REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors Thornton Farish Inc.

We have audited the accompanying financial statements of Thornton Farish Inc. (an Alabama corporation), which comprise the statement of financial condition as of December 31, 2015, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended that are filed pursuant to Rule 17a-5 under the Securities Exchange Act of 1934, and the related notes to the financial statements and supplementary information. Thornton Farish Inc.'s management is responsible for these financial statements. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial condition of Thornton Farish Inc. as of December 31, 2015, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

The supplementary information contained in Schedule I (Computation of Net Capital under Rule 15c3-1), Schedule II (Computation of Basic Net Capital Requirements under Rule 15c3-1), and Schedule III (Information Relating to the Possession or Control Requirements under Rule 15c3-3) has been subjected to audit procedures performed in conjunction with the audit of Thornton Farish Inc.'s financial statements. The supplementary information is the responsibility of Thornton Farish Inc.'s management. Our audit procedures included determining whether the supplementary information reconciles to the financial statements or the underlying accounting and other records, as applicable, and performing procedures to test the completeness and accuracy of the information presented in the supplementary information. In forming our opinion on the supplementary information, we evaluated whether the supplementary information, including its form and content, is presented in conformity with 17 C.F.R. §240.17a-5. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole.

In lieu of corporation income taxes, the stockholders of an S corporation are taxed on their proportionate share of the Company's taxable income. Therefore, no provision or liability for federal or state income taxes has been included in the financial statements.

Effective January 1, 2009, the Company accounts for uncertainty in income taxes in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 740, *Income Taxes*, which prescribes a minimum recognition threshold and measurement methodology that a tax position taken or expected to be taken in a tax return is required before being recognized in the financial statements. It also provides guidance for de-recognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. As of December 31, 2015, the Company had no uncertain tax positions, or interest and penalties, that qualify for either recognition or disclosure in the financial statements.

With few exceptions, the Company is no longer subject to U.S. federal, state, and local income tax examinations by tax authorities for years before 2012.

Advertising

Advertising costs are expensed as incurred. Advertising expense totaled \$575 for the year ended December 31, 2015.

Cash and Cash Equivalents

Cash and cash equivalents include certain investments in highly liquid debt instruments with original maturities of three months or less.

Fair Value of Financial Instruments

FASB ASC 825-10 requires disclosure of fair value information about financial instruments, whether or not recognized in the statement of financial condition. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instruments. FASB ASC 825-10 excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments:

Investment securities: Fair values of securities are usually based on quoted market prices. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities. The Company has no financial instruments that are held or issued for trading purposes.

Investments in Marketable Securities

The company classifies its debt and marketable equity securities into held-to-maturity, trading, or available-for-sale categories at the time of purchase and reevaluates such determinations at each statement of financial condition date. Debt securities are classified as held-to-maturity when the Company has the positive intent and ability to hold the securities to maturity. Debt securities for which the Company does not have the intent or ability to hold to maturity are classified as available-for-sale. Marketable securities that are bought and held principally for the purpose of selling them in the near term are classified as trading securities.

Trading securities are reported at fair value, with unrealized gains and losses recognized in earnings. Available-for-sale securities are carried at fair market value, with the unrealized gains and losses, net of tax, included in the determination of comprehensive income and reported in stockholders' equity. Held-to-maturity securities are recorded as either short-term or long-term on the statement of financial condition based on the contractual maturity date and are stated at amortized cost.

In the event the fair value of an investment declines below cost basis, management is required to determine if the decline in fair value is other-than-temporary. Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the length of time and to the extent to which the fair value has been less than cost basis, the financial condition and near-term prospects of the issuer, and the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. If it is determined that an other-than-temporary decline exists in a marketable security, the Company writes down the investment to its fair market value and records the related write-down as an investment loss in its statement of income.

The fair value of substantially all securities is determined by quoted market prices. The estimated fair value of securities for which there are no quoted market prices is based on similar types of securities that are traded in the market. Gains or losses on securities sold are based on the specific identification method.

Use of Estimates in the Preparation of Financial Statements

In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingencies at the date of the financial statements and revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recent Accounting Pronouncements

In May 2014, the FASB and the International Accounting Standards Board ("ISAB") jointly issued a comprehensive new revenue recognition standard (Accounting Standards Update 2014-09 *Revenue from Contracts with Customers (Topic 606)* that will supersede nearly all existing revenue recognition guidance under U.S. GAAP and International Financial Reporting Standards ("IFRS"). The standard's core principal is that an entity will recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The guidance may be applied retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initial application recognized at the date of initial application for fiscal years and interim periods within those years beginning after December 15, 2016.
