2. Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates:

Cash and Cash Equivalents

Cash and cash equivalents consist of cash held at U.S. and foreign banks, deposits with original maturities of less than 90 days, and money market funds. Cash equivalents are carried at cost, which approximates market value. At December 31, 2016, the Company held cash balances at certain financial institutions in excess of the federally insured limit of \$0.3M. The Company regularly monitors the credit quality of these institutions.

Investments in Marketable Securities

Investments in marketable securities are classified as trading and carried at fair value. Unrealized gains or losses related to trading securities are reported within the Statement of Income in the period they occur.

Recognition of Revenue

Marketing and administrative services revenues, as well as underwriter commissions, are accrued and recognized as they are earned.

Notes to Financial Statements

December 31, 2016

Income Taxes

The Company accounts for income taxes under the liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the statement of financial condition carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using the enacted tax rates in the years in which those temporary differences are expected to be recovered or settled. When applicable, a valuation allowance is established to reduce any deferred tax asset when it is determined that it is more-likely-than-not that some portion of the deferred tax asset will not be realized.

Benefits from uncertain tax positions are recognized in the statement of financial condition only when it is more-likely-thannot that the tax position will be sustained upon examination by the appropriate taxing authority having full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured at the largest amount of cumulative benefit that is greater than fifty percent likely of being realized upon ultimate settlement. Tax positions that previously failed to meet the more-likely-than-not recognition threshold are recognized in the reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold are derecognized in the reporting period in which that threshold is no longer met. The Company has not recorded any liability for uncertain tax positions.

As of December 31, 2016 the Company had a deferred tax asset of \$0.1M.

Fixed Assets

Fixed assets are carried at cost, less accumulated depreciation. Depreciation is provided using the straight-line method over the estimated useful life of the assets.

3. Recent Accounting Pronouncements

In August 2016, the FASB issued Accounting Standards Update 2016-15, Statement of cash flows – Classification of certain cash receipts and cash payments (Topic 230). The amendments in this Update apply to all reporting entities. This Accounting Standards Update addresses the following eight specific cash flow issues: Debt prepayment or debt extinguishment costs; settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing; contingent consideration payments made after a business combination; proceeds from the settlement of insurance claims; proceeds from the settlement of corporate-owned life insurance policies (COLIs) (including bank-owned life insurance policies (BOLIs)); distributions received from equity method investees; beneficial interests in securitization transactions; and separately identifiable cash flows and application of the predominance principle. ASU 2016-15 is effective for annual reporting periods in fiscal years that begin after December 15, 2016. This statement is not expected to have a material impact on the Compuny's financial statements.

In October 2016, the FASB issued Accounting Standards Update 2016-17 – Consolidation (Topie 810). The Board is issuing this Accounting Standards Update to amend the consolidation guidance on how a reporting entity that is the single decision maker of a variable interest entity (VIE) should treat indirect interests in the entity held through related parties that are under common control with the reporting entity when determining whether it is the primary beneficiary of that VIE. Under the amendments, a single decision maker is not required to consider indirect interests held through related parties that are under common control with the single decision maker to be the equivalent of direct interests in their entity. Instead, a single decision maker to include those interests on a proportionate basis consistent with indirect interests held through other related parties. The amendments are effective for the annual period ending after December 15, 2016. This statement is not expected to have a material impact on the Company's financial statements.

5. Fair Value of Financial Instruments

Fair Value Measurement

U.S. GAAP defines fair value as the price an entity would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants as of the measurement date. The standard requires fair value measurement techniques to reflect the assumptions market participants would use in pricing an asset or liability and, where possible, to maximize the use of observable inputs. It also establishes the following hierarchy that prioritizes the valuation inputs into three broad levels:

- Level 1 Valuation based on unadjusted quoted prices in active markets for identical assets and liabilities that the Partnership and the Consolidated Investment Funds have the ability to access as of the measurement date. Valuations utilizing Level 1 inputs do not require any degree of judgment.
- Level 2 Valuations based on (a) quoted prices for similar instruments in active markets; (b) quoted prices for identical
 or similar instruments in markets that are not active that are reflective of recent market transactions; or (c) models in
 which all significant inputs are observable, either directly or indirectly.
- Level 3 Valuations based on indicative quotes that do not reflect recent market transactions and models or other valuation techniques in which the inputs are unobservable and significant to the fair value measurement, which includes situations where there is little, if any, market activity for the asset or liability.

As of December 31, 2016, the Company's investments consisted entirely of mutual funds which are valued based off of unadjusted quoted prices.

The Company categorizes investments recorded at fair value in accordance with the hierarchy established under U.S. GAAP. All of the Company's investments at December 31, 2016 are classified as Level 1 positions.
