

After reviewing the Securities and Exchange Commission's Proposed Rule Change to Amend the NYSE Listed Company Manual to Adopt Listing Standards for Natural Asset Companies (File No. SR-NYSE-2023-09). I found it to be deeply concerning that the SEC would even consider something like this. This proposal is not in the best interest of the American People.

Throughout human history man has tried to control man, and the outcome has always been the same – no good. The land, the air and water have been a gift from God and a necessity for our existence. Yet here again the global elites, the financial elites, nation rulers, NGO's and followers of climate religion are at it again. Man, control of man.

Key phrases came to mind while reading the SEC's proposed rule change:

Degrowth

Depopulation

Deindustrialization

Wealth Distribution

These ideas are just anti-human.

I concur with the comments submitted by the Attorneys General for the States of Utah, Kansas, Alabama, Alaska, Arkansas, Florida, Idaho, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, Montana, Nebraska, New Hampshire, N. Dakota, Ohio, Oklahoma, S. Carolina, Tennessee, Texas, Virginia, West Virginia, and Wyoming, submitted on January 9, 2024

Along with the December 19, 2023, comments of 32 Members of Congress submitted by Harriet Hageman's office.

The outcome of Natural Asset Companies will be nothing short of evil. Do not proceed and drop this idea completely.

God Bless America
