RISK FACTORS

2. List in the order of importance the factors which the Company considers to be the most substantial risks to an investor in this offering in view of all facts and circumstances or which otherwise make the offering one of high risk or speculative.

(1). The Corporation has all substantial risks which have in the foreign exchange markets, the gold markets & the silver markets. If the prediction markets of the Corporation will be wrong, the part or whole fund in trading account will be lost. The Corporation will use leverage to trade foreign exchange, and it is a risks factors.

If the situations will be serious, loses will exceed all fund in the trading account. If the Corporation will lose seriously, the investors who will buy the securities of the Corporation will lose their money.

(2). Our lack of an operating history: the Corporation lacks an operating history, so the investors can't know the ability for running the business by the operating historical data. If the Corporation will lose continually, the investors who will buy the securities of the Corporation will lose their money.

(3). Our lack of an operating history: the managements of the Corporation lack the management's experience in running a public corporation, so the managements of the Corporation maybe make many mistakes while they will be running the Corporation. They maybe charged or penalized by government agencies or SEC for their mistakes, they maybe waste too much time to finish any registering procedures, even make the Corporation will stopped to run its businesses temporary, then the Corporation will lose money.

(4). Our lack of profitable operations in recent periods: the Corporation started to run its business since October 6, 2014, and started to test trading foreign exchange since November 17, 2014. The Corporation didn't have last fiscal year. The Corporation has part period operation in the fourth quarter 2014, so the Corporation lacks its profitable operation in recent periods. The Corporation lacks the profitable operating history, so the investors can't know the profitable ability of the Corporation by the profitable operating historical data. If the Corporation will lose continually, the investors who will buy the securities of the Corporation will lose their money.

(5). Our financial position: as of December 31, 2014, the total assets of the Corporation were \$18,970, the cash and cash equivalents of the Corporation were \$18,970, so the Corporation lacks capital for running its business. If the Corporation will lose continually, it will lose the ability for running its business; the investors who will buy the securities of the Corporation will lose their money, even they can't resale the securities of the Corporation. As of December 31, 2014, the Corporation didn't have any liabilities.

(6). Our lack of sources of additional funding: the Corporation lacks the sources of additional funding. If the Corporation will lose continually, it will lose the ability for running its business; the investors who will buy the securities of the Corporation will lose their money, even they can't resale the securities of the Corporation.

(7). The management beneficially owns a significant portion of the Corporation's securities, it is a risk factor that the management has ability to exercise significant control over the Corporation.

(8). The Corporation dependence on Lansdale Inc, and the risk that this presents. In the future, Lansdale Inc will sell part shares of the Corporation or other corporations, which Lansdale Inc will hold, and then Lansdale Inc will grant most fund to the Corporation, and raise the price of the shares. But if the shares price of the Corporation or other corporations will be low, Lansdale Inc can't sell these shares, and then Lansdale Inc won't grant enough fund to the Corporation, the Corporation won't get enough it working capital.

(9). Many factors can affect the foreign exchange rate. The special factors are international balance of payment, inflation, interest rate, psychological expectations for markets, macro-economy polices of each countries and the currency interference of each countries.

(10). Many factors can affect the price of gold and silver. The special factors are US dollar trend, chaos caused by war, a volatile political situation, a financial crisis in worldwide, inflation, oil prices, rate in a country, economic situation, Supply and demand relation.

(11). If the investing direction of the investors' currency pairs will be opposite with the market direction of their currency pairs, investors will have more losing opportunities if they use a higher leverage rate. The Corporation will use low leverage rate when we are or will be trading foreign exchange.

(12). The Corporation has not yet commenced trading in silver or gold, and the

Corporation plan to trade gold and/or silver in the future, so this is a risk factor.

(13). The Corporation opened its trading account in some brokerages, so the Corporation don't contact directly custodians, and the Corporation don't have contracts directly with custodian, the trading brokerages have custodians for custody our fund and foreign currencies, gold and silver. Because the Corporation don't identified any custodian, so this is a risk factor.

(14). We state specially that we don't register currently with the U.S Commodity Futures Trading Commission (CFTC), but the nature of our business may subject us to CFTC regulation.

Indicate the relative size and financial and market strengths of the Company's competitors in the area of competition in which the Company is or will be operating.

State why the Company believes it can effectively compete with these and other companies in its area of competition.

Note: Because this Offering Circular focuses primarily on details concerning the Company rather than the industry in which the Company operates or will operate, potential investors may wish to conduct their own separate investigation of the Company's industry to obtain broader insight in assessing the Company's prospects.

The Corporation is and will trading foreign currency exchange, London gold and spot silver.

Describe the industry in which we are participating:

Foreign exchange market is a financial market to trade currency. The foreign exchange can trade the spot foreign exchange or the futures foreign exchange. The foreign exchange market can run 24 hours in weekday, except weekend days and holidays. The foreign exchange market can decide the exchange rate between different currencies. Many factors can affect the exchange rate. Foreign exchange market is most close to the perfect competition between different countries.

Gold and silver are international currency. Gold and silver market is a international market. The gold and silver can trade the spot gold and silver or the futures gold and silver. Many factors can affect the price of the gold and silver. Gold and silver market is most close to the perfect competition in international market.

The trends within industry which we are participating:

The supply-demand relationships, the political factors and the markets will affect the currency rate between different currencies in foreign exchange market. The supply-demand relationships, the political factors and the markets will affect the price of the gold and silver in gold and silver market. In recent, the trends within the industry: US Dollar was appreciating, and other currencies were depreciating. The price of Gold was going down, and the price of silver was going down.

Set forth the timing and size of results of our efforts which will be necessary in order for you to be profitable:

In order for the Corporation to be profitable, we will study the supply-demand relationships, the political factors and the markets of the concerned countries and internationals in every day. We will do our best to know the political and economic situations and policies of the concerned countries and internationals, it will be good to get opportunities for investing in foreign exchange, gold and silver market.

Discuss whether there are any limits on the amount of leverage that we will incur, the degree to which our intend on leveraging our trades and the factors we will consider before making leveraged trades:

In foreign exchange market, investors are trading foreign exchange according the exchange rate. The prices change maybe one penny, even the prices change is smaller. Because the prices change is very smaller, investors have to wait long time, and invest too much funds for making a profit. After using leverage to trade, investors can use the fewer funds, and use the less time to make a profit. It is necessary to use leverage for trading foreign exchange. The Corporation can use leverage to increase its potential for making a profit.

If the investing direction of the investors' currency pairs will be opposite with the market direction of their currency pairs, investors will have more losing opportunities if they use a higher leverage rate. The Corporation will use low leverage rate when we are or will be trading foreign exchange.

The amount of leverage that we will incur is 50:1.

Anybody, who trade foreign exchange by an account in any foreign exchange brokerages, must use leverage to trade. All foreign exchange brokerages offer leverage to trade for all its customers.

We use leverage to increase our potential for making a profit. I must use leverage to trade foreign exchange.

(d). Describe specifically the marketing strategies the Company is employing or will employ in penetrating its market or in developing a new market. Set forth in response to Question 4 below the timing and size of the results of this effort which will be necessary in order for the Company to be profitable. Indicate how and by whom its products or

services are or will be marketed (such as by advertising, personal contact by sales representatives, etc.), how its marketing structure operates or will operate and the basis of its marketing approach, including any market studies. Name any customers that account for, or based upon existing orders will account for a major portion (20% or more) of the Company's sales. Describe any major existing sales contracts.

The corporation's investment strategy for the foreign exchange, London gold and spot silver investment is short term hold and trade, and tries to reduce any investment and trading risk.

The Corporation plan that more than 90% of the company's assets will be invested in the trading the foreign currency exchange, London gold and spot silver.

Now, the Corporation is using its 100% working capital to trading foreign exchange.

In the future, the Corporation plan to use 70% working capital for trading foreign exchange, and use 15% working capital for trading London gold, and use 15% working capital for trading spot silver.

(b) State the probable consequences to the Corporation of delays in achieving each of the events or milestones within the above time schedule, and particularly the effect of any delays upon the Corporation's liquidity in view of the Corporation's then anticipated level of operating costs.

Note: After reviewing the nature and timing of each event or milestone, potential investors should reflect upon whether achievement of each within the estimated time frame is realistic and should assess the consequences of delays or failure of achievement in making an investment decision.

If the Corporation of delays in achieving each of the events or milestones within the above time schedule, the profit capacity of the Corporation will be serious to decrease, the Corporation's liquidity will be serious to decrease; even the Corporation's liquidity will be exhausted. The faith of the Corporation's shareholder will be serious to decrease, they will undersell the shares of the Corporation, and the share's price of the Corporation will be falling.

OFFERING PRICE FACTORS

The securities offered are class A common stock, the following factors may be relevant to the price at which the securities are being offered.

5. What were net, after-tax earnings for the last fiscal year? (If losses, show in parenthesis.)

The Corporation started to run its business since October 6, 2014, and started to test trading foreign exchange since November 17, 2014, its last fiscal years was short term.

Total net, after-tax earnings for the last fiscal year was (\$256), per share was (-).

6. If the Company had profits, show offering price as a multiple of earnings. Adjust to

reflect for any stock splits or recapitalizations, and use conversion or exercise price in lieu of offering price, if applicable.

As of December 31, 2014, the Corporation's profit (lose) was (\$256), the Corporation couldn't show offering price as a multiple of earnings, didn't adjust to reflect for any stock splits or recapitalizations, and use conversion or exercise price in lieu of offering price.

7. (a). What is the net tangible book value of the Company? (If deficit, show in parenthesis.) For this purpose, net tangible book value means total assets (exclusive of copyrights, patents, goodwill, research and development costs and similar intangible items) minus total liabilities.

\$ _____ (\$ _____ per share)

If the net tangible book value per share is substantially less than this offering (or exercise or conversion) price per share, explain the reasons for the variation.

Net tangible book value means total assets (exclusive of copyrights, patents, goodwill, research and development costs and similar intangible items) minus total liabilities.

The net tangible book value (If deficit, show in parenthesis) of the Corporation is \$18,970 (about \$- per share)

The net tangible book value per share isn't substantially less than this offering price per share.

(b). State the dates on which the Company sold or otherwise issued securities during the last 12 months, the amount of such securities sold, the number of persons to whom they were sold, and relationship of such persons to the Company at the time of sale, the price at which they were sold and, if not sold for cash, a concise description of the consideration. (Exclude bank debt.)

There weren't any securities were issued during the last 12 months.

At the time of the sale, Lansdale Inc was an affiliate of the Corporation.

8. (a). What percentage of the outstanding shares of the Company will the investors in this offering have? Assume exercise of outstanding options, warrants or rights and conversion of convertible securities, if the respective exercise or conversion prices are at or less than the offering price. Also assume exercise of any options, warrants or rights and

conversions of any convertible securities offered in this offering.)

If the maximum is sold: _____ %

If the minimum is sold: _____ %

What post-offering value is management implicitly attributing to the entire Company by establishing the price per security set forth on the cover page (or exercise or conversion price if common stock is not offered)? (Total outstanding shares after offering times offering price, or exercise or conversion price if common stock is not offered.)

If the maximum is sold: _____ *

If the minimum is sold: _____ *

* These values assume that the Company's capital structure would be changed to reflect any conversions of outstanding convertible securities and any use of outstanding securities as payment in the exercise of outstanding options, warrants or rights included in the calculation. The type and amount of convertible or other securities thus eliminated would be: _____. These values also assume an increase in cash in the Company by the amount of any cash payments that would be made upon cash exercise of options, warrants or rights included in the calculations. The amount of such cash would be: \$ _____ .

(For above purposes, assume outstanding options are exercised in determining "shares" if the exercise prices are at or less than the offering price. All convertible securities, including outstanding convertible securities, shall be assumed converted and any options, warrants or rights in this offering shall be assumed exercised.)

Note: After reviewing the above, potential investors should consider whether or not the offering price (or exercise or conversion price, if applicable) for the securities is appropriate at the present stage of the Company's development.

The post-offering value is management implicitly attributing to the entire Company by establishing the price per security set forth on the cover page:

If the maximum is sold: \$37,206

If the minimum is sold: \$35,206

Lemont Inc
Notes to Condensed Financial Statement
(Unaudited)

Note 1. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited condensed financial statements have been prepared in accordance with generally accepted accounting principles in the United States (GAAP) and applicable rules and regulations of the Securities and Exchange Commission regarding interim financial reporting. Certain information and note disclosures normally included in the financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations.

This is the first condensed financial statements of the Corporation.

The Corporation started to operation its business since October 6, 2014, and the Corporation started to test trading foreign exchange since November 17, 2014.

The condensed financial statements include the accounts of Lemont Inc. All intercompany balances and transactions have been eliminated.

The accompanying condensed financial statements reflect all normal recurring adjustments necessary to present fairly the financial position, results of operations, and cash flows for the periods.

Use of Estimates

Conformity with GAAP requires the use of estimates and judgments that affect the reported amounts in the condensed financial statements and accompanying notes.

These estimates form the basis for judgments we make about the carrying values of our assets and liabilities, which are not readily apparent from other sources.

We base our estimates and judgments on historical information and on various other assumptions that we believe are reasonable under the circumstances.

GAAP requires us to make estimates and judgments in several areas, including, but not limited to, those related to revenue recognition, collectability of accounts receivable, contingent liabilities, fair value of financial instruments, fair value of acquired intangible assets and goodwill, useful lives of intangible assets and property and equipment, and income taxes.

These estimates are based on management's knowledge about current events and expectations about actions we may undertake in the future. Actual results could differ materially from those estimates.

Note 2. Acquisitions

On September 20, 2014, Lansdale Inc became the 100% owner of the Corporation, but the Corporation didn't issue any securities to Lansdale Inc.

Note 3. Earnings per Share

Basic EPS is computed by dividing net income attributable to common stockholders by the weighted-average number of shares of our Class A common stock outstanding, adjusted for outstanding shares that are subject to repurchase.

For the calculation of diluted EPS, net income attributable to common stockholders for basic EPS is adjusted by the effect of dilutive securities, including awards under our equity compensation plans.

Diluted EPS attributable to common stockholders is computed by dividing the resulting net income attributable to common stockholders by the weighted-average number of fully diluted common shares outstanding. Basic and dilutive securities in our basic and diluted EPS calculation for from the October 6, 2014 to December 31, 2014.

Basic and diluted EPS are the same for each class of common stock because they are entitled to the same liquidation and dividend rights.

The numerators and denominators of the basic and diluted EPS computations for our

Class A common stock were calculated as follows:

Ended December 31, 2014

Basic EPS:

Numerator	
Net income	(\$256)
Less: Net income attributable to participating securities	-
Net income attributable to common stockholders	-
Denominator

Share-based Compensation Plans

The Corporation didn't have any share-based compensation plans, so it wasn't applicable!

Note 10. Income Taxes

Our tax provision for interim periods is determined using an estimate of our annual effective tax rate, adjusted for discrete items arising in that quarter. In each quarter we update our estimate of the annual effective tax rate, and if our estimated annual tax rate changes, we make a cumulative adjustment in that quarter. Our quarterly tax provision, and our quarterly estimate of our annual effective tax rate, are subject to significant volatility due to several factors, including our ability to accurately predict our income

(loss) before provision for income taxes in multiple jurisdictions, including the portions of our share-based compensation that will not generate tax benefits, and the effects of acquisitions and the integration of those acquisitions. In addition, our effective tax rate can be more or less volatile based on the amount of income before provision for income taxes.

We are subject to taxation in the United States and various other state jurisdictions. We are under examination by the Internal Revenue Service (IRS). We remain subject to possible examinations or are undergoing audits in various other jurisdictions that are not anticipated to be material to our financial statements.

Although the timing of the resolution, settlement, and closure of any audit is highly uncertain, it is reasonably possible that the balance of gross unrecognized tax benefits could significantly change in the next 12 months. However, given the number of years remaining that are subject to examination, we are unable to estimate the full range of possible adjustments to the balance of gross unrecognized tax benefits.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF CERTAIN RELEVANT FACTORS

47. If the Corporation's financial statements show losses from operations, explain the causes underlying these losses and what steps the Corporation has taken or is taking to address these causes.

The Corporation started to test the trading foreign exchange by MT4 Trading Platform since November 17, 2014. Because we didn't know well to use the MT4 Trading platform, we have the small losses from operation.

We will good to use the MT4 Trading Platform in the future, and then we won't have losses for these causes.

48. There aren't any trends in the Corporation's historical operating results.

49. The Corporation don't sells a product or products.

50. Foreign sales as a percent of total sales for last fiscal year: 0% . Domestic government sales as a percent of total domestic sales for last fiscal year: 0%
