1. ORGANIZATION AND DESCRIPTION OF BUSINESS

Banorte-IXE Securities International Ltd. (the "Company"), an indirect wholly-owned subsidiary of Casa de Bolsa Banorte-IXE, S.A. de C.V. ("Bolsa"), is a New York corporation which was organized in February 1992 and commenced operations in August 1993. The Company trades in Mexican and U.S. securities, primarily on the Mexican stock exchange and the over the counter markets. The Company is an introducing broker-dealer.

The Company receives commission on all trades introduced during the year.

All domestic securities transactions are cleared through clearing brokers on a fully disclosed basis and, accordingly, the Company does not carry securities accounts for these customers or perform custodial functions relating to their securities. The Company is registered with the Securities and Exchange Commission and is a member of the Financial Industry Regulatory Authority Inc (FINRA). Receivable from clearing brokers consists primarily of cash balances held at the clearing brokers. The Company is also a member of Securities Investors Protection Corporation (SIPC).

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("US GAAP"). These financial statements were approved by management and available for issuance on February 26, 2016.

The significant accounting policies followed in the preparation of the financial statements on a consistent basis are:

Cash and cash equivalents

The Company defines cash and cash equivalents as highly-liquid investments with original maturities of three months or less at the time of purchase, other than those held for sale in the ordinary course of business. At December 31, 2015 substantially all of the Company's financial instruments are carried at fair value or amounts approximating fair value.

Fixed assets

Furniture, equipment, software and leasehold improvements are recorded at cost, net of accumulated depreciation and amortization. Furniture, equipment and software are depreciated on a straight-line basis over the estimated useful life of three to five years. Leasehold improvements are amortized on a straight-line basis over the lesser of their economic useful lives or the terms of the underlying lease.

Securities transactions

Securities transactions of the Company and the related revenues and expenses are recorded on a trade-date basis. Securities owned are stated at market value. Net realized and unrealized gains and losses are reflected in trading in the statement of income.

Notes to Financial Statements For the year ended December 31, 2015 (Expressed in United States Dollars)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Use of estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and revenue and expenses during the reporting period. Actual results could differ from those amounts. Significant estimates include taxes, certain income and receivables, and accrued compensation.

Foreign currency translation

Assets and liabilities denominated in foreign currencies are translated at year-end rates of exchange, while the income statement accounts are translated at rates of exchange through out the year. Gains or losses resulting from foreign currency transactions are included in net income.

Revenue recognition

Commissions and fee revenue and expenses are recorded on a trade date basis.

Income Taxes

The Company accounts for income taxes in accordance with ASC 740, which requires an asset and liability approach to financial accounting and reporting for income taxes. Deferred income tax assets and liabilities are computed annually for differences between the financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future, based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized. The provision for income taxes is comprised of state and local taxes computed on a basis other than net income.

ASC 740-10-25 prescribes a comprehensive model of how companies should recognize, measure, present and disclose uncertain tax positions taken or expected to be taken on a tax return. Under ASC 740-10-25, the Company shall initially recognize tax positions in the financial statements when it is more likely than not the position will be sustained upon examination by the tax authorities. The Company shall initially and subsequently measure such tax positions as the largest amount of tax benefit that is greater than 50% likely of being realized upon ultimate settlement with the tax authority assuming full knowledge of the position and all relevant facts. The Company has reviewed and evaluated the relevant technical merits of each of its tax positions and determined that there are no uncertain tax positions that would have a material impact on the financial statements of the Company as of December 31, 2015.

The Company has agreed to indemnify the clearing broker for losses that the clearing broker may sustain from the customer accounts introduced by the Company. **Notes to Financial Statements
For the year ended December 31, 2015
(Expressed in United States Dollars)**

9. OFF-BALANCE-SHEET RISK AND CONCENTRATION RISK

A portion of the Company's assets are held at a clearing broker. The Company is subject to credit risk should the clearing broker be unable to fulfill these obligations.

Financial instruments sold, but not yet purchased resulting from certain unmatched principal transactions represents obligations of the Company to purchase the specified financial instrument at the current market price. Accordingly, although these are generally short-term in nature, these transactions result in off-balance-sheet risk as the Company's ultimate obligation to purchase financial instruments sold, but not yet purchased, may exceed the amount recognized in the Statement of Financial Condition. At December 31, 2015, the Company did not have any financial instruments sold, but not yet purchased.

The Company maintains cash balances at a regulated financial institution in excess of FDIC-insured limits of \$250,000. However, the Company does believe that these amounts are exposed to significant risk and are considering steps to address this risk.

10. FAIR VALUE MEASUREMENT

As defined in ASC 820-10, Fair Value Measurements and Disclosures defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach, as specified by ASC 820-10, are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 - Inputs are unadjusted quoted prices in active markets for identical assets or liabilities, the Company has the ability to access.

Level 2 - Inputs, other than quoted prices included in Level 1, are either directly or indirectly observable, for the asset or liability.

Level 3 - Unobservable inputs reflect management's best assumptions of what market participants would use in pricing the asset or liability at the measurement date. The unobservable inputs should be developed based on the best information available in the circumstances and may include the company's own data.

An instrument's categorization within the fair value hierarchy is based on the lowest level of significant input to its valuation.

As of December 31, 2015, financial instruments owned by the Company primarily consist of cash and cash equivalents and are classified as Level 1. No Level 2 or Level 3 assets were owned by the Company as at December 31, 2015.

11. REGULATORY REQUIREMENTS

The Company is subject to the Securities and Exchange Commission's ("SEC") Uniform Net Capital Rule (the "Rule") and has elected to compute its net capital under the Basic Method of this Rule. This Rule requires that the Company maintain minimum net capital, as defined, equal to the greater of \$100,000 or 6-2/3 percent of aggregate indebtedness, as defined. At December 31, 2015, the Company had net capital of \$8,309,530 which was \$8,209,530 in excess of its required net capital.
