All applications for Bitcoin spot ETF, or similar tradable fund, or trust.

To: Securities and Exchange Commission (SEC):

I am a Software Engineer and Technology professional in USA. Today, I write to the US SEC with a request to reject all Bitcoin Spot ETF applications. This is important because there is a lot of non-compliance by companies associated with these types of business. Further, among other negative impacts of these crypto currencies related instruments is of empowering authoritarian regimes while undermining the Democratic values.

Bitcoin's decentralized nature and potential for circumventing traditional financial channels could make it attractive to authoritarian regimes seeking to evade sanctions and exert greater control over their citizens' finances. A spot ETF with widespread adoption could inadvertently facilitate these efforts, weakening democratic institutions and further enriching oppressive governments, potentially at the expense of human rights and civil liberties.

Please do not allow investment instruments that will have a negative impact in our world.

Sincerely,

Anurag
