

****What follows is not a call for violence against the Government of the United States of America; it's a plea for cooperation between the Government and the people. We the People, call on the Federal Government, the many State Governments, and local City level Governments of the United States of America. We call on you to ensure the freedom of the American people, the people that elected you. Peace is the highest aspiration of the American people; on the Great Seal of the United States, the Eagle carries the olive branch of peace and the arrows of war. "E Pluribus Unum" Latin, "One from many" we are the many; we eagerly offer the olive branch.****

The American Blockchain,

When we the people of the United States of America are presented with the new 'Digital' Dollar, whether it be a Token on a Blockchain, or the coin of the Blockchain, the limitations and access the Federal Government has, is written into the code of that Blockchain. This new asset class will allow the American people a type of freedom they have never known, financial freedom. The need for this freedom has become apparent over many decades, however we the people will not accept a corrupt centralized Blockchain to replace the broken, outdated, and corrupt economic system we have today. Instead when in the course of human events, it has become necessary for a new monetary policy to be created, the rights and freedoms of the American People must be protected. The Unalienable Rights defined in the Declaration of Independence, must be taken into consideration when forming a Centralized Bank Decentralized Currency (CBDC). The American people will have financial freedom, whether they understand Blockchain technology or not, it is the responsibility of our elected officials, from the city level to the Federal level, to ensure the Blockchain that will support the new 'Digital' Dollar does not violate people's financial freedom or their Unalienable Rights.

"That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed" The new consent (or vote) of the governed (the people) will be in the Blockchain. The Federal Government must ensure the Blockchain used for the 'Digital' Dollar does not strip the people of this consent (vote). If the Federal Government designs the Blockchain in a way that removes or controls the consent (vote) of the governed (the people) they are in violation of the Declaration of Independence, "That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government". The American people our owed a 'Digital' Dollar that does not deny them freedom or their Unalienable Rights. The American Blockchain will be built in a way that protects individual freedoms, and limits Government access to the individual's wealth. The need for an American Blockchain is evident by looking at the United States Dollar today, and its history. To prove this, let Facts be submitted to a candid world.

-In April, 1933 all gold (under \$100 worth) was 'bought' from the American people at 20.67 Dollars an ounce. In June, 1933 privet ownership of gold was outlawed. In 1934 the price of

gold was set by the Government at 35.00 Dollars an ounce, the Federal Reserve balance sheets increased 69%. The American people would not be able to own gold bullion again until 1974, three years after the gold standard was completely abandoned in 1971. By this point the American people had come to accept the new Fiat Dollar, mostly because there was no better currency.

-In 2008, the Federal Reserve began Quantitative Easing (QE), the creation of more national debt and the creation of more Dollars in circulation. In 2000 the national debt was around 5.6 Trillion Dollars, by 2010 it was around 13.5 Trillion Dollars, and two years later in 2012 it was about 16.7 Trillion Dollars. Quantitative Easing picked up in 2020, the debt in July, 2020 was about 26 Trillion Dollars, by October, 2020 it had reached 27 Trillion Dollars. Despite the need or desire for the QE, the main concern is the massive increase in the amount of debt and Dollars being created by the Federal Reserve.

Whether unintended or by design, the United States Dollar is being undermined on a massive scale, with little end in sight. Currently the Federal Reserve is buying bonds at a rate of 120 Billion Dollars a month (5/21). The American Blockchain would have a set inflation rate, that could only be changed by the consent (or vote) of all users (the people) on that Blockchain. The Federal Government would no longer be allowed to print as much money as it wants. All coins created would need the support of the American people, voting on the Blockchain to give or deny the Government the ability to create the coins. 'Digital' Dollars can be held in wallets on or off chain, hard wallets will be supported, 3rd party custodians will be supported, custodians will be the equivalent to Banks. Federal, State, and City level Governments will run the Blockchain Pools, creating blocks and storing the Blockchain for the people in the local City or State. Anyone can run a Node for the Blockchain; this provides a balance of power between the people, City, State, and Federal Government levels. It will also provide a Decentralized Blockchain that the people can trust with their wealth. It will not limit the individual's freedom in any way; it will prevent Government overreach and manipulation of the economy. However it will allow the Government the ability to ensure the Blockchain's security by having control over the Pools, and by having many Pools for each State and City.

The American people need to understand the freedoms they will be giving up if the Federal Government limits their control or access to the Blockchain. The Government needs to understand that denying the American people these freedoms, is in violation of what our Founding Fathers built this country on. If we work together we can build a bright and prosperous future for the United States of America, and achieve what our Founding Fathers only dreamed of. "Novus ordo seclorum" Latin, "New order of the ages"
