The Securities and Exchange Commission
S7-10-22

The Enhancement and Standardization of Climate-Related Disclosures for Investors
100 F Street, NE
Washington, DC 20549

Dear Chair Gary Gensler:

On behalf of over 10,000 Americans who want more transparency on climate impacts and goals from companies – including their greenhouse gas emissions and climate targets, The Climate Reality Project urges you strengthen this proposed rule.

We have attached the comment letter we have asked our followers, friends, and volunteers to sign as well as each signatory's name. As you tabulate the the number of comments in favor of a stronger rule on improving and standardize climate-related disclosures, we hope you count each and every one of these signatories as an individual comment.

Thank you for work and commitment.

Sincerely,

Shabd Singh
Legislative Advocacy Manager
The Climate Reality Project

SEC-S7-10-22

555 11th Street, NW, Suite 601
Washington, DC 20004

202-567-6800

www.climaterealityproject.org

Dear Chair Gary Gensler:

The Securities and Exchange Commission's new draft rule for climate risk disclosure is an important first step in protecting investors.

It's a great start to making companies more transparent about their greenhouse emissions and will allow millions of Americans to make more informed investment choices – in everything from retirement funds to college savings accounts.

But the proposed rule doesn't go far enough.

By leaving it up to companies to determine the significance of Scope 3 emissions – particularly when the rule can also shield issuers from liability if they provide false or misleading information – the proposed rule may allow companies to omit some (or most) of their emissions from disclosures.

Please strengthen the final rule to address these loopholes to increase transparency for Americans and protect our planet.

Sincerely,
