- 6 Sierra Bancorp
- 8 Bank of the Sierra
- 10 Results of Operations
- 11 Financial Condition
- 12 Board of Directors
Senior Management Team
- 13 Administrative Officers

MISSION STATEMENT

To be responsible stewards for our shareholders by providing a superior return on equity of 12%+ and a return on assets of 1 %+, within a culture of fiscal discipline and ethical entrepreneurship.

MAJOR STRATEGIES

- ❖ Anticipate and meet the dynamic needs of existing and prospective customers by providing a broad line of competitive and innovative financial products.
- ❖ Provide quality service on a timely, competitive basis.
- ❖ Maintain a selection and review process that employs the right people on the team.
- ❖ Maintain a supportive work environment that encourages creativity and entrepreneurship, and provides the opportunity for advancement.
- ❖ Assist the communities we serve with their socioeconomic needs, through focused local lending efforts and a broad range of community reinvestment activities.
- ❖ Be a disciplined institution of excellence.

VISION STATEMENT

To be the multi-community, independent bank of choice in our designated market areas by meeting the financial needs of the consumers, businesses and agri-businesses that we serve.

PRESIDENT'S MESSAGE

Jim Holly on the Pacific Crest Trail near Devil's Postpile National Monument, near Mammoth Lakes, CA.

"The factors that determine whether or not a company becomes truly great, even in a chaotic world or an uncertain world, lies largely in the hands of its people."

Great by Choice, Collins and Hansen

We continue to believe that quality people working together with a well conceived plan will not only enable us to work through what I call the Great Recession of 2008, but move beyond that and lead to greater financial success. We have what I would call an unrelenting drive to seek new talent while at the same time retaining the high quality staff we presently have. We have been doing that for years now and at this point in time we have the highest talent factor ever. We are engaged in the process because we know that the great differentiator between our Bank and our competitors is the quality of the people we have at every level in the Bank.

One positive aspect of the economic collapse has been the availability of high caliber talent not available in the past. We have seized the opportunity and have been able to add quality staffing at all levels of the Bank while retaining the quality people we have. The effects of doing

this will be evident in the years ahead. There will be no quick end to the chaos and uncertainty that have been so prevalent the past few years, but with a talent laden staff we can confront our circumstances and prevail.

"We do not believe that chaos, uncertainty, and instability are good; leaders, organizations, and societies do not thrive on chaos. But they can thrive in chaos."

Great by Choice, Collins and Hansen

For the year 2012 we continue on with the recovery from the Great Recession of 2008. This has been a painfully slow process now for over four years and a process conducted in an environment of chaos and uncertainty. If there was a ground zero for the housing collapse certainly the San Joaquin Valley from Stockton to Bakersfield would be a part of that. Our market footprint is that of the South San Joaquin Valley from Fresno to Bakersfield. Now as we approach 2013 there are signs of improvement in the housing market and other economic indicators too. On the other hand, the agricultural markets within our footprint have been very strong the past five years aided by a weak dollar that has enabled an export market, particularly in Asia. The exception here would be

the Dairy Industry that has a special set of challenges. The agricultural credit market has very real opportunities for us and we are building a stronger presence there. Small business credit and mortgage credit markets here are strengthening too and we will be more active in those areas as the economy continues to improve.

One aspect of our overall banking operation not often discussed is the diversity and stability of our deposit base. Total deposits at year-end were \$1.174 billion domiciled in our 25 traditional offices and one Internet only office. Only \$15 million of that base were wholesale brokered deposits and then only to accommodate a bond leverage strategy now almost matured. Total deposit accounts numbered over 90,000 which further demonstrates stability and diversity. In Tulare County where we are headquartered we are now the market leader in deposits followed by Bank of America, Wells Fargo a distant third, and then a host of other banks. This would be one of the few counties in California where the local independent bank has the leading market share. If we had the same market share in the other three counties in our footprint we would have total deposits of over \$4.000 billion dollars showing surprising unrealized potential! We will be working on this going forward!

While our deposit growth has been strong, the real challenge has been loan growth. We have met this challenge in 2012 by greatly expanding our Mortgage Loan Warehousing program, and providing a basis to continue that expansion into 2013. This program is now housed in the Real Estate Industries Center which is well staffed for the challenge. In that Center we also have other real estate loan products that are experiencing renewed demand. Earlier I commented that we are making a strong move in agricultural credit. We are doing so by adding staffing and developing unique-to-us ag credit products as well as offering traditional ag credit products. Small business credit demand is increasing throughout our footprint as the economy shows signs of recovery. I should note that Bakersfield and Kern County are particularly vibrant with expanded oil production. Tulare, Kings and Fresno Counties are also showing signs of renewed loan demand.

Nonperforming assets continue to be a challenge for us. We made good progress throughout 2012 until the fourth quarter when two large relationships totaling about \$28 million were designated nonperforming. Both

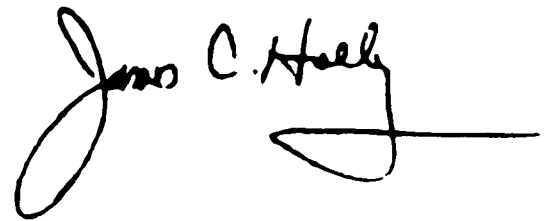

relationships are well collateralized, and are being closely followed internally. While we are confident of a satisfactory resolution of both loan relationships it remains to be seen how it will all work out. Both loans are well reserved. Other nonperforming loans receive the same close following and with an improving economy we think there will be ongoing resolution in this area.

We view the year 2013 as a pivotal year for our Bank, balancing the building of a new and diversified loan portfolio while resolving issues in the legacy loan portfolio, both challenging undertakings but well within our capabilities. Additionally, we have the capital to support both activities and to continue to grow our Bank internally or externally, or both. There is much that remains to be done.

“I never notice what has been done.
I only see what remains to be done.”

--- Madame Curie

Sincerely,
James C. Holly

A handwritten signature in black ink that reads "James C. Holly". The signature is written in a cursive style with a large, looped initial "J" and a long horizontal stroke at the end.

SIERRA BANCORP

Sierra Bancorp (the "Company") is a California corporation headquartered in Porterville, California, and is a registered bank holding company under federal banking laws. Sierra Bancorp's Common Stock trades on the NASDAQ Global Select Market under the symbol BSRR. The Company was formed primarily to serve as the holding company for Bank of the Sierra (the "Bank"), and the Company has been the Bank's sole shareholder since August 2001. References herein to the "Company" include Sierra Bancorp and its only consolidated subsidiary, the Bank, unless the context indicates otherwise. The Company's unconsolidated subsidiaries are Sierra Capital Trust III, which was formed in June 2006 solely to facilitate the issuance capital trust pass-through securities, and Sierra Statutory Trust II, formed in March 2004 also for the purpose of issuing capital trust pass-through securities.

BANK OF THE SIERRA

Bank of the Sierra is a California state-chartered bank headquartered in Porterville, California. The Bank was incorporated in September 1977, and opened for business in January 1978 as a one-branch bank with \$1.5 million in capital and eleven employees. From this modest beginning we have grown to be the largest bank headquartered in the South Valley, with over \$1.4 billion in assets at December 31, 2012. Our growth has primarily been organic, but includes the acquisition of Sierra National Bank in 2000. We currently employ over 400 people and operate 25 full-service branch offices throughout our geographic footprint, which is comprised primarily of Tulare, Kern, Fresno, and Kings Counties. We believe that we have ample organic growth opportunities within our current markets, and have generally adhered to the “market density” principle by opening new branches in underserved areas within our current footprint. Our most recent branch changes include the third-quarter 2012 relocation of our Clovis branch to a larger facility in a more convenient location, and the first-quarter 2011 opening of a new branch in the City of Selma.

In addition to the full-service branch offices noted above, the Bank has a real estate industries group, an agricultural credit division, and an SBA lending unit. We also have

ATM’s at all branch locations, and offsite ATM’s at six different non-branch locations. Furthermore, the Bank is a member of the Allpoint network, which provides our customers with surcharge-free access to over 38,000 ATM’s across the nation and another 12,000 ATM’s in foreign countries, and our customers have access to electronic point-of-sale payment alternatives nationwide via the Pulse EFT network. To ensure that account access preferences are addressed for all of our customers, we also offer online banking and account management options that include bill-pay and mobile banking capabilities, maintain a customer service center that is accessible by toll-free telephone during business hours, and provide an automated telephone banking system with 24-7 access.

We strive to maintain a broad array of loan and deposit products and services that appeal to a wide variety of consumers and businesses. The Bank’s lending activities include real estate, commercial (including small business), agricultural, and consumer loans. The bulk of our real estate loans are secured by commercial or professional office properties which are predominantly owner-occupied. At December 31, 2012, gross loans totaled \$880 million.

Our deposit products include checking accounts, savings accounts, money market demand accounts, time deposits, retirement accounts, and sweep accounts. The Bank's deposit accounts are insured by the Federal Deposit Insurance Corporation (FDIC) up to maximum insurable amounts. We have also been in the CDARS network since its inception, and through CDARS are able to offer full FDIC insurance coverage on multi-million dollar deposits up to specified limits. We attract deposits from throughout our market area with direct-mail and other marketing campaigns, a customer-oriented product mix, competitive pricing, referrals from existing customers, and by offering easy access to the Bank through the delivery channels noted above. We strive to retain our deposit customers by providing a consistently high level of service. At December 31, 2012, we had 92,700 deposit accounts with balances totaling almost \$1.2 billion. Based on June 30, 2012 FDIC market share data for the combined counties within which we operate, namely Tulare, Kern, Fresno, and Kings counties, Bank of the Sierra ranks sixth with 5.4% of total deposits. In Tulare County, where the Bank was originally formed, we have the largest number of branch locations for any individual financial institution (12, including our online branch), and rank first for deposit market share with 19.4% of total deposits.

We offer a multitude of other banking products and services to complement and support our lending and deposit products, including remote deposit capture and automated payroll services for business customers. To provide non-deposit investment options we have a strategic alliance with Investment Centers of America, Inc. of Bismarck, North Dakota ("ICA"). Through this arrangement, registered and licensed representatives of ICA provide our customers with convenient access to annuities, insurance products, mutual funds, and a full range of investment products.

In summary, we are a "build-to-own" (rather than "build-to-sell") community bank that offers investors, customers and staff the confidence of continuity and long-term stability. Low turnover among the Bank's directors and officers has contributed to depth of experience and a solid foundation, which has allowed us to expand operations and enhance the value of the Bank as opportunities have arisen.

RESULTS OF OPERATIONS

Recessionary conditions have led to relatively high credit costs, diminished lending activity, and associated earnings pressures at the Company for the past five years. There are signs of recovery in the national economy and in certain regions of California, including Kern County, but economic conditions have not yet materially improved in Tulare, Fresno, and Kings Counties. Moreover, industry-wide regulatory pressures on certain components of non-interest income have exacerbated the negative impact of the faltering economy on our financial performance in recent years. We have maintained robust liquidity and built a solid capital position in spite of the recession, and the Company's relatively strong core earnings, as measured by pre-tax pre-provision income, have carried us through these unfavorable conditions with positive annual earnings. We recognized consolidated net income of \$8.2 million in 2012, which represents a slight improvement relative to 2011. Net income per diluted share was \$0.58 in 2012, as compared to \$0.55 in 2011. The Company's return on average assets and return on average equity were 0.59% and 4.74%, respectively, in 2012, as compared to 0.59% and 4.73%, respectively, in 2011.

The Company earns income from two primary sources. The first is net interest income, which is interest income generated by earning assets less interest expense on interest-bearing liabilities. The second is non-interest income, which primarily consists of customer service charges and fees but also comes from non-customer sources such as bank-owned life insurance. The majority of the Company's non-interest expense consists of operating costs that relate to providing a full range of banking services to our customers.

Net interest income has been declining, falling by 4% in 2012 relative to 2011 and by 6% in 2011 relative to 2010,

due to net interest margin compression. Negative factors affecting the Company's net interest margin in recent years include relatively strong growth in lower-yielding investment balances (although that trend began to reverse in the second half of 2012), a higher level of non-accruing loans and other non-earning assets, a shift from higher yielding loan categories to lower-yielding loan types, and lower loan yields across the board resulting from increased competition for quality loans.

Our provision for loan and lease losses, which totaled \$14.210 million in 2012 and \$12.000 million in 2011, has been at much higher levels than in pre-recession years. The elevated loan loss provisions have been utilized to establish specific reserves for loans that have migrated into impaired status, replenish reserves subsequent to loan charge-offs, and build general reserves for performing loans due to higher historical loss factors.

Non-interest income increased by \$3.134 million, or 21%, in 2012 over 2011. Significant fluctuations in non-interest income in 2012 were created by non-recurring adjustments that lowered costs associated with tax credit investments and thus boosted income, an increase in bank-owned life insurance (BOLI) income associated with deferred compensation plans, an increase in debit card interchange fees, and the fact that we recorded an impairment charge on equity investment securities in 2011 that wasn't repeated in 2012. Gains on the sale of investment securities totaled \$1.762 million in 2012 and \$1.660 million in 2011.

Operating expense, while reflecting favorable trends in 2012 and 2011, has been elevated relative to pre-recession years due in large part to foreclosed asset costs and other credit-related expenses. The drop of \$949,000, or 2%, in 2012 is due primarily to declining costs associated with foreclosed assets, a reduction in lending-related legal expense, lower occupancy costs and lower marketing expense.

The Company had a tax benefit of \$344,000 in 2012, a tax provision of \$564,000 in 2011, and a tax benefit of \$234,000 in 2010. The tax benefits in 2012 and 2010 were primarily the result of lower taxable income relative to the Company's available tax credits, and a higher level of tax-exempt BOLI income.

FINANCIAL CONDITION

The Company's assets totaled \$1.438 billion at December 31, 2012, relative to total assets of \$1.335 billion at December 31, 2011. Total liabilities were \$1.264 billion at the end of 2012 compared to \$1.167 billion at the end of 2011, and we had shareholders' equity totaling \$174 million at December 31, 2012 relative to \$169 million at December 31, 2011.

Total assets increased by \$102 million, or 8%, in 2012. Investment securities, cash, and balances due from banks declined by a combined \$28 million, or 6%, but that drop was more than offset by a net increase of \$126 million, or 17%, in loan balances. Recessionary conditions have negatively impacted loan demand in recent years, although our efforts in 2012 with regard to mortgage warehouse loans and agricultural loans produced impressive results. Mortgage warehouse balances increased by \$142 million during the year, with net growth of about \$16 million in other commercial loan categories. Furthermore, loans secured by farmland (ag mortgage loans) were up almost \$12 million, or 20%, and agricultural production loans increased by \$5 million, or 32%. Those increases were partially offset by declining balances in certain other loan categories.

Substantial progress was made with regard to the resolution of nonperforming assets throughout much of 2012, but during the fourth quarter we were unfortunately required to downgrade two large loan relationships and place the associated loans on non-accrual status. Those loan balances totaled approximately \$28 million as of year-end, and are considered to be "performing non-performing" loans since the customers in question were still paying principal and interest as agreed as of year-end and the loans are backed by adequate collateral. With the addition of the aforementioned balances nonperforming assets totaled \$73 million at the end of 2012, up slightly from the end of 2011 but still below the peak balance of \$80 million reported at September 30, 2009. The Company's ratio of nonperforming assets to loans plus foreclosed assets fell to 8.10% at December 31, 2012 from 9.25% at December 31, 2011, due to the increase in gross loan balances.

Our allowance for loan and lease losses was \$13.9 million as of December 31, 2012, a decline of \$3 million, or 20%, relative to year-end 2011. The drop during 2012 was

due in part to certain loan charge-offs which were taken against previously-established specific reserves and thus did not require replenishment, as well as a reduction in general reserves consistent with improvement in the quality of the company's performing loans. Because of the decline in the overall allowance and the increase in total loans, the allowance fell to 1.58% of total loans at December 31, 2012 from 2.28% at December 31, 2011.

Total deposits increased by \$88 million, or 8%, during 2012. Non-maturity deposits were up \$100 million, or 14%, including significant increases in savings deposits, non-interest bearing demand deposits, and interest-bearing transaction accounts due in part to aggressive deposit acquisition programs and an intensified focus on business relationships. A drop in time deposits partially offset the increase in non-maturity deposits.

Total capital was \$174 million at December 31, 2012, reflecting an increase of \$5 million, or 3%, for the year. Risk-based capital ratios declined, however, as capital was leveraged for organic loan growth, but our ratios still remain among the highest in our peer group. At December 31, 2012, the consolidated Company's Total Risk-Based Capital Ratio was 19.36%, its Tier One Risk-Based Capital Ratio was 18.11%, and its Tier One Leverage Ratio was 13.34%.

ANNUAL REPORT 2012

SIERRA BANCORP

The Holding Company for
Bank of the Sierra

A copy of the Company's 2012 Annual Report Form 10-K, including financial statements but without exhibits filed with the Securities and Exchange Commission, is enclosed herewith. Quarterly financial reports and other news releases may also be obtained by visiting www.SierraBancorp.com

SIERRA BANCORPSM

Received SEC

MAY 15 2013

Washington, DC 20549

NOTICE OF ANNUAL MEETING OF SHAREHOLDERS To Be Held May 22, 2013

TO THE SHAREHOLDERS OF SIERRA BANCORP:

The Annual Meeting of Shareholders (the "Meeting") of Sierra Bancorp will be held at the Main Office of Bank of the Sierra, 90 North Main Street, Porterville, California 93257 on Wednesday, May 22, 2013 at 7:30 p.m.

At the annual meeting, you will be asked to consider and vote on the following matters:

1. **Election of Directors.** To elect the following three individuals to serve as Class II directors until the 2015 annual meeting of shareholders and until their successors are elected and qualified:

Albert L. Berra

Vincent L. Jurkovich

Gordon T. Woods

2. **Ratification of Appointment of Independent Accountants.** To ratify the appointment of Vavrinek, Trine, Day & Co., LLP as the Company's independent registered public accounting firm for 2013.

3. **Advisory Vote on Executive Compensation.** To approve, on an advisory and non-binding basis, the compensation paid to the Company's Named Executive Officers.

4. To transact such other business as may properly come before the Meeting and any and all adjournments thereof.

The Board of Directors recommends that you vote in favor of the election of the above nominees, and in favor of Proposals 2 and 3.

Only shareholders of record at the close of business on March 25, 2013 are entitled to notice of and to vote at the annual meeting. **Whether you plan to attend the annual meeting or not, please sign, date and return the enclosed proxy card in the postage paid envelope provided, so that as many shares as possible may be represented.** The vote of every shareholder is important and we will appreciate your cooperation in returning your executed proxy promptly. Each proxy is revocable and will not affect your right to vote in person if you attend the annual meeting. If you hold your shares in certificate form and attend the Meeting, you may simply revoke your previously submitted proxy and vote your shares at that time. If your shares are held by a broker or otherwise not registered in your name, you will need additional documentation from your record holder to vote your shares personally at the Meeting. If you hold your shares in certificate form, please indicate on the proxy whether or not you expect to attend.

We appreciate your continuing support and look forward to seeing you at the annual meeting.

DATED: April 26, 2013

By Order of the Board of Directors

Diane Renois
Secretary

**Important Notice Regarding the Availability of Proxy Materials for the
2013 Annual Meeting of Shareholders to be held on May 22, 2013**

This proxy statement and the Company's 2012 Annual Report to Shareholders are available electronically at
www.sierrabancorp.com/financials

SIERRA BANCORP
86 North Main Street
Porterville, California 93257
(559) 782-4900

PROXY STATEMENT
ANNUAL MEETING OF SHAREHOLDERS
To Be Held May 22, 2013

INTRODUCTION

General

This Proxy Statement is furnished in connection with the solicitation of proxies for use at the Annual Meeting of Shareholders (the "Meeting") of Sierra Bancorp (the "Company"), to be held at the Main Office of Bank of the Sierra, 90 North Main Street, Porterville, California at 7:30 p.m. on Wednesday, May 22, 2013 and at any and all adjournments thereof.

We expect to mail this Proxy Statement and accompanying Notice to shareholders on approximately April 26, 2013.

The matters to be considered and voted upon at the Meeting will be:

1. **Election of Directors.** To elect three nominees to serve as Class II directors until the 2015 annual meeting of shareholders and until their successors are elected and qualified.
2. **Ratification of Appointment of Independent Accountants.** To ratify the appointment of Vavrinek, Trine, Day & Co., LLP as the Company's independent registered public accounting firm for 2013.
3. **Advisory Vote on Executive Compensation.** To approve, on an advisory and non-binding basis, the compensation paid to the Company's Named Executive Officers.
4. To transact such other business as may properly come before the Meeting and any and all adjournments thereof.

Revocability of Proxies

A Proxy for use at the Meeting is enclosed. Any shareholder who executes and delivers such Proxy has the right to revoke it at any time before it is exercised by filing with the Secretary of the Company an instrument revoking it or a duly executed proxy bearing a later date, or by attending the Meeting and voting in person. (Any shareholder who holds shares in certificate form and attends the Meeting may simply revoke his or her previously submitted proxy and vote their shares at that time. Shareholders whose shares are held by a broker or are otherwise not registered in their own names will need additional documentation from their record holder to vote any shares personally at the Meeting.) Subject to such revocation, all shares represented by a properly executed Proxy received in time for the Meeting will be voted by the proxy holders whose names are set forth in the accompanying Proxy in accordance with the instructions on the Proxy. If no instruction is specified with respect to a matter to be acted upon, the shares represented by the Proxy will be voted in favor of the election of the nominees for directors set forth herein, in favor of Proposals 2 and 3 and, if any other business is properly presented at the Meeting, in accordance with the recommendations of the Board of Directors.

Solicitation of Proxies

The solicitation of the Proxy accompanying this Proxy Statement is made by the Company's Board of Directors, and we will bear the costs of such solicitation, including preparation, printing and mailing costs. The proxies will be solicited principally through the mails, but officers, directors and regular employees of the Company may solicit proxies personally or by telephone. Arrangements will be made with brokerage firms and other custodians, nominees and fiduciaries to forward these proxy solicitation materials to shareholders whose stock in the Company is held of record by such entities, and we will reimburse such brokerage firms, custodians, nominees and fiduciaries for reasonable out-of-pocket expenses incurred by them in connection therewith.

VOTING SECURITIES

There were 14,119,679 shares of the Company's common stock issued and outstanding on March 25, 2013, which has been set as the record date for the purpose of determining the shareholders entitled to notice of and to vote at the Meeting. The presence, in person or by proxy, of at least a majority of the total number of outstanding shares of our common stock is necessary to constitute a quorum at the Meeting for the transaction of business. Abstentions and broker non-votes are each included in the determination of the number of shares present for determining a quorum but are not counted on any matters brought before the Meeting.

Each shareholder is entitled to one vote on each proposal per share of common stock held as of the record date. Shareholders do not have cumulative voting rights in connection with the election of directors. The election of three directors to serve until the 2015 Annual Meeting of Shareholders requires approval by a "plurality" of the votes cast by the shares of common stock entitled to vote in the election. This means that the three nominees who receive the highest number of properly cast votes will be elected as directors even if those nominees do not receive a majority of the votes cast. Shares represented by proxies that are marked with instructions to "withhold authority" for the election of one or more director nominees or that are not voted (whether by abstention, broker non-vote or otherwise) will not be counted in determining the number of votes cast for those persons.

For all other matters, including the ratification of the appointment of our accountants and the advisory vote on executive compensation, a majority of votes cast shall decide the outcome of each matter submitted to the shareholders at the Meeting. Abstentions will be included in the vote totals and, as such, will have the same effect on proposals as a negative vote. Broker non-votes (i.e., the submission of a proxy by a broker or nominee specifically indicating the lack of discretionary authority to vote on the matter), if any, will not be included in vote totals and, as such, will have no effect on any proposal.

ELECTION OF DIRECTORS

Our Bylaws currently provide that the number of directors shall be not fewer than six nor more than eleven until changed by a bylaw amendment duly adopted by the vote or written consent of our shareholders. The Bylaws further provide that the exact number of directors shall be fixed from time to time, within the foregoing range, by a bylaw or amendment thereof or by a resolution duly adopted by the vote or written consent of our shareholders or by our Board of Directors. The exact number of directors is presently fixed at seven.

Pursuant to the Company's Articles of Incorporation, the Board of Directors is divided into two classes, designated Classes I and II. The directors serve staggered two-year terms, so that directors of only one class are elected at each Annual Meeting of Shareholders. At the Meeting, shareholders will be asked to elect the following three Class II directors whose terms expire this year, for an additional term of two years:

Albert L. Berra

Vincent L. Jurkovich

Gordon T. Woods

Since shareholders do not have cumulative voting rights in the election of directors, a plurality of the votes cast is required for the election of directors. This means that the three nominees who receive the highest number of properly cast votes will be elected as directors even if those nominees do not receive a majority of the votes cast. In the event that any of the nominees should be unable to serve as a director, it is intended that the Proxy will be voted for the election of such substitute nominee, if any, as shall be designated by the Board of Directors. Management has no reason to believe that any nominee will become unavailable.

The following table sets forth information as of March 25, 2013 with respect to (i) each of the persons nominated by the Board of Directors for election as directors, all of whom are also directors of the Company, (ii) each of our directors and executive officers, and (iii) our directors and executive officers as a group. Additional information concerning the experience and qualifications of the Company's directors appears below under "CORPORATE GOVERNANCE – Director Nomination Procedures, Qualifications and Related Matters."

Name, Address and Offices Held with the Company ¹	Principal Occupation for the Past Five Years ²	Age	Term to Expire/ Director Since	Common Stock Beneficially Owned on March 25, 2013		
				Number of Shares ³	Vested Option Shares ⁴	Percentage of Shares Outstanding ⁵
Morris A. Tharp Chairman of the Board	President and Owner, E.M. Tharp, Inc. (Truck Sales and Repair)	73	2014/ 2000 (1977) ⁶	499,475 ⁷	27,500	3.72%
Albert L. Berra Director	Orthodontist/Rancher (Owner, Albert L. Berra, DDS and Berra Farms)	72	2015/ 2000 (1977) ⁶	301,191 ⁸	27,500	2.32%
Robert L. Fields Director	Retired Jeweler (formerly Owner, Bob Fields Jewelers)	85	2014/ 2000 (1982) ⁶	469,578	22,500	3.48%

¹ All offices held apply to both Bank of the Sierra and Sierra Bancorp. The business address of each of the executive officers and directors is 86 North Main Street, Porterville, California 93257.

² None of the companies listed in this column or in related footnotes, other than Bank of the Sierra, are affiliates of Sierra Bancorp. All positions listed have been held for a period of at least five years unless otherwise indicated.

³ Except as otherwise noted, may include shares held by or with such person's spouse (except where legally separated) and minor children, and by any other relative of such person who has the same home; shares held in "street name" for the benefit of such person; shares held by a family trust as to which such person is a trustee and primary beneficiary with sole voting and investment power (or shared power with a spouse); or shares held in an Individual Retirement Account or pension plan as to which such person is the sole beneficiary and has pass-through voting rights and investment power.

⁴ Represents option shares which are vested or will vest within 60 days of March 25, 2013 pursuant to the Company's Stock Incentive Plan. See "EXECUTIVE OFFICER AND DIRECTOR COMPENSATION – Outstanding Equity Awards at Fiscal Year End" and "– Compensation of Directors."

⁵ This percentage is based on the total number of shares of the Company's common stock outstanding, plus the numbers of option shares for the applicable individual, or for the directors and executive officers collectively, which are vested or will vest within 60 days of March 25, 2013 pursuant to the Company's Stock Incentive Plan. See "EXECUTIVE OFFICER AND DIRECTOR COMPENSATION – Outstanding Equity Awards at Fiscal Year End" and "– Compensation of Directors."

⁶ Year first elected or appointed a director of Bank of the Sierra.

⁷ Includes 5,215 shares held by Mr. Tharp as trustee for the grandchildren of another director of the Company, as to which shares Mr. Tharp has sole voting but no investment power; and 5,280 shares held by Mr. Tharp's spouse as separate property, as to which shares Mr. Tharp has neither voting nor investment power.

⁸ Includes 80,704 shares held by Berra Investments, a limited partnership in which Dr. Berra and his spouse are general partners; 22,036 shares held by the Albert L. Berra, DDS Profit Sharing Plan, of which Dr. Berra is trustee, as to all of which shares he has sole voting and dispositive power; and 30,793 shares held by Dr. Berra's spouse as separate property, as to which shares Dr. Berra has neither voting nor investment power.

(Certain footnotes appear on previous page.)

⁹ Includes 30,000 shares held by Holly Farms, L.P., a limited partnership of which Mr. Holly is a general partner, as to which shares he has sole voting power and shared dispositive power.

¹⁰ Includes 50 shares held by a special needs trust of which Ms. Searcy is successor trustee, as to which shares she has sole voting and dispositive power.

¹¹ Gordon T. Woods Construction is a manufacturer and installer of commercial grade filtration systems and Hydrokleen Systems is a designer and manufacturer of water and waste treatment systems.

CORPORATE GOVERNANCE

General

The Board of Directors believes that it is important to encourage the highest level of corporate ethics and responsibility and has fully implemented the corporate governance requirements of Nasdaq and the Securities and Exchange Commission (the "SEC").

Code of Ethics

We have adopted a Code of Ethics which applies to all of our directors, officers and employees, including our principal executive officer, principal financial officer, principal accounting officer and persons performing similar functions. The Code of Ethics requires that our directors, officers and employees avoid conflicts of interest, comply with all laws and other legal requirements, conduct business in an honest and ethical manner and otherwise act with integrity and in the Company's best interests. Under the terms of the Code of Ethics, directors, officers and employees are required to report any conduct that they believe in good faith to be an actual or apparent violation of the Code of Ethics. The Code of Ethics may be found on our web site, "www.sierrabancorp.com" on the "Investor Relations" tab under the topic "Governance Documents." We intend to post notice of any waiver from, or amendment to, any provision of our Code of Ethics on this web site.

Procedures for Reporting Concerns about Accounting, Internal Accounting Controls or Auditing Matters

As a mechanism to encourage compliance with the Code of Ethics, we have established procedures for (i) receiving, retaining and addressing complaints received regarding accounting, internal accounting controls or auditing matters; (ii) allowing employees to anonymously report any problems they may detect with respect to such matters; and (iii) reporting any suspected violations of the Code or of law. The Code of Ethics also prohibits the Company from retaliating against any director, officer or employee who makes a good faith report of a suspected violation of the Code or of law (even if the report is mistaken), or against anyone who assists in the investigation of a reported violation.

Director Independence

General. The Board has determined that all of its directors, other than the President and Chief Executive Officer, are "independent" as that term is defined by the Nasdaq rules. The overwhelming majority of the members of our Board of Directors have historically been independent, and our Audit, Nominating and Governance, and Compensation Committees are comprised solely of independent directors in accordance with SEC and Nasdaq requirements.

Executive Sessions. The independent directors meet regularly in executive session without any members of management present.

Director Attendance

Board and Committee Meeting Attendance. During the fiscal year ended December 31, 2012, our Board of Directors held a total of 13 meetings. Each director attended at least 75% of the aggregate of (a) the total number of such meetings and (b) the total number of meetings held by all committees of the Board on which such director served during 2012.

Director Attendance at Annual Meetings of Shareholders. The Board believes it is important for all directors to attend the annual meeting of shareholders in order to show their support for the Company and to provide an opportunity for shareholders to communicate any concerns to them. The Company's policy is to encourage, but not require, attendance by each director at the Company's annual meeting of shareholders. All of our directors attended our Annual Meeting of Shareholders in 2012.

Shareholder Communications with Board of Directors

Shareholders may communicate with the Board of Directors or with any individual director by mailing a communication to our principal executive offices addressed to the Board of Directors or to the individual director. All of such communications, except those clearly of a marketing nature, will be forwarded unopened directly to the appropriate director or presented to the full Board of Directors at the next regularly scheduled Board meeting.

Director Nomination Procedures, Qualifications and Related Matters

Procedure for Consideration of Director Nominees. Prior to making any recommendations to the Board of Directors concerning the nomination of directors for each year's annual meeting, the Nominating and Governance Committee (the "Governance Committee") shall (i) evaluate the performance, attendance records of, and any loans or other transactions between the Company or the Bank and each of the current Board members proposed for reelection, and on that basis consider the appropriateness of such members standing for reelection; (ii) review the composition and size of the Board in order to ensure that the Board is comprised of members reflecting the proper expertise, skills, attributes and personal and professional backgrounds for service as directors of the Company; (iii) consider the need to augment the Board for any specific purpose; (iv) review and consider any additional requests from outside parties to serve as directors; (v) if a new nominee is needed, determine the specific skills and experience desired in a new director; and (vi) in such case, identify potential nominees who have such skills and experience, determine whether the potential nominees are shareholders of the Company, investigate the potential nominee's background, develop personal knowledge about the candidate, develop a consensus of the committee members with respect to which potential nominee would be best suited for the position, determine whether the candidate is interested, and vote on the recommendation.

The Governance Committee shall consider recommendations from directors, officers and employees of the Company and the Bank, as well as persons recommended by shareholders of the Company, and shall evaluate persons recommended by directors, officers or employees in the same manner as those recommended by shareholders in selecting Board nominees.

Director Qualifications. In considering possible candidates for election as a director, the Governance Committee shall be guided by the principle that each director should: (i) be an individual of the highest ethical character and integrity; (ii) have substantial experience which is of particular relevance to the Company; (iii) have the ability and willingness to devote sufficient time to the affairs of the Company; (iv) have a meaningful financial stake in the Company so as to assure that every director's interests are aligned with those of the shareholders; (v) be knowledgeable about the business activities and market areas in which the Company and its subsidiaries engage; (vi) have a general appreciation regarding major issues facing public companies of a size and operational scope similar to the Company, including contemporary governance concerns, regulatory obligations of a public issuer, strategic business planning, competition in a global economy, and basic concepts of corporate accounting and finance; (vii) live or work within 25 miles of an existing or proposed office of the Bank; (viii) have an excellent personal and professional reputation in and commitment to one or more communities in which the Company does business; (ix) serve or have served as chief executive officer or in another position of active leadership with a business or professional interest located within the market areas served by the Company and its subsidiaries; (x) have an inquiring mind, a willingness to ask hard questions, and the ability to work constructively with others; (xi) have the ability and desire to exercise independent thinking when considering matters brought before the Board, and not be unduly influenced by the opinions of others; (xii) have no conflict of interest that would interfere with his or her performance as a director; and (xiii) have the capacity and desire to represent the best interests of the shareholders as a whole and not primarily a specific interest group or constituency.

While the Board and the Governance Committee believe that every director should possess as many of the foregoing attributes as possible, the Governance Committee has not recommended, and the Board has not established, any specific group of such attributes to be considered "minimum qualifications" for serving as a director.

In considering the desirability of any particular candidate as a potential director, the Governance Committee shall also consider the contributions that a candidate can be expected to make to the collective functioning of the Board based upon the totality of the candidate's credentials, experience and expertise, the

composition of the Board at the time, and other relevant circumstances, including the fit of the individual's skills and personality with those of other directors and potential directors in building a Board that is effective, collegial and responsive to the needs of the Company.

Board Diversity, Qualifications and Experience. As currently comprised, the Board of Directors is a diverse group of individuals who are drawn from various market sectors and industry groups with a presence in the Company's markets. The Board considers diversity as one of many factors in evaluating the composition of the Board but has no set policy in this regard. Board members are individuals with knowledge and experience who serve and represent the communities we serve. Current Board representation provides backgrounds in accounting, banking, farming, manufacturing, and retail. The expertise of these individuals covers accounting and financial reporting, corporate management, strategic planning, business acquisitions, marketing, retail and small business operations. What follows is a brief description of the particular experience, attributes and qualifications of each member of the Company's Board of Directors that led to the conclusion that these individuals should serve as directors of the Company.

Morris A. Tharp is an original proponent of the Bank and has served as Chairman of the Board of the Bank and of Sierra Bancorp since their formations in 1977 and 2000, respectively. He has served on the Audit Committee for many years and also serves on the Capital Committee, as well as being an ex officio member of all other Board committees. Mr. Tharp is a native of Porterville and following his schooling, joined his father in the family business of E.M. Tharp, Inc. Over the years, he has purchased the family business and is now sole owner. For many years he has been very involved in community activities. In selecting Mr. Tharp as a nominee, the Board considered the following: His involvement in the formation of the Bank, his lengthy experience as a bank director and accumulated knowledge of the operations of the Company, his leadership qualities and management expertise gained by owning and running his own Company, and his involvement in the local community.

Albert L. Berra has been a director of the Bank and of Sierra Bancorp since their formations in 1977 and 2000, respectively. He has served on numerous committees of the Bank and the Company throughout that time and is currently Chairman of both the Audit Committee and the Compensation Committee. A native of Porterville, Dr. Berra attended the University of California, Berkeley after high school and went on to St. Louis University to complete his dental and orthodontic training. After service in the U.S. Army, Dr. Berra returned to Porterville to establish his orthodontics practice, which he has operated continuously since his return, and he also runs a farming operation in the area. Dr. Berra is involved in many community activities. Dr. Berra was selected to serve on the Board because of his involvement in the formation of the Bank, his lengthy experience as a bank director and accumulated knowledge of the operations of the Company, his experience operating his own business, his agricultural expertise, and his active involvement in the local community.

Robert L. Fields was an original proponent of the Bank and has been a director of the Bank since 1982. He has also been a director of the Company since its formation in 2000 and has served on the Compensation Committee and Senior Loan Committee for many years. Mr. Fields was born in Wisconsin, and after his military service he attended college in Los Angeles. He then worked for a jewelry store in Beverly Hills and later had the opportunity to buy his own jewelry store in Porterville. Currently retired from the jewelry business, he is managing his personal investments. During the 38 years Mr. Fields has lived in the Porterville area, he has been involved in many civic activities. In selecting Mr. Fields as a nominee, the Board considered the following: His lengthy experience as a bank director and accumulated knowledge of the operations of the Company; his marketing, financial, and operational expertise gained through operating his own business and managing investments; and his active involvement in the local community.

James C. Holly is a founding Director as well as President and Chief Executive Officer of the Bank, and has served in those same capacities for the Company since its formation in 2000. He was born and raised in Racine, Wisconsin and received both a BBA and an MBA degree from the University of Wisconsin. Mr. Holly is also a graduate of the Southwestern Graduate School of Banking at Southern Methodist University and served as a Commissioned Officer in the U.S. Army. He began his banking career with United California Bank, now Wells Fargo Bank. After ten years as a Branch Manager, Mr. Holly left United California Bank and joined in the effort to organize Bank of the Sierra of which he has been President and CEO since its inception in 1977. In selecting Mr. Holly as a nominee, the Board considered the following: His leadership capabilities; his long tenure and strong track record as president of the Bank; his deep understanding of bank lending, operations, and financial management

resulting from his banking background; his extensive network in the banking industry; his knowledge of the local economy; and his involvement in the local community.

Vincent L. Jurkovich has been a director of the Bank and of Sierra Bancorp since their formations in 1977 and 2000, respectively, and was an original proponent of the Bank. He has served on numerous committees of the Bank and the Company throughout that time and has served on the Audit and Senior Loan Committees for many years. He is a native of Porterville and owns and operates Porterville Concrete Pipe, a business which was started by his father in 1919. Mr. Jurkovich was selected to serve on the Board because of his involvement in the formation of the Bank, his lengthy experience as a bank director and accumulated knowledge of the operations of the Company, his experience operating his own business, and his ties to the local community.

Lynda B. Searcy has been a director of the Bank and of Sierra Bancorp since December 2007 and has been a valuable member of the Audit Committee since that time. She also serves on several other Board committees including the Senior Loan Committee. She received her undergraduate degree from the University of Florida and her Masters Degree in Taxation from San Joaquin College of Law. Ms. Searcy is the tax partner at McKinley Searcy Associates, an accounting and consulting firm which she joined in 1983. Ms. Searcy is deeply committed to the community, as demonstrated by her involvement with, among others, the Rotary Club of Porterville (Past President), Porterville Chamber of Commerce (Past Treasurer), Tule River Economic Development Corporation (Past Treasurer) and Tulare County Office of Education Foundation (Board Member). In selecting Ms. Searcy as a nominee, the Board considered the following: Her strong educational background, her experience as a partner and leader at her accounting and consulting firm, her deep understanding of accounting and tax issues, her financial acumen, and her strong commitment to and involvement in the local community.

Gordon T. Woods was an original proponent of the Bank and has been a director of the Bank and of Sierra Bancorp since their formations in 1977 and 2000, respectively. He attended Arizona State University and the University of Arizona on scholarship, majoring in chemical engineering, and is a U.S. Army veteran. His professional experience includes employment as a chemical engineer, as well as executive positions with divisions of Gulf Oil Company and Ford Motor Company. In 1969 he moved to Porterville and established Hydrokleen Systems, a designer and manufacturer of water and waste treatment systems, and in 1989 he established Gordon T. Woods Construction, a manufacturer and installer of commercial grade filtration systems. He is currently CEO of both of those companies. Mr. Woods has been active in numerous service organizations in Porterville and has also served on the Porterville City Council, including two years as the Mayor and two years as Mayor Pro-Tem. Mr. Woods was selected to serve on the Board because of his involvement in the formation of the Bank, his lengthy experience as a bank director and accumulated knowledge of the operations of the Company, his experience in executive positions at international companies, his success at owning and operating his own businesses, his financial acumen, and his involvement in the local community.

Consideration of Shareholder Recommendations. In considering any additional requests from outside parties to serve as directors, including parties recommended by shareholders, the Governance Committee shall follow the same principles outlined above, and shall request of any potential nominee such information, including a completed Directors' and Officers' Questionnaire of the same type completed by each of the Company's existing directors and executive officers each year in connection with the preparation of the Company's proxy materials, as the committee deems necessary to enable it to properly evaluate such person's qualifications and to be aware of any information concerning such person which might require disclosure to shareholders pursuant to the SEC rules concerning proxy statements.

A shareholder wishing to submit recommendations for director candidates for election at an annual meeting of shareholders must do so in writing by December 15th of the previous calendar year, and must include the following in the written recommendation: (i) a statement that the writer is a shareholder and is proposing a candidate for consideration; (ii) the name and contact information for the candidate; (iii) a statement of the candidate's business and educational experience; (iv) information regarding the candidate's qualifications to be a director; (v) the number of shares of the Company's stock owned either beneficially or of record by the candidate and the length of time such shares have been so owned; (vi) the written consent of the candidate to serve as a director if nominated and elected; (vii) information regarding any relationship or understanding between the proposing shareholder and the candidate; (viii) a statement that the proposed candidate has agreed to furnish to the Company all information (including a completed Directors' and Officers' Questionnaire as described above) as the Company

deems necessary to evaluate such candidate's qualifications to serve as a director; and (ix) as to the shareholder giving the notice (a) the name and address of the shareholder and (b) the number of shares of the Company's stock which are owned beneficially or of record by the shareholder.

Nominations by Shareholders. The procedures for nominating directors (as opposed to making recommendations pursuant to the above procedure), other than by the Company, are set forth in our Bylaws, which provide in pertinent part as follows:

"Nominations for election of members of the Board of Directors may be made by the Board of Directors or by any shareholder entitled to vote for the election of directors. Notice of intention to make any nominations by a shareholder shall be made in writing and shall be delivered or mailed to and received by the Secretary of the Corporation not less than one hundred twenty (120) calendar days in advance of the date corresponding to that on which the Corporation's proxy statement was released to the shareholders in connection with the previous year's annual meeting of shareholders; provided, however, that in the event that no annual meeting was held in the previous year or the date of the annual meeting has been changed by more than thirty (30) days from the date contemplated at the time of the previous year's proxy statement, notice by the shareholder must be received by the Secretary of the Corporation not later than the close of business on the later of (i) one hundred and twenty (120) days prior to such annual meeting; or (ii) ten (10) days after the date the notice of such meeting is sent to shareholders pursuant to Section 2.2(d) of these Bylaws.... Such notification shall contain the following information to the extent known to the notifying shareholder: (a) the name and address of each proposed nominee; (b) the principal occupation of each proposed nominee; (c) the number of shares of voting stock of the Corporation owned by each proposed nominee; (d) the name and residence address of the notifying shareholder and the beneficial owner, if any, on whose behalf the nomination is made; and (e) the number of shares of voting stock of the Corporation owned beneficially and of record by the notifying shareholder and such beneficial owner."

For our 2014 Annual Meeting of Shareholders, written notice of intention to make any nominations must be received no later than December 30, 2013.

Board Leadership Structure. The Company is focused on corporate governance practices, and independent Board oversight is valued as an essential component of strong corporate performance to enhance shareholder value. Our commitment to independent oversight is demonstrated by the fact that all of our directors, except our Chief Executive Officer, are independent. In addition, all of the members of the Board's Audit Committee, Compensation Committee, and Governance Committee, are independent.

The Company currently has an independent Chairman separate from the Chief Executive Officer, and our corporate governance guidelines specify that these two positions should be kept separate except in unusual circumstances. Such circumstances have not occurred in the Company's history. The Board believes it is important to maintain flexibility in its leadership structure, but firmly supports having an independent director in a board leadership position. If for any reason it were necessary for the Chairman to also hold the office of Chief Executive Officer temporarily, the Board would appoint an independent lead director to serve in an independent leadership position during this time. Having an independent Chairman or lead director enables non-management directors to raise issues and concerns for Board consideration without immediately involving management. The Chairman provides independent leadership of the Board and also serves as a liaison between the Board and senior management. The Board has determined that the current structure, an independent Chair, separate from the Chief Executive Officer, is the most appropriate structure at this time, while ensuring that, at all times, there will be an independent director in a Board leadership position.

Board Role in Risk Oversight. Risk is inherent with every business, and how well a business manages risk can ultimately determine its success. We face a number of risks, including credit risk, interest rate risk, liquidity risk, financial reporting risk, operational risk, strategic risk and reputational risk. Management is responsible for the day-to-day management of risks the Company faces, while the Board, as a whole and through its committees, particularly the Audit and Compensation Committees, has responsibility for the oversight of risk management and consideration of the Company's entire risk profile. The Board considers the most significant risks facing the

Company and the Company's general risk management strategy, to ensure that risks undertaken by the Company are consistent with the Board's objectives. In its risk oversight role, the Board of Directors has the responsibility to satisfy itself that the risk management processes designed and implemented by management are adequate and functioning as designed.

The Senior Loan Committee (comprised of directors), of which Mr. Holly is chairman, is responsible for monitoring and controlling risks associated with lending. The Committee meets twice a month, and the Chief Credit Officer presents detailed reports to the Committee at least once per month (including loan concentration reports, details on nonperforming loans and foreclosed assets, etc.).

The Audit Committee is responsible for overseeing the Company's financial reporting risk and the entire audit function, and it evaluates the effectiveness of internal and external audit efforts. It receives a status report from the Company's Internal Audit Coordinator on a monthly basis regarding the adequacy and effectiveness of internal control systems, and from the Company's Risk Manager regarding the Company's assessment of risks and overall compliance efforts.

The full Board takes responsibility for ensuring that other risks are monitored and controlled, including liquidity and interest rate risk, and the Chief Financial Officer presents quarterly reports to the Board to assist with this responsibility. In addition, to accomplish the Board's overall risk management strategy, the Board works closely, and meets frequently and as necessary, with senior management to discuss strategy and risks facing the Company. Senior management attends appropriate portions of the Board meetings and is available to address any questions or concerns raised by the Board on risk management and any other matters. The Chairman of the Board and other independent directors work together to provide strong, independent oversight of the Company's management and affairs directly and through its standing committees and, when necessary, special meetings of independent directors. While we believe that this division of responsibility is the most effective approach for addressing the risks facing our Company, we will continue to re-examine our Board leadership structure on a regular basis, recognizing that different structures may be appropriate in different situations faced by the Company.

COMMITTEES OF THE BOARD

Audit Committee

General. The Board of Directors has, among others, a standing Audit, Compliance and CRA Committee (the "Audit Committee"), composed of directors Berra (Chairman), Jurkovich, Searcy, Tharp and Woods, each of whom is an independent director as defined by the rules of Nasdaq. Each member of the Audit Committee also meets the independence criteria prescribed by applicable law and the rules of the SEC for Audit Committee membership. Each Audit Committee member meets Nasdaq's financial knowledge requirements and has substantial experience as the chief executive officer or equivalent of his or her respective business or profession. In addition, at least one member of the Audit Committee has the requisite financial sophistication required under the rules of Nasdaq for one such member. While the Board believes that each member of the Audit Committee is highly qualified to discharge his or her duties, the Board has not designated any particular member of the Audit Committee as an "audit committee financial expert" under the SEC's rules.

During the fiscal year ended December 31, 2012, the Audit Committee held a total of twelve meetings. The purpose of this committee, with respect to its audit duties, is to meet with the Company's outside auditors, in order to fulfill the legal and technical requirements necessary to adequately protect the Company's directors, shareholders, employees and depositors. It is also the responsibility of the Audit Committee to select the Company's independent registered public accounting firm and to make certain that this firm has the necessary freedom and independence to freely examine all company records. Further, the Audit Committee pre-approves all audit and permissible non-audit services to be performed by the independent public accountants, with certain de minimis exceptions. Each year the committee reviews the risk management assessment of the Company's branches, credit centers and operating units and assigns priorities for the year to have independent reviews conducted by loan, operational, information systems and compliance teams hired by the committee. The committee meets with such independent review consultants on at least an annual basis and approves the contractual basis of each engagement letter and arrangement under consideration. Further, as part of its regular monthly meeting schedule, the committee reviews annual and quarterly SEC reports prior to filing, and discusses those reports with Management and the

independent accountants as appropriate. The committee also meets with the accounting audit partner in charge of the engagement, who presents the audited consolidated financial reports to the committee upon completion of the annual engagement. The committee receives and reviews management letters and all reports of external independent firms which have been contracted to perform agreed upon procedures for the benefit of the Company and the committee. Additionally, the committee reviews all Reports of Examination prepared by regulators regarding safety and soundness, compliance, or other examinations performed by such agencies. As part of its responsibilities, the committee also reviews and approves any and all management-initiated responses to engagements conducted by independent consultant firms or regulatory agencies, prior to their submission to such firm or agency. Finally, the Audit Committee has ultimate responsibility for determining matters of interpretation with respect to the audit and accounting related portions of our Code of Ethics, and for making all final decisions concerning any disciplinary actions relating to those portions of the Code.

Audit Committee Charter. The Board of Directors has adopted an Audit Committee charter, which outlines the purpose of the Audit Committee, delineates the membership requirements and addresses the key responsibilities of the committee. The charter may be found on our web site, “www.sierrabancorp.com” on the “Investor Relations” tab under the topic “Governance Documents.”

Audit Committee Report. The Audit Committee has reviewed and discussed with management our audited consolidated financial statements as of and for the fiscal year ended December 31, 2012. The committee has discussed with our independent public accountants, which are responsible for expressing an opinion on the conformity of our audited consolidated financial statements with generally accepted accounting principles, the matters required to be discussed by Statement on Auditing Standards No. 114, including their judgments as to the quality of our financial reporting. The committee has received from our independent public accountants written disclosures and a letter as required by the Public Company Accounting Oversight Board (PCAOB) Rule 3526, and discussed with the independent public accountants the firm's independence from management and from the Company. In considering the independence of our independent public accountants, the committee took into consideration the amount and nature of the fees paid the firm for non-audit services, as described on page 28 below. The Audit Committee also reviewed management's report on its assessment of the effectiveness of the Company's internal control over financial reporting and the independent registered public accounting firm's report on the effectiveness of the Company's internal control over financial reporting.

In reliance on the review and discussions described above, the committee recommends to the Board of Directors that the year-end audited consolidated financial statements be included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012 for filing with the SEC.

Nominating and Governance Committee

General. The Board has a standing Nominating and Governance Committee (the “Governance Committee”) of which director Tharp is Chairman and all other non-employee directors are members. The Governance Committee met once during 2012. All of the members of the Governance Committee are independent directors under Nasdaq rules. The primary purposes of this committee are to (i) identify qualified candidates for director, evaluate the incumbent directors whose terms expire at each upcoming annual meeting, and recommend to the Board the director nominees for each annual meeting of shareholders; (ii) determine desired Board member skills and attributes and annually review and update the criteria for evaluating candidates for directors; (iii) annually evaluate the size and composition of the Board and each committee in light of the Company's operating requirements and existing corporate governance trends; (iv) conduct searches as needed for prospective directors with the desired skills and attributes, and conduct reviews as appropriate into the background and qualifications of director candidates; (v) consider bona fide candidates recommended by shareholders for nomination for election to the Board in accordance with the policies and procedures set forth in the Governance Committee's charter; (vi) retain and compensate third party search firms to assist in identifying or evaluating potential nominees to the Board, if necessary; (vii) assess and report annually to the Board concerning the effectiveness and performance of the Board

and Board committees as well as the effectiveness of the relationship between the Board and management, and identify areas in which the Governance Committee or management believes the Board could improve; (viii) monitor the orientation and continuing education program for directors; (ix) annually review and assess the adequacy of the Company's Corporate Governance Guidelines in light of applicable legal and regulatory requirements; (x) annually review and assess the adequacy of the Company's Code of Ethics; (xi) have ultimate responsibility for determining matters of interpretation with respect to the non-audit related portions of the Code of Ethics and for making all final decisions concerning any disciplinary actions relating to those portions of the Code; (xii) review and oversee matters relating to the independence of Board and committee members; and (xiii) periodically review the Company's succession plans and make recommendations to the Board of Directors with respect to management and director succession.

We do not pay fees to any third party to identify or evaluate or assist in identifying or evaluating potential nominees. The Board and the Governance Committee have adopted specific policies and procedures concerning the director nomination process, in accordance with which the Governance Committee considers various matters and criteria and on that basis recommends the proposed slate of nominees to the full Board. The specific procedures and criteria which the Governance Committee follows and considers in making its decisions concerning recommended nominations for directors are described above under "CORPORATE GOVERNANCE – Director Nomination Procedures, Qualifications and Related Matters."

Governance Committee Charter. The Board of Directors has adopted a Nominating and Governance Committee charter, which outlines the purpose of the Governance Committee, delineates the membership requirements and addresses the key responsibilities of the committee. The charter may be found on our web site, "www.sierrabancorp.com" on the "Investor Relations" tab under the topic "Governance Documents."

Compensation Committee

General. The Board of Directors has a Compensation Committee, of which directors Berra (Chairman), Fields, Searcy and Woods are members. The Compensation Committee met twice during 2012. All of the members of the Compensation Committee are independent directors under Nasdaq rules. The primary functions of this committee are to (i) consider and make recommendations to the Board of Directors concerning the Company's incentive compensation plans and equity-based plans in which directors and executive officers may participate; (ii) approve option grants or restricted stock awards to the Company's "Named Executive Officers" unless the Board of Directors, in its discretion, should decide to take such actions instead of the Committee with respect to any such awards; (iii) annually evaluate the performance of the Company's Chief Executive Officer (the "CEO") in light of the goals and objectives of the Company's executive compensation plans and the CEO's individual performance goals, and make recommendations to the Board of Directors concerning his compensation levels based on this evaluation; (iv) annually review and make recommendations to the Board concerning the compensation arrangements for all executive officers; (v) monitor compensation trends, solicit independent advice where appropriate, and ensure that executive compensation plans are sufficient to attract and retain high quality executives; (vi) review and make recommendations to the Board concerning any salary continuation agreements or other contractual arrangements with any officers; (vii) annually review the compensation paid to non-employee directors and make recommendations to the Board regarding such compensation, provided that no member of the Committee may act to fix his or her own compensation except for uniform compensation paid to directors for their services as a director; (viii) review executive officer compensation for compliance with applicable laws and regulations; (ix) have the authority to retain and terminate any compensation consultant to be used to assist in the evaluation of the CEO, other executive officers, and director compensation; (x) produce an annual report on executive compensation, and review and approve the Compensation Discussion and Analysis appearing in the Proxy Statement; (xi) review and make recommendations to the Board concerning salary ranges for graded personnel, as well as personnel policies and any similar documents relating to personnel matters which require Board approval; and (xii) annually review group health insurance and workers compensation insurance, and make recommendations to the Board with regard to carriers and potential changes in coverage.

Compensation Committee Charter. The Board of Directors has adopted a Compensation Committee charter, which outlines the purpose of the Compensation Committee, delineates the membership requirements and addresses the key responsibilities of the Committee. The charter may be found on our web site, "www.sierrabancorp.com" on the "Investor Relations" tab under the topic "Governance Documents."

Compensation Committee Interlocks and Insider Participation in Compensation Decisions. The persons named above were the only persons who served on the Compensation Committee during the fiscal year ended December 31, 2012. None of these individuals has ever been an officer or employee of the Company or any of its subsidiaries. None of our executive officers serves as a member of the Board of Directors or compensation committee of any other entity that has one or more executive officers serving as a member of our Board of Directors or our Compensation Committee.

Compensation Committee Report. In performing its oversight role, the Compensation Committee has reviewed and discussed the Compensation Discussion and Analysis included in this Proxy Statement with management. Based on such review and discussion, the Compensation Committee recommended to the Board of Directors that the Compensation Discussion and Analysis be included in this Proxy Statement to be filed on Schedule 14A with the SEC.

In addition, the Compensation Committee reviewed the compensation structure for employees of the Company and concluded that none of the elements comprising such compensation encourages behavior that would lead to excessive risks for the Company.

Submitted by the Compensation Committee of the Board of Directors.

Albert L. Berra, Chairman
Robert L. Fields
Lynda B. Scearcy
Gordon T. Woods

COMPENSATION DISCUSSION AND ANALYSIS

Compensation Philosophy and Objectives

Our primary objectives with respect to executive compensation are to attract and retain the most talented and dedicated executives possible, and to align their interests with those of our shareholders. To that end, we strive to implement compensation plans that are competitive relative to similar publicly-traded banking institutions, and to maintain a substantial level of at-risk compensation for our executives that is, in part, dependent upon the Company's financial performance. Compensation for our Named Executive Officers consists primarily of the following elements, which are discussed in greater detail below: base salary; an annual formulary incentive bonus in the case of the CEO, and annual discretionary bonuses based on performance guidelines for the other Named Executive Officers; and long-term incentive awards, including stock option grants, salary continuation agreements, and split-dollar insurance benefits. The Compensation Committee evaluates and adjusts the weighting of these components relative to overall compensation from time to time to support Company objectives. The Compensation Committee and the Board also believe it is important to ensure that the compensation of the CEO is equitable and reasonable in relation to that of the other Named Executive Officers, and that the compensation of the other Named Executive Officers is reasonable in relation to each other given their respective duties and responsibilities, experience, and certain other relevant factors. We do not have employment agreements with our Named Executive Officers, but we do provide salary continuation agreements as described below.

Process for Making Compensation Decisions

Roles of the Compensation Committee. The Compensation Committee reviews executive compensation, and makes recommendations to the Board with regard to appropriate target compensation levels and compensation component weightings for all of the Named Executive Officers in alignment with our compensation philosophy. Compensation includes the primary components listed in the previous paragraph, as well as any perquisites, or special or supplemental benefits. In making its recommendations to the Board, the Compensation Committee evaluates compensation for comparable positions at peer institutions, the relative financial performance of the Company, recommendations of the CEO (in the case of the other Named Executive Officers), internal compensation fairness, the past performance and future goals of the CEO, and independent analysis performed by the committee. The specific factors considered are detailed below under "Targeted Compensation" and "Elements of Executive

Compensation.” The Compensation Committee has the authority to engage consultants and request other information as needed to fairly measure and evaluate the overall compensation of the Named Executive Officers. The Compensation Committee did not retain a consultant in 2012; rather, it directed Company personnel to utilize publicly available data to update a peer compensation study completed for the Company in a prior year by a professional compensation consulting firm.

Role of the Chief Executive Officer. The CEO annually reviews the performance of the Named Executive Officers other than himself, and presents his conclusions and recommendations based on those reviews to the Compensation Committee. In 2012, the CEO considered the updated peer compensation study and the stated objectives of the Compensation Committee and the Board in formulating his recommendations for base salary adjustments, target bonus amounts, and equity awards. The Compensation Committee can exercise its discretion in modifying the CEO’s recommendations before making its recommendations to the Board, but generally accepts them as presented. The CEO is not a member of the Compensation Committee, but is invited to attend meetings of the committee as necessary to provide input and recommendations on compensation for the other Named Executive Officers. The CEO is not involved with any aspect of determining his own pay.

Targeted Compensation

As discussed above, the Compensation Committee utilized an updated peer compensation study to assist in establishing targeted levels and components of compensation for the Named Executive Officers. The peer group consisted of 15 publicly-traded bank holding companies which provide general banking services, located primarily in California, with total assets ranging between 60% and 180% of those of the Company (the “Peer Group”).¹² The Peer Group will be subject to modification for future studies to ensure that it continues to meet the desired comparison criteria. The study provides an analysis of base salary, short-term incentives (including incentive bonuses), and long-term incentives (including the value of stock option awards and increases in pension values) (collectively, “Total Direct Compensation”), for Peer Group officers most closely equivalent to the Named Executive Officers for whom compensation information is publicly disclosed.

One element in determining targeted Total Direct Compensation for the Named Executive Officers was the Company’s performance relative to peer institutions. For the peer study conducted in the fourth quarter of 2012, trailing twelve-month data was used for performance ratios and September 30, 2012 data was used for period-end comparisons. The Company had bottom-quartile return on average assets and return on average equity among peer banks, due in part to higher credit costs associated with more aggressive actions taken to resolve nonperforming assets. Our total risk-based capital ratio was the highest of any peer in the study, however, and our net interest margin and overhead efficiency ratio were better than average.

Based on the Company’s financial performance relative to peer institutions, information in the peer compensation study, recommendations of the CEO (in the case of the other Named Executive Officers), individual performance, and independent analysis performed by the Compensation Committee, the committee targeted the Peer Group median for Total Direct Compensation as an appropriate level, in general, for Total Direct Compensation for the Named Executive Officers. However, after applying the overriding principle of internal equity and in consideration of the variability in short-term incentive compensation payments by the Company and its peer financial institutions in the past few years, Total Direct Compensation established by the Compensation Committee for an individual Named Executive Officer might exceed or fall short of the target. With regard to the components of Total Direct Compensation, the goal of the Compensation Committee was to maintain a substantial level of “at

¹² The Peer Group consists of the following bank holding companies: Bank of Commerce Holdings, Redding, California; Bank of Marin Bancorp, Novato, California; Bridge Capital Holdings, San Jose, California; Central Valley Community Bancorp, Fresno, California; Farmers & Merchants Bancorp, Lodi, California; First California Financial Group, Inc., Westlake Village, California; First PacTrust Bancorp, Irvine, California; Heritage Commerce Corp, San Jose, California; Heritage Oaks Bancorp, Paso Robles, California; North Valley Bancorp, Redding, California; Pacific Mercantile Bancorp, Costa Mesa, California; Pacific Premier Bancorp, Inc., Costa Mesa, California; Provident Financial Holdings, Inc., Riverside, California; Trico Bancshares, Chico, California; and Washington Banking Company, Oak Harbor, Washington.

risk” compensation while striving to ensure that neither base salary nor potential short-term incentive compensation are substantially below the Peer Group median.

The aforementioned variables being duly analyzed and considered, the Compensation Committee came to a unanimous conclusion concerning appropriate targets for base salaries, short-term incentives, and long-term incentives for the Named Executive Officers. The Compensation Committee then presented its recommendations to the Board, which unanimously approved those recommendations. The ultimate result was the determination that a 6% increase in base salaries and a corresponding adjustment to short-term incentive potential was appropriate for the Named Executive Officers, effective January 1, 2013. The CEO declined any increase in compensation, thus his salary and bonus potential remain the same. Effective the beginning of 2012, a 4.7% adjustment to the base salary and a corresponding increase in short-term incentive potential were approved for the Chief Banking Officer, in order to bring his cash compensation closer to the Peer Group median, but there were no increases in base salaries or bonus targets for the other Named Executive Officers. Likewise, there were no increases in base salaries or bonus targets for any of the Named Executive Officers for 2011. The number of stock options granted to each Named Executive Officer in the fourth quarter of 2012 was 5,000, with immediate vesting of such options for the CEO and Chief Credit Officer, and 5-year graded vesting for the CFO and the Chief Banking Officer. Stock option grants for 2013 will likely be considered in the fourth quarter.

Elements of Executive Compensation

Base Salary. Base salaries for our executives are dependent on the scope of their responsibilities, taking into account competitive market compensation paid by similar companies for comparable positions. Generally, we believe that executive base salaries should be targeted so as not to be substantially below the 50th percentile of the Peer Group for executives in similar positions with similar responsibilities. Base salaries are reviewed annually, and adjusted as necessary to realign them with market levels after taking into account individual responsibilities, performance and experience. This review generally takes place in the fourth quarter, with an effective date of January 1st for any salary adjustments that might be approved.

Discretionary Annual Bonuses for Named Executive Officers Other than the CEO. The Board of Directors has the authority to award discretionary annual bonuses to the Named Executive Officers based on the recommendations of the Compensation Committee. For Named Executive Officers other than the CEO, the Board has adopted a Graduated Incentive Pay-out Plan that is dependent on individual performance, as determined by the CEO, the Compensation Committee and the Board; and the Company’s financial performance relative to Board-approved targets. Earnings targets and individual performance goals are carefully established to provide a challenge to the Named Executive Officers, while at the same time being realistically achievable without engaging in activities with excessive risk. The Board, based on the recommendations of the Compensation Committee, establishes the potential levels for incentive bonuses at the start of each fiscal year. Bonuses for any given calendar year are typically accrued during the year for which they are applicable but are not paid until March of the following year, subsequent to our receipt of the final audit report and the review and approval of bonus recommendations by the Board of Directors. For 2012, the potential bonus level for Named Executive Officers other than the CEO was 50% of base salary. However, the plan also specifies that these potential levels are guidelines only, and that all payments made pursuant to the plan are ultimately made at the discretion of the Board of Directors. The Compensation Committee makes recommendations to the Board concerning the appropriate discretionary bonuses for the Named Executive Officers subject to this plan, and the Board approves the final bonus amounts. The earnings targets for 2012 required the Company to achieve net income of at least \$4.25 million, which would have resulted in potential annual bonus payments of 50% of total target amounts, with the payout ratio increasing incrementally up to a potential full bonus payout if the Company earned at least \$8.5 million in net income. Based solely on the Company’s net income relative to the earnings target in 2012, the Company’s Named Executive Officers other than the CEO qualified for discretionary bonuses equivalent to 96% of their maximum potential for short-term incentive pay for the year. However, in light of other events, namely a year-end increase in nonperforming assets, the payout ultimately approved for bonuses for those officers for 2012 was reduced to 74% of total targeted amounts. Net income was 97% of target in 2011, so Named Executive Officers other than the CEO were paid bonuses equivalent to 97% of their maximum bonus potential in 2011. Net income was 76% of target in 2010, so Named Executive Officers other than the CEO were paid bonuses for 2010 equal to 76% of the bonus potential. In 2009 and 2008, net income did not reach the minimum thresholds required for discretionary short-term incentive payments and no bonuses were paid to Named Executive Officers.

CEO Incentive Bonus. The bonus for the CEO is determined by a separate agreement dating back to the inception of the Bank, which specifies an annual bonus of 5% of the Company's pre-tax profits up to a maximum of 100% of his base salary. Based on the Company's pre-tax profit in 2012 the CEO qualified for an annual incentive bonus of \$392,050, but voluntarily reduced the payout for 2012 to \$323,232. The CEO received an annual incentive bonus of \$417,216 for 2011, which equates to 5% of pre-tax profit but is only 96% of the base salary cap. Based on pre-tax income in 2010 the CEO was eligible for an annual bonus of \$356,486, but voluntarily reduced the payment to \$270,902. In view of the Company's 2009 and 2008 performance compared to earnings targets, and the fact that the other Named Executive Officers did not receive any discretionary bonuses for those years due to such performance, the CEO declined to accept the incentive bonuses to which he was otherwise entitled for the 2009 and 2008 calendar years.

Equity Incentives and Stock Ownership. Our 2007 Stock Incentive Plan authorizes the Board of Directors or the Compensation Committee to grant directors and employees of the Company restricted stock awards and/or options to purchase shares of our common stock. We have not issued, nor do we currently have plans to issue, restricted stock awards. Rather, we expect to continue to use stock options as our primary long-term equity incentive vehicle, as has been our past practice. The Board and the Compensation Committee feel that stock options align the interests of executives with those of shareholders, provide a balance to the shorter-term nature of base salary and discretionary annual bonuses, and are the best form of equity compensation from the standpoint of encouraging executive retention.

For the past few years we have made, and in the future we expect to continue to make, annual stock option grants to most officers of the Company, although the grants are given at the discretion of the Board of Directors. In determining the number of stock options to be granted, the Board takes into account the officer's position, scope of responsibility, and ability to impact profits and shareholder value. These grants generally have five-year vesting periods, although stock option grants are immediately vested for directors, and for certain officers who have a minimum number of years of service and a potential retirement date within five years of the grant date. The strike price for options granted in 2012 was the stock closing price on the date of the grant. Stock options have typically been granted during open trading windows (i.e., at times when directors and executive officers are permitted to trade personally) pursuant to the Company's Insider Trading Policy, and no options may be granted to anyone if material nonpublic information is available to the Board at the proposed time of grant. Additional details concerning the Plan and options granted during 2012 and held at December 31, 2012 by the Named Executive Officers are set forth below under "EXECUTIVE OFFICER AND DIRECTOR COMPENSATION – Grants of Plan-Based Awards" and "Outstanding Equity Awards at Fiscal Year End." We do not have requirements for our executives with regard to specific levels of stock ownership.

Salary Continuation Agreements. To encourage our Named Executive Officers to remain with the Company, we have entered into salary continuation agreements with them that provide annual benefits of up to \$100,000 per year for periods of up to 15 years after retirement. The benefit amounts and terms are determined by the individual's position and scope of responsibility, as well as the amount of the annual expense accrual required to accumulate the appropriate liability for payment obligations. This benefit becomes fully vested and payable upon a change in control if followed by resignation or other termination of employment. The material terms of the salary continuation agreements for each of the Named Executive Officers are described below under "EXECUTIVE OFFICER AND DIRECTOR COMPENSATION – Potential Payments Upon Termination or Change in Control – Salary Continuation and Split Dollar Agreements." The Board and the Committee have concluded that providing these agreements is competitively necessary as virtually all comparable institutions offer similar agreements to their senior officers.

Split-Dollar Life Insurance. We also have split-dollar life insurance agreements with our Named Executive Officers. In connection with these agreements, the Company purchased life insurance policies on the lives of the executives. The Company owns the insurance policies, is entitled to their cash surrender value, and is responsible for paying the cost of the insurance. In the event of the executive's death, the split-dollar agreements provide that a portion of the policy proceeds shall be paid to the executive's designated beneficiaries. The split-dollar amount represents, for the most part, the present value of the salary continuation payments referenced in the previous paragraph. In some cases, but not all, the split-dollar allocation continues after the executive's retirement. The executive is responsible for taxes on the imputed value of split-dollar benefits provided under all agreements entered into in 2005 or later. For some earlier-dated agreements, the Company pays an annual bonus sufficient in

amount for the executive to reimburse the Company for the imputed value of the insurance and pay income taxes on the bonus. The Company also provides a small amount of additional life insurance coverage to the Named Executive Officers under its group term life insurance program, which is provided to all employees.

Deferred Compensation Plan. Executive officers are eligible to participate in a non-qualified deferred compensation plan, the “409A Plan,” whereby they can elect to defer all or part of their salary and/or bonus for payment after retirement or termination of employment. Deferred compensation amounts are not taxed until received by the participant. Deferred compensation balances are unsecured obligations of the Company, and are credited/charged by the Company for gains/losses pegged to participant-directed investment allocations. Investment allocation options include equity funds, real estate funds, bond funds and a fixed income alternative. The Company offsets deferred compensation gains/losses with tax-advantaged losses/income on separate account Company-owned life insurance that is invested in options similar to those selected by deferred compensation plan participants. No above-market or preferential earnings are provided by the Company with respect to these plans. Further details on the 409A Plan are described below under “EXECUTIVE OFFICER AND DIRECTOR COMPENSATION – Deferred Compensation.”

Perquisites and Other Programs. The Company provides its executive officers with perquisites and personal benefits that it believes are reasonable and consistent with its overall compensation strategy to attract and retain qualified executives and to facilitate the performance of their duties. The Company maintains a 401(k) employee savings and retirement plan, which is offered to all employees. After the end of each calendar year a discretionary contribution to the 401(k) plan is considered by the Board of Directors, which has typically resulted in a Company contribution to plan participants in the range of 50% to 75% of the lesser of the participant’s actual contribution or 6% of the participant’s gross cash compensation during the preceding calendar year. Other benefits available to all employees include medical, dental, and vision insurance. Executive officers may also be provided club memberships, an automobile allowance, a mileage reimbursement, use of a Company-owned automobile, use of a cell phone, and/or a cell-phone allowance. Reportable benefits totaling \$10,000 or more are described in the Summary Compensation Table below.

Conclusion. The Compensation Committee intends to continue to link executive compensation to corporate performance and shareholder return, while avoiding forms of compensation that might encourage behavior which could have an adverse impact on the Company. The various pay vehicles offered are balanced to compensate our executives for current performance and provide motivation for them to contribute to our overall future success, and we believe that our executive compensation policies and programs serve the best interests of our Company and our shareholders.

EXECUTIVE OFFICER AND DIRECTOR COMPENSATION

Summary Executive Compensation Information

The following table sets forth certain summary compensation information with respect to our Chief Executive Officer, our Chief Financial Officer, and our only other executive officers who served during 2012 (the "Named Executive Officers"):

Name and Principal Position	Year	Salary ¹³	Bonus ¹⁴	Non-Equity Incentive Plan Compensation ¹⁴	Option Awards ¹⁵	Changes in Pension Value and Non-Qualified Deferred Compensation Earnings ¹⁶	All Other Compensation ¹⁷	Total
James C. Holly	2012	\$436,800	–	\$323,232	\$20,007	–	\$65,561	\$845,600
President and Chief Executive Officer	2011	436,800	–	417,216	18,380	\$ 129	62,773	935,298
	2010	436,800	–	270,902	21,062	–	61,928	790,692
Kenneth R. Taylor	2012	228,800	\$ 84,656	–	20,983	35,108	22,202	391,749
Executive Vice President and Chief Financial Officer	2011	228,800	110,968	–	19,268	31,756	9,889	400,681
	2010	228,800	86,944	–	16,850	28,580	9,301	370,475
James F. Gardunio	2012	197,600	73,112	–	20,983	61,953	20,768	374,416
Executive Vice President and Chief Credit Officer	2011	197,600	95,836	–	18,380	58,355	8,657	378,828
	2010	197,600	75,088	–	16,850	54,863	7,197	351,598
Kevin J. McPhail	2012	185,000	68,450	–	20,983	15,961	19,549	309,943
Executive Vice President and Chief Banking Officer	2011	176,800	85,748	–	19,268	15,033	7,548	304,397
	2010	176,800	67,184	–	16,850	14,156	5,566	280,556

¹³ Includes portions of these individuals' salaries which were deferred pursuant to the Company's 401(k) Plan or 409A Plan. The 401(k) Plan permits all employees contribute a portion of their annual compensation on a pre-tax basis. To ensure that the 401(k) Plan maintains its qualified status, highly compensated employees are limited to contributions of approximately 6% of their annual compensation on a pre-tax basis. Annual employer contributions may also be made to the 401(k) Plan at the discretion of the Board of Directors, for distribution to plan participants as a specified percentage of the lesser of their individual contribution or 6% of their annual compensation. The recipients of employer matching contributions are not vested in those amounts during their first year of employment but vest at the rate of 20% per year thereafter, so that by the end of their sixth year of employment they are fully vested in all employer contributions. Employer matching contributions are included in the table above under "All Other Compensation." Highly compensated employees are also allowed to defer up to 100% of their annual compensation pursuant to a non-qualified 409A Plan, although no matching employer contributions are made to that plan. The 409A Plan is described below under "Deferred Compensation."

¹⁴ The amounts reflected in the Bonus column for the Named Executive Officers other than the CEO are based on the Company's Graduated Incentive Payout Plan. As discussed in the Compensation Discussion and Analysis, the Graduated Incentive Payout Plan does not specify fixed incentive bonus amounts, but rather establishes guidelines on the basis of which the Compensation Committee and the Board may award discretionary bonuses. Portions of the amounts in the Bonus column may have been deferred pursuant to the Company's 401(k) Plan or 409A Plan. See "Deferred Compensation." The non-equity incentive plan amount for the CEO is based on his separate agreement with the Board whereby he is entitled to receive an annual bonus of 5% of the Company's pre-tax profits, up to a maximum of 100% of his base salary. The CEO's non-equity incentive plan compensation for 2011 represented 5% of pre-tax profits in 2011. The CEO was entitled to annual bonuses of \$392,050 for 2012 and \$369,000 for 2010 based on the same formula, but he voluntarily accepted the lower amounts reflected in the table for those years.

¹⁵ Amounts in the "Option Awards" column represent the aggregate grant date fair values of options awarded during the year, as computed pursuant to FASB accounting standards on stock options. The assumptions used in valuing these option awards in 2012 are detailed in Note 2 to the consolidated financial statements contained in our Annual Report to Shareholders for 2012.

(Footnotes continued on following page.)

Grants of Plan-Based Awards

The following table furnishes information regarding stock options granted to the Named Executive Officers during 2012, which were the only plan-based equity awards granted to the Named Executive Officers in 2012.

Name	Grant Date	Estimated Possible Payouts Under Non-Equity Incentive Plan Awards ¹⁸			Number of Shares Underlying Options Granted in 2012	Exercise or Base Price ¹⁹	Grant Date Fair Value ²⁰
		Threshold	Target	Maximum			
James C. Holly	11/15/2012	–	\$392,050	\$436,800	5,000	\$10.21	\$20,007
Kenneth R. Taylor	11/15/2012	–	–	–	5,000	10.21	20,983
James F. Gardunio	11/15/2012	–	–	–	5,000	10.21	20,983
Kevin J. McPhaill	11/15/2012	–	–	–	5,000	10.21	20,983

(Certain footnotes continued from previous page.)

¹⁶ Represents the salary continuation plan accruals, i.e., the total change for each year in the accrued liability balance established with respect to the benefit obligation associated with the post-retirement salary continuation agreement of each Named Executive Officer. See “Pension Benefits” and “Potential Payments Upon Termination or Change in Control” for more information about the salary continuation agreements. There were no above-market or preferential earnings on non-qualified deferred compensation accounts. The Company maintains an account for each deferred compensation plan participant that includes deferred compensation and any earnings thereon. Each account is credited (or charged) in an amount equal to the average account balance multiplied by returns (positive or negative) on participant-designated indices. The indices are based on funds available to the investing public, including a money market fund, a bond fund, a real estate fund, and numerous equity and hybrid funds. For more information see “Deferred Compensation.”

¹⁷ The figures in the “All Other Compensation” column include: a \$12,000 per year car allowance provided to Named Executive Officers other than the CEO; employer contributions to these individuals’ accounts pursuant to the 401(k) Plan; imputed term life insurance premiums for Messrs. Gardunio and McPhaill; and cash bonuses for Messrs. Holly and Taylor to reimburse them for the imputed value and tax costs associated with their split dollar life insurance benefits. Such bonus amounts were \$29,861, \$27,073 and \$24,578 for Mr. Holly for 2012, 2011 and 2010, respectively. For Mr. Holly only, also includes director fees of \$28,200, \$28,200 and \$30,000 for 2012, 2011 and 2010, respectively. All other amounts described herein, as well as any other perquisites and personal benefits provided to the Named Executive Officers in the years reported, were less than \$10,000 per individual per year.

¹⁸ Mr. Holly was entitled to a non-equity incentive plan award of \$392,050 for 2012, based on an agreement which stipulates an annual bonus of 5% of the Company’s pre-tax profits up to a maximum of 100% of his base salary. See “COMPENSATION DISCUSSION AND ANALYSIS – CEO Incentive Bonus.” However, he voluntarily accepted the reduced amount of \$323,232 which is reflected as “Non-Equity Plan Compensation” in the Summary Compensation Table above.

¹⁹ The exercise price for all options granted in 2012 is the closing market price of the Company’s stock on the grant date, which the Board of Directors has determined to be substantially equivalent to the fair market value of the shares.

²⁰ Represents the aggregate grant date fair value as computed pursuant to FASB accounting standards on stock compensation. The assumptions used in valuing these option awards are detailed in Note 2 to the consolidated financial statements contained in our Annual Report to Shareholders for 2012.

Outstanding Equity Awards at Fiscal Year-End

The following table sets forth outstanding stock options, which were the only form of equity awards held by the Named Executive Officers as of December 31, 2012:

Name	Number of Shares Underlying Unexercised Options – Exercisable	Number of Shares Underlying Unexercised Options – Unexercisable ²¹	Option Exercise Price ²²	Option Expiration Date
James C. Holly	2,500	–	\$31.70	11/16/16
	2,500	–	26.58	11/15/17
	2,500	–	19.19	11/20/18
	5,000	–	8.80	11/19/19
	5,000	–	10.73	11/18/20
	5,000	–	10.58	11/17/21
	5,000	–	10.21	11/15/22
Kenneth R. Taylor	2,000	–	31.70	11/16/16
	2,000	–	26.58	11/15/17
	1,600	400	19.19	11/20/18
	2,400	1,600	8.80	11/19/19
	1,600	2,400	10.73	11/18/20
	1,000	4,000	10.58	11/17/21
	–	5,000	10.21	11/15/22
James F. Gardunio	25,000	–	22.74	04/21/15
	2,000	–	26.58	11/15/17

	1,000	4,000	10.58	11/17/21
	–	5,000	10.21	11/15/22

Option Exercises and Stock Vested

No stock options were exercised by the Named Executive Officers during 2012. No information is provided concerning stock awards, as the Named Executive Officers did not have any stock awards as of December 31, 2012.

²¹ All outstanding options vest at the rate of 20% on each grant date anniversary until fully vested, except for all options granted to the CEO, and the options granted to the Chief Credit Officer in 2012 and 2011, which vested immediately upon grant. Options are for terms of ten years. Unvested options accelerate in the event of a change in control of the Company, and options terminate in the event of termination of employment, with the time period for exercise of the vested portion depending on the reason the service ceases. In the case of termination for cause, the options expire immediately.

²² The exercise price for all options is the fair market value on the date of grant, as determined by the Board of Directors in accordance with the terms of the stock incentive plan. For options granted in 2012, the closing price of the Company's stock on the grant date was determined to be substantially equivalent to the fair market value of the options. However, as there is a relatively limited trading market for the Company's stock and the price is therefore subject to fluctuation, the Board used the weighted average price for all trading days in the 30 calendar days immediately preceding the grant date to determine the fair market values of stock options granted prior to 2012.

Pension Benefits

The table below shows the present value of accumulated benefits payable to each of the Named Executive Officers under his Salary Continuation Agreement. Detailed information concerning the material provisions of such agreements appears below under “Potential Payments Upon Termination or Change in Control – Salary Continuation and Split Dollar Agreements.”

Pension Benefits

Name	Plan Name	Number of Years Credited Service ²³	Present Value of Accumulated Benefit ²⁴	Payments During Last Fiscal Year
James C. Holly	Salary Continuation Agreement	n/a	\$992,596	–
Kenneth R. Taylor	Salary Continuation Agreement	n/a	215,315	–
James F. Gardunio	Salary Continuation Agreement	n/a	381,795	–
Kevin J. McPhaill	Salary Continuation Agreement	n/a	82,872	–

Deferred Compensation

The Company has a 409A Non-Qualified Deferred Compensation Plan (the “409A Plan”), pursuant to which the Named Executive Officers among others may elect to defer a portion of their annual compensation. The Company does not make contributions to the plan. The 409A Plan is unfunded for tax purposes and for purposes of ERISA. The Company maintains an account for each 409A Plan participant that includes deferred compensation and any earnings thereon. All amounts in these accounts represent unsecured liabilities of the Company. Each account is credited (or charged) every calendar quarter in an amount equal to the average account balance multiplied by returns (positive or negative) on participant-designated indices. The indices are based on funds available to the investing public, including a money market fund, a bond fund, a real estate fund, and numerous equity and hybrid funds. There were no above-market or preferential earnings on the 409A Plan accounts, and no employer matching credits or performance incentive credits have been added to any account. The Company hedges participant earnings with income from Company-owned life insurance that is invested in the same funds that participant-directed indices are based upon, and with deferred tax assets associated with participant accounts. Deferral amounts are selected by the participant in accordance with applicable legal requirements. Payouts may be either lump sum or paid out over time upon retirement or other termination of employment, at the election of the participant subject to various legal requirements and restrictions.

The following table sets forth information concerning activity under the 409A Plan for the Named Executive Officers as of and for the fiscal year ended December 31, 2012:

²³ Benefits due under the salary continuation agreements are set forth in each agreement and are not determined by a formula based on years of service.

²⁴ Represents the cumulative amount accrued with respect to the salary continuation agreements for each of the Named Executive Officers as of December 31, 2012. Monthly charges are made to accrue for these post-retirement benefit obligations in a systematic and orderly way using an appropriate discount rate, such that the accrued liability balance at the participant’s retirement date will be equal to the then present value of the benefits promised under the salary continuation agreement. During 2012, we used a 6% discount rate.

Nonqualified Deferred Compensation

Name	Executive Contributions in Last Fiscal Year ²⁵	Company Contributions in Last Fiscal Year	Aggregate Earnings in Last Fiscal Year ²⁶	Aggregate Withdrawals/ Distributions	Aggregate Balance at Last Fiscal Year-End ²⁷
James C. Holly	–	–	\$105,355	–	\$702,148
Kenneth R. Taylor	–	–	8,342	–	212,181
James F. Gardunio	\$46,112	–	69,187	–	538,853
Kevin J. McPhaill	–	–	953	–	6,249

Potential Payments Upon Termination or Change in Control

The following discussion summarizes the compensation and benefits payable to the Named Executive Officers in the event of a termination of employment under various circumstances, assuming that a termination of employment had occurred on December 31, 2012. The benefits which would be triggered in the event of a change in control of the Bank's common stock include: (i) acceleration of unvested stock options; and (ii) accelerated vesting and payment of benefits under salary continuation agreements. For the salary continuation benefits to be triggered, the individuals must also either resign or be terminated following the change in control.

If a change in control had occurred on December 31, 2012, any unvested stock options for the Named Executive Officers would have become vested and exercisable. Based on the closing market price of \$11.43 per share for the Company's stock on December 31, 2012, the intrinsic value of in-the-money unvested options totaled \$15,388 for Mr. Taylor, \$5,888 for Mr. Gardunio and \$15,388 for Mr. McPhaill as of that date. Under their salary continuation agreements, each of the Named Officers would have received the following annual benefits beginning in 2013, assuming a change in control and related termination or resignation as of December 31, 2012: Messrs. Holly, Taylor and McPhaill, \$100,000 per year for fifteen years; and Mr. Gardunio, \$75,000 per year for ten years. Because Mr. Holly had already reached his retirement age prior to December 31, 2012, this does not represent an additional benefit resulting from a change in control.

If any of the Named Executive Officers had been terminated on December 31, 2012 without cause, or had left the Company due to death or disability, they would have been vested in a portion of their retirement benefits under their salary continuation agreements. Mr. Holly reached his normal retirement age under his agreement in August 2006, so would have received the full \$100,000 per year for fifteen years in the event of termination for any reason (other than cause) at December 31, 2012. If Mr. Taylor, Mr. Gardunio, or Mr. McPhaill had left the Company at December 31, 2012 due to disability or termination without cause, they would have received their accrued liability balances of \$215,315, \$381,795 and \$82,872, respectively. None of these three individuals would have received any benefits in the event of voluntary termination. The material terms of the salary continuation agreements with the Named Executive Officers, including the payments due under the various circumstances described in this paragraph, are described in more detail below.

²⁵ These amounts were included for 2012 in the Salary and/or Bonus columns of the Summary Compensation Table in "Summary Executive Compensation Information" above.

²⁶ These amounts were not included in the Summary Compensation Table as none of the earnings on the accounts were above-market or preferential.

²⁷ The balances in these accounts represent a combination of cumulative participant contributions and earnings or losses thereon. The following balances represent cumulative participant contributions only, through December 31, 2012 (including any Executive Contributions in Last Fiscal Year in the table above, as well as any amounts for prior years that are included in the Summary Compensation Table for the year earned and deferred): Mr. Holly: \$315,051; Mr. Taylor: \$150,821; Mr. Gardunio: \$419,633; and Mr. McPhaill: \$4,800.

Salary Continuation and Split Dollar Agreements. The Company entered into a salary continuation agreement with Mr. Holly in October 2002 which provides an annual benefit of \$100,000 per year for fifteen years upon retirement or at age 66 (whichever is later), subject to certain conditions. Mr. Holly reached his normal retirement age under his agreement in August 2006, so will receive the full \$100,000 per year for fifteen years in the event of any termination of employment except in the case of termination for cause. The Company also entered into a split dollar agreement with Mr. Holly in October 2002 (amended in July 2003) which provides for a lump sum death benefit in the amount of approximately \$978,000 in the event of death prior to retirement while still employed by the Bank. In the event of death after retirement, Mr. Holly's beneficiary shall receive the full lump sum death benefit under the split dollar agreement in addition to all retirement benefits previously paid under the salary continuation agreement at the time of death, which retirement benefits shall cease at that time.

The Company also entered into a salary continuation agreement with Mr. Taylor in October 2002 (amended in January 2007), which provides an annual benefit of \$100,000 per year for fifteen years upon retirement or at age 65 (whichever is later), subject to certain conditions. No benefits are payable in the event of voluntary termination prior to age 65 or termination for cause. In the event of disability or termination without cause, Mr. Taylor would be entitled to a lump sum payment equal to the amount accrued on the Company's books for such liability as of the end of the month preceding termination or disability. The accrual balance at December 31, 2012 is shown in the Pension Benefits table above. This amount can change depending on the current discount rate, but by current estimates will increase to approximately \$657,000 at the end of December 2020, and will be \$992,000 when the benefit is fully vested and accrued in August 2024. In the event of a change in control of the Bank's common stock, Mr. Taylor will be fully vested in his retirement benefits if he resigns or is terminated for any reason other than cause, and will begin to receive such benefits within the month following termination of his employment (subject to the requirements of Section 409A of the Internal Revenue Code), rather than at age 65. The Company also entered into a split dollar agreement with Mr. Taylor in October 2002 which provides for certain payments in the event of death, in addition to the death benefit provided in his salary continuation agreement. The two agreements together provide for a combined lump sum death benefit in the amount of approximately \$992,000 in the event of death prior to retirement while still employed by the Bank. In the event of death after retirement or other termination of employment where Mr. Taylor was eligible for salary continuation payments, Mr. Taylor's beneficiary will receive a lump sum death benefit of approximately \$658,000 under his split dollar agreement. Once a death benefit is paid, the Company is released from its obligation to pay any other retirement benefits that might otherwise be due under Mr. Taylor's salary continuation agreement.

The Company also entered into a salary continuation agreement and a split dollar agreement with Mr. Gardunio in August 2005 containing the same material terms as Mr. Taylor's agreements, except that the amount of his annual benefit is \$75,000; it will be paid for a period of ten rather than fifteen years; and the amount of the pre-retirement and post-retirement lump sum death benefit, which is provided under the split dollar agreement only, is approximately \$581,000. In the event of disability or termination without cause, Mr. Gardunio's lump sum accrual balance as of December 31, 2012 is shown in the Pension Benefits table above. By current estimates his accrual balance is expected to increase every month until August 2015 when it reaches the fully-accrued amount of approximately \$566,000, which is the net present value of \$75,000 per year for ten years discounted at an annual rate of 6%.

The Company also entered into a salary continuation agreement, but no split dollar agreement, with Mr. McPhaill in January 2007 containing the same material terms as Mr. Taylor's salary continuation agreement, except that Mr. McPhaill's salary continuation agreement provides a lump sum death benefit of approximately \$992,000 in the event of death prior to retirement while still employed by the Bank; and in the event of death after retirement or other termination of employment, there will be no lump sum death benefit but his beneficiary will receive, or continue to receive, the same benefits under his salary continuation agreement to which he was entitled at the time of his death. In the event of disability or termination without cause, Mr. McPhaill's lump sum accrual balance would be approximately \$252,000 at the end of 2020 and \$615,000 at the end of 2030, subject to change depending on the discount rate. This benefit will be fully accrued in May 2037, at which time it is estimated to be \$992,000, representing the net present value of \$100,000 per year for fifteen years discounted at an annual rate of 6%. The accrual balance at December 31, 2012 is shown in the Pension Benefits table above.

The Company accrues monthly for post-retirement benefit obligations under the salary continuation agreements in a systematic and orderly way using an appropriate discount rate. The Company also purchased single premium life insurance policies when the salary continuation agreements were originally established, in part to provide tax advantaged income to offset the annual cost of the accruals. These policies name the Company as beneficiary and the proceeds or cash surrender value of the policies will ultimately reimburse the Company for the original investments in the policies, as well as for payments made under the salary continuation agreements. The Company may purchase additional life insurance from time to time such that the aggregate amount is appropriate in relation to the accruals and ultimate obligations under the salary continuation agreements. The amounts expensed for the Named Executive Officers for the salary continuation agreements in 2012 were more than offset by such tax advantaged income.

Compensation of Directors

Non-employee directors received \$900 per meeting for their attendance at Board meetings in 2012 and \$500 per meeting for committee meetings attended, except for the Chairman of the Board who received \$1,500 per Board meeting, and the Chairman of the Audit Committee who received \$1,000 per Audit Committee meeting chaired. The President received \$900 per meeting for attendance at Board of Directors meetings, but did not receive any fees for attending committee meetings. In addition, all directors received an annual retainer of \$16,500. For 2013, the annual retainer increased to \$17,325 but per meeting fees remain unchanged.

The Company instituted a Director Retirement Plan on October 1, 2002, and entered into associated agreements with its independent directors at the time. A supplemental plan for independent directors was adopted effective January 1, 2007. Current directors who qualify as plan participants are directors Tharp, Berra, Fields, Jurkovich, and Woods. The plans provide a combined annual benefit of \$50,000 to each participant for a period of ten years, commencing at retirement, disability, or "change in control." In the event of death prior to any of those events, the plans provide a combined death benefit of \$377,232, which is equal to the Company's accrued liability for each plan participant. In case of death after the commencement of any benefit payments made pursuant to retirement disability, or change in control, the death benefit is bifurcated according to the different terms of the 2002 and 2007 agreements. The earlier agreements provide for the payment of a lump sum benefit equal to the present value of the remaining payments under those agreements, discounted at 8%, while the latter agreements stipulate that the normal benefit due under those agreements continue to be paid. The Company's liability for potential payments under the director retirement agreements became 100% accrued at the end of 2011, at which time directors with retirement agreements were fully vested and eligible for their full benefits under those agreements.

The Company also purchased single-premium life insurance policies covering most of the non-employee directors when the Director Retirement Plan was first implemented, in part to provide tax advantaged income to offset the annual cost of the accruals. Those policies name the Company as beneficiary and the proceeds or cash surrender value of the policies will ultimately reimburse the Company for its original investment in the policies, as well as for certain payments made under the retirement agreements. The Company may purchase additional life insurance from time to time such that the aggregate amount is appropriate in relation to the accruals and ultimate obligations under the retirement agreements.

The table below summarizes the compensation paid to non-employee directors for the year ended December 31, 2012. Compensation paid to Mr. Holly, the only director who is also a Named Executive Officer, is set forth above in the various sections concerning compensation paid to Named Executive Officers.

Director Summary Compensation Table

Name	Fees Earned or Paid in Cash	Option Awards ²⁸	Changes in Pension Value and Non-Qualified Deferred Compensation on Earnings ²⁹	All Other Compensation ³⁰	Total
Albert L. Berra	\$43,200	\$20,007	–	\$ 5,279	\$68,486
Robert L. Fields	41,700	20,007	–	26,093	87,800
Vincent L. Jurkovich	46,700	20,007	–	26,093	92,800
Lynda B. Searcy	49,700	20,007	–	–	69,707
Morris A. Tharp	56,400	20,007	–	5,804	82,211
Gordon T. Woods	50,200	20,007	–	8,512	78,719

RELATED PARTY TRANSACTIONS

Some of our executive officers and directors and the companies with which they are associated have been customers of, and have had banking transactions with, Bank of the Sierra (the “Bank”) in the ordinary course of the Bank’s business since January 1, 2012, and the Bank expects to continue to have such banking transactions in the future. All loans and commitments to lend included in such transactions were made in the ordinary course of business and on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable loans with persons not related to the Bank, and in the opinion of the Board of Directors, did not involve more than the normal risk of repayment or present any other unfavorable features.

SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

Management knows of no person who owned beneficially more than 5% of the Company’s outstanding common stock as of March 25, 2013, except for the persons listed in the table below. Information concerning the stock ownership of the Company’s executive officers, directors and nominees for director is set forth above under “ELECTION OF DIRECTORS” above. The following table furnishes information regarding the known holders of more than 5% of the Company’s outstanding common stock:

²⁸ Represents the aggregate grant date fair value of options granted in 2012, computed pursuant to FASB accounting standards on stock compensation. The assumptions used in valuing these option awards are detailed in Note 2 to the consolidated financial statements contained in our Annual Report to Shareholders for 2012. As of December 31, 2012, each non-employee director held fully vested stock options covering the following numbers of shares: directors Berra, Tharp, Jurkovich and Woods: 27,500 shares each; and directors Fields and Searcy: 22,500 shares each. During 2012, no stock options were exercised by the Company’s directors. Information concerning stock options granted to and held by Mr. Holly, who is also a Named Executive Officer, is set forth above under “Grants of Plan-Based Awards” and “Outstanding Equity Awards at Fiscal Year-End.”

²⁹ There were no retirement plan accruals or above market or preferential earnings on non-qualified deferred compensation accounts in 2012.

³⁰ Consists entirely of cash bonuses to reimburse the applicable individual for the imputed value and tax costs associated with their split dollar life insurance benefits.

Title of Class	Name and Address of Beneficial Owner	Amount and Nature of Beneficial Ownership	Percent of Class³¹
Common Stock	The Banc Funds Company, LLC 20 North Wacker Drive, Suite 3300 Chicago, Illinois 60606	905,247 ³²	6.41%
Common Stock	Private Management Group, Inc. 15635 Alton Parkway, Suite 400 Irvine, California 92618	776,942 ³³	5.50%
Common Stock	Wellington Management Company, LLP 75 State Street Boston Massachusetts 02109	772,921 ³⁴	5.47%
Common Stock	Patricia L. Childress 356 North Porter Road PMB 148 Porterville, California 93257	771,732 ³⁵	5.47%
Common Stock	Carol A. Bates 30731 Highway 190 Porterville, California 93257	645,440 ³⁶	4.57%

³¹ The denominator used to calculate these percentages is the number of shares issued and outstanding as of March 25, 2013. However, the numerator is based on publicly available information from SEC filings so is based on the number of shares reported in those filings. For The Banc Funds Company, LLC, Private Management Group, Inc. and Wellington Management, this date is December 31, 2012; for Ms. Childress the date is November 25, 2008; and for Ms. Bates the date is March 19, 2012.

³² Represents shares reported on a Schedule 13G/A as of December 31, 2012 filed jointly by Banc Fund VI LP (“BF VI”), an Illinois Limited Partnership, Banc Fund VII LP (“BF VII”), an Illinois Limited Partnership, and Banc Fund VIII L.P. (“BF VIII”), an Illinois Limited Partnership. According to the Schedule 13G, 303,550 shares are held by BF VI, 294,680 shares are held by BF VII, and 307,017 shares are held by BF VIII. The general partner of BF VI is MidBanc VI LP (“MidBanc VI”), whose principal business is to be a general partner of BF VI. The general partner of BF VII is MidBanc VII LP (“MidBanc VII”), whose principal business is to be a general partner of BF VII. The general partner of BF VIII is MidBanc VIII LP (“MidBanc VIII”), whose principal business is to be a general partner of BF VIII. MidBanc VI, MidBanc VII, and MidBanc VIII are Illinois limited partnerships. The general partner of MidBanc VI, MidBanc VII, and MidBanc VIII is The Banc Funds Company, LLC, (“TBFC”), whose principal business is to be a general partner of MidBanc VI, MidBanc VII, and MidBanc VIII. TBFC is an Illinois corporation whose principal shareholder is Charles J. Moore. Mr. Moore has been the manager of BF VI, BF VII, and BF VIII, since their respective inception. As manager, Mr. Moore has voting and dispositive power over the securities of the issuer held by each of those entities. As the controlling member of TBFC, Mr. Moore will control TBFC, and therefore each of the Partnership entities directly and indirectly controlled by TBFC.

³³ Represents shares reported on a Schedule 13G as of December 31, 2012 filed by Private Management Group, Inc. Private Management Group, Inc. has sole voting and dispositive power with respect to all 776,942 of such shares.

³⁴ Represents shares reported on a Schedule 13G/A as of December 31, 2012 filed by Wellington Management Company, LLP (“Wellington Management”). Wellington Management, in its capacity as an investment adviser, may be deemed to have beneficial ownership of the 772,921 shares of common stock that are owned by its investment advisory clients, none of which is known to have such interest with respect to more than 5% of the class of shares. Wellington Management has shared voting and shared dispositive power over all 772,921 of such shares. Wellington Management is a registered investment adviser under the Investment Advisers Act of 1940, as amended.

(Footnotes continued on following page.)

SECTION 16(a) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE

Based solely upon a review of Forms 3, 4 and 5 and amendments thereto furnished to the Company during and with respect to its 2012 fiscal year, no director or executive officer failed to file, on a timely basis, reports required during or with respect to 2012 by Section 16(a) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), except that Carol Bates failed to timely file one report on Form 4 with respect to one small transaction and Mr. Holly failed to timely file one report on Form 5 with respect to six small gift transactions occurring on the same day in December 2012. We are unable to express an opinion as to whether any other reports required by Section 16(a) were due with respect to 2012 by Patricia Childress and/or Carol Bates.

PROPOSAL 2

RATIFICATION OF APPOINTMENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

General

The Audit Committee has appointed Vavrinek, Trine, Day & Co., LLP ("Vavrinek") as the independent registered public accounting firm for the Company for the fiscal year ending December 31, 2013. Vavrinek audited the Company's financial statements for the year ended December 31, 2012. Although not required to do so, the Board of Directors has chosen to submit this proposal to the vote of the shareholders in order to ratify the Audit Committee's appointment of Vavrinek. It is the intention of the persons named in the Proxy to vote such Proxy **FOR** the ratification of this appointment. If the Company's shareholders do not ratify the selection, the Audit Committee will reconsider whether to retain Vavrinek, but may still retain them. Even if the selection is ratified, the Audit Committee, in its discretion, may change the appointment at any time during the year if it determines that such a change would be in the best interests of the Company and its shareholders.

Representatives of Vavrinek are expected to be present at the Meeting. They will have the opportunity to make a statement if they desire to do so and will be available to respond to appropriate questions.

(Certain footnotes continued from previous page.)

³⁵ Represents shares reported on a Schedule 13D/A filed with the SEC on January 28, 2009 concerning an event dated November 25, 2008. According to the Schedule 13D/A, Ms. Childress has sole voting power with respect to 739,059 shares; shared voting power with respect to 32,673 shares; sole dispositive power with respect to 755,165 shares; and shared dispositive power with respect to 6,000 shares. Ms. Childress and Ms. Bates filed the Schedule 13D/A and the original Schedule 13D as a group and indicated that they were deemed to be "acting in concert." As a group based on their SEC filings, their beneficial ownership is approximately 10.05%.

³⁶ Represents shares reported on a Form 4 concerning a transaction which occurred on March 9, 2012, reporting a sale of 9,800 shares. Additional information concerning the remaining shares held by Ms. Bates is contained in the Schedule 13D/A referenced in footnote 36. According to that Schedule 13D/A, Ms. Bates had sole voting power with respect to 622,567 shares; shared voting power with respect to 32,673 shares; sole dispositive power with respect to 633,134 shares; and shared dispositive power with respect to 6,000 shares. As indicated in footnote 35, based on their SEC filings, Ms. Bates and Ms. Childress are considered a control group and their combined beneficial ownership is approximately 10.04%.

Fees

The aggregate fees billed by Vavrinek for the fiscal years ended December 31, 2012 and 2011, were as follows:

	<u>2012</u>	<u>2011</u>
Audit fees ³⁷	\$262,000	\$254,000
Audit related fees ³⁸	13,250	13,550
Tax fees ³⁹	64,500	58,050
All other fees	—	—
Total	<u>\$339,750</u>	<u>\$325,600</u>

None of the fees paid to our independent public accountants during 2012 and 2011 were paid under the de minimis safe harbor exception from Audit Committee pre-approval requirements. The Audit Committee has concluded that the provision of the non-audit services listed above is compatible with maintaining Vavrinek's independence.

Board of Directors' Recommendation and Required Vote

The proposal will be ratified if the votes cast favoring the appointment exceed the votes cast opposing it.

YOUR BOARD OF DIRECTORS UNANIMOUSLY RECOMMENDS A VOTE "FOR" PROPOSAL 2.

PROPOSAL 3

ADVISORY VOTE ON EXECUTIVE COMPENSATION

As required by Section 14A of the Exchange Act, the Board of Directors is submitting for shareholder approval, on an advisory basis, the compensation paid to the Company's named executive officers as described in the Compensation Discussion and Analysis and the tabular disclosure regarding executive compensation (together with the accompanying narrative disclosure) above. As previously disclosed by the Company, the Board of Directors has determined that it will hold an advisory vote on executive compensation on an annual basis.

This proposal, commonly known as a "say-on-pay" proposal, gives the Company's shareholders the opportunity to endorse or not endorse the Company's executive pay program and policies through the following resolution:

"Resolved, that the shareholders approve the compensation of the Company's Named Executive Officers, as disclosed in the Compensation Discussion and Analysis, the executive compensation tables, and any related disclosures contained in the proxy statement for the Company's 2013 Annual Meeting of Shareholders."

³⁷ Includes \$95,000 for both 2012 and 2011, for the audit of the Company's internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act.

³⁸ Consists of audits of the Company's employee benefit plans for both years, as well as services relating to a periodic SEC review in 2011 in the amount of \$1,800.

³⁹ Tax services included preparation of tax returns and tax payment planning services, as well as fees related to other tax advice, tax consulting and planning.

This vote shall not be binding on the Board of Directors or the Compensation Committee and will not be construed as overruling a decision by, nor create or imply any additional fiduciary duty by, the Board or the Compensation Committee. Furthermore, because this non-binding advisory resolution relates primarily to compensation that has already been paid or contractually committed for the Company's named executive officers, there is generally no opportunity for the Board to revisit those decisions. However, the Compensation Committee intends to take into account the outcome of the vote when considering future executive compensation arrangements.

Board of Directors' Recommendation and Required Vote

The Board of Directors and the Compensation Committee believe that the Company's compensation practices and procedures are (i) designed to accomplish the objectives stated in the Company's compensation philosophy; (ii) competitive, reasonable and effective; and (iii) appropriately aligned with the long-term success of the Company and the interests of shareholders.

This proposal will be approved if the votes cast in favor exceed the votes cast against it.

YOUR BOARD OF DIRECTORS UNANIMOUSLY RECOMMENDS A VOTE "FOR" PROPOSAL 3.

PROPOSALS OF SHAREHOLDERS

Under certain circumstances, shareholders are entitled to present proposals at shareholder meetings. Any such proposal concerning our 2014 Annual Meeting of Shareholders must be submitted by a shareholder prior to December 30, 2013 in order to qualify for inclusion in the proxy statement relating to such meeting. The submission by a shareholder of a proposal does not guarantee that it will be included in the proxy statement. Shareholder proposals are subject to certain regulations and requirements under federal securities laws.

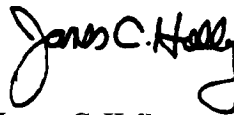

The persons named as proxies for the 2014 Annual Meeting of Shareholders will have discretionary authority to vote on any shareholder proposal which is not included in our proxy materials for the meeting, unless we receive notice of the proposal by March 13, 2014. If we receive proper notice by that date, the proxy holders will not have discretionary voting authority except as provided in federal regulations governing shareholder proposals.

OTHER MATTERS

Management does not know of any matters to be presented to the Meeting other than those set forth above. However, if other matters properly come before the Meeting, it is the intention of the proxy holders to vote said Proxy in accordance with the recommendations of your Board of Directors, and authority to do so is included in the Proxy.

DATED: April 26, 2013

SIERRA BANCORP

James C. Holly
President and Chief Executive Officer

A COPY OF THE COMPANY'S 2012 ANNUAL REPORT ON FORM 10-K INCLUDING FINANCIAL STATEMENTS (BUT WITHOUT EXHIBITS) FILED WITH THE SEC IS INCLUDED AS PART OF THE COMPANY'S ANNUAL REPORT TO SHAREHOLDERS WHICH IS BEING SENT TO SHAREHOLDERS TOGETHER WITH THIS PROXY STATEMENT. IF A SHAREHOLDER DESIRES COPIES OF THE EXHIBITS TO THE REPORT, THEY WILL BE PROVIDED UPON PAYMENT BY THE SHAREHOLDER OF THE COST OF FURNISHING THE EXHIBITS TOGETHER WITH A WRITTEN REQUEST TO KENNETH R. TAYLOR, EXECUTIVE VICE PRESIDENT AND CHIEF FINANCIAL OFFICER, AT 86 NORTH MAIN STREET, PORTERVILLE, CALIFORNIA 93257.

(Zip Code)

(559) 782-4900

Registrant's telephone number, including area code

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock, No Par Value	The NASDAQ Stock Market LLC (NASDAQ Global Select Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes No

As of June 30, 2012, the last business day of the registrant's most recently completed second fiscal quarter, the aggregate market value of the voting stock held by non-affiliates of the registrant was approximately \$106 million, based on the closing price reported to the registrant on that date of \$9.90 per share. Shares of Common Stock held by each officer and director and each person or control group owning more than ten percent of the outstanding Common Stock have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

The number of shares of common stock of the registrant outstanding as of February 28, 2013 was 14,114,879.

Documents Incorporated by Reference: Portions of the definitive proxy statement for the 2013 Annual Meeting of Shareholders to be filed with the Securities and Exchange Commission pursuant to SEC Regulation 14A are incorporated by reference in Part III, Items 10-14.

ITEM 1. BUSINESS

General

The Company

Sierra Bancorp (the “Company”) is a California corporation headquartered in Porterville, California, and is a registered bank holding company under federal banking laws. The Company was formed to serve as the holding company for Bank of the Sierra (the “Bank”), and has been the Bank’s sole shareholder since August 2001. The Company exists primarily for the purpose of holding the stock of the Bank and of such other subsidiaries it may acquire or establish. At the present time, the Company’s only other direct subsidiaries are Sierra Statutory Trust II and Sierra Capital Trust III, which were formed in March 2004 and June 2006, respectively, solely to facilitate the issuance of capital trust pass-through securities (TRUPS). Pursuant to the Financial Accounting Standards Board’s (FASB’s) standard on the consolidation of variable interest entities, these trusts are not reflected on a consolidated basis in the financial statements of the Company. References herein to the “Company” include Sierra Bancorp and its consolidated subsidiary, the Bank, unless the context indicates otherwise.

At December 31, 2013, the Company had consolidated assets of \$1.438 billion, gross loans of \$880 million, deposits of \$1.174 billion and shareholders’ equity of \$174 million. The Company’s liabilities include \$31 million in debt obligations due to Sierra Statutory Trust II and Sierra Capital Trust III, related to TRUPS issued by those entities.

The Bank

The Bank is a California state-chartered bank headquartered in Porterville, California, that offers a full range of retail and commercial banking services to communities in the central and southern sections of the San Joaquin Valley. Our branch footprint stretches from Fresno on the north to Bakersfield on the south, and on the southern end extends east through the Tehachapi plateau and into the northwestern tip of the Mojave Desert. The Bank was incorporated in September 1977 and opened for business in January 1978, and in the ensuing years has grown to be the largest independent bank headquartered in the South San Joaquin Valley. Our growth has primarily been organic, but includes the acquisition of Sierra National Bank in 2000.

Our chief products and services are related to the business of lending money and accepting deposits. The Bank’s lending activities include real estate, commercial (including small business), agricultural, and consumer loans. The bulk of our real estate loans are secured by commercial or professional office properties which are predominantly owner-occupied. We also employ real estate lending specialists who are responsible for a complete line of construction loans for residential and commercial development, permanent mortgage loans, land acquisition and development loans, and multifamily credit facilities. Secondary market services are provided through the Bank’s affiliations with Freddie Mac, Fannie Mae and various non-governmental programs. As of December 31, 2012, the percentage of our total loan and lease portfolio for each of the principal areas in which we direct our lending activities was as follows: (i) loans secured by real estate (62.0%); (ii) commercial and industrial loans (including SBA loans) (31.6%); (iii) consumer loans (3.3%); (iv) direct finance leases (0.5%); and (v) agricultural production loans (2.6%). Real estate loans and related activities generated total revenue of \$33.2 million in 2012 and \$36.1 million in 2011. Interest, fees, and loan sale income on real-estate secured loans totaled approximately 48% of our net interest plus other income for 2012 and 53% in 2011.

In addition to loans, we offer a wide range of deposit products for individuals and businesses including checking accounts, savings accounts, money market demand accounts, time deposits, retirement accounts, and sweep accounts. The Bank’s deposit accounts are insured by the Federal Deposit Insurance Corporation (FDIC) up to maximum insurable amounts. We have also been in the Certificate of Deposit Account Registry Service (CDARS) network since its inception, and through CDARS are able to offer full FDIC insurance coverage on multi-million dollar deposits up to specified limits. We attract deposits from throughout our market area with direct-mail campaigns, a customer-oriented product mix, competitive pricing, convenient locations, drive-through banking, and a multitude of alternative delivery channels, and we strive to retain our deposit customers by providing a consistently high level of service. At December 31, 2012 we had 92,700 deposit accounts totaling \$1.174 billion, compared to 90,400 deposit accounts totaling \$1.086 billion at December 31, 2011.

We currently operate 25 full service branch offices throughout our geographic footprint. Our most recent branch changes include the third-quarter 2012 relocation of the Bank's Clovis branch to a larger facility in a more convenient location, and the first-quarter 2011 opening of a new branch in the City of Selma. The locations of the Bank's current offices are:

Porterville:	Administrative Headquarters 86 North Main Street	Main Office 90 North Main Street	West Olive Branch 1498 West Olive Avenue
Bakersfield:	Bakersfield Ming Office 8500 Ming Avenue	Bakersfield Riverlakes Office 4060 Coffee Road	Bakersfield East Hills Office 2501 Mt. Vernon Avenue
California City:	California City Office 8031 California City Blvd.		
Clovis:	Clovis Office 1835 East Shaw Avenue		
Delano:	Delano Office 1126 Main Street		
Dinuba:	Dinuba Office 401 East Tulare Street		
Exeter:	Exeter Office 1103 West Visalia Road		
Farmersville:	Farmersville Office 400 West Visalia Road		
Fresno:	Fresno Shaw Office 636 East Shaw Avenue	Fresno Herndon Office 7029 N. Ingram Avenue	Fresno Sunnyside Office 5775 E. Kings Canyon Rd.
Hanford:	Hanford Office 427 West Lacey Boulevard		
Lindsay:	Lindsay Office 142 South Mirage Avenue		
Reedley:	Reedley Office 1095 W. Manning Street		
Selma:	Selma Office 2446 McCall Avenue		
Tehachapi:	Tehachapi Downtown Office 224 West "F" Street	Tehachapi Old Town Office 21000 Mission Street	
Three Rivers:	Three Rivers Office 40884 Sierra Drive		
Tulare:	Tulare Office 246 East Tulare Avenue	Tulare Prosperity Office 1430 E Prosperity Avenue	
Visalia:	Visalia Mooney Office 2515 South Mooney Blvd.	Visalia Downtown Office 128 East Main Street	

In addition to the full-service branch offices listed above the Bank has a real estate industries group, an agricultural credit division, and an SBA lending unit. We also have ATM's at all branch locations, and offsite ATM's at six different non-branch locations. Furthermore, the Bank is a member of the Allpoint network, which provides our customers with surcharge-free access to over 38,000 ATM's across the nation and another 12,000 ATM's in foreign countries, and our customers have access to electronic point-of-sale payment alternatives nationwide via the Pulse EFT network. To ensure that account access preferences are addressed for all of our customers, we operate an internet branch which provides the ability to open deposit accounts and submit certain loan applications online, offer an online banking option with bill-pay and mobile banking capabilities, maintain a customer service center that is

accessible by toll-free telephone during business hours, and provide an automated telephone banking system that is accessible 24 hours a day, seven days a week. We offer a multitude of other banking products and services to complement and support our lending and deposit products, including remote deposit capture and automated payroll services for business customers. To provide non-deposit investment options we have a strategic alliance with Investment Centers of America, Inc. of Bismarck, North Dakota (“ICA”). Through this arrangement, registered and licensed representatives of ICA provide our customers with convenient access to annuities, insurance products, mutual funds, and a full range of investment products.

We have not engaged in any material research activities related to the development of new products or services during the last two fiscal years. However, our officers and employees are continually searching for ways to increase public convenience, enhance public access to the electronic payments system, and enable us to improve our competitive position. The cost to the Bank for these development, operations, and marketing activities cannot be calculated with any degree of certainty. We hold no patents or licenses (other than licenses required by appropriate bank regulatory agencies), franchises, or concessions. Our business has a modest seasonal component due to the heavy agricultural orientation of the Central Valley, but as our branches in more metropolitan areas have expanded we have become less reliant on the agriculture-related base. We are not dependent on a single customer or group of related customers for a material portion of our core deposits, nor is a material portion of our loans concentrated within a single industry or group of related industries. Our efforts to comply with government and regulatory mandates on consumer protection and privacy, anti-terrorism, and other initiatives have resulted in significant ongoing expense to the Bank, including staffing additions and costs associated with compliance-related software. However, as far as can be determined there has been no material effect upon our capital expenditures, earnings, or competitive position as a result of environmental regulation at the Federal, state, or local level.

Recent Accounting Pronouncements

Information on recent accounting pronouncements is contained in Note 2 to the consolidated financial statements.

Competition

The banking business in California in general, and specifically in many of our market areas, is highly competitive with respect to virtually all products and services. The industry continues to consolidate, particularly with the relatively large number of FDIC-assisted takeovers of failed banks and other acquisitions of troubled banks in recent years. There are also many unregulated companies competing for business in our markets with financial products targeted at highly profitable customer segments. Many of these competitors are able to compete across geographic boundaries, and provide customers with meaningful alternatives to nearly all significant banking services and products. These competitive trends are likely to continue.

With respect to commercial bank competitors, the business is dominated by a relatively small number of major banks that operate a large number of offices within our geographic footprint. Based on June 30, 2012 FDIC market share data for the combined four counties within which the Company operates, namely Tulare, Kern, Fresno, and Kings counties, the largest portion of deposits belongs to Wells Fargo Bank (21.7%), followed by Bank of America (17.1%). The next three institutions are multi-billion dollar institutions which have market share percentages between 6% and 7%. Bank of the Sierra ranks sixth on the 2012 market share list, with 5.4% of total deposits in the referenced four-county area. In Tulare County, however, where the Bank was originally formed, we rank first for deposit market share with 19.4% of total deposits, and have the largest number of branch locations (12, including our online branch). The larger banks noted above have, among other advantages, the ability to finance wide-ranging advertising campaigns and to allocate their resources to regions of highest yield and demand. They can also offer certain services that we do not offer directly but may offer indirectly through correspondent institutions. By virtue of their greater total capitalization, these banks also have substantially higher lending limits than we do. For customers whose needs exceed our legal lending limits, we typically arrange for the sale, or “participation,” of some of the balances to financial institutions that are not within our geographic footprint.

In addition to other banks, our competitors include savings institutions, credit unions, and numerous non-banking institutions such as finance companies, leasing companies, insurance companies, brokerage firms, asset management groups, mortgage banking firms and internet-based companies. Technological innovations have lowered traditional barriers of entry and enabled many of these companies to offer services that previously were considered traditional

banking products, and we have witnessed increased competition from companies that circumvent the banking system by facilitating payments via the internet, wireless devices, prepaid cards, and other means.

Strong competition for deposits and loans among financial institutions and non-banks alike affects interest rates and other terms on which financial products are offered to customers. Mergers between financial institutions have created additional pressures within the industry to remain competitive by streamlining operations, reducing expenses, and increasing revenues. Competition is also impacted by federal and state interstate banking laws enacted in the mid-1990's, which permit banking organizations to expand into other states. The relatively large California market has been particularly attractive to out-of-state institutions. Competitive conditions were further intensified in the year 2000 by the enactment of the Financial Modernization Act, which made it possible for full affiliations to occur between banks and securities firms, insurance companies, and other financial companies.

For years we have countered rising competition by offering a broad array of products with flexibility in structure and terms that cannot always be matched by our competitors. We also offer our customers community-oriented, personalized service, and rely on local promotional activity and personal contacts by our officers, directors, employees, and shareholders. This approach appears to be well-received by the populace of the San Joaquin Valley, who appreciate a high-touch, customer-oriented environment in which to conduct their financial transactions. As noted above, layered onto our traditional personal-contact banking philosophy are technology-driven initiatives that improve customer access and convenience.

Employees

As of December 31, 2012 the Company had 328 full-time and 90 part-time employees. On a full-time equivalent basis staffing stood at 399 at December 31, 2012, up from 383 at December 31, 2011 due primarily to the addition of staff for lending activities.

Regulation and Supervision

Banks and bank holding companies are heavily regulated by federal and state laws and regulations. Most banking regulations are intended primarily for the protection of depositors and the deposit insurance fund and not for the benefit of shareholders. The following is a summary of certain statutes, regulations and regulatory guidance affecting the Company and the Bank. This summary is not intended to be a complete explanation of such statutes, regulations and guidance, all of which are subject to change in the future, nor does it fully address their effects and potential effects on the Company and the Bank.

Regulation of the Company Generally

The Company's stock is traded on the NASDAQ Global Select Market under the symbol BSRR, and as such the Company is subject to NASDAQ rules and regulations including those related to corporate governance. The Company is also subject to the periodic reporting requirements of Section 13 of the Securities Exchange Act of 1934 (the "Exchange Act") which requires the Company to file annual, quarterly and other current reports with the Securities and Exchange Commission (the "SEC"). The Company is subject to additional regulations including, but not limited to, the proxy and tender offer rules promulgated by the SEC under Sections 13 and 14 of the Exchange Act; the reporting requirements of directors, executive officers and principal shareholders regarding transactions in the Company's common stock, and short swing profits rules promulgated by the SEC, under Section 16 of the Exchange Act; and certain additional reporting requirements for principal shareholders of the Company promulgated by the SEC under Section 13 of the Exchange Act. As a publicly traded company which had more than \$75 million in public float as of June 30, 2012, the Company is classified as an "accelerated filer" for purposes of its Exchange Act filing requirements. In addition to accelerated time frames for filing SEC periodic reports, this also means that the Company is subject to the requirements of Section 404 of the Sarbanes-Oxley Act of 2002 with regard to documenting, testing, and attesting to internal controls over financial reporting.

The Company is a bank holding company within the meaning of the Bank Holding Company Act of 1956 and is registered as such with the Federal Reserve Board. A bank holding company is required to file with the Federal Reserve annual reports and other information regarding its business operations and those of its subsidiaries. It is also subject to periodic examination by the Federal Reserve and is required to obtain Federal Reserve approval before acquiring, directly or indirectly, ownership of the voting shares of any bank if, after such acquisition, it would directly or indi-

rectly own or control more than 5% of the voting stock of that bank, unless it already owns a majority of the voting stock of that bank.

The Federal Reserve Board has determined by regulation certain activities in which a bank holding company may or may not conduct business. A bank holding company must engage, with certain exceptions, in the business of banking or managing or controlling banks or furnishing services to or performing services for its subsidiary banks. The principal exceptions to those prohibitions involve non-bank activities identified by statute, by Federal Reserve regulation, or by Federal Reserve order as activities so closely related to the business of banking or of managing or controlling banks as to be a proper incident thereto, including securities brokerage services, investment advisory services, fiduciary services, and management advisory and data processing services, among others. A bank holding company that also qualifies as and elects to become a "financial holding company" may engage in a broader range of activities that are financial in nature (and complementary to such activities), specifically non-bank activities identified by the Gramm-Leach-Bliley Act of 1999 or by Federal Reserve and Treasury regulation as financial in nature or incidental to a financial activity. Activities that are defined as financial in nature include securities underwriting, dealing, and market making, sponsoring mutual funds and investment companies, engaging in insurance underwriting and agency activities, and making merchant banking investments in non-financial companies. To become and remain a financial holding company, a bank holding company and its subsidiary banks must be well capitalized, well managed, and, except in limited circumstances, have at least a satisfactory rating under the Community Reinvestment Act. The Company has no current intention of becoming a financial holding company, but may do so at some point in the future if deemed appropriate in view of opportunities or circumstances at the time.

The Company and the Bank are deemed to be affiliates of each other within the meaning set forth in the Federal Reserve Act and are subject to Sections 23A and 23B of the Federal Reserve Act. The Federal Reserve Board has also issued Regulation W, which codifies prior regulations under Sections 23A and 23B of the Federal Reserve Act and related interpretative guidance with respect to affiliate transactions. This means, for example, that there are limitations on loans by the Bank to affiliates, and that all affiliate transactions must satisfy certain limitations and otherwise be on terms and conditions at least as favorable to the Bank as would be available for non-affiliates. In addition, we must comply with the Federal Reserve Act and Regulation O issued by the Federal Reserve Board, which require that loans and extensions of credit to our executive officers, directors and principal shareholders, or any company controlled by any such persons, shall, among other conditions, be made on substantially the same terms and follow credit-underwriting procedures no less stringent than those prevailing at the time for comparable transactions with non-insiders.

Regulations and policies of the Federal Reserve Board require a bank holding company to serve as a source of financial and managerial strength to its subsidiary banks. It is the Federal Reserve Board's policy that a bank holding company should stand ready to use available resources to provide adequate capital funds to a subsidiary bank during periods of financial stress or adversity and should maintain the financial flexibility and capital-raising capacity to obtain additional resources for assisting a subsidiary bank. Under certain conditions, the Federal Reserve Board may conclude that certain actions of a bank holding company, such as a payment of a cash dividend, would constitute an unsafe and unsound banking practice. The Federal Reserve Board also has the authority to regulate the debt of bank holding companies, including the authority to impose interest rate ceilings and reserve requirements on such debt. Under certain circumstances, the Federal Reserve Board may require a bank holding company to file written notice and obtain its approval prior to purchasing or redeeming its equity securities, unless certain conditions are met.

Regulation of the Bank Generally

As a California state-chartered bank whose accounts are insured by the FDIC up to the maximum limits allowable by law, the Bank is subject to regulation, supervision and regular examination by the California Department of Financial Institutions (the "DFI") and the FDIC. In addition, while the Bank is not a member of the Federal Reserve System, the Bank is subject to certain regulations of the Federal Reserve Board. The regulations of these agencies govern most aspects of the Bank's business, including the making of periodic reports by the Bank, and the Bank's activities relating to dividends, investments, loans, borrowings, capital requirements, certain check-clearing activities, branching, mergers and acquisitions, reserves against deposits and numerous other areas. Supervision, legal action and examination by the FDIC are generally intended to protect depositors and are not intended for the protection of shareholders.

The earnings and growth of the Bank are largely dependent on our ability to maintain a favorable differential, or “spread,” between our yield on interest-earning assets and the average rate paid on our deposits and other interest-bearing liabilities. As a result, the Bank’s performance is influenced by general economic conditions, both domestic and foreign, the monetary and fiscal policies of the federal government, and the policies of the regulatory agencies, particularly the Federal Reserve Board. The Federal Reserve Board implements national monetary policies (such as, for example, seeking to curb inflation and combat recession) by its open-market operations in United States government securities, by adjusting the required level of reserves for financial institutions subject to its reserve requirements, by varying the discount rate applicable to borrowings by banks that participate in the Federal Reserve System, and through quantitative easing. The actions of the Federal Reserve Board in those areas influence the growth of bank loans, investments and deposits and also affect interest rates on loans and deposits. The nature and impact of any future changes in monetary policies cannot be predicted with any degree of certainty.

Capital Adequacy Requirements

The Company and the Bank are subject to the regulations of the Federal Reserve Board and the FDIC, respectively, governing capital adequacy. Each of the federal regulators has established risk-based and leverage capital guidelines for the banks and/or bank holding companies it regulates, which set total capital requirements and define capital in terms of “core capital elements,” or Tier 1 capital; and “supplemental capital elements,” or Tier 2 capital. Tier 1 capital is generally defined as the sum of the core capital elements less goodwill and certain other deductions, including the unrealized net gains or losses (after tax adjustments) on available-for-sale investment securities, and disallowed deferred tax assets. The following items are defined as core capital elements: (i) common shareholders’ equity; (ii) qualifying non-cumulative perpetual preferred stock and related surplus (and, in the case of holding companies, senior perpetual preferred stock issued to the U.S. Treasury Department pursuant to the Troubled Asset Relief Program); (iii) minority interests in the equity accounts of consolidated subsidiaries; and (iv) “restricted” core capital elements (which include qualifying trust preferred securities) up to 25% of all core capital elements, net of goodwill less any associated deferred tax liability. As of December 31, 2012, TRUPS comprised approximately 16% of the Company’s Tier 1 capital. Supplementary capital elements include: (i) allowance for loan and lease losses (but not more than 1.25% of an institution’s risk-weighted assets); (ii) perpetual preferred stock and related surplus not qualifying as core capital; (iii) hybrid capital instruments, perpetual debt and mandatory convertible debt instruments; and, (iv) term subordinated debt and intermediate-term preferred stock and related surplus. The maximum amount of Tier 2 capital is capped at 100% of Tier 1 capital.

The minimum required ratio of qualifying total capital to total risk-weighted assets is 8% (“Total Risk-Based Capital Ratio”), and the minimum required ratio of Tier 1 capital to total risk-weighted assets is 4% (“Tier 1 Risk-Based Capital Ratio”). Risk-based capital ratios are calculated to provide a measure of capital relative to the degree of risk associated with a financial institution’s operations for transactions reported on the balance sheet as assets, and transactions, such as letters of credit and recourse arrangements, which are recorded as off-balance sheet items. Under risk-based capital guidelines, the nominal dollar amounts of assets and credit-equivalent amounts of off-balance sheet items are multiplied by one of several risk adjustment percentages, which range from 0% for assets with low credit risk, such as cash on hand and certain U.S. Treasury securities, to 100% for assets with relatively high credit risk, such as unsecured loans. As of December 31, 2012 and 2011, Bank-only Total Risk-Based Capital Ratios were 19.14% and 20.89%, respectively, and the Bank’s Tier 1 Risk-Based Capital Ratios were 17.88% and 19.63%, respectively. As of December 31, 2012 and 2011, the consolidated Company’s Total Risk-Based Capital Ratios were 19.36% and 21.72%, respectively, and its Tier 1 Risk-Based Capital Ratios were 18.11% and 20.46%, respectively.

The FDIC and the Federal Reserve Board have also established guidelines for a financial institution’s leverage ratio, defined as Tier 1 capital to adjusted total assets. Banks and bank holding companies that have received the highest rating of the five categories used by regulators to rate banks and are not anticipating or experiencing any significant growth must maintain a leverage ratio of at least 3%. All other institutions are typically required to maintain a leverage ratio of at least 4% to 5%; however, federal regulations also provide that financial institutions must maintain capital levels commensurate with the level of risk to which they are exposed, including the volume and severity of problem loans, and federal regulators may set higher capital requirements when an institution’s particular circumstances warrant. Bank-only leverage ratios were 13.17% and 13.53% on December 31, 2012 and 2011, respectively. As of December 31, 2012 and 2011, the consolidated Company’s leverage ratios were 13.34% and 14.11%, respectively.

Risk-based capital requirements also take into account concentrations of credit involving collateral or loan type, and the risks of “non-traditional” activities (those that have not customarily been part of the banking business). The regulations require institutions with high or inordinate levels of risk to operate with higher minimum capital standards, and authorize the regulators to review an institution’s management of such risks in assessing an institution’s capital adequacy. Additionally, the regulatory Statements of Policy on risk-based capital include exposure to interest rate risk as a factor that the regulators will consider in evaluating a financial institution’s capital adequacy, although interest rate risk does not impact the calculation of an institution’s risk-based capital ratios. Interest rate risk is the exposure of a bank’s current and future earnings and equity capital to adverse movement in interest rates. While interest rate risk is inherent in a financial institution’s role as a financial intermediary, it introduces volatility to the institution’s earnings and economic value.

As noted above, under the current rules of the Federal Reserve Board qualified trust preferred securities are one of several “restricted” core capital elements which may be included in Tier 1 capital, subject to certain limitations. Amounts of restricted core capital elements in excess of established limits generally may be included in Tier 2 capital. Since the Company had less than \$15 billion in assets at December 31, 2012, under the Dodd-Frank Act the Company will be able to continue to include its existing trust preferred securities in Tier 1 Capital to the extent permitted by FRB guidelines. However, as discussed in the next paragraph, the treatment of the Company’s trust preferred securities will change in the future if currently proposed regulations are adopted.

On June 12, 2012, banking regulators issued a notice of proposed rulemaking outlining potential new regulatory capital guidelines which conform to Basel III requirements. While there is lingering uncertainty with regard to exemptions that might apply to community banks, if ultimately adopted as proposed the new rules would, among other things:

- 1) add a new regulatory capital component referred to as “Common Equity Tier 1 capital”, and establish threshold ratios for this new component (e.g., 6.5% to be “well-capitalized”);
- 2) impose a new “capital conservation buffer” of at least 2.5% of risk-weighted assets to be added to Common Equity Tier 1 capital, and limit dividend payments, share buybacks, and certain discretionary bonus payments to executive officers if the capital conservation buffer is not achieved;
- 3) provide a phase-out period for the inclusion of TRUPS as Tier 1 capital (although TRUPS would likely still be includible in Tier 2 capital);
- 4) require us to include accumulated other comprehensive income (AOCI) in Tier 1 capital, which could significantly increase capital volatility;
- 5) impose additional constraints on the inclusion of minority interests, mortgage servicing assets, and deferred tax assets in regulatory capital;
- 6) adjust risk-weightings for certain assets, including the assignment of a risk weighting of 150% to certain acquisition/development and construction loans, a risk weighting of 150% for loans that are more than 90-days past due or are on non-accrual status, and risk weightings for residential mortgages based on loan-to-value ratios and certain other loan characteristics; and
- 7) increase minimum required ratios over a phase-in period, and increase the threshold for a “well-capitalized” classification for the Tier 1 Risk-Based Capital Ratio from 6% to 8%.

The largest impact on the consolidated Company would likely come from the exclusion of \$30 million in TRUPS from Tier 1 capital. Other potential changes that could materially affect us include the additional constraints on the inclusion of deferred tax assets in capital, increased risk weightings for nonperforming loans and acquisition/development loans, and the inclusion of accumulated other comprehensive income in regulatory capital. The inclusion of AOCI would benefit us as long as we have a net unrealized gain on securities, but would lower our regulatory capital ratios if interest rates increase and our unrealized gain becomes an unrealized loss.

The aggregate effect of these regulatory changes on Sierra Bancorp and Bank of the Sierra cannot yet be determined with any degree of certainty, but our preliminary estimates indicate that if the changes are implemented and when they become fully phased-in they could have a material impact on our Tier 1 Leverage Ratio and our consolidated Tier 1 Risk-Based Capital Ratio. Nevertheless, given our current level of capital we should be well-positioned to absorb the impact of Basel III without constraining our organic growth plans, although no assurance can be provided in that regard.

For more information on the Company's capital, see Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operation – Capital Resources. Risk-based capital ratio requirements are discussed in greater detail in the following section.

Prompt Corrective Action Provisions

Federal law requires each federal banking agency to take prompt corrective action to resolve the problems of insured financial institutions, including but not limited to those that fall below one or more prescribed minimum capital ratios. The federal banking agencies have by regulation defined the following five capital categories: "well capitalized" (Total Risk-Based Capital Ratio of 10%; Tier 1 Risk-Based Capital Ratio of 6%; and Leverage Ratio of 5%); "adequately capitalized" (Total Risk-Based Capital Ratio of 8%; Tier 1 Risk-Based Capital Ratio of 4%; and Leverage Ratio of 4%, or 3% if the institution receives the highest rating from its primary regulator); "undercapitalized" (Total Risk-Based Capital Ratio of less than 8%; Tier 1 Risk-Based Capital Ratio of less than 4%; or Leverage Ratio of less than 4%, or 3% if the institution receives the highest rating from its primary regulator); "significantly undercapitalized" (Total Risk-Based Capital Ratio of less than 6%; Tier 1 Risk-Based Capital Ratio of less than 3%; or Leverage Ratio less than 3%); and "critically undercapitalized" (tangible equity to total assets less than 2%). A bank may be treated as though it were in the next lower capital category if, after notice and the opportunity for a hearing, the appropriate federal agency finds an unsafe or unsound condition or practice so warrants, but no bank may be treated as "critically undercapitalized" unless its actual capital ratio warrants such treatment. As of December 31, 2012 and 2011, both the Company and the Bank were deemed to be well capitalized for regulatory capital purposes.

At each successively lower capital category, an insured bank is subject to increased restrictions on its operations. For example, a bank is generally prohibited from paying management fees to any controlling persons or from making capital distributions if to do so would make the bank "undercapitalized." Asset growth and branching restrictions apply to undercapitalized banks, which are required to submit written capital restoration plans meeting specified requirements (including a guarantee by the parent holding company, if any). "Significantly undercapitalized" banks are subject to broad regulatory authority, including among other things, capital directives, forced mergers, restrictions on the rates of interest they may pay on deposits, restrictions on asset growth and activities, and prohibitions on paying bonuses or increasing compensation to senior executive officers without FDIC approval. Even more severe restrictions apply to "critically undercapitalized" banks. Most importantly, except under limited circumstances, not later than 90 days after an insured bank becomes critically undercapitalized the appropriate federal banking agency is required to appoint a conservator or receiver for the bank.

In addition to measures taken under the prompt corrective action provisions, insured banks may be subject to potential actions by the federal regulators for unsafe or unsound practices in conducting their businesses or for violations of any law, rule, regulation or any condition imposed in writing by the agency or any written agreement with the agency. Enforcement actions may include the issuance of cease and desist orders, termination of insurance of deposits (in the case of a bank), the imposition of civil money penalties, the issuance of directives to increase capital, formal and informal agreements, or removal and prohibition orders against "institution-affiliated" parties.

Safety and Soundness Standards

The federal banking agencies have also adopted guidelines establishing safety and soundness standards for all insured depository institutions. Those guidelines relate to internal controls, information systems, internal audit systems, loan underwriting and documentation, compensation and interest rate exposure. In general, the standards are designed to assist the federal banking agencies in identifying and addressing problems at insured depository institutions before capital becomes impaired. If an institution fails to meet the requisite standards, the appropriate federal banking agency may require the institution to submit a compliance plan and could institute enforcement proceedings if an acceptable compliance plan is not submitted or adhered to.

The Dodd-Frank Wall Street Reform and Consumer Protection Act

The Dodd-Frank Wall Street Reform and Consumer Protection Act financial reform legislation ("Dodd-Frank") significantly revised and expanded the rulemaking, supervisory, and enforcement authority of the federal bank regulatory agencies. Dodd-Frank impacts many aspects of the financial industry and, in many cases, will impact larger and smaller financial institutions and community banks differently over time. Many of the following key provisions of Dodd-Frank are already effective or are in the proposed rule or implementation stage:

- a change to permanent status for the previously-implemented temporary increase in FDIC deposit insurance to \$250,000, and an extension of federal deposit insurance coverage through December 31, 2012 for the full net amount held by depositors in non-interest bearing transaction accounts;
- authorization for financial institutions to pay interest on business checking accounts, as a result of which the Company began to pay interest on a limited number of business checking accounts in August, 2011;
- changes in the calculation of FDIC deposit insurance assessments, such that the assessment base is no longer an institution's deposit base but instead is the institution's average consolidated total assets less its average tangible equity, as a result of which smaller banks are now paying proportionately less and larger banks proportionately more of the aggregate insurance assessments;
- the requirement that interchange fees by debit card issuers be reasonable and proportional to the cost incurred, which does not apply directly to banks with less than \$10 billion in assets but nonetheless affects smaller banks due to competitive factors;
- the creation of a Consumer Financial Protection Bureau within the Federal Reserve (discussed below) with centralized responsibility for consumer protection;
- provisions that affect corporate governance and executive compensation at most publicly-traded companies in the United States, including proxy access requirements for shareholders, non-binding shareholder votes on executive compensation, the establishment of an independent compensation committee, enhanced executive compensation disclosures and compensation claw-backs;
- the application of the same leverage and risk-based capital requirements that apply to insured depository institutions to most bank holding companies, and the elimination and phase-out of trust preferred securities from Tier 1 capital with certain exceptions (which exceptions currently enable the Company to continue to include trust preferred securities as Tier 1 capital);
- codification of the requirement that bank holding companies serve as a source of financial strength for their depository institution subsidiaries;
- expansion of restrictions on transactions with affiliates and insiders under Section 23A and 23B of the Federal Reserve Act, and lending limits for derivative transactions, repurchase agreements, and securities lending and borrowing transactions;
- the elimination of remaining barriers to de novo interstate branching by banks; and
- enhanced regulation of financial markets, including the derivative and securitization markets, and the elimination of certain proprietary trading activities by banks (the "Volcker Rule").

Dodd-Frank also contains a number of provisions which should not directly impact the Company, such as the prohibition against charter conversions for troubled institutions; the elimination of the Office of Thrift Supervision, and the transfer of oversight responsibilities for thrift institutions and their holding companies to the Office of the Comptroller of the Currency or to the FDIC and the Federal Reserve; the termination of investments by the U.S. Treasury under the Troubled Asset Relief Program; the creation of a Financial Services Oversight Council to identify emerging systemic risks and improve interagency cooperation; and the establishment of enhanced standards for risk-based capital, leverage limits, stress testing, liquidity, risk management, and concentration/credit exposure limits for institutions with total consolidated assets of \$50 billion or more. However, some of those provisions could have an indirect impact on the Company due to their influence on the industry generally.

Because many of the regulations related to Dodd-Frank have not yet been issued or fully implemented, the statute's ultimate effect on the financial services industry in general, and on the Company in particular, is uncertain at this time. However, it is expected that certain provisions of Dodd-Frank may significantly impact our operations and expenses, including, for example, changes in FDIC assessments, the permitted payment of interest on demand deposits, and enhanced compliance requirements. Some of the rules and regulations promulgated or yet to be promulgated under Dodd-Frank will apply directly to institutions much larger than ours, but could indirectly impact smaller banks, either due to competitive influences or because certain required practices for larger institutions may subsequently become expected "best practices" for smaller institutions. We expect that we may need to devote even more management attention and resources to evaluate and make any changes necessary to comply with new statutory and regulatory requirements under Dodd-Frank.

Deposit Insurance

The Bank's deposits are insured under the Federal Deposit Insurance Act, up to the maximum applicable limits by the Deposit Insurance Fund ("DIF") of the FDIC and are subject to deposit insurance assessments to maintain the DIF. In October 2010, the FDIC adopted a revised restoration plan to ensure that the DIF's designated reserve ratio ("DRR") reaches 1.35% of insured deposits by September 30, 2020, the deadline mandated by the Dodd-Frank Act. However, financial institutions like Bank of the Sierra with assets of less than \$10 billion are exempted from the cost of this increase. Furthermore, the restoration plan proposed an increase in the DRR to 2% of estimated insured deposits as a long-term goal for the fund. The FDIC also proposed future assessment rate reductions in lieu of dividends, when the DRR reaches 1.5% or greater.

As noted above, the Dodd-Frank Act provided for a permanent increase in FDIC deposit insurance per depositor from \$100,000 to \$250,000 retroactive to January 1, 2008, and extended unlimited deposit insurance coverage for non-interest bearing transaction accounts through December 31, 2012. Furthermore, the FDIC redefined its deposit insurance premium assessment base from an institution's total domestic deposits to its total assets less tangible equity, effective in the second quarter of 2011. The changes to the assessment base necessitated changes to assessment rates, which also became effective April 1, 2011. The revised assessment rates are lower than prior rates, but the assessment base is larger and approximately the same amount of assessment revenue is being collected by the FDIC.

To help address liquidity issues created by potential timing differences between the collection of premiums and charges against the DIF, in November 2009 the FDIC adopted a final rule to require insured institutions to prepay, on December 31, 2009, estimated quarterly risk-based deposit insurance assessments for the fourth quarter of 2009, and for all of 2010, 2011 and 2012. Because our actual payments from 2010 through 2012 were lower than the original estimate, the Bank had \$1.7 million of the prepaid regulatory assessment remaining on its books as of December 31, 2012. Until such time as our prepaid FDIC assessment is fully utilized, our accounting offset for FDIC assessment expense is the prepaid account rather than cash.

We are generally unable to control the amount of premiums that we are required to pay for FDIC insurance. If there are additional bank or financial institution failures or if the FDIC otherwise determines, we may be required to pay even higher FDIC premiums than the recent levels. Any future increases in FDIC insurance premiums may have a material adverse effect on our earnings and could have a material adverse effect on the value of, or market for, our common stock.

In addition to DIF assessments, banks must pay quarterly assessments that are applied to the retirement of Financing Corporation bonds issued in the 1980's to assist in the recovery of the savings and loan industry. The assessment amount fluctuates, but was 0.66 basis points of insured deposits for the fourth quarter of 2012. Those assessments will continue until the Financing Corporation bonds mature in 2019.

Community Reinvestment Act

The Bank is subject to certain requirements and reporting obligations involving Community Reinvestment Act ("CRA") activities. The CRA generally requires federal banking agencies to evaluate the record of a financial institution in meeting the credit needs of its local communities, including low and moderate income neighborhoods. The CRA further requires the agencies to consider a financial institution's efforts in meeting its community credit needs when evaluating applications for, among other things, domestic branches, mergers or acquisitions, or the formation of holding companies. In measuring a bank's compliance with its CRA obligations, the regulators utilize a performance-based evaluation system under which CRA ratings are determined by the bank's actual lending, service, and investment performance, rather than on the extent to which the institution conducts needs assessments, documents community outreach activities or complies with other procedural requirements. In connection with its assessment of CRA performance, the FDIC assigns a rating of "outstanding," "satisfactory," "needs to improve" or "substantial noncompliance." The Bank's most recent rating is a "satisfactory" CRA assessment rating, assigned in July 2011.

Privacy and Data Security

The Gramm-Leach-Bliley Act, also known as the Financial Modernization Act of 1999 (the "Financial Modernization Act"), imposed requirements on financial institutions with respect to consumer privacy. Financial institutions, however, are required to comply with state law if it is more protective of consumer privacy than the Financial Mod-

ernization Act. The Financial Modernization Act generally prohibits disclosure of consumer information to non-affiliated third parties unless the consumer has been given the opportunity to object and has not objected to such disclosure. The statute also directed federal regulators, including the Federal Reserve and the FDIC, to establish standards for the security of consumer information, and requires financial institutions to disclose their privacy policies to consumers annually.

Overdrafts

The Electronic Funds Transfer Act, as implemented by the Federal Reserve's Regulation E (which was updated effective January 2010 with a mandatory compliance date of July 1, 2010), governs transfers initiated through automated teller machines (ATMs), point-of-sale terminals, and other electronic banking services. Regulation E prohibits financial institutions from assessing an overdraft fee for paying ATM and one-time point-of-sale debit card transactions, unless the customer affirmatively opts in to the overdraft service for those types of transactions. The opt-in provision establishes requirements for clear disclosure of fees and terms of overdraft services for ATM and one-time debit card transactions. The rule does not apply to other types of transactions, such as check, automated clearing-house (ACH) and recurring debit card transactions.

Additionally, in November 2010, the FDIC issued its Overdraft Guidance on automated overdraft service programs to ensure that a bank mitigates the risks associated with offering automated overdraft payment programs and complies with all consumer protection laws and regulations. The procedural changes and fee adjustments necessitated by those regulatory changes resulted in decreased overdraft income for the Company in 2011 and 2012, and could have a further adverse impact on non-interest income in the future.

Predatory Lending

The term "predatory lending" is far-reaching and covers a potentially broad range of behavior. As such, it does not lend itself to a concise or comprehensive definition. Typically, predatory lending involves at least one, and perhaps all three, of the following elements: making unaffordable loans based on a borrower's assets rather than on the borrower's ability to repay an obligation, or asset-based lending; inducing a borrower to refinance a loan repeatedly in order to charge high points and fees each time the loan is refinanced, or loan flipping; and engaging in fraud or deception to conceal the true nature of the loan obligation from an unsuspecting or unsophisticated borrower.

Federal Reserve Board regulations aimed at curbing such lending significantly widened the pool of high-cost home-secured loans covered by the Home Ownership and Equity Protection Act of 1994, a federal law that requires extra disclosures and consumer protections to borrowers. In addition, the regulation bars loan flipping by the same lender or loan servicer within a year. Lenders also will be presumed to have violated the law which says loans shouldn't be made to people unable to repay them, unless they document that the borrower has the ability to repay. Lenders that violate the rules face cancellation of loans and penalties equal to the finance charges paid. The Company does not engage in predatory lending, and thus does not expect these rules or potential future regulations in this area to have any impact on its financial condition or results of operations.

Consumer Financial Protection and Other Consumer Laws and Regulations

Dodd-Frank created the Consumer Financial Protection Bureau (CFPB) as a new and independent unit within the Federal Reserve System. With certain exceptions, the CFPB has authority to regulate any person or entity that engages in offering or providing a "consumer financial product or service," and it has rulemaking, examination, and enforcement powers over financial institutions. With respect to primary examination and enforcement authority of financial entities, however, the CFPB's authority is limited to institutions with assets of \$10 billion or more. Existing regulators retain this authority over institutions with assets of \$10 billion or less, such as the Bank.

The powers of the CFPB currently include:

- the ability to prescribe consumer financial laws and rules that regulate all institutions that engage in offering or providing a consumer financial product or service;
- primary enforcement and exclusive supervision authority over insured institutions with assets of \$10 billion or more with respect to federal consumer financial laws, including the right to obtain information about an institution's activities and compliance systems and procedures and to detect and assess risks to consumers and markets;

- the ability to require reports from institutions with assets under \$10 billion to support the CFPB in implementing federal consumer financial laws, supporting examination activities, and assessing and detecting risks to consumers and financial markets; and
- examination authority (limited to assessing compliance with federal consumer financial law) with respect to institutions with assets under \$10 billion, such as the Bank, to the extent that a CFPB examiner may be included in the examinations performed by the institution's primary regulator.

The CFPB officially commenced operations on July 21, 2011 and has engaged in numerous activities since then, including (i) investigating consumer complaints about credit cards and mortgages, (ii) launching a supervision program, (iii) conducting research for and developing mandatory financial product disclosures, and (iv) engaging in consumer financial protection rulemaking.

Some uncertainty has arisen related to confidential treatment and privilege and the CFPB's ability to require reports from financial institutions. Banks currently have express legal protection that gives them the confidence and legal certainty to provide confidential "privileged" documents at the request of the federal banking agencies, and the current law provides that a bank does not "waive" confidentiality and risk disclosure of the information to an outside party, potentially involved in litigation with the bank, by providing the information to its regulator. The CFPB does not have the same express statutory protections relating to privilege that the other banking agencies are given. The full extent of the CFPB's authority and potential impact on the Bank is unclear at this time, and the Bank continues to monitor the CFPB's activities on an ongoing basis.

The Bank is already subject to a variety of statutes and regulations designed to protect consumers, including the Fair Credit Reporting Act, Equal Credit Opportunity Act, and Truth-in-Lending Act. Interest and other charges collected or contracted for by the Bank are also subject to state usury laws and certain other federal laws concerning interest rates. The Bank's loan operations are also subject to federal laws and regulations applicable to credit transactions. Together, these laws and regulations include provisions that:

- govern disclosures of credit terms to borrowers who are consumers;
- require financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligations in meeting the housing needs of the communities it serves;
- prohibit discrimination on the basis of race, creed, or other prohibited factors in extending credit;
- govern the use and provision of information to credit reporting agencies; and
- govern the manner in which consumer debts may be collected by collection agencies.

The Bank's deposit operations are also subject to laws and regulations that:

- impose a duty to maintain the confidentiality of consumer financial records and prescribe procedures for complying with administrative subpoenas of financial records; and
- govern automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services.

The Emergency Economic Stabilization Act of 2008 and the Troubled Asset Relief Program

In response to the market turmoil and financial crises affecting the overall banking system and financial markets in the United States, the Emergency Economic Stabilization Act of 2008 (EESA) was enacted in October 2008. In February 2009, the American Recovery and Reinvestment Act of 2009 (the "Stimulus Bill") was enacted, which among other things augmented certain provisions of the EESA. Under the EESA, the Treasury Department has authority to purchase up to \$700 billion in mortgage loans, mortgage-related securities and certain other financial instruments, including debt and equity securities issued by financial institutions in the Troubled Asset Relief Program (the "TARP"). The purpose of the TARP was to restore confidence and stability to the U.S. banking system and to encourage financial institutions to increase lending to customers and to each other.

The Treasury Department allocated \$250 billion in TARP-authorized funds to the TARP Capital Purchase Program, which was developed to purchase senior preferred stock from qualifying financial institutions in order to strengthen their capital and liquidity positions and encourage them to increase lending to creditworthy borrowers. Qualifying financial institutions could be approved to issue preferred stock to the Treasury Department in amounts not less than

1% of their risk-weighted assets and not more than the lesser of \$25 billion or 3% of risk-weighted assets. After evaluating the strategic advantages and operating restrictions inherent in issuing preferred shares to the U.S. government, Sierra Bancorp elected not to participate in the capital purchase element of TARP.

The EESA also established a Temporary Liquidity Guarantee Program (TLGP) that gave the FDIC the ability to provide a guarantee for newly-issued senior unsecured debt and non-interest bearing transaction deposit accounts at eligible insured institutions. The transaction account guarantee program was initially scheduled to continue through December 31, 2010, but the Dodd-Frank Act extended full deposit insurance coverage for non-interest bearing transaction accounts through December 31, 2012, and all financial institutions were required to participate.

Interstate Banking and Branching

The Riegle Neal Interstate Banking and Branching Efficiency Act of 1994 (the “Interstate Banking Act”) regulates the interstate activities of banks and bank holding companies and establishes a framework for nationwide interstate banking and branching. Since 1995, adequately capitalized and managed bank holding companies have been permitted to acquire banks located in any state, subject to two exceptions: first, any state may still prohibit bank holding companies from acquiring a bank which is less than five years old; and second, no interstate acquisition can be consummated by a bank holding company if the acquirer would control more than 10% of the deposits held by insured depository institutions nationwide or 30% or more of the deposits held by insured depository institutions in any state in which the target bank has branches. In 1995, California enacted legislation to implement important provisions of the Interstate Banking Act and to repeal California’s previous interstate banking laws, which were largely preempted by the Interstate Banking Act. A bank may establish and operate de novo branches in any state in which the bank does not maintain a branch if that state has enacted legislation to expressly permit all out-of-state banks to establish branches in that state. However, California law expressly prohibits an out-of-state bank which does not already have a California branch office from (i) purchasing a branch office of a California bank (as opposed to purchasing the entire bank) and thereby establishing a California branch office, or (ii) establishing a de novo branch in California. It appears that the Interstate Banking Act and related California laws have contributed to the accelerated consolidation of the banking industry and increased competition, with many large out-of-state banks having entered the California market as a result of this legislation.

USA Patriot Act of 2001

The impact of the USA Patriot Act of 2001 (the “Patriot Act”) on financial institutions of all kinds has been significant and wide ranging. The Patriot Act substantially enhanced existing anti-money laundering and financial transparency laws, and required appropriate regulatory authorities to adopt rules that promote cooperation among financial institutions, regulators, and law enforcement entities in identifying parties that may be involved in terrorism or money laundering. Under the Patriot Act, financial institutions are subject to prohibitions regarding specified financial transactions and account relationships, as well as enhanced due diligence and “know your customer” standards in their dealings with foreign financial institutions and foreign customers. The Patriot Act also requires all financial institutions to establish anti-money laundering programs. The Bank expanded its Bank Secrecy Act compliance staff and intensified due diligence procedures concerning the opening of new accounts to fulfill the anti-money laundering requirements of the Patriot Act, and also implemented systems and procedures to identify suspicious banking activity and report any such activity to the Financial Crimes Enforcement Network.

Sarbanes-Oxley Act of 2002

The Company is subject to the Sarbanes-Oxley Act of 2002 (Sarbanes-Oxley) which addresses, among other issues, corporate governance, auditing and accounting, executive compensation, and enhanced and timely disclosure of corporate information. Among other things, Sarbanes-Oxley mandates chief executive and chief financial officer certifications of periodic financial reports, additional financial disclosures concerning off-balance sheet items, and accelerated share transaction reporting for executive officers, directors and 10% shareholders. In addition, Sarbanes-Oxley increased penalties for non-compliance with the Exchange Act. SEC rules promulgated pursuant to Sarbanes-Oxley impose obligations and restrictions on auditors and audit committees intended to enhance their independence from management, and include extensive additional disclosure, corporate governance and other related rules.

Commercial Real Estate Lending Concentrations

In December 2006, the federal bank regulatory agencies released Guidance on Concentrations in Commercial Real Estate (CRE) Lending, Sound Risk Management Practices (the "Guidance"). The Guidance, which was issued in response to the agencies' concern that rising CRE concentrations might expose institutions to unanticipated earnings and capital volatility in the event of adverse changes in the commercial real estate market, reinforced existing regulations and guidelines for real estate lending and loan portfolio management. Highlights of the Guidance include the following:

- The Guidance reminds institutions that strong risk management practices and appropriate levels of capital are important elements of a sound CRE lending program.
- The Guidance applies to national banks and state chartered banks, and is also broadly applicable to bank holding companies. For purposes of the Guidance, CRE loans include loans for land development and construction, other land loans, and loans secured by multifamily and nonfarm residential properties. The definition also extends to loans to real estate investment trusts and unsecured loans to developers if their performance is closely linked to the performance of the general CRE market.
- The agencies recognize that banks serve a vital role in their communities by supplying credit for business and real estate development, therefore the Guidance is not intended to limit banks' CRE lending. Instead, the Guidance encourages institutions to identify and monitor credit concentrations, establish internal concentration limits, and report concentrations to management and the board of directors on a periodic basis.
- The agencies recognize that different types of CRE lending present different levels of risk, and therefore, institutions are encouraged to segment their CRE portfolios to acknowledge these distinctions. However, the CRE portfolio should not be divided into multiple sections simply to avoid the appearance of risk concentration.
- Institutions should address the following key elements in establishing a risk management framework for identifying, monitoring, and controlling CRE risk: (1) board of directors and management oversight; (2) portfolio management; (3) management information systems; (4) market analysis; (5) credit underwriting standards; (6) portfolio stress testing and sensitivity analysis; and (7) credit review function.
- As part of the ongoing supervisory monitoring processes, the agencies use certain criteria to identify institutions that are potentially exposed to significant CRE concentration risk. An institution that has experienced rapid growth in CRE lending, has notable exposure to a specific type of CRE, or is approaching or exceeds specified supervisory criteria, may be identified for further supervisory analysis.

The Bank believes that the Guidance is applicable to it, as it has a relatively high level concentration in CRE loans. The Bank and its board of directors have discussed the Guidance and believe that the Bank's underwriting policies, management information systems, independent credit administration process, and monitoring of real estate loan concentrations are sufficient to address the Guidance.

Allowance for Loan and Lease Losses

In December 2006, the federal bank regulatory agencies released an Interagency Policy Statement on the Allowance for Loan and Lease Losses (ALLL), which revises and replaces the banking agencies' 1993 policy statement on the ALLL. The revised statement was issued to ensure consistency with generally accepted accounting principles (GAAP) and more recent supervisory guidance, and it extended the scope to include credit unions. Highlights of the revised statement include the following:

- the revised statement emphasizes that the ALLL represents one of the most significant estimates in an institution's financial statements and regulatory reports, and that an assessment of the appropriateness of the ALLL is critical to an institution's safety and soundness;
- each institution has a responsibility to develop, maintain, and document a comprehensive, systematic, and consistently applied process for determining the amounts of the ALLL;
- each institution must maintain an ALLL that is sufficient to cover estimated credit losses on individual impaired loans as well as estimated credit losses inherent in the remainder of the portfolio; and
- the revised statement clarifies previous guidance on the ALLL with regard to: (1) responsibilities of the board of directors, management, and bank examiners; (2) factors to be considered in the estimation of ALLL; and (3) objectives and elements of an effective loan review system.

In December 2012, the FASB issued a proposed accounting standards update on “Financial Instruments–Credit Losses” with the goal of eliminating the overstatement of assets caused by a delayed recognition of credit losses associated with loans (and other financial instruments). Comments on the proposal are due by April 30, 2013, but no effective date for the guidance has been suggested. If ultimately implemented as proposed, the guidance would require us to modify the methodology we use to determine our allowance for loan and lease losses from the current “incurred loss” model to a new “expected credit loss” model that considers more forward-looking information. That change could potentially necessitate a significant increase in our allowance for loan and lease losses, which could negatively impact our profitability if our loan loss provision needs to be increased accordingly.

Other Pending and Proposed Legislation

Other legislative and regulatory initiatives which could affect the Company, the Bank and the banking industry in general are pending, and additional initiatives may be proposed or introduced before the United States Congress, the California legislature and other governmental bodies in the future. Such proposals, if enacted, may further alter the structure, regulation and competitive relationship among financial institutions, and may subject the Bank to increased regulation, disclosure and reporting requirements. In addition, the various banking regulatory agencies often adopt new rules and regulations to implement and enforce existing legislation. It cannot be predicted whether, or in what form, any such legislation or regulations may be enacted or the extent to which the business of the Company or the Bank would be affected thereby.

ITEM 1A. RISK FACTORS

You should carefully consider the following risk factors and all other information contained in this Annual Report before making investment decisions concerning the Company’s common stock. The risks and uncertainties described below are not the only ones the Company faces. Additional risks and uncertainties not presently known to the Company or that the Company currently believes are immaterial may also adversely impact the Company’s business. If any of the events described in the following risk factors occur, the Company’s business, results of operations and financial condition could be materially adversely affected. In addition, the trading price of the Company’s common stock could decline due to any of the events described in these risks.

Risks Relating to the Bank and to the Business of Banking in General

Our business has been and may continue to be adversely affected by volatile conditions in the financial markets and unfavorable economic conditions generally. From December 2007 through June 2009, the U.S. economy was officially in recession. Business activity across a wide range of industries and regions in the U.S. was greatly reduced during that time frame, and remains at subdued or recessionary levels in many parts of the Country today. The financial markets and the financial services industry in particular have suffered unprecedented disruption, causing a number of institutions to fail or to require government intervention to avoid failure.

As a result of adverse financial and economic conditions, many lending institutions, including our company, experienced significant declines in the performance of their loans, particularly construction, development and land loans, and unsecured commercial and consumer loans. Our nonperforming assets have been at elevated levels since the beginning of the recession in 2007, and totaled \$72.8 million, or 8.10% of total loans and foreclosed assets at December 31, 2012, relative to only \$689,000, or 0.08% of total loans and foreclosed assets at the end of 2006.

The California economy has been particularly hard hit, and the economic decline has been a major factor in the significant increase in the Company’s nonperforming assets and loan charge-offs since mid-2007. Unemployment levels have always been relatively high in the San Joaquin Valley and in Tulare County, which is our geographic center and the base of our agriculturally oriented communities, but recessionary conditions pushed the unemployment rate to exceptionally high levels in recent years. The unemployment rate for Tulare County reached a high of 19.2% during the current economic cycle, in March 2010. It was 15.7% for December 2012, down slightly from 16.5% in December 2011 and 17.9% in December 2010, but still well above the 9.7% aggregate unemployment rate for California in December 2012.

Although there are indications of improving economic conditions nationally, certain sectors, such as real estate, remain relatively weak and unemployment remains high in many of our local markets. The state government, most

local governments, and many local businesses are still experiencing difficulties due to relatively low consumer and business confidence, reduced consumer spending, and a drop in tax revenues. In addition, the values of the real estate collateral supporting many commercial loans and home mortgages have declined and could decline further. Any new negative market developments could further adversely affect consumer confidence levels and payment patterns, which could cause delinquencies and default rates to remain at high levels.

If business and economic conditions do not improve generally or in the principal markets in which we do business, the prolonged economic weakness could have one or more of the following adverse effects on our business:

- a lack of demand for loans, or other products and services offered by us;
- a continued decline in the value of our loans or other assets secured by residential or commercial real estate;
- a decrease in deposit balances due to increased pressure on the liquidity of our customers;
- an impairment of our investment securities; or
- an increase in the number of borrowers who become delinquent, file for protection under bankruptcy laws or default on their loans or other obligations to us, which in turn could result in a higher level of nonperforming assets, net charge-offs and provision for credit losses.

Challenges in the agricultural industry could have an adverse effect on our customers and their ability to make payments to us. While the Company's current relatively high level of nonperforming assets is comprised mainly of other real estate owned and loans secured by land, lots, and commercial/residential real estate, the drivers behind high levels of nonperforming assets in previous economic cycles include difficulties experienced by the agricultural industry in our market areas. This is due to the fact that a considerable portion of our borrowers are involved in, or are impacted to some extent by, the agricultural industry. While a great number of our borrowers are not directly involved in agriculture, they would likely be impacted by difficulties in the agricultural industry since many jobs in the San Joaquin Valley are ancillary to the regular production, processing, marketing and sales of agricultural commodities.

The markets for agricultural products can be adversely impacted by increased supply from overseas competition, a drop in consumer demand, and numerous other factors. The ripple effect of any resulting drop in commodity prices could lower borrower income and depress collateral values. Weather patterns are also of critical importance to row crop, tree fruit, and citrus production. A degenerative cycle of weather has the potential to adversely affect agricultural industries as well as consumer purchasing power, and could lead to further unemployment throughout the San Joaquin Valley. Another potential looming issue that could have a major impact on the agricultural industry involves water distribution rights. If the amount of water available to agriculture becomes increasingly scarce due to drought and/or diversion to other uses, farmers may not be able to continue to produce agricultural products at a reasonable profit, which has the potential to force many out of business. Such conditions have affected and may continue to adversely affect our borrowers and, by extension, our business, and if general agricultural conditions decline our level of nonperforming assets could increase.

Concentrations of real estate loans could subject us to increased risks in the event of a prolonged real estate recession or natural disaster. Our loan portfolio is heavily concentrated in real estate loans, particularly commercial real estate. At December 31, 2012, 62% of our loan portfolio consisted of real estate loans, and a sizeable portion of the remaining loan portfolio has real estate collateral as a secondary source of repayment or as an abundance of caution. Balances secured by commercial buildings and construction and development loans represented 56% of all real estate loans, while loans secured by residential properties accounted for 31%, and loans secured by farmland were 13% of real estate loans. The Company's \$72.8 million balance of nonperforming assets at December 31, 2012 includes nonperforming real estate loans totaling \$46.6 million, and \$19.8 million in foreclosed assets comprised primarily of other real estate owned (OREO).

The Central Valley residential real estate market experienced significant deflation in property values during 2008 and 2009, with little change from recessionary lows since then, and foreclosures have occurred at relatively high rates since the beginning of the recession. If residential real estate values in our market areas slide further, and/or if this weakness further impacts commercial real estate values, the Company could experience additional migration into nonperforming assets. An increase in nonperforming assets could have a material adverse effect on our financial condition and results of operations by reducing our income and increasing our expenses. Continued deterioration in real estate values might also further reduce the amount of loans the Company makes to businesses in the construction

and real estate industry, which could negatively impact our organic growth prospects. Similarly, the occurrence of a natural disaster like those California has experienced in the past, including earthquakes, brush fires, and flooding, could impair the value of the collateral we hold for real estate secured loans and negatively impact our results of operations.

In addition, banking regulators now give commercial real estate loans extremely close scrutiny due to risks relating to the cyclical nature of the real estate market, and related risks for lenders with high concentrations of such loans. The regulators have required banks with relatively high levels of CRE loans to implement enhanced underwriting standards, internal controls, risk management policies and portfolio stress testing, which has resulted in higher allowances for possible loan losses. Expectations for higher capital levels have also materialized. Any increase in our allowance for loan losses would adversely affect our net income, and any requirement that we maintain higher capital levels could adversely impact financial performance measures such as earnings per share.

Our concentrations of commercial real estate, construction and land development, and commercial and industrial loans expose us to increased lending risks. Commercial real estate, construction and land development, and commercial and industrial loans and leases, including agricultural production loans but not including SBA-guaranteed loans, comprised approximately 67% of our total loan portfolio as of December 31, 2012, and expose the Company to a greater risk of loss than residential real estate and consumer loans, which comprised a smaller percentage of the total loan portfolio. Commercial real estate and land development loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to residential loans. Consequently, an adverse development with respect to one commercial loan or one credit relationship exposes us to a greater risk of loss compared to an adverse development with respect to one residential mortgage loan.

Repayment of our commercial loans is often dependent on the cash flows of the borrower, which may be unpredictable, and the collateral securing these loans may fluctuate in value. At December 31, 2012, we had \$285 million or 32% of total loans in commercial loans and leases, including agricultural production loans but not including SBA-guaranteed loans. Commercial lending involves risks that are different from those associated with residential and commercial real estate lending. Real estate lending is generally considered to be collateral based lending with loan amounts based on predetermined loan to collateral values and liquidation of the underlying real estate collateral being viewed as the primary source of repayment in the event of borrower default. Our commercial loans are primarily made based on the cash flows of the borrowers and secondarily on any underlying collateral provided by the borrowers. A borrower's cash flows may be unpredictable, and collateral securing those loans may fluctuate in value. Although commercial loans are often collateralized by equipment, inventory, accounts receivable, or other business assets, the liquidation of collateral in the event of default is often an insufficient source of repayment because accounts receivable may be uncollectible and inventories may be obsolete or of limited use, among other things.

Nonperforming assets adversely affect our results of operations and financial condition, and can take significant time to resolve. Until economic and market conditions improve, we expect that our nonperforming loans will continue at relatively high levels, which will continue to negatively impact earnings and could have a substantial adverse impact if conditions deteriorate further. We do not record interest income on non-accrual loans, thereby adversely affecting our level of interest income. Furthermore, when we receive collateral through foreclosures and similar proceedings, we are required to record the collateral at its fair market value less estimated selling costs, which may result in write-downs or losses. Additionally, our non-interest expense has increased due to the costs of reappraising adversely classified assets, write-downs on foreclosed assets subsequent to reappraisals reflecting lower values, operating costs related to foreclosed assets, legal and other costs associated with loan collections, and various other expenses that would not typically be incurred in a more normal operating environment. An increase in the level of nonperforming assets also increases our risk profile and may impact the capital levels our regulators believe is appropriate in light of such risks. We utilize various techniques such as loan sales, workouts and restructurings to manage our problem assets. Deterioration in the value of these problem assets, the underlying collateral, or in the borrowers' performance or financial condition, could adversely affect our business, results of operations and financial condition. In addition, the resolution of nonperforming assets requires a significant commitment of time from management and staff, which can be detrimental to their performance of other responsibilities. There can be no assurance that we will avoid further increases in nonperforming loans in the future.

We may experience loan and lease losses in excess of our allowance for such losses. We endeavor to limit the risk that borrowers might fail to repay; nevertheless, losses can and do occur. We maintain an allowance for estimated loan and lease losses in our accounting records, based on estimates of:

- historical experience with our loans;
- evaluation of economic conditions;
- regular reviews of the quality, mix and size of the overall loan portfolio;
- a detailed cash flow analysis for nonperforming loans;
- regular reviews of delinquencies; and
- the quality of the collateral underlying our loans.

We maintain our allowance for loan and lease losses at a level that we believe is adequate to absorb specifically identified probable losses as well as any other losses inherent in our loan portfolio at a given date. While we strive to carefully monitor credit quality and to identify loans that may become nonperforming, at any given time there are loans in the portfolio that could result in losses but that have not been identified as nonperforming or potential problem loans. We cannot be sure that we will be able to identify deteriorating loans before they become nonperforming assets, or that we will be able to limit losses on those loans that have been so identified. Changes in economic, operating and other conditions which are beyond our control, including interest rate fluctuations, deteriorating values in underlying collateral (most of which consists of real estate), and changes in the financial condition of borrowers, may cause our estimate of probable losses or actual loan losses to exceed our current allowance. In addition, the FDIC and the DFI, as part of their supervisory functions, periodically review our allowance for loan and lease losses. Such agencies may require us to increase our provision for loan and lease losses or to recognize further losses based on their judgment, which may be different from that of our management. Any such increase in the allowance required by the FDIC or the DFI could also hurt our business.

Our use of appraisals in deciding whether to make a loan on or secured by real property does not ensure the value of the collateral. In considering whether to make a loan secured by real property, we generally require an appraisal of the property. However, an appraisal is only an estimate of the value of the property at the time the appraisal is made, and an error in fact or judgment could adversely affect the reliability of an appraisal. In addition, events occurring after the initial appraisal may cause the value of the real estate to decrease. As a result of any of these factors the value of collateral backing a loan may be less than supposed, and if a default occurs we may not recover the entire outstanding balance of the loan.

Our expenses could increase as a result of increases in FDIC insurance premiums. The FDIC, absent extraordinary circumstances, must establish and implement a plan to restore the deposit insurance reserve ratio to 1.35% of estimated insured deposits or the comparable percentage of the assessment base at any time the reserve ratio falls below that level. Bank failures during the current economic cycle depleted the deposit insurance fund balance, which was in a negative position from the end of 2009 through the first quarter of 2011. The balance had increased to \$25.2 billion with a resulting reserve ratio of 0.35% as of September 30, 2012. The FDIC currently has until September 30, 2020 to bring the reserve ratio back to the statutory minimum. As noted above under “Regulation and Supervision – Deposit Insurance”, the FDIC has implemented a restoration plan that adopted a new assessment base and established new assessment rates starting with the second quarter of 2011. The FDIC also imposed a special assessment in 2009, and required the prepayment of three years of estimated FDIC insurance premiums at the end of 2009. It is generally expected that assessment rates will remain relatively high in the near term due to the significant cost of bank failures and the relatively large number of troubled banks. Any further premium increases or special assessments could have a material adverse effect on our financial condition and results of operations.

We may not be able to continue to attract and retain banking customers, and our efforts to compete may reduce our profitability. The banking business in our current and intended future market areas is highly competitive with respect to virtually all products and services, and that competition may limit our ability to attract and retain banking customers. In California generally, and in our service areas specifically, branches of major banks dominate the commercial banking industry. Such banks have substantially greater lending limits than we have, offer certain services we cannot offer directly, and often operate with economies of scale that result in relatively low operating costs on a per loan or per asset basis. We also compete with numerous financial and quasi-financial institutions for deposits and loans, including providers of financial services over the internet. New technology and other changes are allowing parties to effectuate financial transactions that previously required the involvement of

banks. For example, consumers can maintain funds in brokerage accounts or mutual funds that would have historically been held as bank deposits. Consumers can also complete transactions such as paying bills and transferring funds directly without the assistance of banks. The process of eliminating banks as intermediaries, known as “disintermediation,” could result in the loss of fee income, as well as the loss of customer deposits and the related income generated from those deposits. The loss of these revenue streams and access to lower cost deposits as a source of funds could have a material adverse effect on our financial condition and results of operations.

In addition, with the large number of bank failures in the past few years, customers have been more concerned about the extent to which their deposits are insured by the FDIC. Customers may withdraw deposits in an effort to ensure that the amount they have on deposit with their bank is fully insured. Decreases in deposits may adversely affect our funding costs and net income. Ultimately, competition can and does increase our cost of funds, reduce loan yields and drive down our net interest margin, thereby reducing profitability. It can also make it more difficult for us to continue to increase the size of our loan portfolio and deposit base, and could cause us to rely more heavily on wholesale borrowings, which are generally more expensive than deposits.

If we are not able to successfully keep pace with technological changes affecting the industry, our business could be hurt. The financial services industry is constantly undergoing technological change, with the frequent introduction of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better service clients and reduce costs. Our future success depends, in part, upon our ability to respond to the needs of our clients by using technology to provide desired products and services and create additional efficiencies within our operations. Some of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our clients. Failure to successfully keep pace with technological change in the financial services industry could have a material adverse impact on our business and, in turn, on our financial condition and results of operations.

If our information systems were to experience a system failure or a breach in security, our business and reputation could suffer. We rely heavily on communications and information systems to conduct our business. The computer systems and network infrastructure we use could be vulnerable to unforeseen problems. Our operations are dependent upon our ability to minimize service disruptions by protecting our computer equipment, systems, and network infrastructure from physical damage due to fire, power loss, telecommunications failure or a similar catastrophic event. In addition, we must be able to protect against unauthorized system breaches that could jeopardize the security of customer information and other proprietary data. We have protective measures in place to prevent or limit the effect of the failure, interruption or security breach of our information systems and will continue to implement security technology and monitor and update operational procedures to prevent such damage. However, if such failures, interruptions or security breaches were to occur, they could result in damage to our reputation, a loss of customers, increased regulatory scrutiny, or possible exposure to financial liability, any of which could have a material adverse effect on our financial condition and results of operations.

We are subject to a variety of operational risks, including reputational risk, legal risk, compliance risk, the risk of fraud or theft by employees or outsiders, and the risk of clerical or record-keeping errors, which may adversely affect our business and results of operations. If personal, non-public, confidential or proprietary information of customers in our possession were to be mishandled or misused, we could suffer significant regulatory consequences, reputational damage and financial loss. Such mishandling or misuse could occur, for example, if information were erroneously provided to parties who are not permitted to have the information, either by fault of our systems, employees, or counterparties, or where such information is intercepted or otherwise inappropriately taken by third parties.

Because the nature of the financial services business involves a high volume of transactions, certain errors may be repeated or compounded before they are discovered and successfully remediated. Our necessary dependence upon automated systems to record and process transactions and our large transaction volume may further increase the risk that technical flaws or employee tampering or manipulation of those systems could result in losses that are difficult to detect. We also may be subject to disruptions of our operating systems arising from events that are wholly or partially beyond our control (for example, computer viruses or electrical or telecommunications outages, or natural disasters, disease pandemics or other damage to property or physical assets) which may give rise to disruption of

service to customers and to financial loss or liability. We are further exposed to the risk that our external vendors may be unable to fulfill their contractual obligations (or will be subject to the same risk of fraud or operational errors by their respective employees as we are) and to the risk that our (or our vendors') business continuity and data security systems prove to be inadequate. The occurrence of any of these risks could result in a diminished ability to operate our business (for example, by requiring us to expend significant resources to correct the defect), as well as potential liability to clients, reputational damage and regulatory intervention, which could adversely affect our business, financial condition and results of operations, perhaps materially.

Previously enacted and potential future financial regulatory reforms could have a significant impact on our business, financial condition and results of operations. The Dodd-Frank Wall Street Reform and Consumer Protection Act was enacted in July 2010. Dodd-Frank is expected to have a broad impact on the financial services industry, including significant regulatory and compliance changes. Many of the requirements called for in Dodd-Frank will be implemented over time and most will be subject to implementing regulations over the course of several years. Given the uncertainty associated with the manner in which the provisions of Dodd-Frank will be implemented, the full extent to which they will impact our operations is unclear. The changes resulting from Dodd-Frank may impact the profitability of business activities, require changes to certain business practices, impose more stringent capital, liquidity and leverage requirements or otherwise adversely affect our business. In particular, the potential impact of Dodd-Frank on our operations and activities, both currently and prospectively, include, among others:

- an increase in the cost of operations due to greater regulatory oversight, supervision and examination of banks and bank holding companies, and higher deposit insurance premiums;
- the limitation of our ability to expand consumer product and service offerings due to anticipated stricter consumer protection laws and regulations;
- a material negative impact on our cost of funds when market interest rates increase, if pursuant to the authorization for financial institutions to pay interest on business checking accounts we decide to offer such a product on a broad scale for competitive reasons;
- a potential reduction in fee income, due to limits on interchange fees applicable to larger institutions which could ultimately lead to a competitive-driven reduction in the fees we charge;
- a potential increase in competition due to the elimination of remaining barriers to de novo interstate branching; and
- the limitation of our ability to raise new capital through the use of trust preferred securities, as any new issuances of these securities are not includible as Tier 1 capital.

Further, we may be required to invest significant management attention and resources to evaluate and make any changes necessary to comply with new statutory and regulatory requirements under the Dodd-Frank Act, which may negatively impact results of operations and financial condition. Additionally, we cannot predict whether there will be additional laws or reforms that would affect the U.S. financial system or financial institutions, when such changes may be adopted, how such changes may be interpreted and enforced or how such changes may affect us. However, the costs of complying with any additional laws or regulations could have a material adverse effect on our financial condition and results of operations.

We may be adversely affected by the soundness of other financial institutions. Our ability to engage in routine funding transactions could be adversely affected by the actions and liquidity of other financial institutions. Financial institutions are often interconnected as a result of trading, clearing, counterparty, or other business relationships. We have exposure to many different industries and counterparties, and routinely execute transactions with counterparties in the financial services industry, including commercial banks, brokers and dealers, investment banks, and other institutional clients. Many of these transactions expose us to credit risk in the event of a default by a counterparty or client. Even if the transactions are collateralized, credit risk could exist if the collateral held by us cannot be liquidated at prices sufficient to recover the full amount of the credit or derivative exposure due to us. Any such losses could adversely affect our business, financial condition or results of operations.

Changes in interest rates could adversely affect our profitability, business and prospects. Net interest income, and therefore earnings, can be adversely affected by differences or changes in the base interest rates on, or the repricing frequency of, our interest-bearing liabilities and interest-earning assets. In addition, fluctuations in interest rates can affect the demand of customers for products and services, and an increase in the general level of interest rates may adversely affect the ability of certain borrowers to make variable-rate loan payments. Accordingly,

changes in market interest rates could materially and adversely affect the Company's asset quality, loan origination volume, financial condition, results of operations, and cash flows. This interest rate risk can arise from Federal Reserve Board monetary policies, as well as other economic, regulatory and competitive factors that are beyond our control.

We depend on our executive officers and key personnel to implement our business strategy, and could be harmed by the loss of their services. We believe that our continued growth and success depends in large part upon the skills of our management team and other key personnel. The competition for qualified personnel in the financial services industry is intense, and the loss of key personnel or an inability to continue to attract, retain or motivate key personnel could adversely affect our business. If we are not able to retain our existing key personnel or attract additional qualified personnel, our business operations would be hurt. None of our executive officers have employment agreements.

The value of the securities in our investment portfolio may be negatively affected by continued disruptions in securities markets. The market for some of the investment securities held in our portfolio has experienced volatility and disruption for the last several years. These market conditions may have a detrimental effect on the value of our securities, such as reduced valuations because of the perception of heightened credit risks or due to illiquid markets for certain securities. There can be no assurance that the declines in market value associated with these disruptions will not result in other-than-temporary impairments of these assets, which would lead to accounting charges that could have a material adverse effect on our results of operations and capital levels.

We are exposed to the risk of environmental liabilities with respect to properties to which we obtain title. Approximately 62% of our loan portfolio at December 31, 2012 consisted of real estate loans. In the normal course of business, we may foreclose and take title to real estate, and could be subject to environmental liabilities with respect to these properties. We may be held liable to a governmental entity or to third parties for property damage, personal injury, investigation and clean-up costs incurred by these parties in connection with environmental contamination, or may be required to investigate or clean up hazardous or toxic substances, or chemical releases at a property. The costs associated with investigation or remediation activities could be substantial. In addition, if we are the owner or former owner of a contaminated site, we may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from the property. These costs and claims could adversely affect our business and prospects.

Risks Related to our Common Stock

The price of our common stock may fluctuate significantly, and this may make it difficult for you to sell shares of common stock at times or at prices you find attractive. The trading price of our common stock could be impacted by a number of factors, many of which are outside our control. In addition, the stock market in general is subject to fluctuations that affect the share prices and trading volumes of many companies, and these broad market fluctuations could adversely affect the market price of our common stock. Factors that could affect our common stock price in the future include but are not necessarily limited to the following:

- actual or anticipated fluctuations in our reported operating results and financial condition;
- changes in revenue or earnings estimates or publication of research reports and recommendations by financial analysts;
- failure to meet analysts' revenue or earnings estimates;
- speculation in the press or investment community;
- strategic actions by us or our competitors, such as acquisitions or restructurings;
- actions by shareholders;
- sales of our equity or equity-related securities, or the perception that such sales may occur;
- fluctuations in the trading volume of our common stock;
- fluctuations in the stock prices, trading volumes, and operating results of our competitors;
- general market conditions and, in particular, market conditions for the financial services industry;
- proposed or adopted regulatory changes or developments;
- regulatory action against us;
- anticipated or pending investigations, proceedings, or litigation that involve or affect us; and
- domestic and international economic factors unrelated to our performance.

The stock market and, in particular, the market for financial institution stocks, has experienced significant volatility in recent years. As a result, the market price of our common stock has been, and could continue to be, volatile. The capital and credit markets have been experiencing volatility and disruption for several years, at times reaching unprecedented levels. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers without regard to the issuers' underlying financial strength.

We may pursue additional capital in the future, which may not be available on acceptable terms or at all, could dilute the holders of our outstanding common stock, and may adversely affect the market price of our common stock. Our ability to raise additional capital, if needed, will depend on, among other things, conditions in the capital markets at the time, which are outside of our control, and our financial performance. We cannot provide any assurance that such capital will be available to us on acceptable terms or at all. Any such capital raising alternatives could dilute the holders of our outstanding common stock, and may adversely affect the market price of our common stock and our performance measures such as earnings per share.

The Company relies heavily on the payment of dividends from the Bank. Other than \$1.7 million in cash available at the holding company level at December 31, 2012, the Company's ability to meet debt service requirements and to pay dividends depends on the Bank's ability to pay dividends to the Company, as the Company has no other source of significant income. However, the Bank is subject to regulations limiting the amount of dividends it may pay. For example, the payment of dividends by the Bank is affected by the requirement to maintain adequate capital pursuant to the capital adequacy guidelines issued by the Federal Deposit Insurance Corporation. All banks and bank holding companies are required to maintain a minimum ratio of qualifying total capital to total risk-weighted assets of 8%, at least one-half of which must be in the form of Tier 1 capital, and a ratio of Tier 1 capital to average adjusted assets of 4%. If (i) any of these required ratios are increased; (ii) the total risk-weighted assets of the Bank increase significantly; and/or (iii) the Bank's income declines significantly, the Bank's Board of Directors may decide or be required to retain a greater portion of the Bank's earnings to achieve and maintain the required capital or asset ratios. This would reduce the amount of funds available for the payment of dividends by the Bank to the Company. Further, one or more of the Bank's regulators could prohibit the Bank from paying dividends if, in their view, such payments would constitute unsafe or unsound banking practices. The Bank's ability to pay dividends to the Company is also limited by the California Financial Code. Whether dividends are paid and their frequency and amount will also depend on the financial condition and performance of the Bank, and the discretion of the Bank's Board of Directors. Information concerning the Company's dividend policy and historical dividend practices is set forth in Item 5 below under "Dividends." However, no assurance can be given that our future performance will justify the payment of dividends in any particular year.

You may not be able to sell your shares at the times and in the amounts you want if the trading market for our stock is not active. Although our stock has been listed on NASDAQ for many years, trading in our stock does not consistently occur in high volumes and cannot always be characterized as an active trading market. A limited trading market for our common stock may exaggerate fluctuations in the value of our common stock, leading to price volatility in excess of that which would occur in a more active trading market.

Your investment may be diluted because of our ability to offer stock to others, and from the exercise of stock options. The shares of our common stock do not have preemptive rights. This means that you may not be entitled to buy additional shares if shares are offered to others in the future. We are authorized to issue 24,000,000 shares of common stock, and as of December 31, 2012 we had 14,106,959 shares of our common stock outstanding. Except for certain limitations imposed by NASDAQ, nothing restricts our ability to offer additional shares of stock for fair value to others in the future. Any issuances of common stock would dilute our shareholders' ownership interests and may dilute the per share book value of our common stock.

In addition, when our directors and officers exercise in-the-money stock options your ownership in the Company is diluted. As of December 31, 2012, there were outstanding options to purchase an aggregate of 926,950 shares of our common stock with an average exercise price of \$14.16 per share. At the same date there were an additional 733,640 shares available for grant under our 2007 Stock Incentive Plan.

Shares of our preferred stock issued in the future could have dilutive and other effects on our common stock. Our Articles of Incorporation authorize us to issue 10,000,000 shares of preferred stock, none of which is presently outstanding. Although our Board of Directors has no present intent to authorize the issuance of shares of preferred stock, such shares could be authorized in the future. If such shares of preferred stock are made convertible into shares of common stock, there could be a dilutive effect on the shares of common stock then outstanding. In addition, shares of preferred stock may be provided a preference over holders of common stock upon our liquidation or with respect to the payment of dividends, in respect of voting rights or in the redemption of our common stock. The rights, preferences, privileges and restrictions applicable to any series or preferred stock would be determined by resolution of our Board of Directors.

The holders of our debentures have rights that are senior to those of our shareholders. In 2004 we issued \$15,464,000 of junior subordinated debt securities due March 17, 2034, and in 2006 we issued an additional \$15,464,000 of junior subordinated debt securities due September 23, 2036 in order to supplement regulatory capital. These junior subordinated debt securities are senior to the shares of our common stock. As a result, we must make interest payments on the debentures before any dividends can be paid on our common stock, and in the event of our bankruptcy, dissolution or liquidation, the holders of the debt securities must be paid in full before any distributions may be made to the holders of our common stock. In addition, we have the right to defer interest payments on the junior subordinated debt securities for up to five years, during which time no dividends may be paid to holders of our common stock. In the event that the Bank is unable to pay dividends to us, then we may be unable to pay the amounts due to the holders of the junior subordinated debt securities and, thus, we would be unable to declare and pay any dividends on our common stock.

Provisions in our articles of incorporation could delay or prevent changes in control of our corporation or our management. Our articles of incorporation contain provisions for staggered terms of office for members of the board of directors; no cumulative voting in the election of directors; and the requirement that our board of directors consider the potential social and economic effects on our employees, depositors, customers and the communities we serve as well as certain other factors, when evaluating a possible tender offer, merger or other acquisition of the Company. These provisions make it more difficult for another company to acquire us, which could cause our shareholders to lose an opportunity to be paid a premium for their shares in an acquisition transaction, and reduce the current and future market price of our common stock.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

The Company's administrative headquarters is located at 86 North Main Street, Porterville, California, in a 37,000 square feet, three-story office building of which the Company is sole occupant. The Company purchased this office building in December 2011 in a cash transaction, from parties unrelated to the Company. The Company's main office is located at 90 N. Main Street, Porterville, California, adjacent to its administrative headquarters, and consists of a one-story brick building on unencumbered property owned by us. The Company also owns unencumbered property on which 14 of our other offices are located, namely the following branches: Porterville West Olive, Bakersfield Ming, California City, Dinuba, Exeter, Farmersville, Fresno Shaw, Hanford, Lindsay, Tehachapi Downtown, Tehachapi Old Town, Three Rivers, Tulare, and Visalia Mooney. The remaining branches, as well as our technology center in Porterville and our six remote ATM locations, are all leased from unrelated parties. While limited branch expansion is planned over the course of the next few years, management believes that existing back-office facilities are adequate to accommodate the Company's operations for the immediately foreseeable future.

ITEM 3. LEGAL PROCEEDINGS

From time to time, the Company is a party to claims and legal proceedings arising in the ordinary course of business. After taking into consideration information furnished by counsel to the Company as to the current status of these claims or proceedings to which the Company is a party, management is of the opinion that the ultimate aggregate liability represented thereby, if any, will not have a material adverse affect on the financial condition of the Company.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

(a) Market Information

Sierra Bancorp's Common Stock trades on the NASDAQ Global Select Market under the symbol BSRR, and the CUSIP number for our stock is #82620P102. Trading in the Company's Common Stock has not consistently occurred in high volumes, and such trading activity cannot always be characterized as constituting an active trading market. The following table summarizes trades of the Company's Common Stock, setting forth the approximate high and low sales prices and volume of trading for the periods indicated, based upon information provided by public sources.

Calendar	Sale Price of the Company's Common Stock (per share)		Approximate Trading Volume
	<u>High</u>	<u>Low</u>	<u>In Shares</u>
Quarter Ended			
March 31, 2011	\$11.20	\$10.38	1,444,602
June 30, 2011	\$11.73	\$10.58	1,233,723
September 30, 2011	\$11.70	\$8.47	1,499,721
December 31, 2011	\$11.49	\$8.51	1,744,827
March 31, 2012	\$10.21	\$8.73	1,472,347
June 30, 2012	\$10.20	\$8.42	1,302,810
September 30, 2012	\$13.00	\$9.35	1,218,617
December 31, 2012	\$12.72	\$9.80	1,437,301

(b) Holders

As of January 31, 2013 there were approximately 4,001 shareholders of the Company's Common Stock. Per our stock transfer agent there were 562 registered holders of record, and per Broadridge, an investor communication company, there were approximately 3,439 beneficial holders with shares being held under a street name on that date, including "objecting beneficial owners" whose names and addresses are unavailable.

(c) Dividends

The Company paid cash dividends totaling \$3.4 million, or \$0.24 per share in 2012 and 2011, representing 41% of annual net earnings for dividends paid in 2012 and 43% in 2011. The Company's general dividend policy is to pay cash dividends within the range of typical peer payout ratios, provided that such payments do not adversely affect the Company's financial condition and are not overly restrictive to its growth capacity. However, at a time when many of our peers elected to suspend dividend payments, at least temporarily, the Company's Board also concluded that a certain level of dividend should be maintained as long as our core operating performance remains adequate and policy or regulatory restrictions do not preclude such payments, without regard to peer payout ratios. While we maintained a consistent level of quarterly dividends in 2011 and 2012, no assurance can be given that our financial performance in any given year will justify the continued payment of a certain level of cash dividend, or any cash dividend at all.

As a bank holding company that currently has no significant assets other than its equity interest in the Bank, the Company's ability to declare dividends depends upon cash on hand as supplemented by dividends it might receive from the Bank. The Bank's dividend practices in turn depend upon the Bank's earnings, financial position, current and anticipated capital requirements, and other factors deemed relevant by the Bank's Board of Directors at that time. The power of the Bank's Board of Directors to declare cash dividends is also subject to statutory and regulatory restrictions. Under California banking law, the Bank may declare dividends in an amount not exceeding the lesser of its retained earnings or its net income for the last three years (reduced by dividends paid during such period) or, with the prior approval of the California Commissioner of Financial Institutions, in an amount not exceeding the greatest

of (i) the retained earnings of the Bank, (ii) the net income of the Bank for its last fiscal year, or (iii) the net income of the Bank for its current fiscal year. The payment of any cash dividends by the Bank will depend not only upon the Bank's earnings during a specified period, but also on the Bank meeting certain regulatory capital requirements.

The Company's ability to pay dividends is also limited by state law. The California General Corporation Law allows a California corporation to pay dividends if the company's retained earnings equal at least the amount of the proposed dividend. If a California corporation does not have sufficient retained earnings available for the proposed dividend, it may still pay a dividend to its shareholders if immediately after the dividend the sum of the company's assets (exclusive of goodwill and deferred charges) would be at least equal to 125% of its liabilities (not including deferred taxes, deferred income and other deferred liabilities) and the current assets of the company would be at least equal to its current liabilities, or, if the average of its earnings before taxes on income and before interest expense for the two preceding fiscal years was less than the average of its interest expense for the two preceding fiscal years, at least equal to 125% of its current liabilities. In addition, during any period in which the Company has deferred payment of interest otherwise due and payable on its subordinated debt securities, it may not make any dividends or distributions with respect to its capital stock (see "Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Resources").

(d) Securities Authorized for Issuance under Equity Compensation Plans

The following table provides information as of December 31, 2012, with respect to options outstanding and available under our 2007 Stock Incentive Plan and the now-terminated 1998 Stock Option Plan, which are our only equity compensation plans other than an employee benefit plan meeting the qualification requirements of Section 401(a) of the Internal Revenue Code:

<u>Plan Category</u>	<u>Number of Securities to be Issued Upon Exercise of Outstanding Options</u>	<u>Weighted-Average Exercise Price of Outstanding Options</u>	<u>Number of Securities Remaining Available for Future Issuance</u>
Equity compensation plans approved by security holders	926,950	\$14.16	733,640

(e) Performance Graph

The following is a five-year performance graph comparing the total cumulative shareholder return on the Company's common stock to the cumulative total returns of the NASDAQ Composite Index (a broad equity market index), the SNL Bank Index, and the SNL \$1 billion to \$5 billion (asset size) Bank Index (the latter two qualifying as peer bank indices), assuming a \$100 investment on December 31, 2007 and reinvestment of dividends:

Index	Period Ending					
	12/31/07	12/31/08	12/31/09	12/31/10	12/31/11	12/31/12
Sierra Bancorp	100.00	87.16	32.84	47.16	39.55	52.62
NASDAQ Composite	100.00	60.02	87.24	103.08	102.26	120.42
SNL Bank \$1B-\$5B	100.00	82.94	59.45	67.39	61.46	75.78
SNL Bank	100.00	57.06	56.47	63.27	49.00	66.13

(f) Stock Repurchases

The Company has a non-expiring stock repurchase program that became effective July 1, 2003, under which all share repurchases are executed in accordance with SEC Rule 10b-18. The amount available for repurchase has been supplemented from time to time, as deemed appropriate by the Board of Directors. There were no stock repurchases during the fourth quarter of 2012, leaving 100,669 shares available for repurchase as of December 31, 2012. The Company has not repurchased any shares for the past few years due to economic uncertainties and the perceived need for capital preservation. However, in January 2013, the Board reactivated the Company's stock repurchase plan and increased the total number of shares authorized for repurchase to 700,000, or approximately 5% of total issued and outstanding shares.

ITEM 6. SELECTED FINANCIAL DATA

The following table presents selected historical financial information concerning the Company, which should be read in conjunction with our audited consolidated financial statements, including the related notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations," included elsewhere herein. The selected financial data as of December 31, 2012 and 2011, and for each of the years in the three year period ended December 31, 2012, is derived from our audited consolidated financial statements and related notes which are included in this Annual Report. The selected financial data presented for earlier years is derived from our audited financial statements which are not included in this Annual Report. Throughout this Annual Report, information is for the consolidated Company unless otherwise stated.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion presents Management's analysis of the financial condition of the Company as of December 31, 2012 and December 31, 2011, and the results of operations for each of the years in the three-year period ended December 31, 2012. The discussion should be read in conjunction with the Consolidated Financial Statements of the Company and the Notes related thereto presented elsewhere in this Form 10-K Annual Report (see Item 8 below).

Statements contained in this report or incorporated by reference that are not purely historical are forward looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 as amended, including the Company's expectations, intentions, beliefs, or strategies regarding the future. All forward-looking statements concerning economic conditions, growth rates, income, expenses, or other values which are included in this document are based on information available to the Company on the date noted, and the Company assumes no obligation to update any such forward-looking statements. It is important to note that the Company's actual results could materially differ from those in such forward-looking statements. Risk factors that could cause actual results to differ materially from those in forward-looking statements include but are not limited to those outlined previously in Item 1A.

Critical Accounting Policies

The Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States. The financial information and disclosures contained within those statements are significantly impacted by Management's estimates and judgments, which are based on historical experience and various other assumptions that are believed to be reasonable under current circumstances. Actual results may differ from those estimates under divergent conditions.

Critical accounting policies are those that involve the most complex and subjective decisions and assessments, and have the greatest potential impact on the Company's stated results of operations. In Management's opinion, the Company's critical accounting policies deal with the following areas: the establishment of the Company's allowance for loan and lease losses, as explained in detail in Note 2 to the consolidated financial statements and in the "Provision for Loan Losses" and "Allowance for Loan and Lease Losses" sections of this discussion and analysis; the valuation of impaired loans and foreclosed assets, as discussed in Note 2 to the consolidated financial statements; income taxes and deferred tax assets and liabilities, especially with regard to the ability of the Company to recover deferred tax assets as discussed in the "Provision for Income Taxes" and "Other Assets" sections of this discussion and analysis; goodwill, which is evaluated annually for impairment based on the fair value of the Company and for which it has been determined that no impairment exists, as discussed in Note 2 to the consolidated financial statements and in the "Other Assets" section of this discussion and analysis; and equity-based compensation, which is discussed in greater detail in Note 2 to the consolidated financial statements contained herein. Critical accounting areas are evaluated on an ongoing basis to ensure that the Company's financial statements incorporate the most recent expectations with regard to these areas.

Summary of Performance

Recessionary conditions have led to relatively high credit costs, diminished lending activity, and associated earnings pressures at the Company for the past five years. There are signs of recovery in the national economy and in certain regions of California, including Kern County, but economic conditions have not yet materially improved in Tulare, Fresno, and Kings Counties. Industry-wide regulatory pressures on certain components of non-interest income have exacerbated the negative impact of the faltering economy on our financial performance in recent years. The Company recognized net income of \$8.185 million in 2012 relative to \$7.780 million in 2011 and \$7.363 million in 2010, representing year-over-year increases in net income for both 2012 and 2011 but still coming in well below levels achieved in pre-recession years. Net income per diluted share was \$0.58 for 2012, as compared to \$0.55 for 2011 and \$0.60 in 2010. The Company's return on average assets and return on average equity were 0.59% and 4.74%, respectively, in 2012, as compared to 0.59% and 4.73%, respectively, for 2011, and 0.56% and 5.16%, respectively, in 2010.

The following are some of the major factors impacting the Company's results of operations for the years presented in the consolidated financial statements:

- **Net interest income has been declining, falling by 4% in 2012 relative to 2011 and by 6% in 2011 relative to 2010, due to net interest margin compression.** Negative factors affecting the Company's net interest margin in recent years include relatively strong growth in lower-yielding investment balances (although that trend began to reverse in the second half of 2012), a higher level of non-accruing loans and other non-earning assets, a shift from higher yielding loan categories to lower-yielding loan types, and lower loan yields across the board resulting from increased competition for quality loans.
- **Our loan loss provisions, which have been much higher than in pre-recession years, totaled \$14.210 million in 2012, \$12.000 million in 2011, and \$16.680 million in 2010.** The elevated loan loss provisions have been utilized to establish specific reserves for impaired loans that have migrated into impaired status, replenish reserves subsequent to loan charge-offs, and build general reserves for performing loans due to higher historical loss factors.
- **Non-interest income increased by \$3.134 million, or 21%, in 2012 over 2011, but declined by \$4.273 million, or 22%, in 2011 relative to 2010.** Significant fluctuations in non-interest income in 2012 were created by non-recurring adjustments that lowered costs associated with tax credit investments and thus boosted income, an increase in bank-owned life insurance (BOLI) income associated with deferred compensation plans, an increase in debit card interchange fees, and the fact that we recorded an impairment charge on equity investment securities in 2011 that wasn't repeated in 2012. The drop in 2011 relative to 2010 was also impacted by the other-than-temporary impairment charge, as well as a sizeable decrease in overdraft fee income, a decline in BOLI income associated with deferred compensation plans, and a lower level of gains on the sale of investments. Gains on the sale of investment securities totaled \$1.762 million in 2012, \$1.660 million in 2011, and \$2.643 million in 2010.
- **Operating expense, while reflecting favorable trends in 2012 and 2011, has been elevated relative to pre-recession years due in large part to net OREO costs and other credit-related expenses.** The drop of \$949,000, or 2%, in total operating expense in 2012 is due in large part to declining credit costs (including net foreclosed asset costs and lending-related legal expense), lower occupancy costs and lower marketing expense. The decline of \$4.033 million, or 8%, in 2011 was due mainly to a reduced level of OREO write-downs and OREO operating expense, as well as lower FDIC assessments.
- **The Company had a tax benefit of \$344,000 in 2012, a tax provision of \$564,000 in 2011, and a tax benefit of \$234,000 in 2010.** The tax benefits in 2012 and 2010 were primarily the result of lower taxable income relative to the Company's available tax credits, and a higher level of tax-exempt BOLI income.

The Company's assets totaled \$1.438 billion at December 31, 2012, relative to total assets of \$1.335 billion at December 31, 2011. Total liabilities were \$1.264 billion at the end of 2012 compared to \$1.167 billion at the end of 2011, and we had shareholders' equity totaling \$174 million at December 31, 2012 relative to \$169 million at December 31, 2011. The following summarizes key balance sheet changes during 2012:

- **Total assets increased by \$102 million, or 8%.** Investment securities, cash, and balances due from banks declined by a combined \$28 million, or 6%, but that drop was more than offset by an increase of \$126 million, or 17%, in net loan balances. Our loan growth in 2012 came primarily from the expansion of mortgage warehouse lending and growth in agricultural loans (both ag production and ag real estate loans). The balance of foreclosed assets was also up by \$4 million for the year.
- **Nonperforming assets ended 2012 with a balance of \$73 million, an increase of \$1 million, or 2%, for the year but still below the peak balance of \$80 million reported at September 30, 2009.** The net increase for the year is comprised of the \$4 million increase in foreclosed assets noted above, partially offset by a \$3 million net reduction in loans on non-accrual status. We had been making significant progress in reducing the balance of nonperforming loans for most of 2012, but much of that improvement was reversed in the fourth quarter subsequent to the downgrade to non-accrual status of two large loan relationships totaling approximately \$28 million. The Company's ratio of nonperforming assets to loans plus foreclosed assets fell to 8.10% at December 31, 2012 from 9.25% at December 31, 2011, due to the increase in gross loan balances.

- **Our allowance for loan and lease losses was \$13.9 million as of December 31, 2012, a decline of \$3.4 million, or 20%, relative to year-end 2011.** The drop during 2012 was due in part to certain loan charge-offs which were taken against previously-established specific reserves and thus did not require replenishment, as well as a reduction in general reserves consistent with improvement in the quality of the Company's performing loans. Due to the decline in the overall allowance and the increase in total loans, the allowance fell to 1.58% of total loans at December 31, 2012 from 2.28% at December 31, 2011. Pursuant to management's detailed analysis, the allowance as of the end of 2012 is expected to be sufficient to cover specifically identified probable losses on impaired loans and leases, as well as probable incurred losses inherent in the remaining loan portfolio.
- **Total deposits increased by \$88 million, or 8%, during 2012.** Non-maturity deposits were up \$100 million, or 14%, including significant increases in savings deposits, non-interest bearing demand deposits, and interest-bearing transaction accounts due in part to aggressive deposit acquisition programs and an intensified focus on business relationships. A drop in time deposits partially offset the increase in non-maturity deposits.
- **Total capital was \$174 million at December 31, 2012, reflecting an increase of \$5 million, or 3%, for the year.** Risk-based capital ratios declined, however, as capital was leveraged for organic loan growth. At December 31, 2012, the consolidated Company's Total Risk-Based Capital Ratio was 19.36%, its Tier One Risk-Based Capital Ratio was 18.11%, and its Tier One Leverage Ratio was 13.34%.

Results of Operations

The Company earns income from two primary sources. The first is net interest income, which is interest income generated by earning assets less interest expense on deposits and other borrowed money. The second is non-interest income, which primarily consists of customer service charges and fees but also comes from non-customer sources such as bank-owned life insurance. The majority of the Company's non-interest expenses are operating costs that relate to providing a full range of banking services to our customers.

Net Interest Income and Net Interest Margin

Net interest income was \$50.581 million in 2012, compared to \$52.957 million in 2011 and \$56.182 million in 2010. This represents declines of 4% in 2012 and 6% in 2011. The level of net interest income depends on several factors in combination, including but not necessarily limited to growth in earning assets, yields on earning assets, the cost of interest-bearing liabilities, the volume of earning assets relative to interest-bearing liabilities, and the mix of products which comprise the Company's earning assets, deposits, and other interest-bearing liabilities. Net interest income can also be impacted by the reversal of interest for loans placed on non-accrual status during the reporting period, and by the recovery of interest on loans that have been on non-accrual and are either sold or returned to accrual status.

The following Distribution, Rate and Yield table shows, for each of the past three years, the average balance of each significant balance sheet category and the amount of interest income or interest expense associated with each applicable category. The table also displays the calculated yields on each major component of the Company's investment and loan portfolios, the average rates paid on each key segment of the Company's interest-bearing liabilities, and our net interest margin.

(1) Average balances are obtained from the best available daily or monthly data and are net of deferred fees and related direct costs.

(2) Yields and net interest margin have been computed on a tax equivalent basis.

(3) Loans are gross of the allowance for possible loan losses. Net loan fees have been included in the calculation of interest income. Net loan Fees were \$5,476, \$(635,719) and \$(491,045) for the years ended December 31, 2012, 2011, and 2010 respectively.

(4) Non-accrual loans have been included in total loans for purposes of total interest earning assets.

(5) Net interest margin represents net interest income as a percentage of average interest-earning assets (tax-equivalent).

The Volume and Rate Variances table below sets forth the dollar difference in interest earned or paid for each major category of interest-earning assets and interest-bearing liabilities for the comparative periods, and the amount of such change attributable to changes in average balances (volume) or changes in average interest rates. Volume variances are equal to the increase or decrease in average balance multiplied by prior period rates, and rate variances are equal to the increase or decrease in rate times prior period average balances. Variances attributable to both rate and volume changes are calculated by multiplying the change in rate by the change in average balance, and have been allocated to the rate variance.

⁽¹⁾ Yields on tax exempt income have not been computed on a tax equivalent basis.

As shown above, the Company had a favorable volume variance of \$2.224 million in net interest income for 2012 relative to 2011. The variance was due primarily to growth of \$43 million in average interest-earning assets, but the benefit provided by growth in average interest-earning assets was muted to some extent by the fact that the growth was split between loans and lower-yielding investments. Furthermore, loan growth was generally concentrated in lower-yielding agricultural and commercial loans, while higher-yielding real estate loans and consumer loans declined. It should also be noted that our loan growth in 2012 occurred primarily in the latter half of the year, so the growth is not fully reflected in annual average balances. Strong growth in the average balances of low-cost non-maturity deposits and equity helped compensate for some of the unfavorable pressures on the volume variance. Also favorably impacting the volume variance was a \$9 million reduction in the average balance of nonperforming loans.

In contrast to the favorable volume variance for 2012 over 2011, the impact of interest rate changes led to an unfavorable rate variance of \$4.600 million in net interest income. Our weighted average yield on interest-earning assets was 49 basis points lower in 2012, reflecting a 74 basis point decline in our yield on investments and a 32 basis point drop in the weighted average yield on loans. The lower investment yield is due to the addition of investment securities and the reinvestment of cash from prepayments and maturing balances in a historically low rate environment. Lower loan yields resulted from growth in lower-yielding loan categories and runoff in higher-yielding categories, as well as a general decline in loan interest rates due to intense competition for quality loans. By comparison, our weighted average cost of interest-bearing liabilities was just 15 basis points lower, with the drop due primarily to the lack of competitive pressures on deposit rates and an improving deposit mix. The negative rate variance is exacerbated by our sizeable net interest position, which is the difference between interest-earning assets and interest-bearing liabilities. Our average net interest position in 2011, which is the base period for the rate variance calculation, was \$316 million, meaning that the yield decrease for interest-earning assets was applied to a much higher balance than the rate decrease for interest-bearing liabilities and had a greater impact on net interest income. Also contributing to the negative pressures on our rate variance was an increase in net interest reversals on loans placed on non-accrual status; we had \$276,000 in net interest reversals in 2012, relative to \$189,000 in 2011.

The Company's net interest margin, which is tax-equivalent net interest income as a percentage of average interest-earning assets, is affected by the same factors discussed above relative to rate and volume variances. Our net interest margin was 4.22% in 2012, a decline of 36 basis points relative to 2011. The principal negative factors impacting the Company's net interest margin in 2012 include relatively strong growth in lower-yielding investment balances in the first half of the year (although that trend began to reverse in the second half), a shift from higher yielding loan categories to lower-yielding loan types, lower loan yields across the board resulting from increased competition for quality loans, and an increase in net interest reversals. However, those negatives were partially offset by a relatively large increase in the average balance of non-interest bearing demand deposits, a shift in average interest-bearing deposit balances from higher-cost deposits into lower-cost deposit categories, and a drop in certain deposit rates.

Net interest income declined in 2011 relative to 2010 due to a drop of 32 basis points in our net interest margin, with the margin decline partially offset by a \$12 million increase in average interest-earning assets. The principle negative factors impacting our net interest margin in 2011 were a shift from average loan balances into lower-yielding investment balances, and lower loan yields resulting from increased competition for quality loans. Having a favorable effect on our net interest margin were a shift in average liability balances from higher-cost deposits and borrowings into lower-cost non-maturity deposits, a reduced reliance on interest-bearing liabilities, and a drop in average non-accruing loan balances.

Provision for Loan and Lease Losses

Credit risk is inherent in the business of making loans. The Company sets aside an allowance for loan and lease losses, a contra-asset account, through periodic charges to earnings which are reflected in the income statement as the provision for loan and lease losses. The severity of economic challenges has contributed to higher loan loss provisions for the past several years than in prior periods of strong economic growth, due to the negative impact of recessionary conditions on many of our borrowers and the resulting credit challenges in our loan portfolio. The Company's loan loss provision totaled \$14.210 million in 2012, \$12.000 million in 2011, and \$16.680 million in 2010. The provision was increased by \$2.210 million, or 18%, in 2012 relative to 2011, but reflects a decrease of \$4.680 million, or 28% for 2011 relative to 2010. These elevated loan loss provisions have been utilized to establish specific reserves for impaired loans that have migrated into impaired status, enhance specific reserves on other impaired collateral-dependent loans that might have experienced deterioration in the value of their underlying collateral, replenish reserves subsequent to loan charge-offs, and build general reserves for performing loans due to higher historical loss factors.

The Company's loan loss provisions have been sufficient to maintain an allowance for loan and lease losses at a level that, in management's judgment, is adequate to absorb probable loan losses related to specifically-identified impaired loans, as well as probable incurred losses in the remaining loan portfolio. When available information confirms that specific loans and leases, or portions thereof, are uncollectible, those amounts are immediately charged off against the allowance. Net loans charged off in 2012 totaled \$17.620 million, relative to \$15.855 million in 2011 and \$19.257 million in 2010. The Company's loan loss provision was lower than loan charge-offs for all three years,

since many of the charge-offs were taken against previously-established specific reserves and did not directly result in the need for reserve replenishment via the loan loss provision. The level of charge-offs also affects historical loss factors used in calculating general reserves for non-impaired loans, and higher loss factors can lead to a larger loan loss provision if it is determined that general reserves require enhancement. While this occurred to some extent in 2012, the impact was partially offset by the adjustment of qualitative factors pursuant to management's determination that credit risk in non-impaired loans has declined, as discussed in further detail below under "Allowance for Loan and Lease Losses."

The Company's policies for monitoring the adequacy of the allowance and determining loan amounts that should be charged off, and other detailed information with regard to changes in the allowance, are discussed below under "Allowance for Loan and Lease Losses." The process utilized to establish an appropriate allowance for loan and lease losses can result in a high degree of variability in the Company's loan loss provision, and consequently in our net earnings.

Non-interest Revenue and Operating Expense

The following table sets forth the major components of the Company's non-interest revenue and operating expense, along with relevant ratios, for the years indicated:

Non-Interest Revenue/Expense

Net non-interest income as a % of average interest-earning assets		-2.32%		-2.75%		-2.75%
Efficiency ratio ⁽¹⁾		66.81%		67.83%		67.25%

⁽¹⁾ Tax Equivalent

The overhead efficiency ratio in the table above represents total operating expense divided by the sum of fully tax-equivalent net interest and non-interest income (total revenue), adjusted to exclude the provision for loan losses, investment gains and losses, and other extraordinary gains and losses from the equation. Adjusted revenue declined slightly in 2012, but adjusted operating expense fell by a proportionately greater amount so our efficiency ratio was 102 basis points lower in 2012 than in 2011. Our efficiency ratio rose by 58 basis points in 2011 compared to 2010, since the drop in revenue was proportionately greater than the drop in operating expense.

The Company's results reflect an increase in total non-interest income of \$3.134 million, or 21%, for 2012 over 2011, but a decline of \$4.273 million, or 22%, in 2011 relative to 2010. While the primary reasons for these fluctuations are discussed in greater detail below, several items of a non-recurring nature have impacted non-interest income over the past few years. For 2012, those items include the following: Gains on the sale of investments totaling \$1.762 million; accrual adjustments which contributed to a drop of \$490,000 in costs associated with tax credit investments and other limited partnership investments, and thus increased income; life insurance proceeds totaling \$87,000; and, income on BOLI associated with deferred compensation plans totaling \$339,000 in 2012, relative to a net loss of \$92,000 on deferred compensation BOLI in 2011. In 2011, non-recurring items include the referenced loss on deferred compensation BOLI, a \$1.660 million gain on the sale of investment securities, and a \$1.370 million other-than-temporary impairment charge on equity investment securities. In 2010, non-recurring items include \$2.643 million in gains on investment securities, and \$238,000 in losses incurred upon the disposition of equipment that was acquired subsequent to the termination of operating leases. Total non-interest revenue was 1.47% of average earning assets in 2012, relative to 1.26% in 2011 and 1.64% in 2010.

The principal component of non-interest revenue, namely service charges on deposit accounts, increased by \$133,000, or 1%, in 2012 over 2011, since a drop in overdraft and returned item charges was more than offset by increases in other deposit-related income. Deposit service charges declined by \$1.669 million, or 15%, in 2011 relative to 2010, due to a drop in returned item and overdraft charges resulting from procedural changes and fee adjustments implemented pursuant to newly-enacted consumer-focused legislation and updated regulatory guidelines. The Company's ratio of service charge income to average transaction account balances was 1.7% in 2012, down from 2.0% in 2011 and 2.6% in 2010.

The next line item under other operating income is credit card fees, which consist primarily of credit card interchange fees. Despite the sale of all credit card balances in 2007, we still receive a portion of the interchange and interest income from credit cards issued in our name. Credit card fees declined by \$21,000, or 5%, in 2012 relative to 2011, but increased by \$20,000, or 5%, in 2011 over 2010.

Check card fees, which represent interchange fees from electronic funds transactions (EFT), increased by \$268,000, or 11%, in 2012 over 2011, and also increased by \$258,000, or 11%, in 2011 relative to 2010. The increases resulted from fees earned on incremental cards issued in association with new retail deposit accounts, as well as increased usage per card. The rising popularity of point-of-sale transactions leads us to believe that the upward trend in the number of such transactions will likely continue, although that will not necessarily translate into higher fees since interchange rates could decline.

Other service charges and fees also constitute a relatively large portion of non-interest income, with the principal components consisting of ATM fees from transactions not associated with deposit customers (also referred to as foreign ATM fees), currency order fees, other fees for merchant services, and operating lease income. Other service charges, commissions, and fees increased by \$111,000, or 6%, in 2012 over 2011, but declined by \$180,000, or 8%, in 2011 relative to 2010. The increase in 2012 came from relatively small increases in numerous categories, while the decline in 2011 was due to a drop in leasing income resulting from declining operating lease balances which was partially offset by increases in merchant fees and foreign ATM fees.

Bank-owned life insurance income increased by \$486,000, or 52%, in 2012 over 2011, but declined by \$448,000, or 32%, in 2011 relative to 2010. The fluctuations were primarily the result of income and losses on BOLI associated with deferred compensation plans, which is classified as "separate account" BOLI. The Company owns and derives income from two basic types of BOLI: "general account" and "separate account." At December 31, 2012, the Company had \$34.8 million invested in single-premium general account BOLI, which generates income that is used to help offset expenses associated with executive salary continuation plans, director retirement plans and certain other employee benefits. General account BOLI income is typically fairly consistent, with interest credit rates that do not change frequently, although a \$5 million additional investment in BOLI at the end of the third quarter of 2011 supplemented our general account BOLI income. In addition to general account BOLI, the Company had \$3.2 million invested in separate account BOLI at December 31, 2012, the earnings on which help offset deferred compensation accruals for certain directors and senior officers. Deferred compensation accounts have returns pegged to participant-directed investment allocations, and are thus subject to gains or losses which often contribute to signifi-

cant fluctuations in income from period to period. There was a gain on separate account BOLI totaling \$339,000 in 2012 relative to a loss of \$92,000 in 2011, for an absolute increase in separate account BOLI income of \$431,000 for the comparative years. The comparison for 2011 relative to 2010 reflects a drop of \$444,000 in separate account BOLI income, due to the \$92,000 loss in 2011 relative to a gain of \$352,000 in 2010. As noted, gains and losses on separate account BOLI are related to participant gains and losses on deferred compensation balances. Participant gains are accounted for as expense accruals which, combined with their associated tax effect, effectively offset income on separate account BOLI, while participant losses result in expense accrual reversals that effectively offset losses on separate account BOLI.

Gains on loan sales increased by \$44,000 or 32%, in 2012 over 2011, and also reflect an increase of \$34,000, or 32%, in 2011 over 2010. Loan sales have been increasing due to a rise in mortgage lending activity. In 2012, 2011 and 2010, gains on the sale of investments totaled \$1.762 million, \$1.660 million, and \$2.643 million, respectively, representing significant additions to income. The net gain on investments for 2012 was due primarily to gains realized in the fourth quarter, subsequent to the sale of approximately \$49 million in mortgage-backed and municipal securities to provide additional liquidity for loan growth. The net gain in 2011 came from the sale of \$43 million in select mortgage-backed securities, the proceeds of which were used to retire short-term debt and enable the non-renewal of certain higher-cost time deposits. The sale of securities in both 2012 and 2011 helped us reduce potential volatility and improve the overall quality of the bonds held in our investment portfolio, but contributed to a lower yield on investments. In 2011 we also recorded a \$1.370 million other-than-temporary impairment (OTTI) charge against equity investment securities, offsetting much of the income boost provided by the gain on the sale of investments. The investment gains realized in 2010 were taken pursuant to a portfolio restructuring in the third quarter that involved the sale of \$64 million in mortgage-backed securities.

The next line item reflects pass-through losses associated with our investments in low-income housing tax credit funds and other limited partnership investments. Those costs, which are netted out of revenue, declined by \$490,000, or 55%, in 2012 relative to 2011, but increased by \$77,000, or 10%, in 2011 over 2010. Annual fluctuations typically result from expense accrual adjustments made subsequent to the receipt of updated partnership financial statements, and the relatively large drop in 2012 was primarily the result of cumulative accrual adjustments that are not expected to be repeated in future years.

Other non-interest income includes gains and losses on the disposition of assets (other than foreclosed assets), life insurance proceeds, and rental income generated by the Company's alliance with Investment Centers of America (ICA). Other non-interest income improved by \$151,000, or 164%, in 2012 over 2011, and also reflects an increase of \$142,000 in 2011 relative to 2010. Other income in 2012 includes non-recurring life insurance proceeds totaling \$87,000. A non-recurring \$238,000 loss on the disposition of equipment acquired upon the termination of operating leases in 2010 was a factor in the comparative results for 2011 over 2010.

Total operating expense (non-interest expense) declined \$949,000, or 2%, in 2012 relative to 2011, and was down by \$4.033 million, or 8%, in 2011 relative to 2010. The reduction in 2012 resulted from favorable variances in numerous expense categories. The drop in 2011 relative to 2010 was due primarily to a reduced level of net OREO expenses and lower FDIC assessments. Non-interest expense includes the following non-recurring items and expenses related to ongoing credit issues: Net OREO expense of \$4.914 million in 2012, \$5.226 million in 2011, and \$7.572 million in 2010; a \$75,000 non-recurring expense offset in 2012 in conjunction with the renewal of our contract for debit transaction processing; vendor credits in the amount of \$181,000 received in 2011, for prior-year overcharges on processing software; a non-recurring accrual of \$240,000 in 2011 for potential expenses related to leases; and, a \$75,000 legal settlement paid in 2010 on an operations-related issue. Total non-interest expense declined to 3.79% of average earning assets for 2012, relative to 4.01% in 2011 and 4.39% in 2010.

The largest component of operating expense, namely salaries and employee benefits, increased by only \$65,000, or less than 1%, in 2012 over 2011, and declined by \$200,000, or 1%, in 2011 relative to 2010. All three years reflect reduced accruals for officer bonuses to adjust for Company, branch, and individual performance relative to internal targets. Additional components of compensation expense that can experience significant variability and are typically difficult to predict include salaries associated with successful loan originations, which are accounted for in accordance with FASB guidelines on the recognition and measurement of non-refundable fees and origination costs for lending activities, and accruals associated with employee deferred compensation plans. Loan origination salaries

that were deferred from current expense for recognition over the life of the related loans totaled \$2.745 million in 2012, \$2.586 million in 2011, and \$2.376 million in 2010, with the fluctuations due to variability in successful loan origination activity. Employee deferred compensation expense accruals totaled \$188,000 in 2012, relative to \$17,000 in 2011 and \$206,000 in 2010. As noted above in our discussion of BOLI income, the accruals associated with employee deferred compensation plans are related to separate account BOLI income and losses, as are directors deferred compensation accruals that are included in "other professional services," and the net income impact of all income/expense accruals related to deferred compensation is usually minimal. Salaries and benefits have been further impacted by normal annual salary adjustments, and strategic staff additions in recent years to help position the Company for future growth opportunities. The increase in deferred compensation expense accruals in 2012 was almost entirely offset by the increase in the deferral of loan origination salaries, thus the slight increase in total salaries and benefits was primarily due to regular annual increases and staff additions. The drop in total compensation expense in 2011 was due to a lower level of deferred compensation accruals and a higher level of deferred loan origination salaries, with those beneficial variances partially offset by an increase in expense accruals associated with stock options. Salaries and benefits increased to 44.44% of total operating expense in 2012, from 43.42% in 2011 and 40.41% in 2010, with the increase in the ratio resulting from a declining level of total operating expense rather than a rising level of salaries and benefits. The number of full-time equivalent staff employed by the Company totaled 399 at the end of 2012, 383 at the end of 2011, and 390 at the end of 2010.

Total rent and occupancy costs, including furniture and equipment expense, dropped by \$377,000, or 6%, in 2012 relative to 2011, and also fell by \$282,000, or 4%, in 2011 as compared to 2010. The decline in 2012 is due mainly to lower costs resulting from the purchase of our headquarters office building at the end of 2011, and a drop in depreciation expense on furniture and equipment. The largest impact for 2011 came from the January 2011 closure of a branch with a relatively costly lease, and lower maintenance/repair costs.

Advertising and marketing costs declined by \$280,000, or 14%, in 2012 relative to 2011, but were up by \$72,000, or 4%, in 2011 over 2010. The drop in 2012 was due mainly to a reduction in costs associated with our direct-mail marketing campaign for deposits, as well as lower television and print advertising costs. Management expects marketing costs to increase in 2013, perhaps back to 2011 levels, due to the enhancement of our direct-mail campaign and an increase in image advertising.

Data processing costs reflect an increase of \$284,000, or 19%, in 2012 over 2011, but a drop of \$214,000, or 12%, in 2011 as compared to 2010. The increase in 2012 was due in large part to \$181,000 in non-recurring vendor credits which were received in the first quarter of 2011 for prior-year overcharges on processing software, as well as higher internet banking costs. The decline for 2011 also resulted largely from the referenced vendor credits.

Deposit services costs dropped by \$250,000, or 10%, in 2012, and by \$192,000, or 7%, in 2011. The decline for 2012 was due in part to a \$75,000 non-recurring expense offset in conjunction with the renewal of our contract for debit card transaction processing, as well as lower operating costs associated with online deposit products, debit card processing and other miscellaneous deposit cost categories. The decline for 2011 was due primarily to lower costs associated with our online deposit products, net of an increase in debit card processing costs.

Loan services costs, which include net expenses associated with foreclosed assets, credit card costs, and other loan processing costs, were reduced by \$359,000, or 6%, in 2012 relative to 2011, and by \$2.029 million, or 24%, in 2011 relative to 2010. Much of the variability in loan costs in recent years has been driven by net expenses on foreclosed assets, which is comprised of write-downs taken subsequent to re-appraisals, OREO operating expense (including property taxes), and losses on the sale of foreclosed assets, net of rental income on OREO properties and gains on the sale of foreclosed assets. Net foreclosed asset expenses have been trending down, due primarily to the fact that OREO write-downs have been declining as real estate values have started to stabilize. For 2011 over 2010, the drop in OREO costs was partially offset by increases in costs associated with collections and appraisals and the aforementioned non-recurring accrual of \$240,000 in 2011 for potential expenses on operating leases.

The "other operating costs" category includes telecommunications expense, postage, and other miscellaneous costs. Telecommunications expense increased by \$258,000, or 20%, in 2012, and by \$135,000, or 12%, in 2011, due to rate increases as well as costs associated with the addition and enhancement of data circuits. Postage expense increased by \$142,000, or 25%, in 2012, and by \$18,000, or 3%, in 2011, with the increase in 2012 resulting primarily from

additional mailings for compliance disclosures relating to deposit account overdrafts. Other miscellaneous costs fell by \$121,000, or 14%, in 2012, and by \$173,000, or 16%, in 2011, due to lower depreciation on operating leases and tighter expense controls in various other areas.

Legal and accounting costs declined by \$467,000, or 27%, in 2012 relative to 2011, but increased by \$443,000, or 35%, in 2011 over 2010. The reduction in 2012 was mainly from lower legal costs for loan collections, while the increase for 2011 was due to higher legal costs for collections and consulting costs which were necessitated by the numerous changes in regulatory expectations and the associated promulgation of new guidance on overdrafts.

Other professional services costs include FDIC assessments and other regulatory costs, directors' costs, certain insurance costs, and certain shareholder expenses. This category was substantially the same in 2012 as in 2011, since a \$215,000 increase in accruals for directors' deferred compensation was effectively offset by a lower accrual for regulatory assessments. Other professional services costs fell by \$1.520 million, or 41%, in 2011 relative to 2010, due in part to a lower accrual for FDIC assessments resulting from the FDIC's implementation of a new rate structure in 2011 and the Company's reduced risk profile. The 2011 variance in other professional service expense also reflects a decline in director retirement plan accruals, and a drop in deferred compensation accruals for the Company's directors due to losses on directors' deferred compensation plans in 2011 relative to gains in 2010. As with deferred compensation accruals for employees, directors' deferred fee accruals are related to separate account BOLI income and losses, and the net income impact of all income/expense accruals related to deferred compensation is usually minimal.

Stationery and supply costs increased \$33,000, or 5%, in 2012, but declined by \$10,000, or 1%, in 2011. Sundry and teller costs increased \$143,000, or 38%, in 2012 over 2011, due to a surge in debit card fraud. Our debit card processor implemented additional fraud detection and prevention capabilities in October 2012 which should help reduce losses from levels experienced in 2012, although no assurance can be provided in that regard. Sundry and teller costs fell by \$81,000, or 18%, in 2011, due mainly to a non-recurring settlement of \$75,000 paid to a deposit customer in 2010 for a fraud loss.

Income Taxes

The Company sets aside its provision for income taxes on a monthly basis. As indicated in Note 9 in the Notes to Consolidated Financial Statements, the amount of such provision is determined by applying the Company's statutory income tax rates to pre-tax book income as adjusted for permanent differences between book income and taxable income. Those permanent differences include, but are not limited to, tax-exempt interest income, increases in the cash surrender value of BOLI (BOLI income), California Enterprise Zone deductions, and certain book expenses that are not allowed as tax deductions. Tax-exempt interest income is generated primarily by the Company's investments in state, county and municipal bonds, which provided \$2.703 million in federal tax-exempt income in 2012, \$2.834 million in 2011, and \$2.709 million in 2010. Tax credits, including hiring tax credits as well as those generated by our investments in low-income housing tax credit funds, are applied as a direct reduction to our tax liability for both book and tax purposes. The Company had investments totaling \$8.7 million in low-income housing tax credit funds as of December 31, 2012. Those investments, which are included in other assets rather than in our investment portfolio, have generated substantial tax credits over the past few years, with about \$1.4 million in credits available for the 2012 tax year and \$1.6 million in tax credits utilized in 2011. The credits are dependent upon the occupancy level of the housing projects and income of the tenants, and cannot be projected with complete certainty. Furthermore, our capacity to utilize them will continue to depend on our ability to generate sufficient pre-tax income. Because we have not invested in additional tax credit funds for the past few years, the level of low-income housing tax credits available for future years will taper off until they are substantially utilized by the end of 2018. This means that even if taxable income stayed at the same level through 2018, our tax accrual rate would gradually increase.

The Company had an income tax benefit of \$344,000 in 2012, relative to income tax expense of \$564,000 in 2011 and an income tax benefit of \$234,000 in 2010. The negative income tax provisions for 2012 and 2010 are primarily the result of lower taxable income relative to the Company's available tax credits, but they were also favorably affected by a higher level of BOLI income. As noted above, tax-exempt interest income on municipal securities was not materially different in 2012, 2011, and 2010.

In addition to permanent differences, some income and expense items are recognized in different years for tax purposes than when applying generally accepted accounting principles, leading to timing differences between the Company's actual tax liability and the amount accrued for this liability based on book income. These temporary differences comprise the "deferred" portion of the Company's tax expense, which is accumulated on the Company's books as a deferred tax asset or deferred tax liability until such time as it reverses. At the end of 2012, the Company had a net deferred tax asset of \$12.0 million.

Financial Condition

Total assets of \$1.438 billion at the end of 2012 reflect an increase of \$102 million, or 8%, for the year, due to growth in loans. In contrast, we experienced loan growth challenges in 2011, 2010, and 2009 as a result of less-than-ideal economic conditions and heightened competition for quality loans. The \$122 million increase in gross loans during 2012 was funded in large part by core non-maturity deposits, which were up \$100 million for the period. Investment securities experienced growth during much of 2012, but reflect a net reduction by year-end of \$26 million, or 6%, due to the fourth quarter sale of approximately \$49 million in balances that consisted primarily of mortgage-backed securities.

Even though the regional economy appears to have stabilized, most of our market areas have not improved materially. Some of our borrowers are still experiencing the residual effects of lower consumer spending and economic activity, and our asset quality is still being negatively impacted. Nonperforming assets, including nonperforming loans and foreclosed assets, ended the year at \$72.8 million, an increase of \$1.4 million, or 2%, relative to year-end 2011. Nonperforming loans had been trending substantially lower for much of the year, but increased in the fourth quarter of 2012 due to the downgrade of two large loan relationships totaling about \$28 million. The Company's allowance for loan and lease losses was 1.58% of total loans at December 31, 2012, a drop from the 2.28% ratio at the end of 2011 due to significant growth in total loans, combined with the fact that net loan charge-offs exceeded the loan loss provision by \$3.410 million in 2012. Charge-offs were higher than the provision because some of the charge-offs were made against previously established specific reserves and thus did not require replenishment.

We still have a very strong capital position, due in part to our registered direct offering in 2010 and private placement in 2009, and positive net income throughout the recession. Furthermore, our liquidity position has remained strong for the past couple of years due to growth in customer deposits and the runoff of a large volume of wholesale-sourced brokered deposits and other borrowings, in addition to a substantial increase in unpledged investments. Our robust capital position and access to liquidity resources position us well to take advantage of growth opportunities that might arise as the economy improves, although no assurance can be provided in that regard.

Significant changes in the relative size of balance sheet components in 2012 include net loans and leases, which increased to 60% of total assets at the end of 2012 from 55% at the end of 2011, and investment securities, which declined to 26% of total assets at the end of 2012 from 30% at the end of 2011. On the liability side, non-maturity deposits increased to 70% of total deposits at the end of 2012 from 67% at the end of 2011, while customer time deposits (including CDARS) fell to 29% of total deposits at December 31, 2012 from 32% at December 31, 2011. The major components of the Company's balance sheet are individually analyzed below, along with information on off-balance sheet activities and exposure.

Loan and Lease Portfolio

The Company's loan and lease portfolio represents the single largest portion of invested assets, substantially greater than the investment portfolio or any other asset category, and the quality and diversification of the loan and lease portfolio are important considerations when reviewing the Company's financial condition. The Company is not involved with chemicals or toxins that might have an adverse effect on the environment, thus its primary exposure to environmental legislation is through its lending activities. The Company's lending procedures include steps to identify and monitor this exposure in an effort to avoid any related loss or liability. The Selected Financial Data table in Item 6 above reflects the amount of loans and leases outstanding at December 31st for each year from 2008 through 2012, net of deferred fees and origination costs and the allowance for loan and lease losses. The Loan and Lease Distribution tables that follow set forth by loan type the Company's gross loans and leases outstanding, and the percentage distribution in each category at the dates indicated. The first table provides the loan distribution for the past

five years, with a level of detail consistent with 10-K disclosures in previous years. The second table provides the loan distribution as of the two most recent year-ends using the loan categories that have been disclosed in our recent quarterly reports, which include a greater level of detail for real estate loans than is available for the five-year disclosure. The gross balances shown include nonperforming loans by type, but do not reflect any deferred or un-amortized loan origination, extension, or commitment fees, or deferred loan origination costs.

The Company's gross loans and leases totaled \$880 million at the end of 2012, an increase of \$122 million, or 16%, since the end of 2011. Loan balances had been declining for the past few years due to reductions associated with the resolution of impaired loans and runoff in the normal course of business, but they experienced a significant increase in 2012 due in large measure to growth in balances outstanding on mortgage warehouse lines (a subcomponent of commercial and industrial loans). While the Company has engaged in mortgage warehouse lending on a limited basis for the past several years, the surge in balances in 2012 is primarily the result of hiring an experienced mortgage warehouse lender with contacts throughout California, our implementation of new software to automate the process and provide additional internal controls, and recent market opportunities created by an increase in refinancing activity and the decision of certain competitors to focus principally on larger mortgage lenders. Since mortgage lending activity is strongly correlated to interest rates and has historically been subject to significant fluctuations, no assurance can be provided with regard to our ability to maintain or continue to grow mortgage warehouse balances in the future.

During 2012, commercial loans grew by \$158 million, or 159%, increasing to 29.31% of total loans at December 31, 2012 from 13.12% at December 31, 2011. Mortgage warehouse lines account for \$142 million of the growth in commercial loans, with net growth of about \$16 million in other commercial loan categories. Furthermore, loans secured by farmland (ag mortgage loans) were up almost \$12 million, or 20%, and agricultural production loans increased by \$5 million, or 32%. The growth in ag mortgage loans was offset by declining balances in other real-estate loan categories, thus total real-estate secured loans declined by \$31 million, or 5%, during 2012. Consumer loans were also down \$7 million, or 20%, and direct finance leases fell by almost \$3 million, or 37%. Management has made selective personnel changes over the past few years and has established branch objectives weighted toward high-quality loan growth, to help ensure that growth is not concentrated solely in one segment of the portfolio and to counter factors that have impeded the Company's loan growth, such as weak loan demand, tightened credit criteria for real estate loans, and heightened competition. Furthermore, there is anecdotal evidence that certain sectors of the local economy are beginning to improve, which could also benefit loan growth. We have seen a recent increase in lending activity in areas other than mortgage warehouse loans, but no assurance can be provided that this will be sustained and that loan growth will continue, especially in the near term.

Although not reflected in the loan totals above and not currently comprising a material segment of our lending activities, the Company occasionally originates and sells or participates out portions of certain commercial real estate loans, agricultural or residential mortgage loans, and other loans to non-affiliated investors, and we currently provide servicing for a small number of SBA loans.

Loan and Lease Maturities

The following table shows the maturity distribution for total loans and leases outstanding as of December 31, 2012, including non-accruing loans, grouped by remaining scheduled principal payments.

Loans and Lease Maturity

(dollars in thousands)

	As of December 31, 2012						
	Three months or less	Three months to twelve months	One to five years	Over five years	Total	Floating rate: due after one year	Fixed rate: due after one year
Agricultural	\$ 1,519	\$ 15,998	\$ 3,362	\$ 1,603	\$ 22,482	\$ 1,985	\$ 2,980

Total	\$ 205,013	\$ 89,747	\$ 146,954	\$ 438,081	\$ 879,795	\$ 231,250	\$ 353,785

⁽¹⁾ Includes Small Business and Administration Loans

For a comprehensive discussion of the Company's liquidity position, balance sheet re-pricing characteristics, and sensitivity to interest rates changes, refer to the "Liquidity and Market Risk" section of this discussion and analysis.

Off-Balance Sheet Arrangements

The Company makes commitments to extend credit to its customers in the normal course of business, as long as there are no violations of conditions established in contractual arrangements. The effect on the Company's revenues, expenses, cash flows and liquidity from unused portions of commitments to provide credit cannot be reasonably predicted, because there is no certainty that lines of credit will ever be fully utilized. Total unused commitments to extend credit were \$225 million at December 31, 2012, as compared to \$154 million at December 31, 2011. Those numbers include \$29 million in home equity lines of credit at December 31, 2012, and \$31 million at December 31, 2011. The increase in unused commitments during 2012 was due to an increase in undisbursed commitments on mortgage warehouse lines, and the addition of the unused portions of deposit account overdraft lines that were formalized during 2012. Unused commitments represented 26% of gross loans and leases outstanding at

December 31, 2012 and 20% at December 31, 2011. In addition to unused loan commitments, the Company had undrawn letters of credit totaling \$15 million at December 31, 2012 and \$20 million at December 31, 2011.

These off-balance sheet obligations represent potential credit risk to the Company, and a \$197,000 reserve for unfunded commitments is reflected as a liability in our consolidated balance sheet at December 31, 2012. For more information regarding the Company's off-balance sheet arrangements, see Note 11 to the consolidated financial statements in Item 8 herein.

Contractual Obligations

At the end of 2012, the Company had contractual obligations for the following payments, by type and period due:

Contractual Obligations

(dollars in thousands)

	Payments Due by Period				
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Long-term debt obligations	\$ 35,928	\$ 5,000	\$ -	\$ -	\$ 30,928
Operating lease obligations	9,054	1,005	1,848	1,384	4,817
Other long-term obligations	962	-	-	-	962
Total	<u>\$ 45,944</u>	<u>\$ 6,005</u>	<u>\$ 1,848</u>	<u>\$ 1,384</u>	<u>\$ 36,707</u>

Nonperforming Assets

Nonperforming assets (NPA's) are comprised of loans for which the Company is no longer accruing interest, and foreclosed assets, including mobile homes and other real estate owned (OREO). OREO consists of properties acquired by foreclosure or similar means, which the Company is offering or will offer for sale. Nonperforming loans and leases result when reasonable doubt exists with regard to the Company's ability to collect all principal and interest on a loan or lease. At that point, we stop accruing interest on the loan or lease in question, and reverse any previously-recognized interest to the extent that it is uncollected or associated with interest-reserve loans. Any asset for which principal or interest has been in default for a period of 90 days or more is also placed on non-accrual status, even if interest is still being received, unless the asset is both well-secured and in the process of collection. If the Bank grants a concession to a borrower in financial difficulty, the loan falls into the category of a troubled debt restructuring (TDR). TDR's may be classified as either nonperforming or performing loans depending on their accrual status.

The tables that follow present comparative data for the Company's nonperforming assets and performing TDR's. The first table provides those numbers for the past five years, with a level of detail consistent with 10-K disclosures in previous years. The second table provides nonperforming assets as of the two most recent year-ends using the loan categories that have been disclosed in our recent quarterly reports, which include a greater level of detail for nonperforming real estate loans than is available for the five-year disclosure.

⁽¹⁾ Performing TDRs are not included in nonperforming loans above, nor are they included in the numerators used to calculate the ratios disclosed in this table.

Nonperforming assets comprised 4% of total loans and leases plus foreclosed assets at the end of 2008, but have escalated since then due to deterioration in economic conditions and the associated negative impact on our borrowers. Total NPA's increased by \$1.4 million, or 2%, during 2012, but fell slightly as a percentage of gross loans and leases plus foreclosed assets due to growth in loans. Nonperforming loans declined by \$3.0 million, or 5%, but foreclosed assets increased by \$4.4 million, or 29%. As noted above, nonperforming loans had been trending substantially lower for much of the year, but increased in the fourth quarter of 2012 due to the addition of two large relationships totaling about \$28 million. One of those relationships consists of a \$7 million note which the Company is currently negotiating to sell, although no assurance can be provided that a sale will be consummated. The other relationship is comprised of cross-collateralized development loans and loans secured by income properties, which were current per the terms of the restructured loan agreements as of year-end and which, when viewed in aggregate, are adequately collateralized and guaranteed by a borrower with strong net worth. The relationship was downgraded and placed on non-accrual status to accelerate the reduction of principal, which could ultimately provide management with a higher degree of confidence that all principal and interest due on the loans will eventually be collected, although no assurance can be provided in that regard.

Non-accruing loan balances secured by real estate comprised \$46.6 million of total nonperforming loans at December 31, 2012, and reflect a net increase of \$467,000, or 1%, during the year. Gross additions to nonperforming real estate loans totaled \$43.4 million for 2012, including the aforementioned relationships transferred in the fourth quarter. Partially offsetting the increase created by additional real estate loans being placed on non-accrual status during 2012 were net pay-downs on nonperforming real estate loans of \$10.1 million, charge-offs totaling \$8.7 million, \$22.5 million in transfers to OREO, and the return to accrual status of \$1.7 million in balances. Nonperforming commercial and SBA loans declined by a combined \$2.7 million, or 37%, during 2012, ending the period at \$4.5 million. Gross additions to nonperforming commercial and SBA loans totaled \$2.3 million for 2012, but additions were more than offset by net pay-downs of \$1.9 million and the charge-off of \$2.8 million in nonperforming commercial loan balances. Nonperforming consumer loans, which are largely unsecured, declined by \$1.0 million, or 47%, to a total of \$1.1 million at December 31, 2012, due primarily to charge-offs during the year.

The balance of nonperforming loans at December 31, 2012 includes \$33.5 million in TDR's and other loans that were paying as agreed under modified terms or forbearance agreements but were still classified as nonperforming. As shown in the table, we also had \$18.7 million in loans classified as performing TDR's for which we were still accruing interest at December 31, 2012, relative to a balance of \$36.1 million at December 31, 2011. Performing TDR's reflect a reduction of \$17.4 million for the year, since approximately \$18 million of the loans in the two large relationships placed on non-accrual status in the fourth quarter of 2012 were performing TDR's prior to being downgraded. Notes 2 and 4 in the Notes to Consolidated Financial Statements provide a more comprehensive disclosure of TDR balances and activity within recent periods.

As noted above, foreclosed assets increased \$4.4 million, or 29%, during 2012, due to the migration of \$22.5 million in nonperforming real estate loans into OREO, less OREO sold and any write-downs during that period. A few large loans which were foreclosed on during 2012 were also subsequently sold during the year. The balance of foreclosed assets at December 31, 2012 had an aggregate carrying value of \$19.8 million, and was comprised of 69 properties classified as OREO and three mobile homes. Much of our OREO at year-end 2012 consisted of vacant lots or land, but there were also nine residential properties totaling \$1.5 million and 12 commercial buildings with a combined book balance of \$7.3 million. At the end of 2011 foreclosed assets totaled \$15.4 million, comprised of 66 properties in OREO and five mobile homes. All foreclosed assets are periodically evaluated and written down to their fair value less expected disposition costs, if lower than the then-current carrying value.

An action plan is in place for each of our non-accruing loans and foreclosed assets and they are all being actively managed or marketed. Collection efforts are continuously pursued for all nonperforming loans, but no assurance can be provided that they will be resolved in a timely manner or that nonperforming balances will not increase further.

Allowance for Loan and Lease Losses

The allowance for loan and lease losses, a contra-asset, is established through a provision for loan and lease losses. It is maintained at a level that is adequate to absorb specifically identified probable losses on impaired loans and leases, as well as probable incurred losses inherent in the remaining loan portfolio. When available information confirms

that specific loans and leases, or portions thereof, are uncollectible, those amounts are immediately charged off against the allowance. Recoveries are generally recorded only when cash payments are received subsequent to the charge off. Note 2 in the Notes to Consolidated Financial Statements provides a more comprehensive discussion of the accounting guidance we conform to and the methodology we use to determine an appropriate allowance for loan and lease losses.

At December 31, 2012, our allowance for loan and lease losses was \$13.9 million, or 1.58% of gross loans and leases, a 20% decline from the \$17.3 million allowance at December 31, 2011 which was 2.28% of gross loans and leases. The Company's total allowance was 26.13% of nonperforming loans at December 31, 2012, relative to 30.80% at December 31, 2011. The \$3.4 million reduction in the allowance in 2012 was due in part to the write-down of certain impaired collateral-dependent loan balances against previously-established specific reserves, which did not directly lead to the need for reserve replenishment, as well as a reduction in general reserves consistent with improvement in the quality of the Company's performing loans. Despite substantial charge-offs against previously-established specific reserves, reserves for impaired loans declined by only \$1.6 million during 2012, since the impact of charge-offs was partially offset by the establishment of specific reserves for loans migrating to impaired status and the enhancement of specific reserves to reflect updated expectations with regard to realizable values. General reserves for incurred losses on performing loans declined by \$1.8 million, or 21%, due to the adjustment of qualitative factors to reflect management's assessment that default risk has declined. We believe that default risk is lower because certain higher-risk balances originated prior to the recession have migrated out of performing loans due to payoffs or performance issues, and many of the remaining loans were originated in recent years using more stringent credit criteria and are thus deemed less likely to experience losses. The decline in the allowance for loan and lease losses resulting from the adjustment of qualitative factors was partially offset by the establishment of loss reserves for new loan growth, and the refinement of proxy loss rates which are incorporated into the model when there is insufficient data to utilize the Bank's own historical loan rates. An allowance for potential losses inherent in unused commitments, totaling \$197,000 at December 31, 2012, is included in other liabilities.

The table that follows summarizes the activity in the allowance for loan and lease losses for the periods indicated:

Net Loan and Lease Charge-offs to Average Loans and Leases	2.23%	2.06%	2.26%	1.40%	1.79%
Allowance for Loan and Lease Losses to Gross Loans and Leases at End of Period	1.58%	2.28%	2.63%	2.68%	1.60%
Allowance for Loan Losses to Non-Performing Loans	26.13%	30.80%	46.00%	50.49%	50.67%
Net Loan and Lease Charge-offs to Allowance for Loan Losses at End of Period	127.01%	91.74%	91.10%	54.62%	110.23%
Net Loan Charge-offs to Provision for Loan and Lease Losses	124.00%	132.13%	115.45%	60.04%	85.52%

As shown in the table immediately above, the Company's provision for loan and lease losses was increased by \$2.210 million, or 18%, for 2012 relative to 2011. There was also an increase in net loans charged off in 2012, which were up by \$1.765 million, or 11%, for the reasons noted above in the "Provision for Loan and Lease Losses"

section. Gross real estate loan charge-offs totaled \$11.108 million in 2012, reaching their highest level since the beginning of the recession and representing an increase of \$512,000 over 2011, due in part to continued incremental write-downs on collateral-dependent loans. Gross charge-offs for commercial loans (including SBA-guaranteed loans) and consumer loans, at \$4.270 million and \$2.568 million, respectively, also remained at relatively high levels in 2012. Recoveries of loan principal that had previously been charged off, which were credited back to the allowance for loan and lease losses, totaled \$1.158 million in 2012, approximately the same as in 2011. Since our allowance for loan and lease losses is maintained at a level to cover probable losses on specifically identified loans as well as probable incurred losses in the remaining loan portfolio, any shortfall in the allowance created by loan charge-offs is typically covered by month-end, and always by quarter-end. Additional details on our provision for loan and lease losses and its relationship to actual charge-offs is contained above in the "Provision for Loan and Lease Losses" section.

The Company's allowance for loan and lease losses at December 31, 2012 represents management's best estimate of probable losses in the loan portfolio as of that date. Fluctuations in credit quality, changes in economic conditions, or other factors could induce us to augment or reduce the allowance, however, and no assurance can be given that the Company will not experience substantial losses relative to the size of the allowance.

Provided below is a summary of the allocation of the allowance for loan and lease losses for specific loan categories at the dates indicated. The allocation presented should not be viewed as an indication that charges to the allowance will be incurred in these amounts or proportions, or that the portion of the allowance allocated to a particular loan category represents the total amount available for charge-offs that may occur within that category.

Investments

The Company's investments consist of debt and marketable equity securities (together, the "investment portfolio"), investments in the time deposits of other banks, surplus interest-earning balances in our Federal Reserve Bank account, and overnight fed funds sold. Surplus Federal Reserve Bank balances and fed funds sold to correspondent banks represent the investment of temporary excess liquidity. The Company's investments serve several purposes: 1) they provide liquidity to even out cash flows from the loan and deposit activities of customers; 2) they provide a source of pledged assets for securing public deposits, bankruptcy deposits and certain borrowed funds which require collateral; 3) they constitute a large base of assets with maturity and interest rate characteristics that can be changed more readily than the loan portfolio, to better match changes in the deposit base and other funding sources of the Company; 4) they are an alternative interest-earning use of funds when loan demand is light; and 5) they can provide partially tax exempt income. Aggregate investments were 28% of total assets at December 31, 2012, compared to 32% at December 31, 2011.

We had no fed funds sold at December 31, 2012 or 2011. Interest-bearing balances held at other banks, consisting primarily of excess balance sheet liquidity placed in our Federal Reserve Bank account, totaled \$20 million at both December 31, 2012 and December 31, 2011. The book balance of our investment portfolio was \$380 million at December 31, 2012, relative to \$406 million at the end of 2011. In the first quarter of 2012, surplus liquidity which

was generated from growth in deposits and loan runoff was deployed into longer-term, agency-issued mortgage-backed securities and municipal bonds. However, we sold approximately \$49 million in investment securities in the fourth quarter to help provide liquidity for loan growth, and our investment portfolio thus reflects a decline of \$26 million, or 6%, for the year. Although the Company currently has the intent and the ability to hold the securities in its investment portfolio to maturity, the securities are all marketable and are classified as “available for sale” to allow maximum flexibility with regard to interest rate risk and liquidity management.

The following Investment Portfolio table reflects the amortized cost and fair market values for each primary category of investments for the past three years.

State and political subdivisions	70,736	73,986	67,851	71,340	70,201	70,102
Equity securities	1,336	1,840	1,336	1,347	2,705	1,423
Total investment securities	<u>\$ 373,866</u>	<u>\$ 380,188</u>	<u>\$ 399,946</u>	<u>\$ 406,471</u>	<u>\$ 330,180</u>	<u>\$ 331,730</u>

U.S. Government agency securities increased by \$1 million, or 47%, in 2012, since maturing balances were more than offset by purchases during the year. Mortgage-backed securities declined by \$30 million, or 9%, during 2012, as purchases during the year were not of sufficient volume to make up for the aforementioned sale of bonds in the fourth quarter. The balance of municipal bonds increased by close to \$3 million, or 4%, as the Company has taken advantage of relative value in that sector. All newly purchased municipal bonds have strong underlying ratings. No equity securities were bought or sold during 2012, although the market value of those securities increased by \$493,000, or 37%. Investment securities pledged as collateral for FHLB borrowings, repurchase agreements, public deposits and for other purposes as required or permitted by law totaled \$179 million at December 31, 2012 and \$208 million at December 31, 2011, leaving \$200 million in unpledged debt securities at December 31, 2012 and \$197 million at December 31, 2011. Securities pledged in excess of actual pledging needs, and thus available for liquidity purposes if necessary, totaled \$79 million at December 31, 2012 and \$112 million at December 31, 2011.

The investment maturities table below summarizes contractual maturities for the Company’s investment securities and their weighted average yields at December 31, 2012. The actual timing of principal payments may differ from remaining contractual maturities, because obligors may have the right to prepay certain obligations.

Cash and Due from Banks

Cash on hand and non-interest bearing balances due from correspondent banks totaled \$42 million at the end of 2012 and \$43 million at the end of 2011, comprising 3% of total assets at December 31, 2012 and 2011. The actual balance of cash and due from banks at any given time depends on the timing of collection of outstanding cash items, among other things, and is subject to significant fluctuation in the normal course of business. While cash flows are normally predictable within limits, those limits are fairly broad and the Company manages its short-term cash position through the utilization of overnight loans to and borrowings from correspondent banks, including the Federal Reserve Bank and the Federal Home Loan Bank. Should a large “short” overnight position persist for any length of time, the Company typically raises money through focused retail deposit gathering efforts or by adding brokered time deposits. If a “long” position is prevalent, the Company will let brokered deposits or other wholesale borrowings roll off as they mature, or might invest excess liquidity in higher-yielding, longer-term bonds.

Because of frequent balance fluctuations, a more accurate gauge of cash management efficiency is the average balance for the period. The \$37 million average of non-earning cash and due from banks for 2012 was higher than the \$35 million average for 2011, due in part to extra cash kept on hand to accommodate greater day-to-day fluctuations associated with a higher level of lending activity.

Premises and Equipment

Premises and equipment are stated on our books at cost, less accumulated depreciation and amortization. The cost of furniture and equipment is expensed as depreciation over the estimated useful life of the related assets, and leasehold improvements are amortized over the term of the related lease or the estimated useful life of the improvements, whichever is shorter. The following premises and equipment table reflects the original cost, accumulated depreciation and amortization, and net book value of fixed assets by major category, for the years noted:

Premises and Equipment

(dollars in thousands)

	As of December 31,								
	2012			2011			2010		
	Cost	Accumulated Depreciation and Amortization	Net Book Value	Cost	Accumulated Depreciation and Amortization	Net Book Value	Cost	Accumulated Depreciation and Amortization	Net Book Value
Land	\$ 2,607	\$ -	\$ 2,607	\$ 2,607	\$ -	\$ 2,607	\$ 2,549	\$ -	\$ 2,549
Buildings	15,720	7,259	8,461	16,662	6,843	9,819	12,322	5,548	6,774
Leasehold improvements	10,496	3,652	6,844	8,723	3,066	5,657	9,880	3,389	6,491
Construction in progress	4	-	4	12	-	12	1,033	-	1,033
Furniture and equipment	20,476	16,562	3,914	22,092	19,466	2,626	21,378	18,035	3,343
Total	\$ 49,303	\$ 27,473	\$ 21,830	\$ 50,096	\$ 29,375	\$ 20,721	\$ 47,162	\$ 26,972	\$ 20,190

Net premises and equipment increased by \$1.1 million, or 5%, during 2012, due in large part to the purchase and installation of upgraded ATM's. The net book value of the Company's aggregate premises and equipment was 1.5% of total assets at December 31, 2012, and 1.6% at December 31, 2011. Depreciation and amortization included in occupancy and equipment expense was \$2.3 million for the year ended December 31, 2012, as compared to \$2.5 million in 2011. Depreciation on equipment leased to others is reflected in other operating costs.

Other Assets

The Company's goodwill, shown as a separate line item on the balance sheet, totaled \$5.5 million at December 31, 2012 and 2011. It consists solely of goodwill that was generated in connection with our acquisition of Sierra National Bank in 2000. The Company's goodwill is evaluated annually for potential impairment, and because the estimated fair value of the Company exceeded its book value (including goodwill) as of the measurement date and no impairment was indicated, no further testing was deemed necessary and it was determined that no goodwill impairment existed.

The line item for “other assets” on the Company’s balance sheet totaled \$81.4 million at December 31, 2012, roughly the same as at December 31, 2011. At year-end 2012, other assets included as its largest components \$38.0 million in bank-owned life insurance (see discussion of BOLI in “Non-Interest Revenue and Operating Expense” section above), an \$8.7 million investment in low-income housing tax credit funds, a \$6.4 million investment in restricted stock, a net deferred tax asset of \$12.0 million, current prepaid income taxes totaling \$3.8 million, and accrued interest receivable totaling \$5.1 million. Restricted stock is comprised primarily of Federal Home Loan Bank of San Francisco (“FHLB”) stock that typically experiences balance fluctuations in conjunction with our level of FHLB borrowings. This stock is not deemed to be marketable or liquid and is thus not grouped with the Company’s investments described above. Management has evaluated all deferred tax assets as of every reporting date pursuant to FASB guidance, and concluded that neither the quality of the deferred tax assets nor the Company’s future taxable income potential will preclude full realization of all amounts in future years.

Deposits

Another key balance sheet component impacting the Company’s net interest margin is our deposits. Deposits provide liquidity to fund growth in earning assets, and the Company’s net interest margin is improved to the extent that growth in deposits is concentrated in less volatile and typically less costly non-maturity deposits, which include demand deposit accounts, NOW accounts, savings accounts, and money market demand accounts. Information concerning average balances and rates paid on deposits by deposit type for the past three fiscal years is contained in the Distribution, Rate, and Yield table located in the previous section under Results of Operations—Net Interest Income and Net Interest Margin. A distribution of the Company’s deposits at December 31st for each year from 2008 through 2012, showing the balance and percentage of total deposits by type, is presented in the following table:

Deposit Distribution

(dollars in thousands)

	Year Ended December 31,				
	2012	2011	2010	2009	2008
Interest Bearing Demand Deposits	\$ 84,655	\$ 68,777	\$ -	\$ -	\$ -

Total	100.00%	100.00%	100.00%	100.00%	100.00%

Furthermore, the scheduled maturity distribution of the Company's time deposits at the end of 2012 was as follows:

Deposit Maturity Distribution

(dollars in thousands)

	As of December 31, 2012					Total
	Three months or	Three to six months	Six to twelve months	One to three years	Over three years	
CDAR's	\$ 12,756	\$ 345	\$ 1,964	\$ -	\$ -	\$ 15,065
Time Certificates of Deposit < \$100,000	66,063	21,801	14,785	13,493	751	116,893
Other Time Deposits ≥ \$100,000	170,202	25,650	17,738	4,694	-	218,284
Total	\$ 249,021	\$ 47,796	\$ 34,487	\$ 18,187	\$ 751	\$ 350,242

Total deposit balances increased by \$88 million, or 8%, during 2012. Our deposit mix improved during the year since the growth came in core non-maturity deposits, which were up \$100 million, or 14%, and increased to 70% of total deposits at the end of 2012 from 67% at the end of 2011. Our customers appear to have a propensity to save due to lingering economic uncertainties, but the growth in non-maturity deposits is also due in part to an intensified focus on business relationships and ongoing deposit acquisition programs, including our highly successful direct mail initiatives. Those factors contributed to increases of \$53 million, or 18%, in non-interest bearing demand deposits, \$16 million, or 23%, in interest-bearing demand deposits, \$10 million, or 5%, in NOW accounts, and \$27 million, or 30%, in savings deposits. The only non-maturity deposit category to show a decline for the year is money market deposits, which were down \$5 million, or 7%. Management is of the opinion that a relatively high level of core customer deposits is one of the Company's key strengths, and we continue to focus energy toward deposit account retention and growth.

Customer time deposits under \$100,000 declined by \$5 million, or 4%, during 2012, due mainly to the non-renewal of time deposits under the management of our Treasury Department, and customer time deposits over \$100,000 also declined by \$5 million, or 2%. CDAR's deposits, which also represent time deposits that are primarily sourced from customers in our market areas, were down \$3 million, or 17%, for the year, while the outstanding balance of wholesale-sourced brokered deposits remained at \$15 million.

Other Borrowings

The Company's non-deposit borrowings include overnight borrowings from other banks ("fed funds purchased"), overnight and term advances from the Federal Home Loan Bank, securities sold under agreement to repurchase, and junior subordinated debentures that consist entirely of long-term borrowings from trust subsidiaries formed specifically to issue trust preferred securities. In aggregate, we increased non-deposit borrowings by \$8 million, or 12%, in 2012 to help fund loan growth.

Longer-term FHLB advances, having a remaining maturity of one year or more, totaled \$5 million at December 31, 2012 and \$15 million at December 31, 2011, reflecting a decline of \$10 million. The Company also had \$31 million in junior subordinated debentures at December 31, 2012 and December 31, 2011. The details of the Company's short-term borrowings for the years 2012, 2011, and 2010 are presented in the table below:

Short-term Borrowings

(dollars in thousands)

	Year Ended December 31,		
	2012	2011	2010
Repurchase Agreements			
Balance at December 31	\$ 1,419	\$ 3,037	\$ -
Average amount outstanding	3,441	2,371	-
Maximum amount outstanding at any month end	7,630	5,789	-
Average interest rate for the year	0.61%	0.67%	N/A
Fed funds purchased			
Balance at December 31	\$ -	\$ -	\$ -
Average amount outstanding	-	4	3
Maximum amount outstanding at any month end	-	35	-
Average interest rate for the year	N/A	0.19%	0.32%
FHLB advances			
Balance at December 31	\$ 36,650	\$ 17,120	\$ 14,650
Average amount outstanding	15,234	5,637	16,044
Maximum amount outstanding at any month end	66,520	33,000	44,900
Average interest rate for the year	0.24%	0.69%	1.18%

The Company uses overnight and short-term FHLB advances and fed funds purchased on uncommitted lines from correspondent banks to support liquidity needs created by seasonal deposit flows, to temporarily satisfy funding needs from increased loan demand, and for other short-term purposes. The FHLB line is committed, but the amount of available credit is dependent on the level of pledged collateral. We had no overnight fed funds purchased on our books at December 31, 2012 or December 31, 2011, however repurchase agreement balances totaled approximately \$1 million at the end of 2012, down from \$3 million at the end of 2011. Repurchase agreements represent customer sweep accounts, where deposit balances above a specified threshold are transferred at the close of every business day into non-deposit accounts secured by investment securities. Our short-term FHLB advances were comprised solely of overnight borrowings totaling \$37 million at December 31, 2012, and \$17 million at December 31, 2011.

Capital Resources

At December 31, 2012, the Company had total shareholders' equity of \$173.9 million, comprised of common stock, additional paid-in capital, retained earnings, and accumulated other comprehensive income. Total shareholders' equity at the end of 2011 was \$168.6 million. The \$5.3 million increase in shareholders' equity during 2012 was due in large part to net earnings of \$8.2 million less \$3.4 million in dividends paid. Total capital was also supplemented by increases related to the exercise of stock options and our accounting for unvested stock options, which added a combined total of \$502,000 in 2012.

The Company uses a variety of measures to evaluate its capital adequacy, including risk-based capital and leverage ratios that are calculated separately for the Company and the Bank. Management reviews these capital measurements on a quarterly basis and takes appropriate action to help ensure that they meet or surpass established internal and external guidelines. The following table sets forth the Company's and the Bank's regulatory capital ratios as of the dates indicated.

	December 31, 2012	December 31, 2011
Sierra Bancorp		
Total Capital to Total Risk-weighted Assets	19.36%	21.72%
Tier 1 Capital to Total Risk-weighted Assets	18.11%	20.46%
Tier 1 Leverage Ratio	13.34%	14.11%
Bank of the Sierra		
Total Capital to Total Risk-weighted Assets	19.14%	20.89%
Tier 1 Capital to Total Risk-weighted Assets	17.88%	19.63%
Tier 1 Leverage Ratio	13.17%	13.53%

As of the end of 2012, the Company and the Bank were both classified as “well capitalized,” the highest rating of the categories defined under the Bank Holding Company Act and the Federal Deposit Insurance Corporation Improvement Act (FDICIA) of 1991. We do not foresee any circumstances that would cause the Company or the Bank to be less than well capitalized, although no assurance can be given that this will not occur. For additional details on risk-based and leverage capital guidelines, requirements, and calculations, see “Item 1, Business – Supervision and Regulation – Capital Adequacy Requirements” and “Item 1, Business – Supervision and Regulation – Prompt Corrective Action Provisions” herein.

Liquidity and Market Risk Management

Liquidity

Liquidity refers to the Company’s ability to maintain cash flows that are adequate to fund operations and meet other obligations and commitments in a timely and cost-effective manner. Detailed cash flow projections are reviewed by management on a monthly basis, with various scenarios applied to simulate our ability to meet liquidity needs under adverse conditions. Liquidity ratios are also calculated and reviewed on a regular basis. While these ratios are merely indicators and are not measures of actual liquidity, they are monitored closely and we strive to maintain adequate liquidity resources to draw upon should unexpected liquidity needs arise.

The Company, on occasion, experiences cash needs as the result of loan growth, deposit outflows, asset purchases or liability repayments. To meet short-term needs, the Company can borrow overnight funds from other financial institutions, draw advances against FHLB lines of credit, or solicit brokered deposits if deposits are not immediately obtainable from local sources. Availability on lines of credit from correspondent banks, including the FHLB, totaled \$179 million at December 31, 2012, which is net of any outstanding borrowings and/or FHLB letters of credit. An additional \$197 million in credit is available from the Federal Home Loan Bank if the Company pledges sufficient additional collateral and maintains the required amount of FHLB stock. The Company is also eligible to borrow approximately \$52 million at the Federal Reserve Discount Window, if necessary, based on pledged assets at December 31, 2012. Furthermore, funds can be obtained by drawing down the Company’s correspondent bank deposit accounts, or by liquidating unpledged investments or other readily saleable assets. In addition, the Company can raise immediate cash for temporary needs by selling under agreement to repurchase those investments in its portfolio which are not pledged as collateral. As of December 31, 2012, unpledged debt securities, plus pledged securities in excess of current pledging requirements, comprised \$279 million of the Company’s investment portfolio balances. Other forms of balance sheet liquidity include but are not necessarily limited to any outstanding fed funds sold and vault cash. The Company has a higher level of actual balance sheet liquidity than might otherwise be the case, since we utilize a letter of credit from the FHLB rather than investment securities for certain pledging requirements. The FHLB letter of credit totaled \$64 million at December 31, 2012. Management is of the opinion that available investments and other potentially liquid assets, along with the standby funding sources it has arranged, are more than sufficient to meet the Company’s current and anticipated short-term liquidity needs.

The Company’s net loans to assets and net non-core funding dependence ratios were 61% and 21%, respectively, at December 31, 2012, as compared to internal policy guidelines of “less than 78%” and “less than 50%.” Other liquidity ratios reviewed by management and the Board include net loans to total deposits, wholesale funding to total assets (including ratios and sub-limits for the various components comprising wholesale funding), and available investments to assets, all of which were well within policy guidelines at December 31, 2012. Strong growth in core deposits and growth in investments have had a positive impact on our liquidity position in recent periods, although loan growth has absorbed much of the liquidity generated during 2012 and no assurance can be provided that our liquidity position will continue at current robust levels.

Interest Rate Risk Management

Market risk arises from changes in interest rates, exchange rates, commodity prices and equity prices. The Company does not engage in the trading of financial instruments, nor does it have exposure to currency exchange rates. Our market risk exposure is primarily that of interest rate risk, and we have established policies and procedures to monitor and limit our earnings and balance sheet exposure to changes in interest rates. The principal objective of interest rate risk management is to manage the financial components of the Company’s balance sheet in a manner that will optimize the risk/reward equation for earnings and capital under a variety of interest rate scenarios. To identify areas

of potential exposure to rate changes, the Company performs an earnings simulation analysis on a monthly basis and calculates the market value of portfolio equity under varying interest rate scenarios at least once every quarter.

The Company uses modeling software to simulate the effects of potential interest rate changes on projected net interest income and on the estimated fair values of the Company's financial instruments. The model imports balances, interest rates, maturity dates and re-pricing information for financial instruments on our balance sheet, and incorporates management's assumptions on the characteristics of embedded options along with pricing and duration for anticipated new volumes. Various rate scenarios, consisting of key rate and yield curve projections, are then applied in order to calculate the expected effect of a given interest rate change on the Company's projected interest income and interest expense. The rate projections can be shocked (an immediate and parallel change in all base rates, up or down), ramped (an incremental increase or decrease in rates over a specified time period), economic (based on current trends and econometric models) or stable (unchanged from current actual levels).

The Company uses eight standard interest rate scenarios in conducting its simulations: "stable," upward shocks of 100, 200, 300 and 400 basis points, and downward shocks of 100, 200, and 300 basis points. Pursuant to policy guidelines, we typically attempt to limit the projected 12-month decline in net interest income relative to the stable rate scenario to no more than 5% for a 100 basis point (b.p.) shock, 10% for a 200 b.p. shock, 15% for a 300 b.p. shock, and 20% for a 400 b.p. shock in interest rates. As of December 31, 2012 the Company had the following estimated net interest income sensitivity profile, without factoring in any potential negative impact on spreads resulting from competitive pressures or credit quality deterioration:

	<u>Immediate Change in Rate</u>						
	<u>-300 b.p.</u>	<u>-200 b.p.</u>	<u>-100 b.p.</u>	<u>+100 b.p.</u>	<u>+200 b.p.</u>	<u>+300 b.p.</u>	<u>+400 b.p.</u>
Change in Net Int. Inc. (in \$000's)	-\$10,650	-\$7,336	-\$3,716	+\$1,815	+\$3,643	+\$5,669	+\$7,566
% Change	-21.25%	-14.64%	-7.42%	+3.62%	+7.27%	+11.31%	+15.10%

Our current net interest income simulations indicate that the Company has an asset-sensitive profile, meaning that net interest income increases in rising interest rate scenarios but a drop in interest rates could have a negative impact. We have seen this profile steepen over the past couple of years, as we have benefited from an increasing proportion of lower-cost non-maturity deposits.

If there were an immediate and sustained downward adjustment of 100 basis points in interest rates, all else being equal, net interest income over the next twelve months would likely be around \$3.716 million lower than in a stable interest rate scenario, a drop of 7.42%. The unfavorable variance increases when rates drop 200 or 300 basis points, due to the fact that certain deposit rates are already relatively low (on NOW accounts and savings accounts, for example), and will hit a natural floor of close to zero while variable-rate loan yields continue to drop. This effect is exacerbated by the fact that prepayments on fixed-rate loans and mortgage-backed securities tend to increase as rates decline, although rate floors on some of our variable-rate loans partially offset other negative pressures. While we view declining interest rates as highly unlikely, the potential percentage reduction in net interest income exceeds our internal policy guidelines in all three declining interest rate scenarios, and we will continue to monitor our interest rate risk profile and take corrective action as deemed appropriate.

Net interest income would likely improve by \$1.815 million, or 3.62%, if interest rates were to increase by 100 basis points relative to a stable interest rate scenario, with the favorable variance expanding as interest rates rise higher. The initial increase in rising rate scenarios will likely be limited to some extent by the fact that many of our variable-rate loans are currently at rate floors, creating a re-pricing lag while variable rates are increasing to floored levels, but the Company still appears to be well-positioned to benefit from the eventuality of an upward shift in the yield curve.

The economic value (or "fair value") of financial instruments on the Company's balance sheet will also vary under the interest rate scenarios previously discussed. This variance is essentially a gauge of longer-term exposure to interest rate risk. It is measured by simulating changes in the Company's economic value of equity (EVE), which is derived by subtracting the fair value of liabilities from the fair value of assets. Fair values for financial instruments are estimated by discounting projected cash flows (principal and interest) at current replacement interest rates for each account type, while the fair value of non-financial accounts is assumed to equal their book value for all rate scenarios. An economic value simulation is a static measure for balance sheet accounts at a given point in time, and

the measurement can change substantially over time as the characteristics of the Company's balance sheet evolve and as interest rate and yield curve assumptions are updated.

The amount of change in economic value under different interest rate scenarios depends on the characteristics of each class of financial instrument, including the stated interest rate or spread relative to current market rates or spreads, the likelihood of prepayment, whether the rate is fixed or floating, and the maturity date of the instrument. As a general rule, fixed-rate financial assets become more valuable in declining rate scenarios and less valuable in rising rate scenarios, while fixed-rate financial liabilities gain in value as interest rates rise and lose value as interest rates decline. The longer the duration of the financial instrument, the greater the impact a rate change will have on its value. In our economic value simulations, estimated prepayments are factored in for financial instruments with stated maturity dates, and decay rates for non-maturity deposits are projected based on historical patterns and management's best estimates. We have found that model results are highly sensitive to changes in the assumed decay rate for non-maturity deposits, in particular. The table below shows estimated changes in the Company's EVE as of December 31, 2012, under different interest rate scenarios relative to a base case of current interest rates:

	<u>Immediate Change in Rate</u>					
	<u>-300 b.p.</u>	<u>-200 b.p.</u>	<u>-100 b.p.</u>	<u>+100 b.p.</u>	<u>+200 b.p.</u>	<u>+300 b.p.</u>
Change in EVE (in \$000's)	-\$25,746	-\$42,988	-\$38,641	+\$47,869	+\$73,545	+\$89,939
% Change	-8.50%	-14.19%	-12.75%	+15.80%	+24.27%	+29.68%

The table shows that our EVE will generally deteriorate in declining rate scenarios, but will benefit from rising rates. Our EVE profile has changed substantially in recent years, shifting from unfavorable exposure to a benefit in a rising interest rate environment, due in part to growth in non-maturity deposits and adjustments applied to deposit decay rates and loan prepayment rates in order to better reflect historical patterns. Effectively, lower deposit decay rates mean that we have a longer period to benefit from low-cost deposits, which are even more valuable when the cost of replacing them becomes greater as would be the case in a rising rate environment. However, the same changes that have improved our profile in rising rate scenarios have created greater exposure to declining rates. That negative impact is exacerbated by the acceleration of loan prepayment speeds in declining rate scenarios. While still negative relative to the base case, we see a decelerating decline in EVE as the drop in interest rates approaches 200 basis points and a favorable swing in EVE as interest rates drop from 200 basis points to 300 basis points. This is due to the longer duration of our fixed-rate assets relative to our fixed-rate liabilities, and the resulting impact of a significant rate decline on financial instrument fair values. As noted previously, however, management is of the opinion that the probability of a significant rate decline is low.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information concerning quantitative and qualitative disclosures of market risk called for by Item 305 of Regulation S-K is included as part of Item 7 above. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Market Risk Management".

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The following financial statements and independent auditors' reports listed below are included herein:

Report of Independent Registered Public Accounting Firm

Board of Directors
Sierra Bancorp and Subsidiary
Porterville, California

We have audited the accompanying consolidated balance sheets of Sierra Bancorp and Subsidiary (the "Company") as of December 31, 2012 and 2011, and the related consolidated statements of income, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2012. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Sierra Bancorp and Subsidiary as of December 31, 2012 and 2011, and the results of its operations, changes in its shareholders' equity, and its cash flows for each of the years in the three year period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 14, 2013 expressed an unqualified opinion thereon.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. THE BUSINESS OF SIERRA BANCORP

Sierra Bancorp (the "Company") is a California corporation registered as a bank holding company under the Bank Holding Company Act of 1956, as amended, and is headquartered in Porterville, California. The Company was incorporated in November 2000 and acquired all of the outstanding shares of Bank of the Sierra (the "Bank") in August 2001. The Company's principal subsidiary is the Bank, and the Company exists primarily for the purpose of holding the stock of the Bank and of such other subsidiaries it may acquire or establish. The Company's only other direct subsidiaries are Sierra Statutory Trust II, which was formed in March 2004 solely to facilitate the issuance of capital trust pass-through securities, and Sierra Capital Trust III, which was formed in June 2006 also for the purpose of issuing capital trust pass-through securities.

The Bank operates twenty-five full service branch offices, one online "virtual" branch and two credit centers. The Bank's deposits are insured by the Federal Deposit Insurance Corporation (FDIC) up to applicable legal limits. The Bank maintains a diversified loan portfolio comprised of agricultural, commercial, consumer, real estate construction and mortgage loans. Loans are made primarily within the market area of the South Central San Joaquin Valley of California, specifically, Tulare, Fresno, Kern, Kings, and Madera counties. These areas have diverse economies with principal industries being agriculture, real estate and light manufacturing.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Consolidation and Basis of Presentation

The consolidated financial statements include the accounts of the Company and the consolidated accounts of its wholly-owned subsidiary, Bank of the Sierra. All significant intercompany balances and transactions have been eliminated. Certain reclassifications have been made to prior years' balances to conform to classifications used in 2012. The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America (U.S. GAAP) and prevailing practices within the banking industry.

In accordance with U.S. GAAP, the Company's investments in Sierra Statutory Trust II and Sierra Capital Trust III are not consolidated and are accounted for under the equity method and included in other assets on the consolidated balance sheet. The subordinated debentures issued and guaranteed by the Company and held by the trusts are reflected on the Company's consolidated balance sheet.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Material estimates that are particularly susceptible to significant changes in the near-term relate to the determination of the allowance for loan and lease losses and the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans. In connection with the determination of the allowances for loan and lease losses and other real estate, management obtains independent appraisals for significant properties, evaluates the overall loan portfolio characteristics and delinquencies and monitors economic conditions.

Cash Equivalents

For purposes of reporting cash flows, cash and cash equivalents include cash and balances due from banks, federal funds sold, and interest bearing deposits in banks.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Investment Securities

Investments are classified into the following categories:

- Securities available-for-sale, reported at fair value, with unrealized gains and losses excluded from earnings and reflected, net of tax, as a separate component of shareholders' equity in accumulated other comprehensive income.
- Securities held-to-maturity, which the Company has the intent and has the ability to hold to maturity, are carried at cost, adjusted for amortization of premiums and the accretion of discounts.

Management determines the appropriate classification of its investments at the time of purchase and may only change the classification in certain limited circumstances. All transfers between categories are accounted for at fair value.

Management evaluates securities for other-than-temporary impairment ("OTTI") on at least a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. For securities in an unrealized loss position, management considers the extent and duration of the unrealized loss, and the financial condition and near-term prospects of the issuer. Management also assesses whether it intends to sell, or it is more likely than not that it will be required to sell, a security in an unrealized loss position before recovery of its amortized cost basis. If either of the criteria regarding intent or requirement to sell is met, the entire difference between amortized cost and fair value is recognized as impairment through earnings. For debt securities that do not meet the aforementioned criteria, the amount of impairment is split into two components as follows: 1) OTTI related to credit loss, which must be recognized in the income statement and 2) other-than-temporary impairment (OTTI) related to other factors, which is recognized in other comprehensive income. The credit loss is defined as the difference between the present value of cash flows expected to be collected and the amortized cost basis. For equity securities, the entire amount of impairment is recognized through earnings.

Loans and Leases (Financing Receivables)

Our credit quality classifications of Loans and Leases include Pass, Special Mention, Substandard and Impaired. These classifications are defined in Note 4 (Loans and Leases) to our consolidated financial statements.

Loans and leases are reported at the principal amounts outstanding, adjusted for unearned income, deferred loan origination fees and costs, purchase premiums and discounts, write-downs, and the allowance for loan and lease losses. Loan and lease origination fees, net of certain deferred origination costs, and purchase premiums and discounts are recognized as an adjustment to yield of the related loans and leases over the contractual life of the loan using both the effective interest and straight line methods.

Interest income for all performing loans, regardless of classification (Pass, Special Mention, Substandard and Impaired), is recognized on an accrual basis, with interest accrued daily. Costs associated with successful loan originations are netted from loan origination fees, with the net amount (net deferred loan fees) amortized over the contractual life of the loan in interest income. If a loan has scheduled periodic payments, the amortization of the net deferred loan fee is calculated using the effective interest method over the contractual life of the loan. If the loan does not have scheduled payments, such as a line of credit, the net deferred loan fee is recognized as interest income on a straight line basis over the contractual life of the loan. Fees received for loan commitments are recognized as interest income over the term of the commitment. When loans are repaid, any remaining unamortized balances of deferred fees and costs are accounted for through interest income.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Generally, the Company places loans and leases, regardless of class on nonaccrual status and ceases recognizing interest income when the loan has become delinquent more than 90 days and/or when Management determines that the repayment of principal and collection of interest is unlikely. The Company may decide that it is appropriate to continue to accrue interest on certain loans more than 90 days delinquent if they are well-secured by collateral and collection is in process. When a loan is placed on nonaccrual status, any accrued but uncollected interest for the loan is reversed out of interest income in the period in which the loan's status changed. Subsequent payments received from the customer are applied to principal, and no further interest income is recognized until the principal has been paid in full or until circumstances have changed such that payments are again consistently received as contractually required.

Impaired loans are classified as either nonaccrual or accrual, depending on individual circumstances regarding the collectability of interest and principal according to the contractual terms. For performing impaired loans and leases, interest income is accrued and recognized on a daily basis and applied to current income. For nonaccrual impaired loans and leases, all unpaid accrued interest is reversed against current income, unless the loan or lease is well secured and in the process of collection. Interest received on nonaccrual impaired loans and leases is generally applied to principal or reported as interest income, according to management's judgment as to the collectability of principal. The accrual of interest on loans and leases is discontinued when, in the opinion of management, there is an indication that the borrower may be unable to meet payments as they become due.

For loans with an interest reserve, i.e., where loan proceeds are advanced to the borrower to make interest payments, all interest recognized from the inception of the loan is reversed when the loan is placed on non-accrual.

Generally, loans and leases are restored to accrual status when the obligation is brought current and has performed in accordance with the contractual terms for a reasonable period of time and the ultimate collectability of the total contractual principal and interest is no longer in doubt. Direct financing leases are carried net of unearned income. Income from leases is recognized by a method that approximates a level yield on the outstanding net investment in the lease.

Loans Modified in a Troubled Debt Restructuring

Loans are considered to have been modified in a troubled debt restructuring ("TDR") when due to a borrower's financial difficulties the Company makes certain concessions to the borrower that it would not otherwise consider. Modifications may include interest rate reductions, principal or interest forgiveness, forbearance, and other actions intended to minimize economic loss and to avoid foreclosure or repossession of collateral. Generally, a non-accrual loan that has been modified in a TDR remains on non-accrual status for a period of six months to demonstrate that the borrower is able to meet the terms of the modified loan. However, performance prior to the modification, or significant events that coincide with the modification, are included in assessing whether the borrower can meet the new terms and may result in the loan being returned to accrual status at the time of loan modification or after a shorter performance period. If the borrower's ability to meet the revised payment schedule is uncertain, the loan remains on non-accrual status. TDRs may be removed from TDR designation in the calendar year following the restructuring, if the loan is in compliance with all modified terms and is yielding a market rate of interest.

A TDR is generally considered to be in default when it appears likely that the customer will not be able to repay all principal and interest pursuant to the terms of the restructured agreement.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Allowance for Loan and Lease Losses

The allowance for loan and lease losses is maintained at a level which, in management's judgment, is adequate to absorb loan and lease losses inherent in the loan and lease portfolio. The allowance for loan and lease losses is increased by a provision for loan and lease losses, which is charged to expense, and reduced by charge-offs, net of recoveries. The amount of the allowance is based on management's evaluation of the collectability of the loan and lease portfolio, changes in its risk profile, credit concentrations, historical trends, and economic conditions. This evaluation also considers the balance of impaired loans and leases. A loan or lease is impaired when it is probable that the Bank will be unable to collect all contractual principal and interest payments due in accordance with the terms of the loan or lease agreement. Losses on individually identified loans or leases are measured based on the present value of expected future cash flows discounted at the original effective interest rate of the loan or lease, with any changes over time recognized as bad debt expense in our provision for loan losses. As a practical expedient, impairment may be measured based on the loan's or lease's observable market price or the fair value of the collateral if the loan or lease is collateral dependent. The amount of impairment, if any, is recorded through the provision for loan and lease losses and is added to the allowance for loan and lease losses. One-to-four family residential mortgages and consumer installment loans are subjected to a collective evaluation for impairment, considering delinquency and repossession statistics, historical loss experience, and other factors.

General reserves cover non-impaired loans and are based on historical migration net loss rates for each portfolio segment by call report code, adjusted for the effects of qualitative or environmental factors that are likely to cause estimated credit losses as of the evaluation date to differ from the portfolio segment's historical loss experience. Qualitative factors include consideration of the following: changes in lending policies and procedures; changes in international, national, regional, and local economic and business conditions and developments; changes in nature and volume of the portfolio; changes in the experience, ability and depth of lending management and other relevant staff; changes in the volume and severity of past due, nonaccrual and other adversely graded loans; changes in quality of the loan review system; changes in the value of the underlying collateral for collateral-dependent loans; concentrations of credit; and the effect of the other external factors such as competition and legal and regulatory requirements.

Most of the Company's business activity is with customers located within the Central Valley of California; primarily Fresno, Kings, Tulare and Kern Counties. Therefore, the Company's exposure to credit risk is significantly affected by changes in the economy in these counties. The Company considers this concentration of credit risk when assessing and assigning qualitative factors in the allowance for loan losses. Portfolio segments identified by the Company include Direct Financing leases, Agricultural, Commercial and Industrial, Real Estate, Small Business Administration, and Consumer loans. Relevant risk characteristics for these portfolio segments generally include debt service coverage, loan-to-value ratios and financial performance on non-consumer related loans; and credit scores, debt-to-income ratios, collateral type and loan-to-value ratios for consumer related loans.

Though management believes the allowance for loan and lease losses to be adequate, ultimate losses may vary from their estimates. However, estimates are reviewed periodically, and as adjustments become necessary, they are reported in earnings during periods they become known. In addition, the FDIC and the California Department of Financial Institutions, as an integral part of their examination processes, review the allowance for loan and lease losses. These agencies may require additions to the allowance for loan and lease losses based on their judgment about information available at the time of their examinations.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Reserve for Off-Balance Sheet Commitments

In addition to the exposure to credit loss from outstanding loans, the Company is also exposed to credit loss from certain off-balance sheet commitments such as unused commitments from revolving lines of credit, mortgage warehouse lines of credit, unused commitments on construction loans and commercial and standby letters of credit. Because the available funds have not yet been disbursed on these commitments the estimated losses are not included in the calculation of ALLL. The reserve for off-balance sheet commitments is an estimated loss contingency which is included in other liabilities on the Consolidated Balance Sheets. The adjustments to the reserve for off-balance sheet commitments are reported as a noninterest expense. This reserve is for estimated losses that could occur when the Company is contractually obligated to make a payment under these instruments and must seek repayment from a party that may not be as financially sound in the current period as it was when the commitment was originally made.

Sale and Servicing of Loans

The Company periodically originates loans intended to be sold on the secondary market. These loans are recorded as held for sale and reported at the lower of cost or fair value in the Consolidated Balance Sheets. The loan's cost basis includes unearned deferred fees and costs, and premiums and discounts. These loans are generally held between 30 to 90 days from their origination date. Loans held for sale by the Company currently consist entirely of residential real estate loans. Loans classified as held for sale are disclosed in Note 4, "Loans" of these Consolidated Financial Statements.

Gains and losses on sales of loans are recognized at the time of sale and are calculated based on the difference between the selling price and the allocated book value of loans sold. Book value allocations are determined in accordance with U.S. GAAP. Any inherent risk of loss on loans sold is transferred to the buyer at the date of sale.

The Company has issued various representations and warranties associated with the sale of loans. These representations and warranties may require the Company to repurchase loans with underwriting deficiencies as defined per the applicable sales agreements and certain past due loans within 90 days of the sale. The Company did not experience losses during the years ended December 31, 2012, 2011 or 2010 regarding these representations and warranties.

Premises and Equipment

Premises and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets. The useful lives of premises are estimated to be thirty years. The useful lives of furniture, fixtures and equipment are estimated to be three to twenty years. Leasehold improvements are amortized over the life of the asset or the term of the related lease, whichever is shorter. When assets are sold or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts, and any resulting gain or loss is recognized in income for the period. The cost of maintenance and repairs is charged to expense as incurred.

Impairment of long-lived assets is evaluated by management based upon an event or changes in circumstances surrounding the underlying assets which indicate long-lived assets may be impaired.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Foreclosed Assets

Foreclosed assets include real estate, and other property acquired in full or partial settlement of loan obligations. When property is acquired, any excess of the recorded investment in the loan balance and accrued interest income over the appraised fair market value of the property, net of estimated selling costs, is charged against the allowance for loan and lease losses. A valuation allowance for losses on foreclosed assets is maintained to provide for temporary declines in value. The allowance is established through a provision for losses on foreclosed assets which is included in other non-interest expense. Subsequent gains or losses on sales or write-downs resulting from permanent impairments are recorded in other non-interest income or expense as incurred.

Goodwill

The Company acquired Sierra National Bank in 2000, and the acquisition was accounted for using the purchase method of accounting. The goodwill resulting from this transaction represents the amount by which the purchase price exceeded the fair value of the net assets. In accordance with U.S. GAAP the Company evaluates goodwill periodically for impairment. There was no impairment recognized for the years ended December 31, 2012, 2011, and 2010.

Income Taxes

The Company files its income taxes on a consolidated basis with its subsidiary. The allocation of income tax expense represents each entity's proportionate share of the consolidated provision for income taxes.

Income taxes are accounted for using the asset and liability method. Under the asset and liability method, deferred taxes are recognized for the tax consequences of temporary differences by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax bases of existing assets and liabilities. The effect on deferred taxes of a change in tax rates would be recognized in income in the period that includes the enactment date. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

The Company adopted guidance issued by the FASB *accounting for income taxes*, effective January 1, 2007, which clarifies the accounting and disclosure for uncertainty in tax positions as defined. This guidance seeks to reduce the diversity in practice associated with certain aspects of the recognition and measurement related to accounting for income taxes. A tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely to be realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded. We have determined that as of December 31, 2012 all tax positions taken to date are highly certain and, accordingly, no accounting adjustment has been made to the financial statements.

The Company recognizes interest and penalties related to uncertain tax positions as part of income tax expense.

Salary Continuation Agreements and Directors' Retirement Plan

The Company has entered into agreements to provide members of the Board of Directors and certain key executives, or their designated beneficiaries, with annual benefits for up to fifteen years after retirement or death. The Company accrues for these future benefits from the effective date of the plan until the director's or executive's expected retirement date in a systematic and rational manner. At the consolidated balance sheet date, the amount of accrued benefits equals the then present value of the benefits expected to be provided to the director or employee, any beneficiaries, and covered dependents in exchange for the director's or employee's services to that date.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Comprehensive Income

Comprehensive income consists of net income and the net change in unrealized gains on securities available-for-sale, net of an adjustment for the effects of realized gains and losses and any applicable tax. Comprehensive income is a more inclusive financial reporting methodology that includes disclosure of other comprehensive income that historically has not been recognized in the calculation of net income. Unrealized gains and losses on the Company's available-for-sale investment securities are included in other comprehensive income after the adjustment for the effects of realized gains and losses. Total comprehensive income and the components of accumulated other comprehensive income (loss) are presented in the consolidated statements of comprehensive income.

Stock-Based Compensation

At December 31, 2012, the Company had one stock-based compensation plan, the Sierra Bancorp 2007 Stock Incentive Plan (the "2007 Plan"), which was adopted by the Company's Board of Directors on March 15, 2007 and approved by the Company's shareholders on May 23, 2007. The 2007 Plan is for 1,500,000 shares of the Company's authorized but unissued common stock, subject to adjustment for stock splits and dividends, and provides for the issuance of both "incentive" and "nonqualified" stock options to salaried officers and employees, and of "nonqualified" stock options to non-employee directors. The 2007 Plan also provides for the issuance of restricted stock awards to these same classes of eligible participants. We have not issued, nor do we currently have plans to issue, restricted stock awards. The 2007 plan supersedes the Company's 1998 Stock Option plan ("1998 Plan") which was terminated. The outstanding options issued under the 1998 Plan were not affected by this termination.

The Company is using the Black-Scholes model to value stock options. The "multiple option" approach is used to allocate the resulting valuation to actual expense for current period. Expected volatility is based on historical volatility of the Company's common stock. The Company uses historical data to estimate option exercise and post-vesting termination behavior. The expected term of options granted is based on historical data and represents the period of time that options granted are expected to be outstanding, which takes into account that the options are not transferable. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of the grant. The fair value of each option is estimated on the date of grant using the following assumptions:

	Years Ended December 31,		
	2012	2011	2010
Dividend yield	2.35%	2.27%	2.24%
Expected Volatility	56.71%	52.92%	54.22%
Risk-free interest rate	0.43%	1.06%	1.18%
Expected option life	5.5 years	6.8 years	5.8 years

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Recent Accounting Pronouncements

In September 2011, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2011-08, Intangibles—Goodwill and Other (Topic 350) - Testing Goodwill for Impairment. The objective of ASU 2011-08 is to simplify how entities test goodwill for impairment. Topic 350 requires an entity to test goodwill for impairment on at least an annual basis, by comparing the fair value of a reporting unit with its carrying amount, including goodwill (step one). If the fair value of a reporting unit is less than its carrying amount, then the second step of the test must be performed to measure the amount of the impairment loss, if any. Pursuant to ASU 2011-08, an entity will not be required to calculate the fair value of a reporting unit and perform step one unless, after assessing qualitative factors, the entity determines that it is more likely than not that its fair value is less than its carrying amount. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. This update is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of ASU 2011-08 did not have an impact on the Company’s financial statements, as the Company has not been required to perform the second step of the goodwill impairment test since the first step has, to date, determined that the fair value of the reporting unit, Bank of the Sierra, is greater than its carrying amount.

In June 2011, the FASB issued ASU 2011-05, Comprehensive Income (Topic 220) - Presentation of Comprehensive Income. Current U.S. generally accepted accounting principles allow reporting entities several alternatives for displaying other comprehensive income and its components in financial statements, and ASU 2011-05 is intended to improve the consistency of this reporting issue. The amendments in this ASU require all non-owner changes in stockholders’ equity to be presented either in a single continuous statement of comprehensive income, or in two separate but consecutive statements. In a single continuous statement, the entity is required to present the components of net income and total net income, the components of other comprehensive income and a total for other comprehensive income, along with the total of comprehensive income in that statement. In the two-statement approach, an entity is required to present components of net income and total net income in the statement of net income. The statement of other comprehensive income should immediately follow the statement of net income and include the components of other comprehensive income and a total for other comprehensive income, along with a total for comprehensive income. Furthermore, the entity is required to present, on the face of the financial statements, adjustments for items that are reclassified from other comprehensive income to net income in the statements, where the components of net income and the components of other comprehensive income are presented. The amendments in the ASU do not change the following: 1) items that must be reported in other comprehensive income; 2) when an item of other comprehensive income must be reclassified to net income; 3) the option to present components of other comprehensive income either net of related tax effects or before related tax effects; or, 4) how earnings per share is calculated or presented. The amendments in ASU 2011-05 should be applied retrospectively. For public entities, such as the Company, the amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The Company’s adoption of this ASU impacted our presentation of comprehensive income, but not the calculation of such.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

In May 2011, the FASB issued ASU No. 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs, to substantially converge the fair value measurement and disclosure guidance in U.S. GAAP with International Financial Reporting Standards ("IFRS"). The amended guidance changes several aspects of current fair value measurement guidance, including the following provisions: 1) the application of the concepts of "highest and best use" and "valuation premise"; 2) the introduction of an option to measure groups of offsetting assets and liabilities on a net basis; 3) the incorporation of certain premiums and discounts in fair value measurements; and, 4) the measurement of the fair value of certain instruments classified in shareholders' equity. In addition, the amended guidance includes several new fair value disclosure requirements, including, among other things, information about valuation techniques and unobservable inputs used in Level 3 fair value measurements and a narrative description of Level 3 measurements' sensitivity to changes in unobservable inputs. For public entities such as the Company, the provisions of ASU 2011-04 are effective for interim and annual periods beginning after December 15, 2011, and are to be applied prospectively. The implementation of ASU 2011-04 enhanced our footnote disclosures, but did not change fair value measurements for any of the Company's assets or liabilities carried at fair value and thus did not impact the Company's statements of income and condition.

U.S. Government agencies collateralized by mortgage obligations	(1,433)	144,953	(28)	949
Other Securities	-	-	-	-
Total	\$ (1,459)	\$ 146,688	\$ (147)	\$ 2,927

The Company has reviewed all sectors and securities in the investment portfolio for impairment. During the year ended December 31, 2012, the Company realized losses through earnings from the sale of 22 debt securities for \$297,000. The securities were sold with 129 other debt securities for which \$2,052,000 in gains were realized, as a part of a liquidity strategy to fund new loan growth. During the year ended December 31, 2011 the Company realized a loss through earnings on five equity securities for \$1,370,000. The referenced securities were previously carried on the Company's books at their fair market values with mark to market adjustments applied directly to equity. Since the securities were in a continuous loss position since mid-2008 and the near-term prospect of price recovery was increasingly uncertain, the Company recognized the loss through earnings.

The Company has concluded as of December 31, 2012 that all remaining securities, currently in an unrealized loss position, are not other-than-temporarily-impaired. This assessment was based on the following factors: 1) the Company has the ability to hold the security, 2) the Company does not intend to sell the security, 3) the Company does not anticipate it will be required to sell the security before recovery, 4) and the Company expects to eventually recover the entire amortized cost basis of the security.

Allowance for loan and lease losses	<u>(13,873)</u>	<u>(17,283)</u>
Loans, net	<u>\$ 867,078</u>	<u>\$ 740,929</u>

The Company monitors the credit quality of loans on a continuous basis using the regulatory and accounting classifications of pass, special mention, substandard and impaired to characterize and qualify the associated credit risk. Loans classified as "loss" are immediately charged-off. The Company uses the following definitions of risk classifications:

Pass – Loans listed as pass include larger non-homogeneous loans not meeting the risk rating definitions below and smaller, homogeneous loans not assessed on an individual basis.

Special Mention – Loans classified as special mention have the potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position and some future date.

Substandard – Loans classified as substandard are those loans with clear and at well-defined weaknesses such as a highly leveraged position, unfavorable financial operating results and/or trends, uncertain repayment sources or poor financial condition, which may jeopardize ultimate recoverability of the debt.

Impaired – A loan is considered impaired, when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Additionally, all loans classified as troubled debt restructurings are considered impaired.

4. LOANS AND LEASES (Continued)

A summary of the transactions in the allowance for loan and lease losses follows (dollars in thousands):

	Years Ended December 31,		
	2012	2011	2010
Balance, beginning of year	\$ 17,283	\$ 21,138	\$ 23,715
Provision for loan and lease losses	14,210	12,000	16,680
Losses charged to allowance	(18,778)	(16,987)	(20,337)
Recoveries	1,158	1,132	1,080
Balance, end of year	\$ 13,873	\$ 17,283	\$ 21,138

Loans may or may not be collateralized, and collection efforts are continuously pursued. Loans or leases may be restructured by management when a borrower has experienced some change in financial status causing an inability to meet the original repayment terms and where the Company believes the borrower will eventually overcome those circumstances and make full restitution. Loans and leases are charged off when they are deemed to be uncollectible, while recoveries are generally recorded only when cash payments are received subsequent to the charge-off.

The following table presents the activity in the allowance for loan losses for the year 2012 and the recorded investment in loans and impairment method as of December 31, 2012 by portfolio segment (dollars in thousands):

	Real Estate	Agricultural Products	Commercial and Industrial	Small Business Administration	Direct Finance Leases	Consumer	Total

⁽¹⁾ Included in Total Financing Receivables

⁽²⁾ Includes Small Business Administration loans over 90 days past due and still accruing in the amount of \$48,000.

Generally, the Company places loans and leases, regardless of class on nonaccrual status and ceases recognizing interest income when the loan has become delinquent more than 90 days and/or when Management determines that the repayment of principal and collection of interest is unlikely. The Company may decide that it is appropriate to continue to accrue interest on certain loans more than 90 days delinquent if they are well-secured by collateral and collection is in process. When a loan is placed on nonaccrual status, any accrued but uncollected interest for the loan is reversed out of interest income in the period in which the loan's status changed. Subsequent payments received from the customer are applied to principal, and no further interest income is recognized until the principal has been paid in full or until circumstances have changed such that payments are again consistently received as contractually required.

The following is a summary of information pertaining to impaired and non-accrual loans (dollars in thousands):

	Years Ended December 31,	
	2012	2011
Impaired loans without a valuation allowance	\$ 14,292	\$ 49,625
Impaired loans with a valuation allowance	63,870	48,704

4. LOANS AND LEASES (Continued)

Included in loans above are troubled debt restructurings that were classified as impaired. The Company had \$3,427,000 and \$2,647,000 in commercial loans, \$40,639,000 and \$55,177,000 in real estate secured loans and \$3,976,000 and \$3,220,000 in consumer loans, which were modified as troubled debt restructurings and consequently classified as impaired at December 31, 2012 and 2011, respectively.

Additional commitments to existing customers with restructured loans totaled \$195,000 and \$206,000 at December 31, 2012 and 2011 respectively.

Interest income recognized on impaired loans was \$1,394,000, \$1,214,000 and \$1,575,000 for the years ended December 31, 2012, 2011 and 2010 respectively. There was no interest income recognized on a cash basis on impaired loans for the years ended December 31, 2012, 2011 and 2010 respectively.

The following is a summary of interest income from non-accrual loans in the portfolio at year-end that was not recognized (dollars in thousands):

	<u>Years Ended December 31,</u>		
	<u>2012</u>	<u>2011</u>	<u>2010</u>
Interest that would have been recorded under the loans' original terms	\$ 4,084	\$ 4,353	\$ 3,929
Less gross interest recorded	<u>2,088</u>	<u>1,328</u>	<u>1,219</u>
Foregone interest	<u>\$ 1,996</u>	<u>\$ 3,025</u>	<u>\$ 2,710</u>

Certain loans have been pledged to secure short-term borrowing arrangements (see Note 8). These loans totaled \$392,644,000 and \$338,868,000 at December 31, 2012 and 2011, respectively.

Salaries and employee benefits totaling \$2,745,000, \$2,586,000, and \$2,376,000 have been deferred as loan and lease origination costs to be amortized over the estimated lives of the related loans and leases for the years ended December 31, 2012, 2011 and 2010, respectively.

4. LOANS AND LEASES (Continued)

Interest income for all performing loans, regardless of class (Pass, Special Mention, Substandard and Impaired), is recognized on an accrual basis, with interest accrued daily. Costs associated with successful loan originations are netted from loan origination fees, with the net amount (net deferred loan fees) amortized over the contractual life of the loan in interest income. If a loan has scheduled periodic payments, the amortization of the net deferred loan fee is calculated using the effective interest method over the contractual life of the loan. If the loan does not have scheduled payments, such as a line of credit, the net deferred loan fee is recognized as interest income on a straight line basis over the contractual life of the loan. Fees received for loan commitments are recognized as interest income over the term of the commitment. When loans are repaid, any remaining unamortized balances of deferred fees and costs are accounted for through interest income.

Loan Servicing

The Bank originates mortgage loans for sale to investors. During the years ended December 31, 2012, 2011, and 2010, all mortgage loans that were sold by the Bank were sold without retention of related servicing. The Bank's servicing portfolio at December 31, 2012, 2011 and 2010 totaled \$2,596,000, \$506,000 and \$4,778,000, respectively. At December 31, 2012, loans were principally serviced for one investor.

5. PREMISES AND EQUIPMENT

Premises and equipment at cost consisted of the following (dollars in thousands):

	Years Ended December 31,	
	2012	2011
Land	\$ 2,607	\$ 2,607
Buildings and improvements	15,720	16,662
Furniture, fixtures and equipment	20,476	22,092
Leasehold improvements	10,496	8,723
	<u>49,299</u>	<u>50,084</u>
Less accumulated depreciation and amortization	27,473	29,375
Construction in progress	4	12
	<u>\$ 21,830</u>	<u>\$ 20,721</u>

Depreciation and amortization included in occupancy and equipment expense totaled \$2,289,000, \$2,505,000, and \$2,496,000, for the years ended December 31, 2012, 2011 and 2010, respectively.

6. OTHER ASSETS

Other assets consisted of the following (dollars in thousands):

	Years Ended December 31,	
	2012	2011
Accrued interest receivable	\$ 5,095	\$ 5,368
Deferred tax assets	11,995	11,731
Prepaid taxes	3,775	2,261
Investment in limited partnerships	10,316	9,927
Federal Home Loan Bank stock, at cost	6,019	6,689
Cash surrender value of officer life insurance policies	38,007	37,657
Other	6,262	7,969
	<u>\$ 81,469</u>	<u>\$ 81,602</u>

The Company has invested in limited partnerships that operate qualified affordable housing projects to receive tax benefits in the form of tax deductions from operating losses and tax credits. The Company accounts for these investments under the cost method and management analyzes these investments annually for potential impairment. The Company has no remaining capital commitments to these partnerships at December 31, 2012.

The Company holds certain equity investments that are not readily marketable securities and thus are classified as "other assets" on the Company's balance sheet. These include investments in Pacific Coast Bankers Bancshares, California Economic Development Lending Initiative, and the Federal Home Loan Bank ("FHLB").

The largest of these is the Company's \$6,019,000 investment in FHLB stock, carried at cost. The FHLB requires an equity investment in an amount that is based on a percentage of the Company's borrowing activity at the FHLB. Quarterly, the FHLB assesses the minimum stock requirement based on borrowing activity and membership requirements. Any stock deemed in excess is automatically repurchased by the FHLB at cost.

Bank advances	36,650	.26%	17,120	.05%
Federal Home Loan Bank advances	-	-	-	-
	<u>\$ 38,069</u>		<u>\$ 20,157</u>	

The Company had fixed-rate, long-term debt of \$5,000,000 with the Federal Home Loan Bank at December 31, 2012 which matures in 2013. The contractual maturity of long-term debt is as follows (dollars in thousands):

<u>Year Ending</u> <u>December 31,</u>	<u>Amount</u>	<u>Weighted</u> <u>Average Rate</u>
2013	\$ 5,000	3.93%

The Company had unsecured lines of credit with its correspondent banks which, in the aggregate, amounted to \$55,000,000 at December 31, 2012 and 2011, at interest rates which vary with market conditions. There was \$0 outstanding under these lines of credit at December 31, 2012 and December 31, 2011, respectively.

At December 31, 2012, the Company had remaining borrowing capacity with the Federal Home Loan Bank of \$124,088,000 secured by government agencies and whole loan collateral.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

9. INCOME TAXES (Continued)

The expense for income taxes differs from amounts computed by applying the statutory Federal income tax rates to income before income taxes. The significant items comprising these differences consisted of the following (dollars in thousands):

	Years Ended December 31,		
	2012	2011	2010
Income tax expense at Federal statutory rate	\$ 2,666	\$ 2,837	\$ 2,779
Increase (decrease) resulting from:			
State franchise tax expense, net of Federal tax effect	-	540	282
Tax exempt income	(1,388)	(1,330)	(923)
Affordable housing tax credits	(1,639)	(1,605)	(1,642)
Other	17	122	(730)
	<u>\$ (344)</u>	<u>\$ 564</u>	<u>\$ (234)</u>
Effective tax rate	<u>(4.4)%</u>	<u>6.8%</u>	<u>(3.3)%</u>

The Company is subject to federal income tax and income tax of the state of California. Our federal income tax returns for the years ended December 31, 2009, 2010 and 2011 are open to audit by the federal authorities and our California state tax returns for the years ended December 31, 2008, 2009, 2010 and 2011 are open to audit by the state authorities.

There were no recorded interest or penalties related to uncertain tax positions as part of income tax for the years ended December 31, 2012, 2011, and 2010, respectively. We do not expect the total amount of unrecognized tax benefits to significantly increase or decrease within the next twelve months.

10. SUBORDINATED DEBENTURES

Sierra Statutory Trust II, ("Trust II") and Sierra Capital Trust III ("Trust III"), (collectively, the "Trusts") were formed by the Company for the sole purpose of issuing trust preferred securities fully and unconditionally guaranteed by the Company. For financial reporting purposes, the Trusts are not consolidated and the Floating Rate Junior Subordinated Deferrable Interest Debentures (the "Subordinated Debentures") held by the Trusts and issued and guaranteed by the Company are reflected in the Company's consolidated balance sheet in accordance with provisions of FIN 46. Under applicable regulatory guidance, the amount of trust preferred securities that is eligible as Tier 1 capital is limited to twenty-five percent of the company's Tier 1 capital on a pro forma basis. At December 31, 2012, \$30,000,000 of trust preferred securities qualified as Tier 1 capital.

During the first quarter of 2004, Sierra Statutory Trust II issued 15,000 Floating Rate Capital Trust Pass-Through Securities (TRUPS II), with a liquidation value of \$1,000 per security, for gross proceeds of \$15,000,000. The entire proceeds of the issuance were invested by Trust II in \$15,464,000 of Subordinated Debentures issued by the Company, with identical maturity, re-pricing and payment terms as the TRUPS II. The Subordinated Debentures, purchased by Trust II, represent the sole assets of the Trust II. Those Subordinated Debentures mature on March 17, 2034, bear a current interest rate of 3.06% (based on 3-month LIBOR plus 2.75%), with re-pricing and payments due quarterly.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

10. SUBORDINATED DEBENTURES (Continued)

Those Subordinated Debentures are currently redeemable by the Company, subject to receipt by the Company of prior approval from the Federal Reserve Bank, on any March 17th, June 17th, September 17th, and December 17th. The redemption price is par plus accrued and unpaid interest, except in the case of redemption under a special event which is defined in the debenture.

The TRUPS II are subject to mandatory redemption to the extent of any early redemption of the related Subordinated Debentures and upon maturity of the Subordinated Debentures on March 17, 2034.

The Trust II has the option to defer payment of the distributions for a period of up to five years, as long as the Company is not in default on the payment of interest on the Subordinated Debentures. The TRUPS II issued in the offering were sold in private transactions pursuant to an exemption from registration under the Securities Act of 1933, as amended. The Company has guaranteed, on a subordinated basis, distributions and other payments due on the TRUPS II.

During the second quarter of 2006, Sierra Capital Trust III issued 15,000 Floating Rate Capital Trust Pass-Through Securities (TRUPS III), with a liquidation value of \$1,000 per security, for gross proceeds of \$15,000,000. The entire proceeds of the issuance were invested by Trust III in \$15,464,000 of Subordinated Debentures issued by the Company, with identical maturity, repricing and payment terms as the TRUPS III. The Subordinated Debentures, purchased by Trust III, represent the sole assets of the Trust III. Those Subordinated Debentures mature on September 23, 2036, bear a current interest rate of 1.71% (based on 3-month LIBOR plus 1.40%), with repricing and payments due quarterly.

Those Subordinated Debentures are redeemable by the Company, subject to receipt by the Company of prior approval from the Federal Reserve Bank, on any March 23rd, June 23rd, September 23rd, and December 23rd. The redemption price is par plus accrued and unpaid interest, except in the case of redemption under a special event which is defined in the debenture. The TRUPS III are subject to mandatory redemption to the extent of any early redemption of the related Subordinated Debentures and upon maturity of the Subordinated Debentures on September 23, 2036.

The Trust III has the option to defer payment of the distributions for a period of up to five years, as long as the Company is not in default on the payment of interest on the Subordinated Debentures. The TRUPS III issued in the offering were sold in private transactions pursuant to an exemption from registration under the Securities Act of 1933, as amended. The Company has guaranteed, on a subordinated basis, distributions and other payments due on the TRUPS III.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

11. COMMITMENTS AND CONTINGENCIES

Leases

The Company leases certain of its branch facilities under non-cancelable operating leases. Rental expense included in occupancy and equipment expense totaled \$1,011,000, \$1,167,000 and \$1,343,000 for the years ended December 31, 2012, 2011 and 2010, respectively.

Future minimum lease payments on non-cancelable operating leases are as follows:

<u>Years Ending December 31,</u>	
2013	\$ 1,005,000
2014	945,000
2015	903,000
2016	696,000
2017	688,000
Thereafter	<u>4,817,000</u>
	<u>\$ 9,054,000</u>

The Company has options to renew its branch facilities after the initial leases expire. The renewal options range from one to ten years and are not included in the payments reflected above.

Letter of Credit

The Company holds a letter of credit with the Federal Home Loan Bank of San Francisco totaling \$55,000,000. The letter of credit is pledged to secure public deposits at December 31, 2012.

Federal Reserve Requirements

Banks are required to maintain reserves with the Federal Reserve Bank equal to a specified percentage of their reservable deposits less vault cash. The reserve balances maintained at the Federal Reserve Bank at December 31, 2012 and 2011 were \$38,962,000 and \$38,041,000, respectively.

Financial Instruments with Off-Balance-Sheet Risk

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business. These financial instruments consist of commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheet.

The Company's exposure to credit loss in the event of nonperformance by the other party for commitments to extend credit and letters of credit is represented by the contractual amount of those instruments. The Bank uses the same credit policies in making commitments and letters of credit as it does for loans included on the balance sheet.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

11. COMMITMENTS AND CONTINGENCIES (Continued)

The following financial instruments represent off-balance-sheet credit risk (dollars in thousands):

	Years Ended December 31,	
	2012	2011
Fixed-rate commitments to extend credit	\$ 53,550	\$ 10,150
Variable-rate commitments to extend credit	\$ 171,850	\$ 144,173
Standby letters of credit	\$ 6,690	\$ 11,113
Commercial and similar letters of credit	\$ 8,539	\$ 8,991

Commitments to extend credit consist primarily of unfunded single-family residential and commercial real estate construction loans and commercial revolving lines of credit. Construction loans are established under standard underwriting guidelines and policies and are secured by deeds of trust, with disbursements made over the course of construction. Commercial revolving lines of credit have a high degree of industry diversification. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments to extend credit are made at both fixed and variable rates of interest as stated in the table above. Standby letters of credit are issued by the Company to guarantee the performance of a customer to a third party and are made at variable rates of interest. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers.

Concentration in Real Estate Lending

At December 31, 2012, in management's judgment, a concentration of loans existed in real estate related loans. At that date, approximately 62% of the Company's loans were real estate related. Balances secured by commercial buildings and construction and development loans represented 56% of all real estate loans, while loans secured by non-construction residential properties accounted for 31%, and loans secured by farmland were 13% of real estate loans. Although management believes the loans within these concentrations have no more than the normal risk of collectability, a further decline in the performance of the economy in general or a further decline in real estate values in the Company's primary market areas, in particular, could have an adverse impact on collectability.

Concentration by Geographic Location

The Company grants commercial, real estate mortgage, real estate construction and consumer loans to customers primarily in the South Central San Joaquin Valley of California, specifically Tulare, Fresno, Kern, Kings and Madera counties. The ability of a substantial portion of the Bank's customers to honor their contracts is dependent on the economy in these areas. Although the Bank's loan portfolio is diversified, there is a relationship in this region between the local agricultural economy and the economic performance of loans made to non-agricultural customers.

Contingencies

The Company is subject to legal proceedings and claims which arise in the ordinary course of business. In the opinion of management, the amount of ultimate liability with respect to such actions will not materially affect the consolidated financial position or results of operations of the Company.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

12. SHAREHOLDERS' EQUITY

Share Repurchase Plan

At December 31, 2012, the Company had a stock repurchase plan which was effective July 1, 2003 and has no expiration date. The repurchase program initially provided that up to 250,000 shares of Sierra Bancorp's common stock could be repurchased by the Company from time to time. That amount was supplemented by 250,000 on May, 19, 2005, another 250,000 shares on March 16, 2006, and an additional 500,000 shares on April 19, 2007.

During the year ended December 31, 2012, the Company did not repurchase any shares, leaving 100,669 shares available for repurchase. Repurchases are generally made in the open market at market prices.

Earnings Per Share

A reconciliation of the numerators and denominators of the basic and diluted earnings per share computations is as follows:

	<u>For the Years Ended December 31,</u>		
	<u>2012</u>	<u>2011</u>	<u>2010</u>
<u>Basic Earnings Per Share</u>			
Net income (dollars in thousands)	\$ 8,185	\$ 7,780	\$ 7,363
Weighted average shares outstanding	14,103,805	14,036,667	12,109,717
Basic earnings per share	<u>\$ 0.58</u>	<u>\$ 0.55</u>	<u>\$ 0.61</u>
<u>Diluted Earnings Per Share</u>			
Net income (dollars in thousands)	\$ 8,185	\$ 7,780	\$ 7,363
Weighted average shares outstanding	14,103,805	14,036,667	12,109,717
Effect of dilutive stock options	16,508	48,534	82,628
Weighted average shares outstanding	<u>14,120,313</u>	<u>14,085,201</u>	<u>12,192,345</u>
Diluted earnings per share	<u>\$ 0.58</u>	<u>\$ 0.55</u>	<u>\$ 0.60</u>

Stock Options

In June 1998, Bank of the Sierra adopted the 1998 Stock Option Plan (the "1998 Plan") for which shares were reserved for issuance to employees and directors under incentive and non-statutory agreements. The 1998 Plan was assumed by the Company effective August 10, 2001. Effective May 23, 2007, the 1998 Plan was terminated and no further options may be granted thereunder, but options granted under the 1998 Plan which were outstanding as of the termination date were not affected by this termination. As of December 31, 2012, options granted under the 1998 Plan covering 190,650 shares were still outstanding.

On March 15, 2007 the Board of Directors approved and adopted the Company's 2007 Stock Incentive Plan (the "2007 Plan"), which was approved by the Company's shareholders on May 23, 2007. The 2007 Plan provides for the issuance of both "incentive" and "nonqualified" stock options to officers and employees, and of "nonqualified" stock options to non-employee directors, of the Company and its subsidiaries. The 2007 Plan also provides for the issuance of restricted stock awards to these same classes of eligible participants, which awards may be granted on such terms and conditions as are established by the Board of Directors or the Compensation Committee in its discretion. We have not issued, nor do we currently have plans to issue, restricted stock awards.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

12. SHAREHOLDERS' EQUITY (Continued)

The maximum number of shares to be issued under the 2007 Plan is 1,500,000 shares of the Company's authorized but unissued common stock, subject to adjustment for stock splits and dividends. This maximum number covers both restricted stock awards and stock options to be granted under the 2007 Plan, and is in addition to options covering 190,650 shares outstanding under the 1998 Plan at December 31, 2012.

All options under the 2007 Plan must be granted at an exercise price of not less than 100% of the fair market value of the stock on the date of grant, and will be exercisable in installments as provided in individual stock option agreements. In the event of a "Change in Control" as defined in the 2007 Plan, all outstanding options there under shall become exercisable in full (subject to certain notification requirements), and shall terminate if not exercised within a specified period of time, unless such options are assumed by the successor corporation or substitute options are granted. Options will terminate in the event an optionee ceases to be employed by or to serve as a director of the Company or its subsidiaries, and the vested portion thereof must be exercised within 30 days after such cessation of employment or service.

A summary of the Company's stock option activity, including options from the 1998 Plan, follows (shares in thousands, except exercise price):

	2012			2011		2010	
	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value ⁽¹⁾	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding, beginning of year	810	\$ 14.97		835	\$ 14.24	757	\$ 15.11
Exercised	(5)	\$ 9.45		(125)	\$ 6.72	(31)	\$ 7.69
Granted	189	\$ 10.21		186	\$ 10.58	180	\$ 10.73
Canceled	(67)	\$ 13.08		(86)	\$ 10.43	(71)	\$ 17.48
Outstanding, end of year	<u>927</u>	\$ 14.16	\$ 848	<u>810</u>	\$ 14.97	<u>835</u>	\$ 14.24
Exercisable, end of year ⁽²⁾	<u>599</u>	\$ 16.07	\$ 469	<u>504</u>	\$ 17.15	<u>553</u>	\$ 14.97

⁽¹⁾The aggregate intrinsic value of stock option in the table above represents the total pre-tax intrinsic value (the amount by which the current market value of the underlying stock exceeds the exercise price of the option) that would have been received by the option holders had all option holders exercised their options on December 31, 2012. This amount changes based on changes in the market value of the Company's stock.

⁽²⁾The weighted average remaining contractual life of stock options outstanding and exercisable on December 31, 2012 was 7.1 years and 6.2 years, respectively.

Information related to stock options during each year follows:

	Years Ended December 31,		
	2012	2011	2010
Weighted-average grant-date fair value per share	\$ 3.86	\$ 3.79	\$ 4.21
Total intrinsic value of stock options exercised	\$ 9,000	\$ 465,000	\$ 118,000
Total fair value of stock options vested	\$ 517,000	\$ -	\$ 839,000

Cash received from the exercise of 5,350 shares was \$51,000 for the period ended December 31, 2012 with a related tax benefit of \$3,000.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

12. SHAREHOLDERS' EQUITY (Continued)

The Company is using the Black-Scholes model to value stock options. According to U.S. GAAP a charge of \$487,000, \$459,000 and \$385,000 is reflected in the Company's income statements at December 31, 2012, 2011 and 2010 respectively, as pre-tax compensation and directors' expense related to stock options. The related tax benefit of these options is \$56,000, \$189,000 and \$159,000 for the years ended December 31, 2012, 2011 and 2010 respectively.

Unamortized compensation expense associated with unvested stock options outstanding at December 31, 2012 was \$605,000, which will be recognized over the next 4.3 years.

13. REGULATORY MATTERS

The Company and the Bank are subject to certain regulatory requirements administered by the Board of Governors of the Federal Reserve System and the FDIC. Failure to meet these minimum capital requirements can initiate certain mandatory and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of total and Tier 1 capital to risk-weighted assets and of Tier 1 capital to average assets. Each of these components is defined in the regulations. Management believes that the Company and the Bank met all their capital adequacy requirements as of December 31, 2012 and 2011. In addition, as of December 31, 2012 and 2011, notification from the FDIC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since that notification that management believes have changed the Bank's category. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based and leverage capital ratios as set forth below (dollars in thousands):

	Years Ended December 31,			
	2012		2011	
	Capital Amount	Ratio	Capital Amount	Ratio
<u>Leverage Ratio</u>				
Sierra Bancorp and subsidiary	\$ 186,783	13.34%	\$ 187,137	14.11%
Minimum requirement for "Well-Capitalized" institutions	69,993	5.0%	66,293	5.0%
Minimum regulatory requirement	55,994	4.0%	53,035	4.0%
Bank of the Sierra	\$ 184,024	13.17%	\$ 178,918	13.53%
Minimum requirement for "Well-Capitalized" institutions	69,866	5.0%	66,122	5.0%

Under current rules of the Federal Reserve Board, qualified trust preferred securities are one of several "restricted" core capital elements which may be included in Tier 1 capital in an aggregate amount limited to 25% of all core capital elements, net of goodwill less any associated deferred tax liability. Amounts of restricted core capital elements in excess of these limits generally may be included in tier 2 capital. Since the Company had less than \$15 billion in assets at December 31, 2012, under the Dodd-Frank Act, the Company will be able to continue to include its existing trust preferred securities in Tier 1 Capital to the extent permitted by FRB guidelines. However, the treatment of the Company's trust preferred securities will change in the near future if proposed regulations to conform to Basel III requirements are adopted.

Dividend Restrictions

The Company's ability to pay cash dividends is dependent on dividends paid to it by the Bank, and is also limited by state corporation law. The California General Corporation Law allows a California corporation to pay dividends if the Company's retained earnings equal at least the amount of the proposed dividend. If the Company does not have sufficient retained earnings available for the proposed dividend, it may still pay a dividend to its shareholders if immediately after giving effect to the dividend the sum of the company's assets (exclusive of goodwill and deferred charges) would be at least equal to 125% of its liabilities (not including deferred taxes, deferred income and other deferred liabilities) and the current assets of the company would be at least equal to its current liabilities, or, if the average of its earnings before taxes on income and before interest expense for the two preceding fiscal years was less than the average of its interest expense for the two preceding fiscal years, at least equal to 125% of its current liabilities.

Dividends from the Bank to the Company are restricted under California law to the lesser of the Bank's retained earnings or the Bank's net income for the latest three fiscal years, less dividends previously declared during that period, or, with the approval of the Department of Financial Institutions, to the greater of the retained earnings of the Bank, the net income of the Bank for its last fiscal year, or the net income of the Bank for its current fiscal year. As of December 31, 2012, the maximum amount available for dividend distribution under this restriction was approximately \$26,886,000.

14. BENEFIT PLANS

Salary Continuation Agreements, Directors' Retirement and Officer Supplemental Life Insurance Plans

The Company has entered into salary continuation agreements with its executive officers, and has established retirement plans for qualifying members of the Board of Directors. The plans provide for annual benefits for up to fifteen years after retirement or death. The benefit obligation under these plans totaled \$4,747,000 and \$4,538,000, and was fully accrued for the years ended December 31, 2012 and 2011, respectively. The expense recognized under these arrangements totaled \$292,000, \$403,000, and \$510,000 for the years ended December 31, 2012, 2011 and 2010, respectively. Salary continuation benefits paid to former directors or executives of the Company or their beneficiaries totaled \$83,000 for each of the years ended December 31, 2012, 2011 and 2010. The Company also provides benefits to former executives of Sierra National Bank under salary continuation plans that were in effect at the time Sierra National Bank was merged into Bank of the Sierra. The benefit obligation under these plans totaled \$145,000, \$197,000 and \$245,000, and was fully accrued for the years ended December 31, 2012, 2011, and 2010, respectively. Benefits paid to former executives of SNB under this plan totaled \$67,000, for each of the years ended December 31, 2012, 2011, and 2010, respectively. Certain officers of the Company have supplemental life insurance policies with death benefits available to the officers' beneficiaries.

In connection with these plans, the Company has purchased, or acquired through the merger, single premium life insurance policies with cash surrender values totaling \$34,762,000 and \$34,937,000 at December 31, 2012 and 2011, respectively. On the consolidated balance sheet, the cash surrender values are included in other assets.

Officer and Director Deferred Compensation Plan

The Company has established a deferred compensation plan for certain members of the management group and a deferred fee plan for directors for the purpose of providing the opportunity for participants to defer compensation. The Company bears the costs for the plan's administration and the interest earned on participant deferrals. The related administrative expense was not material for the years ended December 31, 2012, 2011 and 2010. In connection with this plan, life insurance policies with cash surrender values totaling \$3,245,000 and \$2,720,000 at December 31, 2012 and 2011, respectively, are included on the consolidated balance sheet in other assets.

401(k) Savings Plan

The 401(k) savings plan (the "Plan") allows participants to defer, on a pre-tax basis, up to 15% of their salary (subject to Internal Revenue Service limitations) and accumulate tax-deferred earnings as a retirement fund. The Bank may make a discretionary contribution to match a specified percentage of the first 6% of the participants' contributions annually. The amount of the matching contribution was 50% for each of the years ended December 31, 2012, 2011 and 2010. The matching contribution is discretionary; vests over a period of five years from the participants' hire date and is subject to the approval of the Board of Directors. The Company contributed \$302,000, \$304,000 and \$286,000 to the Plan in 2012, 2011 and 2010, respectively.

15. NON-INTEREST REVENUE

The major grouping of non-interest revenue on the consolidated income statements includes several specific items: service charges on deposit accounts, gain on sale of loans, credit card fees, check card fees, (loss) gain on sales and calls of investment securities available for sale, and increase in cash surrender value of life insurance.

Non-interest revenue also includes one general category of other income of which the following are major components (dollars in thousands):

	Years Ended December 31,		
	2012	2011	2010
Included in other income:			
Loss on limited partnerships	\$ (395)	\$ (885)	\$ (808)
Dividends on Equity Investments	67	26	52
Rental income on leases	102	173	570
Other	2,134	1,842	1,457
Total other non-interest revenue	<u>\$ 1,908</u>	<u>\$ 1,156</u>	<u>\$ 1,271</u>

16. OTHER OPERATING EXPENSE

Other expense consisted of the following (dollars in thousands):

	Year Ended December 31,		
	2012	2011	2010
Professional fees	\$ 3,454	\$ 3,941	\$ 5,018
Data processing	1,807	1,523	1,737
Advertising and promotion	1,771	2,051	1,979
Deposit services	2,266	2,516	2,708

17. RELATED PARTY TRANSACTIONS

During the normal course of business, the Bank enters into loans with related parties, including executive officers and directors. These loans are made with substantially the same terms, including rates and collateral, as loans to unrelated parties. The following is a summary of the aggregate activity involving related party borrowers (dollars in thousands):

	<u>Years Ended December 31,</u>		
	<u>2012</u>	<u>2011</u>	<u>2010</u>
Balance, beginning of year	\$ 2,471	\$ 3,465	\$ 3,104
Disbursements	625	773	2,343
Amounts repaid	(2,467)	(1,767)	(1,982)
Decreased	-	-	-
Balance, end of year	<u>\$ 629</u>	<u>\$ 2,471</u>	<u>\$ 3,465</u>
Undisbursed commitments to related parties	<u>\$ 330</u>	<u>\$ 472</u>	<u>\$ 1,433</u>

Deposits from related parties held by the Bank at December 31, 2012 and 2011 amounted to \$9,012,000 and \$6,665,000 respectively.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

18. FAIR VALUE

Fair value is defined by U.S. GAAP as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. U.S. GAAP also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.
- Level 2: Significant observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.
- Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

18. FAIR VALUE (Continued)

The Company used the following methods and significant assumptions to estimate fair values for each category of financial asset noted below:

Securities: The fair values of securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges or matrix pricing, which is a mathematical technique used widely in the industry, to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities.

Collateral Dependent Impaired loans: A specific loss allowance is created for collateral dependent impaired loans, representing the difference between the face value of the loan and its current appraised value less estimated disposition costs.

Foreclosed assets: Repossessed real estate (OREO) and other assets such as mobile homes are acquired at fair value, which is the appraised value less expected disposition costs, ranging from 5% to 15% depending on the specific property. Foreclosed assets are periodically measured for impairment using updated appraisals. If impairment is determined to exist, the book value of a foreclosed asset is immediately written down to its estimated impaired value through the income statement, thus the carrying amount is equal to the fair value and there is no valuation allowance.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

19. DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

Disclosures include estimated fair values for financial instruments for which it is practicable to estimate fair value. These estimates are made at a specific point in time based on relevant market data and information about the financial instruments. These estimates do not reflect any premium or discount that could result from offering the Company's entire holdings of a particular financial instrument for sale at one time, nor do they attempt to estimate the value of anticipated future business related to the instruments. In addition, the tax ramifications related to the realization of unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of these estimates.

Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the fair values presented.

The following methods and assumptions were used by the Company to estimate the fair value of its financial instruments at December 31, 2012 and 2011:

Cash and cash equivalents and short-term borrowings: For cash and cash equivalents and short-term borrowings, the carrying amount is estimated to be fair value.

Investment securities: For investment securities, fair values are based on quoted market prices, where available. If quoted market prices are not available, fair values are estimated using quoted market prices for similar securities and indications of value provided by brokers.

Loans and leases: For variable-rate loans and leases that re-price frequently with no significant change in credit risk or interest rate spread, fair values are based on carrying values. Fair values for other loans and leases are estimated using discounted cash flow analyses, using interest rates being offered at each reporting date for loans and leases with similar terms to borrowers of comparable creditworthiness. Fair values of loans held for sale are estimated using quoted market prices for similar loans or the amount the purchasers have committed to purchase the loan. The carrying amount of accrued interest receivable approximates its fair value.

Cash surrender value of life insurance policies: The fair values are based on current cash surrender values at each reporting date provided by the insurers.

Investment in limited partnerships: The fair values of the investments in WNC Institutional Tax Credit Fund Limited Partnerships are estimated using quarterly indications of value provided by the general partner.

Other investments: Included in other assets are certain long-term investments carried at cost, which approximates estimated fair value.

Deposits: The fair values for demand deposits and other non-maturity deposits are, by definition, equal to the amount payable on demand at the reporting date represented by their carrying amount. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow analysis using interest rates being offered at each reporting date by the Bank for certificates with similar remaining maturities. The carrying amount of accrued interest payable approximates its fair value.

Short-term borrowings: The carrying amounts of federal funds purchased, overnight FHLB advances, borrowings under repurchase agreements, and other short-term borrowings maturing within ninety days approximate their fair values. Fair values of other short-term borrowings are estimated using discounted cash flow analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

SIERRA BANCORP AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

19. DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS (Continued)

Long-term borrowings: The fair values of the Company's long-term borrowings are estimated using discounted cash flow analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

Subordinated debentures: The fair value of subordinated debentures was determined based on the current market value for like kind instruments of a similar maturity and structure.

Limited partnership capital commitments: The fair value of the capital commitments to the WNC Institutional Tax Credit Fund Limited Partnerships are estimated using a discounted cash flow analysis using rates of return currently available for similar instruments.

Commitments to extend credit and letters of credit: Commitments to extend credit are primarily for adjustable rate loans. For these commitments, there are no differences between the committed amounts and their fair values. Commitments to fund fixed rate loans and letters of credit are at rates which approximate fair value at each reporting date.

Carrying amount and estimated fair values of financial instruments were as follows (dollars in thousands):

	Year Ended December 31, 2012				
	Carrying Amount	Estimated Fair Value			Total
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Financial Assets:

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company's Chief Executive Officer and its Chief Financial Officer, after evaluating the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13(a)–15(e) as of the end of the period covered by this report (the "Evaluation Date") have concluded that as of the Evaluation Date, the Company's disclosure controls and procedures were adequate and effective to ensure that material information relating to the Company and its consolidated subsidiaries would be made known to them by others within those entities, particularly during the period in which this annual report was being prepared.

Disclosure controls and procedures are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure, and that such information is recorded, processed, summarized, and reported within the time periods specified by the SEC.

Management's Report on Internal Control over Financial Reporting

Management of the Company is responsible for the preparation, integrity, and reliability of the consolidated financial statements and related financial information contained in this annual report. The consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America and, as such, include some amounts that are based on judgments and estimates of management.

Management has established and is responsible for maintaining effective internal control over financial reporting. The Company's internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

There are inherent limitations in the effectiveness of any internal control, including the possibility of human error and the circumvention or overriding of controls. Accordingly, even effective internal control can provide only reasonable assurance with respect to financial statement preparation. Further, because of changes in conditions, the effectiveness of internal control may vary over time. The system contains monitoring mechanisms, and actions are taken to correct deficiencies identified.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2012. This assessment was based on criteria for effective internal control over financial reporting described in "Internal Control - Integrated Framework" published by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management believes that the Company maintained effective internal control over financial reporting as of December 31, 2012.

Management is responsible for compliance with the federal and state laws and regulations concerning dividend restrictions and federal laws and regulations concerning loans to insiders designated by the FDIC as safety and soundness laws and regulations. Management assessed compliance by the Company's insured financial institution, Bank of the Sierra, with the designated laws and regulations relating to safety and soundness. Based on this assessment, management believes that Bank of the Sierra complied, in all significant respects, with the designated laws and regulations related to safety and soundness for the year ended December 31, 2012.

Our assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2012 has been audited by Vavrinek, Trine, Day & Co., LLP, an independent registered public accounting firm, as stated in their report appearing below.

Changes in Internal Control

There were no significant changes in the Company's internal control over financial reporting or in other factors in the fourth quarter of 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders
Sierra Bancorp and Subsidiary
Porterville, California

We have audited Sierra Bancorp and Subsidiary's (the Company's) internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in conformity with U.S. generally accepted accounting principles. Because management's assessment and our audit were conducted to also meet the reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act (FDICIA), management's assessment and our audit of the Company's internal control over financial reporting included controls over the preparation of financial statements in accordance with instructions to the Consolidated Financial Statements for Bank Holding Companies (Form FR Y-9C). A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and the receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board, the consolidated balance sheets of the Company as of December 31, 2012 and 2011, and the related consolidated statements of operations, shareholders' equity and comprehensive income and cash flows for each of the years in the three year period ended December 31, 2012, and our report dated March 14, 2013 expressed an unqualified opinion on those financial statements.
