OAK TREE SECURITIES, INC.
Notes to Financial Statements
April 30, 2017

1. General Information and Summary of Significant Accounting Policies

Description of Business

Oak Tree Securities, Inc. (the "Company"), is registered as a broker and dealer in securities with the Securities and Exchange Commission ("SEC") and the Financial Industry Regulatory Authority (FINRA). It transacts trades in equity securities through other brokers on a "fully disclosed" basis and receives commissions therefrom. In addition, commissions are earned on sales of limited partnership interests, mutual funds and other interests. Certain operating expenses are partially reimbursed by commissioned representatives, such as regulatory fees, insurance and telephone and communication expense.

Basis of Accounting

The financial statements are prepared on the accrual basis of accounting wherein income is recognized as earned and expenses are recognized when incurred. Commission revenue and the related commission expense is recorded on the trade date of transactions.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Cash and cash equivalents

The Company considers all highly liquid financial instruments purchased with an original maturity of three months or less to be cash equivalents.

The Company maintains cash in one bank with FDIC insurance of up to \$250,000. An additional deposit was maintained with a clearing broker, which is insured by SIPC.

Fair Value Measurements

Fair Values are based on quoted market prices when available. In instances where there is little or no market activity for the same or similar instruments, the company estimates fair value using methods, models or assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology, model or input used.

1. General Information and Summary of Significant Accounting Policies (Continued)

Fair Value Measurements (Continued)

U. S. GAAP establishes a hierarchy for inputs (level 1, 2, and 3 inputs, as defined) used in measuring fair value that maximizes the use of observable inputs, and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. Accordingly, the fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in it entirely.

The three levels of inputs within the fair value hierarchy are defined as follows:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity has the ability to access as of the reporting date.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, through corroboration with observable data.

Level 3 – Unobservable inputs, such as internally developed pricing models for the asset or liability due to little or no market activity for the asset or liability.

Additionally, U.S. GAAP requires enhanced disclosure regarding instruments in the Level 3 category (which have inputs to the valuation techniques that are unobservable and require significant management judgment). See note 5, Investment in National Due Diligence Alliance, for additional information.

Income taxes

When appropriate, deferred income tax assets and liabilities are provided for differences between the tax basis of an asset or liability and the reported amounts in the financial statements brought about because the Company files income tax returns on the cash basis.

Depreciation of fixed assets

Furniture and equipment costing \$13,683 was depreciated on a straight-line basis over five years and was fully depreciated at April 30, 2017. There was no depreciation recorded for the year ended April 30, 2017.

OAK TREE SECURITIES, INC.
Notes to Financial Statements
April 30, 2017

2. Net Capital Requirement

As a registered broker and dealer in securities, the Company is subject to the Securities Exchange Commission Uniform Net Capital Rule (Rule 15c3-1).

The Company's ratio of aggregate indebtedness to net capital as defined in the Uniform Net Capital Rule was approximately 1.13 to 1 at April 30, 2017. Aggregate indebtedness and net capital change from day to day. The Company is required to maintain a ratio of less than 15 to 1.

At April 30, 2017, the Company had net capital as defined of \$191,698, which exceeded the minimum requirement of \$14,457. The Company must maintain a minimum net capital of 120% of the minimum required capital to avoid interim reporting requirements.

3. Exemption from Rule 15c3-3

The Company is exempt from certain provisions of Rule 15c3-3 since it does not clear transactions in securities or hold customer funds or securities. The Company carries no margin accounts and promptly transmits all customer funds, delivers all customer securities and will not otherwise hold funds or securities of customers.

4. Cash Deposit

Consistent with industry practice, the Company's clearing broker, Wedbush Morgan, is holding \$17,314 as a deposit for unpaid security transactions.

5. Investment in National Due Diligence Alliance

On December 17, 2013, the Company purchased a one seventh (1/7) interest in the National Due Diligence Alliance, a Non-Profit Organization, ("the Alliance") at a cost of \$8,571. The cost was based on the book value of assets held by the organization. The intent of management is to hold this investment until the termination of the Alliance. This investment is difficult to value and falls within the Level 3 category for Fair Value Measurements, as discussed in Note 1.

6. Related Party

The Company has a one-year related party commitment of \$5,500 per month, which was renewed on January 1, 2017, for management services.

7. Income Taxes

The Company reports its income on the cash method of accounting for income tax purposes and uses the accrual method of accounting for financial statements. The statements include income and expenses generated by commissions receivable from investment companies and commissions payable to Company representatives, which are not reported for tax purposes until the cash is received or paid. These differences create "timing" differences between taxable income and financial statement income.

OAK TREE SECURITIES, INC.
Notes to Financial Statements
April 30, 2017

7. Income Taxes (Continued)

The Company files income tax returns in the U.S. and California. The Company is no longer subject to U.S. federal or state income tax examinations by tax authorities for years before 2013.

The following is the computation of income tax expense:

<u>Income Tax Expense</u>	<u>California</u>	<u>Federal</u>	<u>Total</u>
Net income before income taxes	\$ 69,891	\$ 69,891

Deferred income tax provision	0	0	0
Total income tax expense, including deferred	<u>\$ 11,112</u>	<u>\$ 27,047</u>	<u>\$ 38,160</u>

8. Common Stock

The Company has two classes of common stock. Class A shareholders (one) are entitled to vote for two directors and Class B shareholders (currently, 4) are entitled to vote for two directors.

9. Threatened Litigation

The Company has been threatened with litigation arising from the normal course of business. In December, 2016, the Company filed a claim with its Professional Liability Insurance Carrier and paid a \$25,000 deductible to defend charges of senior suitability and insufficient due diligence. There is no contingent liability in this suit since the liability policy covers 100% of all claims less the \$25,000 deductible.

In March 2017, the Company retained counsel to assist with a FINRA examination which resulted in a fine of \$50,000 being levied against the Company. That fine has been accrued at April 30, 2017.
