Rule 14.602. Products and Services Available to Listed Companies

The Exchange offers all listed companies the same optional complimentary services through access to IEX Issuer, a market information analytics platform consisting of access to a team of market professionals and web-based content, that provide real-time market intelligence, fundamental and technical trading analysis, and real-time market information. In addition, IEX Issuer may, from time to time, provide information about products and services from third-party vendors that IEX determines may be relevant to listed issuers. Provision of any products and services from a third-party vendor would need to be effected through arrangements directly between the listed issuer and the third-party vendor, without any subsidy or other involvement by the Exchange. A description of all products and services available through IEX Issuer is provided on the Exchange's website.
