

December 20, 2011

Elizabeth M. Murphy
Secretary
Securities and Exchange Commission
100 F Street, N.E.
Washington, D.C. 20549-5546

**Re: Disclosure of Payments by Resource Extraction Issuers
File No. S7-42-10**

Dear Secretary Murphy:

I am pleased to submit the following comments to the Securities and Exchange Commission (the “Commission”) on behalf of the Publish What You Pay coalition (“PWYP”). These comments supplement our comment letters of December 15, 2010, and February 25, 2011 regarding the Commission’s proposed rule to implement Section 1504 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”).

The following responds to issues raised by other commenters in letters to the Commission, provides updates on recent relevant developments in other markets, and highlights how evidence submitted by other commenters supports PWYP’s recommendations.

Many thanks again to the Commission for its dedication and hard work to complete the rulemaking for this important provision. Please let us know if we can provide additional information or if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Isabel Munilla".

Isabel Munilla
Director, Publish What You Pay U.S.

PWYP Supplementary Comments – Project Reporting Definition
Disclosure of Payments by Resource Extraction Issuers File No. S7-42-10
December 20, 2011

We reiterate our recommendation that project should be defined as a lease, license or other concession-level arrangement that assigns rights and fiscal obligations. Royalties, license fees, production entitlements and bonuses – payments which together represent a large share of the financial benefits that accrue to governments from extractive activities – are levied according to the terms of specific leases and licenses. It follows, therefore, that payment disclosures should be made at this level. As noted in our comment dated February 25, 2011, in cases where certain payments are levied at an entity level rather than at the lease/license level (e.g. corporate income tax calculated on the basis of all profits on all projects within a jurisdiction), a limited reporting allowance may be appropriate for those specific payments only. This is consistent with the proposal of Calvert Investments.¹

We take this opportunity to highlight additional support for the recommendation that “project” be defined as lease, license or other concession-level arrangement that assigns it with rights and fiscal obligations:

- The U.S. Department of the Interior (“DOI”) Office of Natural Resources Revenue (“ONRR”), the revenue collection authority for all extractives revenues produced from development on U.S. federal lands, advised the Commission to adopt lease level reporting in an August 4, 2011 letter to the Commission. ONRR states that “[i]f feasible, data should be reported at the lease level” and “[i]f the SEC could incorporate these requirements into its final rule, ONRR believes it may provide a valuable cross-check for the data we receive from resource companies, and help ensure that the **Federal Government and American taxpayers are receiving the proper returns for extraction of these valuable public resources.**² (Emphasis added)
- Companies operating on U.S. federal lands already report at the lease level to the DOI. All companies that are covered by Section 1504’s disclosure requirements and operate on U.S. federal lands must report royalty, sales and other data to the DOI at the lease level for all federal leases, according to DOI requirements.³ See Appendix for an Example of Report of Sales and Royalty Remittance Form MMS-2014.
- Lease-level bonus disclosure is standard practice for bonuses paid to acquire U.S. federal land leases. It is also practiced at the state level. For example, the Bureau of Ocean Energy Management, Regulation and Enforcement (“BOEMRE”) disclosed to the public the Final Bid Recap for Oil and Gas Bid Sale 213 held March 17, 2010 in which companies made approximately \$1.3 billion in bids. All bids made by each company on each lease are disclosed. This includes U.S. and foreign companies, as well as competitors that are not covered by Section 1504’s disclosure requirements. Companies operating as joint ventures are shown with ownership shares made clear. See the Appendix for an excerpt from the Final Bid Recap Report of the bid sale, produced

¹ Freeman, Bennett et al., Calvert Investments, letter to the SEC, March 1, 2011 at <http://sec.gov/comments/s7-42-10/s74210-108.pdf>

² See Prael, Robert, U.S. Department of the Interior, Office of Natural Resources Revenue, letter to the SEC, August 4, 2011, at <http://sec.gov/comments/s7-42-10/s74210-108.pdf>

³ See U.S. Department of the Interior, Office of Natural Resources Revenue, Report of Sales and Royalty Remittance. Form MMS-2014 is used for reporting “royalties, certain rents, and other lease-related transactions,” and requires US operators to identify both the lease and the well that oil, gas and geothermal sales volumes and values, royalty values, and transportation and processing allowance deductions accrue from. In Appendix, and at http://www.onrr.gov/FM/Forms/AFSOil_Gas.htm.

in July 2011.

- The Bureau of Land Management (“BLM”) discloses the Results of Competitive Oil and Gas Lease Sales, which include bid amounts per company.⁴ See the Appendix for an example of a report from Tuesday, July 12, 2011.
- The Alaska Department of Natural Resources, Division of Oil and Gas, discloses bonuses at the lease level.⁵ See Appendix for the Record of Winning Bids of the Competitive Oil and Gas Lease Sale for the Cook Inlet Areawide 2011.
- The U.S. Agency for International Development (USAID), in its July 2011 letter to the Commission specifically supported the law’s project-level reporting requirement, recommending that “project” should be defined under the U.S. law “to ensure that the fullest amount of information” be disclosed. USAID also stated that “vigorous implementation” of Dodd-Frank’s extractive industry disclosure requirements “could contribute to the efficient and effective use of U.S. development dollars and complement U.S. development strategies by ensuring resource extraction dollars benefit the developing country rather than increase the wealth of certain individuals.”⁶
- Calvert Investments notes in its March 1, 2011 letter to the Commission that “Calvert believes that associating the project definition with a particular lease or license is optimal, this methodology should also clarify which and what type of payments should be associated with a particular project. The definition of a project that is associated with a particular lease or license need not require well-by-well or mine-by-mine disclosure. In most jurisdictions, a lease or license is tied to a concession that may be associated with a number of wells or mines.”⁷
- TIAA-CREF notes in its March 2, 2011 letter to the Commission that “[D]isclosure requirements should shed light on the financial relationship between companies and host governments by **linking the definition of project to the individual contracts** between the issuer and host governments.”⁸ (Emphasis added)
- In Indonesia, the EITI reporting template for the oil and gas sectors require companies to report revenues accruing individually from each of their production-sharing contracts (PSC). The Central Government Financial Report of Indonesia (Laporan Keuangan Pemerintah Pusat or LKPP) disaggregates government receipts of the largest revenue streams conveyed by individual oil and gas production units, necessitating company disclosure by PSC.⁹ These templates were approved by BP, Chevron, CNOOC, ExxonMobil, Hess, INPEX, Talisman, Petrochina, Total, ConocoPhillips, the Indonesian national oil company (Pertamina), Freeport and Newmont, and a number of other companies involved in the careful consultations on the template over seven months as part of the

national EITI process, along with government and civil society representatives.¹⁰ The EITI Indonesia Secretariat approved the templates on August 24, 2011. See the Appendix for the EITI Indonesia Quarterly Report April-June 2011, as well as translations of the scoping note and reporting template that were approved.¹¹

- In Bolivia, the Ministry of Hydrocarbons and Energy provides the public with a database that discloses royalty payments received and other information by company on a project by project basis. Projects in this case are called “campo” and mostly pertain to single licenses. This includes royalty payments received by the national government, the national oil company (YPFB - Yacimientos Petrolíferos Fiscales Bolivianos) and regional governments.¹² See Appendix for examples of reports generated from the government database (unofficial English translation included).
- In Peru, Perupetro, the oil and gas sector investment promotion agency, contracting counterparty and contract monitoring institution, makes public a monthly report with production volumes, their value, and royalty amounts per “lote” or concession. Each concession is governed by a contract that is posted for the public.¹³ See Appendix for the October 2011 Report.¹⁴
- The United Steelworkers (“USW”) the largest industrial labor union in North America, representing oil and gas industry workers and mineworkers, supports this proposed definition of project as indicated in their letter to the Commission.¹⁵
- Oil and natural gas workers unions from Nigeria, the most important African supplier of U.S. oil and gas supplies, support this proposed definition of project as indicated in their letters to the Commission. This includes PENGASSAN, the Petroleum & Natural Gas Senior Staff Association of Nigeria, which represents 21,000 Senior and Middle management employees in a variety of oil and gas companies throughout Nigeria, including Chevron Nigeria Limited and Shell Nigeria Gas Limited¹⁶, as well as NUPENG, the Nigeria Union of Petroleum and Natural Gas Workers,

¹⁰ See EITI Indonesia Quarterly Progress Report April-June 2011 at P. 5 (“Extractive industry companies [oil, gas and mining] have been continuously involved in the process, especially its more formal aspects, such as familiarization efforts, meetings of the Implementation Team, a trial run filling out of draft reporting templates, and a workshop for the more formal filling out of those templates in Bali.”) The report also includes a list of the companies and other participants involved in the process. Available in the Appendix and at [http://ipa.or.id/files/EITI%20INDONESIA%20QUARTERLY%20PROGRESS%20REPORT%20April%20-%20June%202011%20\(English\).pdf](http://ipa.or.id/files/EITI%20INDONESIA%20QUARTERLY%20PROGRESS%20REPORT%20April%20-%20June%202011%20(English).pdf)

¹¹ See Id. and supra note 9.

¹² See Bolivia Ministry of Hydrocarbons and Energy *Sistema de Generación de Reportes de Regalías y Participaciones por la producción de Hidrocarburos* at <http://regalias.hidrocarburos.gob.bo/Default.aspx>. A “project” in this case is called campo, or field, and in the Bolivian context, all of these “campos” refer to individual licenses. The database also includes, per project: Information on hydrocarbon production by Department; production of hydrocarbons by “Campo”; production of hydrocarbons by Contractor; amounts in U.S. dollars received by each beneficiary provincial government from January 2002 to December 2010; valuation prices for each product (Natural Gas, Oil, Liquefied Petroleum Gas); transportation rates applied for the determination of prices at the Control Point; percentage of sales of oil for each market (external and internal). This system is updated continuously with the issuance of each monthly Settlement Report by the Ministry of Hydrocarbons and Energy. See the Appendix for an example of reporting.

<http://www.sec.gov/comments/s7-42-10/s74210-78.pdf>

¹⁶ Bayo Olowoshile, General Secretary, Petroleum and Natural Gas Senior Staff Association of Nigeria, letter to the SEC, June 27, 2011, at <http://sec.gov/comments/s7-42-10/s74210-93.pdf>

representing thousands of workers in prospecting, drilling, distribution and marketing of petroleum and natural gas in Nigeria.¹⁷

- The European Commission's ("EC") October 25, 2011, legislative proposals to require extractive industry payment disclosures for listed and non-listed companies through amendments to the Transparency and Accounting Directives recognize that reporting by concession could effectively achieve project-level reporting. The draft legislation proposes that "project" should be equivalent to "the lowest level of operational reporting unit at which the undertaking prepares regular internal management reports, **such as a concession**, geographical basin, etc. and where payments have been attributed to such projects."¹⁸ (Emphasis added). The EC explicitly recognized the benefit of project reporting set at the lease/license level in an explanatory memorandum released with the legislative proposal:

"By requiring disclosure of payments at a project level... local communities would have insight into what governments were being paid by EU multinationals for exploiting local oil/gas fields, mineral deposits and forests... [such that] civil society would be in a position to question whether **the contracts** entered into between the government and extractive and logging companies had delivered adequate value to society and government."¹⁹ (Emphasis added)

To meet the EC objectives as envisioned, projects must be defined in reference to those agreements (i.e. leases/licenses and other concession-level arrangements) that establish the fiscal terms of development.

The benefits of project-level reporting are clear

- **Project-level reporting allows investors and others to identify significant payments, which would otherwise be hidden by aggregated reporting.** Given that projects have different risk profiles depending on their geographic location in a country, project-level payment data may help investors better assess a company's risk exposure. For example, bonus payments for projects in Angola have been sizable, in some cases exceeding \$1 billion for one project.²⁰ Such sums would clearly be material to investors, but without project reporting, this payment would be folded into aggregated figures, preventing investors from assessing risk.
- **Project-level reporting increases safety and security for workers.** Some industry commentators have claimed that transparency would jeopardize employee safety. In contrast, unions in North America and Nigeria have argued that this disclosure increases worker safety and security. The

¹⁷ Elijah Okougbo, General Secretary, Nigeria Union of Petroleum and Natural Gas Workers, letter to the SEC, July 8, 2011, at <http://sec.gov/comments/s7-42-10/s74210-97.pdf>

²⁰ See "New deal for Sinopec in Angola". The Standard (Hong Kong), May 23, 2006. At http://www.thestandard.com.hk/news_detail.asp?we_cat=10&art_id=19231&sid=8085690&con_type=1&d_str=20060523. See also Human Rights Watch, *Transparency and Accountability in Angola*, April 13, 2010, PP. 5-6 for details such as "In the late 1990s, approximately US\$970 million in bonus payments were used for opaque arms purchases...[in May 2004] Sonangol announced that Chevron had paid a \$210 million signing bonus and an \$80 million social bonus payment to extend its concession on Block O in Cabinda until 2030...In 2006 Sonangol announced the winners of a new oil license bidding round and disclosed a world-record set of bonuses worth more than \$3 billion." At http://www.hrw.org/sites/default/files/reports/angola0410webwcover_1.pdf

United Steelworkers note in a letter to the Commission that, "...secrecy surrounding flows of resources from companies to governments at the project level contributes to an environment where disputes can thrive. In the case of resource extraction projects, these disputes can turn violent, thereby destabilizing investments to the detriment of workers and shareholders." In addition, "it is in such closed, opaque environments where the health and safety conditions of workers are poor." For this reason the United Steelworkers, "believe that enhanced transparency would in fact enhance employee safety...It creates a strong incentive for resource companies to resist pressure by governments to enter into investment agreements that only benefit a select group of government insiders. It also creates a strong incentive for governments to promote investment agreements that can serve as a pathway to poverty reduction, stable economic growth and development. One aspect of this development is safer workplace."²¹

Unions in Nigeria agree. PENGASSAN notes in its letter to the Commission that, "Revenue transparency, including project-level payment disclosure, will help create incentives for investment that benefits communities, alleviating much of the violence in the volatile Niger Delta and improving the safety of our members."²² NUPENG adds, "The unpredictable investment environment in Nigeria often leads to militancy and criminal activities in the Niger Delta with our members as major victims of kidnappings and killings. Revenue transparency, including project-level payment disclosure as contained in the communities' memorandum of understanding with companies, will help create incentives for investment that benefits communities, alleviating much of the violence in the volatile Niger Delta and improving the safety of our members."²³

This perspective is shared by one of the largest gold mining companies in the world. Newmont Mining has argued publicly that the company's voluntary payment disclosure, future Section 1504 reporting and the Foreign Corrupt Practices Act, serve as insurance policies to protect its employees in operating environments around the world.²⁴

- **Project payment data is crucial for local communities to hold their national and local governments to account for ensuring that the full local benefits of project development are delivered.** Since these same communities and their descendants bear the majority of the negative environmental and socio-economic impacts of extractive projects, it is crucial that they have the evidence to ensure the benefits outweigh the costs. For example, in the Philippines, project reporting would help indigenous communities secure the benefits from extractive activities they are due under the law. Under [proper citation] indigenous communities have a legal right to a minimum of 1% royalty on gross income on mining projects in their ancestral domains.²⁵ By some estimates, the Tagonito mine in Mindanao generates an average of \$1.5 billion in revenues *each year*. However according to economic analysis from Revenue Watch Institute, total contribution to the local indigenous community has totaled not more than or \$1.2 million *for the last 20 years combined*. Project-by-project reporting would allow Philippine communities to collect their entitlements, as well as help the government to keep track of what is being extracted.

²¹ See supra note 15

²² Bayo Olowoshile, General Secretary, Petroleum and Natural Gas Senior Staff Association of Nigeria, letter to the SEC, June 27, 2011, at <http://sec.gov/comments/s7-42-10/s74210-93.pdf>

²³ Elijah Okougbo, General Secretary, Nigeria Union of Petroleum and Natural Gas Workers, letter to the SEC, July 8, 2011, at <http://sec.gov/comments/s7-42-10/s74210-97.pdf>

²⁴ See Anderson, Chris, Statement at EITI Conference, Paris, March 3, 2011, at <http://soundcloud.com/eiti/paris2011-emerging-reporting-requirements>.

²⁵ See Republic of the Philippines, Republic Act No. 7942, Sections 16 and 17, March 3, 1995, at <http://www.mgb.gov.ph/Files/Policies/RA%207942.pdf>

- **Similarly, project payment data is important for local governments, which may experience the majority of the negative environmental and socio-economic impacts of a project.** In these cases, local governments may struggle to provide the necessary environmental remediation and social protection services needed by their citizens. Information on the payments made by the project or projects in their jurisdiction is crucial to support, for example, efforts to change the revenue transfer formula, or increase government funding for environmental and social programs, or to underpin local government engagement in national debates on energy and mineral development.
- **Finally, project payment data is crucial for citizens and for sub national governments, to ensure accountability in the transfer of funds between national and sub national governments.** A lack of transparency in such transfers obscures discrepancies and corruption, and can ultimately lead to disputes, and even de-stabilizing conflict. These can be centered on the equity of, or discrepancies in revenue transfers and allocations. This has been seen in the Niger Delta, for example, where the amount of money returned to the oil producing region has been a major impetus for unrest in the region (and a bargaining chip for peace negotiations).²⁶

Project-level reporting will not impair competitiveness

- No industry commenters have raised concerns or provided evidence of material competitive impacts in that would result from disclosure under Section 1504 in their annual reports to investors between 2008 and 2010. This suggests that claims to the contrary are overblown.²⁷
- There is no evidence in the public record that disclosures required by Section 1504 provide sufficient information to create competitive disadvantage for issuers during a bidding process. Indeed, the commercial realities of deal-making in the extractive industries involve a wide array of complex factors including the fiscal terms offered, technological capacity, capital available, and others.²⁸
- The recent bidding success of Statoil, which publishes payments to Angola, demonstrates that transparency of government payments has no impact on a company's ability to win bids.²⁹

²⁶ See Osuoka, Asume Isaac, "Oil and Gas Revenues and Development Challenges for the Niger Delta and Nigeria", P. 5. Paper presented at the Expert Group Meeting on The Use of Non-Renewable Resource Revenues for Sustainable Local Development, United Nations, September 23, 2007, at

http://www.un.org/esa/sustdev/sdissues/institutional_arrangements/egm2007/presentations/isaacOsuoka.pdf

²⁷ A review of annual reports to shareholders from 2008-2010 of issuers submitting comments to the SEC, as of October 17, 2011, found no mention of material competitive or cost impacts from implementation of Section 1504, nor the underlying legislation, the Extractive Industries Transparency Disclosure Act (introduced in the U.S. House of Representatives in 2007 and in the U.S. Senate in 2008), or the Energy Security Through Transparency Act (introduced in the U.S. Senate in 2009). In contrast, several issuers note the need for increased reporting for Section 1503, the Mine Safety Disclosure provision of the Dodd-Frank Act.

²⁸ See Offenheiser, Raymond, Oxfam America comment letter to SEC, February 21, 2011, at Section V, Point B at 23-24 at <http://www.sec.gov/comments/s7-42-10/s74210.shtml>. Industry claims that payment data can be used to determine commercial terms have not been substantiated.

²⁹ Statoil announced in December 2011 that it had been granted operator status for two promising deep-water, pre-salt blocks considered "a frontier play with high potential" and participant status in three other blocks in Angola. See Steve Marshall, *Statoil in Angola pre-salt driving seat*, Upstream Online, December 20, 2011, at

http://www.upstreamonline.com/live/article295028.ece?WT.mc_id=recharge&news_rss. Statoil is one of the most proactively transparent oil companies in the world on government payments, while Angola is regularly cited as one of the chief opponents of disclosure. As argued by EarthRights in comments to the SEC, if transparency were a major determinant in the awarding of projects, then it is difficult to imagine that Statoil could have won its bid especially after the enactment of Section 1504, which applies to Statoil as a registrant with the Commission. For details, see EarthRights comment to the SEC, September 20, 2011, P. 14 at <http://sec.gov/comments/s7-42-10/s74210-111.pdf>

- Further, there can be even less adverse impact on competitiveness if other jurisdictions also adopt project level reporting. The European Union seems likely to do so, for example.³⁰

Project-level reporting is extremely unlikely to lead to the disclosure of legitimate commercially sensitive information

- The European Commission “takes the view that in majority of cases the disclosure of payments to government on a country and project basis where those payments have been attributed to a specific project (with a materiality threshold) **would not give direct insight into confidential company information[...]**”³¹ (Emphasis added).
- Section 1504 will not require issuers to reveal contemplated transactions, business models, proprietary technology, or confidential communications.³² Bon Secours Health System confirms in its letter to the Commission that “Section B(q) requires the disclosure of tax, royalty and other payment information, but not the commercial terms of contracts. As such, the required disclosures should not put any covered issuer at a competitive disadvantage relative to an entity in the industry that is not yet covered.”³³

Project-level reporting is extremely unlikely to lead to the disclosure of information that is not already available to competitors

- Contracts – or the fiscal terms for projects - are already available for competitors to access through a variety of mechanisms. For example:
 - The Barrows Company online collection³⁴ and various Wood Mackenzie reports or client advisory services³⁵. Wood Mackenzie’s Global Economic Model (GEM), its proprietary economic modeling software, combines Wood Mackenzie’s unique and proprietary data, both historic and forecast, with company interests, price decks and fiscal models to produce cash flow and valuation reports. It contains more than 190 fiscal regimes covering the globe. A Columbia Law School study of 150 oil and mining contracts confirms that at least competitors have access to these contracts.³⁶

³⁰ See supra note 13.

³¹ See http://ec.europa.eu/internal_market/accounting/docs/sme_accounting/review_directives/20111025-legislative-proposal_en.pdf Section 2.2.2. at P.6.

³² Section 1504 will also not require the disclosure of data deemed by the Qatar government to be “commercially sensitive information”, including “actual or projected production costs, revenues or reserves.” See Mulva, Patrick T., ExxonMobil, Letter to the SEC, March 15, 2011, at P. 5, at <http://www.sec.gov/comments/s7-42-10/s74210-73.pdf>.

³³ Gerardo, Edward, Bon Secours Health System, letter to the SEC, March 1, 2011 at <http://sec.gov/comments/s7-42-10/s74210-51.pdf>; Calvert Investments also notes that Section 1504 disclosures are limited to payments related to a contract, and “competitors of a covered issuer would not be able to discern the terms of a contract or license without addition information regarding production, abatements, the terms of tax holidays, and other special considerations.” See supra note 1 at P.5.

³⁴ The Barrows Company, Inc. “The complete texts of petroleum laws and contracts is contained in Basic Oil Laws & Concession Contracts, which includes National Oil Company Statutes and LNG Contracts. Mining Legislation contains the texts of mining laws in all countries.” At <http://www.barrowscompany.com/>; See also Global Data’s Oil and Gas eTrack available at [http://oilandgasettrack.com/](http://oilandgasetrack.com/).

³⁵ <http://www.woodmacresearch.com/cgi-bin/wmprod/portal/energy/productMicrosite.jsp?productOID=664078>

³⁶ See Rosenblum, Peter and Maples, Susan, Contracts Confidential: Ending Secret Deals In The Extractive Industries, Revenue Watch Institute, 2009, at <http://www.revenuewatch.org/news/publications/contractsconfidentialendingsecretdealsextractiveindustries>

- Many countries already disclose contracts to the public. This includes, for example, Liberia³⁷, Democratic Republic of the Congo³⁸, Mongolia³⁹, Peru⁴⁰, Timor-Leste⁴¹, Ghana⁴², and Ecuador⁴³.
- Leading companies disclose contracts, including Kosmos Energy, which disclosed its contracts in Ghana to the Commission as part of its recent Initial Public Offering. Tullow Oil disclosed its contracts in Ghana on its website.⁴⁴ BP has disclosed the production sharing agreements and host government agreements for projects in the Caspian region.⁴⁵
- The World Bank Board adopted a new policy for its International Finance Corporation in May 2011 encouraging client countries and companies to disclose their extractive industry contracts. The policy will become mandatory for oil, gas and mining clients it finances in May 2013.⁴⁶

There is no support in the statutory language for “project” to be defined to refer only to material projects

Finally, as noted in our February 25, 2011 letter to the Commission⁴⁷, we reiterate that requiring disclosure of only “material” projects would contravene the statute and the Congressional intent.

³⁷ Liberia includes contract disclosure in its EITI law. See Liberia Extractive Industry Act of 2009, July 10, 2009, Authority Ministry of Foreign Affairs, Monrovia, Liberia, at P. 5 at <http://www.leiti.org.lr/doc/act.pdf>.

³⁸ DRC has made all mining contracts public on the Ministry of Mines website at http://mines-rdc.cd/fr/index.php?option=com_content&view=article&id=92.

³⁹ See for example, the Oyu Tolgoi Investment Agreement of October 6, 2009. Chapter 15, paragraph 21 on P. 34 states: “This Agreement shall be made public.” At <http://www.sedar.com/GetFile.do?lang=EN&docClass=14&issuerNo=00002549&fileName=/csfsprod/data101/filings/01485709/00000001/s:\CORPSEC\IMines\AGRMNTS\Mongolia\IA Docs\IA.pdf>

⁴⁰ See oil contracts on the Perupetro website at http://www.perupetro.com.pe/wps/wcm/connect/perupetro/site/InformacionRelevante/Cont_ContratosyConvenios; See mining contracts on the Ministry of Energy and Mines website at <http://www.minem.gob.pe/descripcion.php?idSector=1&idTitular=189&idMenu=sub154&idCateg=189>

⁴¹ The Timor-Leste Petroleum Act (2005) requires all oil and gas contracts signed after the law’s effective date to be publicly disclosed. See Article 30 which prescribes disclosure of “authorizations” defined as “an Access Authorisation, a Petroleum Contract, a Prospecting Authorisation or a Seepage Use Authorisation or any agreement made in respect of such an Authorisation or Contract”. Act available at <http://resources.revenuewatch.org/en/official-document/timor-leste-petroleum-act>. As a result, the majority of Timor-Leste’s Production Sharing Contracts (PSCs) have been published. Contracts can be found on the La’o Hamutuk NGO website www.laoahamutuk.org. Contracts signed before 2006, including the PSCs for the Bayu-Undan and Elang-Kakatua oil and gas fields, have been released by the operating partners (ConocoPhillips, ENI, Santos, INPEX and the Tokyo Electric and Gas Company), with paragraphs omitted. **REPORT OF SALES AND ROYALTY REMITTANCE
FORM MMS-2014**

INSTRUCTIONS

This form is used to report royalties and other obligations due on Federal and Indian oil and gas, and geothermal leases. For detailed instructions and examples on how to complete and submit this form, please refer to the *Minerals Revenue Reporter Handbook*. If you need to speak with someone about your reporting, call 1 (800) 525-0309 or 1 (800) 525-7922.

Send completed Form MMS-2014 to:

Minerals Management Service
Minerals Revenue Management
P.O. Box 5810
Denver, Colorado 80217-5810

Paperwork Reduction Act of 1995 (PRA) Statement: The PRA (44 U.S.C. 3501 *et seq.*) requires us to inform you that we collect this information to document details of royalty payments and sales of minerals from leases on Federal and Indian lands. The MMS uses the information to maintain and audit lease accounts. Responses are mandatory (43 U.S.C. 1334). Proprietary information is protected in accordance with standards established by the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1733), the Freedom of Information Act [5 U.S.C. 552(1), (4)], and Department regulations (43 CFR 2). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The public reporting burden for this form is estimated to average 3 minutes per line for electronic reporting and 7 minutes per line for manual reporting. These estimates include the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct any comments regarding the burden estimate or any other aspect of this form to the Information Collection Clearance Officer, Minerals Management Service, Mail Stop 5438, 1849 C Street, NW., Washington, DC 20240.

PREFACE

The Final Bid Recap lists bid-specific information from a lease sale. Individual copies of the bid recap for a particular sale are available for several months following the completion of the bid evaluation process, which takes approximately 60-90 days following the sale day.

Copies of the bid recap are available from the address below at the cost of \$5.00 each. Payment may be made by check, money order, or cash.

EXPLANATION OF TERMS USED

BID TYPE:

RS20 - Bonus Bidding system with a fixed royalty rate of 18 3/4%; possible royalty suspension of 35 bcf for >=20,000 feet; (0-<200 meters water depth)

RS15 - Bonus Bidding with a fixed royalty rate of 18 3/4%; possible royalty suspension of up to 15 bcf for >=15,000 feet subsea depth but <18,000 feet or up to 25 bcf for >=18,000 feet but <20,000 feet or 35 bcf for >=20,000 feet; (200-<400 meters water depth)

RS16 - Bonus Bidding with a fixed royalty rate of 18 3/4%; possible royalty suspension for 5 mmboe (400-<800 meters water depth)

RS17 - Bonus Bidding with a fixed royalty rate of 18 3/4%; possible royalty suspension for 9 mmboe (800-<1600 meters water depth)

RS18 - Bonus Bidding with a fixed royalty rate of 18 3/4%; possible royalty suspension for 12 mmboe (1600 - 2000 meters water depth)

RS19 - Bonus Bidding with a fixed royalty rate of 18 3/4; possible royalty suspension for 16 mmboe (>2000 meters water depth)

RNK - Rank is the order of bid when more than one bid is submitted for a tract. The high bid is listed first; successive bids are listed in descending monetary order.

R - Denotes Rejected Tract

I - Invalid high bid on G33635 which under Phase 1 evaluation criteria was deemed unacceptable in accordance with BOEMRE regulations.

N - Denotes No Issue Lease

EITI Indonesia Scoping Note

Approved by the Implementation Team on August 24th, 2011

Overview

Indonesia is implementing the Extractive Industries Transparency Initiative (EITI), the global initiative for oil, gas and minerals revenue transparency.

Under the EITI, oil, gas and mining firms report the amount of revenues that they have conveyed to the government. Meanwhile, the government reports how much of these revenues it collects. The comparison and publication of these figures is overseen by a multi-stakeholder committee.

Decisions on “scope” are an important part of the EITI process. Scope refers to:

1. The extractive sectors, companies, and production units that will report.
2. The types of revenue streams that will be reported *and* the government entities collecting these revenue streams that will fill out templates.
3. Amounts (both in physical amounts and in dollars or rupiah surrendered to the government) above which revenue streams will be reported on.
4. Whether amounts reported by industry vs. government will be crosschecked with an effort to see whether figures can be brought into alignment (reconciled) with a possible limited audit of figures that do not agree *or* whether a full audit will take place for figures that do not match.
5. The degree of disaggregation (at the level of individual production units, at the level of companies, or only at the level of total revenue streams collected by the government) at which information will be presented in the final EITI Report
6. The time period that will be covered in the first reporting period.

This note provides recommendations with respect to each of these six dimensions of scope. These recommendations will be submitted for consideration to the multi-stakeholder Implementation Team in early August 2011.

1. Reporting companies

EITI Indonesia is meeting EITI criteria and Government of Indonesia policy goals to bring in all extractive industry producers to the EITI process in Indonesia. The largest oil & gas, copper & gold, tin, bauxite, nickel and coal producers in Indonesia, and the material producing units owned by these firms, will constitute the industry-side reporting entities during the first cycle of Indonesia’s implementation of the Extractive Industries Transparency Initiative (EITI).

The first year of the template submission and reconciliation process is a learning time for all EITI candidate countries. Indonesia is no exception to this rule, particularly in view of the vast complexity of the nation, which is the most populous extractives-rich nation in the world.

Indonesia has more than 230 million people, over 17,000 islands, 10,500 district-licensed mining permits, hundreds of national oil, gas, mineral and coal licenses, more than 2,000 languages, 500 districts, 33 provinces and three time zones.

In view of the vastness of the nation, EITI Indonesia is mindful of the need to do the possible, not the impossible, during the first round of EITI template submission and reconciliation. The nation wants to keep its commitment to produce a first report and complete validation by April 2013. In this regard, having each and every extractives producer submit templates under the first (or any other round) of EITI is impossible in Indonesia. Even if it were possible, such a report would be meaningless, as it would contain too much information. In short, Indonesia is striving for what is practicable and doable.

For the first year, the decision has been taken to require reports from all companies with conveyances of *non-tax revenues* to the state above a certain material threshold.

For oil and gas companies, the major non-tax revenues are volumes of oil and gas surrendered to the government by producers, as is required by the production sharing contracts which govern all oil and gas production in the country. Oil and gas surrendered to government by producers falls into two categories. One is the government's post-cost recovery share of oil and gas. The other is domestic market obligation (DMO) oil surrendered to the state by producers from their share of the split. Any oil and gas company whose total monetized value of oil and gas surrendered to the state in 2009 was in excess of \$10 million will be required to submit EITI reporting templates for all of its producing Production Sharing Contracts. Based on this criterion, **49 revenue-paying production sharing contracts controlled by the 20 largest oil and gas producing companies in the country will report.** See the Summary Table below.

For mineral and coal companies, the major form of non-tax revenues conveyed to the state are royalties. Any mineral or coal company whose total royalty surrendered to the state in 2009 was in excess of \$1 million will be required to submit EITI reporting templates. Based on this criterion, five copper and/or gold companies, four tin, two bauxite and three nickel companies will report, as will Indonesia's 28 largest coal companies and the 40 production units they control. See the Summary Table below.

Non-tax revenues are being used to determine materiality thresholds because the Directorate General of Tax maintains that Indonesian tax law prevents it from disclosing the amount of taxes paid by companies. Although EITI expects information on tax revenues paid by major extractive producers to be submitted by companies as a part of the reporting process, and to be reproduced in Indonesia's first EITI report, this information is not available now.

In any case, volumes of oil and gas surrendered by producers to the state are the largest extractive industry revenue stream in Indonesia, and are therefore the most relevant for making determinations of materiality insofar as the oil and gas sector is concerned. Income taxes paid by

oil and gas companies are in fact determined by taking a fixed (and far lesser) percentage of non-tax revenues.

However, for mineral and coal companies, royalties are typically far less than income taxes, and are less useful indicator of materiality.

The summary table below lists the material firms and producing units which occupy each of the major extractive industry sectors in Indonesia, and the percentage of total non-tax revenues for which these firms and units account, according to government sources of information.

Summary table: Distribution of highest-producing firms and units in Indonesia's oil, gas, minerals and coal sectors

Sector	Number of firms	Number of production units	% of national non-tax revenue streams accounted for by units
Oil and Gas	20	49*	Oil: 99.9
			Gas: 100
Copper and/or Gold	5	5	Copper: 100
			Gold: 99.2
Tin	4	4	Tin: 90
Bauxite	2	2	Bauxite: 100
Nickel	3	3	Nickel: 100
Coal	28	40	Coal: 99.7
Total	62	103	

*In addition to 49 oil and gas operators reporting on a range of revenue streams, the 81 partners of these operators will report their corporate and dividend tax.

As the table shows, a total of 62 firms, and 103 units controlled by these firms, account for most and in some cases all of the conveyances of oil, gas, mineral and coal non-tax revenues. State-owned extractive firms Pertamina (oil and gas), Aneka Tambang (gold and nickel), Timah (tin), and Bukit Asam (coal) are represented in the lists of firms.

Although all production units belonging to *all* oil and gas *companies* with any production unit which pays non-tax revenues in excess of \$10 million will be required to report, and although *all* production units belonging to all mineral and coal *companies* with *any* production unit which pays non-tax revenues in excess of \$1 million will be required to report, the government itself will report on *all* oil, gas, mineral and coal production units that convey non-tax revenues in any amount to the government.

Note: Pertamina E&P is constituted as a single PSC. Its main producing licenses are known as *Daerah Operasi Hulu* (DOH), of which it is believed to possess about ten. A special subsidiary of Pertamina E&P also controls half of the Cepu Block in East Java. Pertamina Hulu Energi (PHE) is a separate company from Pertamina E &P, and operates (mostly) under the auspices of Joint Operating Bodies (JOB) and Joint Development Agreements (JDAs) with selected operators. Under JOBs or JDAs, PHE is considered as a joint operator, including for purposes of conveying to the state its share of equity oil and gas.

Source: "Perusahaan yang setoran PNBP nya di Tauhun 2009 ditenggarai di atas Rp 7 Milyar," and "Komoditas: Nikel," Directorate General of Minerals and Coal, Ministry of Energy and Mineral Resources, 2011. Royalties on nickel paid by state-owned tin mining company PT Aneka Tambang were reported separately by the firm. All figures in the table were originally reported in IDR, but have been converted to USD using the exchange rate of IDR 8,900 = USD 1.

Note: There are in all likelihood more nickel firms that paid more than USD 0 but less than USD 1 million in royalties in 2009. The names of these firms were requested from the Directorate General of Minerals and Coal, but were not provided. The summary calculations in the table immediately above and in the Summary Table on page 2 are, therefore, based only on what data the Directorate General was able to provide.

Coal

Indonesia is the largest exporter of thermal coal in the world, exporting fifty percent more than Australia and twice as much as Russia, respectively, the world's second and third largest thermal coal exporters. Thirty percent of the Indonesia's 40 richest men and women have made the majority of their money in the coal sector. Eighteen percent of the capitalization of the national stock market is made up of coal companies.

There are considerations that are unique to the coal sector in Indonesia. The coal sector is exceptionally de-concentrated, and difficult to capture in its entirety in the context of EITI reporting. According to public statements by the Director General of Minerals and Coal, the nation has between 10,500 district mining licenses, two-thirds of which are for coal.

The Directorate General, however, has only been able to account for the identities of about 8,900 of these mines. Moreover, for the specific purpose of this scoping exercise the Directorate General was only able to provide the names of KPs which had paid royalties in excess of IDR 8.1 million (approximately \$ 700,000). It was estimated that there were "thousands" which had paid royalties of less than that amount. If the Ministry of Energy and Mineral Resources cannot get a handle on the identities of coal KP/IUP and amounts of royalties paid by them, it is not realistic to expect EITI Indonesia to do so.

EITI Indonesia has taken the decision to focus primarily on the 30 national coal contracts of work and the nine KP/IUP with royalty payments in excess of \$1 million per year. This amounts to 99.7 percent of all reported payments from coal producers.

EITI Indonesia has decided to wait until future years to request reports from coal firms that pay less than \$1 million per year in royalties.

Sources: “DHPB in percentage ranking of total value 2009 and “Daftar Name Pemegang KP/IUP Bahan Galian Batubara Yang Setoran PNBP Nya Diperkirakan Mencapai ... Rp 8.1 Milyar Per Tahun Periode Tahun 2009,” Directorate General of Minerals and Coal, Ministry of Energy and Mineral Resources, 2011. All figures in the table were originally reported in IDR, but have been converted to USD using the exchange rate of IDR 8,900 = USD 1.

Note: There are in all likelihood many, many more coal firms that paid more than USD 0 but less than USD 1 million in royalties in 2009. The names of these firms were requested from the Directorate General of Minerals and Coal many times, but were not provided. The summary calculations in the table immediately above and in the Summary Table on page 2 are, therefore, based only on what data the Directorate General was and/or willing to provide.

2. Revenue streams that will be reported on by firms and government

Oil and gas revenues:

The oil and gas operators (and, where noted, partners) listed in Section 1 will submit templates on the conveyances of the following oil and gas revenue streams to the government:

- Government share of equity oil (including condensate) and gas surrendered by operators to the government.
- Payments by operators to compensate the government for over-lifting of operator's share of equity oil (and condensate) and/or gas ("over-lifting").
- Dollar-denominated increase in current or future year's equity share allocated to operators that under-lifted their share of equity oil (and condensate) and/or gas ("under-lifting") in the previous year.
- Domestic Market Obligation oil surrendered by operators to the government (in exchange for a typically-nominal Domestic Market Obligation fees).
- Corporate and dividend tax.
- Signature bonus paid by operators.
- Production bonus.

The following government entities will submit templates for **all** oil and gas companies listed in Section 1 for the following revenue streams:

The Directorate General of Oil and Gas, in the Ministry of Energy and Mineral Resources, will report the:

- volumes of the government's share of equity oil (including condensate) and gas surrendered by reporting PSC operators,
- volumes of DMO oil surrendered by reporting PSC operators,
- value of any signature bonus paid by reporting PSC operators.

The Executive Agency for Upstream Oil and Gas Business Activities (BPMIGAS), under the authority of which the government's share of equity oil (including condensate) and gas are monetized, will report:

- The dollar value of the government's share of equity oil (including condensate) and gas, whether sold for export or sold domestically under the supervisions BPMIGAS.
- The dollar value of over- and under-lifting
- The dollar value of Domestic Market Obligation fees paid to operators.

The Directorate for Non-Tax Revenues, in the Directorate General of Budget, in the Ministry of Finance will report:

- The dollar value of the government's share of equity oil (including condensate) and gas, whether sold for export or domestically.
- The rupiah value of DMO oil purchased by domestic refineries
- The dollar value of over- and under-lifting payments.
- The dollar value of corporate and dividend payments of operators and partners.
- The dollar value of production bonuses paid by operators.

The Directorate for Non-Tax Revenues in the Directorate General of Budget, in the Ministry of Finance will also report its reduction of the government's share of equity oil (including condensate) and gas by the following three revenue categories:

- Land and Building Tax, 10 percent of which will be paid to the central government, and 90 percent of which will be redistributed to local governments.
- Value Added Tax refunds to Operators.
- Local Tax and Retribution, which will be paid to local governments to cover the local tax obligations of the Operator.
- The dollar value of Domestic Market Obligation fees paid to operators.

Mineral and coal revenues:

Mineral & coal firms listed in Section 1 will submit templates on the conveyances of the following revenue streams to the government:

- Mineral and coal royalties
- Income tax
- Land and building tax
- Dead rent a.k.a. land rent
- Dividends (paid by the state-owned companies Antam, Timah, and Bukit Asam as well as at least one large private producer, Freeport)

In addition, mineral and coal producing firms will disclose another 10 types of revenue streams which will not be reconciled.

The following government entities will submit templates for **all** mineral and coal companies listed in Section 1 for the following revenue streams:

The Directorate for Development of Minerals and Coal Businesses, in the Directorate General of Minerals and Coal, in the Ministry of Energy and Mineral Resources will report:

- mineral and coal royalties paid by producers
- dead rent or land rent paid by producers

The Directorate for Potential, Compliance and Receipts, in the Directorate General of Tax, in the Ministry of Finance will report:

- income taxes paid by mineral and coal producers
- land and building taxes paid by mineral and coal producers

The Directorate for Non-Tax Revenues, in the Directorate General of Budget, in the Ministry of Finance will report:

- dividends conveyed by state-owned producers and at least one large private producer which is partly owned by the state.

EI revenues redistributed by the central government to provincial and district governments.

The Directorate General of Fiscal Balancing in the Ministry of Finance will report on the amount of each firm's equity oil (including condensate) and gas, and mineral or coal royalties, redistributed to each producing province, producing district and non-producing districts within the producing province. Reporting templates will be created by the Team for the Formation of the EITI Indonesia Secretariat in consultation with the Directorate General of Fiscal Balancing in the Ministry of Finance in the coming months.

3. Amounts above which selected revenue streams will be reported

For PSC operators and partners, government share of equity oil conveyed to the state above one barrel, or government share of equity gas conveyed to the state above one thousand standard cubic feet (MSCF) will be reported. Any individual monetized revenue stream which is conveyed by any oil and gas PSC operator or partner, or mineral or coal production unit, in excess of either IDR 100,000 or USD 10 per year, will be reported.

4. Reconciliation vs. audit

Article 8 of Indonesia's Presidential Regulation on Transparency of National and Local Extractive Industry Revenues (26/2010), calls for the appointment of a *rekonsiliator* (or reconciler), not an auditor. As such, efforts will be made to reconcile discrepancies between industry and government submissions. In some instances, where efforts to reconcile discrepancies do not bear fruit, limited audits may be warranted and are authorized. However, it is expected (hoped) that most numbers in the report will not require auditing by the reconciler.

5. The degree of disaggregation

In view of the fact that the Ministry of Finance's LKPP publishes one extractive industry payment stream (government share of equity gas) down to the level of individual reporting production units (see pages 4 to 13 of this scoping note), it is the recommendation of the Formation Team that Indonesia's first EITI Report should be fully disaggregated, to the level of individual payment types and individual reporting production units.

6. The time period that will be covered by the first and the subsequent report

The first report will cover revenues conveyed and collected during calendar year 2009. A second report will cover those conveyed and collected in calendar year 2010.

Informe de Actividades

OCTUBRE 2011

» PRESENTACIÓN

El presente informe muestra el resumen mensual de las actividades en las diferentes funciones de PERUPETRO S.A. y de los Contratistas.

La información que se presenta está referida al número de contratos suscritos, el registro sísmico y los pozos perforados por los operadores; los ingresos, retribuciones y transferencias originados; las actividades promocionales y eventos presenciales realizados; la información técnica referente al Banco de Datos y a estudios geológicos y geofísicos, etc.

- Modificación de Contrato por Cambio de Garante Corporativo, Modificación de Anexos A y B, Cambio de Denominación del Contratista, etc.

CONTRATISTA	LOTE	MOTIVO	ESTADO
Vetra Perú S.A.C.	XXV	Cambio de Garante Corporativo en el Contrato de Licencia, solicitado por Vetra Energy Group LLC., para ser sustituido por Vetra Energia S.L.	En trámite para el MINEM
Olympic Perú Inc. Sucursal del Perú	XIII	Cambio de Garante Corporativo en el Contrato de Licencia, solicitado por Compañía Minera Pullalli Limitada para ser sustituido por Olympic Perú Inc.	Tramite en MINEM
Olympic Perú Inc. Sucursal del Perú	XIII	Solicitan modificación del Contrato de Licencia, en dos Contratos diferentes (XIII-A y XIII-B).	Proceso de Evaluación
Petrolifera Petroleum del Perú S.A.C.	133	Modificación de los Anexos A y B	Tramite para el MINEM
UNIPETRO	IX	Modificación de la Tabla de Retribuciones-Acápite 8.3 del Contrato	Espera de informes sobre justificación económica por parte de UNIPETRO
Petrobras Energía Perú S.A.	X	Modificación de la Cláusula de Octava del Contrato de Licencia del Lote X	PERUPETRO emitirá carta respuesta
Vietnam American Exploration Company, Llc, Sucursal del Perú	Z-38	Modificación del Contrato a efectos de incorporar: La nueva denominación del Contratista mediante el cual Vietnam American Exploration Company, Llc, Sucursal del Perú se Transforma en Pitkin Petroleum Perú Z-38 S.R.L., y el cambio de Garante Corporativo, de Vietnam American Exploration Company, Llc por Pitkin Petroleum Plc.	En trámite a Directorio
SK Energy, Sucursal Peruana	Z-46	Solicitan modificación de Contrato efectos de reflejar el cambio de dominación social de su matriz (de SK Energy Co. Ltd a SK Innovation Co. Ltd.) y de su Sucursal. (de SK Energy, Sucursal Peruana a SK Innovation, Sucursal Peruana)	Se solicitó requisito para la aprobación de Cesiones en los contratos por Hidrocarburos según AD No. 081-2011
SK Energy, Sucursal Peruana	8	Solicitan modificación de Contrato efectos de reflejar el cambio de dominación social de su matriz (de SK Energy Co. Ltd a SK Innovation Co. Ltd.) y de su Sucursal. (de SK Energy, Sucursal Peruana a SK Innovation, Sucursal Peruana)	Se emitió Informe de Modificación del Contrato
SK Energy, Sucursal Peruana	56	Solicitan modificación de Contrato efectos de reflejar el cambio de dominación social de su matriz (de SK Energy Co. Ltd a SK Innovation Co. Ltd.) y de su Sucursal. (de SK Energy, Sucursal Peruana a SK Innovation, Sucursal Peruana)	Se emitió Informe de Modificación del Contrato
SK Energy, Sucursal Peruana	88	Solicitan modificación de Contrato efectos de reflejar el cambio de dominación social de su matriz (de SK Energy Co. Ltd a SK Innovation Co. Ltd.) y de su Sucursal. (de SK Energy, Sucursal Peruana a SK Innovation, Sucursal Peruana)	Se emitió Informe de Modificación del Contrato
Petrobras Energía Perú S.A.	X	Modificación del Contrato de Licencia a fin de reflejar la sustitución del Garante Corporativo original, PETROBRAS BRASILEIRO S.A. – PETROBRAS., por PETROBRAS INTERNACIONAL BRASPETRO B,V,.	Se emitió carta al Contratista
Petrobras Energía Perú S.A.	57	Modificación del Contrato de Licencia a fin de reflejar la sustitución del Garante Corporativo original, PETROBRAS BRASILEIRO S.A. – PETROBRAS., por PETROBRAS INTERNACIONAL BRASPETRO B,V.	Se emitió carta al Contratista
Petrobras Energía Perú S.A.	58	Modificación del Contrato de Licencia a fin de reflejar la sustitución del Garante Corporativo original, PETROBRAS BRASILEIRO S.A. – PETROBRAS., por PETROBRAS INTERNACIONAL BRASPETRO B,V,.	Se remitió carta al Contratista
Petrobras Energía Perú S.A.	103	Modificación del Contrato de Licencia a fin de reflejar la sustitución del Garante Corporativo original, PETROBRAS BRASILEIRO S.A. – PETROBRAS., por PETROBRAS INTERNACIONAL BRASPETRO B,V,.	Se remitió carta al Contratista
Petrobras Energía Perú S.A.	117	Modificación del Contrato de Licencia a fin de reflejar la sustitución del Garante Corporativo original, PETROBRAS BRASILEIRO S.A. – PETROBRAS., por PETROBRAS INTERNACIONAL BRASPETRO B,V,.	Se remitió carta al Contratista
Petrolera Monterrico	XV	Modificación del Contrato de Licencia a fin de reflejar la sustitución del Garante Corporativo original, Constructora Roxi S.A. por la empresa Obras y Servicios Petroleros S.A.C.	En Proceso de evaluación

- Publicaciones

- Se publicó un aviso en la revista Desde Adentro.

- Otros

- **Comisión para elaboración de Propuesta Técnico Legal para la exploración/explotación de hidrocarburos no convencionales.** Continúa evaluación.
- **Edición de la versión del libro "Perú 2011" a cargo de la empresa The Oil and Gas Year.** Se coordina la edición final de la publicación.
- **Participación en reportaje a ser difundido en la cadena FOX-Canal 5- Nueva York.** Se completó la entrega de información y filmación de actividades hidrocarburíferas.
- **Edición de video sobre actividades de exploración y/o explotación de hidrocarburos en la actualidad en el Perú.** Se completó la filmación de actividades hidrocarburíferas.

5. Protección Ambiental y Relaciones Comunitarias

Se desarrolla acciones que propicien la interacción entre los actores de la industria hidrocarburífera y la coordinación para el cumplimiento de las normas sobre Consulta a Poblaciones Indígenas, Participación Ciudadana y Protección Ambiental, a través de los grupos funcionales siguientes:

5.1 Protección Ambiental

- Estado de los Estudios Ambientales:

En proceso de aprobación:

EIA	EIA-sd	PMAs
12	1	14

Leyenda:

EIA: Estudios de Impacto Ambiental

EIA-sd: Estudios de Impacto Ambiental semi detallado

PMAs: Plan de Manejo Ambiental

Durante el mes de octubre se aprobaron los siguientes estudios ambientales:

- EIA del Proyecto de Sísmica 3D en Capahuari Norte - Sur, Tambo Este y Jíbaro Nor Este – Jibarito del Lote 1-AB
- EIA del Proyecto de Perforación hasta de (02) Pozos Exploratorios desde la Plataforma DOM-1 en el Lote 116
- PMA del Proyecto Programa Sísmico 2D Sector Caco del Lote 114

- Actividades de gestión ambiental:

ACTIVIDAD	LUGAR	FECHA	MOTIVO
Participación en simulacro de derrames en el Lote 8	Trompeteros	01-02/10/11	Visita a áreas del Plan Ambiental Complementario (PAC) y área de residuos e instalaciones de batería 1. Participación en simulacro de control de derrames realizado por la empresa Pluspetrol Norte en el Lote 8.
Reuniones de la Comisión Técnica Multisectorial para el derrame de petróleo en las comunidades nativas Canaán de Cachiyacu y Nuevo Sucre – Lote 31-B	CENSOPAS	06/10/11	Reunión para coordinar el avance de los acuerdos y las siguientes actividades con las comunidades nativas Canaán y Nuevo Sucre. Participaron MINAM (coordinación), OEFA, CENSI, CENSOPAS, DIGESA y PERUPETRO.
	PERUPETRO	14/10/11	
Participación en monitoreo de OEFA en el Lote 31-B	Contamana	17/10/11	Participación en el monitoreo de agua de la quebrada Mashiría realizado por OEFA en el Lote 31-B como parte de los acuerdos de la Comisión Técnica Multisectorial, con la presencia de MINAM y PERUPETRO.
Participación en simulacro de derrame en el lote Z-1	Tumbes	18/10/11	Participación en un simulacro de derrame de hidrocarburo en la plataforma Albacora Z-1-A-8.
Reunión con ANA	ANA	19/10/11	Reunión para tratar sobre el tiempo de los trámites y autorizaciones.
Reunión con Pacific Stratus Energy	PERUPETRO	21/10/11	Revisión del borrador del Plan Maestro de la reserva Nacional Matsés.
Participación en simulacro de derrames y monitoreo ambiental del Lote 58	Cusco	22-25/10/11	Participación en un simulacro de derrames en el pozo Taini 3X y monitoreo ambiental de agua superficial en el río Urubamba y calidad de aire en el campamento La Peruanita ubicados en el lote 58.
Reunión con OEFA	OEFA	25/10/11	Reunión de coordinación para tratar temas de interés como pasivos ambientales, planes de abandono, entre otros.
Reunión con DGAAE	MINEM	26/10/11	Reunión de coordinación sobre estudios ambientales en evaluación.
Reunión con OSINERGMIN	PERUPETRO	27/10/11	Reunión de coordinación sobre los trabajos relacionados a la terminación de contratos, y otros temas de interés común.
Reunión con Maurel et Prom	PERUPETRO	27/10/11	Reunión para tratar sobre los permisos ambientales pendientes posteriores a la aprobación del EIA.

5.2 Relaciones Comunitarias

Durante el mes de Octubre se han desarrollado reuniones de trabajo interinstitucional relacionadas al cumplimiento de la Ley de Consulta Previa y han continuado las acciones internas para desarrollar procedimientos de Consulta Previa. Así mismo se ha realizado actividades de difusión ante Gobiernos Regionales, locales y Universidades, organizaciones indígenas sobre Participación Ciudadana así como actividades futuras en las áreas comprendidas en Proceso de Selección 2011.

- Resumen de actividades desarrolladas:

ACTIVIDADES	EN EL MES	ACUMULADO
Reuniones relativas al Procedimiento de Consulta	03	19
Participación en eventos convocados por el Ministerio de Energía y Minas	02	13
Participación en talleres de fortalecimiento de capacidades	01	11
EP		03
Reuniones de Comités de Supervisión	04	
Reuniones en el Marco de las Normas de Participación Ciudadana	07	

- Actividades de coordinación y reuniones de difusión:

Nº	FECHA	LUGAR	MOTIVO
1	03-10-11	Perupetro	Reunión con TECPETROL LOTE 174 SAC para dar cumplimiento al Art. 29º RM N° 571-2008-EM
2	05-10-11	Perupetro	Coordinaciones con el GOREU sobre presentación de TECPETROL LOTE 174 SAC en el marco del D.S.012-2008-EM
3	18 – 28-10-11	Perupetro	Coordinaciones con TECPETROL LOTE 174 SAC y ERM relacionado a Scouting social en el lote 174
4	20, 21, 26 y 28-10-11	Perupetro	Participación en Comité de Supervisión de Petrominerales, Perenco, Repsol, Consultora de Petróleos y Sub Andean.
5	18 -28-10-11	Perupetro	Preparación de la Convocatoria para la realización del Evento Presencial correspondiente al Lote 174.

6. Oficinas Descentralizadas

LOCALIDAD	ACTIVIDADES	ORGANIZADOR	PARTICIPANTES
TARAPOTO	1. Participación como observador en la reunión Informativa sobre la perforación del Pozo Situche Norte 4X y el Programa de Relacionamiento con el Proyecto de Desarrollo del Situche, realizado el 04 y 05 de octubre 2011 en Tarapoto.	1. TALISMAN	1. El Presidente y toda la directiva saliente y entrante de la FASAM y representantes de las 10 comunidades que lo integran. Funcionarios de TALISMAN.
	2. Participación en el Taller Informativo sobre la presentación del Plan de Manejo Ambiental del Proyecto de Perforación del Pozo Situche 5x del Lote 64, realizado en la Comunidad Nativa KATIRA el 18 de octubre 2011.	2. TALISMAN	2. Miembros de la FASAM, profesionales de TALISMAN, de Walsh Perú, Ministerio de Energía y Minas, Dirección Regional de Energía y Minas de Loreto y PERUPETRO.
	3. Reunión de capacitación, para la Organización FEPIKRESAM en la difusión del Portal de PERUPETRO, realizado en la OTAR, el 27 de octubre 2011.	3. PERUPETRO OTAR.	3. Miembros de la Directiva de la FEPIKRESAM
	4. Charla de capacitación correspondiente a la difusión del Portal web de Perupetro S.A. para los fines de información acerca de la industria petrolera, medio ambiente y de participación ciudadana a la Institución Educativa IEGPVCH "San Lorenzo", dirigida a los alumnos del 5º año de Secundaria, realizado el 24 de octubre.	4. PERUPETRO-OTAR-SAN LORENZO	4. Alumnos de 5º año de Secundaria y docentes de IEGPVCH "San Lorenzo".
IQUITOS	1. Viaje al Lote 8, integrando la Comisión de Inspección del incidente ocurrido en el oleoducto Capirona-Corrientes, donde se verificó un corte de 8 cm x 2mm a la altura del km 43 + 436 del oleoducto de propiedad de PLUSPETROL NORTE, realizado en Villa Trompeteros, Provincia de Loreto - Nauta de la Región Loreto, en la cuenca del Río corrientes, los días 05, 06 y 07 de octubre.	1. Fiscalía Especializada en Materia Ambiental.	1. PERUPETRO S.A., Policía Nacional del Perú, DIGESA, ALA, OEFA, GOREL, PLUSPETROL.
	2. Participación como exponentes en charlas de Difusión en Loreto a diferentes instituciones de la ciudad de Iquitos, organizada por la Gerencia de Promoción y Comunicaciones, realizado del 11 al 14 de octubre.	2. PERUPETRO S.A. PRCO-OIQT.	2. Colegios Profesionales, Centros Educativos, Cámara de Comercio y Turismo de Loreto, Periodistas.
	3. Reunión el Rectorado de la Universidad Nacional de la Amazonía Peruana (UNAP), donde se abordaron temas de interés mutuo, como la ampliación del convenio marco, entre PERUPETRO S.A. y la UNAP y el apoyo del CAREC a otras facultades en capacitación en actividades de hidrocarburos.	3. PERUPETRO S.A.	3. UNAP, CAREC.
	4. Participación en el Fórum 40 años de Extracción Petrolera en Loreto : en busca de Lecciones, realizado en el auditorio del Instituto de Investigaciones de la Amazonía Peruana IIAP, Iquitos, el 27 de octubre.	4. SPDA	4. PERUPETRO S.A., Grupo Propuesta, WWF, USAID, Blue Moon Fund, IIAP, UNAP, Red Anticorrupción Loreto.
PUCALLPA	1. Participación en la Ceremonia de Inauguración del "XI Programa de Pasantía en Hidrocarburos para Líderes de Comunidades Amazónicas" sede Pucallpa, realizado en Yarinacocha-Pucallpa, el 14 de octubre.	1. MEM-DGAE	1. 20 pasantes indígenas de COMARU, ORICOCA, CART, FECIDPAM, CAH, FECONACURPI, FECONBU y FECONAU; OO.II. ORAU y CONAP; autoridades regionales y locales y representantes de empresas del sector petrolero.
	2. Participación en el Taller Final del Programa de Monitoreo y Vigilancia Ciudadana para el Proyecto de Sísmica 2D en el Lote 162, realizado en el Auditorio del Hotel Sol del Oriente – Pucallpa, realizado el 18 de octubre.	2. PVEP PERU / GEMA	2. 18 Monitores Comunitarios, PVEP, GEMA, GEOKINETICS, DREMU, autoridades regionales y locales.
	3. Expositor en el I Foro Regional de Hidrocarburos - Pucallpa 2011, realizado en la Sede Pucallpa, el 28 de octubre.	3. OSINERGMIN – Oficina Regional Pucallpa.	3. OSINERGMIN, GOREU, DREM-U, MTC, MPCP, MGP, MAPLE, PETROPERU, CCITU, autoridades civiles y políticas, regionales y locales.

LOCALIDAD	ACTIVIDADES	ORGANIZADOR	PARTICIPANTES
TALARA	1. Se asistió en calidad de observador al Monitoreo Socioambiental Comunitario del Plan de Relaciones Comunitarias de acuerdo al EIA aprobado del Proyecto de "Perforación de pozos Exploratorios, de Desarrollo y facilidades de producción del Lote Z-2B" en plataforma SC1, frente a la localidad de La Bocana de Colán, Paita, empresa Savia Peru S.A., realizado el 04 de octubre.	1. Empresa Savia Peru S.A.	1. Monitores Comunitarios de La Bocana de Colán, PERUPETRO S.A.
	2. Participación en calidad de observador al Seminario Taller: "Fortalecimiento de las Capacidades para el Cumplimiento de la Normatividad Ambiental en el Subsector Hidrocarburos en la Región Tumbes" organizado por la OEFA en Tumbes, realizado el 17 de octubre.	2. OEFA	2. OEFA, BPZ Exploración & Producción S.R.L., Capitanía del puerto de Tumbes, OSINERGMIN, PERUPETRO S.A. y Organizaciones Civiles.
	3. Participación en el Simulacro de actuación ante evento de derrame de hidrocarburos organizado por la empresa BPZ Exploración & Producción S.R.L., desarrollado en cercanías a la plataforma "Albacora" en el mar de Tumbes, realizado el 18 de octubre.	3. BPZ Exploración & Producción S.R.L.	3. Empresa BPZ Exploración & Producción S.R.L., Capitanía del puerto, OEFA, OSINERGMIN, PERUPETRO S.A. y ORGANIZACIONES CIVILES.
	4. Charla de capacitación correspondiente a la difusión del Portal web de Perupetro S.A. para los fines de información acerca de la industria petrolera, medio ambiente y de participación ciudadana a la Institución Educativa: "Ignacio Merino" dirigida a los alumnos del 5to año de Secundaria, realizado el 28 de octubre.	4. Perupetro - OTAL.	4. Participantes alumnos del 5to año de Secundaria, del Colegio Nacional "Ignacio Merino".
CUSCO	1. Participación del 3er FORUM denominado: "MEJORES PRACTICAS, ESTANDARES Y TECNOLOGIAS PARA LAS ACTIVIDADES DE HIDROCARBUROS EN LA AMAZONIA PERUANA. Organizado por la Empresa E-tech Internacional y el Gobierno Regional Cusco, realizado el 13 y 14 de Octubre del 2011.	1. E-TECH y Gobierno Regional del Cusco.	1. Pluspetrol, Repsol, DREM, Gran Tierra, OEFA, COMARU, FECONACO, OEFA, DEFENSORIA DEL PUEBLO, SERNANP, CIAM, MINAM, PERUPETRO S.A.
	2. Participación de la Reunión Informativa del PMB (Programa de Monitoreo de Biodiversidad) en el año del proyecto Camisea, desarrollado en la ciudad de Lima, el día 17 de Octubre 2011.	2. TGP y Pluspetrol	2. Pluspetrol, TGP, CECONAMA, MINEM, PERUPETRO S.A. MINAM, Universidad Católica, COMARU, CGBU.
	3. Durante el mes de Octubre se continúa con la Supervisión de los programas de visitas en la exhibición de la Sala Amazónica de colegios e institutos emblemáticos de la ciudad de Cusco.	3. PERUPETRO S.A., Pluspetrol, ONG Asociación Karetí Makluji.-OCUS.	3. Colegios e institutos Emblemáticos de la ciudad de Cusco.

- Estudios Geología & Geofísica

- “Evaluación Geológica / Geofísica de la Cuenca Madre de Dios.” BASE DE DATOS- GEOLOGIA: Se encuentra suspendido el avance. DATA DE NAVEGACIÓN Y SISMICA: Sin avance.
- Actualización al año 2010 del CATALOGO: “Evaluation of the New Field Wildcats drilled between 1990 and 2002 in the Maranon, Ucayali, Madre de Dios, Santiago, Huallaga and Trujillo Basin and Camisea Gas and Condensate Fields”. Avance : 95 %.
- “Evaluación Geológica y Geofísica de la Cuenca Marañón” (incluye nueva información sísmica y de pozos obtenidos en los últimos 10 años). Continúa con la verificación y carga de las diferentes campañas sísmicas.
- “Vectorización de líneas sísmica en cuenca Marañon”. Continúa con la Vectorización de líneas sísmica.
- Convenio PERUPETRO-IRD. Cuenca Tumbes: “Análisis estratigráfico y estructural de la Cuenca Tumbes” (IRD-PERUPETRO).

8. Planeamiento y Presupuesto

- Implementación del Sistema de Control Interno:

Se continúa con el seguimiento de las actividades de implementación del sistema de control interno, llevándose a cabo reuniones con las Gerencias/Divisiones de manera quincenal y reuniones mensuales de Grupo Directivo.

A octubre se tiene un total de 70 actividades implementadas, de las cuales 48 se han realizado con esfuerzo propio de PERUPETRO. Hay 18 actividades en proceso.

A octubre, el nivel de cumplimiento es de un 80%.

- Contrato del Servicio de Optimización del Proceso de Supervisión de Contratos:

El 28 de diciembre del 2010 se suscribió el Contrato con el CONSORCIO SYSTEMS SUPPORT - NEXSYS – SOA.

Se han completado las fases de Análisis, Diseño, Ambiente de Desarrollo, Arquitectura Tecnológica y la Topología de los Servidores y Desarrollo de Interfaces y de la Aplicación BPM.

Al 31 de Octubre, ya se ha capacitado al primer grupo de Usuarios de Supervisión de Contratos en el uso de la Aplicación BPM, también con los mismos usuarios se ha realizado la prueba final del primer proceso, el cual ha sido conforme. Se tiene previsto continuar con la Capacitación y las Pruebas Finales.

A la fecha el proyecto tiene un avance estimado del 80%.

- Presupuesto 2011:

Al mes de Setiembre los ingresos representan el 105.01% respecto del Presupuesto 2011

En la siguiente tabla se muestra la distribución de los ingresos:

- Distribución de Ingresos al mes de Setiembre 2011:

Ingresos	Millones de nuevos soles		% de Ejecución
	Presupuesto a Setiembre	Ejecución a Setiembre	
Regalías	3,875.36	4,156.50	107.25
Venta de hidrocarburos	1,216.49	1,189.05	97.74
Ingresos financieros	17.13	16.39	95.69
Otros ingresos	7.73	11.12	143.81
Total	5,116.72	5,373.06	105.01

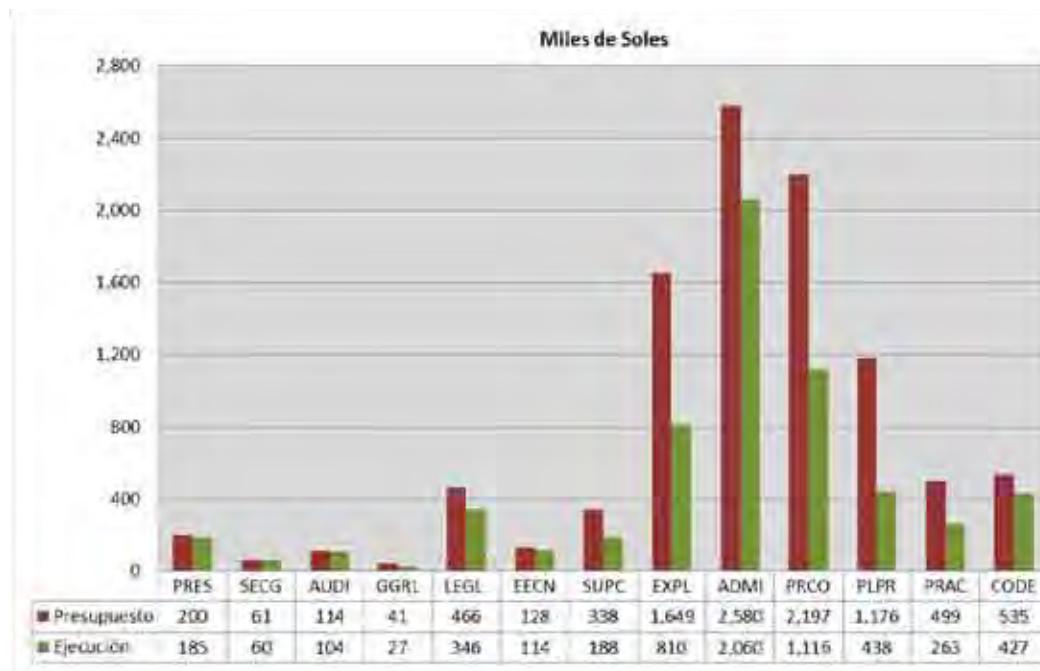

La mayor ejecución es consecuencia, principalmente, de la mayor valorización de los hidrocarburos líquidos (mayores precios en el mercado internacional) y de los mayores precios del gas natural en el mercado interno y para la exportación.

En lo pertinente a los egresos totales, estos alcanzaron los 5,365.61 millones cifra que representó el 104.63% de lo presupuestado. En la siguiente tabla se muestra la distribución de los egresos.

- Distribución de Egresos al mes de Setiembre 2011:

Egresos	Millones de nuevos soles		% de Ejecución
	Presupuesto a Setiembre	Ejecución a Setiembre	
Operativos	1,072.79	1,049.07	97.79
Transferencias	4,054.73	4,316.15	106.45
Gastos de Capital	0.60	0.39	65.02
Total	5,128.11	5,365.61	104.63

Ejecución del Presupuesto de Operación por Áreas a Setiembre 2011
 (Incluye Gastos por Servicios de Terceros, Tributos y Cargas Diversas de Gestión)

9. Recursos Humanos

Modalidad	Número de personas
