INVESTOR INFORMATION

Name: Mr. Mark Alcorn

The decision to change the uptick rule in 2007 was a disaster. It absolutely was a multiplier to the worst market condition since 1928. It contributed greatly to the financial meltdown. The SEC was responsible for changing this rule. It is now your turn to completely reverse it.

Now is not the time to pass a watered down version to replace the current 2007 version. Admit you were wrong and reverse the change back to the way it was pre-2007. Anything short of a full reversal will demonstrate what many small investors now believe...that the SEC has become a puppet of the big money hedge funds and has still not taken its medicine.

Yours,

Mark Alcorn
Boomer/Small Investor
