### **Our Mission**

*Our mission is to produce a line of European, artisan-crafted guns that are superior in quality, design, and aesthetics for the Global Firearms market at an obtainable price point. We want to create a best-in-class Company that brings the highest levels of value and service to its customers*

Avid marksmen and shotgun aficionados, Alan Thompson and Wayne Rodrigue, founded Baserri. It was apparent to both of them that there was a gap in the "double shotgun" markets—specifically regarding affordably-priced, "fine shotguns." They both realized that common, "mass-produced" double shotguns lacked custom workmanship--a condition standard amongst a plethora of domestic and international gun makers. Fine double shotguns were extremely expensive and therefore unattainable for most double gun enthusiasts. Accordingly, they set out to design and market a line of shotguns that have the substance and design of fine, custom-made double shotguns.

## **Risk Factors**

### **1) Our performance is influenced by a variety of economic, social, political factors.**

Our performance is influenced by a variety of economic, social, and political factors. General economic conditions and consumer spending patterns can negatively impact our operating results. Economic uncertainty, unfavorable employment levels, declines in consumer confidence, increases in consumer debt levels, increased commodity prices, and other economic factors may affect consumer spending on discretionary items and adversely affect the demand for our products. Economic conditions also affect governmental political and budgetary policies. As a result, economic conditions also can have an effect on the sale of our products to law enforcement, government, and military customers. The buying history of the outdoors consumer have shown that even during trying economic times sales maintain a nice growth pattern.

### **2) We face intense competition that could result in our losing or failing to gain market share and suffering reduced sales.**

We operate in intensely competitive markets that are characterized by competition from major domestic and international companies. This intense competition could result in pricing pressures, lower sales, reduced margins, and lower market share. Any movement away from high-quality, domestic shotguns to lower priced or comparable foreign alternatives would adversely affect our business. Some of our competitors have greater financial, technical, marketing, distribution, and other resources and, in certain cases, may have lower cost structures than we possess and that may afford them competitive advantages. As a result, they may be able to devote greater resources to the

promotion and sale of products, to negotiate lower prices on raw materials and components, to deliver competitive products at lower prices, and to introduce new products and respond to customer requirements more effectively and quickly than we can. As we become a more global company, these competitive factors become more controllable. If one country's market becomes saturated and less profitable, we can move our focus into a more profitable emerging market.

Competition is primarily based on innovation, quality, reliability, durability, price, performance, consumer brand awareness, and customer service and support. These are the dominant competitive factors in the firearm industry.

**3) Our ability to grow our business depends in part on a strong brand identity and strong social media and search engine optimization performance.**

We believe a strong brand is a competitive advantage in arms industry because of the fragmentation of the market and the large number of manufacturers available to the consumer. Because our brand is relatively new, we currently do not have strong brand identity. In order to attract and retain clients, and respond to competitive pressures, we expect to expend substantial resources to maintain and enhance our brand in the future.

We plan to increase our advertising expenditures in the future. While we intend to enhance our marketing and advertising activities in order to promote our brand, these activities will result in significant expenditures and may not have a material positive impact on our brand identity. In addition, maintaining our brand will depend on our ability to provide a high-quality consumer experience and high quality service, which we may not do successfully. If we are unable to maintain and enhance our brand, our ability to attract new clients or successfully expand our operations will be harmed.

**4) Our business could be harmed in the event of an economic slowdown or recession.**

The success of our business depends in part on the health of the Global market, which traditionally has been subject to economic swings. The purchase of firearms is an expense for most consumers, and one which can be delayed or terminated based on the availability of discretionary income. Economic slowdown or recession, rising interest rates, adverse tax policies, lower availability of credit, increased unemployment, lower consumer confidence, lower wage and salary levels, war or terrorist attacks or the public perception that any of these events may occur, could adversely affect the demand for our products and would harm our business. This concern will be somewhat offset by emerging markets around the world that bring new consumers.

**5) We are subject to extensive regulation.**

We are subject to the rules and regulations of the ATF. If we fail to comply with the ATF rules and regulations, the ATF may limit our activities or growth, fine us, or ultimately put us out of business. Our business, as well as the business of all producers and marketers of firearms and firearm parts, is also subject to numerous federal, state, local, and foreign laws, regulations, and protocols. Applicable laws require the licensing of all persons manufacturing, importing, or selling firearms as a business; require background checks for purchasers of firearms; impose waiting periods between the purchase of a firearm and the delivery of a firearm; prohibit the sale of firearms to certain persons, such as those below a certain age and persons with criminal records; regulate the interstate sale of handguns; prohibit the interstate mail-order sale of firearms; regulate our employment of personnel with criminal convictions; restrict access to firearm manufacturing facilities for individuals from other countries or with criminal convictions; and prohibit the private ownership of fully automatic weapons. From time to time, congressional committees consider proposed bills and various states enact laws relating to the regulation of firearms. These proposed bills and enacted state laws often seek either to restrict or ban the sale and, in some cases, the ownership of various types of firearms. The regulation of firearms could become more restrictive in the future and any such restriction would harm our business. In addition, these laws, regulations, and protocols, as well as their interpretation by regulatory authorities, may change at any time. There can be no assurance that such changes to the laws, regulations, and protocols or to their interpretation will not adversely affect our business.

Furthermore, like many other manufacturers, we are subject to compliance with the Fair Labor Standards Act, the Occupational Safety and Health Act, and many other regulations surrounding employment law, environmental law, and taxation.

Compliance with all of these regulations is costly and time consuming. Although we take every measure to ensure compliance with the many regulations we are subject to, inadvertent violation of any of these regulations could cause us to incur fines and penalties and may also lead to restrictions on our ability to manufacture and sell our products and services and to import or export the products that we sell.

**6) If we fail to complete the three acquisitions with Spanish gun manufacturers**

If we were unable to acquire any of the acquisitions, our growth would be hampered and limited to our long term toll manufacturing arrangements that are in place. If we were able to complete the AyA acquisition only, the growth prospects would be somewhat enhanced since AyA has been in business since 1915. In any event the failure to complete the acquisitions would revise our sales in terms of available units to sell under the Baserri Brand name to approximately 3,000 shotguns per year. The negotiations to acquire AyA, Lanber, and Zabala are ongoing, and are subject to the negotiation and execution of appropriate acquisition agreements, and satisfaction of conditions to closing which have yet to be determined. The attached Letters of Intent are signed by Baserri Shotguns, and are part of the assets merged into Baserri Outdoors Group. AyA, Lanber, and Zabala are all aware of this and fully agree that Baserri Outdoors Group retains all rights originally given to Baserri Shotguns under the Letters of Intent.

**7) If we fail to attract and retain our key personnel, our ability to meet our business goals will be impaired and our financial condition and results of operations will suffer.**

The loss of the services of one or more of our key personnel could seriously harm our business. In particular, our success depends on the continued contributions of our senior leadership team, and other senior level sales, operations, marketing, technology and financial officers. Our senior level officers developed our business plan in large part and its implementation requires their skills and knowledge. None of our officers or key employees are bound by an employment agreement and their employment is at will. Currently all senior leadership members have an equity stake in the long term success of Baserri Outdoors, and as new key employees are brought on they too will have an incentive program that will allow them to earn an equity stake.

Baserri Outdoors Group, Inc. was formed on September 6, 2012. At that time we authorized 50 million shares of which none of those shares have been issued, only contemplated. The only number of shares definitely “set aside” is the 833,334 for this offering. The remaining “Principal Shareholders” are shown in the list here as well as the anticipated debt conversion payments from all of the debt holders who have confirmed their desire to exchange debt for equity. Mr. Rodrigue and Mr. Thompson will receive stock in Baserri Outdoors Group, Inc.

**8) We intend to evaluate acquisitions or investments in complementary technologies and businesses and we may not realize the anticipated benefits from, and may have to pay substantial costs related to, any acquisitions or investments that we undertake.**

As part of our business strategy, we plan to evaluate acquisitions of, or investments in, complementary technologies and businesses. We may be unable to identify suitable acquisition candidates in the future or be able to make these acquisitions on a commercially reasonable basis, or at all. If we complete an acquisition or investment, we may not realize the benefits we expect to derive from the transaction. Any future acquisitions and investments would have several risks, including:

- our inability to successfully integrate acquired technologies or operations;
- diversion of management’s attention;
- problems maintaining uniform standards, procedures, controls and policies;
- potentially dilutive issuances of equity securities or the incurrence of debt or contingent liabilities;
- expenses related to amortization of intangible assets;
- risks associated with operating a business or in a market in which we have little or no prior experience;

- potential write offs of acquired assets;
- loss of key employees of acquired businesses; and
- Our inability to recover the costs of acquisitions or investments.

Note: In addition to the above risks, businesses are often subject to risks not foreseen or fully appreciated by management. In reviewing this Offering Circular potential investors should keep in mind other possible risks that could be important.

## Business and Properties

### (a) What Baserri does:

Baserri was created to fill a dream of its founders, as well as a void in the Shotgun Market. This dream was to create the best shotgun company in the world through its value proposition and customer service.

Aligning themselves with quality gun makers in Europe, they began to produce a line of double barrels that satisfy both the sporting and competitive sectors for an above grade, yet affordable firearm. Baserri's founders insist on crafting aesthetically pleasing firearms that exceed durability and performance standards.

Baserri Shotguns delivers high quality shotguns to the market well within an attainable price range. This is accomplished by controlling the cost of production, suppliers, and having a lean organizational cost structure allowing us to maximize our profit margins.

In August 2010, Baserri Shotguns debuted in the United States with two models, the MARI Elite Sporting Clay Shotgun and the MARI Hr (hunter) Field Shotgun (both 12 gauge). Both models were well received throughout the industry and will eventually drive new product line augmentation. Recognition of Baserri Shotguns by national and regional writers has begun to spark consumer interest at a national level. Both models have been positively reviewed in national publications such as *Shooting Sportsman*, *Sporting Clays*, *Guns Magazine*, and *Shotgun Life*.

### (b) How Baserri produces our shotguns:

Historically these shotguns have been made to our specifications in Italy by FABARM S.p.A. located at Via Averolda, 31 - 25039 Travagliato - Brescia (BS) Italy. We are currently expanding and moving our manufacturing to Spain. Our Spanish manufacturing partners are Lanber Armas S.A. Zubiaurre N°7, 48250 Zaldibar, Bizkaia – Spain, and Aguirre y Aranzabal, S.A (AyA) Avenida Otaola, 25 – 3rd Floor 20600 EIBAR (Guipuzcoa) – Spain. We have a 5 year manufacturing agreement with both of these Spanish companies to manufacture up to 4,500 shotguns per year. We have terms set up with each of the Spanish manufacturers. These terms are typical to the industry which gives us a standard timeframe (30 days) to pay after the shotguns are received in the United States. We are presently introducing these new models for distribution in early 2013. Our current sales offerings include our MARI line of hunting and sporting clay shotguns. The Hunting Shotgun is a Block Lock Over/Under 12 gauge with a 28” barrel, an aluminum receiver, roll engraved with beautiful scrolled design, laser checkering with 34 lines per inch, and a hand oiled European Walnut stock.

The Sporting Clay Shotgun is a Side Plate Over/Under 12 gauge with a 30” barrel, and steel receiver, laser engraved with beautiful scrolled design and hunting scene on the Side Plate, laser checkering with 34 lines per inch, and an upgraded hand oiled European Walnut stock.

Baserri believes it offers an elite custom built shotgun design and quality than its competitors of mass produced guns. Similar priced shotguns do not have the detailed scrolled engraving, 34 lines per inch checkering, and hand oiled European Walnut stocks.

Current Baserri Outdoors Signed Manufacturing Agreements; Aguirre y Aranzabal, S.A (AyA) and Lanber Armas, S.A., respectively. Both agreements are five-year terms and have volume (manufacturing capacity) up to 4,500 shotguns per year.

The three new models that will be released in 2013 include the Lano, Erio and Irati. The Lano will be a new entry level-sporting shotgun. It will be designed with 30” and 32” barrels, grade 3 walnut stock with a palm swell, and a beautiful case hardened steel box lock receiver. Additionally, the barrels are exposed, i.e. thermally separated from each other.

The Erio will be Baserri Shotguns first Semi-Automatic shotgun. It will be designed with 30” & 32” barrels. It will also feature specialty stock—either Grade 4 Walnut Stock or rubberized Camo finish options for water fowlers. The Rubberized Camo finish is a unique three step process that helps the Erio stand apart from the competition. The process starts out similar to others with the first layer being a hydrographic film that applies the camouflage. The second coat is Ultra Violet topcoat that seals the film. Lastly, the shotgun is coated with a special rubber sealant that not only gives the gun a tough outer shell, but also applies a rubbery non-slip finish. This outer layer protects the film against scratches and nicks, while making the shotgun easier to handle in wet environments due to its non-slip nature. The design of the recoil system minimizes muzzle jump to allow for faster re-sighting on the target. Finally, the Irati will be Baserri Shotguns’ upland hunting shotgun. It will be available in 12, 20, and 28 gauges with 28” & 30” barrels. The lightweight alloy box lock receiver will be nickel finished and accented with a grade 2.5 walnut stock. The weight of the 20-gauge version will be 6 pounds.

Baserri’s careful and deliberate focus on R&D has yielded shotguns with measurable key performance indicators—tied to durability, performance, and precision. These metrics, guided Baserri’s current and future models. For example:

The barrels begin as bars of steel which are left out in the elements for a period of time to temper the metal—ensuring longevity.

Tapered Barrel; has eliminated the forcing cone by gradually reducing the bore from .740 to .724 inch, which increases shot velocity, reduces felt recoil, and provides better patterns. No other barrel has the same performance. Baserri will continue its relentless focus on R&D through continuous improvement of its differentiating features. Reinvestment in technologies and testing for future production runs will continue as a core objective. Founded in August 2009, Baserri is led by seasoned professionals with extensive experience in business development and distribution. Outstanding service and dealer relationships along with strategic dealer programs have been the staple of this company.

The development of new models do require additional resources, but since the internal components of the receiver, as well as the overall barrel design are used across a models, the actual monies spent are nominal. These monies are spent on aesthetic changes to the base models and changes to the gauge of shotgun. These costs will not exceed \$25,000 per model.

### Vertical Integration

Outside of the Company’s organic growth initiatives, they have secured a Letter of Intent (LOI) to acquire three independent premier brands and facilitates; Aguirre y Aranzabal (AyA), Lanber Armas S.A. (Lanber), and Zabala Hermanos, S.A. (Zabala). Headquartered in Spain, these brands will drive and accelerate growth by allowing Baserri to vertically integrate operations, expand product offerings, and broaden global sales distribution.

Grouping these companies and brands together will facilitate the new “Baserri Outdoors Group” the opportunity to add the breadth of product line that rivals the largest manufacturers in the shotgun market. Baserri will unite the old world talents of some of Spain’s greatest gun makers with new technology and economies of scale to launch four brands into four unique parts of the overall market. After implementation of the acquisitions, none of the brands will compete with any of the others, and there will be very few gaps in the overall product offering originating in Spain

### New product line:

- AyA to be the Flagship Brand ~ Higher end Price Point
- Baserri to be the next in line Brand ~ Mid-Market Price Point
- Lanber and Zabala to be the next in positioning ~ Economy Price Point

The Company will focus the current product offering of Lanber and Zabala to the top sellers, and then focus on building the new models to bring their designs into the present.

The below charts illustrates the incremental increase (projected) in units through the three acquisitions in Spain.

	2013	2014	2015	2016	2017
Acquisitions	2751	6,501	8,451	10,501	11,701
Baserri	860	2,135	3,075	3,920	4,970
Total Units	3611	8,636	11,526	14,421	16,671

### Value Themes:

- Post-acquisition, Baserri's manufacturing capabilities will include approximately 25,000 square feet of manufacturing space with machinery capacity to produce 10,000 shotguns on one shift. This manufacturing capacity will be achieved after Lanber's and AyA's production equipment is efficiently combined into the manufacturing space to allow for the proper flow of production. This one facility can handle AyA, Lanber, Baserri, and Zabala branded workers particularly for "fit and finish" processes.
- These three companies will be integrated under one roof for manufacturing. This will be done with the excess space that is available in the current AyA manufacturing building. In 2012 each company's approximate production was: AyA: 350 Units, Lanber: 3500 Units, Zabala: 2500 Units. All of the businesses are located with 12 miles of each other and the coordination of the needed machinery will be handled by management. The consolidation of accounting processes will be handled by AyA's current accounting firm. The combination of these companies will be straight forward, and the only integration challenge that we can foresee is the combining of the workforces. This will be handled with open discussions with the workforce to demonstrate the long term benefits of this move.
- The Company also has long-term manufacturing agreements in place with each respective company to secure manufacturing production outside of the anticipated acquisition of each company. This will secure immediate production capabilities--guaranteeing inventory. As part of a seamless integration process, Baserri will work with the respective companies to understand production and sales modes.
- Each company has had international success in creating their own market niche. Historically, Lanber manufactured an affordable double shotgun as well as auto-loaders made for the common shooter. The same falls true for Zabala/Lorana, but, it is AYA which possesses a mystique and exclusive brand identity. Accordingly, AYA's brand recognition and associated reputation for excellence will elevate all of the Baserri brands' reputations when it is known that they share the same manufacturing facilities. The Baserri line of shotguns will be enhanced due to the aforementioned brand perception, but also active design collaboration and innovation input from AYA, Lanber, and Zabala's inevitably seasoned and respected gun makers. This sharing of knowledge is a key takeaway for Baserri as it engages with what may be the pinnacle of fine shotgun producers. Additionally the respective acquisitions also are producers of gun parts and barrel manufacturers, an important source of supplemented revenue for the company.
- This amount of volume, production and acquisition of an existing customer base will create a super brand which will emphasize a global production of high quality products for an affordable price compared to the Global/National competitors. It is our opinion that this "turn key" approach with respect to our initial

production agreements and intent to purchase these companies will allow Baserri to be a major force in the Industry from the onset.

There is no assurance that Baserri Outdoors Group, Inc. will actually complete any of these acquisitions.

(c) Our Industry:

According to Smith & Wessons' 2008 10K SEC Filing Report, the overall fire-arm industry in the United States is estimated to be at \$2.2 billion, of which the shotgun industry is \$313 million. According to the Federal Bureau of Alcohol, Tobacco, Firearms, and Explosives (ATF) the Annual Firearms Manufacturing Industry has grown at a compounded rate of 12.4% from 2004 – 2009. Using a conservative growth rate of 2.5% (which is only 20% of the stated rate), the current shotgun market for 2012 is anticipated to be approximately \$337 Million.

The industry is dominated by a small number of well-known companies. We encounter competition from both domestic and foreign manufacturers. Some competitors manufacture a wide variety of firearms, while the majority of our competitors manufacture only certain types of firearms.

Our industry saw a record for a single year in 2011, when the FBI reported that 14,409,616 background checks were requested. In 2012 that figure is estimated to top 16 million. This demand has increased sales across all segments, including shotguns. While some recent growth can be attributed to political and economic fears, we anticipate increasing social acceptance of firearms for both self-defense and recreation/leisure. We believe strong growth throughout the country last year—unlike 2008 which saw growth driven by Southern states—is evidence of this change. Furthermore, in 2011, 23% of women self-reported owning a firearm, up from just 13% in 2005.

In the United States, there were 2,850,406 registered firearms as of December 2010 according to the ATF's National Firearms Registration and Transfer Record (NFRTR).

**2009 Firearms Manufactured**

According to the most recent data available through the ATF, 2009 saw 752,699 shotguns manufactured in 2009 versus 630,710 in the previous year, reflecting a 19.3% increase.

Total firearms manufactured were 5,555,818 in 2009 consisting of pistols, revolvers, rifles, shotguns and misc. firearms. Shotguns represented 13.5% of production.

**Manufactures' Sales, Exports and Imports**

As of 2011, there are approximately 5,400 licensed firearms manufacturers and 950 licensed importers in the United States. A Federal firearms license is required to engage in the business of manufacturing, importing, or dealing in firearms. These businesses are required by law to maintain records of the production, exportation, importation, acquisition, and disposition of firearms.

Manufacturers' export volume for calendar year 2009, the most recent year for which complete data is available, reached more than 194,000 firearms. Compared with the 2000 export volume of 188,460 firearms, the increase in firearms exported is significantly less than the increase in firearms imported. According to ATF data, the number of shotguns manufactured and exported is trending upward from 2008-2011 as illustrated.

In 2010, according to the United States International Trade Commission, Brazil was the leading importer of shotguns into the United States at 169,136 units and Italy was the second leading importer with 139,181 units. Shotguns made up 18% of all firearms imported into the United States in 2010 with handguns representing 63% and rifles at 19% respectively.

With President Obama being reelected coupled with heightened fear that he may regulate guns and ammunition in the aftermath of the Aurora, Colorado, shooting, we expect firearm sales to remain frothy and frenzied through the upcoming years.

Note: Because this Offering Circular focuses primarily on details concerning the Company rather than the industry in which the Company operates or will operate, potential investors may wish to conduct their own separate investigation of the Company's industry to obtain broader insight in assessing the Company's prospects.

(d) Our Marketing Strategy:

**Our Solution**

The shotgun market in the US is primarily broken down into 4 categories ~ under \$1,000 ~ \$1,000 to \$2,000 ~ \$2,000 to \$4,000 ~ and \$4,000 to \$10,000 per shotgun. Shotguns selling for over \$10,000 and up are in their own category and such as small part of the market. The market we are positioned in by design is the \$2,000 to \$4,000 market space. This market is controlled by Beretta and Browning which own 90% market share. Other players are Ceasar Guerini, Krieghoff, Blaser, Kolar, and AyA. Our 2 models are priced at \$2395 for the field model and \$3395 for the Elite. The Elite has a higher grade wood than our competitors and more engraving on the receiver that our Beretta and Browning competitors'

comparable models. The cost to Baserri was not any more money than shotguns with less engraving so we decided to not value add very much to the selling price of the shotgun in order to be seen as a very competitive product in the marketplace. The reference to the \$6000 to \$8000 shotguns is that we have been are constantly being compared to shotguns in that price point due to the extras we provide at a much lower price point.

The final point is that our competitors Beretta and Browning are 500 and 175 years old respectively and have large infrastructures and sales and marketing costs. Baserri does not have the overhead costs and are able to make very good margins at a lower price point than might be expected with an eye on capturing market share from these large competitors.

Our statements on flexibility can most be described by understanding that we can make decisions very fast and thus respond to changing business climates since there are only 2 owners and since we were not entrenched in manufacturing and owning buildings, etc. On a go forward basis we expect to have more people and assets. The new flexibility will be that we will hire management persons who come from the industry and whose skill sets are aligned with our growth needs. At some point we may not be as flexible, but by that time we will have the maturity of the Brands and the maturity of the management team members to facilitate growth and maintain market share.

As any brand and management team matures, they can positively impact the bottom line of their company by moving their focus toward other avenues of advertising. The tremendous amount of travel and blanket marketing does not have to be as extensive and costly as it does when a new company is building the brand name. An example of this is if the Beretta name rolls across the screen of a television show, the viewer already has in mind what it stands for. A newer company must spend more advertising dollars to get not only the name, but also the story behind the name told. This allows for mature brands to bring more profits to the bottom line. The mature brand and management team then can focus their sales approach on expanding sales growth and retaining market share. This can be achieved by the introduction of new models, expanding into new markets, and reducing price of the product to better compete in the marketplace.

### **Competitive Advantages**

Baserri's main competitive advantage is that we will offer a more custom-built shotgun design and quality than our competitor's mass produced guns. Historical statistics show that there was a down turn in traditional "heirloom" guns that are handed down from generation to generation. Many studies have shown a drop in households with guns peaking in the mid-1970s with 54% to current numbers approximately at 32%. It is our opinion that a major attribute to this is the increase of mass produced shotguns with a lower standard to keep up with supply and demand. At Baserri, we believe that we are on the forefront of a Renaissance in producing a fortified, well-made gun whose owners perceive and realize value via its differentiating attributes. The value added component to our product is the ability to last through the generations rather than sacrifice quality for a lower price point. This will ensure the potential in instilling investment in longevity vs. a lower shelf life of a lower quality mass produced product that our competitors are manufacturing.

- *High Level of Customer Service:* We believe in long-term relationships and will continue to provide unmatched customer service to our client base. For example, we conduct extensive buyer/dealer training to assure proper messaging and communication of Baserri's aforementioned technical and performance differentiators. In addition to training, Baserri places a premium on outbound logistics (responsive order processing) with dealers/retailers.
- *Excellent Value.* Baserri Shotguns provides our gun owners with excellent value at attainable price points.
- *Scalability.* Given our lean operating structure, our business model is designed to scale quickly while maximizing profit margins. Currently, with two owners and three management personnel allows us with a conservative and manageable operating budget in regard to salaries and selling, general and administrative expenses. With comparatively low operating costs and low debt and minimum employees the ability to scale up is less encumbered by existing realities.
- *Artistry and Attention to Detail:* Similarly-priced shotguns typically do not have the detailed scrolled engraving, 34 lines per inch checkering, and hand oiled European Walnut stocks.

- *High-Quality Products* Our shotguns are made with the high standards and quality, providing superior value as noted above.
- *Strong Leadership Team.* Our Leadership Team is comprised of business professionals who have proven.

### **Baserri Shotguns' Growth Strategies**

Organically, since inception, the Company has established a broad dealer network across different states outside of our strategic growth initiatives.

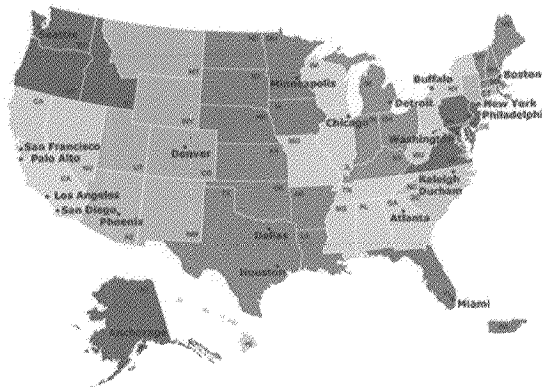

Our growth strategies include:

- *Focus on Consumers.* Maintain our focus on consumers and leverage our industry independence to enhance existing products and services and develop new offerings with broad consumer appeal.
- *Enhance the Baserri Shotguns brand through the country.* We believe that enhancing the Baserri brand will heighten awareness of our product and increase the number of buyers who use our guns ultimately increasing or top line growth. We plan to advertise aggressively online while using select traditional mediums to further promote our brand. In addition, we believe that we can enhance our brand by continuing to focus on consumer, with the objective of creating long-term relationships with our clients. This includes expansion of public relations, social media, and other marketing programs to efficiently increase our brand awareness.
- *Strategic Acquisitions.* We have identified three companies where we have a Letter of Intent (LOI) to acquire in Spain allowing us to vertically integrate our operations, manage quality control, and broaden our global distribution and product offering while becoming one of the premier shotgun companies in the world. These respective transactions will also strengthen our market position, enhance our ancillary capabilities and accelerate our growth.
- *Broaden and deepen our presence in existing markets.* We plan to increase our presence and market share in existing markets by expanding our number of Baserri Dealers through The Baserri Dealer Network, The Company's firearms are primarily marketed through a network of selected, federally licensed, independent wholesale dealers who purchase the products directly from the Company. Our current Baserri Dealers were selected for a number of reasons. First of all, they were selected because of their experience with double barrel shotgun sales. Secondly, because of their interest and commitment to help promote the Baserri line of products in their particular market. Thirdly, we selected based upon a geographic model not to have a large overlapping presence in the marketplace. We believe that maintaining these geographic areas enhances their commitment to sell our products. They resell to legally authorized end users. Additionally, we will continue to focus on growing our business within our dealer's network and work hand in hand to build mutual sales volume and profits. Currently, we have dealers throughout the country representing several states. Our dealer agreements set in place the expectations of each of our dealers. These expectations include:
  - Dealership agrees to stock a full representation of Baserri Shotguns products for their sales area.
  - Dealership agrees to have a trained and active sales force which initiates and maintains contact with retail customers
  - Dealership agrees to have an established business premises for sale and display of Baserri Shotguns products to customers, a Federal Firearms License, regular hours of business, a state or local resale tax number where applicable, and that provide full sales and service support for Baserri Shotguns products

This agreement is not wholly or in part transferrable. This Agreement may be terminated by either party upon 30 days notice in writing to the other party. Upon termination Baserri Shotguns shall have the option to

buy back from the dealership Baserri Shotguns product at the price actually paid by the dealership. This option has never been enacted by Baserri, and we do not plan to enact it unless under an extreme circumstance where a dealer misrepresents the Baserri products. Baserri Outdoors will offer a 5 year warranty on its products.

### Our Strategy

Our objective is to become one of the most recognized respected and successful companies in the firearms industry. The key elements of our strategy include:

### **Broaden and deepen our presence in existing markets**

We plan to increase our presence and market share in existing markets by expanding our number of Baserri dealers and executing our marketing strategy through both traditional and non-traditional mediums. Our Dealer program has been designed to encourage distribution and customer acquisition to facilitate the sale of our products while providing incentives.

### **Enhance the Baserri brand**

We believe that enhancing the Baserri brand will heighten awareness of our company and increase the number of home buyers and sellers who use our services and ultimately increase the number of shotguns we sell. We have launched aggressive social media campaigns, public relations and traditional mediums. We believe that we can enhance our brand by continuing to focus on client service, with the objective of creating lifelong relationships with our clients.

### **Continue to Manufacture a Superior Product**

We are committed to the quality to each and every one of our guns, using the high standards of quality control and inspection before being delivered to customers.

### **Leverage Wholesale Channels**

Baserri is targeting three primary avenues including the "Big Box" Sporting Goods Stores, and Regional and Local Gun Stores, and the Internet Retail Purchaser, which ecommerce transactions have trended higher. The Sporting Goods Stores are comprised of the following retailers; Gander Mountain, Cabala's, Academy, Bass Pro Shops and Dick's Sporting Goods.

### **Our Consumer Website and Services**

Baserri has a fully functional website that is designed to capture broad market coverage from various search engines through our social media and search engine optimization strategy. Our user friendly website allows the customer to learn more about our products while aligning them to one of our FFL dealer for pickup.

#### **(e) Baserri Outdoors Order Backlog:**

As of 02/01/2013 \$450,000

As of 02/01/2012 \$50,000

The variations between the two figures are a result of that we are a growing concern with both acquisition and organic growth. A typical order is approximately \$10,000.

#### **(f) Current and anticipated employees:**

At the end of Fiscal Year 2012, Baserri had 3 employees. Baserri expects the total number of employees to grow to 35 during the next 12 months. This is a direct result of the anticipated acquisitions of Lanber and AyA. The majority of these employees are production employees. Our employees are not subject to any collective bargaining agreements.

#### **(g) Principal properties:**

Baserri does not currently own or lease and principal properties. Within the next 12 months Baserri will acquire a manufacturing facility in Spain. The cost of the manufacturing facility is budgeted to not exceed \$500,000 and will be funded by the proceeds of this public offering.

#### **(h) Company's dependency on proprietary information:**

Baserri is not, to any great extent, dependent upon proprietary information. The brand names for which the shotguns are sold under are trademarked within the United States and Europe. Baserri spent \$10,000 on Research and Development during the last fiscal year. With the acquisitions, that number will increase to approximately \$250,000 over the next fiscal year.

(i) Impact of Regulation:

We are subject to the rules and regulations of the ATF. If we fail to comply with the ATF rules and regulations, the ATF may limit our activities or growth, fine us, or ultimately put us out of business. Our business, as well as the business of all producers and marketers of firearms and firearm parts, is also subject to numerous federal, state, local, and foreign laws, regulations, and protocols. Applicable laws require the licensing of all persons manufacturing, importing, or selling firearms as a business; require background checks for purchasers of firearms; impose waiting periods between the purchase of a firearm and the delivery of a firearm; prohibit the sale of firearms to certain persons, such as those below a certain age and persons with criminal records; regulate the interstate sale of handguns; prohibit the interstate mail-order sale of firearms; regulate our employment of personnel with criminal convictions; restrict access to firearm manufacturing facilities for individuals from other countries or with criminal convictions; and prohibit the private ownership of fully automatic weapons. Baserri is currently in compliance with all the Federal, State, and local requirements to conduct business as an International Gun Importer and Distributor. We currently hold a Federal Firearm License (FFL) to import and distribute non-military firearms, and in particular shotguns with barrels that are longer than 18". With this license we are allowed to import and sell firearms to other FFL licensed Wholesalers, Dealers, and qualified individuals. From time to time, congressional committees consider proposed bills and various states enact laws relating to the regulation of firearms. These proposed bills and enacted state laws often seek either to restrict or ban the sale and, in some cases, the ownership of various types of firearms. The regulation of firearms could become more restrictive in the future and any such restriction would harm our business. In addition, these laws, regulations, and protocols, as well as their interpretation by regulatory authorities, may change at any time. There can be no assurance that such changes to the laws, regulations, and protocols or to their interpretation will not adversely affect our business.

Furthermore, like many other manufacturers, we are subject to compliance with the Fair Labor Standards Act, the Occupational Safety and Health Act, and many other regulations surrounding employment law, environmental law, and taxation.

Compliance with all of these regulations is costly and time consuming. Although we take every measure to ensure compliance with the many regulations we are subject to, inadvertent violation of any of these regulations could cause us to incur fines and penalties and may also lead to restrictions on our ability to manufacture and sell our products and services and to import or export the products that we sell.

(j) Baserri Outdoors Group, Inc's subsidiaries:

Baserrri Outdoors currently has Baserrri Shotguns as a subsidiary. Baserrri Outdoors is uniquely positioned to acquire three companies; Zabala, AyA, and Lanber allowing them to accelerate our growth initiatives. We have conducted extensive due diligence and believe there is economies of scale to realize while being able to maintain key personnel.

(k) Material events effecting Baserrri Outdoors Group, Inc.

Baserrri Outdoors Group, Inc. was incorporated after discussions with our accountants and attorneys to establish a traditional holding company structure so that the Company could better take advantage of conditions within the marketplace namely the opportunities to grow through acquisitions. The merger of Baserrri Shotguns, LLC is the cornerstone event moving Baserrri Outdoors Group, Inc forward.

It is anticipated that Baserrri Outdoors Group, Inc. will form a Spanish Corporation under Spanish law and that this company will be owned by Baserrri Outdoors Group, Inc. for the purposes of acquiring the stock of one Spanish company and the assets and trademarks of another which are discussed below.

The next anticipated acquisition for Baserrri Outdoors Group, Inc. is Aquirre y Aranzabal (AyA) a Spanish gun maker that began manufacturing shotguns in the Basque region of Northern Spain in 1915. Historically AyA has

catered to the English Fine Gun enthusiasts. AyA's current management team will remain and will be responsible for all Spanish gun making efforts. The Company has in place a signed Letter of Intent to purchase up to 100% of the stock in AyA with a minimum of 51% for controlling interest in AyA.

The next anticipated event is to purchase certain assets from Lanber Armas of Bilbao, Spain. The Company has a signed Letter of intent to purchase assets of Lanber Armas. Certain assets such as inventory of parts, machinery, certain trademarks, and various miscellaneous assets will be purchased.

Once these targeted acquisitions and material events have been completed, the AyA Brand, the Lanber Brand and the Baserri Brand will be manufactured under one roof at the AyA facility and under the permits of the AyA company.

Future growth opportunities that would be material to the Company's success and are part of its plan are to develop a line of rifles for sporting use and to open 2 retail stores with which to sell and promote our Branded Products.

#### Profitability Milestones

The Company was not profitable of the last fiscal year. Listed below in chronological order are the events which will lead to profitability once they are achieved.

Event or Milestone	Expected Manner of occurrence or method of achievement	Date or number of months after receipt of proceeds when should be accomplished
(1) Breaking escrow	When over \$1M dollars is in escrow account. At that time proceeds are released and dispersed for use.	Primary release of proceeds expected June 23, 2013.
(2) AyA acquisition	Once proceeds held in escrow are released AyA acquisition will be completed and Revenues from AyA will be realized	2 months for completion
(3) Lanber Brand sales and marketing plan implementation	Fully integrated sales and marketing plan in place to capture historical sales revenues Lanber achieved.	9 months from breaking escrow to full implementation of plan

Any delays to achieving the milestones listed above will have negative consequences to the Company's growth plan. The main effect will be to slow down full implementation of all of the above initiatives and will push further out the revenues stream and thus liquidity will be affected. The delay in breaking escrow (1) will have the most impact. Delays in any of the other milestones will change revenue forecasts and subsequent profitability in the short term but long term forecast should be realized. Milestone (3) has the least impact on the future of the Company.

Note: After reviewing the nature and timing of each event or milestone, potential investors should reflect upon whether achievements of each within the estimated time frame is realistic and should assess the consequences of delays or failure of achievement in making an investment decision.

## Offering Price Factors

Our Common Stock is being offered for a period of twelve months in accordance to Regulation A and the initial price per share will be \$6.00 based on conservative valuation methodology using a discounted cash flow model based on pro-forma results with a discount rate ranging from 6-10% and multiple of 2-4x. Under this valuation model Baserri Outdoors Group was given a post-offering value of \$20,997,992. Utilizing this value the percentage of outstanding stock to be held by the investors was equated directly. The minimum raise of \$1,000,000 would

equate to a 4.76 percentage, and the maximum of \$5,000,000 raise would equate to a 23.8 percentage. At \$6 per share this would be shown in the number of shares offered for sale. The shares sold at the minimum level would be 166,667 shares and at a maximum level 833,333.

Our current tangible net book value as of December 31, 2012 is (\$76,676) and in fiscal year 2011, we reported a net loss of (\$52,511). Baserri is an emerging growth company and its ability to execute its business development strategy will be imperative on its valuation.

There is presently no public market for our common stock. We anticipate making an application for trading of our common stock on the FINRA over the counter bulletin board upon qualification of the offering statement of which this Offering Circular forms a part. We can provide no assurance that our shares will be traded on the bulletin board, or if traded, that a public market will materialize.

We will anticipate filing an application for trading of our common stock on the FINRA over the counter bulletin board after the offering.

## **Summary of Significant Accounting Policies**

### **Organization**

Baserri Shotguns, LLC (“Company”) was registered in Texas on August 3, 2009. The Company sells firearms under the Baserri brand. Baserri produces a line of European, artisan-crafted guns that are superior in quality, design, and aesthetics for the Global Firearms market at an obtainable price point. Baserri wants to create a best-in-class Company that brings the highest levels of value and service to its customers.

### **Use of Estimates**

The preparation of the financial statements is in conformity with accounting principles generally accepted in the United States, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the financial statement dates and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from these estimates.

### **Cash and Cash Equivalents**

The Company considers all highly liquid investments purchased with a maturity period of three months or less to be cash equivalents. There are no cash equivalents at December 31, 2012, 2011, 2010 and 2009, respectively.

### **Trade Receivables**

The Company extends credit to our domestic customers and foreign firearm distributors based on their financial condition. Discounts are offered for early payment on firearm invoices. When it is believed the extension of credit is not advisable, the Company relies on either a prepayment or a letter of credit. Past due balances for collection are placed with an outside agency after 90 days if there has been no good faith effort on the part of the customer to bring its account current. Balances deemed uncollectible by us against our allowance for doubtful accounts are written off. The Company estimates allowance for doubtful accounts through current past due balances, knowledge of our customers’ financial situations, and past payment history.

### **Concentrations of Credit Risk**

Financial instruments that potentially subject the Company to concentration of credit risk consist principally of cash, cash equivalents, and trade receivables. The Company places its cash with high credit quality financial institutions. At times in the future, such amounts may exceed the FDIC limits; however, these deposits typically may be redeemed upon demand and therefore bear minimal risk. In monitoring this credit risk, the Company periodically evaluates the stability of the financial institutions. Generally, no collateral or other security is required to support receivables. To reduce credit risk, a customer’s credit history is evaluated before extension of credit. In addition, an allowance for doubtful receivables has been established as needed based on facts surrounding the credit risk of specific customers, historical trends and other information.

### **Revenue Recognition**

The Company recognizes revenues for our firearm products when the following four basic criteria have been met: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred or services have been provided; (3) the fee is fixed or determinable; and (4) collection is reasonably assured. The Company recognizes revenue from firearm product sales when the earnings process is complete and the risks and rewards of ownership have transferred to the customer, which is generally upon shipment.

### **Allowance for Doubtful Accounts**

The Company has not accrued any balance for uncollectable accounts receivable. Based on its collection history and quality of its customer, the Company deems the accounts receivable balance as of June 30, 2012 and December 31, 2011 to be fully collectible. Company had no collectibles at December 31 2010 and 2009.

### **Inventory**

The Company's firearm inventory is valued at acquisition costs. Acquisition costs includes the purchase cost and also indirect costs such as custom fees, freight and storage fees during transportation, insurance charges, import and excise taxes, and discounts if any. Inventory is issued out of stock using the FIFO (first in, first out) method or market. All inventory carried by the Company is sellable materials. The Company evaluates inventory quarterly and any obsolete or unsellable materials will be written off at that time.

### **Property, Plant and Equipment**

At this time the Company has no property, plants and or equipment. The Company is currently in pursuit of purchasing plants and equipment in Spain. The contemplated stock purchase of Aguirre y Arranzabal will result in ownership of the necessary equipment and machinery to produce the finished shotguns for the three brands. Additionally the Company is in the process of completing the purchase of parts inventory and numerous machines designed specifically for producing shotguns. The contemplated transactions will allow the Company to produce shotguns in excess of 10,000 units per year.

### **Income Taxes**

The Company recognizes deferred tax assets and liabilities based on differences between the financial reporting and tax bases of assets and liabilities using the enacted tax rates and laws that are expected to be in effect when the differences are expected to be recovered. The Company provides a valuation allowance for deferred tax assets for which it does not consider realization of such assets likely. During the period from inception to December 31,, 2012, the Company incurred net losses and therefore has no tax liability accrued in the accompanying financial statements.

### **Warranty**

The Company provides a lifetime warranty option and plan to the original purchaser of our new firearm products. This lifetime warranty is unlimited for the first 5 years except for wood items namely the stock and the forend. At the purchase of the gun the purchaser has the option to purchase an extended/lifetime warranty policy for \$500, which will entitle the gun via the serial number to, received yearly gun checkups and appropriate servicing and repairs for the life of the gun. Exemptions for noted abuse such as submersion in water or bending of barrel via a traumatic blunt force trauma will be taken into account. The lifetime warranty that is purchased follows the gun by serial number and is transferable if the gun is sold in the future. The Company has accrued probable warranty claims at .075 percent of the sale price at the time of sale of each gun.

The Company had total liabilities, which consisted of warranty claims payable of \$6,529 for December 31, 2012, \$6,273 for 2011, \$3,098 for, 2010 , and long-term debt of \$296,353 for December 31, 2012 and \$41,578 for 2011.

Baserri has a limited operating history with only operations since inception, although it has established a base and presences in several markets positioning our firm to capitalize on market opportunities through buyer and seller representation going forward.

Our sales were impacted due to a disruption with our manufacturer, although we have since repositioned our operations to vertically integrate our business model through the acquisition of AyA, Lanber, and Zabala. We have also signed Manufacturing agreements with both Lanber and AyA. These agreements will be utilized in the event that the acquisitions are not completed.

We received the second part of the gun order from Fabarm on January 4, 2011. We then shipped the remaining 50 guns from their purchase order and had an additional 200 guns left to sell in 2011.

We anticipate our operating expenses will increase as we execute our business development strategy. The increase will be attributable to our proposed acquisition, organic growth initiatives, and the professional fees to be incurred in connection with the filing of a registration statement with the Securities Exchange Commission under the Securities Act of 1933.

In 2010 a group of independently owned firearm dealers combined to purchase 300 shotguns from Baserri to be delivered in multiple shipments. Approximately half of the shotguns were delivered in Fiscal Year 2010 and half of in Fiscal Year 2011. Baserri Shotguns used a factoring company to early capture the profits from this sale and fund not only the 300 shotguns for the order, but an additional 200 shotguns to sell to other dealers and interested parties. This was a onetime use of factoring companies. The factoring company arrangement was used in lieu of typical bank financing due to the young age of Baserri at the time, and in no way impacted the sales revenue recognized by Baserri. Baserri has not used their services since that one transaction, and does not intend to in the future.

By the end of March 2011 all guns had been paid for in full. All of our operating expenses are paid for on a cash basis.

Both of the owners of the LLC contributed capital. Jerry Wayne Rodrigue contributed \$149,000 and Alan Thompson contributed \$98,000.

#### **Future Needs**

We currently have limited liquidity, and have not completed our efforts to establish a stabilized source of revenues sufficient to cover operating costs over an extended period of time, although we have several pending deals in the pipeline that we expect to generate adequate cash flow.

Our future capital requirements will depend on many factors, including our rate of growth into new geographic markets, our level of investment in technology and advertising initiatives. We are currently party to a letter of intent with respect to AyA, Lanber and Zabala acquisition and may enter into other types of arrangements in the future, which could also require us to seek additional equity or debt financing. We currently have no bank debt or line of credit facilities. In the event that additional financing is required, we may not be able to raise it on terms acceptable to us or at all. If we are unable to raise additional capital when desired, our business, operations and results will likely suffer.

#### **Off Balance Sheet Arrangements**

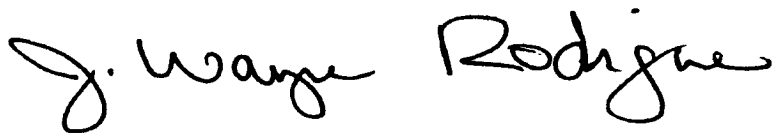

As of December 31, 2012, there were no off balance sheet arrangements.

## **Baserri Shotguns Announces Upcoming Public Offering**

Published August 14, 2012

Friendswood, Texas – [Baserri Shotguns, LLC.], headquartered in Friendswood, Texas has plans to prepare a direct public offering of common stock of Baserri Shotguns, LLC. Plans call for Baserri to file a registration statement with the Securities and Exchange Commission for approval of a direct public offering of common stock to be priced at \$6.00 per share, raising \$5 million.

It is anticipated that the offering will be filed with SEC sometime during the third quarter of 2012 with approval envisioned sometime during the fourth quarter of 2012 or first quarter of 2013. Proceeds from the offering funds will be used for Baserri's business development initiatives and operating capital. Following SEC approval the offering is intended to be marketed directly by Baserri to the public on its website and through various FINRA broker-dealers.

Baserri was founded by avid marksmen and shotgun aficionados, Alan Thompson and Wayne Rodrigue. It was apparent to both of them that there was a gap in the "double shotgun" markets—specifically regarding "fine shotguns" with respect to affordable pricing. They both realized that common, "mass-produced" double shotguns lacked custom workmanship—a condition standard amongst a plethora of domestic and international gun makers. Fine double shotguns were extremely expensive and therefore unattainable for most double gun enthusiasts. Accordingly, they set out to design and market a line of shotguns that have the substance and design of fine, custom-made double shotguns.

*[According to Wayne Rodrigue, "our direct public offering will allow us to not only raise capital to fund our growth initiatives, but also allow us to share in the success of our company with our affinity group." ]*

**Nothing in this press release may be considered or constitutes an offer to purchase or sell the securities of Baserri Shotguns, LLC. No solicitations of interest are intended and none will be accepted. The offering will be made only by means of a prospectus approved by the SEC.**

**Re: Offering Circular on Form 1-A  
File No. 024-10333**

I have been requested to issue my opinion as to the legal status of up to 833,334 Class A common shares of Baserri Outdoors Group, Inc. (the "Company") which are being qualified on Form 1-A ("Offering Circular") under the Securities Act of 1933, as amended (the "Act") for sale by the Company.

I have, in connection with that request, examined the Certificate of Formation, By-laws of the Company, form subscription agreement, a draft of the proposed amended Offering Circular, and reviewed other documents and conducted other investigations as I have deemed necessary and appropriate to establish a basis for the opinions set forth herein.

For purposes of this opinion, I have assumed the authenticity of all documents submitted to me as originals, the conformity to the originals of all documents submitted to me as copies, and the authenticity of the originals of all documents submitted to me as copies. We have also assumed the genuineness of the signatures of persons signing all documents in connection with which this opinion is rendered, the authority of such persons signing on behalf of the parties thereto other than the Company, and the due authorization, execution and delivery of all documents by the parties thereto other than the Company.

Based upon and subject to the foregoing matters discussed below, after having given due regard to such issues of law as I deemed relevant, and assuming that (i) the Offering Circular (and any amendments thereto) is declared effective and remains effective, and the Offering Circular which is part thereof, and the Offering Circular delivery requirements with respect thereto, are complied with and the Company fulfills all of the requirements of the Act, throughout all of the periods relevant to this opinion (including the requirements of Section 10(a)(3) of the Act); (ii) all offers and sales of the Shares are made in a manner complying with the terms of the Offering Circular and the Act; (iii) Subscription Agreements in the form of an exhibit to the Offering Circular (as amended and supplemented from time to time) have been duly executed and delivered by the various investors and the Company; and (iv) all offers and sales of the Shares are made in compliance with the securities laws of the states having jurisdiction thereto, I am of the opinion that the Shares, when offered, issued and paid for as described in the Offering Circular and pursuant to the Subscription Agreements, will be validly issued, fully paid and non-assessable. This opinion is expressly limited in scope to the Shares enumerated herein which are to be expressly covered by the referenced Offering Circular.

I have also assumed that at the time of issuance in the event the minimum number of shares are sold in the offering, the Company will receive the full amount of the consideration for which the Board authorized the issuance of the Shares; the Company will issue a share certificate or certificates to each purchaser of the Shares certifying the number of Shares held by such purchaser, or such Shares will be registered by book entry registration in the name of such purchaser, if un-certificated; and that the Company has complied, and will comply, with all securities laws and regulations and "blue sky" laws applicable to the issuance of the Shares. I express no opinion as to the enforceability of the Subscription Agreements. I express no opinion as to any county, municipal, city, town or village ordinance, rule, regulation or administrative decision. Our opinion is rendered as of the date hereof, and I assume no obligation to

advise you of changes in law or fact (or the effect thereof on the opinions expressed herein) that hereafter may come to our attention.

I express no opinion as to the laws of any state or jurisdiction other than the laws governing corporations of the State of Texas (including applicable provisions of the state constitution and reported judicial decisions interpreting such Law and such Constitution) and the federal laws of the United States of America. No opinion is expressed herein with respect to the qualification of the Shares under the securities or blue sky laws of any state or any foreign jurisdiction.

I have acted as special counsel to the Company only in connection with this opinion letter, and my engagement is limited and there may exist matters of a legal nature about which I have not been consulted. My opinion is expressly limited to the matters set forth above, and I render no opinion, whether by implication or otherwise, as to any other matters other than those described above, relating to the Company, the Shares or the Offering Circular.

This opinion is being delivered and is intended for use solely in regard to the transactions contemplated by the Offering Circular. I assume no duty to communicate to you with respect to any matter which comes to our attention after the effective date of the Offering Circular or any changes in law that may thereafter occur.

#### CONSENT

I hereby consent to the use of this opinion as an exhibit to the Offering Circular and in any amendment thereto. In giving this consent, I do not thereby admit that I am within the category of persons whose consent is required under Section 7 of the Act or the rules and regulations of the Commission promulgated thereunder.

Sincerely,

  
Aaron D. McGeary
