REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholder of Exane, Inc.:

We have audited the accompanying statement of financial condition of Exane, Inc. (the "Company") as of December 31, 2015, that you are filing pursuant to Rule 17a-5 under the Securities Exchange Act of 1934. This financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such statement of financial condition presents fairly, in all material respects, the financial position of Exane, Inc. as of December 31, 2015, in conformity with accounting principles generally accepted in the United States of America.

EXANE INC.

(A Wholly Owned Subsidiary of Exane SA)

NOTES TO STATEMENT OF FINANCIAL CONDITION AS OF AND FOR THE YEAR ENDED DECEMBER 31, 2015

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of Business — Exane, Inc. (the “Company”) is a wholly owned subsidiary of Exane SA (the “Parent”). The Parent is authorized as an investment company in France by CECEI (Committee on Credit Institutions and Investment Companies). The Company is incorporated under the laws of the State of Delaware and is a broker-dealer registered with the Securities and Exchange Commission and a member of the Financial Industry Regulating Authority, Inc. (“FINRA”). The primary function of the Company is to serve the French and other European investment needs of U.S. institutional investors and the U.S. investment needs of U.S. institutional investors. The Company deals primarily in listed securities of European issuers and listed securities and options of U.S. issuers.

Merger with US affiliate — On November 9, 2015, with the issuance of 7.4072 additional shares, the Company purchased its US affiliate Exane Options Inc from its parent corporation, the French broker dealer, Exane Options SA. At the time of the purchase Exane Options Inc had net assets of \$133,749. This acquisition was accounted for as a transfer between entities under common control. Transfers between entities under common control are accounted for as if the transfer occurred at the beginning of the period. Exane Options Inc did not have any activity during the year and the Company received cash and equity totaling \$133,749. Immediately subsequent to the acquisition, Exane Options SA provided to its parent corporation as a dividend the shares received from the Company increasing the Parent’s ownership to the 1,007 shares now outstanding. Also subsequent to the purchase, on December 23, 2015, the Company and Exane Options Inc merged with the surviving corporation being Exane, Inc.

Basis of Presentation — The financial statements are presented in accordance with accounting principles generally accepted in the United States of America.

Cash and Cash Equivalents — The Company considers all highly liquid investments with original maturities of 90 days or less to be cash equivalents. Cash and cash equivalents primarily consist of cash and short-term money market instruments.

Securities Owned — Securities owned at December 31, 2015, consists of certificates of deposits with maturities greater than 90 days and are presented at cost, which approximates fair value and accounted for on a trade date basis.

Furniture, Equipment, and Leasehold Improvements — Maintenance and repair costs are expensed as incurred. Furniture and equipment are carried at cost, less accumulated depreciation and are depreciated on a straight-line basis generally using estimated useful lives of three to five years. Leasehold improvements are carried at cost, less accumulated depreciation and are depreciated on a straight-line basis using either the life of the lease or the estimated life of the asset, whichever is shorter.

As of December 31, 2015, furniture, equipment, and leasehold improvements are comprised of the following:

	Cost	Accumulated Depreciation	Depreciated Value
Organization & Licenses	\$ 38,193	\$ (38,193)	\$ -
Buildings & Improvements	1,556,586	(1,088,164)	468,422
Office Equipment	626,986	(579,870)	47,116
Furniture & Fixtures	382,072	(378,362)	3,710
TOTAL	\$ 2,603,837	\$ (2,084,589)	\$ 519,248

Receivables from and Payables to Brokers, Dealers and Clearing Organizations — Receivables from brokers and dealers include the deposit required pursuant to the clearing agreement, other cash on deposits with the Company's U.S. clearing broker and amounts receivable for securities not delivered by the Company to a purchaser by the settlement date ("fails-to-deliver"). Payables to brokers, dealers and clearing organization include amounts payable for securities not received by the Company from a seller by the settlement date ("fails-to-receive").

	Receivable	Payable
Securities failed to deliver/receive	\$4,568,700	\$18,993
Receivable from clearing organizations	\$4,310,506	\$0
TOTAL	\$8,879,206	\$18,993

Long-Term Liabilities — In 2009 the Company adopted a deferred bonus compensation program whereby portions of the employee's annual cash bonus awards are deferred over a three year period on bonus awards in amounts over a threshold amount. Long-term liabilities are established to reflect the deferred cash bonuses payable in future years.

Defined benefit pension plan — The Company maintains a defined benefit pension plan. Evaluation of pension liability involves certain estimates and assumptions including discount rate, rate of compensation increase and expected return on assets. Refer to Note 4.

Receivables from Customers — The amounts reported in the statement of financial condition represent commissions receivable from customers in connection with securities transactions, less a reserve of \$15,822 for certain 2015 receivables outstanding six months or more, and research fees invoiced but not yet received.

Translation of Foreign Currency — Assets and liabilities denominated in non-U.S. currencies are translated at rates of exchange prevailing on the date of the statement of financial condition, and revenues and expenses are translated at exchange rate at the end of each month.

Income Taxes — Income taxes are provided for using the asset and liability method. Deferred tax assets and liabilities are recognized for temporary differences between the financial reporting and tax bases of the Company's assets and liabilities. Valuation allowances are established to reduce deferred tax assets to the amount that more likely than not will be realized. The Company had no valuation allowances at year-end.

Use of Estimates — These financial statements have been prepared in accordance with generally accepted accounting principles that require management to make certain estimates and assumptions. The most important of these estimates and assumptions relate to fair value measurements, bonus, pension liability and tax accruals at December 31, 2015. Although these and other estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

Fair Value Measurement — The Company adopted fair value measurement standards prescribed by the Financial Accounting Standards Board (FASB) which defines fair value as the price received to transfer a financial asset or paid to transfer a financial liability in an orderly transaction between market participants at the measurement date. This standard also establishes a framework for measuring fair value, expands disclosures about fair value measurements and specifies a hierarchy of valuation techniques based on whether inputs to these valuation techniques are observable or unobservable.

New Accounting Pronouncements:

ASC 606, Revenue from Contracts with Customers. In May 2014, FASB issued ASU 2014-09, *Revenue from Contracts with Customers*. The new guidance will create a more principles-based approach to revenue recognition. Under the new guidance, companies will recognize revenue to depict the transfer of goods or services to customers in amounts that reflect consideration to which a company expects to be entitled in exchange for those goods or services by applying a five step-process. The standard would require additional disclosures and provide more guidance for transactions such as revenue and contract modification. The guidance must be adopted using either a full retrospective approach or a modified retrospective approach. In addition, an explanation of the significant changes between the reported results under the new revenue standard and prior US GAAP is needed. The guidance will be applicable for the Company in the fiscal year beginning January 1, 2018. The Company is currently evaluating the impact of the adoption on its financial statements.

ASC 205, Presentation of Financial Statements – Going Concern. In August 2014, the FASB issued ASU 2014-15, *Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern*. This update requires an entity's management to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued when applicable). When conditions or events raise substantial doubts about an entity's ability to continue as a going concern, management shall disclose: i) the principal conditions or events that raise substantial doubt about the entity's ability to continue as a going concern; ii) management's evaluation of the significance of those conditions or events in relation to the entity's ability to meet its obligations; and iii) management's plans that are intended to mitigate the conditions or events – and whether or not those plans alleviate the substantial doubt about the entity's ability to continue as a going concern. ASU 2014-15 is effective for the annual period ending after December 15, 2016, and early application is permitted. The Company is currently evaluating the impact of the adoption on its financial statements.

ASC 810, Consolidation. In February 2015, FASB issued ASU 2015-02, *Consolidation (Topic 810): Amendments to the Consolidation Analysis*. The new guidance will eliminate the deferral of FAS 167 and update the variable interest model and the voting model. It also permanently exempts reporting entities from consolidating money market funds. A reporting entity that has an interest in a fund that qualifies for the exception is required to disclose any financial support it provided to the

fund during the periods presented and any explicit arrangements to provide financial support in the future. The guidance changes the identification of variable interests (fees paid to a decision maker or service provider), the VIE characteristics for a limited partnership or similar entity and the primary beneficiary determination. The guidance will be applicable public companies in fiscal year beginning December 15, 2015 and for all other companies in fiscal year beginning December 15, 2016. The Company is currently evaluating the impact of the adoption on its financial statements.

2. RELATED PARTY TRANSACTIONS

The Company executes and clears securities transactions through another U.S. broker-dealer or a foreign affiliate. Many of these transactions are denominated in foreign currencies. Pursuant to agreements, the Company receives or pays a fee for such services, which is included in commission revenue or brokerage and clearance expenses. The financial statements reflect the following related party balances as of and for the year ended December 31, 2015:

Assets:		Percent of Total
Receivable from affiliates	\$2,288,063	100%
Financing Activity:		
Dividends	\$3,722,761	100%

The receivable from affiliate balance represents the capital market fees and the net of agency commission fees, execution, revenue sharing, research and other related fees payable as of December 31, 2015.

3. INCOME TAXES

The following is a summary of all the various deferred tax assets and liabilities.

Temporary differences relating to:	
Prepaid and other assets	
Deferred Bonus Program	\$1,646,779
Defined Benefit Pension Plan	\$502,706
Landlord Rent Credits	\$65,995
Reserve for non-payment of Aged Customer Receivables	\$6,883
Total Deferred Tax Assets	<u>\$2,222,363</u>
Accrued expenses	
Leasehold Depreciation	\$56,609
Total Deferred Tax Liabilities	<u>\$56,609</u>

The deferred tax assets and deferred tax liabilities are presented as net in Prepaid and Other Assets in the statement of financial condition.

The Company has determined that there are no unrecognized tax benefits for uncertain tax positions that were required to be recorded. The Company does not expect a significant increase or decrease in unrecognized tax benefits during the next twelve months.

The Company's years open to examination by major jurisdiction are tax years ended December 2011 and forward for Federal, New York State and New York City.

4. EMPLOYEE BENEFIT PLAN

401(k) Retirement Plan — The Company maintains a 401(k) retirement plan (the "Plan") covering substantially all of the employees of the Company. The Company's contribution to the Plan is based on a percentage of employees' contributions and discretionary amounts.

Defined Benefit Pension Plan — The Company maintains a defined benefit pension plan (the "Pension Plan"). The Pension Plan provides death and retirement benefits to all eligible employees. It is the Company's policy to fund the Pension Plan to meet the minimum funding standard as prescribed by the Employee Retirement Income Security Act of 1974 (ERISA). At December 31, 2015, the pension plan assets were invested in a portfolio consisting primarily of cash and cash equivalents, medium term corporate bonds, U.S. equities and mutual funds managed by the Company. Employees must be at least 18 years old and have a minimum of one year of service to be eligible for the Pension Plan.

Fair Value of Pension Plan Assets:

Following is a description of the valuation methodologies used for assets measured at fair value.

Equity securities: Valued at the market price per share held by the plan at year-end.

Corporate debt securities: Valued at the market price per bond held by the plan at year-end plus accrued interest.

Insurance policies: Valued at the cash surrender value of the policy held by the plan at year-end.

Fair Value Hierarchy — The Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

Level 1 — Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. Level 1 primarily consists of money market instruments, deposits, or exchange traded financial instruments.

Level 2 — Quoted prices in active markets are not available, however, pricing inputs are either directly or indirectly observable as of the reporting date. Level 2 includes those financial instruments that are valued using models or other valuation methodologies. Substantially all of the assumptions to value these financial instruments are observable in the marketplace throughout the full term of the instrument, can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace.

Level 3 — Pricing inputs include significant inputs that are generally less observable from objective sources. These inputs may be used with internally developed methodologies that result in management's best estimate of fair value.

Pension asset fair value levels at December 31, 2015:

	Level 1	Level 2	Level 3	Total
Cash & cash equivalents	1,524,928	0	0	1,524,928
Equity securities	1,563,539	0	0	1,563,539
Corporate debt securities	0	1,692,934	0	1,692,934
Pension assets at fair value*	<u>\$3,088,467</u>	<u>\$1,692,934</u>	<u>\$0</u>	<u>\$4,781,401</u>

*Total pension assets of \$5,118,393 also includes insurance policy cash values of \$336,992.

The Company's actual pension plan weighted-average asset allocation at December 31, 2015 by asset category is as follows:

<u>Asset Category</u>	
Fixed Income	30%
Equity Securities	31%
Cash & Cash Equivalents	33%
Insurance Policy Cash Values	<u>6%</u>
Total	<u><u>100%</u></u>

The principal goal of the investment of funds is to provide stability with moderate growth commensurate with the anticipated retirement dates of participants. Fixed income investments, including interest bearing cash and whole life insurance policies, will normally dominate the portfolio (50% - 75%) but will not preclude the opportunistic use of riskier, higher yielding and/or less liquid investments including mutual funds, equities and alternative investments in order to provide additional returns in order to prevent erosion by inflation.

The plan has fifteen years of investing history and was very conservative in its approach to investing during its first few years. Therefore, at this stage the long term rate of return on assets is based on long term historical returns on both fixed income and equity investments rather than actual plan history. Averaging the historical returns (3% to 5% for long term government bonds and 8% to 10% for broad U.S. equity indexes) in proportion to the plans investing goals served as the basis for the rate of return used for the year ended December 31, 2015.

For the year ended December 31, 2015, the expected minimum pension contribution is \$0 to provide an ancillary death benefit through the purchase of individual whole life insurance policies. With the exception of death benefit payments, \$199,000 of benefit payments are expected between 2016 and 2020. Expected payments for the five years subsequent to 2020 are \$885,000.

The plan's Accumulated Benefit Obligation was \$4,818,359 at December 31, 2015 an increase of \$804,382 from the beginning of the year.

5. COMMITMENTS AND CONTINGENCIES

Leases — The Company occupies office space under non-cancelable lease with initial or remaining terms of approximately five years. Future minimum payments are as follows:

2016	720,280
2017	720,280
2018	720,280
2019 and thereafter	<u>540,212</u>
	<u>\$ 2,701,052</u>

Guarantees — The Company has provided a guarantee to their clearing broker. Under the agreement, the Company has agreed to indemnify the clearing broker for customers introduced by the Company that are unable to satisfy the terms of their contracts. The Company's liability under this agreement is not quantifiable. However, the potential for the Company to be required to make payments under this agreement is remote. Accordingly, no contingent liability is carried on the statement of financial condition for these transactions.

6. FAIR VALUE MEASUREMENT

Substantially all of the Company's assets and liabilities are carried at contracted amounts which approximate fair value. Management estimates that the fair value of assets and liabilities (including receivables, payables and accrued expenses) approximates the carrying value as such assets and liabilities are short-term in nature or bear interest at current market rates. As of December 31, 2015, the Company has CDs that are valued on contractual basis that approximates fair value and there are no financial instruments that are considered to be measured at fair value.

7. OFF-BALANCE SHEET RISK

In the normal course of business, the Company executes, as an agent, transactions on behalf of customers. If the agency transactions do not settle because of failure to perform by either the customer or the counterparty, the Company may be required to discharge the obligation of the nonperforming party and, as a result, may incur a loss if the market value of the security is different from the contract amounts of the transaction. The Company's counterparties include U.S. and foreign customers and brokers and dealers that are members of regulated exchanges. The Company does not anticipate nonperformance by such customers or financial institutions; however, the Company's policy is to monitor its market exposure and counterparty risk.

8. NET CAPITAL REQUIREMENTS

The Company is subject to the Securities and Exchange Commission's Uniform Net Capital Rule ("Rule 15c3-1"), which requires the maintenance of minimum net capital. The Company follows the alternative method of computing net capital under Rule 15c3-1 which requires that the Company must maintain minimum net capital, as defined, equal to the greater of \$250,000 or 2% of aggregate debit items. At December 31, 2015, net capital of \$11,191,470 exceeded the required net capital minimum of \$250,000 by \$10,941,470.

9. SUBSEQUENT EVENTS

The Company evaluates events subsequent to December 31, 2015 through the date the audited statement of financial condition is issued. The Company does not note any subsequent events requiring disclosure or adjustment to the statement of financial condition.
