

AMERICA DOES NOT WANT TO BE CHINAⁱ

STOP THE AI/SURVEILLANCE AGENDA

“The danger of AI is much greater than the danger of nuclear warheads – by a lot.”ⁱⁱ

– Elon Musk

To: Congress, and the President, we demand that you halt the AI and surveillance agenda being rolled out now through legislation and initiatives.ⁱⁱⁱ People are not machines, and we are not the enemy – to be surveilled and tracked, to our very DNA. It is unconstitutional and unconscionable to steal and upload people's personal and biological data – for strangers to do with what they will. Where is privacy? Where is right to personal property and control over data? Through-the-wall, -clothes, and -body radar *cannot ever be justified*. The AI/National Security agenda means having robots and supercomputers rule, which is the death of humanity, and gives carte blanche for those with nefarious and selfish purposes to do 24-7 illegal and intimate surveillance on any everyday American citizen they please. This strips us of due process and the 4th Amendment. It is total invasion, and antithetical to the spirit of the country.^{iv} How does robotization and autonomization promote jobs? We do not want “high risk, high reward”^{vi} for our children; we want health and sustainability. AI is not Green or sustainable, it is not healthy or moral. It is unethical in the extreme. Wireless begets perversion.^{vii} You are pushing this agenda through without any discussion of how it will impact Civil and Human Rights, the biosphere, or social fabric. We do not want to live in the Surveillance State,^{viii} and we do not consent for our biological processes to be commoditized and computerized. If China wants to be over-run by machines, there is no reason for us to follow. We insist

that you stop AI at once, and halt the DOD, CIA, FCC, Google authoritarian agenda. Corporate-captured agencies should not run our country. *We, the people*, rule, and we implore you, as our representatives, to listen to *us*, not corporations and agencies.^{ix} We want a sustainable alternative that engenders health, and life quality:

- Bring manufacturing jobs back to America; promote skilled trade and quality in products.
- Institute a Sustainability project in the EPA, with funds re-allocated from agencies and programs,^x which have compromised rights, for real re-greening of America.
- Stop SMART grids and 5G.
- Break up Big Tech.
- Hard-wire America: Install the *WISE-grid (Wired and Sensible)* – fiber-optic and copper wires run to and through the premises, and a *network of booths* installed where people can plug in when out. We want to stop being sprayed with radiation.
- Halt satellites so we can see the night sky.
- Pursue FLOWER (Fine Arts, Law, Organics, Writing, Environment, Reading^{xi}), and not just STEM (Science, Technology, Engineering, and Mathematics).
- Empower independent teams, to review laws, policies, and systems, to insure they do not, and cannot, violate the Constitution.
- People own their own data, bodies, and minds – not the Government, agencies, or corporations.
- Listen to the People, not agencies and corporations.

We expect you to: form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defense, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity. *This is your mandate.*

China's fertility rate has gone down^{xii} and cancer rates up^{xiii} since they became a wireless nation. This is the future if you do not heed the call:

National Security means the health and well-being of Americans. The AI agenda is a burden thrust on the US population.^{xivxxvixvii} The Surveillance State is unconstitutional and opposed to our desires. We want sustainability, health, and nature.

Senator: "We do live in a Democracy, don't we, in which it is the people, not one marine lieutenant colonel, that gets to decide the important policy decisions for the nation?"

Ollie North: "...Yes."^{xviii}

Artificial Intelligence is anti-human, anti-God, un-American.

AMERICANS SAY NO TO: HARPA, Endless Frontiers, Radiation, Rotational Cyber Workforce, CP3, predictive policing, facial recognition, biometric surveillance, through the wall radar, surveillance satellites, DEWs, non-consensual implants, nano-technology, Internet of Things and Humans, mind-machine interface, brain-mapping, synthetic biology, autonomous vehicles, voice recognition, emotion recognition, gait recognition, SMART cities, HAARP, digital passports, social credit.

Our bodies, minds and possessions are ours. We say no to take-over by machines, spying, and yes to liberty and health.
