The Company began operations as a registered broker-dealer in May 2003.

The Company has an agreement (Clearing Agreement) with a clearing broker to clear securities transactions and perform certain record keeping functions. Safekeeping services for customer securities are provided by the clearing broker on a fully disclosed basis. #### *Limited Liability Company/Income Taxes*

The financial statements include only those assets, liabilities and results of operations that relate to the business of Dearborn Capital Markets Group, LLC. As a limited liability company, the member's liability is limited to amounts reflected in its member account.

As a single-member limited liability company, the net income of the Company is not subject to federal and Tennessee income tax. The member reports the net income of the Company on the member's income tax returns.

## NOTES TO FINANCIAL STATEMENTS

*Dearborn Capital Markets Group, LLC*

*December 31, 2015*

---

### *Investment Securities*

Corporate equity securities are classified as available for sale and recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income.

### *Equipment*

Equipment is stated at cost. Depreciation is computed using the straight line method over the estimated useful lives of the assets.

### *Use of Estimates*

The preparation of the Company's financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities, at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Material estimates, that are particularly susceptible to significant change in the near future, relate to the determination of the fair value of corporate equity securities. The fair value of corporate equity securities is obtained by management from third party providers. These valuations are subject to fluctuations caused by current market conditions and other matters. It is reasonably possible that the fair value of corporate equity securities could change materially in the near term.

### *Comprehensive Income*

Accounting principles generally accepted in the United States of America require that revenues, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains (losses) on available for sale securities, are reported as a component of member's equity, such items, along with net income (loss), are components of comprehensive income.

### *Fair Value of Assets and Liabilities*

Accounting principles generally accepted in the United States of America defines fair value and establishes a framework for measuring fair value. Fair value measurements apply to financial assets and liabilities recognized at fair value on a recurring basis or nonrecurring basis, as well as to non-financial assets and liabilities which are re-measured at least annually.

Accounting principles generally accepted in the United States of America establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable market data, when available, and minimizes the use of unobservable inputs when determining fair value. Observable inputs reflect assumptions market participants would use in pricing an asset or liability based on market data obtained from independent sources. Unobservable inputs reflect the Company's assumptions about the assumptions market participants would use in pricing an asset or liability based on the best information available in the circumstances.

*Continued*

## NOTES TO FINANCIAL STATEMENTS

*Dearborn Capital Markets Group, LLC*

*December 31, 2015*

---

Assets and liabilities measured at fair value are grouped into three broad levels based on the reliability of valuation inputs used to determine fair value as follows:

- Level 1: Observable inputs such as quoted prices in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included in Level 1 that are observable for assets or liabilities, either directly or indirectly. These inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and modeling techniques based on inputs that are observable for the assets or liabilities.
- Level 3: Unobservable inputs that reflect the reporting entity's own assumptions that market participants would use in pricing the assets or liabilities.

The availability of observable inputs varies from product to product and is affected by a variety of factors, including the type of product, whether the product is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3.

### *Recent Accounting Pronouncements*

In February 2013, the FASB issued Accounting Standards Update (ASU) No. 2013-02, *Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. The update did not change the current requirements for reporting net income or other comprehensive income in financial statements. The amendments require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under accounting principles generally accepted in the United States of America to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under accounting principles generally accepted in the United States of America to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under accounting principles generally accepted in the United States of America that provide additional detail about those amounts. The amendments in the update are effective for nonpublic entities for reporting periods beginning after December 15, 2013. In compliance with this update, the information required has been included in the statement of Comprehensive Income (Loss) and Note 2.

### *Subsequent Events*

Management has reviewed events occurring through February 10, 2016, the date the financial statements were available to be issued. The Company has determined that there are no subsequent events that require disclosure in the financial statements.

### 7. FAIR VALUE MEASUREMENTS

The financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2015 are as follows:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Fair Value</u>

Securities	\$ <u>61,945</u>	\$ <u>-</u>	\$ <u>-</u>	\$ <u>61,945</u>

### 8. FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISKS AND CONCENTRATION OF CREDIT RISK

In the normal course of business, the Company may be exposed to risks in the execution of securities transactions. These transactions involve elements of risk as to credit extended, market fluctuations, and interest rate changes.

The execution of substantially all purchases and sales of securities requires the performance of another party to fulfill the transactions. In the event that the counterparty to the transaction fails to satisfy its obligation, the Company may be required to purchase or sell the security at the prevailing market price, which may have an adverse effect.

The nature of the securities industry is such that large cash balances are maintained in various financial institutions. These balances may exceed the limits of coverage guaranteed by the Federal Deposit Insurance Corporation.

Based on my review, I'm not aware of any material modifications that should be made to management's statements referred to above for them to be fairly stated, in all material respects, based on the provisions set forth in paragraph (k)(2)(ii) of Rule 15c3-3 under the Securities Exchange Act of 1934.
