Masseyes St.

Fiscal 2013 was a significant year for Krispy Kreme, as we further demonstrated the strength of our business model and laid the foundation for many years of growth. Our collective efforts have resulted in an impressive list of successes.

- · Systemwide sales increased over 8% to almost \$1 billion.
- Company same-store sales grew 5.5%, driven by a 7.1% rise in customer traffic. This marked our fourth consecutive year of positive comps.
- Company wholesale revenues rose to over \$150 million, driven by an increase in average weekly sales per door.
- Company Stores operating income grew to over \$8 million from \$300,000 in fiscal 2012
- Together with our franchise partners, we added a net 54 stores during the year and operated 748 Krispy Kreme locations worldwide at year end.
- We signed international development agreements for Taiwan, Singapore, Moscow, and northern and southern/western India.
- Domestic franchisees generated same-store sales growth of 6.8%, while our international franchisees' sales crossed the \$400 million mark.
- Operating income increased to \$38 million from \$26 million, and adjusted net income rose to \$34 million from \$22 million.
- Operating cash flow increased to \$59 million, and we had a net cash balance at year end of more than \$40 million.
- And finally, we repurchased \$20 million of our shares at an average price of \$6.42.

Of course, these results would not be possible without the dedication of both our team members and our franchise partners who bring passion to their jobs and who delight in sharing our signature doughnuts, sweet treats and delicious coffee with customers. I appreciate their continued efforts and could not be more grateful for what they have achieved.

We at Krispy Kreme view ourselves as stewards of something very special — an iconic brand whose products are renowned not only for their taste and quality, but also for the joy that they bring. Our Company has a rich cultural heritage, and we take a great deal of pride in featuring a selection of core favorites, innovative seasonal offerings, intriguing doughnut and beverage pairings, and flavors to please local palates in each of the 22 countries we serve. But as strong as the physical cravings are for our products, we think that the emotional cravings are even stronger.

Our market research and sales data prove that consumers around the world do not think of Krispy Kreme just in terms of early morning or late evening. They are willing to buy doughnuts throughout the day and night if we simply provide reasons for them to do so. To that end, we are driving new use occasions by leveraging everyday events such as office parties, after school snacks and late night doughnut runs, along with the various holiday occasions that are celebrated throughout the year. And to better engage our customers and encourage their loyalty and visit frequency, we have also made concerted efforts to deepen our social media presence, expand our local relationship marketing efforts, and enhance the in-store experience through our shop atmosphere and team member hospitality.

Interestingly, familiarity with Krispy Kreme mirrors that of companies with much larger footprints, and this suggests to us that our opportunity for new store growth is significant. Our goal is to expand to 1,300 stores by fiscal 2017 through Company and both domestic and international franchise development, and we think meeting this objective is well within our reach.

More specifically, we expect our growth will be fueled by our smaller store strategy, innovation and technology, a broader menu of one-of-a-kind products, domestic expansion and continued international development. Expanding our domestic franchise system will entail infilling current territories and opening up the vast portion of the United States that has yet to be franchised. Internationally, development will consist of building more Krispy Kreme stores within our existing footprint while adding to our market presence through new development agreements. Company store growth will be primarily in the southeastern United States, although we may consider adding shops in other select markets.

We can certainly expect to encounter challenges in the years to come, but we believe our opportunities far outweigh these challenges. I firmly believe our team members and our franchise partners are prepared to seize these opportunities and address all challenges with the same energy, effort and commitment they displayed in fiscal 2013.

In summary, we believe our future is brighter than it has ever been. We are already blessed with several attributes that most companies spend a lifetime trying to attain: a brand that is beloved worldwide, best-in-class products, compelling long-term opportunities, focused strategies, and an incredibly capable and energized team. We are committed to doing everything in our power to continue building upon our current profitability. We are gratified by our fiscal 2013 accomplishments, and we are optimistic that we can successfully achieve both our long-term aspirations and those of our shareholders.

We thank you for believing in us, our company, our brand, our products and our future. We assure our shareholders that, as we move forward on our renewed path of growth, we will live out our mission "to touch and enhance lives through the JOY that is Krispy Kreme" in a manner that brings pride to Krispy Kreme and to all of its constituencies.

Sincerely,

James H. Morgan
Chairman, President and
Chief Executive Officer

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act") that relate to our plans, objectives, estimates and goals. Statements expressing expectations regarding our future and projections relating to products, sales, revenues, expenditures, costs and earnings are typical of such statements, and are made under the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on management's beliefs, assumptions and expectations of our future economic performance, considering the information currently available to management. These statements are not statements of historical fact. Forward-looking statements involve risks and uncertainties that may cause our actual results, performance or financial condition to differ materially from the expectations of future results, performance or financial condition we express or imply in any forward-looking statements. The words "believe," "may," "could," "will," "should," "would," "anticipate," "estimate," "expect," "intend," "objective," "seek," "strive" or similar words, or the negative of these words, identify forward-looking statements. Factors that could contribute to these differences include, but are not limited to:

- the quality of Company and franchise store operations;
- our ability, and our dependence on the ability of our franchisees, to execute on our and their business plans;
- our relationships with our franchisees;
- our ability to implement our international growth strategy;
- our ability to implement our domestic small shop operating model;
- political, economic, currency and other risks associated with our international operations;
- the price and availability of raw materials needed to produce doughnut mixes and other ingredients, and the price of motor fuel;
- our relationships with wholesale customers;
- our ability to protect our trademarks and trade secrets;
- · changes in customer preferences and perceptions;
- · risks associated with competition;
- risks related to the food service industry, including food safety and protection of personal information;
- compliance with government regulations relating to food products and franchising;
- increased costs or other effects of new government regulations relating to healthcare benefits;
- risks associated with implementation of new technology platforms; and
- other factors discussed below in Item 1A, "Risk Factors" and in Krispy Kreme's periodic reports and other information filed with the United States Securities and Exchange Commission (the "SEC").

All such factors are difficult to predict, contain uncertainties that may materially affect actual results and may be beyond our control. New factors emerge from time to time, and it is not possible for management to predict all such factors or to assess the impact of each such factor on the Company. Any forward-looking statement speaks only as of the date on which such statement is made, and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made.

We caution you that any forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to differ materially from the facts, results, performance or achievements we have anticipated in such forward-looking statements except as required by the federal securities laws.

Item 1. BUSINESS.

Company Overview

Krispy Kreme is a leading branded retailer and wholesaler of high-quality doughnuts, complementary beverages and treats and packaged sweets. The Company's principal business, which began in 1937, is owning and franchising Krispy Kreme stores, at which a wide variety of high-quality doughnuts, including the Company's Original Glazed® doughnut, are sold and distributed together with complementary products, and where a broad array of coffees and other beverages are offered.

The Company generates revenues from four business segments: Company Stores, Domestic Franchise, International Franchise and KK Supply Chain. The revenues and operating income of each of these segments for each of the three most recent fiscal years is set forth in Note 2 to the Company's consolidated financial statements appearing elsewhere herein.

Company Stores. The Company Stores segment is comprised of the doughnut shops operated by the Company. These shops sell doughnuts and complementary products through the on-premises and wholesale channels and come in two formats: factory stores and satellite shops. Factory stores have a doughnut-making production line, and many of them sell products through both on-premises and wholesale channels to more fully utilize production capacity. Factory stores also include commissaries which serve only wholesale customers. Satellite shops, which serve only on-premises customers, are smaller than most factory stores, and include the hot shop and fresh shop formats. As of February 3, 2013, there were 97 Company shops in 19 states and the District of Columbia, including 76 factory and 21 satellite shops.

Domestic Franchise. The Domestic Franchise segment consists of the Company's domestic store franchise operations. Domestic franchise stores sell doughnuts and complementary products through the on-premises and wholesale channels in the same way and using the same store formats as do Company stores. As of February 3, 2013, there were 142 domestic franchise stores in 29 states, consisting of 99 factory and 43 satellite stores.

International Franchise. The International Franchise segment consists of the Company's international store franchise operations. International franchise stores sell doughnuts and complementary products almost exclusively through the on-premises sales channel using shop formats similar to those used in the United States, and also using a kiosk format. A portion of sales by the franchisees in Canada, the United Kingdom and Australia are made to wholesale customers. As of February 3, 2013, there were 509 international franchise shops in 21 countries, consisting of 120 factory stores and 389 satellite shops.

KK Supply Chain. The KK Supply Chain segment produces doughnut mixes and manufactures doughnut-making equipment, which all factory stores, both Company and franchise, are required to purchase. In addition, KK Supply Chain sells other ingredients, packaging and supplies, principally to Company-owned and domestic franchise stores.

As of February 3, 2013, there were 239 Krispy Kreme stores operated domestically in 38 states and in the District of Columbia, and there were 509 shops in 21 other countries around the world. Of the 748 total stores, 295 were factory stores and 453 were satellites. The ownership and location of those stores is as follows:

	4		Domestic	International	Total
Company stores	 		97		97
Franchise stores	 •••••	en en la compaña de la comp La compaña de la compaña d	142	509	651

o provincia, jednog so vojde ustes Skorp, od jednog koja koja koja eramase ne razvoja je Signe i od Storija. P Poslavaja i usjednosti je sa provincija i od Skorp, najvoja jednosti se voja jednosti se voja jednosti se se s The Company and its franchisees sell products through two channels:

- On-premises: Sales to customers visiting Company and franchise factory and satellite stores, including sales made through drive-thru windows, along with discounted sales to community organizations that in turn sell doughnuts for fundraising purposes. A substantial majority of the doughnuts sold in our shops are consumed elsewhere.
- Wholesale: Sales of fresh doughnuts and packaged sweets primarily on a branded basis to a variety of retail customers, including convenience stores, grocery stores/mass merchants and other food service and institutional accounts. These customers display and resell the doughnuts and other products from self-service display cases, and in packages merchandised on stand-alone display units. Products are delivered to customer locations by our fleet of delivery trucks operated by a commissioned employee sales force. Distribution through wholesale sales channels generally is limited to stores in the United States. As noted above, only a small minority of sales by international franchisees are made to wholesale customers.

Company History

In 1933, Vernon Carver Rudolph, the founder of Krispy Kreme, went to work for his uncle, who had acquired a doughnut shop in Paducah, Kentucky from a French chef originally from New Orleans, which included, among other items, the rights to a secret yeast-raised doughnut recipe. In the mid 1930s, they decided to look for a larger market, and moved their operations to Nashville, Tennessee. Shortly thereafter, Mr. Rudolph acquired the business, together with his father and brother, and they soon opened shops in Charleston, West Virginia and Atlanta, Georgia. At this time, the business focused on selling doughnuts to local grocery stores.

During the early summer of 1937, Mr. Rudolph decided to leave Nashville to open his own doughnut shop. Along with two friends, he set off in a 1936 Pontiac and arrived in Winston-Salem, North Carolina with \$25 in cash, a few pieces of doughnut-making equipment, the secret recipe, and the name Krispy Kreme Doughnuts. They used their last \$25 to rent a building across from Salem Academy and College in what is now called historic Old Salem.

On July 13, 1937, the first Krispy Kreme doughnuts were made at the new Winston-Salem shop, with the first batch of ingredients purchased on credit. Mr. Rudolph was 21 years of age. Soon afterward, people began stopping by to ask if they could buy hot doughnuts right there on the spot. The demand was so great that Mr. Rudolph opened the shop for retail business by cutting a hole in the wall and selling doughnuts directly to customers, marking the beginning of Krispy Kreme's restaurant business.

In 1939, Mr. Rudolph registered the trademark "Krispy Kreme" with the United States Patent and Trademark Office. The business grew rapidly and the number of shops grew, opened first by family members and later by licensees.

In the 1950s and 1960s, steps were taken to mechanize the doughnut-making process. Proofing, cooking, glazing, screen loading and cutting became entirely automatic. Most of these doughnut-making processes are still used by Krispy Kreme stores today, although they have been further modernized.

Following Mr. Rudolph's death, in May 1976 Krispy Kreme became a wholly-owned subsidiary of Beatrice Foods Company of Chicago, Illinois. In February 1982, a group of Krispy Kreme franchisees purchased Krispy Kreme from Beatrice Foods.

With new leadership, a renewed focus on the hot doughnut experience became a priority for the Company and led to the birth of the Doughnut Theater*, in which the doughnut-making production line is visible to consumers, creating a multi-sensory experience unique to Krispy Kreme that is an important distinguishing feature of our brand. The Company began to expand outside of the Southeast and opened a store in New York City in 1996. Soon afterward, in 1999, the Company opened its first store in California and began its national expansion. In April 2000, Krispy Kreme held an initial public offering of common stock, and in December 2001, the Company opened its first international store, in Canada, and began its international expansion.

When the Company turned 60 years old in 1997, Krispy Kreme's place as a 20th century American icon was recognized by the induction of Company artifacts into the Smithsonian Institution's National Museum of American History.

The last decade of the 20th century and the early years of the 21st was a period of rapid growth in the number of stores and domestic geographic reach of Krispy Kreme, particularly following the April 2000 initial public offering. In many instances, the Company took minority ownership positions in new franchisees, both domestic and international. Enthusiasm for the brand generated very high average unit sales volumes as Krispy Kreme stores expanded into new geographic territories, and the Company generated significant earnings driven by the domestic store expansion. The initial success of a number of franchisees led the Company to reacquire several franchise markets in the United States in 2003 and early 2004, often at substantial premiums. By late 2003, average unit volumes began to fall as initial sales levels in many new stores proved to be unsustainable, which adversely affected earnings of both the Company and franchisees. This led to a period of retrenchment characterized by over 240 domestic store closings from 2004 through 2009. The Company's revenues fell significantly during this period, principally as a result of store closings by the Company and by franchisees. The Company incurred significant losses, including almost \$300 million in impairment charges and lease termination costs during this period related principally to store closings and to the writeoff of goodwill from the franchise acquisitions.

While the domestic business was going through a period of retrenchment, the Company greatly increased its international development efforts. Those efforts, which are continuing, have resulted in the recruitment of new franchisees in 17 countries since the end of fiscal 2004, and those franchisees, together with existing franchisees in four other countries, have opened a cumulative net total of 488 Krispy Kreme stores during that time. As of February 3, 2013, of the 748 Krispy Kreme stores worldwide, 509 are operated by franchisees outside the United States. Many of those franchisees pioneered the development of small Krispy Kreme satellite shop formats which, in tandem with a new small factory store model recently developed by the Company, serve as the prototype for the small shop business model the Company currently is developing to serve domestic markets and accelerate growth in the United States.

Growth returned to the domestic Krispy Kreme system in fiscal 2011, when the number of shops increased for the first time since fiscal 2005, and that growth has continued through fiscal 2013.

Today, Krispy Kreme enjoys over 65% unaided brand awareness, and our Hot Krispy Kreme Original Glazed Now® sign is an integral contributor to the brand's mystique. In addition, the Doughnut Theater® in factory stores provides a multi-sensory introduction to the brand and reinforces the unique Krispy Kreme experience in 22 countries around the world.

Industry Overview

Krispy Kreme operates within the quick service restaurant, or QSR, segment of the restaurant industry, although our consumer research indicated domestic customers think of our shops more like bakeries than restaurants. In our Company shops, approximately 55% of retail transactions include one or more dozens of doughnuts, and the vast majority of products we sell in our shops are consumed elsewhere. In the United States, the QSR segment is the largest segment of the restaurant industry and has demonstrated steady growth over a long period of time.

We believe that the QSR segment is generally less vulnerable to economic downturns than the casual dining segment, due to the value that QSRs deliver to consumers, as well as some "trading to value" by consumers from other restaurant industry segments during adverse economic conditions, as they seek to preserve the "away from home" dining experience on tighter budgets. However, high unemployment, low consumer confidence, tightened credit and other factors have taken their toll on consumers and their ability to increase spending, resulting in fewer visits to restaurants and related dollar growth. As a result, QSR sales may continue to be adversely impacted by the weak economic environment or by sharp increases in commodity or energy prices. The Company believes increased prices of agricultural products and energy are more likely to significantly affect its business than are economic conditions generally, because the Company believes its products are affordable indulgences that appeal to consumers in all economic environments.

In both domestic and international markets, we compete against a broad array of national, regional and local retailers of doughnuts and treats, some of which have substantially greater financial resources than we do and are expanding to other geographic regions, including areas where we have a significant store presence. We also compete against other retailers who sell sweet treats such as cookie, cupcake and ice cream stores. We compete on elements such as food quality, convenience, location, customer service and value.

In addition to retail doughnut outlets, the domestic doughnut market is comprised of several other sales channels, including grocery store packaged products, in-store bakeries within grocery stores, convenience stores, foodservice and institutional accounts, and vending. Our wholesale competitors include makers of doughnuts and snacks sold through all of these wholesale channels. Customer service, including frequency of deliveries and maintenance of fully stocked shelves, is an important factor in successfully competing for convenience store and grocery/mass merchant business. There is an industry trend moving towards expanded fresh product offerings at convenience stores during morning and evening drive times, and products are either sourced from a central commissary or brought in by local bakeries. In the packaged doughnut market, we compete for sales with many sweet treats, including those made by welf-known producers, such as Dolly Madison, Entenmann's, Little Debbie and Sara Lee, as well as regional brands.

Comprehensive, reliable doughnut industry statistics are not readily available; however, with regard to specific sales channels within the industry, data are available. Industry data indicate that, during calendar 2012, doughnut industry sales rose approximately 5% year-over-year in grocery stores and rose approximately 4% in convenience stores.

Krispy Kreme Brand Elements

Krispy Kreme has several important brand elements we believe have created a bond between our brand and our team members, guests, consumers and their communities. The key elements include:

One-of-a-kind taste. The taste experience of our doughnuts is the foundation of our concept and the common thread that binds generations of our loyal customers. Our doughnuts are made based on a secret recipe that has been in our Company since 1937. We use premium ingredients, which are blended by our proprietary processing equipment in accordance with our standard operating procedures, to create this unique and very special product. Our research indicates this one-of-a-kind taste drives guests' cravings for our products.

Doughnut Theater. Our factory stores typically showcase our Doughnut Theater, which is designed to produce a multi-sensory customer experience and establish a brand identity. Our goal is to provide our customers with an entertainment experience and to reinforce our commitment to quality and freshness by allowing them to see the doughnuts being made.

Hot Krispy Kreme Original Glazed Now® sign. The Hot Krispy Kreme Original Glazed Now® sign, when illuminated, is a signal that our hot Original Glazed® doughnuts are being served. The Hot Krispy Kreme Original Glazed Now® sign is an impulse purchase generator and an integral contributor to our brand. In fiscal 2012, we introduced the Krispy Kreme Hot Light® app for smartphones and desktops that automatically notifies guests when the Hot Krispy Kreme Original Glazed Now® sign is illuminated at either their favorite or the nearest Krispy Kreme shop. The app also allows users to get directions to Krispy Kreme locations and find out important information regarding current promotions.

Our Original Glazed® doughnuts are made for several hours every morning and evening, and at other times during the day at our factory stores. We also operate hot shops, which are satellite locations supplied with unglazed doughnuts from a nearby factory store or commissary. Hot shops use tunnel ovens to heat unglazed doughnuts throughout the day, which are then finished using the same glaze waterfall process used at factory shops.

Sharing and Connection. Krispy Kreme doughnuts are a popular choice for sharing with friends, family, co-workers and fellow students. Consumer research shows that approximately 70% of purchases at our domestic shops are for sharing occasions; and in Company shops, approximately 55% of retail transactions

are for sales of one or more dozen doughnuts. The strength of our brand in shared-use occasions transcends international borders. Sales of dozens comprise a significant portion of shop sales transactions around the world, and the sharing concept is an integral part of our global marketing approach.

Community relationships. Krispy Kreme was built upon generations of word-of-mouth marketing. We are committed to building relationships with our team members, guests and in our communities. Our shop operators support their local communities through fundraising programs and sponsorship of charitable events. Many of our loyal customers have memories of selling Krispy Kreme doughnuts to raise money for their schools, clubs and community organizations. We refer to these activities as "local relationship marketing;" it is the core building block of Krispy Kreme marketing and directly connects our marketing efforts to our brand's mission of "touching and enhancing lives through the joy that is Krispy Kreme."

Heritage. For the past 76 years, Krispy Kreme has been known for producing one-of-a-kind doughnuts. Our consumer research indicates this heritage and consistency are important parts of the brand's imagery with our guests. Icons of Krispy Kreme's heritage include paper hats, historical road signs and our "bowtie" logo.

Strategic Initiatives

We have developed a number of strategic initiatives designed to foster the Company's growth and improve its profitability. The major initiatives to which we are devoting our efforts are discussed below.

Developing and Testing Domestic Small Shop Formats To Drive Sales and Profitability

We are working to refine our domestic store operating model to focus on small retail shops, including both satellite shops to which we supply doughnuts from a nearby factory store in a hub and spoke distribution model, and shops that manufacture doughnuts but which have a smaller footprint and have less production capacity than traditional factory stores. The objectives of the small retail shop model are, among other things:

- to stimulate an increase in on-premises sales of doughnuts and complementary products by increasing the number of Krispy Kreme shops to provide customers more convenient access to our products;
- to reduce the investment required to produce a given level of sales and reduce operating costs by operating factory stores that are smaller than our traditional factory shops, as well as satellite shops supplied by larger, more expensive traditional factory stores;
- to increase the number of markets which can support a factory store through the continuing development of smaller factory store models;
- to achieve greater production efficiencies in certain markets by centralizing doughnut production to minimize the burden of fixed costs; and
- to enable store team members to focus on achieving excellence in customer satisfaction and in-shop consumer experience.

We intend to focus development of Company shops in the southeast in order to achieve economies of scale and minimize the geographic span of our Company store operations, and to develop the other domestic markets through franchising. We view successful development and demonstration of the small shop economic model, including both smaller footprint factory stores and satellite shops served through the hub and spoke model, as critical to attracting ongoing franchisee investment in the United States. Most of our international franchisees utilize hub and spoke models, and there currently are 389 satellite locations in operation in 18 foreign countries, which represent approximately 75% of all international franchise shops.

Market research has guided our shop development in the southeast over the past four years, resulting in new shop construction in the Piedmont Triad, Charlotte and Raleigh, North Carolina; Columbia and Greenville, South Carolina; Louisville, Kentucky; Nashville, Tennessee and Norfolk/Virginia Beach, Virginia. Prior to fiscal 2013, most of these shops were hot shop satellites in end-cap locations, all but one with a drive-thru window, with doughnuts supplied twice daily by nearby traditional factory shops using our hub and spoke distribution system.

We opened four new small shops in fiscal 2013, all of which were factory shops smaller than our traditional factory stores. Two of these shops were end-cap spaces in multi-tenant buildings and two were free-standing factory shops, one of which was a second-generation site. The average size is approximately 2,600 square feet, and each is equipped with a drive-thru window. In fiscal 2014, we plan to open as many as ten new Company shops, substantially all of which are expected to be new, free-standing, small format factory shops of approximately 2,300 square feet, each with a drive-thru window. The size of these new shops is expected to be substantially smaller than that of our traditional factory shops, which typically range in size from 2,800 to 5,500 square feet, and which often serve both retail and wholesale customers. Unlike our traditional factory shops, these new small shops serve retail customers only, and do not engage in wholesale distribution.

Our ongoing shop development will continue to focus on the southeast, including, in the near term, Charlotte and Burlington, North Carolina; Knoxville, Tennessee; Jacksonville, Florida; Richmond, Virginia; and Atlanta, Georgia.

We chose these markets as our initial focus of small shop development because they are markets in which we have an existing base of Krispy Kreme factory shops from which to build. In many of the markets in which we plan to develop additional Company shops, we expect to build small factory shops as well as satellite shops supplied using the hub and spoke model. Moreover, successful development of small factory shop economic models, could allow us to locate shops in smaller population towns and areas than has traditionally been possible, which could significantly increase the potential number of Company and franchise stores nationwide. Our goal is to develop a suite of shop designs of varying sizes and production capacities to enable us to develop markets of various sizes and population densities.

Enhancing Our Focus on Shop Operations

In recent years, we have been working to improve our shop operating margins by improving our operating methods; creating and deploying management tools, including labor cost and food cost management tools; enhancing our hospitality, service and cleanliness standards; and continuously training our people on new methods and standards. We believe we have opportunities to continue to improve our shop operating methods and procedures. Our goal is to drive same store sales and operate our shops more efficiently through a focus on operating excellence and world class guest experience. We evaluate guest experiences using several tools, including regular mystery shops, external brand perception research and direct consumer response measurements. These allow us to track guest experiences compared to perceptions and expectations, identify competitive strengths, and track our progress on a shop-by-shop basis.

Over half of our Company shops' revenues are derived from sales to grocers, mass merchants, convenience stores and other wholesale customers. We believe we have less ability to recover higher costs of agricultural commodities in the wholesale channel than we do in the on-premises channel, and we have the additional cost pressures associated with generally rising fuel costs and substantial product returns stemming from the relatively short shelf-life of our signature yeast-raised doughnut. Nevertheless, we believe the Krispy Kreme brand should be represented in wholesale distribution channels. Over time, we expect our wholesale product line to become increasingly differentiated from the products offered in our shops in order to improve the economics of this distribution channel. We are focusing customer development efforts on retailers we believe will generate weekly sales per door significantly greater than our systemwide average. In addition, we are focusing on enhancing our product line to increase consumer value by offering a variety of products with longer shelf-lives, as well as modernizing our delivery fleet, rationalizing delivery routes, improving our packaging designs and enhancing customer service to improve the profitability of wholesale distribution.

Driving Revenues By Enhancing Beverage Offerings and Deploying New Products

Sales of doughnuts comprise approximately 88% of our retail sales. In addition to improving consumer convenience by expanding the number of Krispy Kreme shops and points of distribution in our markets, we plan to continue development and deployment of a brand-relevant range of menu offerings to give consumers more reasons to visit Krispy Kreme shops more often and to improve our sales. These include limited time offerings, leveraged doughnut varieties, enhanced beverage offerings and other products that are complementary to the

Krispy Kreme brand and experience. While we have the option to enhance Krispy Kreme's menu options beyond doughnuts, our consumer research indicates there is substantial untapped consumer demand for more doughnuts. Our short-term menu plans will focus on maximizing doughnut sales with existing and new doughnut varieties across more dayparts and use occasions.

Throughout the world, we continue to work with our franchisees to broaden their menu offerings and offer exciting, new products within our existing platforms. New product innovation is a key part of our global marketing strategy. Our team strives to enhance our product offerings by introducing new beverages, doughnuts and complementary items that take advantage of global, regional and local taste trends. Our beverage offerings in most international markets include a broad range of hot and iced espresso drinks, teas, chocolate drinks, and our frozen Krispy Kreme Chillers® line – localized to meet important customer taste profiles. Our Krispy Kreme Baked Creations® line of baked goods, now available in the Philippines, Korea, Indonesia, Saudi Arabia and Turkey, complements our signature doughnuts and beverages and provides our customers with a range of products that meet additional day part needs. Importantly, we continue to focus on innovation within our core range of doughnuts and have recently introduced innovations internationally such as chocolate glaze and chocolate dough, whole wheat dough, minis, doughnut holes and new doughnut varieties leveraging co-promotional relationships with international chocolate brands, movies and branded toys.

Investing for Growth in the Domestic Franchise System

In fiscal 2013, we continued our preparations to re-engage in marketing Krispy Kreme franchises domestically, including committing additional resources to domestic franchise recruitment. Late in the year, we hired a Vice President of Domestic Franchise Development, a new role designed to lead our U.S. expansion efforts. This officer will focus on recruiting, selecting and developing new domestic franchisees.

We believe developing the small factory shop model, together with the satellite shop concepts developed in recent years, is critical to accelerating domestic franchise growth. See "Developing and Testing Domestic Small Shop Formats To Drive Sales and Profitability," above. It is our goal to increase the total domestic store count, both Company and franchise, to 400 shops by January 2017.

Building On Our Success Internationally

Our international franchisees' expansion in recent years has been outstanding, with international stores growing from 123 to 509 and from 31% of our total store count to 68% since fiscal 2007. We have been devoting additional resources, principally people, to supporting the growth of our international franchisees, and we expect to devote even more resources to supporting international franchisees in fiscal 2014. Krispy Kreme is now represented in 21 countries outside the United States, and we believe the international growth potential in the coming years is substantial. It is our goal to increase the number of international shops to 900 by January 2017.

Enhancing Franchisee Support

We are committed to devoting additional resources and providing an even higher level of support to both our domestic and international franchisees. Staffing is expected to increase in both the Domestic and International Franchise segments, as well as in the Supply Chain, to support franchise operations. New and refined management tools have been developed, tested and deployed in both franchise segments, including operations and training manuals; individual training manuals for specific positions within our shops, such as retail, processing, production and shift management; brand standards manuals; food and labor cost management tools; loss prevention tools; and shop design manuals. Krispy Kreme University, our training operation, is available to franchisee assistant managers and general managers, and our International Franchise personnel also provide training to franchisees around the world.

n de la mercale de la merc La mercale de la mercale d La mercale de la mercale d

Continuing to Invest in Research and Development

In recent years, we have devoted resources to research and development to improve our products and our doughnut production methods and equipment, and we expect to increase our commitment to research and development in coming years. Our objective is to improve the shelf life of our products, particularly our yeast-raised doughnuts, in order to improve the consumer experience with products purchased in the wholesale distribution channel. We also seek to reduce our returns of unsold products; to enhance automation of our doughnut production processes to make it simpler to execute and to achieve greater product consistency and reduce costs; to reduce the size of our doughnut making equipment to enable construction of factory stores in smaller retail spaces to improve shop economics; and to improve the efficiency of our production process and reduce ingredient costs.

Increasing Our Investments in Technology

We are increasing our investments in technology to support our business. In fiscal 2012, we purchased new point-of-sale hardware for all our Company shops and established a new standard hardware configuration for Company and domestic franchisee locations. In fiscal 2013, we tested new front-of-house and back-of-house point-of-sale ("POS") software to more effectively support our business through improved cash controls, enhanced sales visibility and centralized data management. In early fiscal 2014, we began deployment of the new POS software to Company shops, and expect to complete that deployment, together with deployment to certain domestic franchise shops, in fiscal 2014. In fiscal 2015, we plan on leveraging the new software to launch a domestic systemwide loyalty program, improve inventory management and centralize national promotions for Company and domestic franchisee locations.

In fiscal 2012, we began deployment of new handheld software and devices to support the commissioned sales force serving our wholesale customers, and substantially completed that deployment in fiscal 2013. Prior to fiscal 2012, only about one-third of our wholesale routes utilized handheld technology. Among the improvements we expect to achieve, over time, from this new technology are the elimination of substantially all paper from the customer delivery documentation process; further reduction of paper invoicing; a reduction in the amount of time spent in customer aisles performing administrative delivery tasks; elimination of back-of-house data keying; adding GPS functionality for route optimization and monitoring; and improved sales management tools to reduce product returns while maintaining or increasing sales volume.

Over the next few years, we also plan substantial new investments in other technologies to support our business, including selection and implementation of a new enterprise resource planning system, design and deployment of new production planning and cost systems, and development of improved business intelligence systems to support decision-making throughout the organization.

Company Stores Business Segment

Our Company Stores segment is comprised of the operations of our Company-owned stores. These stores sell doughnuts and complementary products through the on-premises and wholesale channels described above under "Company Overview." Expenses for this business segment include cost of goods sold, store level operating expenses along with direct general and administrative expenses, certain marketing costs and allocated corporate costs.

Products

Doughnuts and Related Products. We currently make and sell a wide variety of high-quality doughnuts, including our signature Original Glazed® doughnut. Our shops typically offer 16 or more doughnut varieties, including eight varieties that are offered at all our Krispy Kreme shops and up to four limited item doughnut offerings, with the balance of the assortment selected by the shop manager from our more than 12 other standard doughnut varieties. Most of our doughnuts, including our Original Glazed® doughnut, are yeast-raised doughnuts, although we also offer several varieties of cake doughnuts and crullers. We have become known for seasonal doughnuts that come in a variety of non-traditional shapes, including hearts, pumpkins, footballs, eggs and

snowmen, and which often feature complementary icings and fillings. We also offer other doughnut varieties on a limited time basis to provide interest to our guests and excitement to our team members. Generally, products for domestic stores are first tested in our Company stores and then rolled out to our franchise stores, although we have approved for testing at franchise locations new products which we believe are compatible with our brand image and which meet our demanding quality standards. Sales of doughnuts comprise approximately 88% of total retail sales, with the balance comprised principally of beverage sales.

Many of the doughnut varieties we offer in our doughnut shops are also distributed through wholesale channels. In addition, we offer a number of products exclusively through wholesale channels, including honeybuns, fruit pies, mini-crullers and chocolate products, generally packaged as individually wrapped snacks or packaged in snack bags. We also have introduced products in non-traditional packaging for distribution through grocery stores, mass merchants and convenience stores. Sales of yeast-raised doughnuts comprise approximately 80% of total wholesale sales, with cake doughnuts and all other product offerings as a group each comprising approximately 10% of total wholesale sales.

The cost of doughnut mixes, shortening, sugar and packaging are the four most significant component costs of our doughnut products, comprising approximately 16%, 7%, 8% and 10%, respectively, of Company Stores' cost of sales, respectively, in fiscal 2013.

Complementary products. We continue to develop and leverage complementary products to meet consumer needs for convenience, regional taste preference and variety. Beverages play a large role in providing convenience and satisfaction for our guests, including coffee, which has been part of the brand for many decades. We have a complete beverage program which includes drip coffees, iced coffees, both coffee-based and non-coffee-based frozen drinks, juices, sodas, milks, water, frozen/blended beverages and packaged and fountain beverages. We are continuing to refine our beverage offerings, including specialty espresso, cappuccino and hot chocolate drinks, and rolled out three new drip coffee blends in fiscal 2012. Many markets and shops introduced new espresso beverages in fiscal 2013, and promotional activities include beverage and doughnut combos when appropriate.

Traditional Factory Store Format

Historically, the Krispy Kreme business has been centered around large facilities which operated both as quick service restaurants and as consumer packaged goods distributors, with doughnut-making production lines located in each shop which served both the on-premises and wholesale distribution channels. The operation of these traditional factory stores tends to be complex, and their relatively high initial cost and their location in retail-oriented real estate results in a relatively high level of fixed costs which, in turn, results in high breakeven points.

Traditional factory stores generally are located in freestanding suburban locations generally ranging in size from approximately 2,800 to 5,500 square feet, and typically have the equipment which can produce from 150 to 230 dozen doughnuts per hour. The relatively larger factory stores often sell doughnuts and complementary products to both on-premises and wholesale customers, with the allocation between such channels dependent on the stores' capacities and the characteristics of the markets in which the stores operate; some of these shops have equipment that can produce 600 dozen doughnuts per hour or more than one production line. Relatively smaller traditional factory stores, which typically have less production capacity, serve only on-premises customers.

When the production line is producing our Original Glazed® doughnut, we illuminate our Hot Krispy Kreme Original Glazed Now® sign, which is a signal that our hot Original Glazed® doughnuts are being served. Our high volume dayparts are mornings and early evenings. The breakdown of our sales by daypart is approximately as follows (hours between 11:00 p.m. and 6:00 a.m. have been omitted because very few of our shops are open to the public during these hours):

Hours	Percen	tage of Retail Sales
6 a.m 11 a.m.		36%
11 a.m. – 2 p.m.	and the second s	12%
2 p.m. -6 p.m.		20%
6 p.m. – 11 p.m.	•	28%

The factory store category also includes seven commissaries, five of which have multiple production lines. These facilities often have equipment capable of producing 600 or 1,000 dozen doughnuts per hour, and sometimes have more than one production line. The commissaries typically serve wholesale customers exclusively, although some commissaries produce certain products (typically longer shelf-life products such as honeybuns) that are shipped to other factory stores where they are distributed to wholesale customers together with products manufactured at the receiving shop. One of our commissaries also serves as a hub location, producing doughnuts that are delivered to nearby satellite shops.

Historically, the relatively large size and high cost of traditional factory stores limited the density of our stores in many markets, causing many of our consumers to utilize them as "destination" locations, which limited their frequency of use. In addition, each factory store has significant fixed or semi-fixed costs, and margins and profitability are significantly affected by doughnut production and sales volume. Some of our traditional factory stores and commissaries have more capacity to produce doughnuts than is currently is being utilized.

Small Shop Formats

In recent years, we have been developing several new small domestic shop formats to serve on-premises customers exclusively, with the goal of permitting us to operate a larger number of stores that are more convenient to our customers, reducing the initial shop investment, reducing our per store fixed costs and lowering breakeven points, and, in certain markets, leveraging the production capacity in the existing installed base of traditional factory stores. Our international franchisees pioneered the development of the small shop formats, which include small factory stores that operate independently, as well as satellite stores, which are located in proximity to existing traditional factory stores which supply finished and unglazed doughnuts to the satellites using a hub and spoke distribution system. Most of our international franchisees use a hub and spoke distribution model; approximately 75% of Krispy Kreme shops outside the United States are satellite shops, with the fresh shop being the predominant format.

Our consumer research indicates that the typical Krispy Kreme on-premises customer visits Krispy Kreme an average of once a month, and a significant obstacle to more frequent customer visits is our relative lack of convenience. Our consumer demographics are very much in line with the general population in which we do business. Our consumer research also indicates that consumers give us permission to leverage our brand into a variety of complementary products, so long as the quality of those products is consistent with the very high quality perception consumers attribute to our Original Glazed® doughnut.

Small Factory Stores. We have developed a domestic small retail-only factory store which occupies approximately 2,300 square feet and which contains a full doughnut production line, but on a smaller scale than the production equipment in a traditional factory store. We operate six of these small factory stores, and view the small factory format as a more cost-effective means to offer the Krispy Kreme experience to consumers than our traditional large factory stores. Due to their lower cost, these small format factory shops could enable us to deliver the Krispy Kreme Doughnut Theater® experience to consumers in relatively smaller geographic markets than we currently serve because the small shops typically have lower breakeven points than our large traditional shops.

Our small factory stores generally have the capacity to produce between 65 and 110 dozen doughnuts per hour, depending on the equipment configuration. Our larger traditional shops typically have equipment capable of producing in the range of 150 to 600 dozen doughnuts an hour. We currently operate six small factory shops, four of which were opened in fiscal 2013. Four of the six small factory shops are end-cap locations and two are freestanding buildings, both of which opened in fiscal 2013. All six shops have drive-thru windows. The average capital investment in the two end-cap locations opened in fiscal 2013 was approximately \$680,000, including the doughnut-making equipment, signage, other equipment and furnishings, and tenant upfit from a heated and cooled shell. One of the two free-standing shops was a second-generation site which the Company leased and then refurbished the existing building. The other free-standing shop was a first-generation site on which the landlord constructed and upfit a building and then leased the land and building to the Company. The Company's capital investment in these two free-standing shops was approximately \$1.0 million and \$495,000, respectively, which included the cost of the doughnut-making equipment, signage, other equipment and furnishings and, in the case

of the second-generation site, included the cost of refurbishing the building. The lease for the first generation site developed by the landlord was recorded as a capital lease in the amount of \$455,000, but is not included in the \$495,000 Company-funded investment amount above. We plan to continue refining the small factory model to further reduce the initial capital cost of this format.

We expect to open a minimum of seven to ten new Company small factory shops in each of the next two fiscal years, most of which we expect to be free-standing. While the cost of a free-standing shop is expected to be greater than a similar shop in an end-cap space in a multi-tenant building, we believe that the anticipated higher average weekly sales volume from the free-standing shop will more than offset the higher initial investment.

Outside the United States, small factory stores are more numerous than larger traditional factory stores. Because many international factory stores are located in urban areas where lease rates are relatively high, these shops tend to be smaller than domestic factory stores. In addition, because international factory shops generally serve only on-premises customers, the space required to support wholesale distribution is not required.

Satellite Stores. In addition, we have developed two varieties of domestic satellite stores. These shops serve only on-premises customers, are smaller than traditional factory stores, and do not contain a doughnut making production line. Satellite stores consist of the hot shop and fresh shop formats, and typically range in size from approximately 1,800 to 2,400 square feet (exclusive of larger factory stores that have been converted to satellites). In each of these formats, the Company sells doughnuts, beverages and complementary products, with the doughnuts supplied by a nearby traditional factory store or a commissary.

Hot shops utilize tunnel oven doughnut heating and finishing equipment to offer customers our hot Original Glazed® doughnuts throughout the day. This equipment heats unglazed doughnuts and finishes them using a warm glaze waterfall that is the same as that used in a traditional factory store. Hot shops signal customers that our signature product is available using the Hot Krispy Kreme Original Glazed Now® illuminated sign. Products other than our Original Glazed® doughnut generally are delivered at least twice daily to the hot shop already finished, although in some locations we perform some finishing functions at the hot shop, including application of icings and fillings, to provide consumers with elements of our Doughnut Theater® experience in hot shop locations.

Fresh shops are similar to hot shops, but do not contain doughnut heating and finishing equipment. Doughnuts sold at fresh shops often are delivered fully finished from the factory hub, but in some locations fresh shops decorate and finish doughnuts in the shop in order to provide an element of consumer interest and to emphasize the freshness of our products. The fresh shop format is the predominant satellite format used by our international franchisees, comprising approximately 66% of all international satellite shops.

Hot shops and fresh shops typically are located in shopping centers, and end cap spaces that can accommodate drive-thru windows are particularly desirable. We view the hot shop and fresh shop formats as ways to achieve market penetration and greater consumer convenience in a variety of market sizes and settings. Our international franchisees led the initial development of the satellite shop formats, and we have been working to adapt their work to the domestic market.

The ability to accommodate a drive-thru window is an important characteristic in most new shop locations, including both factory stores and satellite shops. Of our 90 shops which serve on-premises customers, 84 have drive-thrus, and drive-thru sales comprise approximately 46% of these shops' retail sales. At some of the shops which produce doughnuts 24 hours per day, we are experimenting with continuous drive-thru operation.

The following table sets forth the type and locations of Company stores as of February 3, 2013.

Wholesale Distribution

Sales to wholesale customers accounted for over half of fiscal 2013 revenues in the Company Stores segment. Of the 97 stores operated by the Company as of February 3, 2013, 43 serve the wholesale distribution channel, including seven commissaries. We sell our traditional yeast-raised and cake doughnuts in a variety of packages, generally containing from six to 15 doughnuts. In addition, we offer in the wholesale distribution channel a number of doughnuts and complementary products that we do not offer in our shops, including honeybuns,

mini-crullers, fruit pies and a variety of snack doughnuts. These products typically have longer shelf lives than our traditional doughnuts and are packaged in snack bags or as individually wrapped snacks. Packaged products generally are marketed from Krispy Kreme branded displays. In addition to packaged products, we sell individual loose doughnuts through our in-store bakery ("ISB") program, using branded self-service display cases that also contain branded packaging for loose doughnut sales.

The wholesale distribution channel is composed of two principal customer groups: grocers/mass merchants and convenience stores. Substantially all sales to grocers and mass merchants consist of packaged products, while a significant majority of sales to convenience stores consists of loose doughnuts sold through the ISB program.

We deliver doughnuts to wholesale customers using a fleet of delivery trucks operated by a commissioned employee sales force. We deliver products to packaged doughnut customers three or more times per week, generally on either a Monday/Wednesday/Friday or Tuesday/Thursday/Saturday schedule. ISB customers generally are serviced daily, six times per week. In addition to delivering product, our salespeople are responsible for merchandising our products in the displays and picking up unsold products for return to the Company shop. Our principal products are yeast-raised doughnuts having a short shelf-life, which results in unsold product costs in the wholesale distribution channel, most of which are absorbed by the Company.

The wholesale channel is highly competitive, and the Company has not increased selling prices in recent years sufficiently to recover increased costs, particularly higher costs resulting from rising agricultural commodity costs and higher fuel costs. In addition, a number of customers, mainly convenience store chains, have converted from branded doughnut offerings to vertically-integrated private label systems.

In response to these wholesale trends, the Company has reemphasized marketing of new and existing longer shelf-life products, including products made by third parties, and has developed order management systems to more closely match display quantities and assortments with consumer demand and reduce the amount of unsold product. The goals of these efforts are to increase the average weekly sales derived from each wholesale distribution point and minimize spoilage. In addition, where possible, the Company has eliminated relatively lower sales volume distribution points and consolidated wholesale routes in order to reduce delivery costs and increase the average revenue per distribution point and the average revenue per mile driven.

Shop Operations

General store operations. We outline standard specifications and designs for each Krispy Kreme shop format and require compliance with our standards regarding the operation of each store, including, but not limited to, varieties of products, product specifications, sales channels, packaging, sanitation and cleaning, signage, furniture and fixtures, image and use of logos and trademarks, training, marketing and advertising.

Our shops generally operate seven days a week, excluding some major holidays. Traditionally, our domestic sales have been slower during the winter holiday season and the summer months.

Quality standards and customer service. We encourage our team members to be courteous, helpful, knowledgeable and attentive. We emphasize the importance of performance by linking a portion of both a Company shop manager's and assistant manager's incentive compensation to profitability and customer service. We also encourage high levels of customer service and the maintenance of our quality standards by frequently monitoring our stores through a variety of methods, including periodic quality audits, "mystery shoppers" and a toll-free consumer telephone number. In addition, our customer experience department handles customer comments and conducts routine satisfaction surveys of our on-premises customers.

Management and staffing. Responsibility for our Company Stores segment is jointly vested in two senior vice presidents who report to our chief executive officer. Our Senior Vice President of U.S. Franchises and Company Stores focuses on operations at retail-only shops and on both the doughnut production and QSR elements of our stores that serve both on-premises and wholesale customers. In addition, this officer also is responsible for our domestic franchise operations. The Vice President of Company Stores Operations reports to this Senior Vice President, and is supported by market managers in each geographic region and by shop management. Our Senior Vice President of Wholesale Operations is responsible for wholesale distribution at all retail locations serving wholesale customers, and for operation of our seven commissaries. The Wholesale Operations management

structure consists/principally of a vice president of commissary operations who supervises the operations of our seven commissaries through managers at these locations, and a sales organization led by a vice president and consisting of national and regional wholesale sales managers who deal with larger customers and in-store sales personnel responsible for managing sales and deliveries to individual customer locations. We communicate frequently with all store managers and wholesale sales managers and their staffs using shop audits, weekly communications by telephone or e-mail and both scheduled and surprise shop visits.

We offer a comprehensive manager training program covering the critical skills required to operate a Krispy Kreme store and a training program for all positions in the shop. The manager training program includes classroom instruction, computer-based training modules and in-shop training.

Our staffing varies depending on a store's size, volume of business and number of sales channels. Stores, depending on the sales channels they serve, have employees handling on-premises sales, processing, production, bookkeeping, sanitation and delivery. Hourly employees, along with route sales personnel, are trained by local store management through hands-on experience and training manuals.

In fiscal 2011, we began enhancing our shops' timekeeping systems by deploying and beginning implementation of new labor scheduling technology to help our shop managers better match staffing levels with consumer traffic. We continued implementation of and training on this technology in fiscal 2012 and 2013.

We currently operate Company stores in 19 states and the District of Columbia. Over time, we plan to refranchise many of our stores in markets outside our traditional base in the southeastern United States. The franchise rights and other assets in many of these markets were acquired by the Company in business combinations in prior years. Of the 97 stores operated by the Company as of February 3, 2013, approximately 20 stores having fiscal 2013 sales of approximately \$60 million are candidates for refranchising at the appropriate time. In February 2013, the Company refranchised three of these locations and closed a fourth store in the refranchised market in January 2013 in anticipation of the transaction. These four stores had total sales in fiscal 2013 of approximately \$9 million.

Domestic Franchise Business Segment

The Domestic Franchise segment consists of the Company's domestic store franchise operations. This segment derives revenue principally from initial development and franchise fees related to new stores and from royalties on sales by franchise stores. Domestic Franchise direct operating expenses include costs incurred to recruit new domestic franchisees, to assist with domestic store openings, to assist in the development of domestic marketing and promotional programs, and to monitor and aid in the performance of domestic franchise stores, as well as direct general and administrative expenses and certain allocated corporate costs.

The store formats used by domestic franchisees are very similar to those used by the Company. All domestic franchisees sell products to on-premises customers, and most, but not all, also sell products to wholesale customers. Sales to wholesale customers generally constitute a smaller percentage of a domestic franchisee's total sales than do the Company's sales to wholesale customers. The Company's relatively higher percentage of wholesale sales reflects, among other things, the fact that the Company's KK Supply Chain segment earns a profit on sales of doughnut mixes, other ingredients and supplies that are used by the Company Stores segment to produce products for wholesale customers, which gives the Company a cost advantage not enjoyed by franchisees in serving this relatively lower profit margin distribution channel. Sales to wholesale customers comprised approximately 25% of domestic franchisees' total sales in fiscal 2013.

Domestic franchise stores include stores that we historically have referred to as associate stores and area developer stores, as well as franchisee stores that have opened since the beginning of calendar 2008. The rights of our franchisees to build new stores and to use the Krispy Kreme trademarks and related marks vary by franchisee type and are discussed below.

• Associates. Associate franchisees are located principally in the Southeast, and their stores have attributes that are similar to Company stores located in the Southeast. Associates typically have many years of experience operating Krispy Kreme stores and selling Krispy Kreme branded products both at retail and

wholesale in defined territories. This group of franchisees generally concentrates on growing sales within the current base of stores rather than developing new stores. Under their associate license agreements, associates generally have the exclusive right to open new stores in their geographic territories, but they are not obligated to develop additional stores. We cannot grant new franchises within an associate's territory during the term of the license agreement. Further, we generally cannot sell within an associate's territory any Krispy Kreme branded products, because we have granted those exclusive rights to the franchisee for the term of the license agreement.

Associates typically have license agreements that expire in 2020. Associates generally pay royalties of 3.0% of on-premises sales and 1.0% of all other sales. Some associates also contribute 1.0% of all sales to the Company-administered public relations and advertising fund, which we refer to as the Brand Fund. Our Associate license agreements generally permit the franchisee to open Krispy Kreme shops within their geographic territories without the payment of any development fee or initial franchise fee.

Of the approximately \$281 million of sales by domestic franchisees in the 52 weeks ended January 27, 2013, approximately \$84 million, or 30%, was made by franchisees subject to the foregoing royalty structure. The aggregate royalty revenue recognized by the Company on such sales was approximately \$2.0 million.

• Area developers. In the mid-1990s, we franchised territories in the United States, usually defined by metropolitan statistical areas, pursuant to area development agreements. These development agreements established the number of stores to be developed in an area, and the related franchise agreements governed the operation of each store. Most of the area development agreements have expired, been terminated or renewed with territorial and store-count (build out) modifications.

Under their franchise agreements, area developers generally have the exclusive right to sell Krispy Kreme branded products within a one-mile radius of their stores and in wholesale accounts that they have serviced in the last 12 months.

The franchise agreements for area developers have a 15-year term that may be renewed by the Company. These franchise agreements generally provide for royalties of 4.5% of both on-premises and wholesale sales, and contributions to the Brand Fund of 1.0% of sales. In recent years, the Company elected to reduce the royalty rate on wholesale sales; the Company currently charges Area Developers a royalty rate of 1.5% on wholesale sales.

Of the approximately \$281 million of sales by domestic franchisees in the 52 weeks ended January 27, 2013, approximately \$197 million, or 70%, was made by franchisees subject to the Area Developer royalty structure. The aggregate royalty revenue recognized by the Company on such sales was approximately \$7.7 million.

Recent domestic development agreements generally provide for the payment of one-time initial development and franchise fees ranging from \$25,000 to \$50,000 per store.

As of February 3, 2013, we had an equity interest in two of the domestic area developers. Where we are an equity investor in an area developer, we contribute equity or guarantee debt of the franchisee generally proportionate to our ownership interest. See Note 8 to the consolidated financial statements appearing elsewhere herein for additional information on our franchisee investments. We do not currently expect to own equity interests in any future franchisees.

• Recent franchisees. Since fiscal 2009, the Company has signed several new franchise agreements. These agreements included renewal agreements resulting from contract expirations, agreements for new stores with existing franchisees and agreements with new franchisees who acquired existing Krispy Kreme franchise and Company shops. In addition, several agreements arose from the conveyance of Company markets to franchisees. Some of the recent franchisees have signed development agreements, which require the franchisee to build a specified number of stores in an exclusive geography within a specified time period, usually five years or less. The franchise agreements with this group of franchisees have a 15-year term, are renewable provided the franchisee meets specified criteria, and generally do not contemplate

engaging in wholesale distribution. Additionally, these franchise agreements generally allow the Company to sell Krispy Kreme branded products in close geographic proximity to the franchisees' stores. These franchise agreements and development agreements are used for all new franchisees and, in general, for the renewal of older franchise agreements and associate license agreements. We are charging recent franchisees the same royalty and Brand Fund rates as those charged to Area Developer franchisees.

As of February 3, 2013, the Company's approximately 40 domestic franchisees operated a total of 142 stores. Approximately 80% of these franchisees operate five or fewer shops, approximately 10% operate between six and ten shops, and approximately 10% operate more than ten shops.

During fiscal 2013, domestic franchisees opened nine stores and closed seven stores. On August 30, 2012, the Company acquired two stores from one of its domestic franchisees as more fully described in Note 21 to the consolidated financial statements appearing elsewhere herein. The following table sets forth the type and locations of domestic franchise stores as of February 3, 2013.

The Company has equity interests in two domestic franchisees operating stores in Washington, Oregon, Hawaii and South Florida, as more fully described in Note 8 to the consolidated financial statements appearing elsewhere herein. The Company currently does not expect to own equity interests in franchisees in the future.

The Company has development agreements with certain of its domestic franchisees pursuant to which the franchisees are contractually obligated to open additional Krispy Kreme stores. The following table sets forth those commitments, by state, as of February 3, 2013:

We generally assist our franchisees with issues such as operating procedures, advertising and marketing programs, public relations, store design, training and technical matters. We also provide an opening team to provide on-site training and assistance both for the week prior to and during the first week of operation for each initial store opened by a new franchisee. The number of opening team members providing this assistance is reduced with each subsequent store opening for an existing franchisee.

International Franchise Business Segment

The International Franchise segment consists of the Company's international store franchise operations. The franchise agreements with international area developers typically provide for the payment of royalties of 6.0% of all sales, contributions to the Brand Fund of 0.25% of sales and one-time development and franchise fees generally ranging from \$20,000 to \$50,000 per store. Direct operating expenses for this business segment include costs incurred to recruit new international franchisees, to assist with international store openings, to assist in the development of operational tools and store designs, and to monitor and aid in the performance of international franchise stores, as well as direct general and administrative expenses and allocated corporate costs.

The operations of international franchise stores are similar to those of domestic stores, except that substantially all of the sales of international franchise stores are made to on-premises customers. International franchisees pioneered the hub and spoke business model, in which centralized factory stores or commissaries provide fresh doughnuts to satellite locations. Internationally, the fresh shop satellite format predominates, and shops typically are located in pedestrian-rich environments, including transportation hubs and shopping malls. Some of our international franchisees have developed small kiosk formats, which also are typically located in transportation hubs and shopping malls. The satellite shops operated by international franchisees tend to be smaller than domestic satellite shops, and the international satellite shops have lower average unit volumes than do domestic satellite shops.

Our International Franchisees have renewable development agreements regarding the build-out of Krispy Kreme stores in their territories. Territories are typically country or region-wide, but for large countries, the development territory may encompass only a portion of a country. The international franchise agreements have a renewable 15-year term. These agreements generally do not contemplate distribution through wholesale channels, although our franchisees in Canada, Australia and the United Kingdom make such sales.

Product offerings at shops outside the United States include our signature Original Glazed® doughnut, a core set of doughnut varieties offered in our domestic shops and a complementary set of localized doughnut varieties tailored to meet the unique taste preferences and dietary norms in the market. Often, our glazes, icings and filling flavors are tailored to meet local taste preferences. We work closely with our franchisees outside the United States to conduct marketing research to understand local tastes and usage occasions, which drives development of new products and marketing approaches.

Internationally, we believe that complementary products such as baked goods and other treat products could play an increasingly important role for our franchisees as they penetrate their markets and further establish the Krispy Kreme brand. These items offer franchisees the opportunity to fill and/or strengthen day part offerings to meet a broader set of customer needs. Krispy Kreme Baked Creations®, a baked platform for international markets designed to meet needs across a broad set of markets, was launched in fiscal 2010 in the Philippines. Today, our Krispy Kreme Baked Creations® products are available in the Philippines, Korea, Indonesia, Saudi Arabia and Turkey.

Beverage offerings at shops outside the United States include a complete program consisting of hot and iced espresso based beverages, frozen drinks, teas, juices, sodas, water and bottled or canned beverages. Drip coffee is also offered in many international markets, but represents a much smaller component of the beverage program relative to the United States due to international consumer preferences. In-store consumption occasions often play a key role in total beverage consumption internationally due to store locations and consumer habits, and we work closely with international franchisees to adapt the store environment and product offerings to take advantage of this dynamic. We continue to look for ways to improve our beverage program and bring cross-market efficiencies to international franchisees.

Markets outside the United States have been a significant source of growth, all of which we plan to develop by franchising. In the past three years, we have focused our international development efforts primarily on opportunities in markets in Asia and the Middle East. In fiscal 2013, we signed new international franchise agreements with franchisees in Moscow, India and Singapore. In addition to ongoing development efforts in these areas, we are focusing franchise marketing efforts on new markets, including Europe and South and Central America.

Generally, there is a single franchisee in each of the countries outside the United States where Krispy Kreme is represented. During fiscal 2013, the Company signed development agreements for portions of India with two franchisees, and there may be more than one franchisee in a given country going forward. All of the Krispy Kreme shops in the Middle East are operated by a single franchisee.

The types and locations of international franchise stores as of February 3, 2013 are summarized in the table below.

KK Supply Chain Business Segment

The Company operates an integrated supply chain to help maintain the consistency and quality of products throughout the Krispy Kreme system. The KK Supply Chain segment buys and processes ingredients it uses to produce doughnut mixes and manufactures doughnut-making equipment that all factory stores are required to purchase.

The Company manufactures doughnut mixes at its facility in Winston-Salem, North Carolina. The Company also manufactures doughnut mix concentrates, which are blended with flour and other ingredients by contract mix manufacturers to produce finished doughnut mix. In February 2009, the Company entered into an agreement with an independent food company to manufacture certain doughnut mixes using concentrate for domestic regions outside the southeastern United States and to provide backup production capability in the event of a business disruption at the Winston-Salem facility.

In addition to traditional doughnut mixes and mixes made from mix concentrates, the Company manages the production of doughnut premix, which is used to produce doughnut mixes in certain international locations. The premix is shipped to Krispy Kreme stores, where it is combined with locally sourced ingredients to produce doughnut mixes for use at the store. The premix and concentrate production models are used to produce doughnut mixes outside the United States in order to reduce the substantial international transportation costs associated with shipping finished mixes, to minimize foreign import taxes, and to help protect the Company's intellectual property. The Company utilizes contract mix manufacturers in the United Kingdom, Mexico, Japan, Korea, Malaysia and Australia to blend mixes for certain international franchisees using mix concentrates or the premix process.

The KK Supply Chain segment also purchases and sells key supplies, including icings and fillings, other food ingredients, juices, signage, display cases, uniforms and other items to both Company and franchisee-owned stores. In addition, through KK Supply Chain, the Company utilizes volume-buying power, which the Company believes helps lower the cost of supplies to stores and enhances profitability. In March 2011, the Company entered into an agreement with an independent distributor to distribute products to Company and franchise stores in the eastern portion of the United States, as well as to handle the export of products to the 21 foreign countries in which the Company's international franchisees operate. The Company has subcontracted with another independent distributor since 2008 to distribute products to domestic stores in the western portion of the country. Implementation of the eastern U.S. outsourcing resulted in all of KK Supply Chain's distribution operations being handled by contract distributors. The Company believes that moving to a 100% outsourced model has enabled the

Company and its franchisees to benefit from the operating scale of the independent distributors and, in the case of outsourcing of all export functions, to minimize the compliance and other risks associated with exporting to a large number of countries with diverse import regulations and procedures.

Substantially all domestic stores purchase all of their ingredients and supplies from KK Supply Chain, while KK Supply Chain sales to international franchise stores are comprised principally of sales of doughnut mix. The Company is continuously studying its distribution system to reduce the delivered cost of products to both Company and franchise stores. The Company expects to employ increased local sourcing for international franchisees in order to reduce costs, while maintaining control of the doughnut mix manufacturing process.

Flour, shortening, sugar and packaging represent the four most significant cost components of products sold by KK Supply Chain. While the flours used in the production of doughnut mixes are generic, the food properties of flour are different by type of flour and change from crop year to crop year. Accordingly, the Company periodically must reformulate its doughnut mixes to account for changes in the characteristics of the flour used in their production in order to maintain uniform, high quality doughnut products. Similarly, while the shortening in which the Company's doughnuts are fried is made from generic food oils, the specific components and other formula elements of the Company's shortening are proprietary, and the Company's shortenings are manufactured by third-party food companies to the Company's specifications. Such specifications are subject to change from time to time. For example, changes in the formulation of the Company's shortening were necessary to enable the Company to begin offering zero grams transfats per serving of its doughnuts in fiscal 2008.

The Supply Chain business unit is volume-driven, and its economics are enhanced by the opening of new stores and the growth of sales by existing stores.

Revenues by Geographic Region

Set forth below is a table presenting our revenues by geographic region for fiscal 2013, 2012 and 2011. Revenues by geographic region are presented by attributing revenues from customers on the basis of the location to which the Company's products are delivered or, in the case of franchise segment revenues, the location of the franchise store from which the franchise revenue is derived. Please note that fiscal 2013 contained 53 weeks.

Marketing

Krispy Kreme's approach to marketing is a natural extension of our brand equity, brand attributes, relationship with our customers and our values. During fiscal 2011, we hired a chief marketing officer with extensive experience in the QSR business to lead and unify our marketing programs on a global basis.

Domestic

To build our brand and drive our sales in a manner aligned with our brand values, we will focus our domestic marketing activities in the following areas:

Shop Experience. Our factory stores and smaller neighborhood shops are where most guests first experience a hot Original Glazed® doughnut. Customers know that when our Hot Krispy Kreme Original Glazed Now® sign in the shop window is illuminated, they can enjoy a hot Original Glazed® doughnut. We believe this experience begins our relationship with our guests and forms the foundation of the Krispy Kreme experience.

Relationship Marketing. The foundation of our marketing efforts starts with building a "relationship" between our brand and our team members, guests, consumers and their communities. Toward that end, many of our brand-building activities are grassroots-based and focused on building relevancy with these groups. These activities include:

- Good neighbor product deliveries to create trial uses;
- Sponsorship of local events and nonprofit organizations;
- Friends of Krispy Kreme eMessages sent to guests registered to receive monthly updates about new products, promotions and shop openings;
- Fundraising programs designed to assist local charitable organizations in raising money for their non-profit causes which the Company estimates helped raise over \$30 million for these organizations during fiscal 2013; and
- Digital, social, viral and interactive efforts including the use of social media such as Facebook and Twitter
 to communicate product and promotional activity, new shop openings and local relationship marketing
 programs. We currently have over 4.6 million fans on Facebook.

Public Relations. We utilize public relations and media relations, product placement, event marketing and community involvement as vehicles to generate brand awareness, brand relevancy and trial usage for our products. Our public relations activities create opportunities for media and consumers to interact with the Krispy Kreme brand. Our key messages are as follows:

- Krispy Kreme doughnuts are the preferred doughnut of choice for guests nationwide;
- Krispy Kreme is a trusted food retailer with a long history of providing superior, innovative products and delivering quality customer service; and
- Krispy Kreme cares about our brand, our team members, our guests, our consumers and the communities we serve.

Marketing, Advertising and Sales Promotion. Local relationship marketing has been central to building our brand, awareness and relevancy. In addition to these grassroots efforts, we will use other media as appropriate to communicate the brand, promotions and other promotional activities. These media may include traditional tactics (e.g., free-standing newspaper inserts, direct mail, shared mail, radio, television, out-of-home and other communications vehicles) and alternative media such as social, viral, and digital (e.g., Facebook, Twitter, blogs, Krispykreme.com, Friends of Krispy Kreme email club, etc.).

These activities may include limited time offerings and shaped doughnut varieties, such as Valentine's Day Hearts, Fall Footballs, Halloween Pumpkins and Holiday Snowmen. We also engage in activities and call attention to and leverage the Krispy Kreme experience and engage the public in non-traditional ways.

International

Krispy Kreme's approach to international marketing utilizes many of the same elements as the domestic marketing approach to build integrated marketing initiatives through store experience, relationship marketing, public relations and marketing/advertising/sales promotion. One of the key foundations to developing integrated marketing programs that leverage each of these marketing elements is our efforts and focus on driving category-leading new

product innovation. New product innovation is a critical focus internationally as it allows us to engage consumers more often through our marketing efforts and, at the same time, evolve our product range to more effectively meet local taste demands. This focus on new product innovation has resulted in innovations such as our Krispy Kreme Baked Creations® line of baked goods and innovation within our core doughnut range. Those core product range innovations include chocolate glaze and chocolate dough, whole wheat dough, minis, doughnut holes, doughnut pops and new doughnut varieties leveraging co-promotional relationships with international chocolate brands, movies and branded toys.

Our international marketing team works closely with the domestic marketing team to develop global programs that leverage key global occasions and celebrations, including programs for Valentine's Day, Halloween and the holiday season. In addition, we develop international specific programs that address the broad needs of our international markets, regional programs that address trends and occasions unique to Asia/Pacific, Latin America and the Middle East/Europe, and assist in the development of local country programs that leverage unique aspects of our broad set of markets.

To build our brand and drive sales across our international markets, our international team provides strategic leadership, marketing expertise and consulting on local market issues through dedicated regional resources. In partnership with our franchisees, we assist in local marketing planning, product offering innovation, promotional and store activation, and consumer messaging. In addition, we develop global and regional product, promotional and store event programs to supplement and enhance local country marketing initiatives, bring marketing efficiencies to international franchisees, and build local marketing capabilities.

Brand Fund

We administer domestic and international public relations and advertising funds, which we refer to as the Brand Funds. Franchise agreements with domestic area developers and international area developers require these franchisees to contribute 1.0% and 0.25% of their sales, respectively, to the Brand Funds. Company stores contribute to the Brand Fund on the same basis as domestic area developers, as do some associate franchisees. In fiscal 2011, the Company reduced the contribution from its associate and domestic area developer franchisees to 0.75% but reverted to the 1.0% rate in fiscal 2012 and 2013. Proceeds from the Brand Funds are utilized to develop programs to increase sales and brand awareness and build brand affinity. Brand Fund proceeds are also utilized to measure consumer feedback and the performance of our products and stores. In fiscal 2013, we and our domestic and international franchisees contributed approximately \$6.3 million to the Brand Funds.

Competition

Our domestic and international competitors include a wide range of retailers of doughnuts and other treats, coffee shops, other café and bakery concepts. We also compete with snacks sold through convenience stores, supermarkets, restaurants and retail stores domestically, but to a much lesser extent internationally. Some of our competitors have substantially greater financial resources than we do and are expanding to other geographic regions, including areas where we have a significant store presence. We also compete against other retailers who sell sweet treats such as cookie, cupcake and ice cream shops. We compete on elements such as food quality, convenience, location, customer service and value. Customer service, including frequency of deliveries and maintenance of fully stocked shelves, is an important factor in successfully competing for convenience store and grocery/mass merchant business. There is an industry trend moving towards expanded fresh product offerings at convenience stores during morning and evening drive times, and products are either sourced from a central commissary or brought in by local bakeries.

In the packaged doughnut market, an array of doughnuts is typically merchandised on a free-standing branded display. We compete for sales with many sweet treats, including those made by well-known producers, such as Dolly Madison, Entenmann's, Little Debbie, Sara Lee, and regional brands.

We view the uniqueness of our Original Glazed® doughnut as an important factor that distinguishes our brand from competitors, both in the doughnut category and in sweet goods generally.

Trademarks and Trade Names

Our doughnut shops are operated under the Krispy Kreme® trademark, and we use many federally and internationally registered trademarks and service marks, including Original Glazed® and Hot Krispy Kreme Original Glazed Now® and the logos associated with these marks. We have also registered some of our trademarks in approximately 60 other countries. We generally license the use of these trademarks to our franchisees for the operation of their doughnut shops.

Although we are not aware of anyone else using "Krispy Kreme" or "Hot Krispy Kreme Original Glazed Now" as a trademark or service mark in the United States, we are aware that some businesses are using "Krispy" or a phonetic equivalent, such as "Crispie Creme," as part of a trademark or service mark associated with retail doughnut shops. There may be similar uses of which we are unaware that could arise from prior users. When necessary, we aggressively pursue persons who use our trademarks without our consent.

Government Regulation

Environmental regulation. The Company is subject to a variety of federal, state and local environmental laws and regulations. Except for the legal and settlement costs totaling approximately \$2.5 million in fiscal 2010 associated with the settlement of litigation relating to alleged damage to a sewer system in Fairfax County, Virginia, such laws and regulations have not had a significant impact on the Company's capital expenditures, earnings or competitive position.

Local regulation. Our shops, both those in the United States and those in international markets, are subject to licensing and regulation by a number of government authorities, which may include health, sanitation, safety, fire, building and other agencies in the countries, states or municipalities in which the shops are located. Developing new doughnut shops in particular areas could be delayed by problems in obtaining the required licenses and approvals or by more stringent requirements of local government bodies with respect to zoning, land use and environmental factors. Our agreements with our franchisees require them to comply with all applicable federal, state and local laws and regulations, and indemnify us for costs we may incur attributable to their failure to comply.

Food product regulation. Our doughnut mixes are primarily produced at our manufacturing facility in Winston-Salem, North Carolina. Production at and shipments from our Winston-Salem facility are subject to the applicable federal and state governmental rules and regulations. Similar state regulations may apply to products shipped from our doughnut shops to convenience stores or grocers/mass merchants.

As is the case for other food producers, numerous other government regulations apply to our products. For example, the ingredient list, product weight and other aspects of our product labels are subject to state, federal and international regulation for accuracy and content. Most states periodically check products for compliance. The use of various product ingredients and packaging materials is regulated by the United States Department of Agriculture and the Federal Food and Drug Administration. Conceivably, one or more ingredients in our products could be banned, and substitute ingredients would then need to be identified.

International trade. The Company conducts business outside the United States in compliance with all foreign and domestic laws and regulations governing international trade. In connection with our international operations, we typically export our products, principally our doughnut mixes (or products which are combined with other ingredients sourced locally to manufacture mixes) to our franchisees in markets outside the United States. Numerous government regulations apply to both the export of food products from the United States as well as the import of food products into other countries. If one or more of the ingredients in our products are banned, alternative ingredients would need to be identified. Although we intend to be proactive in addressing any product ingredient issues, such requirements may delay our ability to open shops in other countries in accordance with our desired schedule.

Franchise regulation. We must comply with regulations adopted by the Federal Trade Commission (the "FTC") and with several state and foreign laws that regulate the offer and sale of franchises. The FTC's Trade Regulation Rule on Franchising ("FTC Rule") and certain state and foreign laws require that we furnish prospective franchisees with a franchise disclosure document containing information prescribed by the FTC Rule

and applicable state and foreign laws and regulations. We register in domestic and foreign jurisdictions that require registration for the sale of franchises. Our domestic franchise disclosure document complies with FTC disclosure requirements, and our international disclosure documents comply with applicable requirements.

We also must comply with a number of state and foreign laws that regulate some substantive aspects of the franchisor-franchisee relationship. These laws may limit a franchisor's ability to: terminate or not renew a franchise without good cause; interfere with the right of free association among franchisees; disapprove the transfer of a franchise; discriminate among franchisees with regard to charges, royalties and other fees; and place new shops near existing franchises.

Bills intended to regulate certain aspects of franchise relationships have been introduced into the United States Congress on several occasions during the last decade, but none have been enacted.

Employment regulations. We are subject to state and federal labor laws that govern our relationship with team members, such as minimum wage requirements, overtime and working conditions and citizenship requirements. Many of our shop team members are paid at rates which are influenced by changes in the federal minimum wage. Accordingly, further increases in the minimum wage could increase our labor costs. The work conditions at our facilities are regulated by the Occupational Safety and Health Administration and are subject to periodic inspections by this agency. In addition, the enactment of recent legislation and resulting new government regulation relating to healthcare benefits have resulted in increased costs, and may result in additional cost increases and other effects in the future. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Fiscal 2013 Compared to Fiscal 2012 – Company Stores – Costs and expenses."

Other regulations. We are subject to a variety of consumer protection and similar laws and regulations at the federal, state and local level. Failure to comply with these laws and regulations could subject us to financial and other penalties. We have several contracts to serve United States military bases, which require compliance with certain applicable regulations. The stores which serve these military bases are subject to health and cleanliness inspections by military authorities.

Team Members

We employ approximately 4,300 people. Of these, approximately 200 are employed in our headquarters and administrative offices and approximately 100 are employed in our manufacturing and distribution center. We employ approximately 500 employees in our commissaries which serve wholesale customers almost exclusively, most of whom are employed full-time. In our other Krispy Kreme stores, we employ approximately 3,500 team members, of which approximately 2,000 are full-time (including approximately 500 managers, assistant managers and supervisors) with the balance employed part-time.

Kirola og lalengskriver och blir skriver from etter gallette komput Sittligentom et Harbarde block

We are not a party to any collective bargaining agreement, although we have experienced occasional unionization initiatives. We believe our relationships with our team members generally are good.

Available Information

We maintain a website at <u>www.krispykreme.com</u>. The information on our website is available for information purposes only and is not incorporated by reference in this Annual Report on Form 10-K.

We make available on or through our website certain reports and amendments to those reports, if applicable, that we file with or furnish to the SEC in accordance with the Exchange Act. These include our annual reports on Form 10-K, our quarterly reports on Form 10-Q, our current reports on Form 8-K and amendments to those reports. We make this information available on our website free of charge as soon as reasonably practicable after we electronically file the information with, or furnish it to, the SEC.

In addition, many of our corporate governance documents are available on our website. Our Nominating and Corporate Governance Committee Charter is available at www.krispykreme.com/gov_charter.pdf, our Compensation Committee Charter is available at www.krispykreme.com/comp_charter.pdf, our Audit Committee Charter is available at www.krispykreme.com/audit_charter.pdf, our Corporate Governance Guidelines are available at www.krispykreme.com/corpgovernance.pdf, our Code of Business Conduct and Ethics is available

at www.krispykreme.com/code of ethics.pdf, and our Code of Ethics for Chief Executive and Senior Financial Officers is available at www.krispykreme.com/officers ethics.pdf. Each of these documents is available in print to any shareholder who requests it by sending a written request to Krispy Kreme Doughnuts, Inc., 370 Knollwood Street, Winston-Salem, NC 27103, Attention: Secretary.

Item 1A. RISK FACTORS.

Our business, operations and financial condition are subject to various risks. Some of these risks are described below, and you should take such risks into account in evaluating us or any investment decision involving our Company. This section does not describe all risks that may be applicable to us, our industry or our business, and it is intended only as a summary of certain material risk factors. More detailed information concerning the risk factors described below is contained in other sections of this Annual Report on Form 10-K.

and the state of the property of the contract of the state of the

RISKS RELATING TO OUR BUSINESS

Store profitability is sensitive to changes in sales volume.

Each factory store has significant fixed or semi-fixed costs, and margins and profitability are significantly affected by doughnut sales volume. Because significant fixed and semi-fixed costs prevent us from reducing our operating expenses in proportion with declining sales, our earnings are negatively impacted if sales decline.

A number of factors have historically affected, and will continue to affect, our sales results, including, among other factors:

- Consumer trends, preferences and disposable income;
- Our ability to execute our business strategy effectively;
- Competition;
- General regional and national economic conditions; and
- Seasonality and weather conditions.

Changes in our sales results could cause the price of our common stock to fluctuate substantially.

We rely in part on our franchisees. Disputes with our franchisees, or failures by our franchisees to operate successfully, to develop or finance new stores or build them on suitable sites or open them on schedule, could adversely affect our growth and our operating results.

Franchisees, which are all independent operators and not Krispy Kreme employees, contributed (including through purchases from KK Supply Chain) approximately 32% of our total revenues in fiscal 2013. We rely in part on these franchisees and the manner in which they operate their locations to develop and promote our business. We occasionally have disputes with franchisees, which could materially adversely affect our business, financial condition and results of operations. We provide training and support to franchisees, but the quality of franchise store operations may be diminished by any number of factors beyond our control. The failure of our franchisees to operate franchises successfully could have a material adverse effect on us, our reputation and our brands, and could materially adversely affect our business, financial condition and results of operations. In addition, although we do not control our franchisees and they operate as independent contractors, actions taken by any of our franchisees may be seen by the public as actions taken by us, which, in turn, could adversely affect our reputation or brands.

Lack of access to financing by our franchisees on reasonable terms could adversely affect our future operations by limiting franchisees' ability to open new stores or leading to additional franchisee store closures, which would in turn reduce our franchise revenues and KK Supply Chain revenues. Most development agreements specify a schedule for opening stores in the territory covered by the agreement. These schedules form the basis for our expectations regarding the number and timing of new Krispy Kreme store openings. In the past, Krispy Kreme has agreed to extend or modify development schedules for certain franchisees and may do so in the future.

Franchisees opened 107 stores and closed 56 stores in fiscal 2013. Royalty revenues and most KK Supply Chain revenues are directly related to sales by franchise stores and, accordingly, the success of franchisees' operations has a direct effect on our revenues, results of operations and cash flows.

A portion of our growth strategy depends on opening new Krispy Kreme stores both domestically and internationally. Our ability to expand our store base is influenced by factors beyond our and our franchisees' control, which may slow store development and impair our strategy.

Our recent growth reflects the opening of new Krispy Kreme stores internationally, while the number of domestic franchise shops has remained almost constant over the past three years. Our ability to expand our store base both domestically and internationally is influenced by factors beyond our and our franchisees' control, which may slow store development and impair our growth strategy. The success of these new stores will be dependent in part on a number of factors, which neither we nor our franchisees can control.

化成化酸氢甲基酚甲酚 经发生的 多几十二十二人 多数

Our new domestic store operating model may not be successful.

We are working to refine our domestic store operating model to focus on small retail shops, including both satellite shops and shops that manufacture doughnuts but which are smaller and have lower capacity than traditional factory stores. Satellite stores in a market are provided doughnuts from a single traditional factory store or commissary at which all doughnut production for the market takes place. The Company currently plans to open from seven to ten new Company-operated small shops in fiscal 2014, most of which we expect to be small factory shops. Domestic franchisees also may open additional satellite stores and a small number of factory stores, as we work to refine our store formats for new domestic stores. We cannot predict whether this new model will be successful in increasing our profitability.

Political, economic, currency and other risks associated with our international operations could adversely affect our and our international franchisees' operating results.

As of February 3, 2013, there were 509 Krispy Kreme stores operated outside of the United States, representing 68% of our total store count, all of which were operated by franchisees. Our revenues from international franchisees are exposed to the potentially adverse effects of our franchisees' operations, political instability, currency exchange rates, local economic conditions and other risks associated with doing business in foreign countries. Royalties are based on a percentage of net sales generated by our foreign franchisees' operations. Royalties payable to us by our international franchisees are based on a conversion of local currencies to U.S. dollars using the prevailing exchange rate, and changes in exchange rates could adversely affect our revenues. To the extent that the portion of our revenues generated from international operations increases in the future, our exposure to changes in foreign political and economic conditions and currency fluctuations will increase.

We typically export our products, principally our doughnut mixes and doughnut mix concentrates, to our franchisees in markets outside the United States. Numerous government regulations apply to both the export of food products from the United States as well as the import of food products into other countries. If one or more of the ingredients in our products are banned, alternative ingredients would need to be identified. Although we intend to be proactive in addressing any product ingredient issues, such requirements may delay our ability to open stores in other countries in accordance with our desired schedule.

Our profitability is sensitive to changes in the cost of fuel and raw materials.

Although we utilize forward purchase contracts and futures contracts and options on such contracts to mitigate the risks related to commodity price fluctuations, such contracts do not fully mitigate commodity price risk, particularly over the longer term. In addition, the portion of our anticipated future commodity requirements that is subject to such contracts varies from time to time.

Flour, shortening and sugar are our three most significant ingredients. We also purchase a substantial amount of gasoline to fuel our fleet of wholesale delivery vehicles. The prices of wheat and soybean oil, which are the principal components of flour and shortening respectively, and of sugar and gasoline, have been volatile in recent years. Adverse changes in commodity prices could adversely affect the Company's profitability.

We are the exclusive supplier of doughnut mixes or mix concentrates to all Krispy Kreme stores worldwide. We also supply other key ingredients and flavors to all domestic Krispy Kreme Company stores. If we have any problems supplying these ingredients, our and our franchisees' ability to make doughnuts could be negatively affected.

We are the exclusive supplier of doughnut mixes for many domestic and international Krispy Kreme stores. As to other stores, we are the exclusive supplier of doughnut mix concentrates that are blended with other ingredients to produce doughnut mixes. We also are the exclusive supplier of other key ingredients and flavors to all domestic Company stores, most domestic franchise stores and some international franchise stores. We manufacture the doughnut mixes and concentrates at our mix manufacturing facility located in Winston-Salem, North Carolina. We distribute doughnut mixes and other key ingredients and flavors using independent contract distributors for Krispy Kreme shops domestically and internationally. We have a backup source to manufacture our doughnut mixes in the event of a loss of our Winston-Salem facility; this backup source currently produces mix for us for distribution in most Krispy Kreme stores west of the Mississippi River. Nevertheless, an interruption of production capacity at our manufacturing facility could impede our ability or that of our franchisees to make doughnuts. In addition, in the event that any of our supplier relationships terminate unexpectedly, even where we have multiple suppliers for the same ingredient, we may not be able to obtain adequate quantities of the same high-quality ingredient at competitive prices.

We are the only manufacturer of substantially all of our doughnut-making equipment. If we have any problems producing this equipment, our stores' ability to make doughnuts could be negatively affected.

ใน ค.ศ. พละพัทธารับ (พ.ศ. 25 (พ.ศ. 25 (มีพ.ศ. 25 (ม.ศ. 25 (ม.ศ. 27 (พ.ศ. 26 (ม.ศ. 26 (ม.ศ. 26 (ม.ศ. 26 (ม.ศ. 2

We manufacture our custom doughnut-making equipment in one facility in Winston-Salem, North Carolina. Although we have limited backup sources for the production of our equipment, obtaining new equipment quickly in the event of a loss of our Winston-Salem facility would be difficult and would jeopardize our ability to supply equipment to new stores or new parts for the maintenance of existing equipment in established stores on a timely basis.

We have only one supplier of glaze flavoring, and any interruption in supply could impair our ability to make our signature hot Original Glazed® doughnut.

We utilize a sole supplier for our glaze flavoring. Any interruption in the distribution from our current supplier could affect our ability to produce our signature hot Original Glazed® doughnut.

and the heavy had been and all the same of account

We are subject to franchise laws and regulations that govern our status as a franchisor and regulate some aspects of our franchise relationships. Our ability to develop new franchised stores and to enforce contractual rights against franchisees may be adversely affected by these laws and regulations, which could cause our franchise revenues to decline.

As a franchisor, we are subject to regulation by the FTC and by domestic and foreign laws regulating the offer and sale of franchises. Our failure to obtain or maintain approvals to offer franchises would cause us to lose future franchise revenues and KK Supply Chain revenues. In addition, domestic or foreign laws that regulate substantive aspects of our relationships with franchisees may limit our ability to terminate or otherwise resolve conflicts with our franchisees. Because we plan to grow primarily through franchising, any impairment of our ability to develop new franchise stores will negatively affect us and our growth strategy.

Sales to wholesale customers represent a significant portion of our sales. The infrastructure necessary to support wholesale distribution results in significant fixed and semi-fixed costs. Also, the loss of one of our large wholesale customers could adversely affect our financial condition and results of operations.

We have several large wholesale customers. Our top two such customers accounted for approximately 16% of total Company Stores segment revenues during fiscal 2013. The loss of one of our large national wholesale customers could adversely affect our results of operations across all domestic business segments. These customers do not enter into long-term contracts; instead, they make purchase decisions based on a combination of price,

product quality, consumer demand and service quality. They may in the future use more of their shelf space, including space currently used for our products, for other products, including private label products. If our sales to one or more of these customers are reduced, this reduction may adversely affect our business.

The Company operates a fleet network to support wholesale sales. Declines in wholesale sales without a commensurate reduction in operating expenses, as well as rising fuel costs, may adversely affect our business.

Our failure or inability to enforce our trademarks could adversely affect the value of our brands.

We own certain common-law trademark rights in the United States, as well as numerous trademark and service mark registrations in the United States and in other jurisdictions. We believe that our trademarks and other intellectual property rights are important to our success and our competitive position. We therefore devote appropriate resources to the protection of our trademarks and aggressively pursue persons who unlawfully and without our consent use or register our trademarks. We have a system in place that is designed to detect potential infringement on our trademarks, and we take appropriate action with regard to such infringement as circumstances warrant. The protective actions that we take, however, may not be sufficient, in some jurisdictions, to secure our trademark rights for some of the goods and services that we offer or to prevent imitation by others, which could adversely affect the value of our trademarks and service marks.

In certain jurisdictions outside the United States, specifically Costa Rica, Guatemala, India, Indonesia, Nigeria, Peru, the Philippines and Venezuela, we are aware that some businesses have registered, used and/or may be using "Krispy Kreme" (or its phonetic equivalent) in connection with doughnut-related goods and services. There may be similar such uses or registrations of which we are unaware and which could perhaps arise from prior users. These uses and/or registrations could limit our operations and possibly cause us to incur litigation costs, or pay damages or licensing fees to a prior user or registrant of similar intellectual property.

Loss of our trade secret recipes could adversely affect our sales.

We derive significant competitive benefit from the fact that our doughnut recipes are trade secrets. Although we take reasonable steps to safeguard our trade secrets, should they become known to competitors, our competitive position could suffer substantially.

Recent healthcare legislation could adversely affect our business.

Federal legislation regarding government-mandated health benefits is expected to increase our and our domestic franchisees' costs. Due to the breadth and complexity of the healthcare legislation, the lack of implementing regulations and interpretive guidance, and the phased-in nature of the implementation, it is difficult to predict the overall impact of the healthcare legislation on our business and the businesses of our domestic franchisees over the coming years. Possible adverse effects of the legislation include increased costs, exposure to expanded liability and requirements for us to revise the ways in which we conduct business. Our results of operations, financial position and cash flows could be adversely affected. Our domestic franchisees face the potential of similar adverse effects.

We are making investments to improve our information technology systems to increase our operational capabilities and effectiveness. Cost overruns or delays or difficulties in implementing new point-of-sale software or a planned enterprise resource planning system may adversely affect our business and results of operations.

We expect to increase investments during fiscal 2014 in technology and related infrastructure designed to improve our operational capabilities and effectiveness and to provide modern technology platforms to support future growth of our business. We are in the process of implementing new Company-wide point-of-sale system software and are in the planning stages of selecting and beginning implementation of a new enterprise resource planning system. Implementing these systems is a lengthy and expensive process that may result in a diversion of resources from other initiatives and activities. Continued execution of the project plans, or a divergence from them, may result in cost overruns, project delays or business interruptions. Any disruptions, delays or deficiencies in the design and/or implementation of these systems, or our inability to accurately predict the costs of such initiatives

or our failure to generate revenue and corresponding profits from such activities and investments, could impact our ability to perform necessary business operations, which could adversely affect our reputation, competitive position, business, results of operations and financial condition.

RISKS RELATING TO THE FOOD SERVICE INDUSTRY

The food service industry is affected by consumer preferences and perceptions. Changes in these preferences and perceptions may lessen the demand for our doughnuts, which would reduce sales and harm our business.

Food service businesses are often affected by changes in consumer tastes, national, regional and local economic conditions and demographic trends. Individual store performance may be adversely affected by traffic patterns, the cost and availability of labor, purchasing power, availability of products and the type, number and location of competing stores. Our sales have been and may continue to be affected by changing consumer tastes, such as health or dietary preferences that cause consumers to avoid doughnuts in favor of foods that are perceived as healthier. Moreover, because we are primarily dependent on a single product, if consumer demand for doughnuts should decrease, our business would suffer more than if we had a more diversified menu.

The food service industry is affected by litigation, regulation and publicity concerning food quality, health and other issues, which can cause customers to avoid our products and result in liabilities.

na na matang kabalan kalabahan na lambaha Propinsi ng Kabupat na minabahan ng Ang

Food service businesses can be adversely affected by litigation, by regulation and by complaints from customers or government authorities resulting from food quality, illness, injury or other health concerns or operating issues stemming from one store or a limited number of stores, including stores operated by our franchisees. In addition, class action lawsuits have been filed and may continue to be filed against various food service businesses (including quick service restaurants) alleging, among other things, that food service businesses have failed to disclose the health risks associated with high-fat foods and that certain food service business marketing practices have encouraged obesity. Adverse publicity about these allegations may negatively affect us and our franchisees, regardless of whether the allegations are true, by discouraging customers from buying our products. Because one of our competitive strengths is the taste and quality of our doughnuts, adverse publicity or regulations relating to food quality or other similar concerns affect us more than it would food service businesses that compete primarily on other factors. We could also incur significant liabilities if such a lawsuit or claim results in a decision against us or as a result of litigation costs regardless of the result.

The food service industry is affected by food safety issues, including food tampering or contamination.

Food safety, including the possibility of food tampering or contamination is a concern for any food service business. Any report or publicity linking the Company or one of its franchisees to food safety issues, including food tampering or contamination, could adversely affect our reputation as well as our revenues and profits. Food safety issues could also adversely affect the price and availability of affected ingredients, which could result in disruptions in our supply chain or lower margins for us and our franchisees. Additionally, food safety issues could expose the Company to litigation or governmental investigation.

The food service industry is affected by security risks for individually identifiable data of our guests, web-site users, and team members.

We receive and maintain certain personal information about our guests, web-site users, and team members. The use of this information by us is regulated by applicable law, as well as by certain third party contracts. If our security and information systems are compromised or our business associates fail to comply with these laws and regulations and this information is obtained by unauthorized person or used inappropriately, it could adversely affect our reputation, as well as our operations, their results, and our financial condition. Additionally, we could be subject to litigation or the imposition of penalties. As privacy and information security laws and regulations change, we may incur additional costs to ensure we remain in compliance with these laws and regulations.

akkaran kalan 1960 tahun mengabakan bang Kilian serengah belah begil berapak perangan yan melalah kelan berapa Bakah mengalan palangan berapak mengan diri diri bangan permanan mengah begil sam rekalah berapak bang kelanga

Our success depends on our ability to compete with many food service businesses.

We compete with many well-established food service companies. At the retail level, we compete with other doughnut retailers and bakeries, specialty coffee retailers, bagel shops, fast-food restaurants, delicatessens, take-out food service companies, convenience stores and supermarkets. At the wholesale level, we compete primarily with grocery store bakeries, packaged snack foods and vending machine dispensers of snack foods. Aggressive pricing by our competitors or the entrance of new competitors into our markets could reduce our sales and profit margins. Moreover, many of our competitors offer consumers a wider range of products. Many of our competitors or potential competitors have substantially greater financial and other resources than we do which may allow them to react to changes in pricing, marketing and the quick service restaurant industry better than we can. As competitors expand their operations, we expect competition to intensify. In addition, the start-up costs associated with retail doughnut and similar food service establishments are not a significant impediment to entry into the retail doughnut business. We also compete with other employers in our markets for hourly workers and may be subject to higher labor costs.

RISKS RELATING TO OWNERSHIP OF OUR COMMON STOCK and the state of the s

The market price of our common stock has been volatile and may continue to be volatile, and the value of any investment may decline.

ha ha a sa baran a sa an da waa ah ka ha ah baray ak <mark>ah k</mark>a ay a sa sa an an arabara a sa an arabara a sa an arabara a

The market price of our common stock has been volatile and may continue to be volatile. This volatility may cause wide fluctuations in the price of our common stock, which is listed on the New York Stock Exchange. The market price may fluctuate in response to many factors including:

- Changes in general conditions in the economy or the financial markets;
- Variations in our quarterly operating results or our operating results failing to meet the expectations of securities analysts or investors in a particular period;
- Changes in financial estimates by securities analysts:
- Other developments affecting Krispy Kreme, our industry, customers or competitors; and
- The operating and stock price performance of companies that investors deem comparable to Krispy Kreme.

Our charter, bylaws and tax asset protection plan contain provisions that may make it more difficult or expensive to acquire us in the future or may negatively affect our stock price.

Our articles of incorporation, bylaws and tax asset protection plan contain several provisions that may make it more difficult for a third party to acquire control of us without the approval of our board of directors. These provisions may make it more difficult or expensive for a third party to acquire a majority of our outstanding voting common stock. They may also delay, prevent or deter a merger, acquisition, tender offer, proxy contest or other transaction that might otherwise result in our shareholders' receiving a premium over the market price for their common stock.

Item 1B. UNRESOLVED STAFF COMMENTS.

None.

Item 2. PROPERTIES.

Stores. As of February 3, 2013, there were 748 Krispy Kreme stores systemwide, of which 97 were Company stores and 651 were operated by franchisees.

- As of February 3, 2013, all of our Company stores, except our seven commissaries, had on-premises sales, and 43 of our Company factory stores also engaged in wholesale sales.
- Of the 97 Company stores in operation as of February 3, 2013, we owned the land and building for 42 stores, we owned the building and leased the land for 23 stores, leased both the land and building for 9 stores and leased space for 23 in-line and end cap locations.

KK Supply Chain facilities. We own a 150,000 square foot facility in Winston-Salem, North Carolina, which houses our doughnut mix plant. This facility also houses a commissary serving wholesale customers that was opened late in fiscal 2012. We own another 105,000 square foot facility in Winston-Salem which we use primarily as our equipment manufacturing facility, but which also contains our research and development and training facilities.

Other properties. Our corporate headquarters is located in Winston-Salem, North Carolina. We lease the entire 86,000 square feet of this facility under a lease that expires on November 30, 2026, with two five-year renewal options.

Substantially all of the Company's fee simple and leasehold interest in real properties are pledged as collateral for the Company's secured credit facilities.

Item 3. LEGAL PROCEEDINGS.

Pending Matters

Except as disclosed below, the Company currently is not a party to any material legal proceedings.

K² Asia Litigation

On April 7, 2009, a Cayman Islands corporation, K² Asia Ventures, and its owners filed a lawsuit in Forsyth County, North Carolina Superior Court against the Company, its franchisee in the Philippines, and other persons associated with the franchisee. The suit alleges that the Company and the other defendants conspired to deprive the plaintiffs of claimed "exclusive rights" to negotiate franchise and development agreements with prospective franchisees in the Philippines, and seeks unspecified damages. The Company believes that these allegations are false and intends to vigorously defend against the lawsuit.

Colchester Security Litigation

On January 27, 2012, Colchester Security II, LLC, the Company's former landlord in Lorton, Virginia, filed a state court suit against the Company in the Circuit Court of Fairfax County, Virginia, alleging breach of the lease and negligence resulting in property damage at a commissary facility previously operated by the Company. The plaintiff seeks \$2.7 million in damages. The Company denies the allegations and intends to pursue counterclaims of approximately \$3 million relating to indemnity claims and breach of the lease. In March 2013, both parties agreed to avail themselves of the Fairfax County Court's alternate dispute resolution program, and now the matter has been set for binding arbitration to occur in late June 2013.

Third Quarter Fourth Quarter		13.19	6.77

Holders

As of March 22, 2013, there were approximately 15,500 shareholders of record of our common stock.

Dividends

We did not pay any cash dividends in fiscal 2013 or fiscal 2012. Because we intend to invest significant amounts of cash in assets and activities we believe will grow our business and generate significant earnings over the long term, we do not anticipate paying regular cash dividends in the foreseeable future. Furthermore, the terms of our secured credit facilities impose significant limitations on the payment of dividends on, and redemptions of, our common stock. Pursuant to an authorization by our Board of Directors, and with the consent of our lenders, in fiscal 2013 we repurchased in open market transactions approximately 3,113,000 of our common shares for an aggregate purchase price of approximately \$20 million, an average price of \$6.42 per share. We may make additional share repurchases or distribute cash to our shareholders in the future if we conclude doing so is in our shareholders' best interests.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following tables set forth operating metrics with respect to the Krispy Kreme stores operated by the Company (all of which are located in the United States) and the stores operated by the Company's domestic and international franchisees.

The Company's fiscal year ends on the Sunday closest to January 31, which periodically results in a 53-week year. Fiscal 2013 included 53 weeks. Operating metrics in the table below for fiscal 2013 are presented for the 52 weeks ended January 27, 2013 in order to enhance comparability of the fiscal 2013 metrics with those for fiscal 2012 and 2011, each of which contained 52 weeks.

- (1) Represents the change in International Franchise same store sales computed by reconverting franchise store sales in each foreign currency to U.S. dollars at a constant rate of exchange for each period.
- (2) Excludes sales among Company and franchise stores. Systemwide sales is a non-GAAP measure.
- (3) Represents International Franchise store sales computed by reconverting International Franchise store sales for the year ended January 29, 2012 and January 30, 2011 to U.S. dollars based upon the weighted average of the exchange rates prevailing in the year ended February 3, 2013.
- (4) Includes sales between Company and franchise stores.
- (5) Metrics reflect only stores open at the respective period end.

The change in "same store sales" is computed by dividing the aggregate on-premises sales (including fundraising sales) during the current year period for all stores which had been open for more than 56 consecutive weeks during the current year (but only to the extent such sales occurred in the 57th or later week of each store's operation) by the aggregate on-premises sales of such stores for the comparable weeks in the preceding year. Once a store has been open for at least 57 consecutive weeks, its sales are included in the computation of same store sales for all subsequent periods. In the event a store is closed temporarily (for example, for remodeling) and has no sales during one or more weeks, such store's sales for the comparable weeks during the earlier or subsequent period are excluded from the same store sales computation. The change in same store customer count is similarly computed, but is based upon the number of retail transactions reported in the Company's point-of-sale system.

For wholesale sales, "average weekly number of doors" represents the average number of customer locations to which product deliveries were made during a week, and "average weekly sales per door" represents the average weekly sales to each such location.

Systemwide sales, a non-GAAP financial measure, include sales by both Company and franchise Krispy Kreme stores. The Company believes systemwide sales data are useful in assessing consumer demand for the Company's products, the overall success of the Krispy Kreme brand and, ultimately, the performance of the Company. All of the Company's royalty revenues are computed as percentages of sales made by the Company's domestic and international franchisees, and substantially all of KK Supply Chain's external sales of doughnut mixes and other ingredients ultimately are determined by demand for the Company's products at franchise stores. Accordingly, sales by the Company's franchisees have a direct effect on the Company's royalty and KK Supply Chain revenues, and therefore on the Company's profitability. The Company's consolidated financial statements appearing elsewhere herein include sales by Company stores, sales to franchisees by the KK Supply Chain business segment, and royalties and fees received from franchise stores based on their sales, but exclude sales by franchise stores to their customers.

The following table sets forth data about the number of systemwide stores as of February 3, 2013, January 29, 2012 and January 30, 2011.

FISCAL 2013 COMPARED TO FISCAL 2012 (Fig. 4) and a state of the part of the pa

The following discussion of the Company's results of operations should be read in conjunction with the consolidated financial statements and notes thereto appearing elsewhere herein.

Matters Affecting Comparability

The Company's fiscal year ends on the Sunday closest to January 31, which periodically results in a 53-week year. The year ended February 3, 2013 included 53 weeks, compared to 52 weeks for the year ended January 29, 2012. Accordingly, financial results for fiscal 2013 are not directly comparable to those of fiscal 2012.

·教育基础的的 古人的人的特别的事业。

B. B. British British B. D. B. B. British as

of Share gas countered to the end of and the counter with the counter

capter in emiliar in the horizonal discounting two M

Additionally, the Company's provision for income taxes, net income and earnings per share for fiscal 2013 are not comparable to the corresponding amounts for fiscal 2012 as a result of the reversal of valuation allowances on deferred tax assets in the fourth quarter of fiscal 2012 and the resulting increase in income tax expense in fiscal 2013. The Company has substantial net operating loss carryforwards and, accordingly, the Company's cash payments for income taxes, which were not affected by the reversal of the valuation allowance on deferred tax assets, are expected to remain insignificant for the foreseeable future. See "Results of Operations – Fiscal 2013 Compared to Fiscal 2012 - Provision for Income Taxes" below, and Note 3 to the consolidated financial statements appearing elsewhere herein.

Finally, in the second quarter of fiscal 2012, the Company recognized a gain of approximately \$6.2 million on the sale of its 30% equity interest in KK Mexico (approximately \$4.7 million after deduction of approximately \$1.5 million of Mexican taxes payable on the transaction), as described in Note 8 to the consolidated financial statements appearing elsewhere herein. Such gains should not be expected to occur regularly.

Management evaluates the Company's results of operations using, among other measures, adjusted net income and adjusted earnings per share, which include the provision for income taxes only to the extent such taxes are currently payable in cash. In addition, management excludes from adjusted net income charges and credits that are unusual and infrequently occurring. Management believes adjusted net income and adjusted earnings per share are useful performance measures because they more closely measure the cash flows generated by the Company's operations and the trends in those cash flows than do GAAP net income and earnings per share, and because they exclude the effects of transactions that are not indicative of the Company's ongoing results of operations.

Adjusted net income and adjusted earnings per share are non-GAAP measures.

The following presentation of adjusted net income, and the related reconciliation of adjusted net income to GAAP net income and presentation of adjusted earnings per share, are intended to (1) assist the reader in understanding the effects of the reversal of the valuation allowance and the non-recurring gain on the sale of the interest in KK Mexico on the Company's results of operations for fiscal 2012; (2) facilitate comparisons of fiscal 2013 results with the Company's results for fiscal 2012; and (3) illustrate the material difference between the Company's income tax expense and income taxes currently payable. These non-GAAP performance measures are

consistent with other measurements made by management in the operation of the business which do not consider income taxes except to the extent to which those taxes currently are payable; for example, capital allocation of side decisions and incentive compensation measurements that are made on a pretax basis.

Overview

Total revenues rose to \$435.8 million in fiscal 2013 compared to \$403.2 million in fiscal 2012. Excluding the 53rd week, total revenues rose 5.9% to \$426.8 million.

Consolidated operating income increased to \$37.7 million in fiscal 2013 (of which approximately \$1.3 million relates to the 53rd week) from \$25.6 million in fiscal 2012. Consolidated net income was \$20.8 million compared to \$166.3 million. Consolidated net income for fiscal 2012 included an unusual credit of \$139.6 million from the reversal of valuation allowances on deferred tax assets and a \$4.7 million after-tax gain on the sale of the Company's 30% equity interest in KK Mexico. See "Matters Affecting Comparability" above.

A reconciliation of Company Stores segment sales from fiscal 2012 to fiscal 2013 follows:

the control of the co	On-Premises	Wholesale	Total
the control of the property of the party of	tida la Maria	(In thousands)	
Sales for the year ended January 29, 2012	\$126,003	\$145,654	\$271,657
Fiscal 2012 sales at closed stores	(723)	- :	(723)
Fiscal 2013 sales at closed stores	741		741
Increase in sales at established stores (open stores only)	9,565	7,471	17,036
Increase in sales at stores opened in fiscal 2012	3,077		3,077
Sales at stores opened in fiscal 2013	3,143		3,143
Sales at stores acquired in fiscal 2013	1,112	451	1,563
Sales for the year ended February 3, 2013	\$142,918	\$153,576	\$296,494

Sales at Company Stores increased to \$296.5 million in fiscal 2013 from \$271.7 million in fiscal 2012. Excluding the 53rd week, sales increased 6.9% to \$290.3 million. Selling price increases in the on-premises and wholesale distribution channels accounted for approximately 1.2 percentage points of the increase in sales, exclusive of the effects of higher pricing on unit volumes; such effects are difficult to measure reliably. As with all consumer products, however, higher prices may negatively affect sales. The Company believes this phenomenon is more pronounced in the wholesale channel where competing products are merchandised alongside those of the Company.

The following table presents sales metrics for Company stores:

On-premises sales

The components of the change in same store sales at Company stores are as follows:

一个一个大型,我们就是一个一个一个一个一个一个一个一个一个一个一个一个一个一个一个一个一个一个一个	32 110	cks Ended
	2013	January 29, 2012
Change in same store sales attributable to:		200 (400)
Retail pricing	0.7%	7.4%
Guest check average (exclusive of the effects of pricing)	(1.4)	(2.9)
Customer count		
Other	0.0	0.2
Total	5.5%	5.2%

On-premises sales increased to \$142.9 million in fiscal 2013 compared to \$126.0 million in fiscal 2012. Excluding the 53rd week, on-premises sales increased 10.9% to \$139.8 million. The Company is developing and implementing new and enhanced marketing programs designed to increase guest visit frequency. In addition to improved marketing programs, management believes that customer traffic has been positively affected by ongoing store remodelings, an emphasis on hospitality, and continued use of creative limited time doughnut offerings. Additionally, approximately 0.7 percentage points of the sales increase reflects retail price increases implemented in the first quarter of fiscal 2012. On March 7, 2011, the Company implemented price increases at substantially all its stores designed to help offset the rising costs of doughnut mixes, other ingredients and fuel resulting from higher commodity prices. These price increases affected items comprising approximately 60% of on-premises sales, and the average price increase on these items was approximately 14%.

On February 18, 2013, the Company implemented on-premises price increases averaging approximately 3% in its Company shops.

Higher customer traffic was the principal driver of the improvement in same store sales, although cannibalization and honeymoon effects of new stores in expansion markets dampened somewhat the gain in same store customer count in fiscal 2013. "Cannibalization effect" means the tendency for new stores to become successful, in part or in whole, by "shifting" sales from existing stores in the same market. "Honeymoon effect" means the common pattern for many start-up restaurants in which a flurry of activity due to start-up publicity and natural curiosity is followed by a decline during which a steady repeat customer base develops.

Wholesale distribution

Sales to wholesale accounts increased to \$153.6 million in fiscal 2013 compared to \$145.7 in fiscal 2012. Excluding the 53rd week, sales to wholesale accounts increased 3.3% to \$150.5 million. Approximately 1.4 percentage points of the sales increase is due to price increases. The Company started implementing price increases for some products offered in the wholesale channel late in the first quarter of fiscal 2012, and substantially completed implementing the increases during the second quarter. Those price increases affected products comprising approximately 60% of wholesale sales, and the average price increase on those products was approximately 11%. The Company currently plans to implement modest price increases in the wholesale distribution channel in the second or third quarter of fiscal 2014.

Sales to grocers and mass merchants increased to \$93.4 million in fiscal 2013 compared to \$87.7 million in fiscal 2012. Excluding the 53rd week, sales to grocers and mass merchants increased 4.4%, with an 8.9% increase in average weekly sales per door partially offset by a 4.0% decline in the average number of doors served. The decline in the average number of doors served in the grocery/mass merchant channel reflects, among other things, store closures by a regional grocery store customer as well as the elimination of loose doughnut sales at another regional grocer, although the Company continues to sell packaged products to this customer. Sales of loose unpackaged products comprised approximately 2% of sales to grocery/mass merchant customers for fiscal 2013, with the balance comprised of sales of packaged products.

Convenience store sales increased to \$57.0 million in fiscal 2013 compared to \$55.0 million in fiscal 2012. Excluding the 53rd week, sales to convenience stores increased 1.6%, reflecting an 8.8% increase in the average weekly sales per door partially offset by a 6.3% decline in the average number of doors served. The decline in the average number of doors served in the convenience store channel reflects, among other things, a reduction in the number of stops at relatively low volume doors, as well as the loss of a regional convenience store account. Sales of loose unpackaged products comprised approximately 80% of sales to convenience store customers for fiscal 2013, with the balance comprised of sales of packaged products.

Costs and expenses

Total cost of sales as a percentage of revenues declined by 2.0 percentage points from 72.7% in fiscal 2012 to 70.7% of revenues in fiscal 2013.

STAND WEDDINGS CONTROL

The cost of food, beverage and packaging as a percentage of revenues decreased by 1.2 percentage points in fiscal 2013 compared to fiscal 2012. The aggregate purchase price increases for food, beverage and packaging were very slight. The decline in food, beverage and packaging as a percentage of revenues reflects improved materials consumption and a greater percentage of sales derived from on-premises customers compared to fiscal 2012, and lower product returns on wholesale distribution.

The Company's Supply Chain has entered into contracts to purchase approximately half of its flour requirements for fiscal 2014, together with approximately 70% of its shortening requirements, and all of its estimated sugar requirements. Based upon current market forecasts, the Company expects its aggregate cost of ingredients and packaging to rise modestly in fiscal 2014 compared to fiscal 2013, and expects to recover these higher costs through price increases or cost reduction measures. The Company's contracts for sugar also cover substantially all of its estimated fiscal 2015 requirements.

Shop labor as a percentage of revenues declined by 0.6 percentage points from fiscal 2012 to 17.9% of revenues in fiscal 2013, principally due to higher revenues and improved labor cost management.

Vehicle costs as a percentage of revenues decreased from 6.3% of revenues in fiscal 2012 to 5.8% of revenues in fiscal 2013, principally due to higher sales resulting from price increases and lower fuel costs due to a reduction in mileage due to the reduction in the number of wholesale doors served.

Many segment operating costs are fixed or semi-fixed in nature and, accordingly, segment profit margins are sensitive to changes in sales volumes.

The Company is self-insured for workers' compensation, vehicle and general liability claims, but maintains stop-loss coverage for individual claims exceeding certain amounts. The Company provides for claims under these self-insured programs using actuarial methods as described in Note 1 to the consolidated financial statements appearing elsewhere herein, and periodically updates actuarial valuations of its self-insurance reserves at least annually. Such periodic actuarial valuations result in changes over time in the estimated amounts which ultimately will be paid for claims under these programs to reflect the Company's actual claims experience for each policy year as well as trends in claims experience over multiple years. Such claims, particularly workers' compensation claims, often are paid over a number of years following the year in which the insured events occur, and the estimated ultimate cost of each year's claims accordingly is adjusted over time as additional information becomes available. As a result of the periodic update of its actuarial valuation, the Company recorded favorable adjustments for changes in estimates to its self-insurance claims liabilities related to prior policy years of approximately \$730,000 in fiscal 2013, of which \$360,000 was recorded in the fourth quarter, and \$1.3 million in 2012, of which \$830,000 million was recorded in the fourth quarter. The \$730,000 in favorable adjustments recorded in fiscal 2013 includes an unfavorable adjustment relating to workers' compensation liability claims of approximately \$10,000 included in employee benefits in the table above, a favorable adjustment relating to vehicle liability claims of approximately \$390,000 included in vehicle costs, and a favorable adjustment relating to general liability claims of approximately \$275,000 included in other operating costs. An additional \$75,000 of favorable adjustments was recorded in other segments of the business. The \$1.3 million in favorable adjustments recorded in fiscal 2012 includes favorable adjustments of \$1.1 million relating to workers' compensation liability claims, \$40,000 relating to vehicle liability claims and \$180,000 relating to general liability claims.

Depreciation expense increased in fiscal 2013 to 2.7% of revenues from 2.4% in fiscal 2012 due to increased capital expenditures in fiscal 2012 and 2013 including construction of new stores, store refurbishment efforts on existing stores and investments in information technology systems.

The Patient Protection and Affordable Care Act (the "Act") requires businesses employing fifty or more full-time equivalent employees to offer health care benefits to those full-time employees beginning in January 2014, or be subject to an annual penalty. Those benefits must be provided under a health care plan which provides a certain minimum scope of health care services. The Act limits the portion of the cost of the benefits which the Company can require employees to pay.

The Company currently employs a substantial number of persons to whom the Company does not currently provide health care benefits but who could be entitled to receive health care benefits under the Act. The Company does not know the amount by which its costs will increase assuming the above provisions of the Act are implemented in January 2014 because, among other reasons, many of the specifics relating to implementation, including certain of the specifics of the coverage required to be offered, are to be contained in regulations which have not yet been drafted. In addition, the Company does not know how many of the potentially newly-eligible employees will elect to obtain coverage under the Act.

However, based on information currently available to the Company and the Company's analyses to-date and its current cost estimates, management currently does not expect that the aggregate incremental cost of providing health care coverage prescribed by the Act will exceed its current costs by more than approximately \$5 million annually. The Company currently believes its incremental costs will be less than such amount, and may be substantially less. The Company is continuing to study and evaluate the requirements of the Act, and the Company's estimate of the additional cost of providing benefits mandated by the Act is expected to change as the Company gains additional information and makes decisions affecting its implementation of the Act's requirements.

Domestic Franchise revenues were \$10.3 million in fiscal 2013 compared to \$9.5 million in fiscal 2012. Excluding the 53rd week, Domestic Franchise revenues increased 6.5% to \$10.1 million. On a 52-week basis, the increase reflects higher domestic royalty revenues resulting from an increase in sales by domestic franchise stores from \$262 million in fiscal 2012 to \$281 million in fiscal 2013 partially offset by a reduction in other franchise revenue. Domestic Franchise same store sales rose 6.8% in fiscal 2013.

Domestic Franchise operating expenses include costs to recruit new domestic franchisees, to assist in domestic store openings, and to monitor and aid in the performance of domestic franchise stores, as well as allocated corporate costs. Domestic Franchise operating expenses in fiscal 2012 included a provision of \$820,000 for payments under a lease guarantee associated with a franchisee whose franchise agreements the Company terminated. This provision was partially offset by the reversal of a previously recorded accrual of \$110,000 related to a franchisee lease guarantee as a result of the Company receiving a release from the related guarantee during fiscal 2012. The decrease in Domestic Franchise operating expenses also reflects a decline in legal and trademark protection costs of approximately \$250,000, of which approximately \$160,000 is related to the fiscal 2012 franchisee termination.

During the fourth quarter of fiscal 2013, the Company added new personnel to the Domestic Franchise segment and in fiscal 2014 expects to incur additional franchise marketing costs in connection with management's plan to reengage in franchise expansion efforts to drive domestic franchise unit growth.

Domestic franchisees opened nine stores and closed seven stores in fiscal 2013. On August 30, 2012, the Company acquired two Krispy Kreme stores from one of its domestic franchisees as more fully described in Note 21 to the consolidated financial statements appearing elsewhere herein. As of February 3, 2013, existing development and franchise agreements for territories in the United States provide for the development of 54 additional stores through fiscal 2018. Royalty revenues are directly related to sales by franchise stores and, accordingly, the success of franchisees' operations has a direct effect on the Company's revenues, results of operations and cash flows.

International Franchise

$(x_1, x_2, \dots, x_n) = (x_1, \dots, x_n) = (x_1, \dots, x_n)$	The College States	Control of the second	Year I	Ended
en e				
			(In tho	ısands)
REVENUES: Royalties. Development and franchise fees Total revenues.				\$21,308 1,313 22,621
OPERATING EXPENSES:				
Segment operating expenses			6,344	6,261
Depreciation expense			10	··· 6
Allocated corporate overhead	· · · · · · · · · · · · · · · · · · ·	, , , <i> , . ,</i>	1,200	1,300
Total operating expenses			7,554	7,567
SEGMENT OPERATING INCOME			\$17,387	\$15,054

International Franchise royalties were \$23.3 million in fiscal 2013 compared to \$21.3 million in fiscal 2012. Excluding the 53rd week, International Franchise royalties increased 7.5%, driven by an increase in sales by international franchise stores from \$384 million in fiscal 2012 to \$423 million in fiscal 2013 (measured on a 52-week basis). Changes in the rates of exchange between the U.S. dollar and the foreign currencies in which the Company's international franchisees do business decreased sales by international franchisees measured in U.S. dollars by approximately \$3.9 million in fiscal 2013 compared to fiscal 2012, which adversely affected international royalty revenues by approximately \$230,000.

Royalties and franchise fees in fiscal 2012 included approximately \$280,000 and \$95,000, respectively, of amounts relating to the Company's franchisee in Mexico which were accrued in prior periods but which had not previously been reported as revenue because of uncertainty surrounding their collection. Such amounts were reported as revenue in recognition of the payment of such amounts to the Company on May 5, 2011, in connection with the Company's sale of its 30% equity interest in the franchisee, as more fully described in Note 8 to the consolidated financial statements appearing elsewhere herein.

International Franchise same store sales, measured on a constant currency basis to remove the effects of changing exchange rates between foreign currencies and the U.S. dollar ("constant dollar same store sales"), fell 8.1%. The decline in International Franchise same store sales reflects, among other things, waning honeymoon effects from the large number of new stores opened internationally in recent years and the cannibalization effects on initial stores in new markets of additional store openings in those markets.

Constant dollar same store sales in established markets fell 0.8% in fiscal 2013 and fell 14.0% in new markets. "Established markets" means countries in which the first Krispy Kreme store opened before fiscal 2007. Sales at stores in established markets comprised approximately 49% of aggregate sales underlying the constant dollar same store sales metric. While the Company considers countries in which Krispy Kreme first opened before fiscal 2007 to be established markets, franchisees in those markets continue to develop their business. Of the 467 international shops currently in operation that opened since the beginning of fiscal 2007, 195 shops are in these established markets.

International Franchise operating expenses include costs to recruit new international franchisees, to assist in international store openings, and to monitor and aid in the performance of international franchise stores, as well as allocated corporate costs. International Franchise operating expenses were flat at \$6.3 million in fiscal 2013 compared to fiscal 2012. International Franchise operating expenses in fiscal 2013 reflect a decline in legal fees associated with certain litigation as well as lower share-based compensation expense compared to fiscal 2012. Share-based compensation expense was elevated in fiscal 2012 as a result of an executive officer in the segment achieving retirement eligibility under the terms of the Company's stock compensation plan. Share-based payment awards to retirement eligible persons are charged to expense at the grant date rather than being amortized over the four-year vesting period of the awards. In addition, in fiscal 2012, the Company recorded a net credit of \$380,000 to the bad debt provision principally related to the Mexican franchise discussed above, while fiscal 2013 expenses include a charge to bad debt expense of \$180,000. Management expects International Franchise operating expenses to rise in fiscal 2014 due to personnel additions to support international franchise growth, as well as anticipated fiscal 2014 shop openings in new markets, which typically require a greater level of franchisor support than openings in existing markets.

International franchisees opened 98 stores and closed 49 stores in fiscal 2013. As of February 3, 2013, existing development and franchise agreements for territories outside the United States provide for the development of 353 additional stores through fiscal 2019. Royalty revenues are directly related to sales by franchise stores and, accordingly, the success of franchisees' operations has a direct effect on the Company's revenues, results of operations and cash flows.

KK Supply Chain

The components of KK Supply Chain revenues and expenses (expressed in dollars and as a percentage of total revenues before intersegment sales elimination) are set forth in the table below (percentage amounts may not add to totals due to rounding).

Total operating costs	182,962	176,293	84.9	85.4
SEGMENT OPERATING INCOME	\$ 32,450	\$ 30,160	15.1%	14.6%

KK Supply Chain revenues before intersegment sales eliminations were \$215.4 million in fiscal 2013 compared to \$206.5 million in fiscal 2012. Excluding the 53rd week, KK Supply Chain revenues before intersegment sales eliminations increased 2.2%.

Sales of doughnut mixes rose 4.6% on a 52-week basis in fiscal 2013, reflecting higher unit volumes partially offset by lower selling prices resulting from a reduction in raw materials costs.

Sales of other ingredients, packaging and supplies, made principally to Company and Domestic Franchise stores, rose 0.8% on a 52-week basis fiscal 2013 due to higher selling prices of sugar partially offset by lower unit volumes in certain categories. While 52-week systemwide sales at Company and Domestic Franchise stores rose in fiscal 2013 compared to fiscal 2012, a greater percentage of such systemwide sales was to on-premises customers compared to wholesale customers in fiscal 2013. On-premises sales at Company and Domestic Franchise stores generate proportionately lower KK Supply Chain sales than do sales to wholesale customers, because the average customer unit selling price in the on-premises channel is generally higher than in the wholesale channel and because the product returns associated with wholesale distribution generate significant waste. In addition, the Company outsourced distribution to its International Franchise stores in fiscal 2012, which resulted in a reduction in sales of non-mix products to those franchisees.

KK Supply Chain utilizes a fuel surcharge program to recoup additional freight costs resulting from increases in fuel costs. Charges under the program are based upon the price of diesel fuel.

KK Supply Chain input costs increased to 69.4% of revenues in fiscal 2013 compared to 68.7% of revenues in fiscal 2012, principally as a result of an approximate 10% increase in the cost of sugar. While the Company raised selling prices to recover higher sugar costs, the Company did not mark up such higher costs, which resulted in an increase in the overall cost of goods produced and purchased as a percentage of revenues.

Inbound freight as a percentage of revenues increased 0.4 percentage points in fiscal 2013 as a result of outsourcing product distribution for stores east of the Mississippi to a third party provider beginning in fiscal 2012. These increased inbound freight costs were substantially offset by a reduction in distribution costs and other segment operating costs, which include segment management, purchasing and customer service and support expenses associated with the outsourcing of product distribution. Other segment operating expenses in fiscal 2012 also included a charge of approximately \$330,000 for the settlement of certain sales tax litigation.

Franchisees opened 107 stores and closed 56 stores in fiscal 2013. A substantial portion of KK Supply Chain's revenues are directly related to sales by franchise stores and, accordingly, the success of franchisees' operations has a direct effect on the Company's revenues, results of operations and cash flows.

An increasing percentage of franchise store sales is attributable to sales by franchisees outside North America. While the Company sells doughnut mixes and concentrates to its international franchisees, these franchisees purchase substantially all other ingredients, packaging and supplies from local or regional vendors approved by the Company. Accordingly, KK Supply Chain revenues are less correlated with sales by international franchisees than with sales by domestic franchisees.

General and Administrative Expenses

General and administrative expenses were \$25.1 million in fiscal 2013. Excluding the 53rd week, general and administrative expenses were \$24.8 million, or 5.8% of total revenues, in fiscal 2013 compared to \$22.2 million, or 5.5% of total revenues, in fiscal 2012.

The increase in general and administrative expenses in fiscal 2013 reflects an increase in share-based compensation of \$317,000. Share-based compensation in fiscal 2012 included a charge of \$332,000 to correct prior years' errors as described below. Exclusive of the effects of the error correction, share-based compensation expense rose approximately \$650,000 most of which was the result of an executive officer achieving retirement eligibility under the terms of the Company's stock compensation plan in the first quarter of fiscal 2013. Share-based payment awards to retirement eligible persons are charged to expense over the period from the grant date

to the date of retirement eligibility rather than being amortized over the four-year vesting period of the awards, which has the effect of accelerating the recognition of the expense associated with awards to such persons as they approach retirement eligibility.

General and administrative expenses in fiscal 2013 also reflect approximately \$1.4 million of expenses associated with the selection of a new enterprise resource planning system, professional fees associated with the implementation of the tax asset protection plan, and a provision related to the settlement of certain nuisance litigation.

General and administrative expenses in the fourth quarter of fiscal 2012 reflect a reversal of approximately \$840,000 of remaining accruals for pledges to certain nonprofit organizations made in fiscal 2001 through 2004 which the Company determined for various reasons would not be honored. Such amount was largely offset by one-time costs associated with hiring a new executive officer, as well as by a charge of \$474,000 to correct accounting computational errors related to share-based compensation arising in prior periods (of which \$142,000 arose in earlier quarters of fiscal 2012 and the balance in fiscal 2007 through 2011). Except for the quantitative effect of the correction of the errors on the fourth quarter of fiscal 2012, the share-based compensation errors were neither quantitatively nor qualitatively material to the results of any period; accordingly, the errors were corrected in the fourth quarter of fiscal 2012 and prior financial statements were not restated.

The Company is seeking to minimize general and administrative expenses in order to gain operating leverage as its revenues rise.

Impairment Charges and Lease Termination Costs

Impairment charges and lease termination costs were \$306,000 in fiscal 2013 compared to \$793,000 in fiscal 2012. The components of these charges are set forth in the following table:

	Year E	nded
	February 3, 2013	January 29, 2012
Impairment of long-lived assets	(In thou	sands) \$ 60
Lease termination costs		
and the second of the second o	<u>\$306</u>	<u>\$793</u>

Impairment charges relate to the Company Stores segment. The Company tests long-lived assets for impairment when events or changes in circumstances indicate that their carrying value may not be recoverable. These events and changes in circumstances include store closing and refranchising decisions, the effects of changing costs on current results of operations, observed trends in operating results, and evidence of changed circumstances observed as a part of periodic reforecasts of future operating results and as part of the Company's annual budgeting process. Impairment charges generally relate to stores expected to be closed or refranchised, as well as to stores management believes will not generate sufficient future cash flows to enable the Company to recover the carrying value of the stores' assets, but which management has not yet decided to close. When the Company concludes that the carrying value of long-lived assets is not recoverable (based on future projected undiscounted cash flows), the Company records impairment charges to reduce the carrying value of those assets to their estimated fair values. The fair values of these assets are estimated based on the present value of estimated future cash flows, on independent appraisals and, in the case of assets the Company is negotiating to sell, based on the Company's negotiations with unrelated third-party buyers.

Lease termination costs represent the estimated fair value of liabilities related to unexpired leases, after reduction by the amount of accrued rent expense, if any, related to the leases, and are recorded when the lease contracts are terminated or, if earlier, the date on which the Company ceases use of the leased property. The fair value of these liabilities were estimated as the excess, if any, of the contractual payments required under the unexpired leases over the current market lease rates for the properties, discounted at a credit-adjusted risk-free rate over the remaining term of the leases. The provision for lease termination costs also includes adjustments to liabilities recorded in prior periods arising from changes in estimated sublease rentals and from settlements with landlords.

In fiscal 2013 and 2012, the Company recorded lease termination charges of \$306,000 and \$733,000, respectively, principally reflecting a change in estimated sublease rentals and settlements with landlords on stores previously closed.

The Company intends to refranchise certain geographic markets, expected to consist principally of, but not necessarily limited to, markets outside the Company's traditional base in the southeastern United States. The franchise rights and other assets in many of these markets were acquired by the Company in business combinations in prior years.

Since the beginning of fiscal 2009, the Company has refranchised a total of 11 stores and received consideration totaling \$2.5 million in connection with those transactions. During this period, the Company recorded impairment charges totaling approximately \$490,000 related to completed and anticipated refranchisings.

On February 22, 2013, the Company refranchised three stores in the Kansas/Missouri market; the Company closed a fourth store in the market in January 2013 in anticipation of the transaction. The four stores had total sales of approximately \$9 million in fiscal 2013. The Company does not anticipate recording any significant gain or loss on the refranchising transaction.

The Company cannot predict the likelihood of refranchising any additional stores or markets or the amount of proceeds, if any, which might be received therefrom, including the amounts which might be realized from the sale of store assets and the execution of any related franchise agreements. Refranchising could result in the recognition of additional impairment losses on the related assets.

and that a street Milysea Afron a greet.

and the engineering the large transfer and a constraint

William Commission State (Section 2012)

Interest Expense

The components of interest expense are as follows:

	Year l	Ended
	February 3, 2013	January 29, 2012

The decrease in interest accruing on outstanding indebtedness and in letter of credit and unused revolver fees reflects the reduction in the principal outstanding under the Company's term loan and a reduction in the lender's interest margin due to a decrease in the Company's leverage ratio.

Equity in Income (Losses) of Equity Method Franchisees

The Company recorded equity in the losses of equity method franchisees of \$202,000 in fiscal 2013 compared to losses of \$122,000 in fiscal 2012. This caption represents the Company's share of operating results of equity method franchisees which develop and operate Krispy Kreme stores. On May 5, 2011, the Company sold its 30% equity interest in KK Mexico, the Company's franchisee in Mexico, to KK Mexico's majority shareholder as more fully described in Note 8 to the consolidated financial statements appearing elsewhere herein. The Company's equity in earnings of KK Mexico was approximately \$110,000 for the fiscal year ended 2012.

Gain on Sale of Interest in Equity Method Franchisee

In fiscal 2012, the Company realized a gain of approximately \$6.2 million from the sale of the Company's investment in KK Mexico, as more fully described in Note 8 to the consolidated financial statements appearing elsewhere herein. The after-tax proceeds of the sale of approximately \$6.2 million were used to prepay a portion of the Company's 2011 Term Loan.

Other Non-Operating Income and Expense, Net

Other non-operating income and expense in fiscal 2013 and fiscal 2012 includes credits of \$318,000 and \$215,000, respectively, representing reductions in recorded liabilities for franchisee guarantee obligations resulting from decreases in the guaranteed amounts.

Provision for Income Taxes

The provision for income taxes was \$15.5 million in fiscal 2013 and a credit of \$135.9 million in fiscal 2012. The fiscal 2012 amount includes a credit of \$139.6 million (\$1.95 per diluted share) from the reversal of a portion of a valuation allowance on deferred income tax assets.

Contracting the State of State and American State of the State of State of

The Company establishes valuation allowances for deferred tax assets in accordance with GAAP, which provides that such valuation allowances shall be established unless realization of the deferred tax assets is more likely than not. From fiscal 2005 until the fourth quarter of fiscal 2012, the Company maintained a valuation allowance on deferred tax assets equal to the entire excess of those assets over the Company's deferred tax liabilities because of the uncertainty surrounding the realization of those assets. Such uncertainty arose principally from the substantial losses incurred by the Company from fiscal 2005 though fiscal 2009.

Realization of net deferred tax assets generally is dependent on generation of taxable income in future periods. The Company reported a pretax profit of \$418,000 in fiscal 2010 and \$8.9 million in fiscal 2011. In fiscal 2012, the Company's pretax profit increased to \$30.4 million, inclusive of a \$6.2 million non-recurring gain on the Company's sale of its 30% equity interest in KK Mexico. After considering all relevant factors having an impact on the likelihood of future realization of the Company's deferred tax assets, in the fourth quarter of fiscal 2012 management concluded that it was more likely than not that a substantial portion of the Company's deferred tax assets would be realized in future years. Accordingly, in the fourth quarter of fiscal 2012, the Company reversed \$139.6 million of the valuation allowance on deferred tax assets, with an offsetting credit to the provision for income taxes, representing the amount of deferred tax assets management believed was more likely than not to be realized.

While the reversal of a portion of the valuation allowance increased the Company's earnings by \$139.6 million in fiscal 2012, the reversal has the effect of reducing the Company's earnings beginning in fiscal 2013 as a result of an increase in the provision for income taxes. This negative effect on earnings occurs because the reversal of the valuation allowance resulted in the recognition in fiscal 2012 of income tax benefits expected to be realized in later years. Absent the reversal of the valuation allowance, any such tax benefits would have been recognized when realized in future periods upon the generation of taxable income. Accordingly, beginning in fiscal 2013, the Company's effective income tax rate, which in fiscal 2012 and earlier years bore little or no relationship to pretax income, more closely reflects the blended federal and state income tax rates in jurisdictions in which the Company operates.

Because of the increase in the Company's effective income tax rate as described above, the Company's income tax expense in fiscal 2013 is not comparable to income tax expense in fiscal 2012. In addition, until such time as the Company's net operating loss carryforwards are exhausted or expire, GAAP income tax expense is expected to substantially exceed the amount of cash income taxes payable by the Company, which are expected to remain insignificant.

In addition to adjustments to the valuation allowance on deferred tax assets, the provision for income taxes includes amounts estimated to be payable or refundable currently. The portion of the income tax provision representing taxes estimated to be payable currently was approximately \$2.1 million and \$3.5 million in fiscal 2013 and fiscal 2012, respectively, the majority of which represents foreign withholding taxes related to royalties and franchise fees paid by international franchisees. In addition, the fiscal 2012 amount includes approximately \$1.5 million of foreign income taxes arising from the gain on the sale of the Company's interest in KK Mexico.

See "Matters Affecting Comparability," above, for disclosures intended to compare the Company's results of operations for fiscal 2013 and 2012 exclusive of the effects of the reversal of the valuation allowance on deferred tax assets and the gain on the sale of the Company's interest in KK Mexico and related taxes thereon.

Net Income

The Company reported net income of \$20.8 million for fiscal 2013 compared to \$166.3 million for fiscal 2012. The fiscal 2012 net income includes a credit of \$139.6 million from the reversal of a portion of a valuation allowance on deferred income tax assets and an after-tax gain of \$4.7 million on the Company's sale of its interest in KK Mexico. See "Matters Affecting Comparability" above.

FISCAL 2012 COMPARED TO FISCAL 2011

The following discussion of the Company's results of operations should be read in conjunction with the consolidated financial statements and notes thereto appearing elsewhere herein.

Matters Affecting Comparability

The Company's provision for income taxes, net income and earnings per share for fiscal 2012 are not comparable to the corresponding amounts for fiscal 2011 as a result of the reversal of valuation allowances on deferred tax assets in the fourth quarter of fiscal 2012. The Company has substantial net operating loss carryforwards and, accordingly, the Company's cash payments for income taxes, which were not affected by the reversal of the valuation allowance on deferred tax assets, are expected to remain insignificant for the foreseeable future. See "Results of Operations – Fiscal 2012 Compared to Fiscal 2011 - Provision for Income Taxes" below, and Note 3 to the consolidated financial statements appearing elsewhere herein.

In addition, in the second quarter of fiscal 2012, the Company recognized a gain of approximately \$6.2 million on the sale of its 30% equity interest in KK Mexico (approximately \$4.7 million after deduction of approximately \$1.5 million of Mexican taxes payable on the transaction), as described in Note 8 to the consolidated financial statements appearing elsewhere herein. Such gains should not be expected to occur regularly.

Management evaluates the Company's results of operations using, among other measures, adjusted net income and adjusted earnings per share, which include the provision for income taxes only to the extent such taxes are currently payable in cash. In addition, management excludes from adjusted net income charges and credits that are unusual and infrequently occurring. Management believes adjusted net income and adjusted earnings per share are useful performance measures because they more closely measure the cash flows generated by the Company's operations and the trends in those cash flows than do GAAP net income and earnings per share, and because they exclude the effects of transactions that are not indicative of the Company's ongoing results of operations.

Adjusted net income and adjusted earnings per share are non-GAAP measures.

The following presentation of adjusted net income, and the related reconciliation of adjusted net income to GAAP net income and presentation of adjusted earnings per share, are intended to (1) assist the reader in understanding the effects of the reversal of the valuation allowance and the non-recurring gain on the sale of the interest in KK Mexico on the Company's results of operations for fiscal 2012; (2) facilitate comparisons of fiscal 2012 results with the Company's results for fiscal 2011; and (3) illustrate the material difference between the

Company's income tax expense and income taxes currently payable. These non-GAAP performance measures are consistent with other measurements made by management in the operation of the business which do not consider income taxes except to the extent to which those taxes currently are payable, for example, capital allocation decisions and incentive compensation measurements that are made on a pretax basis.

Sales at stores opened in fiscal 2012	4,557		4,557
Sales for the year ended January 29, 2012	\$126,003	\$145,654	\$271,657

Sales at Company Stores increased 10.5% in fiscal 2012 from fiscal 2011 due to an increase in sales from existing stores and stores opened in fiscal 2011 and fiscal 2012. Selling price increases in the on-premises and wholesale distribution channels accounted for approximately 6.8 percentage points of the increase in sales, exclusive of the effects of higher pricing on unit volumes; such effects are difficult to measure reliably. As with all consumer products, however, higher prices may negatively affect sales. The Company believes this phenomenon is more pronounced in the wholesale channel where competing products are merchandised alongside those of the Company.

			1				

On-premises sales

On-premises sales increased 10.4% to \$126.0 million in fiscal 2012 from \$114.1 million in fiscal 2011. On March 7, 2011, the Company implemented price increases at substantially all its stores designed to help offset the rising costs of doughnut mixes, other ingredients and fuel resulting from higher commodity prices. The price increases, which affected approximately 60% of on-premises sales, averaged approximately 14%. These price

increases were not fully reflected in the same store sales metrics because they were in effect for only 47 of the 52 weeks in fiscal 2012. Additionally, during the third quarter of fiscal 2012, the Company raised its fundraising prices approximately 8%.

Wholesale distribution

Sales to wholesale accounts increased 10.5% to \$145.7 million in fiscal 2012 from \$131.8 million in fiscal 2011. Approximately 6.0 percentage points of the sales increase reflects price increases, including not only increases implemented in the first quarter of fiscal 2012 but also price increases implemented in fiscal 2011. The Company believes the wholesale sales increase was greater than that of the doughnut industry as a whole. The Company started implementing price increases for some products offered in the wholesale channel mid-April 2011, and substantially completed implementing the increases during the second quarter. Those price increases affected products comprising approximately 60% of wholesale sales, and the average price increase on those products was approximately 11%.

Sales to grocers and mass merchants increased 15.1% to \$87.7 million, with a 12.7% increase in average weekly sales per door and a 2.6% increase in the average number of doors served. In addition to pricing, the Company believes that average weekly sales per door in the grocer/mass merchant channel have grown as a result of, among other things, improved customer service, introduction of additional price points, a redesign of product packaging to improve its shelf appeal and the addition of new relatively higher volume doors.

Convenience store sales increased 3.9% to \$55.0 million, reflecting a 10.7% increase in the average weekly sales per door, partially offset by a 5.9% decline in the average number of doors served. The decline in the average weekly number of doors in the convenience store channel in fiscal 2012 compared to fiscal 2011 was principally the result of the Company's efforts to improve route management and route consolidation including the elimination of and reduction in the number of stops at relatively low volume doors.

Costs and expenses

Total cost of sales as a percentage of revenues declined by 0.2 percentage points from 72.9% in fiscal 2011 to 72.7% of revenues in fiscal 2012.

As a result of rising costs of doughnut mixes and other ingredients resulting from higher commodity prices, the Company implemented selling price increases designed to help offset the increased costs. Before considering the potential loss of unit volume as a result of on-premises and wholesale selling price increases, those price increases more than offset higher costs of food, beverages and packaging in fiscal 2012. The effects of price increases on unit volumes are difficult to measure reliably. The combined effects of higher selling prices and increased input costs accounted for substantially all of the increase in the cost of food, beverage and packaging as a percentage of revenues for fiscal 2012 compared to last year. Exclusive of the effects of pricing and input costs, food, beverage and packaging costs as a percentage of revenues were flat.

Shop labor as a percentage of revenues declined by 1.4 percentage points from fiscal 2011 to 18.5% of revenues in fiscal 2012, principally due to higher sales resulting from price increases.

Vehicle costs as a percentage of revenues increased from 5.7% of revenues in fiscal 2011 to 6.3% of revenues in fiscal 2012, principally as a result of higher fuel costs and higher expense of leased delivery trucks in fiscal 2012 compared to fiscal 2011. This increase was partially offset by a decrease in repairs and maintenance expense in the fiscal 2012 as a result of the Company replacing a portion of its aging delivery fleet.

The Company is self-insured for workers' compensation, automobile and general liability claims, but maintains stop-loss coverage for individual claims exceeding certain amounts. The Company provides for claims under these self-insured programs using actuarial methods as described in Note 1 to the consolidated financial statements appearing elsewhere herein, and updates actuarial valuations of its self-insurance reserves at least annually. Such periodic actuarial valuations result in changes over time in the estimated amounts which ultimately will be paid for claims under these programs to reflect the Company's actual claims experience for each policy year as well as trends in claims experience over multiple years. Such claims, particularly workers'

compensation claims, often are paid over a number of years following the year in which the insured events occur, and the estimated ultimate cost of each year's claims accordingly is adjusted over time as additional information becomes available. The Company recorded favorable adjustments to its self-insurance claims liabilities related to prior years of approximately \$1.3 million in fiscal 2012, of which \$830,000 was recorded in the fourth quarter, and \$1.8 million in 2011, of which \$1.2 million was recorded in the fourth quarter. Of the \$1.3 million in favorable adjustments recorded in fiscal 2012, \$1.1 million relates to workers' compensation liability claims and is included in employee benefits in the table above, \$40,000 relates to vehicle liability claims and is included in other operating expenses in the table above and \$180,000 relates to general liability claims and is included in other operating expenses in the table above. Of the \$1.8 million in favorable adjustments recorded in fiscal 2011, \$1.4 million relates to workers' compensation liability claims, \$300,000 relates to vehicle liability claims and \$90,000 relates to general liability claims.

Other operating expenses as a percentage of revenues declined by 1.0 percentage point from fiscal 2011 to 6.8% of revenues in fiscal 2012 reflecting, among other things, lower store-level marketing expense.

Other segment operating costs as a percentage of revenues declined by 0.9 percentage points from the fiscal 2011 to 4.4% of revenues in fiscal 2012 reflecting, among other things, a decrease in spending on wholesale selling and support expenses.

Domestic Franchise revenues increased 11.0% to \$9.5 million in fiscal 2012 from \$8.5 million in fiscal 2011. The increase reflects higher domestic royalty revenues resulting from an increase in sales by domestic franchise stores from approximately \$239 million in fiscal 2011 to \$262 million in fiscal 2012. Domestic Franchise same store sales rose 6.6% fiscal 2012.

Domestic Franchise operating expenses include costs to recruit new domestic franchisees, to assist in domestic store openings, and to monitor and aid in the performance of domestic franchise stores, as well as allocated corporate costs. The increase in Domestic Franchise operating expenses in fiscal 2012 compared to fiscal 2011 reflects a provision of \$820,000 recorded in the second quarter of fiscal 2012 for payments under a lease guarantee associated with a franchisee whose franchise agreements the Company terminated during the second quarter, as well as an increase in franchisee support costs. The increase also reflects an increase in bad debt expense as a result of a credit of \$200,000 reflected in fiscal 2011, resulting principally from recoveries of receivables previously written off. These increases were partially offset by the reversal of a previously recorded accrual of \$110,000 related to a franchisee lease guarantee as a result of the Company receiving a release from the related guarantee during the third quarter of fiscal 2012. In addition, operating expenses reflected a decrease in legal fees of \$460,000 in fiscal 2012 compared to fiscal 2011. In fiscal 2011, the Company incurred unusually high legal costs related to the Company's termination of the franchise agreements of one of its domestic franchisees.

Domestic franchisees opened 14 stores and closed 16 stores in fiscal 2012. Of the 16 closures, 10 were operated by a franchisee whose franchise rights the Company terminated in the second quarter of fiscal 2012. Royalty revenues are directly related to sales by franchise stores and, accordingly, the success of franchisees' operations has a direct effect on the Company's revenues, results of operations and cash flows.

restricting to give for the explanation of a factor of the control of the control

International Franchise royalties increased 28.8%, driven by an increase in sales by international franchise stores from \$325 million in fiscal 2011 to \$384 million in fiscal 2012. Changes in the rates of exchange between the U.S. dollar and the foreign currencies in which the Company's international franchisees do business increased sales by international franchisees measured in U.S. dollars by approximately \$16.2 million in fiscal 2012 compared to fiscal 2011, which positively affected international royalty revenues by approximately \$970,000 in fiscal 2012. In fiscal 2012, the Company recognized \$280,000 of royalty revenue from the Company's Mexican franchisee discussed in the second succeeding paragraph below. The Company did not recognize as revenue approximately \$1.6 million of uncollected royalties which accrued during fiscal 2011 because the Company did not believe collection of these royalties was reasonably assured. Substantially all of the unrecognized royalties in fiscal 2011 related to the Company's Australian franchisee, which commenced a voluntary administration process (similar to a bankruptcy filing in the U.S.) in October and November 2010. In connection with that process, in November 2010, the franchisee closed 24 of the 53 shops the franchisee operated prior to the reorganization.

International development and franchise fees decreased \$430,000 in fiscal 2012, primarily as a result of a decline in the number of store openings from 95 in fiscal 2011 to 76 in fiscal 2012. This reduction in fees was partially offset by the recognition of approximately \$95,000 of franchise fees related to the Company's Mexican franchisee described in the following paragraph.

Royalties and franchise fees in fiscal 2012 include approximately \$280,000 and \$95,000, respectively, of amounts relating to the Company's franchisee in Mexico which accrued in prior periods but which had not previously been reported as revenue because of uncertainty surrounding their collection. Such amounts were reported as revenue in recognition of the payment of such amounts to the Company on May 5, 2011, in connection with the Company's sale of its 30% equity interest in the franchisee, as more fully described in Note 8 to the consolidated financial statements appearing elsewhere herein.

International Franchise same store sales, measured on a constant currency basis to remove the effects of changing exchange rates between foreign currencies and the U.S. dollar ("constant dollar same store sales"), fell 10.8%. The decline in International Franchise same store sales reflects, among other things, waning honeymoon effects from the large number of new stores opened internationally in recent years and the cannibalization effects on initial stores in new markets of additional store openings in those markets. "Honeymoon effect" means the common pattern for many start-up restaurants in which a flurry of activity due to start-up publicity and natural

curiosity is followed by a decline during which a steady repeat customer base develops. "Cannibalization effect" means the tendency for new stores to become successful, in part or in whole, by shifting sales from existing stores in the same market.

Constant dollar same store sales in established markets fell 1.9% in fiscal 2012 and fell 18.4% in new markets. "Established markets" means countries in which the first Krispy Kreme store opened before fiscal 2007. Sales at stores in established markets comprised approximately 51% of aggregate constant dollar same store sales.

International Franchise operating expenses include costs to recruit new international franchisees, to assist in international store openings, and to monitor and aid in the performance of international franchise stores, as well as allocated corporate costs. International Franchise operating expenses rose in fiscal 2012 compared to fiscal 2013 as a result of personnel additions, including benefits and travel costs, and other cost increases resulting from the Company's decision to devote additional resources to the development and support of international franchisees. These increases were partially offset by a decrease in bad debt expense to a net credit of \$380,000 in fiscal 2012 compared to a net credit of \$200,000 in fiscal 2011. The credit recorded to the bad debt provision in fiscal 2012 related principally to the Mexican franchisee discussed above. A net credit in bad debt expense should not be expected to recur frequently.

International franchisees opened 76 stores and closed 33 stores in fiscal 2012. Royalty revenues are directly related to sales by franchise stores and, accordingly, the success of franchisees' operations has a direct effect on the Company's revenues, results of operations and cash flows.

KK Supply Chain

The components of KK Supply Chain revenues and expenses (expressed in dollars and as a percentage of total revenues before intersegment sales elimination) are set forth in the table below (percentage amounts may not add to totals due to rounding).

SEGMENT OPERATING INCOME	\$ 30,160	\$ 30,213	<u>14.6</u> %	16.6%
		The second second		

KK Supply Chain revenues before intersegment sales eliminations increased \$24.9 million, or 13.7%, in fiscal 2012 compared to fiscal 2011. The increase reflects selling price increases for doughnut mixes, sugar, shortening and certain other ingredients instituted by KK Supply Chain in order to pass along to Company and franchise stores increases in KK Supply Chain's cost of sugar, flour and shortening. The unit volumes in most product categories were generally flat in fiscal 2012 compared to fiscal 2011.

The Company utilizes a fuel surcharge program to recoup additional freight costs resulting from increases in fuel costs. Charges under the program are based upon the price of diesel fuel. The increase in fuel surcharges compared to fiscal 2012 reflects the rising cost of diesel fuel, prices for which were higher relative to the surcharge benchmark in fiscal 2012 than in fiscal 2011.

The increase in cost of goods produced and purchased as a percentage of sales in fiscal 2012 compared to fiscal 2011 reflects, among other things, an increase in the cost of agricultural commodities used in the production of doughnut mix and of other goods sold to Company and franchise stores. In particular, the prices of flour, shortening and sugar and the products from which they are made were significantly higher in fiscal 2012 compared fiscal 2011. KK Supply Chain increased the prices charged to Company and franchise stores for doughnut mixes, shortening, sugar and other goods in order to mitigate increases in the cost of raw materials. However, KK Supply Chain margins were adversely affected because, while the Company increased prices to cover higher costs, the Company did not raise prices to earn a proportionate gross profit on all of its higher costs.

Distribution costs rose in fiscal 2012 compared to fiscal 2011 as a result of duplicate facility costs and other conversion expenses associated with the transition of product distribution for stores east of the Mississippi to an outsourced provider which began in June 2011; however, distribution costs as a percentage of total revenues fell in fiscal 2012 compared to fiscal 2011 principally due to higher sales resulting from price increases.

Other segment operating costs include segment management, purchasing, customer service and support, laboratory and quality control costs, and research and development expenses. These costs include a net credit in bad debt expense of approximately \$90,000 in fiscal 2012 compared to a charge of \$270,000 in fiscal 2011. The net credit in fiscal 2012 principally reflected sustained improved payment performance and reduced credit exposure with respect to a small number of franchisees. A net credit in bad debt expense should not be expected to recur frequently.

Franchisees opened 90 stores and closed 49 stores in fiscal 2012. A substantial portion of KK Supply Chain's revenues are directly related to sales by franchise stores and, accordingly, the success of franchisees' operations has a direct effect on the Company's revenues, results of operations and cash flows.

An increasing percentage of franchise store sales is attributable to sales by franchisees outside North America. While the Company sells doughnut mixes and concentrates to its international franchisees, these franchisees purchase substantially all other ingredients, packaging and supplies from local or regional vendors approved by the Company. Accordingly, KK Supply Chain revenues are less correlated with sales by international franchisees than with sales by domestic franchisees.

General and Administrative Expenses

General and administrative expenses were \$22.2 million, or 5.5% of total revenues, in fiscal 2012 compared to \$21.9 million, or 6.0% of total revenues, in fiscal 2011. General and administrative expenses in the fourth quarter of fiscal 2012 reflect a reversal of approximately \$840,000 of remaining accruals for pledges to certain nonprofit organizations made in fiscal 2001 through 2004 which the Company determined for various reasons would not be honored. Such amount was largely offset by one-time costs associated with hiring a new executive officer, as well as by a charge of \$474,000 to correct accounting computational errors related to share-based compensation arising in prior periods (of which \$142,000 arose in earlier quarters of fiscal 2012 and the balance in fiscal 2007 through 2011). Except for the quantitative effect of the correction of the errors on the fourth quarter of fiscal 2012, the share-based compensation errors were neither quantitatively nor qualitatively material to the results of any period; accordingly, the errors were corrected in the fourth quarter of fiscal 2012 and prior financial statements were not restated.

Impairment Charges and Lease Termination Costs

Impairment charges and lease termination costs were \$793,000 in fiscal 2012 compared to \$4.1 million in fiscal 2011. The components of these charges are set forth in the following table:

"我们就是我们的,我们就是我们的,我们就是我们的,我们就没有一个人,我们就没有一个人。""我们就是我们的,我们就会没有一个人,我们就是我们的,我们就没有一个人,	Year Ended	
	January 29, 2012	January 30, 2011
	(In tho	usands)
Impairment charges:		
Impairment of long-lived assets - current period charges	\$ 60	\$3,437
Impairment of long-lived assets - adjustments to previously recorded estimates		(173)
Impairment of reacquired franchise rights		40
Total impairment charges	60	3,304
Lease termination costs	733	762
and the control of the control of the second	\$793	\$4,066

Impairment charges relate to the Company Stores segment. The Company tests long-lived assets for impairment when events or changes in circumstances indicate that their carrying value may not be recoverable. These events and changes in circumstances include store closing and refranchising decisions, the effects of changing costs on current results of operations, observed trends in operating results, and evidence of changed circumstances observed as a part of periodic reforecasts of future operating results and as part of the Company's annual budgeting process. Impairment charges generally relate to stores expected to be closed or refranchised, as well as to stores management believes will not generate sufficient future cash flows to enable the Company to recover the carrying value of the stores' assets, but which management has not yet decided to close. When the Company concludes that the carrying value of long-lived assets is not recoverable (based on future projected undiscounted cash flows), the Company records impairment charges to reduce the carrying value of those assets to their estimated fair values. The fair values of these assets are estimated based on the present value of estimated future cash flows, on independent appraisals and, in the case of assets the Company is negotiating to sell, based on the Company's negotiations with unrelated third-party buyers.

Lease termination costs represent the estimated fair value of liabilities related to unexpired leases, after reduction by the amount of accrued rent expense, if any, related to the leases, and are recorded when the lease contracts are terminated or, if earlier, the date on which the Company ceases use of the leased property. The fair value of these liabilities were estimated as the excess, if any, of the contractual payments required under the unexpired leases over the current market lease rates for the properties, discounted at a credit-adjusted risk-free rate over the remaining term of the leases. In fiscal 2012, the Company recorded lease termination charges of \$733,000, principally reflecting a change in estimated sublease rentals and settlements with landlords on stores previously closed. In fiscal 2011, the Company recorded lease termination charges of \$762,000, representing a change in estimated sublease rentals on stores previously closed and charges related to two store closures and a store relocation, partially offset by the reversal of previously recorded accrued rent related to those stores.

The Company intends to refranchise certain geographic markets, expected to consist principally of, but not necessarily limited to, markets outside the Company's traditional base in the southeastern United States. The franchise rights and other assets in many of these markets were acquired by the Company in business combinations in prior years.

Since the beginning of fiscal 2009, the Company has refranchised a total of 11 stores and received consideration totaling \$2.5 million in connection with those transactions. During this period, the Company recorded impairment charges totaling approximately \$490,000 related to completed and anticipated refranchisings.

Interest Expense

The components of interest expense are as follows:

	Year Ended		
ing the second of the second o	-	January 30, 2011	
grande de la companya			
Interest accruing on outstanding indebtedness	\$ 803	\$4,312	
Letter of credit and unused revolver fees		1,136	
Amortization of deferred financing costs		696	
Amortization of unrealized losses on interest rate derivatives		152	
		63	
Other	\$1,666	\$6,359	

The decrease in interest accruing on outstanding term loan indebtedness and in letter of credit and unused revolver fees reflects the substantial reduction in lender margin on the Company's credit facilities resulting from the refinancing of those facilities in January 2011, as more fully described in Note 12 to the consolidated financial statements appearing elsewhere herein, as well as the reduction in the principal outstanding under the Company's term loan. The interest rate derivative contracts which gave rise to the amortization of unrealized losses on interest rate derivatives in fiscal 2011 expired in April 2010.

Loss on Refinancing of Debt

During the fourth quarter of fiscal 2011, the Company closed the 2011 Secured Credit Facilities described below under "Liquidity and Capital Resources — Cash Flows From Financing Activities" and used the proceeds to retire other indebtedness, as more fully described in Note 12 to the consolidated financial statements appearing elsewhere herein. The Company recorded a loss on the refinancing of approximately \$1.0 million, consisting of an \$865,000 write-off of unamortized deferred financing costs related to the retired debt and \$160,000 related to other expenses.

Equity in Income (Losses) of Equity Method Franchisees

The Company recorded equity in the losses of equity method franchisees of \$122,000 in fiscal 2012 compared to earnings of \$547,000 in fiscal 2011. This caption represents the Company's share of operating results of equity method franchisees which develop and operate Krispy Kreme stores. On May 5, 2011, the Company sold its 30% equity interest in KK Mexico, the Company's franchisee in Mexico, to KK Mexico's majority shareholder as more fully described in Note 8 to the consolidated financial statements appearing elsewhere herein. The Company's equity in earnings of KK Mexico was approximately \$110,000 and \$790,000 for the fiscal year ended 2012 and 2011, respectively.

Gain on Sale of Interest in Equity Method Franchisee

In fiscal 2012, the Company realized a gain of approximately \$6.2 million from the sale of the Company's investment in KK Mexico, as more fully described in Note 8 to the consolidated financial statements appearing elsewhere herein. The after-tax proceeds of the sale of approximately \$6.2 million were used to prepay a portion of the Company's 2011 Term Loan.

Other Non-Operating Income and Expense, Net

Other non-operating income and expense in fiscal 2012 and fiscal 2011 includes credits of \$215,000 and \$329,000, respectively, representing reductions in recorded liabilities for franchisee guarantee obligations resulting from decreases in the guaranteed amounts.

Provision for Income Taxes

The provision for income taxes was a credit of \$135.9 million in fiscal 2012 and a charge of \$1.3 million in fiscal 2011. The fiscal 2012 amount includes a credit of \$139.6 million (\$1.95 per diluted share) from the reversal of a portion of a valuation allowance on deferred income tax assets.

The Company establishes valuation allowances for deferred tax assets in accordance with GAAP, which provides that such valuation allowances shall be established unless realization of the deferred tax assets is more likely than not. From fiscal 2005 until the fourth quarter of fiscal 2012, the Company maintained a valuation allowance on deferred tax assets equal to the entire excess of those assets over the Company's deferred tax liabilities because of the uncertainty surrounding the realization of those assets. Such uncertainty arose principally from the substantial losses incurred by the Company from fiscal 2005 though fiscal 2009.

Realization of net deferred tax assets generally is dependent on generation of taxable income in future periods. The Company reported a pretax profit of \$418,000 in fiscal 2010 and \$8.9 million in fiscal 2011. In fiscal 2012, the Company's pretax profit increased to \$30.4 million, inclusive of a \$6.2 million non-recurring gain on the Company's sale of its 30% equity interest in KK Mexico. After considering all relevant factors having an impact on the likelihood of future realization of the Company's deferred tax assets, in the fourth quarter of fiscal 2012 management concluded that it was more likely than not that a substantial portion of the Company's deferred tax assets would be realized in future years. Accordingly, in the fourth quarter of fiscal 2012, the Company reversed \$139.6 million of the valuation allowance on deferred tax assets, with an offsetting credit to the provision for income taxes, representing the amount of deferred tax assets management believed was more likely than not to be realized.

While the reversal of a portion of the valuation allowance increased the Company's earnings by \$139.6 million in fiscal 2012, the reversal has the effect of reducing the Company's earnings beginning in fiscal 2013 as a result of an increase in the provision for income taxes in such years. This negative effect on earnings occurs because the reversal of the valuation allowance resulted in the recognition in fiscal 2012 of income tax benefits expected to be realized in later years. Absent the reversal of the valuation allowance, any such tax benefits would have been recognized when realized in future periods upon the generation of taxable income. Accordingly, beginning in fiscal 2013, the Company's effective income tax rate, which in fiscal 2012 and earlier years bore little or no relationship to pretax income, more closely reflects the blended federal and state income tax rates in jurisdictions in which the Company operates.

Because of the increase in the Company's effective income tax rate as described above, the Company's income tax expense in fiscal 2013 is not comparable to income tax expense in fiscal 2012 and earlier years. In addition, until such time as the Company's net operating loss carryforwards are exhausted or expire, GAAP income tax expense is expected to substantially exceed the amount of cash income taxes payable by the Company, which are expected to remain insignificant.

In addition to adjustments to the valuation allowance on deferred tax assets, the provision for income taxes includes amounts estimated to be payable or refundable currently. The portion of the income tax provision representing taxes estimated to be payable currently was approximately \$3.5 million and \$1.4 million in fiscal 2012 and fiscal 2011, respectively, the majority of which represents foreign withholding taxes related to royalties and franchise fees paid by international franchisees. In addition, the fiscal 2012 amount includes approximately \$1.5 million of foreign income taxes arising from the gain on the sale of the Company's interest in KK Mexico.

See "Matters Affecting Comparability," above, for disclosures intended to compare the Company's results of operations for fiscal 2012 and 2011 exclusive of the effects of the reversal of the valuation allowance on deferred tax assets and the gain on the sale of the Company's interest in KK Mexico and related taxes thereon.

Net Income

The Company reported net income of \$166.3 million for fiscal 2012 compared to \$7.6 million for fiscal 2011. Fiscal 2012 net income includes a credit of \$139.6 million from the reversal of a portion of a valuation allowance on deferred income tax assets and an after-tax gain of \$4.7 million on the Company's sales of its interest in KK Mexico. See "Matters Affecting Comparability" above.

A SA TOP I SHOW A SACRAGE TO SAIN

LIQUIDITY AND CAPITAL RESOURCES

The following table presents a summary of the Company's cash flows from operating, investing and financing activities for fiscal 2013, fiscal 2012 and fiscal 2011:

	Year Ended		
	February 3, 2013	January 29, 2012	January 30, 2011
		(In thousands)	
Net cash provided by operating activities	\$ 59,310	\$33,861	\$ 20,508
Net cash used for investing activities	(14,438)	(2,524)	(8,572)
Net cash used for financing activities	(22,859)	(8,988)	(10,181)
Net increase in cash and cash equivalents	\$ 22,013	\$22,349	\$ 1,755

Cash Flows from Operating Activities

Cash provided by operating activities in fiscal 2013 increased \$25.4 million to \$59.3 million from \$33.9 million in fiscal 2012. Approximately \$15.2 million of the improvement reflects the increase in operating cash flow from \$37.4 million in fiscal 2012 to \$52.6 million in fiscal 2013. The improvement also reflects a net increase in customer deposits of \$1.0 million in fiscal 2013 compared to a net decrease of \$310,000 in fiscal 2012. The increase reflects deposits related to equipment sales to international franchisees for new stores being developed that are expected to open in fiscal 2014. The improvement also reflects a net increase in deferred franchise fee revenue of \$1.2 million in fiscal 2013 compared to a net decrease of \$380,000 in fiscal 2012. The increase reflects the execution of four new international franchise development agreements in fiscal 2013. Cash provided by operating activities in fiscal 2013 also reflects the receipt of \$2.0 million of landlord contributions to building renovation costs related to the Company's headquarters building and to new stores. Finally, payments on leases related to closed stores were approximately \$1.7 million higher in fiscal 2012 than in fiscal 2013, principally due to settlements with landlords in fiscal 2012 on terminated leases. The remainder of the change in cash flows from operating activities principally reflects normal fluctuations in working capital.

Cash provided by operating activities in fiscal 2012 increased \$13.4 million to \$33.9 million from \$20.5 million in fiscal 2011. Approximately \$13.0 million of the improvement reflects the increase in operating cash flow from \$24.4 million in fiscal 2011 to \$37.4 million in fiscal 2012. Also, cash provided by operating activities in fiscal 2011 reflected the payment of approximately \$2.0 million to a landlord in connection with the renegotiation and renewal of the lease for the Company's headquarters. The balance of the change in cash flows from operating activities principally reflects normal fluctuations in working capital.

Cash Flows from Investing Activities

The components of capital expenditures in each of the last three fiscal years were approximately as follows:

					and the second	14 <u>41 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1</u>	Year Ended	
			1.4 1.4		in Allega (1997) Samuel and Allega (1997)	February 3, 2013	2012	2011

Corporate info	rmation	technology	·			303	140	429
Other						529	534	566
						\$14,218	\$11,884	\$9,694

In addition, the Company acquired two stores from a franchisee for \$915,000 during fiscal 2013.

In fiscal 2012, the Company received proceeds of \$7.7 million from the sale of the Company's 30% equity interest in KK Mexico as more fully described in Note 8 to the consolidated financial statements appearing elsewhere herein.

In fiscal 2011, the Company realized proceeds from the sale of property and equipment of \$2.9 million from the sale of closed stores or refranchised stores.

In connection with the refinancing of the Company's Secured Credit Facilities in January 2011, as more fully described in Note 12 to the consolidated financial statements appearing elsewhere herein, the Company deposited into escrow \$1.8 million related to properties with respect to which the Company agreed to furnish to the lenders certain documentation on or before January 31, 2012, with amounts to be released from escrow upon the Company's furnishing such documentation. In fiscal 2012, the entire \$1.8 million was released from escrow.

Cash Flows from Financing Activities

During fiscal 2013, the Company repaid approximately \$2.3 million of outstanding term loan and capitalized lease indebtedness, consisting of approximately \$2.2 million of scheduled principal amortization and \$120,000 of prepayments from the proceeds of the exercise of stock options.

During fiscal 2012, the Company repaid approximately \$9.0 million of outstanding term loan and capitalized lease indebtedness, consisting of approximately \$2.3 million of scheduled principal amortization, \$6.2 million of prepayments from the sale of the Company's interest in KK Mexico as more fully described in Note 8 to the consolidated financial statements appearing elsewhere herein, and \$520,000 of prepayments from the proceeds of the exercise of stock options.

In January 2011, the Company entered into the 2011 Secured Credit Facilities as more fully described in Note 12 to the consolidated financial statements appearing elsewhere herein. Those facilities consist of the \$35 million 2011 Term Loan and the \$25 million 2011 Revolver. The proceeds of the 2011 Term Loan were used to retire the approximately \$35 million outstanding term loan balance under the Company's prior secured credit facilities, which were terminated. The Company paid approximately \$1.5 million in fees and expenses in connection with the 2011 Secured Credit Facilities, of which approximately \$1.3 million was capitalized as deferred financing costs and the balance of approximately \$160,000 was charged to expense and is included in "Loss on refinancing of debt" in the accompanying consolidated statement of operations. During fiscal 2011, the Company repaid \$8.3 million of outstanding term loan and capitalized lease indebtedness prior to the refinancing, consisting of approximately \$700,000 of scheduled principal amortization, \$2.6 million of prepayments from the sale of a closed store, and a discretionary prepayment of \$5 million.

During fiscal 2013, pursuant to an authorization of the Company's Board of Directors, and with the approval of its lenders, the Company repurchased in open market transactions approximately 3,113,000 shares of its common stock for \$20 million, an average price of \$6.42 per share. The Company's Board of Directors may authorize additional share repurchases or other transactions involving the direct or indirect distribution of cash to the Company's shareholders, but the Company currently does not contemplate instituting a regular cash dividend. The Company's secured credit facilities impose significant limitations on redemptions of the Company's shares and cash distributions to shareholders and, accordingly, approval of the Company's lenders would be required prior to implementing any such transaction.

Capital Resources, Contractual Obligations and Off-Balance Sheet Arrangements

In addition to cash generated from operations, the Company utilizes other capital resources and financing arrangements to fund its business. A discussion of these capital resources and financing techniques is included below.

Debt

The Company continuously monitors its funding requirements for general working capital purposes and other financing and investing activities. In the last three fiscal years, management focused on reducing or eliminating the Company's investments in franchisees and the related guarantees of franchisees' obligations, reducing outstanding debt, and on restructuring the Company's borrowing arrangements to maintain credit availability and lower financing costs to facilitate accomplishing the Company's business restructuring and expansion initiatives.

The 2011 Secured Credit Facilities described in Note 12 to the consolidated financial statements appearing elsewhere herein are the Company's principal source of external financing. The 2011 Secured Credit Facilities contain significant financial covenants. Based on the Company's current working capital and the fiscal 2014 operating plan, management believes the Company can comply with the financial covenants and that the Company can meet its projected operating, investing and financing cash requirements.

The operation of the financial covenants described above could limit the amount the Company may borrow under the 2011 Revolver. In addition, the maximum amount which may be borrowed under the 2011 Revolver is reduced by the amount of outstanding letters of credit, which totaled approximately \$10.2 million as of February 3, 2013, all of which secure the Company's reimbursement obligations to insurers under the Company's self-insurance arrangements. The unused borrowing capacity available to the Company as of February 3, 2013 was approximately \$14.8 million. The restrictive covenants did not limit the Company's ability to borrow the full \$14.8 million of unused credit under the 2011 Revolver at that date.

The 2011 Secured Credit Facilities also contain customary events of default including, without limitation, payment defaults, breaches of representations and warranties, covenant defaults, cross-defaults to other indebtedness in excess of \$2.5 million, certain events of bankruptcy and insolvency, judgment defaults in excess of \$2.5 million and the occurrence of a change of control.

Leases

The Company conducts some of its operations from leased facilities and leases certain equipment. Generally, these leases have initial terms of two to 20 years and contain provisions for renewal options of five to 15 years. In determining whether to enter into a lease for an asset, the Company evaluates the nature of the asset and the associated lease terms to determine if leasing is an effective financing tool.

Off-Balance Sheet Arrangements

The Company's only off-balance sheet arrangements, as defined by Item 303(a)(4) of SEC Regulation S-K, consist principally of the Company's guarantees of indebtedness of certain franchisees, as discussed in Notes 8 and 14 to the consolidated financial statements appearing elsewhere herein.

Contractual Cash Obligations at February 3, 2013 when the contractual Cash Obligations at February 3, 2013

The Company's contractual cash obligations as of February 3, 2013 are as follows:

⁽¹⁾ Estimated interest payments for variable rate debt are based upon the LIBOR interest rate as of February 3, 2013.

The preceding table of contractual cash obligations excludes income tax liabilities of approximately \$1.2 million as of February 3, 2013 for uncertain tax positions due to uncertainty in predicting the timing of any such related payments.

Capital and Liquidity Requirements

In the next five years, the Company plans to use cash primarily for the following activities:

- Working capital and other general corporate purposes;
- Opening new Company stores, principally small retail shops, in selected markets;
- Remodeling, replacement and relocation of selected older Company shops;
- Routine capital expenditures to maintain the appearance and functionality of the Company's facilities and equipment, including its wholesale commissaries and retail Krispy Kreme shops;
- · Maintaining and enhancing the KK Supply Chain manufacturing and distribution capabilities; and
- Investing in information technology.

⁽²⁾ Amounts represent 100% of the Company's aggregate exposure at February 3, 2013 under loan guarantees related to franchisees in which the Company has an ownership interest. The timing of the potential payment is based upon the maturity of the guaranteed indebtedness. No demand has been made on the Company to perform under any of the guarantees.

The Company's capital requirements for these activities may be significant. The amount of these capital requirements will depend on many factors, including the Company's overall performance, the pace of store expansion, securing desirable real estate for new stores, the number of store remodels, and other infrastructure needs. The Company currently estimates that its capital expenditures for fiscal 2014 will be in the range of \$23 million to \$35 million. The most significant capital expenditures currently planned for fiscal 2014 are from seven to ten new stores, refurbishments and replacement of existing stores, new point-of-sale software to replace existing software that is approaching the end of its useful life, initial investment in a new enterprise resource planning system and enhancements to and replacements of existing information technology systems, and ongoing smaller, routine capital expenditures. The Company plans to fund these expenditures principally using cash provided by operations and current cash resources, although the Company may choose to lease certain anticipated asset acquisitions.

The Company believes that its current cash balances, cash expected to be generated from operations and the liquidity afforded by the 2011 Revolver are sufficient to meet the Company's liquidity requirements for the foreseeable future.

Inflation

The Company does not believe that general price inflation has had a material effect on its results of operations in recent years. However, prices of agricultural commodities and fuel have been volatile in recent years. Those price changes, which have generally trended upward, have had a significant effect on the cost of flour, shortening and sugar, the three most significant ingredients used in the production of the Company's products, as well as on the cost of gasoline consumed by the Company's wholesale delivery fleet.

Critical Accounting Policies

The Company's discussion and analysis of its financial condition and results of operations is based upon its financial statements that have been prepared in accordance with GAAP. The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures, including disclosures of contingencies and uncertainties. GAAP provides the framework from which to make these estimates, assumptions and disclosures. The Company chooses accounting policies within GAAP that management believes are appropriate to accurately and fairly report the Company's operating results and financial position in a consistent manner. Management regularly assesses these policies in light of changes in facts and circumstances and discusses the selection of accounting policies and significant accounting judgments with the Audit Committee of the Board of Directors. The Company believes that application of the following accounting policies involves judgments and estimates that are among the more significant used in the preparation of the financial statements, and that an understanding of these policies is important to understanding the Company's financial condition and results of operations.

Allowance for Doubtful Accounts

Accounts receivable arise primarily from royalties earned on sales by the Company's franchisees, sales by KK Supply Chain to our franchisees of equipment, mix and other supplies necessary to operate a Krispy Kreme store, as well as from wholesale sales by company stores to convenience and grocery stores and other customers. The Company has recorded provisions for doubtful accounts related to its accounts receivable, including receivables from franchisees, in amounts which management believes are sufficient to provide for losses estimated to be sustained on realization of these receivables. Such estimates inherently involve uncertainties and assessments of the outcome of future events, and changes in facts and circumstances may result in adjustments to the provision for doubtful accounts.

Goodwill

The Financial Accounting Standards Board ("FASB") guidance related to goodwill addresses the accounting and reporting of goodwill subsequent to its acquisition. This guidance provides that goodwill is not subject to amortization but must be tested annually for impairment, or more frequently if events and circumstances indicate potential impairment.

The Company performs the annual test for goodwill impairment as of December 31. The impairment test for indefinite-lived intangible assets like goodwill involves comparing the fair value of such assets with their carrying value, with any excess of carrying value over fair value recorded as an impairment charge. The goodwill impairment test involves determining the fair values of the reporting units to which goodwill is assigned and comparing those fair values to the reporting units' carrying values, including goodwill. The Company estimates the fair value of its reporting units forecasting future revenues, expenses and any capital spending to derive future reporting unit cash flows, then discounts those cash flows to present value. The Company also considers the estimated fair values of its reporting units relative to the Company's overall market capitalization in connection with its goodwill impairment assessment. Changes in projections or estimates could significantly change the estimated fair values of reporting units. In addition, if management uses different assumptions or estimates in the future or if conditions exist in future periods that are different than those anticipated, operating results and the balances of goodwill could be affected by impairment charges. There were no goodwill impairment charges in fiscal 2013, 2012 or 2011. As of February 3, 2013, the remaining goodwill had a carrying value of \$23.5 million, of which \$7.8 million and \$15.7 million was associated with the Domestic and International Franchise segments, respectively, each of which consists of a single reporting unit. The risk of goodwill impairment would increase in the event that the franchise segments' operating results were to significantly deteriorate or the overall market capitalization of the Company were to decline below the book value of the Company's shareholders' equity.

In September 2011, the FASB amended the guidance on the annual testing of goodwill for impairment. The amended guidance will permit, but does not require, companies to assess qualitative factors to determine if it is more likely than not that goodwill might be impaired and whether it is necessary to perform the two-step goodwill impairment test required under current accounting standards. Companies may elect to apply the new guidance in some periods and not in others, and to some reporting units and not to others. The Company adopted the amended guidance in the fourth quarter of fiscal 2012. Such adoption had no effect on the Company's consolidated financial statements.

Asset Impairment

When an asset group (typically a store) is identified as underperforming or when a decision is made to abandon an asset group or to close a store, the Company makes an assessment of the potential impairment of the related assets. The assessment is based upon a comparison of the carrying amount of the assets, primarily property and equipment, to the estimated undiscounted cash flows expected to be generated from those assets. To estimate cash flows, management projects the net cash flows anticipated from continuing operation of the asset group or store until its closing or abandonment, as well as cash flows, if any, anticipated from disposal of the related assets. If the carrying amount of the assets exceeds the sum of the undiscounted cash flows, the Company records an impairment charge in an amount equal to the excess of the carrying value of the assets over their estimated fair value.

Determining undiscounted cash flows and the fair value of an asset group involves estimating future cash flows, revenues, operating expenses and disposal values. The projections of these amounts represent management's best estimates at the time of the review. If different cash flows had been estimated, property and equipment balances and related impairment charges could have been affected. Further, if management uses different assumptions or estimates in the future or if conditions exist in future periods that are different than those anticipated, future operating results could be affected. In addition, the sale of assets whose carrying value has been reduced by impairment charges could result in the recognition of gains or losses to the extent the sales proceeds realized differ from the reduced carrying amount of the assets. The Company recorded no impairment charges in fiscal 2013. In fiscal 2012 and 2011, the Company recorded impairment charges related to long-lived assets totaling approximately \$60,000 and \$3.3 million, respectively. Additional impairment charges may be necessary in future years.

Insurance

The Company is subject to workers' compensation, vehicle and general liability claims. The Company is self-insured for the cost of all workers' compensation, vehicle and general liability claims up to the amount of stop-loss insurance coverage purchased by the Company from commercial insurance carriers. The Company maintains accruals for the estimated cost of claims on an undiscounted basis, without regard to the effects of stop-loss coverage, using actuarial methods which evaluate known open and incurred but not reported claims and consider historical loss development experience. In addition, the Company records receivables from the insurance carriers for claims amounts estimated to be recovered under the stop-loss insurance policies when these amounts are estimable and probable of collection. The Company estimates such stop-loss receivables using the same actuarial methods used to establish the related claims accruals, and taking into account the amount of risk transferred to the carriers under the stop-loss policies. Many estimates and assumptions are involved in estimating future claims, and differences between future events and prior estimates and assumptions could affect future operating results and result in adjustments to these loss accruals and related insurance receivables.

Income Taxes

The Company recognizes deferred income tax assets and liabilities based upon management's expectation of the future tax consequences of temporary differences between the income tax and financial reporting bases of assets and liabilities. Deferred tax liabilities generally represent tax expense recognized for which payment has been deferred, or expenses which have been deducted in the Company's tax returns but which have not yet been recognized as an expense in the financial statements. Deferred tax assets generally represent tax deductions or credits that will be reflected in future tax returns for which the Company has already recorded a tax benefit in its consolidated financial statements.

The Company had valuation allowances against deferred income tax assets of \$9.8 million and \$10.7 million at February 3, 2103 and January 29, 2012, respectively, representing the portion of such deferred tax assets which, as of such dates, management estimated would not be realized. Under generally accepted accounting principles ("GAAP"), future realization of deferred tax assets is evaluated under a "more likely than not" standard. Realization of net deferred tax assets generally is dependent on generation of taxable income in future periods. From fiscal 2005 until the fourth quarter of fiscal 2012, the Company maintained a valuation allowance on deferred tax assets equal to the entire excess of those assets over the Company's deferred income tax liabilities because of the uncertainty surrounding the realization of those assets. Such uncertainty arose principally from the substantial losses incurred by the Company from fiscal 2005 though fiscal 2009.

The Company reported a pretax profit of \$418,000 in fiscal 2010 and \$8.9 million in fiscal 2011. In fiscal 2012, the Company's pretax profit increased to \$30.4 million, inclusive of a \$6.2 million non-recurring gain from the Company's sale of its 30% interest in KK Mexico. After considering all relevant factors having an impact on the likelihood of future realization of the Company's deferred tax assets, in the fourth quarter of fiscal 2012 management concluded that it was more likely than not that a substantial portion of the Company's deferred tax assets would be realized in future years and, in accordance with GAAP, reversed \$139.6 million of the valuation allowance, with an offsetting credit to the provision for income taxes.

Two of the most significant factors considered by management in reaching its conclusion were that the Company earned a significant pretax profit in both fiscal 2011 and 2012 and the positive trend in the Company's earnings. In fiscal 2013, the Company's pretax income rose to \$36.3 million.

The evaluation of the amount of net deferred tax assets expected to be realized necessarily involves forecasting the amount of taxable income that will be generated in future years. In addition, because a substantial portion of the Company's deferred tax assets consist of net operating loss and tax credit carryforwards that are subject to expiration, the specific future periods in which taxable income is generated may have a material effect on the amount of deferred tax assets that ultimately are realized. The Company has forecasted future results using estimates management believes to be reasonable and which are based on objective verifiable evidence. The most important factor considered by management in making its forecast was the Company's results of operations for fiscal 2011, 2012 and 2013. Assuming the Company generates pretax income in each future year approximating

the Company's average pretax income over the past three years, management estimates that approximately \$116 million of its deferred tax assets will be realized in future periods. The decrease in the amount of deferred income tax assets expected to be realized from January 29, 2012 to February 3, 2013 reflects the realization in fiscal 2013 of approximately \$13 million of such assets and the loss of approximately \$9.8 million of income tax benefits associated with the expiration in fiscal 2013 of warrants to acquire the Company's common stock issued in prior years, as more fully described in Note 3 to the consolidated financial statements appearing elsewhere herein.

The remaining valuation allowance of \$9.8 million as of February 3, 2013 represents the portion of the Company's deferred tax assets management estimates will not be realized in the future. Such assets are associated principally with state net operating loss carryforwards having relatively short carryover periods which are forecasted to expire unused, as well as federal foreign tax credits and federal jobs credit carryforwards forecasted to expire unused.

The realization of deferred income tax assets is dependent on future events. While management believes its forecast of future taxable income is reasonable, actual results inevitably will vary from management's forecasts. Such variances could result in adjustments to the valuation allowance on deferred tax assets in future periods, and such adjustments could be material to the financial statements.

As described above, in making its estimate of the amount of deferred tax assets which will be realized in future periods, the Company estimated annual future pretax income of approximately \$24 million. Based on that estimate, the Company concluded that a valuation allowance on deferred tax assets of \$9.8 million was appropriate as of February 3, 2013. A 10% reduction in the amount of assumed future annual pretax income would have had no material effect on management's determination of the amount of deferred tax valuation allowance. A 20% reduction in the amount of assumed future annual pretax income would have caused management's determination of the appropriate valuation allowance to increase from \$9.8 million to approximately \$14.6 million. If the Company's earnings remain at current levels or continue to increase, it is reasonably likely that management would conclude that its estimate of annual income in future years should increase. For example, if management concluded that a future annual earnings forecast of \$34 million, which approximates Fiscal 2013 pretax income measured on a 52 week basis, were appropriate, then the amount of the deferred tax valuation allowance would be reduced by approximately \$3 million, with an offsetting credit to the provision for income taxes. Management believes that because estimates of future earnings are inherently subjective, and because such estimates necessarily involve forecasting many years into the future, frequent revisions to such estimates should not be expected. While the Company's results of operations continued to improve in fiscal 2013 and exceeded management's estimated annual pretax income for future years of \$24 million described above, the Company believes that additional evidence is necessary before concluding that the level of pretax income achieved in fiscal 2013 is sustainable on a long-term basis. Management believes that such evidence should include, among other things, at least one additional year of pretax profits substantially in excess of \$24 million before it would be appropriate for management to revised upward its estimate of future annual pretax income. As a result, absent the occurrence of some event or events not currently known, management does not anticipate adjusting its estimate of future earnings until the end of fiscal 2014, although management will revisit this assessment at the end of each quarter of the coming fiscal year.

While the reversal of a portion of the valuation allowances increased the Company's earnings by \$139.6 million in fiscal 2012, the reversal has the effect of increasing the provision for income taxes, and therefore decreasing net income, beginning in fiscal 2013. This negative effect on earnings occurs because the reversal of the valuation allowances resulted in the recognition in fiscal 2012 of income tax benefits expected to be realized in later years. Absent the reversal of the valuation allowances, such tax benefits would have been recognized when realized in future periods upon the generation of taxable income. Accordingly, beginning in fiscal 2013, the Company's effective income tax rate, which in fiscal 2012 and earlier years bore little or no relationship to pretax income, more closely reflects the blended federal and state income tax rates in jurisdictions in which the Company operates.

Because of the increase in the Company's effective income tax rate as described above, the Company's income tax expense in fiscal 2013 is not comparable to income tax expense in prior years In addition, until such time as the Company's net operating loss carryforwards are exhausted or expire, GAAP income tax expense is expected to substantially exceed the amount of cash income taxes payable by the Company, which are expected to remain insignificant for the foreseeable future.

Guarantee Liabilities

The Company has guaranteed a portion of certain loan obligations of certain franchisees in which the Company owns an interest. The Company assesses the likelihood of making any payments under the guarantees and records estimated liabilities for anticipated payments when the Company believes that an obligation to perform under the guarantees is probable and the amount can be reasonably estimated. No liabilities for the guarantees were recorded at the time they were issued because the Company believed the value of the guarantees was immaterial. As of February 3, 2013, the Company has recorded liabilities of approximately \$1.6 million related to such loan guarantees. The aggregate outstanding principal balance that was guaranteed by the Company was approximately \$2.1 million at that date. Assessing the probability of future guarantee payments involves estimates and assumptions regarding future events, including the future operating results of the franchisees. If future events are different from those assumed or anticipated, the amounts estimated to be paid pursuant to such guarantees could change, and additional provisions to record such liabilities could be required.

Stock-Based Compensation

The Company measures and recognizes compensation expense for share-based payment awards based on their fair values. Because options granted to employees differ from options on the Company's common shares traded in the financial markets, the Company cannot determine the fair value of options granted to employees based on observed market prices. Accordingly, the Company estimates the fair value of stock options subject only to service conditions using the Black-Scholes option valuation model, which requires inputs including interest rates, expected dividends, volatility measures and employee exercise behavior patterns. Some of the inputs the Company uses are not market-observable and must be estimated. In addition, the Company must estimate the number of awards which ultimately will vest, and periodically adjusts such estimates to reflect actual vesting events. Use of different estimates and assumptions would produce different option values, which in turn would affect the amount of compensation expense recognized.

The Black-Scholes model is capable of considering the specific features included in the options granted to the Company's employees that are subject only to service conditions. However, there are other models which could be used to estimate their fair value. If the Company were to use different models, the option values would differ despite using the same inputs. Accordingly, using different assumptions coupled with using different valuation models could have a significant impact on the fair value of employee stock options.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Interest Rate Risk

The Company is exposed to market risk from increases in interest rates on its outstanding debt. All of the borrowings under the Company's secured credit facilities bear interest at variable rates based upon either the lenders' prime rate, the Fed funds rate or LIBOR. The interest cost of the Company's debt may be affected by changes in these short-term interest rates and increases in those rates may adversely affect the Company's results of operations.

On March 3, 2011, the Company entered into an interest rate derivative contract having an aggregate notional principal amount of \$17.5 million. The derivative contract entitles the Company to receive from the counterparty the excess, if any, of the three-month LIBOR rate over 3.00% for each of the calendar quarters in the period beginning April 2012 and ending December 2015. The Company is accounting for this derivative contract as a cash flow hedge.

As of February 3, 2013, the Company had approximately \$24 million in borrowings outstanding. A hypothetical increase of 100 basis points in short-term interest rates would result in an approximately \$240,000 increase in annual interest expense on the Company's term debt. The Company has sought to limit its exposure to rising short-term interest rates by entering into the derivative contract described above. The Company's credit facilities and the related interest rate derivative are described in Note 12 to the consolidated financial statements appearing elsewhere herein.

Currency Risk

The substantial majority of the Company's revenue, expense and capital purchasing activities are transacted in U.S. dollars. Although royalties from international franchisees are payable to the Company in U.S. dollars, those royalties are computed based on local currency sales, and changes in the rate of exchange between the U.S. dollar and the foreign currencies used in the countries in which the international franchisees operate affect the Company's royalty revenues. Because royalty revenues are derived from a relatively large number of foreign countries, and royalty revenues are not highly concentrated in a small number of such countries, the Company believes that the relatively small size of any currency hedging activities would adversely affect the economics of hedging strategies and, accordingly, the Company historically has not attempted to hedge these exchange rate risks.

In fiscal 2013, the Company's international franchisees had sales of approximately \$423 million, and the Company's related royalty revenues were approximately \$23 million. A hypothetical 10% change in the average rate of exchange between the U.S. dollar and the currencies in which the Company's international franchisees do business would have a corresponding effect on the Company's international royalty revenues of approximately \$2.3 million.

Commodity Price Risk

The Company is exposed to the effects of commodity price fluctuations on the cost of ingredients of its products, of which flour, sugar and shortening are the most significant. In order to secure adequate supplies of materials and bring greater stability to the cost of ingredients, the Company routinely enters into forward purchase contracts and other purchase arrangements with suppliers. Under the forward purchase contracts, the Company commits to purchasing agreed-upon quantities of ingredients at agreed-upon prices at specified future dates. The outstanding purchase commitment for these commodities at any point in time typically ranges from one month's to two years' anticipated requirements, depending on the ingredient.

In addition to entering into forward purchase contracts, from time to time the Company purchases exchange-traded commodity futures contracts, and options on such contracts, for raw materials which are ingredients of its products or which are components of such ingredients, including wheat and soybean oil. The Company typically assigns the futures contract to a supplier in connection with entering into a forward purchase contract for the related ingredient.

The Company operates a large fleet of delivery vehicles and is exposed to the effects of changes in gasoline prices. The Company periodically uses futures and options on futures to hedge a portion of its exposure to rising gasoline prices.

Commodity Derivatives Outstanding at February 3, 2013

Quantitative information about the Company's unassigned option contracts and futures contracts and options on such contracts as of February 3, 2013, which mature in fiscal 2014, is set forth in the table below.

	Contract Volume	Weighted Average Contract Price or Strike Price	Aggregate Contract Price or Strike Price	Aggregate Fair Value
Futures contracts:	9	(Dollars in thousands, excep	t average prices)	
Wheat	145,000 bu.	\$8.65	\$1,254	\$(15)

Although the Company utilizes forward purchase contracts and futures contracts and options on such contracts to mitigate the risks related to commodity price fluctuations, such contracts do not fully mitigate price risk. In addition, the portion of the Company's anticipated future commodity requirements that are subject to such contracts vary from time to time. Adverse changes in commodity prices could materially adversely affect the Company's profitability and liquidity.

Sensitivity to Price Changes in Commodities

The following table illustrates the potential effect on the Company's costs resulting from hypothetical changes in the cost of the Company's three most significant ingredients and in the cost of gasoline used to fuel the Company's delivery fleet.

Ingredient	Approximate Anticipated Fiscal 2014 Purchases	Approximate Range of Prices Paid In Fiscal 2013	Hypothetical Price Increase	Approximate Annual ce Effect Of Hypothetical Price Increase	
				(In thousands)	
Flour	70 million lbs.	\$0.1709 - \$0.2823/lb.	\$0.05/lb.	\$3,500	
Shortening	45 million lbs.	\$0.5410 - \$0.9456/lb.	\$0.10/lb.	\$4,500	
Sugar	55 million lbs.	0.4150 - 0.4418	N/A	N/A	
Gasoline	3 million gal.	\$ 3.36 - \$4.00/gal.	\$0.30/gal.	\$ 900	

Anticipated fiscal 2014 purchases of flour, shortening and sugar set forth in the preceding table represent aggregate estimated purchases by KK Supply Chain. Approximately 52% of KK Supply Chain's fiscal 2013 sales were to Company Stores, with the remaining 48% of sales made to domestic and international franchisees. KK Supply Chain adjusts the selling prices of it products quarterly to reflect changes in its input costs. To the extent KK Supply Chain adjusts selling prices to exactly offset changes in its input costs, the Company, through its Company Stores segment, is directly exposed to only about half of such changes in KK Supply Chain input costs. However, to the extent higher selling prices resulting from adverse movements in the cost of agricultural commodities adversely affect sales by Company franchisees, the Company's financial results could be indirectly adversely affected by lower KK Supply Chain sales to franchisees, as well as by lower royalty revenues.

The ranges of prices paid for fiscal 2013 set forth in the table above reflect the effects of any forward purchase contracts entered into at various times prior to delivery of the goods and, accordingly, do not necessarily reflect the ranges of prices of these ingredients prevailing in the market during the fiscal year.

The Company has fixed the price of its anticipated sugar requirements for fiscal 2014 and accordingly, hypothetical effects of changes in the price of sugar have been omitted from the foregoing table.

As of March 2013, the Company has fixed the prices on approximately half of its anticipated fiscal 2014 requirements of flour and approximately 70% of its anticipated fiscal 2014 requirements of shortening at prices not materially different from prices that prevailed in fiscal 2013.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Krispy Kreme Doughnuts, Inc.

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Krispy Kreme Doughnuts, Inc. and its subsidiaries (the "Company") at February 3, 2013 and January 29, 2012, and the results of their operations and their cash flows for each of the three years in the period ended February 3, 2013 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in Item 15(a)2 presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of February 3, 2013, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and the financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO FINANCIAL STATEMENTS

Note 1 — Accounting Policies

Krispy Kreme Doughnuts, Inc. ("KKDI") and its subsidiaries (collectively, the "Company") are engaged in the sale of doughnuts and complementary products through Company-owned stores. The Company also derives revenue from franchise and development fees and royalties from franchisees. Additionally, the Company sells doughnut mix, other ingredients and supplies and doughnut-making equipment to franchisees.

Significant Accounting Policies

The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America ("GAAP"). The significant accounting policies followed by the Company in preparing the accompanying consolidated financial statements are as follows:

BASIS OF CONSOLIDATION. The financial statements include the accounts of KKDI and its subsidiaries, the most significant of which is KKDI's principal operating subsidiary, Krispy Kreme Doughnut Corporation.

Investments in entities over which the Company has the ability to exercise significant influence but which the Company does not control, and whose financial statements are not otherwise required to be consolidated, are accounted for using the equity method. These entities typically are 25% to 35% owned and are hereinafter sometimes referred to as "Equity Method Franchisees."

REVENUE RECOGNITION. A summary of the revenue recognition policies for the Company's business segments is as follows:

- Company Stores revenue is derived from the sale of doughnuts and complementary products to on-premises and wholesale customers. Revenue is recognized at the time of sale for on-premises sales. For wholesale sales, revenue is recognized at the time of delivery, net of provisions for estimated product returns.
- Domestic and International Franchise revenue is derived from development and initial franchise fees
 relating to new store openings and ongoing royalties charged to franchisees based on their sales.
 Development and franchise fees for new stores are deferred until the store is opened, which is the time
 at which the Company has performed substantially all of the initial services it is required to provide.
 Royalties are recognized in income as underlying franchisee sales occur unless there is significant
 uncertainty concerning the collectibility of such revenues, in which case royalty revenues are recognized
 when received.
- KK Supply Chain revenue is derived from the sale of doughnut mix, other ingredients and supplies and doughnut-making equipment. Revenues for the sale of doughnut mix and supplies are recognized upon delivery to the customer or, in the case of franchisees located outside North America, when the goods are loaded on the transport vessel at the U.S. port. Revenue for equipment sales and installation associated with new store openings is recognized at the store opening date. Revenue for equipment sales not associated with new store openings is recognized when the equipment is installed if the Company is responsible for the installation, and otherwise upon shipment of the equipment.

FISCAL YEAR. The Company's fiscal year ends on the Sunday closest to January 31, which periodically results in a 53-week year. Fiscal 2013 contained 53 weeks, while 2012 and 2011 each contained 52 weeks.

CASH AND CASH EQUIVALENTS. The Company considers cash on hand, demand deposits in banks and all highly liquid debt instruments with an original maturity of three months or less to be cash and cash equivalents.

ALLOWANCE FOR DOUBTFUL ACCOUNTS. The Company maintains allowances for doubtful accounts related to its accounts receivable, including receivables from franchisees, in amounts which management believes are sufficient to provide for losses estimated to be sustained on realization of these receivables. Such estimates inherently involve uncertainties and assessments of the outcome of future events, and changes in facts and circumstances may result in adjustments to the allowance for doubtful accounts.

NOTES TO FINANCIAL STATEMENTS—(Continued)

INVENTORIES. Inventories are recorded at the lower of cost or market, with cost determined using the first-in, first-out method.

PROPERTY AND EQUIPMENT. Depreciation of property and equipment is provided using the straight-line method over the assets' estimated useful lives, which are as follows: buildings — 7 to 35 years; machinery and equipment — 3 to 15 years; computer software — 3 years; and leasehold improvements — 1 to 20 years.

GOODWILL. Goodwill represents the excess of the purchase price over the value of identifiable net assets acquired in business combinations. Goodwill has an indefinite life and is not amortized, but is tested for impairment annually or more frequently if events or circumstances indicate the carrying amount of the asset may be impaired. Such impairment testing is performed for each reporting unit to which goodwill has been assigned.

LEGAL COSTS. Legal costs associated with litigation and other loss contingencies are charged to expense as services are rendered.

ASSET IMPAIRMENT. When an asset group (typically a store) is identified as underperforming or a decision is made to abandon an asset group or to close a store, the Company makes an assessment of the potential impairment of the related assets. The assessment is based upon a comparison of the carrying amount of the asset group, consisting primarily of property and equipment, to the estimated undiscounted cash flows expected to be generated from the asset group. To estimate cash flows, management projects the net cash flows anticipated from continuing operation of the asset group or store until its closing or abandonment as well as cash flows, if any, anticipated from disposal of the related assets. If the carrying amount of the assets exceeds the sum of the undiscounted cash flows, the Company records an impairment charge in an amount equal to the excess of the carrying value of the assets over their estimated fair value.

EARNINGS PER SHARE. The computation of basic earnings per share is based on the weighted average number of common shares outstanding during the period. The computation of diluted earnings per share reflects the additional common shares that would have been outstanding if dilutive potential common shares had been issued, computed using the treasury stock method. Such potential common shares consist of shares issuable upon the exercise of stock options and warrants and the vesting of currently unvested shares of restricted stock and restricted stock units.

The following table sets forth amounts used in the computation of basic and diluted earnings per share:

		Year Ended	· '
the second of th	February 3, 2013	January 29, 2012	January 30, 2011
 Manager and Antonion of State of St		(In thousands)	
Numerator: net income	\$20,779	\$166,269	\$ 7,599
Denominator:		per - 1	
Basic earnings per share — weighted average shares outstanding	67,624	69,145	68,337
Effect of dilutive securities:	in the past		
Stock options and warrants	1,781	1,741	1,055
Restricted stock and restricted stock units	491	611	530
Diluted earnings per share — weighted average shares	1000	7 19	
outstanding plus dilutive potential common shares	69,896	<u>71,497</u>	69,922
		-,	

Stock options and warrants with respect to 2.7 million, 7.6 million and 9.0 million shares, as well as 98,000, 185,000 and 409,000 unvested shares of restricted stock and unvested restricted stock units, have been excluded from the computation of the number of shares used to compute diluted earnings per share for the years ended February 3, 2013, January 29, 2012 and January 30, 2011, respectively, because their inclusion would be antidilutive.

NOTES TO FINANCIAL STATEMENTS—(Continued)

SHARE-BASED COMPENSATION. The Company measures and recognizes compensation expense for share-based payment awards by charging the fair value of each award at its grant date to earnings over the service period necessary for each award to vest.

CONCENTRATION OF CREDIT RISK. Financial instruments that subject the Company to credit risk consist principally of receivables from wholesale customers and franchisees and guarantees of indebtedness of franchisees. Wholesale receivables are primarily from grocer/mass merchants and convenience stores. The Company maintains allowances for doubtful accounts which management believes are sufficient to provide for losses which may be sustained on realization of these receivables. In fiscal 2013, 2012 and 2011, no customer accounted for more than 10% of Company Stores segment revenues. The two largest wholesale customers collectively accounted for approximately 16%, 14% and 13% of Company Stores segment revenues in fiscal 2013, 2012 and 2011, respectively. The two wholesale customers with the largest trade receivables balances collectively accounted for approximately 24% and 22% of total wholesale customer receivables at February 3, 2013 and January 29, 2012, respectively.

The Company also evaluates the recoverability of receivables from its franchisees and maintains allowances for doubtful accounts which management believes are sufficient to provide for losses which may be sustained on realization of these receivables. In addition, the Company evaluates the likelihood of potential payments by the Company under loan guarantees and records estimated liabilities for payments the Company considers probable.

SELF-INSURANCE RISKS AND RECEIVABLES FROM INSURERS. The Company is subject to workers' compensation, vehicle and general liability claims. The Company is self-insured for the cost of all workers' compensation, vehicle and general liability claims up to the amount of stop-loss insurance coverage purchased by the Company from commercial insurance carriers. The Company maintains accruals for the estimated cost of claims, without regard to the effects of stop-loss coverage, using actuarial methods which evaluate known open and incurred but not reported claims and consider historical loss development experience. In addition, the Company records receivables from the insurance carriers for claims amounts estimated to be recovered under the stop-loss insurance policies when these amounts are estimable and probable of collection. The Company estimates such stop-loss receivables using the same actuarial methods used to establish the related claims accruals, and taking into account the amount of risk transferred to the carriers under the stop-loss policies. The stop-loss policies provide coverage for claims in excess of retained self-insurance risks, which are determined on a claim-by-claim basis.

The Company recorded favorable adjustments to its self-insurance claims liabilities related to prior years of approximately \$730,000, \$1.3 million and \$1.8 million in fiscal 2013, 2012 and 2011, respectively. Such adjustments represent changes in estimates of the ultimate cost of incurred claims.

The Company provides health and medical benefits to eligible employees, and purchases stop-loss insurance from commercial insurance carriers which pays covered medical costs in excess of a specified annual amount incurred by each claimant.

DERIVATIVE FINANCIAL INSTRUMENTS AND DERIVATIVE COMMODITY INSTRUMENTS. The Company reflects derivative financial instruments, which consist primarily of interest rate derivatives and commodity futures contracts and options on such contracts, in the consolidated balance sheet at their fair value. The difference between the cost, if any, and the fair value of the interest rate derivatives is reflected in income unless the derivative instrument qualifies as a cash flow hedge and is effective in offsetting future cash flows of the underlying hedged item, in which case such amount is reflected in other comprehensive income. The difference between the cost, if any, and the fair value of commodity derivatives is reflected in earnings because the Company has not designated any of these instruments as cash flow hedges.

NOTES TO FINANCIAL STATEMENTS—(Continued)

FOREIGN CURRENCY TRANSLATION. Until May 2011, the Company had an ownership interest in its franchisee in Mexico, which was accounted for using the equity method. The functional currency of the franchisee is the local currency. Assets and liabilities of these operations were translated into U.S. dollars using exchange rates as of the balance sheet date, and revenues, expenses and the Company's equity in the earnings or losses of the franchisee are translated using the average exchange rate for the reporting period. The resulting cumulative translation adjustments were reported, net of income taxes, as a component of accumulated other comprehensive income. Transaction gains and losses resulting from remeasuring transactions denominated in currencies other than an entity's functional currency are reflected in earnings. The Company also has an ownership interest in its franchisee in Western Canada that is accounted for using the equity method. The carrying value of this investment has been reduced to zero.

COMPREHENSIVE INCOME. Accounting standards on reporting comprehensive income require that certain items, including foreign currency translation adjustments and mark-to-market adjustments on derivative contracts accounted for as cash flow hedges (which are not reflected in net income) be presented as components of comprehensive income. The cumulative amounts recognized by the Company under these standards are reflected in the consolidated balance sheet as accumulated other comprehensive income, a component of shareholders' equity.

USE OF ESTIMATES. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results will differ from these estimates, and the differences could be material.

CORRECTION OF BALANCE SHEET CLASSIFICATION ERROR. The Company's KK Supply Chain transfers doughnut mixes and certain other goods to third-party distribution companies which, in turn, distribute such products to Company and franchise stores pursuant to distribution contracts with KK Supply Chain. The Company does not record revenues or profit on the product transfers to the distribution companies because all revenue recognition criteria are not met at that time. Revenues and profit are recorded only upon the delivery of the goods to the stores by the distribution companies (and the sales to Company shops are eliminated in consolidation). In the fourth quarter of fiscal 2013, the Company concluded that certain of the Company's receivables from third-party distribution companies resulting from the product transfers had been incorrectly reported as a component of inventories, rather than as a component of receivables, in prior periods. The Company corrected this classification error as of February 3, 2013. While not material to previously issued financial statements, to enhance comparability, the Company corrected the corresponding error as of January 29, 2012, by revising the classification of \$3.9 million of receivables from the distribution companies previously classified as inventories to receivables. The error also affected the change in inventories and change in receivables line items in the statement of cash flows in prior periods, but there was no effect on net cash provided by operating activities. The Company revised its statement of cash flows to adjust the increase in receivables from \$862,000 to \$4,999,000 and to adjust the increase in inventories from \$1,862,000 to a decrease of \$2,275,000 in fiscal 2012, and to adjust the increase in receivables from \$2,604,000 to \$2,583,000 and to adjust the increase in inventories from \$314,000 to \$335,000 in fiscal 2011. Correction of this error had no effect on the Company's results of operations, total current assets, working capital, or total operating, investing, or financing cash flows.

NOTES TO FINANCIAL STATEMENTS—(Continued)

Recent Accounting Pronouncements

In February 2013, the FASB issued guidance requiring an entity to provide information about the amounts reclassified out of accumulated other comprehensive income ("AOCI") by component. In addition, an entity is required to present, either on the face of the financial statements or in the notes, significant amounts reclassified out of AOCI by the respective line items of net income, but only if the amount reclassified is required to be reclassified in its entirety in the same reporting period. For amounts that are not required to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures that provide additional details about those amounts. This guidance is effective for the Company in the first quarter of fiscal 2014, but adoption of the guidance is not expected to have a material effect on the Company's consolidated financial statements.

In July 2012, the FASB issued amended accounting guidance regarding indefinite-lived intangible asset impairment testing. The amended guidance permits, but does not require, an entity to first assess qualitative factors to determine whether it is necessary to perform a quantitative impairment test. An entity would not be required to calculate the fair value of an indefinite-lived intangible asset unless the entity determines, based on qualitative assessment, that it is not more likely than not, the indefinite-lived intangible asset is impaired. This guidance is effective for the Company in fiscal 2014, with early adoption permitted. The Company does not expect adoption of this new guidance will have a material effect on its financial position or results of operations.

In June 2011, the FASB issued new accounting standards which require an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income, or in two separate but consecutive statements. The Company adopted the new standards in fiscal 2013 and elected to present a statement of comprehensive income separate from the statement of income.

In May 2011, the FASB issued an Accounting Standards Update ("ASU") related to fair value measurements. The ASU clarifies some existing concepts, eliminates wording differences between GAAP and International Financial Reporting Standards ("IFRS"), and in some limited cases, changes some principles to achieve convergence between GAAP and IFRS. The ASU also expands the disclosures for fair value measurements that are estimated using significant unobservable (Level 3) inputs. The ASU was effective for the Company in fiscal 2013. Adoption of the new accounting standards had no material effect on the Company's financial condition or results of operations.

Effective February 1, 2010, the first day of fiscal 2011, the Company was required to adopt new accounting standards related to the consolidation of variable interest entities ("VIE"). Those standards require an enterprise to qualitatively assess whether it is the primary beneficiary of a VIE based on whether the enterprise has the power to direct matters that most significantly impact the activities of the VIE and has the obligation to absorb losses of, or the right to receive benefits from, the VIE that could potentially be significant to the VIE. An enterprise must consolidate the financial statements of VIEs of which it is the primary beneficiary. Under the new accounting standards, the Company was no longer the primary beneficiary of its franchisee in northern California, which required the Company to deconsolidate the franchisee and recognize a divestiture of the three stores the Company sold to the franchisee in the third quarter of fiscal 2010. The cumulative effect of adoption of the new standards has been reflected as a \$1.3 million credit to the opening balance of retained earnings as of February 1, 2010. Adoption of the standards had no material effect on the Company's financial position, results of operations or cash flows.

Note 2 — Segment Information

The Company's reportable segments are Company Stores, Domestic Franchise, International Franchise and KK Supply Chain. The Company Stores segment is comprised of the stores operated by the Company. These stores sell doughnuts and complementary products through both on-premises and wholesale channels, although some stores serve only one of these distribution channels. The Domestic Franchise and International Franchise

NOTES TO FINANCIAL STATEMENTS—(Continued)

segments consist of the Company's franchise operations. Under the terms of franchise agreements, domestic and international franchisees pay royalties and fees to the Company in return for the use of the Krispy Kreme name and ongoing brand and operational support. Expenses for these segments include costs to recruit new franchisees, to assist in store openings, to support franchisee operations and marketing efforts, as well as allocated corporate costs. The majority of the ingredients and materials used by Company stores are purchased from the KK Supply Chain segment, which supplies doughnut mix, other ingredients and supplies and doughnut making equipment to both Company and franchisee-owned stores.

All intercompany sales by the KK Supply Chain segment to the Company Stores segment are at prices intended to reflect an arms-length transfer price and are eliminated in consolidation. Operating income for the Company Stores segment does not include any profit earned by the KK Supply Chain segment on sales of doughnut mix and other items to the Company Stores segment; such profit is included in KK Supply Chain operating income.

The following table presents the results of operations of the Company's operating segments for fiscal 2013, 2012 and 2011. Segment operating income is consolidated operating income before unallocated general and administrative expenses and impairment charges and lease termination costs.

The Company recognizes deferred income tax assets and liabilities based upon management's expectation of the future tax consequences of temporary differences between the income tax and financial reporting bases of assets and liabilities. Deferred tax liabilities generally represent tax expense recognized for which payment has been deferred, or expenses which have been deducted in the Company's tax returns but which have not yet been recognized as an expense in the financial statements. Deferred tax assets generally represent tax deductions or credits that will be reflected in future tax returns for which the Company has already recorded a tax benefit in its consolidated financial statements.

NOTES TO FINANCIAL STATEMENTS—(Continued)

The tax effects of temporary differences are as follows:

Deferred income tax liabilities		78- T
Net deferred income tax assets	\$116,411	\$139,593

The Company establishes valuation allowances for deferred income tax assets in accordance with GAAP, which provides that such valuation allowances shall be established unless realization of the income tax benefits is more likely than not.

The Company had valuation allowances against deferred tax assets of \$9.8 million and \$10.7 million at February 3, 2013 and January 29, 2012, respectively, representing the portion of such deferred tax assets which, as of such dates, management estimated would not be realized in future periods. Under GAAP, future realization of deferred tax assets is evaluated under a "more likely than not" standard. Realization of net deferred tax assets generally is dependent on generation of taxable income in future periods. From fiscal 2005 until the fourth quarter of fiscal 2012, the Company maintained a valuation allowance on deferred tax assets equal to the entire excess of those assets over the Company's deferred income tax liabilities because of the uncertainty surrounding the realization of those assets. Such uncertainty arose principally from of the substantial losses incurred by the Company from fiscal 2005 through fiscal 2009.

The Company reported a pretax profit of \$418,000 in fiscal 2010 and \$8.9 million in fiscal 2011. In fiscal 2012, the Company's pretax profit increased to \$30.4 million, inclusive of a \$6.2 million non-recurring gain on the Company's sale of its 30% interest in KK Mexico. After considering all relevant factors and objectively verifiable evidence having an impact on the likelihood of future realization of the Company's deferred tax assets, in the fourth quarter of fiscal 2012 management concluded that it was more likely than not that a substantial portion of the Company's deferred tax assets would be realized in future years. Accordingly, the Company reversed

NOTES TO FINANCIAL STATEMENTS—(Continued)

\$139.6 million of the valuation allowance on deferred tax assets, with an offsetting credit to the provision for income taxes. In addition, during fiscal 2012 the Company realized approximately \$15.1 million of additional deferred tax assets, principally from the utilization of net operating loss carryovers to offset fiscal 2012 taxable income.

The valuation allowance of \$9.8 million as of February 3, 2013 represents the portion of the Company's deferred tax assets management estimates will not be realized in the future. Such assets are associated principally with state net operating loss and state credit carryforwards having relatively short carryforward periods which are forecasted to expire unused, as well as federal foreign tax credits and federal jobs credit carryforwards forecasted to expire unused. During fiscal 2013, the Company's gross deferred tax assets and the related valuation allowance were each reduced in the amount of \$885,000 as a result of the Company's amendment of a prior year income tax return; the amendment had no effect on the Company's net deferred tax assets.

The realization of deferred income tax assets is dependent on future events. While management believes its forecast of future taxable income is reasonable, actual results inevitably will vary from management's forecasts. Such variances could result in adjustments to the valuation allowance on deferred tax assets in future periods, and such adjustments could be material to the financial statements.

The changes in the valuation allowance on deferred income tax assets are summarized as follows:

and the second of the second o		Year Ended	
and the second of the second o	February 3, 2013	January 29, 2012	January 30, 2011

Deferred income tax assets and liabilities are reflected in the accompanying consolidated balance sheet as follows:

		January 29, 2012
	(In thou	isands)
Net current assets.	\$ 23,323	\$ 10,540
Net noncurrent assets.		
Net asset	\$116,411	\$139,593

The Company has approximately \$183 million of federal income tax loss carryforwards expiring in fiscal 2026 through 2031. In addition to this amount, the Company has approximately \$23 million of federal income tax loss carryforwards resulting from tax deductions related to stock options and other equity awards to employees, the tax benefits of which, if subsequently realized, will be recorded as additions to common stock. The Company also has state income tax loss carryforwards expiring in fiscal 2014 through 2031. The Company has \$4.9 million of federal tax credit carryforwards expiring in fiscal 2014 through 2031, principally consisting of federal foreign tax credit carryforwards. The Company also has approximately \$415,000 of state income tax credit carryforwards expiring in fiscal 2014 through 2026.

NOTES TO FINANCIAL STATEMENTS—(Continued)

In fiscal 2008, the Company issued warrants to acquire shares of the Company's common stock at prices of \$12.21 per share as more fully described in Note 15. The warrants expired unexercised in the first quarter of fiscal 2013. Accordingly, the Company will not be entitled to any income tax deductions related to them. Deferred tax assets at January 29, 2012 included approximately \$7.2 million related to these warrants. In accordance with GAAP, such amounts were charged to common stock in the first quarter of fiscal 2013 because common stock in the accompanying consolidated balance sheet includes cumulative credits related to share based compensation in excess of such amounts.

In fiscal 2006, the Company issued a warrant to acquire shares of the Company's common stock at prices of \$7.75 as more fully described in Note 15. The warrant expired unexercised in the fourth quarter of fiscal 2013. Accordingly, the Company will not be entitled to any income tax deductions related to it. Deferred tax assets at January 29, 2012 included approximately \$2.6 million related to the warrant. In accordance with GAAP, such amounts were charged to common stock in the fourth quarter of fiscal 2013 because common stock in the accompanying consolidated balance sheet includes cumulative credits related to share based compensation in excess of such amounts.

The Company is subject to U.S. federal income tax, as well as income tax in multiple U.S. state and local jurisdictions and a limited number of foreign jurisdictions. The Company's income tax returns periodically are examined by the Internal Revenue Service (the "IRS") and by other tax authorities in various jurisdictions. The Company assesses the likelihood of adverse outcomes resulting from these examinations in determining the provision for income taxes. Generally, the IRS and other tax authorities are permitted to examine the Company's income tax returns and propose adjustments to those returns for a three year period following the filing of the returns, and thereafter are barred by the statute of limitations from proposing adjustments to the returns. An important exception is that the tax authorities may challenge a deduction for a loss carryforward in the year in which the carryforward is utilized (which may be many years following the year in which the loss was incurred), unless the tax authorities previously have examined the tax return for the loss year. The IRS is currently examining the Company's federal income tax return for fiscal 2010. With the exception of the current examination, the IRS has not examined the Company's federal income tax returns for years subsequent to fiscal 2004. The Company's fiscal 2006 through fiscal 2012 tax returns (and the fiscal 2013 return, when filed) are subject to examination by the IRS, notwithstanding the statute of limitations, because fiscal 2006 through fiscal 2009 were loss years (as was fiscal 2011). Losses incurred in such years constitute substantially all of the Company's federal tax loss carryovers. A substantial portion of the Company's state net operating loss carryforwards remain subject to examination by state tax authorities for similar reasons.

Income tax payments, net of refunds, were \$2.3 million, \$3.3 million and \$1.0 million in fiscal 2013, 2012 and 2011, respectively. The tax payments in all three fiscal years were comprised largely of foreign withholding taxes on revenues received from foreign franchisees. The fiscal 2012 tax payments also reflect approximately \$1.5 million of Mexican taxes arising from the Company's sale of its 30% equity interest in KK Mexico described in Note 8. The fiscal 2011 amount is net of a federal income tax refund of \$560,000 resulting from enactment of the Worker, Homeownership and Business Assistance Act of 2009.

The Company had \$1.2 million of unrecognized tax benefits as of February 3, 2013, all of which, if subsequently recognized, would be recorded as a credit to income tax expense.

NOTES TO FINANCIAL STATEMENTS—(Continued)

The following table presents a reconciliation of the beginning and ending amounts of unrecognized tax benefits:

		Year Ended	
of the second se	February 3, 2013	January 29, 2012	January 30, 2011
A Company of the Comp	April 18 Section 18	(In thousands)	-
Unrecognized tax benefits at beginning of year	\$1,165	\$1,365	\$1,883
Increases related to positions taken in the current year	128	102	85
Increases (decreases) related to positions taken in prior years	. 	(10)	28
Lapsing of statutes of limitations	(116)	(292)	(631)
Unrecognized tax benefits at end of year	<u>\$1,177</u>	<u>\$1,165</u>	\$1,365

The amount of unrecognized tax benefits may decrease in fiscal 2014 due to the lapsing of statutes of limitations. The total amount of unrecognized tax benefits is not expected to change materially in fiscal 2014, and any such changes, if recognized, are not expected to have any material effect on income tax expense.

The Company's policy is to recognize interest and penalties related to income tax issues as components of income tax expense. The Company's balance sheet reflects approximately \$295,000 and \$380,000 of accrued interest and penalties as of February 3, 2013 and January 29, 2012, respectively.

Note 8 — Investments in Franchisees

As of February 3, 2013, the Company had investments in three franchisees. These investments were made in the form of capital contributions and, in certain instances, loans evidenced by promissory notes. These investments are reflected as "Investments in equity method franchisees" in the consolidated balance sheet.

Information about the Company's ownership in the Equity Method Franchisees and the markets served by those franchisees is set forth below:

	$\mathcal{T}_{\mathcal{A},\mathbf{w},\mathbf{w}} = \{\mathbf{x}_{\mathbf{w}}^{\mathbf{w}}, \mathbf{x}_{\mathbf{w}}^{\mathbf{w}}\} \in \mathcal{B}_{\mathbf{w}}$	Stores as of February 3,	Ownership%

The loan guarantee amounts in the preceding tables represent the portion of the principal amount outstanding under the related loan that is subject to the Company's guarantee.

The Company has a 25% interest in Kremeworks, LLC ("Kremeworks"), and has guaranteed 20% of the outstanding principal balance of certain of Kremeworks' bank indebtedness, which as amended, matures in October 2013. The aggregate amount of such indebtedness was approximately \$2.2 million at February 3, 2013.

Current liabilities at February 3, 2013 and January 29, 2012 include accruals for potential payments under loan guarantees of approximately \$1.6 million and \$1.9 million, respectively, related to Krispy Kreme of South Florida, LLC ("KKSF"). The underlying indebtedness matured by its terms in October 2009. Such maturity had been extended on a month-to-month basis pursuant to an informal agreement between KKSF and the lender. In October 2012, KKSF received notice that the original lender had sold the loan to a new lender. The new lender has advised KKSF that the entire balance due under the loan is currently due and owing, but has not made demand for payment on KKSF. KKSF is seeking modifications of the loan agreement from the new lender to extend the maturity of the loan and, as an alternative, is seeking replacement financing from other lenders to refinance the balance of the loan. There was no liability reflected in the financial statements for the guarantee of Kremeworks' debt because the Company did not believe it was probable that the Company would be required to perform under that guarantee. While there is no current demand on the Company to perform under either of the guarantees, there can be no assurance that the Company will not be required to perform and, if circumstances change from those prevailing at February 3, 2013, additional guarantee payments or provisions for guarantee payments could be required with respect to either of the guarantees, and such payments or provisions could be significant.

NOTES TO FINANCIAL STATEMENTS—(Continued)

In December 2011, the Company, KKSF and KKSF's majority owner entered into a restructuring agreement pursuant to which KKSF is to pay to the Company past due amounts totaling approximately \$825,000, all of which the Company had written off in prior years. KKSF paid a total of \$180,000 of such amount following the execution of the agreement, and is to commence repayment of the remaining amount not later than January 2014. All amounts paid under the agreement will be recorded as bad debt recoveries. At such time as KKSF has paid all the agreed upon amounts and the Company has been released from all guarantees of KKSF indebtedness (and the Company has been reimbursed for any and all amounts paid by the Company pursuant to the guarantees), the Company has agreed to convey to KKSF's majority owner all of the Company's membership interests in KKSF, provided that neither KKSF nor its majority owner are then in default under any agreement between either of them and the Company.

The following table summarizes the Company's obligations under the loan guarantees as of February 3, 2013, and the scheduled expiration of these obligations in each of the next five fiscal years and thereafter. The amounts shown as the scheduled expiration of the guarantees are based upon the scheduled maturity of the underlying guaranteed obligation.

	Guarantee	Total Loan	Amounts Expiring in Fiscal Year					. *
,	Percentages	Percentages Guarantees		2015	2016	2017	2018	Thereafter
					(In the	ousands)		
Kremeworks, LLC	20%	\$ 437	\$ 43,7	\$	\$	\$	\$	\$
South Florida, LLC	100%	1,628 \$2,065	1,628 \$2,065	<u>-</u>	· <u>\$</u>	<u>=</u>	<u>\$</u>	<u></u>

On May 5, 2011, the Company sold its 30% equity interest in Krispy Kreme Mexico, S. de R.L. de C.V. ("KK Mexico"), the Company's franchisee in Mexico, to KK Mexico's majority shareholder. The Company received cash proceeds of approximately \$7.7 million in exchange for its equity interest and, after deducting costs of the transaction, realized a gain of approximately \$6.2 million on the disposition. After provision for payment of Mexican income taxes related to the sale of approximately \$1.5 million, the Company reported an after tax gain on the disposition of approximately \$4.7 million in the second quarter of fiscal 2012. The net after tax proceeds of the sale of approximately \$6.2 million were used to prepay a portion of the outstanding balance of the 2011 Term Loan.

In connection with the Company's sale of its KK Mexico interest, KK Mexico paid approximately \$765,000 of amounts due to the Company which were evidenced by promissory notes, relating principally to past due royalties and fees due to the Company. As a consequence of this payment, in the first quarter of fiscal 2012, the Company reversed an allowance for doubtful notes receivable of approximately \$391,000 and recorded royalty

english serveri di Propositi di parattaga a mark

NOTES TO FINANCIAL STATEMENTS—(Continued)

and franchise fee income of approximately \$280,000 and \$95,000 respectively. The reserve had previously been established, and the royalties and fees had not previously been recognized as revenue, because of uncertainty surrounding the collection of these amounts.

net of accumulated impairment losses of \$1.8 million and accumulated		
amortization of \$24 in fiscal 2013	699	280
	\$24,195	\$23,776

⁽²⁾ The net income or loss of each of these entities is includable on the income tax returns of their owners to the extent required by law. Accordingly, the financial statements of these entities do not include a provision for income taxes and as a result pretax income or loss for each of these entities is also their net income or loss.

NOTES TO FINANCIAL STATEMENTS—(Continued)

On August 30, 2012, the Company acquired the assets and operations of one of its franchisees in exchange for \$915,000 cash as more fully described in Note 21. The allocation of the purchase price included \$443,000 allocated to reacquired franchise rights, which is being amortized over the remaining life of the franchise agreement of approximately eight years.

In addition to the foregoing notes receivable, the Company had promissory notes totaling approximately \$3.3 million at February 3, 2013 and January 29, 2012, respectively, representing principally royalties and fees due to the Company which, as a result of doubt about their collection, the Company had not yet recorded as revenues.

NOTES TO FINANCIAL STATEMENTS—(Continued)

No payments were required to be made currently on any of these amounts. During fiscal 2012, the Company recognized approximately \$375,000 of previously unrecognized revenues related to KK Mexico which were received on May 5, 2011 in connection with the Company's sale of its 30% equity interest in the franchisee, as more fully described in Note 8. During fiscal 2012, the Company also reversed an allowance for doubtful notes receivable of approximately \$391,000 related to KK Mexico; such note also was paid in full on May 5, 2011. Collections on these promissory notes are being recorded as revenue as they are received.

Note 11 — Accrued Liabilities

The components of accrued liabilities are as follows:

	February 3, 2013	January 29, 2012

2011 Secured Credit Facilities

On January 28, 2011, the Company entered into secured credit facilities (the "2011 Secured Credit Facilities"), consisting of a \$25 million revolving credit line (the "2011 Revolver") and a \$35 million term loan (the "2011 Term Loan"), each of which mature in January 2016. The 2011 Secured Credit Facilities are secured by a first lien on substantially all of the assets of the Company and its domestic subsidiaries. The Company used the proceeds of the 2011 Term Loan to repay the approximate \$35 million principal outstanding balance under the Company's prior secured credit facilities (the "2007 Secured Credit Facilities") described below, which were then terminated. The Company recorded a pretax charge of approximately \$1.0 million in the fourth quarter of fiscal 2011 to write off a majority of the unamortized deferred debt issuance costs related to the terminated facility and to record certain expenses related to the new facility.

Interest on borrowings under the 2011 Secured Credit Facilities is payable either at LIBOR or the Base Rate (which is the greatest of the prime rate, the Fed funds rate plus 0.50%, or the one-month LIBOR rate plus 1.00%), in each case plus the Applicable Percentage. The Applicable Percentage for LIBOR loans ranges from 2.25% to 3.00%, and for Base Rate loans ranges from 1.25% to 2.00%, in each case depending on the Company's leverage ratio. As of February 3, 2013, all outstanding borrowings under the 2011 Secured Credit Facilities were based on LIBOR, and the Applicable Margin was 2.25%.

On March 3, 2011, the Company entered into an interest rate derivative contract having an aggregate notional principal amount of \$17.5 million. The derivative contract entitles the Company to receive from the counterparty the excess, if any, of the three-month LIBOR rate over 3.00% for each of the calendar quarters in the period beginning April 2012 and ending December 2015. The Company is accounting for this derivative contract as a cash flow hedge.

NOTES TO FINANCIAL STATEMENTS—(Continued)

The 2011 Revolver contains provisions which permit the Company to obtain letters of credit, issuance of which constitutes usage of the lending commitments and reduces the amount available for cash borrowings. At closing, \$12.5 million of letters of credit were issued under the 2011 Revolver to replace letters of credit issued under the terminated facilities, all of which secure the Company's reimbursement obligations to insurers under the Company's self-insurance programs. Such letters of credit totaled \$10.2 million as of February 3, 2013. There were no borrowings outstanding under the 2011 Revolver at February 3, 2013 or January 29, 2012.

The Company is required to pay a fee equal to the Applicable Percentage for LIBOR-based loans on the outstanding amount of letters of credit, as well as a fronting fee of 0.125% of the amount of such letter of credit. There also is a fee on the unused portion of the 2011 Revolver lending commitment, ranging from 0.35% to 0.65%, depending on the Company's leverage ratio.

The 2011 Term Loan is payable in quarterly installments of approximately \$467,000 (as adjusted to give effect to principal prepayments), and a final installment equal to the remaining principal balance in January 2016. The Term Loan is required to be prepaid with some or all of the net proceeds of certain equity issuances, debt issuances, asset sales and casualty events. On the closing date, the Company deposited into escrow an aggregate of \$1.8 million with respect to nine properties for which the Company agreed to furnish to the lenders certain documentation on or before January 31, 2012, with amounts to be released from escrow upon the Company's furnishing such documentation. If the Company did not furnish the documentation by January 31, 2012, then the amount remaining in escrow on that date would have been used to make a prepayment of principal on the 2011 Term Loan. During fiscal 2012, all documentation was furnished by the Company and the entire \$1.8 million of the escrowed amount was returned to the Company.

The 2011 Secured Credit Facilities require the Company to meet certain financial tests, including a maximum leverage ratio and a minimum fixed charge coverage ratio. The leverage ratio was required to be not greater than 2.5 to 1.0 in fiscal 2013 and thereafter. The fixed charge coverage ratio is required to be not less than 1.1 to 1.0 in fiscal 2013 and 1.2 to 1.0 thereafter.

As of February 3, 2013, the Company's leverage ratio was 0.7 to 1.0 and the fixed charge coverage ratio was 3.3 to 1.0.

On March 27, 2012, the Company's Board of Directors authorized the repurchase of up to \$20 million of the Company's common stock. The Company's lenders consented to such repurchases, subject to certain conditions, the most significant of which was that for the Reference Period (defined below) immediately preceding any such repurchases, the Leverage Ratio be not greater than 2.0 to 1.0 and the Fixed Charge Coverage Ratio be not less than 1.5 to 1.0. The Company completed the share repurchase in June 2012 as described in Note 15.

The leverage ratio is calculated by dividing total debt as of the end of each fiscal quarter by Consolidated EBITDA for the Reference Period (each consisting of the four most recent fiscal quarters). For this purpose, debt includes not only indebtedness reflected in the consolidated balance sheet, but also, among other things, the amount of undrawn letters of credit, the principal balance of indebtedness of third parties to the extent such indebtedness is guaranteed by the Company, and any amounts reasonably expected to be paid with respect to any other guaranty obligations. The fixed charge coverage ratio is calculated for each Reference Period by dividing (a) the sum of (i) Consolidated EBITDA, plus (ii) Cash Lease Payments, minus (iii) cash income taxes, minus (iv) distributions in respect of the Company's common stock (which are limited by the credit agreement), minus (v) unfinanced capital expenditures, by (b) Consolidated Fixed Charges.

"Consolidated EBITDA" is a non-GAAP measure and is defined in the 2011 Secured Credit Facilities to mean, for each Reference Period, generally, consolidated net income or loss, exclusive of unrealized gains and losses on hedging instruments, gains or losses on asset dispositions, and provisions for payments on guarantee obligations, plus the sum of interest expense, income taxes, depreciation, rent expense and lease termination costs, and non-cash charges; and minus the sum of non-cash credits, interest income, Cash Lease Payments, and payments on guaranty obligations in excess of \$1 million during the Reference Period or \$3 million in the aggregate.

NOTES TO FINANCIAL STATEMENTS—(Continued)

"Cash Lease Payments" means the sum of cash paid or required to be paid for obligations under operating leases for real property and equipment (net of sublease income), lease payments on closed stores (but excluding payments in settlement of future obligations under terminated operating leases), and cash payments in settlement of future obligations under terminated operating leases to the extent the aggregate amount of such payments exceeds \$1.5 million during a Reference Period or \$5.0 million in the aggregate.

"Consolidated Fixed Charges" means the sum of cash interest expense, Cash Lease Payments, and scheduled principal payments of indebtedness.

The operation of the restrictive financial covenants described above may limit the amount the Company may borrow under the 2011 Revolver. The restrictive covenants did not limit the Company's ability to borrow the full \$14.8 million of unused credit under the 2011 Revolver at February 3, 2013.

The 2011 Secured Credit Facilities also contain covenants which, among other things, generally limit (with certain exceptions): liquidations, mergers, and consolidations; the incurrence of additional indebtedness (including guarantees); the incurrence additional liens; the sale, assignment, lease, conveyance or transfer of assets; certain investments (including investments in and advances to franchisees which own and operate Krispy Kreme stores); dividends and stock redemptions or repurchases; transactions with affiliates; engaging in materially different lines of business; sale-leaseback transactions; and other activities customarily restricted in such agreements. The 2011 Secured Credit Facilities also prohibit the transfer of cash or other assets to KKDI from its subsidiaries, whether by dividend, loan or otherwise, but provide for exceptions to enable KKDI to pay taxes, directors' fees and operating expenses.

The 2011 Secured Credit Facilities also contain customary events of default including, without limitation, payment defaults, breaches of representations and warranties, covenant defaults, cross-defaults to other indebtedness in excess of \$2.5 million, certain events of bankruptcy and insolvency, judgment defaults in excess of \$2.5 million and the occurrence of a change of control.

Borrowings and issuances of letters of credit under the 2011 Revolver are subject to the satisfaction of usual and customary conditions, including the accuracy of representations and warranties and the absence of defaults.

2007 Secured Credit Facilities

In February 2007, the Company closed the 2007 Secured Credit Facilities totaling \$160 million then consisting of a \$50 million revolving credit facility maturing in February 2013 (the "2007 Revolver") and a \$110 million term loan maturing in February 2014 (the "2007 Term Loan"). The 2007 Secured Credit Facilities were secured by a first lien on substantially all of the assets of the Company and its subsidiaries.

The commitments under the 2007 Revolver were reduced from \$50 million to \$30 million in April 2008, and further reduced to \$25 million in connection with amendments to the facilities in April 2009 (the "April 2009 Amendments"). In connection with the April 2009 Amendments, the Company prepaid \$20 million of the principal balance outstanding under the 2007 Term Loan. The Company made other payments of 2007 Term Loan principal after February 2007, consisting of \$26.6 million representing the proceeds of asset sales, \$25.0 million representing discretionary prepayments and \$3.4 million representing scheduled amortization which, together with the \$20 million prepayment in April 2009 reduced the principal balance of the 2007 Term Loan to approximately \$35 million as of January 27, 2011. On January 28, 2011, the 2007 Term Loan was repaid in full and the 2007 Secured Credit Facilities were terminated.

Interest on borrowings under the 2007 Revolver and 2007 Term Loan was payable either (a) at the greater of LIBOR or 3.25% or (b) at the Alternate Base Rate (which was the greater of Fed funds rate plus 0.50% or the prime rate), in each case plus the Applicable Margin. After giving effect to the April 2009 Amendments, the Applicable Margin for LIBOR-based loans and for Alternate Base Rate-based loans was 7.50% and 6.50%, respectively (5.50% and 4.50%, respectively, prior to the April 2009 Amendments and 3.50% and 2.50%, respectively, prior to amendments executed in April 2008).

NOTES TO FINANCIAL STATEMENTS—(Continued)

The Company was required to pay a fee equal to the Applicable Margin for LIBOR-based loans on the outstanding amount of letters of credit issued under the 2007 Revolver, as well as a fronting fee of 0.25% of the amount of such letter of credit payable to the letter of credit issuer. There also was a fee on the unused portion of the 2007 Revolver lending commitment, which increased from 0.75% to 1.00% in connection with the April 2009 Amendments.

Lease Obligations

The Company leases equipment and facilities under both capital and operating leases. The approximate future minimum lease payments under non-cancelable leases as of February 3, 2013 are set forth in the following table:

the professional and a second section of

Fiscal Year	A Operating Leases	Capital Leases
	(In tho	ısands)
2014.	\$ 11,267	\$ 580
2015	10,931	350

	\$119,027	5,394
Less: portion representing interest		(3,836)
Less: portion representing executory costs		(118)
in the control of the		\$ 1,440

Rent expense, net of rental income, totaled \$12.8 million in fiscal 2013, \$12.0 million in fiscal 2012 and \$10.8 million in fiscal 2011. Such rent expense includes rents under non-cancelable operating leases as well as sundry short-term rentals.

Cash Payments of Interest

Interest paid, inclusive of deferred financing costs, totaled \$1.2 million in fiscal 2013, \$1.8 million in fiscal 2012 and \$8.1 million in fiscal 2011.

Note 13 — Other Long-Term Obligations and Deferred Credits

NOTES TO FINANCIAL STATEMENTS—(Continued)

Note 14 — Commitments and Contingencies

Except as disclosed below, the Company currently is not a party to any material legal proceedings.

Pending Litigation

K² Asia Litigation

On April 7, 2009, a Cayman Islands corporation, K² Asia Ventures, and its owners filed a lawsuit in Forsyth County, North Carolina Superior Court against the Company, its franchisee in the Philippines, and other persons associated with the franchisee. The suit alleges that the Company and the other defendants conspired to deprive the plaintiffs of claimed "exclusive rights" to negotiate franchise and development agreements with prospective franchisees in the Philippines, and seeks unspecified damages. The Company believes that these allegations are false and intends to vigorously defend against the lawsuit.

Colchester Security Litigation

On January 27, 2012, Colchester Security II, LLC, the Company's former landlord in Lorton, Virginia, filed a suit against the Company in the Circuit Court of Fairfax County, Virginia alleging breach of the lease and negligence resulting in property damage at a commissary facility previously operated by the Company. The plaintiff seeks \$2.7 million in damages. The Company denies the allegations and intends to pursue counterclaims of approximately \$3.0 million relating to indemnity claims and breach of the lease. No liability has been recorded with respect to this matter because management does not believe it is probable that a loss has been incurred. In March 2013, both parties agreed to avail themselves of the Fairfax County Court's alternate dispute resolution program, and now the matter has been set for binding arbitration to occur in late June 2013.

Other Legal Matters

The Company also is engaged in various legal proceedings arising in the normal course of business. The Company maintains insurance policies against certain kinds of such claims and suits, including insurance policies for workers' compensation and personal injury, all of which are subject to deductibles.

Other Commitments and Contingencies

The Company has guaranteed certain loans from third-party financial institutions on behalf of Equity Method Franchisees, primarily to assist the franchisees in obtaining third-party financing. The loans are collateralized by certain assets of the franchisee, generally the Krispy Kreme store and related equipment. The Company's contingent liabilities related to these guarantees totaled approximately \$2.1 million at February 3, 2013, and are summarized in Note 8. These guarantees require payment from the Company upon demand of the guaranteed party upon certain defaults by the respective debtor and, if the debtor defaults, the Company may be required to pay amounts outstanding under the related agreements in addition to the principal amount guaranteed, including accrued interest and related fees.

The aggregate recorded liability for these loan guarantees totaled \$1.6 million as of February 3, 2013 and \$1.9 million as of January 29, 2012, and is included in accrued liabilities in the accompanying consolidated balance sheet. These liabilities represent the estimated amount of guarantee payments which the Company believed to be probable. While there is no current demand on the Company to perform under any of the guarantees, there can be no assurance that the Company will not be required to perform and, if circumstances change from those prevailing at February 3, 2013, additional guarantee payments or provisions for guarantee payments could be required with respect to any of the guarantees.

NOTES TO FINANCIAL STATEMENTS—(Continued)

One of the Company's lenders had issued letters of credit on behalf of the Company totaling \$10.2 million at February 3, 2013, all of which secure the Company's reimbursement obligations to insurers under the Company's self-insurance arrangements.

The Company is exposed to the effects of commodity price fluctuations on the cost of ingredients of its products, of which flour, shortening and sugar are the most significant. In order to secure adequate supplies of product and bring greater stability to the cost of ingredients, the Company routinely enters into forward purchase contracts with suppliers under which the Company commits to purchase agreed-upon quantities of ingredients at agreed-upon prices at specified future dates. Typically, the aggregate outstanding purchase commitment at any point in time will range from one month's to several years' anticipated ingredients purchases, depending on the ingredient. In addition, from time to time the Company enters into contracts for the future delivery of equipment purchased for resale and components of doughnut-making equipment manufactured by the Company. As of February 3, 2013, the Company had approximately \$81 million of commitments under ingredient and other forward purchase contracts. While the Company has multiple suppliers for most of its ingredients, the termination of the Company's relationships with vendors with whom the Company has forward purchase agreements, or those vendors' inability to honor the purchase commitments, could adversely affect the Company's results of operations and cash flows.

In addition to entering into forward purchase contracts, the Company from time to time purchases exchange-traded commodity futures contracts or options on such contracts for raw materials which are ingredients of the Company's products or which are components of such ingredients, including wheat and soybean oil. The Company typically assigns the futures contract to a supplier in connection with entering into a forward purchase contract for the related ingredient. The Company may also purchase futures, options on futures or enter into other hedging contracts to hedge its exposure to rising gasoline prices. See Note 20 for additional information about these derivatives.

Note 15 — Shareholders' Equity

Share-Based Compensation for Employees and Directors that the same and the same and

On June 12, 2012, the Company's shareholders approved the Krispy Kreme Doughnuts, Inc. 2012 Stock Incentive Plan (the "2012 Plan"). The 2012 Plan, which expires on June 11, 2022, replaced the Company's 2000 Stock Incentive Plan (the "2000 Plan), which expired on June 30, 2012. The 2012 Plan provides for the grant of incentive stock options, non-qualified stock options, restricted stock awards, restricted stock units, stock awards, performance unit awards, performance share awards, stock appreciation rights and phantom stock awards.

THE CONTRACTOR STATES OF THE PROPERTY OF THE SECOND PROPERTY OF THE CONTRACTOR OF TH

The 2012 Plan limits issuance of shares of Company common stock under the 2012 Plan to approximately 3,550,000 shares, of which 3.3 million remain available for grant through June 11, 2022. Any shares that are subject to options or stock appreciation rights awarded under the 2012 Plan will be counted against the 2012 Plan limit as one share for every one share granted, and any shares that are subject to 2012 Plan awards other than options or stock appreciation rights will be counted against this limit as one and thirty three-hundredths (1.33) shares for every one share granted. The 2012 Plan provides that options may be granted with exercise prices not less than the closing sale price of the Company's common stock on the date of grant.

The Company measures and recognizes compensation expense for share-based payment ("SBP") awards based on their fair values. The fair value of SBP awards for which employees and directors render the requisite service necessary for the award to vest is recognized over the related vesting period. The fair value of SBP awards which vest in increments and for which vesting is subject solely to service conditions is charged to expense on a straight-line basis over the aggregate vesting period of each award, which generally is four years. The fair value

NOTES TO FINANCIAL STATEMENTS—(Continued)

of SBP awards which vest in increments and for which vesting is subject to both market conditions and service conditions is charged to expense over the estimated vesting period of each increment of the award, each of which is treated as a separate award for accounting purposes.

The aggregate cost of SBP awards charged to earnings for fiscal 2013, 2012 and 2011 is set forth in the following table. The Company did not realize any excess tax benefits from the exercise of stock options or the vesting of restricted stock or restricted stock units during any of the periods.

		Year Ended	
	February 3, 2013	January 29, 2012	January 30, 2011
The state of the s		(In thousands)	. ;
Costs charged to earnings related to:			$(x_1,\dots,x_n) \in \mathcal{F}_{\frac{n}{4}}$

Total costs	\$6,801	\$6,699	\$5,147
Costs included in:	•		
Direct operating expenses	\$2,614	\$2,829	\$2,079
General and administrative expenses	4,187	3,870	3,068
Total costs	\$6,801	\$6,699	\$5,147
그는 사람들이 되었다. 그는 그를 하는 그 회사는 그 회사를 가장 하는 것이 없는 사람들이 되었다.		est to the second	

The fair value of stock options subject only to service conditions was estimated using the Black-Scholes option pricing model. In addition to service conditions, certain stock options granted in fiscal 2008 also provide that the price of the Company's common stock must increase by 20% after the grant date, and remain at or above the appreciated price for at least ten consecutive trading days, in order for the options to become vested and exercisable. The fair value of those stock options was estimated using Monte Carlo simulation techniques. Options granted generally have contractual terms of 10 years, the maximum term permitted under the 2012 and 2000 Plans. There were no stock options granted in fiscal 2013. The weighted average assumptions used in valuing stock options in fiscal 2012 and 2011 are set forth in the following table:

				Year E	Inded
Books, and	V. 3. 334			January 29, 2012	January 30, 2011
Expected	life of option.		 	7.0 years	7.0 years
Risk-free	interest rate		 	1.41%	2.66%
Expected	volatility of sto	ck	 	70.0%	50.0%
Expected	dividend yield		 	arthur a ll a da	1 x 1 = 1 2 1 2 1 2 1 2 1 2 1 2 1 2 1 2 1 2

The expected life of stock options valued using the Black-Scholes option pricing model is estimated by reference to historical experience and any relevant characteristics of the option. The expected life of stock options valued using Monte Carlo simulation techniques is based upon the vesting dates forecasted by the simulation and then assuming that options which vest are exercised at the midpoint between the forecasted vesting date and their expiration. The risk-free rate of interest is based on the yield of a zero-coupon U.S. Treasury bond on the date the

NOTES TO FINANCIAL STATEMENTS—(Continued)

award is granted having a maturity approximately equal to the expected term of the award. Expected volatility is estimated based upon the historical volatility of the Company's common shares. The Company uses historical employee turnover data to estimate forfeitures of awards prior to vesting.

There were no stock options granted during fiscal 2013. The number of options granted during fiscal 2012 and 2011 and the aggregate and weighed average fair value of such options were as follows:

ેલા મુખ્યાના માટે માટે માટે માટે માટે માટે માટે માટ	Year	Ended	12.04

In addition to stock options, the Company periodically has awarded restricted stock and restricted stock units (which are settled in common stock). The following table summarizes changes in unvested restricted stock and restricted stock unit awards for fiscal 2013, 2012 and 2011:

2. We get the control of the context with a filling of the control of the cont	Unvested Shares	Weighted Average Grant Date Fair Value
Unvested at January 31, 2010	1,386,200	\$ 4.13

Forfeited	(78,700)	\$ 6.49
Unvested at February 3, 2013	1,238,200	\$ 8.65

The total fair value as of the grant date of the restricted stock and restricted stock unit awards vesting during fiscal 2013, 2012 and 2011 was \$2.9 million, \$2.7 million and \$3.3 million, respectively.

As of February 3, 2013, the total unrecognized compensation cost related to SBP awards was approximately \$8.2 million. The remaining service periods over which compensation cost will be recognized for these awards range from approximately three months to four years, with a weighted average remaining service period of approximately 1.5 years.

At February 3, 2013, there were approximately 9.7 million shares of common stock reserved for issuance pursuant to awards granted under the 2012 and 2000 Plans.

NOTES TO FINANCIAL STATEMENTS—(Continued)

Common Shares and Warrants Issued in Connection With Settlement of Litigation

In fiscal 2008, the Company issued warrants to acquire 4.3 million shares of common stock at a price of \$12.21 per share in connection with the settlement of certain litigation. The warrants expired unexercised on March 2, 2012.

Warrant Issued in Exchange for Services

In fiscal 2006, the Company issued a warrant to purchase 1.2 million shares of the Company's common stock at a price of \$7.75 per share as part of the consideration paid to a corporate recovery and advisory firm. The warrant expired unexercised on January 31, 2013.

Tax Asset Protection Plan

On January 14, 2013, the Company's Board of Directors adopted a tax asset protection plan (the "Plan") intended to preserve the Company's federal net operating loss and other tax carryforwards, which represent a substantial asset to the Company and its shareholders.

As of February 3, 2013, the Company had approximately \$206 million of federal net operating losses that can be carried forward to future years to offset taxable income the Company earns in the future, thereby reducing the amount of taxes payable by the Company in subsequent years. These carryforwards are more fully described in Note 3. These net operating loss carryforwards expected to be realized in future had a carrying value of approximately \$81 million as of February 3, 2013.

Under the Internal Revenue Code (the "Code"), the Company's ability to make use of these carryforwards would be limited in the event of a significant change in ownership of the Company's common shares by shareholders owning 5% or more of the Company's shares. Specifically, a cumulative change of more than 50% of the Company's shares during any three year period by shareholders owning 5% or more of the Company's stock would trigger a limitation. Certain Company actions, including share repurchases, would also add to the cumulative ownership change.

Because a limitation in the Company's ability to utilize its tax carryforwards could increase the amount of the Company's future tax payments or accelerate the timing of such payments, a limitation could have a material adverse effect on the Company's cash flows and financial position. For this reason, the Company adopted the Plan to discourage persons from acquiring more than 4.99% of the Company's common shares, which should have the effect of substantially reducing the likelihood of an ownership change and any resulting limitation on the Company's ability to utilize its carryforwards.

Under the Plan, subject to certain exceptions, the acquisition by any person or group of 4.99% or more of the Company's outstanding shares of common stock makes that person or group an "acquiring person" and could result in significant dilution in the ownership and economic interest of such acquiring person. This potential dilution acts as a strong deterrent against stock acquisitions that may result in an ownership change that could give rise to a limitation on the Company's ability to utilize the carryforwards.

To effect the Plan, the Company declared a dividend of one preferred share purchase right (a "Right") for each outstanding share of its common stock payable to registered shareholders of record as of January 24, 2013, as well as to holders of the Company's common stock issued after that date. The Rights trade with, and be represented by, the Company's common stock.

NOTES TO FINANCIAL STATEMENTS—(Continued)

Under the Plan, the Board is granted the discretion to exempt persons from the 4.99% threshold if it were to determine that such ownership is in the best interests of shareholders and not inconsistent with the purpose of the Plan. Shareholders of the Company as of January 14, 2103 holding 4.99% or more of the Company's outstanding shares of common stock are exempt from the provisions of the Plan unless they thereafter make additional purchases. The Plan will expire upon redemption or exchange of the Rights or if the net operating loss carryforwards are utilized in all material respects or are no longer available in any material respect. Otherwise, the Plan will expire no later than the close of business on January 14, 2019, unless extended by the Board.

The Plan should not interfere with any merger or other business combination that is in the best interests of the Company and its shareholders because the Rights may be redeemed by the Company at \$0.01 per Right in cash prior to the time the Rights become exercisable.

Repurchases of Common Shares

Pursuant to the authorization of its Board of Directors, from March 27, 2012 through June 28, 2012, the Company's repurchased \$20 million of its common stock. The average price per share was \$6.42.

During each of the last three fiscal years, the Company permitted holders of restricted stock awards to satisfy their obligations to reimburse the Company for the minimum required statutory withholding taxes arising from the vesting of such awards by surrendering vested common shares in lieu of reimbursing the Company in cash. The aggregate fair value of common shares surrendered related to the vesting of restricted stock awards was \$758,000, \$1.0 million and \$581,000 in fiscal 2013, 2012 and 2011, respectively. The aggregate fair value of the surrendered shares has been reflected as a financing activity in the accompanying consolidated statement of cash flows and as a repurchase of common shares in the accompanying consolidated statement of changes in shareholders' equity.

Net provision	306	733	762
Total impairment charges and lease termination costs	\$306	<u>\$793</u>	\$4,066

The Company tests long-lived assets for impairment when events or changes in circumstances indicate that their carrying value may not be recoverable. These events and changes in circumstances include store closing and refranchising decisions, the effects of changing costs on current results of operations, observed trends in operating results, and evidence of changed circumstances observed as a part of periodic reforecasts of future operating results and as part of the Company's annual budgeting process. When the Company concludes that the carrying value of long-lived assets is not recoverable (based on future projected undiscounted cash flows), the Company records impairment charges to reduce the carrying value of those assets to their estimated fair values. Impairment charges related to Company Stores long-lived assets were approximately \$60,000 and \$3.4 million in fiscal 2012 and 2011, respectively. Such charges relate to underperforming stores, including both stores closed or likely to be closed and stores which management believes will not generate sufficient future cash flows to enable the Company to recover the carrying value of the stores' assets, but which management has not yet decided to close. The impaired store assets include real properties, the fair values of which were estimated based on independent appraisals or, in the case of any properties which the Company is negotiating to sell, based on the Company's negotiations with unrelated third-party buyers; leasehold improvements, which are typically abandoned when the leased properties revert to the lessor; and doughnut-making and other equipment.

The Company records impairment charges for reacquired franchise rights when such intangible assets are determined to be impaired as a result of store closing decisions or other developments.

Lease termination costs represent the estimated fair value of liabilities related to unexpired leases, after reduction by the amount of accrued rent expense, if any, related to the leases, and are recorded when the lease contracts are terminated or, if earlier, the date on which the Company ceases use of the leased property. The fair value of these liabilities were estimated as the excess, if any, of the contractual payments required under the unexpired leases over the current market lease rates for the properties, discounted at a credit-adjusted risk-free rate over the remaining term of the leases. The provision for lease termination costs also includes adjustments to liabilities recorded in prior periods arising from changes in estimated sublease rentals and from settlements with landlords.

NOTES TO FINANCIAL STATEMENTS—(Continued)

	* * *		<u> </u>

Note 17 — Related Party Transactions

All franchisees are required to purchase doughnut mix and production equipment from the Company. Revenues include \$8.9 million, \$9.5 million and \$8.5 million in fiscal 2013, 2012 and 2011, respectively, of sales to stores owned by franchisees in which the Company had an ownership interest. Revenues also include royalties from these franchisees of \$1.3 million, \$1.8 million and \$1.9 million in fiscal 2013, 2012 and 2011, respectively. Trade receivables from these franchisees are included in receivables from related parties as described in Note 4. These transactions were conducted pursuant to development and franchise agreements, the terms of which are substantially the same as the agreements with unaffiliated franchisees.

The Company's franchisee for the Middle East is an affiliate of an entity which, until December 20, 2012, was the beneficial owner of approximately 13% of the Company's common stock. The Company had transactions in the normal course of business with this franchisee (including sales of doughnut mix and equipment to the franchisee and royalties payable to the Company by the franchisee based on its sales at Krispy Kreme franchise stores) totaling approximately \$6.7 million in fiscal 2013, \$7.8 million in fiscal 2012 and \$9.2 million in fiscal 2011. Such transactions were conducted pursuant to development and franchise agreements, the terms of which are substantially the same as the agreements with other international franchisees.

In fiscal 2010, the Company entered into a contract to refurbish the interior and exterior of two Company stores with Cummings Incorporated ("Cummings"), a store exterior design and remodeling company of which an independent director of the Company was a 60% indirect owner. The Company paid Cummings approximately \$380,000 in fiscal 2011 to complete the refurbishment of the two stores. While the unique nature of the refurbishing services provided by Cummings was not directly comparable to those provided by competitors, management believes the terms of the contract were no less favorable than could have been obtained from a non-affiliated entity for conventional remodeling services.

NOTES TO FINANCIAL STATEMENTS—(Continued)

Note 18 — Employee Benefit Plans

The Company has a 401(k) savings plan (the "401(k) Plan") to which eligible employees may contribute up to 100% of their salary and bonus on a tax deferred basis, subject to statutory limitations. The Company currently matches 50% of the first 6% of compensation contributed by each employee to the 401(k) Plan. Contributions expense for this plan totaled approximately \$820,000 in fiscal 2013, \$820,000 in fiscal 2012 and \$780,000 in fiscal 2011.

The Company also has a Nonqualified Deferred Compensation Plan (the "401(k) Mirror Plan") designed to enable officers of the Company whose contributions to the 401(k) Plan are limited by certain statutory limitations to have the same opportunity to defer compensation as is available to other employees of the Company under the qualified 401(k) savings plan. Participants may defer from 1% to 15% of their base salary and from 1% to 100% of their bonus (reduced by their contributions to the 401(k) Plan), subject to statutory limitations, into the 401(k) Mirror Plan and may direct the investment of the amounts they have deferred. The investments, however, are not a legally separate fund of assets, are subject to the claims of the Company's general creditors, and are included in other assets in the consolidated balance sheet. The corresponding liability to participants is included in other long-term obligations. The balance in the asset and corresponding liability account was \$1.8 million and \$1.0 million at February 3, 2013 and January 29, 2012, respectively.

Note 19 — Fair Value Measurements

The accounting standards for fair value measurements define fair value as the price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date.

The accounting standards for fair value measurements establish a three-level fair value hierarchy that prioritizes the inputs used to measure fair value. This hierarchy requires entities to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

- Level 1 Quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities.
- Level 2 Observable inputs other than quoted prices included within Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value measurement of the assets or liabilities. These include certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table presents the Company's assets and liabilities that are measured at fair value on a recurring basis at February 3, 2013 and January 29, 2012.

NOTES TO FINANCIAL STATEMENTS—(Continued)

Long-Lived Assets

During the year ended January 29, 2012, long-lived assets with an aggregate carrying value of \$1.2 million were written down to their estimated fair values of \$1.1 million, resulting in recorded impairment charges of \$60,000 as described in Note 16. During the year ended January 30, 2011, long-lived assets with an aggregate carrying value of \$7.5 million were written down to their estimated fair values of \$4.1 million, resulting in recorded impairment charges of \$3.4 million. During fiscal 2012 and 2011, the Company recorded impairment charges related to long-lived assets, substantially all of which were real properties; the fair values of these assets were estimated based on the present value of estimated future cash flows, on independent appraisals and, in the case of any properties which the Company is negotiating to sell, based on the Company's negotiations with unrelated third-party buyers. The charges relate to stores closed, refranchised or expected to be closed, as well as charges with respect to stores management believes will not generate sufficient future cash flows to enable the Company to recover the carrying value of the stores' assets, but which management has not yet decided to close. These inputs are classified as Level 2 within the valuation hierarchy.

Lease Termination Liabilities

During the fiscal year ended January 30, 2011, the Company recorded provisions for lease termination costs related to closed stores based upon the estimated fair values of the liabilities under unexpired leases as described in Note 16; such provisions were reduced by previously recorded accrued rent expense related to those stores. The fair value of these liabilities was computed as the excess, if any, of the contractual payments required under the unexpired leases over the current market lease rates for the properties, discounted at a credit-adjusted risk-free rate over the remaining term of the leases. These inputs are classified as Level 2 within the valuation hierarchy. For the year ended January 30, 2011, \$687,000 of previously recorded accrued rent expense related to two store closures and a store relocation exceeded the \$422,000 fair value of lease termination liabilities related to such stores, and such excess has been reflected as a credit to lease termination costs during the period.

Fair Values of Financial Instruments at the Balance Sheet Dates

The carrying values and approximate fair values of certain financial instruments as of February 3, 2013 and January 29, 2012 were as follows:

	Februar	y 3, 2013	January 29, 2012		
	Carrying Value	Fair Value	Carrying Value	Fair Value

The fair value of the term loan is estimated based on an indicative bid price, valuation input Level 2, under GAAP.

NOTES TO FINANCIAL STATEMENTS—(Continued)

Note 20 — Derivative Instruments

The Company is exposed to certain risks relating to its ongoing business operations. The primary risks managed by using derivative instruments are commodity price risk and interest rate risk. The Company does not hold or issue derivative instruments for trading purposes.

The Company is exposed to credit-related losses in the event of non-performance by the counterparties to its derivative instruments. The Company mitigates this risk of nonperformance by dealing with highly rated counterparties.

Additional disclosure about the fair value of derivative instruments is included in Note 19.

Commodity Price Risk

The Company is exposed to the effects of commodity price fluctuations in the cost of ingredients of its products, of which flour, sugar and shortening are the most significant. In order to bring greater stability to the cost of ingredients, from time to time the Company purchases exchange-traded commodity futures contracts, and options on such contracts, for raw materials which are ingredients of its products or which are components of such ingredients, including wheat and soybean oil. The Company is also exposed to the effects of commodity price fluctuations in the cost of gasoline used by its delivery vehicles. To mitigate the risk of fluctuations in the price of its gasoline purchases, the Company may purchase exchange-traded commodity futures contracts and options on such contracts. The difference between the cost, if any, and the fair value of commodity derivatives is reflected in earnings because the Company has not designated any of these instruments as hedges. Gains and losses on these contracts are intended to offset losses and gains on the hedged transactions in an effort to reduce the earnings volatility resulting from fluctuating commodity prices. The settlement of commodity derivative contracts is reported in the consolidated statement of cash flows as a cash flow from operating activities. At February 3, 2013, the Company had commodity derivatives with an aggregate contract volume of 145,000 bushels of wheat. Other than the requirement to meet minimum margin requirements with respect to the commodity derivatives, there are no collateral requirements related to such contracts.

Interest Rate Risk

All of the borrowings under the Company's secured credit facilities bear interest at variable rates based upon either the lenders' prime rate, the Fed funds rate or LIBOR. The interest cost of the Company's debt may be affected by changes in these short-term interest rates and increases in those rates may adversely affect the Company's results of operations.

On March 3, 2011, the Company entered into an interest rate derivative contract having an aggregate notional principal amount of \$17.5 million. The derivative contract entitles the Company to receive from the counterparty the excess, if any, of the three-month LIBOR rate over 3.00% for each of the calendar quarters in the period beginning April 2012 and ending December 2015. The Company is accounting for this derivative contract as a cash flow hedge.

In May 2007, the Company entered into interest rate derivative contracts having an aggregate notional principal amount of \$60 million. The derivative contracts entitled the Company to receive from the counterparties the excess, if any, of three-month LIBOR over 5.40%, and required the Company to pay to the counterparties the excess, if any, of 4.48% over three-month LIBOR, in each case multiplied by the notional amount of the contracts. The contracts expired in April 2010. Settlements under these derivative contracts were reported as cash flow from operating activities in the consolidated statement of cash flows.

NOTES TO FINANCIAL STATEMENTS—(Continued)

These derivatives entered into in May 2007 were accounted for as cash flow hedges from their inception through April 8, 2008. Hedge accounting was discontinued on that date because the derivative contracts could no longer be shown to be effective in hedging interest rate risk as a result of amendments to the Company's 2007 Secured Credit Facilities, which provided that interest on LIBOR-based borrowings is payable based upon the greater of the LIBOR rate for the selected interest period or 3.25%. As a consequence of the discontinuance of hedge accounting, changes in the fair value of the derivative contracts subsequent to April 8, 2008 were reflected in earnings as they occurred. Amounts included in accumulated other comprehensive income related to changes in the fair value of the derivative contracts for periods prior to April 9, 2008 were charged to earnings in the periods in which the hedged forecasted transaction (interest on \$60 million of the principal balance of the 2007 Term Loan) affected earnings, or earlier upon a determination that some or all of the forecasted transaction would not occur. Such charges totaled approximately \$152,000 in fiscal 2011.

Quantitative Summary of Derivative Positions and Their Effect on Results of Operations

The following table presents the fair values of derivative instruments included in the consolidated balance sheet as of February 3, 2013 and January 29, 2012:

Note 21 — Acquisitions and Divestitures

Business Combination

On August 30, 2012, the Company acquired the assets and operations of one of its franchisees in exchange for \$915,000 cash. The acquired assets consisted principally of two Krispy Kreme stores. The allocation of the purchase price was as follows: \$464,000 to property and equipment, \$8,000 to other assets, and the balance of \$443,000 to reacquired franchise rights. The results of operations of the acquired business have been included with those of the Company from the acquisition date.

Asset Divestiture

On September 27, 2012, the Company sold to one of its franchisees the leasehold interests and certain other assets, including rights under franchise agreements, for three Krispy Kreme stores operated by the franchisee. The Company acquired the leasehold interests and other assets related to the three stores from the franchisee in August 2006 for \$2.9 million cash. After the Company's acquisition of the assets, the franchisee continued to operate the stores for its own account pursuant to an operating agreement between the Company and the franchisee. The aggregate purchase price of the three stores and the related assets in the September 2012 transaction was approximately \$3.6 million, of which approximately \$360,000 was paid in cash at closing. The balance of the

NOTES TO FINANCIAL STATEMENTS—(Continued)

purchase price was evidenced by a promissory note in the approximate amount of \$3.2 million, payable in monthly installments of approximately \$51,000, including interest at 8%, beginning in November 2012, and a final installment of the remaining principal balance on October 1, 2017. The carrying value of the divested assets was approximately \$1.9 million. Because the initial investment made by the franchisee to acquire the assets was less than the minimum amount necessary to recognize a gain on the sale, the Company deferred recognition of the \$1.7 million gain, and such deferred gain is reflected as a reduction in the carrying value of the note receivable. The Company is reporting the principal and interest payments received from the franchisee as a reduction of the carrying value of the note. At such time as the franchisee's investment exceeds 20% of the purchase price, the Company will reconsider whether recognition of a gain on the transaction is then appropriate.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

Item 9A. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

As of February 3, 2013, the end of the period covered by this Annual Report on Form 10-K, management performed, under the supervision and with the participation of the Company's chief executive officer and chief financial officer, an evaluation of the effectiveness of the Company's disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports the Company files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Company's chief executive officer and chief financial officer, to allow timely decisions regarding required disclosures. Based on this evaluation, the Company's chief executive officer and chief financial officer have concluded that, as of February 3, 2013, the Company's disclosure controls and procedures were effective.

NOTES TO FINANCIAL STATEMENTS—(Continued)

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. Internal control over financial reporting is a process, effected by an entity's board of directors, management and other personnel, designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with GAAP. Internal control over financial reporting includes those policies and procedures which pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of assets; provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with GAAP; provide reasonable assurance that receipts and expenditures are being made only in accordance with management's and/or the Board of Directors' authorization; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect material errors in our financial statements. Also, projection of any evaluation of the effectiveness of our internal control over financial reporting to future periods is subject to the risk that controls may become inadequate because of changes in conditions, because the degree of compliance with our policies and procedures may deteriorate.

Management assessed the effectiveness of our internal control over financial reporting as of February 3, 2013, using the criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on our assessment, management has concluded that we maintained effective internal control over financial reporting as of February 3, 2013, based on the COSO criteria.

The effectiveness of the Company's internal control over financial reporting as of February 3, 2013, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein.

Changes in Internal Control Over Financial Reporting

During the quarter ended February 3, 2013, there were no changes in the Company's internal control over financial reporting that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. OTHER INFORMATION.

None.

PART III

Item 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE.

Except as set forth below, the information required by this item is contained in our proxy statement for our 2013 Annual Meeting of Shareholders to be held on June 18, 2013, to be filed pursuant to Section 14 of the Exchange Act, and is incorporated herein by reference.

NYSE and SEC Certifications

In accordance with Section 303A.12(a) of the NYSE Listed Company Manual, the Chief Executive Officer of the Company submits annual certifications to the NYSE stating that he is not aware of any violations by the Company of the NYSE corporate governance listing standards, qualifying the certification to the extent necessary. The last such annual certification was submitted on June 25, 2012 and contained no qualifications.

We have filed certifications executed by our Chief Executive Officer and Chief Financial Officer with the SEC pursuant to Sections 302 and 906 of the Sarbanes-Oxley Act as exhibits to this Annual Report on Form 10-K.

Item 11. EXECUTIVE COMPENSATION.

The information required by this item is contained in our proxy statement for our 2013 Annual Meeting of Shareholders to be held on June 18, 2013, to be filed pursuant to Section 14 of the Exchange Act, and is incorporated herein by reference.

Item 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

The information required by this item is contained in our proxy statement for our 2013 Annual Meeting of Shareholders to be held on June 18, 2013, to be filed pursuant to Section 14 of the Exchange Act, and is incorporated herein by reference.

Item 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE.

The information required by this item is contained in our proxy statement for our 2013 Annual Meeting of Shareholders to be held on June 18, 2013, to be filed pursuant to Section 14 of the Exchange Act, and is incorporated herein by reference.

Item 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this item is contained in our proxy statement for our 2013 Annual Meeting of Shareholders to be held on June 18, 2013, to be filed pursuant to Section 14 of the Exchange Act, and is incorporated herein by reference.

CERTIFICATION OF CHIEF EXECUTIVE OFFICER

I, James H. Morgan, certify that:

- 1. I have reviewed this Annual Report on Form 10-K of Krispy Kreme Doughnuts, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
