Subject: 79 FR 7239 Security and Exchange Commission Performance Planning Comment March 10, 2010

I Anthony G Bryant submit my concerns for this agency does not think in terms of inner cities and or rural communities and with over 800 Billion dollars of bailouts of publicly held companies and all of the booms and bust from dotcoms to mortgage crisis and now pensions funds and other municipal bond issuance since I was deemed in error by many components of the regulatory agencies that have relationships with government officials many working on the very final rules and later becoming direct lobbyist . I submit that this agency does not care about minority businesses at all and anytime a effort is made to participate within the markets that final rule are not user friendly enough induce any real benefits and incentives for example many Publicly Traded companies bid on large government contracts for example Boeing and other such as Booze Allen Hamilton by the way they receive about 97 percent of their profits from the Department of Defense with their capacity they qualify for Insurance Bonding that provides for jobs not within the low to moderate income communities and rural communities that are in need of economic development . I deem this agency to be disconnected and a plan must consider the impacts of all American citizens . I have made several local ,county , state and federal comments to induce the planning community to be historically based , open to different and layperson ideas and measurable programs and activities for all since my company Bryant Group Inc founded in 1993 and Port City Services LLC founded in 2002 was deemed by local ,county ,state and federal law enforcement as a criminal enterprise for filing a EPA , JUSTICE , Interior , Housing and Urban Development , HHS, Social Security Administration , US Postal Services , Internal Revenue Service components of the Justice DEA , ATF , and Executives of the US Attorney Office many once retired and leave the government are consultants , lawyers , direct lobbyist for many corporations under the agency of the Securities and Exchange Commission with 16.9 percent unemployment for 18 to 24 years old in inner cities and for example in the State of North Carolina over 26 percent unemployment is their a strategic plan for those citizens ? I submit the following attachments as a protest to the lack of planning regarding the question presented in hopes of shedding the light on those as Ralph Ellison called the " Invisible Man" I would now paraphrased the " Invisible American Citizen " . I am against the Comcast request to merge with Time Warner for my Internet service was submitted to criminal discovery as well as my email account with Google regarding my Procurement and Grant Fraud Email to the Justice Department October 2008 and all Region Four Atlanta Justice Department Components and Region Seven Criminal Discovered as well I hope within your strategic plan that all citizens are protected under the 14th Amendment section one and two for the only person that benefits from those protections are Corporate Executives .

Respectfully Submitted

Anthony G Bryant
