

As 4th, 5th and 6th generation cattle ranchers in Wyoming, we are concerned the SEC Natural Asset Companies want to acquire working lands to reduce cattle production. This would attract investors who are interested in the environment and the pure green agenda. This lack of use does not equal a healthy ecosystem or improve conservation. There are private property rights in America and this is a scam to take these rights away from the citizens – just like Communist countries!

There is also the risk of foreign companies or countries gaining ownership of these Natural Asset Companies, if very tight regulations are not put in place.

The National Grasslands and Forests already are overseen by the United States Forest Service under the Department of Agriculture. In addition, the Bureau of Land Management National Parks and National Monuments are overseen by the Interior Department. How can the SEC just grab power from Department of Agriculture and the Interior Department and decide they are going to create something called NACs. This is all typical of this Biden Administration – creating power out of no where without any legal capacity to do so! And then we have to wait for the Supreme Court to rule against these stupid moves

WE ARE ADAMANTLY OPPOSED to such a communist idea!!
