2. Significant Accounting Policies (continued)

Fixed Assets

Equipment is stated at cost and depreciated on a straight-line basis over their estimated useful life of three years.

Maintenance and repairs, which do not extend the useful lives of the respective assets, are charged to expense as incurred.

Fixed assets are reviewed for impairment whenever events or changes in circumstances indicate that the related carrying amount may be impaired. The Company records an impairment loss if the undiscounted future cash flows are found to be less than the carrying amount of the asset. If an impairment loss has occurred, a charge is recorded to reduce the carrying amount of the asset to fair value. There has been no impairment as of December 31, 2015.

Revenue Recognition

All securities transactions and the related revenues and expenses are recorded on a trade date basis. Commissions and related clearing charges are recorded on a trade date basis. Included in commission revenue are revenues derived from matched principal transactions.

Commissions Receivable

Commissions receivable represent amounts due from the Clearing Broker and amounts due from customers for the billing of brokerage on emerging market credit default swaps on a name give up basis. The Company provides an allowance for doubtful accounts based on the age of past due accounts and an assessment of the entity's ability to pay. As of December 31, 2015, no allowance for doubtful accounts was considered necessary.

Securities Owned

Securities owned represent municipal bonds. The bonds are valued using inputs other than quoted prices that are observable for the asset either directly or indirectly, at the measurement date, including inputs in markets that are not considered to be active.

2. Significant Accounting Policies (continued)

Cost and fair value of securities owned at December 31, 2015 are as follows:

Municipal bonds - cost	\$56,093
Unrealized loss - gross	<u>(37,189)</u>
Fair value	<u><u>\$ 18,904</u></u>

Investments

The Company accounted for investments at cost when the Company's ownership interest was less than 20% and under the equity method of accounting, when the Company held 20% or more ownership interest that gave it the ability to exercise significant influence over operating and financial policies of the investee. Under the equity method of accounting, the Company adjusted the carrying amount of the investment for its share of the earnings or losses of the investee and reported the recognized earnings or losses in the statement of operations.

3. Related-Party Transactions

FXDD provides accounting, administrative and technology services and facilities to the Company under a service agreement and, in turn, charges a fixed monthly administration fee. For the year ended December 31, 2015, these fees amounted to \$60,000. These amounts are included in administrative expenses on the statement of operations. Additionally, the Company reimburses FXDD for salaries and other expenses paid by FXDD on behalf of the Company. For the year ended December 31, 2015, these expenses amounted to \$1,355,598, of which \$980,899 is included in Compensation and benefits, with the remainder included in Communications, Professional fees, and Other expenses on the statement of operations. Included in due to Parent on the statement of financial condition is \$15,672, relating to salaries and other expenses paid by FXDD on behalf of the Company.

4. Investment in Affiliate

Investment in affiliate consisted of the following: (1) a 23% interest in an affiliated limited liability company and (2) an investment in a financial interest in a gross revenue stream of the affiliate. 5. Fair Value Measurements

In accordance with FASB ASC 820, *Fair Value Measurements and Disclosures*, the Company discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The hierarchy gives the highest priority to valuations based upon unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to valuations based upon unobservable inputs that are significant to the valuation (Level 3 measurements). This guidance provides three levels of the fair value hierarchy as follows:

- *Level 1:* Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date;
- *Level 2:* Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, at the measurement date, including inputs in markets that are not considered to be active;
- *Level 3:* Inputs to the valuation that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument. Inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in inactive markets, inputs other than quoted prices that observable, or inputs that are derived principally from or corroborated by observable market data.

The fair value of municipal securities is determined using recently executed transactions, market price quotations and pricing models that factor in, where applicable, interest rates, bond or credit default swap spreads and volatility. These bonds are generally categorized in Level 2 of the fair value hierarchy.

A financial instrument's level within the fair value hierarchy is based upon the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgment by the Company. The Company considers observable data to be market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.
