|---|---|
| **LIMIT OF FEES ON OPTIONS STRATEGY EXECUTIONS** | $750 cap on transaction fees for Strategy Executions involving (a) reversals and conversions, (b) [dividend spreads, (c)] box spreads, ([d]c) short stock interest spreads, ([e]d) merger spreads, and ([f]e) jelly rolls.[8] The cap applies to all Strategy Executions executed on the same trading day in the same option class. Transaction fees for Strategy Executions are further capped at $25,000 per month per initiating firm. All Royalty fees associated with Strategy Executions on Index and Exchange Traded Funds will be passed through to trading participants on the Strategy Executions on a pro-rata basis. These Royalty fees will not be included in the calculation of the $750 per trade cap or the $25,000 per month strategy fee cap. Manual Broker Dealer and Firm Proprietary Strategy trades that do not reach the $750 cap will be billed at $0.25 per contract. FLEX Option trades are not eligible for strategy treatment. Any qualifying Strategy Execution executed as a Qualified Contingent Cross order will not be eligible for this fee cap. |

*****

[5] Specialist, eSpecialist, and Market Maker (both Directed and non-Directed) fees will be aggregated and capped at $350,000 per month plus an incremental service fee of $.01 per contract for all Specialist, eSpecialist and Market Maker volume executed in excess of 3,500,000 contracts per month, except for the execution of a QCC order against a non-Customer, in which case the incremental service fee is $.05, or the execution of either a QCC order against a Customer or the execution of an Electronic Complex Order, in which case the incremental service fee is $.10. Any fees or volume associated with a Strategy Trade (reversals and conversions, [dividend spreads,] box spreads, short stock interest spreads, merger spreads, and jelly rolls) will not be counted towards either the $350,000 cap, or the volume threshold of 3,500,000 contracts. Royalty Fees will continue to be charged and do not count toward the $350,000 fee cap. Specialist, eSpecialist, and Market Maker (both Directed and non-Directed) participants that execute 50,000 or more contracts ADV each day during the month will be eligible for the lower per contract rate described in the fee schedule under the section on “NYSE Amex Options: Trade-Related Charges.” In calculating this threshold of 50,000 or more contracts, the Exchange will exclude both Strategy Trades and QCC trades.

[6] Firm Proprietary manual trades are those trades executed in open outcry on behalf of an ATP holder that clear in the firm range. The firm facilitation rate applies to trades that clear in the firm range (clearance account "F") and customer on the contra (clearance account "C") with the same clearing firm symbol on both sides of the trade. Fees for Firm Proprietary manual trades will be aggregated and capped at $100,000 per month for member firms plus an incremental service fee of $.01 per contract for all Firm Proprietary manual trading volume in excess of the cap, except for the execution of a QCC order against a non-Customer, in which case the incremental service fee is $.05, and the execution of a QCC order against a Customer, in which case the incremental service fee is $.10. Any fee or volume associated with a Strategy Execution (reversal and conversion, [dividend spread,] box spread, short stock interest spread, merger spread and jelly roll) will not be counted toward the $100,000 cap. Royalty fees will continue to be charged at the rate provided herein and do not count toward the $100,000 fee cap. Firm Facilitation trades will continue to be executed at the rate of $0.00 per contract regardless of whether a firm has reached the $100,000 cap or not, except for QCC volume in excess of the cap as noted above.

*****

[8] (a) Reversals and Conversions. A “reversal” is established by combining a short security position with a short put and a long call position that shares the same strike and expiration. A “conversion” is established by combining a long position in the underlying security with a long put and a short call position that shares the same strike and expiration.

(b) [Dividend Spread. A “dividend spread” is defined as transactions done to achieve a dividend arbitrage involving the purchase, sale and exercise of in-the-money options of the same class, executed prior to the date on which the underlying stock goes ex-dividend.

(c)] Box spread. A "box spread" is defined as transactions involving a long call option and a short put option at one strike, combined with a short call option and long put at a different strike, to create synthetic long and synthetic short stock positions, respectively.

([d]c) Short stock interest spread. A "short stock interest spread" is defined as transactions done to achieve a short stock interest arbitrage involving the purchase, sale and exercise of in-the-money options of the same class.

([e]d) Merger spread. A "merger spread" is defined as transactions done to achieve a merger arbitrage involving the purchase, sale and exercise of options of the same class and expiration date, each executed prior to the date on which shareholders of record are required to elect their respective form of consideration, i.e., cash or stock.

([f]e) Jelly rolls. A "jelly roll" is created by entering into two separate positions simultaneously. One position involves buying a put and selling a call with the same strike price and expiration. The second position involves selling a put and buying a call, with the same strike price, but with a different expiration from the first position.
