PART II — OFFERING CIRCULAR

ITEM 3. SUMMARY INFORMATION, RISK FACTORS AND DILUTION

Investing in the Company's Securities is very risky. You should be able to bear a complete loss of your investment. You should carefully consider the following factors, including those listed in this Securities Offering.

Dairy Production Industry Risks

Dairy Production investments are subject to varying degrees of risk. The yields available from equity investments in Dairy Product Production Companies depends on the amount of income earned and capital appreciation generated by the Company as well as the expenses incurred in connection therewith. If any of the Company's products does not generate income sufficient to meet operating expenses, the Company's Common Stock value could adversely be affected. Income from, and the value of, the Company's Products and/or Assets may be adversely affected by the general economic climate, the Dairy Products Market conditions such as oversupply of related products or a reduction in demand for Dairy Products in the areas in which the Company's Products and/or Assets are located, competition from other Dairy Products suppliers, and the Company's ability to provide adequate Dairy Products. Revenues from the Company's Products and/or Assets are also affected by such factors such as the costs of production and local economic market conditions.

Because Dairy Production Company investments are relatively illiquid, the Company's ability to vary its Products and/or Asset portfolio promptly in response to economic or other conditions is limited. The relative illiquidity of its holdings could impede the Company's ability to respond to adverse changes in the performance of its Products and/or Assets. No assurance can be given that the fair market value of the assets produced or acquired by the Company will not decrease in the future. Investors have no right to withdrawal their equity commitment or require the Company to repurchase their respective Common Stock interests and the transferability of the Common Stock Units is limited. Accordingly, investors should be prepared to hold their investment interest until the Company is dissolved and its assets are liquidated.

Development Stage Business

Omega Creamery, LLC commenced operations in January of 2012 as a Wyoming Limited Liability Company. The Company was initially named "SuperNatural Nutrition, LLC", and the Company name was changed to "Omega Creamery, LLC" in January of 2013. The Company was then reorganized in October of 2013 as a California Limited Liability Company and converted to a California Stock Corporation in May of 2014. Accordingly, the Company has only a limited history upon which an evaluation of its prospects and future performance can be made. The Company's proposed operations are subject to all business risks associated with new enterprises. The likelihood of the Company's success must be considered in light of the problems, expenses, difficulties, complications, and delays frequently encountered in connection with the expansion of a business, operation in a competitive industry, and the continued development of advertising, promotions and a corresponding customer base. There is a possibility that the Company could sustain losses in the future. There can be no assurances that Omega Creamery Corporation will operate profitably.

Inadequacy of Funds

Gross offering proceeds of a maximum of \$5,000,000 may be realized. Management believes that such proceeds will capitalize and sustain the Company sufficiently to allow for the implementation of the Company's Business Plans. If only a fraction of this Offering is sold, or if certain assumptions contained in Management's business plans prove to be incorrect, the Company may have inadequate funds to fully develop its business.

Competition

Competition exists for Dairy related products in most markets, including all sectors in which the Company intends to operate. The Company may be competing for sales with entities that have substantial greater economic and personnel resources than the Company or better relationships with suppliers and other Dairy Product industry related professionals. These entities may also generally be able to accept more risk than the Company can manage. Competition from other Companies in the Dairy Products Marketplace may reduce the number of suitable prospective retailer, distributor or wholesale sales opportunities.

Changes in Consumer Preferences and Distribution Channels could Decrease our Revenues and Cash Flow.

We are subject to the risk of:

- Evolving consumer preferences and nutritional and health-related concerns; and
- Changes in food distribution channels, such as consolidation of the supermarket industry and other retail outlets that result in a smaller customer base and intensify the competition for fewer customers.

To the extent that consumer preference evolves away from products that we produce for health or other reasons, and we are unable to create new products that satisfy new consumer preferences, there will be a decreased demand for our products. There has been a recent trend toward consolidation among food retailers which we expect to continue. As a result, these food retailers are selecting product suppliers who can meet their needs nationwide. If we are not selected by these food retailers for one or more of our products, our sales volumes could be significantly reduced. In addition, national distributors or regional food brokers could choose not to carry our products. Any shift in consumer preferences away from our products could decrease our revenues and cash flow and impair our ability to fulfill our obligations and operate our business.

Increased Energy and Gas Costs could Increase our Expenses and Reduce our Profitability

We require a substantial amount of electricity, natural gas and gasoline to manufacture, store and transport our products. The prices of electricity, natural gas and gasoline fluctuate significantly over time. Many of our products compete based on price and we may not be able to pass on increased costs of production, storage or transportation to our customers. As a result, increases in the cost of electricity, natural gas or gasoline could substantially harm our business and results of operations.

Outbreaks of disease can reduce our net sales and operating margins

The productivity of our business depends on animal and crop health on disease control.

We face the risk of outbreaks of mad cow disease, which could lead to the destruction of beef cattle and dairy cows and decreased demand for dairy and beef products. If this occurs, we would also face reduced milk supply and increased cost to produce our dairy products, which could reduce our sales and operating margins.

We face the risk of outbreaks of foot-and-mouth disease, which could lead to a massive destruction of cloven-hoofed animals such as dairy cattle, beef cattle, swine, sheep and goats and significantly reduce the demand for our products. Because foot-and-mouth disease is highly contagious and destructive to susceptible livestock, any outbreak of foot-and-mouth disease could result in the widespread destruction of all potentially infected livestock. Our operations could suffer as a result of decreased demand for our products. If this happens, we could also have difficulty procuring the milk we need for our dairy operations and incur increased cost to produce our dairy products, which could reduce our sales and operating margins.

Our Operations are Subject to Numerous Laws and Regulations, Exposing us to Potential Claims and Compliance Costs that could Adversely Affect our Business

We are subject to Federal, State, and Local Laws and Regulations relating to the manufacturing, labeling, packaging, health and safety, sanitation, quality control, fair trade practices, and other aspects of our business. In addition, zoning, construction and operating permits are required from governmental agencies which focus on issues such as land use, environmental protection, and waste management. These laws and regulations may, in certain instances, affect our ability to develop and market new products and to utilize technological innovations in our business. In addition, changes in these rules might increase the cost of operating our facilities or conducting our business which would adversely affect our finances.

Product Liability Claims or Product Recalls could Adversely Affect our Business Reputation and Expose us to Increased Scrutiny by Federal and State Regulators

The sale of food products for human consumption involves the risk of injury to consumers. Such hazards could result from:

- Tampering by unauthorized third parties;
- Product contamination (such as Listeria and Salmonella) or spoilage;
- The presence of foreign objects, substances, chemicals, and other agents;
- Residues introduced during the growing, storage, handling or transportation phases, or

- Improperly formulated products which either do not contain the proper mixture or ingredients or which otherwise do not have the proper attributes.

Some of the products we sell now or in the future, may be produced for us by third parties, or contain inputs manufactured by third parties, and such third parties may not have adequate quality control standards to assure that such products are not adulterated, misbranded, contaminated or otherwise defective. In addition, we may license our "Omega Creamery" Brand for use on products produced and marketed by third parties, for which we will receive royalties. We may be subject to claims made by consumers as a result of products manufactured by these third parties which may be marketed under our brand name(s).

Consumption of our products may cause serious health-related illnesses and we may be subject to claims or lawsuits relating to such matters. Even an inadvertent shipment of adulterated products is a violation of law and may lead to an increased risk of exposure to product liability claims, product recalls and increased scrutiny by Federal and State Regulatory Agencies. Such claims or liabilities may not be covered by our insurance or by any rights of indemnity or contribution which we may have against others in the case of products which are produced by third parties. In addition, even if a product liability claim is not successful or is not fully pursued, the negative publicity surrounding any assertion that our products caused illness or injury could have a material adverse affect on our reputation with existing and potential customers and on our brand image.

Dependence on Management

In the early stages of development the Company's business will be significantly dependent on the Company's management team. The Company's success will be particularly dependent upon the services of:

- Mr. John Schindler, the Company's Founder, Formulator and Chief Executive Officer
- Mr. Steven Michael Ehlinger II, Chief Financial Officer
- Mr. Hans Fastre, Chief Operations Officer
- Mr. Gary Smith, Process Engineer
- Mr. Randy Denny, Director of Marketing
- Mr. Juan Garcia, Kitchen Manager

Risks of Borrowing

Although the Company does not intend to incur any additional debt from the investment commitments provided in this offering, should the company obtain secure bank debt in the future, possible risks could arise. If the Company incurs additional indebtedness, a portion of the Company's cash flow will have to be dedicated to the payment of principal and interest on such new indebtedness. Typical loan agreements also might contain restrictive covenants, which may impair the Company's operating flexibility. Such loan agreements would also provide for default under certain circumstances, such as failure to meet certain financial covenants. A default under a loan agreement could result in the loan becoming immediately due and payable and, if unpaid, a judgment in favor of such lender which would be senior to the rights of members of the Company. A judgment creditor would have the right to foreclose on any of the Company's assets resulting in a material adverse effect on the Company's business, operating results or financial condition.

Unanticipated Obstacles to Execution of the Business Plan

The Company's business plans may change significantly. Many of the Company's potential business endeavors are capital intensive and may be subject to statutory or regulatory requirements. Management believes that the Company's chosen activities and strategies are achievable in light of current economic and legal conditions with the skills, background, and knowledge of the Company's principals and advisors. Management reserves the right to make significant modifications to the Company's stated strategies depending on future events.

Management Discretion as to Use of Proceeds

The net proceeds from this Offering will be used for the purposes described under "Use of Proceeds." The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated which it deems to be in the best interests of the Company and its Investors in order to address changed circumstances or opportunities. As a result of the foregoing, the success of the Company will be substantially dependent upon the discretion and judgment of Management with

respect to application and allocation of the net proceeds of this Offering. Investors for the Units offered hereby will be entrusting their funds to the Company's Management, upon whose judgment and discretion the investors must depend.

Minimum Amount of Capital to be Raised

The minimum amount of Securities that need to be sold in this offering for the Company to access the investment funds is \$50,000. After the Minimum Amount of Capital required to be reached, all Investor funds will be transferred from the Company's Investment Holding Account to the Company. The Company cannot assure you that subscriptions for the entire Offering will be obtained. The Company has the right to terminate this offering of Securities at any time, regardless of the number of Securities that have sold. The Company's ability to meet financial obligations, cash needs, and to achieve objectives, could be adversely affected if the entire offering of Securities is not fully subscribed.

Management Discretion as to Use of Proceeds

The net proceeds from this Offering will be used for the purposes described under "Use of Proceeds." The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated which it deems to be in the best interests of the Company and its Investors in order to address changed circumstances or opportunities. As a result of the foregoing, the success of the Company will be substantially dependent upon the discretion and judgment of Management with respect to application and allocation of the net proceeds of this Offering. Investors for the Units offered hereby will be entrusting their funds to the Company's Management, upon whose judgment and discretion the investors must depend.

Unanticipated Obstacles to Execution of the Business Plan

The Company's business plans may change significantly. Many of the Company's potential business endeavors are capital intensive and may be subject to statutory or regulatory requirements. Management believes that the Company's chosen activities and strategies are achievable in light of current economic and legal conditions with the skills, background, and knowledge of the Company's principals and advisors. Management reserves the right to make significant modifications to the Company's stated strategies depending on future events.

Control by Management

As of May 1st, 2014 the Company's Managers owned approximately 56% of the Company's outstanding Common Stock Units and 0% of the Company's Preferred Stock Units. Upon completion of this Offering, The Company's Management will own approximately 56% of the outstanding Common Stock Units of the Company and 0% of the outstanding Preferred Stock Units of the Company. Investors will not have the ability to control either a vote of the Company's Managers or any appointed officers. See "COMPANY MANAGERS" section.

Return of Profits

The Company has never declared or paid any cash dividends on its Common Stock. The Company currently intends to retain future earnings, if any, to finance the expansion of the Company's Operations and Holdings. As a result, the Company does not anticipate paying any cash dividends to its Common Stock Holders for the foreseeable future.

No Assurances of Protection for Proprietary Rights; Reliance on Trade Secrets

In certain cases, the Company may rely on trade secrets to protect intellectual property, proprietary technology and processes, which the Company has acquired, developed or may develop in the future. There can be no assurances that secrecy obligations will be honored or that others will not independently develop similar or superior products or technology. The protection of intellectual property and/or proprietary technology through claims of trade secret status has been the subject of increasing claims and litigation by various companies both in order to protect proprietary rights as well as for competitive reasons even where proprietary claims are unsubstantiated. The prosecution of proprietary claims or the defense of such claims is costly and uncertain given the uncertainty and rapid development of the principles of law pertaining to this area. The Company, in common with other investment funds, may also be subject to claims by other parties with regard to the use of intellectual property, technology information and data, which may be deemed proprietary to others.

The Company's Continuing as a Going Concern Depends Upon Financing

If the Company does not raise sufficient working capital and continues to experience pre-operating losses, there will most likely be substantial doubt as to its ability to continue as a going concern. Because the Company has generated no revenue, all expenditures during the development stage have been recorded as pre-operating losses. Revenue operations have not commenced because the Company has not raised the necessary capital.

Broker - Dealer Sales of Units

The Company's Preferred Stock Units and Common Stock Units are not included for trading on any exchange, and there can be no assurances that the Company will ultimately be registered on any exchange. The NASDAQ Stock Market, Inc. has recently enacted certain changes to the entry and maintenance criteria for listing eligibility on the NASDAQ SmallCap Market. The entry standards require at least \$4 million in net tangible assets or \$750,000 net income in two of the last three years. The proposed entry standards would also require a public float of at least 1 million shares, \$5 million value of public float, a minimum bid price of \$2.00 per share, at least three market makers, and at least 300 shareholders. The maintenance standards (as opposed to entry standards) require at least \$2 million in net tangible assets or \$500,000 in net income in two of the last three years, a public float of at least 500,000 shares, a \$1 million market value of public float, a minimum bid price of \$1.00 per share, at least two market makers, and at least 300 shareholders.

No assurance can be given that the Preferred Stock or Common Stock Units of the Company will ever qualify for inclusion on the NASDAQ System or any other trading market until such time as the Managing Members deem it necessary. As a result, the Company's Preferred Stock Units and Common Stock Units are covered by a Securities and Exchange Commission rule that opposes additional sales practice requirements on broker-dealers who sell such securities to persons other than established customers and qualified investors. For transactions covered by the rule, the broker-dealer must make a special suitability determination for the purchaser and receive the purchaser's written agreement to the transaction prior to the sale. Consequently, the rule may affect the ability of broker-dealers to sell the Company's securities and will also affect the ability of members to sell their units in the secondary market.

Secondary Market

No application is currently being prepared for the Company's Securities to be admitted to the Official Listing and trading on any regulated market. No application is being prepared to include the Securities to trading on an "Over-the-Counter" or "Open Market", though the Company intends to submit an S-1 or Form 10 Filing within TWELVE MONTHS of the close of this securities offering. There can be no assurance that a liquid market for the Securities will develop or, if it does develop, that it will continue. If a market does develop, it may not be liquid. Therefore, investors may not be able to sell their Securities easily or at prices that will provide them with yield comparable to similar investments that have a developed secondary market. Illiquidity may have a **severely adverse effect on the market value of the Securities and investors wishing to sell the Securities might therefore suffer losses.**

Certain Factors Related to Our Common Stock

Because the Company's Common Stock may be considered a "penny stock," and a shareholder may have difficulty selling shares in the secondary trading market.

The Company's Common Stock Securities may be subject to certain rules and regulations relating to "penny stock" (generally defined as any equity security that has a price less than \$5.00 per share, subject to certain exemptions). Broker-dealers who sell penny stocks are subject to certain "sales practice requirements" for sales in certain nonexempt transactions (i.e., sales to persons other than established customers and institutional "qualified investors"), including requiring delivery of a risk disclosure document relating to the penny stock market and monthly statements disclosing recent price information for the penny stocks held in the account, and certain other restrictions. For as long as the Company's Common Stock is subject to the rules on penny stocks, the market liquidity for such securities could be significantly limited. This lack of liquidity may also make it more difficult for the Company to raise capital in the future through sales of equity in the public or private markets.

The price of the Company's Common Stock may be volatile, and a shareholder's investment in the Company's Common Stock could suffer a decline in value.

There could be significant volatility in the volume and market price of the Company's Common Stock, and this volatility may continue in the future. The Company's Common Stock may be listed on the OTCQB, OTCQX, OTCBB, The Bermuda BSX Exchange, the London Stock Exchange's AIM Market, the Canadian TSX Venture Exchange or TMX Exchange, the Irish Stock Exchange, the Frankfurt Stock Exchange and / or the Berlin Stock Exchange, where each has a greater chance for market volatility for securities that trade on these markets as opposed to a national exchange or quotation system. This volatility may be caused by a variety of factors, including the lack of readily available quotations, the absence of consistent administrative supervision of "bid" and "ask" quotations and generally lower trading volume. In addition, factors such as quarterly variations in our operating results, changes in financial estimates by securities analysts or our failure to meet our or their projected financial and operating results, litigation involving us, general trends relating to the Dairy Products Industry, actions by governmental agencies, national economic and stock market considerations as well as other events and circumstances beyond our control could have a significant impact on the future market price of our Common Stock and the relative volatility of such market price.

Compliance with Securities Laws

The Company's Securities are being offered for sale in reliance upon certain exemptions from the registration requirements of the Securities Act, applicable California Securities Laws, and other applicable state securities laws. If the sale of Securities were to fail to qualify for these exemptions, purchasers may seek rescission of their purchases of Securities. If a number of purchasers were to obtain rescission, we would face significant financial demands, which could adversely affect the Company as a whole, as well as any non-rescinding purchasers.

Offering Price

The price of the Securities offered has been arbitrarily established by our current Managers, considering such matters as the state of the Company's business development and the general condition of the industry in which it operates. The Offering price bears little relationship to the assets, net worth, or any other objective criteria.

Lack of Firm Underwriter

The Securities are offered on a "best efforts" basis by the Company Managers, without compensation and on a "best efforts" basis through certain FINRA registered broker-dealers, which enter into Participating Broker-Dealer Agreements with the Company. Accordingly, there is no assurance that the Company, or any FINRA broker-dealer, will sell the maximum Securities offered or any lesser amount.

Projections: Forward Looking Information

Management has prepared projections regarding anticipated financial performance. The Company's projections are hypothetical and based upon a presumed financial performance of the Company, the addition of a sophisticated and well funded marketing plan, and other factors influencing the business. The projections are based on Management's best estimate of the probable results of operations of the Company and the investments made by management, based on present circumstances, and have not been reviewed by independent accountants and/or auditing counsel. These projections are based on several assumptions, set forth therein, which Management believes are reasonable. Some assumptions, upon which the projections are based, however, invariably will not materialize due the inevitable occurrence of unanticipated events and circumstances beyond Management's control. Therefore, actual results of operations will vary from the projections, and such variances may be material. Assumptions regarding future changes in sales and revenues are necessarily speculative in nature. In addition, projections do not and cannot take into account such factors as general economic conditions, unforeseen regulatory changes, the entry into a market of additional competitors, the terms and conditions of future capitalization, and other risks inherent to the Company's business. While Management believes that the projections accurately reflect possible future results of operations, those results cannot be guaranteed.

ITEM 4. PLAN OF DISTRIBUTION

The Website is owned and operated by Alternative Securities Markets Group, an equity partner of the Company, can be viewed at <http://www.AlternativeSecuritiesMarket.com>.

This Offering Circular will be furnished to prospective Investors upon their request via electronic PDF format and will be available for viewing and download 24 hours per day, 7 days per week on the website.

In order to subscribe to purchase the Securities, a prospective Investor must complete, sign and deliver the executed Subscription Agreement, Investor Questionnaire and Form W-9 to **Omega Creamery Corporation** and either mail or wire funds for its subscription amount in accordance with the instructions included in the Subscription Package.

The Investing Section of the Website Hosting this Offering will be coded to only allow access to invest to those prospective Investors that reside in jurisdictions where the Offering is registered and meet any state-specific Investor suitability standards.

The Company reserves the right to reject any Investor's subscription in whole or in part for any reason. If the Offering terminates or if any prospective Investor's subscription is rejected, all funds received from such Investors will be returned without interest or deduction.

In addition to this Offering Circular, subject to limitations imposed by applicable securities laws, we expect to use additional advertising, sales and other promotional materials in connection with this Offering. These materials may include public advertisements and audio-visual materials, in each case only as authorized by the Company. Although these materials will not contain information in conflict with the information provided by this Offering and will be prepared with a view to presenting a balanced discussion of risk and reward with respect to the Securities, these materials will not give a complete understanding of this Offering, the Company or the Securities and are not to be considered part of this Offering Circular. This Offering is made only by means of this Offering Circular and prospective Investors must read and rely on the information provided in this Offering Circular in connection with their decision to invest in the Securities.

ITEM 6. DESCRIPTION OF BUSINESS

A. The Company:

Omega Creamery

Overview Highlights

- Omega Creamery, LLC (the “Company”) makes and sells its “Fully-Functional”, organic line of, plant-based, dairy-free, milk beverages and ice cream desserts and confirmed that there is a true need and demand for the Omega Products.
- OmegaMilk™, the Company’s core products utilize its 4-corner Nutrition System to formulate Omega’s organic & proprietary blend of flax, hemp and rice to deliver high levels of Omega 3s, low sugar, superfood nutrition and probiotics.
 - OmegaMilk™ *delivers this unique point of difference while consistently testing high with consumers on both taste and organoleptics relative to competitive dairy-free milk alternatives.*
- The Company’s products enjoy strong underlying market growth:
 - the plant-based, dairy-free milk category is exhibiting sustained and rapid growth;
 - U.S. retail sales of refrigerated dairy-free milk reached \$1.3 billion in 2011, an 8% CAGR from 2008.
- The Company is ready to capitalize its growth to scale regionally, then nationally.
- The Company has assembled a highly experienced team of Management and Advisors to help guide and support the product roll-out and scalability.

The Company Produces 2 Unique Product Lines That Deliver Deliciously Creamy, Functional Nutrition

**Milk
OmegaMilk™**

- Highly differentiated 3 flavor line
- Tastes more like real dairy
- Over 2500mg/serving of Omega 3
- Low glycemic sweetener
- Creamy and delicious
- Organic, vegan, gluten & dairy free

**Ice Cream
OmegaCream™**

- Innovative delicious superfood flavors
- Made with OmegaMilk™
- Up to 4,500mg/serving of Omega 3
- High transfer rate probiotics
- Creamy and rich like dairy ice cream
- Organic, vegan, gluten & dairy free

Innovative, Highly Differentiated Brand & Product

OmegaMilk™ is the first fully-functional plant-based milk

➤ ***OmegaMilk™ has a clear nutritional advantage***

- A proprietary and uniquely functional blend of omega 3s, low glycemic sweetener, superfood nutrients, probiotics that is organic and vegan.
- Delivers > 2,500mg of Omega 3s per serving (by far the highest Omega 3 content in the plant-based milk category).

➤ ***OmegaMilk™ is overwhelmingly favored by consumers versus current leading dairy-free milk alternatives with respect to both taste and organoleptics (which is the industry term for the overall experience of taste, smell, look, texture and feel.)***

- The product has a uniquely strong, white color that closely resembles milk.
- Initial consumer feedback supports that the OmegaMilk™ texture and mouth feel are as close, if not closer, to milk as any other plant-based, dairy-free milk option.

➤ ***A unique and relevant brand position poised to capitalize on a growing consumer preference for new, innovative plant-based options.***

- Soy pioneered the dairy-free milk category; however, a number of factors related to the loss of consumer demand for GMO Soy products are contributing to soy's rapid decline in market share to new, non-soy entrants (i.e. almond and coconut based milks).
- OmegaMilk's unique focus on the functional benefit provided by its proprietary *blend* may be the best non-soy alternative in the market in regards to the balancing of taste and superior nutrition.

The “Wind is at Our Backs” A confluence of macro trends are driving rapid and sustained growth in the plant-based milk category

➤ **Growing consumer demand for plant-based foods**

- Plant-based foods are increasingly perceived as healthier sources of key nutrients.
- Containing “good fats” with cholesterol and less or no “bad fats”.
- U.S. retail sales of refrigerated dairy-free milk surpassed \$1.3 billion in 2011, 8% to 12% CAGR from 2008.
 - Non-soy dairy-free milks have grown by 45% to 68% per year since 2009.

➤ **Milk consumption is declining**

- Average dairy milk consumption per capita has declined to the lowest rate on record; household penetration of plant-based milk has increased by 35% since 2008 to 23% of U.S. households.
- Factors contributing to this decline include: (i) consumer awareness of the potentially harmful hormones/residues in dairy milk, (ii) growing awareness of Lactose Intolerance in the general U.S. population (est. to be over 60%), and (iii) consumer’s avoiding foods with cholesterol.

➤ **Within the plant-based category, soy is declining**

- Soy has suffered from negative publicity around GMO, protein extraction methods, potential contribution to hormone imbalances, and allergen concerns.

➤ **Omega3 is a strong and growing trend**

- Global consumer demand for Omega 3’s, OmegaMilk™’s core ingredient, is expected to drive over \$2 billion of retail sales in 2012.
- Functional Ingredients magazine writes “*these ingredients [Omega 3s] have unrivaled backing in the form of scientific studies vouching their benefits in cardiovascular health, in fighting inflammation and in infant nutrition.*”

Additional Investment Highlights

➤ *Highly Experienced Executive Leadership*

- The Company is building a highly experienced team of food industry veterans capable of driving national product placement, managing rapid growth, and maximizing ROI.
- The management team has more than 60 years of combined natural & organic foods, mass market retail and consumer packaged goods industry experience.

➤ *OmegaMilk™ is Generating Strong Sales Results Per Point of Placement in Pilot Retail Accounts*

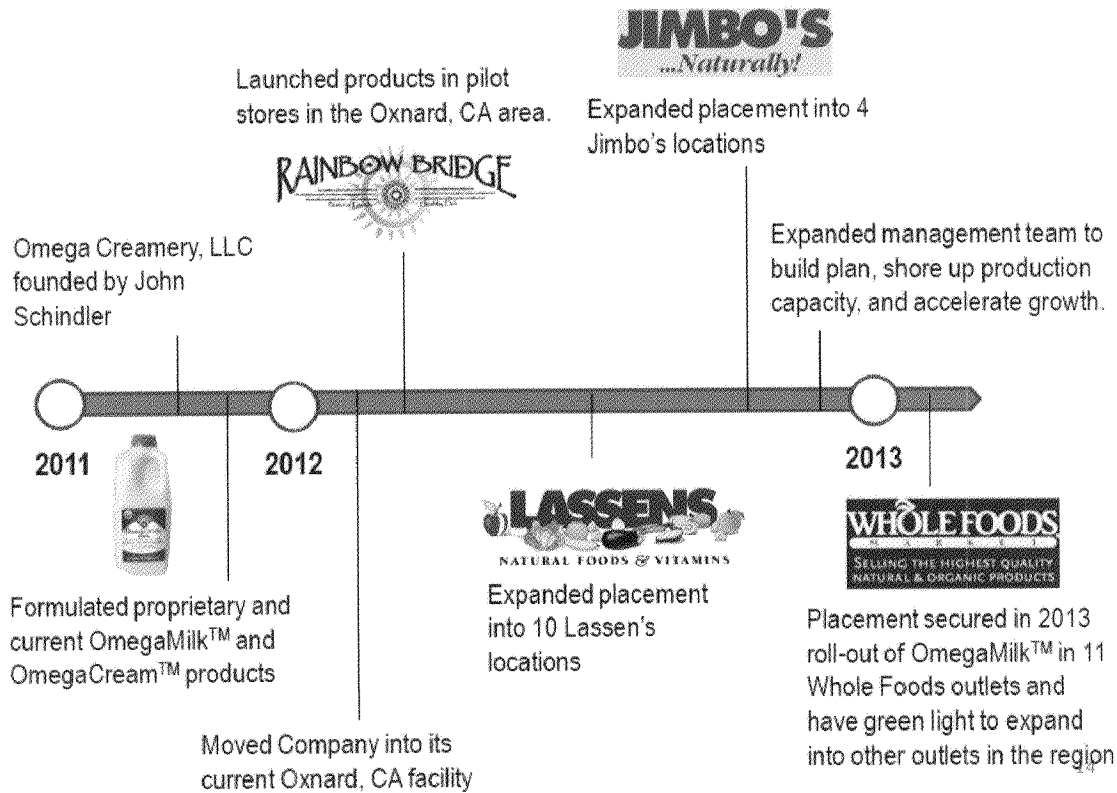

- On average, OmegaMilk™ is turning 1 to 3 cases of OmegaMilk™ per week per SKU at \$4.99 in B+ stores like Whole Foods, Lazy Acres, Jimbo's and Rainbow Bridge.
- If OmegaMilk™ sustained this weekly sales volume velocity at retail (2 cases x \$4.99/unit) throughout the SouthWest region, it would be the #3 item in the SPINs natural retailer channel based on sales per point of placement (among measured SouthWest retail locations by Spins as of 2/11/2012).

➤ *Profitable and Rapidly Scalable Model*

- The Company is targeting competitive pricing that supports strong, highly scalable unit economics.
- By migrating production and fulfillment to 3rd party manufacturers and warehouses, the Company will be able to use its capital most efficiently to support rapid sales growth.

12

The Company has Built Traction Organically Over a Short Period of Time

OmegaMilk™: the Core Driver of Immediate Revenue Growth and Substantive Equity Value

- The Company can leverage its proprietary plant-based and dairy-free OmegaMilk™ blend to create a number of innovative and dairy-free products across a wide range of refrigerated, non-refrigerated, frozen and freeze-dried dairy and food product categories, such as:
 - OmegaCream Bars™, our plant-based and dairy-free ice cream will be made into bars and other desert forms, whipped cream, superfood popsicles.
 - Superfood Smoothies and Shakes that builds on OmegaMilk™ and OmegaCream™, with nutrient dense, superfood ingredients can be sold retail or through juice bars, events and restaurants.
 - The Company's development pipeline includes value added, smaller sized, half-and-half, creamers, muscle-milk and Ensure type nutritional drinks.
 - Baby formulas and nutritional drinks for toddlers and children that taste great.
 - More nutritious freeze-dried "Instant Breakfast" and supplement packets.
 - High Omega 3, plant-based yogurts, Keefers, cheese margarine.

The Refrigerated Dairy-free Milk Market is a Large, Growing Segment of the U.S. Packaged Foods Industry

- U.S. retail sales of refrigerated dairy-free milk surpassed \$1.3 billion in 2011 with an 8% to 15% CAGR since 2008. The non-soy based dairy-free milk category has been growing by 45% to 68% per year since 2009.
- The natural & organic foods channel (per SPINs and Company estimates for retailers not measured by SPINs) represents approximately 9% of the market, with the largest category being conventional retailers measured by SPINs:

- In recent years, plant-based beverages have grown as a percentage of overall milk sales and household penetration (plant based milk sales grew from 4.6% to 6.0% of total milk sales in the U.S. grocery industry between 2008 and 2011).

17

Market Share is Concentrated Amongst the Largest Five Brands

- There are a number of brands in the plant-based, dairy free milk category; As measured by SPINs, the top 5 brands control 97% of the conventional grocery channel:

Company	Brand(s)	SPINs Market Share(1) / Comment
1. WhiteWave Foods	Silk, Alpro	64.2% / market share leader in SPINs conventional.
2. Blue Diamond	Almond Breeze	16.4% / predominantly almond based milks.
3. Private Label	Many	10.4% / many retailers have private label, dairy-free SKUs.
4. Heritage Farms	8 th Continent	3.9% / predominantly soy based milks.
5. Hain-Celestial	Rice Dream	2.5% / formerly owned by Imagine Foods; rice based milks.

Other Competitors:

Turtle Mountain	So Delicious	Strong recent growth; Diverse ingredient base.
CROPP Coop.	Organic Valley	Dairy company that also has organic, soy based milks.
Good Karma	Good Karma	Flax based milk brand, smallest brand in this group.
Califia Farms	Califia Farms	Almond based milk, brand position is California centric.
GFA Brans, Inc.	Earth Balance	Primarily soy based milks but adding SKUs.

OmegaMilk™ Has a Clear Nutritional Advantage Against Even The Largest Brands

- OmegaMilk™ is the organic plant based, dairy-free milk with the highest Omega 3 content, lowest glycemic sweeteners in the category and tastes more like real dairy.

20

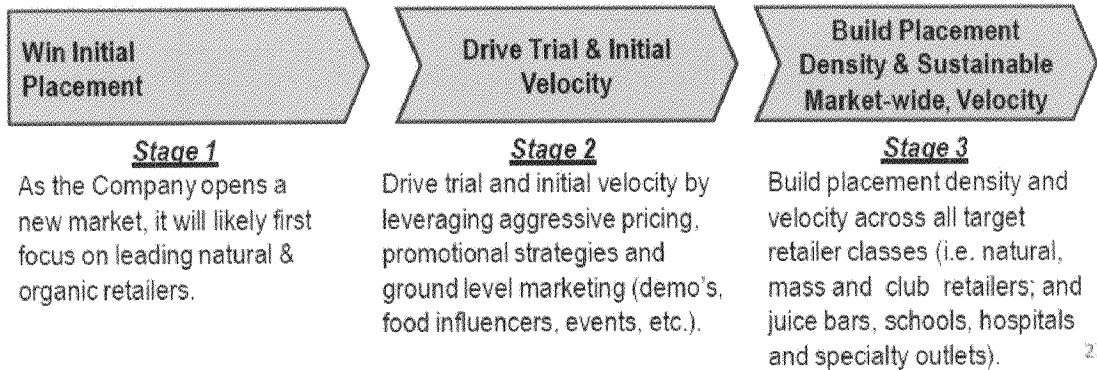

Build Substantive Equity Value by Capturing only 1.5% of the National Plant-based, Dairy Free Milk Category in 5 Years

- The Company's five year goal is to capture one and a half percent of the total U.S. plant-based, dairy free milk market, would exceed our projected numbers:

Step 1 *Building a large base of retail points of distribution* by winning shelf placement of OmegaMilk™ SKUs in major retailers, within target channels, located throughout the U.S.; and,

Step 2 *Driving national consumer awareness of the OmegaMilk™ brand* so that the OmegaMilk™ product achieves sustainable and category leading velocity (sales per point of distribution).

22

Building an Aggressive Sales Organization with Strong, Internal Capabilities that Efficiently Leverage Capital & External Resources

- The Company's sales resources will be led by an internal sales team that will manage and leverage a national network of brokers and distributors.
- Brand ambassadors will be used in each market and will serve as sales and marketing reps that help build placement in market-level retailers, coordinate "plus outs" and "resets" (resetting and taking over shelf space with our products) service key retailers at the store level, and help execute all sampling & in-field marketing.
- Brokers will be utilized to facilitate initial, rapid placement and distribution and provide store level "coverage" within each geographic market to ensure the Company's products are effectively priced, placed and merchandised.
 - Broker costs are estimated to be 5% of net sales, declining to 4% of net sales as the Company's net sales approach \$15-20mm.
- The Company plans to initially target placement in two primary classes of retail trade that generate a large percentage of the plant based, dairy free milk market:
 - Natural & organic retailers (ex: Whole Foods Markets, Sprout's, etc.); and,
 - "Mass" or Conventional retailers (ex: Safeway, Fred Meyer and "gourmet" retailers such as Dean & DeLuca).

23

2013: Build Market # 1 and Achieve the Production Volume Needed to Expand Rapidly and Efficiently in 2014 - 2017

Market # 1 = Southern California

- Year 1 resources are focused on building placement in over 300 outlets in SoCal (Containing over 22 million people, roughly 60% of California's population) primarily, natural and organic retailers such as Whole Foods, Mother's Markets and leading Co-Ops.
- After traction is built in the natural & organic stores and in strategically selected specialty and "mass" retailers, the Company will seek placement in most Southern California "mass" or specialty retailers that have dairy free milk sections.
- The Company believes that by the end of year 1 it will have sufficient placement and velocity in California to attain profitability and capitalize the National Roll-Out

Replicate the Success of Market #1 Nationally in Years 2 - 5 and Expand Footprint to More Than 10,000 Retailer Outlets

- By the end of Year 1, the Company anticipates that it will have the sales volume and shelf velocity to leverage 3rd party distribution partners and ship directly to large, multi-regional retailers who have their own distribution capabilities.
- The Company is projecting to replicate and modularly expand (“Scale”) the success it had from a year 1 and Market #1 sales standpoint as it enters new regions in years 2 - 5 and significantly accelerates revenue growth.
- The following table summarizes the timing and geographic breadth of the Company’s projected region-by-region, national roll-out.

Marketing Strategy – Innovative, Traditional & Non-Traditional
With focus on food influencers, media coverage and social platform.

- A sales strategy focused on market-by-market geographic expansion allows for a targeted marketing strategy focused on innovative initiatives that drive trial and referral, educate the consumer and build strong consumer brand awareness.
- In Year 1, as the Company builds initial placement in Market #1, it's primary marketing channel (in terms of total \$ invested) will be in-store promotions, POS and sampling and referrals from food influencers and nutritionally oriented groups and media; however, as the Company builds placement density, it will also look to leverage additional channels to build the brand and improve velocity.

Potential Marketing Channels

Field Marketing & Events	Public Relations	Retail Displays & Promotions	Social Media & Web Based Channels
Strategic Seeding	In-Store POS	Product Sampling & Education	Cause Related Marketing

Once Consumers Taste OmegaMilk™ and Learn about the Nutritional Profile, They're Hooked!

- The Company will utilize well-trained sampling teams to engage consumers “at the shelf”.
 - Wherever possible, sampling teams will be made up of Company employees (hired as independent contractors).
 - Sampling teams will execute in-store product demonstrations and will be incentivized to hand-out samples and drive consumer trial.
 - These demo's will be primarily focused on natural & organic retailers where such sampling opportunities can sell 2-5 cases of product per 4 hour demo.
 - The demo's will include participating in events (vendor fairs, anniversary events, grand-openings, special events, etc.) organized and promoted by retailer partners.
 - As the Company's placement density and volume grows, the Company will deploy 'in the field' focused sampling programs that will accelerate sampling & consumer trial.

- In addition to traditional sampling, the Company will also leverage “food influencers” to cost efficiently market and distribute samples to consumer groups that align well with the brand's target demographics.
 - “food influencers” include physicians, physical trainers, bloggers, interest groups, and celebrities that can influence the buying behaviors of large consumer groups, such as the Elevate Newsletter, Dr. Dales Newsletter or the TV Talk Radio show, “Here's To Your Health”

Online and Social Outreach is at the Heart of Every Marketing Campaign and Allows the Company to Establish Direct Connections

- Facebook and Twitter are necessary and vital components to the Company's overall marketing strategy (both require little capital investment and generate significant ROI).
 - Strategy: Make consumers and fans feel like they are part of Company's team; incentivize them to share their love of Company with others (generates strong word-of-mouth marketing).
 - Allows the Company to keep content fresh with new material almost daily and provide a personal face to the brand.

Communicate with fans frequently; excite them in a highly personal way
Contests result in tremendous fan response/engagement

Quick two-way/back-and-forth communication with consumers

Track tweets related to products (directly or indirectly) - (e.g. someone tweets about heart disease and Company responds with info on Omega 3s and OmegaMilk™.

Strictly avoid anything that feels like "marketing" or promotion based.

Build credibility as source of 3rd party "expert" information and create network of bloggers focused on similar consumer.

Building a Strong and Scalable Operations Foundation that Supports the Company's Sales & Marketing Initiatives

- The Company's operations team is executing a plan that builds a highly scalable supply, production and distribution chain capable of producing and consistently delivering a delicious and creamy product to a rapidly expanding universe of retailers.
- Today, 100% of operations, including manufacturing and fulfillment, is conducted at the Company's Oxnard, California facility.
 - This facility can produce approximately \$40k/month of products with moderate upgrades.
- To maximize growth, the Company will significantly increase shelf-life, distribution capabilities, deployment and velocity gains through Co-Packing milk in gabled cartons.
- Co-Packing milk will free up capacity for ice cream and other new product SKUs
- Operations will be proactively managed by an experienced internal team.
- The Operations team has a 3 step plan that will increase capacity and shelf-life while maximizing the Company's ability to adjust to sudden volume expansion possibilities, allow for new product development and maximize ROI.

3 Step Successive Supply and Production Capacity Expansion That Supports Profitability and Increasing Shelf Life Demands

- The Company is pursuing a three step, production progression that cost efficiently builds capacity and shelf-life capability as the Company's volume and distribution footprint justify.

Indemnification of Directors and Officers:

The Company is incorporated under the laws of California. California General Corporation Law provides that a corporation may indemnify directors and officers as well as other employees and individuals against expenses including attorneys' fees, judgments, fines and amounts paid in settlement in connection with various actions, suits or proceedings, whether civil, criminal, administrative or investigative other than an action by or in the right of the corporation, a derivative action, if they acted in good faith and in a manner they reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, if they had no reasonable cause to believe their conduct was unlawful. A similar standard is applicable in the case of derivative actions, except that indemnification only extends to expenses including attorneys' fees incurred in connection with the defense or settlement of such actions and the statute requires court approval before there can be any indemnification where the person seeking indemnification has been found liable to the corporation. The statute provides that it is not exclusive of other indemnification that may be granted by a corporation's certificate of incorporation, bylaws, agreement, and a vote of stockholders or disinterested directors or otherwise.

The Company's Certificate of Incorporation provides that it will indemnify and hold harmless, to the fullest extent permitted by California's General Corporation Law, as amended from time to time, each person that such section grants us the power to indemnify.

California's General Corporation Law permits a corporation to provide in its certificate of incorporation that a director of the corporation shall not be personally liable to the corporation or its stockholders for monetary damages for breach of fiduciary duty as a director, except for liability for:

- any breach of the director's duty of loyalty to the corporation or its stockholders;
- acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law;
- payments of unlawful dividends or unlawful stock repurchases or redemptions; or
- any transaction from which the director derived an improper personal benefit.

The Company's Certificate of Incorporation provides that, to the fullest extent permitted by applicable law, none of our directors will be personally liable to us or our stockholders for monetary damages for breach of fiduciary duty as a director. Any repeal or modification of this provision will be prospective only and will not adversely affect any limitation, right or protection of a director of our company existing at the time of such repeal or modification.
