

Exhibit 5 – Text of Proposed Rule Change

Proposed new language is underlined; proposed deletions are in brackets.

CHAPTER 11. TRADING RULES

Rule 11.190. Orders and Modifiers

(a) No Change.

(b) (1)-(9) No Change.

(10) Discretionary Peg Order. A pegged order that upon entry into the System, the price of the order is automatically adjusted by the System to be equal to the less aggressive of the Midpoint Price or the order's limit price, if any. When unexecuted shares of such order are posted to the Order Book, the price of the order is automatically adjusted by the System to be equal to and ranked at the less aggressive of one (1) MPV less aggressive than the primary quote (i.e., the NBB for buy orders and NBO for sell orders) or the order's limit price and is automatically adjusted by the System in response to changes in the NBB (NBO) for buy (sell) orders up (down) to the order's limit price, if any. In order to meet the limit price of active orders on the Order Book, a Discretionary Peg order will exercise the least amount of price discretion necessary from the Discretionary Peg order's resting price to its discretionary price (defined as the less aggressive of the Midpoint Price or the Discretionary Peg order's limit price, if any), except during periods of quote instability as defined in paragraph (g) below when a Discretionary Peg order is only eligible to trade at its resting price. When exercising price discretion, a Discretionary Peg order maintains time priority at its resting price and is prioritized behind any non-displayed interest at the discretionary price for the duration of that book processing action. If multiple Discretionary Peg orders are exercising price discretion during the same book processing action, they maintain their relative time priority at the discretionary price. A Discretionary Peg order:

- (A) Must be a pegged order.
- (B) May have any TIF described in paragraph (c) of this IEX Rule and as described in IEX Rule 11.190(a)(3).
- (C) Is not eligible for routing pursuant to IEX Rule 11.230(b) and (c)(2).

- (D) May not be an ISO, as defined in paragraph (12) below.
- (E) May be submitted with a limit price or without a limit price (an “unpriced pegged order”).
- (F) Is eligible to trade only during the Regular Market Session. As provided in IEX Rule 11.190(a)(3)(D), any pegged order marked with a TIF of DAY that is submitted to the System before the opening of the Regular Market Session will be queued by the System until the start of the Regular Market Session; any pegged order [that] which is marked with a TIF other than DAY will be rejected when submitted to the System during the Pre-Market Session. Any pegged order submitted into the System after the closing of the Regular Market Session will be rejected.
- (G) May be a MQTY, as defined in paragraph (11) below.
- (H) Is not eligible to display. Pegged orders are always non-displayed.
- (I) May be an odd lot, round lot, or mixed lot.
- (J) Is eligible to be invited by the System to Recheck the Order Book to trade against interest resting at the Midpoint Price as described in IEX Rule 11.230(a)(4)(D).
- (K) Is eligible to exercise price discretion to its discretionary price, except during periods of quote instability, as specified in paragraph (g) below.
 - (i) If the System determines the NBB for a particular security to be an unstable quote in accordance with paragraph (g), it will restrict buy Discretionary Peg orders in that security from exercising price discretion to trade against interest at or above the NBB.
 - (ii) If the System determines the NBO for a particular security to be an unstable -quote in accordance with paragraph (g), it will restrict sell Discretionary Peg orders in that security from exercising price discretion to trade against interest at or below the NBO.

(16) Corporate Discretionary Peg Order. A Discretionary Peg buy order that upon entry into the System, the price of the order is automatically adjusted by the System to be equal to the less aggressive of the Midpoint Price, the consolidated last sale price, or the order’s limit price, if any. When unexecuted shares of such order are posted to the Order Book, the price of the order is automatically adjusted by the System to be equal to and ranked at the less aggressive of one (1) MPV less than the NBB, the consolidated last sale price, or the order’s limit price and is automatically adjusted by the System in response to changes in the NBB

and consolidated last sale price up to the order's limit price, if any (the order's "resting price"). In order to meet the limit price of active orders on the Order Book, a Corporate Discretionary Peg order will exercise the least amount of price discretion necessary from the order's resting price to its discretionary price (defined as the less aggressive of the Midpoint Price, consolidated last sale price, or the order's limit price, if any), except during periods of quote instability as defined in paragraph (g) below when a Corporate Discretionary Peg order is only eligible to trade at its resting price. When exercising price discretion, a Corporate Discretionary Peg order maintains time priority at its resting price and is prioritized behind any non-displayed interest at the discretionary price for the duration of that book processing action. If multiple Corporate Discretionary Peg orders are exercising price discretion during the same book processing action, they maintain their relative time priority at the discretionary price. A Corporate Discretionary Peg order:

- (A) Must be a pegged order.
- (B) May have any TIF described in paragraph (c) of this IEX Rule and as described in IEX Rule 11.190(a)(3).
- (C) Is not eligible for routing pursuant to IEX Rule 11.230(b) and (c)(2).
- (D) May not be an ISO, as defined in paragraph (12) below.
- (E) May be submitted with a limit price or without a limit price (an "unpriced pegged order").
- (F) Is eligible to trade only during the Regular Market Session and after at least one consolidated last sale eligible trade in the security has occurred on the current day. As provided in IEX Rule 11.190(a)(3)(D), any pegged order marked with a TIF of DAY that is submitted to the System before the opening of the Regular Market Session will be queued by the System until the start of the Regular Market Session; any pegged order which is marked with a TIF other than DAY will be rejected when submitted to the System during the Pre-Market Session. Any pegged order submitted into the System after the closing of the Regular Market Session will be rejected.
- (G) May be a MQTY, as defined in paragraph (11) below.
- (H) Is not eligible to display. Pegged orders are always non-displayed.
- (I) May be an odd lot, round lot, or mixed lot.
- (J) Is eligible to be invited by the System to Recheck the Order Book to trade against interest resting at the Midpoint Price as described in IEX Rule 11.230(a)(4)(D).

(K) Is eligible to exercise price discretion to its discretionary price, except during periods of quote instability, as specified in paragraph (g) below. If the System determines the NBB for a particular security to be an unstable quote in accordance with paragraph (g), it will restrict Corporate Discretionary Peg orders in that security from exercising price discretion to trade against interest at or above the NBB.
