2012 Annual Report

2012 Annual Letter

On the same date in 1922 that archeologist Howard Carter was entering King Tut's tomb in Egypt for the first time, something unusual was happening in southeast South Dakota. Rising up from the rich black dirt was a radio tower. On November 24, 1922, just a few days after the BBC had its official radio debut, WNAX, with call letters derived from the words "North American Experiment," went on the air. WNAX began service to five states with a complete range of entertainment, news, and agricultural programming. Several years later, WNAX hired Lawrence Welk and his orchestra as its exclusive house band. As the popularity of WNAX increased, the owners launched WNAX gas stations throughout the central states with the slogan "*You will run out of gas before you run out of signal.*"

In May, 1922, Cornell University in Ithaca, New York, was converting 8YC (a radio station that was first licensed in 1912 to the School of Electrical Engineering at Cornell) into WHCU. The stated aim of the station was to present all programming that was educational in nature.

Three short years later in 1925, the year that Scopes was found guilty of teaching evolution, WCSH (now WZAN) in Maine was launched as the "Voice of the Sunrise Land."

In 1927, WKBK, now in Keene, New Hampshire, signed on. On the west coast, an entrepreneur moved a radio station from Seattle to Bellingham, Washington and launched KGMI.

The AM broadcast band was on the cusp of fantastic growth, but what all of the previously mentioned heritage stations have in common is that they are now Saga stations. We cherish their heritage. They are just as important today in their communities and areas served as they were 85 – 90 years ago. This is the power of local radio.

Since Saga was formed 26 years ago, we have grown to 91 radio stations, 8 owned and/or operated television stations, 5 state farm and news radio networks, and a collection of 26 metro translators that either rebroadcast our heritage AM stations on FM or serve to enhance our new digital signals with analog coverage in our markets.

We are not done by a long shot. Though the last couple of years have been challenging, we have still managed to pay down debt (more on this later) and last year we paid a special dividend.

Part of our strength is our adherence to both goals and focus. Robert Heinlein (1907 – 1988), one of the leaders in Science Fiction writing, said it best:

"In the absence of clearly-defined goals, we become strangely loyal to performing daily trivia until ultimately we become enslaved by it."

Goals have been a part of the fabric of Saga since our founding. Over the past 26 years, we have seen many broadcast companies rapidly assembled with the mission to acquire quickly (not necessarily with a strategy), grow profits, and find an exit point. That mission could be construed as a goal but the usual effect is that these companies end up laying fallow by the roadside.

Our goals have been refined to where we can say that Saga's mission is to do compelling broadcasting, create an ambiance that encourages talent, find and acquire broadcast properties that have similar components and grow and nurture them. If you do this correctly, you should have a successful company. We like to think that we are successful. However, though our goals and strategies have evolved, we have had to modify them due to a tough economic environment that has enveloped us, along with everyone else.

We know that our mission remains the same, but the timing of building our company has been affected. We now find ourselves with a great and profitable company that has to modify its operating plan to fit our current operating environment.

Let me explain our quandary. Since our inception, we have used our free cash flow along with judicious use of debt to strategically grow Saga. Over the last four years we have had to re-format this strategy.

Our debt has never been out of control. It has always been conservatively levered until the banking industry changed that matrix. Since 2009, we have paid our debt down from \$134 million to \$58 million. Our cash on hand, as of February 28, 2013, is about \$24 million. Last year we paid a special cash dividend and announced a 4 for 3 stock split that was effective January 16, 2013.

Saga will continue to generate cash. We can continue to pay special dividends. We can, as we have in the past, repurchase company stock. We can pay down additional debt (at year end, debt was 1.5x EBITDA). We can make acquisitions, something that we haven't been able to do over the last five years. Although we have not stopped growing our radio and TV markets, the acquisition market has been somewhat frozen over the past several years due to the spread between the bid and ask price for assets. In fact, the last five years have been the slowest trading time in decades for the broadcast industry, especially in radio. Denial on the part of companies is a big part of this. There has been a reset in values in broadcasting that is no different from many other industries. What has traded has been by necessity with rare exception. We are buyers, but buyers with a plan that will not allow us to compromise the financial strength of Saga. Growth for the sake of growth badly hurt our industry.

These are several strategies that can be adopted either singularly or in concert and any combination of the above is possible and practical.

Now, what happened in 2012? We had a flat year compared to 2011 that was made into an up year due to a good political cycle. Gross revenue increased 3.8% to \$143.8 million and included \$6.7 million in political revenue. Free cash flow increased 9.5% to \$25.1 million for the year. Station operating expense (station operating expense includes depreciation and amortization attributable to the stations) decreased \$641 thousand for the year. Net income increased \$5.3 million to \$17.9 million resulting in \$3.16 of net income per fully diluted share compared to \$2.23 last year. During the year we reduced our outstanding bank debt by a little over \$10 million.

What do we see in 2013? There is a lack of clarity at this time but we will continue to manage the company profitably, although growth will be challenging. This is probably what all of you are hearing from other industries as well. I wish that I could speak with more specificity but currently our confidence in our predictive abilities goes out for no more than 30 – 60 days. Other executives in the broadcast industry share a similar frustration.

There is nothing wrong with broadcasting as a business. Americans still depend upon radio and television for news, information, weather, traffic and localism. Despite what some hi-tech companies would have you believe, the business of broadcasting is healthy and profitable. We have our challenges, but they do not and will not hamper our ability to serve our communities well and profit from our efforts.

I remember several years ago when Warren Buffet said that he would not consider buying newspapers for Berkshire Hathaway. He has gone 180 degrees from that position and has made a substantial commitment to community newspapers. Berkshire Hathaway feels about local newspapers the way we do about community/local radio and television stations. This is a very important and ingrained role that we have and it will not diminish.

I am very proud of our company and its 1,200 employees. We continue to be recognized as a top industry leader and continue to receive awards and accolades at our individual stations. We have leading stations in each and every market we operate. Can we do better? Certainly, and we will. Complacency is not part of our DNA. We are achievers with a goal of continued excellence.

I thank all of our stockholders for your confidence in our company. As I always remind everyone in Saga... if we do compelling radio and TV, people will listen and watch. If you create effective advertising and run it with frequency, advertisers will get results, they will buy more advertising, our profits will increase... business and life are good.

A handwritten signature in black ink, appearing to read "Ed Christian". The signature is fluid and stylized, with a prominent initial "E" and "C".

Forward-Looking Statements

Statements contained in this Form 10-K that are not historical facts are forward-looking statements that are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. In addition, words such as “believes,” “anticipates,” “estimates,” “plans,” “expects,” and similar expressions are intended to identify forward-looking statements. These statements are made as of the date of this report or as otherwise indicated, based on current expectations. We undertake no obligation to update this information. A number of important factors could cause our actual results for 2013 and beyond to differ materially from those expressed in any forward-looking statements made by or on our behalf. Forward-looking statements are not guarantees of future performance as they involve a number of risks, uncertainties and assumptions that may prove to be incorrect and that may cause our actual results and experiences to differ materially from the anticipated results or other expectations expressed in such forward-looking statements. The risks, uncertainties and assumptions that may affect our performance, which are described in Item 1A of this report, include our financial leverage and debt service requirements, dependence on key personnel, dependence on key stations, U.S. and local economic conditions, our ability to successfully integrate acquired stations, regulatory requirements, new technologies, natural disasters and terrorist attacks. We cannot be sure that we will be able to anticipate or respond timely to changes in any of these factors, which could adversely affect the operating results in one or more fiscal quarters. Results of operations in any past period should not be considered, in and of itself, indicative of the results to be expected for future periods. Fluctuations in operating results may also result in fluctuations in the price of our stock.

PART I

Item 1. Business

We are a broadcast company primarily engaged in acquiring, developing and operating broadcast properties. As of February 28, 2013, we owned and/or operated four television stations and four low-power television stations serving two markets, five radio information networks, and sixty-one FM and thirty AM radio stations serving twenty-three markets, including Bellingham, Washington; Columbus, Ohio; Norfolk, Virginia; Milwaukee, Wisconsin; Manchester, New Hampshire; Des Moines, Iowa; and Joplin, Missouri.

The following table sets forth information about our radio stations and the markets they serve as of February 28, 2013:

(c) Station operated under the terms of a TBA.

(d) Station operated under the terms of a Shared Services Agreement.

N/S Station is a non-subscriber to the A.C Nielsen ratings and data.

For purposes of business segment reporting, we have aligned operations with similar characteristics into two business segments: Radio and Television. The Radio segment includes twenty-three markets, which includes all ninety-one of our radio stations and five radio information networks. The Television segment includes two markets and consists of four television stations and four low power television (“LPTV”) stations. For more information regarding our reportable segments, see Note 13 of the Notes to Consolidated Financial Statements included with this Form 10-K, which is incorporated herein by reference.

Strategy

Our strategy is to operate top billing radio and television stations in mid-sized markets, which we define as markets ranked from 20 to 200 out of the markets summarized by Investing in Radio Market Report and Investing in Television Market Report.

Programming and marketing are key components in our strategy to achieve top ratings in both our radio and television operations. In many of our markets, the three or four most highly rated stations (radio and/or television) receive a disproportionately high share of the market’s advertising revenues. As a result, a station’s revenue is dependent upon its ability to maximize its number of listeners/viewers within an advertiser’s given demographic parameters. In certain cases we use attributes other than specific market listener data for sales activities. In those markets where sufficient alternative data is available, we do not subscribe to an independent listener rating service.

The radio stations that we own and/or operate employ a variety of programming formats, including Classic Hits, Adult Contemporary, Classic Rock, News/Talk and Country. We regularly perform extensive market research, including music evaluations, focus groups and strategic vulnerability studies. Our stations also employ audience promotions to further develop and secure a loyal following.

The television stations that we own and/or operate are comprised of two CBS affiliates, one ABC affiliate, two Fox affiliates, one Univision affiliate, one NBC affiliate, and one Telemundo affiliate. In addition to securing network programming, we carefully select available syndicated programming to maximize viewership. We also develop local programming, including a strong local news franchise in each of our television markets.

We concentrate on the development of strong decentralized local management, which is responsible for the day-to-day operations of the stations we own and/or operate. We compensate local management based on the station’s financial performance, as well as other performance factors that are deemed to affect the

long-term ability of the stations to achieve financial performance objectives. Corporate management is responsible for long-range planning, establishing policies and procedures, resource allocation and monitoring the activities of the stations.

Under the Telecommunications Act of 1996 (the “Telecommunications Act”), we are permitted to own as many as 8 radio stations in a single market. See “Federal Regulation of Radio and Television Broadcasting”. We seek to acquire reasonably priced broadcast properties with significant growth potential that are located in markets with well-established and relatively stable economies. We often focus on local economies supported by a strong presence of state or federal government or one or more major universities. Future acquisitions will be subject to the availability of financing, the terms of our credit facility, and compliance with the Communications Act of 1934 (the “Communications Act”) and FCC rules.

Advertising Sales

Our primary source of revenue is from the sale of advertising for broadcast on our stations. Depending on the format of a particular radio station, there are a predetermined number of advertisements broadcast each hour. The number of advertisements broadcast on our television stations may be limited by certain network affiliation and syndication agreements and, with respect to children’s programs, federal regulation. We determine the number of advertisements broadcast hourly that can maximize a station’s available revenue dollars without jeopardizing listening/viewing levels. While there may be shifts from time to time in the number of advertisements broadcast during a particular time of the day, the total number of advertisements broadcast on a particular station generally does not vary significantly from year to year. Any change in our revenue, with the exception of those instances where stations are acquired or sold, is generally the result of pricing adjustments, which are made to ensure that the station efficiently utilizes available inventory.

Advertising rates charged by radio and television stations are based primarily on a station’s ability to attract audiences in the demographic groups targeted by advertisers, the number of stations in the market competing for the same demographic group, the supply of and demand for radio and television advertising time, and other qualitative factors including rates charged by competing radio and television stations within a given market. Radio rates are generally highest during morning and afternoon drive-time hours, while television advertising rates are generally higher during prime time evening viewing periods. Most advertising contracts are short-term, generally running for only a few weeks. This allows broadcasters the ability to modify advertising rates as dictated by changes in station ownership within a market, changes in listener/viewer ratings and changes in the business climate within a particular market.

Approximately \$124,700,000 or 87% of our gross revenue for the year ended December 31, 2012 (approximately \$116,274,000 or 85% in fiscal 2011 and approximately \$118,345,000 or 86% in fiscal 2010) was generated from the sale of local advertising. Additional revenue is generated from the sale of national advertising, network compensation payments, barter and other miscellaneous transactions. In all of our markets, we attempt to maintain a local sales force that is generally larger than our competitors. The principal goal in our sales efforts is to develop long-standing customer relationships through frequent direct contacts, which we believe represents a competitive advantage. We also typically provide incentives to our sales staff to seek out new opportunities resulting in the establishment of new client relationships, as well as new sources of revenue, not directly associated with the sale of broadcast time.

Each of our stations also engages independent national sales representatives to assist us in obtaining national advertising revenues. These representatives obtain advertising through national advertising agencies and receive a commission from us based on our net revenue from the advertising obtained. Total gross revenue resulting from national advertising in fiscal 2012 was approximately \$18,084,000 or 13% of our gross revenue (approximately \$21,288,000 or 15% in fiscal 2011 and approximately \$19,820,000 or 14% in fiscal 2010).

Competition

Both radio and television broadcasting are highly competitive businesses. Our stations compete for listeners/viewers and advertising revenues directly with other radio and/or television stations, as well as other media, within their markets. Our radio and television stations compete for listeners/viewers primarily on the basis of program content and by employing on-air talent which appeals to a particular demographic group. By

building a strong listener/viewer base comprised of a specific demographic group in each of our markets, we are able to attract advertisers seeking to reach these listeners/viewers.

Other media, including broadcast television and/or radio (as applicable), cable television, newspapers, magazines, direct mail, the Internet, coupons and billboard advertising, also compete with us for advertising revenues.

The radio and television broadcasting industries are also subject to competition from new media technologies, such as the delivery of audio programming by cable and satellite television systems, satellite radio systems, direct reception from satellites, and streaming of audio on the Internet.

Seasonality

Our revenue varies throughout the year. Advertising expenditures, our primary source of revenue, is generally lowest in the first quarter.

Environmental Compliance

As the owner, lessee or operator of various real properties and facilities, we are subject to various federal, state and local environmental laws and regulations. Historically, compliance with these laws and regulations has not had a material adverse effect on our business. There can be no assurance, however, that compliance with existing or new environmental laws and regulations will not require us to make significant expenditures of funds.

Employees

As of December 31, 2012, we had approximately 803 full-time employees and 315 part-time employees, none of whom are represented by unions. We believe that our relations with our employees are good.

We employ several high-profile personalities with large loyal audiences in their respective markets. We have entered into employment and non-competition agreements with our President and with most of our on-air personalities, as well as non-competition agreements with our commissioned sales representatives.

Available Information

You can find more information about us at our Internet website www.sagacommunications.com. Our Annual Report on Form 10-K, our Quarterly Reports on Form 10-Q, our Current Reports on Form 8-K and any amendments to those reports are available free of charge on our Internet website as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission (the "SEC").

Federal Regulation of Radio and Television Broadcasting

Introduction. The ownership, operation and sale of radio and television stations, including those licensed to us, are subject to the jurisdiction of the FCC, which acts under authority granted by the Communications Act. Among other things, the FCC assigns frequency bands for broadcasting; determines the particular frequencies, locations and operating power of stations; issues, renews, revokes and modifies station licenses; determines whether to approve changes in ownership or control of station licenses; regulates equipment used by stations; adopts and implements regulations and policies that directly or indirectly affect the ownership, operation and employment practices of stations; and has the power to impose penalties for violations of its rules or the Communications Act. For additional information on the impact of FCC regulations and the introduction of new technologies on our operations, see "Forward Looking Statements" and "Risk Factors" contained elsewhere herein.

The following is a brief summary of certain provisions of the Communications Act and of specific FCC regulations and policies. Reference should be made to the Communications Act, FCC rules and the public notices and rulings of the FCC for further information concerning the nature and extent of federal regulation of broadcast stations.

License Renewal. Radio and television broadcasting licenses are granted for maximum terms of eight years, and are subject to renewal upon application to the FCC. Under its “two-step” renewal process, the FCC must grant a renewal application if it finds that during the preceding term the licensee has served the public interest, convenience and necessity, and there have been no serious violations of the Communications Act or the FCC’s rules which, taken together, would constitute a pattern of abuse. If a renewal applicant fails to meet these standards, the FCC may either deny its application or grant the application on such terms and conditions as are appropriate, including renewal for less than the full 8-year term. In making the determination of whether to renew the license, the FCC may not consider whether the public interest would be served by the grant of a license to a person other than the renewal applicant. If the FCC, after notice and opportunity for a hearing, finds that the licensee has failed to meet the requirements for renewal and no mitigating factors justify the imposition of lesser sanctions, the FCC may issue an order denying the renewal application, and only thereafter may the FCC accept applications for a construction permit specifying the broadcasting facilities of the former licensee. Petitions may be filed to deny the renewal applications of our stations, but any such petitions must raise issues that would cause the FCC to deny a renewal application under the standards adopted in the “two-step” renewal process. We have filed applications to renew the Company’s radio and television station licenses, as necessary, and we intend to timely file renewal applications, as required for the Company’s stations. Under the Communications Act, if a broadcast station fails to transmit signals for any consecutive 12-month period, the FCC license expires at the end of that period, unless the FCC exercises its discretion to extend or reinstate the license “to promote equity and fairness.” The FCC, to date, has refused to exercise such discretion.

The following table sets forth the market and broadcast power of each of the broadcast stations that we own or operate with an attributable interest and the date on which each such station’s FCC license expires:

Station	Market ⁽¹⁾	Power (Watts) ⁽²⁾	Expiration Date of FCC Authorization

- (1) Some stations are licensed to a different community located within the market that they serve.
- (2) Some stations are licensed to operate with a combination of effective radiated power (“ERP”) and antenna height, which may be different from, but provide equivalent coverage to, the power shown. The ERP of our television stations is expressed in terms of visual (“vis”) components. WYSE, WISE, KPSZ, KPUG, KGMI, KBAI, WZBK, WBCO, WEGI, WKFN, WNYN and WHCU operate with lower power at night than the power shown.
- (3) We program this station pursuant to a TBA with the licensee of KVCT, Surtsey Media, LLC (“Surtsey”). See Note 9 of the Notes to Consolidated Financial Statements included with this Form 10-K for additional information on our relationship with Surtsey.
- (4) KUNU-LD, KXTS-LD, KVTX-LP, and KMOL-LD are “low power” television stations that operate as “secondary” stations (i.e., if they conflict with the operations of a “full power” television station, the low power stations must change their facilities or terminate operations).
- (5) Operates daytime only or with greatly reduced power at night.
- (6) An application for renewal of license is pending before the FCC.

Ownership Matters. The Communications Act prohibits the assignment of a broadcast license or the transfer of control of a broadcast licensee without the prior approval of the FCC. In determining whether to grant or renew a broadcast license, the FCC considers a number of factors pertaining to the licensee, including compliance with the Communications Act’s limitations on alien ownership; compliance with various rules limiting common ownership of broadcast, cable and newspaper properties; and the “character” and other qualifications of the licensee and those persons holding “attributable or cognizable” interests therein.

Under the Communications Act, broadcast licenses may not be granted to any corporation having more than one-fifth of its issued and outstanding capital stock owned or voted by aliens (including non-U.S. corporations), foreign governments or their representatives (collectively, “Aliens”). The Communications Act also prohibits a corporation, without FCC waiver, from holding a broadcast license if that corporation is controlled, directly or indirectly, by another corporation in which more than 25% of the issued and

outstanding capital stock is owned or voted by Aliens. The FCC has issued interpretations of existing law under which these restrictions in modified form apply to other forms of business organizations, including partnerships. Although we serve as a holding company for most of our various radio station subsidiaries (where we could not have more than 25% of our stock owned or voted by Aliens), we directly own two radio stations and an FM translator so that we cannot have more than 20% of our stock owned by Aliens.

The Communications Act and FCC rules also generally prohibit or restrict the common ownership, operation or control of a radio broadcast station and a television broadcast station serving the same geographic market. In its *2006 Quadrennial Regulatory Review*, released February 4, 2008, the FCC adopted a presumption, in the top 20 Designated Market Areas (“DMAs”), that it is not inconsistent with the public interest for one entity to own a daily newspaper and a radio station or, under the following limited circumstances, a daily newspaper and a television station, if (1) the television station is not ranked among the top four stations in the DMA and (2) at least eight independent “major media voices” remain in the DMA. In all other instances, the FCC adopted a presumption that a newspaper/broadcast station combination would not be in the public interest, with two limited exceptions, and emphasized that the Commission is unlikely to approve such transactions. Taking into account these respective presumptions, in determining whether the grant of a transaction that would result in newspaper/broadcast cross-ownership is in the public interest, the Commission will consider the following factors: (1) whether the cross-ownership will increase the amount of local news disseminated through the affected media outlets in the combination; (2) whether each affected media outlet in the combination will exercise its own independent news judgment; (3) the level of concentration in the Nielsen DMA; and (4) the financial condition of the newspaper or broadcast outlet, and if the newspaper or broadcast station is in financial distress, the proposed owner’s commitment to invest significantly in newsroom operations.

The FCC established criteria for obtaining a waiver of the rules to permit the ownership of two television stations in the same DMA that would not otherwise comply with the FCC’s rules. Under certain circumstances, a television station may merge with a “failed” or “failing” station or an “unbuilt” station if strict criteria are satisfied. Additionally, the FCC now permits a party to own up to two television stations (if permitted under the modified TV duopoly rule) and up to six radio stations (if permitted under the local radio ownership rules), or one television station and up to seven radio stations, in any market where at least 20 independently owned media voices remain in the market after the combination is effected (“Qualifying Market”). The FCC will permit the common ownership of up to two television stations and four radio stations in any market where at least 10 independently owned media voices remain after the combination is affected. The FCC will permit the common ownership of up to two television stations (if permitted under the FCC’s local television multiple ownership rule) and one radio station notwithstanding the number of voices in the market. The FCC also adopted rules that make television time brokerage agreements or TBA’s count as if the brokered station were owned by the brokering station in making a determination of compliance with the FCC’s multiple ownership rules. TBA’s entered into before November 5, 1996, are grandfathered until the FCC announces a required termination date. As a result of the FCC’s rules, we would not be permitted to acquire a television broadcast station (other than low power television) in a non-Qualifying Market in which we now own any television properties. The FCC revised its rules to permit a television station to affiliate with two or more major networks of television broadcast stations under certain conditions. (Major existing networks are still subject to the FCC’s dual network ban).

We are permitted to own an unlimited number of radio stations on a nationwide basis (subject to the local ownership restrictions described below). We are permitted to own an unlimited number of television stations on a nationwide basis so long as the ownership of the stations would not result in an aggregate national audience reach (i.e., the total number of television households in the Arbitron Area of Dominant Influence (“ADI”) markets in which the relevant stations are located divided by the total national television households as measured by ADI data at the time of a grant, transfer or assignment of a license) of 35%. The multiple ownership rules now permit opportunities for newspaper-broadcast combinations, as follows:

- In markets with three or fewer TV stations, no cross-ownership is permitted among TV, radio and newspapers. A company may obtain a waiver of that ban if it can show that the television station does not serve the area served by the cross-owned property (i.e., the radio station or the newspaper).

- In markets with between 4 and 8 TV stations, combinations are limited to one of the following:
 - (A) A daily newspaper; one TV station; and up to half of the radio station limit for that market (*i.e.*, if the radio limit in the market is 6, the company can only own 3) or
 - (B) A daily newspaper; and up to the radio station limit for that market; (*i.e.*, no TV stations) or
 - (C) Two TV stations (if permissible under local TV ownership rule); and up to the radio station limit for that market (*i.e.*, no daily newspapers).
- In markets with nine or more TV stations, the FCC eliminated the newspaper-broadcast cross-ownership ban and the television-radio cross-ownership ban.

Under the rules, the number of radio stations one party may own in a local Arbitron-rated radio market is determined by the number of full-power commercial and noncommercial radio stations in the market as determined by Arbitron and BIA/Kelsey Radio markets that are not Arbitron rated are determined by analysis of the broadcast coverage contours of the radio stations involved. Numerous parties, including the Company, have sought reconsideration of the multiple ownership rules. In *Prometheus Radio v. FCC*, Case No. 03-3388 (U.S. Court of Appeals D.C. Circuit), on June 24, 2004, the court remanded the case to the FCC for the FCC to justify or modify its approach to setting numerical limits and for the FCC to reconsider or better explain its decision to repeal the failed station solicitation rule, and lifted a previously-imposed stay on the effect of the revised radio multiple ownership rules. By *Further Notice of Proposed Rule Making (2006 Quadrennial Regulatory Review)*, released July 24, 2006, the Commission solicited comments. The rules adopted in the *2006 Quadrennial Regulatory Review* were vacated in part by the Third Circuit Court of Appeals in *Prometheus Radio Project v. FCC* (652 F. 3d 432 (2011)) because the FCC's procedures in the rule making proceeding did not satisfy the Administrative Procedure Act. The newspaper-broadcast cross-ownership rule was vacated, but the media ownership rules were affirmed. The FCC had created special benefits for so-called "eligible entities." Because there was no data attempting to show a connection between the FCC's eligible entity definition and the goal of increasing ownership of minorities and women under §309(j) of the Telecommunication Act of 1996, the "eligible entity" definition adopted was vacated as arbitrary and capricious. In its *2010 Quadrennial Regulatory Review*, released December 22, 2011, the Commission proposed to eliminate the radio/television cross-ownership rule in favor of reliance on the local radio rule and local television rule. Other rules were left largely unchanged:

- *Local Television Ownership Rule.* The FCC tentatively concluded that it should retain the current local television ownership rule with minor modifications (eliminate the Grade B contour overlap provision of the current rule). The FCC tentatively concluded that it should retain the prohibition against mergers among the top-four-rated stations, the eight-voices test, and the existing numerical limits. In addition, the FCC sought comment on whether to adopt a waiver standard applicable to small markets, as well as appropriate criteria for any such standard. The FCC sought comment on whether multicasting should be a factor in determining the television ownership limits.
- *Local Radio Ownership Rule.* The FCC proposed to retain the current local radio ownership rule; however, the FCC is seeking comment on modifications to the rule and whether and how the rule should account for other audio platforms. The FCC proposed to also retain the AM/FM subcaps (limitations on how many AM and FM stations may be owned in a market), and sought comment on the impact of the introduction of digital radio. The FCC also sought comment on whether to adopt a waiver standard and on specific criteria to adopt.
- *Newspaper/Broadcast Cross-Ownership Rule.* The FCC tentatively concluded that some newspaper/broadcast cross-ownership restrictions continue to be necessary to protect and promote viewpoint diversity, and proposed to use DMA definitions to determine that relevant market area for television stations. The FCC proposed to adopt a rule that includes elements of the 2006 rule, including the top 20 DMA demarcation point, the top-four television station restrictions, and the eight remaining voices test.

- *Dual Network Rule.* The FCC tentatively concluded that the dual network rule remains necessary in the public interest to promote competition and localism and should be retained without modification.

The FCC is also seeking comment on whether television local news service (“LNS”) agreements and shared service agreements (“SSA”) are substantively equivalent to agreements that are already subject to the FCC’s attribution rules, and are therefore attributable now or should be in the future.

New rules could restrict the Company’s ability to acquire additional radio and television stations in some markets and could require the Company to terminate its arrangements with Surtsey. The Court and FCC proceedings are ongoing and we cannot predict what action, if any, the Court or the FCC may take to further modify its rules. The statements herein are based solely on the FCC’s multiple ownership rules in effect as of the date hereof and do not include any forward-looking statements concerning compliance with any future multiple ownership rules.

Under the Communications Act, we are permitted to own radio stations (without regard to the audience shares of the stations) based upon the number of full-power radio stations in the relevant radio market as follows:

Number of Stations In Radio Market	Number of Stations We Can Own
14 or Fewer	Total of 5 stations, not more than 3 in the same service (AM or FM), except the Company cannot own more than 50% of the stations in the market.
15 – 29	Total of 6 stations, not more than 4 in the same service (AM or FM).
30 – 44	Total of 7 stations, not more than 4 in the same service (AM or FM).
45 or More	Total of 8 stations, not more than 5 in the same service (AM or FM).

New rules to be promulgated under the Communications Act may permit us to own, operate, control or have a cognizable interest in additional radio broadcast stations if the FCC determines that such ownership, operation, control or cognizable interest will result in an increase in the number of radio stations in operation. No firm date has been established for initiation of this rule-making proceeding.

The FCC generally applies its ownership limits to “attributable” interests held by an individual, corporation, partnership or other association. In the case of corporations holding broadcast licenses, the interests of officers, directors and those who, directly or indirectly, have the right to vote 5% or more of the corporation’s stock (or 20% or more of such stock in the case of certain passive investors that are holding stock for investment purposes only) are generally attributable, as are positions of an officer or director of a corporate parent of a broadcast licensee. Currently, one of our directors has an attributable interest or interests in companies applying for or licensed to operate broadcast stations other than us.

The FCC’s ownership attribution rules (a) apply to limited liability companies and registered limited liability partnerships the same attribution rules that the FCC applies to limited partnerships; and (b) include an equity/debt plus (“EDP”) rule that attributes the other media interests of an otherwise passive investor if the investor is (1) a “major-market program supplier” that supplies over 15% of a station’s total weekly broadcast programming hours, or (2) a same-market media entity subject to the FCC’s multiple ownership rules (including broadcasters, cable operators and newspapers) so that its interest in a licensee or other media entity in that market will be attributed if that interest, aggregating both debt and equity holdings, exceeds 33% of the total asset value (equity plus debt) of the licensee or media entity. We could be prohibited from acquiring a financial interest in stations in markets where application of the EDP rule would result in us having an attributable interest in the stations. In reconsidering its rules, the FCC also eliminated the “single majority shareholder exemption” which provides that minority voting shares in a corporation where one shareholder controls a majority of the voting stock are not attributable; however, in December 2001 the FCC “suspended” the elimination of this exemption until the FCC resolved issues concerning cable television ownership.

On January 21, 2010, the FCC launched an initiative on the future of media and the information needs of communities in the digital age, which will examine the changes underway in the media marketplace, analyze the full range of future technologies and services that will provide communities with news and information in

the digital age, and, as appropriate, make policy recommendations to the FCC, other government entities, and other parties. Initial topics under consideration include: the state of TV, radio, newspaper, and Internet news and information services; the effectiveness and nature of public interest obligations in a digital era; the role of public media and private sector foundations; and many others. Proposals are before the FCC whereby the government would take back part of the spectrum allotted for over-the-air television in favor of wireless broadband. The FCC is conducting a proceeding whereby broadcasters may voluntarily participate in an auction of their over-the-air broadcast spectrum, otherwise agree to modifications in the spectrum available to them, move from the UHF to the VHF band (with or without compensations), or become subject to restrictions on their usage of the spectrum. The Company cannot predict what changes, if any, will be made as a result of the FCC's initiative.

In addition to the FCC's multiple ownership rules, the Antitrust Division of the United States Department of Justice and the Federal Trade Commission and some state governments have the authority to examine proposed transactions for compliance with antitrust statutes and guidelines. The Antitrust Division has issued "civil investigative demands" and obtained consent decrees requiring the divestiture of stations in a particular market based on antitrust concerns.

Programming and Operation. The Communications Act requires broadcasters to serve the "public interest." Licensees are required to present programming that is responsive to community problems, needs and interests and to maintain certain records demonstrating such responsiveness. Complaints from listeners concerning a station's programming often will be considered by the FCC when it evaluates renewal applications of a licensee, although such complaints may be filed at any time and generally may be considered by the FCC at any time. Stations also must follow various rules promulgated under the Communications Act that regulate, among other things, political advertising, sponsorship identification, the advertisement of contests and lotteries, obscene and indecent broadcasts, and technical operations, including limits on radio frequency radiation. The FCC now requires the owners of antenna supporting structures (towers) to register them with the FCC. As an owner of such towers, we are subject to the registration requirements. The Children's Television Act of 1990 and the FCC's rules promulgated thereunder require television broadcasters to limit the amount of commercial matter which may be aired in children's programming to 10.5 minutes per hour on weekends and 12 minutes per hour on weekdays. The Children's Television Act and the FCC's rules also require each television licensee to serve, over the term of its license, the educational and informational needs of children through the licensee's programming (and to present at least three hours per week of "core" educational programming specifically designed to serve such needs). Licensees are required to publicize the availability of this programming and to file quarterly a report with the FCC on these programs and related matters. On October 27, 2011, the FCC released an Order on Reconsideration and Further Notice of Proposed Rule Making, *Standardized and Enhanced Disclosure Requirements for Television Broadcast Licensee Public Interest Obligations*, which vacated a 2008 order that, among other things, would have required television stations to file on a quarterly basis, a "Standardized Television Disclosure" form setting forth in detail certain information about their programming. On April, 27, 2012, the FCC released a *Second Report and Order* that requires television stations to post their public files online in a central, Commission-hosted database, rather than maintaining the files locally at their main studios. It did not impose any new reporting obligation on the Company. The FCC did not adopt new disclosure obligations for sponsorship identification and shared services agreements. The FCC deferred considering whether to adopt online posting of public files for radio stations until the FCC has gained experience with online posting files of television broadcasters. Television stations are required to provide closed captioning for certain video programming.

Equal Employment Opportunity Rules. Equal employment opportunity (EEO) rules and policies for broadcasters prohibit discrimination by broadcasters and multichannel video programming distributors ("MVPDs"). They also require broadcasters to provide notice of job vacancies and to undertake additional outreach measures, such as job fairs and scholarship programs. The rules mandate a "three prong" outreach program; i.e., Prong 1: widely disseminate information concerning each full-time (30 hours or more) job vacancy, except for vacancies filled in exigent circumstances; Prong 2: provide notice of each full-time job vacancy to recruitment organizations that have requested such notice; and Prong 3: complete two (for broadcast employment units with five to ten full-time employees or that are located in smaller markets) or four (for employment units with more than ten full-time employees located in larger markets) longer-term

recruitment initiatives within a two-year period. These include, for example, job fairs, scholarship and internship programs, and other community events designed to inform the public as to employment opportunities in broadcasting. The rules mandate extensive record keeping and reporting requirements. The EEO rules are enforced through review at renewal time, at mid-term for larger broadcasters, and through random audits and targeted investigations resulting from information received as to possible violations. The FCC has not yet decided on whether and how to apply the EEO rule to part-time positions. Failure to observe these or other rules and policies can result in the imposition of various sanctions, including monetary forfeitures, the grant of “short” (less than the full eight-year) renewal terms or, for particularly egregious violations, the denial of a license renewal application or the revocation of a license.

Time Brokerage Agreements. As is common in the industry, we have entered into what have commonly been referred to as Time Brokerage Agreements (“TBAs”). Such arrangements are an extension of the concept of agreements under which a licensee of a station sells blocks of time on its station to an entity or entities which purchase the blocks of time and which sell their own commercial advertising announcements during the time periods in question. While these agreements may take varying forms, under a typical TBA, separately owned and licensed radio or television stations agree to enter into cooperative arrangements of varying sorts, subject to compliance with the requirements of antitrust laws and with the FCC’s rules and policies. Under these types of arrangements, separately-owned stations agree to function cooperatively in terms of programming, advertising sales, and other matters, subject to the licensee of each station maintaining independent control over the programming and station operations of its own station. One typical type of TBA is a programming agreement between two separately-owned radio or television stations serving a common service area, whereby the licensee of one station purchases substantial portions of the broadcast day on the other licensee’s station, subject to ultimate editorial and other controls being exercised by the latter licensee, and sells advertising time during such program segments.

The FCC’s rules provide that a station purchasing (brokering) time on another station serving the same market will be considered to have an attributable ownership interest in the brokered station for purposes of the FCC’s multiple ownership rules. As a result, under the rules, a broadcast station will not be permitted to enter into a time brokerage agreement giving it the right to purchase more than 15% of the broadcast time, on a weekly basis, of another local station that it could not own under the local ownership rules of the FCC’s multiple ownership rules. The FCC’s rules also prohibit a broadcast licensee from simulcasting more than 25% of its programming on another station in the same broadcast service (i.e., AM-AM or FM-FM) whether it owns the stations or through a TBA arrangement, where the brokered and brokering stations serve substantially the same geographic area.

The FCC’s multiple ownership rules count stations brokered under a joint sales agreement (“JSA”) toward the brokering station’s permissible ownership totals, as long as (1) the brokering entity owns or has an attributable interest in one or more stations in the local market, and (2) the joint advertising sales amount to more than 15% of the brokered station’s advertising time per week. In a “Notice of Proposed Rulemaking” in MB Docket No. 04-256, released August 2, 2004, the FCC sought comment from the public on whether television JSAs should also be attributable to the brokering station. The issue of whether to make attributable Shared Services Agreements and Local News Service Agreements is among the subjects being considered in the *2010 Quadrennial Regulatory Review*. We cannot predict whether the FCC will make such agreements attributable. The FCC rules permit, under certain circumstances, the ownership of two or more television stations in a Qualifying Market and require the termination of certain non-complying existing television TBA’s. We currently have a television TBA in the Victoria, Texas market with Surtsey. Even though the Victoria market is not a Qualifying Market such that the duopoly would otherwise be permissible, as discussed above, we believe that the TBA is “grandfathered” under the FCC’s rules and need not be terminated earlier than the date to be established in the ownership review proceeding. See “Ownership Matters” above.

On March 7, 2003 we entered into an agreement of understanding with Surtsey, whereby we have guaranteed up to \$1,250,000 of the debt incurred by Surtsey in closing on the acquisition of a construction permit for KFJX-TV, a television station in Pittsburg, Kansas, serving the Joplin, Missouri television market. In consideration for our guarantee, Surtsey has entered into various agreements with us relating to the station, including a Shared Services Agreement, Agreement for Use of Ancillary Digital Spectrum and Agreement for the Sale of Commercial Time. On January 31, 2012, the Company and Surtsey amended these agreements and

entered into an agreement which included an assignable option with Surtsey for KFJX-TV. Under the FCC's ownership rules, we are prohibited from owning or having an attributable or cognizable interest in KFJX-TV. On January 31, 2012, we entered into an agreement which included an extension of the grandfathered TBA for KVCT-TV and an assignable option with Surtsey for KVCT-TV. As noted above, if the FCC decides to attribute television SSA's and JSA's, we would be required to terminate the Agreement for the Sale of Commercial Time.

Other FCC Requirements

The "V-Chip." The FCC adopted methodology that will be used to send program ratings information to consumer TV receivers (implementation of "V-Chip" legislation contained in the Communications Act). The FCC also adopted the TV Parental Guidelines, developed by the Industry Ratings Implementation Group, which apply to all broadcast television programming except for news and sports. As a part of the legislation, television station licensees are required to attach as an exhibit to their applications for license renewal a summary of written comments and suggestions received from the public and maintained by the licensee that comment on the licensee's programming characterized as violent.

Digital Television. Under the FCC's rules all U.S. television broadcasters have been required to convert their operations from NTSC (analog) to digital television ("DTV"). The rules include provisions for the return of NTSC channels to the government. The FCC has attempted to provide DTV coverage areas that are comparable to the former NTSC service areas. DTV licensees may use their DTV channels for a multiplicity of services such as high-definition television broadcasts, multiple standard definition television broadcasts, data, audio, and other services so long as the licensee provides at least one free video channel equal in quality to the previous NTSC technical standard. Our full-service television stations currently provide DTV service and have terminated NTSC operations. The Company has constructed DTV facilities serving at least 80% of their NTSC population coverage. We hold licenses that authorize KOAM-TV to operate on Channel 7 for DTV and KAVU-TV to operate on Channel 15 for DTV. The FCC's rules require broadcasters to include Program and System Information Protocol ("PSIP") information in their digital broadcast signals.

Brokered Station KVCT is providing DTV service on Channel 11. KFJX-TV, with which KOAM-TV shares certain services, is providing DTV services on Channel 13.

In October 2003, the FCC adopted rules requiring "plug and play" cable compatibility would allow consumers to plug their cable directly into their digital TV set without the need for a set-top box. In January 2013, the U.S. Court of Appeals for the D.C. Circuit vacated the rules. The Company cannot predict whether the FCC will adopt other proposals to address this matter. The FCC has adopted rules whereby television licensees are charged a fee of 5% of gross revenue derived from the offering of ancillary or supplementary services on DTV spectrum for which a subscription fee is charged. Licensees and "permittees" of DTV stations must file with the FCC a report by December 1 of each year describing such services. None of the Company's stations to date are offering ancillary or supplementary services on their DTV channels.

White Spaces. On September 23, 2010, the FCC adopted a *Second Memorandum Opinion and Order* in ET Docket No. 04-186 that updated the rules for unlicensed wireless devices that can operate in broadcast television spectrum at locations where that spectrum is unused by licensed services. This unused TV spectrum is commonly referred to as television "white spaces." The rules allow for the use of unlicensed TV bands devices in the unused spectrum to provide broadband data and other services for consumers and businesses. It is possible that such operations have the potential for causing interference to broadcast operation, but we cannot yet judge whether such operations will have an adverse impact on the Company's operations.

"Must-Carry" Rules. The Cable Television Consumer Protection and Competition Act of 1992, among other matters, requires cable television system operators to carry the signals of local commercial and non-commercial television stations and certain low power television stations. Cable television operators and other MVPDs may not carry broadcast signals without, in certain circumstances, obtaining the transmitting station's consent. A local television broadcaster must make a choice every three years whether to proceed under the "must-carry" rules or waive the right to mandatory-uncompensated coverage and negotiate a grant of retransmission consent in exchange for consideration from the MVPD. Such must-carry rights extend to the

DTV signals broadcast by our stations. For the three-year period commencing on January 1, 2012, we generally elected “retransmission consent” in notifying MVPDs that carry our television programming in our television markets.

Low Power and Class A Television Stations. Currently, the service areas of low power television (“LPTV”) stations are not protected. LPTV stations can be required to terminate their operations if they cause interference to full power stations. LPTV stations meeting certain criteria were permitted to certify to the FCC their eligibility to be reclassified as “Class A Television Stations” whose signal contours would be protected against interference from other stations. Stations deemed “Class A Stations” by the FCC would thus be protected from interference. We own four operating LPTV stations, KUNU-LD, KVTX-LP, KXTS-LD, and KMOL-LD, Victoria, Texas. None of the stations qualifies under the FCC’s established criteria for Class A status. In January 2006, the FCC announced a filing window from May 1 through May 12, 2006, during which NTSC LPTV stations could apply for a digital companion channel or implement DTV operation on their existing NTSC channels. The Company’s LPTV stations did not apply for companion channels, and instead filed applications to “flash-cut” to implement DTV operation on their existing NTSC channels, or filed “displacement” applications to use different digital channels. The FCC has set September 1, 2015, as the terminal date for transition of LPTV to digital transmission.

Low Power FM Radio. The FCC has created a “low power radio service” on the FM band (“LPFM”) in which the FCC authorizes the construction and operation of noncommercial educational FM stations with up to 100 watts effective radiated power (“ERP”) with antenna height above average terrain (“HAAT”) at up to 30 meters (100 feet). This combination is calculated to produce a service area radius of approximately 3.5 miles. The FCC’s rules will not permit any broadcaster or other media entity subject to the FCC’s ownership rules to control or hold an attributable interest in an LPFM station or enter into related operating agreements with an LPFM licensee. Thus, absent a waiver, we could not own or program an LPFM station. LPFM stations are allocated throughout the FM broadcast band, (i.e., 88.1 to 107.9 MHz), although they must operate with a noncommercial format. The FCC has established allocation rules that require FM stations to be separated by specified distances to other stations on the same frequency, and stations on frequencies on the first, second and third channels adjacent to the center frequency. The FCC has granted construction permits and licenses for LPFM stations. On January 4, 2011, the President signed into law the Local Community Radio Act of 2010 which requires the Commission to modify the rules authorizing the operation of LPFM, as proposed in MM Docket No. 99-25. The law requires the Commission to: (1) Prescribe protection for co-channels and first- and second-adjacent channels; (2) Prohibit any applicant from obtaining a LPFM license if the applicant has engaged in any manner in the unlicensed operation of any station in violation of the Communications Act; (3) Eliminate provisions prohibiting the FCC from extending the eligibility for application for LPFM stations beyond the organizations and entities as proposed in the docket; and (4) Eliminate third-adjacent minimum distance separation requirements between: (i) LPFM stations and (ii) full-service FM stations, FM translator stations, and FM booster stations. The law prohibits the FCC from reducing the minimum co-channel and first- and second-adjacent channel distance separation requirements in effect on the date of enactment of the law between LPFM stations and full-service FM stations. The law authorizes a waiver of the second-adjacent channel distance separation requirement to any LPFM station that establishes that its proposed operations will not interfere with any authorized radio service, provided that, upon notification by the FCC that it is causing certain interference, such LPFM station must: (i) suspend operation; and (ii) resume operation only after interference has been eliminated or it demonstrates that such interference was not due to the LPFM station’s emissions. The law requires the FCC to comply with its existing minimum distance separation requirements for full-service FM stations, FM translator stations, and FM booster stations that broadcast radio reading services via an analog subcarrier frequency to avoid potential interference by LPFM stations; and when licensing new FM translator stations, FM booster stations, and LPFM stations, to ensure that: (i) licenses are available to FM translator stations, FM booster stations, and LPFM stations; (ii) such decisions are made based on the needs of the local community; and (iii) FM translator stations, FM booster stations, and LPFM stations remain equal in status and secondary to existing and modified full-service FM stations. On January 5, 2012, the FCC released a Report to Congress on the impact that LPFM stations will have on full-service commercial FM stations. The FCC “found no statistically reliable evidence that low-power FM stations have a substantial or consistent economic impact on full-service commercial FM stations,” and that “low-power FM stations generally do not have, and in the future are

unlikely to have, a demonstrable economic impact on full-service commercial FM radio stations.” In an order released December 4, 2012, the FCC modified its rules to implement the new law. The FCC has dismissed approximately 3,000 so-called “short-form” applications for construction permits for new FM translator stations to accommodate a filing opportunity for construction permits for new LPFM stations. Two of the Company’s short-form applications have been dismissed pursuant to this process. The FCC projects that it will open a filing window for applications on or about October 15, 2013. We cannot predict what, if any, impact the new LPFM stations will have on the Company’s full-service stations and FM translators.

Digital Audio Radio Satellite Service and Internet Radio. In adopting its rules for the Digital Audio Radio Satellite Service (“DARS”) in the 2310-2360 MHz frequency band, the FCC stated, “although healthy satellite DARS systems are likely to have some adverse impact on terrestrial radio audience size, revenues and profits, the record does not demonstrate that licensing satellite DARS would have such a strong adverse impact that it threatens the provision of local service.” The FCC granted two nationwide licenses, one to XM Satellite Radio, which began broadcasting in May 2001, and a second to Sirius Satellite Radio, which began broadcasting in February 2002. The satellite radio systems provide multiple channels of audio programming in exchange for the payment of a subscription fee. The Commission approved the application of Sirius Satellite Radio Inc. and XM Satellite Radio Holdings Inc. to transfer control of the licenses and authorizations held by the two companies to one company, which is now known as Sirius XM Radio, Inc. We cannot predict the extent to which DARS will have an adverse impact on our business. Various companies have introduced devices that permit the reception of audio programming streamed over the Internet on home computers, on portable receivers, such as cell phones, and in automobiles. A number of digital music providers have developed and are offering their product through the Internet. Terrestrial radio operators are also making their product available through the Internet. We cannot predict whether, or the extent to which, such reception devices will have an adverse impact on our business.

Satellite Carriage of Local TV Stations. The Satellite Home Viewer Improvement Act (“SHVIA”), a copyright law, prevents direct-to-home satellite television carriers from retransmitting broadcast network television signals to consumers unless those consumers (1) are “unserved” by the over-the-air signals of their local network affiliate stations, and (2) have not received cable service in the preceding 90 days. According to the SHVIA, “unserved” means that a consumer cannot receive, using a conventional outdoor rooftop antenna, a television signal that is strong enough to provide an adequate television picture. In December 2001 the U.S. Court of Appeals for the District of Columbia upheld the FCC’s rules for satellite carriage of local television stations which require satellite carriers to carry upon request all local TV broadcast stations in local markets in which the satellite carriers carry at least one TV broadcast station, also known as the “carry one, carry all” rule. In December 2004, Congress passed and the President signed the Satellite Home Viewer Extension and Reauthorization Act of 2004 (“SHVERA”), which again amends the copyright laws and the Communications Act. The SHVIA governs the manner in which satellite carriers offer local broadcast programming to subscribers, but the SHVIA copyright license for satellite carriers was more limited than the statutory copyright license for cable operators. Specifically, for satellite purposes, “local,” though out-of-market (i.e., “significantly viewed”) signals were treated the same as truly “distant” (e.g., hundreds of miles away) signals for purposes of the SHVIA’s statutory copyright licenses. The SHVERA is intended to address this inconsistency by giving satellite carriers the option to offer Commission-determined “significantly viewed” signals to subscribers. In November, 2005, the FCC adopted a *Report and Order* to implement SHVERA to enable satellite carriers to offer FCC-determined “significantly viewed” signals of out-of-market broadcast stations to subscribers subject to certain constraints set forth in SHVERA. The *Order* includes an updated list of stations currently deemed significantly viewed. On November 23, 2010, the FCC released three orders that implemented the Satellite Television Extension and Localism Act of 2010 (“STELA”). The FCC modified its Significantly Viewed (“SV”) rules to implement Section 203 of the STELA which amends Section 340 of the Communications Act to give satellite carriers the authority to offer out-of-market but SV broadcast television stations as part of their local service to subscribers. Section 203 of the STELA changes the restrictions on subscriber eligibility to receive SV network stations from satellite carriers. To implement the STELA, the FCC revised its satellite subscriber eligibility rules. The new rules could result in satellite carriers providing additional signals in DMAs where the Company operates television stations, but we cannot predict at this time, what, if any, impact the rules might have on the Company.

In-Band On-Channel “Hybrid Digital” Radio. On May 31, 2007, the FCC released its *Second Report and Order, First Order on Reconsideration and Second Further Notice of Proposed Rulemaking (Digital Audio Broadcasting Systems)* that adopted rules permitting radio stations to broadcast using in-band, on-channel (IBOC) as the technology that allows AM and FM stations to operate using the IBOC systems developed by iBiquity Digital Corporation. This technology has become commonly known as “hybrid digital” or HD radio. Stations broadcast the same main channel program material in both analog and digital modes. IBOC technology permits “hybrid” operations, the simultaneous transmission of analog and digital signals with a single AM and FM channel. IBOC technology can provide near CD-quality sound on FM channels and FM quality on AM channels. Hybrid IBOC also permits the transmission of up to three additional program streams over the radio stations. Hybrid IBOC operations will have minimal impact on the present broadcast service. At the present time, we are configured to broadcast in HD radio on 47 stations and we continue to convert stations to HD radio on an ongoing basis. On January 29, 2010, the FCC adopted an *Order* that permits FM radio stations to voluntarily increase digital power levels up to ten percent of analog power levels and establishes interference mitigation and remediation procedures to promptly resolve complaints of interference to analog stations. The Commission hopes the changes will boost digital signal coverage while safeguarding analog reception against interference from higher power digital transmissions.

Use of FM Translators by AM Stations and Digital Program Streams. FM translator stations are relatively low power radio stations (maximum ERP: 250 Watts) that rebroadcast the programs of full-power FM stations on a secondary basis, meaning they must terminate or modify their operation if they cause interference to a full-power station. The FCC permits AM stations to be rebroadcast on FM translator stations in order to improve reception of programs broadcast by AM stations. The Company intends to continue to use some of its existing FM translators in connection with some of its AM stations. The Company is using some of its existing FM translators to rebroadcast HD radio program streams generated by some of its FM stations, which is permitted by the FCC.

Hart-Scott-Rodino Antitrust Improvements Act of 1976. The Federal Trade Commission and the Department of Justice, the federal agencies responsible for enforcing the federal antitrust laws, may investigate certain acquisitions. Under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, an acquisition meeting certain size thresholds requires the parties to file Notification and Report Forms with the Federal Trade Commission and the Department of Justice and to observe specified waiting period requirements before consummating the acquisition. Any decision by the Federal Trade Commission or the Department of Justice to challenge a proposed acquisition could affect our ability to consummate the acquisition or to consummate it on the proposed terms. The FCC has eliminated its previous scrutiny of some proposed acquisitions and mergers on antitrust grounds that were manifest in a policy of placing a “flag” soliciting public comment on concentration of control issues based on advertising revenue shares or other criteria, on the public notice announcing the acceptance of assignment and transfer applications. Notwithstanding this action, we cannot predict whether the FCC will adopt rules that would restrict our ability to acquire additional stations.

Changes to Application and Assignment Procedures. In January 2010, the FCC adopted a First Report and Order that gives Native American tribes a priority to obtain broadcast radio licenses in tribal communities. The Order provides an opportunity for tribes to establish new service specifically designed to offer programming that meets the needs of tribal citizens. In addition, the First Report and Order modified the Commission’s radio application and assignment procedures, assisting qualified applicants to more rapidly introduce new radio service to the public. These modifications (1) Prohibit an AM applicant that obtains a construction permit through a dispositive Section 307(b) preference from downgrading the service level that led to the dispositive preference; (2) Requires technical proposals for new or major change AM facilities filed with Form 175 (*i.e.*, FCC “short-form” Auction) applications to meet certain minimum technical standards to be eligible for further auction processing; and (3) Gives FCC operating bureaus authority to cap filing window applications. On December 29, 2011, the FCC released its Third Report and Order which limits eligibility for authorizations associated with allotments added to the FM Table of Allotments using the “Tribal Priority” to the tribes whom the Tribal Priority was intended to benefit. In a Public Notice released December 2, 2010 (GN Docket No. 10-244) the FCC sought comment on how it could design, adopt, and implement an additional new preference program in its competitive bidding process for persons or entities that have overcome substantial disadvantage and would be eligible for a bidding credit. In the *Quadrennial Regulatory*

Review NPRM, the Commission also sought comment on a proposal for applicants to be accorded licensing preferences if they could demonstrate that they have overcome “significant social and economic disadvantages.” The Company cannot predict whether such preferences will be adopted, or whether they would have any impact on the Company.

Spectrum Auctions and Channel Sharing. On November 30, 2010, the FCC adopted a *Notice of Proposed Rulemaking* in ET Docket No. 10-235 that proposed that wireless broadband providers have equal access to television broadcast frequencies that could become available in spectrum auctions. On April 27, 2012, the adopted new rules in that docket that establish a framework for how two or more television licensees may voluntarily share a single six MHz channel in conjunction with the auction process:

- While stations will need to retain at least one standard definition programming stream to meet the FCC’s requirement of providing an over-the-air video broadcast at no direct charge to viewers, they will have the flexibility of tailoring their channel sharing agreements to meet their individual programming and economic needs.
- Stations sharing together will employ a single channel and transmission facility but will each continue to be licensed separately, retain its original call sign, retain all the rights pertaining to an FCC license, and remain subject to all of the FCC’s rules, policies, and obligations.

The new rules apply to full power and Class A television stations, including both commercial and noncommercial educational television stations. The rules neither increase nor decrease the cable and satellite carriage rights currently afforded broadcast licensees. Nor do the new rules address the proposals in the *Notice of Proposed Rulemaking* to establish fixed and mobile allocations in the UHF/VHF bands or to improve TV service on VHF channels. The FCC said it will address the allocation issue in a future rulemaking, and may address the VHF issues at a later date as well. At this time, the Company has made no decision as to whether it will voluntarily participate in combining operations or spectrum auctions.

Proposed Changes. The FCC has under consideration, and may in the future consider and adopt, new laws, regulations and policies regarding a wide variety of matters that could, directly or indirectly, affect us and the operation and ownership of our broadcast properties. Application processing rules adopted by the FCC might require us to apply for facilities modifications to our standard broadcast stations in future “window” periods for filing applications or result in the stations being “locked in” with their present facilities. The Balanced Budget Act of 1997 authorizes the FCC to use auctions for the allocation of radio broadcast spectrum frequencies for commercial use. The implementation of this law could require us to bid for the use of certain frequencies.

The Company pays for the use of music on its stations by obtaining licenses from organizations called performing rights societies, *e.g.* Broadcast Music, Inc. (“BMI”), which, in turn pay composers, authors and publishers for their works. In 2009, a bill, H.R. 848, the Performance Rights Act, was introduced in Congress, but did not pass in the 111th Congress. If passed, this bill would have required the Company to pay additional fees to an organization called MusicFirst which would distribute the money to other entities. Efforts continue by MusicFirst to persuade Congress to enact a law that would require such payments. We cannot predict whether such a law might be enacted. Should such a law be enacted, it would impose an additional financial burden on the Company, but the extent of the burden would depend on how the fee payment requirement was structured.

On January 3, 2013, the FCC released the *Sixth Further Notice of Proposed Rulemaking*, which seeks comment on the requirement that persons with attributable interests in broadcast licensees and other entities filing an FCC Ownership Report provide an “FCC Registration Number” (“FRN”) linked to their social security numbers. Questions have been raised about the security of the FCC’s Registration System where this data would be stored. The FCC is also seeking comment on whether to expand the biennial ownership reporting requirement to include interests, entities and individuals that are not attributable because of (a) the single majority shareholder exemption and (b) the exemption for interests held in eligible entities pursuant to the higher EDP threshold. The Company has utilized the single majority shareholder exemption in reporting

ownership interests in the Company. The Company cannot predict whether these proposals will be adopted, and if so, whether information provided by those persons with a reportable attributable interest in the Company will be secure.

On March 25, 2010, the FCC issued a Public Notice implementing the Common Alerting Protocol (“CAP”), which is an open, interoperable, data interchange format for collecting and distributing all-hazard safety notifications and emergency warnings to multiple information networks, public safety alerting systems, and personal communications devices. CAP will allow the Federal Emergency Management Agency (“FEMA”), the National Weather Service (“NWS”), a State Governor, or any other authorized initiator of a public alert and warning to automatically format and geo-target a particular alert simultaneously to the public over multiple media platforms, such as television, radio, cable, cell phones and electronic highway signs. CAP allows an alert initiator to send alerts specifically formatted for people with disabilities and for non-English speakers. The deadline for compliance with CAP was extended to June 12, 2012 and the Company has complied with the CAP requirements.

The 1996 Telecommunications Act lifted previous restrictions on a local telephone company providing video programming directly to customers within the telephone company’s service areas. The law now permits a telephone company to distribute video services either under the rules applicable to cable television systems or as operators of so-called “wireless cable” systems as common carriers or under FCC rules regulating “open video systems” subject to common carrier regulations. We cannot predict what effect these services may have on us. Likewise, we cannot predict what other changes might be considered in the future, nor can we judge in advance what impact, if any, such changes might have on our business.

Executive Officers

Our current executive officers are:

Name	Age	Position
Edward K. Christian	68	President, Chief Executive Officer and Chairman; Director
Steven J. Goldstein	56	Executive Vice President and Group Program Director
Warren S. Lada	58	Executive Vice President, Operations
Samuel D. Bush	55	Senior Vice President, Treasurer and Chief Financial Officer
Marcia K. Lobaito	64	Senior Vice President, Corporate Secretary, and Director of Business Affairs
Catherine A. Bobinski	53	Senior Vice President/Finance, Chief Accounting Officer and Corporate Controller

Officers are elected annually by our Board of Directors and serve at the discretion of the Board. Set forth below is information with respect to our executive officers.

Mr. Christian has been President, Chief Executive Officer and Chairman since our inception in 1986.

Mr. Goldstein has been Executive Vice President and Group Program Director since 1988. Mr. Goldstein has been employed by us since our inception in 1986.

Mr. Lada has been Executive Vice President, Operations since March 2012. He was Senior Vice President, Operations from 2000 to 2012 and Vice President, Operations from 1997 to 2000. From 1992 to 1997 he was Regional Vice President of our subsidiary, Saga Communications of New England, Inc.

Mr. Bush has been Senior Vice President since 2002, Chief Financial Officer and Treasurer since September 1997. He was Vice President from 1997 to 2002. From 1988 to 1997 he held various positions with the Media Finance Group at AT&T Capital Corporation, including senior vice president.

Ms. Lobaito has been Senior Vice President since 2005, Director of Business Affairs and Corporate Secretary since our inception in 1986 and Vice President from 1996 to 2005.

Ms. Bobinski has been Senior Vice President/Finance since March 2012 and Chief Accounting Officer and Corporate Controller since September 1991. She was Vice President from March 1999 to March 2012. Ms. Bobinski is a certified public accountant.

Item 1A. Risk Factors

The more prominent risks and uncertainties inherent in our business are described in more detail below. However, these are not the only risks and uncertainties we face. Our business may face additional risks and uncertainties that are unknown to us at this time.

Global Economic Conditions and Uncertainties May Continue to Affect our Business

The demand for advertising services is sensitive to changes in the level of economic activity. The global economic downturn that began in 2008 caused a decline in advertising and marketing by our customers. This reduction in advertising spending had an adverse effect on our revenue, profit margins and cash flows. Global economic conditions have been slow to recover and remain uncertain. The U.S. economy grew slowly in 2012 and unemployment remained relatively high. Our net revenues grew in the low single digits in 2012 as compared to 2011. There can be no assurance that any of the recent economic improvements will be broad based and sustainable, or that they will enhance conditions in markets relevant to us. Due to the continued uncertain pace of economic growth, we cannot predict future revenue trends. Further, there can be no assurance that we will not experience future adverse effects that may be material to our cash flows, competitive position, financial condition, results of operations, or our ability to access capital.

The volatility in global financial markets may also limit our ability to access the capital markets at a time when we would like, or need, to do so, which could have an impact on our flexibility to react to changing economic and business conditions. Accordingly, if the economy does not fully recover or worsens, our business, results of operations and financial condition could be materially and adversely affected.

We Have Substantial Indebtedness and Debt Service Requirements

At December 31, 2012 our long-term debt (including the current portion thereof and our guarantee of debt of Surtsey Media, LLC) was approximately \$58,828,000. We have borrowed and expect to continue to borrow to finance acquisitions and for other corporate purposes. Because of our substantial indebtedness, a significant portion of our cash flow from operations is required for debt service. Our leverage could make us vulnerable to an increase in interest rates, a downturn in our operating performance, or a decline in general economic conditions. The term loan principal amortizes in equal installments of 5% of the term loan during each year, however, upon satisfaction of certain conditions, as defined in the credit facility, no amortization payment is required. The credit facility is also subject to mandatory prepayment requirements, including but not limited to, certain sales of assets, certain insurance proceeds, certain debt issuances and certain sales of equity. Any outstanding balance under the credit facility will be due on the maturity date of June 13, 2016. We believe that cash flows from operations will be sufficient to meet our debt service requirements for interest and scheduled payments of principal under the credit facility. However, if such cash flow is not sufficient, we may be required to sell additional equity securities, refinance our obligations or dispose of one or more of our properties in order to make such scheduled payments. We cannot be sure that we would be able to effect any such transactions on favorable terms, if at all.

Our Debt Covenants Restrict our Financial and Operational Flexibility

Our credit facility contains a number of financial covenants which, among other things, require us to maintain specified financial ratios and impose certain limitations on us with respect to investments, additional indebtedness, dividends, distributions, guarantees, liens and encumbrances. Our ability to meet these financial ratios can be affected by operating performance or other events beyond our control, and we cannot assure you that we will meet those ratios. Certain events of default under our credit facility could allow the lenders to declare all amounts outstanding to be immediately due and payable and, therefore, could have a material adverse effect on our business. We have pledged substantially all of our assets (excluding our FCC licenses and certain other assets) in support of the credit facility and each of our subsidiaries has guaranteed the credit facility and has pledged substantially all of their assets (excluding their FCC licenses and certain other assets) in support of the credit facility.

We Depend on Key Personnel

Our business is partially dependent upon the performance of certain key individuals, particularly Edward K. Christian, our President and CEO. Although we have entered into employment and non-competition agreements with Mr. Christian, which terminate on March 31, 2018, and certain other key personnel, including on-air personalities, we cannot be sure that such key personnel will remain with us. We do not maintain key man life insurance on Mr. Christian's life. We can give no assurance that all or any of these employees will remain with us or will retain their audiences. Many of our key employees are at-will employees who are under no legal obligation to remain with us. Our competitors may choose to extend offers to any of these individuals on terms which we may be unwilling to meet. In addition, any or all of our key employees may decide to leave for a variety of personal or other reasons beyond our control. Furthermore, the popularity and audience loyalty of our key on-air personalities is highly sensitive to rapidly changing public tastes. A loss of such popularity or audience loyalty is beyond our control and could limit our ability to generate revenues.

We Depend on Key Stations

Historically our top six markets when combined represented 44%, 44% and 45% of our net operating revenue for the years ended December 31, 2012, 2011 and 2010, respectively. Accordingly, we may have greater exposure to adverse events or conditions that affect the economy in any of these markets, which could have a material adverse effect on our revenue, results of operations and financial condition.

Local and National Economic Conditions May Affect our Advertising Revenue

Our financial results are dependent primarily on our ability to generate advertising revenue through rates charged to advertisers. The advertising rates a station is able to charge are affected by many factors, including the general strength of the local and national economies. Generally, advertising declines during periods of economic recession or downturns in the economy. Our revenue has been and is likely to be adversely affected during such periods, whether they occur on a national level or in the geographic markets in which we operate. During such periods we may also be required to reduce our advertising rates in order to attract available advertisers. Such a decline in advertising rates could also have a material adverse effect on our revenue, results of operations and financial condition.

Our Stations Must Compete for Advertising Revenues in Their Respective Markets

Both radio and television broadcasting are highly competitive businesses. Our stations compete for listeners/viewers and advertising revenues within their respective markets directly with other radio and/or television stations, as well as with other media, such as broadcast television and/or radio (as applicable), cable television and/or radio, satellite television and/or satellite radio systems, newspapers, magazines, direct mail, the Internet, coupons and billboard advertising. Audience ratings and market shares are subject to change, and any change in a particular market could have a material adverse effect on the revenue of our stations located in that market. While we already compete in some of our markets with other stations with similar programming formats, if another radio station in a market were to convert its programming format to a format similar to one of our stations, if a new station were to adopt a comparable format or if an existing competitor were to strengthen its operations, our stations could experience a reduction in ratings and/or advertising revenue and could incur increased promotional and other expenses. Other radio or television broadcasting companies may enter into the markets in which we operate or may operate in the future. These companies may be larger and have more financial resources than we have. We cannot assure you that any of our stations will be able to maintain or increase their current audience ratings and advertising revenues.

Our Success Depends on our Ability to Identify, Consummate and Integrate Acquired Stations

As part of our strategy, we have pursued and may continue to pursue acquisitions of additional radio and television stations, subject to the terms of our credit facility. Broadcasting is a rapidly consolidating industry, with many companies seeking to consummate acquisitions and increase their market share. In this environment, we compete and will continue to compete with many other buyers for the acquisition of radio and television stations. Some of those competitors may be able to outbid us for acquisitions because they have greater financial resources. As a result of these and other factors, our ability to identify and consummate future acquisitions is uncertain.

Our consummation of all future acquisitions is subject to various conditions, including FCC and other regulatory approvals. The FCC must approve any transfer of control or assignment of broadcast licenses. In addition, acquisitions may encounter intense scrutiny under federal and state antitrust laws. Our future acquisitions may be subject to notification under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 and to a waiting period and possible review by the Department of Justice and the Federal Trade Commission. Any delays, injunctions, conditions or modifications by any of these federal agencies could have a negative effect on us and result in the abandonment of all or part of attractive acquisition opportunities. We cannot predict whether we will be successful in identifying future acquisition opportunities or what the consequences will be of any acquisitions.

Certain of our acquisitions may prove unprofitable and fail to generate anticipated cash flows. In addition, the success of any completed acquisition will depend on our ability to effectively integrate the acquired stations. The process of integrating acquired stations may involve numerous risks, including difficulties in the assimilation of operations, the diversion of management's attention from other business concerns, risk of entering new markets, and the potential loss of key employees of the acquired stations.

Future Impairment of our FCC Broadcasting Licenses Could Affect our Operating Results

As of December 31, 2012, our FCC broadcasting licenses represented 45.8% of our total assets. We are required to test our FCC broadcasting licenses for impairment on an annual basis, or more frequently if events or changes in circumstances indicate that our FCC broadcasting licenses might be impaired which may result in future impairment losses. For further discussion, see Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations — Critical Accounting Policies and Estimates included with this Form 10-K.

Our Business is Subject to Extensive Federal Regulation

The broadcasting industry is subject to extensive federal regulation which, among other things, requires approval by the FCC of transfers, assignments and renewals of broadcasting licenses, limits the number of broadcasting properties that may be acquired within a specific market, and regulates programming and operations. For a detailed description of the material regulations applicable to our business, see "Federal Regulation of Radio and Television Broadcasting" and "Other FCC Requirements" in Item 1 of this Form 10-K. Failure to comply with these regulations could, under certain circumstances and among other things, result in the denial or revocation of FCC licenses, shortened license renewal terms, monetary fines or other penalties which would adversely affect our profitability. Changes in ownership requirements could limit our ability to own or acquire stations in certain markets.

New Federal Regulations or Fees Could Affect our Broadcasting Operations

There has been proposed legislation in the past and there could be again in the future that requires radio broadcasters to pay additional fees such as a spectrum fee for the use of the spectrum or a royalty fee to record labels and performing artists for use of their recorded music. Currently, we pay royalties to song composers and publishers indirectly through third parties. Any proposed legislation that is adopted into law could add an additional layer of royalties to be paid directly to the record labels and artists. While this proposed legislation did not become law, it has been the subject of considerable debate and activity by the broadcast industry and other parties affected by the legislation. It is currently unknown what impact any potential required royalty payments would have on our results of operations, cash flows or financial position.

The FCC's Vigorous Enforcement of Indecency Rules Could Affect our Broadcasting Operations

Federal law regulates the broadcast of obscene, indecent or profane material. The FCC has increased its enforcement efforts relating to the regulation of indecency violations, and Congress has increased the penalties for broadcasting obscene, indecent or profane programming, and these penalties may potentially subject broadcasters to license revocation, renewal or qualification proceedings in the event that they broadcast such material. In addition, the FCC's heightened focus on the indecency regulations against the broadcast industry may encourage third parties to oppose our license renewal applications or applications for consent to acquire broadcast stations. Because the FCC may investigate indecency complaints prior to notifying a licensee of the

existence of a complaint, a licensee may not have knowledge of a complaint unless and until the complaint results in the issuance of a formal FCC letter of inquiry or notice of apparent liability for forfeiture. We have stations that are currently subject to indecency-related inquiries and/or proposed fines at the FCC's Enforcement Bureau, and we may in the future become subject to additional inquiries or proceedings related to our stations' broadcast of obscene, indecent or profane material. To the extent that any inquiries or other proceedings result in the imposition of fines, a settlement with the FCC, revocation of any of our station licenses or denials of license renewal applications, our result of operations and business could be materially adversely affected.

New Technologies May Affect our Broadcasting Operations

The FCC has and is considering ways to introduce new technologies to the broadcasting industry, including satellite and terrestrial delivery of digital audio broadcasting and the standardization of available technologies which significantly enhance the sound quality of AM broadcasters. We are unable to predict the effect such technologies may have on our broadcasting operations. The capital expenditures necessary to implement such technologies could be substantial. Moreover, the FCC may impose additional public service obligations on television broadcasters in return for their use of the digital television spectrum. This could add to our operational costs. One issue yet to be resolved is the extent to which cable systems will be required to carry broadcasters' new digital channels. Our television stations are highly dependent on their carriage by cable systems in the areas they serve. FCC rules that impose no or limited obligations on cable systems to carry the digital television signals of television broadcast stations in their local markets could adversely affect our television operations.

The Company is Controlled by our President, Chief Executive Officer and Chairman

As of March 4, 2013, Edward K. Christian, our President, Chief Executive Officer and Chairman, holds approximately 62% of the combined voting power of our Common Stock (not including options to acquire Class B Common Stock and based on Class B shares generally entitled to ten votes per share). As a result, Mr. Christian generally is able to control the vote on most matters submitted to the vote of stockholders and, therefore, is able to direct our management and policies, except with respect to (i) the election of the two Class A directors, (ii) those matters where the shares of our Class B Common Stock are only entitled to one vote per share, and (iii) other matters requiring a class vote under the provisions of our certificate of incorporation, bylaws or applicable law. For a description of the voting rights of our Common Stock, see Note 10 of the Notes to Consolidated Financial Statements included with this Form 10-K. Without the approval of Mr. Christian, we will be unable to consummate transactions involving an actual or potential change of control, including transactions in which stockholders might otherwise receive a premium for their shares over then-current market prices.

We May Experience Volatility in the Market Price of our Common Stock

The market price of our common stock has fluctuated in the past and may continue to be volatile. In addition to stock market fluctuations due to economic or other factors, the volatility of our shares may be influenced by lower trading volume and concentrated ownership relative to many of our publicly-held competitors. Because several of our shareholders own significant portions of our outstanding shares, our stock is relatively less liquid and therefore more susceptible to price fluctuations than many other companies' shares. If these shareholders were to sell all or a portion of their holdings of our common stock, then the market price of our common stock could be negatively affected. Investors should be aware that they could experience short-term volatility in our stock if such shareholders decide to sell all or a portion of their holdings of our common stock at once or within a short period of time.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our corporate headquarters is located in Grosse Pointe Farms, Michigan. The types of properties required to support each of our stations include offices, studios, and transmitter and antenna sites. A station's studios are generally housed with its offices in business districts. The transmitter sites and antenna sites are generally located so as to provide maximum market coverage for our stations broadcast signals.

As of December 31, 2012 the studios and offices of 27 of our 32 operating locations, including our corporate headquarters in Michigan, are located in facilities we own. The remaining studios and offices are located in leased facilities with lease terms that expire in 6 months to 4 years. We own or lease our transmitter and antenna sites, with lease terms that expire in 2 months to 77 years. We do not anticipate any difficulties in renewing those leases that expire within the next five years or in leasing other space, if required.

No one property is material to our overall operations. We believe that our properties are in good condition and suitable for our operations.

We own substantially all of the equipment used in our broadcasting business.

Item 3. Legal Proceedings

We currently and from time to time are involved in litigation incidental to the conduct of our business. We are not a party to any lawsuit or proceeding which, in the opinion of management, is likely to have a material adverse effect on our financial position, cash flows or results of operations.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

On January 16, 2013 the Company consummated a four-for-three stock split of its Class A and Class B Common Stock, resulting in an increase of issued and outstanding shares of approximately 1,218,000 and 199,000, respectively, for holders of record as of the close of business on December 28, 2012.

The Company's Class A Common Stock trades on the NYSE MKT under the ticker symbol SGA. There is no public trading market for the Company's Class B Common Stock. The following table sets forth the high and low sales prices of the Class A Common Stock as reported by the NYSE MKT for the calendar quarters indicated (as adjusted for the four-for-three stock split):

Year	High	Low
2011:		
First Quarter	\$26.10	\$18.03
Second Quarter	\$30.34	\$23.25
Third Quarter	\$29.70	\$20.14
Fourth Quarter	\$30.06	\$19.99
2012:		
First Quarter	\$35.99	\$26.44
Second Quarter	\$28.92	\$25.55
Third Quarter	\$32.11	\$25.31
Fourth Quarter	\$38.33	\$27.64

The closing price for the Company's Class A Common Stock on March 4, 2013 as reported by the NYSE MKT was \$47.62. As of March 4, 2013, there were approximately 194 holders of record of the Company's Class A Common Stock, and one holder of the Company's Class B Common Stock.

Dividends

On October 2, 2012 the Company's Board of Directors declared a special cash dividend of \$1.24 per share on its Classes A and B Common Stock. This dividend totaling \$7.0 million was paid on December 3, 2012 to shareholders of record on November 15, 2012. No dividends were declared by the Company in 2011. See Item 7. Management's Discussion and Analysis of Financial Position and Results of Operations — Liquidity and Capital Resources included with this Form 10-K.

Securities Authorized for Issuance Under Equity Compensation Plan Information

The following table sets forth as of December 31, 2012, the number of securities outstanding under our equity compensation plans, the weighted average exercise price of such securities and the number of securities available for grant under these plans (as adjusted for the four-for-three stock split):

Plan Category	(a)	(b)	(c)
	Number of Shares to be Issued Upon Exercise of Outstanding Warrants, Options, Warrants and Rights	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Column (a))
Equity Compensation Plans Approved by Stockholders:			
Employees' 401(k) Savings and Investment Plan	—	\$ —	437,843
2003 Stock Option Plan	28,917	\$57.787	—
2005 Incentive Compensation Plan	237,300 ⁽¹⁾	\$31.805 ⁽²⁾	496,145
Equity Compensation Plans Not Approved by Stockholders:			
None	—		—
Total	<u>266,217</u>		<u>933,988</u>

- (1) Includes 5,534 shares of restricted stock.
- (2) Weighted-Average Exercise Price of Outstanding Options.

Recent Sales of Unregistered Securities

Not applicable.

Issuer Purchases of Equity Securities

There were no repurchases of our equity securities during the quarter ended December 31, 2012.

Performance Graph

COMMON STOCK PERFORMANCE

Set forth below is a line graph comparing the cumulative total stockholder return for the years ended December 31, 2008, 2009, 2010, 2011 and 2012 of our Class A Common Stock against the cumulative total return of the NYSE MKT Stock Market (US Companies) and a Peer Group selected by us consisting of the following radio and/or television broadcast companies: Arbitron Inc., Beasley Broadcast Group, Inc., CBS Corp., CC Media Holdings, Inc., Cumulus Media Inc., Emmis Communications Corp., Entercom Communications Corp., Entravision Communications Corp., Fisher Communications Inc., Journal Communications, Inc., Radio One Inc., Saga Communications, Inc., Salem Communications Corp., Sirius XM Radio Inc., Spanish Broadcasting System, Inc. and Dial Global, Inc. The graph and table assume that \$100 was invested on December 31, 2007, in each of our Class A Common Stock, the NYSE MKT Stock Market (US Companies) and the Peer Group and that all dividends were reinvested. *The information contained in this graph shall not be deemed to be “soliciting material” or “filed” with the SEC or subject to the liabilities of Section 18 of the Exchange Act, except to the extent that we specifically incorporate it by reference into a document filed under the Securities Act or the Exchange Act.*

Comparison of Five-Year Cumulative Total Return

Legend

Symbol	CRSP Total Returns Index for:	12/07	12/08	12/09	12/10	12/11	12/12
—■—	Saga Communications, Inc.	100.0	28.0	53.2	110.4	158.7	204.6
-●-	NYSE MKT Stock Market (US Companies)	100.0	63.7	78.0	99.2	90.4	99.04
-▲-	Self-Determined Peer Group	100.0	26.6	53.0	85.7	96.9	139.41

The comparisons in the above table are required by the SEC. This table is not intended to forecast or to be indicative of any future return of our Class A Common Stock.

- (1) In January 2013, the Company consummated a four-for-three stock split of its Class A and Class B Common Stock. All share and per share information has been adjusted to reflect the retroactive equivalent change in the weighted average shares.
- (2) In April 2012, the Company entered into an agreement to sell WXVT-TV in Greenville, Mississippi. The operating results of WXVT-TV have been reported as discontinued operations for all periods presented.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with Item 1. Business, Item 6. Selected Financial Data and the consolidated financial statements and notes thereto of Saga Communications, Inc. and its subsidiaries contained elsewhere herein. The following discussion is presented on both a consolidated and segment basis. Corporate general and administrative expenses, interest expense, other (income) expense, and income tax provision are managed on a consolidated basis and are reflected only in our discussion of consolidated results.

For purposes of business segment reporting, we have aligned operations with similar characteristics into two business segments: Radio and Television. The Radio segment includes twenty-three markets, which includes all ninety-one of our radio stations and five radio information networks. The Television segment includes two markets and consists of four television stations and four low power television ("LPTV") stations. The discussion of our operating performance focuses on segment operating income because we manage our segments primarily on operating income. Operating performance is evaluated for each individual market.

General

We are a broadcast company primarily engaged in acquiring, developing and operating broadcast properties. We actively seek and explore opportunities for expansion through the acquisition of additional broadcast properties. We review acquisition opportunities on an ongoing basis.

Radio Segment

Our radio segment's primary source of revenue is from the sale of advertising for broadcast on our stations. Depending on the format of a particular radio station, there are a predetermined number of advertisements available to be broadcast each hour.

Most advertising contracts are short-term and generally run for a few weeks only. The majority of our revenue is generated from local advertising, which is sold primarily by each radio markets' sales staff. For the years ended December 31, 2012, 2011 and 2010, approximately 88%, 85% and 86%, respectively, of our radio segment's gross revenue was from local advertising. To generate national advertising sales, we engage independent advertising sales representative firms that specialize in national sales for each of our broadcast markets.

Our revenue varies throughout the year. Advertising expenditures, our primary source of revenue, generally have been lowest during the winter months, which include the first quarter of each year. In 2012, we had a significant increase in political advertising due to both the presidential election and a number of congressional, senatorial, gubernatorial and local elections in most of our markets. Because 2013 is a non-election year, we expect political revenue to significantly decline in 2013.

Our net operating revenue, station operating expense and operating income vary from market to market based upon the market's rank or size which is based upon population and the available radio advertising revenue in that particular market.

The broadcasting industry and advertising in general, is influenced by the state of the overall economy, including unemployment rates, inflation, energy prices and consumer interest rates. Our stations broadcast primarily in small to midsize markets. Historically, these markets have been more stable than major metropolitan markets during downturns in advertising spending, but may not experience increases in such spending as significant as those in major metropolitan markets in periods of economic improvement.

Our financial results are dependent on a number of factors, the most significant of which is our ability to generate advertising revenue through rates charged to advertisers. The rates a station is able to charge are, in large part, based on a station's ability to attract audiences in the demographic groups targeted by its advertisers. In a number of our markets, this is measured by periodic reports generated by independent national rating services. In the remainder of our markets it is measured by the results advertisers obtain through the actual running of an advertising schedule. Advertisers measure these results based on increased demand for their goods or services and/or actual revenues generated from such demand. Various factors affect the rate a station can charge, including the general strength of the local and national economies, population growth, ability to provide popular programming, local market competition, target marketing capability of radio compared to other advertising media, and signal strength.

When we acquire and/or begin to operate a station or group of stations we generally increase programming and advertising and promotion expenses to increase our share of our target demographic audience. Our strategy sometimes requires levels of spending commensurate with the revenue levels we plan on achieving in two to five years. During periods of economic downturns, or when the level of advertising spending is flat or down across the industry, this strategy may result in the appearance that our cost of operations are increasing at a faster rate than our growth in revenues, until such time as we achieve our targeted levels of revenue for the acquired station or group of stations.

The number of advertisements that can be broadcast without jeopardizing listening levels (and the resulting ratings) is limited in part by the format of a particular radio station. Our stations strive to maximize revenue by constantly managing the number of commercials available for sale and by adjusting prices based upon local market conditions and ratings. While there may be shifts from time to time in the number of advertisements broadcast during a particular time of the day, the total number of advertisements broadcast on a particular station generally does not vary significantly from year to year. Any change in our revenue, with the exception of those instances where stations are acquired or sold, is generally the result of inventory sell out ratios and pricing adjustments, which are made to ensure that the station efficiently utilizes available inventory.

Our radio stations employ a variety of programming formats. We periodically perform market research, including music evaluations, focus groups and strategic vulnerability studies. Because reaching a large and demographically attractive audience is crucial to a station's financial success, we endeavor to develop strong listener loyalty. Our stations also employ audience promotions to further develop and secure a loyal following. We believe that the diversification of formats on our radio stations helps to insulate us from the effects of changes in musical tastes of the public on any particular format.

The primary operating expenses involved in owning and operating radio stations are employee salaries, sales commissions, programming expenses, depreciation, and advertising and promotion expenses.

The radio broadcasting industry is subject to rapid technological change, evolving industry standards and the emergence of new media technologies and services. These new technologies and media are gaining advertising share against radio and other traditional media.

We are continuing to expand our digital initiative to provide a seamless experience across numerous platforms to allow our listeners and viewers to connect with our products where and when they want. Over the past year, we have embarked on a project to bring all of our websites in house while making them fully accessible on mobile devices. The net result will provide new avenues for revenue and improve our overall digital reach.

In addition, we continue the rollout of HD Radio[™]. HD Radio[™] utilizes digital technology that provides improved sound quality over standard analog broadcasts and also allows for the delivery of additional channels of diversified programming or data streams in each radio market.

During the years ended December 31, 2012, 2011 and 2010, our Columbus, Ohio; Des Moines, Iowa; Manchester, New Hampshire; and Milwaukee, Wisconsin markets, when combined, represented approximately 30% of our consolidated net operating revenue. An adverse change in any of these radio markets or relative market position in those markets could have a significant impact on our operating results as a whole.

The following tables describe the percentage of our consolidated net operating revenue represented by each of these markets:

	Percentage of Consolidated Net Operating Revenue for the Years Ended December 31,		
	2012	2011	2010
Market:			
Columbus, Ohio	7%	6%	5%
Des Moines, Iowa	6%	7%	6%
Manchester, New Hampshire	6%	5%	6%
Milwaukee, Wisconsin	11%	12%	13%

We have experienced a significant decline in our net operating revenue for the years ended December 31, 2011 and 2012 as compared to the corresponding period of 2010 in our Milwaukee, Wisconsin market. This decline in net operating revenue has directly affected the operating income of our radio stations in this market. These reductions are attributable to a combination of aggressive competitive pricing due to a soft economy and new ratings methodology that has changed the competitive pricing landscape in the market; an increase in the demand for 30 second spots that has caused a reduction in both our rates and inventory available as we control the number of units per hour to provide more entertainment for our listeners; and a decline in certain key category spending in the market.

We use certain financial measures that are not calculated in accordance with generally accepted accounting principles in the United States of America (GAAP) to assess our financial performance. For example, we evaluate the performance of our markets based on “station operating income” (operating income plus corporate general and administrative expenses, depreciation and amortization). Station operating income is generally recognized by the broadcasting industry as a measure of performance, is used by analysts who report on the performance of the broadcasting industry and it serves as an indicator of the market value of a group of stations. In addition, we use it to evaluate individual stations, market-level performance, overall operations and as a primary measure for incentive based compensation of executives and other members of management. Station operating income is not necessarily indicative of amounts that may be available to us for debt service requirements, other commitments, reinvestment or other discretionary uses. Station operating income is not a measure of liquidity or of performance in accordance with GAAP, and should be viewed as a supplement to, and not a substitute for our results of operations presented on a GAAP basis.

During the years ended December 31, 2012, 2011 and 2010, the radio stations in our four largest markets when combined, represented approximately 34%, 33% and 32%, respectively, of our consolidated station operating income. The following tables describe the percentage of our consolidated station operating income represented by each of these markets:

	Percentage of Consolidated Station Operating Income (*) for the Years Ended December 31,		
	2012	2011	2010
Market:			
Columbus, Ohio	8%	6%	3%
Des Moines, Iowa	5%	5%	4%
Manchester, New Hampshire	8%	7%	8%
Milwaukee, Wisconsin	13%	15%	17%

(*) Operating income plus corporate general and administrative expenses, depreciation and amortization.

Television Segment

Our television segment's primary source of revenue is from the sale of advertising for broadcast on our stations. The number of advertisements available for broadcast on our television stations is limited by network affiliation and syndicated programming agreements and, with respect to children's programs, federal regulation. Our television stations' local market managers determine the number of advertisements to be broadcast in locally produced programs only, which are primarily news programming and occasionally local sports or information shows.

Our net operating revenue, station operating expense and operating income vary from market to market based upon the market's rank or size, which is based upon population, available television advertising revenue in that particular market, and the popularity of programming being broadcast.

Our financial results are dependent on a number of factors, the most significant of which is our ability to generate advertising revenue through rates charged to advertisers. The rates a station is able to charge are, in large part, based on a station's ability to attract audiences in the demographic groups targeted by its advertisers, as measured principally by periodic reports by independent national rating services. Various factors affect the rate a station can charge, including the general strength of the local and national economies, population growth, ability to provide popular programming through locally produced news, sports and weather and as a result of syndication and network affiliation agreements, local market competition, the ability of television broadcasting to reach a mass appeal market compared to other advertising media, and signal strength including cable/satellite coverage, and government regulation and policies.

Our stations strive to maximize revenue by constantly adjusting prices for our commercial spots based upon local market conditions, advertising demands and ratings. While there may be shifts from time to time in the number of advertisements broadcast during a particular time of day, the total number of advertisements broadcast on a station generally does not vary significantly from year to year. Any change in our revenue, with the exception of those instances where stations are acquired or sold, is generally the result of pricing adjustments, which are made to ensure that the station efficiently utilizes available inventory.

Because audience ratings in the local market are crucial to a station's financial success, we endeavor to develop strong viewer loyalty by providing locally produced news, weather and sports programming. We believe that this emphasis on the local market provides us with the viewer loyalty we are trying to achieve.

Most of our revenue is generated from local advertising, which is sold primarily by each television markets' sales staff. For the years ended December 31, 2012, 2011 and 2010, approximately 85%, 81% and 80%, respectively, of our television segment's gross revenue was from local advertising. To generate national advertising sales, we engage independent advertising sales representatives that specialize in national sales for each of our television markets.

Our revenue varies throughout the year. Advertising expenditures, our primary source of revenue, generally have been lowest during the winter months, which include the first quarter of each year. In 2012, we had a significant increase in political advertising due to both the presidential election and a number of congressional, senatorial, gubernatorial and local elections in our markets. Because 2013 is a non-election year, we expect political revenue to significantly decline in 2013.

In 2009 we entered into retransmission consent agreements with certain cable and satellite providers as to the terms of their carriage of our television stations, and the compensation we would receive for granting such carriage rights. In 2011 we renegotiated new retransmission consent agreements with these and other providers that resulted in a significant increase in our retransmission consent revenue for fiscal 2012 -2014. We recognized revenue of \$1.8 million in 2012 and, per the terms of our network affiliation agreements, we remitted \$435,000 of this revenue to our network partners as their share of our retransmission consent revenue.

The primary operating expenses involved in owning and operating television stations are employee salaries, sales commissions, programming expenses, including news production and the cost of acquiring certain syndicated programming, depreciation, and advertising and promotion expenses.

Our television market in Joplin, Missouri represented approximately 9%, 9% and 8% of our net operating revenues, and approximately 11%, 10% and 10% of our consolidated station operating income (operating income plus corporate general and administrative expenses, depreciation and amortization) for the years ended December 31, 2012, 2011 and 2010, respectively.

Results of Operations

The following tables summarize our results of operations for the three years ended December 31, 2012, 2011 and 2010.

Consolidated Results of Operations

	Years Ended December 31,			2012 vs. 2011		2011 vs. 2010

Year Ended December 31, 2012 Compared to Year Ended December 31, 2011

Consolidated

For the year ended December 31, 2012, consolidated net operating revenue was \$130,259,000 compared with \$125,273,000 for year ended December 31, 2011, an increase of \$4,986,000 or 4%. Gross political revenue and gross retransmission consent revenue increased \$5,472,000 and \$1,314,000, respectively, in 2012. Gross local revenue increased \$1,624,000 and gross national revenue decreased \$3,204,000 compared to the prior year. The increase in gross local revenue was primarily attributable to improvements in our Charlottesville, VA, Columbus, OH and Norfolk, VA markets, partially offset by a decline in gross local revenue in our Milwaukee, WI market and our Networks. The increase in gross political revenue was a result of the 2012 election campaigns, and the increase in gross retransmission consent revenue was due to our renegotiated contracts for the carriage rights of our television stations. The decrease in national revenue is due to a reduction of national advertising in 2012.

Station operating expense was \$90,288,000 for the year ended December 31, 2012, compared with \$90,929,000 for the year ended December 31, 2011, a decrease of \$641,000 or less than 1%. Music licensing fees decreased \$1,771,000 in the current year as a result of lower royalty rates and credits received from two of our performance rights organizations for fees previously paid. We also had decreases during the year ended December 31, 2012 of \$494,000 in advertising and promotions expense, \$377,000 in bad debt expense and \$236,000 in depreciation and amortization expense. The decrease in advertising and promotions was primarily attributable to reductions in TV and billboard advertising, and the reduction in bad debt expense was a result of enhanced collection efforts in many of our markets. These decreases in expenses were partially offset by an increase in salaries of \$1,728,000, as a result of the reinstatement of the 5% salary reductions implemented in March 2009 and programming contractual agreement increases. Retransmission fees were \$435,000, which is a new expense in 2012 for our television stations. Retransmission fees are the amount that we pay our network affiliates as a result of our renegotiated carriage rights agreements.

Operating income from continuing operations for the year ended December 31, 2012 was \$32,011,000 compared to \$26,754,000 for the year ended December 31, 2011, an increase of \$5,257,000, or 20%. The increase was a result of the improvement in net operating revenue and the reduction in station operating expense described in detail above. Additionally, our corporate general and administrative charges increased \$370,000 in the current year. The increase in corporate general and administrative charges was primarily from an increase in 401(k) expenses of \$230,000 as a result of the reinstatement of Company contributions in 2012, and a \$100,000 increase in interactive expense to bring all of our websites in-house. The Company did not make any matching contributions to the 401(k) plan in 2011.

The loss from discontinued operations was related to our Greenville, Mississippi TV station held for sale and is presented net of income taxes. Please refer to Note 3 — Discontinued Operations, in the accompanying notes to the consolidated financial statements for more information on our discontinued operations.

We generated net income of \$17,925,000 (\$3.16 per share on a fully diluted basis) for the year ended December 31, 2012, compared with \$12,631,000 (\$2.23 per share on a fully diluted basis) for the year ended December 31, 2011, an increase of \$5,294,000 or 42%. In the current year we had an increase in operating income from continuing operations of \$5,257,000, as described above, and a decrease in interest expense of \$1,687,000. Additionally, in 2011 we recognized a charge of \$1,326,000 for the write-off of unamortized debt issuance costs related to our pre-existing credit facility. The decrease in interest expense was attributable to an average decrease in market interest rates of 0.856%, a decrease in average debt outstanding, and a decrease in the amortization of debt financing costs. Income tax expense increased \$3,335,000 in 2012 as a result of the improvement in operating income and the decline in interest expense.

Radio Segment

For the year ended December 31, 2012, net operating revenue of the radio segment was \$111,763,000 compared with \$108,938,000 for the year ended December 31, 2011, an increase of \$2,825,000 or 3%. Gross local revenue and gross political revenue increased \$1,829,000 and \$3,769,000, respectively, in 2012. Gross national revenue decreased \$2,760,000 compared to the prior year. The increase in gross local revenue was primarily attributable to improvements in our Charlottesville, VA, Columbus, OH and Norfolk, VA markets, partially offset by a decline in gross local revenue in our Milwaukee, WI market and our Networks. The increase in gross political revenue was a result of the 2012 election campaigns. The decrease in national revenue is due to a reduction of national advertising in 2012. National advertising on our Networks accounted for 23% of this decrease.

Station operating expense for the radio segment was \$77,992,000 for the year ended December 31, 2012, compared with \$79,130,000 for the year ended December 31, 2011, a decrease of \$1,138,000 or 1%. Music licensing fees decreased \$1,756,000 in the current year as a result of lower royalty rates and credits received from two of our performance rights organizations for fees previously paid. We also had decreases during the year ended December 31, 2012 of \$449,000 in advertising and promotions expense and \$343,000 in bad debt expense. The decrease in advertising and promotions was primarily attributable to reductions in TV and billboard advertising, and the reduction in bad debt expense was a result of enhanced collection efforts in many of our markets. These decreases in expenses were partially offset by an increase in compensation expense of \$1,425,000, primarily as a result of the reinstatement of the 5% salary reductions implemented in March 2009 and programming contractual agreement increases.

Operating income for the radio segment increased \$3,963,000 or 13% to \$33,771,000 for the year ended December 31, 2012, from \$29,808,000 for the year ended December 31, 2011. The increase was a result of the improvement in net operating revenue and reduction in station operating expense described above.

Television Segment

For the year ended December 31, 2012, net operating revenue of our television segment was \$18,496,000 compared with \$16,335,000 for the year ended December 31, 2011, an increase of \$2,161,000 or 13%. Gross political revenue and gross retransmission consent revenue increased \$1,703,000 and \$1,314,000, respectively, in 2012. The increase in gross political revenue was attributable to the 2012 election campaigns, and the increase in gross retransmission consent revenue was a result of our renegotiated contracts for the carriage rights of our television stations. These increases were partially offset by decreases in gross national revenue and gross local revenue of \$444,000 and \$205,000, respectively.

Station operating expense in the television segment for the year ended December 31, 2012 was \$12,296,000, compared with \$11,799,000 for the year ended December 31, 2011, an increase of \$497,000 or 4%. The increase in station operating expense was primarily retransmission fees of \$435,000 in 2012, which is a new expense in 2012 for our television stations. Retransmission fees are the amount that we pay our network affiliates as a result of our renegotiated carriage rights agreements.

Operating income in the television segment for the year ended December 31, 2012 was \$6,200,000 compared with \$4,536,000 for the year ended December 31, 2011, an increase of \$1,664,000 or 37%. The increase was a result of the improvement in net operating revenue partially offset by an increase in station operating expense, described in detail above.

Year Ended December 31, 2011 Compared to Year Ended December 31, 2010

Consolidated

For the year ended December 31, 2011, consolidated net operating revenue was \$125,273,000 compared with \$125,833,000 for year ended December 31, 2010, a decline of \$560,000 or less than 1%. Gross national revenue and gross local revenue increased \$1,467,000 and \$825,000, respectively. Gross political revenue decreased \$2,897,000 for the year ended December 31, 2011 as compared to 2010. The improvement in gross national revenue was primarily the result of increased advertising from the financial services, cellular and automotive industries. Gross local revenue increased primarily as a result of increased local advertising in our Joplin, MO market following a tornado that caused significant damage in the market in May 2011, and an increase in advertising spending in general. The decrease in gross political revenue was attributable to political advertising in 2010 which was an election year.

Station operating expense was \$90,929,000 for the year ended December 31, 2011, compared with \$90,335,000 for the year ended December 31, 2010, an increase of \$594,000 or less than 1%. Salaries increased \$400,000 as a result of the 3.75% reinstatement in 2011 of the 5% salary reductions implemented in March 2009. Our health care costs increased \$643,000 in the current year, primarily resulting from both increased claims and Health Care Reform. These increases were partially offset by reductions in music license fees and depreciation expense of \$241,000 and \$242,000, respectively.

Operating income from continuing operations for the year ended December 31, 2011 was \$26,754,000 compared to \$28,224,000 for the year ended December 31, 2010, a decrease of \$1,470,000, or 5%. The decrease was a result of the decline in net operating revenue and increase in station operating expense, described above. Additionally, our corporate general and administrative charges increased \$316,000 in the current year. The increase in corporate general and administrative charges was primarily from an increase in IT expenses of \$200,000 and an increase in officers' life insurance expense of \$61,000 that is attributable to a decline in the cash surrender value of the life insurance policies.

The loss from discontinued operations was related to our Greenville, Mississippi TV station held for sale and is presented net of income taxes. Please refer to Note 3 — Discontinued Operations, in the accompanying notes to the consolidated financial statements for more information on our discontinued operations.

We generated net income of \$12,631,000 (\$2.23 per share on a fully diluted basis) during the year ended December 31, 2011, compared with \$15,136,000 (\$2.68 per share on a fully diluted basis) for the year ended December 31, 2010, a decrease of \$2,505,000 or 17%. In 2011, we had a decrease in operating income from continuing operations of \$1,470,000, as described above, and decreases in interest expense and income tax expense of \$2,202,000 and \$2,015,000, respectively. The reduction in interest expense was attributable to an average decline in market interest rates of approximately 0.98%, a decrease in the amortization of debt financing costs, and a decrease in the average obligation of debt outstanding. The reduction in income tax expense was attributable to our 2011 operating performance. Additionally, in 2011, we recognized a \$1,326,000 charge for the write-off of unamortized debt issuance costs in conjunction with our previous credit agreement. See Note 4 — Long-Term Debt, in the accompanying notes to the consolidated financial statements. In 2010, we had non-recurring income of \$3,561,000 resulting from an agreement to downgrade an FCC license at one of our stations.

Radio Segment

For the year ended December 31, 2011, net operating revenue of the radio segment was \$108,938,000 compared with \$109,891,000 for the year ended December 31, 2010, a decrease of \$953,000 or 1%. Gross national revenue improved \$1,464,000 in 2011. Gross political revenue and gross local revenue declined \$1,935,000 and \$495,000, respectively, for the year ended December 31, 2011 as compared to 2010. The increase in gross national revenue was primarily the result of increased advertising from the financial services, cellular and automotive industries. The reduction in gross political revenue was attributable to political advertising in 2010 which was an election year. The decline in gross local revenue was primarily the result of a softening in local advertising in 2011.

Station operating expense for the radio segment was \$79,130,000 for the year ended December 31, 2011, compared with \$79,012,000 for the year ended December 31, 2010, an increase of approximately \$118,000 or less than 1%. Salaries increased \$350,000 as a result of the 3.75% reinstatement in 2011 of the 5% salary reductions implemented in March 2009. Our health care costs increased approximately \$537,000 in 2011, primarily resulting from both increased claims and Health Care Reform. These increases were partially offset by reductions in music license fees and ratings service expense of \$247,000 and \$156,000, respectively. Additionally, we had a decline in depreciation and amortization expense of \$254,000 in 2011.

Operating income in the radio segment for the year ended December 31, 2011 was \$29,808,000 compared with \$30,879,000 for the year ended December 31, 2010, a decrease of \$1,071,000 or 3%. The decrease was a direct result of the decline in net operating revenue and the increase in station operating expense, described above.

Television Segment

For the year ended December 31, 2011, net operating revenue of our television segment was \$16,335,000 compared with \$15,942,000 for the year ended December 31, 2010, an increase of \$393,000 or 2%. Gross local revenue increased \$1,320,000, but was partially offset by a decline in gross political revenue of \$962,000. Gross national revenue was relatively unchanged compared to 2010. The improvement in local revenue was primarily a result of an increase in local advertising in our Joplin, MO market following a tornado in May 2011 that caused significant damage in the market. Our television stations that we own and operate in Joplin did not sustain damage in the tornado. The decline in gross political revenue was attributable to political advertising in 2010 which was an election year.

Station operating expense in the television segment for the year ended December 31, 2011 was \$11,799,000, compared with \$11,323,000 for the year ended December 31, 2010, an increase of \$476,000 or 4%. Our health care costs increased \$106,000, primarily resulting from both increased claims and Health Care Reform. Sales commission and selling expenses increased \$159,000 as a result of increased revenue. In addition, salaries increased \$48,000 from the 3.75% reinstatement in 2011 of the 5% salary reductions implemented in March 2009.

Operating income in the television segment for the year ended December 31, 2011 was \$4,536,000, compared with \$4,619,000 for the year ended December 31, 2010, a decrease of \$83,000 or 2%. The decrease was a result of the increase in station operating expense described above.

Liquidity and Capital Resources

Debt Arrangements and Debt Service Requirements

Our credit facility, providing availability up to \$117.8 million (the "Credit Facility") consists of a \$57.8 million term loan (the "Term Loan") and a \$60 million revolving loan (the "Revolving Credit Facility") and matures on June 13, 2016. An additional \$40 million financing may, in the future, be made available to the Company subject to compliance with terms and conditions of the Credit Facility.

We had \$60 million of unused borrowing capacity under the Revolving Credit Facility at December 31, 2012. The unused portion of the Revolving Credit Facility is available for general corporate purposes, including working capital, capital expenditures, permitted acquisitions and related transaction expenses and permitted stock buybacks.

The Credit Facility permits up to \$25 million, annually, in aggregate amount for additional business acquisitions, subject to certain terms and conditions as set forth in the Credit Facility in further detail, and also permits the Company to make up to \$20 million, annually, in aggregate amount for dividends, distributions and stock redemptions.

The Term Loan principal amortizes in equal installments of 5% of the Term Loan during each year, however, upon satisfaction of certain conditions, as defined in the Credit Facility, no amortization payment is required. The Credit Facility is also subject to mandatory prepayment requirements, including but not limited to, certain sales of assets, certain insurance proceeds, certain debt issuances and certain sales of equity. Optional prepayments of the Credit Facility are permitted without any premium or penalty, other than certain costs and expenses. As of December 31, 2012, we have no required amortization payment.

Interest rates under the Credit Facility are payable, at our option, at alternatives equal to LIBOR plus 1.50% to 2.75% or the base rate plus 0.50% to 1.75%. The spread over LIBOR and the base rate vary from time to time, depending upon our financial leverage. We also pay quarterly commitment fees of 0.25% to 0.375% per annum on the unused portion of the Revolving Credit Facility.

We have pledged substantially all of our assets (excluding our FCC licenses and certain other assets) in support of the Credit Facility and each of our subsidiaries has guaranteed the Credit Facility and has pledged substantially all of their assets (excluding their FCC licenses and certain other assets) in support of the Credit Facility.

The Credit Facility contains a number of financial covenants (all of which we were in compliance with at December 31, 2012) which, among other things, require us to maintain specified financial ratios and impose certain limitations on us with respect to investments, additional indebtedness, dividends, distributions, guarantees, liens and encumbrances.

In 2003, we entered into an agreement of understanding with Surtsey Media whereby we have guaranteed up to \$1,250,000 of the debt incurred in closing the acquisition of a construction permit for KFJX-TV station in Pittsburg, Kansas, a full power Fox affiliate serving Joplin, Missouri. At December 31, 2012, there was \$1,078,000 of debt outstanding under this agreement. We do not have any recourse provision in connection with our guarantee that would enable us to recover any amounts paid under the guarantee. As a result, at December 31, 2012, we have recorded \$1,078,000 in debt and \$1,000,000 in intangible assets, primarily broadcast licenses. In consideration for the guarantee, Surtsey Media entered into various agreements with us relating to the stations, which were amended in January 2012. See Note 9 of the Notes to Consolidated Financial Statements included within this Form 10-K, which is incorporated by reference.

Sources and Uses of Cash

During the years ended December 31, 2012, 2011 and 2010, we had net cash flows from operating activities of \$30,955,000, \$27,178,000 and \$27,539,000, respectively. We believe that cash flow from operations will be sufficient to meet quarterly debt service requirements for interest and scheduled payments of principal under the Credit Facility. However, if such cash flow is not sufficient, we may be required to sell additional equity securities, refinance our obligations or dispose of one or more of our properties in order to make such scheduled payments. There can be no assurance that we would be able to effect any such transactions on favorable terms, if at all.

In March 2013, our board of directors authorized an increase to our Stock Buy-Back Program (the "Buy-Back Program") to allow us to purchase up to \$75.8 million of our Class A Common Stock. From its inception in 1998 through December 31, 2012, we have repurchased 1.9 million shares of our Class A Common Stock for \$45.8 million. During the year ended December 31, 2012, approximately 3,000 shares were retained for payment of withholding taxes related to the vesting of restricted stock for \$80,000.

Our capital expenditures, exclusive of acquisitions, for the year ended December 31, 2012 were \$4,809,000 (\$5,410,000 in 2011). We anticipate capital expenditures in 2013 to be approximately \$5.0 million, which we expect to finance through funds generated from operations.

Summary Disclosures About Contractual Obligations

We have future cash obligations under various types of contracts, including the terms of our Credit Facility, operating leases, programming contracts, employment agreements, and other operating contracts. The following table reflects a summary of our contractual cash obligations and other commercial commitments as of December 31, 2012:

Contractual Obligations:	Payments Due By Period				
	Total	Less Than 1 Year	1 to 3 Years	4 to 5 Years	More Than 5 Years
			(In thousands)		
Long-Term Debt Obligations ⁽¹⁾ . . .	\$58,828	\$ —	\$ 1,078	\$57,750	\$ —
Interest Payments on Long-Term Debt ⁽²⁾	4,129	1,216	2,378	535	—
Operating Leases	6,177	1,216	1,303	729	2,929
Purchase Obligations ⁽³⁾	26,705	12,166	10,828	2,482	1,229
Other Long-Term Liabilities	—	—	—	—	—
Total Contractual Cash Obligations .	<u>\$95,839</u>	<u>\$14,598</u>	<u>\$15,587</u>	<u>\$61,496</u>	<u>\$4,158</u>

- (1) Under our Credit Facility, the maturity on outstanding debt of \$58.8 million could be accelerated if we do not maintain certain covenants. Long-Term Debt Obligations include the guarantee of debt of a related party of \$1,078,000. (See Notes 4 and 9 of the Notes to Consolidated Financial Statements).
- (2) Interest payments on the long-term debt are based on scheduled debt maturities and the interest rates are held constant over the remaining terms.
- (3) Includes \$17,334,000 in obligations under employment agreements and contracts with on-air personalities, other employees, and our President, CEO, and Chairman, Edward K. Christian and \$9,371,000 in purchase obligations under general operating agreements and contracts including but not limited to syndicated programming contracts; sports programming rights; software rights; ratings services; television advertising; and other operating expenses.

We anticipate that the above contractual cash obligations will be financed through funds generated from operations or additional borrowings under our Credit Facility, or a combination thereof.

Critical Accounting Policies and Estimates

Our consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States, which require us to make estimates, judgments and assumptions that affect the reported amounts of certain assets, liabilities, revenues, expenses and related disclosures and contingencies. We evaluate estimates used in preparation of our financial statements on a continual basis, including estimates related to the following:

Revenue Recognition: Revenue from the sale of commercial broadcast time to advertisers is recognized when commercials are broadcast. Revenue is reported net of advertising agency commissions. Agency commissions, when applicable, are based on a stated percentage applied to gross billing. All revenue is recognized in accordance with the Securities and Exchange Commission's ("SEC") Staff Accounting Bulletin ("SAB") No. 104, Topic 13, *Revenue Recognition Revised and Updated* and the Accounting Standards Codification (ASC) Topic 605, *Revenue Recognition*.

Carrying Value of Accounts Receivable and Related Allowance for Doubtful Accounts: We evaluate the collectability of our accounts receivable based on a combination of factors. In circumstances where we are aware of a specific customer's inability to meet its financial obligations to us (e.g., bankruptcy filings, credit history, etc.), we record a specific reserve for bad debts against amounts due to reduce the net recognized receivable to the amount we reasonably believe will be collected. For all other customers, we recognize reserves for bad debts based on past loss history and the length of time the receivables are past due, ranging from 50% for amounts 90 days outstanding to 100% for amounts over 120 days outstanding. If our evaluations of the collectability of our accounts receivable differ from actual results, additional bad debt expense and allowances may be required. Our historical estimates have been a reliable method to estimate future allowances and our reserves have averaged approximately 3% of our outstanding receivables. The effect

of an increase in our allowance of 1% of our outstanding receivables as of December 31, 2012, from 3.0% to 4.0% or from \$577,000 to \$774,000 would result in a decrease in net income of \$116,000, net of taxes for the year ended December 31, 2012.

Purchase Accounting: We account for our acquisitions under the purchase method of accounting. The total cost of acquisitions is allocated to the underlying net assets, based on their respective estimated fair values as of the acquisition date. The excess of consideration paid over the estimated fair values of the net assets acquired is recorded as goodwill. Determining the fair values of the net assets acquired and liabilities assumed requires management's judgment and often involves the use of significant estimates including assumptions with respect to future cash inflows and outflows, discount rates, asset lives and market multiples, among other items.

Broadcast Licenses and Goodwill: We have made acquisitions in the past for which a significant amount of the purchase price was allocated to broadcast licenses and goodwill assets. As of December 31, 2012, we have recorded approximately \$90,361,000 in broadcast licenses, which represents 45.8% of our total assets. In assessing the recoverability of these assets, we must conduct impairment testing and charge to operations an impairment expense only in the periods in which the carrying value of these assets is more than their fair value.

We completed the impairment test for broadcast licenses during the fourth quarter of 2012 and determined that the fair value of the broadcast licenses was greater than the carrying value recorded for each of our markets and, accordingly, no impairment was recorded.

Our goodwill was fully impaired in 2008; therefore we have no goodwill at December 31, 2012.

We believe our estimate of the value of our broadcast licenses is a critical accounting estimate as the value is significant in relation to our total assets, and our estimate of the value uses assumptions that incorporate variables based on past experiences and judgments about future operating performance of our stations. These variables include but are not limited to: (1) the forecast growth rate of each radio and television market, including population, household income, retail sales and other expenditures that would influence advertising expenditures; (2) market share and profit margin of an average station within a market; (3) estimated capital start-up costs and losses incurred during the early years; (4) risk-adjusted discount rate; (5) the likely media competition within the market area; and (6) terminal values. Changes in our estimates of the fair value of these assets could result in material future period write-downs in the carrying value of our broadcast licenses. For illustrative purposes only, had the fair values of each of our broadcasting licenses been lower by 10% as of December 31, 2012, the Company would have recorded a broadcast license impairment of approximately \$0.3 million; had the fair values of each of our broadcasting licenses been lower by 20% as of December 31, 2012, the Company would have recorded a broadcast license impairment of approximately \$2.7 million; and had the fair value of our broadcasting licenses been lower by 30% as of December 31, 2012, the Company would have recorded a broadcast license impairment of approximately \$9.1 million. Please refer to Note 2 — Broadcast Licenses and Other Intangible Assets, in the accompanying notes to the consolidated financial statements for a discussion of several key assumptions used in the fair value estimate of our broadcast licenses during our fourth quarter annual impairment test.

Stock Based Compensation: We use a Black-Scholes valuation model to estimate the fair value of stock based awards. Under the fair value method, stock based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense on a straight-line basis over the vesting period. Determining the fair value of share-based awards at grant date requires assumptions and judgments about expected volatility and forfeiture rates, among other factors. If actual results differ significantly from these assumptions, then stock based compensation expense may differ materially in the future from that previously recorded.

Litigation and Contingencies: On an ongoing basis, we evaluate our exposure related to litigation and contingencies and record a liability when available information indicates that a liability is probable and estimable. We also disclose significant matters that are reasonably possible to result in a loss or are probable but not estimable.

Market Risk and Risk Management Policies

Our earnings are affected by changes in short-term interest rates as a result of our long-term debt arrangements. If market interest rates averaged 1% more in 2012 than they did during 2012, our interest expense would increase, and income before taxes would decrease by \$621,000. These amounts are determined by considering the impact of the hypothetical interest rates on our borrowing cost. This analysis does not consider the effects of the reduced level of overall economic activity that could exist in such an environment. Further, in the event of a change of such magnitude, management would likely take actions to further mitigate its exposure to the change. However, due to the uncertainty of the specific actions that would be taken and their possible effects, the sensitivity analysis assumes no changes in our financial structure.

Inflation

The impact of inflation on our operations has not been significant to date. There can be no assurance that a high rate of inflation in the future would not have an adverse effect on our operations.

Recent Accounting Pronouncements

In July 2012, the FASB issued ASU 2012-02, *Testing Indefinite-Lived Intangible Assets for Impairment*. The guidance gives companies the option to first perform a qualitative assessment to determine whether it is more likely that not that an indefinite-lived intangible asset is impaired. If the qualitative assessment supports that it is more likely than not the fair value of the asset exceeds its carrying amount, the company would not be required to perform a quantitative impairment test. If the qualitative assessment does not support the fair value of the asset, then a quantitative assessment is performed. ASU 2012-02 is effective for public entities for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. This guidance is effective for the Company for the first quarter of 2013 and is not expected to have a material impact on our consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Information appearing under the caption “Market Risk and Risk Management Policies” in Item 7 is hereby incorporated by reference.

Item 8. Financial Statements and Supplementary Data

The financial statements attached hereto are filed as part of this annual report.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 of the Securities Exchange Act of 1934 (the "Exchange Act"). Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures over financial reporting were effective to ensure that material information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act to be recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal controls over financial reporting during the quarter ended December 31, 2012 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Based on our evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2012. Our internal control over financial reporting as of December 31, 2012 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in its report which appears below.

Attestation Report of the Independent Registered Public Accounting Firm

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders
Saga Communications, Inc

We have audited Saga Communications, Inc.'s internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Saga Communications, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Saga Communications, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on the COSO criteria

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Saga Communications, Inc, as of December 31, 2012 and 2011, and the consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2012 of Saga Communications Inc. and our report dated March 15, 2013 expressed an unqualified opinion thereon.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this item is incorporated by reference to the information contained in our Proxy Statement for the 2013 Annual Meeting of Stockholders to be filed not later than 120 days after the end of the Company's fiscal year. See also Item 1. Business — Executive Officers.

Item 11. Executive Compensation

The information required by this item is incorporated by reference to the information contained in our Proxy Statement for the 2013 Annual Meeting of Stockholders to be filed not later than 120 days after the end of the Company's fiscal year.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this item is incorporated by reference to the information contained in our Proxy Statement for the 2013 Annual Meeting of Stockholders to be filed not later than 120 days after the end of the Company's fiscal year. In addition, the information contained in the "Securities Authorized for Issuance Under Equity Compensation Plan Information" subheading under Item 5 of this report is incorporated by reference herein.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this item is incorporated by reference to the information contained in our Proxy Statement for the 2013 Annual Meeting of Stockholders to be filed not later than 120 days after the end of the Company's fiscal year.

Item 14. Principal Accountant Fees and Services

The information required by this item is incorporated by reference to the information contained in our Proxy Statement for the 2013 Annual Meeting of Stockholders to be filed not later than 120 days after the end of the Company's fiscal year.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) 1. Financial Statements

The following consolidated financial statements attached hereto are filed as part of this annual report:

Report of Independent Registered Public Accounting Firm

Consolidated Financial Statements:

- Consolidated Balance Sheets as of December 31, 2012 and 2011
- Consolidated Statements of Income for the years ended December 31, 2012, 2011 and 2010
- Consolidated Statements of Stockholders' Equity for the years ended December 31, 2012, 2011 and 2010
- Consolidated Statements of Cash Flows for the years ended December 31, 2012, 2011 and 2010

Notes to Consolidated Financial Statements

2. Financial Statement Schedules

Schedule II Valuation and qualifying accounts is disclosed in Note 1 to the Consolidated Financial Statements attached hereto and filed as part of this annual report. All other schedules for which provision are made in the applicable accounting regulations of the Securities and Exchange Commission are not required under the related instructions or are inapplicable and therefore have been omitted.

3. Exhibits

The Exhibits filed in response to Item 601 of Regulation S-K are listed in the Exhibit Index, which is incorporated herein by reference.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Saga Communications, Inc.

We have audited the accompanying consolidated balance sheets of Saga Communications, Inc. (the “Company”) as of December 31, 2012 and 2011, and the related consolidated statements of income, stockholders’ equity and cash flows for each of three years in the period ended December 31, 2012. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Saga Communications, Inc. at December 31, 2012 and 2011, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2012 in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Saga Communications, Inc.’s internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 15, 2013 expressed an unqualified opinion thereon.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies

Nature of Business

Saga Communications, Inc. is a broadcasting company whose business is devoted to acquiring, developing and operating broadcast properties. As of December 31, 2012 we owned or operated ninety-one radio stations, four television stations, four low-power television stations and five radio information networks serving twenty-five markets throughout the United States.

Basis of Presentation

On January 16, 2013 the Company consummated a four-for-three stock split of its Class A and Class B Common Stock, to shareholders of record as of the close of business on December 28, 2012. The stock split increased the Company's issued and outstanding shares of common stock from 3,659,753 shares of Class A Common Stock and 597,504 shares of Class B Common Stock to 4,877,323 and 796,672 shares, respectively.

All share and per share information in the accompanying financial statements have been restated retroactively to reflect the stock split. The common stock and additional paid-in capital accounts at December 31, 2012 and 2011 reflect the retroactive capitalization of the four-for-three stock split.

Principles of Consolidation

The consolidated financial statements include the accounts of Saga Communications, Inc. and our wholly-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States (GAAP) requires us to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. While we do not believe that the ultimate settlement of any amounts reported will materially affect our financial position or results of future operations, actual results may differ from estimates provided.

Concentration of Risk

Our top six markets when combined represented 44%, 44% and 45% of our net operating revenue for the years ended December 31, 2012, 2011 and 2010, respectively.

We sell advertising to local and national companies throughout the United States. We perform ongoing credit evaluations of our customers and generally do not require collateral. We maintain an allowance for doubtful accounts at a level which we believe is sufficient to cover potential credit losses.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand and time deposits with original maturities of three months or less. We did not have any time deposits at December 31, 2012 and 2011.

Financial Instruments

Our financial instruments are comprised of cash and cash equivalents, accounts receivable, accounts payable and long-term debt. The carrying value of cash and cash equivalents, accounts receivable and accounts payable approximate fair value due to their short maturities. The carrying value of long-term debt approximates fair value as it carries interest rates that either fluctuate with the euro-dollar rate, prime rate or have been reset at the prevailing market rate at December 31, 2012.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies – (continued)

Allowance for Doubtful Accounts

A provision for doubtful accounts is recorded based on our judgment of the collectability of receivables. Amounts are written off when determined to be fully uncollectible. Delinquent accounts are based on contractual terms. The activity in the allowance for doubtful accounts during the years ended December 31, 2012, 2011 and 2010 was as follows:

<u>Year Ended</u>	<u>Balance at Beginning of Period</u>	<u>Charged to Costs and Expenses</u>	<u>Write Off of Uncollectible Accounts, Net of Recoveries</u>	<u>Balance at End of Period</u>
	(In thousands)			
December 31, 2012	\$794	\$134	\$(351)	\$577
December 31, 2011	\$797	\$526	\$(529)	\$794
December 31, 2010	\$733	\$560	\$(496)	\$797

Barter Transactions

Our radio and television stations trade air time for goods and services used principally for promotional, sales and other business activities. An asset and a liability are recorded at the fair market value of goods or services received. Barter revenue is recorded when commercials are broadcast, and barter expense is recorded when goods or services are received or used.

Property and Equipment

Property and equipment are carried at cost. Expenditures for maintenance and repairs are expensed as incurred. When property and equipment is sold or otherwise disposed of, the related cost and accumulated depreciation is removed from the respective accounts and the gain or loss realized on disposition is reflected in earnings. Depreciation is provided using the straight-line method based on the estimated useful life of the assets. We review our property and equipment for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of these assets is measured by comparison of their carrying amounts to future undiscounted cash flows the assets are expected to generate. If the assets are considered to be impaired, the impairment to be recognized equals the amount by which the carrying value of the assets exceeds its fair market value. We did not record any impairment of property and equipment during 2012, 2011 and 2010.

Property and equipment consisted of the following:

	<u>Estimated Useful Life</u>	<u>December 31,</u>	
		<u>2012</u>	<u>2011</u>
		(In thousands)	
Land and land improvements	—	\$ 11,321	\$ 11,178
Buildings	31.5 years	32,367	31,741
Towers and antennae	7 – 15 years	25,687	25,582
Equipment	3 – 15 years	74,874	74,403
Furniture, fixtures and leasehold improvements	7 – 20 years	7,768	7,623
Vehicles	5 years	3,762	3,720
		<u>155,779</u>	<u>154,247</u>
Accumulated depreciation		<u>(97,317)</u>	<u>(93,625)</u>
Net property and equipment		<u>\$ 58,462</u>	<u>\$ 60,622</u>

Depreciation expense for the years ended December 31, 2012, 2011 and 2010 was \$6,805,000, \$7,053,000 and \$7,285,000, respectively.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies – (continued)

Intangible Assets

Intangible assets deemed to have indefinite useful lives, which include broadcast licenses, are not amortized and are subject to impairment tests which are conducted as of October 1 of each year, or more frequently if impairment indicators arise.

We have 97 broadcast licenses serving 25 markets, some of which are currently under renewal, while others require renewal over the period 2014-2021. In determining that the Company's broadcast licenses qualified as indefinite-lived intangible assets, management considered a variety of factors including our broadcast licenses may be renewed indefinitely at little cost; our broadcast licenses are essential to our business and we intend to renew our licenses indefinitely; we have never been denied the renewal of a FCC broadcast license nor do we believe that there will be any compelling challenge to the renewal of our broadcast licenses; and we do not believe that the technology used in broadcasting will be replaced by another technology in the foreseeable future.

Separable intangible assets that have finite lives are amortized over their useful lives using the straight-line method. Favorable lease agreements are amortized over the leases ranging from 4 to 26 years. Other intangibles are amortized over one to eleven years.

Deferred Costs

The costs related to the issuance of debt are capitalized and amortized to interest expense over the life of the debt. During the years ended December 31, 2012, 2011 and 2010, we recognized interest expense related to the amortization of debt issuance costs of \$231,000, \$642,000 and \$1,079,000, respectively. During 2011 we wrote-off unamortized debt issuance costs of \$1,326,000, pre-tax, in connection with the refinancing of our bank debt, included in Long-term obligations. See Note 4 — Long-Term Debt.

At December 31, 2012 and 2011, the net book value of deferred costs was \$793,000 and \$1,024,000, respectively, and was presented in Other intangibles, deferred costs and investments in our consolidated balance sheet.

Broadcast Program Rights

We record the capitalized costs of broadcast program rights when the license period begins and the programs are available for use. Amortization of the program rights is recorded using the straight-line method over the license period or based on the number of showings. Amortization of broadcast program rights is included in station operating expense. Unamortized broadcast program rights are classified as current or non-current based on estimated usage in future years.

Treasury Stock

We have a Stock Buy-Back Program (the "Buy-Back Program") which allows us to purchase up to \$60 million of our Class A Common Stock. As of December 31, 2012, we had remaining authorization of \$14.2 million for future repurchases of our Class A Common Stock.

Repurchases of shares of our Common Stock are recorded as Treasury Stock and result in a reduction of Stockholders' Equity. During 2012, 2011 and 2010, we acquired 2,924 shares at an average price of \$27.30 per share, 5,380 shares at an average price of \$21.71 per share and 7,288 shares at an average price of \$10.69 per share, respectively.

In March 2013, our board of directors authorized an increase in the amount committed to the Buy-Back Program from \$60 million at December 31, 2012 to \$75.8 million, with the amount available to \$30 million for future repurchases of our Class A Common Stock.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies – (continued)

Revenue Recognition

Revenue from the sale of commercial broadcast time to advertisers is recognized when commercials are broadcast. Revenue is reported net of advertising agency commissions. Agency commissions, when applicable are based on a stated percentage applied to gross billing. All revenue is recognized in accordance with the Securities and Exchange Commission's ("SEC") Staff Accounting Bulletin ("SAB") No. 104, Topic 13, *Revenue Recognition Revised and Updated* and The Accounting Standards Codification (ASC) Topic 605, *Revenue Recognition*.

Time Brokerage Agreements/Local Marketing Agreements

We have entered into Time Brokerage Agreements ("TBA's") or Local Marketing Agreements ("LMA's") in certain markets. In a typical TBA/LMA, the FCC licensee of a station makes available, for a fee, blocks of air time on its station to another party that supplies programming to be broadcast during that air time and sells its own commercial advertising announcements during the time periods specified. Revenue and expenses related to TBA's/LMA's are included in the accompanying Consolidated Statements of Income.

Advertising and Promotion Costs

Advertising and promotion costs are expensed as incurred. Such costs amounted to \$3,182,000, \$3,675,000 and \$3,562,000 for the years ended December 31, 2012, 2011 and 2010, respectively.

Income Taxes

Deferred tax assets and liabilities are determined based on temporary differences between the financial reporting and tax basis of assets and liabilities and are measured using the enacted tax rates and laws that are expected to be in effect when the differences are expected to reverse.

Stock-Based Compensation

Stock-based compensation cost for stock option awards is estimated on the date of grant using a Black-Scholes valuation model and is expensed on a straight-line method over the vesting period of the options. Stock-based compensation expense is recognized net of estimated forfeitures. The fair value of restricted stock awards is determined based on the closing market price of the Company's Class A Common Stock on the grant date and is adjusted at each reporting date based on the amount of shares ultimately expected to vest. See Note 7 — Stock-Based Compensation for further details regarding the expense calculated under the fair value based method.

Dividends

On October 2, 2012 the Company's Board of Directors declared a special cash dividend of \$1.24 per share on its Classes A and B Common Stock. This dividend totaling \$7.0 million was paid on December 3, 2012 to shareholders of record on November 15, 2012. No dividends were declared by the Company in 2011 or 2010.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies – (continued)

Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share:

	Years Ended December 31,		
	2012	2011	2010
	(In thousands, except per share data)		
Numerator:			
Net income available to common stockholders	\$17,925	\$12,631	\$15,136
Denominator:			
Denominator for basic earnings per share-weighted average shares	5,659	5,651	5,640
Effect of dilutive securities:			
Stock options	13	5	1
Denominator for diluted earnings per share – adjusted weighted-average shares and assumed conversions	5,672	5,656	5,641
Basic earnings per share	\$ 3.17	\$ 2.24	\$ 2.68
Diluted earnings per share	\$ 3.16	\$ 2.23	\$ 2.68

Potentially dilutive common shares primarily consist of employee stock options. Employee stock options to purchase approximately 93,000, 304,000 and 392,000 shares of our stock were outstanding at December 31, 2012, 2011 and 2010, respectively, but were not included in the computation of diluted earnings per share because the effect would have been antidilutive as the options' exercise prices exceeded the average market price. The actual effect of these shares, if any, on the diluted earnings per share calculation will vary significantly depending on fluctuations in the stock price.

Recent Accounting Pronouncements

In July 2012, the FASB issued ASU 2012-02, *Testing Indefinite-Lived Intangible Assets for Impairment*. The guidance gives companies the option to first perform a qualitative assessment to determine whether it is more likely that not that an indefinite-lived intangible asset is impaired. If the qualitative assessment supports that it is more likely than not the fair value of the asset exceeds its carrying amount, the company would not be required to perform a quantitative impairment test. If the qualitative assessment does not support the fair value of the asset, then a quantitative assessment is performed. ASU 2012-02 is effective for public entities for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. This guidance is effective for the Company for the first quarter of 2013 and is not expected to have a material impact on our consolidated financial statements.

2. Broadcast Licenses and Other Intangibles Assets

Broadcast Licenses

We evaluate our FCC licenses for impairment annually or more frequently if events or changes in circumstances indicate that the asset might be impaired. FCC licenses are evaluated for impairment at the market level using a direct method. If the carrying amount of FCC licenses is greater than their estimated fair value in a given market, the carrying amount of FCC licenses in that market is reduced to its estimated fair value.

We operate our broadcast licenses in each market as a single asset and determine the fair value by relying on a discounted cash flow approach assuming a start-up scenario in which the only assets held by an investor are broadcast licenses. The fair value calculation contains assumptions incorporating variables that are based on past experiences and judgments about future operating performance using industry normalized

Saga Communications, Inc.

Notes to Consolidated Financial Statements

2. Broadcast Licenses and Other Intangibles Assets – (continued)

information for an average station within a market. These variables include, but are not limited to: (1) the forecasted growth rate of each radio or television market, including population, household income, retail sales and other expenditures that would influence advertising expenditures; (2) the estimated available advertising revenue within the market and the related market share and profit margin of an average station within a market; (3) estimated capital start-up costs and losses incurred during the early years; (4) risk-adjusted discount rate; (5) the likely media competition within the market area; and (6) terminal values.

We have recorded the changes to broadcast licenses for the years ended December 31, 2012 as follows:

	<u>Radio</u>	<u>Television</u>	<u>Total</u>
		(In thousands)	
Balance at January 1, 2012	\$80,768	\$9,588	\$90,356
Acquisitions	5	—	5
Balance at December 31, 2012	<u>\$80,773</u>	<u>\$9,588</u>	<u>\$90,361</u>

There were no changes to broadcast licenses for the year ended December 31, 2011.

2012 Impairment Test

We completed our annual impairment test of broadcast licenses during the fourth quarter of 2012 and determined that the fair value of the broadcast licenses was greater than the carrying value recorded for each of our markets and, accordingly, no impairment was recorded.

The following table reflects certain key estimates and assumptions used in the impairment test in the fourth quarter of 2012. The ranges for operating profit margin and market long-term revenue growth rates vary based on our specific markets. In general, when comparing between 2012 and 2011: (1) the market specific operating profit margin range remained consistent; (2) the market long-term revenue growth rates were relatively consistent; (3) the discount rate remained consistent; and (4) current year revenues were 4.6% higher than previously projected for 2012.

	<u>Fourth Quarter 2012</u>	<u>Fourth Quarter 2011</u>
Discount rates	12.0% – 12.2%	11.9% – 12.2%
Operating profit margin ranges	17.4% – 35.8%	17.4% – 35.8%
Market long-term revenue growth rates	1.75% – 3.1%	2.0% – 3.0%

If actual market conditions are less favorable than those estimated by us or if events occur or circumstances change that would reduce the fair value of our broadcast licenses below the carrying value, we may be required to recognize additional impairment charges in future periods. Such a charge could have a material effect on our consolidated financial statements.

2011 Impairment Test

During the fourth quarter of 2011, we completed our annual impairment test of broadcast licenses and determined that the fair value of the broadcast licenses was greater than the carrying value recorded for each of our markets and, accordingly, no impairment was recorded.

2010 Impairment Test

During the fourth quarter of 2010, we completed our annual impairment test of broadcast licenses and determined that the fair value of the broadcast licenses was greater than the carrying value recorded for each of our markets and, accordingly, no impairment was recorded.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

2. Broadcast Licenses and Other Intangibles Assets – (continued)

Other Intangible Assets

We evaluate amortizable intangible assets for recoverability when circumstances indicate impairment may have occurred, using an undiscounted cash flow methodology. If the future undiscounted cash flows for the intangible asset are less than net book value, then the net book value is reduced to the estimated fair value.

We have recorded amortizable intangible assets at December 31, 2012 as follows:

	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>	<u>Net Amount</u>
		(In thousands)	
Non-competition agreements	\$ 4,511	\$ 4,511	\$ —
Favorable lease agreements	5,862	5,540	322
Other intangibles	<u>1,731</u>	<u>1,577</u>	<u>154</u>
Total amortizable intangible assets	<u>\$12,104</u>	<u>\$11,628</u>	<u>\$476</u>

We have recorded amortizable intangible assets at December 31, 2011 as follows:

	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>	<u>Net Amount</u>
		(In thousands)	
Non-competition agreements	\$ 4,511	\$ 4,511	\$ —
Favorable lease agreements	5,862	5,504	358
Other intangibles	<u>1,716</u>	<u>1,562</u>	<u>154</u>
Total amortizable intangible assets	<u>\$12,089</u>	<u>\$11,577</u>	<u>\$512</u>

Aggregate amortization expense for these intangible assets for the years ended December 31, 2012, 2011 and 2010, was \$51,000, \$50,000 and \$49,000, respectively. Our estimated annual amortization expense for the years ending December 31, 2013, 2014, 2015, 2016 and 2017 is \$52,000, \$52,000, \$38,000, \$37,000 and \$37,000, respectively.

3. Discontinued Operations

On April 3, 2012 we entered into a definitive agreement to sell our Greenville, Mississippi TV station (“WXVT”) for \$3 million, subject to certain adjustments, to H3 Communications, LLC (“H3”). This transaction was completed on January 31, 2013 and we recognized a gain of approximately \$200,000, net of tax, on the sale of WXVT during the first quarter of 2013.

In accordance with authoritative guidance we have reported the results of operations of WXVT as discontinued operations in the accompanying consolidated financial statements. For all previously reported periods, certain amounts in the consolidated financial statement have been reclassified. The assets and liabilities of WXVT have been classified as held for sale and the net results of operations have been reclassified from continuing operations to discontinued operations. WXVT was previously included in the Company’s television segment.

2015	—
2016	57,750
2017	—
Thereafter	—
	\$58,828

On June 13, 2011, we entered into a new credit facility with a group of banks, to refinance our outstanding debt under our old credit agreement (the “Old Credit Agreement”). We wrote off unamortized debt issuance costs relating to the Old Credit Agreement of approximately \$1.3 million, pre-tax, due to this refinancing during the quarter ended June 30, 2011.

Our credit facility, providing availability up to \$117.8 million at December 31, 2012 (the “Credit Facility”) consists of a \$57.8 million term loan (the “Term Loan”) and a \$60 million revolving loan (the “Revolving Credit Facility”) and matures on June 13, 2016. An additional \$40 million financing may, in the future, be made available to the Company subject to compliance with terms and conditions of the Credit Facility.

We had \$60 million of unused borrowing capacity under the Revolving Credit Facility at December 31, 2012. The unused portion of the Revolving Credit Facility is available for general corporate purposes, including working capital, capital expenditures, permitted acquisitions and related transaction expenses and permitted stock buybacks.

The Term Loan principal amortizes in equal installments of 5% of the Term Loan during each year, however, upon satisfaction of certain conditions, as defined in the Credit Facility, no amortization payment is required. The Credit Facility is also subject to mandatory prepayment requirements, including but not limited to, certain sales of assets, certain insurance proceeds, certain debt issuances and certain sales of equity. Optional prepayments of the Credit Facility are permitted without any premium or penalty, other than certain costs and expenses. As of December 31, 2012, we have no required amortization payment.

Interest rates under the Credit Facility are payable, at our option, at alternatives equal to LIBOR (0.2117% at December 31, 2012) plus 1.50% to 2.75% or the base rate plus 0.50% to 1.75%. The spread over LIBOR and the base rate vary from time to time, depending upon our financial leverage. We also pay quarterly commitment fees of 0.25% to 0.375% per annum on the unused portion of the Revolving Credit Facility.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

4. Long-Term Debt – (continued)

We have pledged substantially all of our assets (excluding our FCC licenses and certain other assets) in support of the Credit Facility and each of our subsidiaries has guaranteed the Credit Facility and has pledged substantially all of their assets (excluding their FCC licenses and certain other assets) in support of the Credit Facility.

The Credit Facility contains a number of financial covenants (all of which we were in compliance with at December 31, 2012) which, among other things, require us to maintain specified financial ratios and impose certain limitations on us with respect to investments, additional indebtedness, dividends, distributions, guarantees, liens and encumbrances.

5. Supplemental Cash Flow Information

	Years Ended December 31,		
	2012	2011	2010
	(In thousands)		
Cash paid during the period for:			
Interest	\$1,559	\$2,788	\$4,504
Income taxes	\$6,999	\$3,202	\$4,664
Non-cash transactions:			
Barter revenue	\$4,188	\$4,369	\$4,554
Barter expense	\$3,894	\$4,138	\$4,541
Acquisition of property and equipment	\$ 99	\$ 286	\$ 137

6. Income Taxes

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax liabilities and assets are as follows:

	December 31,	
	2012	2011
	(In thousands)	
Deferred tax liabilities:		
Property and equipment	\$ 9,205	\$ 9,766
Intangible assets	10,437	5,538
Prepaid expenses	616	439
Total deferred tax liabilities	20,258	15,743
Deferred tax assets:		
Allowance for doubtful accounts	233	319
Compensation	3,195	3,060
Other accrued liabilities	76	150
Loss carry forwards	58	92
	3,562	3,621
Less: valuation allowance	58	92
Total net deferred tax assets	3,504	3,529
Net deferred tax liabilities	\$ 16,754	\$ 12,214

Non-current portion of deferred tax liabilities	(17,646)	(13,383)
Net deferred tax liabilities	\$(16,754)	\$(12,214)

Saga Communications, Inc.

Notes to Consolidated Financial Statements

6. Income Taxes – (continued)

At December 31, 2012, we have state and local tax loss carry forwards of approximately \$1,334,000, which will expire from 2013 to 2023. During 2012, we utilized approximately \$708,000 in state and local tax loss carry forwards, approximately \$67,000 in state and local tax loss carry forwards expired and accordingly, the valuation allowances decreased by \$34,000. At December 31, 2012, the valuation allowance for net deferred tax assets relates to state loss carry forwards. Deferred tax assets are required to be reduced by a valuation allowance if it is more likely than not that some portion or all of the deferred tax asset will not be realized.

At December 31, 2012 and 2011, net deferred tax liabilities include a deferred tax asset of \$1,199,000 and \$1,236,000, respectively, relating to stock-based compensation expense. Full realization of this deferred tax asset requires stock options to be exercised at a price equaling or exceeding the sum of the grant price plus the fair value of the option at the grant date and restricted stock to vest at a price equaling or exceeding the fair market value at the grant date. Accounting guidance, however, does not allow a valuation allowance to be recorded unless the company's future taxable income is expected to be insufficient to recover the asset. Accordingly, there can be no assurance that the price of the Company's common stock will increase to levels sufficient to realize the entire tax benefit currently reflected in the balance sheet at December 31, 2012 and 2011. See Note 7 — Stock-Based Compensation for further discussion of stock-based compensation expense.

The significant components of the provision for income taxes are as follows:

	Years Ended December 31,		
	2012	2011	2010
	(In thousands)		
Current:			
Federal	\$ 6,160	\$1,820	\$ 4,320
State	1,150	510	1,000
Total current	7,310	2,330	5,320
Total deferred.	4,540	6,100	5,080
	<u>\$11,850</u>	<u>\$8,430</u>	<u>\$10,400</u>
Taxes are allocated as follows:			
Continuing operations	\$11,939	\$8,604	\$10,619
Discontinued operations	(89)	(174)	(219)
	<u>\$11,850</u>	<u>\$8,430</u>	<u>\$10,400</u>

In addition, we recognized tax expense of \$25,000, \$0 and \$0 as a result of stock option exercises for the difference between compensation expense for financial statement and income tax purposes for the years ended December 31, 2012, 2011 and 2010, respectively.

The reconciliation of income tax at the U.S. federal statutory tax rates to income tax expense (benefit) is as follows:

	Years Ended December 31,		
	2012	2011	2010
	(In thousands)		
Tax expense at U.S. statutory rates	\$10,486	\$7,260	\$ 8,875
State tax expense, net of federal benefit	1,356	1,116	1,523
Other, net	42	69	164
Change in valuation allowance on loss carry forwards	(34)	(15)	(162)
	\$11,850	\$8,430	\$10,400
Discontinued operations.	89	174	219
	<u>\$11,939</u>	<u>\$8,604</u>	<u>\$10,619</u>

Saga Communications, Inc.

Notes to Consolidated Financial Statements

6. Income Taxes – (continued)

The Company files income taxes in the U.S. federal jurisdiction, and in various state and local jurisdictions. The Company is no longer subject to U.S. federal examinations by the Internal Revenue Service (IRS) for years prior to 2007. During the first quarter of 2012, the IRS commenced an examination of the Company's 2010 U.S. federal income tax return which was completed in the third quarter of 2012 and resulted in no changes to the return. The Company is subject to examination for income and non-income tax filings in various states.

Included in the balance sheets at December 31, 2012 and 2011 are tax accruals of approximately \$16,000 and \$56,000, respectively for uncertain tax positions. Recognition of any of the related unrecognized tax benefits would affect the Company's effective tax rate.

We classify income tax-related interest and penalties as interest expense and corporate general and administrative expense, respectively. For the years ended December 31, 2012 and 2011, we had no tax-related interest or penalties and had \$0 and \$13,000 accrued at December 31, 2012 and 2011, respectively.

In March 2012, the Compensation Committee recommended, and the Board approved, a \$350,000 discretionary bonus to the CEO for the year ended December 31, 2011. As a result of the CEO's total gross compensation, approximately \$177,000 was nondeductible pursuant to Section 162(m) of the Internal Revenue Code of 1986, as amended.

7. Stock-Based Compensation

2005 Incentive Compensation Plan

On May 10, 2010, our stockholders approved the Amended and Restated 2005 Incentive Compensation Plan (the "2005 Plan") which replaced our 2003 Stock Option Plan (the "2003 Plan") as to future grants. The 2005 Plan extends through March 2015 and allows for the granting of restricted stock, restricted stock units, incentive stock options, nonqualified stock options, and performance awards to officers and a selected number of employees. The number of shares of Common Stock that may be issued under the 2005 Plan may not exceed 500,000 shares of Class B Common Stock, 1,500,000 shares of Class A Common Stock of which up to 500,000 shares of Class A Common Stock may be issued pursuant to incentive stock options and 500,000 Class A Common Stock issuable upon conversion of Class B Common Stock. Awards denominated in Class A Common Stock may be granted to any employee under the 2005 Plan. However, awards denominated in Class B Common Stock may only be granted to Edward K. Christian, President, Chief Executive Officer, Chairman of the Board of Directors, and the holder of 100% of the outstanding Class B Common Stock of the Company. Stock options granted under the 2005 Plan may be for terms not exceeding ten years from the date of grant and may not be exercised at a price which is less than 100% of the fair market value of shares at the date of grant.

Stock-Based Compensation

The Company's stock-based compensation expense is measured and recognized for all stock-based awards to employees using the estimated fair value of the award. Compensation expense is recognized over the period during which an employee is required to provide service in exchange for the award. For these awards, we have recognized compensation expense using a straight-line amortization method. Accounting guidance requires that stock-based compensation expense be based on awards that are ultimately expected to vest, therefore stock-based compensation has been adjusted for estimated forfeitures. When estimating forfeitures, we consider voluntary termination behaviors as well as trends of actual option forfeitures. For the years ended December 31, 2012, 2011 and 2010, we had \$22,000, \$196,000 and \$567,000, respectively, of total compensation expense related to stock options. This expense is included in corporate general and administrative expense of our results of operations. The associated future income tax benefit recognized for the years ended December 31, 2012, 2011 and 2010 was \$9,000, \$80,000 and \$231,000, respectively.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

7. Stock-Based Compensation – (continued)

We calculated the fair value of each option award on the date of grant using the Black-Scholes option pricing model. The estimated expected volatility, expected term of options and estimated annual forfeiture rate were determined based on historical experience of similar awards, giving consideration to the contractual terms of the stock-based awards, vesting schedules and expectations of future employee behavior. The risk-free interest rate was based on the U.S. Treasury yield curve in effect at the time of grant.

The following summarizes the stock option transactions for the 2005 and 2003 Plans and the 1992 Stock Option Plan (the “1992 Plan”) for the year ended December 31:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at January 1, 2010	517,905	\$40.92		
Granted	—	—		
Exercised	—	—		
Forfeited/canceled/expired	(125,957)	47.61		
Outstanding at December 31, 2010	<u>391,948</u>	<u>\$38.78</u>	<u>3.9</u>	<u>\$ —</u>
Granted	—	—		
Exercised	—	—		
Forfeited/canceled/expired	(88,316)	43.50		
Outstanding at December 31, 2011	<u>303,632</u>	<u>\$37.40</u>	<u>3.6</u>	<u>\$ 135,886</u>
Granted	—	—		
Exercised	(9,796)	27.26		
Forfeited/canceled/expired	(33,176)	61.69		
Outstanding at December 31, 2012	<u>260,660</u>	<u>\$34.69</u>	<u>3.0</u>	<u>\$1,253,039</u>
Vested and Exercisable at December 31, 2012.	<u>260,660</u>	<u>\$34.69</u>	<u>3.0</u>	<u>\$1,253,039</u>

The total intrinsic value of stock options exercised during the year ended December 31, 2012 was \$72,200. Cash received from stock options exercised during the year ended December 31, 2012 was \$287,600. No options were exercised during the years ended December 31, 2011 and 2010.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

7. Stock-Based Compensation – (continued)

The following summarizes the non-vested stock option transactions for the 2005, 2003 and 1992 Plans for the year ended December 31:

	<u>Number of Options</u>	<u>Weighted Average Grant Date Fair Value</u>
Non-vested at January 1, 2010	107,270	\$14.81
Granted	—	—
Vested	(55,537)	15.66
Forfeited/canceled/expired	<u>(4,860)</u>	<u>13.94</u>
Non-vested at December 31, 2010	46,873	\$13.88
Granted	—	—
Vested	(37,150)	13.73
Forfeited/canceled/expired	<u>(440)</u>	<u>14.48</u>

Vested	(9,283)	14.48
Forfeited/canceled/expired	<u>—</u>	<u>—</u>
Non-vested at December 31, 2012	<u>—</u>	<u>\$ —</u>

The following summarizes the restricted stock transactions for the year ended December 31:

	<u>Shares</u>	<u>Weighted Average Grant Date Fair Value</u>
Outstanding at January 1, 2010	49,824	\$23.59
Granted	—	—
Vested	(18,792)	26.94
Forfeited/canceled/expired	<u>(2,868)</u>	<u>21.64</u>
Outstanding at December 31, 2010	28,164	\$21.55
Granted	—	—
Vested	(14,187)	23.46
Forfeited/canceled/expired	<u>(765)</u>	<u>19.32</u>
Outstanding at December 31, 2011	13,212	\$19.61
Granted	—	—
Vested	(7,641)	20.82
Forfeited/canceled/expired	<u>(40)</u>	<u>17.97</u>
Non-vested and outstanding at December 31, 2012	<u>5,531</u>	<u>\$17.97</u>
Weighted average remaining contractual life (in years)5	

The weighted average grant date fair value of restricted stock that vested during 2012, 2011 and 2010 was \$159,000, \$333,000 and \$506,000, respectively. The net value of unrecognized compensation cost related to unvested restricted stock awards aggregated \$16,000, \$127,000 and \$329,000 at December 31, 2012, 2011 and 2010, respectively.

For the years ended December 31, 2012, 2011 and 2010 we had \$110,000, \$187,000 and \$360,000, respectively, of total compensation expense related to restricted stock-based arrangements. The expense is included in corporate general and administrative expenses in our results of operations. The associated tax benefit recognized for the years ended December 31, 2012, 2011 and 2010 was \$45,000, \$77,000 and \$147,000, respectively.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

8. Employee Benefit Plans

401(k) Plan

We have a defined contribution pension plan (“401(k) Plan”) that covers substantially all employees. Employees can elect to have a portion of their wages withheld and contributed to the plan. The 401(k) Plan also allows us to make a discretionary contribution. Total administrative expense under the 401(k) Plan was \$12,000, \$16,000 and \$23,000 in 2012, 2011 and 2010, respectively. The Company’s discretionary contribution to the plan was approximately \$230,000 for the year ended December 31, 2012. The Company did not make a discretionary contribution to the 401(k) Plan for the years ended December 31, 2011 or 2010.

Deferred Compensation Plan

In 1999 we established a Nonqualified Deferred Compensation Plan which allows officers and certain management employees to annually elect to defer a portion of their compensation, on a pre-tax basis, until their retirement. The retirement benefit to be provided is based on the amount of compensation deferred and any earnings thereon. Deferred compensation expense for the years ended December 31, 2012, 2011 and 2010 was \$126,000, \$141,000 and \$218,000, respectively. We invest in company-owned life insurance policies to assist in funding these programs. The cash surrender values of these policies are in a rabbi trust and are recorded as our assets.

Split Dollar Officer Life Insurance

The Company provides split dollar insurance benefits to certain executive officers and records an asset equal to the cumulative premiums paid on the related policies, as the Company will fully recover these premiums under the terms of the plan. The Company retains a collateral assignment of the cash surrender values and policy death benefits payable to insure recovery of these premiums.

9. Related Party Transactions

Principal Stockholder Employment Agreement

In June 2011, we entered into a new employment agreement with Edward K. Christian, Chairman, President and CEO, which became effective as of June 1, 2011, and replaces and supersedes his prior employment agreement. The new employment agreement terminates on March 31, 2018. The agreement provides for an annual base salary of \$860,000 (subject to annual increases on each anniversary date not less than the greater of 3% or a defined cost of living increase). Mr. Christian may defer any or all of his annual salary.

Under the agreement, Mr. Christian is eligible for discretionary and performance bonuses, stock options and/or stock grants in amounts determined by the Compensation Committee and will continue to participate in the Company’s benefit plans. The Company will maintain insurance policies, will furnish an automobile, will pay for an executive medical plan and will maintain an office for Mr. Christian at its principal executive offices and in Sarasota County, Florida. The agreement provides certain payments to Mr. Christian in the event of his disability, death or a change in control. Upon a change in control, Mr. Christian may terminate his employment. The agreement also provides generally that, upon a change in control, the Company will pay Mr. Christian an amount equal to 2.99 times the average of his total annual salary and bonuses for each of the three immediately preceding periods of twelve consecutive months, plus an additional amount for tax liabilities, related to the payment. For the three years ended December 31, 2012 his average annual compensation, as defined by the employment agreement was approximately \$1,185,000.

In addition, if Mr. Christian’s employment is terminated for any reason, other than for cause, the Company will continue to provide health insurance and medical reimbursement and maintain existing life insurance policies for a period of ten years, and the current split dollar life insurance policy shall be transferred to Mr. Christian and his wife, and the Company shall reimburse Mr. Christian for any tax consequences of such transfer. The agreement contains a covenant not to compete restricting Mr. Christian from competing with the Company in any of its markets if he voluntarily terminates his employment with the Company or is terminated for cause, for a three year period thereafter.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

9. Related Party Transactions – (continued)

On December 15, 2010, Mr. Christian agreed to defer approximately \$134,000 of his 2011 salary to be paid 100% on January 20, 2012. On December 19, 2011, Mr. Christian agreed to defer approximately \$100,000 of his 2012 salary to be paid 100% on January 25, 2013. On December 27, 2012, Mr. Christian agreed to defer approximately \$100,000 of his 2013 salary to be paid 100% on January 10, 2014.

Change in Control Agreements

In December 2007, Samuel D. Bush, Senior Vice President and Chief Financial Officer, Steven J. Goldstein, Executive Vice President and Group Program Director, Warren S. Lada, Executive Vice President of Operations and Marcia K. Lobaito, Senior Vice President, Corporate Secretary and Director of Business Affairs, entered into Change in Control Agreements. A change in control is defined to mean the occurrence of (a) any person or group becoming the beneficial owner, directly or indirectly, of more than 30% of the combined voting power of the Company's then outstanding securities and Mr. Christian ceasing to be Chairman and CEO of the Company; (b) the consummation of a merger or consolidation of the Company with any other corporation, other than a merger or consolidation which results in the voting securities of the Company outstanding immediately prior thereto continuing to represent more than 50% of the combined voting securities of the Company or such surviving entity; or (c) the approval of the stockholders of the Company of a plan of complete liquidation of the Company or an agreement for the sale or disposition by the Company of all or substantially all of its assets.

If there is a change in control, the Company shall pay a lump sum payment within 45 days thereof of 1.5 times the average of the executive's last three full calendar years of such executive's base salary and any annual cash bonus paid. In the event that such payment constitutes a "parachute payment" within the meaning of Section 280G subject to an excise tax imposed by Section 4999 of the Internal Revenue Code, the Company shall pay the executive an additional amount so that the executive will receive the entire amount of the lump sum payment before deduction for federal, state and local income tax and payroll tax. In the event of a change in control (other than the approval of plan of liquidation), the Company or the surviving entity may require as a condition to receipt of payment that the executive continue in employment for a period of up to six months after consummation of the change in control. During such six months, executive will continue to earn his pre-existing salary and benefits. In such case, the executive shall be paid the lump sum payment upon completion of the continued employment. If, however, the executive fails to remain employed during this period of continued employment for any reason other than (a) termination without cause by the Company or the surviving entity, (b) death, (c) disability or (d) breach of the agreement by the Company or the surviving entity, then executive shall not be paid the lump sum payment. In addition, if the executive's employment is terminated by the Company without cause within six months prior to the consummation of a change in control, then the executive shall be paid the lump sum payment within 45 days of such change in control.

Transactions with Affiliate and Other Related Party Transactions

Surtsey Media, LLC ("Surtsey Media") owns the assets of television station KVCT in Victoria, Texas. Surtsey Media is a multi-media company 100%-owned by the daughter of Mr. Christian, our President, Chief Executive Officer and Chairman. We operate KVCT under a Time Brokerage Agreement ("TBA") with Surtsey Media which we entered into in May 1999. Under the FCC's ownership rules, we are prohibited from owning or having an attributable or cognizable interest in this station. Under the TBA, during 2012, 2011 and 2010, we paid Surtsey Media fees of approximately \$3,100 per month plus accounting fees and reimbursement of expenses actually incurred in operating the station. In January 2012, the TBA was amended. Pursuant to the amendment, (i) the term is extended nine years commencing from June 1, 2013, with rights to extend for two additional eight year terms, (ii) we paid Surtsey Media an extension fee of \$27,950 upon execution of the amendment, (iii) the monthly fees, payable to Surtsey Media are increased for each extension period, and (iv) we have an exclusive option, while the TBA is in effect, to purchase all of the assets of station KVCT, subject to certain conditions, based on a formula.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

9. Related Party Transactions – (continued)

In March 2003, we entered into an agreement of understanding with Surtsey Media whereby we have guaranteed up to \$1,250,000 of the debt incurred, in closing the acquisition of a construction permit for KFJX-TV station in Pittsburg, Kansas, a full power Fox affiliate serving Joplin, Missouri. At December 31, 2012, there was \$1,078,000 of debt outstanding under this agreement. We do not have any recourse provision in connection with our guarantee that would enable us to recover any amounts paid under the guarantee. As a result, at December 31, 2012, we have recorded \$1,078,000 in debt and \$1,000,000 in intangible assets, primarily broadcast licenses. In consideration for the guarantee, Surtsey Media entered into various agreements with us relating to the station, including a Shared Services Agreement, Technical Services Agreement, and Agreement for the Sale of Commercial Time and Broker Agreement (the “Station Agreements”). We paid fees under the agreements during 2012, 2011 and 2010 of approximately \$4,100 per month plus accounting fees and reimbursement of expenses actually incurred in operating the station. We generally prepay Surtsey quarterly for its estimated expenses. The station went on the air for the first time on October 18, 2003. Under the FCC’s ownership rules we are prohibited from owning or having an attributable or cognizable interest in this station. In January 2012, the Station Agreements were amended. Pursuant to the amendment, (i) the Broker Agreement and the Technical Services Agreement are terminated, (ii) the terms of the continuing Station Agreements are extended nine years commencing from June 1, 2013, with rights to extend for two additional eight year terms, (iii) we paid Surtsey Media \$37,050 upon execution of the amendment, (iv) the monthly fees payable to Surtsey Media were increased for each extension period, and (v) we have an exclusive option, while the Agreement for the Sale of Commercial Time and Shared Services Agreement are in effect, to purchase all of the assets of Station KFJX subject to certain conditions, based on a formula, together with a payment of \$1.2 million.

Surtsey Productions, Inc., the parent company of Surtsey Media, leases office space in a building owned by us, and paid us rent of \$10,000, \$10,000 and \$18,000 during the years ended December 31, 2012, 2011 and 2010, respectively.

In February 2012, we sold a used vehicle to the daughter of Mr. Christian. The vehicle was sold at its fair market value of \$38,000.

10. Common Stock

Dividends. Stockholders are entitled to receive such dividends as may be declared by our Board of Directors out of funds legally available for such purpose. However, no dividend may be declared or paid in cash or property on any share of any class of Common Stock unless simultaneously the same dividend is declared or paid on each share of the other class of common stock. In the case of any stock dividend, holders of Class A Common Stock are entitled to receive the same percentage dividend (payable in shares of Class A Common Stock) as the holders of Class B Common Stock receive (payable in shares of Class B Common Stock).

Voting Rights. Holders of shares of Common Stock vote as a single class on all matters submitted to a vote of the stockholders, with each share of Class A Common Stock entitled to one vote and each share of Class B Common Stock entitled to ten votes, except (i) in the election for directors, (ii) with respect to any “going private” transaction between the Company and the principal stockholder, and (iii) as otherwise provided by law.

In the election of directors, the holders of Class A Common Stock, voting as a separate class, are entitled to elect twenty-five percent, or two, of our directors. The holders of the Common Stock, voting as a single class with each share of Class A Common Stock entitled to one vote and each share of Class B Common Stock entitled to ten votes, are entitled to elect the remaining directors. The Board of Directors consisted of five members at December 31, 2012. Holders of Common Stock are not entitled to cumulative voting in the election of directors.

The holders of the Common Stock vote as a single class with respect to any proposed “going private” transaction with the principal stockholder or an affiliate of the principal stockholder, with each share of each class of Common Stock entitled to one vote per share.

Saga Communications, Inc.

Notes to Consolidated Financial Statements

10. Common Stock – (continued)

Under Delaware law, the affirmative vote of the holders of a majority of the outstanding shares of any class of common stock is required to approve, among other things, a change in the designations, preferences and limitations of the shares of such class of common stock.

Liquidation Rights. Upon our liquidation, dissolution, or winding-up, the holders of Class A Common Stock are entitled to share ratably with the holders of Class B Common Stock in accordance with the number of shares held in all assets available for distribution after payment in full of creditors.

In any merger, consolidation, or business combination, the consideration to be received per share by the holders of Class A Common Stock and Class B Common Stock must be identical for each class of stock, except that in any such transaction in which shares of common stock are to be distributed, such shares may differ as to voting rights to the extent that voting rights now differ among the Class A Common Stock and the Class B Common Stock.

Other Provisions. Each share of Class B Common Stock is convertible, at the option of its holder, into one share of Class A Common Stock at any time. One share of Class B Common Stock converts automatically into one share of Class A Common Stock upon its sale or other transfer to a party unaffiliated with the principal stockholder or, in the event of a transfer to an affiliated party, upon the death of the transferor.

11. Commitments and Contingencies

Leases

We lease certain land, buildings and equipment under noncancellable operating leases. Rent expense for the year ended December 31, 2012 was \$1,400,000 (\$1,511,000 and \$1,608,000 for the years ended December 31, 2011 and 2010, respectively).

Minimum annual rental commitments under noncancellable operating leases consisted of the following at December 31, 2012 (in thousands):

2013	\$1,216
2014	721
2015	582
2016	446
2017	283
Thereafter	<u>2,929</u>
	<u>\$6,177</u>

Broadcast Program Rights

We have entered into contracts for broadcast program rights that expire at various dates during the next five years. The aggregate minimum payments relating to these commitments consisted of the following at December 31, 2012 (in thousands):

2013	\$ 616
2014	507
2015	255
2016	37
2017	33
Thereafter	<u>21</u>
	\$1,469
Amounts due within one year (included in accounts payable)	<u>616</u>
	<u>\$ 853</u>

Saga Communications, Inc.

Notes to Consolidated Financial Statements

11. Commitments and Contingencies – (continued)

Contingencies

In 2003, in connection with our acquisition of one FM radio station, WJZK-FM serving the Columbus, Ohio market, we entered into an agreement whereby we would pay the seller up to an additional \$1,000,000 if we obtain approval from the FCC for a city of license change.

12. Fair Value Measurements

Fair value is defined as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. To increase the comparability of fair value measures, the following hierarchy prioritizes the inputs to valuation methodologies used to measure fair value:

Level 1 — Quoted prices in active markets for identical assets or liabilities.

Level 2 — Observable inputs other than quoted prices in active markets for identical assets and liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.

Level 3 — Unobservable inputs in which there is little or no market data available, which requires management to develop its own assumptions in pricing the asset or liability.

We measure the fair value of time deposits based on quoted market prices of similar assets and other significant inputs derived from or corroborated by observable market data and are considered a level 2.

Interest on the Credit Facility is at a variable rate, and as such the debt obligation outstanding approximates fair value and is considered a level 2.

Non-Recurring Fair Value Measurements

The Company has certain assets that are measured at fair value on a non-recurring basis under the circumstances and events described in Note 2 — Broadcast Licenses and Other Intangibles, and are adjusted to fair value only when the carrying values are more than the fair values. The categorization of the framework used to price the assets is considered a level 3, due to the subjective nature of the unobservable inputs used to determine the fair value. (See Note 2 for the disclosure of certain key assumptions used to develop the unobservable inputs.)

In 2012, 2011 and 2010 the Company reviewed the fair value of its broadcasting licenses, net property and equipment and other intangibles, and concluded that these assets were not impaired as the fair value of these assets equaled or exceeded their carrying values. As such, no non-recurring fair value measures were utilized in the aforementioned periods.

13. Segment Information

We evaluate the operating performance of our markets individually. For purposes of business segment reporting, we have aligned operations with similar characteristics into two business segments: Radio and Television.

The Radio segment includes twenty-three markets, which includes all ninety-one of our radio stations and five radio information networks. The Television segment includes two markets and consists of four television stations and four low power television (“LPTV”) stations. The Radio and Television segments derive their revenue from the sale of commercial broadcast inventory. The category “Corporate general and administrative” represents the income and expense not allocated to reportable segments.

PUBLICATIONS

The Company's Annual Report Form 10-K and Quarterly Reports to Stockholders are available free of charge to stockholders. Inquiries are welcome by letter or telephone to Samuel D. Bush, Senior Vice President, Treasurer and CFO, at the Saga Corporate Office.

Stockholders whose stock is held in street name are encouraged to write to the company to have their names placed on the financial mailing list, enabling them to receive annual and interim reports without delay.

You may find more information about us at our Internet website located at www.sagacommunications.com. Our Annual report on Form 10-K, our Quarterly Reports on Form 10-Q, our current reports on Form 8-K and any amendments to those reports are available free of charge on our Internet website as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC.

ANNUAL MEETING

The Annual Meeting of Stockholders will be held on Monday, May 13, 2013 at 9:00 am Eastern Daylight Time, at the Company's corporate offices at 73 Kercheval Avenue, Grosse Pointe Farms, MI.

This press release contains forward-looking statements that are based upon current expectations and involve certain risks and uncertainties within the meaning of the U.S. Private Securities Litigation Reform act of 1995. Words such as "believes", "expects", "anticipates" and other similar expressions are intended to identify forwardlooking statements. Key risks are described in the reports Saga Communications, Inc. periodically files with the U.S. Securities and Exchange Commission. Readers should note that these statements may be impacted by several factors, including economic changes in the radio and television broadcast industry in general, as well as Saga's actual performance. Results may vary from those stated herein and Saga undertakes no obligation to update the information contained herein.
