Re: Pay Ratio Disclosure, File No. S7-07-13

Dear Ms. Murphy,

The US is falling behind the rest of the industrialized world due to greed.
The lust for money has a few Americans with more money than they could use in 100
lifetimes but a majority, those that do the actual work, living in shambles.

It is as if they are painting millions into a corner and while they now resemble a moron with
a paintbrush in the hand laughing at the fools the repercussions could be devastating for
this once so great nation!

Sincerely,

rasmus Gjesdal
