HOW DOES NIELSEN HELP OUR CLIENTS?

2012 YEAR IN REVIEW

Received SEC

APR 22 2013

Washington, DC 20549

HOW AM I DOING VERSUS MY COMPETITORS?

WHAT IS MY MARKET SHARE?

WHAT PRODUCT MIX WILL MAXIMIZE MY SALES?

HOW CAN I IMPROVE MY PRICING AND PROMOTION TO DRIVE PROFITABILITY?

HOW DO I KNOW WHAT AUDIENCE I AM REACHING?

HOW DID MY ADS INFLUENCE AUDIENCES? DID THEY BUY MY PRODUCT?

WHAT IS THE VALUE OF DIGITAL ADVERTISING?

HOW CAN SOCIAL MEDIA ENHANCE AUDIENCE ENGAGEMENT?

HOW CAN I INCREASE THE ROI OF MY ADVERTISING SPEND?

Nielsen's mission is to help our clients have the most complete understanding of consumers worldwide. Our focus on the consumer provides information and insights that enable clients to make crucial business decisions every day.

With innovation at the forefront, we strive to add value for clients across both the developed and developing worlds as media is consumed in new ways and as clients enter new geographies. Our promise to our clients is to help them make faster, smarter and more confident decisions, driven by consumer foresight.

“WE WORK AT THE
INTERSECTION
OF BIG DATA AND
BIG DECISIONS.”

DAVID L. CALHOUN
CHIEF EXECUTIVE OFFICER

DEAR SHAREHOLDERS

Despite some dire predictions, the world did not end in 2012. The European Union did not unravel. The U.S. did not throw itself over the “fiscal cliff.” Certainly, we are all still adjusting to the more complicated economic environment of the past few years. But we continue to move forward, propelled by consumer demand—the most powerful financial driver in the world. That force and the remarkable efforts of our 35,000 associates made 2012, Nielsen’s 90th year providing measurement services, a successful one. Our particular success was marked by unprecedented expansion of our measurement services for the media and retail industries, and by seizing a number of important Big Data opportunities, all fueled by innovation.

Every day, seven billion consumers work, learn, eat, sleep, relax—and spend hundreds of billions of dollars buying the products and services they see featured on every screen and in every store in their daily lives. This demand will only increase in the coming years, as there will be another billion consumers by 2025—and at least two billion of the total consumer population will join the middle class, predominantly in emerging markets including China, Latin America, India and Africa.

At the same time, demand will shift, in part because nearly 500 million people are projected to move into cities in search of better opportunities in the next dozen years. By one estimate, annual household consumption in the 600 largest cities will increase by more than \$20 trillion¹ over that period—and urban consumers buy differently than rural ones. Technology is accelerating the shift in demand and will drive more information and interaction as it becomes cheaper and even more pervasive.

I've yet to meet any leader who would bet against these projections. The only strategic question we all face is how to capitalize on the opportunity presented. All of this was foreseen by Arthur C. Nielsen, Sr., who described the ultimate mission of his young company's measurement activities as "the increasing of the standard of living in the free countries of this world." We continue to embody that commitment today.

As our founder recognized, companies that understand who and where their consumers are can reach more of them more efficiently, achieving greater economies of scale and spending less on distribution. Competition intensifies and innovation flourishes. In short, consumer measurement facilitates growth.

At Nielsen today, we embrace our founder's passion as we continue to invest in creating the world's most complete picture of what consumers watch and buy. This is what we do, and we do it for more than 20,000 clients in approximately 100 countries around the world. We work on behalf of some of the most sophisticated companies on the planet, and on behalf of those, large and small, that aspire to join their ranks. We are fully committed to bringing our clients the most accurate and timely information we can generate about their consumers.

OUR CORE BUSINESSES

97% of our revenue comes from two fundamental consumer activities we call Watch and Buy.² The former serves media interests, the latter supports manufacturers and retailers. The core of each business is measuring the activity of the world's consumers. In each area, we also offer a set of analytic services designed to help our clients meet their most important challenges and seize their biggest opportunities.

Our Watch and Buy businesses are highly scalable. Both have posted growth³ during every one of the past six years including 2012, despite the ups and downs of the business cycle. The stability of these businesses reflects just how deeply Nielsen's information is embedded in our clients' ongoing operations and in their decision-making processes. Our multi-year client relationships provide us with the incentive and the flexibility to keep improving and extending our measurement activities every year. As we define and expand measurement, we consider the open-air marketplaces of Nairobi as important as the grocery stores of Main Street USA, and watching video on a tablet as important as watching TV.

We work at the intersection of Big Data and big decisions. This is crucial for clients, whether they have millions or billions in sales. Their decisions drive high-stakes investments, and must be made on the very best data available. We provide much of that data, and work with our clients to integrate it into their systems and workflows. Our teams—who are often deeply integrated into our clients' daily activities—are world class at helping them extract unique insights from giant datasets, that ultimately help them grow.

For us, Big Data starts with massive volume. We collect enormous amounts of consumer purchasing data all over the world, from all types of retailers, e-commerce providers and consumer households. We also measure how thousands of monthly and weekly changes in product offerings, pricing, promotion and marketing programs influence sales across every retailer and distribution channel. At the same time, we capture incredible data variety as we measure media consumption by millions of

2 The Expositions segment, an unparalleled collection of business-to-business trade shows and related properties, makes up the remaining 3% of the company's revenues.

3 Growth measured in constant currency.

WE MEASURE THE SALES OF FAST-MOVING CONSUMER GOODS REPRESENTED BY MORE THAN 18 MILLION PHYSICAL RETAIL LOCATIONS IN THE WORLD, FROM ROADSIDE STANDS TO BIG-BOX CHAINS. THAT NUMBER IS GROWING EVERY YEAR.

consumers across a multitude of different programs and campaigns, on platforms from broadcast to cable to digital to mobile, through devices from TV to tablets to smart phones, in dozens of countries. And we are constantly measuring the velocity of change, as content distribution becomes fragmented, as consumers shift their purchasing behavior, as rural consumers become urbanized and as changing demographics influence consumption.

But data alone isn't sufficient. Our ability to help clients unlock value from data has become even more important, as the world transitions from huge databases to high-volume streaming data that flows in real time. One estimate suggests that 90 percent of the world's existing data has been created *in the last two years*. Think about what that means for the years ahead, and the rich opportunities it will create for the companies in any industry who develop the ability to mine vast streams of information for competitive advantage.

Our experience also reminds us that Big Data isn't just about powerful computers processing lots of information. It is also about creating new data by sending people into places to measure activity where there is no point-of-service data capture. We are aggressive in using technology to drive accurate measurement. But much of the world is not even on the grid, let alone the Internet. Most of the world's population are not scanning items, surfing online, texting friends or swiping cards as they seek their next meal. No technology is present to help measure their activity, and yet that activity is becoming increasingly important to our clients, whether they are expanding in the developing markets they grew up in, or expanding into them from the developed world. We will go just about anywhere, using just about any technology, to expand our measurement reach. As a young Nielsen associate in India put it, "We aspire to be the guide of choice to the hotspots of the global bazaar."

WHAT CONSUMERS BUY

Nielsen's Buy segment represented 61% of total revenues in 2012. Our retail measurement and consumer panel services help packaged goods companies and retailers determine what consumers are buying in terms of categories, brands and products. Most of the largest companies in the global consumer packaged goods industry are longstanding Nielsen clients.

We measure the sales of fast-moving consumer goods represented by more than 18 million physical retail locations in the world, from roadside stands to big-box chains. That number is growing every year. Only Nielsen collects data in approximately 100 countries on how much of any given product is sold across many diverse distribution channels, and combines it with household panel data that captures every item brought into the home to better understand product loyalty, buying behavior and purchase influences.

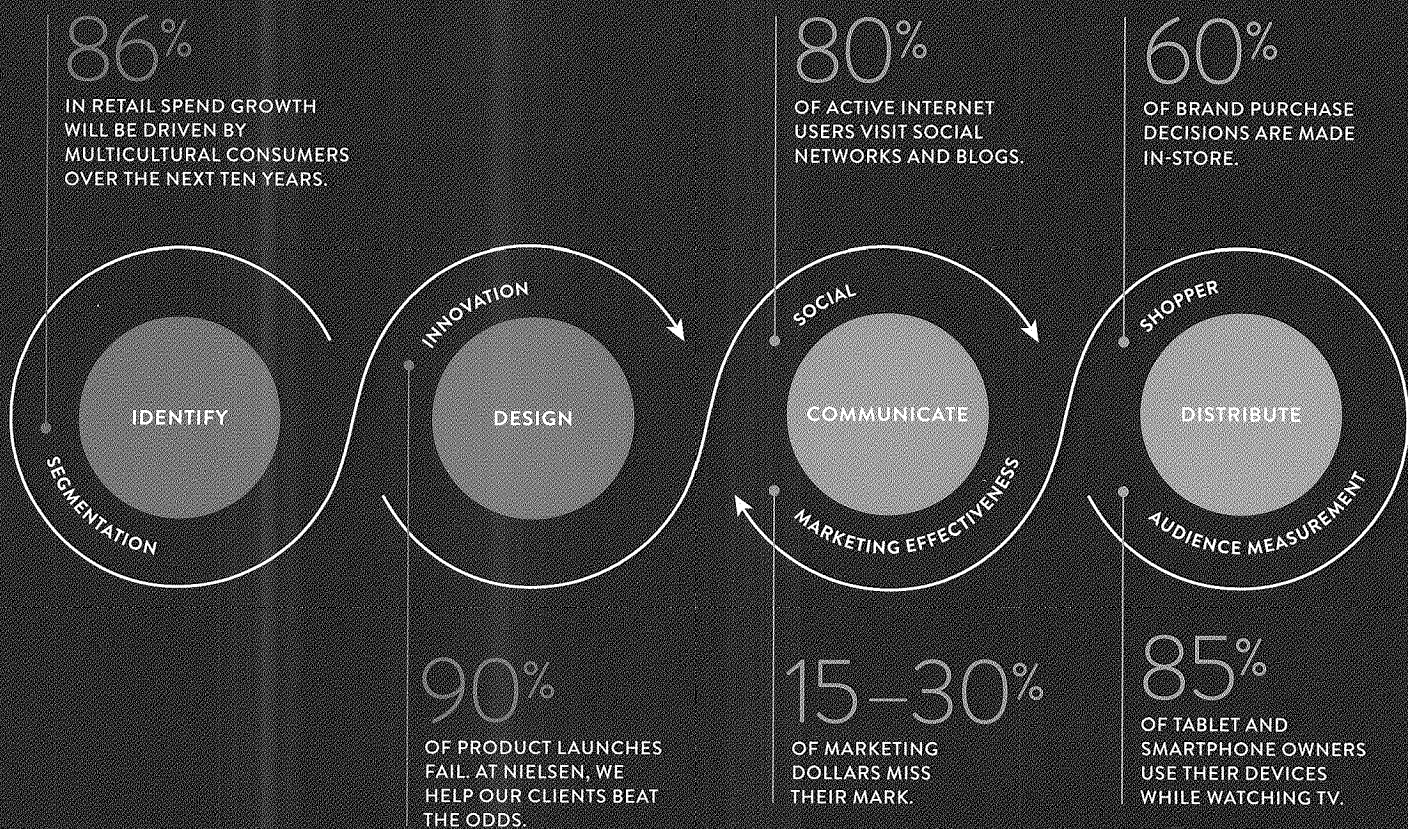

Our measurement capabilities are extensive by any assessment. But our clients constantly ask us to expand our coverage of consumer spending as they expand their own product portfolios and distribution. We are continuously building new capabilities and making additional investments to achieve this goal.

We marked many important milestones in 2012:

- Integrating sales from the world's largest retailer: We were delighted with Walmart's decision to resume sharing their retail sales information in the U.S. Walmart has transformed the global retail industry, and the industry at large will benefit from the more comprehensive view of U.S. retail sales their participation makes possible.
- Expanding our global measurement footprint: We made substantial enhancements throughout the year to our measurement of consumer shopping in China, India and Africa, to keep pace with our clients' needs in these expanding consumer markets.
- Extending our coverage into new channels: We invested to expand our measurement of online retail for fast-moving consumer goods. While e-commerce represents a small portion of our clients' sales, it is growing at a rapid pace. We are committed to continuing to invest in capturing data from this channel as it grows in strategic importance to both retailers and manufacturers.

CONSUMER INSIGHTS FOR FASTER, SMARTER AND BETTER DECISIONS

Nielsen's reach, breadth and depth of expertise help deliver consistent results to clients. We provide end-to-end consumer insights, helping clients make strategic business decisions at every step of the way. Nielsen provides effective strategies that enable clients to reach their desired consumers today as well as work to evolve these strategies and identify breakthrough opportunities to stay ahead of their competitors.

SEGMENTATION

The world is a fragmented place. Nielsen helps identify unique consumer segments that are relevant to our clients' businesses.

SOCIAL

Nielsen provides a view into the social world by tracking social media conversations that can help media companies and advertisers understand audience engagement. Social media is changing consumer behavior and we are at the forefront of providing real-time metrics to enhance marketing strategies.

SHOPPER

Understanding a shopper's path to purchase is critical to our retailer and manufacturing clients. Nielsen provides insights into not only who their shoppers are, but also what they are buying, where, when and why. We deliver actionable insights to meet the needs of consumers and improve the performance in stores, categories and brands.

INNOVATION

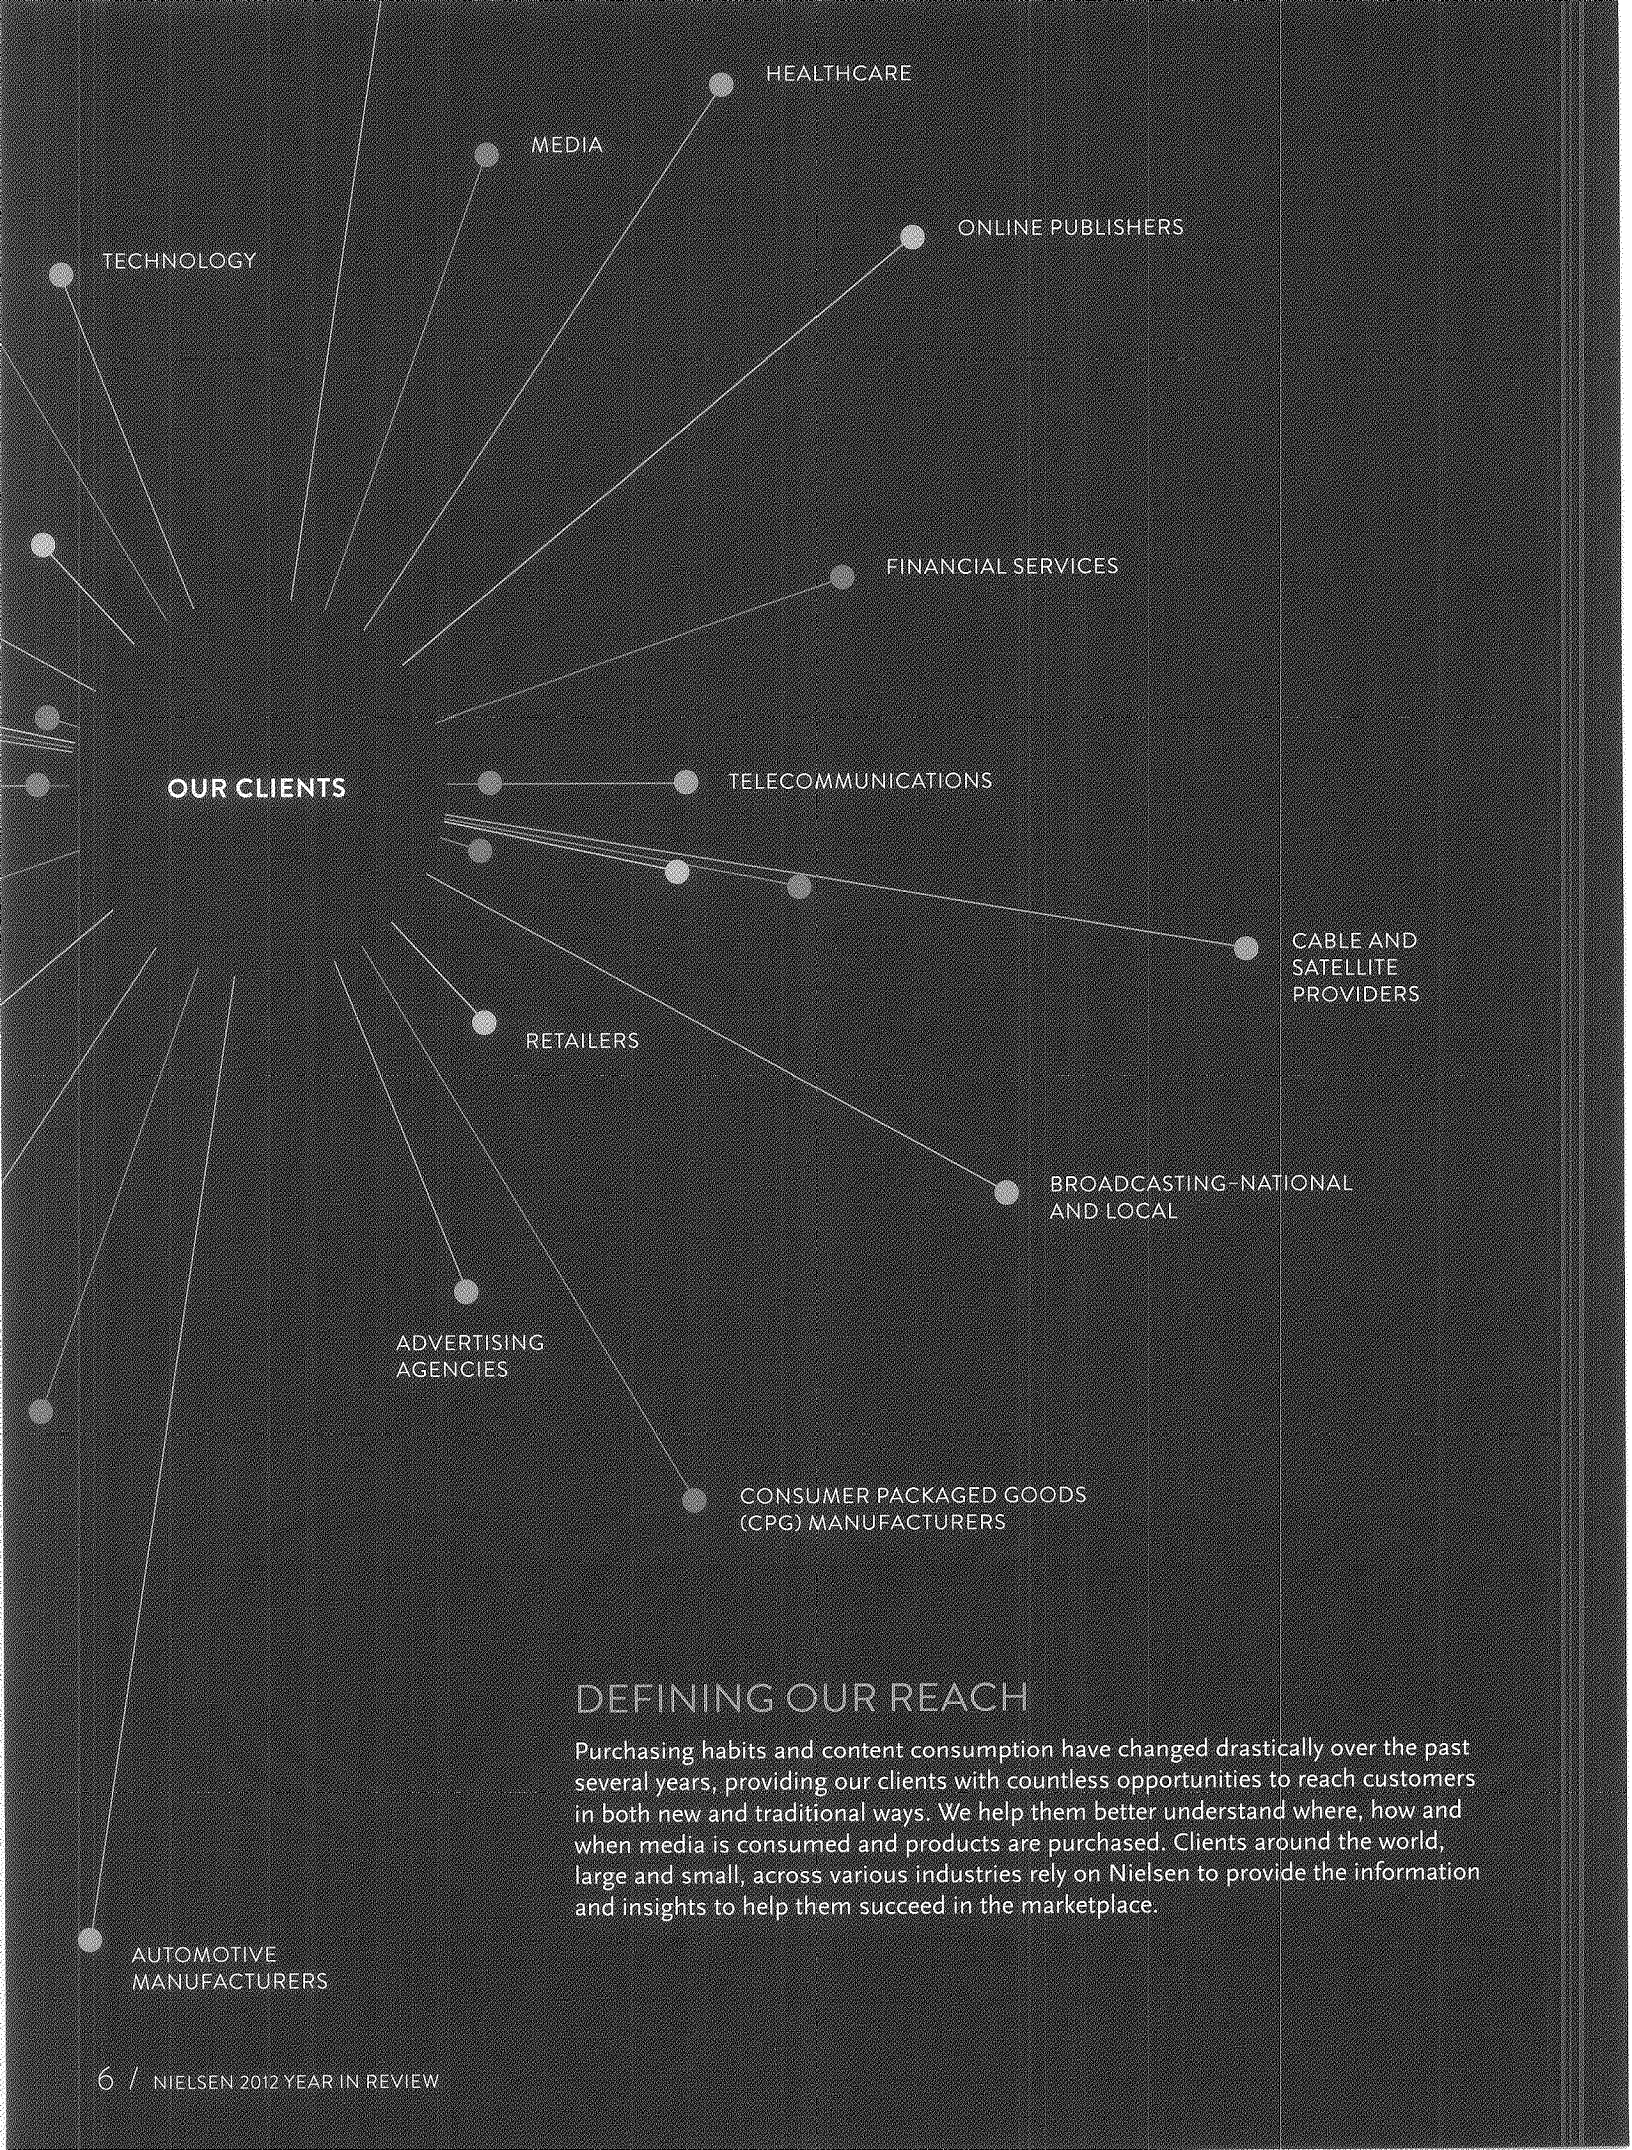

Clients rely on our ability to provide innovative approaches for successful product offerings. This not only includes insights into packaging and distribution but also a roadmap to expand offerings to meet consumer needs.

MARKETING EFFECTIVENESS

Our insights into what customers watch and buy help manufacturers, retailers and media companies prioritize advertising spend and create effective marketing plans. We help clients determine the best strategy to reach their audience to ultimately maximize return on investment (ROI).

AUDIENCE MEASUREMENT

Our audience measurement data provides a comprehensive view of how, when and where consumers are connecting with content. Clients rely on Nielsen to determine the best way to reach the right audience on the right platform.

DEFINING OUR REACH

Purchasing habits and content consumption have changed drastically over the past several years, providing our clients with countless opportunities to reach customers in both new and traditional ways. We help them better understand where, how and when media is consumed and products are purchased. Clients around the world, large and small, across various industries rely on Nielsen to provide the information and insights to help them succeed in the marketplace.

- **Creating a more detailed understanding of consumer shopping behavior:** We introduced a powerful consumer loyalty platform to U.S. retailers, with Safeway as our first client. This service, enabled by our Answers on Demand platform, provides access to billions of store transactions that can be matched to each customer segment. Retailers and manufacturers can see whether a specific product is being stocked in the right amount at the right price with the right type of promotional support to help drive loyalty for those customer segments. It also allows retailers such as Safeway to create a unique relationship with each and every one of their customers.
- **Applying neuroscience to assess consumer response:** Consumer neuroscience offers a different approach to assessing consumer responses to advertising messages and other forms of marketing. By simply measuring the brain's activities with regard to attention, emotional engagement and memory encoding, this pure form of research eliminates survey and question biases.
- **Adding category coverage:** We acquired The Perishables Group in the U.S. to add sales and market share of fresh produce, dairy and meats to a retailer's view of each store.

Measuring retail consumption may be the largest part of our Buy business, but our work providing analytical insights is also an integral part of our relationships with manufacturers and retailers. In a world where innovation is paramount, we have more than 30 years experience evaluating tens of thousands of new product concepts, helping companies make products more attractive to consumers. We also help our clients optimize the mix of product features, media spend, pricing and packaging—all to find new ways to unlock growth and deliver increased profitability to their businesses.

WHAT CONSUMERS WATCH

Nielsen's Watch segment represented 36% of total revenues in 2012. Our measurement shows that the average consumer in the U.S. engages with media six hours per day, and it informs how advertisers, agencies and media players trade billions of advertising dollars each year. We capture what consumers are watching on a range of devices in the household: televisions, computers, tablets, smartphones, gaming consoles and other entertainment devices—any way that consumers are viewing what was once called TV, better described more broadly today as *video* content.

Our major Watch clients include most of the world's leading media companies, Silicon Valley giants and startups, digital publishers and technology players. Our audience measurements of what we call *Reach*—how many people see programming and advertising and how often they see it—facilitate commerce among advertisers, agencies, content providers, distributors, publishers and advertising platforms.

The growth opportunities inherent in our Watch businesses are easy to see. Start with the explosion in video content available from thousands of distribution channels, whether it's TV broadcasters, cable networks, subscription providers, online publishers or social networks. Now multiply that increase in video content by the ever-expanding universe of devices that can access it. Our job is to measure and analyze the total consumption of media from all of the possible distribution points.

Our *Reach* activities in 2012 included a number of important milestones:

- **Expanding the breadth of our television ratings across countries:** We now provide TV audience measurement and ratings (the reach of a program and its advertising known as Gross Ratings Points or GRPs) in 32 countries, and became the preferred measurement provider in three new markets in 2012.
- **Extending our measurement of the digital world:** We extended our reach metrics with Nielsen Online Campaign Ratings, which include digital advertising audience metrics that are directly comparable to overnight television ratings. Our digital measurement services are designed to utilize the advantages of a Big Data world, incorporating census-like measurement techniques that provide an unprecedented level of accuracy in understanding consumers' digital viewing behavior.

OUR JOB IS TO MEASURE AND ANALYZE THE TOTAL CONSUMPTION OF MEDIA FROM ALL OF THE POSSIBLE DISTRIBUTION POINTS.

Publishers and other media content owners are now using these services to provide guarantees to advertisers for the online reach of video advertising. Major advertisers and their agencies are also using these new services directly to optimize their advertising spend in the U.S. and the U.K., and we plan further expansion to other markets in 2013.

- Adding the consumption of radio: In December 2012 we announced an agreement to acquire Arbitron, a leader in measuring radio audiences, which will allow us to represent an additional two hours a day that consumers engage with media—most of it in automobiles, close to stores. Pending final regulatory approval, we will be excited to welcome the Arbitron team to Nielsen during 2013.

As noted earlier, we offer our Watch clients a range of analytic services that extend beyond measuring *Reach*. We also marked important milestones in 2012 in expanding our capabilities to measure *Resonance*, which is our approach for analyzing how content influences an audience:

- Expanding our ability to measure social media impact: We acquired SocialGuide to strengthen our ability to analyze how consumers interact with social media while watching television. These capabilities support our collaboration with Twitter to develop social TV ratings, capturing the powerful link between social media activity and television engagement as advertisers seek to measure earned media in all its forms.
- Measuring the effectiveness of digital advertising: Our acquisition of Vizu allows us to help advertisers and publishers assess and optimize the effectiveness of digital advertising by analyzing its impact online in real time.

Reach and *Resonance* tell you who saw your advertising and how well it connected with them. But to determine return on investment (ROI), you must connect what people watch with what they buy. We define this as *Reaction*, which completes the 3R model we use to assess marketing investments and return for our clients.

OUR WORK IN THESE AREAS MAKES IT CLEAR THAT MAXIMIZING MARKETING ROI IS NEVER ABOUT CHOOSING ONE ADVERTISING MEDIUM OVER ANOTHER, BUT ABOUT HOW THEY WORK TOGETHER TO ACHIEVE MARKETING GOALS.

WHERE WATCH MEETS BUY

Because Nielsen measures both what consumers watch and what they buy, we have been able to pioneer ways to bring them together. Doing so allows us to measure *Reaction*—what viewers do after exposure to advertising. We consider this another Big Data opportunity: matching enormous consumer credit, debit and loyalty-card datasets with massive data streams of activity and information from our TV, digital and household purchase panels using stringent privacy protections. We can now show our clients how anonymous groups of consumers saw certain advertising campaigns and then bought the advertised goods.

This allows us to provide our clients with a comprehensive view on how marketing spend affects consumer actions, which they particularly value in a climate of proliferating marketing choices and shrinking marketing budgets. Nielsen aims to be the leader in *Reach*, *Resonance* and *Reaction*, leveraging the strength *Reach* provides to underpin our investments in more comprehensive *Resonance* and *Reaction* services. Our work in these areas makes it clear that maximizing marketing ROI is never about choosing one advertising medium over another, but about how they work together to achieve marketing goals.

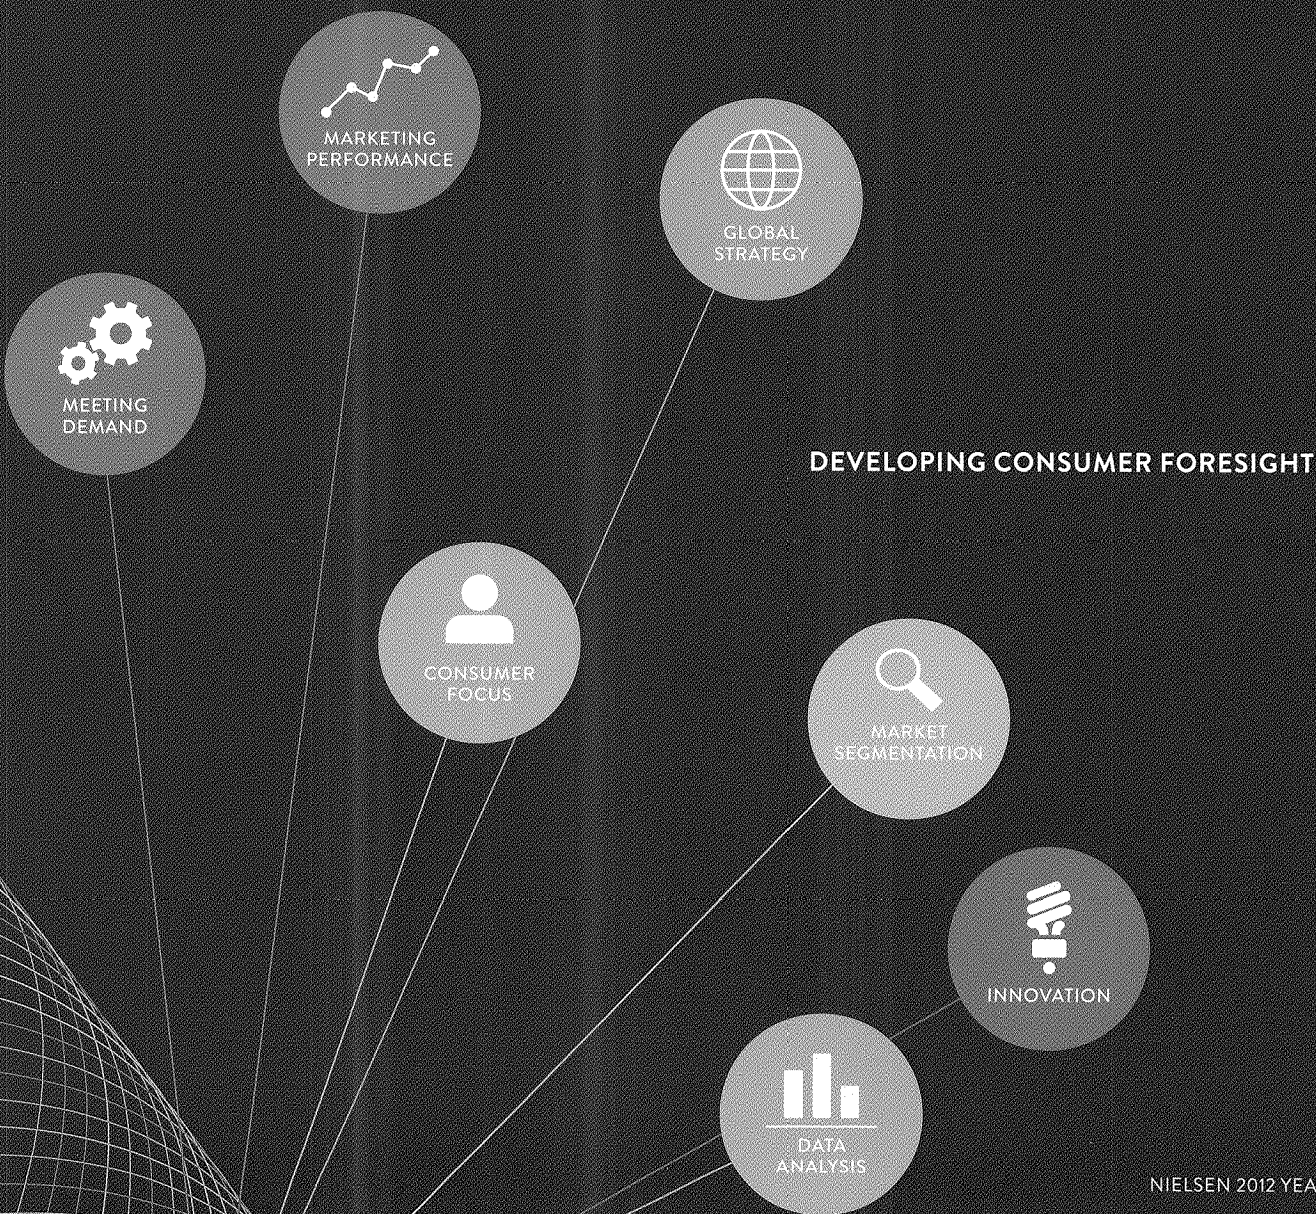

SEEING AROUND THE NEXT CORNER

Delighting our clients compels us to continually stretch our understanding of what consumers will demand — and how companies in our industry can meet that demand with innovative products, services and technologies. During 2012 we invested in several areas to nurture innovation and help enable our clients develop consumer foresight to see around the next corner.

We launched The Demand Institute, a non-profit organization jointly founded with The Conference Board. The Institute's long-term agenda is focused on how major shifts in consumer demand across countries and industries will unlock new opportunities for business and government leaders over the next decade. The first major Demand Institute project during 2012 was an in-depth look at the U.S. housing market and its impact on adjacent industries. Future work will examine other influential global consumer markets undergoing substantial evolution or reinvention.

We also invested in several new ventures that will enable us to connect a broad and vibrant network of entrepreneurs in our industry who are leading innovation in marketing and measurement ideas and technologies. These activities include a collaboration with the Stanford Graduate School of Business to spur advancements in advertising effectiveness; a joint venture funding innovations in marketing technology with the Israeli Government and other private investors; an anchor investment in an early-stage venture fund focused on commercializing marketing technology and advertising effectiveness tools; and a Singapore-based innovation hub that seeks to help clients invest for growth in new ways across Asia.

This set of strategic investments broadens our visibility into new consumer trends and opportunities across the developed and developing world, more deeply integrates Nielsen with the entrepreneurial capabilities that surround our industry, and further supports our goal of helping our clients capitalize on the future as it arrives.

FINANCIAL RESULTS

Our advances in our measurement and analytics capabilities help sustain our growth in revenue and profitability, our improved cash flow and our reduction in leverage. Full year 2012 revenues were \$5.6 billion, a 4 percent increase from 2011 on a constant currency basis. Adjusted EBITDA grew to 28.5 percent of total revenues. We also grew free cash flow by growing adjusted EBITDA and reducing our weighted average interest rate through debt repayment and refinancing. Our commitments to financial flexibility and cost leadership enable our ongoing investments for growth.

LOOKING AHEAD

Our future lies directly where our 20,000 clients are headed. The heart of our business is measuring the consumption of products universally viewed as essential by consumers in any culture: food, beverages and household products as well as media and entertainment. Today's two biggest trends of global population growth and the explosion of technology adoption will be essential to the shape of the future.

Modern consumer demand in its simplest form—the exchange of money for goods—has built up over several hundred years since the invention of the first general stores and the printing press. That consumer demand constantly changes over time as our clients invent new types of stores, new products and new ways to deliver the information we all crave for understanding our world and entertaining our minds. Change that was once described as evolution has become revolution in the digital age. Fragmentation is a common way to describe the increasing variety and velocity of challenges most industry participants face.

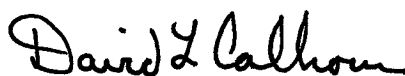

This is a world we are inspired by. Our mission demands that we keep up with consumers and measure all that they consume, through all modes of distribution, in all geographies around the world. Our clients are most interested in clarity about the rate of consumer change and in forward-looking analytics that can improve their probability of success. The world moves fast, and so must we.

.

In this digital age, where Big Data and fragmentation rule, we believe a company's values and mission provide the real keys to success. Our values represent a personal and collective commitment to being *simple*, being *open* and being *integrated* in everything we do. Beyond what we do, we must bring these values to all the great people with whom we interact: clients, partners, all members of the value chain, our communities, our shareholders and, most importantly, each other. These values are hard to achieve. Just like the consumers we measure, who strive for a better life every day, our pursuit of a more values-driven culture will sustain us in a way numerical measures alone never could.

As we look ahead, it is our team of 35,000 associates that ultimately provides us with unwavering confidence in our future. The kernels of many of our best ideas come from young people who join Nielsen as we build our businesses in vast, developing countries, reinforcing why our top priority and most important investment every year is leadership and talent development. We know if we get that right, everything else is achievable. Just as consumers know no limits, neither will Nielsen.

All of us who represent Nielsen are proud of what we accomplished together in 2012, and we look forward to helping our clients around the world achieve even greater success in 2013 and beyond.

(a) Adjusted EBITDA is not a presentation made in accordance with GAAP. We use Adjusted EBITDA to consistently measure our performance from period to period both at the consolidated level as well as within our operating segments, to evaluate and fund incentive compensation programs and to compare our results to those of our competitors.

(b) The net debt leverage ratio is defined as net debt (gross debt less cash and cash equivalents) as of the balance sheet date divided by Adjusted EBITDA for the twelve months then ended.

(c) Non-operating expense for twelve months ended December 31 reflects debt extinguishment/pre-payment charges of \$121 million in 2012 and \$231 million in 2011.

(d) Other items primarily consist of Sponsor Advisory Fees (including termination payments of \$102 million for the full year ended December 31, 2011), and costs related to public offering and other transaction-related fees.

WHAT CONSUMERS BUY

Nielsen's Buy segment provides consumer packaged goods manufacturers and retailers with the most comprehensive view of their consumers and their market activity. Operating in over 100 countries, we provide clients with measurement and analytics to enhance media, pricing and promotion strategies, optimize product innovation and performance and understand consumer shopping and purchase behaviors to win in the marketplace. Our long-lasting customer relationships demonstrate our ability to identify economic opportunity for clients and help drive growth while maximizing return on marketing investments.

ASSORTMENT

Nielsen helps manufacturing clients find growth opportunities for their brands and product categories. We deliver insights on consumer response to changes in product assortment and analyze the incremental value of new products introduced into a particular category. We help clients optimize their product portfolio mix to manage shelf space and increase sales volume.

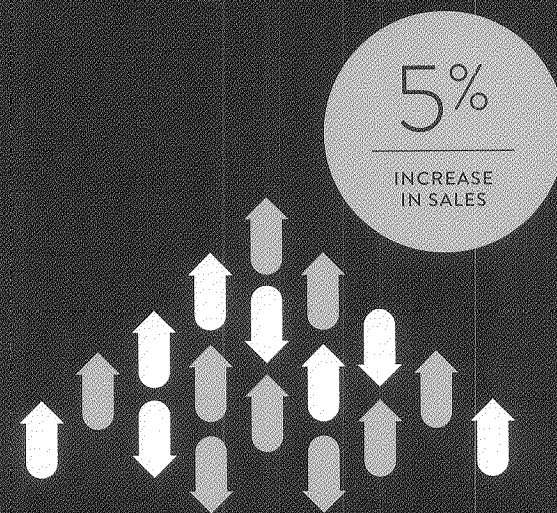

CASE STUDY

WHAT IS THE RIGHT PRODUCT MIX TO MAXIMIZE MY SALES?

A leader in the consumer packaged goods industry was faced with the issue of limited shelf space at many retailers due to new entrants to the category. The client wanted to grow its line of frozen food entrées without increasing its SKU count.

Nielsen conducted an extensive study of the category and helped identify products that contributed most to the brand's overall profitability.

- The client eliminated several SKUs from the store shelves and increased distribution of new products that complemented other offerings within the line.
- These changes in product portfolio expanded the client's reach into new customer segments and our insights helped increase their credibility with retailers and channel partners.

RESULTS: Increased sales by up to 5% in the designated retailers, without increasing its total SKU count. The product portfolio also surpassed its main competitors in sales dollars, volume and sales velocity.

PRICING AND PROMOTION

Nielsen helps clients enhance their brands' growth by determining the right pricing and implementing the optimal in-store promotions to achieve sales and profit goals. We evaluate shopper spending habits, using a store-level modeling approach to help clients calculate the true net effect of promotions and optimize allocation of promotion spend. We help clients succeed with insights that help improve margins for their product portfolios while using pricing strategies to drive volume.

CASE STUDY

HOW CAN I DETERMINE THE EFFECTIVENESS OF IN-STORE PROMOTIONS AND DISPLAYS?

A multinational beverage company utilized Nielsen's store audit capabilities to analyze the impact of in-store promotions and displays within their category across a wide range of retailers.

Nielsen conducted analyses of the beverage line across hundreds of stores over a six-week period in a region selected by the client.

- The study determined that pricing variances within their category and across competitors created challenges in this market.
- Different uses of in-store promotions and displays were driving different outcomes.

RESULTS. Implementing a combination of demos and displays in stores increased the client's sales by 18% vs. 6% in display-only retailers.

WHAT CONSUMERS WATCH

Nielsen's Watch segment helps media and advertising clients better understand their audiences. As consumption of media is rapidly evolving and fragmenting, Nielsen provides innovative solutions that help clients improve advertising and media plans in real time. We provide audience measurement, advertising effectiveness and analytical insights for television, digital, mobile and social activity, to help clients achieve their business objectives.

MARKETING PERFORMANCE (ROI)

Nielsen's in-depth knowledge of what consumers buy and watch positions us to help clients understand the effectiveness of an advertising campaign. We deliver insights on reach, resonance and reaction for television, digital, mobile and social media. Advertisers gain a deeper understanding of how much and which part of their advertising dollars are working. That enables our clients to optimize marketing spend and go-to-market plans to drive profitable growth.

REACH

Who did the program or ad reach?

RESONANCE

Did it change attitudes?

REACTION

Did it change behavior?

REACH

HOW CAN I ADJUST MY ADVERTISING CAMPAIGN TO REACH MY TARGET CONSUMER?

A large beverage company used Nielsen Online Campaign Ratings to understand its campaign's true audience delivery and optimize the campaign in real time. The client discovered that only 16% of campaign impressions were reaching the intended audience, and took steps identified in collaboration with Nielsen to improve campaign effectiveness.

- Secured better placements from underperforming publishers to improve audience delivery.
- Optimized the campaign by reallocating impressions from lower to higher performing sites.

RESULTS: Increased on-target impressions to 41% of the campaign, driving higher performance without incremental spend.

RESONANCE

DID MY ADS INFLUENCE MY AUDIENCE'S OPINION OF MY BRAND?

A personal care brand ran a campaign to drive awareness for a new hair care product line. The client wanted to better understand how their campaign was influencing the viewer's opinions about the product. Nielsen provided the solution to measure and optimize brand lift in real time.

Using Nielsen Online Brand Effect, the client was able to view brand lift performance and its drivers for each of the creative components as the campaign was executed.

- The higher performing creative was driving 60% of the brand lift while the lowest performing creative was not providing any brand lift.
- The client immediately identified an opportunity to improve performance in-flight by reallocating impressions to the higher performing creative units.

RESULTS: The modified campaign improved brand awareness by 53% and increased the impact of their media spend by \$100K+.

REACTION

DID MY ADVERTISING CAMPAIGN DRIVE SALES?

A large consumer products company invested in a broad scale digital campaign targeted to reach males age 21-29. The client ran a mix of banner advertisements, online video and interactive media on multiple sites. The client wanted to determine how their campaign influenced consumer behavior.

- Nielsen tagged the digital advertisements using Nielsen Online Campaign Ratings to understand how many of the impressions reached the desired audience.
- The sales lift was measured through off-line purchase panels among people who were exposed to the ad versus those who were not exposed.

RESULTS: Determined that the campaign delivered +22% sales lift among those exposed to the advertisements. Based on that insight, the client reallocated advertising spend to the higher performing ad formats and sites to achieve optimal impact on sales volumes.

EXPOSITIONS

Nielsen Expositions is a leading organizer of business-to-business tradeshows, serving various industries including apparel, sports, jewelry and design. Through publications, trade shows and conferences, and digital products and services, Nielsen Expositions offers insight, analysis and face-to-face contacts to help professionals better understand their markets, serve their customers and grow their businesses.

Nielsen believes corporate sustainability is an opportunity to maximize our impact on the communities we live in and that we represent to our clients. Our commitment to our communities and our clients is advanced in three primary ways:

- Being a responsible supplier across environmental, social and economic dimensions
- Collaborating around key causes
- Providing marketing analytics that help clients validate and optimize their own corporate social responsibility efforts

MAKING AN ENVIRONMENTAL, SOCIAL AND ECONOMIC IMPACT

Every day, Nielsen empowers its global associates to lead and participate in projects that make a positive impact in their communities.

OUR CORE BUSINESS

We create products that make an uncommon impact and align our business interests with positive environmental, social and economic results.

We are making operational and cultural changes that reduce our environmental impact around the world: greening our travel, our offices and our supply chain.

IN-KIND GIVING

We donate our services to organizations whose missions bring about positive change in our communities and who can make different uses of the information and analytics we provide.

SKILLS-BASED VOLUNTEERING

As a global measurement provider, we identify opportunities for our employees to lend their unique skill sets to not-for-profit and community organizations, while serving as ambassadors for our brand.

FINANCIAL CONTRIBUTIONS

On a limited basis, we contribute financially to relevant causes and encourage employees to donate as well, especially during natural disasters.

Nielsen associates are focused on making a positive social impact through the causes we know most about:

ENVIRONMENT

HUNGER & NUTRITION

TECHNOLOGY ACCESS

EDUCATION

DIVERSITY & INCLUSION

GLOBAL IMPACT DAY

On June 14, 2012 we held our first global day of volunteering. In our inaugural year, more than 17,000 Nielsen associates from 80 countries stepped outside of our offices to make an impact on a scale that few companies can do. We created a library in Brazil, repaired roofs in Egypt, taught classes in nearly every country and fed the sick and malnourished in some of the most struggling places around the world.

FOCUS ON DIVERSITY AND INCLUSION

Nielsen's business is built upon increased understanding and inclusion of diverse communities everywhere we operate. We work on behalf of clients and industries, and in our own business practices. Through our Diversity & Inclusion efforts, we embrace the voices and choices of diverse people and communities via a five-prong approach: Accountability, Supplier Diversity, Retention, Career Development and Education. Specifically, our Corporate Supplier Diversity Initiative provides economic development opportunities for certified minority- and women-owned businesses, and is critical to Nielsen's success.

MEASURING IMPACT

How do we help clients measure the impact of their cause marketing efforts on their brands?

Recently we began supporting some of our largest clients by helping them evaluate and optimize their cause marketing efforts. By strengthening the ROI of social investments, we can help brands validate and improve their efforts to make an impact.

For example, in 2012 we worked with a major consumer packaged goods company to measure the impact of a hunger relief program in the United States. We supported this client's efforts by measuring:

CONSUMER EXPOSURES

Who did the campaign reach across paid and earned media?

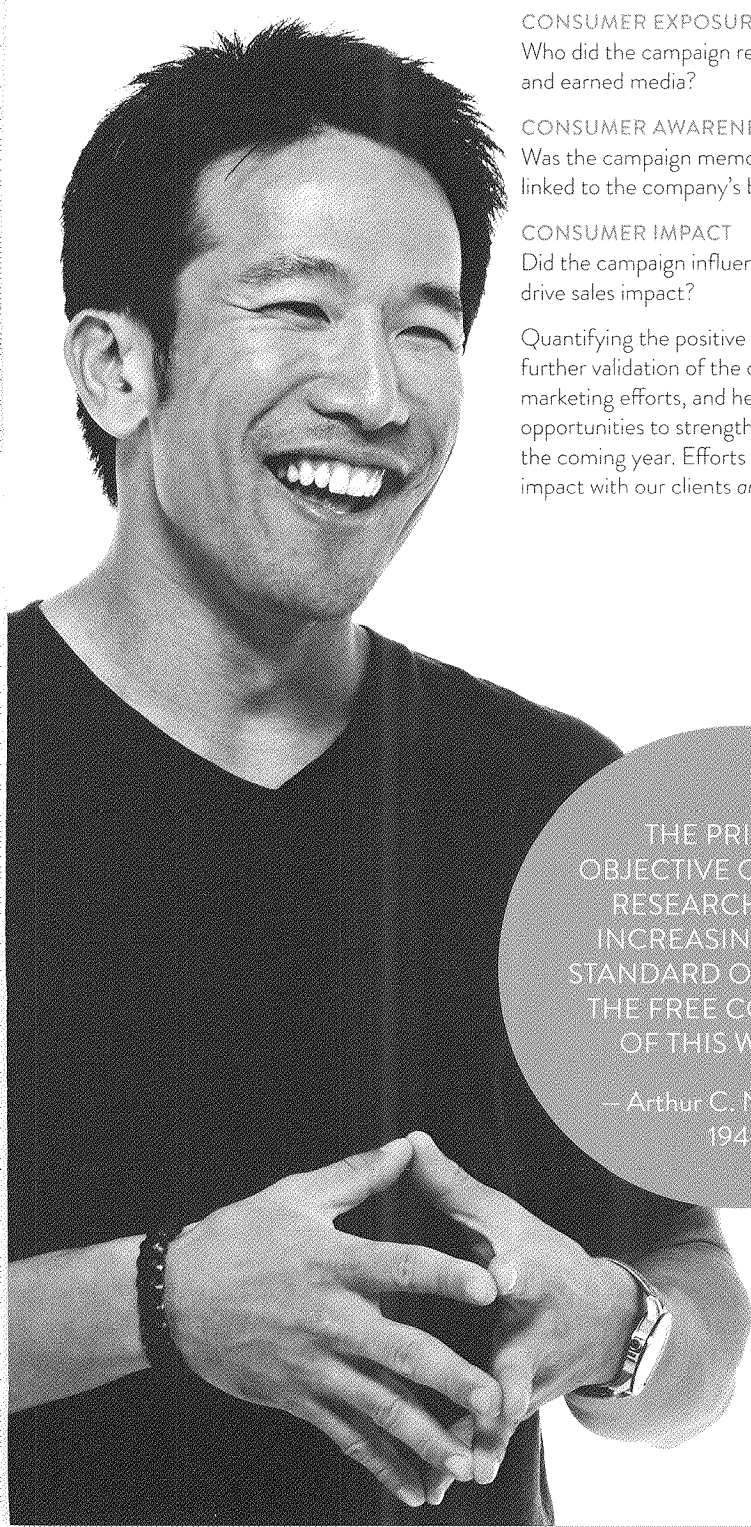

CONSUMER AWARENESS AND LINKAGE

Was the campaign memorable and strongly linked to the company's brands?

CONSUMER IMPACT

Did the campaign influence behaviors and drive sales impact?

Quantifying the positive results provided further validation of the company's cause marketing efforts, and helped them identify opportunities to strengthen the program in the coming year. Efforts such as this make an impact with our clients *and* our communities.

THE PRIMARY
OBJECTIVE OF MARKET
RESEARCH IS "THE
INCREASING OF THE
STANDARD OF LIVING IN
THE FREE COUNTRIES
OF THIS WORLD."

— Arthur C. Nielsen, Sr.,
1940

SOME OF OUR GLOBAL PARTNERS INCLUDE:

A BILLION + CHANGE

In 2012, Nielsen joined a group of prominent U.S. companies committed to pro bono work in a campaign called A Billion + Change, a national campaign to mobilize billions of dollars of pro bono and skills-based service in 2013 to address core issues our communities face across the country and around the world. As a global measurement company we focused on providing organizations with information unique to Nielsen, such as data on food pricing and new research on after school STEM (Science, Technology, Engineering and Math) education programs.

A BILLION
+ Change

JUNIOR ACHIEVEMENT WORLDWIDE

Junior Achievement Worldwide (JA Worldwide) is a global organization dedicated to educating young people about workforce readiness, financial literacy and entrepreneurship. In 2012, Nielsen associates donated their professional skills, working with JA Worldwide in classrooms across 13 countries to reach approximately 8,000 students. We are proud to support JA Worldwide's mission to inspire and prepare young people to succeed in a global economy.

JA Worldwide®

THE WORLD FOOD PROGRAMME

Nielsen began its relationship with the World Food Programme in 2011. We continue to support its marketing and research objectives with our unique information assets and global consumer understanding to help the organization achieve its goal of ending hunger in our lifetimes.

The terms “Company,” “Nielsen,” “we,” “our” or “us,” as used herein, refer to Nielsen Holdings N.V. and our consolidated subsidiaries unless otherwise stated or indicated by context. The term “TNC B.V.,” as used herein, refers to The Nielsen Company B.V., the principal subsidiary of Nielsen.

CAUTIONARY STATEMENT REGARDING FORWARD LOOKING STATEMENTS

This Annual Report on Form 10-K includes forward-looking statements. These forward-looking statements generally can be identified by the use of words such as “anticipate,” “expect,” “plan,” “could,” “may,” “will,” “believe,” “estimate,” “forecast,” “project” and other words of similar meaning. Such statements are not guarantees of future performance, events or results and involve potential risks and uncertainties. These forward-looking statements are based on our current plans and expectations and are subject to a number of known and unknown uncertainties and risks, many of which are beyond our control, which could significantly affect current plans and expectations and our future financial position and results of operations. These factors include, but are not limited to:

- the timing and scope of technological advances;
- consolidation in our customers’ industries that may reduce the aggregate demand for our services and put pricing pressure on us;
- customer procurement strategies that could put additional pricing pressure on us;
- general economic conditions, including the effects of the current economic environment on advertising spending levels, the costs of, and demand for, consumer packaged goods, media, entertainment and technology products and any interest rate or exchange rate fluctuations;
- goodwill and other intangible asset impairments;
- our substantial indebtedness;
- certain covenants in our debt documents and our ability to comply with such covenants;
- regulatory review by governmental agencies that oversee information gathering and changes in data protection laws;
- the ability to maintain the confidentiality of our proprietary information gathering processes and intellectual property;
- intellectual property infringement claims by third parties;
- risks to which our international operations are exposed, including local political and economic conditions, the effects of foreign currency fluctuations and the ability to comply with local laws and the ability to comply with applicable anti-bribery and economic sanctions laws;
- criticism of our audience measurement services;
- the ability to attract and retain customers, key personnel and sample participants;
- the effect of disruptions to our information processing systems;
- the effect of disruptions in the mail, telecommunication infrastructure and/or air services;
- the impact of tax planning initiatives and resolution of audits of prior tax years;
- future litigation or government investigations;
- the possibility that the Sponsors’ (defined herein) interests will conflict with ours or yours;
- the impact of competition;
- the financial statement impact of changes in generally accepted accounting principles; and
- the ability to successfully integrate our Company in accordance with our strategy and success of our joint ventures.

We caution you that the foregoing list of important factors may not contain all of the material factors that are important to you. In addition, in light of these risks and uncertainties, the matters referred to in the forward-looking statements contained in this annual report on Form 10-K may not in fact occur or may prove to be materially different from the expectations expressed or implied by these forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statement as a result of new information, future events or otherwise, except as otherwise required by law.

PART I

Item 1. Business.

Background and Business Overview

We are a leading global information and measurement company that provides clients with a comprehensive understanding of consumers and consumer behavior. We deliver critical media and marketing information, analytics and industry expertise about what consumers buy and what consumers watch (consumer interaction with television, online and mobile) on a global and local basis. Our information, insights and solutions help our clients maintain and strengthen their market positions and identify opportunities for profitable growth. We have a presence in approximately 100 countries, including many developing and emerging markets, and hold leading market positions in many of our services and geographies. Based on the strength of the Nielsen brand, our scale and the breadth and depth of our solutions, we believe we are the global leader in measuring and analyzing consumer behavior in the segments in which we operate.

We help our clients enhance their interactions with consumers and make critical business decisions that we believe positively affect our clients' sales. Our data and analytics solutions, which have been developed through substantial investment over many decades, are deeply embedded into our clients' workflow as demonstrated by our long-term client relationships, multi-year contracts and high contract renewal rates. The average length of relationship with our top ten clients, which include The Coca-Cola Company, NBC Universal, Nestle S.A., News Corp., The Procter & Gamble Company and the Unilever Group, is more than 30 years. Typically, before the start of each year, nearly 70% of our annual revenue has been committed under contracts in our combined Buy and Watch segments.

We align our business into three reporting segments, the principal two of which are what consumers buy (consumer purchasing measurement and analytics herein referred to as "Buy") and what consumers watch (media audience measurement and analytics herein referred to as "Watch"). Our Buy and Watch segments, which together generated approximately 97% of our revenues in 2012, are built on an extensive foundation of proprietary data assets designed to yield essential insights for our clients to successfully measure, analyze and grow their businesses. The information from our Buy and Watch segments, when brought together, can deliver powerful insights into the effectiveness of advertising by linking media consumption trends with consumer purchasing data to better understand how media exposure drives purchase behavior. We believe these integrated insights will better enable our clients to enhance the return on investment of their advertising and marketing spending.

Our Buy segment provides retail transactional measurement data, consumer behavior information and analytics primarily to businesses in the consumer packaged goods industry. According to Euromonitor International, global consumer spending in the product categories we measure was over \$7.0 trillion in 2009. Our extensive database of retail and consumer information, combined with our advanced analytical capabilities, helps generate strategic insights that influence our clients' key business decisions. We track billions of sales transactions per month in retail outlets in approximately 100 countries around the world and our data is used by our clients to measure their sales and market share. We are the only company offering such extensive global coverage for the collection, provision and analysis of this information for consumer packaged goods. Our Buy services also enable our clients to better manage their brands, uncover new sources of demand, launch and grow new services, analyze their sales, improve their marketing mix and establish more effective consumer relationships. Within our Buy segment, we have two primary geographic groups, developed and developing markets. Developed markets primarily include the United States, Canada, Western Europe, Japan and Australia while developing markets include Africa, Latin America, Eastern Europe, Russia, China, India and Southeast Asia. Our Buy segment represented approximately 61% of our total revenues in 2012.

Our Watch segment provides viewership data and analytics primarily to the media and advertising industries across television, online and mobile screens. According to ZenithOptimedia, a leading global media services agency, total global spending on advertising across television, online and mobile platforms was at least \$267 billion in 2011. Our Watch data is used by our media clients to understand their audiences, establish the value of their

advertising inventory and maximize the value of their content, and by our advertising clients to plan and optimize their spending. Within our Watch segment, our ratings are the primary metrics used to determine the value of programming and advertising in the U.S. total television advertising marketplace, which was approximately \$76 billion in 2011 according to a report by Veronis Suhler Stevenson. In addition to the United States, we measure television viewing in 32 other countries. We also measure markets that account for approximately 75% of global internet users and offer mobile measurement services in 16 countries, including the United States, where we are the market leader. Our Watch segment represented approximately 36% of our total revenue in 2012.

Our Expositions segment operates one of the largest portfolios of business-to-business trade shows and conference events in the United States. Each year, we produce more than 60 trade shows and conference events, which in 2012 connected over 335,000 buyers and sellers across 9 diversified and vibrant end markets. Our Expositions segment represented approximately 3% of our total revenue in 2012.

Our Company was founded in 1923 by Arthur C. Nielsen, Sr., who invented an approach to measuring competitive sales results that made the concept of “market share” a practical management tool. For nearly 90 years, we have advanced the practice of market research and media audience measurement to provide our clients a better understanding of their consumers. Our Company, incorporated in the Netherlands, was purchased on May 24, 2006 by a consortium of private equity firms (AlpInvest Partners, The Blackstone Group, The Carlyle Group, Hellman & Friedman, Kohlberg Kravis Roberts & Co. and Thomas H. Lee Partners, the “Original Sponsors,” and together with subsequent investor Centerview Partners, the “Sponsors”). Subsequently, David Calhoun was appointed Chief Executive Officer. Mr. Calhoun has repositioned the Company and focused on building an open, simple and integrated operating model to drive innovation and deliver greater value to our clients. In January 2011, our Company consummated an initial public offering of our common stock and our shares trade on the New York Stock Exchange under the symbol “NLSN”.

Services and Solutions

What Consumers Buy

Our Buy segment provides retail transactional measurement data, consumer behavior information and analytics primarily to businesses in the consumer packaged goods industry. This segment is organized into two areas: Information, which provides retail scanner and consumer panel-based measurement, and Insights, which provides a broad range of analytics. For the year ended December 31, 2012, revenues from our Buy segment represented approximately 61% of our consolidated revenue. This segment has historically generated stable revenue streams that are characterized by multi-year contracts and high contract renewal rates. At the beginning of each year, approximately 60% of the segment’s revenue base for the upcoming year is typically committed under existing agreements. Our top five Buy segment clients represented approximately 23% of our Buy segment revenue for the year ended December 31, 2012 and the average length of relationship with these same clients is over 30 years. No single client accounted for 10% or more of our Buy segment revenue in 2012.

Information: Retail Measurement Services

We are a global leader in retail measurement services. Our purchasing data provides market share, competitive sales volumes, and insights into such activities as distribution, pricing, merchandising and promotion. By combining this detailed information with our in-house expertise and professional consultative services, we produce valuable insights that help our clients improve their marketing and sales decisions and grow their market share.

Depending on the sophistication of each country’s retailer systems, we collect retail sales information from stores using electronic point-of-sale technology and/or teams of local field auditors. Stores within our worldwide retail network include grocery, drug, convenience and discount retailers, who, through various cooperation arrangements, share their sales data with us. The electronic retail sales information collected by stores through checkout scanners is transmitted directly to us. In certain developing markets where electronic retail sales information is unavailable, we utilize field auditors to collect information through in-store inventory and price checks. For all information we collect, our quality control systems validate and confirm the source data. The data

is then processed into databases that clients access using our proprietary software that allows them to query the information, conduct customized analysis and generate reports and alerts.

Information: Consumer Panel Measurement

We conduct consumer panels around the world that help our clients understand consumer purchasing dynamics at the household level. Among other things, this information offers insight into shopper behavior such as trial and repeat purchase for new products and likely substitutes, as well as customer segmentation. In addition, our panel data augments our retail measurement information in circumstances where we do not collect data from certain retailers.

Our consumer panels collect data from approximately 250,000 household panelists across 26 countries who use in-home scanners to record purchases from each shopping trip. In the United States, for example, approximately 100,000 selected households, constituting a demographically balanced sample, participate in the panels. Data received from household panels undergo a quality control process including UPC verification and validation, before being processed into databases and reports. Clients may access these databases to perform analyses.

Insights: Analytical Services

Utilizing our foundation of consumer purchasing information, we provide a wide and growing selection of consumer intelligence and analytical services that help clients make smarter business decisions throughout their product development and marketing cycles. We draw actionable insights from our retail and consumer panel measurement data sets, our online behavioral information, as well as a variety of other proprietary data sets.

We use consumer trends and comprehensive data analysis to advise our clients across their innovation process and apply a demand-driven approach to identify unmet consumer needs so they can develop breakthrough products. We use intelligence from comprehensive retail and consumer data analysis to inform client decisions on marketing spend for media, price, promotion and assortment. We help clients influence purchase decisions that shoppers make whether pre-store, in-store or online, and provide insights on how to market effectively along a shopper's path to purchase. We also help clients drive profitable growth using demand-driven strategies that close the gap between consumer demand and sales, aligning what people want to what people buy.

What Consumers Watch

Our Watch segment provides viewership data and analytics primarily to the media and advertising industries for television, online and mobile devices. For the year ended December 31, 2012, revenues from our Watch segment represented approximately 36% of our consolidated revenue. This segment has historically generated stable revenue streams that are characterized by multi-year contracts and high contract renewal rates. At the beginning of each year, approximately 90% of the segment's revenue base for the upcoming year is typically committed under existing agreements. Our top five clients represented 30% of segment revenue for the year ended December 31, 2012 and the average length of relationship with these same clients is more than 30 years. No customer accounted for 10% or more of our Watch segment revenue in 2012.

Television Audience Measurement Services

We are the global leader in television audience measurement. In the United States, which is by far the world's largest market for television programming, broadcasters and cable networks use our television audience ratings as the primary currency to establish the value of their airtime and more effectively schedule and promote their programming. Advertisers use this information to plan television advertising campaigns, evaluate the effectiveness of their commercial messages and negotiate advertising rates.

We provide two principal television ratings services in the United States: measurement of national television audiences and measurement of local television audiences in all 210 designated local television markets. We use various methods to collect the data from households including electronic meters, which provide minute-by-minute viewing information for next day consumption by our clients, and written diaries. These methods enable us to collect not only television device viewing data but also the demographics of the audience (*i.e.*, who in the household is watching), from which we calculate statistically reliable and accurate estimates of total television viewership. We have made significant investments over decades to build an infrastructure that can accurately and efficiently track television audience viewing, a process that has become increasingly complex as the industry has converted to digital transmission and integrated new technologies allowing for developments such as time-shifted viewing.

Our measurement techniques are constantly evolving to account for new television viewing behavior, increased fragmentation and new media technologies. For example, to help advertisers and programmers understand time-shifted viewing behavior, we created the “C3” ratings, which is a measure of how many people watch programming and commercials during live and time-shifted viewing up to three days after the program aired. The C3 rating has become the primary metric for buying and selling advertising on national broadcast television. We are expanding our television audience measurement to incorporate viewing of video-on-demand and from connected devices such as gaming consoles. We are developing and testing ways to measure how consumers watch video on tablets and other devices, to help advertising and programmers incorporate this viewing behavior into their programming and advertising plans. In the U.S., we utilize a single-source TV and PC panel to provide information to clients about simultaneous usage of more than one screen (e.g. if a consumer uses Facebook while watching a TV program), unduplicated reach (*i.e.* total audience net of duplication across platforms), cause and effect analysis (e.g. if a TV advertisement spurs a consumer to view a specific website online) and program viewing behavior (e.g. what platforms consumers use to view certain programming). We are working with Twitter to establish a measurement of consumer interaction with television programming and social media to address the growing interest in social TV among advertisers and media players.

We measure television viewing in 32 countries outside the United States, including Australia, Indonesia, Italy and South Korea. The international television audience measurement industry operates on a different model than in the United States. In many international markets, a joint industry committee of broadcasters in each individual country selects a single official audience measurement provider, which is designated the “currency” through an organized bidding process that is typically revisited every several years. We have strong relationships in these countries and see a significant opportunity to expand our presence into additional countries around the world.

Digital Audience Measurement Services

We are a global provider of digital media and market research, audience analytics and social media measurement. We employ a variety of measurement offerings to provide online publishers, internet and media companies, marketers and retailers with metrics to better understand the behavior of online audiences. Our online measurement services have a presence in more than 40 countries including the United States, South Korea and Brazil – markets that account for approximately almost 75% of global internet users. Through a combination of patented panel and census data collection methods, we monitor and measure the internet surfing, online buying and video viewing (including television content) of digital audiences. We provide critical advertising metrics such as audience demographics, page and ad views, and time spent. Through our social media monitoring capabilities, 50 million new social media messages are collected every day from more than 30 countries in 15 languages, representing a 30% year over year growth in data collection. As newer forms of digital media such as video advertising, social media and applications become a greater proportion of consumer behavior, we are transitioning our portfolio of online services, including discontinuation of certain legacy services in certain markets and the launch of other services, to address the evolving requirements of measuring digital audiences and better serve our clients.

Mobile Measurement Services

We provide independent measurement and consumer research for telecom and media companies in the mobile telecommunications industry. Clients, principally mobile carriers and device manufacturers, rely upon our data to make consumer marketing, competitive strategy and resource allocation decisions. In the United States, our metrics are a leading indicator for market share, customer satisfaction, device share, service quality, revenue share, content audience and other key performance indicators. We also benchmark the end-to-end consumer experience to pinpoint problem areas in the service delivery chain, track key performance metrics for mobile devices and identify key market opportunities (*e.g.*, demand tracking for device features and services). To address the rapid growth of mobile internet consumption, we are expanding our capabilities to capture internet, video and other media on mobile devices. As mobile adoption continues globally, there is an opportunity for us to measure media and data content on mobile devices worldwide and to incorporate mobile measurement into a more comprehensive view of consumer media behavior. We offer mobile measurement services in 30 countries worldwide, including the United States, where we are a leader in the nascent market for mobile audience measurement, and are focused on expanding our presence in other markets.

Advertiser Solutions

We provide a range of solutions to major advertisers, whether they are consumer packaged goods manufacturers, retailers, media companies, or other verticals such as automotive, telecom or financial services, to help validate and optimize their advertising spend. We quantify the effectiveness of advertising by reporting behavioral observations, attitudinal changes and actual offline purchase activity. We offer services specific to television, digital and social marketing to determine “resonance” or impact of specific campaigns, by measuring objectives such as breakthrough, brand recall, purchase intent and effect on product and brand loyalty. These services can also help clients determine which elements of their advertising campaigns are more or less effective, including frequency of repetition, length of commercial and context. As part of these efforts, we collect and analyze more than 20 million surveys annually to provide important insights on television and online advertising and content effectiveness.

We also combine intelligence on what consumers watch and buy to inform client decisions on their advertising spend. We integrate data from our Buy segment and other third party sources including our Nielsen Catalina Solutions joint venture, with Watch data on audience exposure to help assess the effect of an advertising campaign on purchase activity. We believe these and other offerings of consumer behavior data and marketing insights can provide value to advertisers as well as media content owners and distributors, and help these clients answer some of their most important marketing questions.

Expositions

In our Expositions segment, we operate one of the largest portfolios of business-to-business trade shows and conference events in the United States. Each year, we produce more than 60 trade shows and conference events, which in 2012 connected approximately 335,000 buyers and sellers across 9 diversified and vibrant end markets. Our leading events include the Hospitality Design Conference and Expo, the Kitchen/Bath Industry Show, the ASD Merchandise Shows, the JA International Jewelry Summer and Winter Shows and the Interbike International Bike Show and Expo. For the year ended December 31, 2012, revenues from our Expositions segment represented approximately 3% of our consolidated revenue.

Competitive Advantages

We are faced with a number of competitors in the markets in which we operate. Some of our competitors in each market may have substantially greater financial marketing and other resources than we do and may benefit from other competitive advantages. See “ – Competitive Landscape” and “Risk Factors – We face competition, which could adversely affect our business, financial condition, results of operations and cash flow.”

Notwithstanding the challenges presented by the competitive landscape, we believe that we have several competitive advantages, including the following:

Global Scale and Brand. We provide a breadth of information and insights about the consumer in approximately 100 countries. In our Buy segment, we track billions of sales transactions per month in retail outlets in approximately 100 countries around the world. We also have approximately 250,000 household panelists across 26 countries. In our Watch segment, our ratings are the primary metrics used to determine the value of programming and advertising in the U.S. total television advertising marketplace, which was approximately \$76 billion in 2011 according to Veronis Suhler Stevenson. We believe our footprint, neutrality, credibility and leading market positions will continue to contribute to our long-term growth and strong operating margins as the number and role of multinational companies expands. Our scale is supported by our global brand, which is defined by the original Nielsen code created by our founder, Arthur C. Nielsen, Sr.: impartiality, thoroughness, accuracy, integrity, economy, price, delivery and service.

Strong, Diversified Client Relationships. Many of the world’s largest brands rely on us as their information and analytics provider to create value for their business. We maintain long-standing relationships and multi-year contracts with high renewal rates due to the value of the services and solutions we provide. In our Buy segment, our clients include the largest consumer packaged goods and merchandising companies in the world such as The Coca-Cola Company, Kraft Foods and The Procter & Gamble Company, as well as leading retail chains such as Carrefour, Kroger, Safeway, Tesco, Walgreens, Wal-Mart Stores. In our Watch segment, our client base includes leading broadcast, cable and internet companies such as CBS, Disney/ABC, Facebook, Google, Microsoft, NBC Universal/Comcast, News Corp., Time Warner, Twitter, Univision and Yahoo!; leading advertising agencies such as WPP, IPG, Omnicom, and Publicis; leading telecom companies such as AT&T, Verizon, Vodafone, and Nokia; and leading automotive companies such as Chrysler, Ford and Toyota. The average length of relationship with our top 10 clients across both our Buy and Watch segments is more than 30 years. In addition, due to our growing presence in developing markets, we have cultivated strong relationships with local market leaders that can benefit from our services as they expand globally. Our strong client relationships provide both a foundation for recurring revenues as well as a platform for growth.

Enhanced Data Assets and Measurement Science. Our extensive portfolio of transactional and consumer behavioral data across our Buy and Watch segments enables us to provide critical information to our clients. For decades, we have employed advanced measurement methodologies that yield statistically accurate information about consumer behavior while having due regard for their privacy. Our particular expertise in panel measurement includes a proven methodology to create statistically accurate research insights that are fully representative of designated audiences. This expertise is a distinct advantage as we extrapolate more precise insights from emerging large-scale census databases to provide greater granularity and segmentation for our clients. We continue to enhance our core competency in measurement science by improving research approaches and investing in new methodologies. We have also invested significantly in our data architecture to enable the integration of distinct large-scale census data sets including those owned by third parties. We believe that our expertise, established standards and increasingly granular and comprehensive data assets provide us with a distinct advantage as we deliver more precise insights to our clients.

Innovation. We have focused on innovation to deepen our capabilities, expand in new and emerging forms of measurement, enhance our analytical offerings and capitalize on industry trends. For example, we are investing in advanced delivery technologies to extend the value of the full suite of our data assets for our clients. We have further enhanced our information and analytics delivery platform, Nielsen Answers on Demand, to

enable the management of consumer loyalty programs for retailers. The 2012 expansion of our Nielsen Campaign Ratings service provides “reach” metrics for TV and digital campaign ratings, and can offer advertisers and media companies a unique measurement of unduplicated audiences for their advertising and programming across television and online viewing.

Scalable Operating Model. Our global presence and operating model allow us to scale our services and solutions rapidly and efficiently. We have a long track record of establishing leading services that can be quickly expanded across clients, markets and geographies. Our global operations and technology organization enables us to achieve faster, higher quality outcomes for clients in a cost-efficient manner. Our flexible architecture allows us to incorporate leading third-party technologies as well as data from external sources, and enables our clients to use our technology and solutions on their own technology platforms. In addition, we work with leading technology partners such as IBM, Tata Consultancy Services and TIBCO, which allows for greater quality in client offerings and efficiency in our global operations.

Industry Trends

We believe companies, including our clients, require an increasing amount of data and analytics to set strategy and direct operations. This has resulted in a large market for business information and insight which we believe will continue to grow. Our clients are media, advertising and consumer packaged goods companies in the large and growing markets. We believe that significant economic, technological, demographic and competitive trends facing consumers and our clients will provide a competitive advantage to our business and enable us to capture a greater share of our significant market opportunity. We may not be able to realize these opportunities if these trends do not continue or if we are otherwise unable to execute our strategies. See “Risk Factors – We may be unable to adapt to significant technological change which could adversely affect our business” and “Risk Factors – Our international operations are exposed to risks which could impede growth in the future.”

Developing markets present significant expansion opportunities. Brand marketers are focused on attracting new consumers in developing countries as a result of the fast-paced population growth of the middle class in these regions. In addition, the retail trade in these markets is quickly evolving from small, local formats toward larger, more modern formats with electronic points of sale, a similar evolution to what occurred in developed markets over the last several decades. We provide established measurement methodologies to help give consumer packaged goods companies, retailers and media companies an accurate understanding of local consumers to allow them to harness growing consumer buying power in fast growing markets like Brazil, Russia, India and China.

Demographic shifts and changes in spending behavior are altering the consumer landscape. Consumer demographics and related trends are constantly evolving globally, leading to changes in consumer preferences and the relative size and buying power of major consumer groups. Shifts in population size, age, racial composition, family size and relative wealth are causing marketers continuously to re-evaluate and reprioritize their consumer marketing strategies. We track and interpret consumer demographics that help enable our clients to engage more effectively with their existing consumers as well as forge new relationships with emerging segments of the population.

The media landscape is dynamic and changing. Consumers are rapidly changing their media consumption patterns. The growing availability of the Internet, and the proliferation of new formats and channels such as mobile devices, social networks and other forms of user-generated media have led to an increasingly fragmented consumer base that is more difficult to measure and analyze. In addition, simultaneous usage of more than one screen is becoming a regular aspect of daily consumer media consumption. We have effectively measured and tracked media consumption through numerous cycles in the industry’s evolution – from broadcast to cable, from analog to digital, from offline to online and from live to time-shifted. We believe our distinct ability to provide audience measurement and metrics across television, online and mobile platforms helps clients better understand, adapt to and profit from the continued transformation of the global media landscape.

Consumers are more connected, informed and in control. Today, more than three-quarters of the world's homes have access to television, there are more than 2.4 billion internet users around the globe, and approximately three-fourths of the world's population has access to a mobile phone. Advances in technology have given consumers a greater level of control of when, where and how they consume information and interact with media and brands. They can compare products and prices instantaneously and have new avenues to learn about, engage with and purchase products and services. These shifts in behavior create significant complexities for our clients. Our broad portfolio of information and insights enables our clients to engage consumers with more impact and efficiency, influence consumer purchasing decisions and actively participate in and shape conversations about their brands.

Increasing amounts of consumer information are leading to new marketing approaches. The advent of the internet and other digital platforms has created rapid growth in consumer data that is expected to intensify as more entertainment and commerce are delivered across these platforms. As a result, companies are looking for real-time access to more granular levels of data to understand growth opportunities more quickly and more precisely. This presents a significant opportunity for us to work with companies to effectively manage, integrate and analyze large amounts of information and extract meaningful insights that allow marketers to generate profitable growth.

Consumers are looking for greater value. Economic and social trends have spurred consumers to seek greater value in what they buy as exemplified by the rising demand for "private label" (store branded) products. For instance, in the United States, the absolute dollar share for private label consumer packaged goods increased more than \$15 billion during 2009 and 2012. This increased focus on value is causing manufacturers, retailers and media companies to re-evaluate brand positioning, pricing and loyalty. We believe companies will increasingly look to our broad range of consumer purchasing insights and analytics to more precisely and effectively measure consumer behavior and target their products and marketing offers at the right place and at the right price.

Our Growth Strategy

We believe we are well-positioned for growth worldwide and have a multi-faceted strategy that builds upon our brand, strong client relationships and integral role in measuring and analyzing the global consumer. Our growth strategy is also subject to certain risks. For example, we may be unable to adapt to significant technological changes such as changes in the technology used to collect and process data or in methods of television viewing. In addition, consolidation in our customers' industries may reduce the aggregate demand for our services. See "Risk Factors."

Continue to grow in developing markets

Developing markets (measured in our Buy segment) comprised approximately 20% of our 2012 revenues and represent a significant long-term opportunity for us given the growth of the middle class and the rapid evolution and modernization of the retail trade in these regions. Currently, the middle class is expanding significantly each year on a global basis, with Africa, Brazil, Russia, India and China currently contributing nearly half of all global consumption growth. Key elements of our strategy include:

- Continuing to grow our existing services in local markets while simultaneously introducing into developing markets new services drawn from our global portfolio;
- Partnering with existing clients as they expand their businesses into developing and emerging markets and providing the high-quality measurement and insights to which they are accustomed; and
- Building relationships with local companies that are expanding beyond their home markets by capitalizing on the global credibility and integrity of the Nielsen brand.

Continue to develop innovative services

We intend to continue developing our service portfolio to provide our clients with comprehensive and advanced solutions. Key elements of our strategy include:

- Further developing our analytics offerings across all facets of our client base to provide a more comprehensive offering and help our clients think through their most important challenges;
- Continuing to grow our leadership in measurement and insight services related to TV, online and mobile and expanding our services in growth areas including social media to help our media clients more effectively reach their target audiences and better understand the value of their content; and
- Continuing to expand our Advertiser Solutions offering, which integrates our proprietary data and analytics from both the Buy and Watch segments, by developing powerful tools to help clients better understand the effectiveness of advertising and the impact of advertising spend on consumer purchasing behavior.

Continue to attract new clients and expand existing relationships

We believe that substantial opportunities exist to both attract new clients and to increase our revenue from existing clients. Building on our deep knowledge and the embedded position of our Buy and Watch segments, we expect to sell new and innovative solutions to our new and existing clients, increasing our importance to their decision making processes.

Continue to pursue strategic acquisitions to complement our leadership positions

We have increased our capabilities through investments and acquisitions in the areas of retail measurement, international audience measurement, and advertising effectiveness for digital and social media campaigns. Going forward, we will consider select acquisitions of complementary businesses that enhance our product and geographic portfolio and can benefit from our scale, scope and status as a global leader.

Technology Infrastructure

We operate with an extensive data and technology infrastructure utilizing eight primary data centers in seven countries around the world. Our global database has the capacity to house approximately 36 petabytes of information, with our Buy segment processing approximately nine trillion purchasing data points each month and our Watch segment processing approximately 1.7 billion tuning and viewing records each month. Our technology infrastructure plays an instrumental role in meeting service commitments to global clients and allows us to quickly scale our services across practice areas and geographies. Our technology platform utilizes an open approach that facilitates integration of distinct data sets, interoperability with client data and technology, and partnerships with leading technology companies such as IBM, Tata Consulting Services and TIBCO.

Intellectual Property

Our patents, trademarks, trade secrets, copyrights and all of our other intellectual property are important assets that afford protection to our business. Our success depends to a degree upon our ability to protect and preserve certain proprietary aspects of our technology and our brand. To ensure that objective, we control access to our proprietary technology. Our employees and consultants enter into confidentiality, non-disclosure and invention assignment agreements with us. We protect our rights to proprietary technology and confidential information in our business arrangements with third parties through confidentiality and other intellectual property and business agreements.

We hold a number of third-party patent and intellectual property license agreements that afford us rights to third party patents, technology and other intellectual property. Such license agreements most often do not

preclude either party from licensing our patents and technology to others. Such licenses may involve one-time payments or ongoing royalty obligations, and we cannot ensure that future license agreements can or will be obtained or renewed on acceptable terms, or at all.

Employees

As of December 31, 2012, we employed approximately 35,000 people worldwide. Approximately 19% of our employees are covered under collective bargaining agreements and an additional 12% are covered under works council agreements in Europe. We may become subject to additional agreements or experience labor disruptions which may result in higher operating costs over time. We believe that our employee relations are good.

Competitive Landscape

There is no single competitor that offers all of the services we offer in all of the markets in which we offer them. We have many competitors worldwide that offer some of the services we provide in selected markets. While we maintain leading positions in many markets in which we operate, our future success will depend on our ability to enhance and expand our suite of services, provide reliable and accurate measurement solutions and related information, drive innovation that anticipates and responds to emerging client needs, strengthen and expand our geographic footprint, and protect consumer privacy. See "Risk Factors – We face competition, which could adversely affect our business, financial condition, results of operations and cash flow." We believe our global presence and integrated portfolio of services are key assets in our ability to effectively compete in the marketplace. A summary of the competitive landscape for each of our segments is included below:

What Consumers Buy

While we do not have one global competitor in our Buy segment, we face numerous competitors in various areas of our service in different markets throughout the world. Competition includes companies specializing in marketing research, in-house research departments of manufacturers and advertising agencies, retailers that sell information directly or through brokers, information management and software companies, and consulting and accounting firms. In retail measurement, our principal competitor in the United States is Information Resources, Inc., which is also present in some European markets. Our retail measurement service also faces competition in individual markets from local companies. Our consumer panel services and analytics services have many direct and/or indirect competitors in all markets around the world including in selected cases GfK, Ipsos, Kantar and local companies in individual countries.

What Consumers Watch

While we do not have one global competitor in our Watch segment, we face numerous competitors in various areas of our operations in different markets throughout the world. We are the clear market leader in U.S. television audience measurement; however, there are many emerging players and technologies that will increase competitive pressure. Numerous companies such as Kantar (a unit of WPP), Rentrak and TRA (a unit of TiVo) are attempting to measure television viewing using data received from set-top boxes of cable and satellite TV providers. Our principal competitor in television audience measurement outside the United States is Kantar, with additional companies such as Ipsos, GfK and Médiamétrie representing competitors in individual countries. Our online service faces competition in the United States and globally from companies that provide panel-based internet measurement services such as comScore, providers of site-centric Web analytics solutions, including Coremetrics, Google, Adobe and WebTrends; and companies that measure consumer generated media on the internet such as Twelvelfold, Visible Technologies, and Radian 6.

Expositions

The trade show industry is highly fragmented with numerous competitors serving individual business sectors or geographies. Our primary competitors in this segment are Reed Expositions, Advanstar and Hanley Wood.

Regulation

Our operations are subject to and affected by data protection laws in many countries. These laws constrain whether and how we collect personal data (*i.e.*, information relating to an identifiable individual), how that data may be used and stored, and whether, to whom and where that data may be transferred. Data collection methods that may not always be obvious to the data subject, like the use of cookies online, or that present a higher risk of abuse, such as collecting data directly from children, tend to be more highly regulated; and data transfer constraints can impact multinational access to a central database and cross-border data transfers.

Some of the personal data we collect may be considered “sensitive” by the laws of many jurisdictions because they may include certain demographic information and consumption preferences. “Sensitive” personal data typically are more highly regulated than non-sensitive data. Generally, this means that for sensitive data the data subject’s consent should be more explicit and fully informed and security measures surrounding the storage of the data should be more rigorous. The greater constraints that apply to the collection and use of sensitive data increase the administrative and operational burdens and costs of panel recruitment and management.

The attention privacy and data protection issues attract can offer us a competitive advantage. Because we recognize the importance of privacy to our panelists, our customers, consumers in general, and regulators, we devote dedicated resources to enhancing our privacy and security practices in our product development plans and other areas of operation, and participate in privacy policy organizations and “think tanks.” We do this to improve both our practices and the perception of Nielsen as a leader in this area.

Iran Sanctions Related Disclosure

Under the Iran Threat Reduction and Syrian Human Rights Act of 2012, which added Section 13(r) of the Exchange Act, we are required to include certain disclosures in our periodic reports if we or any of our “affiliates” knowingly engaged in certain specified activities during the period covered by the report. Because the SEC defines the term “affiliate” broadly, it includes any entity controlled by us as well as any person or entity that controls us or is under common control with us (“control” is also construed broadly by the SEC). We are not presently aware that we and our consolidated subsidiaries have knowingly engaged in any transaction or dealing reportable under Section 13(r) of the Exchange Act during the year ended December 31, 2012. In addition, we sought confirmation from companies that may be considered our affiliates as to whether they have knowingly engaged in any such reportable transactions or dealings during such period and, except as described below, are not presently aware of any such reportable transactions or dealings by such companies.

The Blackstone Group L.P., one of our Sponsors, informed us that TRW Automotive Holdings Corp., a company that may be considered one of its affiliates, included the disclosure reproduced below in its annual report on Form 10-K as filed with the SEC on February 15, 2013 as required by Section 13(r) of the Exchange Act (the “TRW Disclosure”). We have no involvement in or control over the activities of TRW Automotive Holdings Corp., any of its predecessor companies or any of its subsidiaries, and we have not independently verified or participated in the preparation of the TRW Disclosure.

TRW Disclosure:

“Compliance with Government Regulations

Pursuant to Section 13(r)(1)(D)(iii) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), we note that in 2012 certain of our non-U.S. subsidiaries sold products to customers that could be affiliated with, or deemed to be acting on behalf of, the Industrial Development and Renovation Organization, which has been designated as an agency of the Government of Iran. Gross revenue attributable to such sales was approximately \$8,326,000, and net profit from such sales was approximately \$377,000. Although these activities were not prohibited by U.S. law at the time they were conducted, our subsidiaries have discontinued their dealings with such customers, other than limited wind-down activities (which are permissible), and we do not otherwise intend to continue or enter into any Iran-related activity.”

Recent Developments

In December 2012, we signed a definitive agreement to acquire Arbitron Inc. (NYSE: ARB), an international media and marketing research firm, for \$48 per share in cash (the "Transaction"). In addition, we entered into a commitment for an unsecured note or unsecured loan up to \$1,300 million (the "Commitment Letter") to fund the closing of the Transaction. The Transaction has been approved by the board of directors of both companies and is subject to customary closing conditions, including regulatory review. As of December 31, 2012, there were no borrowings outstanding under the Commitment Letter.

In January 2013, our board of directors adopted a cash dividend policy with the present intent to pay quarterly cash dividends on our outstanding common stock. The board also declared the first quarterly cash dividend of \$0.16 per share, to be paid on March 20, 2013 to holders of record of our common stock on March 6, 2013. Our dividend policy and the payment of future cash dividends are subject to the discretion of the board of directors.

In February 2013, the mandatory convertible subordinated bonds were converted into 10,416,700 shares of our common stock at a conversion rate of 1.8116 shares per \$50.00 principal amount of the bonds.

In February 2013, we amended our Amended and Restated Master Services Agreement (the "Agreement"), dated as of October 1, 2007 with Tata America International Corporation and Tata Consultancy Services Limited (jointly, "TCS"). The term of the Agreement has been extended for an additional three years, so as to expire on December 31, 2020, with a one-year renewal option granted to Nielsen. Nielsen has increased its commitment to purchase services from TCS from \$1.0 billion to \$2.5 billion (the "Minimum Commitment") over the life of the contract (from October 1, 2007), including a commitment to purchase at least \$100 million in services per year (the "Annual Commitment"). TCS will continue to globally provide Nielsen with professional services relating to information technology (including application development and maintenance), business process outsourcing, client service knowledge process outsourcing, management sciences, analytics, and financial planning and analytics. The amount of the Minimum Commitment and the Annual Commitment may be reduced on the occurrence of certain events, some of which also provide Nielsen with the right to terminate the Agreement or statement of work, as applicable.

In February 2013, the Company received the requisite lender consents to amend its Senior Secured Credit Agreement to allow for the replacement of its existing class A, B and C term loans with a new class of term loans. The amendment is expected to close during the first quarter of 2013, subject to customary closing conditions, and will be documented in an Amended and Restated Credit Agreement.

In February 2013, Venezuela devalued its currency by 32%. As the Company has operations in both its Buy and Watch segments in Venezuela, this devaluation will result in a charge of approximately \$12 million in the first quarter of 2013 in the foreign exchange transaction (losses)/gains, net line in the consolidated statement of operations.

Financial Information about Segments and Geographic Areas

See Note 16 to our consolidated financial statements – "Segments," for further information regarding our operating segments and our geographic areas.

Available Information

Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to these reports will be made available free of charge on our website at <http://www.nielsen.com> as soon as reasonably practicable after we electronically file such reports with, or furnish them to, the Securities and Exchange Commission ("SEC"). Information on our website is not incorporated by reference herein and is not a part of this report.

Item 1A. Risk Factors

The risks described below are not the only risks facing us. Any of the following risks could materially and adversely affect our business, financial condition or results of operations. Additional risks and uncertainties not currently known to us or those we currently view to be immaterial may also materially and adversely affect our business, financial condition or results of operations.

Risks Related to Our Business

We may be unable to adapt to significant technological change which could adversely affect our business.

We operate in businesses that require sophisticated data collection, processing systems, software and other technology. Some of the technologies supporting the industries we serve are changing rapidly. We will be required to adapt to changing technologies, either by developing and marketing new services or by enhancing our existing services, to meet client demand.

Moreover, the introduction of new services embodying new technologies and the emergence of new industry standards could render existing services obsolete. Our continued success will depend on our ability to adapt to changing technologies, manage and process ever-increasing amounts of data and information and improve the performance, features and reliability of our existing services in response to changing client and industry demands. We may experience difficulties that could delay or prevent the successful design, development, testing, introduction or marketing of our services. New services, or enhancements to existing services, may not adequately meet the requirements of current and prospective clients or achieve any degree of significant market acceptance.

Traditional methods of television viewing are changing as a result of fragmentation of channels and digital and other new television technologies and devices such as video-on-demand, digital video recorders, game consoles, tablets, other mobile devices and internet viewing. If we are unable to continue to successfully adapt our media measurement systems to new viewing habits, our business, financial position and results of operations could be adversely affected.

Consolidation in the consumer packaged goods, media, entertainment, telecommunications and technology industries could put pressure on the pricing of our services, thereby leading to decreased earnings.

Consolidation in the consumer packaged goods, media, entertainment, telecommunications and technology industries could reduce aggregate demand for our services in the future and could limit the amounts we earn for our services. When companies merge, the services they previously purchased separately are often purchased by the combined entity in the aggregate in a lesser quantity than before, leading to volume compression and loss of revenue. While we attempt to mitigate the revenue impact of any consolidation by expanding our range of services, there can be no assurance as to the degree to which we will be able to do so as industry consolidation continues, which could adversely affect our business, financial position and results of operations.

Client procurement strategies could put additional pressure on the pricing of our information services, thereby leading to decreased earnings.

Certain of our clients may continue to seek further price concessions from us. This puts pressure on the pricing of our information services, which could limit the amounts we earn. While we attempt to mitigate the revenue impact of any pricing pressure through effective negotiations and by providing services to individual businesses within particular groups, there can be no assurance as to the degree to which we will be able to do so, which could adversely affect our business, financial position and results of operations.

Continued adverse market conditions, particularly in the consumer packaged goods, media, entertainment, telecommunications or technology industries could adversely impact our revenue.

A number of adverse financial developments continue to impact the U.S. and global financial markets. These developments include a significant economic deterioration both in the United States and globally,

volatility and deterioration in the equity markets, and deterioration and tightening of liquidity in the credit markets. In addition, issues related to sovereign debt in Europe recently have negatively affected the global financial markets. The current economic environment has witnessed a significant reduction in consumer confidence and demand, impacting the demand for our customers' products and services. Those reductions could adversely affect the ability of some of our customers to meet their current obligations to us and hinder their ability to incur new obligations until the economy and their businesses strengthen. The inability of our customers to pay us for our services and/or decisions by current or future customers to forego or defer purchases may adversely impact our business, financial condition, results of operations, profitability and cash flows and may continue to present risks for an extended period of time. We cannot predict the impact of economic slowdowns on our future financial performance.

We expect that revenues generated from our information and insights services will continue to represent a substantial portion of our overall revenue for the foreseeable future. To the extent the businesses we service, especially our clients in the consumer packaged goods, media, entertainment, telecommunications and technology industries, are subject to the financial pressures of, for example, increased costs or reduced demand for their products, the demand for our services, or the prices our clients are willing to pay for those services, may decline.

During challenging economic times, clients, typically advertisers, within our Buy segment may reduce their discretionary advertising expenditures and may be less likely to purchase our analytical services, which would have an adverse effect on our revenue.

Clients within our Watch segment derive a significant amount of their revenue from the sale or purchase of advertising. During challenging economic times, advertisers may reduce advertising expenditures and advertising agencies and other media may be less likely to purchase our media information services, which would have an adverse effect on our revenue.

Revenues within our Expositions segment are primarily derived from business-to-business trade shows and events. During challenging economic times exhibitors may cut back on attending our events, which would have an adverse effect on our revenue.

We have suffered losses due to goodwill impairment charges in the past and could do so again in the future.

Goodwill and indefinite-lived intangible assets are subject to annual review for impairment (or more frequently should indications of impairment arise). In addition, other intangible assets are also reviewed for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. As of December 31, 2012, we had goodwill and intangible assets of \$11,907 million. Any downward revisions in the fair value of our reporting units or our intangible assets could result in impairment charges for goodwill and intangible assets that could materially affect our financial performance.

Our substantial indebtedness could adversely affect our financial health.

We have now and will continue to have a significant amount of indebtedness. As of December 31, 2012, we had total indebtedness of \$6,584 million (including \$288 million of Mandatory Convertible Subordinated Bonds due 2013 that were converted on February 1, 2013 into 10,416,700 shares of common stock). Furthermore, the interest payments on our indebtedness could reduce the availability of our cash flow.

Our substantial indebtedness could have important consequences. For example, it could:

- increase our vulnerability to the current general adverse economic and industry conditions;
- require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, service development efforts and other general corporate purposes;

- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;
- expose us to the risk of increased interest rates as certain of our borrowings are at variable rates of interest;
- restrict us from making strategic acquisitions or causing us to make non-strategic divestitures;
- limit our ability to obtain additional financing for working capital, capital expenditures, service development, debt service requirements, acquisitions and general corporate or other purposes;
- limit our ability to adjust to changing market conditions; and
- place us at a competitive disadvantage compared to our competitors that have less debt.

In addition, the indentures governing our outstanding notes and our credit facilities contain financial and other restrictive covenants that will limit the ability of our operating subsidiaries to engage in activities that may be in our best interests in the long term. The failure to comply with those covenants could result in an event of default which, if not cured or waived, could result in the acceleration of all of our debt.

Despite current indebtedness levels, we and our subsidiaries may still be able to incur substantially more debt. This could further increase the risks associated with our substantial leverage.

We and our subsidiaries may be able to incur substantial additional indebtedness in the future. If new debt is added to our and our subsidiaries' current debt levels, the related risks that we and they now face could intensify.

To service our indebtedness, we will require a significant amount of cash as well as continued access to the capital markets. Our ability to generate cash and our access to the capital markets depend on many factors beyond our control.

Our ability to make payments on our indebtedness and to fund planned capital expenditures and product development efforts will depend on our ability to generate cash in the future and our ability to refinance our indebtedness. This, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control.

We may not be able to generate sufficient cash flow from operations to pay our indebtedness or to fund our other liquidity needs. Our cash interest expense for the years ended December 31, 2012, 2011 and 2010 was \$384 million, \$446 million and \$531 million, respectively. At December 31, 2012, we had \$4,090 million of floating-rate debt under our senior secured credit facilities of which \$2,540 million was subject to effective floating-fixed interest rate swaps. A one percent increase in interest rates applied to our floating rate indebtedness would therefore increase annual interest expense by approximately \$16 million (\$41 million without giving effect to any of our interest rate swaps). We may need to refinance all or a portion of our indebtedness on or before maturity. We may not be able to refinance any of our indebtedness, including our senior secured credit facilities, on commercially reasonable terms or at all.

The success of our business depends on our ability to recruit sample participants to participate in our research samples.

Our business uses scanners and diaries to gather consumer data from sample households as well as Set Meters, People Meters, Active/Passive Meters and diaries to gather television audience measurement data from sample households. It is increasingly difficult and costly to obtain consent from households to participate in the surveys. In addition, it is increasingly difficult and costly to ensure that the selected sample of households mirrors the behaviors and characteristics of the entire population and covers all of the demographic segments requested by our clients. Additionally, as consumers adopt modes of telecommunication other than traditional

telephone service, such as mobile, cable and internet calling, it may become more difficult for our services to reach and recruit participants for consumer purchasing and audience measurement services. If we are unsuccessful in our efforts to recruit appropriate participants and maintain adequate participation levels, our clients may lose confidence in our ratings services and we could lose the support of the relevant industry groups. If this were to happen, our consumer purchasing and audience measurement services may be materially and adversely affected.

Data protection laws may restrict our activities and increase our costs.

Various statutes and rules regulate conduct in areas such as privacy and data protection which may affect our collection, use, storage and transfer of personally identifiable information both abroad and in the United States. Compliance with these laws may require us to make certain investments or may dictate that we not offer certain types of services or only offer such services after making necessary modifications. Failure to comply with these laws may result in, among other things, civil and criminal liability, negative publicity, data being blocked from use and liability under contractual warranties. In addition, there is an increasing public concern regarding data and consumer protection issues, and the number of jurisdictions with data protection laws has been slowly increasing. There is also the possibility that the scope of existing privacy laws may be expanded. For example, several countries, including the United States, have regulations that restrict telemarketing to individuals who request to be included on a do-not-call list. Typically, these regulations target sales activity and do not apply to survey research. If the laws were extended to include survey research, our ability to recruit research participants could be adversely affected. These or future initiatives may adversely affect our ability to generate or assemble data or to develop or market current or future services, which could negatively impact our business.

If we are unable to protect our intellectual property rights, our business could be adversely affected.

The success of our business will depend, in part, on:

- obtaining patent protection for our technology and services;
- defending our patents, copyrights, trademarks, service marks and other intellectual property;
- preserving our trade secrets and maintaining the security of our know-how and data; and
- operating our business without infringing upon intellectual property rights held by third parties.

We rely on a combination of contractual provisions, confidentiality procedures and the patent, copyright, trademark and trade secret laws of the United States and other countries to protect our intellectual property. These legal measures afford only limited protection and may not provide sufficient protection to prevent the infringement, misuse or misappropriation of our intellectual property. Intellectual property law in several foreign jurisdictions is subject to considerable uncertainty. There can be no assurances that the protections we have available for our proprietary technology in the United States and other countries will be available to us in all of the places we sell our services. Any infringement or misappropriation of our technology can have a negative impact on our business. The patents we own could be challenged, invalidated or circumvented by others and may not be of sufficient scope or strength to provide us with meaningful protection or commercial advantage. The expiration of our patents may lead to increased competition. Although our employees, consultants, clients and collaborators enter into confidentiality agreements with us, our trade secrets, data and know-how could be subject to unauthorized use, misappropriation or unauthorized disclosure. The growing need for global data, along with increased competition and technological advances, puts increasing pressure on us to share our intellectual property for client applications with others, which could result in infringement. Competitors may gain access to our intellectual property and proprietary information. Our trademarks could be challenged, which could force us to rebrand our services, result in a loss of brand recognition and require us to devote resources to advertising and marketing new brands. Furthermore, litigation may be necessary to enforce our intellectual property rights, to protect our trade secrets and to determine the validity and scope of our proprietary rights. Given the importance of our intellectual property, we will enforce our rights whenever it is necessary and prudent

to do so. Any future litigation, regardless of the outcome, could result in substantial expense and diversion of time and attention of management, may not be resolved in our favor and could adversely affect our business.

If third parties claim that we infringe upon their intellectual property rights, our operating profits could be adversely affected.

We cannot be certain that we do not and will not infringe the intellectual property rights of others in operating our business. We may be subject to legal proceedings and claims in the ordinary course of our business, including claims that we have infringed third parties' intellectual property rights. Any such claims of intellectual property infringement, even those without merit, could:

- be expensive and time-consuming to defend;
- result in our being required to pay possibly significant damages;
- cause us to cease providing our services that incorporate the challenged intellectual property;
- require us to redesign or rebrand our services;
- divert management's attention and resources; or
- require us to enter into potentially costly royalty or licensing agreements in order to obtain the right to use a third party's intellectual property, although royalty or licensing agreements may not be available to us on acceptable terms or at all.

Any of the above could have a negative impact on our operating profits and harm our future prospects and financial condition.

We generate revenues throughout the world which are subject to exchange rate fluctuations, and our revenue and net income may suffer due to currency translations and repatriation of earnings to the U.S.

We operate globally, deriving approximately 48% of revenues for the year ended December 31, 2012 in currencies other than U.S. dollars, with approximately 12% of revenues deriving in Euros. Our U.S. operations earn revenue and incur expenses primarily in U.S. dollars, while our European operations earn revenue and incur expenses primarily in Euros, which have recently been subject to significant volatility. Outside the United States and the European Union, we generate revenue and expenses predominantly in local currencies. Because of fluctuations (including possible devaluations) in currency exchange rates, we are subject to currency translation exposure on the profits of our operations, in addition to economic exposure. In certain instances, we may not be able to freely convert foreign currencies into U.S. dollars due to limitations placed on such conversions. Certain of the countries in which we operate, such as Venezuela, have currencies which are considered to be hyperinflationary. These risks could have a material adverse effect on our business, results of operations and financial condition.

Of the \$288 million in cash and cash equivalents, approximately \$265 million was held in jurisdictions outside the U.S. and as a result there may be tax consequences if such amounts were moved out of these jurisdictions or repatriated to the U.S. We regularly review the amount of cash and cash equivalents held outside of the U.S. to determine the amounts necessary to fund the current operations of our foreign operations and their growth initiatives and amounts needed to service our U.S. indebtedness and related obligations.

Our international operations are exposed to risks which could impede growth in the future.

We continue to explore opportunities in major international markets around the world, including China, Russia, India and Brazil. International operations expose us to various additional risks, which could adversely affect our business, including:

- costs of customizing services for clients outside of the United States;
- reduced protection for intellectual property rights in some countries;

- the burdens of complying with a wide variety of foreign laws;
- difficulties in managing international operations;
- longer sales and payment cycles;
- exposure to foreign currency exchange rate fluctuation;
- exposure to local economic conditions;
- limitations on the repatriation of funds from foreign operations;
- exposure to local political conditions, including adverse tax policies, civil unrest and seizure of assets by a foreign government; and
- the risks of an outbreak of war, the escalation of hostilities and acts of terrorism in the jurisdictions in which we operate.

In countries where there has not been a historical practice of using consumer packaged goods retail information or audience measurement information in the buying and selling of advertising time, it may be difficult for us to maintain subscribers.

Criticism of our audience measurement service by various industry groups and market segments could adversely affect our business.

Due to the high-profile nature of our services in the media, internet and entertainment information industries, we could become the target of criticism by various industry groups and market segments. We strive to be fair, transparent and impartial in the production of audience measurement services, and the quality of our U.S. ratings services are voluntarily subject to review and accreditation by the Media Rating Council, a voluntary trade organization, whose members include many of our key client constituencies. However, criticism of our business by special interests, and by clients with competing and often conflicting demands on our measurement service, could result in government regulation. While we believe that government regulation is unnecessary, no assurance can be given that legislation will not be enacted in the future that would subject our business to regulation, which could adversely affect our business.

A loss of one of our largest clients could adversely impact our results of operations.

Our top ten clients accounted for approximately 25% of our total revenues for the year ended December 31, 2012. We cannot assure you that any of our clients will continue to use our services to the same extent, or at all, in the future. A loss of one or more of our largest clients, if not replaced by a new client or an increase in business from existing clients, would adversely affect our prospects, business, financial condition and results of operations.

We rely on third parties to provide certain data and services in connection with the provision of our current services.

We rely on third parties to provide certain data and services for use in connection with the provision of our current services. For example, our Buy segment enters into agreements with third parties (primarily retailers of fast-moving consumer goods) to obtain the raw data on retail product sales it processes and edits and from which it creates products and services. These suppliers of data may increase restrictions on our use of such data, fail to adhere to our quality control standards, increase the price they charge us for this data or refuse altogether to license the data to us. In addition, we may need to enter into agreements with third parties to assist with the marketing, technical and financial aspects of expanding our services for other types of media. In the event we are unable to use such third party data and services or if we are unable to enter into agreements with third parties, when necessary, our business and/or our potential growth could be adversely affected. In the event that such data and services are unavailable for our use or the cost of acquiring such data and services increases, our business could be adversely affected.

We rely on a third party for the performance of a significant portion of our worldwide information technology and operations functions, various services and assistance in certain integration projects. A failure to provide these functions, services or assistance in a satisfactory manner could have an adverse effect on our business.

Pursuant to the terms of an eight-year agreement, effective February 2013, we are dependent upon Tata America International Corporation and Tata Consultancy Services Limited (collectively, "TCS") for the performance of a significant portion of our information technology and operations functions worldwide, the provision of a broad suite of information technology and business process services, including general and process consulting, product engineering, program management, application development and maintenance, coding, data management, finance and accounting services and human resource services, as well as assistance in integrating and centralizing multiple systems, technologies and processes on a global scale. The success of our business depends in part on maintaining our relationships with TCS and their continuing ability to perform these functions and services in a timely and satisfactory manner. If we experience a loss or disruption in the provision of any of these functions or services, or they are not performed in a satisfactory manner, we may have difficulty in finding alternate providers on terms favorable to us, or at all, and our business could be adversely affected.

Long-term disruptions in the mail, telecommunication infrastructure and/or air service could adversely affect our business.

Our business is dependent on the use of the mail, telecommunication infrastructure and air service. Long-term disruptions in one or more of these services, which could be caused by events such as natural disasters, the outbreak of war, the escalation of hostilities, civil unrest and/or acts of terrorism, could adversely affect our business, results of operations and financial condition.

Hardware and software failures, delays in the operation of our computer and communications systems or the failure to implement system enhancements may harm our business.

Our success depends on the efficient and uninterrupted operation of our computer and communications systems. A failure of our network or data gathering procedures could impede the processing of data, delivery of databases and services, client orders and day-to-day management of our business and could result in the corruption or loss of data. While many of our services have appropriate disaster recovery plans in place, we currently do not have full backup facilities everywhere in the world to provide redundant network capacity in the event of a system failure. Despite any precautions we may take, damage from fire, floods, hurricanes, power loss, telecommunications failures, computer viruses, break-ins and similar events at our various computer facilities could result in interruptions in the flow of data to our servers and from our servers to our clients. In addition, any failure by our computer environment to provide our required data communications capacity could result in interruptions in our service. In the event of a delay in the delivery of data, we could be required to transfer our data collection operations to an alternative provider of server hosting services. Such a transfer could result in significant delays in our ability to deliver our services to our clients and could be costly to implement. Additionally, significant delays in the planned delivery of system enhancements and improvements, or inadequate performance of the systems once they are completed, could damage our reputation and harm our business. Finally, long-term disruptions in infrastructure caused by events such as natural disasters, the outbreak of war, the escalation of hostilities, civil unrest and/or acts of terrorism (particularly involving cities in which we have offices) could adversely affect our services. Although we carry property and business interruption insurance, our coverage may not be adequate to compensate us for all losses that may occur.

The presence of our Global Technology and Information Center in Florida heightens our exposure to hurricanes and tropical storms, which could disrupt our business.

The technological data processing functions for certain of our U.S. operations are concentrated at our Global Technology and Information Center ("GTIC") at a single location in Florida. Our geographic concentration in Florida heightens our exposure to a hurricane or tropical storm. These weather events could cause severe damage

to our property and technology and could cause major disruptions to our operations. Although our GTIC was built in anticipation of severe weather events and we have insurance coverage, if we were to experience a catastrophic loss, we may exceed our policy limits and/or we may have difficulty obtaining similar insurance coverage in the future. As such, a hurricane or tropical storm could have an adverse effect on our business.

Our services involve the storage and transmission of proprietary information. If our security measures are breached and unauthorized access is obtained, our services may be perceived as not being secure and panelists and survey respondents may hold us liable for disclosure of personal data, and clients and venture partners may hold us liable or reduce their use of our services.

We store and transmit large volumes of proprietary information and data that contains personally identifiable information about individuals. Security breaches could expose us to a risk of loss of this information, litigation and possible liability and our reputation could be damaged. For example, hackers or individuals who attempt to breach our network security could, if successful, misappropriate proprietary information or cause interruptions in our services. If we experience any breaches of our network security or sabotage, we might be required to expend significant capital and resources to protect against or to alleviate problems. We may not be able to remedy any problems caused by hackers or saboteurs in a timely manner, or at all. Techniques used to obtain unauthorized access or to sabotage systems change frequently and generally are not recognized until launched against a target and, as a result, we may be unable to anticipate these techniques or to implement adequate preventive measures. If an actual or perceived breach of our security occurs, the perception of the effectiveness of our security measures could be harmed and we could lose current and potential clients.

If we are unable to attract, retain and motivate employees, we may not be able to compete effectively and will not be able to expand our business.

Our success and ability to grow are dependent, in part, on our ability to hire, retain and motivate sufficient numbers of talented people, with the increasingly diverse skills needed to serve clients and expand our business, in many locations around the world. Competition for highly qualified, specialized technical and managerial, and particularly consulting personnel is intense. Recruiting, training and retention costs and benefits place significant demands on our resources. The inability to attract qualified employees in sufficient numbers to meet particular demands or the loss of a significant number of our employees could have an adverse effect on us, including our ability to obtain and successfully complete important client engagements and thus maintain or increase our revenues.

Changes in tax laws may adversely affect our reported results.

Changes in tax laws, regulations, related interpretations and tax accounting standards in the United States, the Netherlands and other countries in which we operate may adversely affect our financial results. For example, recent legislative proposals to reform U.S. taxation of non-U.S. earnings could have a material adverse effect on our financial results by subjecting a significant portion of our non-U.S. earnings to incremental U.S. taxation and/or by delaying or permanently deferring certain deductions otherwise allowed in calculating our U.S. tax liabilities. In addition, governments are increasingly considering tax law changes as a means to cover budgetary shortfalls resulting from the current economic environment.

We face competition, which could adversely affect our business, financial condition, results of operations and cash flow.

We are faced with a number of competitors in the markets in which we operate. Some of our competitors in each market may have substantially greater financial marketing and other resources than we do and may in the future engage in aggressive pricing action to compete with us. Although we believe we are currently able to compete effectively in each of the various markets in which we participate, we may not be able to do so in the future or be capable of maintaining or further increasing our current market share. Our failure to compete successfully in our various markets could adversely affect our business, financial condition, results of operations and cash flow.

We may be subject to antitrust litigation or government investigation in the future, which may result in an award of money damages or force us to change the way we do business.

In the past, certain of our business practices have been investigated by government antitrust or competition agencies, and we have on several occasions been sued by private parties for alleged violations of the antitrust and competition laws of various jurisdictions. Following some of these actions, we have changed certain of our business practices to reduce the likelihood of future litigation. Although each of these material prior legal actions have been resolved, there is a risk based upon the leading position of certain of our business operations that we could, in the future, be the target of investigations by government entities or actions by private parties challenging the legality of our business practices. Also, in markets where the retail trade is concentrated, regulatory authorities may perceive certain of our retail services as potential vehicles for collusive behavior by retailers or manufacturers. There can be no assurance that any such investigation or challenge will not result in an award of money damages, penalties or some form of order that might require a change in the way that we do business, any of which could adversely affect our revenue stream and/or profitability.

The use of joint ventures, over which we do not have full control, could prevent us from achieving our objectives.

We have conducted and will continue to conduct a number of business initiatives through joint ventures, some of which are or may be controlled by others. Our joint venture partners might have economic or business objectives that are inconsistent with our objectives. Our joint venture partners could go bankrupt, leaving us liable for their share of joint venture liabilities. Although we generally will seek to maintain sufficient control of any joint venture to permit our objectives to be achieved, we might not be able to take action without the approval of our joint venture partners. Also, our joint venture partners could take appropriate actions binding on the joint venture without our consent. In addition, the terms of our joint venture agreements may limit our business opportunities. Accordingly, the use of joint ventures could prevent us from achieving our intended objectives.

Failure to successfully complete or integrate acquisitions into our existing operations could have an adverse impact on our business, financial condition and results of operations.

We regularly evaluate opportunities for strategic growth through tuck-in acquisitions. Potential issues associated with these acquisitions could include, among other things, our ability to realize the full extent of the benefits or cost savings that we expect to realize as a result of the completion of the acquisition within the anticipated time frame, or at all; receipt of necessary consents, clearances and approvals in connection with the acquisition; diversion of management's attention from base strategies and objectives; and, with respect to acquisitions, our ability to successfully combine our businesses with the business of the acquired company in a manner that permits cost savings to be realized, including sales and administrative support activities and information technology systems among our company and the acquired company, motivating, recruiting and retaining executives and key employees, conforming standards, controls, procedures and policies, business cultures and compensation structures among our company and the acquired company, consolidating and streamlining corporate and administrative infrastructures, consolidating sales and marketing operations, retaining existing customers and attracting new customers, identifying and eliminating redundant and underperforming operations and assets, coordinating geographically dispersed organizations, and managing tax costs or inefficiencies associated with integrating our operations following completion of the acquisitions. In addition, acquisitions outside of the United States increase our exposure to risks associated with foreign operations, including fluctuations in foreign exchange rates and compliance with foreign laws and regulations. If an acquisition is not successfully completed or integrated into our existing operations, our business, financial condition and results of operations could be adversely impacted.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

We lease property in approximately 600 locations worldwide. We also own eight properties worldwide, including our offices in Oxford, United Kingdom, Mexico City, Mexico and Sao Paulo, Brazil. Our leased property includes offices in New York, New York, Oldsmar, Florida and Markham, Canada. In addition, we are subject to certain covenants including the requirement that we meet certain conditions in the event we merge into or convey, lease, transfer or sell our properties or assets as an entirety or substantially as an entirety to, any person or persons, in one or a series of transactions.

Item 3. Legal Proceedings

Nielsen is subject to litigation and other claims in the ordinary course of business, some of which include claims for substantial sums. Accruals have been recorded when the outcome is probable and can be reasonably estimated. While the ultimate results of claims and litigation cannot be determined, the Company does expect that the ultimate disposition of these matters will not have a material adverse effect on its operations or financial condition. However, depending on the amount and the timing, an unfavorable resolution of some or all of these matters could materially affect the Company's future results of operations or cash flows in a particular period.

Item 4. Mine Safety Disclosures

Not Applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Nielsen's common stock is listed on the New York Stock Exchange and is traded under the symbol "NLSN." At the close of business on February 1, 2013, there were 40 stockholders of record, including our parent company, Valcon Acquisition Holding (Luxembourg) S.à.r.l ("Luxco") who owned 236,266,399 shares (or approximately 65%) of our common stock. We believe that the number of beneficial owners is substantially greater than the number of record holders because a large portion of our common stock is held in "street name" by brokers.

In February 2013, Luxco and certain Nielsen employees completed a public offering of 40,814,883 shares of the Company's common stock at a price of \$32.55 per share. Subsequent to this offering, Luxco owned 195,463,201 shares (or approximately 52%) of the Company's common stock.

The high and low reported sale prices per share for our common stock for the quarterly periods for the years ended December 31, 2012 and 2011 were as follows:

Quarterly Period	2012		2011	
	High	Low	High	Low
First ⁽¹⁾	\$31.10	\$26.57	\$28.15	\$24.75
Second	\$30.35	\$25.14	\$33.00	\$26.88
Third	\$30.50	\$25.02	\$31.83	\$24.67
Fourth	\$32.07	\$27.30	\$31.45	\$24.38

(1) First quarter of 2011 represents the period of January 26, 2011, the date of our initial public offering, to March 31, 2011.

No dividends have been declared on our common stock during the years ended December 31, 2012 or 2011. In January 2013, we adopted a cash dividend policy pursuant to which we intend to declare and pay quarterly cash dividends on each issued and outstanding share of common stock. The first quarterly cash dividend under this policy was declared by our board of directors in the amount of \$0.16 per share payable on March 20, 2013 to holders of record of shares of our common stock on March 6, 2013. Any decision to declare and pay dividends in the future will be made at the discretion of our board of directors and will be subject to the board's continuing determination that the dividend policy and the declaration of dividends thereunder are in the best interests of our shareholders, and are in compliance with all laws and agreements to which we are subject. In addition, our ability to pay dividends is limited by covenants in our senior secured credit facilities and in the indentures governing our notes. See the "Liquidity and Capital Resources" section of Item 7 – Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 10 to our consolidated financial statements – "Long-term Debt and Other Financing Arrangements," for a description of our senior secured credit facility, debenture loans and these dividend restrictions.

Dividend Tax

In general, the Company must withhold tax (dividend tax) from dividends distributed on our common stock at the rate of 15 percent.

Dividends include, without limitation:

- (i) Distributions of profits (including paid-in capital not recognized for dividend tax purposes) in cash or in kind, including deemed and constructive dividends;
- (ii) liquidation distributions and, generally, proceeds realized upon a repurchase of our common stock by the Company or upon the transfer of our common stock to a direct or indirect subsidiary of the Company, in excess of the average paid-in capital recognized for dividend tax purposes;

- (iii) the par value of our common stock issued or any increase in the par value of our common stock, except where such (increase in) the par value of our common stock is funded out of the Company's paid-in capital recognized for dividend tax purposes; and
- (iv) repayments of paid-in capital recognized for dividend tax purposes up to the amount of the Company's profits (*zuivere winst*) unless the Company's general meeting of stockholders has resolved in advance that the Company shall make such repayments and the par value of our common stock concerned has been reduced by a corresponding amount through an amendment of the Company's articles of association.

A holder of our common stock which is, is deemed to be, or, in the case of an individual – has elected to be treated as, resident in the Netherlands for the relevant tax purposes, is generally entitled to credit the dividend tax withheld against such holder's liability to tax on income and capital gains or, in certain cases, to apply for a full refund of the withheld dividend tax.

A holder of our common stock which is not, is not deemed to be, and, in case the holder is an individual, has not elected to be treated as, resident in the Netherlands for the relevant tax purposes, may be eligible for a partial or full exemption or refund of the dividend tax under an income tax convention in effect between the Netherlands and the holder's country of residence.

In addition, generally a non-resident holder of our common stock that is not an individual may be entitled to an exemption from dividend withholding tax, provided that the following tests are satisfied:

- (i) such holder is, according to the tax law of a member state of the European Union or a state designated by ministerial decree that is a party to the agreement regarding the European Economic Area, resident in such state and is not transparent for tax purposes according to the tax law of such state;
- (ii) any one or more of the following threshold conditions are satisfied:
 - (a) at the time the dividend is distributed by us, such holder has shares representing at least 5 percent of our nominal paid up capital;
 - (b) such holder has held shares representing at least 5 percent of our nominal paid-up capital for a continuous period of more than one year at any time during the four years preceding the time the dividend is distributed by us;
 - (c) such holder is connected with us within the meaning of article 10a, paragraph 4, of the Dutch Corporation Tax Act 1969 (*Wet op de Vennootschapsbelasting 1969*); or
 - (d) an entity connected with such holder within the meaning of article 10a, paragraph 4, of the Dutch Corporation Tax Act 1969 (*Wet op de Vennootschapsbelasting 1969*) holds at the time the dividend is distributed by us, shares representing at least 5 percent of our nominal paid up capital;
- (iii) such holder is not considered to be resident outside the member states of the European Union or the states designated by ministerial decree that are a party to the agreement regarding the European Economic Area, under the terms of a double taxation treaty concluded with a third state; and
- (iv) such holder does not perform a similar function as an investment institution (*beleggingsinstelling*) as meant by article 6a or article 28 of the Dutch Corporation Tax Act 1969 (*Wet op de Vennootschapsbelasting 1969*).

Dividend distributions to a U.S. holder of our common stock (with an interest of less than 10 percent of the voting rights in our common stock) are subject to 15 percent dividend withholding tax, which is equal to the rate such U.S. holder may be entitled to under the current income tax treaty between the Netherlands and the United States (the "Treaty"). As such, there is no need to claim a refund of the excess of the amount withheld over the Treaty rate.

On the basis of article 35 of the Treaty, qualifying U.S. pension trusts are under certain conditions entitled to a full exemption from or refund of Netherlands dividend withholding tax.

Under the terms of domestic anti-dividend stripping rules, a recipient of dividends distributed on our common stock will not be entitled to an exemption from, reduction, refund, or credit of dividend tax if the recipient is not the beneficial owner of such dividends as meant in those rules.

Investors are advised to consult their professional advisers as to the tax consequences of purchase, ownership and disposition of our common stock.

Item 6. Selected Financial and Other Data

The following table sets forth selected historical consolidated financial data as of the dates and for the periods indicated. The selected consolidated statement of operations data for the years ended December 31, 2012, 2011 and 2010 and selected consolidated balance sheet data as of December 31, 2012 and 2011 have been derived from our audited consolidated financial statements and related notes appearing elsewhere in this Form 10-K. The selected consolidated statement of operations data for the years ended December 31, 2009 and 2008 and selected consolidated balance sheet data as of December 31, 2010, 2009 and 2008 have been derived from our audited consolidated financial statements which are not included in this annual report on Form 10-K.

The results of operations for any period are not necessarily indicative of the results to be expected for any future period. The audited consolidated financial statements from which the historical financial information for the periods set forth below have been derived were prepared in accordance with U.S. generally accepted accounting principles (“GAAP”). The selected historical consolidated financial data set forth below should be read in conjunction with, and are qualified by reference to “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our audited consolidated financial statements and related notes thereto appearing elsewhere in this annual report on Form 10-K.

(IN MILLIONS, EXCEPT PER SHARE AMOUNTS)	Years Ended December 31,				
	2012 ⁽¹⁾	2011 ⁽²⁾	2010 ⁽³⁾	2009 ⁽⁴⁾	2008 ⁽⁵⁾
Statement of Operations Data:					
Revenues	\$5,612	\$5,532	\$5,126	\$4,808	\$4,806
Depreciation and amortization ⁽⁶⁾	520	529	558	557	499
Operating income	952	794	730	116	420
Interest expense	413	477	660	647	701
Income/(loss) from continuing operations	273	85	154	(428)	(314)
Income/(loss) from continuing operations per common share					
(basic)	0.75	0.24	0.55	(1.57)	(1.39)
Income/(loss) from continuing operations per common share					
(diluted)	0.75	0.24	0.54	(1.57)	(1.39)
Cash dividends declared per common share	—	—	0.03	—	—

(IN MILLIONS)	December 31,				
	2012	2011	2010	2009	2008
Balance Sheet Data:					
Total assets	\$14,585	\$14,504	\$14,429	\$14,600	\$15,091
Long-term debt including capital leases	6,579	6,762	8,550	8,640	9,320

- (1) Income for year ended December 31, 2012 included \$84 million in restructuring charges and \$121 million of charges associated with certain debt retirement transactions.
- (2) Income for year ended December 31, 2011 included \$84 million in restructuring charges and \$333 million of charges associated with the initial public offering of the Company’s common stock and related debt retirement transactions and Sponsor Agreement termination payments.

- (3) Income for year ended December 31, 2010 included \$61 million in restructuring charges, \$136 million of foreign currency transaction gains and \$90 million of charges associated with certain debt retirement transactions.
- (4) The loss in the year ended December 31, 2009 included a goodwill and intangible asset impairment charge of \$527 million and \$62 million in restructuring charges.
- (5) The loss in the year ended December 31, 2008 included a goodwill impairment charge of \$96 million and \$118 million in restructuring charges.
- (6) Depreciation and amortization expense included charges for the depreciation and amortization of tangible and intangible assets acquired in business combinations of \$166 million, \$182 million, \$215 million, \$247 million and \$245 million for the years ended December 31, 2012, 2011, 2010, 2009 and 2008, respectively.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction

The following discussion and analysis should be read together with the accompanying consolidated financial statements and related notes thereto. Further, this report may contain material that includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that reflect, when made, Nielsen's current views with respect to current events and financial performance. These forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, those described in "Item 1A. Risk Factors." Statements, other than those based on historical facts, which address activities, events or developments that we expect or anticipate may occur in the future are forward-looking statements. Such forward-looking statements are and will be, as the case may be, subject to many risks, uncertainties and factors relating to Nielsen's operations and business environment that may cause actual results to be materially different from any future results, express or implied, by such forward-looking statements. See "Cautionary Statement Regarding Forward Looking Statements" in Part I of this Annual Report on Form 10-K. The terms "Company," "Nielsen," "we," "our" or "us," as used herein, refer to Nielsen Holdings N.V. and its consolidated subsidiaries unless otherwise stated or indicated by context.

Background and Executive Summary

On May 17, 2006, Nielsen, formerly known as Valcon Acquisition Holding B.V., was formed by investment funds associated with the Original Sponsors as a subsidiary of Valcon Acquisition Holding (Luxembourg) S.à r.l. ("Luxco"). On May 24, 2006, The Nielsen Company B.V. ("TNC B.V.") (formerly VNU Group B.V. and VNU N.V.) was acquired through a tender offer to stockholders by Valcon Acquisition B.V. ("Valcon"), a wholly owned subsidiary of Nielsen (herein referred to as the "Acquisition"). The registered office of Nielsen is located in Diemen, the Netherlands, with our headquarters located in New York.

We are a global information and measurement company that provides clients with a comprehensive understanding of consumers and consumer behavior. We deliver critical media and marketing information, analytics and industry expertise about what consumers buy (referred to herein as "Buy") and what consumers watch on a global and local basis (consumer interaction across the television, online and mobile viewing platforms referred to herein as "Watch"). Our information, insights and solutions help our clients maintain and strengthen their market positions and identify opportunities for profitable growth. We have a presence in approximately 100 countries, including many developing and emerging markets, and hold leading market positions in many of our services and geographies.

We believe that important measures of our results of operations include revenue, operating income and Adjusted EBITDA (defined below). Our long-term financial objectives include consistent revenue growth and expanding operating margins. Accordingly, we are focused on geographic market and service offering expansion to drive revenue growth and improving operating efficiencies including effective resource utilization, information technology leverage and overhead cost management.

Our business strategy is built upon a model that has traditionally yielded consistent revenue performance. Typically, before the start of each year, nearly 70% of our annual revenue has been committed under contracts in our combined Buy and Watch segments, which provides us with a high degree of stability to our revenue and allows us to effectively manage our profitability and cash flows. We continue to look for growth opportunities through global expansion, specifically within developing markets, as well as through the cross-platform expansion of our insights services and measurement services.

Our restructuring and other productivity initiatives have been focused on a combination of improving operating leverage through targeted cost-reduction programs, business process improvements and portfolio restructuring actions, while at the same time investing in key programs to enhance future growth opportunities.

Achieving our business objectives requires us to manage a number of key risk areas. Our growth objective of geographic market and service expansion requires us to maintain the consistency and integrity of our information and underlying processes on a global scale, and to invest effectively our capital in technology and infrastructure to keep pace with our clients' demands and our competitors. Our operating footprint across approximately 100 countries requires disciplined global and local resource management of internal and third party providers to ensure success. In addition, our high level of indebtedness requires active management of our debt profile, with a focus on underlying maturities, interest rate risk, liquidity and operating cash flows.

Business Segment Overview

We align our business into three reporting segments: what consumers buy (consumer purchasing measurement and analytics), what consumers watch (media audience measurement and analytics) and Expositions. Our Buy and Watch segments, which together generated substantially all of our revenues in 2012, are built on a foundation of proprietary data assets that are designed to yield essential insights for our clients to successfully measure, analyze and grow their businesses.

Our Buy segment provides Information services, which include our core tracking and scan data (primarily transactional measurement data and consumer behavior information), and Insights services (primarily comprised of our analytical solutions) to businesses in the consumer packaged goods industry. Our services also enable our clients to better manage their brands, uncover new sources of demand, launch and grow new products, analyze their sales, improve their marketing mix and establish more effective consumer relationships. Our data is used by our clients to measure their market share, tracking billions of sales transactions per month in retail outlets around the world. Our extensive database of retail and consumer information, combined with our advanced analytical capabilities, helps generate strategic insights that influence our clients' key business decisions. Within our Buy segment, we have two primary geographic groups, developed and developing markets. Developed markets primarily include the United States, Canada, Western Europe, Japan and Australia while developing markets include Africa, Latin America, Eastern Europe, Russia, China, India and Southeast Asia.

Our Watch segment provides viewership data and analytics primarily to the media and advertising industries for television, online and mobile screens. Our Watch data is used by our media clients to understand their audiences, establish the value of their advertising inventory and maximize the value of their content, and by our advertising clients to plan and optimize their spending.

Our Expositions segment operates one of the largest portfolios of business-to-business trade shows and conference events in the United States. Each year, we produce more than 60 trade shows and conference events, which in 2012 connected over 335,000 buyers and sellers across 9 diversified and vibrant end markets.

Certain corporate costs, other than those described above, including those related to selling, finance, legal, human resources, and information technology systems, are considered operating costs and are allocated to our segments based on either the actual amount of costs incurred or on a basis consistent with the operations of the underlying segment.

Critical Accounting Policies

The discussion and analysis of our financial condition and results of operations is based on our consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses and the related disclosure of contingent assets and liabilities. The most significant of these estimates relate to: revenue recognition; business combinations including purchase price allocations; accruals for pension costs and other post-retirement benefits; accounting for income taxes; and valuation of long-lived assets including goodwill and indefinite-lived intangible assets, computer software and stock-based compensation. We base our estimates on historical experience and on

various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the valuation of assets and liabilities that are not readily apparent from other sources. We evaluate these estimates on an ongoing basis. Actual results could vary from these estimates under different assumptions or conditions. For a summary of the significant accounting policies, including critical accounting policies discussed below, see Note 1 – “Description of Business, Basis of Presentation and Significant Accounting Policies” – to our consolidated financial statements.

Revenue Recognition

We recognize revenues when persuasive evidence of an arrangement exists, services have been rendered or information has been delivered, the fee is fixed or determinable and the collectibility of the related revenue is reasonably assured.

A significant portion of our revenue is generated from information (primarily retail measurement and consumer panel services) and measurement (primarily from television, internet and mobile audiences) services. We generally recognize revenue from the sale of services as the services are performed, which is usually ratably over the term of the contract(s). Invoiced amounts are recorded as deferred revenue until earned. Substantially all of our customer contracts are non-cancelable and non-refundable.

Certain of our revenue arrangements include multiple deliverables and in these arrangements, the individual deliverables within the contract that have stand-alone value to the customer are separated and recognized upon delivery based upon our best estimate of their selling prices. These arrangements are not significant to our results of operations. In certain cases, software is included as part of these arrangements to allow our customers to supplementally view delivered information and is provided for the term of the arrangement and is not significant to the marketing effort and is not sold separately. Accordingly, software provided to our customers is considered to be incidental to the arrangements and is not recognized as a separate element.

A discussion of our revenue recognition policies, by segment, follows:

Buy

Revenue from our Buy segment, primarily from retail measurement services and consumer panel services, is recognized over the period during which the services are performed and information is delivered to the customer, primarily on a straight-line basis.

We provide insights and solutions to customers through analytical studies that are recognized into revenue as value is delivered to the customer. The pattern of revenue recognition for these contracts varies depending on the terms of the individual contracts, and may be recognized proportionally or deferred until the end of the contract term and recognized when the information has been delivered to the customer.

Watch

Revenue from our Watch segment is primarily generated from television, internet and mobile measurement services and recognized on a straight-line basis over the contract period, as the service is delivered to the customer.

Expositions

Revenue and certain costs within our Expositions segment are recognized upon completion of each event.

Stock-Based Compensation

Expense Recognition

Our stock-based compensation programs are comprised of both stock options and RSUs. We measure the cost of all stock-based payments, including stock options, at fair value on the grant date and recognize such costs within the consolidated statements of operations; however, no expense is recognized for stock-based payments that do not ultimately vest. We recognize expense associated with stock-based payments that vest upon a single date using the straight-line method. For those that vest over time, an accelerated graded vesting is used. We recorded \$34 million, \$27 million and \$18 million of expense associated with stock-based compensation for the years ended December 31, 2012, 2011 and 2010, respectively. As of December 31, 2012, the aggregate grant date fair value of all outstanding vested and unvested options was \$75 million and \$62 million, respectively. As of December 31, 2012, approximately \$16 million of unearned stock-based compensation related to unvested RSUs (net of estimated forfeitures) is expected to be recognized over a weighted average period of 3.4 years

Fair Value Measurement

Determining the fair value of stock-based awards at the grant date requires considerable judgment. Stock-based compensation expense for stock options is primarily based on the estimated grant date fair value using the Black-Scholes option pricing model, which considers factors such as estimating the expected term of stock options, expected volatility of our stock, and the number of stock-based awards expected to be forfeited due to future terminations. Some of the critical assumptions used in estimating the grant date fair value are presented in the table below:

	Year Ended December 31,		
	2012	2011	2010
Expected life (years)	3.50 - 6.00	3.50 - 6.00	2.85 - 4.17
Risk-free interest rate	0.38 - 0.83%	1.18 - 2.23%	1.28 - 2.12%
Expected dividend yield	0%	0%	0%
Expected volatility	28.00 - 30.30%	31.70 - 42.00%	58.00 - 63.00%
Weighted-average volatility	28.56%	33.42%	60.05%

In addition, for stock-based awards where vesting is dependent upon achieving certain operating performance goals, we estimate the likelihood of achieving the performance goals. Differences between actual results and these estimates could have a material effect on our financial results. We consider several factors in estimating the expected life of our options granted, including the expected lives used by a peer group of companies and the historical option exercise behavior of our employees, which we believe are representative of future behavior. Expected volatility has been based primarily on a combination of the estimates of implied volatility of our peer-group and our historical volatility adjusted for leverage. For grants subsequent to our initial public offering, implied volatility based on trading Nielsen call options is also considered in the calculation of expected volatility because it is considered representative of future stock price trends.

The assumptions used in calculating the fair value of stock-based awards represent our best estimates and, although we believe them to be reasonable, these estimates involve inherent uncertainties and the application of management's judgment. If factors change and we employ different assumptions in the application of our option-pricing model in future periods or if we experience different forfeiture rates, the compensation expense that is derived may differ significantly from what we have recorded in the current year.

Goodwill and Indefinite-Lived Intangible Assets

Goodwill and other indefinite-lived intangible assets are stated at historical cost less accumulated impairment losses, if any.

Goodwill and other indefinite-lived intangible assets, consisting of certain trade names and trademarks, are each tested for impairment on an annual basis and whenever events or circumstances indicate that the carrying amount of such asset may not be recoverable. We have designated October 1st as the date in which the annual assessment is performed as this timing corresponds with the development of our formal budget and business plan review. We review the recoverability of our goodwill by comparing the estimated fair values of reporting units with their respective carrying amounts. We established, and continue to evaluate, our reporting units based on our internal reporting structure and generally define such reporting units at our operating segment level or one level below. The estimates of fair value of a reporting unit are determined using a combination of valuation techniques, primarily by an income approach using a discounted cash flow analysis and supplemented by a market-based approach.

A discounted cash flow analysis requires the use of various assumptions, including expectations of future cash flows, growth rates, discount rates and tax rates in developing the present value of future cash flow projections. Many of the factors used in assessing fair value are outside of the control of management, and these assumptions and estimates can change in future periods. Changes in assumptions or estimates could materially affect the determination of the fair value of a reporting unit, and therefore could affect the amount of potential impairment. The following assumptions are significant to our discounted cash flow analysis:

- *Business projections* – the assumptions of expected future cash flows and growth rates are based on assumptions about the level of business activity in the marketplace as well as applicable cost levels that drive our budget and business plans. The budget and business plans are updated at least annually and are frequently reviewed by management and our board of directors. Actual results of operations, cash flows and other factors will likely differ from the estimates used in our valuation, and it is possible that differences and changes could be material. A deterioration in profitability, adverse market conditions and a slower or weaker economic recovery than currently estimated by management could have a significant impact on the estimated fair value of our reporting units and could result in an impairment charge in the future. Should such events or circumstances arise, management would evaluate other options available at that time that, if executed, could result in future profitability.
- *Long-term growth rates* – the assumed long-term growth rate representing the expected rate at which a reporting unit's earnings stream, beyond that of the budget and business plan period, is projected to grow. These rates are used to calculate the terminal value, or value at the end of the future earnings stream, of our reporting units, and are added to the cash flows projected for the budget and business plan period. The long-term growth rate for each reporting unit is influenced by general market conditions as well as factors specific to the reporting unit such as the maturity of the underlying services. The long-term growth rates we used for our reporting units were between 2% and 4%.
- *Discount rates* – the reporting unit's combined future cash flows are discounted at a rate that is consistent with a weighted-average cost of capital that is likely to be used by market participants. The weighted-average cost of capital is our estimate of the overall after-tax rate of return required by equity and debt holders of a business enterprise. The discount rate for each reporting unit is influenced by general market conditions as well as factors specific to the reporting unit. The discount rates we used for our reporting units were between 8.0% and 15.0%.

These estimates and assumptions vary between each reporting unit depending on the facts and circumstances specific to that unit. We believe that the estimates and assumptions we made are reasonable, but they are susceptible to change from period to period.

We also use a market-based approach in estimating the fair value of our reporting units. The market-based approach utilizes available market comparisons such as indicative industry multiples that are applied to current year revenue and earnings as well as recent comparable transactions.

To validate the reasonableness of the reporting unit fair values, we reconcile the aggregate fair values of our reporting units to our enterprise market capitalization. Enterprise market capitalization includes, among other factors, the market value of our common stock and the appropriate redemption values of our debt.

We did not have any indicators of impairment during the year ended December 31, 2012. The following table summarizes the results of the ten reporting units that were subject to the October 1, 2012 annual impairment testing and the related goodwill value associated with the reporting units for (a) fair values exceeding carrying values by less than 10%, (b) fair values exceeding carrying values between 10% and 20% and (c) fair values exceeding carrying values by more than 20%.

<u>Fair value exceeds carrying value by:</u>	<u>Number of reporting units</u>	<u>Reporting units goodwill (in millions)</u>
Less than 10%	1	\$ 109
10% to 20%	—	—
Greater than 20%	<u>9</u>	<u>7,167</u>
Totals	<u>10</u>	<u>\$7,276</u>

We perform sensitivity analyses on our assumptions, primarily around both long-term growth rate and discount rate assumptions. Our sensitivity analyses include several combinations of reasonably possible scenarios with regard to these assumptions. However, we consistently test a one percent movement in both our long-term growth rate and discount rate assumptions. When applying these sensitivity analyses, we noted that the fair value was less than the underlying book value for one of our reporting units with goodwill of approximately \$109 million at October 1, 2012 (approximately 1.5% of our total goodwill).

Even though our sensitivity analyses, based upon reasonably possible adverse changes in assumptions as one of our reporting units showed a potential shortfall, we believe it was not reasonably likely that an impairment would occur in the next twelve months from that date as management has the ability to execute certain productivity and other actions in order to increase the results of operations and cash flows of our reporting units. While management believes that these sensitivity analyses provide a reasonable basis on which to evaluate the recovery of our goodwill, other facts or circumstances may arise that could impact the impairment assessment and therefore these analyses should not be used as a sole predictor of impairment.

The impairment test for other indefinite-lived intangible assets consists of a comparison of the fair value of the intangible asset with its carrying amount. If the carrying amount of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. The estimates of fair value of trade names and trademarks are determined using a “relief from royalty” discounted cash flow valuation methodology. Significant assumptions inherent in this methodology include estimates of royalty rates and discount rates. Discount rate assumptions are based on an assessment of the risk inherent in the respective intangible assets. Assumptions about royalty rates are based on the rates at which comparable trade names and trademarks are being licensed in the marketplace.

Pension Costs

We provide a number of retirement benefits to our employees, including defined benefit pension plans and post-retirement medical plans. Pension costs, in respect of defined benefit pension plans, primarily represent the increase in the actuarial present value of the obligation for pension benefits based on employee service during the year and the interest on this obligation in respect of employee service in previous years, net of the expected return on plan assets. Differences between this expected return and the actual return on these plan assets and actuarial changes are not recognized in the statement of operations, unless the accumulated differences and changes exceed a certain threshold. The excess is amortized and charged to the statement of operations over, at the maximum, the average remaining term of employee service. We recognize obligations for contributions to defined contribution pension plans as expenses in the statement of operations as they are incurred.

The determination of benefit obligations and expenses is based on actuarial models. In order to measure benefit costs and obligations using these models, critical assumptions are made with regard to the discount rate,

the expected return on plan assets and the assumed rate of compensation increases. We provide retiree medical benefits to a limited number of participants in the U.S. and have ceased to provide retiree health care benefits to certain of our Dutch retirees. Therefore, retiree medical care cost trend rates are not a significant driver of our post retirement costs. Management reviews these critical assumptions at least annually. Other assumptions involve demographic factors such as turnover, retirement and mortality rates. Management reviews these assumptions periodically and updates them as necessary.

The discount rate is the rate at which the benefit obligations could be effectively settled. For our U.S. plans, the discount rate is based on a bond portfolio that includes only long-term bonds with an Aa rating, or equivalent, from a major rating agency. For the Dutch and other non-U.S. plans, the discount rate is set by reference to market yields on high-quality corporate bonds. We believe the timing and amount of cash flows related to the bonds in these portfolios are expected to match the estimated payment benefit streams of our plans.

To determine the expected long-term rate of return on pension plan assets, we consider, for each country, the structure of the asset portfolio and the expected rates of return for each of the components. For our U.S. plans, a 50 basis point decrease in the expected return on assets would increase pension expense on our principal plans by approximately \$1 million per year. A similar 50 basis point decrease in the expected return on assets would increase pension expense on our principal Dutch plans by approximately \$3 million per year. We assumed that the weighted-averages of long-term returns on our pension plans were 6.2%, 6.3% and 6.5 % for the years ended December 31, 2012, 2011 and 2010, respectively. The actual return on plan assets will vary year to year from this assumption. Although the actual return on plan assets will vary from year to year, we believe it is appropriate to use long-term expected forecasts in selecting our expected return on plan assets. As such, there can be no assurance that our actual return on plan assets will approximate the long-term expected forecasts.

Income Taxes

We have a presence in approximately 100 countries. We have completed many material acquisitions and divestitures which have generated complex tax issues requiring management to use its judgment to make various tax determinations. We try to organize the affairs of our subsidiaries in a tax efficient manner, taking into consideration the jurisdictions in which we operate. Although we are confident that tax returns have been appropriately prepared and filed, there is risk that additional tax may be assessed on certain transactions or that the deductibility of certain expenditures may be disallowed for tax purposes. Our policy is to estimate tax risk to the best of our ability and provide accordingly for those risks and take positions in which a high degree of confidence exists that the tax treatment will be accepted by the tax authorities. The policy with respect to deferred taxation is to provide in full for temporary differences using the liability method.

Deferred tax assets and deferred tax liabilities are computed by assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. The carrying value of deferred tax assets is adjusted by a valuation allowance to the extent that these deferred tax assets are not considered to be realized on a more likely than not basis. Realization of deferred tax assets is based, in part, on our judgment and various factors including reversal of deferred tax liabilities, our ability to generate future taxable income in jurisdictions where such assets have arisen and potential tax planning strategies. Valuation allowances are recorded in order to reduce the deferred tax assets to the amount expected to be realized in the future.

Long-Lived Assets

We are required to assess whether the value of our long-lived assets, including our buildings, improvements, technical and other equipment, and amortizable intangible assets have been impaired whenever events or changes in circumstances indicate that the carrying amount of the assets might not be recoverable. We do not perform a periodic assessment of assets for impairment in the absence of such information or indicators. Conditions that would necessitate an impairment assessment include a significant decline in the observable market value of an asset, a significant change in the extent or manner in which an asset is used or a significant adverse change that

would indicate that the carrying amount of an asset or group of assets is not recoverable. Recoverability of assets that are held and used is measured by comparing the sum of the future undiscounted cash flows expected to be derived from an asset (or a group of assets) to their carrying value. If the carrying value of the asset (or the group of assets) exceeds the sum of the future undiscounted cash flows, impairment is considered to exist. If impairment is considered to exist based on undiscounted cash flows, the impairment charge is measured using an estimation of the assets' fair value, typically using a discounted cash flow method. The identification of impairment indicators, the estimation of future cash flows and the determination of fair values for assets (or groups of assets) requires us to make significant judgments concerning the identification and validation of impairment indicators, expected cash flows and applicable discount rates. These estimates are subject to revision as market conditions and our assessments change. No impairment indicators were noted for the years ended December 31, 2012, 2011 and 2010.

We capitalize software development costs with respect to major internal use software initiatives or enhancements. The costs are capitalized from the time that the preliminary project stage is completed, and we consider it probable that the software will be used to perform the function intended until the time the software is placed in service for its intended use. Once the software is placed in service, the capitalized costs are generally amortized over periods of three to seven years. If events or changes in circumstances indicate that the carrying value of software may not be recovered, a recoverability analysis is performed based on estimated undiscounted cash flows to be generated from the software in the future. If the analysis indicates that the carrying value is not recoverable from future cash flows, the software cost is written down to estimated fair value and an impairment is recognized. These estimates are subject to revision as market conditions and as our assessments change.

Factors Affecting Nielsen's Financial Results

Acquisitions and Investments in Affiliates

For the year ended December 31, 2012, we paid cash consideration of \$160 million associated with both current period and previously executed acquisitions, net of cash acquired. Had the current period acquisitions occurred as of January 1, 2012, the impact on our consolidated results of operations would not have been material.

For the year ended December 31, 2011, we paid cash consideration of \$123 million associated with both current period and previously executed acquisitions, net of cash acquired. Had that period's acquisitions occurred as of January 1, 2011, the impact on our consolidated results of operations would not have been material.

For the year ended December 31, 2010, we paid cash consideration of \$55 million associated with both current period and previously executed acquisitions, net of cash acquired. Had that period's acquisitions occurred as of January 1, 2010, the impact on our consolidated results of operations would not have been material.

Transactions with Sponsors

In connection with the Acquisition, certain of our subsidiaries and the Sponsors entered into Advisory Agreements (the "Sponsor Advisory Agreements"), which provided for an annual management fee, in connection with planning, strategy, oversight and support to management, and were payable quarterly and in advance to each Sponsor, on a pro rata basis, for the eight year duration of the agreements, as well as reimbursements for each Sponsor's respective out-of-pocket expenses in connection with the management services provided under the agreement (the "Sponsor Advisory Fees").

On January 31, 2011, each of our subsidiaries party to the Sponsor Advisory Agreements agreed, along with the Sponsors, to terminate all such agreements in exchange for a settlement of \$102 million and we recorded a charge of \$61 million (net of tax of \$41 million). The pre-tax amount of this charge was recorded as a component of selling, general and administrative expenses in our consolidated statement of operations. We recorded \$12 million in selling, general and administrative expenses related to management fees, travel and consulting attributable to a number of the Sponsors for the year ended December 31, 2010.

Foreign Currency

Our financial results are reported in U.S. dollars and are therefore subject to the impact of movements in exchange rates on the translation of the financial information of individual businesses whose functional currencies are other than U.S. dollars. Our principal foreign exchange revenue exposure is spread across several currencies, primarily the Euro. The table below sets forth the profile of our revenue by principal currency.

	Year ended December 31, 2012	Year ended December 31, 2011	Year ended December 31, 2010
U.S. Dollar	52%	50%	52%
Euro	12%	14%	14%
Other Currencies	<u>36%</u>	<u>36%</u>	<u>34%</u>
Total	100%	100%	100%

As a result, fluctuations in the value of foreign currencies relative to the U.S. dollar impact our operating results. Impacts associated with fluctuations in foreign currency are discussed in more detail under “Item 7A.—Quantitative and Qualitative Disclosures about Market Risk.” In countries with currencies other than the U.S. dollar, assets and liabilities are translated into U.S. dollars using end-of-period exchange rates; revenues, expenses and cash flows are translated using average rates of exchange. The average U.S. dollar to Euro exchange rate was \$1.29 to €1.00, \$1.39 to €1.00 and \$1.33 to €1.00 for the years ended December 31, 2012, 2011 and 2010, respectively. Constant currency growth rates used in the following discussion of results of operations eliminate the impact of year-over-year foreign currency fluctuations.

We have operations in both our Buy and Watch segments in Venezuela and our functional currency for these operations was the Venezuelan bolivares fuertes. Venezuela’s currency was considered hyperinflationary as of January 1, 2010 and further, in January 2010, Venezuela’s currency was devalued and a new currency exchange rate system was announced. We evaluated the new exchange rate system and concluded that our local currency transactions will be denominated in U.S. dollars effective as of January 1, 2010 and until Venezuela’s currency is deemed to be non-hyperinflationary. We recorded a charge of \$7 million associated with the currency devaluation in January 2010 in our foreign exchange transaction (losses)/gains, net line item in the consolidated statement of operations. In June 2010, a further revision to the currency exchange rate system was made and in December 2010, the government of Venezuela eliminated the preferential exchange rate. Neither the impact of the hyperinflationary accounting or the subsequent changes to the exchange rate system had a material impact on our consolidated results of operations for the years ended December 31, 2012, 2011, or 2010.

In February 2013, Venezuela’s currency was further devalued by 32%, which will result in a charge of approximately \$12 million in the first quarter of 2013 in the foreign exchange transaction (losses)/gains, net line in the consolidated statement of operations.

We evaluate our results of operations on both an as reported and a constant currency basis. The constant currency presentation is a non-GAAP financial measure, which excludes the impact of fluctuations in foreign currency exchange rates. We believe providing constant currency information provides valuable supplemental information regarding our results of operations, consistent with how we evaluate our performance. We calculate constant currency percentages by converting our prior-period local currency financial results using the current period foreign currency exchange rates and comparing these adjusted amounts to our current period reported results. This calculation may differ from similarly-titled measures used by others and, accordingly, the constant currency presentation is not meant to be a substitution for recorded amounts presented in conformity with GAAP nor should such amounts be considered in isolation.

Results of Operations – (Years Ended December 31, 2012, 2011 and 2010)

The following table sets forth, for the periods indicated, the amounts included in our Consolidated Statements of Operations:

(IN MILLIONS)	Year Ended December 31,		
	2012	2011	2010
Revenues	\$5,612	\$5,532	\$5,126
Cost of revenues, exclusive of depreciation and amortization shown separately below	2,278	2,237	2,129
Selling, general and administrative expenses, exclusive of depreciation and amortization shown separately below	1,778	1,888	1,648
Depreciation and amortization	520	529	558
Restructuring charges	84	84	61
Operating income	952	794	730
Interest income	4	6	5
Interest expense	(413)	(477)	(660)
Loss on derivative instruments	—	(1)	(27)
Foreign currency exchange transaction (losses)/gains, net	(17)	(9)	136
Other expense, net	(118)	(209)	(81)
Income from continuing operations before income taxes and equity in net income of affiliates	408	104	103
(Provision)/benefit for income taxes	(140)	(22)	46
Equity in net income of affiliates	5	3	5
Income from continuing operations	273	85	154
Income/(loss) from discontinued operations, net of tax	—	1	(22)
Net income	273	86	132
Net income attributable to noncontrolling interests	—	2	2
Net income attributable to Nielsen stockholders	\$ 273	\$ 84	\$ 130

Net Income to Adjusted EBITDA Reconciliation

We define Adjusted EBITDA as net income or loss from our consolidated statements of operations before interest income and expense, income taxes, depreciation and amortization, restructuring charges, goodwill and intangible asset impairment charges, stock-based compensation expense and other non-operating items from our consolidated statements of operations as well as certain other items specifically described below.

Adjusted EBITDA is not a presentation made in accordance with GAAP, and our use of the term Adjusted EBITDA may vary from the use of similarly-titled measures by others in our industry due to the potential inconsistencies in the method of calculation and differences due to items subject to interpretation.

We use Adjusted EBITDA to measure our performance from period to period both at the consolidated level as well as within our operating segments, to evaluate and fund incentive compensation programs and to compare our results to those of our competitors. In addition to Adjusted EBITDA being a significant measure of performance for management purposes, we also believe that this presentation provides useful information to investors regarding financial and business trends related to our results of operations and that when non-GAAP financial information is viewed with GAAP financial information, investors are provided with a more meaningful understanding of our ongoing operating performance.

Adjusted EBITDA should not be considered as an alternative to net income, operating income, cash flows from operating activities or any other performance measures derived in accordance with GAAP as measures of operating

performance or cash flows as measures of liquidity. Adjusted EBITDA has important limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP.

The below table presents a reconciliation from net income to Adjusted EBITDA for the years ended December 31, 2012, 2011 and 2010:

<u>(IN MILLIONS)</u>	<u>Year Ended December 31,</u>		
	<u>2012</u>	<u>2011</u>	<u>2010</u>
Net income	\$ 273	\$ 86	\$ 132
(Income)/loss from discontinued operations, net	—	(1)	22
Interest expense, net	409	471	655
Provision/(benefit) for income taxes	140	22	(46)
Depreciation and amortization	520	529	558
EBITDA	<u>1,342</u>	<u>1,107</u>	<u>1,321</u>
Equity in net income of affiliates	(5)	(3)	(5)
Other non-operating expense/(income), net	135	219	(28)
Restructuring charges	84	84	61
Stock-based compensation expense	34	27	18
Other items ^(a)	12	112	44
Adjusted EBITDA	<u>\$1,602</u>	<u>\$1,546</u>	<u>\$1,411</u>

- (a) For the year ended December 31, 2012, other items consists primarily of deal related costs. For the year ended December 31, 2011, other items primarily consist of Sponsor Advisory Fees (including termination payments of \$102 million), costs related to public offerings and other transaction-related costs. For the year ended December 31, 2010, other items primarily consist of Sponsor Advisory Fees of \$12 million, Transformation Initiative and other dual running costs of \$16 million and consulting and other costs of \$16 million associated with information technology infrastructure transformation and fees associated with certain consulting arrangements.

Consolidated Results for the Year Ended December 31, 2012 Compared to the Year Ended December 31, 2011

Revenues

Revenues increased 1.4% to \$5,612 million for the year ended December 31, 2012 from \$5,532 million for the year ended December 31, 2011, or 3.9% on a constant currency basis, which excludes a 2.5% unfavorable impact of changes in foreign currency exchange rates. Revenues within our Buy segment increased 0.3% (3.9% on a constant currency basis) while revenues within our Watch segment increased 3.3% (4.3% on a constant currency basis), and revenues within our Expositions increased 2.2% (2.2% on a constant currency basis).

Cost of Revenues, Exclusive of Depreciation and Amortization

Cost of revenues increased 1.8% to \$2,278 million for the year ended December 31, 2012 from \$2,237 million for the year ended December 31, 2011, or 4.5% on a constant currency basis, excluding a 2.7% favorable impact of changes in foreign currency exchange rates. Costs within our Buy segment increased 3.1% (7.0% on a constant currency basis) due primarily to investments in the continued global expansion of our services and higher retail measurement costs, substantially offset by favorable impact of changes in foreign currency exchange rates. Costs within our Watch segment decreased 0.1% (an increase of 0.8% on a constant currency basis) as the impact of productivity initiatives and the favorable impact of foreign currency exchange rates offset increases in spending on product portfolio management initiatives. Corporate costs decreased by approximately \$3 million in 2012 as compared to 2011 driven by cost savings initiatives.

Selling, General and Administrative Expenses, Exclusive of Depreciation and Amortization

Selling, general and administrative (“SG&A”) expenses decreased 5.8% to \$1,778 million for the year ended December 31, 2012 from \$1,888 million for the year ended December 31, 2011, or a decrease of 3.5% on a constant currency basis, excluding a 2.3% favorable impact of changes in foreign currency exchange rates. Costs within our Buy segment decreased 1.9% (an increase of 1.3% on a constant currency basis) due primarily to the impact of productivity initiatives and the favorable impact of changes in foreign currency exchange rates, which more than offset increases in client service costs and other investments associated with the global expansion of our services. Costs within our Watch segment increased 1.9% (3.1% on a constant currency basis) due primarily to increased investment in product development initiatives. Corporate costs decreased by \$88 million due to a \$102 million charge for the termination and settlement of the Sponsor Advisory Agreements recorded in 2011 offset by higher deal related fees in 2012.

Depreciation and Amortization

Depreciation and amortization expense was \$520 million for the year ended December 31, 2012 as compared to \$529 million for the year ended December 31, 2011. Depreciation and amortization expense associated with tangible and intangibles assets acquired in business combinations decreased to \$166 million for the year ended December 31, 2012 from \$182 million for the year ended December 31, 2011 resulting from lower amortization on purchase price adjustments from the acquisition for certain assets that became fully amortized. The decline was primarily offset by increases in depreciation and amortization expense associated with the timing of capital expenditures versus the prior year.

Restructuring Charges

We recorded \$84 million in restructuring charges for the year ended December 31, 2012, of which \$5 million related to property lease termination charges with the remainder relating to severance costs associated with employee terminations.

We recorded \$84 million in restructuring charges for the year ended December 31, 2011 primarily related to severance costs associated with employee terminations.

Operating Income

Operating income for the year ended December 31, 2012 was \$952 million compared to operating income of \$794 million for the year ended December 31, 2011. Operating income of \$409 million for the year ended December 31, 2012 within our Buy segment decreased from \$432 million for the year ended December 31, 2011. Operating income within our Watch segment of \$537 million for the year ended December 31, 2012 increased from \$462 million for the year ended December 31, 2011. Operating income within our Expositions segment was \$72 million for the year ended December 31, 2012 as compared to \$60 million for the year ended December 31, 2011. Corporate operating expenses decreased to \$66 million for the year ended December 31, 2012 from \$160 million for the year ended December 31, 2011.

Interest Expense

Interest expense was \$413 million for the year ended December 31, 2012 compared to \$477 million for the year ended December 31, 2011. The decline primarily related to the impact of debt retirements from our initial public offering of common stock in 2011, lower interest cost on our derivative instruments as well as our debt refinancing of our 11.50% Senior Notes and our 8.50% Senior Secured Term Loan with our 4.50% Senior Notes in the fourth quarter of 2012.

Foreign Currency Exchange Transaction (Losses)/Gains, Net

Foreign currency exchange transaction (losses)/gains, net, represent the net gain or loss on revaluation of external debt, intercompany loans and other receivables and payables. Fluctuations in the value of foreign

currencies relative to the U.S. Dollar, particularly the Euro, have a significant effect on our operating results. The average U.S. Dollar to Euro exchange rate was \$1.29 to €1.00 for the year ended December 31, 2012 as compared to \$1.39 to €1.00 for the year ended December 31, 2011.

We incurred \$17 million and \$9 million in foreign currency exchange losses for the year ended December 31, 2012 and 2011, respectively. The loss in 2012 resulted primarily from fluctuations in certain currencies associated with a portion of our intercompany loan portfolio. The loss in 2011 resulted primarily from fluctuations in certain currencies associated with a portion of our intercompany loan portfolio partially offset by the fluctuation in Japanese Yen as compared to the Euro applied to a debenture loan.

Other Expense, Net

The \$118 million of other expense, net amount for the year ended December 31, 2012, consists of charges of \$115 million associated with the redemption and retirement of our 11.50% Senior Notes due 2016 and the prepayment of our 8.50% Senior Secured Term Loan due 2017, a \$6 million write-down of an investment in an equity security, and a \$6 million charge associated with extinguishment of our term loan due in 2013, partially offset by a \$10 million gain on the acquisition of a previously nonconsolidated business.

The \$209 million of other expense, net amount for the year ended December 31, 2011 includes charges of \$231 million associated with the redemption and subsequent retirement of certain indebtedness through the use of proceeds generated from our initial public offering of common stock and concurrent offering of mandatory convertible subordinated bonds. The charges related to the associated redemption premiums and recognition of previously deferred financing costs. These charges were partially offset by \$10 million of other gains primarily related to an acquisition of the remaining interest of a previously nonconsolidated subsidiary and \$12 million of other gains, primarily relating to the settlement of certain patent infringement matters.

Income from Continuing Operations Before Income Taxes and Equity in Net Income of Affiliates

Income was \$408 million for the year ended December 31, 2012 compared to \$104 million for the year ended December 31, 2011 due primarily to the consolidated results mentioned above.

Income Taxes

The effective tax rates for the years ended December 31, 2012 and 2011 were 34% and 21%, respectively.

The effective tax rate for the year ended December 31, 2012 was higher than the statutory expense rate due to the impact of distributions from foreign subsidiaries, tax rate differences in the other jurisdictions where we file tax returns, US state and local and other withholding taxes, offset by the favorable impact of certain financing activities, the net release of valuation allowances and changes in deferred tax rates. The effective tax rate for the year ended December 31, 2011 was lower than the statutory rate primarily due to the favorable effect of financing activities, release of valuation allowances and the impact of the tax rate differences in the other jurisdictions where we file tax returns.

At December 31, 2012 and 2011, we had uncertain tax positions of \$100 million and \$96 million, respectively. We also have accrued interest and penalties associated with these uncertain tax positions as of December 31, 2012 and 2011 of \$40 million and \$29 million, respectively.

Estimated interest and penalties related to the underpayment of income taxes is classified as a component of our provision or benefit for income taxes. It is reasonably possible that a reduction in a range of \$6 million to \$14 million of uncertain tax positions may occur within the next twelve months as a result of projected resolutions of worldwide tax disputes.

Our future effective tax rates could be adversely affected by earnings being lower than anticipated in countries where statutory rates are lower and earnings being higher than anticipated in countries where statutory rates are higher, by changes in the valuation of our deferred tax assets, or by changes in tax laws, regulations, accounting principles, or interpretations thereof.

Adjusted EBITDA

Adjusted EBITDA increased 3.6% to \$1,602 million for the year ended December 31, 2012 from \$1,546 million for the year ended December 31, 2011, or 5.7% on a constant currency basis. Our Adjusted EBITDA margin increased to 28.55% for the year ended December 31, 2012 from 27.95% for the year ended December 31, 2011. See “Results of Operations – (Years Ended December 31, 2012, 2011 and 2010)” for the reconciliation of net income to Adjusted EBITDA.

Consolidated Results for the Year Ended December 31, 2011 Compared to the Year Ended December 31, 2010

Revenues

Our revenues increased 7.9% to \$5,532 million for the year ended December 31, 2011 from \$5,126 million for the year ended December 31, 2010, or 5.6% on a constant currency basis, which excludes a 2.3% favorable impact of changes in foreign currency exchange rates. These increases were driven by a 9.7% increase within our Buy segment (6.7% on a constant currency basis) and a 5.1% increase within our Watch segment (3.8% on a constant currency basis), and a 6.5% increase in our Expositions segment (6.5% on a constant currency basis).

Cost of Revenues, Exclusive of Depreciation and Amortization

Cost of revenues increased 5.1% to \$2,237 million for the year ended December 31, 2011 from \$2,129 million for the year ended December 31, 2010, or 2.8% on a constant currency basis, excluding a 2.3% unfavorable impact of changes in foreign currency exchange rates. These increases resulted from a 9.7% increase within our Buy segment (6.7% on a constant currency basis) due to the global expansion of our services. Costs within our Watch segment decreased 1.7% (3.2% on a constant currency basis) due primarily to productivity savings and product portfolio management initiatives in our Television measurement business. Corporate costs decreased by approximately \$8 million in 2011 as compared to 2010 driven by cost savings initiatives.

Selling, General and Administrative Expenses, Exclusive of Depreciation and Amortization

Selling, general and administrative (“SG&A”) expenses increased 14.6% to \$1,888 million for the year ended December 31, 2011 from \$1,648 million for the year ended December 31, 2010, or 11.8% on a constant currency basis, excluding a 2.8% unfavorable impact of changes in foreign currency exchange rates. These increases were driven by an 11.4% increase within our Buy segment (8.3% on a constant currency basis) due to increases in data acquisition and client service costs associated with the global expansion of our services as well as a 7.4% increase within our Watch segment (5.5% on a constant currency basis) due to increased investment in audience measurement and advertiser solutions initiatives. Corporate costs increased by approximately \$78 million primarily as a result of a \$102 million charge for the termination and settlement of the Sponsor Advisory Agreements partially offset by cost savings initiatives.

Depreciation and Amortization

Depreciation and amortization expense was \$529 million for the year ended December 31, 2011 as compared to \$558 million for the year ended December 31, 2010. Depreciation and amortization expense associated with tangible and intangibles assets acquired in business combinations decreased to \$182 million for the year ended December 31, 2011 from \$215 million for the year ended December 31, 2010 resulting from lower amortization on purchase price adjustments from the Acquisition for certain software and other assets that became fully amortized. This decline was partially offset by increases in depreciation and amortization expense associated with additional capital expenditures and acquisitions.

Restructuring Charges

Other Productivity Initiatives

We recorded \$84 million in restructuring charges associated with productivity initiatives during the year ended December 31, 2011. These amounts primarily related to severance charges associated with employee terminations.

We recorded \$70 million in restructuring charges associated with productivity initiatives during the year ended December 31, 2010. Of these amounts, approximately \$11 million related to property lease termination charges with the remainder relating to severance charges associated with employee terminations.

Transformation Initiative

The Transformation Initiative has been completed in all aspects as of the year ended December 31, 2011. We recorded net credits of \$9 million in restructuring charges, associated with adjustments to previously established liabilities for employee severance and other benefits for the year ended December 31, 2010.

Operating Income

Operating income for the year ended December 31, 2011 was \$794 million compared to operating income of \$730 million for the year ended December 31, 2010. Operating income of \$432 million for the year ended December 31, 2011 within our Buy segment increased from \$414 million for the year ended December 31, 2010. Operating income within our Watch segment of \$462 million for the year ended December 31, 2011 increased from \$367 million for the year ended December 31, 2010. Operating income within our Expositions segment was \$60 million for the year ended December 31, 2011 as compared to \$49 million for the year ended December 31, 2010. Corporate operating expenses increased to \$160 million for the year ended December 31, 2011 from \$100 million for the year ended December 31, 2010.

Interest Expense

Interest expense was \$477 million for the year ended December 31, 2011 compared to \$660 million for the year ended December 31, 2010. The decline related to the impact of debt retirements and lower interest cost on derivative instruments, partially offset by increases in interest cost associated with our senior secured term loans and from the issuance of our mandatory convertible subordinated bonds.

Loss on Derivative Instruments

The loss on derivative instruments was \$1 million for the year ended December 31, 2011 compared to a loss of \$27 million for the year ended December 31, 2010. The reduction in losses resulted from the maturity of \$2.3 billion in notional amount of interest rate swaps between February 2010 and November 2010 for which hedge accounting was discontinued in February 2009.

Foreign Currency Exchange Transaction (Losses)/Gains, Net

Foreign currency exchange transaction (losses)/gains, net, represent the net gain or loss on revaluation of external debt, intercompany loans and other receivables and payables. Fluctuations in the value of foreign currencies relative to the U.S. Dollar have a significant effect on our operating results, particularly the Euro. The average U.S. Dollar to Euro exchange rate was \$1.39 to €1.00 for the year ended December 31, 2011 as compared to \$1.33 to €1.00 for the year ended December 31, 2010.

Foreign currency exchange resulted in a \$9 million loss for the year ended December 31, 2011 compared to a gain of \$136 million for the year ended December 31, 2010. The loss in 2011 resulted primarily from fluctuations in certain currencies associated with a portion of our intercompany loan portfolio and the fluctuation in Japanese Yen as compared to the Euro applied to our Japanese Yen denominated debenture. The gain in 2010 resulted primarily from the fluctuation in the value of the U.S. Dollar against the Euro applied to certain of our Euro-denominated senior secured term loans that were subsequently designated as net investment hedges and debentures that were subsequently retired as well as fluctuations in certain currencies including the Euro and Canadian dollar associated with a portion of our intercompany loan portfolio.

Other Expense, Net

Other expense, net of \$209 million for the year ended December 31, 2011 includes charges of approximately \$231 million associated with the redemption and subsequent retirement of certain indebtedness

through the use of proceeds generated from our initial public offering of common stock and concurrent offering of mandatory convertible subordinated bonds. The charges related to the associated redemption premiums and recognition of previously deferred financing costs. These charges were partially offset by \$10 million of other gains primarily related to an acquisition of the remaining interest of a previously nonconsolidated subsidiary and \$12 million of other gains, primarily relating to the settlement of patent infringement matters.

Other expense, net of \$81 million for the year ended December 31, 2010 includes net charges of approximately \$90 million associated with the redemption and subsequent retirement of all \$870 million aggregate principal amount of our 10.00% Senior Notes due 2014 at a price of 105% of the principal amount redeemed as well as all €150 million aggregate principal amount of our 9% Senior Notes due 2014 at a price of 104.5% of the amount redeemed. The charges related to the associated redemption premiums and recognition of previously deferred financing costs. These charges were partially offset by gains attributable to business divestitures.

Income from Continuing Operations Before Income Taxes and Equity in Net Income of Affiliates

Income was \$104 million for the year ended December 31, 2011 compared to \$103 million for the year ended December 31, 2010.

Income Taxes

The effective tax rates for the years ended December 31, 2011 and 2010 were 21% and 45% (benefit), respectively. The effective tax rate for the year ended December 31, 2011 was lower than the statutory rate primarily due to the favorable effect of financing activities, release of valuation allowances and the impact of the tax rate differences in the other jurisdictions where we file tax returns, partially offset by withholding taxes and provision for uncertain tax positions. The effective tax rate benefit for the year ended December 31, 2010 was lower than the statutory rate primarily due to the favorable effect of certain foreign currency exchange gains, financing activities, release of valuation allowances and the impact of the tax rate differences in the other jurisdictions where we file tax returns, partially offset by withholding taxes.

At December 31, 2011 and 2010, we had uncertain tax positions of \$96 million and \$114 million, respectively. We also have accrued interest and penalties associated with these uncertain tax positions as of December 31, 2011 and 2010 of \$29 million and \$25 million, respectively. Estimated interest and penalties related to the underpayment of income taxes is classified as a component of our provision or benefit for income taxes. It is reasonably possible that a reduction in a range of \$8 million to \$19 million of uncertain tax positions may occur within the next twelve months as a result of projected resolutions of worldwide tax disputes.

Our future effective tax rates could be adversely affected by earnings being lower than anticipated in countries where statutory rates are lower and earnings being higher than anticipated in countries where statutory rates are higher, by changes in the valuation of our deferred tax assets, or by changes in tax laws, regulations, accounting principles, or interpretations thereof.

Equity in Net Income of Affiliates

Equity in net income of affiliates was \$3 million for the year ended December 31, 2011 as compared to \$5 million of income for the year ended December 31, 2010.

Adjusted EBITDA

Our Adjusted EBITDA increased 9.6% to \$1,546 million for the year ended December 31, 2011 from \$1,411 million for the year ended December 31, 2010, or 7.8% on a constant currency basis. Our Adjusted EBITDA margin increased to 27.95% for the year ended December 31, 2011 from 27.52% for the year ended December 31, 2010. See "Results of Operations – (Years Ended December 31, 2012, 2011 and 2010)" for the reconciliation of net income to Adjusted EBITDA.

Business Segment Results for the Year Ended December 31, 2012 Compared to the Year Ended December 31, 2011

Revenues

The table below sets forth our segment revenue performance data for the year ended December 31, 2012 compared to the year ended December 31, 2011, both on an as-reported and constant currency basis.

<u>(IN MILLIONS)</u>	<u>Year Ended December 31, 2012</u>	<u>Year Ended December 31, 2011</u>	<u>% Variance 2012 vs. 2011 Reported</u>	<u>Year Ended December 31, 2011 Constant Currency</u>	<u>% Variance 2012 vs. 2011 Constant Currency</u>
Revenues by segment					
Buy	\$3,420	\$3,409	0.3%	\$3,293	3.9%
Watch	2,009	1,944	3.3%	1,927	4.3%
Expositions	183	179	2.2%	179	2.2%
Total	<u>\$5,612</u>	<u>\$5,532</u>	<u>1.4%</u>	<u>\$5,399</u>	<u>3.9%</u>

Buy Segment Revenues

Revenues increased 0.3% to \$3,420 million for the year ended December 31, 2012 from \$3,409 million for the year ended December 31, 2011, or 3.9% on a constant currency basis. Revenues from Developing markets increased 1.3% (7.0% on a constant currency basis) and revenues from Developed markets decreased 0.1% for the period (an increase of 2.4% on a constant currency basis).

Revenues from Information services increased 2.4% to \$2,595 million for the year ended December 31, 2012 from \$2,534 million for the year ended December 31, 2011, or 6.3% on a constant currency basis, excluding a 3.9% unfavorable impact of changes in foreign currency exchange rates. Revenues from Developed markets increased 2.1% (4.9% on a constant currency basis) as growth in retail measurement services in North America was offset in part by a soft Western Europe market as well as the unfavorable impact of changes in foreign currency exchange rates. Revenues from Developing markets increased 3.0% during the period (an increase of 9.1% on a constant currency basis) as growth driven by the continued expansion of both our retail measurement and consumer panel services to both new and existing clients and new markets was substantially offset by the unfavorable impact of changes in foreign currency exchange rates.

Revenues from Insights services decreased 5.7% to \$825 million for the year ended December 31, 2012 from \$875 million for the year ended December 31, 2011, or a decrease of 3.1% on a constant currency basis, excluding a 2.6% unfavorable impact of changes in foreign currency exchange rates. Growth in North America of 2% was more than offset by the unfavorable impact of changes in foreign currency exchange rates and decreases in discretionary client spending in Western Europe.

Watch Segment Revenues

Revenues increased 3.3% to \$2,009 million for the year ended December 31, 2012 from \$1,944 million for the year ended December 31, 2011, or 4.3% on a constant currency basis. Television measurement grew 4.8% (5.4% on a constant currency basis) driven by increases in spending from both new and existing clients.

Expositions Segment Revenues

Revenues increased 2.2% to \$183 million for the year ended December 31, 2012 from \$179 million for the year ended December 31, 2011. These increases primarily relate to growth driven by certain sectors of existing shows.

Business Segment Profitability

We do not allocate items below operating income/(loss) to our business segments and therefore the tables below set forth a reconciliation of operating income/(loss) at the business segment level for the years ended December 31, 2012 and 2011, adjusting for certain items affecting operating income/(loss), such as restructuring charges, depreciation and amortization, stock-based compensation expense and certain other items described below resulting in a presentation of our non-GAAP business segment profitability. Non-GAAP business segment profitability provides useful supplemental information to management and investors regarding financial and business trends related to our results of operations. When this non-GAAP financial information is viewed with our GAAP financial information, investors are provided with a meaningful understanding of our ongoing operating performance. It is important to note that the non-GAAP business segment profitability corresponds in total to our consolidated Adjusted EBITDA described within our consolidated results of operations above, which our chief operating decision making group and other members of management use to measure our performance from period to period both at the consolidated level as well as within our operating segments, to evaluate and fund incentive compensation programs and to compare our results to those of our competitors. These non-GAAP measures should not be considered as an alternative to net income, operating income, cash flows from operating activities or any other performance measures derived in accordance with GAAP as measures of operating performance or cash flows as measures of liquidity. These non-GAAP measures have important limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP.

Buy Segment Profitability

Operating income was \$409 million for the year ended December 31, 2012 as compared to \$432 million for the year ended December 31, 2011 as the increase in revenue mentioned above was more than offset by the unfavorable impact of changes in foreign currency exchange rates, investments in Developing markets expansion, increases in retail measurement costs, and higher depreciation and amortization expense. Non-GAAP business segment income increased 2.2% on a constant currency basis.

Watch Segment Profitability

Operating income was \$537 million for the year ended December 31, 2012 as compared to \$462 million for the year ended December 31, 2011. The increase was primarily driven by the revenue performance discussed above and decreased depreciation and amortization expense. This performance was offset in part by increased investment in audience measurement initiatives, the unfavorable impact of changes in foreign currency exchange rates and higher restructuring charges. Non-GAAP business segment income increased 8.4% on a constant currency basis.

Expositions Segment Profitability

Operating income was \$72 million for the year ended December 31, 2012 as compared to \$60 million for the year ended December 31, 2011 driven primarily by the revenue performance discussed above, as well as lower restructuring charges and depreciation and amortization expense. Non-GAAP business segment income increased 8.0% on a constant currency basis.

Corporate Expenses and Eliminations

Operating expenses were \$66 million for the year ended December 31, 2012 as compared to \$160 million for the year ended December 31, 2011 due primarily to the \$102 million charge for the termination and settlement of the Sponsor Advisory Agreements in 2011, partially offset by additional deal related costs in 2012.

Business Segment Results for the Year Ended December 31, 2011 Compared to the Year Ended December 31, 2010

Revenues

The table below sets forth our segment revenue growth data for the year ended December 31, 2011 compared to the year ended December 31, 2010, both on an as-reported and constant currency basis.

<u>(IN MILLIONS)</u>	<u>Year Ended December 31, 2011</u>	<u>Year Ended December 31, 2010</u>	<u>% Variance 2011 vs. 2010 Reported</u>	<u>Year Ended December 31, 2010 Constant Currency</u>	<u>% Variance 2011 vs. 2010 Constant Currency</u>
Revenues by segment					
Buy	\$3,409	\$3,108	9.7%	\$3,196	6.7%
Watch	1,944	1,850	5.1%	1,873	3.8%
Expositions	179	168	6.5%	168	6.5%
Total	<u>\$5,532</u>	<u>\$5,126</u>	<u>7.9%</u>	<u>\$5,237</u>	<u>5.6%</u>

Buy Segment Revenues

Revenues increased 9.7% to \$3,409 million for the year ended December 31, 2011 from \$3,108 million for the year ended December 31, 2010, or 6.7% on a constant currency basis driven by a 17.8% increase in Developing markets (15.0% on a constant currency basis) and a 6.1% increase in Developed markets (3.0% on a constant currency basis), as our customers continue to expand geographically and increase their spending on analytical services.

Revenues from Information services increased 11.2% to \$2,534 million for the year ended December 31, 2011 from \$2,278 million for the year ended December 31, 2010, or 7.9% on a constant currency basis, excluding a 3.3% favorable impact of changes in foreign currency exchange rates. These increases were driven by 20.0% growth in Developing Markets (17.1% on a constant currency basis) as a result of continued expansion of both our retail measurement and consumer panel services to both new and existing customers and new markets. Revenue from Developed Markets increased 7.5% (4.0% on a constant currency basis) due primarily to growth in retail measurement services in North America from new and existing customers.

Revenues from Insights services increased 5.4% to \$875 million for the year ended December 31, 2011 from \$830 million for the year ended December 31, 2010, or 3.2% on a constant currency basis, excluding a 2.2% favorable impact of changes in foreign currency exchange rates. These increases were driven by strong growth in our Developing Markets due to increases in customer discretionary spending on new product forecasting and other analytical services, which can be cyclical in nature.

Watch Segment Revenues

Revenues increased 5.1% to \$1,944 million for the year ended December 31, 2011 from \$1,850 million for the year ended December 31, 2010, or 3.8% on a constant currency basis. Television measurement grew 4.7% driven by increases in spending from existing customers globally on both new and existing services.

Expositions Segment Revenues

Revenues increased 6.5% to \$179 million for the year ended December 31, 2011 from \$168 million for the year ended December 31, 2010. Substantially all of this growth was driven by increases in exhibitors for certain sectors of existing shows with the remaining growth driven by the impact of acquisitions, net of certain show closures.

Business Segment Profitability

We do not allocate items below operating income/(loss) to our business segments and therefore the tables below set forth a reconciliation of operating income/(loss) at the business segment level for the years ended December 31, 2011 and 2010, adjusting for certain items affecting operating income/(loss), such as restructuring charges, depreciation and amortization, stock-based compensation expense and certain other items described below resulting in a presentation of our non-GAAP business segment profitability. Non-GAAP business segment profitability provides useful supplemental information to management and investors regarding financial and business trends related to our results of operations. When this non-GAAP financial information is viewed with our GAAP financial information, investors are provided with a meaningful understanding of our ongoing operating performance. It is important to note that the non-GAAP business segment profitability corresponds in total to our consolidated Adjusted EBITDA described within our consolidated results of operations above, which our chief operating decision making group and other members of management use to measure our performance from period to period both at the consolidated level as well as within our operating segments, to evaluate and fund incentive compensation programs and to compare our results to those of our competitors. These non-GAAP measures should not be considered as an alternative to net income, operating income, cash flows from operating activities or any other performance measures derived in accordance with GAAP as measures of operating performance or cash flows as measures of liquidity. These non-GAAP measures have important limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP.

Buy Segment Profitability.

Operating income was \$432 million for the year ended December 31, 2011 as compared to \$414 million for the year ended December 31, 2010 due primarily to the revenue performance mentioned above and the favorable impact of changes in foreign currency exchange rates. This performance was offset in part by higher restructuring charges and investments in Developing Markets expansion. Non-GAAP business segment income increased 3.6% on a constant currency basis.

Watch Segment Profitability

Operating income was \$462 million for the year ended December 31, 2011 as compared to \$367 million for the year ended December 31, 2010. The increase was driven by the revenue performance discussed above, the impact of productivity initiatives and the decrease in depreciation and amortization expense associated with technology infrastructure initiatives and Local People Meters. Non-GAAP business segment income increased 10.5% on a constant currency basis.

Expositions Segment Profitability

Operating income was \$60 million for the year ended December 31, 2011 as compared to \$49 million for the year ended December 31, 2010 driven primarily by the revenue performance discussed above, as well as lower depreciation expense. Non-GAAP business segment income increased 11.5% on a constant currency basis.

Corporate Expense and Eliminations.

Operating loss was \$160 million for the year ended December 31, 2011 as compared to an operating loss of \$100 million for the year ended December 31, 2010 due primarily to the \$102 million charge for the termination and settlement of the Sponsor Advisory Agreement as well as certain costs attributable to the initial public offering of our common stock, offset by lower restructuring charges. Non-GAAP business segment loss decreased 19.2% on a constant currency basis.

Liquidity and Capital Resources

Overview

Our contractual obligations, commitments and debt service requirements over the next several years are significant. We expect that our primary source of liquidity will continue to be cash generated from operations as well as existing cash. At December 31, 2012, cash and cash equivalents were \$288 million and our total indebtedness was \$6,584 million. In addition, as of December 31, 2012 we had \$622 million available for borrowing under our senior secured revolving credit facility. Our cash interest paid for the years ended December 31, 2012, 2011 and 2010 was \$384 million, \$446 million and \$531 million, respectively.

Of the \$288 million in cash and cash equivalents, approximately \$265 million was held in jurisdictions outside the U.S. and as a result there may be tax consequences if such amounts were moved out of these

jurisdictions or repatriated to the U.S. We regularly review the amount of cash and cash equivalents held outside of the U.S. to determine the amounts necessary to fund the current operations of our foreign operations and their growth initiatives and amounts needed to service our U.S. indebtedness and related obligations.

We believe we will have available resources to meet both our short-term and long-term liquidity requirements, including our senior secured debt service. We expect the cash flow from our operations, combined with existing cash and amounts available under the revolving credit facility, will provide sufficient liquidity to fund our current obligations, projected working capital requirements, restructuring obligations, dividend payments and capital spending over the next year. In addition we may, from time to time, purchase, repay, redeem or retire any of our outstanding debt securities (including any publicly issued debt securities) in privately negotiated or open market transactions, by tender offer or otherwise.

2012 Capital Markets and Financing Transactions

In February 2012, our €30 million 6.75% EMTN matured and was repaid and in April 2012, our €50 million variable rate EMTN matured and was repaid.

In August 2006, certain of our subsidiaries entered into a senior secured credit agreement that was amended and restated in June 2010 (the "Senior Secured Credit Agreement"). In February 2012, the Senior Secured Credit Agreement was amended and restated to provide for a new five-year amortizing term loan facility in an aggregate principal amount of \$1,222 million, the proceeds from which were used to repay a corresponding amount of the existing senior secured term loans due 2013. We accounted for this as a new term loan due 2017 and an extinguishment of the amounts repaid under the existing term loan due 2013 and recorded a charge of \$6 million associated with the combined elements of this transaction as a component of other expense, net in our consolidated financial statements.

Borrowings under this new term loan facility bear interest at a rate as determined by the type of borrowing, equal to either the "base rate" or LIBOR rate, plus, in each case, an applicable margin. The applicable margin on base rate loans under this new term loan facility ranges from 0.75% to 1.50% based on a total leverage ratio. The applicable margin on LIBOR loans under this new term loan facility ranges from 1.75% to 2.50% based on the total leverage ratio. Loans under this new term loan facility mature in full in February 2017, but the maturity date shall be January 2016 if at such time there is more than \$750 million in the aggregate of existing other term loans under the Senior Secured Credit Agreement with a maturity of May 2016. The loans under this new term loan facility are required to be repaid in an amount equal to 5% of the original principal amount in the first year after the closing date, 5% in the second year, 10% in the third year, 10% in the fourth year and 70% in the fifth year (with payments in each year being made in equal quarterly installments other than the fifth year, in which payments shall be equal to 3.33% of the original principal amount of loans in each of the first three quarters and the remaining principal balance due in February 2017 (unless repayment is required in January 2016 as indicated above)). Loans under this new term loan facility are secured on a pari passu basis with our existing obligations under the Senior Secured Credit Agreement and Senior Secured Loan Agreement.

In October 2012, we issued \$800 million in aggregate principal amount of 4.50% Senior Notes due 2020 at par with cash proceeds of approximately \$788 million, net of fees and expenses. Further, in October 2012, we redeemed and subsequently retired all of our 11.50% Senior Notes due 2016 and prepaid our 8.50% Senior Secured Term Loan due 2017. The redemption and prepayment transactions resulted in a pre-tax charge of \$115 million in the fourth quarter of 2012 recorded in other expense, net in our consolidated statements of operations.

In November 2012, we entered into \$500 million in aggregate notional amount of four-year interest rate swap agreements with starting dates in November 2012. These agreements fix the LIBOR related portion of interest rates of a corresponding amount of our variable-rate debt at an average rate of 0.57%. The commencement date of these interest rate swaps coincided with the \$500 million aggregate notional amount of interest rate swaps that matured in November 2012. These derivative instruments have been designated as interest rate cash flow hedges.

In December 2012, we signed a definitive agreement to acquire Arbitron Inc. (NYSE: ARB), an international media and marketing research firm, for \$48 per share in cash (the "Transaction"). In addition, we entered into a commitment for an unsecured note or unsecured loan for up to \$1,300 million (the "Commitment Letter") to fund the closing of the Transaction. The Transaction has been approved by the board of directors of both companies and is subject to customary closing conditions, including regulatory review. As of December 31, 2012, there were no borrowings outstanding under the Commitment Letter.

Financing Transactions

Term Loan Facilities

In addition to the \$1,222 million term loan facility due 2017, the Senior Secured Credit Agreement also provides for two term loan facilities of \$1,610 million and €227 million maturing in 2013 and four term loan facilities, including two dollar-denominated term loan facilities totaling \$2,386 million and two Euro-denominated term loan facilities totaling €273 million, maturing in 2016. Total outstanding borrowings under the facility were \$4,090 million at December 31, 2012.

We are required to repay installments on the borrowings under the senior secured term loan facilities due 2016 in quarterly principal amounts of 0.25% of their original principal amount, with the remaining amount payable upon maturity.

Borrowings under the senior secured term loan facilities maturing in 2013 and 2016 bear interest at a rate as determined by the type of borrowing, equal to either (a) a "base rate" determined by reference to the higher of (1) the federal funds rate plus 0.5% or (2) the prime rate or (b) a LIBOR rate for the currency of such borrowings, plus, in each case, an applicable margin. The applicable margins for the senior secured term loans that mature in 2013 vary depending on our secured leverage ratio, from 2.00% to 2.25% in the case of LIBOR loans and from 1.00% to 1.25% in the case of base rate loans. The applicable margins for two of the senior secured term loans that mature in 2016 are set at a fixed rate of 3.75% in the case of LIBOR loans and 2.75% in the case of base rate loans, and the margin for the remaining 2016 term loans vary depending upon our total leverage and credit rating, from 3.25% to 3.75% in the case of LIBOR loans and from 2.25% to 2.75% in the case of base rate loans.

The Senior Secured Credit Agreement contains a number of covenants that, among other things, restrict, subject to certain exceptions, the ability of Nielsen Holding and Finance B.V. and its restricted subsidiaries (which together constitute most of our subsidiaries) to incur additional indebtedness or guarantees, incur liens and engage in sale and leaseback transactions, make certain loans and investments, declare dividends, make payments or redeem or repurchase capital stock, engage in certain mergers, acquisitions and other business combinations, prepay, redeem or purchase certain indebtedness, amend or otherwise alter terms of certain indebtedness, sell certain assets, transact with affiliates, enter into agreements limiting subsidiary distributions and alter the business they conduct. These entities are restricted, subject to certain exceptions, in their ability to transfer their net assets to Nielsen Holdings N.V. Such restricted net assets amounted to approximately \$5.2 billion at December 31, 2012. In addition, these entities are required to maintain a maximum total leverage ratio and a minimum interest coverage ratio. Neither Nielsen Holdings nor TNC B.V. is currently bound by any financial or negative covenants contained in the credit agreement. The Senior Secured Credit Agreement also contain certain customary affirmative covenants and events of default. Certain significant financial covenants are described further below.

Obligations under the Senior Secured Credit Agreement are guaranteed by TNC B.V., substantially all of the wholly owned U.S. subsidiaries of TNC B.V. and certain of the non-U.S. wholly-owned subsidiaries of TNC B.V., and are secured by substantially all of the existing and future property and assets of the U.S. subsidiaries of TNC B.V. and by a pledge of substantially all of the capital stock of the guarantors, the capital stock of substantially all of the U.S. subsidiaries of TNC B.V., and up to 65% of the capital stock of certain of the non-U.S. subsidiaries of TNC B.V. Under a separate security agreement, substantially all of the assets of TNC B.V. are pledged as collateral for amounts outstanding under the senior secured credit facilities.

Subsequent Event

In February 2013, the Company received the requisite lender consents to amend its Senior Secured Credit Agreement to allow for the replacement of its existing class A, B and C term loans with a new class of term loans. The amendment is expected to close during the first quarter of 2013, subject to customary closing conditions, and will be documented in an Amended and Restated Credit Agreement.

Revolving Credit Facility

The Senior Secured Credit Agreement also contains a senior secured revolving credit facility under which Nielsen Finance LLC, TNC (US) Holdings, Inc., and Nielsen Holding and Finance B.V. can borrow revolving loans. The revolving credit facility can also be used for letters of credit, guarantees and swingline loans. In March 2011, we amended the Senior Secured Credit Agreement to provide for the termination of the existing revolving credit commitments totaling \$688 million, which had a final maturity date of August 2012, and their replacement with new revolving credit commitments totaling \$635 million with a final maturity date of April 2016.

The senior secured revolving credit facility is provided under the Senior Secured Credit Agreement and so contains covenants and restrictions as noted above with respect to the Senior Secured Credit Agreement under the "Term loan facilities" section above. Obligations under the revolving credit facility are guaranteed by the same entities that guarantee obligations under the Senior Secured Credit Agreement and Senior Secured Loan Agreement.

As of December 31, 2012 and 2011, we had no borrowings outstanding, but had outstanding letters of credit of \$13 million and \$19 million, respectively. As of December 31, 2012, we had \$622 million available for borrowing under the revolving credit facility.

Debenture Loans

The indentures governing certain of our debenture loans limit the majority of our subsidiaries' ability to incur additional indebtedness, pay dividends or make other distributions or repurchase our capital stock, make certain investments, enter into certain types of transactions with affiliates, use assets as security in other transactions and sell certain assets or merge with or into other companies subject to certain exceptions. Upon a change in control, we are required to make an offer to redeem all of the Senior Notes at a redemption price equal to the 101% of the aggregate accreted principal amount plus accrued and unpaid interest. The Senior Notes are jointly and severally guaranteed by TNC B.V., substantially all of the wholly owned U.S. subsidiaries of TNC B.V., and certain of the non-U.S. wholly-owned subsidiaries of TNC B.V.

Overview of 2011 and 2010 Capital Markets and Financing Transactions

We entered into the following transactions during 2011:

- On January 31, 2011, we completed an initial public offering of 82,142,858 shares of our €0.07 par value common stock at a price of \$23.00 per share, generating proceeds of approximately \$1,801 million, net of \$88 million of underwriter discounts.

Concurrent with our offering of common stock, we issued \$288 million in aggregate principal amount of 6.25% Mandatory Convertible Subordinated Bonds due February 1, 2013 ("the Bonds"), generating proceeds of approximately \$277 million, net of \$11 million of underwriter discounts. Interest on the Bonds are payable quarterly in arrears in February, May, August and November of each year, commencing in May 2011. The Bonds were subject to mandatory conversion into 10,416,700 shares of our common stock on February 1, 2013 at a conversion rate of 1.8116 shares per \$50.00 principal amount of the bonds.

We utilized substantially all of the combined net proceeds of approximately \$2,078 million associated with the aforementioned transactions to settle certain advisory agreements with the Sponsors (See

Note 14 to our consolidated financial statements, “Investments in Affiliates and Related Party Transactions” for information regarding these advisory agreements) and redeem and retire certain issuances of our long-term indebtedness as follows:

- In February 2011, we paid approximately \$201 million to redeem \$164 million of our outstanding \$467 million (\$500 million aggregate principal amount) 11.50% Senior Discount Notes Due 2016 with a redemption cost of the stated rate applied to the principal amount being redeemed plus a proportionate amount of accrued interest to the principal amount.
- In February 2011, we paid approximately \$129 million to redeem \$107 million of our outstanding \$307 million (\$330 million aggregate principal amount) 11.625% Senior Discount Notes Due 2014 with a redemption cost of the stated rate applied to the principal amount being redeemed plus a proportionate amount of accrued interest to the principal amount.
- In February 2011, we paid approximately \$1,133 million to redeem all of our outstanding \$999 million (\$1,070 million aggregate principal amount) 12.50% Senior Subordinated Discount Notes Due 2016 at a price of 105.89% of the aggregate principal amount.
- In February and March 2011, we paid approximately \$495 million to redeem all of our outstanding 11.125% Senior Discount Debenture Notes due 2016 at a price of 104.87% of the aggregate principal amount.

We recorded a total debt extinguishment charge of approximately \$145 million (net of tax of \$86 million) in our consolidated statement of operations for the year ended December 31, 2011 associated with these redemptions. The pre-tax amount of this charge was recorded in other expense, net in the consolidated statements of operations.

- In March 2011, we entered into an amendment (the “Amendment Agreement”) to our Amended and Restated Credit Agreement, dated August 9, 2006 and amended and restated as of June 23, 2009 (the “Credit Agreement”), among us, the other borrowers and guarantors party thereto, the lenders and other parties from time to time party thereto, and Citibank, N.A., as administrative agent. The Amendment Agreement documents the terms of new revolving credit commitments obtained by us in connection with a revolving credit commitment extension offer. In connection with the Amendment Agreement, we terminated the existing revolving credit commitments totaling \$688 million, which had a final maturity date of August 9, 2011, and replaced them with new revolving credit commitments totaling \$635 million with a final maturity date of April 1, 2016.
- In August 2011, we entered into \$250 million in aggregate notional amount of four-year forward interest swap agreements with starting dates in September 2011. These agreements fix the LIBOR-related portion of a corresponding amount of our variable-rate debt at an average rate of 0.84%. These derivative instruments have been designated as interest rate cash flow hedges.
- In November 2011, we entered into a \$125 million notional amount and a €125 million notional amount of four-year interest rate swap agreements with starting dates in November 2011. These agreements fix the LIBOR and Euro LIBOR-related portion of interest rates of a corresponding amount of our variable-rate debt at a rate of 0.84% and 1.30%, respectively. These derivative instruments have been designated as interest rate cash flow hedges.
- In December 2011, Nielsen’s JPY 4,000 million 2.50% EMTN matured and was repaid.
- During 2011 we elected to permanently repay \$287 million of our existing term loans due August 2013.

We entered into the following transactions during 2010:

- In March 2010, we entered into a three-year interest swap to fix the LIBOR-related portion of interest rates for \$250 million of our variable-rate debt at 1.69%. This swap replaced the \$500 million

notional amount interest rate swap that matured on February 9, 2010. This derivative instrument has been designated as an interest rate cash flow hedge.

- In May 2010, our €50 million variable rate EMTN matured and was repaid.
- In August 2010, we completed a term loan extension offer in accordance with the terms of our 2006 Senior Secured Credit Facilities. In connection with completing the term loan extension offer and in order to document the terms of the new Class C term loans, as of such date we entered into an amendment to the 2006 Senior Secured Credit Facilities (the "2010 Amendment"). Pursuant to the term loan extension offer and the 2010 Amendment, approximately \$1,495 million of our Class A term loans (which mature August 2013) and approximately \$5 million of our Class B term loans (which mature May 2016) were exchanged for the same principal amount of new Class C term loans. The new Class C term loans mature on May 1, 2016 and bear a tiered floating interest rate of LIBOR plus a margin of (x) 3.75% to the extent that Nielsen Finance LLC's Total Leverage Ratio (as defined in the 2006 Senior Secured Credit Facilities) is greater than 5.0 to 1.0 and (y) 3.50% to the extent that Nielsen Finance LLC's Total Leverage Ratio (as defined in the 2006 Senior Secured Credit Facilities) is less than or equal to 5.0 to 1.0. The foregoing margins are also subject to a decrease of 0.25% in the event and for so long as Nielsen Finance LLC's corporate credit and/or family rating, as applicable, from either S&P or Moody's is at least BB- or Ba3, respectively. The Class C term loans will amortize in equal quarterly installments in aggregate annual amounts equal to 1.00% of the original principal amount. No optional prepayments of Class C term loans may be made so long as any Class A or Class B term loans are outstanding. Except as set forth in the 2010 Amendment, the Class C term loans shall have the same terms as the Class B term loans.
- In October 2010, we issued \$750 million in aggregate principal amount of 7.75% Senior Notes due 2018 at an issue price of \$745 million with cash proceeds of approximately \$731 million, net of fees and expenses. In November 2010, we issued an additional \$330 million in aggregate principal amount of 7.75% Senior Notes due 2018 at an issue price of \$340 million with cash proceeds of approximately \$334 million, net of fees and expenses.
- We used the net proceeds from the aforementioned issuances, along with cash on hand, to fund a redemption of the remaining all of our 10% Senior Notes due 2014 at a price of 105% and all of our 9% Senior Notes due 2014 at a price of 104.5% in separate transactions in November and December 2010. The redemption and retirement of these notes resulted in a loss of approximately \$90 million in the fourth quarter of 2010.
- In October and November 2010, we entered into an aggregate of \$1 billion notional amount of three-year forward interest rate swap agreements with starting dates in November 2010. These agreements fix the LIBOR-related portion of interest rates of a corresponding amount of our variable-rate debt at an average rate of 0.72%. The commencement date of the interest rate swaps coincided with the \$1 billion notional amount of interest rate swaps that matured in November 2010. Additionally, in November 2010 we entered into a \$250 million notional amount three-year forward interest rate swap agreement with a starting date in November 2011, which fixes the LIBOR-related portion of interest rates of a corresponding amount of our variable-rate debt at a rate of 1.26%. These derivative instruments have been designated as interest rate cash flow hedges.
- We elected to permanently repay \$75 million of our existing term loans due August 2013 during 2010.

Cash Flows 2012 versus 2011

Operating activities. Net cash provided by operating activities was \$784 million for the year ended December 31, 2012, compared to \$641 million for the year ended December 31, 2011. Net cash provided by operating activities for the year ended December 31, 2011 included the \$102 million payment for the termination and settlement of the Sponsor Advisory Agreements. Excluding this payment, cash flows provided by operating activities increased \$41 million as compared to the prior period. This increase was driven by the Adjusted

EBITDA performance described above and lower interest payments, substantially offset by the timing of vendor and employee payroll payments and timing of accounts receivable collections. Our key collections performance measure, days billing outstanding (DBO), increased by 1 day for the year ended December 31, 2012 compared to a 1 day decrease for the year ended December 31, 2011.

Investing activities. Net cash used in investing activities was \$522 million for the year ended December 31, 2012, compared to \$486 million for the year ended December 31, 2011. The primary driver for the increased usage of cash from investing activities was the increase in acquisition payments.

Financing activities. Net cash used in financing activities was \$298 million for the year ended December 31, 2012, compared to \$250 million for the year ended December 31, 2011. The use of cash is described under the “2012 Capital Markets and Financing Transactions” and “Financing Transactions” sections above.

Cash Flows 2011 versus 2010

Operating activities. Net cash provided by operating activities was \$641 million for the year ended December 31, 2011, compared to \$543 million for the year ended December 31, 2010. The primary drivers for the increase in cash provided by operating activities was the growth in operating income excluding the impact of non-cash depreciation and amortization and lower interest payments. Our key collections performance measure, days billing outstanding (DBO), decreased by 1 day for the year ended December 31, 2011 compared to being relatively flat for the year ended December 31, 2010.

Investing activities. Net cash used in investing activities was \$486 million for the year ended December 31, 2011, compared to \$365 million for the year ended December 31, 2010. The drivers for the increase in the usage of cash from investing activities were the increase in acquisition payments and capital expenditures.

Financing activities. Net cash used in financing activities was \$250 million for the year ended December 31, 2011, compared to \$263 million for the year ended December 31, 2010. The use of cash in both periods is described under the “Financing Transactions” section above.

Capital Expenditures

Investments in property, plant, equipment, software and other assets totaled \$358 million, \$367 million and \$334 million in 2012, 2011 and 2010, respectively. The decrease in capital expenditures related to significant investments in technology infrastructure development in 2011.

Dividends

No dividends were declared or paid on our common stock during 2012 or 2011. In September 2010, we declared a special dividend of approximately €6 million (\$7 million) in the aggregate, or €0.02 per share, to its existing stockholders, \$5 million of which was in the form of a non-cash settlement of loans we have previously extended to Luxco.

On January 31, 2013, our board of directors adopted a cash dividend policy with the present intent to pay quarterly cash dividends on our outstanding common stock. The board also declared the first quarterly cash dividend of \$0.16 per share, to be paid on March 20, 2013 to holders of record of our common stock on March 6, 2013. Our dividend policy and the payment of future cash dividends are subject to the discretion of the board of directors.

Covenants Attributable to TNC B.V.

Financial covenants contained in our Credit Agreement consist of a maximum leverage ratio and a minimum interest coverage ratio as related to our indirect wholly-owned subsidiary, Nielsen Holding and Finance B.V. and its

restricted subsidiaries. The leverage ratio requires that we not permit the ratio of total net debt (as defined in the facility) at the end of any calendar quarter to Covenant EBITDA (as defined in the facility) for the four quarters then ended to exceed a specified threshold. The maximum permitted ratio is 6.25 to 1.0.

The interest coverage ratio requires that we not permit the ratio of Covenant EBITDA at the end of any calendar quarter to Consolidated Interest Expense (as defined in the Credit Agreement) for the four quarters then ended to be less than a specified threshold. The minimum permitted ratio is 1.50 to 1.0.

Failure to comply with either of these covenants would result in an event of default under our Credit Agreement unless waived by our senior credit lenders. An event of default under our Credit Agreement can result in the acceleration of our indebtedness under the facility, which in turn would result in an event of default and possible acceleration of indebtedness under the agreements governing our debt securities as well. As our failure to comply with the covenants described above can cause us to go into default under the agreements governing our indebtedness, management believes that our Credit Agreement and these covenants are material to us. As of December 31, 2012, we were in full compliance with the covenants described above.

Pursuant to our Credit Agreement, we are subject to making mandatory prepayments on the term loans within our Credit Agreement to the extent in any full calendar year we generate Excess Cash Flow (“ECF”), as defined in the Credit Agreement. The percentage of ECF that must be applied as a repayment is a function of several factors, including our ratio of total net debt to Covenant EBITDA, as well other adjustments, including any voluntary term loan repayments made in the course of the calendar year. To the extent any mandatory repayment is required pursuant to this ECF clause, such payment must generally occur on or around the time of the delivery of the annual consolidated financial statements to the lenders. At December 31, 2012, our ratio of total net debt to Covenant EBITDA was less than 5.00 to 1.00 and therefore no mandatory repayment was required. Our next ECF measurement date will occur upon completion of the 2013 results, and although the Company does not expect to be required to issue any mandatory repayments in 2014 or beyond, it is uncertain at this time if any such payments will be required in future periods.

Commitments and Contingencies

Outsourced Services Agreements

In February 2013, we amended our Amended and Restated Master Services Agreement (the “MSA”), dated as of October 1, 2007 with Tata America International Corporation and Tata Consultancy Services Limited (jointly, “TCS”). The term of the MSA has been extended for an additional three years, so as to expire on December 31, 2020, with a one-year renewal option granted to Nielsen. In addition, we have increased our commitment to purchase services from TCS (the “Minimum Commitment”) from \$1.0 billion to \$2.5 billion over the life of the contract (from October 1, 2007), including a commitment to purchase at least \$100 million in services per year (the “Annual Commitment”). TCS’ charges under the separate Global Infrastructure Services Agreement between the parties will be credited against the Minimum Commitment and the Annual Commitment. TCS will globally provide us with professional services relating to information technology (including application development and maintenance), business process outsourcing, client service knowledge process outsourcing, management sciences, analytics, and financial planning and analytics. As we order specific services under the Agreement, the parties will execute Statements Of Work (“SOWs”) describing the specific scope of the services to be performed by TCS. The amount of the Minimum Commitment and the Annual Commitment may be reduced on the occurrence of certain events, some of which also provide us with the right to terminate the Agreement or SOWs, as applicable.

Other Contractual Obligations

Our other contractual obligations include capital lease obligations (including interest portion), facility leases, leases of certain computer and other equipment, agreements to purchase data and telecommunication services, the payment of principal and interest on debt and pension fund obligations.

At December 31, 2012, the minimum annual payments under these agreements and other contracts that had initial or remaining non-cancelable terms in excess of one year are as listed in the following table. Due to the uncertainty with respect to the timing of future cash flows associated with our unrecognized tax benefits at December 31, 2012, we are unable to make reasonably reliable estimates of the timing of any potential cash settlements with the respective taxing authorities. Therefore, \$140 million of unrecognized tax benefits (which includes interest and penalties of \$40 million) have been excluded from the contractual obligations table below. See Note 13 – “Income Taxes” – to the consolidated financial statements for a discussion on income taxes.

(IN MILLIONS)	Payments due by period						
	Total	2013	2014	2015	2016	2017	Thereafter
Capital lease obligations and other debt ^(a)	\$ 172	\$ 24	\$ 15	\$ 14	\$ 14	\$ 14	\$ 91
Operating leases ^(b)	393	91	78	59	45	36	84
Other contractual obligations ^(c)	239	150	47	26	12	2	2
Long-term debt, including current portion ^(a)	6,184	341	344	150	2,732	733	1,884
Interest ^(d)	1,291	295	265	245	172	123	191
Pension fund obligations ^(e)	47	47	—	—	—	—	—
Total	<u>\$8,326</u>	<u>\$948</u>	<u>\$749</u>	<u>\$494</u>	<u>\$2,975</u>	<u>\$908</u>	<u>\$2,252</u>

- (a) Other debt includes bank overdrafts of \$5 million due within one year. These amounts exclude the \$288 million of Mandatory Convertible Subordinated Bonds due February 1, 2013 as these bonds converted into shares of our common stock upon maturity and did not result in a cash payment of principal. Our short-term and long-term debt obligations, including capital lease and other financing obligations, are described in Note 10 – “Long-Term Debt and Other Financing Arrangements” – to our consolidated financial statements.
- (b) Our operating lease obligations are described in Note 15 – “Commitments and Contingencies” – to our consolidated financial statements.
- (c) Other contractual obligations represent obligations under agreement, which are not unilaterally cancelable by us, are legally enforceable and specify fixed or minimum amounts or quantities of goods or services at fixed or minimum prices. We generally require purchase orders for vendor and third party spending. The amounts presented above represent the minimum future annual services covered by purchase obligations including data processing, building maintenance, equipment purchasing, photocopiers, land and mobile telephone service, computer software and hardware maintenance, and outsourcing. Our remaining commitments as of December 31, 2012 under the outsourced services agreements with TCS have been included above on an estimated basis over the years within the contractual period in which we expect to satisfy our obligations. Since the amendment to the TCS agreement occurred after December 31, 2012, it is not reflected above.
- (d) Interest payments consist of interest on both fixed-rate and variable-rate debt based on LIBOR as of December 31, 2012. Interest payments associated with the \$288 million of Mandatory Convertible Subordinated Bonds due February 1, 2013 have been included as it is assumed such payments will be made in cash.
- (e) Our contributions to pension and other post-retirement defined benefit plans were \$64 million, \$54 million and \$30 million during 2012, 2011 and 2010, respectively. Future minimum pension and other post-retirement benefits contributions are not determinable for time periods after 2013. See Note 9 – “Pensions and Other Post-Retirement Benefits” – to our consolidated financial statements for a discussion on plan obligations.

Guarantees and Other Contingent Commitments

At December 31, 2012, we were committed under the following significant guarantee arrangements:

Sub-lease guarantees. We provide sub-lease guarantees in accordance with certain agreements pursuant to which we guarantee all rental payments upon default of rental payment by the sub-lessee. To date, we have not been required to perform under such arrangements, and do not anticipate making any significant payments related to such guarantees and, accordingly, no amounts have been recorded.

Letters of credit. Letters of credit issued and outstanding amount to \$13 million at December 31, 2012.

Legal Proceedings and Contingencies

We are subject to litigation and other claims in the ordinary course of business, some of which include claims for substantial sums. Accruals have been recorded when the outcome is probable and can be reasonably estimated. While the ultimate results of claims and litigation cannot be determined, we expect that the ultimate disposition of these matters will not have a material adverse effect on our operations or financial condition. However, depending on the amount and the timing, an unfavorable resolution of some or all of these matters could materially affect our future results of operations or cash flows in a particular period.

Off-Balance Sheet Arrangements

Except as disclosed above, we have no off-balance sheet arrangements that currently have or are reasonably likely to have a material effect on our consolidated financial condition, changes in financial condition, results of operations, liquidity, capital expenditure or capital resources.

Summary of Recent Accounting Pronouncements

Fair Value Measurement

In May 2011, the Financial Accounting Standards Board (“FASB”) issued an accounting update that amends Accounting Standards Codification (“ASC”) 820—“Fair Value Measurement” regarding fair value measurements and disclosure requirements. The amendments were effective for us as of January 1, 2012. The adoption of this update did not have a significant impact on our consolidated financial statements.

Presentation of Comprehensive Income

In June 2011, the FASB issued an accounting update that amends ASC 220—“Presentation of Comprehensive Income” (“ASC 220”), which eliminates the option to present other comprehensive income and its components in the statement of equity. We have presented the items of net income and other comprehensive income in two separate but consecutive statements and this amended guidance did not have any other impact on our consolidated financial statements.

In February 2013, the FASB issued an accounting update that amends ASC 220, which requires public companies to present the effect of significant amounts reclassified from each component of accumulated other comprehensive income and the income statement line items affected by the reclassification on the face of the financial statements or in a single footnote. This amendment is effective for us for interim and annual reporting periods in 2013. The adoption of this update is not expected to have a significant impact on our consolidated financial statements.

Testing Goodwill and Indefinite-Lived Intangible Assets for Impairment

In September 2011 and July 2012, the FASB issued accounting updates that amend ASC 350—“Goodwill and Other Intangible Assets”, which were intended to simplify impairment testing for goodwill and indefinite-

lived intangible assets by adding a qualitative review step to assess whether the previously required quantitative impairment analysis is necessary. The amended guidance permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit or an indefinite-lived intangible asset is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the prescribed two-step impairment test. Otherwise, the two-step impairment test is not required. We considered the updated guidance in our October 1, 2012 annual impairment test. The adoption of these updates did not have an impact on our consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the potential loss arising from adverse changes in market rates and market prices such as interest rates, foreign currency exchange rates, and changes in the market value of equity instruments. We are exposed to market risk, primarily related to foreign exchange and interest rates. We actively monitor these exposures. Historically, in order to manage the volatility relating to these exposures, we entered into a variety of derivative financial instruments, mainly interest rate swaps, cross-currency swaps and forward rate agreements. Currently we only employ basic contracts, that is, without options, embedded or otherwise. Our objective is to reduce, where it is deemed appropriate to do so, fluctuations in earnings, cash flows and the value of our net investments in subsidiaries resulting from changes in interest rates and foreign currency rates. It is our policy not to trade in financial instruments.

Foreign Currency Exchange Rate Risk

We operate globally and we predominantly generate revenue and expenses in local currencies. Because of fluctuations (including possible devaluations) in currency exchange rates or the imposition of limitations on conversion of foreign currencies into our reporting currency, we are subject to currency translation exposure on the profits of our operations, in addition to transaction exposure.

Foreign currency translation risk is the risk that exchange rate gains or losses arise from translating foreign entities' statements of earnings and balance sheets from functional currency to our reporting currency (the U.S. Dollar) for consolidation purposes. Translation risk exposure is managed by creating "natural hedges" in our financing or by using derivative financial instruments aimed at offsetting certain exposures in the statement of earnings or the balance sheet. We do not use derivative financial instruments for trading or speculative purposes.

The table below details the percentage of revenues and expenses by currency for the years ended December 31, 2012 and 2011:

	<u>U.S. Dollars</u>	<u>Euro</u>	<u>Other Currencies</u>
Year ended December 31, 2012			
Revenues	52%	12%	36%
Operating costs	50%	13%	37%
Year ended December 31, 2011			
Revenues	50%	14%	36%
Operating costs	50%	15%	35%

Based on the year ended December 31, 2012, a one cent change in the U.S. dollar/Euro exchange rate would have impacted revenues by approximately \$7 million annually, with an immaterial impact on operating income.

We have operations in both our Buy and Watch segments in Venezuela and our functional currency for these operations was the Venezuelan bolivares fuertes. Venezuela's currency was considered hyperinflationary as of January 1, 2010 and further, in January 2010, Venezuela's currency was devalued and a new currency exchange rate system was announced. We evaluated the new exchange rate system and concluded that our local currency transactions will be denominated in U.S. dollars effective as of January 1, 2010 and until Venezuela's

currency is deemed to be non-hyperinflationary. We recorded a charge of \$7 million associated with the currency devaluation in January 2010 in our foreign exchange transaction (losses)/gains, net line item in the consolidated statement of operations. In June 2010, a further revision to the currency exchange rate system was made and in December 2010, the government of Venezuela eliminated the preferential exchange rate. Neither the impact of the hyperinflationary accounting or the subsequent changes to the exchange rate system had a material impact on our consolidated results of operations for the year ended December 31, 2012 or 2011.

In February 2013, Venezuela's currency was further devalued by 32% which will result in a charge of approximately \$12 million in the first quarter of 2013 in the foreign exchange transaction (losses)/gains, net line in our consolidated statement of operations.

Effective in July 2010, we designated our Euro denominated variable rate senior secured term loans due 2013 and 2016 as non-derivative hedges of our net investment in a European subsidiary. Subsequent to this designation gains or losses attributable to fluctuations in the Euro as compared to the U.S. Dollar associated with this debenture were recorded to currency translation adjustment within stockholders' equity, net of income tax. We recorded losses of \$43 million (net of tax of \$17 million) to currency translation adjustment during the second half of 2010 associated with changes in foreign currency exchange rates attributable to these loans and therefore no gains or losses were recorded within our net income during that period. Our net income reflected foreign currency exchange gains of \$96 million for the year ended December 31, 2010 related to these loans.

Interest Rate Risk

We continually review our fixed and variable rate debt along with related hedging opportunities in order to ensure our portfolio is appropriately balanced as part of our overall interest rate risk management strategy and through this process we consider both short-term and long-term considerations in the U.S. and global financial markets in making adjustments to our tolerable exposures to interest rate risk. At December 31, 2012, we had \$4,090 million of floating-rate debt under our senior secured credit facilities, of which \$2,540 million was subject to effective floating-fixed interest rate swaps. A one percent increase in interest rates applied to our floating rate indebtedness would therefore increase annual interest expense by approximately \$16 million (\$41 million without giving effect to any of our interest rate swaps).

In November 2012, we entered into \$500 million in aggregate notional amount of four-year interest rate swap agreements with starting dates in November 2012. These agreements fix the LIBOR related portion of interest rates of a corresponding amount of our variable-rate debt at a weighted average rate of 0.57%. The commencement date of these interest rate swaps coincided with the \$500 million aggregate notional amount of interest rate swaps that matured in November 2012. These derivative instruments have been designated as interest rate cash flow hedges.

In November 2011, we entered into a \$125 million notional amount and a €125 million notional amount of four-year interest rate swap agreements with starting dates in November 2011. These agreements fix the LIBOR and Euro LIBOR-related portion of interest rates of a corresponding amount of our variable-rate debt at a rate of 0.84% and 1.30%, respectively. These derivative instruments have been designated as interest rate cash flow hedges.

In August 2011, we entered into \$250 million in aggregate notional amount of four-year forward interest swap agreements with starting dates in September 2011. These agreements fix the LIBOR-related portion of interest rates of a corresponding amount of our variable-rate debt at an average rate of 0.84%. These derivative instruments have been designated as interest rate cash flow hedges.

In October and November 2010, we entered into \$1 billion in aggregate notional amount of three-year forward interest rate swap agreements with starting dates in November 2011. These agreements fix the LIBOR-related portion of interest rates of a corresponding amount of our variable-rate debt at an average rate of 0.72%. The commencement date of the interest rate swaps coincides with the \$1 billion notional amount of interest rate

swaps that matured in November 2011. Additionally, in November 2010, we entered into a \$250 million notional amount three-year forward interest rate swap agreement with a starting date in November 2011, which fixes the LIBOR-related portion of interest rates of a corresponding amount of our variable-rate debt at a rate of 1.26%. These derivative instruments have been designated as interest rate cash flow hedges.

In March 2010, we entered into a three-year interest swap to fix the LIBOR-related portion of interest rates for \$250 million of our variable-rate debt at 1.69%. This swap replaced the \$500 million notional amount interest rate swap that matured in February 2010. This derivative instrument has been designated as an interest rate cash flow hedge.

Derivative instruments involve, to varying degrees, elements of non-performance, or credit risk. We do not believe that we currently face a significant risk of loss in the event of non-performance by the counterparties associated with these instruments, as these transactions were executed with a diversified group of major financial institutions with a minimum investment-grade or better credit rating. Our credit risk exposure is managed through the continuous monitoring of our exposures to such counterparties.

Management's Annual Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company and has performed an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2012, based on the framework and criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on this evaluation, management has concluded that our internal controls over financial reporting were effective as of December 31, 2012.

Ernst & Young LLP, independent registered public accounting firm, has provided an attestation report on the Company's internal control over financial reporting. The Company's financial statements included in this annual report on Form 10-K also have been audited by Ernst & Young LLP. Their reports follow.

**Report of Independent Registered Public Accounting Firm on
Internal Control Over Financial Reporting**

The Board and Stockholders
of Nielsen Holdings N.V.

We have audited Nielsen Holdings N.V.'s internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Nielsen Holdings N.V. management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Nielsen Holdings N.V. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Nielsen Holdings N.V. as of December 31, 2012 and 2011, and the related consolidated statements of operations and comprehensive income/(loss), changes in equity and cash flows for each of the three years in the period ended December 31, 2012 of Nielsen Holdings N.V. and our report dated February 22, 2013, expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

New York, New York
February 22, 2013

Report of Independent Registered Public Accounting Firm

The Board and Stockholders
of Nielsen Holdings N.V.

We have audited the accompanying consolidated balance sheets of Nielsen Holdings N.V. as of December 31, 2012 and 2011, and the related consolidated statements of operations and comprehensive income/ (loss), changes in equity and cash flows for each of the three years in the period ended December 31, 2012. Our audits also included the financial statement schedules listed in the Index at Item 8. These financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Nielsen Holdings N.V. at December 31, 2012 and 2011, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedules, when considered in relation to the basic financial statements taken as a whole, present fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Nielsen Holdings N.V.'s internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 22, 2013 expressed an unqualified opinion thereon.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements

1. Description of Business, Basis of Presentation and Significant Accounting Policies

On May 17, 2006, Nielsen Holdings N.V. (the “Company” or “Nielsen”), formerly known as Valcon Acquisition Holding B.V. and Nielsen Holdings B.V., was formed by investment funds associated with AlpInvest Partners, The Blackstone Group, The Carlyle Group, Hellman & Friedman, Kohlberg Kravis Roberts & Co., and Thomas H. Lee Partners (collectively, and with subsequent investor Centerview Partners, the “Sponsors”) as a subsidiary of Valcon Acquisition Holding (Luxembourg) S.à r.l. (“Luxco”). On May 24, 2006, The Nielsen Company B.V. (“TNC B.V.”) (formerly VNU Group B.V. and VNU N.V.) was acquired through a tender offer to stockholders by Valcon Acquisition B.V. (“Valcon”), a wholly owned subsidiary of the Company (herein referred to as the “Valcon Acquisition”). On January 31, 2011, Nielsen completed an initial public offering of 82,142,858 shares of its €0.07 par value common stock at a price of \$23.00 per share. Nielsen’s common stock is listed on the New York Stock Exchange and is traded under the symbol “NLSN.” In March 2012, Luxco and certain Nielsen employees (the “selling shareholders”) completed a public offering of 34,500,000 shares of our stock at a price of \$30.25 per share. As of December 31, 2012, Luxco owned 236,266,399 shares (or approximately 65%) of our outstanding shares of common stock. In February 2013, Luxco and certain Nielsen employees completed a public offering of 40,814,883 shares of the Company’s common stock at a price of \$32.55 per share. Subsequent to this offering, Luxco owned 195,463,201 shares (or approximately 52%) of the Company’s common stock.

Nielsen, together with its subsidiaries, is a leading global information and measurement company that provides clients with a comprehensive understanding of consumers and consumer behavior. Nielsen is aligned into three reportable segments: what consumers buy (“Buy”), what consumers watch (“Watch”) and Expositions. Nielsen has a presence in approximately 100 countries, with its headquarters located in Diemen, the Netherlands and New York, USA. See Note 16 – “Segments” for a discussion of the Company’s reportable segments.

The accompanying consolidated financial statements are presented in conformity with U.S. generally accepted accounting principles (“GAAP”). All amounts are presented in U.S. Dollars (“\$”), except for share and per share data or where expressly stated as being in other currencies, e.g., Euros (“€”). The consolidated financial statements include the accounts of Nielsen and all subsidiaries and other controlled entities. Supplemental cash flows from discontinued operations are presented in Note 4 to the consolidated financial statements “Business Divestitures.” The Company has evaluated events occurring subsequent to December 31, 2012 for potential recognition or disclosure in the consolidated financial statements and concluded there were no subsequent events that required recognition or disclosure other than those provided.

Consolidation

The consolidated financial statements include the accounts of Nielsen and all subsidiaries and other controlled entities. Noncontrolling interests in subsidiaries are reported as a component of equity in the consolidated financial statements with disclosure, on the face of the consolidated statement of operations, of the amounts of consolidated net income attributable to Nielsen stockholders and to the noncontrolling interests. The equity method of accounting is used for investments in affiliates and joint ventures where Nielsen has significant influence but not control, usually supported by a shareholding of between 20% and 50% of the voting rights. Investments in which Nielsen owns less than 20% are accounted for either as available-for-sale securities if the shares are publicly traded or as cost method investments. Intercompany accounts and transactions between consolidated companies have been eliminated in consolidation.

Foreign Currency Translation

Nielsen has significant investments outside the United States, primarily in the Euro-zone, Canada and the United Kingdom. Therefore, changes in the value of foreign currencies affect the consolidated financial statements when translated into U.S. Dollars. The functional currency for substantially all subsidiaries outside the U.S. is the local currency. Financial statements for these subsidiaries are translated into U.S. Dollars at period-

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

end exchange rates as to the assets and liabilities and monthly average exchange rates as to revenues, expenses and cash flows. For these countries, currency translation adjustments are recognized in stockholders' equity as a component of accumulated other comprehensive income/(loss), net, whereas transaction gains and losses are recognized in foreign exchange transaction (losses)/gains, net in the consolidated statement of operations.

In February 2013, Venezuela devalued its currency by 32%. As the Company has operations in both its Buy and Watch segments in Venezuela, this devaluation will result in a charge of approximately \$12 million in the first quarter of 2013 in the foreign exchange transaction (losses)/gains, net line in the consolidated statement of operations.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Investments

Investments include available-for-sale securities carried at fair value, or at cost if not publicly traded, investments in affiliates, and a trading asset portfolio maintained to generate returns to offset changes in certain liabilities related to deferred compensation arrangements. For the available-for-sale securities, any unrealized holding gains and losses, net of deferred income taxes, are excluded from operating results and are recognized in stockholders' equity as a component of accumulated other comprehensive income/(loss) until realized. Nielsen assesses declines in the value of individual investments to determine whether such decline is other than temporary and thus the investment is impaired by considering available evidence. For the year ended December 31, 2012, the Company recorded a \$6 million impairment in Other Expense, net in the consolidated statement of operations, for a decline in value of an investment in an equity security that was determined to be other-than-temporary. No such impairment was recorded for the years ended December 31, 2011 and 2010.

Financial Instruments

Nielsen's financial instruments include cash and cash equivalents, investments, long-term debt and derivative financial instruments. These financial instruments potentially subject Nielsen to concentrations of credit risk. To minimize the risk of credit loss, these financial instruments are primarily held with acknowledged financial institutions. The carrying value of Nielsen's financial instruments approximate fair value, except for differences with respect to long-term, fixed and variable-rate debt and certain differences relating to investments accounted for at cost. The fair value of financial instruments is generally determined by reference to market values resulting from trading on a national securities exchange or in an over-the-counter market. In cases where quoted market prices are not available, fair value is based on estimates using present value or other valuation techniques. Cash equivalents have original maturities of three months or less.

In addition, the Company has accounts receivable that are not collateralized. The Buy and Watch segments service high quality clients dispersed across many geographic areas and the customer base within the Expositions segment consists of a large number of diverse customers. The Company analyzes the aging of accounts receivable, historical bad debts, customer creditworthiness and current economic trends in determining the allowance for doubtful accounts.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

Derivative Financial Instruments

Nielsen uses derivative instruments principally to manage the risk associated with movements in foreign currency exchange rates and the risk that changes in interest rates will affect the fair value or cash flows of its debt obligations.

To qualify for hedge accounting, the hedging relationship must meet several conditions with respect to documentation, probability of occurrence, hedge effectiveness and reliability of measurement. Nielsen documents the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedge transactions as well as the hedge effectiveness assessment, both at the hedge inception and on an ongoing basis.

Nielsen recognizes all derivatives at fair value either as assets or liabilities in the consolidated balance sheets and changes in the fair values of such instruments are recognized currently in earnings unless specific hedge accounting criteria are met. If specific cash flow hedge accounting criteria are met, Nielsen recognizes the changes in fair value of these instruments in other comprehensive income.

Goodwill and Indefinite-Lived Intangible Assets

Goodwill and other indefinite-lived intangible assets are stated at historical cost less accumulated impairment losses, if any. Goodwill and other indefinite-lived intangible assets, consisting of certain trade names and trademarks, are each tested for impairment on an annual basis and whenever events or circumstances indicate that the carrying amount of such asset may not be recoverable. Nielsen has designated October 1st as the date in which the annual assessment is performed as this timing corresponds with the development of the Company's formal budget and business plan review. Nielsen reviews the recoverability of its goodwill by comparing the estimated fair values of reporting units with their respective carrying amounts. The Company established, and continues to evaluate, its reporting units based on its internal reporting structure and generally defines such reporting units at its operating segment level or one level below. The estimates of fair value of a reporting unit are determined using a combination of valuation techniques, primarily an income approach using a discounted cash flow analysis supplemented by a market-based approach.

A discounted cash flow analysis requires the use of various assumptions, including expectations of future cash flows, growth rates, discount rates and tax rates in developing the present value of future cash flow projections. Nielsen also uses a market-based approach in estimating the fair value of its reporting units. The market-based approach utilizes available market comparisons such as indicative industry multiples that are applied to current year revenue and earnings as well as recent comparable transactions.

There was no impairment noted in 2012, 2011 and 2010 with respect to the Company's goodwill. (See Note 5 – "Goodwill and Other Intangible Assets").

The impairment test for other indefinite-lived intangible assets consists of a comparison of the fair value of the intangible asset with its carrying amount. If the carrying amount of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. The estimates of fair value of trade names and trademarks are determined using a "relief from royalty" discounted cash flow valuation methodology. Significant assumptions inherent in this methodology include estimates of royalty rates and discount rates. Discount rate assumptions are based on an assessment of the risk inherent in the respective intangible assets. Assumptions about royalty rates are based on the rates at which comparable trade names and trademarks are being licensed in the marketplace. There was no impairment noted in any period presented with respect to the Company's indefinite-lived intangible assets.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

Software and Other Amortized Intangible Assets

Intangible assets with finite lives are stated at historical cost, less accumulated amortization and impairment losses. These intangible assets are amortized on a straight-line basis over the following estimated useful lives, which are reviewed annually:

		<u>Weighted Average</u>
Trade names and trademarks (with finite lives)	5 - 20 years	16
Customer-related intangibles	6 - 25 years	22
Covenants-not-to-compete	2 - 7 years	5
Computer software	3 - 7 years	4
Patents and other	3 - 10 years	5

Nielsen has purchased and internally developed software to facilitate its global information processing, financial reporting and client access needs. Costs that are related to the conceptual formulation and design of software programs are expensed as incurred; costs that are incurred to produce the finished product after technological feasibility has been established are capitalized as an intangible asset and are amortized over the estimated useful life. If events or changes in circumstances indicate that the carrying value of software may not be recovered, a recoverability analysis is performed based on estimated undiscounted cash flows to be generated from the software in the future. If the analysis indicates that the carrying value is not recoverable from future cash flows, the software cost is written down to estimated fair value and an impairment is recognized. These estimates are subject to revision as market conditions and as our assessments change.

Research and Development Costs

Research and development costs, which were not material for any periods presented, are expensed as incurred.

Property, Plant and Equipment

Property, plant and equipment are carried at historical cost less accumulated depreciation and impairment losses. Property, plant and equipment are depreciated on a straight-line basis over the estimated useful lives of 25 to 50 years for buildings and related leasehold improvements and 3 to 10 years for equipment, which includes computer hardware, metering equipment and office furniture.

Impairment of Long-Lived Assets Other than Goodwill and Indefinite-Lived Intangible Assets

Long-lived assets other than goodwill and indefinite-lived intangible assets held and used by Nielsen, including property, plant and equipment and amortized intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of assets may not be recoverable. Nielsen evaluates recoverability of assets to be held and used by comparing the carrying amount of an asset to the future net undiscounted cash flows to be generated by the asset. If such asset is considered to be impaired, the impairment loss is measured as the amount by which the carrying amount of the asset exceeds its fair value. No impairment indicators were noted by the Company during 2012, 2011 and 2010, respectively.

Revenue Recognition

Nielsen recognizes revenues when persuasive evidence of an arrangement exists, services have been rendered or information has been delivered, the fee is fixed or determinable and the collectibility of the related revenue is reasonably assured.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

A significant portion of the Company's revenue is generated from information (primarily retail measurement and consumer panel services) and measurement (primarily from television, internet and mobile audiences) services. The Company generally recognizes revenue from the sale of services as the services are performed, which is usually ratably over the term of the contract(s). Invoiced amounts are recorded as deferred revenue until earned. Substantially all of the Company's customer contracts are non-cancellable and non-refundable.

Certain of the Company's revenue arrangements include multiple deliverables and in these arrangements, the individual deliverables within the contract that have stand-alone value to the customer are separated and recognized upon delivery based upon the Company's best estimate of their selling prices. These arrangements are not significant to the Company's results of operations. In certain cases, software is included as part of these arrangements to allow Nielsen's customers to supplementally view delivered information and is provided for the term of the arrangement and is not significant to the marketing effort and is not sold separately. Accordingly, software provided to Nielsen's customers is considered to be incidental to the arrangements and is not recognized as a separate element.

A discussion of Nielsen's revenue recognition policies, by segment, follows:

Buy

Revenue from the Buy segment, primarily from retail measurement services and consumer panel services is recognized over the period during which the services are performed and information is delivered to the customer, primarily on a straight-line basis.

The Company provides insights and solutions to customers through analytical studies that are recognized into revenue as value is delivered to the customer. The pattern of revenue recognition for these contracts varies depending on the terms of the individual contracts, and may be recognized proportionally or deferred until the end of the contract term and recognized when the information has been delivered to the customer.

Watch

Revenue from the Watch segment is primarily generated from television, internet and mobile measurement services and recognized on a straight-line basis over the contract period, as the service is delivered to the customer.

Expositions

Revenue and certain costs within the Expositions segment are recognized upon completion of each event.

Discontinued Operations

Revenue for publications, sold in single copies via newsstands and/or dealers, was recognized in the month in which the magazine went on sale. Revenue from printed circulation and advertisements included therein was recognized on the date it was available to the consumer. Revenue from electronic circulation and advertising was recognized over the period during which both were electronically available. The unearned portion of paid magazine subscriptions was deferred and recognized on a straight-line basis with monthly amounts recognized on the magazines' cover dates.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

Deferred Costs

Incremental direct costs incurred related to establishing or significantly expanding a panel or an electronic metered sample in a designated market, are deferred at the point when Nielsen determines them to be recoverable. Prior to this point, these cost are expensed as incurred. These deferred costs are typically amortized over the original contract period beginning when the panel or electronic metered sample is ready for its intended use.

Advertising and Marketing Costs

Advertising and marketing costs are expensed as incurred and are reflected as selling, general and administrative expenses in the Consolidated Statements of Operations. These costs include all brand advertising, telemarketing, direct mail and other sales promotion associated with Nielsen's exhibitions, and marketing/media research services. Advertising and marketing costs totaled \$18 million, \$20 million and \$20 million for the years ended December 31, 2012, 2011 and 2010, respectively.

Stock-Based Compensation

Nielsen measures the cost of all stock-based payments, including stock options, at fair value on the grant date and recognizes such costs within the Consolidated Statements of Operations; however, no expense is recognized for stock-based payments that do not ultimately vest. Nielsen recognizes the expense of its options that cliff vest using the straight-line method. For those that vest over time, an accelerated graded vesting is used. The Company recorded \$34 million, \$27 million and \$18 million of expense associated with stock-based compensation for the years ended December 31, 2012, 2011 and 2010, respectively.

Computation of Net Income per Share

Basic net income or loss per share is computed using the weighted-average number of common stock outstanding during the period. Diluted net income per share is computed using the weighted-average number of shares of common stock and dilutive potential shares of common stock outstanding during the period. Dilutive potential shares of common stock primarily consist of employee stock options and restricted stock as well as the amount of potential shares to be converted associated with the Company's mandatory convertible subordinated bonds due 2013.

Employee stock options, restricted stock and similar equity instruments granted by the Company are treated as potential common stock outstanding in computing diluted earnings per share. Diluted stock outstanding include restricted stock units and the dilutive effect of in-the-money options which is calculated based on the average share price for each period using the treasury stock method. Under the treasury stock method, the amount the employee must pay for exercising stock options, the amount of compensation cost for future service that the Company has not yet recognized, and the amount of benefits that would be recorded in additional paid-in capital when the award becomes deductible for tax purposes are assumed to be used to repurchase stock.

The effect of 7,698,964, 4,537,689 and 2,840,615 shares of common stock equivalents under stock compensation plans were excluded from the calculation of diluted earnings per share for the years ended December 31, 2012, 2011 and 2010, respectively, as such shares would have been anti-dilutive. Additionally, the Company's mandatory convertible subordinated bonds due 2013 were converted into 10,416,700 shares of common stock on February 1, 2013, and were excluded from the calculation of diluted earnings per share for the year ended December 31, 2012, as such shares would have been anti-dilutive.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

Income Taxes

Nielsen provides for income taxes utilizing the asset and liability method of accounting for income taxes. Under this method, deferred income taxes are recorded to reflect the tax consequences in future years of differences between the tax basis of assets and liabilities and their financial reporting amounts at each balance sheet date, based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income. If it is determined that it is more likely than not that future tax benefits associated with a deferred tax asset will not be realized, a valuation allowance is provided. The effect on deferred tax assets and liabilities of a change in the tax rates is recognized in the Consolidated Statements of Operations as an adjustment to income tax expense in the period that includes the enactment date.

The Company records a liability for unrecognized tax benefits resulting from uncertain tax positions taken or expected to be taken in a tax return. The Company recognizes interest and penalties, if any, related to unrecognized tax benefits in income tax expense. See Note 13 – “Income Taxes” for further discussion of income taxes.

Comprehensive Income/(Loss)

Comprehensive income/(loss) is reported in the accompanying consolidated statements of comprehensive income/loss and consists of net income or loss and other gains and losses affecting equity that are excluded from net income or loss.

2. Summary of Recent Accounting Pronouncements

Fair Value Measurement

In May 2011, the Financial Accounting Standards Board (“FASB”) issued an accounting update that amends Accounting Standards Codification (“ASC”) 820—“Fair Value Measurement” regarding fair value measurements and disclosure requirements. The amendments were effective for Nielsen as of January 1, 2012. The adoption of this update did not have a significant impact on the Company’s consolidated financial statements.

Presentation of Comprehensive Income

In June 2011, the FASB issued an accounting update that amends ASC 220 – “Presentation of Comprehensive Income”, which eliminates the option to present total other comprehensive income in the statement of equity. The Company has presented the items of net income and other comprehensive income in two separate, but consecutive statements and this amended guidance did not have any other impact on the Company’s consolidated financial statements.

In February 2013, the FASB issued an accounting update that amends ASC 220, which requires public companies to present the effect of significant amounts reclassified from each component of accumulated other comprehensive income and the income statement line items affected by the reclassification on the face of the financial statements or in a single footnote. This amendment is effective for Nielsen for interim and annual report periods in 2013. The adoption of this update is not expected to have a significant impact on the Company’s consolidated financial statements.

Testing Goodwill and Indefinite-Lived Intangible Assets for Impairment

In September 2011 and July 2012, the FASB issued accounting updates that amend ASC 350 – “Goodwill and Other Intangible Assets”, which were intended to simplify impairment testing for goodwill and indefinite-

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

lived intangible assets by adding a qualitative review step to assess whether the required quantitative impairment analysis is necessary. The amended guidance permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the prescribed two-step impairment test. Otherwise, the two-step goodwill impairment test is not required. The Company considered the updated guidance in its October 1, 2012 annual impairment test. The adoption of these updates did not have an impact on the Company's consolidated financial statements.

3. Business Acquisitions

For the year ended December 31, 2012, Nielsen paid cash consideration of \$160 million associated with both current period and previously executed acquisitions, net of cash acquired. Had the current period acquisitions occurred as of January 1, 2012, the impact on Nielsen's consolidated results of operations would not have been material.

For the year ended December 31, 2011, Nielsen paid cash consideration of \$123 million associated with both current period and previously executed acquisitions, net of cash acquired. Had the current period acquisitions occurred as of January 1, 2011, the impact on Nielsen's consolidated results of operations would not have been material.

For the year ended December 31, 2010, Nielsen paid cash consideration of \$55 million associated with both current period and previously executed acquisitions, net of cash acquired. Had such acquisitions occurred as of January 1, 2010, the impact on Nielsen's consolidated results of operations would not have been material.

4. Business Divestitures

During the year ended December 31, 2012, Nielsen paid net cash disbursements of \$4 million associated with previously executed business divestitures.

During the year ended December 31, 2011, Nielsen received net cash proceeds of \$5 million associated with previously executed business divestitures.

During the year ended December 31, 2010, Nielsen received net cash proceeds of \$17 million associated with business divestitures, including the sale of its box-office tracking business as well as the remaining properties within the Publications operating segment discussed within discontinued operations below.

Discontinued Operations

In December 2009, the Company substantially completed its planned exit of the Publications operating segment through the sale of its media properties, including The Hollywood Reporter and Billboard, to e5 Global Media LLC.

In October 2010, the Company reached an agreement with the plaintiff in a lawsuit associated with its former Publications operating segment for a \$12 million cash settlement, which was paid in October 2010. The Company recorded a \$7 million charge (net of tax of \$5 million) associated with this settlement, which has been reported as a component of discontinued operations for the year ended December 31, 2010.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

Summarized results of operations for discontinued operations are as follows:

(IN MILLIONS)	Year Ended December 31,		
	2012	2011	2010
Revenues	\$—	\$—	\$ 8
Goodwill impairment charges	—	—	—
Operating loss	—	—	(26)
Loss from operations before income taxes	—	—	(26)
Benefit for income taxes	—	—	9
Loss from operations	—	—	(17)
Gain/(Loss) on sale, net of tax ⁽¹⁾	—	1	(5)
Income/(Loss) from discontinued operations, net of tax	\$—	\$ 1	\$(22)

- (1) The gain for the year ended December 31, 2011 primarily related to a Publications property that was previously sold. The \$5 million loss (net of a tax benefit of \$3 million) for the year ended December 31, 2010 includes the net loss on the sale of the remaining Publications properties.

Following are the major categories of cash flows from discontinued operations, as included in Nielsen's Consolidated Statements of Cash Flows:

(IN MILLIONS)	Year Ended December 31,		
	2012	2011	2010
Net cash used in operating activities	\$—	\$—	\$(17)
Net cash used in investing activities	—	—	—
Net cash used in financing activities	—	—	—
	\$—	\$—	\$(17)

5. Goodwill and Other Intangible Assets

Goodwill

The table below summarizes the changes in the carrying amount of goodwill by reportable segment for the years ended December 31, 2012 and 2011, respectively.

(IN MILLIONS)	Buy	Watch	Expositions	Total
Balance December 31, 2010	\$2,990	\$3,546	\$560	\$7,096
Acquisitions, divestitures and other adjustments	123	—	—	123
Effect of foreign currency translation	(58)	(6)	—	(64)
Balance December 31, 2011	\$3,055	\$3,540	\$560	\$7,155
Acquisitions, divestitures and other adjustments	14	117	5	136
Effect of foreign currency translation	57	4	—	61
Balance December 31, 2012	\$3,126	\$3,661	\$565	\$7,352
Cumulative Impairments	\$ —	\$ 376	\$ 2	\$ 378

At December 31, 2012, \$122 million of goodwill is expected to be deductible for income tax purposes.

Nielsen Holdings N.V.
Notes to Consolidated Financial Statements (continued)

Other Intangible Assets

<u>(IN MILLIONS)</u>	<u>Gross Amounts</u>		<u>Accumulated Amortization</u>	
	<u>December 31, 2012</u>	<u>December 31, 2011</u>	<u>December 31, 2012</u>	<u>December 31, 2011</u>
<i>Indefinite-lived intangibles:</i>				
Trade names and trademarks	\$1,921	\$1,921	\$ —	\$ —
<i>Amortized intangibles:</i>				
Trade names and trademarks	\$ 128	\$ 113	\$ (46)	\$ (37)
Customer-related intangibles	2,882	2,823	(886)	(747)
Covenants-not-to-compete	36	32	(25)	(22)
Computer software	1,316	1,089	(804)	(648)
Patents and other	90	83	(57)	(46)
Total	<u>\$4,452</u>	<u>\$4,140</u>	<u>\$(1,818)</u>	<u>\$(1,500)</u>

The amortization expense for the years ended December 31, 2012, 2011 and 2010 was \$320 million, \$319 million and \$319 million, respectively. These amounts include amortization expense associated with computer software of \$156 million, \$158 million and \$164 million for the years ended December 31, 2012, 2011 and 2010, respectively.

Certain of the trade names associated with Nielsen are deemed indefinite-lived intangible assets, as their associated Nielsen brand awareness and recognition has existed for over 50 years and the Company intends to continue to utilize these trade names. There are also no legal, regulatory, contractual, competitive, economic or other factors that may limit their estimated useful lives. Nielsen reconsiders the remaining estimated useful life of indefinite-lived intangible assets each reporting period.

The Company's 2012, 2011 and 2010 annual assessments did not result in an impairment for any of its underlying reporting units or indefinite-lived intangible assets.

All other intangible assets are subject to amortization. Future amortization expense is estimated to be as follows:

<u>(IN MILLIONS)</u>	
For the year ending December 31:	
2013	\$ 330
2014	303
2015	269
2016	194
2017	165
Thereafter	<u>1,373</u>
Total	<u>\$2,634</u>

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

6. Property, Plant and Equipment

<u>(IN MILLIONS)</u>	<u>December 31, 2012</u>	<u>December 31, 2011</u>
Land and buildings	\$ 341	\$ 359
Information and communication equipment	839	771
Furniture, equipment and other	<u>127</u>	<u>160</u>
	1,307	1,290
Less accumulated depreciation and amortization	<u>(747)</u>	<u>(681)</u>
	<u><u>\$ 560</u></u>	<u><u>\$ 609</u></u>

Depreciation and amortization expense from continuing operations related to property, plant and equipment was \$183 million, \$171 million and \$168 million for the years ended December 31, 2012, 2011 and 2010, respectively.

The above amounts include amortization expense on assets under capital leases and other financing obligations of \$7 million in each of the years ended December 31, 2012, 2011 and 2010, respectively. The net book value of assets under capital leases and other financing obligations was \$139 million and \$144 million as of December 31, 2012 and 2011, respectively. Capital leases and other financing obligations are comprised primarily of buildings.

7. Fair Value Measurements

Fair value is defined as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining fair value, the Company considers the principal or most advantageous market in which the Company would transact, and also considers assumptions that market participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions, and risk of non-performance.

There are three levels of inputs that may be used to measure fair value:

- Level 1: Quoted market prices available in active markets for identical assets or liabilities as of the reporting date.
- Level 2: Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date.
- Level 3: Pricing inputs that are generally unobservable and may not be corroborated by market data.

Financial Assets and Liabilities Measured on a Recurring Basis

The Company's financial assets and liabilities are measured and recorded at fair value, except for equity method investments, cost method investments, and long-term debt. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurements. The Company's assessment of the significance of a particular input to the fair value measurements requires judgment, and may affect the valuation of the assets and liabilities being measured and their placement within the fair value

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

hierarchy. The following table summarizes the valuation of the Company's material financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2012 and 2011:

<u>(IN MILLIONS)</u>	<u>December 31, 2012</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>

Total	<u>\$44</u>	<u>\$ 20</u>	<u>\$ 24</u>	<u>\$—</u>

- (1) Investments in equity securities are carried at fair value, which is based on the quoted market price at period end in an active market. These investments are classified as available-for-sale with any unrealized gains or losses resulting from changes in fair value recorded, net of tax, as a component of accumulated other comprehensive income/(loss) until realized. Nielsen assesses declines in the value of individual investments to determine whether such decline is other than temporary and thus the investment is impaired by considering available evidence. For the year ended December 31, 2012, the Company recorded a \$6 million impairment in Other Expense, net in the consolidated statement of operations for a decline in value of an investment in an equity security that was determined to be other-than-temporary.
- (2) Plan assets are comprised of investments in mutual funds, which are intended to fund liabilities arising from deferred compensation plans. These investments are carried at fair value, which is based on quoted market prices at period end in active markets. These investments are classified as trading securities with any gains or losses resulting from changes in fair value recorded in other expense, net in the consolidated statements of operations.
- (3) Investments in mutual funds are money-market accounts held with the intention of funding certain specific retirement plans.
- (4) Derivative financial instruments include interest rate swap arrangements recorded at fair value based on externally-developed valuation models that use readily observable market parameters and the consideration of counterparty risk.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

- (5) The Company offers certain employees the opportunity to participate in a deferred compensation plan. A participant's deferrals are invested in a variety of participant directed stock and bond mutual funds and are classified as trading securities. Changes in the fair value of these securities are measured using quoted prices in active markets based on the market price per unit multiplied by the number of units held exclusive of any transaction costs. A corresponding adjustment for changes in fair value of the trading securities is also reflected in the changes in fair value of the deferred compensation obligation.

Derivative Financial Instruments

Nielsen uses interest rate swap derivative instruments principally to manage the risk that changes in interest rates will affect the cash flows of its underlying debt obligations.

To qualify for hedge accounting, the hedging relationship must meet several conditions with respect to documentation, probability of occurrence, hedge effectiveness and reliability of measurement. Nielsen documents the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions as well as the hedge effectiveness assessment, both at the hedge inception and on an ongoing basis. Nielsen recognizes all derivatives at fair value either as assets or liabilities in the consolidated balance sheets and changes in the fair values of such instruments are recognized currently in earnings unless specific hedge accounting criteria are met. If specific cash flow hedge accounting criteria are met, Nielsen recognizes the changes in fair value of these instruments in accumulated other comprehensive income/(loss).

Nielsen manages exposure to possible defaults on derivative financial instruments by monitoring the concentration of risk that Nielsen has with any individual bank and through the use of minimum credit quality standards for all counterparties. Nielsen does not require collateral or other security in relation to derivative financial instruments. A derivative contract entered into between Nielsen or certain of its subsidiaries and a counterparty that was also a lender under Nielsen's senior secured credit facilities at the time the derivative contract was entered into is guaranteed under the senior secured credit facilities by Nielsen and certain of its subsidiaries (see Note 10 "Long-term Debt and Other Financing Arrangements" for more information). Since it is Nielsen's policy to only enter into derivative contracts with banks of internationally acknowledged standing, Nielsen considers the counterparty risk to be remote.

It is Nielsen's policy to have an International Swaps and Derivatives Association ("ISDA") Master Agreement established with every bank with which it has entered into any derivative contract. Under each of these ISDA Master Agreements, Nielsen agrees to settle only the net amount of the combined market values of all derivative contracts outstanding with any one counterparty should that counterparty default. Certain of the ISDA Master Agreements contain cross-default provisions where if the Company either defaults in payment obligations under its credit facility or if such obligations are accelerated by the lenders, then the Company could also be declared in default on its derivative obligations. At December 31, 2012, Nielsen had no material exposure to potential economic losses due to counterparty credit default risk or cross-default risk on its derivative financial instruments.

Interest Rate Risk

Nielsen is exposed to cash flow interest rate risk on the floating-rate U.S. Dollar and Euro Term Loans, and uses floating-to-fixed interest rate swaps to hedge this exposure. These interest rate swaps have various maturity dates through November 2016. For these derivatives, Nielsen reports the after-tax gain or loss from the effective portion of the hedge as a component of accumulated other comprehensive income/(loss) and reclassifies it into

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

earnings in the same period or periods in which the hedged transaction affects earnings, and within the same income statement line item as the impact of the hedged transaction.

In November 2012, the Company entered into \$500 million in aggregate notional amount of four-year interest rate swap agreements with starting dates in November 2012. These agreements fix the LIBOR related portion of interest rates of a corresponding amount of our variable-rate debt at a weighted average rate of 0.57%. The commencement date of these interest rate swaps coincided with the \$500 million aggregate notional amount of interest rate swaps that matured in November 2012. These derivative instruments have been designated as interest rate cash flow hedges.

In November 2011, the Company entered into a \$125 million notional amount and a €125 million notional amount of four-year interest rate swap agreements with starting dates in November 2011. These agreements fix the LIBOR and Euro LIBOR-related portion of interest rates of a corresponding amount of the Company's variable-rate debt at a rate of 0.84% and 1.30%, respectively. These derivative instruments have been designated as interest rate cash flow hedges.

In August 2011, the Company entered into \$250 million in aggregate notional amount of four-year forward interest swap agreements with starting dates in September 2011. These agreements fix the LIBOR-related portion of interest rates of a corresponding amount of the Company's variable-rate debt at an average rate of 0.84%. These derivative instruments have been designated as interest rate cash flow hedges.

In October and November 2010, the Company entered into an aggregate of \$1 billion notional amount of three-year forward interest rate swap agreements with starting dates in November 2010. These agreements fix the LIBOR-related portion of interest rates of a corresponding amount of the Company's variable-rate debt at an average rate of 0.72%. The commencement date of the interest rate swaps coincided with the \$1 billion notional amount of interest rate swaps that matured in November 2010. Additionally, in November 2010 the Company entered into a \$250 million notional amount three-year forward interest rate swap agreement with a starting date in November 2011, which fixes the LIBOR-related portion of interest rates of a corresponding amount of the Company's variable-rate debt at a rate of 1.26%. These derivative instruments have been designated as interest rate cash flow hedges.

In March 2010, Nielsen entered into a three-year interest swap to fix the LIBOR-related portion of interest rates for \$250 million of the Company's variable-rate debt at 1.69%. This swap replaced the \$500 million notional amount interest rate swap that matured in February 2010. This derivative instrument has been designated as an interest rate cash flow hedge.

Nielsen expects to recognize approximately \$14 million of net pre-tax losses from accumulated other comprehensive loss to interest expense in the next 12 months associated with its interest-related derivative financial instruments.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

As of December 31, 2012 the Company had the following outstanding interest rate swaps utilized in the management of its interest rate risk:

	<u>Notional Amount</u>	<u>Maturity Date</u>	<u>Currency</u>
Interest rate swaps designated as hedging instruments			
US Dollar term loan floating-to-fixed rate swaps	\$ 250,000,000	March 2013	US Dollar
US Dollar term loan floating-to-fixed rate swaps	\$1,000,000,000	November 2013	US Dollar
US Dollar term loan floating-to-fixed rate swaps	\$ 250,000,000	November 2014	US Dollar
US Dollar term loan floating-to-fixed rate swaps	\$ 250,000,000	September 2015	US Dollar
US Dollar term loan floating-to-fixed rate swaps	\$ 125,000,000	November 2015	US Dollar
Euro term loan floating-to-fixed rate swaps	€ 125,000,000	November 2015	Euro
US Dollar term loan floating-to-fixed rate swaps	\$ 500,000,000	November 2016	US Dollar

Foreign Currency Risk

Nielsen has managed its exposure to changes in foreign currency exchange rates attributable to certain of its long-term debt through the use of foreign currency swap derivative instruments. When the derivative financial instrument is deemed to be highly effective in offsetting variability in the hedged item, changes in its fair value are recorded in accumulated other comprehensive loss and recognized contemporaneously with the earnings effects of the hedged item.

See Note 10 – “Long-term Debt and Other Financing Arrangements” for more information on the long-term debt transactions referenced in this note.

Fair Values of Derivative Instruments in the Consolidated Balance Sheets

The fair values of the Company’s derivative instruments as of December 31, 2012 and December 31, 2011 were as follows:

	<u>December 31, 2012</u>		<u>December 31, 2011</u>	
	<u>Accounts Payable and Other Current Liabilities</u>	<u>Other Non-Current Liabilities</u>	<u>Accounts Payable and Other Current Liabilities</u>	<u>Other Non-Current Liabilities</u>

Derivatives in Cash Flow Hedging Relationships

The pre-tax effect of derivative instruments in cash flow hedging relationships for the years ended December 31, 2012, 2011 and 2010 was as follows (amounts in millions):

Derivatives in Cash Flow Hedging Relationships	Amount of Loss Recognized in OCI on Derivatives (Effective Portion) December 31,			Location of (Loss)/Gain Reclassified from OCI into Income (Effective Portion)	Amount of Loss Reclassified from OCI into Income (Effective Portion) December 31,			Amount of Loss Recognized in Income on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing) December 31,		
	2012	2011	2010		2012	2011	2010	2012	2011	2010
	Interest rate swaps	\$23	\$38		\$12	Interest expense	\$25	\$21	\$14	\$—

Derivatives Not Designated as Hedging Instruments

The pre-tax effect of derivative instruments not designated as hedges for the years ended December 31, 2012, 2011 and 2010 was as follows (amounts in millions):

Derivatives Not Designated as Hedging Instruments	Location of Loss Recognized in Statement of Operations on Derivatives	Amount of Loss Recognized in Statement of Operations on Derivatives For the Years Ended December 31,		
		2012	2011	2010
Interest rate swaps	Loss on derivative instruments	\$—	\$ 1	\$18
Foreign currency forward contracts	Loss on derivative instruments	—	—	9
Total		\$—	\$ 1	\$27

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The Company is required, on a nonrecurring basis, to adjust the carrying value or provide valuation allowances for certain assets using fair value measurements. The Company's equity method investments, cost method investments, and non-financial assets, such as goodwill, intangible assets, and property, plant and equipment, are measured at fair value when there is an indicator of impairment and recorded at fair value only when an impairment charge is recognized.

The Company did not measure any material non-financial assets or liabilities at fair value during the years ended December 31, 2012 or 2011.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

8. Restructuring Activities

A summary of the changes in the liabilities for restructuring activities is provided below:

<u>(IN MILLIONS)</u>	<u>Transformation Initiative</u>	<u>Productivity Initiatives and Legacy Programs</u>	<u>Total</u>
Balance at December 31, 2009	\$ 46	\$ 29	\$ 75
Charges	(9)	70	61
Payments	(37)	(33)	(70)
Non-cash charges and other adjustments	3	(1)	2
Effect of foreign currency translation	(1)	(2)	(3)
Balance at December 31, 2010	<u>2</u>	<u>63</u>	<u>65</u>
Charges	—	84	84
Payments	(2)	(80)	(82)
Balance at December 31, 2011	<u>—</u>	<u>67</u>	<u>67</u>
Charges	—	84	84
Non-cash charges and other adjustments	—	(5)	(5)
Payments	—	(82)	(82)
Balance at December 31, 2012	<u>\$ —</u>	<u>\$ 64</u>	<u>\$ 64</u>

Of the \$64 million in remaining liabilities for restructuring actions, \$53 million is expected to be paid within one year and is classified as a current liability within the consolidated financial statements as of December 31, 2012.

Productivity Initiatives and Legacy Programs

In December 2009, Nielsen commenced certain specific restructuring actions attributable to defined cost reduction programs directed towards achieving increased productivity in future periods primarily through targeted employee terminations.

The Company recorded \$84 million in restructuring charges associated with these initiatives during the year ended December 31, 2012. Of these amounts, \$5 million related to property lease termination charges with the remainder relating to severance costs associated with employee terminations.

The Company recorded \$84 million in restructuring charges associated with these initiatives during the year ended December 31, 2011. The charges primarily related to severance costs associated with employee terminations.

The Company recorded \$70 million in restructuring charges associated with these initiatives during the year ended December 31, 2010. Of these amounts, \$11 million related to property lease termination charges with the remainder relating to severance costs associated with employee terminations.

Transformation Initiative

The Transformation Initiative has been completed in all respects as of December 31, 2011.

Nielsen recorded net credits of \$9 million for the year ended December 31, 2010 associated with adjustments to previously established liabilities for employee severance and other benefits.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

9. Pensions and Other Post-Retirement Benefits

Nielsen sponsors both funded and unfunded defined benefit pension plans (the "Pension Plans") for some of its employees in the Netherlands, the United States and other international locations.

A summary of the activity for the Pension Plans follows:

(IN MILLIONS)	Year Ended December 31, 2012

Notes to Consolidated Financial Statements (continued)

Net periodic benefit cost for the years ended December 31, 2012, 2011 and 2010, respectively, includes the following components:

(IN MILLIONS)	Net Periodic Pension Cost			
	The Netherlands	United States	Other	Total
<i>Year ended December 31, 2012</i>				
Service cost	\$ 3	\$—	\$ 14	\$ 17
Interest cost	28	13	25	66
Expected return on plan assets	(34)	(18)	(29)	(81)
Amortization of net loss	3	4	4	11
Net periodic pension cost	<u>\$—</u>	<u>\$ (1)</u>	<u>\$ 14</u>	<u>\$ 13</u>
<i>Year ended December 31, 2011</i>				
Service cost	\$ 4	\$—	\$ 13	\$ 17
Interest cost	31	15	26	72
Expected return on plan assets	(37)	(18)	(28)	(83)
Amortization of net loss	—	2	1	3
Curtailment gain	—	—	(1)	(1)
Net periodic pension cost	<u>\$ (2)</u>	<u>\$ (1)</u>	<u>\$ 11</u>	<u>\$ 8</u>
<i>Year ended December 31, 2010</i>				
Service cost	\$ 4	\$—	\$ 10	\$ 14
Interest cost	29	15	25	69
Expected return on plan assets	(37)	(18)	(26)	(81)
Amortization of net gain	(1)	—	—	(1)
Curtailment gain	—	—	(2)	(2)
Net periodic pension cost	<u>\$ (5)</u>	<u>\$ (3)</u>	<u>\$ 7</u>	<u>\$ (1)</u>

The curtailment gains of \$1 million and \$2 million in 2011 and 2010, respectively, resulted from employee terminations primarily in Europe.

The deferred loss included as a component of accumulated other comprehensive income/(loss) that is expected to be recognized as a component of net periodic benefit cost during 2013 is as follows:

	The Netherlands	United States	Other	Total
Net actuarial loss	\$ (6)	\$ (5)	\$ (10)	\$ (21)

The weighted average assumptions underlying the pension computations were as follows:

(IN MILLIONS)	Year Ended December 31,		
	2012	2011	2010
Pension benefit obligation:			
—discount rate	3.8%	4.7%	5.2%
—rate of compensation increase	2.1%	2.0%	2.1%
Net periodic pension costs:			
—discount rate	4.7%	5.2%	5.7%
—rate of compensation increase	2.0%	2.1%	2.1%
—expected long-term return on plan assets	6.2%	6.3%	6.5%

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

The assumptions for the expected return on plan assets for the Pension Plans were based on a review of the historical returns of the asset classes in which the assets of the Pension Plans are invested and long-term economic forecast for the type of investments held by the plans. The historical returns on these asset classes were weighted based on the expected long-term allocation of the assets of the Pension Plans.

Nielsen's pension plans' weighted average asset allocations by asset category are as follows:

	<u>The Netherlands</u>	<u>United States</u>	<u>Other</u>	<u>Total</u>
At December 31, 2012				
Equity securities	22%	60%	47%	37%
Fixed income securities	62	40	49	54
Other	<u>16</u>	<u>—</u>	<u>4</u>	<u>9</u>
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>	<u>100%</u>
At December 31, 2011				
Equity securities	23%	60%	44%	36%
Fixed income securities	61	39	52	55
Other	<u>16</u>	<u>1</u>	<u>4</u>	<u>9</u>
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>	<u>100%</u>

No Nielsen shares are held by the pension plans.

Nielsen's primary objective with regard to the investment of the Pension Plans' assets is to ensure that in each individual plan, sufficient funds are available to satisfy future benefit obligations. For this purpose, asset and liability management studies are made periodically at each pension fund. For each of the Pension Plans, an appropriate mix is determined on the basis of the outcome of these studies, taking into account the national rules and regulations. The overall target asset allocation among all plans for 2012 was 40% equity securities and 56% long-term interest-earning investments (debt or fixed income securities), and 4% other securities.

Equity securities primarily include investments in U.S. and non U.S. companies. Fixed income securities include corporate bonds of companies from diversified industries and mortgage-backed securities. Other types of investments are primarily insurance contracts.

Assets at fair value (See Note 7 – "Fair Value Measurements" for additional information on fair value measurement and the underlying fair value hierarchy) as of December 31, 2012 and 2011 are as follows:

<u>(IN MILLIONS)</u>	<u>December 31, 2012</u>				<u>December 31, 2011</u>			
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Cash and equivalents	\$ 2	\$ 1	\$—	\$ 3	\$ 10	\$ 1	\$—	\$ 11

2015	37	11	24	72
2016	37	11	25	73
2017	38	12	27	77
2018-2022	192	68	152	412

Defined Contribution Plans

Nielsen also offers defined contribution plans to certain participants, primarily in the United States. Nielsen's expense related to these plans was \$37 million, \$37 million and \$35 million for the years ended December 31, 2012, 2011 and 2010, respectively. In the United States, Nielsen contributes cash to each employee's account in an amount up to 3% of compensation (subject to IRS limitations). No contributions are made in shares of the Company's common stock. Effective October 7, 2011, participants were allowed to invest in The Nielsen Company Stock Fund, which is an investment fund that exclusively invests in the Company's common stock.

Nielsen Holdings N.V.

Common Stock and Mandatory Convertible Bond Offerings and Related Transactions

On January 31, 2011, Nielsen completed an initial public offering of 82,142,858 shares of its €0.07 par value common stock at a price of \$23.00 per share, generating proceeds of approximately \$1,801 million, net of \$88 million of underwriter discounts.

Concurrent with its offering of common stock, the Company issued \$288 million in aggregate principal amount of 6.25% Mandatory Convertible Subordinated Bonds due February 1, 2013 ("the Bonds"), generating proceeds of approximately \$277 million, net of \$11 million of underwriter discounts. Interest on the Bonds is payable quarterly in arrears in February, May, August and November of each year, and commenced in May 2011. The Bonds provided for mandatory conversion into between 10,416,700 and 12,499,925 shares of Nielsen's common stock on February 1, 2013 at a conversion rate per \$50.00 principal amount of the bonds of not more than 2.1739 shares and not less than 1.8116 shares depending on the market value of its common stock (the average of the volume weighted-average price of its common stock for a 20 consecutive trading day period beginning on the 25th trading day immediately preceding February 1, 2013) relative to the initial price and the threshold appreciation price per share of \$23.00 and \$27.60, respectively. On February 1, 2013, the Bonds were converted into 10,416,700 shares of Nielsen's common stock at per share price of \$27.60.

The Company utilized substantially all of the combined net proceeds of approximately \$2,078 million associated with the aforementioned transactions to settle the Advisory Agreements with the Sponsors (See Note 14 – "Investments in Affiliates and Related Party Transactions" for further information) and redeem and retire certain issuances of the Company's long-term indebtedness as follows:

- In February 2011, the Company paid approximately \$201 million to redeem \$164 million of its outstanding \$467 million (\$500 million aggregate principal amount) 11.50% Senior Discount Notes Due 2016 with a redemption cost of the stated rate applied to the principal amount being redeemed plus a proportionate amount of accrued interest to the principal amount.
- In February 2011, the Company paid approximately \$129 million to redeem \$107 million of its outstanding \$307 million (\$330 million aggregate principal amount) 11.625% Senior Discount Notes

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

Due 2014 with a redemption cost of the stated rate applied to the principal amount being redeemed plus a proportionate amount of accrued interest to the principal amount.

- In February 2011, the Company paid approximately \$1,133 million to redeem all of its outstanding \$999 million (\$1,070 million aggregate principal amount) 12.50% Senior Subordinated Discount Notes Due 2016 at a price of 105.89% of the aggregate principal amount.
- In February and March 2011, the Company paid approximately \$495 million to redeem all of its 11.125% Senior Discount Debenture Notes due 2016 at a price of 104.87% of the aggregate principal amount.

The Company recorded a total debt extinguishment charge of approximately \$231 million in other expense, net in the consolidated statement of operations associated with these redemptions.

As of December 31, 2011, Luxco owned 270,746,445 shares (or approximately 75%) of the Company's common stock. On March 26, 2012, Luxco and certain Nielsen employees (the "selling shareholders") completed a public offering of 34,500,000 shares of Nielsen's common stock at a price of \$30.25 per share. As of December 31, 2012, Luxco owned 236,266,399 shares (or approximately 65%) of our outstanding shares of common stock. In February 2013, Luxco and certain Nielsen employees completed a public offering of 40,814,883 shares of the Company's common stock at a price of \$32.55 per share. Subsequent to this offering, Luxco owned 195,463,201 shares (or approximately 52%) of the Company's common stock.

Senior Secured Credit Facilities

Term Loan Facilities

In August 2006, certain of Nielsen's subsidiaries entered into the Senior Secured Credit Agreement that was amended and restated in June 2009. The Senior Secured Credit Agreement provides for term loan facilities as shown in the table above.

The Company is required to repay installments on the borrowings under the senior secured term loan facilities due 2016 in quarterly principal amounts of 0.25% of their original principal amount, with the remaining amount payable upon maturity.

Borrowings under the senior secured term loan facilities bear interest at a rate as determined by the type of borrowing, equal to either (a) a "base rate" determined by reference to the higher of (1) the federal funds rate plus 0.5% or (2) the prime rate or (b) a LIBOR rate for the currency of such borrowings, plus, in each case, an applicable margin. The applicable margins for the senior secured term loans that mature in 2013 vary depending on the Company's secured leverage ratio, from 2.00% to 2.25% in the case of LIBOR loans and from 1.00% to 1.25% in the case of base rate loans. The applicable margins for two of the senior secured term loans that mature in 2016 are set at a fixed rate of 3.75% in the case of LIBOR loans and 2.75% in the case of base rate loans, and the margin for the remaining 2016 term loans vary depending upon the Company's total leverage and credit rating, from 3.25% to 3.75% in the case of LIBOR loans and from 2.25% to 2.75% in the case of base rate loans.

In February 2012, the Senior Secured Credit Agreement was amended and restated to provide for a new five-year amortizing term loan facility in an aggregate principal amount of \$1,222 million, the proceeds from which were used to repay a corresponding amount of the existing senior secured term loans due 2013. Borrowings under this new term loan facility bear interest at a rate as determined by the type of borrowing, equal to either the "base rate" or LIBOR rate, plus, in each case, an applicable margin. The applicable margin on base rate loans under this new term loan facility ranges from 0.75% to 1.50% based on a total leverage ratio. The applicable margin on LIBOR loans under this new term loan facility ranges from 1.75% to 2.50% based on the total leverage ratio. Loans under this new term loan facility mature in full in February 2017, but the maturity date

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

shall be January 2016 if at such time there is more than \$750 million in the aggregate of existing other term loans under the Senior Secured Credit Agreement with a maturity of May 2016. The loans under this new term loan facility are required to be repaid in an amount equal to 5% of the original principal amount in the first year after the closing date, 5% in the second year, 10% in the third year, 10% in the fourth year and 70% in the fifth year (with payments in each year being made in equal quarterly installments other than the fifth year, in which payments shall be equal to 3.33% of the original principal amount of loans in each of the first three quarters and the remaining principal balance due in February 2017 (unless repayment is required in January 2016 as indicated above)). Loans under this new term loan facility are secured on a pari passu basis with the Company's existing obligations under the Senior Secured Credit Agreement and Senior Secured Loan Agreement.

The Senior Secured Credit Agreement contains a number of covenants that, among other things, restrict, subject to certain exceptions, the ability of Nielsen Holding and Finance B.V. and its restricted subsidiaries (which together constitute most of its subsidiaries) to incur additional indebtedness or guarantees, incur liens and engage in sale and leaseback transactions, make certain loans and investments, declare dividends, make payments or redeem or repurchase capital stock, engage in certain mergers, acquisitions and other business combinations, prepay, redeem or purchase certain indebtedness, amend or otherwise alter terms of certain indebtedness, sell certain assets, transact with affiliates, enter into agreements limiting subsidiary distributions and alter the business they conduct. These entities are restricted, subject to certain exceptions, in their ability to transfer their net assets to Nielsen Holdings N.V. Such restricted net assets amounted to approximately \$5.2 billion at December 31, 2012. In addition, these entities are required to maintain a maximum total leverage ratio and a minimum interest coverage ratio. Neither Nielsen Holdings nor TNC B.V. is currently bound by any financial or negative covenants contained in the credit agreement. The Senior Secured Credit Agreement also contain certain customary affirmative covenants and events of default.

Obligations under the Senior Secured Credit Agreement are guaranteed by TNC B.V., substantially all of the wholly owned U.S. subsidiaries of TNC B.V. and certain of the non-U.S. wholly-owned subsidiaries of TNC B.V., and are secured by substantially all of the existing and future property and assets of the U.S. subsidiaries of TNC B.V. and by a pledge of substantially all of the capital stock of the guarantors, the capital stock of substantially all of the U.S. subsidiaries of TNC B.V., and up to 65% of the capital stock of certain of the non-U.S. subsidiaries of TNC B.V. Under a separate security agreement, substantially all of the assets of TNC B.V. are pledged as collateral for amounts outstanding under the senior secured credit facilities.

Subsequent Event

In February 2013, the Company received the requisite lender consents to amend its Senior Secured Credit Agreement to allow for the replacement of its existing class A, B and C term loans with a new class of term loans. The amendment is expected to close during the first quarter of 2013, subject to customary closing conditions, and will be documented in an Amended and Restated Credit Agreement.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

Revolving Credit Facility

The Senior Secured Credit Agreement also contains a senior secured revolving credit facility under which Nielsen Finance LLC, TNC (US) Holdings, Inc., and Nielsen Holding and Finance B.V. can borrow revolving loans. The revolving credit facility can also be used for letters of credit, guarantees and swingline loans. In March 2011, the Company amended the Senior Secured Credit Agreement to provide for the termination of the existing revolving credit commitments totaling \$688 million, which had a final maturity date of August 2012, and their replacement with new revolving credit commitments totaling \$635 million with a final maturity date of April 2016.

Revolving loans made pursuant to the new revolving credit commitments may be drawn in U.S. Dollars or Euros (at the election of the borrowers) and bear a tiered floating interest rate depending on a total leverage ratio, from 2.25% to 3.50% in the case of LIBOR borrowings and from 1.25% to 2.50% in the case of base rate borrowings. A commitment fee is payable on the unused portion of the new revolving credit commitments ranging from 0.375% to 0.75% also depending on the total leverage ratio.

The senior secured revolving credit facility is provided under the Senior Secured Credit Agreement and so contains covenants and restrictions as noted above with respect to the Senior Secured Credit Agreement under the "Term loan facilities" section above. Obligations under the revolving credit facility are guaranteed by the same entities that guarantee obligations under the Senior Secured Credit Agreement and Senior Secured Loan Agreement.

As of December 31, 2012 and 2011, the Company had no borrowings outstanding, but had outstanding letters of credit of \$13 million and \$19 million, respectively. As of December 31, 2012, the Company had \$622 million available for borrowing under the revolving credit facility.

Debenture Loans

The indentures governing the Senior Notes limit the majority of Nielsen's subsidiaries' ability to incur additional indebtedness, pay dividends or make other distributions or repurchase its capital stock, make certain investments, enter into certain types of transactions with affiliates, use assets as security in other transactions and sell certain assets or merge with or into other companies subject to certain exceptions. Upon a change in control, Nielsen is required to make an offer to redeem all of the Senior Notes at a redemption price equal to the 101% of the aggregate accreted principal amount plus accrued and unpaid interest. The Senior Notes are jointly and severally guaranteed by TNC B.V., substantially all of the wholly owned U.S. subsidiaries of TNC B.V., and certain of the non-U.S. wholly-owned subsidiaries of TNC B.V.

In October 2012, the Company issued \$800 million aggregate principal amount of 4.50% Senior Notes due 2020 which mature on October 1, 2020 at an issue price of \$800, with cash proceeds of approximately \$788 million, net of fees and expenses. Concurrent with this issuance, the Company redeemed and subsequently retired all of its 11.50% Senior Notes due 2016 and prepaid its 8.50% Senior Secured Term Loan due 2017. In connection with these transactions, the Company recorded a charge of \$115 million in Other expense, net in the consolidated statements of operations.

In October and November 2010, the Company issued a combined \$1,080 million in aggregate principal amount of 7.75% Senior Notes due 2018 at an issue price of \$1,085 million with cash proceeds of approximately \$1,065 million, net of fees and expenses.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

In August 2006, Nielsen issued \$650 million 10% and €150 million 9% senior notes due 2014. On April 16, 2008, Nielsen issued \$220 million aggregate principal amount of additional 10% Senior Notes due 2014. In November and December 2010 the Company redeemed all \$870 million aggregate principal amount of its 10% Senior Notes due 2014 at a price of 105% of the amount redeemed as well as all €150 million aggregate principal amount of its 9% Senior Notes due 2014 at a price of 104.5% of the amount redeemed. The redemption and subsequent retirement of these collective notes resulted in a loss of \$90 million associated with the redemption option premium and recognition of previously deferred debt issuance costs recorded as a component of Other expense, net in the consolidated statement of operations in the fourth quarter of 2010. These redemptions were consummated using the proceeds from the issuance of a combined \$1,080 million in aggregate principal amount of 7.75% Senior Notes due 2018 discussed above.

In January 2009, Nielsen issued \$330 million in aggregate principal amount of 11.625 % Senior Notes due 2014 at an issue price of \$297 million with cash proceeds of approximately \$290 million, net of fees and expenses. These Senior Notes were partially redeemed during 2011 as described above.

In April 2009, Nielsen issued \$500 million in aggregate principal amount of 11.50% Senior Notes due 2016 at an issue price of \$461 million with cash proceeds of approximately \$452 million, net of fees and expenses. These Senior Notes were partially redeemed during 2011 as described above.

In August 2006, Nielsen also issued \$1,070 million 12.50% senior subordinated discount notes due 2016 (“Senior Subordinated Discount Notes”). The Senior Subordinated Discount Notes were entirely redeemed during 2011 as described above.

In August 2006, Nielsen issued €343 million 11.125% senior discount notes due 2016 (“Senior Discount Notes”). The Senior Discount Notes were entirely redeemed during 2011 as described above.

Nielsen has a Euro Medium Term Note (“EMTN”) program in place under which no further debenture loans and private placements can be issued. All debenture loans and most private placements are quoted on the Luxembourg Stock Exchange. As of December 31, 2012, all EMTN loans have matured and been repaid.

In December 2011, Nielsen’s JPY 4,000 million 2.50% EMTN matured and was repaid and in May 2010, Nielsen’s €50 million variable rate EMTN matured and was repaid.

In February 2012, Nielsen’s €30 million 6.75% EMTN matured and was repaid and in April 2012, Nielsen’s €50 million variable rate EMTN matured and was repaid.

Other Transactions

In December 2012, the Company signed a definitive agreement to acquire Arbitron Inc. (NYSE: ARB), an international media and marketing research firm, for \$48 per share in cash (the “Transaction”). In addition, the Company entered into a commitment for an unsecured note or unsecured loan of up to \$1,300 million (the “Commitment Letter”) to fund the closing of the Transaction. The Transaction has been approved by the board of directors of both companies and is subject to customary closing conditions, including regulatory review. As of December 31, 2012, there were no borrowings outstanding under the Commitment Letter.

Effective July 1, 2010, the Company designated its Euro denominated variable rate senior secured term loans due 2013 and 2016 as non-derivative hedges of its net investment in a European subsidiary. Beginning on July 1, 2010, gains or losses attributable to fluctuations in the Euro as compared to the U.S. Dollar associated with this debenture were recorded to the cumulative translation adjustment within stockholders’ equity, net of income tax. The Company recorded losses of \$43 million (net of tax of \$17 million) to the cumulative translation adjustment

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

during the second half of 2010 associated with changes in foreign currency exchange rates attributable to these loans and therefore no gains or losses were recorded within the Company's net income during that period. The Company's net income reflected foreign currency exchange gains of \$96 million for the year ended December 31, 2010 and losses of \$21 million for the year ended December 31, 2009 associated with these loans.

Deferred Financing Costs

The costs related to the issuance of debt are capitalized and amortized to interest expense using the effective interest method over the life of the related debt. Deferred financing costs were \$60 million and \$73 million at December 31, 2012 and 2011, respectively.

Related Party Lenders

A portion of the borrowings under the senior secured credit facility, as well as certain of the Company's senior debenture loans, have been purchased by certain of the Sponsors in market transactions not involving the Company. Amounts held by the Sponsors were \$412 million and \$600 million as of December 31, 2012 and 2011, respectively. Interest expense associated with amounts held by the Sponsors approximated \$20 million, \$26 million and \$29 million during the years ended December 31, 2012, 2011 and 2010, respectively.

Capital Lease and Other Obligations

Nielsen finances certain computer equipment, software, buildings and automobiles under capital leases and related transactions. These arrangements do not include terms of renewal, purchase options, or escalation clauses.

Assets under capital lease are recorded within property, plant and equipment. See Note 6 – "Property, Plant and Equipment."

Future minimum capital lease payments under non-cancelable capital leases at December 31, 2012 are as follows:

<u>(IN MILLIONS)</u>	
2013	\$ 19
2014	15
2015	14
2016	14
2017	14
Thereafter	91
Total	<u>167</u>
Less: amount representing interest	<u>60</u>
Present value of minimum lease payments	<u>\$107</u>
Current portion	\$ 10
Total non-current portion	<u>97</u>
Present value of minimum lease payments	<u>\$107</u>

Capital leases and other financing transactions have effective interest rates ranging from 8% to 10%. Interest expense recorded related to capital leases and other financing transactions during the years ended December 31, 2012, 2011 and 2010 was \$9 million, \$10 million and \$11 million, respectively. Nielsen recognizes rental income from non-cancelable subleases. Rental income will commence in 2013 for which the total aggregate future proceeds to be received under the non-cancelable subleases are \$5 million.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

11. Stockholders' Equity

Common stock activity is as follows:

	Year Ended December 31, 2012	Year Ended December 31, 2011	Year Ended December 31, 2010
(Actual number of shares of common stock outstanding)			
Beginning of year	359,647,605	276,059,333	276,156,839
Shares of common stock issued through initial public offering	—	82,142,858	—
Shares of common stock issued through business combinations	246,627	535,353	—
Shares of common stock issued through compensation plans	2,625,651	966,580	368,259
Repurchases of common stock	—	(56,519)	(465,765)
End of year	<u>362,519,883</u>	<u>359,647,605</u>	<u>276,059,333</u>

Shares of common stock repurchased described above are privately negotiated transactions. Cumulative shares of treasury stock were 213,127 and 459,754 as of December 31, 2012 and 2011, respectively, with a corresponding value of \$4 million and \$8 million, respectively.

On August 30, 2010, the Company effectuated a reverse stock split by which each one and six tenths (1.6) issued and outstanding share of common stock, par value €0.04 per share, was converted into one (1.0) share of common stock, par value €0.07 per share. All applicable share and per share amounts have been restated to show the effect of the reverse stock split for all periods presented.

No dividends were declared or paid on the Company's common stock in 2012 and 2011, respectively. In September 2010, the Company declared a special dividend of approximately €6 million (\$7 million) in the aggregate, or €0.02 per share, to its existing stockholders, \$5 million of which was in the form of a non-cash settlement of loans the Company had previously extended to Luxco. See Note 14 – "Investments in Affiliates and Related Party Transactions" for additional information regarding these loans.

On January 31, 2013, the Company's board of directors adopted a cash dividend policy with the present intent to pay quarterly cash dividends on its outstanding common stock. The board also declared the first quarterly cash dividend of \$0.16 per share, to be paid on March 20, 2013 to holders of record of the Company's common stock on March 6, 2013. The dividend policy and the payment of future cash dividends are subject to the discretion of the Company's board of directors.

12. Stock-Based Compensation

In connection with the Valcon Acquisition, Nielsen implemented an equity-based, management compensation plan ("Equity Participation Plan" or "EPP") to align compensation for certain key executives with the performance of the Company. Under this plan, certain of the Company's executives may be granted stock options, stock appreciation rights, restricted stock and dividend equivalent rights in the shares of the Company or purchase its shares. In connection with the completion of Nielsen's initial public offering of common stock on January 31, 2011 the Company implemented the Nielsen Holdings 2010 Stock Incentive Plan (the "Stock Incentive Plan") and suspended further grants under the EPP. The Stock Incentive Plan is the source of new equity-based awards permitting the Company to grant to its key employees, directors and other service providers the following types of awards: incentive stock options, non-qualified stock options, stock appreciation rights,

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

restricted stock, restricted stock units and other awards valued in whole or in part by reference to shares of Nielsen's common stock and performance-based awards denominated in shares or cash. There were no awards granted under the Stock Incentive Plan during the year ended December 31, 2010.

Under the Stock Incentive Plan, Nielsen granted 4,133,381 and 4,307,002 time-based stock options to purchase shares during the years ended December 31, 2012 and 2011, respectively. Under the Equity Participation Plan, Nielsen granted 919,052 time-based and 175,301 performance-based stock options to purchase shares during the year ended December 31, 2010. As of December 31, 2012, the total number of shares authorized for award of options or other equity-based awards was 34,795,000 under the Stock Incentive Plan. The 2012 and 2011 time-based awards become exercisable over a four-year vesting period at a rate of 25% per year on the anniversary day of the award, and are tied to the executives' continuing employment. The majority of the 2010 time-based awards become exercisable ratably on the first three anniversaries of the grant date of the award, contingent on continuing employment on each vesting date. In addition, time-based awards granted in 2010 become exercisable over a four-year vesting period tied to the executives' continuing employment as follows: 75% vested on December 31, 2012 and 25% will vest on December 31, 2013. The 2009, 2008 and 2007 time-based awards became exercisable over a four-year, four-year and five-year vesting period, respectively, and were fully vested as of December 31, 2012. The 2010, 2009 and 2008 performance options are tied to the executives' continued employment and become vested and exercisable based on the achievement of certain annual EBITDA targets over a four-year vesting period. The 2007 and 2006 performance options are tied to the executives' targets over a five-year vesting period. If the annual EBITDA targets are achieved on a cumulative basis for any current year and prior years, the options become vested as to a pro-rata portion for any prior year installments which were not vested because of failure to achieve the applicable annual EBITDA target. Both option tranches expire ten years from date of grant. Upon a change in control, any then-unvested time options will fully vest and any then-unvested performance options can vest, subject to certain conditions.

For the years ended December 31, 2012, 2011 and 2010, the fair values of the time-based and performance-based awards were estimated using the Black-Scholes option pricing model. Expected volatility has been based on a combination of the estimates of implied volatility of the Company's peer-group and the Company's historical volatility adjusted for leverage. For grants subsequent to the Company's initial public offering, implied volatility based on trading Nielsen call options is also considered in the calculation of expected volatility because it is considered representative of future stock price trends.

The following assumptions were used during 2012, 2011 and 2010:

	Year Ended December 31,		
	2012	2011	2010
Expected life (years)	3.50 - 6.00	3.50 - 6.00	2.85 - 4.17
Risk-free interest rate	0.38 - 0.83%	1.18 - 2.23%	1.28 - 2.12%
Expected dividend yield	0%	0%	0%
Expected volatility	28.00 - 30.30%	31.70 - 42.00%	58.00 - 63.00%
Weighted average volatility	28.56%	33.42%	60.05%

The Company recorded stock-based compensation expense of \$34 million, \$27 million and \$18 million for the years ended December 31, 2012, 2011 and 2010, respectively. The tax benefit related to the stock compensation expense was \$13 million, \$11 million and \$8 million, for the respective periods.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

Nielsen's stock option plan activity is summarized below:

	Number of Options (Time Based and Performance Based)	Weighted-Average Exercise Price	Weighted- Average Remaining Contractual Term in Years	Aggregate Intrinsic Value in Millions
Stock Option Plan activity				
Outstanding at December 31, 2009	16,354,797	\$ 17.52	7.40	\$ 29
Granted	1,094,353	18.76		
Forfeited	(703,387)	(20.46)		
Exercised	(625,554)	(13.42)		
Outstanding at December 31, 2010	16,120,209	17.63	6.51	\$ 77
Granted	4,307,002	30.00		
Forfeited	(684,306)	(20.96)		
Exercised	(1,160,878)	(13.20)		
Outstanding at December 31, 2011	18,582,027	\$ 20.65	5.77	\$175
Granted	4,133,381	28.00		
Forfeited	(655,034)	(24.30)		
Exercised	(2,372,536)	(14.64)		
Outstanding at December 31, 2012	19,687,838	\$ 22.80	5.16	\$156
Exercisable at December 31, 2012	9,986,984	\$ 19.63	4.61	\$112

Time-based and performance-based options granted during 2010 have exercise prices of \$18.41 per share and \$36.80 per share, respectively. There were no performance-based awards granted in 2012 and 2011.

As of December 31, 2012, 2011 and 2010, the weighted-average grant date fair value of the options granted was \$7.25, \$9.39 and \$8.05, respectively, and the aggregate fair value of options vested was \$21 million, \$12 million and \$12 million, respectively.

At December 31, 2012, there is approximately \$36 million of unearned stock-based compensation related to stock options which the Company expects to record as stock-based compensation expense over the next four years. The compensation expense related to the time-based awards is amortized over the term of the award using the graded vesting method.

The intrinsic value of the options exercised during the years ended December 31, 2012, 2011 and 2010 was \$34 million, \$18 million and \$4 million, respectively. For the year ended December 31, 2012, cash proceeds from the exercise of options was \$32 million.

As of December 31, 2012, affiliates of Centerview Partners, a stockholder of Luxco, collectively holds 312,500 performance-based options and 218,750 time-based options to purchase shares in the Company. Cumulative expense related to these outstanding options amounted to approximately \$5 million through December 31, 2012.

During the years ended December 31, 2012 and 2011, 687,300 and 248,450, respectively, of restricted stock units (RSUs) ultimately payable in shares of common stock were granted under the Stock Incentive Plan. The

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

awards vest at a rate of 25% per year over four years on the anniversary of the award. There were 80,981 RSUs that vested during the year ended December 31, 2012. In 2010, 6,250 RSUs ultimately payable in shares of common stock were granted. The 2010 awards fully vested on November 1, 2011. The estimated weighted average grant date fair value of these units in 2012, 2011 and 2010 were \$27.99, \$30.05 and \$19.20, respectively.

As of December 31, 2012, approximately \$16 million of unearned stock-based compensation related to unvested RSUs (net of estimated forfeitures) is expected to be recognized over a weighted average period of 3.4 years.

13. Income Taxes

The components of income from continuing operations before income taxes and equity in net income of affiliates, were:

<u>(IN MILLIONS)</u>	<u>Year Ended December 31,</u>		
	<u>2012</u>	<u>2011</u>	<u>2010</u>
Dutch	\$ 20	\$ 12	\$147
Non-Dutch	388	92	(44)
Income from continuing operations before income taxes and equity in net income of affiliates	<u>\$408</u>	<u>\$104</u>	<u>\$103</u>

The above amounts for Dutch and non-Dutch activities were determined based on the location of the taxing authorities.

The provision/(benefit) for income taxes attributable to the income/(loss) from continuing operations before income taxes and equity in net income of affiliates consisted of:

<u>(IN MILLIONS)</u>	<u>Year ended December 31,</u>		
	<u>2012</u>	<u>2011</u>	<u>2010</u>
Current:			
Dutch	\$ (20)	\$ 3	\$ 11
Non-Dutch	113	143	117
	<u>93</u>	<u>146</u>	<u>128</u>
Deferred:			
Dutch	25	(13)	(1)
Non-Dutch	22	(111)	(173)
	<u>47</u>	<u>(124)</u>	<u>(174)</u>
Total	<u>\$140</u>	<u>\$ 22</u>	<u>\$ (46)</u>

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

The Company's provision/(benefit) for income taxes for the years ended December 31, 2012, 2011 and 2010 was different from the amount computed by applying the statutory Dutch federal income tax rates to the underlying income from continuing operations before income taxes and equity in net income of affiliates as a result of the following:

(IN MILLIONS)	Year ended December 31,		
	2012	2011	2010
Income from continuing operations before income taxes and equity in net income of affiliates	\$ 408	\$ 104	\$ 103
Dutch statutory tax rate	25.0%	25.0%	25.5%
Provision/(benefit) for income taxes at the Dutch statutory rate	\$ 102	\$ 26	\$ 26
Tax impact on distributions from foreign subsidiaries	35	9	1
Effect of operations in non-Dutch jurisdictions, including foreign tax credits	15	(3)	(35)
U.S. state and local taxation	6	(4)	(24)
Withholding and other taxation	36	30	29
Effect of global financing activities	(51)	(38)	(28)
Changes in estimates for uncertain tax positions	48	22	2
Changes in valuation allowances	(15)	(25)	(25)
Effect of change in deferred tax rates	(40)	—	—
Other, net	4	5	8
Total (benefit)/provision for income taxes	\$ 140	\$ 22	\$ (46)
Effective tax rate	34.3%	21.2%	(44.7%)

(IN MILLIONS)	December 31, 2012	December 31, 2011

Share-based payments	59	46
Accrued expenses	26	35
Other assets	52	37
	1,270	1,273
Valuation allowances	(248)	(193)
Deferred tax assets, net of valuation allowances	1,022	1,080
Deferred tax liabilities (on balance):		
Intangible assets	(1,661)	(1,723)
Fixed asset depreciation	(21)	(4)
Financial instruments	(50)	(53)
Deferred revenues / costs	—	—
Computer software	(69)	(43)
	(1,801)	(1,823)
Net deferred tax liability	\$ (779)	\$ (743)
Recognized as:		
Deferred income taxes, current	\$ 57	\$ 55
Deferred income taxes, non-current	(836)	(798)
Total	\$ (779)	\$ (743)

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

At December 31, 2012 and 2011 the Company had net operating loss carryforwards of approximately \$1,260 million and \$1,262 million, respectively, which begin to expire in 2013. In addition, the Company had tax credit carryforwards of approximately \$113 million and \$96 million at December 31, 2012 and 2011, respectively, which will begin to expire in 2014.

In certain jurisdictions, the Company has operating losses and other tax attributes that, due to the uncertainty of achieving sufficient profits to utilize these operating loss carryforwards and tax credit carryforwards, the Company currently believes it is more likely than not that a portion of these losses will not be realized. Therefore, the Company has a valuation allowance of approximately \$205 million and \$169 million at December 31, 2012 and 2011, related to these net operating loss carryforwards and tax credit carryforwards. In addition, the Company has valuation allowances of \$43 million and \$24 million at December 31, 2012 and 2011, respectively, on deferred tax assets related to other temporary differences, which the Company currently believes will not be realized.

As a consequence of the significant restructuring of the ownership of the Nielsen non-U.S. subsidiaries in 2007 and 2008 the Company has determined that as of December 31, 2012 no income taxes are required to be provided for on the approximately \$3.3 billion, which is the excess of the book value of its investment in non-U.S. subsidiaries over the corresponding tax basis. Certain of these differences can be eliminated at a future date.

At December 31, 2012 and 2011, the Company had uncertain tax positions of \$100 million and \$96 million, respectively. The Company has also accrued interest and penalties associated with these unrecognized tax benefits as of December 31, 2012 and 2011 of \$40 million and \$29 million, respectively. Estimated interest and penalties related to the underpayment of income taxes is classified as a component of benefit (provision) for income taxes in the Consolidated Statement of Operations. It is reasonably possible that a reduction in a range of \$6 million to \$14 million of uncertain tax positions may occur within the next twelve months as a result of projected resolutions of worldwide tax disputes.

A reconciliation of the beginning and ending amount of uncertain tax positions is as follows:

<u>(IN MILLIONS)</u>	<u>December 31,</u> <u>2012</u>	<u>December 31,</u> <u>2011</u>	<u>December 31,</u> <u>2010</u>
Balance as of the beginning of period	\$ 96	\$114	\$129
Additions for current year tax positions	7	4	3
Additions for tax positions of prior years	16	—	3
Reductions for lapses of statute of limitations	(19)	(22)	(22)
Effect of foreign currency translation	—	—	(1)
Balance as of the end of the period	<u>\$100</u>	<u>\$ 96</u>	<u>\$114</u>

If the balance of the Company's uncertain tax positions is sustained by the taxing authorities in the Company's favor, the reversal of the entire balance would reduce the Company's effective tax rate in future periods.

The Company files numerous consolidated and separate income tax returns in the U.S. Federal jurisdiction and in many state and foreign jurisdictions. With few exceptions, the Company is no longer subject to U.S. Federal income tax examinations for 2006 and prior periods. In addition, the Company has subsidiaries in various states, provinces and countries that are currently under audit for years ranging from 2001 through 2008.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

14. Investments in Affiliates and Related Party Transactions

Related Party Transactions with Affiliates

As of December 31, 2012 and 2011, Nielsen had investments in affiliates of \$77 million and \$74 million, respectively. Nielsen's only significant investment, and its percentage of ownership as of December 31, 2012, was its 51% non-controlling ownership interest in Scarborough Research ("Scarborough"). As of December 31, 2012, the carrying value of the Company's investment in Scarborough was \$53 million.

Nielsen and Scarborough enter into various related party transactions in the ordinary course of business, including Nielsen providing certain general and administrative services to Scarborough. Nielsen pays royalties to Scarborough for the right to include Scarborough data in Nielsen services sold directly to Nielsen customers. Additionally, Nielsen sells various Scarborough services directly to its clients, for which it receives a commission from Scarborough. As a result of these transactions, Nielsen received net payments from Scarborough of \$15 million, \$14 million and \$7 million for the years ended December 31, 2012, 2011 and 2010. Obligations between Nielsen and its affiliates, including Scarborough, are regularly settled in cash in the ordinary course of business. Nielsen had net receivables from its affiliates of approximately \$6 million and \$12 million at December 31, 2012 and 2011, respectively.

Transactions with Sponsors

In connection with the Valcon Acquisition, two of Nielsen's subsidiaries and the Sponsors entered into Advisory Agreements, which provided for an annual management fee, in connection with planning, strategy, oversight and support to management, and were payable quarterly and in advance to each Sponsor, on a pro rata basis, for the eight year duration of the agreements, as well as reimbursements for each Sponsor's respective out-of-pocket expenses in connection with the management services provided under the agreement. For the year ended December 31, 2010, the Company recorded \$12 million in selling, general and administrative expenses related to these management fees, sponsor travel and consulting.

The Advisory Agreements provided that upon the consummation of a change in control transaction or an initial public offering in excess of \$200 million, each of the Sponsors would receive, in lieu of quarterly payments of the annual management fee, a fee equal to the net present value of the aggregate annual management fee that would have been payable to the Sponsors during the remainder of the term of the agreements (assuming an eight year term of the agreements), calculated using the treasury rate having a final maturity date that is closest to the eighth anniversary of the date of the agreements.

In January 2011 in conjunction with the Company's initial public offering of common stock, the Advisory Agreements with the Sponsors were terminated for a settlement amount of \$102 million and the Company recorded this charge as a component of selling, general and administrative expenses in the consolidated statement of operations.

The Company has periodically extended loans to Luxco to permit Luxco to pay certain operational expenses and to fund share repurchases. The full principal amount of and accrued interest on each such loan is payable at maturity, which is generally one year or less from incurrence. The rate of interest on these loans has ranged from 3.47% to 7.70%. At December 31, 2012, there were no loans outstanding to or from Luxco.

Equity Healthcare LLC

Effective in January 2009, Nielsen entered into an employer health program arrangement with Equity Healthcare LLC ("Equity Healthcare"). Equity Healthcare negotiates with providers of standard administrative

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

services for health benefit plans and other related services for cost discounts, quality of service monitoring, data services and clinical consulting and oversight by Equity Healthcare. Because of the combined purchasing power of its client participants, Equity Healthcare is able to negotiate pricing terms from providers that are believed to be more favorable than the companies could obtain for themselves on an individual basis. Equity Healthcare is an affiliate of The Blackstone Group, one of the Sponsors.

In consideration for Equity Healthcare's provision of access to these favorable arrangements and its monitoring of the contracted third parties' delivery of contracted services to Nielsen, the Company pays Equity Healthcare a fee of \$2.50 per participating employee per month ("PEPM Fee"). As of December 31, 2012, Nielsen had approximately 7,300 employees enrolled in its self-insured health benefit plans in the United States. Equity Healthcare may also receive a fee ("Health Plan Fees") from one or more of the health plans with whom Equity Healthcare has contractual arrangements if the total number of employees joining such health plans from participating companies exceeds specified thresholds.

Board of Directors

On July 26, 2012, Iain Leigh resigned from the Boards of Directors of Nielsen Holdings, N.V. and The Nielsen Company B.V. and Vivek Y. Ranadivé was elected as a member of the unitary Board of Directors to serve until the next Annual Meeting of Shareholders. Mr. Ranadivé has been the Chief Executive Officer and Chairman of the Board of Directors of TIBCO Software Inc. ("TIBCO") since its inception in 1997. The Company has an ongoing contractual relationship with TIBCO. In connection with his appointment, the Board of Directors of the Company affirmatively determined that Mr. Ranadivé is independent for purposes of the New York Stock Exchange listing rules and the Company's Corporate Governance Guidelines

15. Commitments and Contingencies

Leases and Other Contractual Arrangements

In February 2013, the Company amended its Amended and Restated Master Services Agreement (the "MSA"), dated as of October 1, 2007 with Tata America International Corporation and Tata Consultancy Services Limited (jointly, "TCS"). The term of the MSA has been extended for an additional three years, so as to expire on December 31, 2020, with a one-year renewal option granted to Nielsen. In addition, the Company has increased its commitment to purchase services from TCS (the "Minimum Commitment") from \$1.0 billion to \$2.5 billion over the life of the contract (from October 1, 2007), including a commitment to purchase at least \$100 million in services per year (the "Annual Commitment"). TCS' charges under the separate Global Infrastructure Services Agreement between the parties will be credited against the Minimum Commitment and the Annual Commitment. TCS will continue to globally provide the Company with professional services relating to information technology (including application development and maintenance), business process outsourcing, client service knowledge process outsourcing, management sciences, analytics, and financial planning and analytics. As Nielsen orders specific services under the Agreement, the parties will execute Statements of Work ("SOWs") describing the specific scope of the services to be performed by TCS. The amount of the Minimum Commitment and the Annual Commitment may be reduced on the occurrence of certain events, some of which also provide the Company with the right to terminate the Agreement or SOWs, as applicable.

Nielsen has also entered into operating leases and other contractual obligations to secure real estate facilities, agreements to purchase data processing services and leases of computers and other equipment used in the ordinary course of business and various outsourcing contracts. These agreements are not unilaterally cancelable by Nielsen, are legally enforceable and specify fixed or minimum amounts or quantities of goods or services at fixed or minimum prices.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

The amounts presented below represent the minimum annual payments under Nielsen's purchase obligations that have initial or remaining non-cancelable terms in excess of one year. These purchase obligations include data processing, building maintenance, trade show venues, equipment purchasing, photocopiers, land and mobile telephone service, computer software and hardware maintenance, and outsourcing.

(IN MILLIONS)	For the Years Ending December 31,						
	2013	2014	2015	2016	2017	Thereafter	Total
Operating leases	\$ 91	\$ 78	\$59	\$45	\$36	\$84	\$393
Other contractual obligations	150	47	26	12	2	2	239
Total	<u>\$241</u>	<u>\$125</u>	<u>\$85</u>	<u>\$57</u>	<u>\$38</u>	<u>\$86</u>	<u>\$632</u>

Total expenses incurred under operating leases were \$88 million, \$97 million and \$96 million for the years ended December 31, 2012, 2011 and 2010, respectively. Nielsen recognized rental income received under subleases of \$8 million, \$10 million and \$13 million for the years ended December 31, 2012, 2011 and 2010, respectively. At December 31, 2012, Nielsen had aggregate future proceeds to be received under non-cancelable subleases of \$40 million.

Nielsen also has minimum commitments under non-cancelable capital leases. See Note 10 "Long-term Debt and Other Financing Arrangements" for further discussion.

Guarantees and Other Contingent Commitments

At December 31, 2012, Nielsen was committed under the following significant guarantee arrangements:

Sub-lease guarantees

Nielsen provides sub-lease guarantees in accordance with certain agreements pursuant to which Nielsen guarantees all rental payments upon default of rental payment by the sub-lessee. To date, the Company has not been required to perform under such arrangements, does not anticipate making any significant payments related to such guarantees and, accordingly, no amounts have been recorded.

Letters of credit

Letters of credit issued and outstanding amount to \$13 million and \$19 million at December 31, 2012 and 2011, respectively.

Legal Proceedings and Contingencies

Nielsen is subject to litigation and other claims in the ordinary course of business, some of which include claims for substantial sums. Accruals have been recorded when the outcome is probable and can be reasonably estimated. While the ultimate results of claims and litigation cannot be determined, the Company does expect that the ultimate disposition of these matters will not have a material adverse effect on its operations or financial condition. However, depending on the amount and the timing, an unfavorable resolution of some or all of these matters could materially affect the Company's future results of operations or cash flows in a particular period.

Nielsen Holdings N.V.

Notes to Consolidated Financial Statements (continued)

16. Segments

The Company aligns its operating segments in order to conform to management's internal reporting structure, which is reflective of service offerings by industry. Management aggregates such operating segments into three reporting segments: what consumers buy ("Buy"), consisting principally of market research information and analytical services; what consumers watch ("Watch"), consisting principally of television, online and mobile audience and advertising measurement and corresponding analytics and Expositions, consisting principally of trade shows, events and conferences.

Corporate consists principally of unallocated items such as certain facilities and infrastructure costs as well as intersegment eliminations. Certain corporate costs, other than those described above, including those related to selling, finance, legal, human resources, and information technology systems, are considered operating costs and are allocated to the Company's segments based on either the actual amount of costs incurred or on a basis consistent with the operations of the underlying segment. Information with respect to the operations of each of Nielsen's business segments is set forth below based on the nature of the services offered and geographic areas of operations.

The notes to the consolidated financial statements of Nielsen Holdings N.V. (the “Company”) are an integral part of these unconsolidated financial statements.

Notes to Schedule I

1. Basis of Presentation

The Company has accounted for the earnings of its subsidiaries under the equity method in these financial statements.

2. Commitments and Contingencies

The Company had no material commitments or contingencies during the reported periods.

3. Related Party Transactions

The Company executed a \$6 million short-term loan with one of its subsidiaries with an original maturity in June 2012 and began accreting interest in December 2011 at a rate of 3.01%. In 2012, the loan was extended at a rate of 2.99% and will mature in December 2013.

The Company enters into certain transactions with its subsidiaries through the normal course of operations and periodically settles these transactions in cash. On December 31, 2012, the Company has a \$7 million receivable from subsidiary associated with the sale of shares of common stock in conjunction with acquisitions made by its subsidiaries. During the year ended December 31, 2011, the Company received a net cash payment of \$5 million associated with the sale of shares of common stock in conjunction with acquisitions made by its subsidiaries, net of reimbursements of fees paid on behalf of the Company by its subsidiaries

Notes to Schedule I (continued)

4. Common Stock and Mandatory Convertible Bond Offerings and Related Transactions

On January 31, 2011, the Company completed an initial public offering of 82,142,858 shares of its €0.07 par value common stock at a price of \$23.00 per share, generating proceeds of approximately \$1,801 million, net of \$88 million of underwriter discounts. As of December 31, 2011, Luxco owned 270,746,445 shares (or approximately 75%) of the Company's common stock. On March 26, 2012, Luxco and certain Nielsen employees (the "selling shareholders") completed a public offering of 34,500,000 shares of Nielsen's common stock at a price of \$30.25 per share. As of December 31, 2012, Luxco owned 236,266,399 shares (or approximately 65%) of our outstanding shares of common stock. In February 2013, Luxco and certain Nielsen employees completed a public offering of 40,814,883 shares of the Company's common stock at a price of \$32.55 per share. Subsequent to this offering, Luxco owned 195,463,201 shares (or approximately 52%) of the Company's common stock.

Concurrent with its offering of common stock, the Company issued \$288 million in aggregate principal amount of 6.25% Mandatory Convertible Subordinated Bonds due February 1, 2013 ("the Bonds"), generating proceeds of approximately \$277 million, net of \$11 million of underwriter discounts. Interest on the Bonds is payable quarterly in arrears in February, May, August and November of each year, and commenced in May 2011. The Bonds provided for mandatory conversion into between 10,416,700 and 12,499,925 shares of Nielsen's common stock on February 1, 2013 at a conversion rate per \$50.00 principal amount of the bonds of not more than 2.1739 shares and not less than 1.8116 shares depending on the market value of its common stock (the average of the volume weighted-average price of its common stock for a 20 consecutive trading day period beginning on the 25 trading day immediately preceding February 1, 2013) relative to the initial price and the threshold appreciation price per share of \$23.00 and \$27.60, respectively. On February 1, 2013, the Bonds were converted into 10,416,700 shares of Nielsen's common stock at per share price of \$27.60.

The Company remitted and utilized substantially all of the combined net proceeds of approximately \$2,078 million associated with the aforementioned transactions to certain of its subsidiaries to settle the Advisory Agreements in place between the Sponsors and certain of such subsidiaries and to redeem and retire certain issuances of the Company's subsidiary long-term indebtedness.

Recent Developments

In January 2013, the Company adopted a cash dividend policy pursuant to which it intends to declare and pay quarterly cash dividends on each issued and outstanding share of common stock. The first quarterly cash dividend under this policy was declared by the Company's board of directors in the amount of \$0.16 per share payable on March 20, 2013 to holders of record of shares of its common stock on March 6, 2013. Any decision to declare and pay dividends in the future will be made at the discretion of our board of directors and will be subject to the board's continuing determination that the dividend policy and the declaration of dividends thereunder are in the best interests of our shareholders, and are in compliance with all laws and agreements to which we are subject. In addition, the Company's ability to pay dividends is limited by covenants in our senior secured credit facilities and in the indentures governing our notes. See the "Liquidity and Capital Resources" section of Item 7 – Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 10 to our consolidated financial statements – "Long-term Debt and Other Financing Arrangements," for a description of our senior secured credit facility, debenture loans and these dividend restrictions.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that the Company files or submits to the SEC under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, as the Company's disclosure controls and procedures are designed to do.

The Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of December 31, 2012 (the "Evaluation Date"). Based on such evaluation and subject to the foregoing, such officers have concluded that, as of the Evaluation Date, the Company's disclosure controls and procedures are effective at the reasonable assurance level to ensure that information required to be disclosed by the Company in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and to ensure that information required to be disclosed by the Company in the reports that the Company files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

(b) Management's Annual Report on Internal Control over Financial Reporting

Management's Annual Report on Internal Control over Financial Reporting appears in Part II, Item 8. "Financial Statements and Supplementary Data" of this annual report on Form 10-K.

The Company's financial statements included in this annual report on Form 10-K have been audited by Ernst & Young LLP, independent registered public accounting firm. Ernst & Young LLP has also provided an attestation report on the Company's internal control over financial reporting. Their reports appear in Part II, Item 8. "Financial Statements and Supplementary Data" of this annual report on Form 10-K.

(c) Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting that occurred during the quarter ended December 31, 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers, and Corporate Governance

The information required by this Item is incorporated by reference to the following sections of our definitive Proxy Statement related to the 2013 Annual Meeting of Stockholders (the "2013 Proxy Statement"), which will be filed with the SEC on or before April 30, 2013: "Proposal No. 3 – Election of Directors", "The Board of Directors and Certain Governance Matters" and "Section 16(a) Beneficial Ownership Reporting Compliance".

Item 11. Executive Compensation

The information required by this Item is incorporated by reference to the following sections of the 2013 Proxy Statement, which will be filed with the SEC on or before April 30, 2013: "Executive Compensation" and "Director Compensation".

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item is incorporated by reference to the following sections of the 2013 Proxy Statement, which will be filed with the SEC on or before April 30, 2013: "Equity Compensation Plan Information" and "Ownership of Securities".

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this Item is incorporated by reference to the following sections of the 2013 Proxy Statement, which will be filed with the SEC on or before April 30, 2013: "Certain Relationships and Related Party Transactions" and "The Board of Directors and Certain Governance Matters".

Item 14. Principal Accounting Fees and Services

The information required by this Item is incorporated by reference to the following section of the 2013 Proxy Statement, which will be filed with the SEC on or before April 30, 2013: "Proposal No. 4 – Ratification of Independent Registered Public Accounting Firm".

PART IV

CHIEF EXECUTIVE OFFICER CERTIFICATION

I, David L. Calhoun, certify that:

1. I have reviewed this annual report on Form 10-K of Nielsen Holdings N.V.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal controls over financial reporting (as defined in Exchange act rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Annual Report of Nielsen Holdings N.V. (the "Company") on Form 10-K for the year ended December 31, 2012 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, David L. Calhoun, Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that to my knowledge:

- (1) The Report fully complies with requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

This certification is provided solely pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, and shall not be deemed to be part of the Report or filed for any purpose whatsoever.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Annual Report of Nielsen Holdings N.V. (the "Company") on Form 10-K for the year ended December 31, 2012 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Brian West, Chief Financial Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that to my knowledge:

- (1) The Report fully complies with requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

This certification is provided solely pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, and shall not be deemed to be part of the Report or filed for any purpose whatsoever.
