

The notion that the SEC and the Federal Government are using this obvious ruse to strip away legal, commercial access to our Nation's natural resources is beyond shocking. Once again, the Federal Government is over-stepping it's authority to strip away the rights of the citizens for the exercise of free commercial enterprises; for the sake of benefitting the elite Wall Street moguls, and to establish the Climate Hoax narrative for the purpose of ultimate control of the populace. I am adamantly opposed to this, as it goes against every notion of free-enterprise that this country was founded upon and made it the most prosperous nation on the planet.
