

Urgent: Act now to stop NAC: "Natural Asset Company" from becoming reality: Deadline for public comment is Thursday, Jan. 18th, 2024. [88 Fed. Reg. 68811 Oct. 4, 2023).

"Natural Asset Companies" will threaten our economy, the management of private ranch lands, and the sovereign management of our National Parks by the United States. Most importantly, they will threaten our national security by allowing foreign entities to be managing public and private lands within the United States. This is absolutely absurd and very frightening for our country. In summary, this new "investment product" seeks to change our sovereign country from the "inside out" and would leave us at the mercy of foreign entities and foreign investors to manage our own resources, our own Public Lands and even our private lands. Basically, due to numerous issues related to the creation of public lands, and the rights given to private land owners as well, NAC's implementation would be illegal. The United State's citizens wish to live in a free and strong United States, of the people, and governed by it's people -not by foreign entities nor foreign investors. We also have not given authority to investors within the US to manage our local, state and federal parks, National Forests. ,We (the US citizens) have voted and provided for management of those lands by our own established citizen agencies. **The SEC has no right to implement this new effort to weaken our country's land and it's management. In fact, I firmly believe is it illegal. We cannot allow this effort now! Do the right thing and stop NAC's from ever becoming reality.**
