### 2. Summary of Significant Accounting Policies

#### *Financial Reporting and Use of Estimates*

The financial statements of the Company have been prepared on the accrual basis in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

#### *Cash and Cash Equivalents*

For purposes of the statements of cash flows, money market funds and short term cash investments with a maturity, at date of purchase, of three months or less are considered to be cash equivalents.

It is the Company's policy to place its cash and cash equivalents in high quality financial institutions. At times these deposits may exceed federally insured limits. The Company does not believe significant credit risk exists with respect to these institutions.

### 3. Net Capital Requirements

The Company, as a registered broker-dealer in securities, is subject to the Securities and Exchange Commission's Uniform Net Capital Rule (SEC Rule 15c3-1). ### 5. Indemnifications

The Company enters into contracts that contain a variety of indemnifications. The Company's maximum exposure under these arrangements is unknown. However, the Company has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

### 6. Fair Value

The Company follows the provisions of ASC Topic 820, *Fair Value Measurement*, which defines fair value and establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs, requiring that inputs that are most observable be used when available. Observable inputs are inputs that market participants operating within the same marketplace as the Company would use in pricing its assets and liabilities based on independently derived and observable market data. Unobservable inputs are inputs that cannot be sourced from a broad active market in which assets or liabilities identical or similar to those held by the Company. The Company estimates the price of any assets for which there are only unobservable inputs by using assumptions that market participants, having investments in the same or similar assets, would use for such assets based on best information available in the circumstances. Pursuant to ASC 820, the input hierarchy is broken down into three levels based on the degree to which the input is observable as follows:

## Brookwood Securities Partners, LLC

### Notes to Statements of Financial Condition

---

Level 1 - Valuation based on quoted market prices in active markets for identical assets or liabilities. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail any judgment. Examples include equity that is actively traded on a major exchange and mutual funds.

Level 2 - Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability through corroboration with market data at the measurement date. Most debt securities, preferred stocks, certain equity securities, short-term investments and derivatives are model priced using observable inputs and are classified with Level 2.

Level 3 - Valuation based on inputs that are unobservable and reflect management's best estimate of what market participants would use as fair value. Examples include investments in limited partnerships, limited liability investment companies and private equity investments.

The following tables show, by level within the fair value hierarchy, the Company's financial assets that are reported at fair value on a recurring basis as of December 31, 2014 and 2013. The financial assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the asset or liability's placement within the fair value hierarchy levels.

<i>Fair Value at December 31, 2015</i>	Level 1
Money market funds	\$ 82,480

<i>Fair Value at December 31, 2014</i>	Level 1
Money market funds	\$ 432,450

#### 7. Subsequent Events

The Company evaluated all events and transactions that occurred after December 31, 2015 through the date the financial statements were issued and noted no material subsequent events requiring disclosure.
