To Whom it May Concern,

Thank you for this opportunity to express concerns it our market trades. These are some of my discovered present trading areas of interest. I have filed several SEC complaint forms. I truly feel and have felt Market Volatility was trade ordered movement not HFT. I hope these two submissions are of use to the How and Why.

Sincerely Yours,

Darrell Starr-Jude

One day a time shall exist when a person can invest into a stock. Go to bed, go to work and go in peace through a day without fear. Money invested to the advancement of society through stocks shall be and will be the desired place to increase wealth without fears. An individual customer has a need which becomes satisfied by a product. The individual consumer will select their items of choice. The human by wisdom using the tools of quality, cost and satisfaction will select their product. There will be no a hedge funds or highly financed individuals who believe and say, "They are the gods; they do society a favor by choosing which company shall be successful." Illegal will be downward price drives from which self-appointed individual profit and corporations' struggle. Stock price drops will be a result and byproduct of merchandise failure or the product becoming obsolete due to advancements. This wise knowledge will flow in the minds of the mortal race. It is by **Blood, Sweat and Tears** the riches and rewards of a healthy growing society exist. The intelligent human being understands only God can create from an empty void. A human requires financial funding with the co-operation of many talented individuals imploring vast amounts of time. Major monuments on this earth take mankind years to build, but self-serving unwise individuals' seconds to destroy. This destruction usually the result of age old human vices: lust and greed.

Please, stop wealth growth through the unfair practice of stock shorting. We the People buy stocks to support companies and believe rewards come from successful adventures. Please, return short /puts to their proper place created to protect a stock investor from total losses. Not a tool used for creating stock or corporation failure, but an insurance for a stock investor with loss. No insurance policy would allow an owner to burn their house down and profit: an illegal action worthy of prosecution. We require the protection, goals and functions of the SEC to oversee, then positively aid in the capitol growth of invested stock corporations and their public stock investors.

Market Trading Example Using: Buying and Selling a Car

By dejude42 1/31/2016

I went to the car lot to buy myself a car. I saw this vehicle. I wanted this car. I thought to myself with a BID 15 it's mine.

The sales person approached and said, "Mister this car is a beauty the ASK 25". Then trying to seal the deal, he shaped a smile with a whisper, "You will not find another car like this in this state." Those words produced a quite between us. Then I kicked a tire and thought to myself what an ASK.

"I really feel", and after some time said, "You know this model just turned older and you're priced too high". I began thinking to myself and feeling quite justified. I looked at the trader, and began to do my walk away stride.

I hear in my ear, "I forgot about that fact and what you say is true. Please, turn back around, because in this day - at this very hour: an ASK 20 for you. That is what I'll do".

I smiled, grinned and shook my head. Again, I thought to myself - what an ASK. Then came my mumbled with well place stalls, "I've noticed a dent --- a couple of deep scratches --- and why is the mileage so high. ----- I'll give you a 12 BID and believe me, I am too generous."

I thought I was about to see a car dealer cry when he sighed and spoke, "ASK 18 - the best I can do. Please, go look around. The car maybe here when you come back: show me cash and it is yours in a flash ASK 18."

It wasn't BID 15, but ASK 18 that got my car. The owners ASK relinquishes while the buyer BID is just wishes.

Real life does not allow Widen Spreads. How would you create it legally? Can a thug say, "You're going to sell me that car or else." Immanent Domains do not apply to stocks. Buyers (BID) cannot legally force the sellers (ASK) lower price. A forced lower sale price creates volatility in any environment, as would any forced higher sell price creates loss gains. It is a simple plan: Every month you will pay me insurance, or else...

Individual Stocks must produce worth. This worth is perceived future value, actual dividends and the ability to readily liquidate. Not an easy chore, stock values are sensitive and backdoor lowering very destructive.

Just the Facts: A Trading Analysis Using the Buying and Selling of Car By dejude42 1/31/2016

These facts exist:

- 1.) The Current Stock market is a Spread based on two values- BID (buyers PPS (Price per Share)) and ASK (sellers price).
 - A. BID (current or lower page levels) is only a proposal. BID is a reference numerical value a place holder, a BID by being a suggestion can neither add nor subtract value.
 - B. ASK (current and upper page levels) is actual and future monetary Price per Share worth.
- 2.) The Market at the present time allows the current Spread to form one of two traits.
 - A. A tight Bid and ASK Spread page (**the Current BID and ASK PPS**) window that **will not allow** any new buy and sell orders to be place between the Current BID and ASK Price per Share (PPS).
 - B. A **Widen Spread allows** a window for a trader to place an order into the page or pages of the Current BID and ASK spread. Order insertions obtain the following results:
 - 2B1.) **ANY** inserted BID orders in a Widen Spread window tighten the page window of the Current Widen Spread. The two precise noticeable BID consequences derived by a direct BID trade order insertion:
 - 2B1a.) The BID and ASK Widen Spread integer pages in the window decrease.
 - 2B1b.) A BID PPS order placed directly below the Current Widen Spread ASK PPS returns the Current existing Widen Spread to a tight Spread.
 - 2B2.) Any inserted ASK order into a Current Widen Spread immediately Lowers the Current ASK PPS. ***** This is the backdoor to PPS manipulative lowering. *****
- 3.) The Market at the present time allows (**with the usage of BID and ASK perimeters**) trading engineered methods to lower any stock ASK PPS at an individual's chosen time. This statement is proven by Widen Spread (2B).

IN CONCLUSION:

BID and ASK must be isolated and preserved as two separate components. Their physical appearance may appear to be alike, but when their current amenities purposely destroy gains by devious selected trade action: Individuals must **heed the call** to stop this manipulation.

What Four Decimal Points Mean To an Investor

OPTICAL ILLUSION OR EGYPTIAN CREATION

WHAT A FOUR DECIMAL NUMBER BECOMES

1 OR 1.0000 EQUALS 4 DIGITAL POINTS 1/10000

Hopefully the above is a pyramid: if not draw a pyramid with five levels and label each top to bottom 1 , 1.0 , 1.00, 1.000 and 1.0000.

Use the theory of Einstein "Invert". This inverted pyramid has one share per page. That equals 10000 pages and means 10000 shares are to be relinquished or in the case of longs need to be bought to raise one penny. The mind can go boggle: real or naked shares. Imagine multiple levels with thousands of shares: Last year 40000 companies bought out--- small companies are driven into pink slip.

Investors with the ability to raise the price at .0001 cent at a time become defeated and overwhelmed at the inability to drive price upward. Widen Spreads creates many more blocks and volatility. This is a terrific tool to destroy a lowered price stock.

The small penny gives an investor some worth per share, but the usage of this 1 / 10000 is devastating for a stock rally. An absolute tool used to destroy a weakened corporation and investors possible return to wealth.

This unseen tool used creates wealth to those who gain by stock failure: since no loss can be reported until stock sold. It is a devious way to lose; everyone buying believes they have a chance. Two days ago our rally showed: A rise in PPS is very possible.

Widen Spreads are the reason a stock can trade millions and the majority of shares being buys and lose value.

100 TIMES THE AMOUNT OF SHARES MUST BE BOUGHT TO INCREASE ONE PENNY.

10 TIME 10 = 100 100 TIME 100 EQUALS 10000 OR 1/10000 OF A PENNY.

Current investors buy with no gain are being driven out, future investors are deceived.

Mankind stock price is currently controlled by this type of trading.
