Redefining OCAL

2013 Annual Report

How are we Redefining OCAL

Letter from the PRESIDENT

On behalf of Home Federal's management and Board of Directors, I am pleased to provide this annual report for the fiscal year ended June 30, 2013. This marked another successful year for Home Federal as we continued to grow and expand our operations. Home Federal has benefitted from economic conditions in the Shreveport/Bossier City MSA which continued to perform well during the past year. Oil and gas industry activity, among other factors, has been driving loan and deposit growth in our region.

These market conditions have led to another robust year in mortgage originations. Continued growth and diversification of our loan portfolio has contributed to the execution of our business strategy.

- We have emphasized lending to locally-based businesses that can maintain a deposit relationship in addition to loans.
- · During 2013, we hired a Credit Officer with over 30 years of banking experience to ensure that we maintain high asset quality.
- We have continued to implement our community bank strategy, which is to grow our balance sheet with short-term loans while selling our 15-30 year fixed-rate residential loans.
- · We have expanded our residential mortgage origination business to increase market share of "purchase money" residential mortgages.
- We have retained mortgage servicing on some of the top tier conforming Fannie Mae residential mortgages that we originated to increase fee income and cross-selling opportunities.

In order to facilitate the growth of Home Federal, we are also seeking opportunities to expand our operations in our market area through additional branch offices or banking-related businesses. We have fully remodeled our 53 year old Main Office location in downtown Shreveport to include a drive-thru lane, ATM, and after hours depository. Over the past four years, all four of our branch locations are either new construction or have been remodeled with current features and design.

As the lease matures on our agency office location in South Shreveport, we have remodeled a building that was purchased in August 2011 to house our commercial lending operation and serve as the offices for Marketing, Human Resources and mortgage origination. This new agency office is located adjacent to our Yource Drive branch and will provide additional space for future growth. Although the building required a deployment of capital, operating expenses should be comparable to the existing leased agency office location.

We are in the planning process for a new branch location in North Bossier City to further increase our exposure to the fastest growing market in the Shreveport/Bossier City MSA. This branch is expected to be placed into operation in early fiscal 2015 (summer/fall calendar 2014).

Last year we introduced a marketing campaign called, "We Define Local" to differentiate Home Federal from other community banks entering our market. This year, we will introduce a new campaign called, "Redefining Local." The goal of the campaign is to emphasize Home Federal's position as a local community bank with technology that one could expect from a larger financial institution. For example, we have expanded our Internet and mobile banking platform to include an App with Mobile Remote Deposit Capture in the iTunes Store and on Google Play.

As we look to the future, we will continue to aggressively manage our cost of funds to help offset decreases to the yield on our earning assets. We have implemented an asset liability management solution to help identify risks and opportunities for Home Federal. We firmly believe there are many opportunities for Home Federal in the years ahead.

Very truly yours,

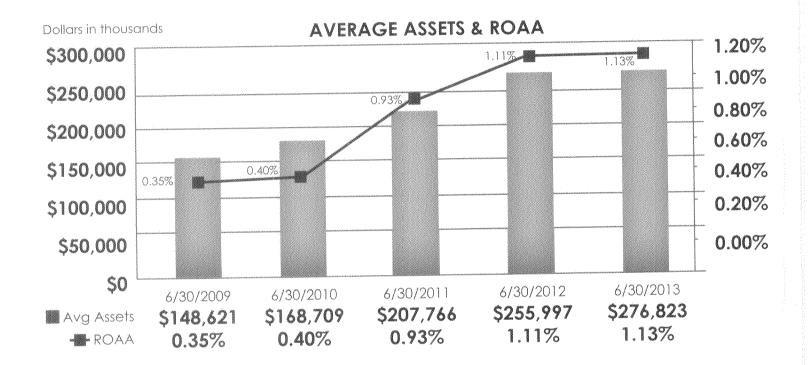

James R. Barlow

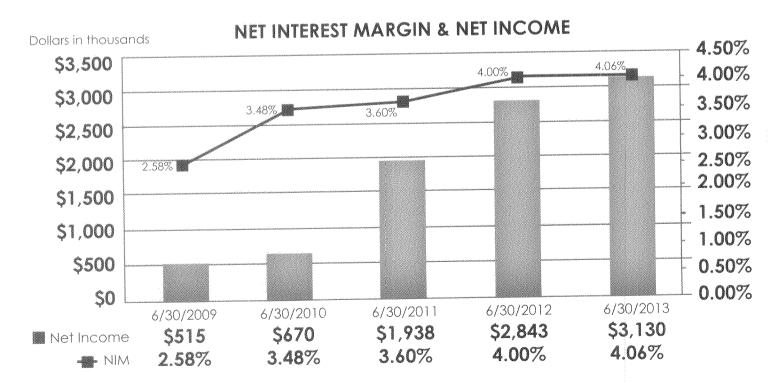

President and Chief Operating Officer of Home Federal Bancorp, Inc. of Louisiana President and Chief Executive Officer

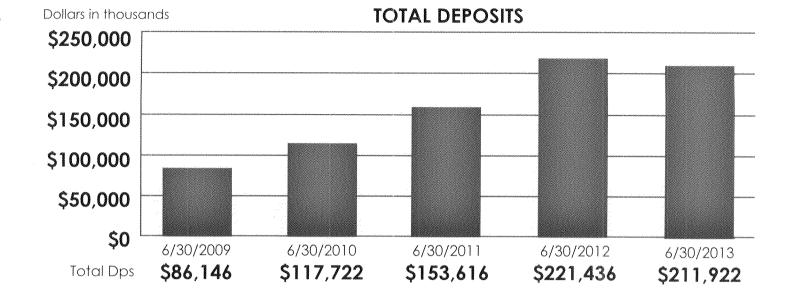

James K. Barlow

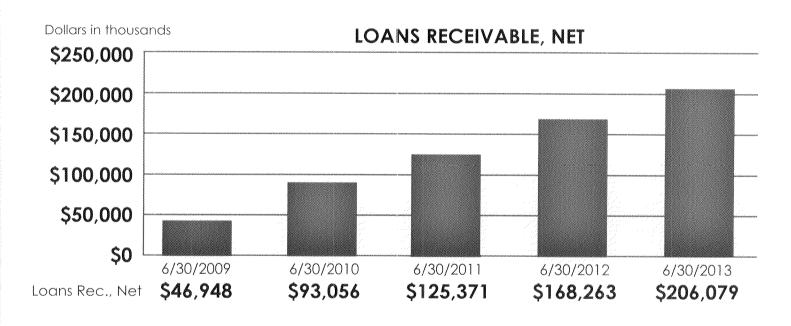

of Home Federal Bank

Item 1. Business

Home Federal Bancorp, Inc. of Louisiana, a Louisiana chartered corporation ("Home Federal Bancorp" or the "Company"), became the holding company for Home Federal Bank ("Home Federal Bank" or the "Bank") on December 22, 2010, upon completion of the Bank's second step conversion from the mutual holding company form of organization to the stock holding company form of organization. As part of the conversion, all outstanding shares of the former Home Federal Bancorp, Inc. of Louisiana common stock (other than those owned by Home Federal Mutual Holding Company) were converted into the right to receive 0.9110 of a share, and cash in lieu of fractional shares, of Home Federal Bancorp common stock resulting in approximately 1,100,609 shares issued in the exchange. In addition, a total of 1,945,220 shares of common stock of Home Federal Bancorp were sold in subscription, community and syndicated community offerings to certain depositors and borrowers of the Bank, the Bank's Employee Stock Ownership Plan and other investors for \$10.00 per share, or \$19.5 million in the aggregate. Treasury stock held was cancelled. The net proceeds of the offering were approximately \$18.0 million, after offering expenses.

Home Federal Bank is a federally chartered stock savings bank originally organized in 1924 as Home Building and Loan Association. The Bank reorganized into the mutual holding company structure in January 2005 and changed its name to "Home Federal Bank" in 2009 as part of its business strategy to be recognized as a community bank. Home Federal Bank's headquarters and main office, three full service branch offices and agency office are located in Shreveport and Bossier City, Louisiana and serve the Shreveport-Bossier City metropolitan area. Home Federal Bank's business primarily consists of attracting deposits from the general public and using those funds to originate loans. At our agency office, we offer security brokerage and advisory services through a third party provider.

As of June 30, 2013, Home Federal Bancorp's only business activities are to hold all of the outstanding common stock of Home Federal Bank. Home Federal Bancorp is authorized to pursue other business activities permitted by applicable laws and regulations for savings and loan holding companies, which may include the issuance of additional shares of common stock to raise capital or to support mergers or acquisitions and borrowing funds for reinvestment in Home Federal Bank.

Home Federal Bancorp does not own or lease any property, but instead uses the premises, equipment and furniture of Home Federal Bank. At the present time, Home Federal Bancorp employs only persons who are officers of Home Federal Bank to serve as officers of Home Federal Bancorp and may also use the support staff of Home Federal Bank from time to time. These persons are not separately compensated by Home Federal Bancorp.

Pursuant to the regulations under Sections 23A and 23B of the Federal Reserve Act, Home Federal Bank and Home Federal Bancorp have entered into an expense sharing agreement. Under this agreement, Home Federal Bancorp will reimburse Home Federal Bank for the time that employees of Home Federal Bank devote to activities of Home Federal Bancorp, the portion of the expense of the annual independent audit attributable to Home Federal Bancorp and all expenses attributable to Home Federal Bancorp's public filing obligations under the Securities Exchange Act of 1934.

Market Area

Our primary market area for loans and deposits is in northwest Louisiana, particularly Caddo Parish and neighboring communities in Bossier Parish, which are located in the Shreveport-Bossier City metropolitan statistical area.

Shreveport and Bossier City are located in northern Louisiana on Interstate 20, approximately fifteen miles from the Texas state border and 185 miles east of Dallas, Texas. Our primary market area has a diversified economy with employment in services, government and wholesale/retail trade constituting the basis of the local economy, with service jobs being the largest component. The majority of the services are health care related as Shreveport has become a regional hub for health care. The casino gaming industry also supports a significant

number of the service jobs. The energy sector has a prominent role in the regional economy, resulting from oil and gas exploration and drilling.

Competition. We face significant competition both in attracting deposits and in making loans. Our most direct competition for deposits has come historically from commercial banks, credit unions and other savings institutions located in our primary market area, including many large financial institutions which have greater financial and marketing resources available to them. In addition, we face significant competition for investors' funds from short-term money market securities, mutual funds and other corporate and government securities. We do not rely upon any individual group or entity for a material portion of our deposits. Our ability to attract and retain deposits depends on our ability to generally provide a rate of return, liquidity and risk comparable to that offered by competing investment opportunities.

Our competition for real estate loans comes principally from mortgage banking companies, commercial banks, other savings institutions and credit unions. We compete for loan originations primarily through the interest rates and loan fees we charge, and the efficiency and quality of services we provide borrowers. Factors which affect competition include general and local economic conditions, current interest rate levels and volatility in the mortgage markets. Competition may increase as a result of the continuing reduction of restrictions on the interstate operations of financial institutions.

Lending Activities

General. At June 30, 2013, our net loan portfolio amounted to \$206.1 million, representing approximately 74.4% of total assets at that date. Historically, our principal lending activity was the origination of one- to four-family residential loans. At June 30, 2013, one- to four-family residential loans amounted to \$73.2 million, or 35.1% of the total loan portfolio. Commercial real estate loans amounted to \$51.2 million, or 24.5% of the total loan portfolio at June 30, 2013.

The types of loans that we may originate are subject to federal and state laws and regulations. Interest rates charged on loans are affected principally by the demand for such loans and the supply of money available for lending purposes and the rates offered by our competitors. These factors are, in turn, affected by general and economic conditions, the monetary policy of the federal government, including the Federal Reserve Board, legislative and tax policies, and governmental budgetary matters.

A savings institution generally may not make loans to one borrower and related entities in an amount which exceeds 15% of its unimpaired capital and surplus, although loans in an amount equal to an additional 10% of unimpaired capital and surplus may be made to a borrower if the loans are fully secured by readily marketable securities. In addition, upon application the Office of the Comptroller of the Currency permits a savings institution to lend up to an additional 15% of unimpaired capital and surplus to one borrower to develop domestic residential housing units. At June 30, 2013, our regulatory limit on loans-to-one borrower was \$6.3 million and the five largest loans or groups of loans-to-one borrower, including related entities, aggregated \$6.2 million, \$5.9 million, \$4.8 million and \$4.7 million. Each of our five largest loans or groups of loans was originated with strong guarantor support to known borrowers in our market area and performing in accordance with its terms at June 30, 2013.

Loans to or guaranteed by general obligations of a state or political subdivision are not subject to the foregoing lending limits.

Loan Portfolio Composition. The following table shows the composition of our loan portfolio by type of loan at the dates indicated.

⁽¹⁾ Does not include loans held-for-sale amounting to \$3.5 million, \$11.2 million, \$6.7 million, \$13.4 million and \$1.3 million at June 30, 2013, 2012, 2011, 2010 and 2009, respectively.

Origination of Loans. Our lending activities are subject to written underwriting standards and loan origination procedures established by the board of directors and management. When applicable, loans originated are also subject to the underwriting standards of Fannie Mae, Freddie Mac, HUD, VA, USDA and correspondent banks that purchase loans we originate. Loan originations are obtained through a variety of sources, primarily from existing customers, local realtors and builders. Written loan applications are taken by one of our loan officers. The loan officer also supervises the procurement of credit reports, income and asset documentation and other documentation involved with a loan. All appraisals are ordered through an approved appraisal management company in compliance with the Dodd-Frank Consumer Protection Act. Under our lending policy, a title insurance policy is required on most mortgage loans, with the exception of certain smaller loan amounts where our policy requires a title opinion only. We also require fire and extended coverage casualty insurance in order to protect the properties securing the real estate loans. Borrowers must also obtain flood insurance policies when the property is in a flood hazard area.

Our loan approval process is intended to assess the borrower's ability to repay the loan, the viability of the loan and the value of the property that will secure the loan. All residential loans originated for sale to FNMA or other investor banks that receive an Approve-Eligible recommendation on the automated underwriting feedback certificate that is applicable for each loan type must be approved by a Bank mortgage underwriter. Loans that do not receive an Approve-Eligible recommendation must be approved by a Bank mortgage underwriter and the Senior Vice President of Mortgage. In addition, all loans originated to be held on the Bank's portfolio must be approved by a Bank mortgage underwriter and the Senior Vice President of Mortgage for loans up to \$500,000, and for loans up to \$1.0 million by the senior credit officer. Commercial real estate secured loans and lines of credit and commercial business loans up to \$1.0 million must be approved by the Senior Credit Officer or the President/Chief Executive Officer or the Chairman of the Board, up to \$2.0 million by two of the following three officers, Senior Credit

Officer, President/Chief Executive Officer, Chairman of the Board, and in excess of \$2.0 million by the Executive Committee. In accordance with past practice, all loans are ratified by our board of directors.

Historically, we purchased loans from a mortgage originator secured by single-family housing primarily located in predominantly rural areas of Texas and to a lesser extent, Tennessee, Arkansas, Alabama, Louisiana and Mississippi. We have not purchased any such mortgage loans since fiscal 2008. The loans were generally secured by rural properties and the seller retained servicing rights. Although the loans were originated with fixed-rates, Home Federal Bank receives an adjustable-rate of interest equal to the Federal Housing Finance Board rate, with rate floors and ceilings of approximately 5.0% and 8.0%, respectively. Under the terms of the loan agreements, the seller must repurchase any loan that becomes more than 90 days delinquent. At June 30, 2013, we had approximately \$8.2 million of such loans in our portfolio with an average contractual remaining term of approximately 17.9 years.

In recent periods, we have originated and sold a substantial amount of our fixed-rate conforming mortgages to correspondent banks. For the year ended June 30, 2013, we originated \$169.8 million of one- to four-family residential loans and sold \$110.4 million of such loans. Our residential loan originations primarily consist of rural development, FHA and VA loans.

The following table shows total loans originated, sold and repaid during the periods indicated.

	Year Ended June 30,				
	2013	2012	2011		
		(In thousands)

Net increase in loan portfolio		\$ <u>42,892</u>	\$ <u>32,315</u>		

⁽¹⁾ Other items consist of deferred loan fees, the allowance for loan losses and loans held-for-sale at year end.

Although federal laws and regulations permit savings institutions to originate and purchase loans secured by real estate located throughout the United States, we concentrate our lending activity in our primary market area in Caddo and Bossier Parishes, Louisiana and the surrounding area. Subject to our loans-to-one borrower limitation, we are permitted to invest without limitation in residential mortgage loans and up to 400% of our capital in loans secured by non-residential or commercial real estate. We also may invest in secured and unsecured consumer loans in an amount not exceeding 35% of total assets. This 35% limitation may be exceeded for certain types of consumer loans, such as home equity and property improvement loans secured by residential real property. In addition, we may invest up to 10% of our total assets in secured and unsecured loans for commercial, corporate, business or agricultural purposes. At June 30, 2013, we were within each of the above lending limits.

During fiscal 2013 and 2012, we sold \$110.4 million and \$120.0 million of loans, respectively. We recognized gain on sale of loans of \$2.7 million during fiscal 2013 and \$2.4 million during fiscal 2012. Loans were sold during these periods primarily to other financial institutions. Such loans were sold against forward sales commitments with servicing released and without recourse after a certain period of time, typically 90 days. The loans sold primarily consisted of long-term, fixed rate residential real estate loans. These loans were originated during this period of historically low interest rates and were sold to reduce our interest rate risk. We will continue to

sell loans in the future to the extent we believe the interest rate environment is unfavorable and interest rate risk is unacceptable.

Contractual Terms to Final Maturities. The following table shows the scheduled contractual maturities of our loans as of June 30, 2013, before giving effect to net items. Demand loans, loans having no stated schedule of repayments and no stated maturity, and overdrafts are reported as due in one year or less. The amounts shown below do not take into account loan prepayments.

Total	\$ <u>137,271</u>	\$ <u>9,124</u>	\$ <u>146,395</u>

Scheduled contractual maturities of loans do not necessarily reflect the actual expected term of the loan portfolio. The average life of mortgage loans is substantially less than their average contractual terms because of prepayments. The average life of mortgage loans tends to increase when current mortgage loan rates are higher than rates on existing mortgage loans and, conversely, decrease when rates on current mortgage loans are lower than existing mortgage loan rates (due to refinancing of adjustable-rate and fixed-rate loans at lower rates). Under the latter circumstance, the weighted average yield on loans decreases as higher yielding loans are repaid or refinanced at lower rates.

One- to Four-Family Residential Real Estate Loans. At June 30, 2013, \$73.2 million, or 35.1%, of the total loan portfolio, before net items, consisted of one- to four-family residential loans.

The loan-to-value ratios, maturities and other provisions of the loans made by us generally have reflected the policy of making less than the maximum loan permissible under applicable regulations, in accordance with sound lending practices, market conditions and underwriting standards established by us. Our current lending policy on one- to four-family residential loans generally limits the maximum loan-to-value ratio to 90% or less of the appraised value of the property although we will lend up to a 100% loan-to-value ratio with private mortgage insurance. These loans are amortized on a monthly basis with principal and interest due each month, with terms not in excess of 30 years and generally include "due-on-sale" clauses.

At June 30, 2013, \$63.0 million, or 86.1%, of our one- to four-family residential mortgage loans were fixed-rate loans. Fixed-rate loans generally have maturities ranging from 15 to 30 years and are fully amortizing with monthly loan payments sufficient to repay the total amount of the loan with interest by the end of the loan term. Our fixed-rate loans generally are originated under terms, conditions and documentation which permit them to be sold to U.S. Government-sponsored agencies, such as the Federal Home Loan Mortgage Corporation, and other investors in the secondary mortgage market. Consistent with our asset/liability management, we have sold a significant portion of our long-term, fixed rate loans.

Although we offer adjustable rate loans, substantially all of the single-family loan originations over the last few years have consisted of fixed-rate loans due to the low interest rate environment. The adjustable-rate loans held in portfolio typically have interest rates which adjust on an annual basis. These loans generally have an annual cap of 2% on any increase or decrease and a cap of 6% above or below the initial rate over the life of the loan. Such loans are underwritten based on the initial rate plus 2%.

Commercial — Real Estate Secured Loans. As of June 30, 2013, Home Federal Bank had outstanding \$51.2 million of loans secured by commercial real estate, \$25.5 million, or 49.9%, of which were owner occupied. It is the current policy of Home Federal Bank to lend in a first lien position on real property occupied as a commercial business property. Home Federal Bank offers fixed and variable rate commercial real estate loans. Home Federal Bank's commercial real estate loans are limited to a maximum of 85% of the appraised value and have terms up to 15 years, however, the terms are generally no more than 5 years with amortization periods of 20 years or less. It is our policy that commercial real estate secured lines of credit are limited to a maximum of 85% of the appraised value of the property and shall not exceed 3 to 5 year amortizations.

Multi-Family Residential Loans. At June 30, 2013, we had outstanding approximately \$19.6 million of multi-family residential loans. Our multi-family residential loan portfolio includes income producing properties of 50 or more units and low income housing developments. We obtain personal guarantees on all properties other than those of the public housing authority for which they are not permitted.

Commercial Business Loans. At June 30, 2013, we had outstanding approximately \$16.8 million of non-real estate secured commercial loans. The business lending products we offer include lines of credit, inventory financing and equipment loans. Commercial business loans and lines of credit carry more credit risk than other types of commercial loans. We attempt to limit such risk by making loans predominantly to small- and mid-sized businesses located within our market area and having the loans personally guaranteed by the principals involved. We have established underwriting standards in regard to business loans which set forth the criteria for sources of repayment, borrower's capacity to repay, specific financial and collateral margins and financial enhancements such as guarantees. Generally, the primary source of repayment is cash flow from the business and the financial strength of the borrower.

Land Loans. As of June 30, 2013, land loans were \$15.6 million, or 7.5% of the total loan portfolio, before net items. Land loans include land which has been acquired for the purpose of development and unimproved land. Our loan policy provides for loan-to-value ratios of 50% for unimproved land loans. Land loans are originated with fixed rates and terms up to five years with longer amortizations. Although land loans generally are considered to have greater credit risk than certain other types of loans, we expect to mitigate such risk by requiring personal guarantees and identifying other secondary sources of repayment for the land loan other than the sale of the

collateral. It is our practice to only originate a limited amount of loans for speculative development to borrowers with whom our lenders have a prior relationship.

Construction Loans. At June 30, 2013, we had outstanding approximately \$16.9 million of construction loans which included loans for the construction of residential and commercial property. Our residential construction loans typically have terms of six to 11 months with a takeout letter from Home Federal for the permanent mortgage. Our commercial construction loans include owner occupied commercial properties, pre-sold property and speculative office property. As of June 30, 2013, we held \$11.6 million of speculative construction loans, \$5.7 million of which related to speculative office condominium projects, which are limited to eight units at any one time.

Home Equity and Second Mortgage Loans. At June 30, 2013, we held \$2.3 million of home equity and second mortgage loans. These loans are secured by the underlying equity in the borrower's residence. We do not require that we hold the first mortgage on the properties that secure the second mortgage loans. The amount of our second mortgage loans generally cannot exceed a loan-to-value ratio of 90% after taking into consideration the first mortgage loan. These loans are typically three-to-five year balloon loans with fixed rates and terms that will not exceed 10 years and contain an on-demand clause that allows us to call the loan in at any time.

Equity Lines of Credit. We offer lines of credit secured by a borrower's equity in real estate which loans amounted to \$12.6 million, or 6.0% of the total loan portfolio, before net items, at June 30, 2013. The rates and terms of such lines of credit depend on the history and income of the borrower, purpose of the loan and collateral. Lines of credit will not exceed 90% of the value of the equity in the collateral.

Consumer Non-real Estate Loans. We are authorized to make loans for a wide variety of personal or consumer purposes. We originate consumer loans primarily in order to accommodate our customers. The consumer loans at June 30, 2013 consist of loans secured by deposit accounts with us, automobile loans, overdraft and other unsecured loans.

Consumer non-real estate loans generally have shorter terms and higher interest rates than residential mortgage loans, and generally entail greater credit risk than residential mortgage loans, particularly those loans secured by assets that depreciate rapidly, such as automobiles, boats and recreational vehicles. In such cases, repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment for the outstanding loan and the remaining deficiency often does not warrant further substantial collection efforts against the borrower. In particular, amounts realizable on the sale of repossessed automobiles may be significantly reduced based upon the condition of the automobiles and the fluctuating demand for used automobiles. Our automobile loans at June 30, 2013 totaled \$16,000.

We offer loans secured by deposit accounts held with us, which loans amounted to \$259,000, or 0.1% of the total loan portfolio, before net items, at June 30, 2013. Such loans are originated for up to 100% of the account balance, with a hold placed on the account restricting the withdrawal of the account balance. The interest rate on the loan is equal to the interest rate paid on the account plus 2%. These loans typically are payable on demand with a maturity date of one year.

Loan Origination and Other Fees. In addition to interest earned on loans, we generally receive loan origination fees or "points" for originating loans. Loan points are a percentage of the principal amount of the mortgage loan and are charged to the borrower in connection with the origination of the loan. In accordance with accounting guidance, loan origination fees and points are deferred and amortized into income as an adjustment of yield over the life of the loan.

Asset Quality

General. During fiscal 2013, we engaged a third party to review loans, policies, and procedures. The scope of the services provided included credit underwriting, adherence to our loan policies as well as regulatory policies, and recommendations regarding reserve allocations. We expect these reviews will be done annually.

Our collection procedures provide that when a loan is 10 days past due, personal contact efforts are attempted, either in person or by telephone. At 15 days past due, a late charge notice is sent to the borrower requesting payment. If the loan is still past due at 30 days, a formal letter is sent to the borrower stating that the loan is past due and that legal action, including foreclosure proceedings, may be necessary. If a loan becomes 60 days past due and no progress has been made in resolving the delinquency, a collection letter from legal counsel is sent and personal contact is attempted. When a loan continues in a delinquent status for 90 days or more, and a repayment schedule has not been made or kept by the borrower, generally a notice of intent to foreclose is sent to the borrower. If the delinquency is not cured, foreclosure proceedings are initiated. In most cases, deficiencies are cured promptly. While we generally prefer to work with borrowers to resolve such problems, we will institute foreclosure or other collection proceedings when necessary to minimize any potential loss.

Loans are placed on non-accrual status when management believes the probability of collection of interest is doubtful. When a loan is placed on non-accrual status, previously accrued but unpaid interest is deducted from interest income. We generally discontinue the accrual of interest income when the loan becomes 90 days past due as to principal or interest unless the credit is well secured and we believe we will fully collect.

Real estate and other assets we acquire as a result of foreclosure or by deed-in-lieu of foreclosure are classified as real estate owned until sold. We held no real estate owned at June 30, 2013 or 2012.

Delinquent Loans. The following table shows the delinquencies in our loan portfolio as of the dates indicated.

Classified Assets. Federal regulations require that each insured savings institution classify its assets on a regular basis. In addition, in connection with examinations of insured institutions, federal examiners have authority to identify problem assets and, if appropriate, classify them. There are three classifications for problem assets: "substandard," "doubtful" and "loss." Substandard assets have one or more defined weaknesses and are characterized by the distinct possibility that the insured institution will sustain some loss if the deficiencies are not corrected. Doubtful assets have the weaknesses of substandard assets with the additional characteristic that the weaknesses make collection or liquidation in full on the basis of currently existing facts, conditions and values questionable, and there is a higher possibility of loss. An asset classified as loss is considered uncollectible and of such little value that continuance as an asset of the institution is not warranted. Another category designated "special mention" also must be established and maintained for assets which do not currently expose an insured institution to a sufficient degree of risk to warrant classification as substandard, doubtful or loss. Assets classified as substandard or doubtful require the institution to establish general allowances for loan losses. If an asset or portion thereof is classified as loss, the insured institution must either establish specific allowances for loan losses in the amount of 100% of the portion of the asset classified loss, or charge-off such amount. General loss allowances established to cover possible losses related to assets classified substandard or doubtful may be included in determining an institution's regulatory capital, while specific valuation allowances for loan losses do not qualify as regulatory capital. Federal examiners may disagree with an insured institution's classifications and amounts reserved. At June 30, 2013 we held \$402,000 of assets designated as special mention, \$5.3 million classified as substandard and \$27,000 classified as doubtful. The classified assets are related to three commercial loans and one residential mortgage loan classified as substandard and one line of credit classified as doubtful.

Allowance for Loan Losses. At June 30, 2013, our allowance for loan losses amounted to \$2.2 million. The allowance for loan losses is maintained at a level believed, to the best of our knowledge, to cover all known and inherent losses in the portfolio both probable and reasonable to estimate at each reporting date. The level of allowance for loan losses is based on our periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing conditions. We are primarily engaged in originating single-family residential loans. Our management considers the deficiencies of all classified loans in determining the amount of allowance for loan losses required at each reporting date. Our management analyzes the

⁽¹⁾ Non-performing loans consist of non-accruing loans plus accruing loans 90 days or more past due.

probability of the correction of the substandard loans' weaknesses and the extent of any known or inherent losses that we might sustain on them. During the fiscal year 2013, we recorded a provision for loan losses of \$558,000 as compared to \$856,000 recorded for fiscal year 2012. The 2013 provision reflects our estimate to maintain the allowance for loan losses at a level to cover probable losses inherent in the loan portfolio.

The provision for fiscal year 2013 reflects the risks associated with our commercial lending (both real estate secured and non-real estate secured), as well as other risks in our portfolio. As noted previously, total non-performing assets increased by approximately \$635,000 over the prior year; however, our loans 30-89 days overdue decreased \$701,000 as of June 30, 2013 compared to June 30, 2012, all of which were secured by one- to four-family residential properties.

While management believes that it determines the size of the allowance based on the best information available at the time, the allowance will need to be adjusted as circumstances change and assumptions are updated. Future adjustments to the allowance could significantly affect net income.

The following table shows changes in our allowance for loan losses during the periods presented. There were no loan charge-offs during fiscal 2012 or 2011. We had \$16,000, \$13,000 and \$9,000 of loan charge-offs during fiscal 2013, 2010 and 2009, respectively.

⁽¹⁾ None of the listed equity securities has a stated maturity.

Our investment in equity securities consists primarily of FHLB stock, and shares of First National Bankers Bankshares, Inc. ("FNBB"). Management monitors its investment portfolio to determine whether any investment securities which have unrealized losses should be considered other than temporarily impaired.

Mortgage-backed securities represent a participation interest in a pool of one- to four-family or multi-family mortgages. The mortgage originators use intermediaries (generally U.S. Government agencies and government-sponsored enterprises) to pool and repackage the participation interests in the form of securities, with

investors receiving the principal and interest payments on the mortgages. Such U.S. Government agencies and government-sponsored enterprises guarantee the payment of principal and interest to investors.

Mortgage-backed securities are typically issued with stated principal amounts, and the securities are backed by pools of mortgages that have loans with interest rates that are within a range and have varying maturities. The underlying pool of mortgages, *i.e.*, fixed-rate or adjustable-rate, as well as prepayment risk, are passed on to the certificate holder. The life of a mortgage-backed pass-through security approximates the life of the underlying mortgages.

Our mortgage-backed securities consist of Ginnie Mae securities ("GNMA"), Freddie Mac securities ("FHLMC") and Fannie Mae securities ("FNMA"). Ginnie Mae is a government agency within the Department of Housing and Urban Development which is intended to help finance government-assisted housing programs. Ginnie Mae securities are backed by loans insured by the Federal Housing Administration, or guaranteed by the Veterans Administration. The timely payment of principal and interest on Ginnie Mae securities is guaranteed by Ginnie Mae and backed by the full faith and credit of the U.S. Government. Freddie Mac is a private corporation chartered by the U.S. Government. Freddie Mac guarantees the timely payment of interest and the ultimate return of principal on participation certificates. Fannie Mae is a private corporation chartered by the U.S. Congress with a mandate to establish a secondary market for mortgage loans. Fannie Mae guarantees the timely payment of principal and interest on Fannie Mae securities. Freddie Mac and Fannie Mae securities are not backed by the full faith and credit of the U.S. Government. In September 2008, the Federal Housing Finance Agency was appointed as conservator of Fannie Mae and Freddie Mac. The U.S. Department of the Treasury agreed to provide capital as needed to ensure that Fannie Mae and Freddie Mac continue to provide liquidity to the housing and mortgage markets.

Mortgage-backed securities generally yield less than the loans which underlie such securities because of their payment guarantees or credit enhancements which offer nominal credit risk. In addition, mortgage-backed securities are more liquid than individual mortgage loans and may be used to collateralize our borrowings or other obligations.

The following table sets forth the composition of our mortgage-backed securities portfolio at each of the dates indicated. The amounts reflect the fair value of our mortgage-backed securities at June 30, 2013, 2012 and 2011.

Sources of Funds

General. Deposits are our primary source of funds for lending and other investment purposes. In addition to deposits, principal and interest payments on loans and investment securities are a source of funds. Loan repayments are a relatively stable source of funds, while deposit inflows and outflows are significantly influenced by general interest rates and money market conditions. Borrowings may also be used on a short-term basis to compensate for reductions in the availability of funds from other sources and on a longer-term basis for general business purposes.

Deposits. We attract deposits principally from residents of Louisiana and particularly from Caddo and Bossier Parishes. Deposit account terms vary, with the principal differences being the minimum balance required, the time periods the funds must remain on deposit and the interest rate. During the quarter ended March 31, 2012, we began to utilize brokered certificates of deposit as a component of our strategy for lowering the overall cost of funds. The brokered certificates of deposit are callable by Home Federal Bank after twelve months. At June 30, 2013, we had \$12.7 million in brokered certificates of deposit. A significant decrease in money market accounts at June 30, 2013 was attributable to a non-recurring deposit that had a balance of \$31.7 million at June 30, 2012. The deposit was short-term in nature and withdrawn during the quarter ended September 30, 2012.

We establish interest rates paid, maturity terms, service fees and withdrawal penalties on a periodic basis. Management determines the rates and terms based on rates paid by competitors, the need for funds or liquidity, growth goals and federal regulations. We attempt to control the flow of deposits by pricing our accounts to remain generally competitive with other financial institutions in the market area.

The following table shows the distribution of, and certain other information relating to, our deposits by type of deposit, as of the dates indicated.

Borrowings. We may obtain advances from the Federal Home Loan Bank of Dallas upon the security of the common stock we own in that bank and certain of our residential mortgage loans and mortgage-backed and other investment securities, provided certain standards related to creditworthiness have been met. These advances are made pursuant to several credit programs, each of which has its own interest rate and range of maturities. Federal Home Loan Bank advances are generally available to meet seasonal and other withdrawals of deposit accounts and to permit increased lending.

As of June 30, 2013, we were permitted to borrow up to an aggregate total of \$129.6 million from the Federal Home Loan Bank of Dallas. We had \$21.7 million and \$23.5 million of Federal Home Loan Bank advances outstanding at June 30, 2013 and 2012, respectively. Additionally, at June 30, 2013, Home Federal Bank was a party to a Master Purchase Agreement with First National Bankers Bank whereby Home Federal Bank may purchase Federal Funds from First National Bankers Bank in an amount not to exceed \$16.7 million. There were no amounts purchased under this agreement as of June 30, 2013.

The following table shows certain information regarding our borrowings at or for the dates indicated:

	At or For the Year

Subsidiaries

At June 30, 2013, the Company had one subsidiary, Home Federal Bank. The Bank's only subsidiary at such date was Metro Financial Services, Inc., an inactive, wholly-owned subsidiary.

Employees

Home Federal Bank had 47 full-time employees and 7 part-time employees at June 30, 2013. None of these employees are covered by a collective bargaining agreement, and we believe that we enjoy good relations with our personnel.

REGULATION

Set forth below is a brief description of certain laws relating to the regulation of Home Federal Bancorp and Home Federal Bank. This description does not purport to be complete and is qualified in its entirety by reference to applicable laws and regulations.

General

Home Federal Bank, as a federally chartered savings bank, is subject to federal regulation and oversight by the Office of the Comptroller of the Currency extending to all aspects of its operations. Home Federal Bank also is subject to regulation and examination by the Federal Deposit Insurance Corporation, which insures the deposits of Home Federal Bank to the maximum extent permitted by law, and requirements established by the Federal Reserve Board. Federally chartered savings institutions are required to file periodic reports with the Office of the Comptroller of the Currency and are subject to periodic examinations by the Office of the Comptroller of the Currency and the Federal Deposit Insurance Corporation. The investment and lending authority of savings institutions is prescribed by federal laws and regulations, and such institutions are prohibited from engaging in any activities not permitted by such laws and regulations. Such regulation and supervision primarily are intended for the protection of depositors and not for the purpose of protecting shareholders.

Federal law provides the federal banking regulators, including the Office of the Comptroller of the Currency and Federal Deposit Insurance Corporation, with substantial enforcement powers. The Office of the Comptroller of the Currency's enforcement authority over all savings institutions includes, among other things, the ability to assess civil money penalties, to issue cease and desist or removal orders and to initiate injunctive actions. In general, these enforcement actions may be initiated for violations of laws and regulations and unsafe or unsound practices. Other actions or inactions may provide the basis for enforcement action, including misleading or untimely reports filed with the Office of the Comptroller of the Currency. Any change in these laws and regulations, whether by the Federal Deposit Insurance Corporation, Office of the Comptroller of the Currency or Congress, could have a material adverse impact on Home Federal Bancorp and Home Federal Bank and our operations.

Under the Dodd-Frank Wall Street Reform and Consumer Protection Act enacted in 2010, the powers of the Office of Thrift Supervision regarding Home Federal Bank, and Home Federal Bancorp transferred to other federal financial institution regulatory agencies on July 21, 2011. See "— 2010 Regulatory Reform." As of the

transfer date, all of the regulatory functions related to Home Federal Bank that were under the jurisdiction of the Office of Thrift Supervision transferred to the Office of the Comptroller of the Currency. In addition, as of that same date, all of the regulatory functions related to Home Federal Bancorp, as a savings and loan holding company that were under the jurisdiction of the Office of Thrift Supervision, transferred to the Federal Reserve Board.

2010 Regulatory Reform

On July 21, 2010, the President signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act. The financial reform and consumer protection act imposes new restrictions and an expanded framework of regulatory oversight for financial institutions, including depository institutions. In addition, the new law changed the jurisdictions of existing bank regulatory agencies and in particular transferred the regulation of federal savings associations from the Office of Thrift Supervision to the Office of Comptroller of the Currency, effective July 21, 2011. Savings and loan holding companies are now regulated by the Federal Reserve Board. The new law also established an independent federal consumer protection bureau within the Federal Reserve Board. The following discussion summarizes significant aspects of the law that may affect Home Federal Bank and Home Federal Bancorp. Many regulations implementing these changes have not been promulgated, so we cannot determine the full impact on our business and operations at this time.

The following aspects of the financial reform and consumer protection act are related to the operations of Home Federal Bank:

- The Office of Thrift Supervision merged into the Office of the Comptroller of the Currency and the
 authority of the other remaining bank regulatory agencies were restructured. The federal thrift charter
 is preserved under the jurisdiction of the Office of the Comptroller of the Currency.
- A new independent consumer financial protection bureau was established within the Federal Reserve
 Board, empowered to exercise broad regulatory, supervisory and enforcement authority with respect to
 both new and existing consumer financial protection laws. However, smaller financial institutions, like
 Home Federal Bank, are subject to the supervision and enforcement of their primary federal banking
 regulator with respect to the federal consumer financial protection laws.
- Tier 1 capital treatment for "hybrid" capital items like trust preferred securities was eliminated subject to various grandfathering and transition rules.
- The prohibition on payment of interest on demand deposits was repealed, effective July 21, 2011.
- State law is preempted only if it would have a discriminatory effect on a federal savings association or
 is preempted by any other federal law. The Office of the Comptroller of the Currency must make a
 preemption determination on a case-by-case basis with respect to a particular state law or other state
 law with substantively equivalent terms.
- Deposit insurance is permanently increased to \$250,000 and unlimited deposit insurance for noninterest-bearing transaction accounts extended through the end of 2012.
- Deposit insurance assessment base calculation equals the depository institution's total assets minus the sum of its average tangible equity during the assessment period.
- The minimum reserve ratio of the Deposit Insurance Fund increased to 1.35 percent of estimated annual insured deposits or assessment base; however, the Federal Deposit Insurance Corporation is directed to "offset the effect" of the increased reserve ratio for insured depository institutions with total consolidated assets of less than \$10 billion.

The following aspects of the financial reform and consumer protection act are related to the operations of Home Federal Bancorp:

- Authority over savings and loan holding companies transferred to the Federal Reserve Board on July 21, 2011.
- Leverage capital requirements and risk based capital requirements applicable to depository institutions
 and bank holding companies were extended to thrift holding companies. However, the Federal Reserve
 Board has not issued regulations that address the levels of these capital requirements and when they
 will apply to Home Federal Bancorp.
- The Federal Deposit Insurance Act was amended to direct federal regulators to require depository institution holding companies to serve as a source of strength for their depository institution subsidiaries.
- The Securities and Exchange Commission is authorized to adopt rules requiring public companies to
 make their proxy materials available to shareholders for nomination of their own candidates for
 election to the board of directors.
- Public companies are now required to provide their shareholders with a non-binding vote: (i) at least once every three years on the compensation paid to executive officers, and (ii) at least once every six years on whether they should have a "say on pay" vote every one, two or three years.
- A separate, non-binding shareholder vote is now required regarding golden parachutes for named
 executive officers when a shareholder vote takes place on mergers, acquisitions, dispositions or other
 transactions that would trigger the parachute payments.
- Securities exchanges are now required to prohibit brokers from using their own discretion to vote shares not beneficially owned by them for certain "significant" matters, which include votes on the election of directors, executive compensation matters, and any other matter determined to be significant.
- Stock exchanges, which do not include the OTC Bulletin Board, will be prohibited from listing the securities of any issuer that does not have a policy providing for (i) disclosure of its policy on incentive compensation payable on the basis of financial information reportable under the securities laws, and (ii) the recovery from current or former executive officers, following an accounting restatement triggered by material noncompliance with securities law reporting requirements, of any incentive compensation paid erroneously during the three-year period preceding the date on which the restatement was required that exceeds the amount that would have been paid on the basis of the restated financial information.
- Disclosure in annual proxy materials will be required concerning the relationship between the executive compensation paid and the financial performance of the issuer.
- Item 402 of Regulation S-K will be amended to require companies to disclose the ratio of the Chief Executive Officer's annual total compensation to the median annual total compensation of all other employees.
- Smaller reporting companies are exempt from complying with the internal control auditor attestation requirements of Section 404(b) of the Sarbanes-Oxley Act.

Regulation of Home Federal Bancorp

Home Federal Bancorp, a Louisiana corporation, is a registered savings and loan holding company within the meaning of Section 10 of the Home Owners' Loan Act and is subject to examination and supervision by the

Federal Reserve Board as well as certain reporting requirements. In addition, because Home Federal Bank is a subsidiary of a savings and loan holding company, it is subject to certain restrictions in dealing with us and with other persons affiliated with the Bank.

Holding Company Acquisitions. Home Federal Bancorp is a savings and loan holding company under the Home Owners' Loan Act, as amended. Federal law generally prohibits a savings and loan holding company, without prior approval of the Federal Reserve Board, from acquiring the ownership or control of any other savings institution or savings and loan holding company, or all, or substantially all, of the assets or more than 5% of the voting shares of the savings institution or savings and loan holding company. These provisions also prohibit, among other things, any director or officer of a savings and loan holding company, or any individual who owns or controls more than 25% of the voting shares of such holding company, from acquiring control of any savings institution not a subsidiary of such savings and loan holding company, unless the acquisition is approved by the Federal Reserve Board.

The Federal Reserve Board may not approve any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, subject to two exceptions: (1) the approval of interstate supervisory acquisitions by savings and loan holding companies; and (2) the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permit such acquisitions. The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

Holding Company Activities. Home Federal Bancorp operates as a unitary savings and loan holding company and is permitted to engage only in the activities permitted for financial institution holding companies or for multiple savings and loan holding companies. Multiple savings and loan holding companies are permitted to engage in the following activities: (i) activities permitted for a bank holding company under section 4(c) of the Bank Holding Company Act (unless the Federal Reserve Board prohibits or limits such 4(c) activities); (ii) furnishing or performing management services for a subsidiary savings association; (iii) conducting any insurance agency or escrow business; (iv) holding, managing, or liquidating assets owned by or acquired from a subsidiary savings association; (v) holding or managing properties used or occupied by a subsidiary savings association; (vi) acting as trustee under deeds of trust; or (vii) activities authorized by regulation as of March 5, 1987, to be engaged in by multiple savings and loan holding companies. Under the 2010 legislation, savings and loan holding companies became subject to statutory capital requirements. While there are no specific restrictions on the payment of dividends or other capital distributions for savings and loan holding companies, federal regulations do prescribe such restrictions on subsidiary savings institutions, as described below. Home Federal Bank will be required to notify the Federal Reserve Board 30 days before declaring any dividend. In addition, the financial impact of a holding company on its subsidiary institution is a matter that is evaluated by the Federal Reserve Board and the agency has authority to order cessation of activities or divestiture of subsidiaries deemed to pose a threat to the safety and soundness of the institution.

All savings associations subsidiaries of savings and loan holding companies are required to meet a qualified thrift lender, or QTL, test to avoid certain restrictions on their operations. If the subsidiary savings institution fails to meet the QTL, as discussed below, then the savings and loan holding company must register with the Federal Reserve Board as a bank holding company, unless the savings institution requalifies as a QTL within one year thereafter.

Federal Securities Laws. Home Federal Bancorp registered its common stock with the Securities and Exchange Commission under Section 12(b) of the Securities Exchange Act of 1934. Home Federal Bancorp is subject to the proxy and tender offer rules, insider trading reporting requirements and restrictions, and certain other requirements under the Securities Exchange Act of 1934. Pursuant to applicable federal banking regulations and our Plan of Conversion and Reorganization, we have agreed to maintain such registration for a minimum of three years following the conversion and offering.

The Sarbanes-Oxley Act. As a public company, Home Federal Bancorp is subject to the Sarbanes-Oxley Act of 2002 which addresses, among other issues, corporate governance, auditing and accounting, executive compensation, and enhanced and timely disclosure of corporate information. As directed by the Sarbanes-Oxley Act, our principal executive officer and principal financial officer are required to certify that our quarterly and annual

reports do not contain any untrue statement of a material fact. The rules adopted by the Securities and Exchange Commission under the Sarbanes-Oxley Act have several requirements, including having these officers certify that: they are responsible for establishing, maintaining and regularly evaluating the effectiveness of our internal control over financial reporting; they have made certain disclosures to our auditors and the audit committee of the Board of Directors about our internal control over financial reporting; and they have included information in our quarterly and annual reports about their evaluation and whether there have been changes in our internal control over financial reporting or in other factors that could materially affect internal control over financial reporting.

Regulation of Home Federal Bank

General. Home Federal Bank is subject to the regulation of the Office of the Comptroller of the Currency, as its primary federal regulator and the Federal Deposit Insurance Corporation, as the insurer of its deposit accounts, and, to a limited extent, the Federal Reserve Board.

Insurance of Accounts. The deposits of Home Federal Bank are insured to the maximum extent permitted by the Deposit Insurance Fund and are backed by the full faith and credit of the U.S. Government. As insurer, the Federal Deposit Insurance Corporation is authorized to conduct examinations of, and to require reporting by, insured institutions. It also may prohibit any insured institution from engaging in any activity determined by regulation or order to pose a serious threat to the Federal Deposit Insurance Corporation. The Federal Deposit Insurance Corporation also has the authority to initiate enforcement actions against savings institutions, after giving the Office of the Comptroller of the Currency an opportunity to take such action.

The 2010 financial institution reform legislation permanently increased deposit insurance on most accounts to \$250,000. In addition, pursuant to Section 13(c)(4)(G) of the Federal Deposit Insurance Act, the Federal Deposit Insurance Corporation implemented two temporary programs to provide deposit insurance for the full amount of most noninterest bearing transaction deposit accounts and to guarantee certain unsecured debt of financial institutions and their holding companies. Under the unsecured debt program, the Federal Deposit Insurance Corporation's guarantee expired on the earlier of the maturity date of the debt or December 31, 2012. The unlimited deposit insurance for non-interest-bearing transaction accounts was extended by the 2010 legislation through the end of 2012 for all insured institutions without a separate insurance assessment (but the cost of the additional insurance coverage was considered under the risk-based assessment system). Home Federal Bank participated in the temporary liquidity guarantee program.

The Federal Deposit Insurance Corporation's risk-based premium system provides for quarterly assessments. Each insured institution is placed in one of four risk categories depending on supervisory and capital considerations. Within its risk category, an institution is assigned to an initial base assessment rate which is then adjusted to determine its final assessment rate based on its brokered deposits, secured liabilities and unsecured debt. The Federal Deposit Insurance Corporation recently amended its deposit insurance regulations (1) to change the assessment base for insurance from domestic deposits to average assets minus average tangible equity and (2) to lower overall assessment rates. The revised assessments rates are between 2.5 to 9 basis points for banks in the lowest risk category and between 30 to 45 basis points for banks in the highest risk category. The amendments became effective for the quarter beginning April 1, 2011 with the new assessment methodology being reflected in the premium invoices due September 30, 2011.

In 2009, the Federal Deposit Insurance Corporation required insured deposit institutions on December 30, 2009 to prepay 13 quarters of estimated insurance assessments. Our prepayment totaled \$326,000. Unlike a special assessment, this prepayment did not immediately affect bank earnings. Banks booked the prepaid assessment as a non-earning asset and recorded the actual risk-based premium payments at the end of each quarter. In addition, all institutions with deposits insured by the Federal Deposit Insurance Corporation are required to pay assessments to fund interest payments on bonds issued by the Financing Corporation, a mixed-ownership government corporation established to recapitalize the predecessor to the Deposit Insurance Fund. These assessments will continue until the Financing Corporation bonds mature in 2019.

The Federal Deposit Insurance Corporation may terminate the deposit insurance of any insured depository institution, including Home Federal Bank, if it determines after a hearing that the institution has engaged or is engaging in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations, or has violated

any applicable law, regulation, order or any condition imposed by an agreement with the Federal Deposit Insurance Corporation. It also may suspend deposit insurance temporarily during the hearing process for the permanent termination of insurance, if the institution has no tangible capital. If insurance of accounts is terminated, the accounts at the institution at the time of the termination, less subsequent withdrawals, shall continue to be insured for a period of six months to two years, as determined by the Federal Deposit Insurance Corporation. Management is aware of no existing circumstances which would result in termination of Home Federal Bank's deposit insurance.

Regulatory Capital Requirements. Federally insured savings institutions are required to maintain minimum levels of regulatory capital. Current Office of the Comptroller of the Currency capital standards require savings institutions to satisfy a tangible capital requirement, a leverage capital requirement and a risk-based capital requirement. The tangible capital must equal at least 1.5% of adjusted total assets. Leverage capital, also known as "core" capital, must equal at least 3.0% of adjusted total assets for the most highly rated savings associations. An additional cushion of at least 100 basis points is required for all other savings associations, which effectively increases their minimum Tier 1 leverage ratio to 4.0% or more. Under the Office of the Comptroller of the Currency's regulation, the most highly-rated banks are those that the Office of the Comptroller of the Currency determines are strong associations that are not anticipating or experiencing significant growth and have well-diversified risk, including no undue interest rate risk exposure, excellent asset quality, high liquidity and good earnings. Under the risk-based capital requested, "total" capital (a combination of core and "supplementary" capital) must equal at least 8.0% of "risk-weighted" assets. The Office of the Comptroller of the Currency also is authorized to impose capital requirements in excess of these standards on individual institutions on a case-by-case basis.

Core capital generally consists of common stockholders' equity (including retained earnings). Tangible capital generally equals core capital minus intangible assets, with only a limited exception for purchased mortgage servicing rights. Home Federal Bank had no intangible assets at June 30, 2013. Both core and tangible capital are further reduced by an amount equal to a savings institution's debt and equity investments in subsidiaries engaged in activities not permissible to national banks (other than subsidiaries engaged in activities undertaken as agent for customers or in mortgage banking activities and subsidiary depository institutions or their holding companies). These adjustments do not affect Home Federal Bank's regulatory capital.

In determining compliance with the risk-based capital requirement, a savings institution is allowed to include both core capital and supplementary capital in its total capital, provided that the amount of supplementary capital included does not exceed the savings institution's core capital. Supplementary capital generally consists of general allowances for loan losses up to a maximum of 1.25% of risk-weighted assets, together with certain other items. In determining the required amount of risk-based capital, total assets, including certain off-balance sheet items, are multiplied by a risk weight based on the risks inherent in the type of assets. The risk weights range from 0% for cash and securities issued by the U.S. Government or unconditionally backed by the full faith and credit of the U.S. Government to 100% for loans (other than qualifying residential loans weighted at 80%) and repossessed assets.

Savings institutions must value securities available for sale at amortized cost for regulatory capital purposes. This means that in computing regulatory capital, savings institutions should add back any unrealized losses and deduct any unrealized gains, net of income taxes, on debt securities reported as a separate component of capital, as defined by generally accepted accounting principles.

At June 30, 2013, Home Federal Bank exceeded all of its regulatory capital requirements, with tangible, core and risk-based capital ratios of 15.16%, 15.16% and 25.48%, respectively.

Any savings institution that fails any of the capital requirements is subject to possible enforcement actions by the Office of the Comptroller of the Currency or the Federal Deposit Insurance Corporation. Such actions could include a capital directive, a cease and desist order, civil money penalties, the establishment of restrictions on the institution's operations, termination of federal deposit insurance and the appointment of a conservator or receiver. The Office of the Comptroller of the Currency's capital regulation provides that such actions, through enforcement proceedings or otherwise, could require one or more of a variety of corrective actions.

Prompt Corrective Action. The following table shows the amount of capital associated with the different capital categories set forth in the prompt corrective action regulations.

Capital Category	Total Risk-Based	Tier 1 Risk-Based	Tier 1 Leverage
	Capital	Capital	Capital
Well capitalized	10% or more	6% or more	5% or more
	8% or more	4% or more	4% or more
	Less than 8%	Less than 4%	Less than 4%
	Less than 6%	Less than 3%	Less than 3%

In addition, an institution is "critically undercapitalized" if it has a ratio of tangible equity to total assets that is equal to or less than 2.0%. Under specified circumstances, a federal banking agency may reclassify a well-capitalized institution as adequately capitalized and may require an adequately capitalized institution or an undercapitalized institution to comply with supervisory actions as if it were in the next lower category (except that the Federal Deposit Insurance Corporation may not reclassify a significantly undercapitalized institution as critically undercapitalized).

An institution generally must file a written capital restoration plan which meets specified requirements within 45 days of the date that the institution receives notice or is deemed to have notice that it is undercapitalized, significantly undercapitalized or critically undercapitalized. A federal banking agency must provide the institution with written notice of approval or disapproval within 60 days after receiving a capital restoration plan, subject to extensions by the agency. An institution which is required to submit a capital restoration plan must concurrently submit a performance guaranty by each company that controls the institution. In addition, undercapitalized institutions are subject to various regulatory restrictions, and the appropriate federal banking agency also may take any number of discretionary supervisory actions.

At June 30, 2013, Home Federal Bank was deemed a well-capitalized institution for purposes of the prompt corrective action regulations and as such is not subject to the above mentioned restrictions.

Recent Regulatory Capital Rules. In July 2013, the federal banking regulators issued final rules that significantly increase regulatory capital requirements. The final rules include transition periods for compliance. Community banking organizations like the Company must begin complying with the rules on January 1, 2015. Among other things, the new rules introduce a new minimum common equity tier 1 capital ratio of 4.5% of risk-weighted assets and increase the minimum tier 1 capital ratio from 4.0% to 6.0% of risk-weighted assets. There is also a new "capital conservation buffer" that requires an institution to hold additional common equity tier 1 capital to risk-based assets of more than 2.5% in order to avoid restriction on dividends and executive compensation. The new rules also impose stricter capital deduction requirements, revise certain of the current risk-weighting categories and impose capital requirements on savings and loan holding companies regardless of asset size.

Capital Distributions. Office of the Comptroller of the Currency regulations govern capital distributions by savings institutions, which include cash dividends, stock repurchases and other transactions charged to the capital account of a savings institution to make capital distributions. A savings institution must file an application for Office of the Comptroller of the Currency approval of the capital distribution if either (1) the total capital distributions for the applicable calendar year exceed the sum of the institution's net income for that year to date plus the institution's retained net income for the preceding two years, (2) the institution would not be at least adequately capitalized following the distribution, (3) the distribution would violate any applicable statute, regulation, agreement or Office of the Comptroller of the Currency-imposed condition, or (4) the institution is not eligible for expedited treatment of its filings. If an application is not required to be filed, savings institutions must still file a notice with the Office of the Comptroller of the Currency at least 30 days before the board of directors declares a dividend or approves a capital distribution if either (1) the institution would not be well-capitalized following the distribution; (2) the proposed distribution would reduce the amount or retire any part of our common or preferred stock or retire any part of a debt instrument included in our regulatory capital, or (3) the savings institution is a subsidiary of a savings and loan holding company and the proposed capital distribution is not a cash dividend. If a savings institution, such as Home Federal Bank, that is the subsidiary of a savings and loan holding company, has filed a notice with the Federal Reserve Board for a cash dividend and is not required to file an application or notice with the Office of the Comptroller of the Currency for any of the reasons described above, then the savings institution is only required to

provide an informational copy to the Office of the Comptroller of the notice filed with the Federal Reserve Board, at the same time that it is filed with the Federal Reserve Board.

An institution that either before or after a proposed capital distribution fails to meet its then applicable minimum capital requirement or that has been notified that it needs more than normal supervision may not make any capital distributions without the prior written approval of the Office of the Comptroller of the Currency. In addition, the Office of the Comptroller of the Currency may prohibit a proposed capital distribution, which would otherwise be permitted by Office of the Comptroller of the Currency regulations, if the Office of the Comptroller of the Currency determines that such distribution would constitute an unsafe or unsound practice.

Under federal rules, an insured depository institution may not pay any dividend if payment would cause it to become undercapitalized or if it is already undercapitalized. In addition, federal regulators have the authority to restrict or prohibit the payment of dividends for safety and soundness reasons. The FDIC also prohibits an insured depository institution from paying dividends on its capital stock or interest on its capital notes or debentures (if such interest is required to be paid only out of net profits) or distributing any of its capital assets while it remains in default in the payment of any assessment due the FDIC. Home Federal Bank is currently not in default in any assessment payment to the FDIC.

Qualified Thrift Lender Test. All savings institution subsidiaries of savings and loan holding companies are required to meet a qualified thrift lender, or QTL, test to avoid certain restrictions on their operations. A savings institution can comply with the QTL test by either qualifying as a domestic building and loan association as defined in the Internal Revenue Code or meeting the Office of the Comptroller of the Currency QTL test. Currently, the Office of the Comptroller of the Currency QTL test requires that 65% of an institution's "portfolio assets" (as defined) consist of certain housing and consumer-related assets on a monthly average basis in nine out of every 12 months. To be a qualified thrift lender under the IRS test, the savings institution must meet a "business operations test" and a "60 percent assets test," each defined in the Internal Revenue Code.

If a savings association fails to remain a QTL, it is immediately prohibited from the following:

- Making any new investments or engaging in any new activity not allowed for both a national bank and a savings association;
- Establishing any new branch office unless allowable for a national bank; and
- Paying dividends unless allowable for a national bank and necessary to meet the obligations of its holding company.

Any company that controls a savings institution that is not a qualified thrift lender must register as a bank holding company within one year of the savings institution's failure to meet the QTL test. Three years from the date a savings association should have become or ceases to be a QTL, the institution must dispose of any investment or not engage in any activity unless the investment or activity is allowed for both a national bank and a savings association. Under the Dodd-Frank Wall Street Reform and Consumer Protection Act, a savings institution not in compliance with the QTL test is also prohibited from paying dividends and is subject to an enforcement action for violation of the Home Owners' Loan Act, as amended.

At June 30, 2013, Home Federal Bank believes that it meets the requirements of the QTL test.

Community Reinvestment Act. All federal savings associations have a responsibility under the Community Reinvestment Act and related regulations to help meet the credit needs of their communities, including low- and moderate-income neighborhoods. An institution's failure to comply with the provisions of the Community Reinvestment Act could result in restrictions on its activities. Home Federal Bank received a "satisfactory" Community Reinvestment Act rating in its most recently completed examination.

Limitations on Transactions with Affiliates. Transactions between a savings association and any affiliate are governed by Sections 23A and 23B of the Federal Reserve Act as made applicable to savings associations by Section 11 of the Home Owners' Loan Act. An affiliate of a savings association is any company or entity which

company context, the holding company of a savings association (such as Home Federal Bancorp) and any companies which are controlled by such holding company are affiliates of the savings association. Generally, Section 23A limits the extent to which the savings association or its subsidiaries may engage in "covered transactions" with any one affiliate to an amount equal to 10% of such association's capital stock and surplus, and contains an aggregate limit on all such transactions with all affiliates to an amount equal to 20% of such capital stock and surplus. Section 23B applies to "covered transactions" as well as certain other transactions and requires that all transactions be on terms substantially the same, or at least as favorable, to the savings association as those provided to a non-affiliate. The term "covered transaction" includes the making of loans to, purchase of assets from and issuance of a guarantee to an affiliate and similar transactions. Section 23B transactions also include the provision of services and the sale of assets by a savings association to an affiliate. In addition to the restrictions imposed by Sections 23A and 23B, a savings association is prohibited from (i) making a loan or other extension of credit to an affiliate, except for any affiliate which engages only in certain activities which are permissible for bank holding companies, or (ii) purchasing or investing in any stocks, bonds, debentures, notes or similar obligations of any affiliate, except for affiliates which are subsidiaries of the savings association.

In addition, Sections 22(g) and (h) of the Federal Reserve Act as made applicable to savings associations by Section 11 of the Home Owners' Loan Act place restrictions on loans to executive officers, directors and principal shareholders of the savings association and its affiliates. Under Section 22(h), loans to a director, an executive officer and to a greater than 10% shareholder of a savings association, and certain affiliated interests of either, may not exceed, together with all other outstanding loans to such person and affiliated interests, the savings association's loans to one borrower limit (generally equal to 15% of the association's unimpaired capital and surplus). Section 22(h) also requires that loans to directors, executive officers and principal shareholders be made on terms substantially the same as offered in comparable transactions to other persons unless the loans are made pursuant to a benefit or compensation program that (i) is widely available to employees of the association and (ii) does not give preference to any director, executive officer or principal shareholder, or certain affiliated interests of either, over other employees of the savings association. Section 22(h) also requires prior board approval for certain loans. In addition, the aggregate amount of extensions of credit by a savings association to all insiders cannot exceed the association's unimpaired capital and surplus. Furthermore, Section 22(g) places additional restrictions on loans to executive officers. Home Federal Bank currently is subject to Section 22(g) and (h) of the Federal Reserve Act and at June 30, 2013, was in compliance with the above restrictions.

Incentive Compensation. Guidelines adopted by the federal banking agencies pursuant to the FDIA prohibit excessive compensation as an unsafe and unsound practice and describe compensation as excessive when the amounts paid are unreasonable or disproportionate to the services performed by an executive officer, employee, director or principal stockholder.

In January 2010, the FDIC announced that it would seek public comment on whether banks with compensation plans that encourage risky behavior should be charged higher deposit assessment rates than such banks would otherwise be charged. The comment period ended in February 2010. As of June 30, 2013, a final rule has not been adopted.

In June 2010, the Federal Reserve issued comprehensive guidance on incentive compensation policies (the "Incentive Compensation Guidance") intended to ensure that the incentive compensation policies of banking organizations do not undermine the safety and soundness of such organizations by encouraging excessive risk-taking. The Incentive Compensation Guidance, which covers all employees that have the ability to materially affect the risk profile of an organization, either individually or as part of a group, is based upon the key principles that a banking organization's incentive compensation arrangements should (i) provide incentives that do not encourage risk-taking beyond the organization's ability to effectively identify and manage risks, (ii) be compatible with effective internal controls and risk management, and (iii) be supported by strong corporate governance, including active and effective oversight by the organization's board of directors. Any deficiencies in compensation practices that are identified may be incorporated into the organization's supervisory ratings, which can affect its ability to make acquisitions or perform other actions. The Incentive Compensation Guidance provides that enforcement actions may be taken against a banking organization if its incentive compensation arrangements or related risk-management control or governance processes pose a risk to the organization's safety and soundness and the organization is not taking prompt and effective measures to correct the deficiencies.

In April 2011, the federal banking agencies and the Securities and Exchange Commission jointly published proposed rulemaking designed to implement provisions of the Dodd-Frank Act prohibiting incentive compensation arrangements that would encourage inappropriate risk taking. Those proposed regulations apply only to a financial institution or its holding company with \$1 billion or more of assets.

The scope and content of the U.S. banking regulators' policies on incentive compensation are continuing to develop. It cannot be determined at this time whether a final rule will be adopted and whether compliance with such a final rule will adversely affect the ability of Home Federal Bancorp and Home Federal Bank to hire, retain and motivate their key employees.

Regulation of Residential Mortgage Loan Originators. On July 28, 2010, the Federal bank regulatory authorities adopted a final rule on the Secure and Fair Enforcement for Mortgage Licensing Act of 2008 ("S.A.F.E. Act"). Under the S.A.F.E. Act, residential mortgage loan originators employed by financial institutions, such as Home Federal Bank, must register with the Nationwide Mortgage Licensing System and Registry, obtain a unique identifier from the registry, and maintain their registration. Any residential mortgage loan originator who fails to satisfy these requirements will not be permitted to originate residential mortgage loans.

Anti-Money Laundering. All financial institutions, including savings associations, are subject to federal laws that are designed to prevent the use of the U.S. financial system to fund terrorist activities. Financial institutions operating in the United States must develop anti-money laundering compliance programs, due diligence policies and controls to ensure the detection and reporting of money laundering. Such compliance programs are intended to supplement compliance requirements, also applicable to financial institutions, under the Bank Secrecy Act and the Office of Foreign Assets Control Regulations. Home Federal Bank has established policies and procedures to ensure compliance with these provisions.

Federal Home Loan Bank System. Home Federal Bank is a member of the Federal Home Loan Bank of Dallas, which is one of 12 regional Federal Home Loan Banks that administers a home financing credit function primarily for its members. Each Federal Home Loan Bank serves as a reserve or central bank for its members within its assigned region. The Federal Home Loan Bank of Dallas is funded primarily from proceeds derived from the sale of consolidated obligations of the Federal Home Loan Bank System. It makes loans to members (i.e., advances) in accordance with policies and procedures established by the board of directors of the Federal Home Loan Bank. At June 30, 2013, Home Federal Bank had \$21.7 million of Federal Home Loan Bank advances and \$107.9 million available on its credit line with the Federal Home Loan Bank.

As a member, Home Federal Bank is required to purchase and maintain stock in the Federal Home Loan Bank of Dallas in an amount equal to 0.06% of its total assets. At June 30, 2013, Home Federal Bank had \$1.2 million in Federal Home Loan Bank stock, which was in compliance with the applicable requirement.

The Federal Home Loan Banks are required to provide funds for the resolution of troubled savings institutions and to contribute to affordable housing programs through direct loans or interest subsidies on advances targeted for community investment and low- and moderate-income housing projects. These contributions have adversely affected the level of Federal Home Loan Bank dividends paid in the past and could do so in the future. These contributions also could have an adverse effect on the value of Federal Home Loan Bank stock in the future.

Federal Reserve System. The Federal Reserve Board requires all depository institutions to maintain reserves against their transaction accounts (primarily NOW and Super NOW checking accounts) and non-personal time deposits. The required reserves must be maintained in the form of vault cash or an account at a Federal Reserve Bank. At June 30, 2013, Home Federal Bank had met its reserve requirement.

TAXATION

Federal Taxation

General. Home Federal Bancorp and Home Federal Bank are subject to federal income taxation in the same general manner as other corporations with some exceptions listed below. The following discussion of federal

and state income taxation is only intended to summarize certain pertinent income tax matters and is not a comprehensive description of the applicable tax rules. Home Federal Bank's tax returns have not been audited during the past five years.

Method of Accounting. For federal income tax purposes, Home Federal Bank reports income and expenses on the accrual method of accounting and used a June 30 tax year in 2012 for filing its federal income tax return.

Bad Debt Reserves. The Small Business Job Protection Act of 1996 eliminated the use of the reserve method of accounting for bad debt reserves by savings associations, effective for taxable years beginning after 1995. Prior to that time, Home Federal Bank was permitted to establish a reserve for bad debts and to make additions to the reserve. These additions could, within specified formula limits, be deducted in arriving at taxable income. As a result of the Small Business Job Protection Act of 1996, savings associations must use the experience method in computing their bad debt deduction beginning with their 1996 federal tax return. In addition, federal legislation required the recapture over a six year period of the excess of tax bad debt reserves at December 31, 1995 over those established as of December 31, 1987.

Taxable Distributions and Recapture. Prior to the Small Business Job Protection Act of 1996, bad debt reserves created prior to January 1, 1988 were subject to recapture into taxable income if Home Federal Bank failed to meet certain thrift asset and definitional tests. New federal legislation eliminated these savings association related recapture rules. However, under current law, pre-1988 reserves remain subject to recapture should Home Federal Bank make certain non-dividend distributions or cease to maintain a bank charter.

At June 30, 2013, the total federal pre-1988 reserve was approximately \$3.3 million. The reserve reflects the cumulative effects of federal tax deductions by Home Federal Bank for which no federal income tax provisions have been made.

Alternative Minimum Tax. The Internal Revenue Code imposes an alternative minimum tax at a rate of 20% on a base of regular taxable income plus certain tax preferences. The alternative minimum tax is payable to the extent such alternative minimum tax income is in excess of the regular income tax. Net operating losses, of which Home Federal Bank has none, can offset no more than 90% of alternative minimum taxable income. Certain payments of alternative minimum tax may be used as credits against regular tax liabilities in future years. Home Federal Bank has not been subject to the alternative minimum tax or any such amounts available as credits for carryover.

Corporate Dividends-Received Deduction. Home Federal Bancorp may exclude from its income 100% of dividends received from Home Federal Bank as a member of the same affiliated group of corporations. The corporate dividends received deduction is 80% in the case of dividends received from corporations which a corporate recipient owns less than 80%, but at least 20% of the distribution corporation. Corporations which own less than 20% of the stock of a corporation distributing a dividend may deduct only 70% of dividends received.

State and Local Taxation

Home Federal Bancorp is subject to the Louisiana Corporation Income Tax based on our Louisiana taxable income. The Corporation Income Tax applies at graduated rates from 4% upon the first \$25,000 of Louisiana taxable income to 8% on all Louisiana taxable income in excess of \$200,000. For these purposes, "Louisiana taxable income" means net income which is earned by us within or derived from sources within the State of Louisiana, after adjustments permitted under Louisiana law, including a federal income tax deduction. In addition, Home Federal Bank is subject to the Louisiana Shares Tax which is imposed on the assessed value of a company's stock. The formula for deriving the assessed value is to calculate 15% of the sum of:

- (a) 20% of our capitalized earnings, plus
- (b) 80% of our taxable stockholders' equity, minus
- (c) 50% of our real and personal property assessment.

Various items may also be subtracted in calculating a company's capitalized earnings.

Item 1A. Risk Factors

Not applicable.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

We currently conduct business from our main office, two additional full-service banking offices and one agency office located in Shreveport, Louisiana and one full-service banking office located in Bossier City, Louisiana. The following table sets forth certain information relating to Home Federal Bank's offices, a parcel of land for a future branch office and two properties acquired for agency and administrative offices.

Description/Address	Leased/Owned	Net Book Value of Property			Amount of Deposits	
•	(In thousands)					
Building/ATM						
624 Market Street, Shreveport, LA	Owned	\$	1,060	\$	75,501

⁽¹⁾ The building is owned but the land is subject to an operating lease which was renewed on November 30, 2008 for a five-year period.

Item 3. Legal Proceedings

Home Federal Bancorp and Home Federal Bank are not involved in any pending legal proceedings other than nonmaterial legal proceedings occurring in the ordinary course of business.

Item 4. Mine Safety Disclosures

Not applicable.

⁽²⁾ The building is in the process of renovation to serve as the future location of the agency office.

⁽³⁾ The building is in the process of renovation to serve as a future administrative office.

PART II

<u>Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities</u>

(a) Home Federal Bancorp's common stock is traded on the Nasdaq Capital Market under the symbol "HFBL."

Presented below is the high and low sales price information for Home Federal Bancorp's common stock and cash dividends declared for the periods indicated.

	Stock Pric	e per Share	Cash Dividends
Quarter Ended	High Lo		per Share
Fiscal 2013:			
June 30, 2013	\$18.38	\$17.00	\$0.06
March 31, 2013	18.37	17.40	0.06
December 31, 2012	17.85	17.05	0.06
September 30, 2012	17.89	14.95	0.06
Fiscal 2012:			
June 30, 2012	\$15.16	\$14.13	\$0.06
March 31, 2012	15.00	13.76	0.06
December 31, 2011	17.12	12.85	0.06
September 30, 2011	13.99	13.00	0.06

At September 23, 2013, Home Federal Bancorp had 220 shareholders of record.

The information for all equity based and individual compensation arrangements is incorporated by reference from Item 11 hereof.

- (b) Not applicable.
- (c) Purchases of Equity Securities.

The Company's repurchases of its common stock made during the quarter ended June 30, 2013 are set forth in the table below:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicity Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs (a)(b)
April 1, 2013 – April 30, 2013	10,000	\$17.75	10,000	124,345
May 1, 2013 – May 31, 2013			, <u></u>	124,345
June 1, 2013 – June 30, 2013	738	17.75	<u>738</u>	<u>123,607</u>
Total	10,738	\$ <u>17.75</u>	10,738	<u>123,607</u>

Notes to this table:

⁽a) On September 12, 2012, the Company announced by press release a repurchase program to repurchase up to 275,000 shares, or approximately 10.0% of the Company's outstanding shares of common stock. The repurchase program does not have an expiration date.

⁽b) On January 24, 2013, the Company announced by press release a repurchase program to repurchase up to 120,000 shares, or approximately 5.0% of the Company's outstanding shares of common stock. The repurchase program does not have an expiration date.

Item 6. Selected Financial Data

Set forth below is selected consolidated financial and other data of Home Federal Bancorp. The information at or for the years ended June 30, 2013 and 2012 is derived in part from the audited financial statements that appear in this Form 10-K. The information at or for the years ended June 30, 2011, 2010 and 2009, is also derived from audited financial statements that do not appear in this Form 10-K.

- * Not meaningful.
- (1) Includes merger and stock issuance related expense of \$133,000 for the year ended June 30, 2009.
- (2) With the exception of end of period ratios, all ratios are based on average monthly balances during the indicated periods.
- Average interest rate spread represents the difference between the average yield on interest-earning assets and the average rate paid on interest-bearing liabilities, and net interest margin represents net interest income as a percentage of average interest-earning assets.
- (4) The efficiency ratio represents the ratio of non-interest expense divided by the sum of net interest income and non-interest income.
- (5) Asset quality ratios and capital ratios are end of period ratios, except for net charge-offs to average loans receivable.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

Our profitability depends primarily on our net interest income, which is the difference between interest and dividend income on interest-earning assets, principally loans, investment securities and interest-earning deposits in other institutions, and interest expense on interest-bearing deposits and borrowings from the Federal Home Loan Bank of Dallas. Net interest income is dependent upon the level of interest rates and the extent to which such rates are changing. Our profitability also depends, to a lesser extent, on non-interest income, provision for loan losses, non-interest expenses and federal income taxes. Home Federal Bancorp, Inc. of Louisiana had net income of \$3.1 million in fiscal 2013 compared to net income of \$2.8 million in fiscal 2012.

Historically, our business consisted primarily of originating single-family real estate loans secured by property in our market area. Typically, single-family loans involve a lower degree of risk and carry a lower yield than commercial real estate, construction, commercial business and consumer loans. During fiscal 2009, we hired three commercial loan officers and began to offer commercial real estate loans, commercial business loans and real estate secured lines of credit which typically have higher rates and shorter terms than single-family loans. Although our loans continue to be primarily funded by certificates of deposit, which typically have a higher interest rate than passbook accounts, it is now our policy to require commercial customers to have a deposit relationship with us, which has increased our balance of NOW accounts in recent periods. The combination of these factors has resulted in higher interest rate spreads in fiscal 2013. Due to the continued low interest rate environment, we have sold a substantial amount of our fixed rate single-family residential loan originations in recent periods. We have also sold investment securities available-for-sale to realize gains in the portfolio. Because of a decrease in our cost of funds and the volume increase of interest earning assets, our net interest margin increased from 4.00% to 4.06% during

fiscal 2013 compared to 2012 and our net interest income increased to \$10.6 million for fiscal 2013 as compared to \$9.7 million for fiscal 2012. We expect to continue to emphasize consumer and commercial lending in the future in order to improve the yield on our portfolio. In July, 2009, we began offering security brokerage and advisory services at our agency office through Tipton Wealth Management in our effort to transition to a full service community bank.

Home Federal Bancorp's operations and profitability are subject to changes in interest rates, applicable statutes and regulations and general economic conditions, as well as other factors beyond our control.

Business Strategy

Our business strategy is focused on operating a growing and profitable community-oriented financial institution. Our current business strategy includes:

- Continuing to Grow and Diversify Our Loan Portfolio. We intend to grow and continue to diversify of loan portfolio by, among other things, emphasizing the origination of commercial real estate and business loans. At June 30, 2013, our commercial real estate loans amounted to \$51.2 million, or 24.5% of the total loan portfolio. Our construction loans at June 30, 2013 amounted to \$16.9 million or 8.1% of the total loan portfolio and commercial business loans amounted to \$16.8 million or 8.0% of the total loan portfolio. Commercial real estate, commercial business, construction and development and consumer loans all typically have higher yields and are more interest sensitive than long-term single-family residential mortgage loans. We plan to continue to grow and diversify our loan portfolio, and we intend to continue to grow our holdings of commercial real estate and business loans.
- Diversify Our Products and Services. We intend to continue to emphasize our commercial business
 products to provide a full-service banking relationship to our commercial customers. We have
 introduced mobile and Internet banking and remote deposit capture, to better serve our commercial
 clients. Additionally, we have developed new deposit products focused on expanding our deposit base
 to new types of customers.
- Managing Our Expenses. We have incurred significant additional expenses related to personnel and infrastructure in recent periods as we implemented our business strategy. Our total non-interest expense increased \$513,000, or 6.3%, in fiscal 2013 compared to 2012. Our efficiency ratio for 2013 was 62.0% compared to 62.9% for fiscal 2012.
- Enhancing Core Earnings. We expect to continue to emphasize commercial real estate and business loans which generally bear interest rates higher than residential real estate loans and sell a substantial part of our fixed rate residential mortgage loan originations. The average interest rate spread for the year ended June 30, 2013 was 3.80% as compared to 3.62% for the year ended June 30, 2012.
- Expanding Our Franchise in our Market Area and Contiguous Communities. We intend to pursue opportunities to expand our market area by opening additional *de novo* banking offices and possibly, through acquisitions of other financial institutions and banking related businesses (although we have no current plans, understandings or agreements with respect to any specific acquisitions). We expect to focus on contiguous areas to our current locations in Caddo and Bossier Parishes.
- Maintain Our Asset Quality. At June 30, 2013, our non-performing assets totaled \$649,000, or 0.23% of total assets. We had no real estate owned and one troubled debt restructuring at June 30, 2013. We intend to continue to stress maintaining high asset quality even as we continue to grow our institution and diversity our loan portfolio.
- Cross-Selling Products and Services and Emphasizing Local Decision Making. We have promoted cross-selling products and services in our branch offices and emphasized our local decision making and streamlined loan approval process.

Critical Accounting Policies

In reviewing and understanding financial information for Home Federal Bancorp, you are encouraged to read and understand the significant accounting policies used in preparing our consolidated financial statements. These policies are described in Note 1 of the notes to our consolidated financial statements included in Item 8 of this document. Our accounting and financial reporting policies conform to accounting principles generally accepted in the United States of America and to general practices within the banking industry. Accordingly, the consolidated financial statements require certain estimates, judgments, and assumptions, which are believed to be reasonable, based upon the information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the periods presented. The following accounting policies comprise those that management believes are the most critical to aid in fully understanding and evaluating our reported financial results. These policies require numerous estimates or economic assumptions that may prove inaccurate or may be subject to variations which may significantly affect our reported results and financial condition for the period or in future periods.

Allowance for Loan Losses. We have identified the evaluation of the allowance for loan losses as a critical accounting policy where amounts are sensitive to material variation. The allowance for loan losses represents management's estimate for probable losses that are inherent in our loan portfolio but which have not yet been realized as of the date of our consolidated balance sheet. It is established through a provision for loan losses charged to earnings. Loans are charged against the allowance for loan losses when management believes that the collectability of the principal is unlikely. Subsequent recoveries are added to the allowance. The allowance is an amount that management believes will cover known and inherent losses in the loan portfolio, based on evaluations of the collectability of loans. The evaluations take into consideration such factors as changes in the types and amount of loans in the loan portfolio, historical loss experience, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, estimated losses relating to specifically identified loans, and current economic conditions. This evaluation is inherently subjective as it requires material estimates including, among others, exposure at default, the amount and timing of expected future cash flows on impacted loans, value of collateral, estimated losses on our commercial and residential loan portfolios and general amounts for historical loss experience. All of these estimates may be susceptible to significant changes as more information becomes available.

While management uses the best information available to make loan loss allowance evaluations, adjustments to the allowance may be necessary based on changes in economic and other conditions or changes in accounting guidance. Historically, our estimates of the allowance for loan loss have not required significant adjustments from management's initial estimates. In addition, the Office of the Comptroller of the Currency as an integral part of their examination processes, periodically reviews our allowance for loan losses. The Office of the Comptroller of the Currency may require the recognition of adjustments to the allowance for loan losses based on their judgment of information available to them at the time of their examinations. To the extent that actual outcomes differ from management's estimates, additional provisions to the allowance for loan losses may be required that would adversely impact earnings in future periods.

Income Taxes. Deferred income tax assets and liabilities are determined using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the temporary differences between the book and tax bases of the various assets and liabilities and gives current recognition to changes in tax rates and laws. Realizing our deferred tax assets principally depends upon our achieving projected future taxable income. We may change our judgments regarding future profitability due to future market conditions and other factors. We may adjust our deferred tax asset balances if our judgments change.

Changes in Financial Condition

Home Federal Bancorp's total assets decreased \$19.0 million, or 6.4%, to \$277.2 million at June 30, 2013 compared to \$296.2 million at June 30, 2012. This decrease was primarily due to decreases in investment securities of \$20.4 million, loans held-for-sale of \$7.7 million, and cash and cash equivalents of \$31.2 million, compared to the prior year. These decreases were partially offset by increases in net loans receivable of \$37.8 million, premises and equipment of \$1.7 million and cash surrender of bank owned life insurance of \$186,000.

Loans receivable, net increased \$37.8 million, or 22.5%, from \$168.3 million at June 30, 2012 to \$206.1 million at June 30, 2013. The increase in loans receivable, net was attributable primarily to increases in one-to four-family residential loans of \$13.8 million, commercial real estate loans of \$11.9 million, multi-family residential loans of \$6.7 million, commercial business loans of \$4.4 million, and land loans of \$3.3 million at June 30, 2013, compared to the prior year period. At June 30, 2013, the balance of purchased loans approximated \$8.3 million, which consisted solely of one-to-four family residential loans purchased from a mortgage originator headquartered in Arkansas. We have not purchased any loans since fiscal 2008.

As part of implementing our business strategy, in recent periods we diversified the loan products we offer and increased our efforts to originate higher yielding commercial real estate loans and lines of credit and commercial business loans. In fiscal 2009, we hired three commercial loan officers and began offering commercial real estate loans and lines of credit and commercial business loans which were deemed attractive due to their generally higher yields and shorter anticipated lives compared to single-family residential mortgage loans. As of June 30, 2013, Home Federal Bank had \$51.2 million of commercial real estate loans and \$16.8 million of commercial business loans. Although commercial loans are generally considered to have greater credit risk than other certain types of loans, we attempt to mitigate such risk by originating such loans in our market area to known borrowers.

Securities available-for-sale decreased \$20.5 million, or 29.9%, from \$68.4 million at June 30, 2012 to \$48.0 million at June 30, 2013. This decrease resulted primarily from the sale of securities, normal principal paydowns, and by market value declines in the portfolio, partially offset by new investment acquisitions of \$31.5 million. During the past two years, there have been significant loan prepayments due to the heavy volume of loan refinancing. However, with interest rates at their cyclical lows, management is reluctant to invest in long-term, fixed rate mortgage loans for the portfolio and instead sold the majority of the long-term, fixed rate mortgage loan production. During the quarter ended June 30, 2012, \$3.6 million of mortgage-backed securities designated as held-to-maturity were transferred to the investment securities available for sale category as management determined they no longer had the intent to hold the securities to maturity. New investment securities purchased during fiscal 2013 consisted of mortgage-backed securities.

Cash and cash equivalents decreased \$31.2 million, or 89.4%, from \$34.9 million at June 30, 2012 to \$3.7 million at June 30, 2013. The net decrease in cash and cash equivalents was attributable to a non-recurring deposit during the fourth quarter of fiscal 2012 which had a remaining balance of approximately \$31.7 million at June 30, 2012. This short-term deposit was fully withdrawn early in the first quarter of fiscal 2013.

Total liabilities decreased \$11.1 million, or 4.5%, from \$246.3 million at June 30, 2012 to \$235.2 million at June 30, 2013 due primarily to a decrease of \$9.5 million, or 4.3%, in deposits, and a decrease in advances from the Federal Home Loan Bank of \$1.8 million, or 7.7%. The decrease in deposits was attributable primarily to a decrease of \$29.0 million in our money market accounts as the result of the effects of the \$31.7 million short-term deposit as of June 30, 2012, described above. Certificates of deposit increased \$3.6 million, or 3.3%, from \$108.6 million at June 30, 2012 to \$112.3 million at June 30, 2013. NOW accounts increased \$4.6 million from \$16.9 million at June 30, 2012 to \$21.5 million at June 30, 2013. Non-interest bearing deposit accounts increased \$8.6 million from \$20.6 million at June 30, 2012 to \$29.2 million at June 30, 2013 and savings accounts increased \$2.6 million from \$6.9 million at June 30, 2012 to \$9.5 million at June 30, 2013. At June 30, 2013, we held \$12.7 million in brokered certificates of deposit.

Shareholders' equity decreased \$7.9 million, or 15.8%, to \$42.0 million at June 30, 2013, from \$49.9 million at June 30, 2012. The primary reasons for the decrease in shareholders' equity from June 30, 2012, were the acquisition of treasury stock of \$10.5 million, dividends paid of \$632,000 and a decrease in the Company's accumulated other comprehensive income of \$1.3 million. These decreases in shareholders' equity were partially offset by net income of \$3.1 million for the year ended June 30, 2013, proceeds from the issuance of common stock from the exercise of stock options of \$769,000 and the vesting of restricted stock awards, stock options and release of employee stock ownership plan shares totaling \$617,000. The change in accumulated other comprehensive income was primarily due to the change in net unrealized loss on securities available for sale due to recent declines in interest rates. The net unrealized loss on securities available-for-sale is affected by interest rate fluctuations. Generally, an increase in interest rates will have an adverse impact while a decrease in interest rates will have a positive impact.

Average Balances, Net Interest Income, Yields Earned and Rates Paid. The following table shows for the periods indicated the total dollar amount of interest from average interest-earning assets and the resulting yields, as well as the interest expense on average interest-bearing liabilities, expressed both in dollars and rates, and the net interest margin. Tax-exempt income and yields have not been adjusted to a tax-equivalent basis. All average balances are based on monthly balances. Management does not believe that the monthly averages differ significantly from what the daily averages would be.

⁽¹⁾ Includes loans held for sale for the years ended June 30, 2013 and 2012.

⁽²⁾ Includes retained earnings and accumulated other comprehensive loss.

Interest rate spread represents the difference between the weighted-average yield on interest-earning assets and the weighted-average rate on interest-bearing liabilities.

⁽⁴⁾ Net interest margin is net interest income divided by net average interest-earning assets.

Rate/Volume Analysis. The following table describes the extent to which changes in interest rates and changes in volume of interest-related assets and liabilities have affected Home Federal Bancorp's interest income and interest expense during the periods indicated. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (i) changes in volume (change in volume multiplied by prior year rate), (ii) changes in rate (change in rate multiplied by current year volume), and (iii) total change in rate and volume. The combined effect of changes in both rate and volume has been allocated proportionately to the change due to rate and the change due to volume.

Comparison of Operating Results for the Years Ended June 30, 2013 and 2012

General. Net income amounted to \$3.1 million for the year ended June 30, 2013, reflecting an increase of \$287,000 compared to net income of \$2.8 million for the year ended June 30, 2012. This increase was due to a \$1.2 million increase in net interest income after provision for loan losses and a \$100,000 increase in non-interest income, offset by an increase of \$513,000 in non-interest expense and an increase of \$501,000 in the provision for income taxes.

Net Interest Income. Net interest income amounted to \$10.6 million for fiscal year 2013, an increase of \$903,000, or 9.3%, compared to \$9.7 million for fiscal year 2012. The increase was due primarily to an increase of \$432,000 in total interest income, and a \$471,000 decrease in interest expense.

The average interest rate spread increased from 3.62% for fiscal 2012 to 3.80% for fiscal 2013 while the average balance of net interest-earning assets increased from \$241.7 million to \$260.7 million during the same periods. The percentage of average interest-earning assets to average interest-bearing liabilities decreased slightly to 126.77% for fiscal 2013 compared to 130.09% for fiscal 2012. The increase in the average interest rate spread reflects the decline in interest rates paid on interest bearing liabilities. Home Federal Bancorp's average cost of funds decreased 39 basis points in fiscal 2013 compared to fiscal 2012. Lower certificate of deposit interest rates in our market area led us to decrease the average rates paid on certificates of deposit 41 basis points in fiscal 2013 compared to fiscal 2012. Net interest margin increased to 4.06% in fiscal 2013 compared to 4.00% for fiscal 2012.

Interest income increased \$432,000, or 3.4%, to \$13.2 million for fiscal 2013 compared to \$12.7 million for fiscal 2012. Such increase was primarily due to an increase in the average balance of loans receivable. A decrease in average yields on interest earning assets primarily resulted from the decrease in the average balance of investment securities due to security sales and normal principal payments. The increase in the average balance of loans

receivable was primarily due to new loans originated by our commercial lending activities. The average yield of the loan portfolio decreased 68 basis points during fiscal 2013.

Interest expense decreased \$471,000, or 15.4%, to \$2.6 million for fiscal 2013 compared to fiscal 2012 primarily as a result of decreases in the average rates paid on interest-bearing liabilities, partially offset by increases in the average balance of interest-bearing deposits.

Provision for Loan Losses. The allowance for loan losses is established through a provision for loan losses charged to earnings as losses are estimated to have occurred in our loan portfolio. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of the underlying collateral and prevailing economic conditions. The evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

A loan is considered impaired when, based on current information or events, it is probable that we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. When a loan is impaired, the measurement of such impairment is based upon the fair value of the collateral of the loan. If the fair value of the collateral is less than the recorded investment in the loan, we will recognize the impairment by creating a valuation allowance with a corresponding charge against earnings.

An allowance is also established for uncollectible interest on loans classified as substandard. The allowance is established by a charge to interest income equal to all interest previously accrued and income is subsequently recognized only to the extent that cash payments are received. When, in management's judgment, the borrower's ability to make interest and principal payments is back to normal, the loan is returned to accrual status.

A provision of \$558,000 was made to the allowance during fiscal 2013, compared to a provision of \$856,000 in fiscal 2012. We held three commercial loans and one residential mortgage loan classified as substandard totaling \$5.3 million at June 30, 2013, compared to two residential mortgage loans and one equity line of credit classified as substandard totaling \$451,000 at June 30, 2012. The loans are performing in accordance with their terms at June 30, 2013. We had one line of credit classified as doubtful at June 30, 2013 in the amount of \$27,000 compared to none at June 30, 2012.

Non-Interest Income. Non-interest income amounted to \$3.4 million for the year ended June 30, 2013, an increase of \$100,000, or 3.0%, compared to non-interest income of \$3.3 million for the year ended June 30, 2012. The increase was primarily due to a \$320,000 increase in gain on sale loans, partially offset by a decrease of \$146,000 in gain on sale of investments, \$55,000 in other non-interest income, and \$19,000 in income from bank owned life insurance.

Non-Interest Expense. Non-interest expense increased \$513,000, or 6.3%, in fiscal 2013, largely due to increases in compensation and benefits of \$433,000, legal expenses of \$88,000, occupancy expenses of \$18,000, data processing expense of \$73,000. The increase in compensation and benefits expense was attributable in part to increasing loan volume and related commissions to commercial and residential loan officers during fiscal 2013. Non-interest expense increases were partially offset by decreases in audit and examination fees, franchise and bank shares tax, advertising, loan and collection expense and other general overhead expenses, including printing and office supplies expense.

Provision for Income Tax Expense. The provision for income taxes amounted to \$1.6 million and \$1.1 million for the fiscal years ended June 30, 2013 and 2012, respectively. Our effective tax rate was 34.2% for fiscal 2013 and 28.4% for fiscal 2012.

Exposure to Changes in Interest Rates

Our ability to maintain net interest income depends upon our ability to earn a higher yield on interest-earning assets than the rates we pay on deposits and borrowings. Our interest-earning assets consist primarily of securities available-for-sale and long-term residential and commercial mortgage loans which have fixed rates of interest. Consequently, our ability to maintain a positive spread between the interest earned on assets and the interest paid on deposits and borrowings can be adversely affected when market rates of interest rise.

Although long-term, fixed-rate mortgage loans made up a significant portion of our interest-earning assets at June 30, 2013, we sold a substantial amount of our one- to four-family residential loans we originated and maintained a significant portfolio of available-for-sale securities during the past few years in order to better position the Company for a rising interest rate environment in the long term. At June 30, 2013 and 2012, securities available-for-sale amounted to \$48.0 million and \$68.4 million, respectively, or 17.3% and 23.1%, respectively, of total assets at such dates.

Quantitative Analysis. The Office of the Comptroller of the Currency provides a quarterly report on the potential impact of interest rate changes upon the market value of portfolio equity. Management reviews the quarterly reports from the Office of the Comptroller of the Currency which show the impact of changing interest rates on net portfolio value. Net portfolio value is the difference between incoming and outgoing discounted cash flows from assets, liabilities, and off-balance sheet contracts.

Net Portfolio Value. Our interest rate sensitivity is monitored by management through the use of a model which internally generates estimates of the change in our net portfolio value ("NPV") over a range of interest rate scenarios. NPV is the present value of expected cash flows from assets, liabilities, and off-balance sheet contracts. The NPV ratio, under any interest rate scenario, is defined as the NPV in that scenario divided by the market value of assets in the same scenario. The following table sets forth our NPV as of June 30, 2013:

Change in Interest Rates in		Net Portfolio Valu	NPV as % of Portfolio Value of Assets		
Basis Points (Rate Shock)	Amount	\$ Change	% Change	NPV Ratio	Change
		(D	ollars in thousand	s)	
300	\$36,666	\$(6,403)	(14.87)%	14.07%	(1.50)%
200	39,330	(3,739)	(8.68)	14.78	(0.79)
100	41,522	(1,547)	(3.59)	15.30	(0.27)
Static	43,069		` 	15.57	`
(100)	44,274	1,205	2.80	15.75	0.18
(200)	44,480	1,411	3.27	15.70	0.13

Qualitative Analysis. Our ability to maintain a positive "spread" between the interest earned on assets and the interest paid on deposits and borrowings is affected by changes in interest rates. Our fixed-rate loans generally are profitable if interest rates are stable or declining since these loans have yields that exceed our cost of funds. If interest rates increase, however, we would have to pay more on our deposits and new borrowings, which would adversely affect our interest rate spread. In order to counter the potential effects of dramatic increases in market rates of interest, we have underwritten our mortgage loans to allow for their sale in the secondary market. Total loan originations amounted to \$240.9 million for fiscal 2013 and \$251.9 million for fiscal 2012, while loans sold amounted to \$110.4 million and \$120.0 million during the same respective periods. More significantly, we have invested excess funds from loan payments and prepayments and loan sales in investment securities classified as available-for-sale. As a result, Home Federal Bancorp is not as susceptible to rising interest rates as it would be if its interest-earning assets were primarily comprised of long-term fixed rate mortgage loans. With respect to its floating or adjustable rate loans, Home Federal Bancorp writes interest rate floors and caps into such loan documents. Interest rate floors limit our interest rate risk by limiting potential decreases in the interest yield on an adjustable rate loan to a certain level. As a result, we receive a minimum yield even if rates decline farther and the interest rate on the particular loan would otherwise adjust to a lower amount. Conversely, interest rate ceilings limit the amount by which the yield on an adjustable rate loan may increase to no more than six percentage points over the rate at the time of origination. Finally, we intend to place a greater emphasis on shorter-term consumer loans and commercial business loans in the future.

Liquidity and Capital Resources

Home Federal Bancorp maintains levels of liquid assets deemed adequate by management. Our liquidity ratio averaged 22.0% for the quarter ended June 30, 2013. We adjust our liquidity levels to fund deposit outflows, repay our borrowings and to fund loan commitments. We also adjust liquidity as appropriate to meet asset and liability management objectives.

Our primary sources of funds are deposits, amortization and prepayment of loans and mortgage-backed securities, maturities of investment securities and other short-term investments, loan sales and earnings and funds provided from operations. While scheduled principal repayments on loans and mortgage-backed securities are a relatively predictable source of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions and competition. We set the interest rates on our deposits to maintain a desired level of total deposits. In addition, we invest excess funds in short-term interest-earning accounts and other assets, which provide liquidity to meet lending requirements. Our deposit accounts with the Federal Home Loan Bank of Dallas amounted to \$28,000 and \$2.6 million at June 30, 2013 and 2012, respectively.

A significant portion of our liquidity consists of securities classified as available-for-sale and cash and cash equivalents. Our primary sources of cash are net income, principal repayments on loans and mortgage-backed securities and increases in deposit accounts. If we require funds beyond our ability to generate them internally, we have borrowing agreements with the Federal Home Loan Bank of Dallas which provide an additional source of funds. At June 30, 2013, we had \$21.7 million in advances from the Federal Home Loan Bank of Dallas and had \$107.9 million in additional borrowing capacity. Additionally, at June 30, 2013, Home Federal Bank was a party to a Master Purchase Agreement with First National Bankers Bank whereby Home Federal Bank may purchase Federal Funds from First National Bankers Bank in an amount not to exceed \$16.7 million. There were no amounts purchased under this agreement as of June 30, 2013.

At June 30, 2013, the Company had outstanding loan commitments of \$29.1 million to originate loans. At June 30, 2013, certificates of deposit scheduled to mature in less than one year, totaled \$46.0 million. Based on prior experience, management believes that a significant portion of such deposits will remain with us, although there can be no assurance that this will be the case. In addition, the cost of such deposits could be significantly higher upon renewal, in a rising interest rate environment. We intend to utilize our high levels of liquidity to fund our lending activities. If additional funds are required to fund lending activities, we intend to sell our securities classified as available-for-sale as needed.

Home Federal Bank is required to maintain regulatory capital sufficient to meet tangible, core and risk-based capital ratios of at least 1.5%, 3.0% and 8.0%, respectively. At June 30, 2013, Home Federal Bank exceeded each of its capital requirements with ratios of 15.16%, 15.16% and 25.48%, respectively.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements, as defined by Securities and Exchange Commission rules, and have not had any such arrangements during the two years ended June 30, 2013. See Notes 9 and 14 to the Notes to Consolidated Financial Statements contained in Item 8 of this Form 10-K.

Impact of Inflation and Changing Prices

The consolidated financial statements and related financial data presented herein regarding Home Federal Bancorp have been prepared in accordance with accounting principles generally accepted in the United States of America which generally require the measurement of financial position and operating results in terms of historical dollars, without considering changes in relative purchasing power over time due to inflation. Unlike most industrial companies, virtually all of our assets and liabilities are monetary in nature. As a result, interest rates generally have a more significant impact on Home Federal Bancorp's performance than does the effect of inflation. Interest rates do not necessarily move in the same direction or in the same magnitude as the prices of goods and services, since such prices are affected by inflation to a larger extent than interest rates.

Forward-Looking Statements

This Annual Report on Form 10-K contains certain forward-looking statements (as defined in the Securities Exchange Act of 1934 and the regulations thereunder). Forward-looking statements are not historical facts but instead represent only the beliefs, expectations or opinions of Home Federal Bancorp and its management regarding future events, many of which, by their nature, are inherently uncertain. Forward-looking statements may be identified by the use of such words as: "believe", "expect", "anticipate", "intend", "plan", "estimate", or words of similar meaning, or future or conditional terms such as "will", "would", "should", "could", "may". "likely". "probably". or "possibly." Forward-looking statements include, but are not limited to, financial projections and estimates and their underlying assumptions; statements regarding plans, objectives and expectations with respect to future operations, products and services; and statements regarding future performance. Such statements are subject to certain risks, uncertainties and assumption, many of which are difficult to predict and generally are beyond the control of Home Federal Bancorp and its management, that could cause actual results to differ materially from those expressed in, or implied or projected by, forward-looking statements. The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statements: (1) economic and competitive conditions which could affect the volume of loan originations, deposit flows and real estate values; (2) the levels of non-interest income and expense and the amount of loan losses; (3) competitive pressure among depository institutions increasing significantly; (4) changes in the interest rate environment causing reduced interest margins; (5) general economic conditions, either nationally or in the markets in which Home Federal Bancorp is or will be doing business, being less favorable than expected; (6) political and social unrest, including acts of war or terrorism; or (7) legislation or changes in regulatory requirements adversely affecting the business in which Home Federal Bancorp will be engaged. Home Federal Bancorp undertakes no obligation to update these forward-looking statements to reflect events or circumstances that occur after the date on which such statements were made.

Report of Independent Registered Public Accounting Firm

To the Board of Directors Home Federal Bancorp, Inc. of Louisiana and Subsidiary Shreveport, Louisiana

We have audited the accompanying consolidated balance sheets of Home Federal Bancorp, Inc. of Louisiana (the Company) and its wholly-owned subsidiary Home Federal Bank (the Bank) as of June 30, 2013 and 2012, and the related consolidated statements of operations, comprehensive income, changes in stockholders' equity, and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Home Federal Bancorp, Inc. of Louisiana and Subsidiary as of June 30, 2013 and 2012, and the consolidated results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America (GAAP).

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies

Nature of Operations

On December 22, 2010, Home Federal Mutual Holding Company completed its second step conversion from the mutual holding company form of organization to the fully public stock holding company structure pursuant to a Plan of Conversion and Reorganization. Upon completion of the conversion, Home Federal Bancorp, Inc. of Louisiana, a newly formed Louisiana chartered corporation (the Company), became the holding company for Home Federal Bank (the Bank), and Home Federal Mutual Holding Company of Louisiana and Home Federal Bancorp, Inc. of Louisiana, a federally chartered corporation, (the Mid-Tier Company) ceased to exist. As part of the conversion, all outstanding shares of the Mid-Tier Company common stock (other than those owned by Home Federal Mutual Holding Company) were converted into the right to receive 0.9110 of a share of the newly formed Home Federal Bancorp, Inc. of Louisiana common stock resulting in approximately 1,100,609 shares issued in the exchange and cash in lieu of fractional shares. In addition, a total of 1,945,220 shares of common stock, par value \$0.01 per share, of Home Federal Bancorp, Inc. of Louisiana were sold in subscription, community and syndicated community offerings to certain depositors and borrowers of the Bank, the Bank's Employee Stock Ownership Plan, and other investors for \$10.00 per share, or \$19.5 million in aggregate. Treasury stock held was cancelled in the conversion. The net proceeds of the offering were approximately \$18.0 million, after offering expenses.

The Bank is a federally chartered, stock savings and loan association and is subject to federal regulation by the Federal Deposit Insurance Corporation and the Office of the Comptroller of the Currency (the OCC). The Bank provides financial services to individuals, corporate entities and other organizations through the origination of loans and the acceptance of deposits in the form of passbook savings, certificates of deposit, and demand deposit accounts. Services are provided by four branch offices, three of which are located in Shreveport, Louisiana and one in Bossier City, Louisiana, and one agency office located in Shreveport, Louisiana.

The Bank is subject to competition from other financial institutions, and is also subject to the regulations of certain Federal and State agencies and undergoes periodic examinations by those regulatory authorities.

Basis of Presentation and Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, Home Federal Bank. All significant intercompany balances and transactions have been eliminated.

Use of Estimates

In preparing consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP), management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated balance sheets and reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the allowance for loan losses and deferred taxes.

Significant Group Concentrations of Credit Risk

Most of the Company's activities are provided to customers of the Bank by four branch offices, three of which are located in the city of Shreveport, Louisiana and one in Bossier City, Louisiana. The area served by the Bank is primarily the Shreveport-Bossier City metropolitan area; however, loan and deposit customers are found dispersed in a wider geographical area covering much of northwest Louisiana.

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Cash and Cash Equivalents

For purposes of the Consolidated Statements of Cash Flows, cash and cash equivalents include cash on hand, balances due from banks, and federal funds sold, all of which mature within ninety days.

At June 30, 2013 and 2012, cash and cash equivalents consisted of the following:

	2013	2012
	(In Tho	usands)
Cash on Hand	\$ 467	\$ 587
Demand Deposits at Other Institutions	2,218	5,401
Federal Funds Sold		<u>28,875</u>
Total	\$ <u>3,685</u>	\$ <u>34,863</u>

Securities

Securities are being accounted for in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 320, *Investments - Debt and Equity Securities*. ASC 320 requires the classification of securities into one of three categories: Trading, Available-for-Sale, or Held-to-Maturity. Management determines the appropriate classification of debt securities at the time of purchase and re-evaluates this classification periodically.

Investments in non-marketable equity securities and debt securities, in which the Company has the positive intent and ability to hold to maturity, are classified as held-to-maturity and carried at cost, adjusted for amortization of the related premiums and accretion of discounts, using the interest method. Investments in debt securities that are not classified as held-to-maturity and marketable equity securities that have readily determinable fair values are classified as either trading or available-for-sale securities.

Securities that are acquired and held principally for the purpose of selling in the near term are classified as trading securities. Investments in securities not classified as trading or held-to-maturity are classified as available-for-sale. Trading account and available-for-sale securities are carried at fair value. Unrealized holding gains and losses on trading securities are included in earnings while net unrealized holding gains and losses on available-for-sale securities are excluded from earnings and reported in other comprehensive income.

The Company held no trading securities as of June 30, 2013 and 2012.

Purchase premiums and discounts are recognized in interest income using the interest method over the term of the securities. Declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses. In estimating other-than-temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method.

Loans Held-for-Sale

Loans originated and intended for sale in the secondary market are carried at the lower of cost or estimated fair value in the aggregate. Net unrealized losses, if any, are recognized through a valuation allowance by charges to income.

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Loans

Loans receivable are stated at unpaid principal balances, less allowances for loan losses and unamortized deferred loan fees. Net non-refundable fees (loan origination fees, commitment fees, discount points) and costs associated with lending activities are being deferred and subsequently amortized into income as an adjustment of yield on the related interest earning assets using the interest method. Interest income on contractual loans receivable is recognized on the accrual method. Unearned discounts are deferred and amortized on the interest method over the life of the loan.

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of the underlying collateral, and prevailing economic conditions. The evaluation is inherently subjective, as it requires estimates that are susceptible to significant revision as more information becomes available.

A loan is considered impaired when, based on current information or events, it is probable that the Bank will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. When a loan is impaired, the measurement of such impairment is based upon the fair value of the collateral of the loan. If the fair value of the collateral is less than the recorded investment in the loan, the Bank will recognize the impairment by creating a valuation allowance with a corresponding charge against earnings.

An allowance is also established for uncollectible interest on loans classified as substandard. The allowance is established by a charge to interest income equal to all interest previously accrued and income is subsequently recognized only to the extent that cash payments are received. When, in management's judgment, the borrower's ability to make periodic interest and principal payments is back to normal, the loan is returned to accrual status.

It should be understood that estimates of future loan losses involve an exercise of judgment. While it is possible that in particular periods the Company may sustain losses, which are substantial relative to the allowance for loan losses, it is the judgment of management that the allowance for loan losses reflected in the accompanying statements of condition is adequate to absorb known and inherent losses in the existing loan portfolio both probable and reasonable to estimate.

Off-Balance Sheet Credit Related Financial Instruments

In the ordinary course of business, the Bank has entered into commitments to extend credit. Such financial instruments are recorded when they are funded.

Foreclosed Assets

Assets acquired through, or in lieu of, loan foreclosure are held-for-sale and are carried at the lower of cost or current fair value minus estimated cost to sell as of the date of foreclosure. Cost is defined as the lower of the fair value of the property or the recorded investment in the loan. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less cost to sell.

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Premises and Equipment

Land is carried at cost. Buildings and equipment are carried at cost less accumulated depreciation computed on the straight-line method over the estimated useful lives of the assets. Estimated useful lives are as follows:

Buildings and Improvements Furniture and Equipment 10 - 40 Years 3 - 10 Years

Bank-Owned Life Insurance

The Company has purchased life insurance contracts on the lives of certain key employees. The Bank is the beneficiary of these policies. These contracts are reported at their cash surrender value and changes in the cash surrender value are included in other non-interest income.

Income Taxes

The Company and its wholly-owned subsidiary file a consolidated Federal income tax return on a fiscal year basis. Each entity will pay its pro-rata share of income taxes in accordance with a written tax-sharing agreement.

The Company accounts for income taxes on the asset and liability method. Deferred tax assets and liabilities are recorded based on the difference between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the expected amount most likely to be realized. Realization of deferred tax assets is dependent upon the generation of a sufficient level of future taxable income and recoverable taxes paid in prior years. Current taxes are measured by applying the provisions of enacted tax laws to taxable income to determine the amount of taxes receivable or payable.

The Company follows the provisions of the *Income Taxes* Topic of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 740. ASC 740 prescribes a recognition threshold and measurement attribute for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return and also provides guidance on various related matters such as derecognition, interest, penalties, and disclosures required. The Company recognizes interest and penalties, if any, related to unrecognized tax benefits in income tax expense.

While the Bank is exempt from Louisiana income tax, it is subject to the Louisiana Ad Valorem Tax, commonly referred to as the Louisiana Shares Tax, which is based on stockholders' equity and net income.

Earnings per Share

Earnings per share are computed based upon the weighted average number of common shares outstanding during the year.

Non-Direct Response Advertising

The Company expenses all advertising costs, except for direct-response advertising, as incurred. Non-direct response advertising costs were \$241,000 and \$282,000 for the years ended June 30, 2013 and 2012, respectively.

In the event the Company incurs expense for material direct-response advertising, it will be amortized over the estimated benefit period. Direct-response advertising consists of advertising whose primary purpose is to elicit sales to customers who could be shown to have responded specifically to the advertising and results in probable future benefits. For the years ended June 30, 2013 and 2012, the Company did not incur any amount of direct-response advertising.

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Stock-Based Compensation

GAAP requires all share-based payments to employees, including grants of employee stock options and recognition and retention share awards, to be recognized as expense in the statement of operations based on their fair values. The amount of compensation is measured at the fair value of the options or recognition and retention share awards when granted, and this cost is expensed over the required service period, which is normally the vesting period of the options or recognition and retention awards. This guidance applies to awards granted or modified after January 1, 2006, or any unvested awards outstanding prior to that date.

Reclassification

Certain financial statement balances included in the prior year financial statements have been reclassified to conform to the current year presentation.

Comprehensive Income

Accounting principles generally require that recognized revenue, expenses, gains, and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, are reported as a separate component of the equity section of the Consolidated Balance Sheets, such items, along with net income, are components of comprehensive income.

The components of other comprehensive income and related tax effects are as follows:

	2013	2012
	(In Tho	usands)
Unrealized Holding (Loss) Gain on Available-for-Sale-Securities Reclassification Adjustment for Transfer of Securities from	\$(1,833)	\$204
Held-to-Maturity to Available-for-Sale		155
Reclassification Adjustment for Gain Realized in Income	<u>(179</u>)	<u>(440)</u>

Tax Effect	<u>684</u>	<u>27</u>
Net-of-Tax Amount	\$ <u>(1,328)</u>	\$ <u>(54)</u>

The components of accumulated other comprehensive income, included in stockholders' equity, are as follows:

	2013	2012
	(In Tho	usands)
Net Unrealized Gain on Securities Available-for-Sale Tax Effect	\$ 67 (23)	\$2,079 _(707)
Net-of-Tax Amount	\$ <u>44</u>	\$ <u>1,372</u>

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Recent Accounting Pronouncements

In December 2011, the FASB issued guidance which relates to deconsolidation events. Under this guidance, when a parent (reporting entity) ceases to have a controlling financial interest in a subsidiary that is in-substance real estate, as a result of the default on the subsidiary's nonrecourse debt, the reporting entity should apply the guidance in Subtopic 360-20, Property, Plant and Equipment - Real Estate Sales, to determine whether it should derecognize the in-substance real estate. This guidance is effective for fiscal years ending after December 31, 2013, and is not expected to have an impact on the Company's financial statements.

In December 2011, the FASB issued authoritative guidance to provide enhanced disclosures in the financial statements about offsetting and netting arrangements. The new guidance requires entities to disclose both gross information and net information about both instruments and transactions eligible for offset in the statement of financial position, and instruments and transactions subject to an agreement similar to a master netting agreement. This guidance was issued to facilitate comparison between U.S. GAAP and IFRS financial statement presentations. The new guidance will be effective for years beginning on or after January 1, 2013, and is not expected to have a significant impact on the Company's financial statements.

In February 2013, the FASB issued ASU 2013-2, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income, relating to the reporting of amounts reclassified out of accumulated other comprehensive income to improve the transparency of reporting these reclassifications. This guidance does not amend any existing requirements for reporting net income or other comprehensive income in the financial statements. The guidance requires an entity to disaggregate the total change of each component of other comprehensive income and separately present reclassification adjustments and current period other comprehensive income. The provisions of this guidance also requires that entities present, either in a single note or parenthetically on the face of the financial statements, the effect of significant amounts reclassified from each component of accumulated other comprehensive income based on its source and the income statement line item affected by the reclassification. If a component is not required to be reclassified to net income in its entirety, entities would instead cross reference to the related note to the financial statements for additional information. This guidance is effective for interim and annual reporting periods beginning after December 15, 2012. The adoption of this guidance is not expected to have a significant impact on the Company's financial statements.

Notes to Consolidated Financial Statements

Note 2. Securities (Continued)

The amortized cost and fair value of debt securities by contractual maturity at June 30, 2013, follows:

	Available-	for-Sale	Held-to-N	laturity
	Amortized	Fair	Amortized Cost	Fair Value
	Cost	Value (In The	ousands)	v atue
Within One Year or Less	\$	\$	\$	\$
One through Five Years	319	328		
After Five through Ten Years	267	276		
Over Ten Years	47,308	47,357		
Total	\$ <u>47,894</u>	\$ <u>47,961</u>	\$	\$

For the years ended June 30, 2013 and 2012, proceeds from the sale of securities available-for-sale amounted to \$34.7 million and \$43.4 million, respectively. Gross realized gains amounted to \$216,000 and \$362,000, respectively. There were no gross realized losses for the years ended June 30, 2013 and 2012.

Information pertaining to securities with gross unrealized losses at June 30, 2013, aggregated by investment category and length of time that individual securities have been in a continuous loss position, follows:

				June 30	, 2013			
	Le	ss Than Tw	elve Mo	onths	(Over Twelv	e Months	
	Unre	ross ealized sses	_	Fair Talue	Gro Unrea Loss	lized	Fai Valu	
				(In Tho	ısands)			
Securities Available-for-Sale								
Debt Securities								
Mortgage-Backed Securities	\$	737	\$	27,875	\$		\$	
Marketable Equity Securities		 =						
Total Securities Available-for- Sale	\$	7 <u>37</u>	\$_	27,875	\$	<u>==</u>	\$	<u></u>

The unrealized losses on the Company's investment in mortgage-backed securities at June 30, 2013 were caused by interest rate changes. The contractual cash flows of these investments are guaranteed by agencies of the U.S. government. Accordingly, it is expected that these securities would not be settled at a price less than the amortized cost of the Company's investment. Because the decline in market value is attributable to changes in interest rates and not credit quality and because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Company does not consider these investments to be other-than-temporarily impaired at June 30, 2013.

There were no unrealized losses as of June 30, 2012.

At June 30, 2013, securities with a carrying value of \$12.7 million were pledged to secure public deposits, and securities and mortgage loans with a carrying value of \$96.7 million were pledged to secure FHLB advances.

During the year ended June 30, 2012, the Company transferred certain investments from the held-to-maturity category to the available-for-sale category. These securities were transferred in accordance with the limited exceptions as provided by ASC 320, Investments - Debt and Equity Securities.

Credit Quality Indicators

The Company segregates loans into risk categories based on the pertinent information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying the loans according to credit risk. Loans classified as substandard or identified as special mention are reviewed quarterly by management to evaluate the level of deterioration, improvement, and impairment, if any, as well as assign the appropriate risk category.

Loans excluded from the scope of the quarterly review process above are generally identified as pass credits until: (a) they become past due; (b) management becomes aware of a deterioration in the credit worthiness of the borrower; or (c) the customer contacts the Company for a modification. In these circumstances, the loan is specifically evaluated for potential classification and the need to allocate reserves or charge-off.

The Company uses the following definitions for risk ratings:

Pass - Loans classified as pass are well protected by the current net worth or paying capacity of the obligor or by the fair value, less cost to acquire and sell, the underlying collateral in a timely manner.

Special Mention - Loans identified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

Substandard - Loans classified as substandard are inadequately protected by the current net worth and payment capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful - Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loss - This classification includes those loans which are considered uncollectible and of such little value that their continuance as loans is not warranted. Even though partial recovery may be possible in the future, it is not practical or desirable to defer writing off these basically worthless loans. Accordingly, these loans are charged-off before period end.

Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when contractually due. Loans that experience insignificant payment delays or payment shortfalls are generally not classified as impaired. On a case-by-case basis, management determines the significance of payment delays and payment shortfalls, taking into consideration all of the circumstances related to the loan, including: the length of the payment delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Notes to Consolidated Financial Statements

The Company's loan portfolio also includes a loan that has been modified in a troubled debt restructuring (TDR), where economic concessions have been granted to borrowers who have experienced or are expected to experience financial difficulties. These concessions typically result from the Company's loss mitigation activities and could include reductions in the interest rate, payment extensions, or other actions.

Notes to Consolidated Financial Statements

Note 3. Loans Receivable (Continued)

Credit Quality Indicators (Continued)

When the Company modifies a loan, management evaluates any possible concession based on the present value of expected future cash flows, discounted at the contractual interest rate of the original loan agreement, except when the sole source of repayment for the loan is the liquidation of the collateral. In these cases, management uses the current fair value of the collateral, less selling costs. If management determines that the value of the modified loan is less than the recorded investment in the loan, impairment is recognized through an allowance estimate.

The TDR shown in the following table was modified by an interest rate adjustment and is currently included in non-accrual loans due to non-performance after the modification, as of June 30, 2013:

Loan Type	Number of Contracts	Pre- Modification Recorded Investment	Post- Modification Recorded Investment	Specific Reserves Allocated	
Loans Secured by Mortgages on Real Estate					
One-to-Four Family Residential	<u>1</u>	\$ <u>334</u>	\$ <u>334</u>	\$ <u></u>	
Total	<u>_1</u>	\$ <u>334</u>	\$ <u>334</u>	\$ <u></u>	

There were no troubled debt restructurings as of June 30, 2012.

Notes to Consolidated Financial Statements

Note 6. Deposits (Continued)

Interest expense on deposits for the years ended June 30, 2013 and 2012, was as follows:

	2013	2012
	(In Tho	usands)
NOW and Money Market	\$ 351	\$ 334
Passbook Savings	21	39
Certificates of Deposit	<u>1,872</u>	2,088
Total	\$ <u>2,244</u>	\$ <u>2,461</u>

The aggregate amount of time deposits in denominations of \$100,000 or more at June 30, 2013 and 2012, was \$53.5 million and \$48.3 million, respectively.

At June 30, 2013 and 2012, the Bank had brokered certificates of deposit totaling \$12.7 million and \$10.4 million, respectively. The brokered certificates of deposit are callable by the Bank after twelve months.

Included in money market accounts at June 30, 2012 was a non-recurring deposit that had a balance of \$31.7 million at June 30, 2012. The deposit was short-term in nature and withdrawn as of August 1, 2012.

Note 7. Advances from Federal Home Loan Bank of Dallas

Pursuant to collateral agreements with the Federal Home Loan Bank of Dallas (FHLB), advances are secured by a blanket floating lien on first mortgage loans. Total interest expense recognized amounted to \$326,000 and \$589,000, for fiscal years 2013 and 2012, respectively.

Advances at June 30, 2013 and 2012, consisted of the following:

	Advar	ce Total
Contract Rate	2013	2012
	(In The	ousands)
0.00% to 0.99%	\$17,100	\$13,000

5.00% to 5.99%		198
Total	\$ <u>21,662</u>	\$ <u>23,469</u>

Notes to Consolidated Financial Statements

Note 7. Advances from Federal Home Loan Bank of Dallas (Continued)

Maturities of advances at June 30, 2013 are as follows (in thousands):

Year Ending June 30,	Amount
2014	\$19,015
2015	236
2016	246
2017	258
2018	270
Thereafter	<u>1,637</u>
Total	\$ <u>21,662</u>

Note 8. Other Borrowings

At June 30, 2013, the Company had available a \$2.0 million line of credit agreement with a bank, maturing March 20, 2014. The line is secured by 100 shares of the subsidiary Bank's common stock and bears interest at a rate of 4.25%. At June 30, 2013, amounts drawn on the line of credit totaled \$500,000. There was no line of credit outstanding at June 30, 2012.

Note 9. Commitments

Lease Commitments

The Bank leases property for three branch facilities expiring in various years through November 2018.

Future minimum rental payments resulting from the non-cancelable term of these leases are as follows (in thousands):

Year Ending June 30,	Amount
2014	\$ 151
2015	76
2016	72
2017	26
2018	26
Thereafter	11
Total	\$ <u>362</u>

Total rent expense paid under the terms of these leases for the years ended June 30, 2013 and 2012, amounted to \$147,000 and \$129,000, respectively. Rent expense for the years ended June 30, 2013 and 2012, is net of sublease rental income in the amount of \$6,000. Future rentals to be received under a month-to-month sublease are expected to be \$500 per month.

Contractual Commitment

The Bank has an agreement with a third-party to provide on-line data processing services. The agreement, which expires January 31, 2015, contains a minimum monthly service charge of \$4,000. At the end of this term, the agreement will automatically continue for successive periods of five years unless terminated upon written notice given at least twelve months prior to the end of the present term.

Notes to Consolidated Financial Statements

Note 9. Commitments (Continued)

Contractual Commitment (Continued)

The future minimum commitments for the on-line processing services are as follows (in thousands):

Year Ending June 30,	Amount		
	(In Thousands)		
2014	\$ 48		
2015	28		
Total	\$ 76		

Employment Contracts

The Company and the Bank have employment contracts with certain key employees. These contracts provide for compensation and termination benefits. The future minimum commitments for employment contracts are as follows (in thousands):

Year Ending June 30,	Amount
	(In Thousands)
2014	\$ 459
2015	431
2016	378
2017	354
2018	<u>274</u>
Total	\$ <u>1,896</u>

Note 10. Income Taxes

The Company and its subsidiary file consolidated federal income tax returns. The current provision for federal and state income taxes is calculated on pretax accounting income adjusted by items considered to be permanent differences between book and taxable income. Income tax expense for the years ended June 30, 2013 and 2012, is summarized as follows:

	2013	2012
	(In Thous	sands)
Current Deferred	\$1,755 (127)	\$ 1,499 (372)
Total	\$ <u>1,628</u>	\$ <u>1,127</u>

Notes to Consolidated Financial Statements

Note 10. Income Taxes (Continued)

The effective federal income tax rate for the years ended June 30, 2013 and 2012, was 34.2% and 28.39%, respectively. Reconciliations of income tax expense at the statutory rate to the Company's effective rates are as follows:

	2013	2012
_	(In The	ousands)
Computed at Expected Statutory Rate	\$1,618	\$1,350
Capital Gains and Losses	40	(163)
Stock Option Compensation	(2)	11
Non-Taxable Income	(64)	(71)
Other	<u> 36</u>	
Provision for Income Tax Expense	\$ <u>1,628</u>	\$ <u>1,127</u>

At June 30, 2013 and 2012, temporary differences between the financial statement carrying amount and tax bases of assets that gave rise to deferred tax recognition were related to the effect of loan bad debt deduction differences for tax and book purposes, deferred stock option compensation and non-deductible capital losses. The deferred tax expense or benefit related to securities available-for-sale has no effect on the Bank's income tax provision since it is charged or credited to the Bank's other comprehensive income or loss equity component. A valuation allowance has been established to eliminate the deferred tax benefit of capital losses due to the uncertainty as to whether the tax benefits would be realized in future periods.

The net deferred income tax asset and liability consisted of the following components at June 30, 2013 and 2012:

	2013	2012
	(In The	ousands)
Deferred Tax Assets		
Stock Option Compensation	\$ 92	\$ 110
Loans Receivable - Bad Debt Loss Allowance	655	471
Capital Losses	154	154
•	901	735
Valuation Allowance	<u>(103</u>)	_(64)
Net Deferred Tax Assets	798	671
Deferred Tax Liabilities		
Market Value Adjustment to		
Available-for-Sale Securities	(23)	<u>(707</u>)
Net Deferred Tax Assets (Liabilities)	\$ <u>_775</u>	\$ <u>(36</u>)

In computing federal taxes on income under provisions of the Internal Revenue Code in years past, earnings appropriated by savings and loan associations to general reserves were deductible in arriving at taxable income if certain conditions were met. Bank retained earnings appropriated to the federal insurance reserve at June 30, 2013 and 2012, amounted to \$4.0 million. Included were appropriations of net income of prior years of \$3.3 million, for which no provision for federal income taxes has been made. If this portion of the reserve is used for any purpose other than to absorb losses, a tax liability will be imposed upon the Bank at the then current federal income tax rate.

Notes to Consolidated Financial Statements

Note 10. Income Taxes (Continued)

At June 30, 2013 and 2012, the Company did not have any tax positions which resulted in unrecognized tax benefits. In addition, the Company had no amount of interest and penalties recognized in the consolidated statements of operations for the years ended June 30, 2013 and 2012, nor any amount of interest and penalties recognized in the consolidated balance sheets as of June 30, 2013 and 2012. As of June 30, 2013 and 2012, the Company had no uncertain tax positions. As of June 30, 2013, the tax years that remain open for examination by tax jurisdictions include the years ended June 30, 2012, 2011 and 2010.

Note 11. Employee Benefit Plans

Effective November 15, 2004, the Bank adopted the Home Federal Bank Employees' Savings and Profit Sharing Plan and Trust administered by the Pentegra Group. This plan complies with the requirements of Section 401(k) of the Internal Revenue Code. Those eligible for this defined contribution plan must have completed twelve months of full time service and attained age 21. Participating employees may make elective salary reduction contributions of up to \$16,500, of their eligible compensation. The Bank will contribute a basic "safe harbor" contribution of 3% of participant plan salary and will match 50% of the first 6% of plan salary elective deferrals. The Bank is also permitted to make discretionary contributions to be allocated to participant accounts. Pension costs, including administrative fees, attributable to the Bank's 401(k) safe harbor plan for the years ended June 30, 2013 and 2012, were \$229,000 and \$203,000, respectively.

During fiscal year 2011, The Company established a Survivor Benefit Plan for the benefit of selected executives. The purpose of the plan is to provide benefits to designated beneficiaries if a participant dies while employed by the Company. The plan is considered an unfunded plan for tax and ERISA purposes and all obligations arising under the plan are payable from the general assets of the Company. At June 30, 2013 and 2012, there were no obligations requiring accrual for this plan.

The Bank adopted a Supplemental Executive Retirement Agreement ("SERP") effective as of January 1, 2013, (Effective Date) for its Chief Financial Officer, Clyde D. Patterson. The agreement is to encourage Mr. Patterson to remain employed by the Bank until December 31, 2017 (Target Retirement Date), in exchange for supplemental retirement benefits payable in equal annual installments of \$25,000 for ten consecutive years. Mr. Patterson will be 100% vested after an additional five years of service following the Effective Date, and shall vest ratably (i.e. 20% per year for five years) in the full retirement benefit for each year of service credit earned following the Effective Date. In the event of his death after a separation from service on or after December 31, 2017 and prior to receipt of ten years of Supplemental Retirement Benefits, the remainder will be payable each year to his designated beneficiary. In the event of his death while in active service, the designated beneficiary shall receive the full Supplemental Retirement Benefit in a single lump sum payment within thirty days following the date of death. In the event of his separation from service prior to December 31, 2017, whether with or without cause, Mr. Patterson shall be entitled to receive his accrued benefit payable in a lump sum on the first day of the next calendar quarter. Mr. Patterson shall be 100% vested in his accrued benefit at all times.

The Bank adopted a Supplemental Executive Retirement Agreement ("SERP") on December 27, 2012 (Effective Date) for its Chief Executive Officer, Daniel R. Herndon. The agreement is to encourage Mr. Herndon to remain employed by the Bank until December 31, 2017 (Target Retirement Date), in exchange for retirement benefits payable in equal annual installments of \$75,000 for eight consecutive years.

Notes to Consolidated Financial Statements

Note 11. Employee Benefit Plans (Continued)

Mr. Herndon will be 100% vested after an additional five years of service following the Effective Date, and shall vest ratably (i.e. 20% per year for five years) in the full retirement benefit for each year of service credit earned following the Effective Date. In the event of his death after a separation from service on or after December 31, 2017, and prior to receipt of eight years of Supplemental Retirement Benefits, the remainder will be payable each year to his designated beneficiary. In the event of his death while in active service, the designated beneficiary shall receive the full Supplemental Retirement Benefit in a single lump sum payment within thirty days following the date of death. In the event of his separation from service prior to December 31, 2017, whether with or without cause, Mr. Herndon shall be entitled to receive his accrued benefit payable in a lump sum on the first day of the next calendar quarter. Mr. Herndon shall be 100% vested in his accrued benefit at all times.

For the year ended June 30, 2013, the Company recorded compensation expense totaling \$65,252, to accrue the benefits required by the SERP agreements. The Bank's future compensation expense under these agreements is approximately \$140,000 to \$170,000 per year through December 2017.

Note 12. Employee Stock Ownership Plan

During fiscal 2005, the Company instituted an employee stock ownership plan. The Home Federal Bank Employee Stock Ownership Plan (ESOP) enables all eligible employees of the Bank to share in the growth of the Company through the acquisition of stock. Employees are generally eligible to participate in the ESOP after completion of one year of service and attaining the age of 21.

The ESOP purchased the statutory limit of eight percent of the shares sold in the initial public offering of the Mid-Tier Company completed on January 18, 2005, excluding shares issued to Home Federal Mutual Holding Company of Louisiana (113,887 shares of Mid-Tier Company). This purchase was facilitated by a loan from the Mid-Tier Company to the ESOP in the amount of \$1.1 million. As a result of the second step conversion, the ESOP became a stock benefit plan of the Company and the Mid-Tier Company's stock was exchanged for shares of the Company. The corresponding note is being repaid in 80 quarterly debt service payments of \$23,000 on the last business day of each quarter, beginning March 31, 2005, at the rate of 5.25%.

As part of the conversion described in Note 1, the ESOP purchased 116,713 shares of the Company, which represented 6.0% of the shares sold in the conversion. This purchase was facilitated by a loan from the Company to the ESOP in the amount of \$1.2 million. The corresponding note is being repaid in 80 quarterly debt service payments of \$20,000 on the last business day of each quarter, beginning March 31, 2011, at the rate of 3.2%.

The loans are secured by a pledge of the ESOP shares. The shares pledged as collateral are reported as unearned ESOP shares in the consolidated balance sheets. The notes payable and the corresponding notes receivable have been eliminated in consolidation.

The Company may contribute to the ESOP, in the form of debt service, at the discretion of its board of directors. Cash dividends on the Company's unallocated stock shall be used to either repay the loan or be distributed to the participants in the ESOP. If dividends are used to repay the loan, additional shares will be released from the suspense account and allocated to participants. Shares are released for allocation to ESOP participants based on principal and interest payments of the note. Compensation expense is recognized based on the number of shares allocated to ESOP participants each year and the average market price of the stock for the current year. Released ESOP shares become outstanding for earnings per share computations.

Notes to Consolidated Financial Statements

Note 12. Employee Stock Ownership Plan (Continued)

As compensation expense is incurred, the unearned ESOP shares account is reduced based on the original cost of the stock. The difference between the cost and the average market price of shares released for allocation is applied to additional paid-in capital. ESOP compensation expense for the years ended June 30, 2013 and 2012, was \$200,000 and \$159,000, respectively.

The ESOP shares as of June 30, 2013 and 2012, were as follows:

	2013	2012
Allocated Shares	57,226	45,696
Shares Released for Allocation	5,765	5,765
Unreleased Shares	<u>167,609</u>	<u>179,139</u>
Total ESOP Shares	230,600	<u>230,600</u>
Fair Value of Unreleased Shares (In Thousands)	\$ 2,906	\$ 2,642
Stock Price at June 30, 2013 and 2012, Respectively	\$ 17.34	\$ 14.75

Note 13. Stock-Based Compensation

On August 10, 2005, the shareholders of the Company approved the establishment of the Home Federal Bancorp, Inc. of Louisiana 2005 Recognition and Retention Plan and Trust Agreement (the 2005 Recognition Plan) as an incentive to retain personnel of experience and ability in key positions. As a result of the second step conversion, the 2005 Recognition Plan became a stock benefit plan of the Company, and the Mid-Tier Company's common stock was exchanged for stock of the Company. The aggregate number of shares of the Company's common stock subject to award under the 2005 Recognition Plan totaled 63,547 (as adjusted for the conversion described in Note 1). As shares were acquired for the 2005 Recognition Plan, the purchase price of these shares was recorded as a contra equity account. As the shares are distributed, the contra equity account is reduced.

On December 23, 2011, the shareholders of the Company approved the establishment of the Home Federal Bancorp, Inc. of Louisiana 2011 Recognition and Retention Plan and Trust Agreement (the 2011 Recognition Plan, together with the 2005 Recognition Plan, the Recognition Plan) as an incentive to retain personnel of experience and ability in key positions. The aggregate number of shares of the Company's common stock available for award under the 2011 Recognition Plan totaled 77,808 shares. As of June 30, 2013, 69,251 shares were awarded under the 2011 Recognition Plan.

Recognition Plan shares are earned by recipients at a rate of 20% of the aggregate number of shares covered by the Recognition Plan award over five years. If the employment of an employee or service as a non-employee director is terminated prior to the fifth anniversary of the date of grant of Recognition Plan share award for any reason other than the recipient's death, disability, or following a change in control of the Company, the recipient shall forfeit the right to any shares subject to the awards that have not been earned.

The cost associated with the 2005 Recognition Plan is based on a share price of \$10.93 (as adjusted), which represents the market price of the Company's stock on the date on which the 2005 Recognition Plan shares were granted. The cost associated with the 2011 Recognition Plan is based on a share price of \$14.70, which represents the fair market price of the Company's stock on the date on which the 2011 Recognition Plan shares were granted. The cost of the Recognition Plan is being recognized over the five year vesting period. Compensation expense pertaining to the Recognition Plan was \$209,000 and \$90,000, for the years ended June 30, 2013 and 2012, respectively.

Notes to Consolidated Financial Statements

Note 13. Stock-Based Compensation (Continued)

A summary of the changes in restricted stock follows:

	Unawarded Shares		Awarded Shares	
	2013	2012	2013	2012
Balance - Beginning of Year	8,557	-	69,251	2,808
Granted	_	8,557		69,251
Forfeited	_			
Earned and Issued	=		<u>(13,842)</u>	(2,808)
Balance - End of Year	<u>8,557</u>	<u>8,557</u>	<u>55,409</u>	69,251

On August 10, 2005, the shareholders of the Company approved the establishment of the Home Federal Bancorp, Inc. of Louisiana 2005 Stock Option Plan (the 2005 Option Plan) for the benefit of directors, officers, and other employees. The aggregate number of shares of common stock reserved for issuance under the Option Plan totaled 158,868 (as adjusted for the conversion described in Note 1). Both incentive stock options and non-qualified stock options may be granted under the plan.

On December 23, 2011, the shareholders of the Company approved the establishment of the Home Federal Bancorp, Inc. of Louisiana 2011 Stock Option Plan (the 2011 Option Plan, together with the 2005 Option Plan, the Option Plan) for the benefit of directors, officers, and other employees. The aggregate number of shares of common stock reserved for issuance under the 2011 Option Plan totaled 194,522. Both incentive stock options and non-qualified stock options may be granted under the Option Plan. As of June 30, 2013, 169,235 options had been granted under the 2011 Option Plan.

On August 18, 2005, the Company granted 158,858 options (as adjusted for the conversion described in Note 1), to directors and employees. Under the 2005 Option Plan, the exercise price of each option cannot be less than the fair market value of the underlying common stock as of the date of the option grant, which was \$10.82 (as adjusted), and the maximum term is ten years. On August 19, 2010, the Company granted 21,616 options under the 2005 Option Plan that were previously forfeited (as adjusted for the conversion), at an exercise price of \$10.93 per share. On January 31, 2012, 169,234 options were granted to directors and employees at an exercise price of \$14.70 per share under the 2011 Option Plan.

Incentive stock options and non-qualified stock options granted under the Option Plan become vested and exercisable at a rate of 20% per year over five years, commencing one year from the date of the grant, with an additional 20% vesting on each successive anniversary of the date the option was granted. No vesting shall occur after an employee's employment or service as a director is terminated. As of June 30, 2013, 2,133 and 25,288 stock options were available for future grant under the 2005 Option Plan and the 2011 Option Plan, respectively. In the event of death or disability of an employee or director or change in control of the Company, the unvested options shall become vested and exercisable.

Notes to Consolidated Financial Statements

Note 13. Stock-Based Compensation (Continued)

Following is a summary of the status of the Option Plan (as adjusted for the conversion) during the fiscal years ended June 30, 2013 and 2012:

			Weighted	
		Weighted	Average	
		Average	Remaining	Aggregate
	Number of	Exercise	Contract	Intrinsic
	Shares	Price	Term	Value
Outstanding at June 30, 2012	334,822	\$13.08		
Granted				
Exercised	(70,325)	10.93		
Forfeited				
Outstanding at June 30, 2013	<u> 264,497</u>	\$ <u>13.64</u>	<u>_7.24</u>	\$ <u>977,321</u>
Options Exercisable at June 30, 2013	<u>88,720</u>	\$ <u>12.22</u>	<u>4.94</u>	\$ <u>454,674</u>
Outstanding at June 30, 2011	158,868	\$10.83		
Granted	194,522	14.70		
Exercised	(18,568)	10.82		
Forfeited				
Outstanding at June 30, 2012	334,822	\$ <u>13.08</u>	<u>7.21</u>	\$ <u>561,000</u>
Options Exercisable at June 30, 2012	<u>120,875</u>	\$ <u>10.82</u>	<u>3.31</u>	\$ <u>475,000</u>

The fair value of each option granted is estimated on the grant date using the Black-Scholes model. The following assumptions were made in estimating fair value. The fair value has been adjusted for the exchange ratio as a result of the second-step conversion:

	2011 Option Plan	2005 Option Plan
Dividend Yield	1.65%	2.0%
Expected Term	10 years	10 Years
Risk-Free Interest Rate	1.83%	4.13%
Expected Life	10 years	10 Years
Expected Volatility	29.74%	8.59%

A summary of the status of the Company's nonvested options as of June 30, 2013, and changes during the year ended June 30, 2013, is as follows:

		Weighted Average
	Number of Shares	Exercise Price
Nonvested at June 30, 2012	213,947	\$14.36
Granted Vested	(38,170)	 14.27
Forfeited Nonvested at June 30, 2013	<u></u> <u>175,777</u>	\$ <u>14.37</u>

The Company recognizes compensation expense during the vesting period based on the fair value of the option on the date of the grant. At June 30, 2013 and 2012, compensation expense charged to operations was \$166,000 and \$74,000, respectively.

Notes to Consolidated Financial Statements

Note 14. Off-Balance Sheet Activities

Credit Related Financial Instruments

The Bank is a party to credit related financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments consist primarily of commitments to extend credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets.

The Bank's exposure to credit loss in the event of non-performance by the other party to loan commitments is represented by the contractual amount of the commitment. The Bank follows the same credit policies in making commitments as it does for on-balance sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require a payment of a fee. The commitments for equity lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount and type of collateral obtained, if deemed necessary by the Bank upon extension of credit, varies and is based on management's credit evaluation of the counterparty.

No material gains or losses are anticipated as a result of these transactions.

At June 30, 2013 and 2012, the following financial instruments were outstanding:

	Contract Amount	
	2013	2012
	(In Tho	usands)
Commitments to Grant Loans Unfunded Commitments Under Lines of Credit	\$29,071 <u>8,063</u> \$ <u>37,134</u>	\$23,682 <u>6,557</u> \$ <u>30,239</u>
Fixed Rate Loans (3.125% - 5.75% in 2013; 2.75% - 3.88% in 2012) Variable Rate Loans	\$37,134 \$ <u>37,134</u>	\$30,239 \$ <u>30,239</u>

Cash Deposits

The Company periodically maintains cash balances in financial institutions that are in excess of insured amounts. The Company has not experienced any losses and does not believe that significant credit risk exists as a result of this practice.

Regional Credit Concentration

A substantial portion of the Bank's lending activity is with customers located within a 100 mile radius of the Shreveport, Louisiana metropolitan area, which includes areas of northwest Louisiana, northeast Texas and southwest Arkansas. Although concentrated within the region, the Bank has a diversified loan portfolio, which should preclude the Bank from being dependent upon the well being of any particular economic sector to ensure collectability of any significant portion of its debtors' loan contracts.

Other Credit Concentrations

The Bank has purchased, with recourse from the seller, a significant number of loans from third-party mortgage originators. These loans are serviced by these entities. At June 30, 2013 and 2012, the balance of the loans outstanding being serviced by these entities was \$8.3 million and \$8.7 million, respectively.

Notes to Consolidated Financial Statements

Note 14. Off-Balance Sheet Activities (Continued)

Credit Related Financial Instruments (Continued)

Interest Rate Floors and Caps

The Bank writes interest rate floors and caps into its variable rate mortgage loan contracts and loan servicing agreements in an attempt to manage its interest rate exposure. Such floors and caps enable customers to transfer, modify, or reduce their interest rate risk, which, in turn, creates an off-balance sheet market risk to the Bank. At June 30, 2013, the Bank's loan portfolio contained approximately \$10.2 million of loans in which the loan contracts or servicing agreements possessed interest rate floors and caps. Of this amount, \$8.3 million consisted of purchased loans, which were originated by third-party mortgage originators.

Note 15. Related Party Events

In the ordinary course of business, the Bank makes loans to its directors and officers. These loans are made on substantially the same terms and conditions, including interest rates and collateral, as those prevailing at the same time for comparable transactions with other customers, and do not involve more than normal credit risk or present other unfavorable features.

An analysis of the activity in loans made to such borrowers (both direct and indirect), including lines of credit, is summarized as follows for the years ended June 30, 2013 and 2012:

	2013	2012	
	(In Thousands)		
Balance – Beginning of Year Additions Principal Payments	\$1,919 1,197 (1,751)	\$1,710 1,189 <u>(980</u>)	
Balance – End of Year	\$ <u>1,365</u>	\$ <u>1,919</u>	

Deposits from related parties held by the Bank at June 30, 2013 and 2012, amounted to \$2.5 million and \$1.3 million, respectively.

Note 16. Regulatory Matters

The Bank is subject to various regulatory capital requirements administered by federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly other discretionary actions by regulators that, if undertaken, could have a direct material effect on the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital requirements that involve quantitative measures of the Bank's assets, liabilities, and certain off-balance-sheet items, as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

The Bank is required to maintain minimum capital ratios under OCC regulatory guidelines in order to ensure capital adequacy. Management believes, as of June 30, 2013 and 2012, that the Bank met all OCC capital adequacy requirements to which it is subject.

Notes to Consolidated Financial Statements

Note 16. Regulatory Matters (Continued)

As of June 30, 2013, the most recent notification from the Office of Thrift Supervision, the Bank's predecessor regulator to the OCC, categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum capital ratios, which are different than those required to meet OCC capital adequacy requirements.

There are no conditions or events since that notification that management believes may have changed the Bank's category. The Bank was also classified as well capitalized at June 30, 2012.

The Bank's actual and required capital amounts and ratios for OCC regulatory capital adequacy purposes are presented below as of June 30, 2013 and 2012:

		Act	ual	Required for Adequacy Po	•
		Amount	Ratio	Amount	Ratio

Note 17. Restrictions on Dividends

Federal banking regulations place certain restrictions on dividends paid by the Bank to the Company. The total amount of dividends which may be paid is generally limited to the net income of the Bank for the year to date, plus the retained net income for the preceding two years.

Notes to Consolidated Financial Statements

Note 18. Fair Value Disclosures

The following disclosure is made in accordance with the requirements of ASC 825, Financial Instruments. Financial instruments are defined as cash and contractual rights and obligations that require settlement, directly or indirectly, in cash. In cases where quoted market prices are not available, fair values have been estimated using the present value of future cash flows or other valuation techniques. The results of these techniques are highly sensitive to the assumptions used, such as those concerning appropriate discount rates and estimates of future cash flows, which require considerable judgment. Accordingly, estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current settlement of the underlying financial instruments.

ASC 825 excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements. These disclosures should not be interpreted as representing an aggregate measure of the underlying value of the Company.

The following methods and assumptions were used by the Bank in estimating fair values of financial instruments:

Cash and Cash Equivalents

The carrying amount approximates the fair value of cash and cash equivalents.

Securities to be Held-to-Maturity and Available-for-Sale

Fair values for investment securities, including mortgage-backed securities, are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments. The carrying values of restricted or non-marketable equity securities approximate their fair values. The carrying amount of accrued investment income approximates its fair value.

Mortgage Loans Held-for-Sale

Because these loans are normally disposed of within ninety days of origination, their carrying value closely approximates the fair value of such loans.

Loans Receivable

For variable-rate loans that re-price frequently and with no significant changes in credit risk, fair value approximates the carrying value. Fair values for other loans are estimated using the discounted value of expected future cash flows. Interest rates used are those being offered currently for loans with similar terms to borrowers of similar credit quality. The carrying amount of accrued interest receivable approximates its fair value.

Deposit Liabilities

The fair values for demand deposit accounts are, by definition, equal to the amount payable on demand at the reporting date, that is, their carrying amounts. Fair values for other deposit accounts are estimated using the discounted value of expected future cash flows. The discount rate is estimated using the rates currently offered for deposits of similar maturities.

Advances from Federal Home Loan Bank

The carrying amount of short-term borrowings approximates their fair value. The fair value of long-term debt is estimated using discounted cash flow analyses based on current incremental borrowing rates for similar borrowing arrangements.

Notes to Consolidated Financial Statements

Note 18. Fair Value Disclosures (Continued)

Off-Balance Sheet Credit-Related Instruments

Fair values for outstanding mortgage loan commitments to lend are based on fees currently charged to enter into similar agreements, taking into account the remaining term of the agreements, customer credit quality, and changes in lending rates.

The fair value of interest rate floors and caps contained in some loan servicing agreements and variable rate mortgage loan contracts are considered immaterial within the context of fair value disclosure requirements. Accordingly, no fair value estimate is provided for these instruments.

At June 30, 2013 and 2012, the carrying amount and estimated fair values of the Bank's financial instruments were as follows:

	2013		2012	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
		(In Tho	usands)	
Financial Assets				
Cash and Cash Equivalents	\$ 3,685	\$ 3,685	\$ 34,863	\$ 34,863
Securities Available-for-Sale	47,961	47,961	68,426	68,426
Securities to be Held-to-Maturity	1,465	1,465	1,381	1,381
Loans Held-for-Sale	3,464	3,464	11,157	11,157
Loans Receivable	206,079	206,055	168,263	170,138
Financial Liabilities				
Deposits	211,922	211,130	221,436	225,651
Advances from FHLB	21,662	22,045	23,469	24,097
Off-Balance Sheet Items				
Mortgage Loan Commitments	291	291	237	237

The estimated fair values presented above could be materially different than net realizable value and are only indicative of the individual financial instrument's fair value. Accordingly, these estimates should not be considered an indication of the fair value of the Bank taken as a whole.

The Company follows the guidance of ASC 820, Fair Value Measurements. ASC 820 establishes a framework for measuring fair value and expands disclosures about fair value measurements. This standard was issued to establish a uniform definition of fair value. The definition of fair value under ASC 820 is market-based as opposed to company-specific, and includes the following:

- Defines fair value as the price that would be received to sell an asset or paid to transfer a liability, in either case, through an orderly transaction between market participants at a measurement date and establishes a framework for measuring fair value;
- Establishes a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date;
- Nullifies the guidance in EITF 02-3, which required the deferral of profit at inception of a transaction involving a derivative financial instrument in the absence of observable data supporting the valuation technique;

Notes to Consolidated Financial Statements

Note 18. Fair Value Disclosures (Continued)

- Eliminates large position discounts for financial instruments quoted in active markets and requires consideration of the company's creditworthiness when valuing liabilities; and
- Expands disclosures about instruments that are measured at fair value.

The standard establishes a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy favors the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

- Level 1 Fair value is based upon quoted prices (unadjusted) for identical assets or liabilities in active markets in which the Company can participate.
- Level 2 Fair value is based upon (a) quoted prices for similar assets or liabilities in active markets; (b) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly; (c) inputs other than quoted prices that are observable for the asset or liability; or (d) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 Fair value is based upon inputs that are unobservable for the asset or liability. These inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available in the circumstances, which include the Company's own data. The Company's own data used to develop unobservable inputs are adjusted if information indicates that market participants would use different assumptions.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The preceding methods described may produce a fair value calculation that may not be indicative of the net realizable value or reflective of future fair values. Furthermore, although the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. There have been no changes in the methodologies used during the year ended June 30, 2013.

Notes to Consolidated Financial Statements

Note 18. Fair Value Disclosures (Continued)

Fair values of assets and liabilities measured on a recurring basis at June 30, 2013 and 2012, are as follows:

		Fair Value Me	asurements

Notes to Consolidated Financial Statements

Note 19. Earnings Per Common Share

The following table presents the components of average outstanding common shares for the years ended June 30, 2013 and 2012:

	2013	2012
Average Common Shares Issued	3,062,386	3,054,148
Average Treasury Shares Held	(486,627)	(36,985)
Average Unearned ESOP Shares	(173,374)	(184,904)
Average Unearned RRP Trust Shares	<u>(72,082</u>)	(32,314)
Weighted Average Number of Common		
Shares Used in Basic EPS	<u>2,330,303</u>	<u>2,799,945</u>
Effect of Dilutive Securities		
Stock Options	<u>64,214</u>	18,130
Weighted Average Number of Common		
Shares and Dilutive Potential Common		
Shares Used in Dilutive EPS	<u>2,394,517</u>	<u>2,818,075</u>

Earnings per share are computed using the weighted average number of shares outstanding as prescribed in GAAP. The share amounts have been adjusted for the conversion completed on December 22, 2010 and the exchange of Mid-Tier Company common stock for shares of the Company at an exchange ratio of 0.9110. For the years ended June 30, 2013 and 2012, there were outstanding options to purchase 264,497 and 334,822 shares, respectively, at \$13.64 per share for 2013 and \$13.08 per share for 2012.

Note 20. Subsequent Events

In accordance with FASB ASC 855, Subsequent Events, the Company has evaluated subsequent events through the date that the financial statements were available to be issued.

No events or transactions have occurred subsequent to the balance sheet date that would require recognition or disclosure in the financial statements.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

- (a) Our management evaluated, with the participation of our principal executive officer and principal financial officer, the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on such evaluation, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and regulations and are operating in an effective manner.
- (b) Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements prepared for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in Internal Control — Integrated Framework, management concluded that our internal control over financial reporting was effective as of June 30, 2013.

(c) No change in the Company's internal control over financial reporting (as defined in rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

Item 9B. Other Information

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required herein is incorporated by reference from the sections captioned "Information with Respect to Nominees for Director, Continuing Directors and Executive Officers" and "Beneficial Ownership of Common Stock by Certain Beneficial Owners and Management -Section 16(a) Beneficial Ownership Reporting Compliance" in the Registrant's Proxy Statement to be filed with the Securities and Exchange Commission within 120 days of June 30, 2013 ("Proxy Statement").

Code of Ethics. Home Federal Bancorp has adopted a Code of Ethics that applies to its principal executive officer and principal financial officer, as well as directors, other officers and employees of Home Federal Bancorp and Home Federal Bank. A copy of the Code of Ethics may be obtained without charge upon request made to Clyde D. Patterson, Home Federal Bancorp, Inc., 624 Market Street, Shreveport, Louisiana 71101.

Item 11. Executive Compensation

The information required herein is incorporated by reference from the section captioned "Management Compensation" in the Proxy Statement to be filed with the Securities and Exchange Commission within 120 days of June 30, 2013.

<u>Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters</u>

Security Ownership of Certain Beneficial Owners and Management. The information required herein is incorporated by reference from the section captioned "Beneficial Ownership of Common Stock by Certain Beneficial Owners and Management" in the Proxy Statement to be filed with the Securities and Exchange Commission within 120 days of June 30, 2013.

Equity Compensation Plan Information. The following table provides information as of June 30, 2013 with respect to shares of common stock that may be issued under our existing equity compensation plans, which consist of the 2005 and 2011 Stock Option Plans and 2005 and 2011 Recognition and Retention Plans, all of which were approved by our shareholders.

CERTIFICATIONS

I, Daniel R. Herndon, Chief Executive Officer, certify that:

- 1. I have reviewed this annual report on Form 10-K of Home Federal Bancorp, Inc. of Louisiana;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
