to after-tax earnings related to these exposures.

| (Millions) | Adverse impact on after-tax earnings | | Positive impact on after-tax earnings | |
|------------------------|--------------------------------------|----------|---------------------------------------|--------|
| | 2012 | 2011 | 2012 | 2011 |
| Foreign exchange rates | \$ (97) | \$ (131) | \$ 105 | \$ 146 |
| Interest rates | (2) | (2) | 1 | 2 |
| Commodity prices | (9) | (10) | 7 | 7 |

In addition to the possible adverse and positive impacts discussed in the preceding table related to foreign exchange rates, recent historical information is as follows. 3M estimates that year-on-year currency effects, including hedging impacts, had the following effects on net income attributable to 3M: full-year 2012 (\$103 million decrease) and full-year 2011 (\$154 million increase). This estimate includes the effect of translating profits from local currencies into U.S. dollars; the impact of currency fluctuations on the transfer of goods between 3M operations in the United States and abroad; and transaction gains and losses, including derivative instruments designed to reduce foreign currency exchange rate risks and the negative impact of swapping Venezuelan bolivars into U.S. dollars. 3M estimates that year-on-year derivative and other transaction gains and losses had the following effects on net income attributable to 3M: full-year 2012 (\$49 million increase) and full-year 2011 (immaterial impact).

An analysis of the global exposures related to purchased components and materials is performed at each year-end. A one percent price change would result in a pre-tax cost or savings of approximately \$71 million per year. The global energy exposure is such that a 10 percent price change would result in a pre-tax cost or savings of approximately \$42 million per year.

Management's Responsibility for Financial Reporting

Management is responsible for the integrity and objectivity of the financial information included in this report. The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. Where necessary, the financial statements reflect estimates based on management's judgment.

Management has established and maintains a system of internal accounting and other controls for the Company and its subsidiaries. This system and its established accounting procedures and related controls are designed to provide reasonable assurance that assets are safeguarded, that the books and records properly reflect all transactions, that policies and procedures are implemented by qualified personnel, and that published financial statements are properly prepared and fairly presented. The Company's system of internal control is supported by widely communicated written policies, including business conduct policies, which are designed to require all employees to maintain high ethical standards in the conduct of Company affairs. Internal auditors continually review the accounting and control system.

3M Company

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting. Management conducted an assessment of the Company's internal control over financial reporting based on the framework established by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control — Integrated Framework*. Based on the assessment, management concluded that, as of December 31, 2012, the Company's internal control over financial reporting is effective.

Management's assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2012 excluded Ceradyne, Inc., which was acquired by the Company in November 2012 in a purchase business combination. Ceradyne, Inc. is a wholly-owned subsidiary of the Company whose total assets and total net sales represented less than 5% of consolidated total assets and less than 1% of consolidated net sales, respectively, of the Company as of and for the year ended December 31, 2012. As permitted by guidelines established by the Securities and Exchange Commission, companies are allowed to exclude certain acquisitions from their assessment of internal control over financial reporting during the first year of an acquisition while integrating the acquired company.

The Company's internal control over financial reporting as of December 31, 2012 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included herein, which expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2012.

3M Company

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors of 3M Company

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of 3M Company and its subsidiaries (the "Company") at December 31, 2012 and 2011, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2012 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As described in Management's Report on Internal Control Over Financial Reporting, management has excluded Ceradyne, Inc. from its assessment of internal control over financial reporting as of December 31, 2012, because it was acquired by the Company in a purchase business combination during 2012. We have also excluded Ceradyne, Inc. from our audit of internal control over financial reporting. Ceradyne, Inc. is a wholly-owned subsidiary of the Company whose total assets and total net sales represent less than 5% and 1%, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2012.

The accompanying Notes to Consolidated Financial Statements are an integral part of this statement.

Notes to Consolidated Financial Statements

NOTE 1. Significant Accounting Policies

Consolidation: 3M is a diversified global manufacturer, technology innovator and marketer of a wide variety of products. All subsidiaries are consolidated. All significant intercompany transactions are eliminated. As used herein, the term “3M” or “Company” refers to 3M Company and subsidiaries unless the context indicates otherwise.

Foreign currency translation: Local currencies generally are considered the functional currencies outside the United States. Assets and liabilities for operations in local-currency environments are translated at year-end exchange rates. Income and expense items are translated at average rates of exchange prevailing during the year. Cumulative translation adjustments are recorded as a component of accumulated other comprehensive income (loss) in shareholders' equity.

Although local currencies are typically considered as the functional currencies outside the United States, under Accounting Standards Codification (ASC) 830, *Foreign Currency Matters*, the reporting currency of a foreign entity's parent is assumed to be that entity's functional currency when the economic environment of a foreign entity is highly inflationary—generally when its cumulative inflation is approximately 100 percent or more for the three years that precede the beginning of a reporting period. 3M has a subsidiary in Venezuela with operating income representing less than 1.0 percent of 3M's consolidated operating income for 2012. 3M determined that the cumulative inflation rate of Venezuela in November 2009 and since has exceeded 100 percent. Accordingly, the financial statements of the Venezuelan subsidiary were remeasured as if its functional currency were that of its parent beginning January 1, 2010.

Regulations in Venezuela require the purchase and sale of foreign currency to be made at official rates of exchange that are fixed from time to time by the Venezuelan government. Certain laws in the country, however, provided an exemption for the purchase and sale of certain securities and resulted in an indirect “parallel” market through which companies obtained foreign currency without having to purchase it from Venezuela's Commission for the Administration of Foreign Exchange (CADIVI). In May 2010, the Venezuelan government took control of the previously freely-traded parallel market. The government-controlled rate that emerged under the new Transaction System for Foreign Currency Denominated Securities (SITME) is not as unfavorable as the previous parallel rate in comparison to the official rates. As previously disclosed, as of December 31, 2009 (prior to the change in functional currency of 3M's Venezuelan subsidiary in January 2010), 3M changed to use of the parallel exchange rate for translation of the financial statements of its Venezuelan subsidiary. Beginning January 1, 2010, as discussed above, the financial statements of the Venezuelan subsidiary are remeasured as if its functional currency were that of its parent. This remeasurement utilized the parallel rate through May 2010 and the SITME rate thereafter.

The Company continues to monitor circumstances relative to its Venezuelan subsidiary. Other factors notwithstanding, the change in functional currency of this subsidiary and associated remeasurement beginning January 1, 2010 as a result of Venezuela's economic environment decreased net sales of the Venezuelan subsidiary by approximately two-thirds in 2010 in comparison to 2009 (based on exchange rates at 2009 year-end), but did not otherwise have a material impact on operating income and 3M's consolidated results of operations.

Reclassifications: Certain amounts in the prior years' consolidated financial statements have been reclassified to conform to the current year presentation.

Use of estimates: The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Cash and cash equivalents: Cash and cash equivalents consist of cash and temporary investments with maturities of three months or less when acquired.

Marketable securities: The classification of marketable securities as current or non-current is dependent upon management's intended holding period, the security's maturity date and liquidity considerations based on market conditions. If management intends to hold the securities for longer than one year as of the balance sheet date, they are classified as non-current. 3M reviews impairments associated with its marketable securities in accordance with the measurement guidance provided by ASC 320, *Investments-Debt and Equity Securities*, when determining the classification of the impairment as “temporary” or “other-than-temporary”. A temporary impairment charge results in an unrealized loss being recorded in the other comprehensive income component of shareholders' equity. Such an

unrealized loss does not reduce net income for the applicable accounting period because the loss is not viewed as other-than-temporary. The factors evaluated to differentiate between temporary and other-than-temporary include the projected future cash flows, credit ratings actions, and assessment of the credit quality of the underlying collateral, as well as other factors.

Investments: Investments primarily include equity method, cost method, and available-for-sale equity investments. Available-for-sale investments are recorded at fair value. Unrealized gains and losses relating to investments classified as available-for-sale are recorded as a component of accumulated other comprehensive income (loss) in shareholders' equity.

Other assets: Other assets include deferred income taxes, product and other insurance receivables, the cash surrender value of life insurance policies, and other long-term assets. Investments in life insurance are reported at the amount that could be realized under contract at the balance sheet date, with any changes in cash surrender value or contract value during the period accounted for as an adjustment of premiums paid. Cash outflows and inflows associated with life insurance activity are included in "Purchases of marketable securities and investments" and "Proceeds from sale of marketable securities and investments," respectively.

Inventories: Inventories are stated at the lower of cost or market, with cost generally determined on a first-in, first-out basis.

Property, plant and equipment: Property, plant and equipment, including capitalized interest and internal engineering costs, are recorded at cost. Depreciation of property, plant and equipment generally is computed using the straight-line method based on the estimated useful lives of the assets. The estimated useful lives of buildings and improvements primarily range from 10 to 40 years, with the majority in the range of 20 to 40 years. The estimated useful lives of machinery and equipment primarily range from three to 15 years, with the majority in the range of five to 10 years. Fully depreciated assets are retained in property and accumulated depreciation accounts until disposal. Upon disposal, assets and related accumulated depreciation are removed from the accounts and the net amount, less proceeds from disposal, is charged or credited to operations. Property, plant and equipment amounts are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset (asset group) may not be recoverable. An impairment loss would be recognized when the carrying amount of an asset exceeds the estimated undiscounted future cash flows expected to result from the use of the asset and its eventual disposition. The amount of the impairment loss recorded is calculated by the excess of the asset's carrying value over its fair value. Fair value is generally determined using a discounted cash flow analysis.

Conditional asset retirement obligations: A liability is initially recorded at fair value for an asset retirement obligation associated with the retirement of tangible long-lived assets in the period in which it is incurred if a reasonable estimate of fair value can be made. Conditional asset retirement obligations exist for certain long-term assets of the Company. The obligation is initially measured at fair value using expected present value techniques. Over time the liabilities are accreted for the change in their present value and the initial capitalized costs are depreciated over the remaining useful lives of the related assets. The asset retirement obligation liability was \$86 million and \$79 million at December 31, 2012 and 2011, respectively.

Goodwill: Goodwill is the excess of cost of an acquired entity over the amounts assigned to assets acquired and liabilities assumed in a business combination. Goodwill is not amortized. Goodwill is tested for impairment annually in the fourth quarter of each year, and is tested for impairment between annual tests if an event occurs or circumstances change that would indicate the carrying amount may be impaired. Impairment testing for goodwill is done at a reporting unit level, with all goodwill assigned to a reporting unit. Reporting units are one level below the business segment level, but can be combined when reporting units within the same segment have similar economic characteristics. 3M did not combine any of its reporting units for impairment testing. An impairment loss generally would be recognized when the carrying amount of the reporting unit's net assets exceeds the estimated fair value of the reporting unit. The estimated fair value of a reporting unit is determined using earnings for the reporting unit multiplied by a price/earnings ratio for comparable industry groups, or by using a discounted cash flow analysis.

Intangible assets: Intangible assets include patents, tradenames and other intangible assets acquired from an independent party. Intangible assets with an indefinite life, namely certain tradenames, are not amortized. Intangible assets with a definite life are amortized over a period ranging from one to 20 years generally on a straight line basis, unless another systematic and rational basis is more representative of the asset's use. Indefinite-lived intangible assets are tested for impairment annually, and are tested for impairment between annual tests if an event occurs or circumstances change that would indicate that the carrying amount may be impaired. Intangible assets with a definite life are tested for impairment whenever events or circumstances indicate that the carrying amount of an asset (asset group)

may not be recoverable. An impairment loss is recognized when the carrying amount of an asset exceeds the estimated undiscounted cash flows used in determining the fair value of the asset. The amount of the impairment loss recorded is calculated by the excess of the asset's carrying value over its fair value. Fair value is generally determined using a discounted cash flow analysis. Costs related to internally developed intangible assets, such as patents, are expensed as incurred, primarily in "Research, development and related expenses."

Restructuring actions: Restructuring actions generally include significant actions involving employee-related severance charges, contract termination costs, and impairment of assets associated with such actions. Employee-related severance charges are largely based upon distributed employment policies and substantive severance plans. These charges are reflected in the quarter when the actions are probable and the amounts are estimable, which typically is when management approves the associated actions. Severance amounts for which affected employees were required to render service in order to receive benefits at their termination dates were measured at the date such benefits were communicated to the applicable employees and recognized as expense over the employees' remaining service periods. Contract termination and other charges primarily reflect costs to terminate a contract before the end of its term (measured at fair value at the time the Company provided notice to the counterparty) or costs that will continue to be incurred under the contract for its remaining term without economic benefit to the Company. Asset impairment charges related to intangible assets and property, plant and equipment reflect the excess of the assets' carrying values over their fair values.

Revenue (sales) recognition: The Company sells a wide range of products to a diversified base of customers around the world and has no material concentration of credit risk. Revenue is recognized when the risks and rewards of ownership have substantively transferred to customers. This condition normally is met when the product has been delivered or upon performance of services. The Company records estimated reductions to revenue or records expense for customer and distributor incentives, primarily comprised of rebates and free goods, at the time of the initial sale. These sales incentives are accounted for in accordance with ASC 605, *Revenue Recognition*. The estimated reductions of revenue for rebates are based on the sales terms, historical experience, trend analysis and projected market conditions in the various markets served. Since the Company serves numerous markets, the rebate programs offered vary across businesses, but the most common incentive relates to amounts paid or credited to customers for achieving defined volume levels or growth objectives. Free goods are accounted for as an expense and recorded in cost of sales. Sales, use, value-added and other excise taxes are not recognized in revenue.

The vast majority of 3M's sales agreements are for standard products and services with customer acceptance occurring upon delivery of the product or performance of the service. However, to a limited extent 3M also enters into agreements that involve multiple elements (such as equipment, installation and service), software, or non-standard terms and conditions.

For non-software multiple-element arrangements, in connection with 3M's adoption on a prospective basis of Accounting Standards Updated (ASU) No. 2009-13, *Multiple-Deliverable Revenue Arrangements—a consensus of the FASB Emerging Issues Task Force*, to new or materially modified arrangements beginning in 2011, the Company recognizes revenue for delivered elements when they have stand-alone value to the customer, they have been accepted by the customer, and for which there are only customary refund or return rights. Arrangement consideration is allocated to the deliverables by use of the relative selling price method. The selling price used for each deliverable is based on vendor-specific objective evidence (VSOE) if available, third-party evidence (TPE) if VSOE is not available, or estimated selling price if neither VSOE nor TPE is available. Estimated selling price is determined in a manner consistent with that used to establish the price to sell the deliverable on a standalone basis. For applicable pre-existing arrangements, 3M recognizes revenue for delivered elements when the fair values of the undelivered items are known and allocation of consideration to the delivered items is most often based on the residual method. In addition to the preceding conditions under ASU No. 2009-13 and for applicable pre-existing arrangements, equipment revenue is not recorded until the installation has been completed if equipment acceptance is dependent upon installation or if installation is essential to the functionality of the equipment. Installation revenues are not recorded until installation has been completed.

For arrangements (or portions of arrangements) falling within software revenue recognition standards and that do not involve significant production, modification, or customization, revenue for each software or software-related element is recognized when the Company has VSOE of the fair value of all of the undelivered elements and applicable criteria have been met for the delivered elements. When the arrangements involve significant production, modification or customization, long-term construction-type accounting involving proportional performance is generally employed.

For prepaid service contracts, sales revenue is recognized on a straight-line basis over the term of the contract, unless historical evidence indicates the costs are incurred on other than a straight-line basis. License fee revenue is recognized as earned, and no revenue is recognized until the inception of the license term.

On occasion, agreements will contain milestones, or 3M will recognize revenue based on proportional performance. For these agreements, and depending on the specifics, 3M may recognize revenue upon completion of a substantive milestone, or in proportion to costs incurred to date compared with the estimate of total costs to be incurred.

Accounts receivable and allowances: Trade accounts receivable are recorded at the invoiced amount and do not bear interest. The Company maintains allowances for bad debts, cash discounts, product returns and various other items. The allowance for doubtful accounts and product returns is based on the best estimate of the amount of probable credit losses in existing accounts receivable and anticipated sales returns. The Company determines the allowances based on historical write-off experience by industry and regional economic data and historical sales returns. The Company reviews the allowance for doubtful accounts monthly. The Company does not have any significant off-balance-sheet credit exposure related to its customers.

Advertising and merchandising: These costs are charged to operations in the period incurred, and totaled \$482 million in 2012, \$518 million in 2011 and \$512 million in 2010.

Research, development and related expenses: These costs are charged to operations in the period incurred and are shown on a separate line of the Consolidated Statement of Income. Research, development and related expenses totaled \$1.634 billion in 2012, \$1.570 billion in 2011 and \$1.434 billion in 2010. Research and development expenses, covering basic scientific research and the application of scientific advances in the development of new and improved products and their uses, totaled \$1.079 billion in 2012, \$1.036 billion in 2011 and \$919 million in 2010. Related expenses primarily include technical support provided by 3M to customers who are using existing 3M products; internally developed patent costs, which include costs and fees incurred to prepare, file, secure and maintain patents; and amortization of acquired patents.

Internal-use software: The Company capitalizes direct costs of materials and services used in the development of internal-use software. Amounts capitalized are amortized over a period of three to seven years, generally on a straight-line basis, unless another systematic and rational basis is more representative of the software's use. Amounts are reported as a component of either machinery and equipment or capital leases within property, plant and equipment.

Environmental: Environmental expenditures relating to existing conditions caused by past operations that do not contribute to current or future revenues are expensed. Reserves for liabilities related to anticipated remediation costs are recorded on an undiscounted basis when they are probable and reasonably estimable, generally no later than the completion of feasibility studies or the Company's commitment to a plan of action. Environmental expenditures for capital projects that contribute to current or future operations generally are capitalized and depreciated over their estimated useful lives.

Income taxes: The provision for income taxes is determined using the asset and liability approach. Under this approach, deferred income taxes represent the expected future tax consequences of temporary differences between the carrying amounts and tax basis of assets and liabilities. The Company records a valuation allowance to reduce its deferred tax assets when uncertainty regarding their realizability exists. As of December 31, 2012 and 2011, the Company recorded \$29 million and \$82 million, respectively, of valuation allowances. The Company recognizes and measures its uncertain tax positions based on the rules under ASC 740, *Income Taxes*.

Earnings per share: The difference in the weighted average 3M shares outstanding for calculating basic and diluted earnings per share attributable to 3M common shareholders is the result of the dilution associated with the Company's stock-based compensation plans. Certain options outstanding under these stock-based compensation plans during the years 2012, 2011 and 2010 were not included in the computation of diluted earnings per share attributable to 3M common shareholders because they would not have had a dilutive effect (12.6 million average options for 2012, 17.4 million average options for 2011, and 26.3 million average options for 2010). The computations for basic and diluted earnings per share for the years ended December 31 follow:

Earnings Per Share Computations

| <u>(Amounts in millions, except per share amounts)</u> | <u>2012</u> | <u>2011</u> | <u>2010</u> |
|---|-------------|-------------|-------------|
| Numerator: | | | |
| Net income attributable to 3M | \$ 4,444 | \$ 4,283 | \$ 4,085 |
| Denominator: | | | |
| Denominator for weighted average 3M common shares outstanding – basic | 693.9 | 708.5 | 713.7 |
| Dilution associated with the Company's stock-based compensation plans | 9.4 | 10.5 | 11.8 |
| Denominator for weighted average 3M common shares outstanding – diluted | 703.3 | 719.0 | 725.5 |
| Earnings per share attributable to 3M common shareholders – basic | \$ 6.40 | \$ 6.05 | \$ 5.72 |
| Earnings per share attributable to 3M common shareholders – diluted | \$ 6.32 | \$ 5.96 | \$ 5.63 |

Stock-based compensation: The Company recognizes compensation expense for its stock-based compensation programs, which include stock options, restricted stock, restricted stock units, performance shares, and the General Employees' Stock Purchase Plan (GESPP). Under applicable accounting standards, the fair value of share-based compensation is determined at the grant date and the recognition of the related expense is recorded over the period in which the share-based compensation vests. Refer to Note 14 for additional information.

Comprehensive income: Total comprehensive income and the components of accumulated other comprehensive income (loss) are presented in the Consolidated Statement of Comprehensive Income and the Consolidated Statement of Changes in Equity. Accumulated other comprehensive income (loss) is composed of foreign currency translation effects (including hedges of net investments in international companies), defined benefit pension and postretirement plan adjustments, unrealized gains and losses on available-for-sale debt and equity securities, and unrealized gains and losses on cash flow hedging instruments.

Derivatives and hedging activities: All derivative instruments within the scope of ASC 815, *Derivatives and Hedging*, are recorded on the balance sheet at fair value. The Company uses interest rate swaps, currency and commodity price swaps, and foreign currency forward and option contracts to manage risks generally associated with foreign exchange rate, interest rate and commodity market volatility. All hedging instruments that qualify for hedge accounting are designated and effective as hedges, in accordance with U.S. generally accepted accounting principles. If the underlying hedged transaction ceases to exist, all changes in fair value of the related derivatives that have not been settled are recognized in current earnings. Instruments that do not qualify for hedge accounting are marked to market with changes recognized in current earnings. Cash flows from derivative instruments are classified in the statement of cash flows in the same category as the cash flows from the items subject to designated hedge or undesignated (economic) hedge relationships. The Company does not hold or issue derivative financial instruments for trading purposes and is not a party to leveraged derivatives.

Credit risk: The Company is exposed to credit loss in the event of nonperformance by counterparties in interest rate swaps, currency swaps, commodity price swaps, and forward and option contracts. However, the Company's risk is limited to the fair value of the instruments. The Company actively monitors its exposure to credit risk through the use of credit approvals and credit limits, and by selecting major international banks and financial institutions as counterparties. 3M enters into master netting agreements with counterparties when possible to mitigate credit risk in derivative transactions. A master netting arrangement may allow counterparties to net settle amounts owed to each other as a result of multiple, separate derivative transactions. The Company does not anticipate nonperformance by any of these counterparties. In addition to the one master agreement supported by a primary counterparty's parent guarantee, 3M has credit support agreements in place with six of its primary derivative counterparties. Under these agreements, either party is required to post eligible collateral when the market value of transactions covered by these agreements exceeds specified thresholds, thus limiting credit exposure for both parties. For presentation purposes on 3M's consolidated balance sheet, the fair value of derivative assets or liabilities are presented on a gross basis even when derivative transactions are subject to master netting arrangements and may qualify for net presentation.

Fair value measurements: 3M follows ASC 820, *Fair Value Measurements and Disclosures*, with respect to assets and liabilities that are measured at fair value on a recurring basis and nonrecurring basis. Under the standard, fair value is defined as the exit price, or the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The standard also establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs market participants would use in valuing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the factors market participants would use in valuing the asset or liability developed based upon the best information available in the circumstances. The hierarchy is broken down into three levels. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs (other than quoted prices) that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability. Categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Acquisitions: The Company accounts for business acquisitions in accordance with ASC 805, *Business Combinations*. This standard requires the acquiring entity in a business combination to recognize all (and only) the assets acquired and liabilities assumed in the transaction and establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed in a business combination. Certain provisions of this standard prescribe, among other things, the determination of acquisition-date fair value of consideration paid in a business combination (including contingent consideration) and the exclusion of transaction and acquisition-related restructuring costs from acquisition accounting.

New Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2009-13, *Multiple-Deliverable Revenue Arrangements—a consensus of the FASB Emerging Issues Task Force*, that provides amendments to the criteria for separating consideration in multiple-deliverable arrangements. As a result of these amendments, multiple-deliverable revenue arrangements are separated in more circumstances than under pre-existing U.S. GAAP. The ASU does this by establishing a selling price hierarchy for determining the selling price of a deliverable. The selling price used for each deliverable is based on vendor-specific objective evidence (VSOE) if available, third-party evidence (TPE) if VSOE is not available, or estimated selling price if neither VSOE nor TPE is available. A vendor is required to determine its best estimate of selling price in a manner that is consistent with that used to determine the price to sell the deliverable on a standalone basis. This ASU also eliminates the residual method of allocation and requires that arrangement consideration be allocated at the inception of the arrangement to all deliverables using the relative selling price method, which allocates any discount in the overall arrangement proportionally to each deliverable based on its relative selling price. The ASU does not apply to arrangements for which industry specific allocation and measurement guidance exists, such as long-term construction contracts and software transactions. For 3M, ASU No. 2009-13 was effective beginning January 1, 2011. 3M elected to adopt the provisions of this standard prospectively to new or materially modified arrangements beginning on the effective date. The adoption of this standard did not have a material impact on 3M's consolidated results of operations or financial condition.

In October 2009, the FASB issued ASU No. 2009-14, *Certain Revenue Arrangements That Include Software Elements—a consensus of the FASB Emerging Issues Task Force*, that reduces the types of transactions that fall within the scope of software revenue recognition guidance. Pre-existing software revenue recognition guidance required that its provisions be applied to an entire arrangement involving the sale of any products or services containing or utilizing software when the software was considered more than incidental to the product or service. As a result of the amendments included in ASU No. 2009-14, many tangible products and services that rely on software are accounted for under the multiple-element arrangements revenue recognition guidance rather than under the software revenue recognition guidance. Under the ASU, the following components are excluded from the scope of software revenue recognition guidance: the tangible element of the product, software products bundled with tangible products where the software components and non-software components function together to deliver the product's essential functionality, and undelivered components that relate to software that is essential to the tangible product's functionality. The ASU also provides guidance on how to allocate transaction consideration when an arrangement contains both deliverables within the scope of software revenue guidance (software deliverables) and deliverables not within the scope of that guidance (non-software deliverables). For 3M, ASU No. 2009-14 was effective beginning January 1, 2011. 3M elected to adopt the provisions of this standard prospectively to new or materially modified arrangements beginning on the effective date. The adoption of this standard did not have a material impact on 3M's consolidated results of operations or financial condition.

In January 2010, the FASB issued ASU No. 2010-06, *Improving Disclosures About Fair Value Measurements*, that amends pre-existing disclosure requirements under ASC 820 by adding required disclosures about items transferring into and out of levels 1 and 2 in the fair value hierarchy; adding separate disclosures about purchases, sales, issuances, and settlements relative to level 3 measurements; and clarifying, among other things, the pre-existing fair value disclosures about the level of disaggregation. For 3M, this ASU was effective for the first quarter of 2010, except for the requirement to provide level 3 activity of purchases, sales, issuances, and settlements on a gross basis, which was effective beginning the first quarter of 2011. Since this standard impacts disclosure requirements only, its adoption did not have a material impact on 3M's consolidated results of operations or financial condition.

In April 2010, the FASB issued ASU No. 2010-17, *Milestone Method of Revenue Recognition—a consensus of the FASB Emerging Issues Task Force* that recognizes the milestone method as an acceptable revenue recognition method for substantive milestones in research or development arrangements. This standard requires its provisions be met in order for an entity to recognize consideration that is contingent upon achievement of a substantive milestone as revenue in its entirety in the period in which the milestone is achieved. In addition, this ASU requires disclosure of certain information with respect to arrangements that contain milestones. For 3M, this standard was effective prospectively beginning January 1, 2011. The adoption of this standard did not have a material impact on 3M's consolidated results of operations or financial condition.

In May 2011, the FASB issued ASU No. 2011-04, *Fair Value Measurement: Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. This standard clarifies guidance on how to measure fair value and is largely consistent with existing fair value measurement principles. The ASU also expands existing disclosure requirements for fair value measurements and makes other amendments. For 3M, this ASU was effective prospectively beginning January 1, 2012. The adoption of this standard did not have a material impact on 3M's consolidated results of operations or financial condition.

In June 2011, the FASB issued ASU No. 2011-05, *Presentation of Comprehensive Income*, and in December 2011 issued ASU No. 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassification of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*. These standards require entities to present items of net income and other comprehensive income either in a single continuous statement, or in separate, but consecutive, statements of net income and other comprehensive income. The new requirements do not change which components of comprehensive income are recognized in net income or other comprehensive income, or when an item of other comprehensive income must be reclassified to net income. Also, the earnings-per share computation does not change. However, the option under previous standards to report other comprehensive income and its components in the statement of changes in equity was eliminated. For 3M, these standards were effective retrospectively beginning January 1, 2012, with early adoption permitted. 3M adopted these standards in the fourth quarter of 2011. Since these standards impact presentation and disclosure requirements only, their adoption did not have a material impact on 3M's consolidated results of operations or financial condition.

In September 2011, the FASB issued ASU No. 2011-08, *Testing Goodwill for Impairment*. Under this standard, entities testing goodwill for impairment now have an option of performing a qualitative assessment before having to calculate the fair value of a reporting unit. If an entity determines, on the basis of qualitative factors, that the fair value of the reporting unit is more-likely-than-not less than the carrying amount, the existing quantitative impairment test is required. Otherwise, no further impairment testing is required. For 3M, this ASU was effective beginning January 1, 2012, with early adoption permitted under certain conditions. The adoption of this standard did not have a material impact on 3M's consolidated results of operations or financial condition.

In December 2011, the FASB issued ASU No. 2011-11, *Disclosures About Offsetting Assets and Liabilities*, and in January 2013 issued ASU No. 2013-01, *Clarifying the Scope of Disclosures About Offsetting Assets and Liabilities*. These standards create new disclosure requirements regarding the nature of an entity's rights of setoff and related arrangements associated with its derivative instruments, repurchase agreements, and securities lending transactions. Certain disclosures of the amounts of certain instruments subject to enforceable master netting arrangements would be required, irrespective of whether the entity has elected to offset those instruments in the statement of financial position. For 3M, these ASUs are effective January 1, 2013 with retrospective application required. Since these standards impact disclosure requirements only, their adoption will not have a material impact on 3M's consolidated results of operations or financial condition.

In July 2012, the FASB issued ASU No. 2012-02, *Testing Indefinite-Lived Intangible Assets for Impairment*. Under this standard, entities testing long-lived intangible assets for impairment now have an option of performing a qualitative assessment to determine whether further impairment testing is necessary. If an entity determines, on the basis of qualitative factors, that the fair value of the indefinite-lived intangible asset is more-likely-than-not less than the carrying

amount, the existing quantitative impairment test is required. Otherwise, no further impairment testing is required. For 3M, this ASU is effective beginning January 1, 2013, with early adoption permitted under certain conditions. The adoption of this standard is not expected to have a material impact on 3M's consolidated results of operations or financial condition.

In February 2013, the FASB issued ASU No. 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. Under this standard, entities will be required to disclose additional information with respect to changes in accumulated other comprehensive income (AOCI) balances by component and significant items reclassified out of AOCI. Expanded disclosures for presentation of changes in AOCI involve disaggregating the total change of each component of other comprehensive income (for example, unrealized gains or losses on available for sale marketable securities) as well as presenting separately for each such component the portion of the change in AOCI related to (1) amounts reclassified into income and (2) current-period other comprehensive income. Additionally, for amounts reclassified into income, disclosure in one location would be required, based upon each specific AOCI component, of the amounts impacting individual income statement line items. Disclosure of the income statement line item impacts will be required only for components of AOCI reclassified into income in their entirety. Therefore, disclosure of the income statement line items affected by AOCI components such as net periodic benefit costs would not be included. The disclosures required with respect to income statement line item impacts would be made in either the notes to the consolidated financial statements or parenthetically on the face of the financial statements. For 3M, this ASU is effective beginning January 1, 2013. Because this standard only impacts presentation and disclosure requirements, its adoption will not have a material impact on 3M's consolidated results of operations or financial condition.

NOTE 2. Acquisitions

3M makes acquisitions of certain businesses from time to time that the Company feels align with its strategic intent with respect to, among other factors, growth markets and adjacent product lines or technologies.

The impact on the consolidated balance sheet of the purchase price allocations related to acquisitions, including adjustments relative to other acquisitions within the allocation period, follows. The allocations of purchase price related to the acquisitions of the business purchased from Federal Signal Corp. in September 2012, and Ceradyne, Inc. in November 2012 are considered preliminary, largely with respect to certain acquired property, plant and equipment; intangible assets; and tax-related assets and liabilities. Adjustments in 2012 to the preliminary purchase price allocations of other acquisitions within the allocation period were not material and primarily related to the 2011 acquisitions of Winterthur Technologie AG and the business acquired from GPI Group.

| (Millions) | 2012 Acquisition Activity | | |
|---|---------------------------|--------------|----------|
| | Ceradyne, Inc. | Other | |
| | | Acquisitions | Total |
| Asset (Liability) | | | |

| Cash paid | \$ 776 | \$ 227 | \$ 946 | \$ 156 | \$ 2,105 |
| Less: Cash acquired | 11 | 20 | 152 | 92 | 275 |
| Cash paid, net of cash acquired | \$ 765 | \$ 207 | \$ 794 | \$ 64 | \$ 1,830 |
| Non-cash (financed liability) | — | — | — | 18 | 18 |
| Net assets acquired | \$ 765 | \$ 207 | \$ 794 | \$ 82 | \$ 1,848 |

Goodwill resulting from business combinations is largely attributable to the existing workforce of the acquired businesses and synergies expected to arise after 3M's acquisition of these businesses. In-process research and development associated with CodeRyte, Inc. is reflected in the preceding 2012 table as purchased indefinite-lived intangible assets. Pro forma information related to acquisitions was not included because the impact on the Company's consolidated results of operations was not considered to be material.

In addition to business combinations, 3M periodically acquires certain tangible and/or intangible assets and purchases interests in certain enterprises that do not otherwise qualify for accounting as business combinations. These transactions are largely reflected as additional asset purchase and investment activity.

2012 acquisitions:

During 2012, 3M completed three business combinations. The purchase price paid for these business combinations (net of cash acquired) and the impact of other matters (net) during 2012 aggregated to \$1.046 billion.

(1) In April 2012, 3M (Health Care Business) purchased all of the outstanding shares of CodeRyte, Inc., an industry leader in clinical natural processing technology and computer-assisted coding solutions for healthcare outpatient providers, which is headquartered in Bethesda, Maryland.

(2) In September 2012, 3M (Display and Graphics Business) purchased the net assets of Federal Signal Technologies Group from Federal Signal Corp., for a total purchase price of approximately \$104 million. This business focuses on electronic toll collection and parking management hardware and software services, with primary facilities spread throughout the United States and in the U.K.

(3) In November 2012, 3M (Industrial and Transportation Business) purchased all of the outstanding shares of Ceradyne, Inc. (Ceradyne) for \$798 million, net of cash acquired. The net assets acquired in this transaction included \$250 million of marketable securities and \$93 million of debt, as indicated in the preceding 2012 table. Ceradyne, headquartered in Costa Mesa, California, is involved in the development and production of advanced technical ceramics for demanding applications in the automotive, oil and gas, solar, industrial, electronics and defense industries.

In December 2011, 3M (Consumer and Office Business) entered into a definitive agreement to acquire the Office and Consumer Products business of Avery Dennison Corp. (Avery). 3M and Avery withdrew from the regulatory approval process for this acquisition in September 2012 and subsequently announced that they had terminated this agreement in October 2012. 3M has no remaining obligations resulting from the termination of this agreement.

Purchased identifiable finite-lived intangible assets related to acquisition activity in 2012 totaled \$213 million. The associated finite-lived intangible assets acquired in 2012 will be amortized generally on a straight-line basis over a weighted-average life of 12 years (lives ranging from two to 20 years). Acquired in-process research and development and identifiable intangible assets for which significant assumed renewals or extensions of underlying arrangements impacted the determination of their useful lives were not material.

2011 acquisitions:

During 2011, 3M completed nine business combinations. The purchase price paid for these business combinations (net of cash acquired) and the impact of other matters (net) during 2011 aggregated to \$649 million.

(1) In January 2011, 3M (Industrial and Transportation Business) purchased certain assets of Nida-Core Corp., a manufacturer of structural honeycomb core and fiber-reinforced foam core materials based in Port St. Lucie, Florida.

(2) In February 2011, 3M (Industrial and Transportation Business) announced that it completed its acquisition of all of the outstanding shares of Alpha Beta Enterprise Co. Ltd., a manufacturer of box sealing tape and masking tape headquartered in Taipei, Taiwan.

(3) In February 2011, 3M (Consumer and Office Business) purchased all of the outstanding shares of Hybrivet Systems Inc., a provider of instant-read products to detect lead and other contaminants and toxins, which is based in Natick, Massachusetts.

(4) In early March 2011, 3M (Industrial and Transportation Business) acquired a controlling interest in Winterthur via completion of a public tender offer. Winterthur, based in Zug, Switzerland, is a leading global supplier of precision grinding technology serving customers in the area of hard-to-grind precision applications in industrial, automotive, aircraft and cutting tools. As of the settlement date of the tendered shares (the business acquisition date), 3M owned approximately 86 percent of Winterthur shares via the tender and previous open market share purchases. The purchase price paid in the preceding table includes non-cash consideration of \$10 million representing the business acquisition date fair value of shares previously owned by 3M as of December 31, 2010 and cash consideration paid, net of cash acquired, of \$293 million for subsequently tendered and open market purchased shares through the business acquisition date. Following the business acquisition date, 3M purchased the remaining outstanding shares of its consolidated Winterthur subsidiary, increasing 3M's ownership interest to 100 percent as of December 31, 2011 as discussed in Note 5.

(5) In April 2011, 3M (Electro and Communications Business) purchased all of the outstanding shares of AP&T Co. Ltd., based in Korea, which provides advanced sputtering and plating services, materials and manufacturing capabilities for flexible circuits for the mobile hand-held, touch-screen panel and display markets.

(6) In April 2011, 3M (Display and Graphics Business) purchased all of the outstanding shares of Original Wraps Inc., a company specializing in the creative business development, technology and design of personalization platforms for vehicles and vehicle accessories, which is based in Golden, Colorado.

(7) In July 2011, 3M (Industrial and Transportation Business) purchased all of the outstanding shares of Advanced Chemistry & Technology Inc., a manufacturer of quick-cure, light-weight polysulfide sealants for aerospace applications, which is based in Garden Grove, California.

(8) In July 2011, 3M (Industrial and Transportation Business) purchased certain assets of Piranha Plastics LLC, based in Santa Clara, California, which provides plastic molding and paint solutions to the automotive aftermarket.

(9) In October 2011, 3M (Consumer and Office Business) acquired the do-it-yourself and professional business of GPI Group. GPI, headquartered in France, is a manufacturer and marketer of home improvement products such as tapes, hooks, insulation, and floor protection products and accessories.

Purchased identifiable finite-lived intangible assets related to acquisition activity in 2011 totaled \$342 million. The associated finite-lived intangible assets acquired in 2011 will be amortized generally on a straight-line basis over a weighted-average life of 14 years (lives ranging from three to 20 years). Acquired identifiable intangible assets for which significant assumed renewals or extensions of underlying arrangements impacted the determination of their useful lives were not material.

2010 acquisitions:

During 2010, 3M completed ten business combinations. The purchase price paid for these business combinations (net of cash acquired), contingent consideration paid for pre-2009 business combinations, and the impact of other matters (net) during 2010 aggregated to \$1.83 billion. In addition, the Company recorded a financed liability of 1.7 billion Japanese Yen (approximately \$18 million based on acquisition date exchange rates) as non-cash investing and financing activity, which related to April 2010 acquisition of the A-One branded label business and related operations (discussed further below).

(1) In January 2010, 3M (Consumer and Office Business) purchased all of the outstanding shares of Incavas Industria de Cabos e Vassouras Ltda., a manufacturer of floor care products based in Rio Grande do Sul, Brazil.

(2) In April 2010, 3M (Consumer and Office Business) purchased a majority stake in the A-One branded label business and related operations, which is headquartered in Tokyo, Japan and has manufacturing, distribution and sales locations around Japan. The terms of this acquisition included embedded mirroring put and call options for a fixed price and five-year term with respect to the remaining minority shares. Accordingly, 3M recorded this business combination as an acquisition of all outstanding interests with a corresponding five-year financed liability of 1.7 billion Japanese Yen relative to the embedded put/call option as of the acquisition date. The Company records interest on this liability, which is recorded in other liabilities, at an annual rate of 1%.

(3) In May 2010, 3M (Health Care Business) purchased certain assets of J.R. Phoenix Ltd., a manufacturer of hand hygiene and skin care products for health care and professional use based in Kitchener, Ontario, Canada.

(4) In June 2010, 3M (Industrial and Transportation Business) purchased all of the outstanding shares of MTI PolyFab Inc., a manufacturer of thermal and acoustic insulation for the aerospace industry. MTI PolyFab Inc. is based in Mississauga, Ontario, Canada.

(5) In July 2010, 3M (Safety, Security and Protection Services Business) purchased all of the outstanding shares of Dailys Limited, a supplier of non-woven disposable protective clothing, primarily chemical protective coveralls for industrial use. Dailys Limited is based in Ellesmere Port, United Kingdom.

(6) In October 2010, 3M (Consumer and Office Business) purchased certain assets of Ross Outdoor Sports Specialties, LLC, a Colorado-based manufacturer of fly fishing equipment and accessories.

(7) In October 2010, 3M (Health Care Business) purchased all of the outstanding shares of Hangzhou ORJ Medical Instrument and Material Co., Ltd., a manufacturer of orthodontic supplies based in Hangzhou, China.

(8) In October 2010, 3M (Health Care Business) purchased all of the outstanding shares of Arizant Inc., a manufacturer of patient warming solutions designed to prevent hypothermia in surgical settings based in Eden Prairie, Minnesota.

(9) In October 2010, 3M (Safety, Security and Protection Services Business) purchased all of the outstanding shares of Attenti Holdings S.A., a Tel Aviv, Israel-based supplier of remote people-monitoring technologies used for offender-monitoring applications and to assist eldercare facilities in monitoring and enhancing the safety of patients.

(10) In October 2010, 3M (Safety, Security and Protection Services Business) acquired a controlling interest in Cogent Inc. via a tender offer, and in December 2010 completed a second-step merger for the same amount per outstanding share as the tender offer, thereby acquiring the remaining noncontrolling interest in the company. Cogent Inc., based in Pasadena, California, is a provider of finger, palm, face and iris biometric systems for governments, law enforcement agencies, and commercial enterprises. The consideration paid in the preceding table includes \$248 million related to the December 2010 acquisition of the remaining noncontrolling interest in Cogent, Inc. Net assets acquired in the Cogent Inc. transaction included \$532 million of cash and marketable securities, as indicated in the preceding 2010 table.

Purchased identifiable intangible assets related to the acquisition activity in 2010 totaled \$663 million. The associated finite-lived intangible assets acquired in 2010 will be amortized generally on a straight-line basis over a weighted-average life of 11 years (lives ranging from two to 17 years). Acquired identifiable intangible assets for which significant assumed renewals or extensions of underlying arrangements impacted the determination of their useful lives were not material.

NOTE 3. Goodwill and Intangible Assets

Purchased goodwill from acquisitions totaled \$327 million in 2012, \$41 million of which is deductible for tax purposes. Purchased goodwill from acquisitions totaled \$255 million in 2011, \$7 million of which is deductible for tax purposes. The acquisition activity in the following table also includes the net impact of adjustments to the preliminary allocation of purchase price for prior year acquisitions, which increased goodwill by \$12 million in 2012 and increased goodwill by \$4 million in 2011. The amounts in the "Translation and other" column in the following table primarily relate to changes in foreign currency exchange rates. The goodwill balance by business segment follows:

Goodwill

| (Millions) | Dec. 31, 2010 Balance | 2011 acquisition activity | 2011 translation and other | Dec. 31, 2011 Balance | 2012 acquisition activity | 2012 translation and other | Dec. 31, 2012 Balance |
|----------------------|-----------------------------|---------------------------------|----------------------------------|-----------------------------|---------------------------------|----------------------------------|-----------------------------|
| Industrial and | | | | | | | |
| Transportation | \$ 1,783 | \$ 205 | \$ (27) | \$ 1,961 | \$ 204 | \$ 19 | \$ 2,184 |
| Health Care | 1,506 | 3 | 5 | 1,514 | 88 | (4) | 1,598 |
| Consumer and Office | 187 | 42 | (1) | 228 | 6 | (1) | 233 |
| Safety, Security and | | | | | | | |
| Protection Services | 1,670 | (1) | 6 | 1,675 | — | 6 | 1,681 |
| Display and Graphics | 994 | 4 | (5) | 993 | 41 | (18) | 1,016 |
| Electro and | | | | | | | |
| Communications | 680 | 6 | (10) | 676 | — | (3) | 673 |
| Total Company | \$ 6,820 | \$ 259 | \$ (32) | \$ 7,047 | \$ 339 | \$ (1) | \$ 7,385 |

Effective in the first quarter of 2012, 3M made certain product moves across divisions within its business segments, but none were across business segments. For any product moves that resulted in reporting unit changes, the Company applied the relative fair value method to determine the impact on goodwill of the associated reporting units. In addition, during the first quarter of 2012, the Company completed its assessment of any potential goodwill impairment for reporting units impacted by this new structure and determined that no impairment existed. The Company also completed its annual goodwill impairment test in the fourth quarter of 2012 for all reporting units and determined that no impairment existed. In addition, the Company had no impairments of goodwill in prior years.

Acquired Intangible Assets

For 2012, intangible assets (excluding goodwill) acquired through business combinations increased the gross carrying amount by \$213 million. Balances are also impacted by changes in foreign currency exchange rates. The gross carrying amount and accumulated amortization of acquired intangible assets as of December 31, follow:

| (Millions) | 2012 | 2011 |
|---|------------|------------|
| Patents | \$ 596 | \$ 561 |
| Other amortizable intangible assets (primarily tradenames and customer related intangibles) | 2,456 | 2,323 |
| Total gross carrying amount | \$ 3,052 | \$ 2,884 |
| Accumulated amortization — patents | (421) | (374) |
| Accumulated amortization — other | (833) | (717) |
| Total accumulated amortization | \$ (1,254) | \$ (1,091) |
| Total finite-lived intangible assets — net | \$ 1,798 | \$ 1,793 |
| Non-amortizable intangible assets (primarily tradenames) | 127 | 123 |
| Total intangible assets — net | \$ 1,925 | \$ 1,916 |

3M has certain tradenames that are not amortized because of the long-time established name recognition in their respective industries.

Amortization expense for the years ended December 31 follows:

| <u>(Millions)</u> | <u>2012</u> | <u>2011</u> | <u>2010</u> |
|----------------------|---------------|---------------|---------------|
| Amortization expense | <u>\$ 233</u> | <u>\$ 235</u> | <u>\$ 176</u> |

Expected amortization expense for acquired amortizable intangible assets recorded as of December 31, 2012 follows:

| <u>(Millions)</u> | <u>2013</u> | <u>2014</u> | <u>2015</u> | <u>2016</u> | <u>2017</u> | <u>After 2017</u> |
|----------------------|---------------|---------------|---------------|---------------|---------------|-----------------------|
| Amortization expense | <u>\$ 239</u> | <u>\$ 214</u> | <u>\$ 200</u> | <u>\$ 186</u> | <u>\$ 171</u> | <u>\$ 788</u> |

The preceding expected amortization expense is an estimate. Actual amounts of amortization expense may differ from estimated amounts due to additional intangible asset acquisitions, changes in foreign currency exchange rates, impairment of intangible assets, accelerated amortization of intangible assets and other events. 3M expenses the costs incurred to renew or extend the term of intangible assets.

NOTE 4. Supplemental Balance Sheet Information

Accounts payable (included as a separate line item in the Consolidated Balance Sheet) includes drafts payable on demand of \$74 million at December 31, 2012, and \$82 million at December 31, 2011. Accumulated depreciation for capital leases totaled \$73 million and \$60 million as of December 31, 2012, and 2011, respectively. Additional supplemental balance sheet information is provided in the table that follows.

| (Millions) | 2012 | 2011 |
|---|-----------------|-----------------|
| Other current assets | | |
| Prepaid expenses and other | \$ 555 | \$ 676 |
| Deferred income taxes | 472 | 385 |
| Derivative assets-current | 49 | 107 |

| Other | 267 | 233 |
| Total other liabilities | <u>\$ 1,634</u> | <u>\$ 1,857</u> |

NOTE 5. Supplemental Equity and Comprehensive Income Information

Common stock (\$.01 par value per share) of 3.0 billion shares is authorized, with 944,033,056 shares issued. Treasury stock is reported at cost, with 256,941,406 shares at December 31, 2012, 249,063,015 shares at December 31, 2011, and 232,055,448 shares at December 31, 2010. Preferred stock, without par value, of 10 million shares is authorized but unissued.

The components of other comprehensive income (loss) and accumulated other comprehensive income (loss) attributable to 3M follow.

Accumulated Other Comprehensive Income (Loss) Attributable to 3M

| (Millions) | December 31, 2012 | December 31, 2011 |
|---|----------------------|----------------------|
| Cumulative translation adjustment | \$ 230 | \$ 114 |
| Defined benefit pension and postretirement plans adjustment | (4,955) | (5,155) |
| Debt and equity securities, unrealized gain (loss) | (2) | (6) |
| Cash flow hedging instruments, unrealized gain (loss) | (23) | 22 |
| Total accumulated other comprehensive income (loss) | <u>\$ (4,750)</u> | <u>\$ (5,025)</u> |

Components of Comprehensive Income (Loss) Attributable to 3M Years ended December 31

| (Millions) | 2012 | 2011 | 2010 |
|---|-----------------|-----------------|-----------------|
| Net income attributable to 3M | \$ 4,444 | \$ 4,283 | \$ 4,085 |
| Cumulative translation | 133 | (253) | 213 |
| Tax effect | (17) | (7) | (8) |
| Cumulative translation - net of tax | 116 | (260) | 205 |
| Defined benefit pension and postretirement plans adjustment | 411 | (1,977) | (68) |
| Tax effect | (211) | 701 | 28 |
| Defined benefit pension and postretirement plans adjustment - net of tax | 200 | (1,276) | (40) |
| Debt and equity securities, unrealized gain (loss) | 6 | - | 5 |
| Tax effect | (2) | - | (2) |
| Debt and equity securities, unrealized gain (loss) - net of tax | 4 | - | 3 |
| Cash flow hedging instruments, unrealized gain (loss) | (69) | 84 | 6 |
| Tax effect | 24 | (30) | (2) |
| Cash flow hedging instruments unrealized gain (loss) - net of tax | (45) | 54 | 4 |
| Total comprehensive income (loss) attributable to 3M | \$ 4,719 | \$ 2,801 | \$ 4,257 |

Reclassification adjustments are made to avoid double counting in comprehensive income items that are also recorded as part of net income. Reclassifications to earnings from accumulated other comprehensive income including noncontrolling interest that related to pension and postretirement expense in the income statement were \$615 million pre-tax (\$396 million after-tax) in 2012, \$475 million pre-tax (\$307 million after-tax) in 2011, and \$306 million pre-tax (\$197 million after-tax) in 2010. These pension and postretirement expense pre-tax amounts are shown in the table in Note 10 as amortization of transition (asset) obligation, amortization of prior service cost (benefit) and amortization of net actuarial (gain) loss. Cash flow hedging instruments reclassifications are provided in Note 11. Reclassifications to earnings from accumulated other comprehensive income that related to realized losses due to sales or impairments (net of realized gains) for debt and equity securities were not material for 2012, \$10 million pre-tax (\$6 million after-tax) in 2011, and not material for 2010. Income taxes are not provided for foreign translation relating to permanent investments in international subsidiaries, but tax effects within cumulative translation do include impacts from items such as net investment hedge transactions.

Purchase and Sale of Subsidiary Shares and Transfers of Ownership Interests Involving Non-Wholly Owned Subsidiaries

As discussed in Note 2, in early March 2011, 3M acquired a controlling interest in Winterthur Technologie AG (Winterthur), making Winterthur a consolidated subsidiary as of that business acquisition date. Subsequent to this business acquisition date, 3M purchased additional outstanding shares of its Winterthur subsidiary increasing 3M's ownership interest from approximately 86 percent as of the business acquisition date to 100 percent as of December 31, 2011. The \$57 million of cash paid in 2011 as a result of these additional purchases of Winterthur shares was classified as other financing activity in the consolidated statement of cash flows. These additional purchases did not result in a material transfer from noncontrolling interest to 3M Company shareholders' equity. In addition, during 2011, 3M sold a noncontrolling interest in a newly formed subsidiary for an immaterial amount, which was also classified as other financing activity in the consolidated statement of cash flows.

During the second half of 2009 and the first half of 2010, 3M effected a purchase of subsidiary shares and transfers of ownership interests to align activities in Japan and to simplify the Company's ownership structure. As a result of these activities, beginning in June 2010 the Company has a wholly owned subsidiary in the region in addition to its majority owned Sumitomo 3M Limited entity (Sumitomo 3M). Because the Company retained its controlling interest in the subsidiaries involved, these activities resulted in changes to 3M Company shareholders' equity and noncontrolling interest. These activities included the following:

- During the second half of 2009, a wholly owned subsidiary that, in turn, owned a portion of the Company's majority owned Sumitomo 3M, was transferred to another subsidiary (referred to herein as 3M HC) that was majority, rather than wholly, owned. Sumitomo 3M also owned a portion of 3M HC. As a result of the transaction, 3M's effective ownership in Sumitomo 3M was reduced from 75 percent to 71.5 percent. The transfer resulted in a decrease in 3M Company shareholders' equity and an increase in noncontrolling interest of \$81 million in the second half of 2009.
- During the first quarter of 2010, majority owned 3M HC which, as a result of the transfer above owned a portion of the Company's majority owned Sumitomo 3M, transferred this interest to Sumitomo 3M. In addition, Sumitomo 3M purchased a portion of its shares held by its noncontrolling interest, Sumitomo Electric Industries, Ltd. (SEI), by paying cash of 5.8 billion Japanese Yen and entering into a note payable to SEI of 17.4 billion Japanese Yen (approximately \$63 million and \$188 million, respectively, based on applicable exchange rates at that time). As a result of these transactions, 3M's effective ownership in Sumitomo 3M was increased from 71.5 percent to 75 percent. The cash paid as a result of the purchase of Sumitomo 3M shares from SEI was classified as other financing activity in the consolidated statement of cash flows. The remainder of the purchase financed by the note payable to SEI was considered non-cash financing activity in the first quarter of 2010. These transactions resulted in an increase in 3M Company shareholders' equity of \$22 million and a decrease in noncontrolling interest of \$278 million in the first quarter of 2010.
- During the second quarter of 2010, majority owned Sumitomo 3M transferred its interest in 3M HC to 3M HC. As a result of this transaction, 3M HC became wholly owned by the Company. The transfer resulted in an increase in 3M Company shareholders' equity and a decrease in noncontrolling interest of \$24 million in the second quarter of 2010.

3M also acquired the remaining noncontrolling interest of a previously majority owned subsidiary for an immaterial amount during the first half of 2010. In addition, as discussed in Note 2, in October 2010 3M acquired a controlling interest in Cogent Inc. via a tender offer and in December 2010 completed a second-step merger for the same amount per outstanding share as the tender offer, thereby acquiring the remaining noncontrolling interest in Cogent Inc. The resulting October 2010 increase and December 2010 decrease in noncontrolling interest associated with the Cogent Inc. transactions are presented netting to zero with respect to the amount impacting noncontrolling interest in the consolidated statement of changes in equity. However, the December 2010 transaction resulted in an immaterial transfer from noncontrolling interest to 3M Company shareholders' equity.

The following table summarizes the effects of the 2010 transactions on equity attributable to 3M Company shareholders.

| <u>(Millions)</u> | <u>2010</u> |
|---|-----------------|
| Net income attributable to 3M | \$ 4,085 |
| Transfers from noncontrolling interest | 43 |
| Change in 3M Company shareholders' equity from net income attributable to 3M and transfers from noncontrolling interest | <u>\$ 4,128</u> |

NOTE 6. Supplemental Cash Flow Information

| <u>(Millions)</u> | <u>2012</u> | <u>2011</u> | <u>2010</u> |
|--|-------------|-------------|-------------|
| Cash income tax payments, net of refunds | \$ 1,717 | \$ 1,542 | \$ 1,509 |
| Cash interest payments | 166 | 219 | 178 |
| Capitalized interest | 23 | 19 | 17 |

Cash interest payments include interest paid on debt and capital lease balances, including net interest payments/receipts related to accreted debt discounts/premiums, as well as net interest payments/receipts associated with interest rate swap contracts.

Individual amounts in the Consolidated Statement of Cash Flows exclude the impacts of acquisitions, divestitures and exchange rate impacts, which are presented separately.

Transactions related to investing and financing activities with significant non-cash components are as follows:

- During 2010, Sumitomo 3M purchased a portion of its shares held by its noncontrolling interest, Sumitomo Electric Industries, Ltd. (SEI), by paying cash of 5.8 billion Japanese Yen and entering into a note payable to SEI of 17.4 billion Japanese Yen. The cash paid as a result of the purchase of Sumitomo 3M shares from SEI was classified as other financing activity in the consolidated statement of cash flows. The remainder of the purchase financed by the note payable to SEI was considered non-cash financing activity in the first quarter of 2010. This is described in Note 5 in the section entitled "Purchase and Sale of Subsidiary Shares and Transfers of Ownership Interests Involving Non-Wholly Owned Subsidiaries".
- Also in 2010, as discussed in Note 2, the Company recorded a financed liability of 1.7 billion Japanese Yen related to the A-One acquisition.

NOTE 7. Income Taxes

Income Before Income Taxes

| (Millions) | 2012 | 2011 | 2010 |
|---------------|----------|----------|----------|
| United States | \$ 2,902 | \$ 2,516 | \$ 2,778 |
| International | 3,449 | 3,515 | 2,977 |
| Total | \$ 6,351 | \$ 6,031 | \$ 5,755 |

Provision for Income Taxes

| (Millions) | 2012 | 2011 | 2010 |
|-------------------|----------|----------|----------|
| Currently payable | | | |
| Federal | \$ 743 | \$ 431 | \$ 837 |
| State | 75 | 51 | 73 |
| International | 918 | 861 | 796 |
| Deferred | | | |
| Federal | (3) | 181 | 55 |
| State | 10 | 12 | 43 |
| International | 97 | 138 | (212) |
| Total | \$ 1,840 | \$ 1,674 | \$ 1,592 |

Components of Deferred Tax Assets and Liabilities

| (Millions) | 2012 | 2011 |
|--|------------|------------|
| Deferred tax assets: | | |
| Accruals not currently deductible | | |
| Employee benefit costs | \$ 115 | \$ 96 |
| Product and other claims | 161 | 155 |
| Miscellaneous accruals | 137 | 133 |
| Pension costs | 969 | 1,183 |
| Stock-based compensation | 415 | 483 |
| Net operating/capital loss carryforwards | 304 | 392 |
| Foreign tax credits | 285 | 286 |
| Inventory | 189 | 174 |
| Other - net | 18 | — |
| Gross deferred tax assets | 2,593 | 2,902 |
| Valuation allowance | (29) | (82) |
| Total deferred tax assets | \$ 2,564 | \$ 2,820 |
| Deferred tax liabilities: | | |
| Product and other insurance receivables | \$ (60) | \$ (63) |
| Accelerated depreciation | (858) | (745) |
| Intangible amortization | (808) | (799) |
| Other | — | (84) |
| Total deferred tax liabilities | \$ (1,726) | \$ (1,691) |
| Net deferred tax assets | \$ 838 | \$ 1,129 |

The net deferred tax assets are included as components of Other Current Assets, Other Assets, Other Current Liabilities, and Other Liabilities within the Consolidated Balance Sheet. See Note 4 "Supplemental Balance Sheet Information" for further details.

As of December 31, 2012, the Company had tax effected federal, state, and international operating loss, capital loss, and tax credit carryovers of approximately \$43 million, \$11 million, and \$250 million (before valuation allowances), respectively. The federal tax attribute carryovers will expire after seventeen to nineteen years, the state after five to ten years, and the majority of international after seven years with the remaining international expiring in one year or with an indefinite carryover period. The tax attributes being carried over arise as certain jurisdictions may have tax losses or may

have inabilities to utilize certain losses without the same type of taxable income. The Company has provided \$29 million of valuation allowance against certain of these deferred tax assets based on management's determination that it is more-likely-than-not that the tax benefits related to these assets will not be realized. The valuation allowance was reduced in 2012 due to the closure of audits with certain taxing authorities.

During 2012, the Company contributed \$1.079 billion to its U.S. and international pension plans and \$67 million to its postretirement plans. During 2011, the Company contributed \$517 million to its U.S. and international pension plans and \$65 million to its postretirement plans. During 2010, the Company contributed \$556 million to its U.S. and international pension plans and \$62 million to its postretirement plans. The current income tax provision includes a benefit for the pension contributions; the deferred tax provision includes a cost for the related temporary difference.

Reconciliation of Effective Income Tax Rate

| | 2012 | 2011 | 2010 |
|---|--------|--------|--------|
| Statutory U.S. tax rate | 35.0 % | 35.0 % | 35.0 % |
| State income taxes - net of federal benefit | 0.9 | 0.7 | 1.2 |
| International income taxes - net | (4.2) | (4.6) | (7.1) |
| U.S. research and development credit | - | (0.5) | (0.2) |
| Reserves for tax contingencies | (1.9) | (1.2) | (0.5) |
| Medicare Modernization Act, one-time charge | - | - | 1.5 |
| Domestic Manufacturer's deduction | (1.2) | (1.5) | (1.4) |
| All other - net | 0.4 | (0.1) | (0.8) |
| Effective worldwide tax rate | 29.0 % | 27.8 % | 27.7 % |

The effective tax rate for 2012 was 29.0 percent, compared to 27.8 percent in 2011, an increase of 1.2 percentage points. Various factors increased or decreased the effective tax rate when compared to the same periods last year. The primary factors that increased the Company's effective tax rate year-on-year include international taxes, specifically with respect to the corporate reorganization of a wholly owned international subsidiary (which benefited 2011), state income taxes, lower domestic manufacturer's deduction, and the lapse of the U.S. research and development credit. These and other factors, when compared to 2011, increased the 2012 effective tax rate by 2.1 percentage points. Factors that decreased the Company's effective tax rate year-on-year include international taxes as a result of changes to the geographic mix of income before taxes and adjustments to its income tax reserves. These factors, when compared to last year, decreased the effective tax rate 0.9 percentage points.

On January 2, 2013, the American Taxpayer Relief Act of 2012 was signed into law. Included in this Act was the extension of the research and development credit for years 2012 and 2013. As this Act was enacted during 2013, the impacts of this law are not included in the 2012 financial results. The Company anticipates a beneficial impact on the effective tax rate in 2013 for both the 2012 and 2013 research and development credit.

The effective tax rate for 2011 was 27.8 percent, compared to 27.7 percent in 2010, an increase of 0.1 percentage points. The year-on-year change in international income taxes increased the effective tax rate for 2011 when compared to 2010 by approximately 2.5 percentage points, which includes a partial offsetting benefit from the corporate reorganization of a wholly owned international subsidiary in 2011. This 2.5 percentage point net increase was due primarily to certain 2010 tax benefits, which did not repeat in 2011, related to net operating losses partially offset by a valuation allowance resulting from the 2010 corporate alignment transactions that allowed the Company to increase its ownership of a foreign subsidiary. These transactions are described in the section of Note 5 entitled "Purchase and Sale of Subsidiary Shares and Transfers of Ownership Interest Involving Non-Wholly Owned Subsidiaries". Other significant items impacting the year-on-year comparison include a one-time 2010 income tax charge of \$84 million (discussed further below), which benefited the 2011 tax rate when compared to 2010 by 1.5 percentage points, as this charge did not repeat in 2011. The Company's effective tax rate also benefited during 2011 when compared to 2010 by approximately 0.7 percentage points from adjustments to its income tax reserves.

Under a Federal program (Medicare Modernization Act) that was established to encourage companies to provide retiree prescription drug coverage, many companies, including 3M, received a tax-advantaged subsidy. The tax advantage of the subsidy was eliminated by the Patient Protection and Affordable Care Act (H.R. 3590), including modifications included in the Health Care and Education Reconciliation Act of 2010 (collectively, the "Act"), which were enacted in March 2010. Although the elimination of this tax advantage does not take effect until 2013 under the Act, 3M was required to recognize the full accounting impact in its financial statements in the period in which the Act was enacted. Because future anticipated retiree health care liabilities and related tax subsidies are already reflected in 3M's financial statements, the

change in law resulted in a reduction of the value of the company's deferred tax asset related to the subsidy. This reduction in value resulted in a one-time non-cash income tax charge to 3M's earnings in 2010 of approximately \$84 million, or 12 cents per diluted share.

The Company files income tax returns in the U.S. federal jurisdiction, and various states and foreign jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2004.

The IRS completed its field examination of the Company's U.S. federal income tax returns for the years 2005 through 2007 in the fourth quarter of 2009. The Company protested certain IRS positions within these tax years and entered into the administrative appeals process with the IRS during the first quarter of 2010. During the first quarter of 2010, the IRS completed its field examination of the Company's U.S. federal income tax return for the 2008 year. The Company protested certain IRS positions for 2008 and entered into the administrative appeals process with the IRS during the second quarter of 2010. During the first quarter of 2011, the IRS completed its field examination of the Company's U.S. federal income tax return for the 2009 year. The Company protested certain IRS positions for 2009 and entered into the administrative appeals process with the IRS during the second quarter of 2011. During the first quarter of 2012, the IRS completed its field examination of the Company's U.S. federal income tax return for the 2010 year. The Company protested certain IRS positions for 2010 and entered into the administrative appeals process with the IRS during the second quarter of 2012. In December 2012, the Company received a statutory notice of deficiency for the 2006 year. The Company intends to file a petition in Tax Court in the first quarter of 2013.

Currently, the Company is under examination by the IRS for its U.S. federal income tax returns for the years 2011, 2012, and 2013. It is anticipated that the IRS will complete its examination of the Company for 2011 by the end of the second quarter of 2013, for 2012 by the end of the first quarter of 2014, and for 2013 by the end of the first quarter of 2015. As of December 31, 2012, the IRS has not proposed any significant adjustments to the Company's tax positions for which the Company is not adequately reserved.

During the first quarter of 2010, the Company paid the agreed upon assessments for the 2005 tax year. During the second quarter of 2010, the Company paid the agreed upon assessments for the 2008 tax year. During the second quarter of 2011, the Company received a refund from the IRS for the 2004 tax year. During the first quarter of 2012, the Company paid the agreed upon assessments for the 2010 tax year. Payments relating to other proposed assessments arising from the 2005 through 2013 examinations may not be made until a final agreement is reached between the Company and the IRS on such assessments or upon a final resolution resulting from the administrative appeals process or judicial action. In addition to the U.S. federal examination, there is also limited audit activity in several U.S. state and foreign jurisdictions.

3M anticipates changes to the Company's uncertain tax positions due to the closing of various audit years mentioned above. Currently, the Company is not able to reasonably estimate the amount by which the liability for unrecognized tax benefits will increase or decrease during the next 12 months as a result of the ongoing income tax authority examinations.

A reconciliation of the beginning and ending amount of gross unrecognized tax benefits (UTB) is as follows:

Federal, State and Foreign Tax

| (Millions) | 2012 | 2011 | 2010 |
|--|--------|--------|--------|
| Gross UTB Balance at January 1 | \$ 594 | \$ 622 | \$ 618 |
| Additions based on tax positions related to the current year | 80 | 92 | 128 |
| Additions for tax positions of prior years | 114 | 69 | 142 |
| Reductions for tax positions of prior years | (120) | (123) | (161) |
| Settlements | (50) | 9 | (51) |
| Reductions due to lapse of applicable statute of limitations | (90) | (75) | (54) |
| Gross UTB Balance at December 31 | \$ 528 | \$ 594 | \$ 622 |
| Net UTB impacting the effective tax rate at December 31 | \$ 185 | \$ 295 | \$ 394 |

The total amount of UTB, if recognized, would affect the effective tax rate by \$185 million as of December 31, 2012, \$295 million as of December 31, 2011, and \$394 million as of December 31, 2010. The ending net UTB results from adjusting the gross balance for items such as Federal, State, and non-U.S. deferred items, interest and penalties, and deductible

taxes. The net UTB is included as components of Other Current Assets, Other Assets, Accrued Income Taxes, and Other Liabilities within the Consolidated Balance Sheet.

The Company recognizes interest and penalties accrued related to unrecognized tax benefits in tax expense. The Company recognized in the consolidated statement of income on a gross basis approximately \$12 million, \$1 million, and \$9 million of benefit in 2012, 2011, and 2010, respectively. At December 31, 2012 and December 31, 2011, accrued interest and penalties in the consolidated balance sheet on a gross basis were \$44 million and \$56 million, respectively. Included in these interest and penalty amounts are interest and penalties related to tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility. Because of the impact of deferred tax accounting, other than interest and penalties, the disallowance of the shorter deductibility period would not affect the annual effective tax rate but would accelerate the payment of cash to the taxing authority to an earlier period.

As a result of certain employment commitments and capital investments made by 3M, income from manufacturing activities in China, Taiwan, Korea, Brazil, and Singapore is subject to reduced tax rates or, in some cases, is exempt from tax for years through 2013, 2016, 2018, 2023, and 2023, respectively. The income tax benefits attributable to the tax status of these subsidiaries are estimated to be \$64 million (9 cents per diluted share) in 2012, \$77 million (11 cents per diluted share) in 2011, and \$69 million (10 cents per diluted share) in 2010.

The Company has not provided deferred taxes on unremitted earnings attributable to international companies that have been considered to be reinvested indefinitely. These earnings relate to ongoing operations and were approximately \$8.6 billion as of December 31, 2012. Because of the availability of U.S. foreign tax credits, it is not practicable to determine the income tax liability that would be payable if such earnings were not indefinitely reinvested.

NOTE 8. Marketable Securities

The Company invests in agency securities, corporate securities, asset-backed securities, treasury securities and other securities. The following is a summary of amounts recorded on the Consolidated Balance Sheet for marketable securities (current and non-current).

| (Millions) | December 31, 2012 | December 31, 2011 |
|--|----------------------|----------------------|
| U.S. government agency securities | \$ 162 | \$ 119 |
| Foreign government agency securities | 16 | 8 |
| Corporate debt securities | 471 | 413 |
| Commercial paper | 116 | 30 |
| Certificates of deposit/time deposits | 41 | 49 |
| U.S. treasury securities | 54 | — |
| U.S. municipal securities | 13 | 9 |
| Asset-backed securities: | | |
| Automobile loan related | 567 | 530 |
| Credit card related | 123 | 244 |
| Equipment lease related | 54 | 54 |
| Other | 31 | 5 |
| Asset-backed securities total | <u>775</u> | <u>833</u> |
| Current marketable securities | \$ 1,648 | \$ 1,461 |
| U.S. government agency securities | \$ 125 | \$ 361 |
| Foreign government agency securities | 51 | 15 |
| Corporate debt securities | 494 | 255 |
| U.S. treasury securities | 18 | 34 |
| U.S. municipal securities | 14 | 5 |
| Auction rate securities | 7 | 4 |
| Asset-backed securities: | | |
| Automobile loan related | 375 | 188 |
| Credit card related | 34 | 24 |
| Equipment lease related | 36 | 10 |
| Other | 8 | — |
| Asset-backed securities total | <u>453</u> | <u>222</u> |
| Non-current marketable securities | \$ 1,162 | \$ 896 |
| Total marketable securities | \$ 2,810 | \$ 2,357 |

Classification of marketable securities as current or non-current is dependent upon management's intended holding period, the security's maturity date and liquidity considerations based on market conditions. If management intends to hold the securities for longer than one year as of the balance sheet date, they are classified as non-current. At December 31, 2012, gross unrealized losses totaled approximately \$6 million (pre-tax), while gross unrealized gains totaled approximately \$3 million (pre-tax). At December 31, 2011, gross unrealized losses totaled approximately \$12 million (pre-tax), while gross unrealized gains totaled approximately \$3 million (pre-tax). Gross realized gains and losses on sales or maturities of marketable securities were not material in 2012, 2011 and 2010. Cost of securities sold use the first in, first out (FIFO) method. Since these marketable securities are classified as available-for-sale securities, changes in fair value will flow through other comprehensive income, with amounts reclassified out of other comprehensive income into earnings upon sale or "other-than-temporary" impairment.

3M reviews impairments associated with its marketable securities in accordance with the measurement guidance provided by ASC 320, *Investments-Debt and Equity Securities*, when determining the classification of the impairment as "temporary" or "other-than-temporary". A temporary impairment charge results in an unrealized loss being recorded in the other comprehensive income component of shareholders' equity. Such an unrealized loss does not reduce net income attributable to 3M for the applicable accounting period because the loss is not viewed as other-than-temporary. The factors evaluated to differentiate between temporary and other-than-temporary include the projected future cash flows, credit ratings actions, and assessment of the credit quality of the underlying collateral, as well as other factors.

The balance at December 31, 2012 for marketable securities by contractual maturity are shown below. Actual maturities may differ from contractual maturities because the issuers of the securities may have the right to prepay obligations without prepayment penalties.

| <u>(Millions)</u> | <u>December 31, 2012</u> |
|--|--------------------------|
| Due in one year or less | \$ 912 |
| Due after one year through three years | 1,483 |
| Due after three years through five years | 414 |
| Due after five years | <u>1</u> |
| Total marketable securities | <u>\$ 2,810</u> |

3M has a diversified marketable securities portfolio of \$2.810 billion as of December 31, 2012. Within this portfolio, current and long-term asset-backed securities (estimated fair value of \$1.228 billion) are primarily comprised of interests in automobile loans and credit cards. At December 31, 2012, all asset-backed securities were rated AAA or A-1+ by Standard & Poor's and/or Aaa or P-1 by Moody's Investors Service and/or AAA or F1+ by Fitch Ratings.

3M's marketable securities portfolio includes auction rate securities that represent interests in investment grade credit default swaps; however, currently these holdings comprise less than one percent of this portfolio. The estimated fair value of auction rate securities are \$7 million and \$4 million as of December 31, 2012 and 2011, respectively. Gross unrealized losses within accumulated other comprehensive income related to auction rate securities totaled \$6 million (pre-tax) and \$9 million (pre-tax) as of December 31, 2012 and 2011, respectively. As of December 31, 2012, auction rate securities associated with these balances have been in a loss position for more than 12 months. Since the second half of 2007, these auction rate securities failed to auction due to sell orders exceeding buy orders. Liquidity for these auction-rate securities is typically provided by an auction process that resets the applicable interest rate at pre-determined intervals, usually every 7, 28, 35, or 90 days. The funds associated with failed auctions will not be accessible until a successful auction occurs or a buyer is found outside of the auction process. Refer to Note 12 for a table that reconciles the beginning and ending balances of auction rate securities.

NOTE 9. Long-Term Debt and Short-Term Borrowings

The following debt tables reflect interest rates, including the effects of interest rate swaps, as of December 31, 2012. Long-term debt and short-term borrowings as of December 31 consisted of the following:

Long-Term Debt

| (Millions) Description / 2012 Principal Amount | Currency/ Fixed vs. Floating | Effective Interest Rate | Final Maturity Date | 2012 | 2011 |
|---|------------------------------------|-------------------------------|---------------------------|----------|----------|
| Eurobond (775 million Euros) | Euro Fixed | 4.30 % | 2014 | \$ 1,034 | \$ 1,017 |
| Medium-term note (\$1 billion) | USD Fixed | 1.62 % | 2016 | 994 | 992 |
| Medium-term note (\$850 million) | USD Fixed | 4.42 % | 2013 | 850 | 849 |
| 30-year bond (\$750 million) | USD Fixed | 5.73 % | 2037 | 747 | 747 |
| Medium-term note (\$650 million) | USD Fixed | 1.10 % | 2017 | 647 | — |
| Medium-term note (\$600 million) | USD Fixed | 2.17 % | 2022 | 592 | — |
| Medium-term note | USD Fixed | — % | — | — | 500 |
| Eurobond (250 million Euros) | Euro Floating | 0.88 % | 2014 | 349 | 347 |
| 30-year debenture (\$330 million) | USD Fixed | 6.01 % | 2028 | 347 | 348 |
| UK borrowing (66 million GBP) | GBP Floating | 1.34 % | 2015 | 106 | — |
| Floating rate note (\$97 million) | USD Floating | 0.00 % | 2041 | 97 | 97 |
| Floating rate note (\$59 million) | USD Floating | 0.00 % | 2044 | 59 | 59 |
| Other borrowings | Various | 0.36 % | 2013-2040 | 80 | 91 |
| Total long-term debt | | | | \$ 5,902 | \$ 5,047 |
| Less: current portion of long-term debt | | | | 986 | 563 |
| Long-term debt (excluding current portion) | | | | \$ 4,916 | \$ 4,484 |

Short-Term Borrowings and Current Portion of Long-Term Debt

| (Millions) | Effective Interest Rate | 2012 | 2011 |
|---|----------------------------|----------|--------|
| Current portion of long-term debt | 3.83 % | \$ 986 | \$ 563 |
| U.S. dollar commercial paper | — % | — | — |
| Other borrowings | 4.70 % | 99 | 119 |
| Total short-term borrowings and current portion of long-term debt | | \$ 1,085 | \$ 682 |

The following weighted-average effective interest rate table reflects the combined effects of interest rate and currency swaps at December 31, 2012 and 2011.

Weighted-Average Effective Interest Rate

| At December 31 | Total | |
|----------------|--------|--------|
| | 2012 | 2011 |
| Short-term | 3.91 % | 4.32 % |
| Long-term | 3.16 % | 3.76 % |

Maturities of long-term debt for the five years subsequent to December 31, 2012 are as follows (in millions):

| 2013 | 2014 | 2015 | 2016 | 2017 | After 2017 | Total |
|--------|----------|--------|--------|--------|---------------|----------|
| \$ 986 | \$ 1,481 | \$ 107 | \$ 994 | \$ 648 | \$ 1,686 | \$ 5,902 |

Long-term debt payments due in 2013 and 2014 include floating rate notes totaling \$132 million (classified as current portion of long-term debt) and \$97 million, respectively, as a result of put provisions associated with these debt instruments.

The floating rate notes contain put provisions granting the holders the option to require 3M to repurchase the securities on certain dates. Under the terms of the floating rate notes due in 2044, holders have an annual put feature. 3M would be required to repurchase these securities at a discount to par ranging from 98 percent to 99 percent up until 2013, and at 100 percent of par value from 2014 and every anniversary thereafter until final maturity. Under the terms of the floating

rate notes due in 2027, 2040, and 2041, holders have put options that commence ten years after the date of issuance and each third anniversary thereafter until final maturity. 3M would be required to repurchase these securities at various prices, ranging from 99 percent to 100 percent of par value according to the redemption schedules for each security. In 2011, 2010, 2009 and 2008, 3M was required to repurchase an immaterial amount of principal on the aforementioned floating rate notes.

The Company has a "well-known seasoned issuer" shelf registration statement, effective August 5, 2011, which registers an indeterminate amount of debt or equity securities for future sales. In September 2011, in connection with this August 5, 2011 shelf registration statement, 3M established a \$3 billion medium-term notes program (Series F), from which 3M issued \$1 billion aggregate principal amount of five-year fixed rate medium-term notes with a coupon rate of 1.375%. In June 2012, 3M issued \$650 million aggregate principal amount of five-year fixed rate medium-term notes due 2017 with a coupon rate of 1.000% and \$600 million aggregate principal amount of ten-year fixed rate medium-term notes due 2022 with a coupon rate of 2.000%, which were both issued from this \$3 billion medium-term notes program (Series F). The designated use of these proceeds is for general corporate purposes.

In connection with a prior "well-known seasoned issuer" shelf registration, in June 2007 the Company established a \$3 billion medium-term notes program. Three debt securities were issued under this medium-term notes program. First, in December 2007, 3M issued a five-year, \$500 million, fixed rate note with a coupon rate of 4.65%, which matured in December 2012. Second, in August 2008, 3M issued a five-year, \$850 million, fixed rate note with a coupon rate of 4.375%. Third, in October 2008, the Company issued a three-year \$800 million, fixed rate note with a coupon rate of 4.50%. The Company entered into interest rate swaps to convert this \$800 million note to a floating rate. This three-year fixed rate note and related interest rate swaps matured in the fourth quarter of 2011.

The Company also issued notes under a \$1.5 billion medium-term note program established in December 2003. In March 2007, the Company issued a 30-year, \$750 million, fixed rate note with a coupon rate of 5.70%. In November 2006, 3M issued a three-year, \$400 million, fixed rate note. The Company entered into an interest rate swap to convert this to a rate based on a floating LIBOR index. Both the note and related swap matured in November 2009. In December 2004, 3M issued a 40-year, \$60 million floating rate note, with the rate based on a floating LIBOR index. This \$1.5 billion medium term note program was replaced by the \$3 billion program established in June 2007.

In July 2007, 3M issued a seven-year 5.0% fixed rate Eurobond for an amount of 750 million Euros (book value of approximately \$1.017 billion in U.S. Dollars at December 31, 2012). In addition, in December 2007, 3M reopened its existing seven year 5.0% fixed rate Eurobond for an additional amount of 275 million Euros (book value of approximately \$366 million in U.S. Dollars at December 31, 2012). This security was issued at a premium and was subsequently consolidated with the original security in January 2008. Upon the initial debt issuance in July 2007, 3M completed a fixed-to-floating interest rate swap on a notional amount of 400 million Euros as a fair value hedge of a portion of the fixed interest rate Eurobond obligation. In August 2010, the Company terminated 150 million Euros of the notional amount of this swap. As a result, the notional amount remaining after the partial termination is 250 million Euros. The termination of a portion of this swap did not impact the terms of the remaining portion. After these swaps, the fixed rate portion of the Eurobond totaled 775 million Euros and the floating rate portion totaled 250 million Euros.

The Company has an AA- credit rating, with a stable outlook, from Standard & Poor's and an Aa2 credit rating, with a stable outlook, from Moody's Investors Service. In September 2012, 3M entered into a \$1.5 billion, five-year multi-currency revolving credit agreement, which amended the existing agreement that was entered into in August 2011. This amended agreement extended the expiration date from August 2016 to September 2017. This credit agreement includes a provision under which 3M may request an increase of up to \$500 million, bringing the total facility up to \$2 billion (at the lenders' discretion). This facility was undrawn at December 31, 2012. In August 2012, 3M entered into a \$150 million, one-year committed letter of credit facility with HSBC Bank USA, which replaced the one-year \$200 million committed credit facility that was entered into in August 2011. As of December 31, 2012, 3M letters of credit issued under this \$150 million committed facility totaled \$121 million. In December 2012, 3M entered into a three-year 66 million British Pound (approximately \$106 million) committed credit facility agreement with JP Morgan Chase Bank, which is fully drawn as of December 31, 2012. Apart from the committed facilities, an additional \$100 million in stand-alone letters of credit are also issued and outstanding at December 31, 2012. The Company also utilized \$37 million in international lines of credit and \$6 million in U.S. lines of credit with other banking partners as of December 31, 2012. These letters of credit are utilized in connection with normal business activities. Under both the \$1.5 billion and \$150 million credit agreements, the Company is required to maintain its EBITDA to Interest Ratio as of the end of each fiscal quarter at not less than 3.0 to 1. This is calculated (as defined in the agreement) as the ratio of consolidated total EBITDA for the four consecutive quarters then ended to total interest expense on all funded debt for the same period. At December 31, 2012, this ratio was approximately 45 to 1. Debt covenants do not restrict the payment of dividends.

NOTE 10. Pension and Postretirement Benefit Plans

3M has company-sponsored retirement plans covering substantially all U.S. employees and many employees outside the United States. In total, 3M has over 70 plans in 25 countries. Pension benefits associated with these plans generally are based on each participant's years of service, compensation, and age at retirement or termination. The U.S. defined-benefit pension plan was closed to new participants effective January 1, 2009. The Company also provides certain postretirement health care and life insurance benefits for substantially all of its U.S. employees who reach retirement age while employed by the Company. Most international employees and retirees are covered by government health care programs. The cost of company-provided postretirement health care plans for international employees is not material and is combined with U.S. amounts in the tables that follow.

The Company also sponsors employee savings plans under Section 401(k) of the Internal Revenue Code. These plans are offered to substantially all regular U.S. employees. Effective January 1, 2010, substantially all Company contributions to the plans are made in cash. During 2008 the Board of Directors approved various changes to the employee savings plans. For substantially all employees hired prior to January 1, 2009, employee 401(k) contributions of up to 6% of eligible compensation are matched at rates of 60% or 75%, depending on the plan the employee participated in. Employees hired on or after January 1, 2009 receive a cash match of 100% for employee 401(k) contributions of up to 6% of eligible compensation and also receive an employer retirement income account cash contribution of 3% of the participant's total eligible compensation. All contributions are invested in a number of investment funds pursuant to their elections. U.S. expenses related to employer contributions to these plans were \$124 million, and \$109 million and \$97 million for 2012, 2011 and 2010, respectively. Various international countries also participate in defined contribution plans. International expenses related to employer contributions to these plans were \$58 million, \$54 million and \$36 million for 2012, 2011 and 2010, respectively.

The Company's defined benefit pension funding policy is to deposit with independent trustees amounts allowable by law. Trust funds and deposits with insurance companies are maintained to provide pension benefits to plan participants and their beneficiaries. There are no plan assets in the non-qualified plan due to its nature. For its U.S. postretirement health care and life insurance benefit plans, the Company has set aside amounts at least equal to annual benefit payments with an independent trustee.

In August 2006, the Pension Protection Act (PPA) was signed into law in the U.S. The PPA transition rules increased the funding target for defined benefit pension plans to 100% of the target liability by 2011. 3M's U.S. qualified defined benefit plan does not have a mandatory cash contribution because the Company has a significant credit balance from previous discretionary contributions that can be applied to any PPA funding requirements.

In the fourth quarter of 2010, the Company made further changes to its U.S. postretirement benefit plans. As a result of these changes, the Company will transition all current and future retirees to the savings account benefits-based plan announced in 2008. These changes become effective beginning January 1, 2013, for all Medicare eligible retirees and their Medicare eligible dependents and January 1, 2015, for all non-Medicare eligible retirees and their eligible dependents.

In the second quarter of 2010, 3M's Brazilian subsidiary received approval from the government in Brazil to freeze its defined benefit pension plan. Effective March 31, 2010, participants in this subsidiary's pension plan no longer accrue additional pension benefits. As a result, the Company recorded a \$22 million curtailment gain in the second quarter of 2010.

In December 2011, the Company began offering a voluntary early retirement incentive program to certain eligible participants of its U.S. pension plans who meet age and years of pension service requirements. The eligible participants who accepted the offer and retired on February 1, 2012 received an enhanced pension benefit. Pension benefits were enhanced by adding one additional year of pension service and one additional year of age for certain benefit calculations. 616 participants accepted the offer and retired on February 1, 2012. As a result, the Company incurred a \$26 million charge related to these special termination benefits in the first quarter of 2012.

Effective July 1, 2012, 3M Canada closed its pension plans for salaried employees to new participants. The change did not trigger a plan remeasurement and therefore there is no immediate impact to the liability and expense.

3M was informed during the first quarter of 2009 that the general partners of WG Trading Company, in which 3M's benefit plans hold limited partnership interests, are the subject of a criminal investigation as well as civil proceedings by the SEC and CFTC (Commodity Futures Trading Commission). In March 2011, over the objections of 3M and six other limited partners of WG Trading Company, the district court judge ruled in favor of the court appointed receiver's proposed

distribution plan. In April 2011, the 3M benefit plans received their share under the court-ordered distribution plan. 3M and six other limited partners of WG Trading Company have appealed the court's order to the United States Court of Appeals for the Second Circuit. The benefit plan trustee holdings of WG Trading Company interests were adjusted to reflect the decreased estimated fair market value, inclusive of estimated insurance proceeds, as of the annual measurement dates. The Company has insurance that it believes, based on what is currently known, will result in the recovery of a portion of the decrease in original asset value. As of the 2012 measurement date these holdings represented less than one percent of 3M's fair value of total plan assets. 3M currently believes that the resolution of these events will not have a material adverse effect on the consolidated financial position of the Company.

The following tables include a reconciliation of the beginning and ending balances of the benefit obligation and the fair value of plan assets as well as a summary of the related amounts recognized in the Company's consolidated balance sheet as of December 31 of the respective years. 3M also has certain non-qualified unfunded pension and postretirement benefit plans, inclusive of plans related to supplement/excess benefits for employees impacted by particular relocations and other matters, that individually and in the aggregate are not significant and which are not included in the tables that follow. The obligations for these plans are included within other liabilities in the Company's consolidated balance sheet and aggregated less than \$40 million as of both December 31, 2012 and 2011.

The balance of amounts recognized for international plans in accumulated other comprehensive income as of December 31 in the preceding table are presented based on the foreign currency exchange rate on that date.

The pension accumulated benefit obligation represents the actuarial present value of benefits based on employee service and compensation as of the measurement date and does not include an assumption about future compensation levels. The accumulated benefit obligation of the U.S. pension plans was \$14.127 billion and \$13.804 billion at December 31, 2012 and 2011, respectively. The accumulated benefit obligation of the international pension plans was \$5.942 billion and \$4.889 billion at December 31, 2012 and 2011, respectively.

The following amounts relate to pension plans with accumulated benefit obligations in excess of plan assets as of December 31:

| (Millions) | Qualified and Non-qualified Pension Plans | | | |
|--------------------------------|---|-----------|---------------|----------|
| | United States | | International | |
| | 2012 | 2011 | 2012 | 2011 |
| Projected benefit obligation | \$ 505 | \$ 14,499 | \$ 5,122 | \$ 2,983 |
| Accumulated benefit obligation | 492 | 13,804 | 4,808 | 2,740 |
| Fair value of plan assets | 8 | 12,102 | 4,038 | 2,321 |

Components of net periodic benefit cost and other supplemental information for the years ended December 31 follow:

| Discount rate | 4.14 % | 4.15 % | 5.23 % | 3.78 % | 4.58 % | 5.04 % | 4.00 % | 4.04 % | 5.09 % |
| Compensation rate increase | 4.00 % | 4.00 % | 4.00 % | 3.31 % | 3.52 % | 3.59 % | N/A | N/A | N/A |

The Company is in the process of transitioning all current and future retirees to the savings account benefits-based plan announced in 2008. The contributions provided by the Company to the health savings accounts increase three percent per year. Therefore, the Company no longer has material exposure to health care cost inflation.

Weighted-average assumptions used to determine net cost for years ended

| | Qualified and Non-qualified Pension Benefits | | | | | | Postretirement Benefits | | |

The Company determines the discount rate used to measure plan liabilities as of the December 31 measurement date for the pension and postretirement benefit plans, which is also the date used for the related annual measurement assumptions. The discount rate reflects the current rate at which the associated liabilities could be effectively settled at the end of the year. The Company sets its rate to reflect the yield of a portfolio of high quality, fixed-income debt instruments that would produce cash flows sufficient in timing and amount to settle projected future benefits. Using this methodology, the Company determined a discount rate of 4.14% for pension and 4.00% for postretirement benefits to be appropriate for its U.S. plans as of December 31, 2012, which is a decrease of 0.01 percentage points and 0.04 percentage points, respectively, from the rates used as of December 31, 2011. For the international pension and postretirement plans the discount rates also reflect the current rate at which the associated liabilities could be effectively settled at the end of the year. If the country has a deep market in corporate bonds the Company matches the expected cash flows from the plan either to a portfolio of bonds that generate sufficient cash flow or a notional yield curve generated from available bond information. In countries that do not have a deep market in corporate bonds, government bonds are considered with a risk premium to approximate corporate bond yields.

For the U.S. qualified pension plans, the Company's assumption for the expected return on plan assets was 8.25% in 2012. The Company is lowering the 2013 expected return on plan assets for its U.S. pension plan by 0.25 percentage points to 8.00%. This will increase the 2013 expected pension expense by approximately \$33 million. Projected returns are based primarily on broad, publicly traded equity and fixed-income indices and forward-looking estimates of active portfolio and investment management. As of December 31, 2012, the Company's 2013 expected long-term rate of return on U.S. plan assets is based on an asset allocation assumption of 30% global equities, with an expected long-term rate of return of 7.58%; 16% private equities, with an expected long-term rate of return of 12.58%; 33% fixed-income securities, with an expected long-term rate of return of 3.72%; 16% absolute return investments independent of traditional performance benchmarks, with an expected long term return of 6.43%; and 5% commodities, with an expected long-term rate of return of 6.08%. The Company expects additional positive return from active investment management. These assumptions result in an 8.00% expected rate of return on an annualized basis in 2013. The actual rate of return on plan assets in 2012 was 13.6%. In 2011 the plan earned a rate of return of 8.7% and in 2010 earned a return of 14.4%. The average annual actual return on the plan assets over the past 10 and 25 years has been 10.5% and 10.6%, respectively. Return on assets assumptions for international pension and other post-retirement benefit plans are calculated on a plan-by-plan basis using plan asset allocations and expected long-term rate of return assumptions.

During 2012, the Company contributed \$1.079 billion to its U.S. and international pension plans and \$67 million to its postretirement plans. During 2011, the Company contributed \$517 million to its U.S. and international pension plans and \$65 million to its postretirement plans. In 2013, the Company expects to contribute an amount in the range of \$400 million to \$600 million of cash to its U.S. and international retirement plans. The Company does not have a required minimum cash pension contribution obligation for its U.S. plans in 2013. Therefore, the amount of the anticipated discretionary contribution could vary significantly depending on the U.S. plans' funded status and the anticipated tax deductibility of the contribution. Future contributions will also depend on market conditions, interest rates and other factors.

Future Pension and Postretirement Benefit Payments

The following table provides the estimated pension and postretirement benefit payments that are payable from the plans to participants.

| (Millions) | Qualified and Non-qualified Pension Benefits | | Postretirement Benefits |
|-----------------------|---|---------------|----------------------------|
| | United States | International | |
| 2013 Benefit Payments | \$ 760 | \$ 211 | \$ 113 |
| 2014 Benefit Payments | 784 | 223 | 126 |
| 2015 Benefit Payments | 808 | 236 | 138 |
| 2016 Benefit Payments | 831 | 248 | 153 |
| 2017 Benefit Payments | 854 | 256 | 154 |
| Following five years | 4,566 | 1,463 | 787 |

Plan Asset Management

3M's investment strategy for its pension and postretirement plans is to manage the funds on a going-concern basis. The primary goal of the funds is to meet the obligations as required. The secondary goal is to earn the highest rate of return possible, without jeopardizing its primary goal, and without subjecting the Company to an undue amount of contribution rate volatility. Fund returns are used to help finance present and future obligations to the extent possible within actuarially determined funding limits and tax-determined asset limits, thus reducing the level of contributions 3M must make. The investment strategy has used long duration cash and derivative instruments to offset a significant portion of the interest rate sensitivity of U.S. pension liabilities. In addition, credit risk is managed through mandates for public securities and maximum issuer limits that are established and monitored on a regular basis.

Normally, 3M does not buy or sell any of its own stock as a direct investment for its pension and other postretirement benefit funds. However, due to external investment management of the funds, the plans may indirectly buy, sell or hold 3M stock. The aggregate amount of the shares would not be considered to be material relative to the aggregate fund percentages.

The discussion that follows references the fair value measurements of certain assets in terms of levels 1, 2 and 3. See Note 12 for descriptions of these levels. While the company believes the valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

U.S. Pension Plans Assets

In order to achieve the investment objectives in the U.S. pension plans, the investment policy includes a target strategic asset allocation. The investment policy allows some tolerance around the target in recognition that market fluctuations and illiquidity of some investments may cause the allocation to a specific asset class to stray from the target allocation, potentially for long periods of time. Acceptable ranges have been designed to allow for deviation from long-term targets and to allow for the opportunity for tactical over- and under-weights. The portfolio will normally be rebalanced when the quarter-end asset allocation deviates from acceptable ranges. The allocation is reviewed regularly by the named fiduciary of the plans.

The fair values of the assets held by the U.S. pension plans by asset class are as follows:

| (Millions) Asset Class | Fair Value Measurements Using Inputs Considered as | | | | | | Fair Value at | |
|---|--|----------|----------|----------|----------|----------|---------------|-----------|
| | Level 1 | | Level 2 | | Level 3 | | Dec. 31, | |

Publicly traded equities are valued at the closing price reported in the active market in which the individual securities are traded. Index funds, including Europe, Australasia, and Far East (EAFE) funds, are valued at the net asset value (NAV) as determined by the custodian of the fund. The NAV is based on the fair value of the underlying assets owned by the fund, minus its liabilities then divided by the number of units outstanding. Long/short equity interests are valued using the most recent general partner statement of fair value, updated for any subsequent partnership interests' cash flows or expected changes in fair value.

Fixed income includes derivative instruments such as credit default swaps, interest rate swaps and futures contracts that are used to help manage risks. U.S. government and government agency bonds and notes are valued at the closing price reported in the active market in which the individual security is traded. Corporate bonds and notes, asset backed securities and collateralized mortgage obligations are valued at either the yields currently available on comparable securities of issuers with similar credit ratings or valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable such as credit and liquidity risks. Private placement funds are valued using the most recent general partner statement of fair value, updated for any subsequent partnership interests' cash flows or expected changes in fair value. Swaps and derivative instruments are valued by the custodian using closing market swap curves and market derived inputs.

The private equity portfolio is a diversified mix of partnership interests including buyouts, derivative instruments, direct investments, distressed debt, growth equity, mezzanine, real estate and venture capital investments. Partnership interests are valued using the most recent general partner statement of fair value, updated for any subsequent partnership interests' cash flows or expected changes in fair value.

Absolute return consists primarily of private partnership interests in hedge funds, hedge fund of funds and bank loan funds. Partnership interests are valued using the NAV as determined by the administrator or custodian of the fund. Hedge fund partnership interests, which have a redemption right and are past any lock-up redemption period, are classified as level 2. A hedge fund was restructured during 2012, extending the lock-up redemption period, and therefore was moved to level 3 during 2012.

Commodities consist of commodity-linked notes and commodity-linked derivative contracts designed to deliver investment returns similar to the Goldman Sachs Commodities Index (GSCI) or Dow Jones UBS Commodity index returns. Commodities are valued at closing prices determined by calculation agents for outstanding transactions.

Other items to reconcile to fair value of plan assets include the net of insurance receivables for WG Trading Company, interest receivables, amounts due for securities sold, amounts payable for securities purchased and interest payable.

The following table sets forth a summary of changes in the fair values of the U.S. pension plans' level 3 assets for the years ended December 31, 2012 and 2011:

| (Millions) | Fair Value Measurement Using Significant Unobservable Inputs (Level 3) | | | | | |
|--|--|--------------|----------------|-----------------|-------------|----------|
| | Equities | Fixed Income | Private Equity | Absolute Return | Commodities | Total |
| Beginning balance at Jan. 1, 2011 | \$ 506 | \$ 144 | \$ 2,075 | \$ 623 | \$ 111 | \$ 3,459 |
| Net transfers into / (out of) level 3 | — | 5 | — | (59) | — | (54) |

| Change in unrealized gains / (losses) relating to instruments still held at the reporting date | 43 | — | 65 | 71 | 3 | 182 |
| Ending balance at Dec. 31, 2012 | \$ 483 | \$ 2 | \$ 2,136 | \$ 865 | \$ 107 | \$ 3,593 |

International Pension Plans Assets

Outside the U.S., pension plan assets are typically managed by decentralized fiduciary committees. The disclosure below of asset categories is presented in aggregate for over 65 plans in 24 countries; however, there is significant variation in policy asset allocation from country to country. Local regulations, local funding rules, and local financial and tax considerations are part of the funding and investment allocation process in each country. 3M's Treasury group provides standard funding and investment guidance to all international plans with more focused guidance to the larger plans.

Each plan has its own strategic asset allocation. The asset allocations are reviewed periodically and rebalanced when necessary.

The fair values of the assets held by the international pension plans by asset class are as follows:

| (Millions) Asset Class | Fair Value Measurements Using Inputs Considered as | | | | | | Fair Value at | |
|---|--|-----------------|-----------------|-----------------|---------------|---------------|-----------------|-----------------|
| | Level 1 | | Level 2 | | Level 3 | | Dec. 31, | |
| | 2012 | 2011 | 2012 | 2011 | 2012 | 2011 | 2012 | 2011 |

Equities consist primarily of mandates in public equity securities managed to the Morgan Stanley Capital All Country World Index. Publicly traded equities are valued at the closing price reported in the active market in which the individual securities are traded.

Fixed Income investments include domestic and foreign government, corporate, mortgage backed and other debt. Governments, corporate bonds and notes and mortgage backed securities are valued at the closing price reported if traded on an active market or at yields currently available on comparable securities of issuers with similar credit ratings or valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable such as credit and liquidity risks.

Private equity funds consist of both active and passive mandates. Partnership interests are valued using the most recent general partner statement of fair value, updated for any subsequent partnership interests' cash flows or expected changes in fair value. Real estate consists of property funds and REITS (Real Estate Investment Trusts). Property funds are valued using the most recent partnership statement of fair value, updated for any subsequent partnership interests' cash flows. REITS are valued at the closing price reported in the active market in which it is traded.

Absolute return consists of private partnership interests in hedge funds, insurance contracts, derivative instruments, hedge fund of funds, and bank loan funds. Insurance consists of insurance contracts, which are valued using cash surrender values which is the amount the plan would receive if the contract was cashed out at year end. Derivative instruments consist of interest rate swaps that are used to help manage risks. Hedge funds are valued at the NAV as determined by the independent administrator or custodian of the fund.

Other items to reconcile to fair value of plan assets include the net of interest receivables, amounts due for securities sold, amounts payable for securities purchased and interest payable.

The following table sets forth a summary of changes in the fair values of the international pension plans' level 3 assets for the years ended December 31, 2012 and 2011:

| (Millions) | Fair Value Measurement Using Significant Unobservable Inputs (Level 3) | | | | |

Postretirement Benefit Plans Assets

In order to achieve the investment objectives in the U.S. postretirement plan, the investment policy includes a target strategic asset allocation. The investment policy allows some tolerance around the target in recognition that market fluctuations and illiquidity of some investments may cause the allocation to a specific asset class to stray from the target allocation, potentially for long periods of time. Acceptable ranges have been designed to allow for deviation from long-term targets and to allow for the opportunity for tactical over- and under-weights. The portfolio will normally be rebalanced when the quarter-end asset allocation deviates from acceptable ranges. The allocation is reviewed regularly by the named fiduciary of the plan.

The fair values of the assets held by the postretirement benefit plans by asset class are as follows:

| (Millions) Asset Class | Fair Value Measurements Using Inputs Considered as | | | | | | Fair Value at | |
|---|--|--------|---------|--------|---------|--------|---------------|----------|
| | Level 1 | | Level 2 | | Level 3 | | Dec. 31, | |

| Other items to reconcile to fair value of plan assets | | | | | | | \$ (8) | \$ (3) |
| Fair value of plan assets | | | | | | | \$ 1,321 | \$ 1,209 |

Publicly traded equities are valued at the closing price reported in the active market in which the individual securities are traded. Index funds are valued at the NAV as determined by the custodian of the fund. The NAV is based on the fair value of the underlying assets owned by the fund, minus its liabilities then divided by the number of units outstanding. Long/short equity interests are valued using the most recent general partner statement of fair value, updated for any subsequent partnership interests' cash flows or expected changes in fair value.

Fixed income includes derivative investments such as credit default swaps, interest rate swaps and futures contracts that are used to help manage risks. U.S. government and government agency bonds and notes are valued at the closing price

reported in the active market in which the individual security is traded. Corporate bonds and notes, asset backed securities and collateralized mortgage obligations are valued at either the yields currently available on comparable securities of issuers with similar credit ratings or valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable such as credit and liquidity risks. Swaps and derivative instruments are valued by the custodian using market swap curves and market derived inputs.

The private equity portfolio is a diversified mix of partnership interests including buyouts, derivative instruments, direct investments, distressed debt, growth equity, mezzanine, real estate and venture capital investments. Partnership interests are valued using the most recent general partner statement of fair value, updated for any subsequent partnership interests' cash flows or expected changes in fair value.

Absolute return primarily consists of private partnership interests in hedge funds, hedge fund of funds and bank loan funds. Partnership interests are valued using the NAV as determined by the independent administrator or custodian of the fund.

Commodities consist of commodity-linked notes and commodity-linked derivative contracts designed to deliver investment returns similar to the GSCI or Dow Jones UBS Commodity index returns. Commodities are valued at closing prices determined by calculation agents for outstanding transactions.

Other items to reconcile to fair value of plan assets include the net of interest receivables, amounts due for securities sold, foreign currency fluctuations, amounts payable for securities purchased and interest payable.

The following table sets forth a summary of changes in the fair values of the postretirement plans' level 3 assets for the years ended December 31, 2012 and 2011:

| (Millions) | Fair Value Measurement Using Significant Unobservable Inputs (Level 3) | | | | | |

NOTE 11. Derivatives

The Company uses interest rate swaps, currency swaps, commodity price swaps, and forward and option contracts to manage risks generally associated with foreign exchange rate, interest rate and commodity price fluctuations. The information that follows explains the various types of derivatives and financial instruments used by 3M, how and why 3M uses such instruments, how such instruments are accounted for, and how such instruments impact 3M's financial position and performance.

Additional information with respect to the impacts on other comprehensive income of nonderivative hedging and derivative instruments is included in Note 5. Additional information with respect to the fair value of derivative instruments is included in Note 12. References to information regarding derivatives and/or hedging instruments associated with the Company's long-term debt are also made in Note 9.

Types of Derivatives/Hedging Instruments and Inclusion in Income/Other Comprehensive Income

Cash Flow Hedges:

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income and reclassified into earnings in the same period during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

Cash Flow Hedging - Foreign Currency Forward and Option Contracts: The Company enters into foreign exchange forward and option contracts to hedge against the effect of exchange rate fluctuations on cash flows denominated in foreign currencies and certain intercompany financing transactions. These transactions are designated as cash flow hedges. The settlement or extension of these derivatives will result in reclassifications (from accumulated other comprehensive income) to earnings in the period during which the hedged transactions affect earnings. Generally, 3M dedesignates these cash flow hedge relationships in advance of the occurrence of the forecasted transaction. The portion of gains or losses on the derivative instrument previously accumulated in other comprehensive income for dedesignated hedges remains in accumulated other comprehensive income until the forecasted transaction occurs. Changes in the value of derivative instruments after dedesignation are recorded in earnings and are included in the Derivatives Not Designated as Hedging Instruments section below. Hedge ineffectiveness and the amount excluded from effectiveness testing recognized in income on cash flow hedges were not material for 2012, 2011 and 2010. The maximum length of time over which 3M hedges its exposure to the variability in future cash flows for a majority of the forecasted transactions is 12 months and, accordingly, at December 31, 2012, the majority of the Company's open foreign exchange forward and option contracts had maturities of one year or less. The dollar equivalent gross notional amount of the Company's foreign exchange forward and option contracts designated as cash flow hedges at December 31, 2012 was approximately \$5.8 billion.

Cash Flow Hedging - Commodity Price Management: The Company manages commodity price risks through negotiated supply contracts, price protection agreements and forward physical contracts. The Company uses commodity price swaps relative to natural gas as cash flow hedges of forecasted transactions to manage price volatility. The related mark-to-market gain or loss on qualifying hedges is included in other comprehensive income to the extent effective, and reclassified into cost of sales in the period during which the hedged transaction affects earnings. Generally, the length of time over which 3M hedges its exposure to the variability in future cash flows for its forecasted natural gas transactions is 12 months. No significant commodity cash flow hedges were discontinued and hedge ineffectiveness was not material for 2012, 2011 and 2010. The dollar equivalent gross notional amount of the Company's natural gas commodity price swaps designated as cash flow hedges at December 31, 2012 was \$18 million.

Cash Flow Hedging - Forecasted Debt Issuance: In August 2011, in anticipation of the September 2011 issuance of \$1 billion in five-year fixed rate notes, 3M executed a pre-issuance cash flow hedge on a notional amount of \$400 million by entering into a forward-starting five-year floating-to-fixed interest rate swap. Upon debt issuance in September 2011, 3M terminated the floating-to-fixed interest rate swap. The termination of the swap resulted in a \$7 million pre-tax loss (\$4 million after-tax) that will be amortized over the five-year life of the note and, when material, is included in the tables below as part of the loss recognized in income on the effective portion of derivatives as a result of reclassification from accumulated other comprehensive income.

As of December 31, 2012, the Company had a balance of \$23 million associated with the after tax net unrealized loss associated with cash flow hedging instruments recorded in accumulated other comprehensive income. This includes a \$3 million balance (loss) related to a floating-to-fixed interest rate swap (discussed in the preceding paragraph), which will be

amortized over the five-year life of the note. 3M expects to reclassify a majority of the remaining balance to earnings over the next 12 months (with the impact offset by cash flows from underlying hedged items).

The location in the consolidated statements of income and comprehensive income and amounts of gains and losses related to derivative instruments designated as cash flow hedges are provided in the following table. Reclassifications of amounts from accumulated other comprehensive income into income include accumulated gains (losses) on dedesignated hedges at the time earnings are impacted by the forecasted transaction.

Year Ended December 31, 2012

| (Millions) | Pretax Gain (Loss) Recognized in Other Comprehensive Income on Effective Portion of Derivative | Pretax Gain (Loss) Recognized in Income on Effective Portion of Derivative as a Result of Reclassification from Accumulated Other Comprehensive Income | | Ineffective Portion of Gain (Loss) on Derivative and Amount Excluded from Effectiveness Testing Recognized in Income | |

Fair Value Hedges:

For derivative instruments that are designated and qualify as fair value hedges, the gain or loss on the derivatives as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current earnings.

Fair Value Hedging - Interest Rate Swaps: The Company manages interest expense using a mix of fixed and floating rate debt. To help manage borrowing costs, the Company may enter into interest rate swaps. Under these arrangements, the Company agrees to exchange, at specified intervals, the difference between fixed and floating interest amounts calculated by reference to an agreed-upon notional principal amount. The mark-to-market of these fair value hedges is recorded as gains or losses in interest expense and is offset by the gain or loss of the underlying debt instrument, which also is recorded in interest expense. These fair value hedges are highly effective and, thus, there is no impact on earnings due to hedge ineffectiveness. The dollar equivalent (based on inception date foreign currency exchange rates) gross notional amount of the Company's interest rate swaps at December 31, 2012 was \$342 million.

At December 31, 2012, the Company had interest rate swaps designated as fair value hedges of underlying fixed rate obligations. In July 2007, in connection with the issuance of a seven-year Eurobond for an amount of 750 million Euros, the Company completed a fixed-to-floating interest rate swap on a notional amount of 400 million Euros as a fair value hedge of a portion of the fixed interest rate Eurobond obligation. In August 2010, the Company terminated 150 million Euros of the notional amount of this swap. As a result, a gain of 18 million Euros, recorded as part of the balance of the underlying debt, will be amortized as an offset to interest expense over this debt's remaining life. Prior to termination of the applicable portion of the interest rate swap, the mark-to-market of the hedge instrument was recorded as gains or losses in interest expense and was offset by the gain or loss on carrying value of the underlying debt instrument. Consequently, the subsequent amortization of the 18 million Euros recorded as part of the underlying debt balance is not part of gains on hedged items recognized in income in the tables below.

The Company also had two fixed-to-floating interest rate swaps with an aggregate notional amount of \$800 million designated as fair value hedges of the fixed interest rate obligation under the \$800 million, three-year, 4.50% notes issued in October 2008. These swaps and underlying note matured in the fourth quarter of 2011.

The location in the consolidated statements of income and amounts of gains and losses related to derivative instruments designated as fair value hedges and similar information relative to the hedged items are as follows:

| Year ended December 31, 2012 (Millions) | Gain (Loss) on Derivative Recognized in Income | | Gain (Loss) on Hedged Item Recognized in Income | |
|--|---|---------|--|--------|
| | Location | Amount | Location | Amount |

| Interest rate swap contracts | Interest expense | \$ (10) | Interest expense | \$ 10 |
| Total | | \$ (10) | | \$ 10 |
| Year ended December 31, 2010 (Millions) | | | | |
| Derivatives in Fair Value Hedging Relationships | | | | |
| Interest rate swap contracts | Interest expense | \$ (16) | Interest expense | \$ 16 |
| Total | | \$ (16) | | \$ 16 |

Net Investment Hedges:

As circumstances warrant, the Company uses cross currency swaps, forwards and foreign currency denominated debt to hedge portions of the Company's net investments in foreign operations. For hedges that meet the effectiveness requirements, the net gains or losses attributable to changes in spot exchange rates are recorded in cumulative translation within other comprehensive income. The remainder of the change in value of such instruments is recorded in earnings. Recognition in earnings of amounts previously recorded in cumulative translation is limited to circumstances such as complete or substantially complete liquidation of the net investment in the hedged foreign operation. At December 31, 2012, there were no cross currency swaps and foreign currency forward contracts designated as net investment hedges.

In addition to the derivative instruments used as hedging instruments in net investment hedges, 3M also uses foreign currency denominated debt as nonderivative hedging instruments in certain net investment hedges. In July and December 2007, the Company issued seven-year fixed rate Eurobond securities for amounts of 750 million Euros and 275 million Euros, respectively. 3M designated each of these Eurobond issuances as hedging instruments of the Company's net investment in its European subsidiaries.

The location in the consolidated statements of income and comprehensive income and amounts of gains and losses related to derivative and nonderivative instruments designated as net investment hedges are as follows. There were no reclassifications of the effective portion of net investment hedges out of accumulated other comprehensive income into income for the periods presented in the table below.

Year ended December 31, 2012

| Derivative and Nonderivative Instruments in Net Investment Hedging Relationships (Millions) | Pretax Gain (Loss) Recognized as Cumulative Translation within Other Comprehensive Income on Effective Portion of Instrument | Ineffective Portion of Gain (Loss) on Instrument and Amount Excluded from Effectiveness Testing Recognized in Income | |

| | Amount | Location | Amount |
| Foreign currency denominated debt | \$ 111 | N/A | \$ — |
| Total | \$ 111 | | \$ — |

Derivatives Not Designated as Hedging Instruments:

Derivatives not designated as hedging instruments include dedesignated foreign currency forward and option contracts that formerly were designated in cash flow hedging relationships (as referenced in the Cash Flow Hedges section above). In addition, 3M enters into foreign currency forward contracts and commodity price swaps to offset, in part, the impacts of certain intercompany activities (primarily associated with intercompany licensing arrangements) and fluctuations in costs associated with the use of certain precious metals, respectively. These derivative instruments are not designated in hedging relationships; therefore, fair value gains and losses on these contracts are recorded in earnings. The dollar equivalent gross notional amount of these forward, option and swap contracts not designated as hedging instruments totaled \$1.0 billion as of December 31, 2012. The Company does not hold or issue derivative financial instruments for trading purposes.

The location in the consolidated statements of income and amounts of gains and losses related to derivative instruments not designated as hedging instruments are as follows:

| Derivatives Not Designated as Hedging Instruments (Millions) | Year ended December 31, 2012 Gain (Loss) on Derivative Recognized in Income | | Year ended December 31, 2011 Gain (Loss) on Derivative Recognized in Income | |
|---|---|---------|---|--------|
| | Location | Amount | Location | Amount |

| Foreign currency forward contracts | Interest expense | (19) |
| Commodity price swap contracts | Cost of sales | 1 |
| Total | | \$ (42) |

Location and Fair Value Amount of Derivative Instruments

The following tables summarize the fair value of 3M's derivative instruments, excluding nonderivative instruments used as hedging instruments, and their location in the consolidated balance sheet. Additional information with respect to the fair value of derivative instruments is included in Note 12.

December 31, 2012

| Fair Value of Derivative Instruments | Assets | | Liabilities | |
|--|----------------------|--------------|---------------------------|---------------|
| | Location | Amount | Location | Amount |
| Derivatives designated as hedging instruments | | | | |
| Foreign currency forward/option contracts | Other current assets | \$ 39 | Other current liabilities | \$ 85 |
| Commodity price swap contracts | Other current assets | — | Other current liabilities | 1 |
| Interest rate swap contracts | Other assets | 23 | Other liabilities | — |
| Total derivatives designated as hedging instruments | | \$ 62 | | \$ 86 |
| Derivatives not designated as hedging instruments | | | | |
| Foreign currency forward/option contracts | Other current assets | \$ 10 | Other current liabilities | \$ 20 |
| Total derivatives not designated as hedging instruments | | \$ 10 | | \$ 20 |
| Total derivative instruments | | \$ 72 | | \$ 106 |

December 31, 2011

| Fair Value of Derivative Instruments | Assets | | Liabilities | |
|--|----------------------|---------------|---------------------------|--------------|
| | Location | Amount | Location | Amount |
| Derivatives designated as hedging instruments | | | | |
| Foreign currency forward/option contracts | Other current assets | \$ 82 | Other current liabilities | \$ 34 |
| Commodity price swap contracts | Other current assets | — | Other current liabilities | 7 |
| Interest rate swap contracts | Other assets | 28 | Other liabilities | — |
| Total derivatives designated as hedging instruments | | \$ 110 | | \$ 41 |
| Derivatives not designated as hedging instruments | | | | |
| Foreign currency forward/option contracts | Other current assets | \$ 25 | Other current liabilities | \$ 8 |
| Total derivatives not designated as hedging instruments | | \$ 25 | | \$ 8 |
| Total derivative instruments | | \$ 135 | | \$ 49 |

Currency Effects

Currency Effects: 3M estimates that year-on-year currency effects, including hedging impacts, decreased net income attributable to 3M by approximately \$103 million in 2012 and increased net income attributable to 3M by approximately \$154 million in 2011. These estimates include the effect of translating profits from local currencies into U.S. dollars; the impact of currency fluctuations on the transfer of goods between 3M operations in the United States and abroad; and transaction gains and losses, including derivative instruments designed to reduce foreign currency exchange rate risks and the negative impact of swapping Venezuelan bolivars into U.S. dollars. 3M estimates that year-on-year derivative and other transaction gains and losses increased net income attributable to 3M by approximately \$49 million in 2012 and had an immaterial impact on net income attributable to 3M in 2011.

NOTE 12. Fair Value Measurements

3M follows ASC 820, *Fair Value Measurements and Disclosures*, with respect to assets and liabilities that are measured at fair value on a recurring basis and nonrecurring basis. Under the standard, fair value is defined as the exit price, or the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The standard also establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs market participants would use in valuing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the factors market participants would use in valuing the asset or liability developed based upon the best information available in the circumstances. The hierarchy is broken down into three levels. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs (other than quoted prices) that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability. Categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Assets and Liabilities that are Measured at Fair Value on a Recurring Basis:

For 3M, assets and liabilities that are measured at fair value on a recurring basis primarily relate to available-for-sale marketable securities, available-for-sale investments (included as part of investments in the Consolidated Balance Sheet) and certain derivative instruments. Derivatives include cash flow hedges, interest rate swaps and most net investment hedges. The information in the following paragraphs and tables primarily addresses matters relative to these financial assets and liabilities. Separately, there were no material fair value measurements with respect to nonfinancial assets or liabilities that are recognized or disclosed at fair value in the Company's financial statements on a recurring basis for 2012 and 2011.

3M uses various valuation techniques, which are primarily based upon the market and income approaches, with respect to financial assets and liabilities. Following is a description of the valuation methodologies used for the respective financial assets and liabilities measured at fair value.

Available-for-sale marketable securities — except auction rate securities:

Marketable securities, except auction rate securities, are valued utilizing multiple sources. A weighted average price is used for these securities. Market prices are obtained for these securities from a variety of industry standard data providers, security master files from large financial institutions, and other third-party sources. These multiple prices are used as inputs into a distribution-curve-based algorithm to determine the daily fair value to be used. 3M classifies U.S. treasury securities as level 1, while all other marketable securities (excluding auction rate securities) are classified as level 2. Marketable securities are discussed further in Note 8.

Available-for-sale marketable securities — auction rate securities only:

As discussed in Note 8, auction rate securities held by 3M failed to auction since the second half of 2007. As a result, investments in auction rate securities are valued utilizing third-party indicative bid levels in markets that are not active and broker-dealer valuation models that utilize inputs such as current/forward interest rates, current market conditions and credit default swap spreads. 3M classifies these securities as level 3.

Available-for-sale investments:

Investments include equity securities that are traded in an active market. Closing stock prices are readily available from active markets and are used as being representative of fair value. 3M classifies these securities as level 1.

Derivative instruments:

The Company's derivative assets and liabilities within the scope of ASC 815, *Derivatives and Hedging*, are required to be recorded at fair value. The Company's derivatives that are recorded at fair value include foreign currency forward and option contracts, commodity price swaps, interest rate swaps, and net investment hedges where the hedging instrument is recorded at fair value. Net investment hedges that use foreign currency denominated debt to hedge 3M's net investment are not impacted by the fair value measurement standard under ASC 820, as the debt used as the hedging instrument is

marked to a value with respect to changes in spot foreign currency exchange rates and not with respect to other factors that may impact fair value.

3M has determined that foreign currency forwards and commodity price swaps will be considered level 1 measurements as these are traded in active markets which have identical asset or liabilities, while currency swaps, foreign currency options, interest rate swaps and cross-currency swaps will be considered level 2. For level 2 derivatives, 3M uses inputs other than quoted prices that are observable for the asset. These inputs include foreign currency exchange rates, volatilities, and interest rates. The level 2 derivative positions are primarily valued using standard calculations/models that use as their basis readily observable market parameters. Industry standard data providers are 3M's primary source for forward and spot rate information for both interest rates and currency rates, with resulting valuations periodically validated through third-party or counterparty quotes and a net present value stream of cash flows model.

The following tables provide information by level for assets and liabilities that are measured at fair value on a recurring basis.

| (Millions) Description | Fair Value at Dec. 31, 2012 | Fair Value Measurements Using Inputs Considered as | | |
|---|--------------------------------|---|---------|---------|
| | | Level 1 | Level 2 | Level 3 |

| Derivative instruments — liabilities: | | | | |
| Foreign currency forward/option contracts | 42 | 42 | — | — |
| Commodity price swap contracts | 7 | 7 | — | — |

The following table provides a reconciliation of the beginning and ending balances of items measured at fair value on a recurring basis in the table above that used significant unobservable inputs (Level 3).

| (Millions) Marketable securities – auction rate securities only | 2012 | 2011 | 2010 |
|--|----------|----------|----------|
| Beginning balance | \$ 4 | \$ 7 | \$ 5 |
| Total gains or losses: | | | |
| Included in earnings | — | — | — |
| Included in other comprehensive income | 3 | (3) | 2 |
| Purchases, issuances, and settlements | — | — | — |
| Transfers in and/or out of Level 3 | — | — | — |
| Ending balance (December 31) | <u>7</u> | <u>4</u> | <u>7</u> |
| Additional losses included in earnings due to reclassifications from other comprehensive income for: | | | |
| Securities sold during the period ended December 31 | — | — | — |
| Securities still held at December 31 | — | — | — |

In addition, the plan assets of 3M's pension and postretirement benefit plans are measured at fair value on a recurring basis (at least annually). Refer to Note 10.

Assets and Liabilities that are Measured at Fair Value on a Nonrecurring Basis:

Disclosures are required for certain assets and liabilities that are measured at fair value, but are recognized and disclosed at fair value on a nonrecurring basis in periods subsequent to initial recognition. For 3M, such measurements of fair value relate primarily to long-lived asset impairments. There were no material long-lived asset impairments for 2012, 2011 and 2010.

Fair Value of Financial Instruments:

The Company's financial instruments include cash and cash equivalents, marketable securities, accounts receivable, certain investments, accounts payable, borrowings, and derivative contracts. The fair values of cash and cash equivalents, accounts receivable, accounts payable, and short-term borrowings and current portion of long-term debt approximated carrying values because of the short-term nature of these instruments. Available-for-sale marketable securities and investments, in addition to certain derivative instruments, are recorded at fair values as indicated in the preceding disclosures. For its long-term debt the Company utilized third-party quotes to estimate fair values (classified as level 2). Information with respect to the carrying amounts and estimated fair values of these financial instruments follow:

| <u>(Millions)</u> | <u>December 31, 2012</u> | | <u>December 31, 2011</u> | |
|---|--------------------------|-------------------|--------------------------|-------------------|
| | <u>Carrying Value</u> | <u>Fair Value</u> | <u>Carrying Value</u> | <u>Fair Value</u> |
| Long-term debt, excluding current portion | \$ 4,916 | \$ 5,363 | \$ 4,484 | \$ 5,002 |

The fair values reflected above consider the terms of the related debt absent the impacts of derivative/hedging activity. The carrying amount of long-term debt referenced above is impacted by certain fixed-to-floating interest rate swaps that are designated as fair value hedges and by the designation of fixed rate Eurobond securities issued by the Company as hedging instruments of the Company's net investment in its European subsidiaries. 3M's fixed-rate bonds were trading at a premium at December 31, 2012 and 2011 due to the low interest rates and tightening of 3M's credit spreads.

NOTE 13. Commitments and Contingencies

Capital and Operating Leases:

Rental expense under operating leases was \$300 million in 2012, \$279 million in 2011 and \$262 million in 2010. It is 3M's practice to secure renewal rights for leases, thereby giving 3M the right, but not the obligation, to maintain a presence in a leased facility. 3M has two primary capital leases. First, 3M has a capital lease, which became effective in April 2003, that involves a building in the United Kingdom (with a lease term of 22 years). During the second quarter of 2003, 3M recorded a capital lease asset and obligation of approximately 33.5 million British Pound (GBP), or approximately \$54 million at December 31, 2012 exchange rates. Second, during the fourth quarter of 2009, 3M recorded a capital lease asset and obligation of approximately \$50 million related to an IT investment with an amortization period of seven years.

Minimum lease payments under capital and operating leases with non-cancelable terms in excess of one year as of December 31, 2012, were as follows:

| <u>(Millions)</u> | <u>Capital Leases</u> | <u>Operating Leases</u> |
|--|-----------------------|-------------------------|
| 2013 | \$ 22 | \$ 194 |
| 2014 | 21 | 158 |
| 2015 | 8 | 119 |
| 2016 | 7 | 77 |
| 2017 | 4 | 68 |
| After 2017 | 34 | 119 |
| Total | <u>\$ 96</u> | <u>\$ 735</u> |
| Less: Amounts representing interest | <u>6</u> | |
| Present value of future minimum lease payments | 90 | |
| Less: Current obligations under capital leases | 19 | |
| Long-term obligations under capital leases | <u>\$ 71</u> | |

Warranties/Guarantees:

3M's accrued product warranty liabilities, recorded on the Consolidated Balance Sheet as part of current and long-term liabilities, are estimated at approximately \$28 million at both December 31, 2012 and December 31, 2011. 3M does not consider this amount to be material. The fair value of 3M guarantees of loans with third parties and other guarantee arrangements are not material.

Related Party Activity:

3M does not have any material related party activity that is not in the ordinary course of business.

Legal Proceedings:

The Company and some of its subsidiaries are involved in numerous claims and lawsuits, principally in the United States, and regulatory proceedings worldwide. These include various products liability (involving products that the Company now or formerly manufactured and sold), intellectual property, and commercial claims and lawsuits, including those brought under the antitrust laws, and environmental proceedings. Unless otherwise stated, the Company is vigorously defending all such litigation.

Process for Disclosure and Recording of Liabilities and Insurance Receivables Related to Legal Proceedings

Many lawsuits and claims involve highly complex issues relating to causation, scientific evidence, and whether there are actual damages and are otherwise subject to substantial uncertainties. Assessments of lawsuits and claims can involve a series of complex judgments about future events and can rely heavily on estimates and assumptions. The Company complies with the requirements of ASC Topic 450, *Contingencies*, and related guidance, and records liabilities for legal proceedings in those instances where it can reasonably estimate the amount of the loss and where liability is probable. Where the reasonable estimate of the probable loss is a range, the Company records the most likely estimate of the loss, or the low end of the range if there is no one best estimate. The Company either discloses the amount of a possible loss or range of loss in excess of established accruals if estimable, or states that such an estimate cannot be made. The Company discloses significant legal proceedings even where liability is not probable or the amount of the liability is not estimable, or both, if the Company believes there is at least a reasonable possibility that a loss may be incurred.

The Company estimates insurance receivables based on an analysis of its numerous policies, including their exclusions, pertinent case law interpreting comparable policies, its experience with similar claims, and assessment of the nature of the claim and remaining coverage, and records an amount it has concluded is likely to be recovered. For those insured matters where the Company has taken an accrual, the Company also records receivables for the amount of insurance that it expects to recover under the Company's insurance program. For those insured matters where the Company has not taken an accrual because the liability is not probable or the amount of the liability is not estimable, or both, but where the Company has incurred an expense in defending itself, the Company records receivables for the amount of insurance that it expects to recover for the expense incurred.

Because litigation is subject to inherent uncertainties, and unfavorable rulings or developments could occur, there can be no certainty that the Company may not ultimately incur charges in excess of presently recorded liabilities. A future adverse ruling, settlement, or unfavorable development could result in future charges that could have a material adverse effect on the Company's results of operations or cash flows in the period in which they are recorded. The Company currently believes that such future charges, if any, would not have a material adverse effect on the consolidated financial position of the Company. Based on experience and developments, the Company reexamines its estimates of probable liabilities and associated expenses and receivables each period, and whether it is able to estimate a liability previously determined to be not estimable and/or not probable. Where appropriate, the Company makes additions to or adjustments of its estimated liabilities. As a result, the current estimates of the potential impact on the Company's consolidated financial position, results of operations and cash flows for the legal proceedings and claims pending against the Company could change in the future.

The following table shows the major categories of significant legal matters – respirator mask/asbestos litigation (including Aearo – described below), environmental remediation and other environmental liabilities -- for which the Company has been able to estimate its probable liability and for which the Company has taken accruals and the related insurance receivables:

Liability and Receivable Balances

At December 31

| (Millions) | 2012 | 2011 | 2010 |
|---|-------------|-------------|-------------|
| Respirator mask/asbestos liabilities | \$ 154 | \$ 130 | \$ 126 |
| Respirator mask/asbestos insurance receivables | 87 | 121 | 122 |
| Environmental remediation liabilities | \$ 29 | \$ 28 | \$ 24 |
| Environmental remediation insurance receivables | 11 | 15 | 15 |
| Other environmental liabilities | \$ 57 | \$ 75 | \$ 90 |
| Other environmental insurance receivables | 15 | — | — |

Respirator Mask/Asbestos Litigation

As of December 31, 2012, the Company is a named defendant, with multiple co-defendants, in numerous lawsuits in various courts that purport to represent approximately 2,060 individual claimants compared to approximately 2,260 individual claimants with actions pending at December 31, 2011.

The vast majority of the lawsuits and claims resolved by and currently pending against the Company allege use of some of the Company's mask and respirator products and seek damages from the Company and other defendants for alleged personal injury from workplace exposures to asbestos, silica, coal mine dust or other occupational dusts found in products manufactured by other defendants or generally in the workplace. A minority of the lawsuits and claims resolved by and currently pending against the Company generally allege personal injury from occupational exposure to asbestos from products previously manufactured by the Company, which are often unspecified, as well as products manufactured by other defendants, or occasionally at Company premises.

The Company's current volume of new and pending matters is substantially lower than its historical experience. The Company expects that filing of claims by unimpaired claimants in the future will continue to be at much lower levels than in the past. Accordingly, the number of claims alleging more serious injuries, including mesothelioma and other malignancies, will represent a greater percentage of total claims than in the past. The Company has prevailed in all nine cases taken to trial, including seven of the eight cases tried to verdict (such trials occurred in 1999, 2000, 2001, 2003, 2004, and 2007), and an appellate reversal in 2005 of the 2001 jury verdict adverse to the Company. The ninth case, tried in 2009, was dismissed by the Court at the close of plaintiff's evidence, based on the Court's legal finding that the plaintiff had not presented sufficient evidence to support a jury verdict. The plaintiffs appealed but in February 2012 the California Court of Appeals granted the plaintiff's voluntary dismissal of the appeal.

The Company has demonstrated in these past trial proceedings that its respiratory protection products are effective as claimed when used in the intended manner and in the intended circumstances. Consequently the Company believes that claimants are unable to establish that their medical conditions, even if significant, are attributable to the Company's respiratory protection products. Nonetheless the Company's litigation experience indicates that claims of persons with malignant conditions are costlier to resolve than the claims of unimpaired persons, and it therefore believes the average cost of resolving pending and future claims on a per-claim basis will continue to be higher than it experienced in prior periods when the vast majority of claims were asserted by the unimpaired.

As previously reported, the State of West Virginia, through its Attorney General, filed a complaint in 2003 against the Company and two other manufacturers of respiratory protection products in the Circuit Court of Lincoln County, West Virginia and amended its complaint in 2005. The amended complaint seeks substantial, but unspecified, compensatory damages primarily for reimbursement of the costs allegedly incurred by the State for worker's compensation and healthcare benefits provided to all workers with occupational pneumoconiosis and unspecified punitive damages. While the case has been inactive since the fourth quarter of 2007, the Court held a case management conference in March 2011, but no further activity has occurred in the case since that conference. No liability has been recorded for this matter because the Company believes that liability is not probable and estimable at this time. In addition, the Company is not able to estimate a possible loss or range of loss given the minimal activity in this case and the fact that the complaint asserts claims against two other manufacturers where a defendant's share of liability may turn on the law of joint and several liability and by the amount of fault a jury allocates to each defendant if a case is ultimately tried.

Plaintiffs have asserted specific dollar claims for damages in approximately 40% of the 1,149 lawsuits that were pending against the Company at the end of 2012 in all jurisdictions. A majority of states restrict or prohibit specifying damages in tort cases such as these, and most of the remaining jurisdictions do not require such specification. In those cases in which plaintiffs choose to assert specific dollar amounts in their complaints, brought in states that permit such pleading, the amounts claimed are typically not meaningful as an indicator of the Company's potential liability. This is because (a) the amounts claimed typically bear no relation to the extent of the plaintiff's injury, if any; (b) the complaints nearly always assert claims against multiple defendants with the typical complaint asserting claims against as few as a dozen different defendants to upwards of 100 different defendants, the damages alleged are not attributed to individual defendants, and a defendant's share of liability may turn on the law of joint and several liability, which can vary by state, and by the amount of fault a jury allocates to each defendant if a case is ultimately tried before a jury; (c) many cases are filed against the Company even though the plaintiffs did not use any of the Company's products and, ultimately, are withdrawn or dismissed without any payment; and (d) many cases are brought on behalf of plaintiffs who have not suffered any medical injury, and, ultimately, are resolved without any payment or a payment that is a small fraction of the damages initially claimed. Of the 465 pending cases in which purported damage amounts are specified in the complaints, 281 cases involve claims of \$100,000 or less (18 of which also allege punitive damages of \$15,000, 13 of which also allege punitive damages of \$10 million, and 3 of which also allege punitive damages of \$20 million); 59 cases involve claims between \$100,000 and \$3 million (45 of which also allege punitive damages of \$250,000, and 8 of which also allege punitive damages of \$1 million); 7 cases involve claims between \$3 million and \$7.5 million (all of which also allege punitive damages of \$5 million); 5 cases involve claims of \$10 million (4 of which also allege punitive damages of \$10 million); 72 cases involve claims of \$10 million to \$50 million (all of which also allege punitive damages of \$13 million); 4 cases involve claims of \$50 million (all of which also allege punitive damages of \$50 million) and 37 cases involve claims of over \$50 million (36 of which allege punitive damages of \$100 million). Some complaints allege that the compensatory and punitive damages are at least the amounts specified. As previously stated, the Company's experience and the other reasons cited indicate that the damage amounts specified in complaints are not a meaningful factor in any assessment of the Company's potential liability.

Respirator Mask/Asbestos Liabilities and Insurance Receivables: The Company estimates its respirator mask/asbestos liabilities, including the cost to resolve the claims and defense costs, by examining: (i) the Company's experience in resolving claims, (ii) apparent trends, (iii) the apparent quality of claims (e.g., whether the claim has been asserted on behalf of asymptomatic claimants), (iv) changes in the nature and mix of claims (e.g., the proportion of claims asserting usage of the Company's mask or respirator products and alleging exposure to each of asbestos, silica, coal or other occupational dusts, and claims pleading use of asbestos-containing products allegedly manufactured by the Company), (v) the number of current claims and a projection of the number of future asbestos and other claims that may be filed against the Company, (vi) the cost to resolve recently settled claims, and (vii) an estimate of the cost to resolve and defend against current and future claims.

Developments may occur that could affect the Company's estimate of its liabilities. These developments include, but are not limited to, significant changes in (i) the number of future claims, (ii) the average cost of resolving claims, (iii) the legal costs of defending these claims and in maintaining trial readiness, (iv) changes in the mix and nature of claims received, (v) trial and appellate outcomes, (vi) changes in the law and procedure applicable to these claims, and (vii) the financial viability of other co-defendants and insurers.

As a result of the greater cost of resolving claims of persons with more serious injuries, including mesothelioma and other malignancies, the Company increased its accruals in 2012 for respirator mask/asbestos liabilities by \$71 million. During 2012, the Company made payments for fees and settlements of \$45 million related to the respirator mask/asbestos litigation. As of December 31, 2012, the Company had accruals for respirator mask/asbestos liabilities of \$126 million (excluding Aearo accruals). The Company cannot estimate the amount or range of amounts by which the liability may exceed the accrual the Company has established because of the (i) inherent difficulty in projecting the number of claims that have not yet been asserted, particularly with respect to the Company's respiratory products that themselves did not contain any harmful materials, (ii) the complaints nearly always assert claims against multiple defendants where the damages alleged are typically not attributed to individual defendants so that a defendant's share of liability may turn on the law of joint and several liability, which can vary by state, (iii) the multiple factors described above that the Company considers in estimating its liabilities, and (iv) the several possible developments described above that may occur that could affect the Company's estimate of liabilities.

As of December 31, 2012, the Company's receivable for insurance recoveries related to the respirator mask/asbestos litigation was \$87 million. In 2012, the Company increased its receivables for expected insurance recoveries by \$39 million related to this litigation. The Company estimates insurance receivables based on an analysis of its numerous policies, including their exclusions, pertinent case law interpreting comparable policies, its experience with similar claims, and assessment of the nature of the claim and remaining coverage, and records an amount it has concluded is likely to be recovered.

Various factors could affect the timing and amount of recovery of this receivable, including (i) delays in or avoidance of payment by insurers; (ii) the extent to which insurers may become insolvent in the future, and (iii) the outcome of negotiations with insurers and legal proceedings with respect to respirator mask/asbestos liability insurance coverage. The difference between the accrued liability and insurance receivable represents in part the time delay between payment of claims on the one hand and receipt of insurance reimbursements on the other hand. Because of the lag time between settlement and payment of a claim, no meaningful conclusions may be drawn from quarterly or annual changes in the amount of receivables for expected insurance recoveries or changes in the number of claimants.

As previously reported, on January 5, 2007 the Company was served with a declaratory judgment action filed on behalf of two of its insurers (Continental Casualty and Continental Insurance Co. – both part of the Continental Casualty Group) disclaiming coverage for respirator mask/asbestos claims. The action, pending in the District Court in Ramsey County, Minnesota, seeks declaratory judgment regarding coverage provided by the policies and the allocation of covered costs among the policies issued by the various insurers. The action named, in addition to the Company, over 60 of the Company's insurers. This action is similar in nature to an action filed in 1994 with respect to breast implant coverage, which ultimately resulted in the Minnesota Supreme Court's ruling of 2003 that was largely in the Company's favor. The plaintiff insurers have served an amended complaint that names some additional insurers and deletes others. A significant number of the insurer defendants named in the amended complaint have been dismissed because of settlements they have reached with 3M regarding the matters at issue in the lawsuit. The case is currently in the discovery phase. Trial is scheduled to begin in the summer of 2013. During 2012, the Company reached settlements with several insurers, including Continental Casualty and Continental Insurance Co. mentioned above, that will result in payments totaling approximately \$87 million (\$72 million of which has been received in 2012) to the Company over the next year.

Respirator Mask/Asbestos Litigation – Aearo Technologies

On April 1, 2008, a subsidiary of the Company purchased the stock of Aearo Holding Corp., the parent of Aearo Technologies (“Aearo”). Aearo manufactured and sold various products, including personal protection equipment, such as eye, ear, head, face, fall and certain respiratory protection products.

As of December 31, 2012, Aearo and/or other companies that previously owned and operated Aearo's respirator business (American Optical Corporation, Warner-Lambert LLC, AO Corp. and Cabot Corporation (“Cabot”)) are named defendants, with multiple co-defendants, including the Company, in numerous lawsuits in various courts in which plaintiffs allege use of mask and respirator products and seek damages from Aearo and other defendants for alleged personal injury from workplace exposures to asbestos, silica-related, or other occupational dusts found in products manufactured by other defendants or generally in the workplace.

As of December 31, 2012, the Company, through its Aearo subsidiary, has recorded \$28 million as the best estimate of the probable liabilities for product liabilities and defense costs related to current and future Aearo-related asbestos and silica-related claims. Responsibility for legal costs, as well as for settlements and judgments, is currently shared in an informal arrangement among Aearo, Cabot, American Optical Corporation and a subsidiary of Warner Lambert and their insurers (the “Payor Group”). Liability is allocated among the parties based on the number of years each company sold respiratory products under the “AO Safety” brand and/or owned the AO Safety Division of American Optical Corporation and the alleged years of exposure of the individual plaintiff. Aearo's share of the contingent liability is further limited by an agreement entered into between Aearo and Cabot on July 11, 1995. This agreement provides that, so long as Aearo pays to Cabot an annual

fee of \$400,000, Cabot will retain responsibility and liability for, and indemnify Aearo against, asbestos and silica-related product liability claims for respirators manufactured prior to July 11, 1995. Because the date of manufacture for a particular respirator allegedly used in the past is often difficult to determine, Aearo and Cabot have applied the agreement to claims arising out of the alleged use of respirators while exposed to asbestos or silica or products containing asbestos or silica prior to January 1, 1997. With these arrangements in place, Aearo's potential liability is limited to exposures alleged to have arisen from the use of respirators involving exposure to asbestos, silica, or silica products on or after January 1, 1997. To date, Aearo has elected to pay the annual fee. Aearo could potentially be exposed to additional claims for some part of the pre-July 11, 1995 period covered by its agreement with Cabot if Aearo elects to discontinue its participation in this arrangement, or if Cabot is no longer able to meet its obligations in these matters.

In March 2012, Cabot CSC Corporation and Cabot Corporation filed a lawsuit against Aearo in the Superior Court of Suffolk County, Massachusetts seeking declaratory relief as to the scope of Cabot's indemnity obligations under the July 11, 1995 agreement, including whether Cabot has retained liability for coal workers' pneumoconiosis claims, and seeking damages for breach of contract.

Developments may occur that could affect the estimate of Aearo's liabilities. These developments include, but are not limited to: (i) significant changes in the number of future claims, (ii) significant changes in the average cost of resolving claims, (iii) significant changes in the legal costs of defending these claims, (iv) significant changes in the mix and nature of claims received, (v) trial and appellate outcomes, (vi) significant changes in the law and procedure applicable to these claims, (vii) significant changes in the liability allocation among the co-defendants, (viii) the financial viability of members of the Payor Group including exhaustion of available coverage limits, (ix) the outcome of pending insurance coverage litigation among certain other members of the Payor Group and their respective insurers, and/or (x) a determination that the interpretation of the contractual obligations on which Aearo has estimated its share of liability is inaccurate. The Company cannot determine the impact of these potential developments on its current estimate of Aearo's share of liability for these existing and future claims. If any of the developments described above were to occur, the actual amount of these liabilities for existing and future claims could be significantly larger than the amount accrued.

Because of the inherent difficulty in projecting the number of claims that have not yet been asserted, the complexity of allocating responsibility for future claims among the Payor Group, and the several possible developments that may occur that could affect the estimate of Aearo's liabilities, the Company cannot estimate the amount or range of amounts by which Aearo's liability may exceed the accrual the Company has established.

Environmental Matters and Litigation

The Company's operations are subject to environmental laws and regulations including those pertaining to air emissions, wastewater discharges, toxic substances, and the handling and disposal of solid and hazardous wastes enforceable by national, state, and local authorities around the world, and private parties in the United States and abroad. These laws and regulations provide, under certain circumstances, a basis for the remediation of contamination, for restoration of or compensation for damages to natural resources, and for personal injury and property damage claims. The Company has incurred, and will continue to incur, costs and capital expenditures in complying with these laws and regulations, defending personal injury and property damage claims, and modifying its business operations in light of its environmental responsibilities. In its effort to satisfy its environmental responsibilities and comply with environmental laws and regulations, the Company has established, and periodically updates, policies relating to environmental standards of performance for its operations worldwide.

Under certain environmental laws, including the United States Comprehensive Environmental Response, Compensation and Liability Act of 1980 and similar state laws, the Company may be jointly and severally liable, typically with other companies, for the costs of remediation of environmental contamination at current or former facilities and at off-site locations. The Company has identified numerous locations, most of which are in the United States, at which it may have some liability. Please refer to the paragraph entitled "*Environmental Liabilities and Insurance Receivables*" that follows for information on the amount of the accrual.

Environmental Matters

As previously reported, the Company has been voluntarily cooperating with ongoing reviews by local, state, national (primarily the U.S. Environmental Protection Agency (EPA)), and international agencies of possible environmental and health effects of various perfluorinated compounds ("PFCs"), including perfluorooctanyl compounds such as perfluorooctanoate ("PFOA") and perfluorooctane sulfonate ("PFOS"). As a result of its phase-out decision in May 2000, the Company no longer manufactures perfluorooctanyl compounds. The company ceased manufacturing and using the vast majority of these compounds within approximately two years of the phase-out announcement, and ceased all manufacturing and the last significant use of this chemistry by 2008. Through its ongoing life cycle management and its raw material composition identification processes associated with the Company's policies covering the use of all persistent and bio-accumulative materials, the Company has on occasion identified the presence of precursor chemicals in materials purchased from

suppliers that may ultimately degrade to PFOA, PFOS or similar compounds. Upon such identification, the Company works to find alternatives for such chemicals.

Regulatory activities concerning PFOA and/or PFOS continue in the United States, Europe and elsewhere, and before certain international bodies. These activities include gathering of exposure and use information, risk assessment, and consideration of regulatory approaches. The EPA continues to develop Drinking Water Health Advisories for PFOS and PFOA, which are expected to be released in 2013. Those advisory levels will supersede the current provisional advisory levels. In an effort to move toward developing standards under the Safe Drinking Water Act, the EPA published on May 2, 2012 a list of unregulated substances, including six PFCs, required to be monitored during the period 2013-2015 by public water system suppliers to determine the extent of their occurrence.

The Agency for Toxic Substances and Disease Registry (ATSDR) has completed a bio-monitoring study evaluating PFC blood levels in volunteers living near fields where wastewater treatment sludge was applied from the municipal wastewater treatment plant in Decatur, Alabama that received wastewater from numerous sources, including sanitary wastewater from 3M. The Company expects ATSDR to release its report in 2013.

3M continues its third and final phase of work pursuant to a Memorandum of Understanding with the EPA regarding an environmental assessment program at the Company's Decatur manufacturing site. That work includes groundwater sampling off-site from the 3M Decatur facility as well as at three local landfills used by the facility. The Company shared results from this final phase of sampling work with the EPA in September, 2012.

The Company is continuing to make progress in its work, under the supervision of state regulators, to address its historic disposal of PFC-containing waste associated with manufacturing operations at the Cottage Grove, Minnesota and Decatur, Alabama plants.

As previously reported, the Company entered into a voluntary remedial action agreement with the Alabama Department of Environmental Management (ADEM) to address the presence of PFCs in the soil at the Company's manufacturing facility in Decatur, Alabama. For approximately twenty years, the Company incorporated its wastewater treatment plant sludge containing PFCs in fields at its Decatur facility pursuant to a permit issued by ADEM. After a review of the available options to address the presence of PFCs in the soil, ADEM agreed that the preferred remediation option is to use a multilayer cap over the former sludge incorporation areas on the manufacturing site with subsequent groundwater migration controls and treatment. Implementation of that option will continue throughout the balance of 2013 and is expected to be completed in 2016.

The Company continues to work with the Minnesota Pollution Control Agency (MPCA) pursuant to the terms of the previously disclosed May 2007 Settlement Agreement and Consent Order to address the presence of certain PFCs in the soil and groundwater at former disposal sites in Washington County, Minnesota (Oakdale and Woodbury) and at the Company's manufacturing facility at Cottage Grove, Minnesota. Under this agreement, the Company's principal obligations include (i) evaluating releases of certain PFCs from these sites and proposing response actions; (ii) providing treatment or alternative drinking water upon identifying any level exceeding a Health Based Value ("HBV") or Health Risk Limit ("HRL") (i.e., the amount of a chemical in drinking water determined by the Minnesota Department of Health (MDH) to be safe for human consumption over a lifetime) for certain PFCs for which a HBV and/or HRL exists as a result of contamination from these sites; (iii) remediating identified sources of other PFCs at these sites that are not controlled by actions to remediate PFOA and PFOS; and (iv) sharing information with the MPCA about certain perfluorinated compounds. During 2008, the MPCA issued formal decisions adopting remedial options for the former disposal sites in Washington County, Minnesota (Oakdale and Woodbury). In August 2009, the MPCA issued a formal decision adopting remedial options for the Company's Cottage Grove manufacturing facility. During the spring and summer of 2010, 3M began implementing the agreed upon remedial options at the Cottage Grove and Woodbury sites. 3M commenced the remedial option at the Oakdale site in late 2010. At each location the remedial options were recommended by the Company and approved by the MPCA. Remediation work has been completed at the Oakdale site, and it is in an operational maintenance mode. Remediation will continue at the other two sites during 2013.

The Company cannot predict what additional regulatory actions arising from the foregoing proceedings and activities, if any, may be taken regarding such compounds or the consequences of any such actions.

Environmental Litigation

As previously reported, a former employee filed a purported class action lawsuit in 2002 in the Circuit Court of Morgan County, Alabama seeking unstated damages and alleging that the plaintiffs suffered fear, increased risk, subclinical injuries, and property damage from exposure to certain perfluorochemicals at or near the Company's Decatur, Alabama, manufacturing facility. The Circuit Court in 2005 granted the Company's motion to dismiss the named plaintiff's personal injury-related claims on the basis that such claims are barred by the exclusivity provisions of the state's Workers Compensation Act. The plaintiffs' counsel filed an amended complaint in November 2006, limiting the case to property damage claims on behalf of a purported class of residents and property owners in the vicinity of the Decatur plant. Also, in

2005, the judge in a second purported class action lawsuit (filed by three residents of Morgan County, Alabama, seeking unstated compensatory and punitive damages involving alleged damage to their property from emissions of certain perfluorochemical compounds from the Company's Decatur, Alabama, manufacturing facility that formerly manufactured those compounds) granted the Company's motion to abate the case, effectively putting the case on hold pending the resolution of class certification issues in the first action described above filed in the same court in 2002. Despite the stay, plaintiffs filed an amended complaint seeking damages for alleged personal injuries and property damage on behalf of the named plaintiffs and the members of a purported class. No further action in the case is expected unless and until the stay is lifted.

In February 2009, a resident of Franklin County, Alabama, filed a purported class action lawsuit in the Circuit Court of Franklin County seeking compensatory damages and injunctive relief based on the application by the Decatur utility's wastewater treatment plant of wastewater treatment sludge to farmland and grasslands in the state that allegedly contain PFOA, PFOS and other perfluorochemicals. The named defendants in the case include 3M, its subsidiary Dyneon LLC, Daikin America, Inc., Synagro-WWT, Inc., Synagro South, LLC and Biological Processors of America. The named plaintiff seeks to represent a class of all persons within the State of Alabama who have had PFOA, PFOS and other perfluorochemicals released or deposited on their property. In March 2010, the Alabama Supreme Court ordered the case transferred from Franklin County to Morgan County. In May, 2010, consistent with its handling of the other matters, the Morgan County Circuit Court abated this case, putting it on hold pending the resolution of the class certification issues in the first case filed there.

In December 2010, the State of Minnesota, by its Attorney General Lori Swanson, acting in its capacity as trustee of the natural resources of the State of Minnesota, filed a lawsuit in Hennepin County District Court against 3M to recover damages (including unspecified assessment costs and reasonable attorney's fees) for alleged injury to, destruction of, and loss of use of certain of the State's natural resources under the Minnesota Environmental Response and Liability Act (MERLA) and the Minnesota Water Pollution Control Act (MWPCA), as well as statutory nuisance and common law claims of trespass, nuisance, and negligence with respect to the presence of PFCs in the groundwater, surface water, fish or other aquatic life and sediments. The State also seeks declarations under MERLA that 3M is responsible for all damages the State may suffer in the future for injuries to natural resources from releases of PFCs into the environment, and under MWPCA that 3M is responsible for compensation for future loss or destruction of fish, aquatic life and other damages.

In January 2011, the City of Lake Elmo filed a motion to intervene in the State of Minnesota lawsuit and seeks damages in excess of \$50,000 and other legal and equitable relief, including reasonable attorneys' fees, for alleged contamination of city property, wells, groundwater and water contained in the wells with PFCs under several theories, including common law and statutory nuisance, strict liability, trespass, negligence, and conversion. The court granted the City of Lake Elmo's motion to intervene in this lawsuit.

In November 2011, the Metropolitan Council filed a motion to intervene and a complaint in the State of Minnesota lawsuit seeking damages in excess of \$50,000 and other legal, declaratory and equitable relief, including reasonable attorneys' fees, for costs and fees that the Metropolitan Council alleges it will be required to assess at some time in the future if the MPCA imposes restrictions on Metropolitan Council's PFOS discharges to the Mississippi River. Metropolitan Council's intervention motion was based on several theories, including common law negligence, and statutory claims under MERLA for response costs and under the Minnesota Environmental Rights Act (MERA) for declaratory and equitable relief against 3M for PFOS and other PFC pollution of the waters and sediments of the Mississippi River. 3M did not object to the motion to intervene. In January 2012, 3M answered the Metropolitan Council's complaint and filed a counterclaim alleging that the Metropolitan Council discharges PFCs to the Mississippi River and discharges PFC-containing sludge and biosolids from one or more of its wastewater treatment plants onto agricultural lands and local area landfills. Accordingly, 3M requested that if the Court finds that the State is entitled to any of the damages the State seeks, 3M seeks contribution and apportionment from the Metropolitan Council, including attorneys' fees, under MERLA, and contribution from and liability for the Metropolitan Council's proportional share of damages awarded to the State under the MWPCA, as well as under statutory nuisance and common law theories of trespass, nuisance and negligence. 3M also seeks declaratory relief under MERA.

In May 2012, 3M filed a motion to disqualify the State of Minnesota's counsel, Covington & Burling, LLP (Covington). In October 2012, the court granted 3M's motion to disqualify Covington as counsel to the State and stayed discovery in the natural resources damages case for up to 180 days to give the State time to secure new counsel. In October 2012, the State and Covington appealed the court's disqualification to the Minnesota Court of Appeals.

In June 2009, the Company, along with more than 250 other companies, was served with a third-party complaint seeking contribution towards the cost of cleaning up a 17-mile stretch of the Passaic River in New Jersey. After commencing an enforcement action in 1990, the State of New Jersey filed suit against Maxus Energy, Tierra Solutions, Occidental Chemical and two other companies seeking cleanup and removal costs and other damages associated with the presence of dioxin and other hazardous substances in the sediment of the Passaic. The third-party complaint seeks to spread those costs among the third-party defendants, including 3M. Allegations asserted against 3M relate to its use of two commercial

drum conditioning facilities in New Jersey. Currently, the State of New Jersey is actively negotiating with third-party defendants, including 3M, to settle pending claims related to the state's response costs. The potential scope of a state settlement remains uncertain and would not include release from potential federal claims, yet to be asserted, related to the final cleanup costs. Total costs for the remedy currently proposed by EPA could easily exceed \$1 billion. While the Company does not yet have a basis for estimating its potential exposure in this case, or in the yet to be asserted EPA claim, the Company currently believes its allocable share of the possible loss, if any, is likely to be a fraction of one percent of the total costs because of the Company's limited potential involvement at this site.

For environmental litigation matters described in this section for which a liability, if any, has been recorded, the Company believes the amount recorded, as well as the possible loss or range of loss in excess of the established accrual is not material to the Company's consolidated results of operations or financial condition. For those matters for which a liability has not been recorded, the Company believes such liability is not probable and estimable and the Company is not able to estimate a possible loss or range of loss at this time, with the exception of the Passaic River litigation, where the Company's potential exposure, if any, is likely to be a fraction of one percent of the total costs.

Environmental Liabilities and Insurance Receivables

As of December 31, 2012, the Company had recorded liabilities of \$29 million for estimated "environmental remediation" costs based upon an evaluation of currently available facts with respect to each individual site and also recorded related insurance receivables of \$11 million. The Company records liabilities for remediation costs on an undiscounted basis when they are probable and reasonably estimable, generally no later than the completion of feasibility studies or the Company's commitment to a plan of action. Liabilities for estimated costs of environmental remediation, depending on the site, are based primarily upon internal or third-party environmental studies, and estimates as to the number, participation level and financial viability of any other potentially responsible parties, the extent of the contamination and the nature of required remedial actions. The Company adjusts recorded liabilities as further information develops or circumstances change. The Company expects that it will pay the amounts recorded over the periods of remediation for the applicable sites, currently ranging up to 20 years.

As of December 31, 2012, the Company had recorded liabilities of \$57 million for "other environmental liabilities" based upon an evaluation of currently available facts to implement the Settlement Agreement and Consent Order with the MPCA, the remedial action agreement with ADEM, and to address trace amounts of perfluorinated compounds in drinking water sources in the City of Oakdale, Minnesota, as well as presence in the soil and groundwater at the Company's manufacturing facilities in Decatur, Alabama, and Cottage Grove, Minnesota, and at two former disposal sites in Washington County, Minnesota (Oakdale and Woodbury). The Company expects that most of the spending will occur over the next four years. In 2012, the Company recorded expected insurance recoveries of \$15 million related to "other environmental liabilities."

It is difficult to estimate the cost of environmental compliance and remediation given the uncertainties regarding the interpretation and enforcement of applicable environmental laws and regulations, the extent of environmental contamination and the existence of alternative cleanup methods. Developments may occur that could affect the Company's current assessment, including, but not limited to: (i) changes in the information available regarding the environmental impact of the Company's operations and products; (ii) changes in environmental regulations, changes in permissible levels of specific compounds in drinking water sources, or changes in enforcement theories and policies, including efforts to recover natural resource damages; (iii) new and evolving analytical and remediation techniques; (iv) success in allocating liability to other potentially responsible parties; and (v) the financial viability of other potentially responsible parties and third-party indemnitors. For sites included in both "environmental remediation liabilities" and "other environmental liabilities," at which remediation activity is largely complete and remaining activity relates primarily to operation and maintenance of the remedy, including required post-remediation monitoring, the Company believes the exposure to loss in excess of the amount accrued would not be material to the Company's consolidated results of operations or financial condition. However, for locations at which remediation activity is largely ongoing, the Company cannot estimate a possible loss or range of loss in excess of the associated established accruals for the reasons described above.

Compliance Matters

In November 2009, the Company contacted the Department of Justice (DOJ) and Securities and Exchange Commission (SEC) to voluntarily disclose that the Company was conducting an internal investigation as a result of reports it received about its subsidiary in Turkey, alleging bid rigging and bribery and other inappropriate conduct in connection with the supply of certain reflective and other materials and related services to Turkish government entities. The Company also contacted certain affected government agencies in Turkey. In September 2012, the Turkish Competition Authority issued its decision finding that there was insufficient evidence obtained in the investigation to find that 3M Turkey or the other companies investigated violated the Turkish competition law.

The Company retained outside counsel to conduct an assessment of its policies, practices, and controls and to evaluate its overall compliance with the Foreign Corrupt Practices Act (FCPA), including a review of its practices in certain other countries and acquired entities. As part of its review, the Company has also reported to the DOJ and SEC issues arising from transactions in other countries. In January 2013, the DOJ and SEC each notified the Company that they are terminating their investigations into possible violations of the FCPA without taking any action or imposing any fines against the Company. Among the reasons cited by the DOJ for closing its investigation included the Company's voluntary disclosure and cooperation, the Company's thorough investigation, and the steps the Company has taken to enhance its anti-corruption compliance program.

Other Matters

Commercial Litigation

In September 2010, various parties, on behalf of a purported class of shareholders of Cogent, Inc. ("Cogent"), commenced three lawsuits against the Company, Cogent, and its directors in the Delaware Court of Chancery. Plaintiffs allege that 3M, in connection with its tender offer for Cogent shares, aided and abetted the breach of fiduciary duties by Cogent directors and seek an unspecified amount of damages. The three cases were consolidated, expedited discovery was conducted, and Plaintiffs' motion for a preliminary injunction to enjoin the acquisition was denied on October 1, 2010. On November 15, 2010, plaintiffs filed an amended complaint that added Cogent directors appointed by 3M, as named defendants, and asserted additional claims of breach of fiduciary duties in connection with the acquisition and a subsequent offering period. 3M completed its acquisition of Cogent in December 2010. In March 2012, all parties to the litigation agreed to settle this litigation for an amount that is not material to the Company. On August 30, 2012, the Court of Chancery approved the settlement and dismissed plaintiffs' claims.

Separately, several purported holders of Cogent shares, representing a total of approximately 5.8 million shares, have asserted appraisal rights under Delaware law. The Company has answered the appraisal petition and is defending this matter vigorously. Trial in Delaware occurred in November 2012; post-trial briefing is ongoing.

In October 2012, four plaintiffs filed purported class actions against Ceradyne, its directors, 3M and Cyborg Acquisition Corporation (a direct wholly owned subsidiary of 3M) in connection with 3M's proposed acquisition of Ceradyne. Two suits were filed in California Superior Court for Orange County and two were filed in the Delaware Chancery Court. The suits seek principally to enjoin the proposed acquisition of Ceradyne, and allege that the defendants breached and/or aided and abetted the breach of their fiduciary duties to Ceradyne by seeking to sell Ceradyne through an allegedly unfair process and for an unfair price and on unfair terms, and/or by allegedly failing to make adequate disclosures to Ceradyne stockholders regarding the proposed acquisition of Ceradyne. The California court consolidated the two California actions. In the Delaware cases, the plaintiffs' motions to expedite proceedings, which the defendants have opposed, was denied by the Delaware Chancery Court. The parties reached a settlement of those matters for an amount that is not material to the Company. The settlement papers are presently being drafted, and the settlement will be presented to the California court for preliminary and final approval.

Separately, one Ceradyne shareholder, who purports to hold 16,656 shares, filed a petition for appraisal rights under Delaware law.

3M filed suit against Avery Dennison Corporation in the United States District Court for the District of Minnesota in June 2010, alleging that Avery's OmniCube™ full cube retroreflective sheeting products, which are used for highway signage, infringe a number of 3M patents. 3M's motion to preliminarily enjoin the sales of Avery's OmniCube retroreflective sheeting was denied in December 2010. 3M also sought a declaratory judgment from the District Court in Minnesota that 3M's Diamond Grade™ DG3 full cube retroreflective sheeting does not infringe two Avery patents. The District Court granted Avery's motion to dismiss 3M's declaratory judgment suit in March 2011. 3M appealed the dismissal of the declaratory judgment lawsuit, and in January 2012, the Federal Circuit Court of Appeals issued a decision reversing the district court and reinstating the declaratory judgment action. Avery did not appeal this decision, and that action, including Avery's counterclaims against 3M for infringement of the Avery patents, is proceeding in the District Court in Minnesota. In October 2010, Avery Dennison filed a lawsuit against the Company in the United States District Court for the Central District of California, alleging that 3M monopolized or attempted to monopolize the markets for Type XI retroreflective sheeting and for broad high performance sheeting in violation of the Sherman Act, as well as other claims. Avery alleges that 3M manipulated the standards-setting process of the American Society for Testing and Materials (ASTM), a private organization responsible for creating standards for, among other things, retroreflective sheeting used for highway signage; entered into illegal and anticompetitive contracts; and engaged in other anticompetitive acts including false advertising and disparagement. 3M's motion to transfer the antitrust case to the United States District Court for the District of Minnesota was granted in February 2011. 3M's patent infringement lawsuit against Avery, the declaratory judgment action against Avery (with Avery's patent infringement counterclaims), and Avery's antitrust suit against 3M are moving forward in the Minnesota Court.

In March 2012, the district court issued its claim construction ruling in the 3M patent case, finding in 3M's favor on 16 of the 19 disputed terms. Fact and expert discovery in that case have concluded and the parties are awaiting oral argument

on pending motions for summary judgment on certain matters filed by both parties. Avery has sought reexamination of the five 3M patents in suit. The U.S. Patent and Trademark Office (US PTO) granted reexamination and issued a first Office Action rejecting all claims for two of the patents in suit. The US PTO denied in whole Avery's request for reexamination of one of the patents in suit.

Fact discovery is also complete in the antitrust case and expert discovery is ongoing. Fact discovery is ongoing in the declaratory judgment case involving Avery's patents and the parties are beginning the claim construction process. Avery filed a motion to join all three cases for trial, a motion that the Court denied. Accordingly, the 3M patent infringement case is expected to go to trial late in 2013.

3M sued TransWeb Corporation in Minnesota in 2010 for infringement of several 3M patents covering fluorination and hydrocharging of filter media used in 3M's respirators and furnace filters. TransWeb does not make finished goods, but sells media to competitors of 3M's respirator and furnace filter businesses. TransWeb filed a declaratory judgment action in and successfully moved the litigation to the United States District Court for the District of New Jersey, seeking a declaration of invalidity and non-infringement of 3M's patents, and further alleging that 3M waited too long to enforce its rights. TransWeb also alleged 3M obtained the patents through inequitable conduct and that 3M's attempt to enforce the patents constitutes a violation of the antitrust laws. On November 30, 2012, the jury returned a verdict in favor of TransWeb on all but one count, including findings that 3M's patents were invalid and not infringed, and that 3M had committed an antitrust violation by seeking to enforce a patent it had obtained fraudulently. The jury also recommended that the court find 3M had committed inequitable conduct in obtaining the patents, and that the patents were therefore unenforceable. Since the vast majority of TransWeb's claim for treble antitrust damages is in the form of its attorneys' fees and expenses in connection with the defense of the patent case, the parties agreed that the measure of damages would not go to the jury, but rather would be submitted to a special master after the trial. It is expected this process will take several months, and the special master's recommendations would then be forwarded to the court for review and entry of a final judgment. 3M intends to appeal.

In December 2010, Meda AB, the Swedish-based acquirer of 3M's European pharmaceutical business, filed a lawsuit against 3M, 3M Innovative Properties Company, and Riker Laboratories, Inc. (collectively, "3M"). Meda initially asserted claims against 3M for breach of contract and breach of the implied covenant of good faith and fair dealing. In October 2011, Meda amended its pleading to assert a claim for fraud. All three claims are based on allegations that 3M did not inform Meda about certain information relating to the pricing of a particular drug in France prior to the acquisition. Meda seeks to recover compensatory damages in excess of \$300 million (including prejudgment interest), punitive damages, and attorneys' fees. In September 2012, 3M filed a motion for summary judgment on the grounds that Meda cannot establish a breach of any duty owed by 3M. A non-jury trial started in the United States District Court for the Southern District of New York in January 2013. The court is expected to issue its decision in the first quarter of 2013.

Shurtape Technologies, LLC sued 3M in the United States District Court for the Western District of North Carolina, alleging that 3M's ScotchBlue™ Painter's Masking Tape with Edge-Lock™ Paint Line Protector, which was introduced in late 2009, infringes Shurtape's U.S. patent describing masking tape having an absorbent coating applied to the edge of the tape and several of Shurtape's trademarks. 3M requested reexamination of the Shurtape patent, and in November 2012, the US PTO issued an office action adopting many of 3M's invalidity arguments and rejecting all claims in the Shurtape patent. 3M has also filed a motion with the district court asking that the litigation be stayed pending resolution of the reexamination. Shurtape has opposed that motion and the court has not yet ruled. Trial is anticipated in late 2013 or early 2014.

For commercial litigation matters described in this section for which a liability, if any, has been recorded, the Company believes the amount recorded, as well as the possible loss or range of loss in excess of the established accrual is not material to the Company's consolidated results of operations or financial condition. For those matters for which a liability has not been recorded, the Company believes that such liability is not probable and estimable and the Company is not able to estimate a possible loss or range of loss at this time.

Product Liability Litigation

Électricité de France (EDF) filed a lawsuit against 3M France in the French courts in 2006 claiming commercial loss and property damage after experiencing electrical network failures which EDF alleges were caused by so-called defective 3M transition splices. The French Court of Appeals at Versailles affirmed the commercial trial court's decision that the transition splices conformed to contract specifications which were thoroughly analyzed and tested by EDF before purchase and installation. The Court of Appeals, however, ordered a court-appointed expert to study the problem and issue a technical opinion on the cause of the network failures. In spite of considerable testing of 3M's splices over several years, the court-appointed expert has been unable to identify a defect in the 3M splices and to determine the definitive cause of the network failures. The court-appointed expert is expected to submit his final report to the commercial court by June 30, 2013. Thereafter, the commercial court may take from six months to one year to render its decision.

One customer obtained an order in the French courts against 3M Purification SAS (a French subsidiary) in October 2011 appointing an expert to determine the amount of commercial loss and property damage allegedly caused by so-called defective 3M filters used in the customer's manufacturing process. An Austrian subsidiary of this same customer also filed a claim against 3M Austria GmbH (an Austrian subsidiary) and 3M Purification SAS in the Austrian courts in September 2012 seeking damages for the same issue. Another customer filed a lawsuit against 3M Deutschland GmbH (a German subsidiary) in the German courts in March 2012 seeking commercial loss and property damage allegedly caused by so-called defective 3M filters used in that customer's manufacturing process. The Company has resolved on an amicable basis claims of two other customers arising out of the same issue.

For product liability litigation matters described in this section for which a liability has been recorded, the Company believes the amount recorded is not material to the Company's consolidated results of operations or financial condition. In addition, the Company is not able to estimate a possible loss or range of loss in excess of the established accruals at this time.

NOTE 14. Stock-Based Compensation

The 3M 2008 Long-Term Incentive Plan provides for the issuance or delivery of up to 64 million shares of 3M common stock pursuant to awards granted under the plan. In May 2012, shareholders approved an additional 36 million shares, increasing the number of approved shares to 100 million shares. Awards under this plan may be issued in the form of Incentive Stock Options, Nonqualified Stock Options, Progressive Stock Options, Stock Appreciation Rights, Restricted Stock, Restricted Stock Units, Other Stock Awards, and Performance Units and Performance Shares. Awards denominated in shares of common stock other than options and Stock Appreciation Rights, per the 2008 Plan, count against the 100 million share limit as 3.38 shares for every one share covered by such award (for full value awards with grant dates prior to May 11, 2010), as 2.87 shares for every one share covered by such award (for full value awards with grant dates on or after May 11, 2010 and prior to May 8, 2012), or as 3.50 shares for every one share covered by such award (for full value awards with grant dates of May 8, 2012 or later). The remaining total shares available for grant under the 2008 Long Term Incentive Plan Program are 48,786,751 as of December 31, 2012. There were approximately 11,564 participants with outstanding options, restricted stock, or restricted stock units at December 31, 2012.

The Company's annual stock option and restricted stock unit grant is made in February to provide a strong and immediate link between the performance of individuals during the preceding year and the size of their annual stock compensation grants. The grant to eligible employees uses the closing stock price on the grant date. Stock options vest over a period from one to three years with the expiration date at 10 years from date of grant. Accounting rules require recognition of expense under a non-substantive vesting period approach, requiring compensation expense recognition when an employee is eligible to retire. Employees are considered eligible to retire at age 55 and after having completed five years of service. This retiree-eligible population represents 30 percent of the 2012 annual stock-based compensation award expense dollars; therefore, higher stock-based compensation expense is recognized in the first quarter. Beginning in 2007, the Company reduced the number of traditional stock options granted under the Management Stock Ownership Program (MSOP) plan by reducing the number of employees eligible to receive annual grants and by shifting a portion of the annual grant away from traditional stock options primarily to restricted stock units. However, associated with the reduction in the number of eligible employees, the Company provided a one-time "buyout" grant in 2007 of restricted stock units to the impacted employees. 3M also has granted progressive (reload) options. These options are nonqualified stock options that were granted to certain participants under the 1997 or 2002 MSOP, but for which the reload feature was eliminated in 2005 (on a prospective basis only). Participants who had options granted prior to this effective date may still qualify to receive new progressive (reload) stock options.

In addition to the annual grants, the Company makes other minor grants of stock options, restricted stock units and other stock-based grants. The Company issues cash settled Restricted Stock Units and Stock Appreciation Rights in certain countries. These grants do not result in the issuance of Common Stock and are considered immaterial by the Company.

Amounts recognized in the financial statements with respect to stock-based compensation programs, which include stock options, restricted stock, restricted stock units, performance shares, and the General Employees' Stock Purchase Plan (GESPP), are provided in the following table. Capitalized stock-based compensation amounts were not material for the twelve months ended 2012, 2011 and 2010. The income tax benefits shown in the table can fluctuate by period due to the amount of employee "disqualifying dispositions" related to Incentive Stock Options (ISOs). The Company last granted ISOs in 2002.

Stock-Based Compensation Expense

| (Millions) | Years ended December 31 | | |
|---|-------------------------|---------|---------|
| | 2012 | 2011 | 2010 |
| Cost of sales | \$ 27 | \$ 29 | \$ 31 |
| Selling, general and administrative expenses | 167 | 192 | 209 |
| Research, development and related expenses | 29 | 32 | 34 |
| Stock-based compensation expenses | \$ 223 | \$ 253 | \$ 274 |
| Income tax benefits | \$ (67) | \$ (80) | \$ (98) |
| Stock-based compensation expenses, net of tax | \$ 156 | \$ 173 | \$ 176 |

The following table summarizes stock option activity during the twelve months ended December 31:

Stock Option Program

| | 2012 | | 2011 | | 2010 | |
|----------------------|-------------------|---------------------------------|-------------------|---------------------------------|-------------------|---------------------------------|
| | Number of Options | Weighted Average Exercise Price | Number of Options | Weighted Average Exercise Price | Number of Options | Weighted Average Exercise Price |
| Under option — | | | | | | |
| January 1 | 64,148,415 | \$ 77.28 | 70,335,044 | \$ 74.80 | 74,268,165 | \$ 72.39 |
| Granted: | | | | | | |
| Annual | 5,770,190 | 87.91 | 5,514,500 | 89.46 | 5,788,313 | 78.79 |
| Progressive (Reload) | 110,065 | 89.65 | 237,839 | 94.02 | 188,105 | 88.67 |
| Other | 51,661 | 89.25 | 8,953 | 86.71 | 27,911 | 82.13 |
| Exercised | (13,123,617) | 68.78 | (11,625,863) | 68.47 | (9,678,654) | 59.11 |
| Canceled | (391,684) | 83.65 | (322,058) | 75.09 | (258,796) | 70.76 |
| December 31 | 56,565,030 | \$ 80.33 | 64,148,415 | \$ 77.28 | 70,335,044 | \$ 74.80 |
| Options exercisable | | | | | | |
| December 31 | 45,207,143 | \$ 78.78 | 52,644,364 | \$ 76.90 | 58,201,617 | \$ 75.87 |

Outstanding options under grant include grants from previous plans. For options outstanding at December 31, 2012, the weighted-average remaining contractual life was 55 months and the aggregate intrinsic value was \$709 million. For options exercisable at December 31, 2012, the weighted-average remaining contractual life was 44 months and the aggregate intrinsic value was \$637 million. As of December 31, 2012, there was \$54 million of compensation expense that has yet to be recognized related to non-vested stock option based awards. This expense is expected to be recognized over the remaining weighted-average vesting period of 21 months.

The total intrinsic values of stock options exercised during 2012, 2011 and 2010 was \$282 million, \$287 million and \$263 million, respectively. Cash received from options exercised during 2012, 2011 and 2010 was \$903 million, \$796 million and \$571 million, respectively. The Company's actual tax benefits realized for the tax deductions related to the exercise of employee stock options for 2012, 2011 and 2010 was \$98 million, \$96 million and \$93 million, respectively.

The Company does not have a specific policy to repurchase common shares to mitigate the dilutive impact of options; however, the Company has historically made adequate discretionary purchases, based on cash availability, market trends, and other factors, to satisfy stock option exercise activity.

For annual and progressive (reload) options, the weighted average fair value at the date of grant was calculated using the Black-Scholes option-pricing model and the assumptions that follow.

Stock Option Assumptions

| | Annual | | | Progressive (Reload) | | |
|--------------------------|----------|----------|----------|----------------------|----------|----------|
| | 2012 | 2011 | 2010 | 2012 | 2011 | 2010 |
| Exercise price | \$ 87.89 | \$ 89.47 | \$ 78.72 | \$ 87.89 | \$ 93.94 | \$ 86.72 |
| Risk-free interest rate | 1.1 % | 2.8 % | 2.8 % | 0.2 % | 0.4 % | 0.6 % |
| Dividend yield | 2.6 % | 2.6 % | 2.5 % | 2.6 % | 2.6 % | 2.5 % |
| Volatility | 24.5 % | 22.0 % | 25.7 % | 23.4 % | 21.5 % | 33.2 % |
| Expected life (months) | 74 | 72 | 72 | 19 | 15 | 17 |
| Black-Scholes fair value | \$ 14.94 | \$ 16.10 | \$ 16.50 | \$ 8.50 | \$ 7.49 | \$ 12.01 |

Expected volatility is a statistical measure of the amount by which a stock price is expected to fluctuate during a period. For the 2012 annual grant date, the Company estimated the expected volatility based upon the average of the most recent one year volatility, the median of the term of the expected life rolling volatility, the median of the most recent term of the expected life volatility of 3M stock, and the implied volatility on the grant date. The expected term assumption is based on the weighted average of historical grants.

The following table summarizes restricted stock and restricted stock unit activity during the twelve months ended December 31, 2012:

Restricted Stock and Restricted Stock Units

| | 2012 | | 2011 | | 2010 | |
|---------------------|------------------|--|------------------|--|------------------|--|
| | Number of Awards | Weighted Average Grant Date Fair Value | Number of Awards | Weighted Average Grant Date Fair Value | Number of Awards | Weighted Average Grant Date Fair Value |
| Nonvested balance — | | | | | | |
| As of January 1 | 4,858,972 | \$ 73.02 | 4,812,657 | \$ 68.75 | 4,379,480 | \$ 68.85 |
| Granted | | | | | | |
| Annual | 968,522 | 87.92 | 889,448 | 89.46 | 902,549 | 78.81 |
| Other | 99,337 | 85.07 | 351,624 | 87.07 | 527,823 | 70.09 |
| Vested | (2,594,468) | 63.51 | (1,077,816) | 72.21 | (948,233) | 79.12 |
| Forfeited | (70,801) | 82.65 | (116,941) | 72.01 | (48,962) | 76.22 |
| As of December 31 | 3,261,562 | \$ 85.17 | 4,858,972 | \$ 73.02 | 4,812,657 | \$ 68.75 |

As of December 31, 2012, there was \$79 million of compensation expense that has yet to be recognized related to non-vested restricted stock and restricted stock units. This expense is expected to be recognized over the remaining weighted-average vesting period of 25 months. The total fair value of restricted stock and restricted stock units that vested during the twelve months ended December 31, 2012, 2011 and 2010 was \$228 million, \$102 million and \$75 million, respectively. The Company's actual tax benefits realized for the tax deductions related to the vesting of restricted stock and restricted stock units for the twelve months ended December 31, 2012, 2011 and 2010 was \$86 million, \$36 million and \$20 million, respectively.

Restricted stock units granted under the 3M 2008 Long-Term Incentive Plan generally vest three years following the grant date assuming continued employment. The one-time "buyout" restricted stock unit grant in 2007 vested at the end of five years. Restricted stock unit grants issued in 2008 and prior did not accrue dividends during the vesting period. Beginning in 2009, dividend equivalents equal to the dividends payable on the same number of shares of 3M common stock accrue on these restricted stock units during the vesting period, although no dividend equivalents are paid on any of these restricted stock units that are forfeited prior to the vesting date. Dividends are paid out in cash at the vest date on restricted stock units, except for performance shares which do not earn dividends. Since the rights to dividends are forfeitable, there is no impact on basic earnings per share calculations. Weighted average restricted stock unit shares outstanding are included in the computation of diluted earnings per share.

Performance Shares

Beginning in 2008, the Company grants certain members of executive management performance shares on an annual basis. The performance criteria, which were modified in 2010, are designed to focus management attention on three key factors that create long-term stockholder value: Organic Sales Volume Growth, Return on Invested Capital and sales from new products. The number of shares of 3M common stock that could actually be delivered at the end of the three-year performance period may be anywhere from 0% to 200% of each performance share granted, depending on the performance of the Company during such performance period. Non-substantive vesting requires that expense for the performance shares be recognized over one or three years depending on when each individual became a 3M executive. The first performance shares, which were granted in 2008, were distributed in 2011. Performance shares do not accrue dividends during the performance period. Therefore, the grant date fair value is determined by reducing the closing stock price on the date of grant by the net present value of dividends during the performance period. As a result of the significant uncertainty due to the economic crisis of 2008-2009, the Company granted restricted stock units instead of performance shares in 2009. Therefore, since there were no performance shares in 2009, there were also no related distributions in 2012. Performance share grants resumed in 2010 and continued thereafter.

The following table summarizes performance share activity during the twelve months ended December 31, 2012:

| | 2012 | | 2011 | | 2010 | |
|-------------------------|------------------|--|------------------|--|------------------|--|
| | Number of Awards | Weighted Average Grant Date Fair Value | Number of Awards | Weighted Average Grant Date Fair Value | Number of Awards | Weighted Average Grant Date Fair Value |
| Undistributed balance — | | | | | | |
| As of January 1 | 878,872 | \$ 78.55 | 760,645 | \$ 73.99 | — | \$ — |
| Granted | 467,531 | 81.55 | 415,024 | 84.58 | 370,575 | 74.46 |
| Distributed | — | — | (206,410) | 72.77 | — | — |
| Performance change | (178,838) | 81.27 | (39,323) | 82.10 | 396,390 | 73.55 |
| Forfeited | (78,481) | 80.21 | (51,064) | 80.20 | (6,320) | 73.92 |
| As of December 31 | 1,089,084 | \$ 79.27 | 878,872 | \$ 78.55 | 760,645 | \$ 73.99 |

As of December 31, 2012, there was \$11 million of compensation expense that has yet to be recognized related to performance shares. This expense is expected to be recognized over the remaining weighted-average earnings period of 11 months. There were no performance shares distributed or related tax benefits realized during the twelve months ended December 31, 2012 and 2010. For the twelve months ended December 31, 2011, the total fair value of performance shares that were distributed was \$18 million and actual tax benefits realized for the tax deductions related to the distribution of performance shares was \$5 million.

General Employees' Stock Purchase Plan (GESPP):

In May 2012, shareholders approved an additional 30 million shares for issuance under the Company's GESPP, increasing the number of approved shares to 60 million shares. Substantially all employees are eligible to participate in the plan. Participants are granted options at 85% of market value at the date of grant. There are no GESPP shares under option at the beginning or end of each year because options are granted on the first business day and exercised on the last business day of the same month.

General Employees' Stock Purchase Plan

| | 2012 | | 2011 | | 2010 | |
|--|-------------|---------------------------------|-------------|---------------------------------|-------------|---------------------------------|
| | Shares | Weighted Average Exercise Price | Shares | Weighted Average Exercise Price | Shares | Weighted Average Exercise Price |
| Options granted | 1,455,545 | \$ 75.32 | 1,433,609 | \$ 73.67 | 1,325,579 | \$ 70.57 |
| Options exercised | (1,455,545) | 75.32 | (1,433,609) | 73.67 | (1,325,579) | 70.57 |
| Shares available for grant -- December 31 | 31,445,207 | | 2,900,751 | | 4,334,360 | |

The weighted-average fair value per option granted during 2012, 2011 and 2010 was \$13.29, \$13.00 and \$12.45, respectively. The fair value of GESPP options was based on the 15% purchase price discount. The Company recognized compensation expense for GESPP options of \$19 million in 2012, \$19 million in 2011 and \$17 million in 2010.

NOTE 15. Business Segments

3M's businesses are organized, managed and internally grouped into segments based on differences in markets, products, technologies and services. In 2012, 3M managed its operations in six operating business segments: Industrial and Transportation; Health Care; Consumer and Office; Safety, Security and Protection Services; Display and Graphics; and Electro and Communications. 3M's six business segments bring together common or related 3M technologies, enhancing the development of innovative products and services and providing for efficient sharing of business resources. These segments have worldwide responsibility for virtually all 3M product lines. 3M is not dependent on any single product/service or market. Transactions among reportable segments are recorded at cost. 3M is an integrated enterprise characterized by substantial intersegment cooperation, cost allocations and inventory transfers. Therefore, management does not represent that these segments, if operated independently, would report the operating income information shown. The difference between operating income and pre-tax income relates to interest income and interest expense, which are not allocated to business segments.

Consistent with 3M's strategy of building relevance and presence in the marketplace, the Company announced in October 2012 that it was immediately beginning to align resources and management toward a new structure comprised of five business groups: Consumer; Industrial; Health Care; Safety and Graphics; and Electronics and Energy. The company's operating results were managed on the basis of its existing segment structure through 2012, with the intention that results be managed under the new alignment once it is fully effective in the first quarter of 2013. As a result, the business segment information that follows is reported under the existing segment structure through 2012.

Business Segment Products

| Business Segment | Major Products |
|--|--|
| Industrial and Transportation | Tapes, coated and nonwoven abrasives, adhesives, specialty materials, filtration products, closure systems for personal hygiene products, acoustic systems products, automotive components, abrasion-resistant films, structural adhesives and paint finishing and detailing products, energy control products |
| Health Care | Medical and surgical supplies, skin health and infection prevention products, drug delivery systems, dental and orthodontic products, health information systems and food safety products |
| Consumer and Office | Sponges, scouring pads, high-performance cloths, consumer and office tapes, repositionable notes, indexing systems, construction and home improvement products, home care products, protective material products, and consumer and office tapes and adhesives |
| Safety, Security and Protection Services | Personal protection products, safety and security products, commercial cleaning and protection products, floor matting, roofing granules for asphalt shingles, infrastructure protection products, and track and trace solutions |
| Display and Graphics | Optical films solutions for electronic displays, reflective sheeting for transportation safety, commercial graphics systems, and mobile interactive solutions, including mobile display technology, visual systems and computer screen films |
| Electro and Communications | Packaging and interconnection devices, insulating and splicing solutions for the electronics, telecommunications and electrical industries, and touch screens and touch monitors |

Corporate and unallocated operating income includes a variety of miscellaneous items, such as corporate investment gains and losses, certain derivative gains and losses, certain insurance-related gains and losses, certain litigation and environmental expenses, corporate restructuring charges and certain under- or over-absorbed costs (e.g. pension, stock-based compensation) that the Company may choose not to allocate directly to its business segments. Because this category includes a variety of miscellaneous items, it is subject to fluctuation on a quarterly and annual basis.

3M business segment reporting measures include dual credit to business segments for certain U.S. sales and related operating income. Management evaluates each of its six operating business segments based on net sales and operating income performance, including dual credit U.S. reporting to further incentivize U.S. sales growth. As a result, 3M provides additional ("dual") credit to those business segments selling products in the U.S. to an external customer when that segment is not the primary seller of the product. For example, certain respirators are primarily sold by the Occupational Health and Environmental Safety Division within the Safety, Security and Protection Services business segment; however, the Industrial and Transportation business segment also sells this product to certain customers in its U.S. markets. In this example, the non-primary selling segment (Industrial and Transportation) would also receive credit for the associated net sales it initiated and the related approximate operating income. The assigned operating income related to dual credit activity may differ from operating income that would result from actual costs associated with such sales. The offset to the dual credit business segment reporting is reflected as a reconciling item entitled "Elimination of Dual Credit," such that sales and operating income for the U.S. in total are unchanged.

NOTE 16. Geographic Areas

Geographic area information is used by the Company as a secondary performance measure to manage its businesses. Export sales and certain income and expense items are generally reported within the geographic area where the final sales to 3M customers are made.

| (Millions) | Net Sales | | | Operating Income | | | Property, Plant and Equipment - net | |
|--------------------------------|-----------|-----------|-----------|------------------|----------|----------|-------------------------------------|----------|

NOTE 17. Quarterly Data (Unaudited)

| (Millions, except per-share amounts) 2012 | First Quarter | Second Quarter | Third Quarter | Fourth Quarter | Year 2012 |
|--|------------------|-------------------|------------------|-------------------|--------------|
| Net sales | \$ 7,486 | \$ 7,534 | \$ 7,497 | \$ 7,387 | \$ 29,904 |
| Cost of sales | 3,889 | 3,870 | 3,935 | 3,991 | 15,685 |
| Net income including noncontrolling interest | 1,141 | 1,186 | 1,180 | 1,004 | 4,511 |
| Net income attributable to 3M | 1,125 | 1,167 | 1,161 | 991 | 4,444 |
| Earnings per share attributable to 3M common shareholders - basic | 1.61 | 1.68 | 1.68 | 1.43 | 6.40 |
| Earnings per share attributable to 3M common shareholders - diluted | 1.59 | 1.66 | 1.65 | 1.41 | 6.32 |

| (Millions, except per-share amounts) 2011 | First Quarter | Second Quarter | Third Quarter | Fourth Quarter | Year 2011 |
|--|------------------|-------------------|------------------|-------------------|--------------|
| Net sales | \$ 7,311 | \$ 7,680 | \$ 7,531 | \$ 7,089 | \$ 29,611 |
| Cost of sales | 3,802 | 4,040 | 4,027 | 3,824 | 15,693 |
| Net income including noncontrolling interest | 1,103 | 1,177 | 1,103 | 974 | 4,357 |
| Net income attributable to 3M | 1,081 | 1,160 | 1,088 | 954 | 4,283 |
| Earnings per share attributable to 3M common shareholders - basic | 1.52 | 1.63 | 1.54 | 1.36 | 6.05 |
| Earnings per share attributable to 3M common shareholders - diluted | 1.49 | 1.60 | 1.52 | 1.35 | 5.96 |

Gross profit is calculated as net sales minus cost of sales.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

a. The Company carried out an evaluation, under the supervision and with the participation of its management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's "disclosure controls and procedures" (as defined in the Exchange Act Rule 13a-15(e)) as of the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective.

b. The Company's management is responsible for establishing and maintaining an adequate system of internal control over financial reporting, as defined in the Exchange Act Rule 13a-15(f). Management conducted an assessment of the Company's internal control over financial reporting based on the framework established by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control — Integrated Framework*. Based on the assessment, management concluded that, as of December 31, 2012, the Company's internal control over financial reporting is effective. Management's assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2012 excluded Ceradyne, Inc., which was acquired by the Company in November 2012 in a purchase business combination. Ceradyne, Inc. is a wholly-owned subsidiary of the Company whose total assets and total net sales represented less than 5% of consolidated total assets and less than 1% of consolidated net sales, respectively, of the Company as of and for the year ended December 31, 2012. As permitted by guidelines established by the Securities and Exchange Commission, companies are allowed to exclude certain acquisitions from their assessment of internal control over financial reporting during the first year of an acquisition while integrating the acquired company. The Company's internal control over financial reporting as of December 31, 2012 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included herein, which expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2012.

c. There was no change in the Company's internal control over financial reporting that occurred during the Company's most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

The Company is implementing an enterprise resource planning ("ERP") system on a worldwide basis, which is expected to improve the efficiency of certain financial and related transaction processes. The gradual implementation is expected to occur in phases over the next several years. The implementation of a worldwide ERP system will likely affect the processes that constitute our internal control over financial reporting and will require testing for effectiveness.

The Company completed implementation with respect to elements of certain processes/sub-processes in limited subsidiaries/locations and will continue to roll-out the ERP system over the next several years. As with any new information technology application we implement, this application, along with the internal controls over financial reporting included in this process, was appropriately considered within the testing for effectiveness with respect to the implementation in these instances. We concluded, as part of our evaluation described in the above paragraphs, that the implementation of ERP in these circumstances has not materially affected our internal control over financial reporting.

Item 9B. Other Information.

None.

PART III

Documents Incorporated by Reference

In response to Part III, Items 10, 11, 12, 13 and 14, parts of the Company's definitive proxy statement (to be filed pursuant to Regulation 14A within 120 days after Registrant's fiscal year-end of December 31, 2012) for its annual meeting to be held on May 14, 2013, are incorporated by reference in this Form 10-K.

Item 10. Directors, Executive Officers and Corporate Governance.

The information relating to directors and nominees of 3M is set forth under the caption "Proposal No. 1" in 3M's proxy statement for its annual meeting of stockholders to be held on May 14, 2013 ("3M Proxy Statement") and is incorporated by reference herein. Information about executive officers is included in Item 1 of this Annual Report on Form 10-K. The information required by Items 405, 407(c)(3), (d)(4) and (d)(5) of Regulation S-K is contained under the captions "Section 16(a) Beneficial Ownership Reporting Compliance," "Governance of the Company — Director Nomination Process," "Board and Committee Membership — Audit Committee" of the 3M Proxy Statement and such information is incorporated by reference herein.

Code of Ethics. All of our employees, including our Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer and Controller, are required to abide by 3M's long-standing business conduct policies to ensure that our business is conducted in a consistently legal and ethical manner. 3M has posted the text of such code of ethics on its website (<http://www.3M.com/businessconduct>). At the same website, any future amendments to the code of ethics will also be posted. Any person may request a copy of the code of ethics, at no cost, by writing to us at the following address:

3M Company
3M Center, Building 220-11W-09
St. Paul, MN 55144-1000
Attention: Vice President, Compliance and Business Conduct

Item 11. Executive Compensation.

The information required by Item 402 of Regulation S-K is contained under the captions "Executive Compensation" (excluding the information under the caption "— Compensation Committee Report") and "Director Compensation and Stock Ownership Guidelines" of the 3M Proxy Statement. Such information is incorporated by reference.

The information required by Items 407(e)(4) and (e)(5) of Regulation S-K is contained under the captions "Compensation Committee Interlocks and Insider Participation" and "Executive Compensation — Compensation Committee Report" of the 3M Proxy Statement. Such information (other than the Compensation Committee Report, which shall not be deemed to be "filed") is incorporated by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The information relating to security ownership of certain beneficial owners and management is set forth under the designation "Information on Stock Ownership of Directors and Executive Officers" and "Security Ownership of More Than 5 Percent Stockholders" in the 3M Proxy Statement and such information is incorporated by reference herein.

Equity compensation plans information as of December 31, 2012 follows:

Equity Compensation Plans Information (1)

| <u>Plan Category</u> | <u>A</u> <u>Number of securities to be issued upon exercise of outstanding options, warrants and rights</u> | <u>B</u> <u>Weighted-average exercise price of outstanding options, warrants and rights</u> | <u>C</u> <u>Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (A))</u> |
|--|--|--|--|
| Equity compensation plans approved by security holders | | | |
| Stock options | 56,565,030 | \$ 80.33 | — |
| Restricted stock units | 3,261,562 | | — |
| Performance shares | 1,089,084 | | — |
| Non-employee director deferred stock units | 216,494 | | — |
| Total | <u>61,132,170</u> | | <u>48,786,751</u> |
| Employee stock purchase plan | — | | <u>31,445,207</u> |
| Subtotal | <u>61,132,170</u> | | <u>80,231,958</u> |
| Total | <u>61,132,170</u> | | <u>80,231,958</u> |

(1) In column B, the weighted-average exercise price is only applicable to stock options. In column C, the number of securities remaining available for future issuance for stock options, restricted stock units, and stock awards for non-employee directors is approved in total and not individually with respect to these items.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

With respect to certain relationships and related transactions as set forth in Item 404 of Regulation S-K, no matters require disclosure with respect to transactions with related persons. The information required by Item 404(b) and Item 407(a) of Regulation S-K is contained under the captions "Governance of the Company — Related Person Transaction Policy and Procedures" and "Governance of the Company — Director Independence" of the 3M Proxy Statement and such information is incorporated by reference herein.

Item 14. Principal Accounting Fees and Services.

The information relating to principal accounting fees and services is set forth under the designation "Fees of the Independent Registered Public Accounting Firm" and "Audit Committee Policy on Pre-Approval of Audit and Permissible Non-Audit Services of the Independent Registered Public Accounting Firm" in the 3M Proxy Statement and such information is incorporated by reference herein.

PART IV

Item 15. Exhibits, Financial Statement Schedules.

(a) (1) Financial Statements. The consolidated financial statements filed as part of this report are listed in the index to financial statements on page 43 as follows:

| | <u>Page Number</u> |
|---|--------------------|
| Report of Independent Registered Public Accounting Firm | 45 |
| Consolidated Statement of Income for the years ended December 31, 2012, 2011 and 2010 | 46 |
| Consolidated Statement of Comprehensive Income for the years ended December 31, 2012, 2011 and 2010 | 47 |
| Consolidated Balance Sheet at December 31, 2012 and 2011 | 48 |
| Consolidated Statement of Changes in Equity for the years ended December 31, 2012, 2011 and 2010 | 49-50 |
| Consolidated Statement of Cash Flows for the years ended December 31, 2012, 2011 and 2010 | 51 |
| Notes to Consolidated Financial Statements | 52-117 |

(a) (2) Financial Statement Schedules. Financial statement schedules are omitted because of the absence of the conditions under which they are required or because the required information is included in the Consolidated Financial Statements or the notes thereto. The financial statements of unconsolidated subsidiaries are omitted because, considered in the aggregate, they would not constitute a significant subsidiary.

(a) (3) Exhibits. The exhibits are either filed with this report or incorporated by reference into this report. Exhibit numbers 10.1 through 10.37 are management contracts or compensatory plans or arrangements. See (b) Exhibits, which follow.

(b) Exhibits.

Index to Exhibits:

- (3) Articles of Incorporation and bylaws:
 - (3.1) Certificate of incorporation, as amended as of May 11, 2007, is incorporated by reference from our Form 8-K dated May 14, 2007.
 - (3.2) Bylaws, as amended as of February 10, 2009, are incorporated by reference from our Form 8-K dated February 12, 2009.
- (4) Instruments defining the rights of security holders, including indentures:
 - (4.1) Indenture, dated as of November 17, 2000, between 3M and The Bank of New York Mellon Trust Company, N.A., as successor trustee, with respect to 3M's senior debt securities, is incorporated by reference from our Form 8-K dated December 7, 2000.
 - (4.2) First Supplemental Indenture, dated as of July 29, 2011, to Indenture dated as of November 17, 2000, between 3M and the Bank of New York Mellon Trust Company, N.A., as successor trustee, with respect to 3M's senior debt securities, is incorporated by reference from our Form 10-Q for the quarter ended June 30, 2011.
- (10) Material contracts and management compensation plans and arrangements:
 - (10.1) 3M 2008 Long-Term Incentive Plan (including amendments through February 2012) is incorporated by reference from our Proxy Statement for the 2012 Annual Meeting of Stockholders.
 - (10.2) Form of Agreement for Stock Option Grants to Executive Officers under the 3M 2008 Long-Term Incentive Plan is incorporated by reference from our Form 8-K dated May 13, 2008.
 - (10.3) Form of Stock Option Agreement for options granted to Executive Officers under the 3M 2008 Long-Term Incentive Plan, commencing February 9, 2010, is incorporated by reference from our Form 10-K for the year ended December 31, 2009.

- (10.4) Form of Restricted Stock Unit Agreement for restricted stock units granted to Executive Officers under the 3M Long-Term Incentive Plan, effective February 9, 2010, is incorporated by reference from our Form 10-K for the year ended December 31, 2009.
- (10.5) Form of 3M Performance Share Award under the 3M 2008 Long-Term Incentive Plan is incorporated by reference from our Form 8-K dated March 4, 2010.
- (10.6) Form of Stock Option Agreement for U.S. Employees under 3M 2008 Long-Term Incentive Plan is incorporated by reference from our Form 10-K for the year ended December 31, 2008.
- (10.7) Form of Restricted Stock Unit Agreement for U.S. Employees under 3M 2008 Long-Term Incentive Plan is incorporated by reference from our Form 10-K for the year ended December 31, 2008.
- (10.8) Amendment of the 3M 2005 Management Stock Ownership Program and the 3M 2008 Long-term Incentive Plan — transfer of stock options to former spouses, is incorporated by reference from our Form 10-K for the year ended December 31, 2010.
- (10.9) 3M 2005 Management Stock Ownership Program is incorporated by reference from our Proxy Statement for the 2005 Annual Meeting of Stockholders.
- (10.10) 3M 2002 Management Stock Ownership Program is incorporated by reference from our Proxy Statement for the 2002 Annual Meeting of Stockholders.
- (10.11) Amendments of 3M 2002 and 2005 Management Stock Ownership Programs are incorporated by reference from our Form 8-K dated November 14, 2008.
- (10.12) Form of award agreement for non-qualified stock options granted under the 2005 Management Stock Ownership Program, is incorporated by reference from our Form 8-K dated May 16, 2005.
- (10.13) Form of award agreement for non-qualified stock options granted under the 2002 Management Stock Ownership Program, is incorporated by reference from our Form 10-K for the year ended December 31, 2004.
- (10.14) 3M 1997 General Employees' Stock Purchase Plan, as amended through November 8, 2004, is incorporated by reference from our Form 10-K for the year ended December 31, 2004.
- (10.15) 3M Board resolution dated May 12, 2009, regarding three-year extension of 3M 1997 General Employees' Stock Purchase Plan is incorporated by reference from our Form 10-Q for the quarter ended June 30, 2009.
- (10.16) Amendment of the 3M 1997 General Employees Stock Purchase Plan approved on February 9, 2010 is incorporated by reference from our Form 10-K for the year ended December 31, 2009.
- (10.17) 3M Board resolution dated February 7, 2012 extending for three additional one-year periods the General Employees' Stock Purchase Plan, is incorporated by reference from our Form 10-K for the year ended December 31, 2011.
- (10.18) 3M 2012 Amended and Restated General Employees Stock Purchase Plan is incorporated by reference from our Proxy Statement for the 2012 Annual Meeting of Stockholders.
- (10.19) 3M VIP Excess Plan is incorporated by reference from our Form 8-K dated November 14, 2008.
- (10.20) Amendment of 3M VIP Excess Plan is incorporated by reference from our Form 8-K dated November 24, 2009.
- (10.21) 3M VIP (Voluntary Investment Plan) Plus is incorporated by reference from Registration Statement No. 333-73192 on Form S-8, filed on November 13, 2001.
- (10.22) Amendment of 3M VIP Plus is incorporated by reference from our Form 8-K dated November 14, 2008.
- (10.23) 3M Deferred Compensation Plan, as amended through February 2008, is incorporated by reference from our Form 8-K dated February 14, 2008.
- (10.24) Amendment of 3M Deferred Compensation Plan is incorporated by reference from our Form 8-K dated November 14, 2008.
- (10.25) 3M Deferred Compensation Excess Plan is incorporated by reference from our Form 10-K for the year ended December 31, 2009.
- (10.26) 3M Performance Awards Deferred Compensation Plan is incorporated by reference from our Form 10-K for the year ended December 31, 2009.
- (10.27) 3M Executive Annual Incentive Plan is incorporated by reference from our Form 8-K dated May 14, 2007.
- (10.28) Description of changes to 3M Compensation Plan for Non-Employee Directors is incorporated by reference from our Form 8-K dated August 8, 2005.
- (10.29) 3M Compensation Plan for Non-Employee Directors, as amended, through November 8, 2004, is incorporated by reference from our Form 10-K for the year ended December 31, 2004.
- (10.30) Amendment of 3M Compensation Plan for Non-Employee Directors is incorporated by reference from our Form 8-K dated November 14, 2008.
- (10.31) 3M Executive Life Insurance Plan, as amended, is incorporated by reference from our Form 10-K for the year ended December 31, 2003.

- (10.32) Summary of Personal Financial Planning Services for 3M Executives is incorporated by reference from our Form 10-K for the year ended December 31, 2003.
- (10.33) 3M policy on reimbursement of incentive payments is incorporated by reference from our Form 10-K for the year ended December 31, 2006.
- (10.34) Amended and Restated 3M Nonqualified Pension Plan I is incorporated by reference from our Form 8-K dated December 23, 2008.
- (10.35) Amended and Restated 3M Nonqualified Pension Plan II is incorporated by reference from our Form 8-K dated December 23, 2008.
- (10.36) 3M Nonqualified Pension Plan III is incorporated by reference from our Form 8-K dated November 14, 2008.
- (10.37) Policy on Reimbursement of Incentive Compensation (effective May 11, 2010) is incorporated by reference from our Form 10-Q dated August 4, 2010.
- (10.38) Amended and restated five-year credit agreement as of September 28, 2012, is incorporated by reference from our Form 8-K dated October 3, 2012.
- (10.39) Letter of credit agreement as of August 24, 2012 is incorporated by reference from our Form 8-K dated August 29, 2012.
- (10.40) Registration Rights Agreement as of August 4, 2009, between 3M Company and State Street Bank and Trust Company as Independent Fiduciary of the 3M Employee Retirement Income Plan, is incorporated by reference from our Form 8-K dated August 5, 2009.

Filed herewith, in addition to items specifically identified above:

- (12) Calculation of ratio of earnings to fixed charges.
- (21) Subsidiaries of the Registrant.
- (23) Consent of independent registered public accounting firm.
- (24) Power of attorney.
- (31.1) Certification of the Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350.
- (31.2) Certification of the Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350.
- (32.1) Certification of the Chief Executive Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350.
- (32.2) Certification of the Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350.
- (95) Mine Safety Disclosures.
- (101) The following financial information from 3M Company's Annual Report on Form 10-K for the period ended December 31, 2012, filed with the SEC on February 14, 2013, formatted in Extensible Business Reporting Language (XBRL): (i) the Consolidated Statement of Income for the years ended December 31, 2012, 2011 and 2010, (ii) the Consolidated Statement of Comprehensive Income for the years ended December 31, 2012, 2011 and 2010, (iii) the Consolidated Balance Sheet as of December 31, 2012 and 2011, (iv) the Consolidated Statement of Changes in Equity for the years ended December 31, 2012, 2011 and 2010, (v) the Consolidated Statement of Cash Flows for the years ended December 31, 2012, 2011 and 2010, and (vi) Notes to Consolidated Financial Statements.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

3M COMPANY

By /s/ David W. Meline
David W. Meline,
Senior Vice President and Chief Financial Officer
(Principal Financial Officer)
February 14, 2013

Pursuant to the requirements of the Securities Exchange Act of 1934, this report has been signed below by the following persons on behalf of the Registrant and in the capacities indicated on February 14, 2013.

| <u>Signature</u> | <u>Title</u> |
|-----------------------|--|
| Inge G. Thulin | Chairman of the Board, President and Chief Executive Officer (Principal Executive Officer and Director) |

Mail:

Wells Fargo Shareowner Services
P.O. Box 64854
St. Paul, MN 55164-0854

Dividends

Quarterly dividends on 3M common stock typically are paid on or about the 12th of March, June, September and December. 3M has paid dividends since 1916. Shareholders can reinvest dividends and make additional cash contributions through the Automatic Dividend Reinvestment Plan or have dividend payments automatically deposited into checking or savings accounts through the Electronic Dividend Deposit Service.

Stock Listings

3M's common stock trades on the New York and Chicago stock exchanges, and is also traded on the SWX Swiss Exchange. Our symbol is MMM. 3M is one of 30 companies in the Dow Jones Industrial Average and is also a component of the Standard & Poor's 500 Index.

3M stock performance (with dividend reinvestment)

The graph above compares the five-year cumulative total shareholder return for 3M common stock with that of the Standard & Poor's 500 Stock Index (S&P 500) and the Dow Jones Industrial Average (DJIA). The comparison assumes that \$100 was invested in 3M stock and the two indexes on Dec. 31, 2007, and that all quarterly dividends were reinvested.

Annual Shareholders' Meeting

3M's annual meeting of shareholders will be held on Tuesday, May 14, 2013, at 10 a.m. at RiverCentre, 175 West Kellogg Boulevard, St. Paul, Minnesota.

Shareholders of record may vote proxies via the Internet at <http://www.proxyvote.com>, by calling 1-800-690-6903, or by mail. If a broker holds your shares, please contact the broker to determine your voting options.
