NOTE 2 - Summary of Significant Accounting Policies (cont.)

Income Tax

The Company, with the consent of its stockholders, elected under the Internal Revenue Code to be an S Corporation effective January 1, 2009. In lieu of corporation income taxes, the stockholders of an S Corporation are taxed on their proportionate share of the Company's taxable income. Therefore, no provision or liability for federal income taxes has been included in these financial statements. The financial statements do include a provision for state replacement taxes.

The Company is subject to the accounting standard for uncertainty in income taxes. The tax effects from an uncertain tax position can be recognized in the financial statements, only if the position is more likely than not to be sustained on audit, based on the technical merits of the position. The Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more likely than not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized, upon ultimate settlement with the relevant tax authority. When applicable, the Company has elected to record any potential penalties and interest related to uncertain tax positions as income tax expense on the Company's statements of income. The Company did not have any uncertain tax positions for the year ended December 31, 2015. Income tax returns for the years ended December 31, 2012 through 2015 remain open, and are subject to review by applicable tax authorities.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Subsequent Events

The Company has evaluated subsequent events occurring through February 12, 2016, the date that the financial statements were available to be issued, for events requiring recording or disclosure in the Company's financial statements.

NOTE 8 - Fair Value of Financial Instruments

The Company follows accounting principles generally accepted in the United States of America for measuring, reporting, and disclosing fair value. These standards apply to all assets and liabilities that are measured, reported, and/or disclosed on a fair value basis.

As defined in the accounting standards, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy ranks the quality and reliability of the information used to determine fair values. Assets and liabilities measured, reported and/or disclosed at fair value will be classified and disclosed in one of the following three categories:

Level 1 - Inputs to the valuation methodology are unadjusted quoted market prices for identical assets in active markets.

Level 2 - Observable market based inputs or unobservable inputs that are corroborated by market data. Inputs to the valuation methodology include

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Unobservable inputs that are unobservable and not corroborated by market data.

OBERWEIS SECURITIES, INC.

NOTES TO FINANCIAL STATEMENTS As of and for the year ended December 31, 2015

NOTE 8 - Fair Value of Financial Instruments (cont.)

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There are no changes in the methodologies used at December 31, 2015:

Fixed Income Securities – Classified as Level 2, as quotes may not be available from pricing vendors a variety of techniques may be used to estimate value. Estimates of value may be based on certain minimum principal amounts (e.g. \$1 million) and may not reflect all of the factors that affect the value of the security, including liquidity risk. The values are not firm bids or offers. The market value of a security may differ from its purchase price and may not closely reflect the value at which the security may be sold or purchased based on various market factors. The majority of fixed income securities held by the Company are municipal bonds.

Mutual funds - Classified as Level 1, as they are traded in an active market for which the Net Asset Values are readily available. The Company primarily invests in The Oberweis Funds.

The Company is responsible for the determination of fair value. The Company has not historically adjusted the prices obtained from the pricing services used. The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The table below and on the following page present the balances of assets and liabilities measured at fair value on a recurring basis by level within the hierarchy.

	December 31, 2015			
	Total	Level 1	Level 2	Level 3
Mutual funds	\$ 239,217	\$ 239,217	\$ -	\$ -
Fixed income securities	5,208,554	-	5,208,554	-
Total Marketable Securities	<u>\$ 5,447,771</u>	<u>\$ 239,217</u>	<u>\$ 5,208,554</u>	<u>\$ -</u>

NOTE 9 - Stockholder Agreement

The transfer of the Company's shares is restricted by a stockholder agreement dated November 17, 2004.

OBERWEIS SECURITIES, INC.

NOTES TO FINANCIAL STATEMENTS As of and for the year ended December 31, 2015

NOTE 10 - Concentrations of Credit Risk

The Company is engaged in various trading and brokerage activities in which counterparties primarily include broker-dealers, banks, and other financial institutions. In the event that the counterparties do not fulfill their obligations, the Company may be exposed to risk. The risk of default depends on the creditworthiness of the counterparty or issuer of the instrument. It is the Company's policy to periodically review, as necessary, the credit standing of each counterparty.

NOTE 11 - Commitments and Contingent Liabilities

The Company was named as the respondent in an arbitration proceeding filed with the Financial Industry Regulatory Authority ("FINRA"). The claimants in the case, who are former customers of the Company, claim that the Company failed to adequately supervise a former registered representative who allegedly recommended several outside investments to the customers. The representative's association with the Company ended nearly five years before the claimants filed the arbitration proceeding. Claimants seek damages in the range of \$5 million to \$10 million, based upon alleged losses in the outside investments. The Company cannot state with certainty what the eventual outcome of the pending arbitration will be. The Company does not believe the resolution of this matter will have a material adverse impact on the results of operations in any future period.

NOTE 12 - Commitments and Contingent Liabilities

The Company is an introducing broker that executes and clears all transactions with and for customers on a fully-disclosed basis with another broker. In connection with this arrangement, the Company is contingently liable for the payment for securities purchased and the delivery of securities sold by customers.

NOTE 13 - Net Capital Requirements

The Company is subject to the Securities and Exchange Commission's Uniform Net Capital Rule (SEC Rule 15c3-1), which requires the maintenance of minimum net capital and requires that the ratio of aggregate indebtedness to net capital not exceed 15 to 1. SEC Rule 15c3-1 also provides that equity capital may not be withdrawn or cash dividends paid if the resulting net capital ratio would exceed 10 to 1. At December 31, 2015, the Company had net capital of \$1,262,751, which was \$1,162,751, in excess of its minimum required net capital of \$100,000. The Company's aggregate indebtedness ratio was 0.53 to 1. No material differences exist between the net capital calculated above and the net capital computed and reported in the Company's December 31, 2015 FOCUS filing.
