REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Member
Olympus Securities, LLC
Montville, New Jersey

We have audited the accompanying statement of financial condition of Olympus Securities, LLC as of December 31, 2015, and the related notes to the financial statements. This financial statement is the responsibility of Olympus Securities, LLC's management. Our responsibility is to express an opinion on this financial statement based on our audit.

Except as discussed in the following paragraph, we conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the statement of financial condition is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the statement of financial position. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall statement of financial position presentation. We believe that our audit provides a reasonable basis for our opinion.

We were unable to obtain sufficient appropriate audit evidence supporting the Company's equity security stated at \$7,716 and a liability of \$130,327, which is included in due to clearing brokers, in the statement of financial condition at December 31, 2015; nor were we able to satisfy ourselves as to the carrying value of the equity security or the liability by other auditing procedures.

In our opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the equity security and liability, the statement of financial condition referred to above presents fairly, in all material respects, the financial position of Olympus Securities, LLC as of December 31, 2015 in accordance with accounting principles generally accepted in the United States of America.

5. FAIR VALUE MEASUREMENT

FASB ASC 820 defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach, as specified by FASB ASC 820, are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 – Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access.

Level 2 – Inputs are inputs (other than quoted prices included within level 1) that are observable for the asset or liability, either directly or indirectly.

Level 3 – Are unobservable inputs for the asset or liability and rely on management's own assumptions about the assumptions that market participants would use in pricing the asset or liability. (The unobservable inputs should be developed based on the best information available in the circumstances and may include the Company's own data.)

A description of the valuation techniques applied to the Company's major categories of assets and liabilities measured at fair value on a recurring basis follows.

Equity securities: Securities traded on a registered U.S. securities exchange are valued based on the last sale price of the security reported on the principle exchange on which it is traded, prior to the time when the Company's assets are valued. In the absence of a sale, the security is valued at the last sale price on the prior trading day, if it is within the spread of the current day's closing "bid" and the "asked" prices, and if not, at the current day's closing bid price. To the extent these securities are actively traded, and valuation adjustments are not applied,

5. FAIR VALUE MEASUREMENT (cont'd)

they are categorized in level 1 of the fair value hierarchy. Securities that are traded in inactive markets are categorized in level 2 of the fair value hierarchy.

The following table presents the Company's fair value hierarchy for those assets and liabilities measured at fair value on a recurring basis as of December 31, 2015:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets				
Equity Securities- Semi Conductor	<u>\$ 7,716</u>	<u>\$ --</u>	<u>\$ --</u>	<u>\$ 7,716</u>

The Company had no transfers between any levels during the year ended December 31, 2015.

6. CONCENTRATION OF RISK

In the normal course of business, the Company's activities, through its clearing broker, involves the execution, settlement and financing of various customer securities transactions. These activities may expose the Company to off-balance sheet risk. In the event a customer fails to satisfy its obligations, the Company may be required to purchase or sell financial instruments at prevailing market prices in order to fulfill the customer's obligations.

In the Company's trading activities, the Company has purchased and sold securities for its own account and may incur losses if the market values of the securities change subsequent to year-end.

In addition, the Company bears the risk of financial failure by its clearing broker. If the clearing broker should cease doing business, the Company's receivables from this clearing broker could be subject to forfeiture.
