SECURITIES EXCHANGE ACT OF 1934
Release No. 75802 / September 1, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16564

In the Matter of GERARD HARYMAN, Respondent.	ORDER MAKING FINDINGS AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER PURSUANT TO SECTIONS 15(b) AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934

I.

On June 1, 2015, the Securities and Exchange Commission ("Commission") instituted public administrative and cease-and-desist proceedings pursuant to Sections 15(b) and 21C of the Securities Exchange Act of 1934 ("Exchange Act") against Gerard Haryman ("Haryman" or "Respondent").

II.

In response to these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") that the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, Respondent admits the Commission's jurisdiction over him and the subject matter of these proceedings, and consents to the entry of this Order Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order Pursuant to Sections 15(b) and 21C of the Securities Exchange Act of 1934 ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

Summary

These proceedings arise out of a fraudulent scheme in which insiders of publicly-traded penny stock companies paid secret kickbacks to a purported corrupt hedge fund manager, who was in fact an undercover agent with the Federal Bureau of Investigation ("Fund Manager"), in exchange for the Fund Manager's purchase of restricted stock of the penny stock companies on behalf of his purported hedge fund ("the Fund"), which did not actually exist.

Respondent

1. Respondent, age 71, a resident of Lake Worth, Florida, was a consultant to and investor in A Clean Slate, Inc. ("Clean Slate"), a publicly-traded company that provides financial services and specialized in debt relief and financial recovery services. Respondent participated in an offering of Clean Slate stock, which is a penny stock. Haryman was charged with two counts each of mail fraud and wire fraud and one count of conspiracy to commit securities fraud on March 21, 2014 and pleaded guilty to all counts on May 2, 2014 in *U.S. v. Haryman*, 14-CR-10077-RGS (D. Mass.). On November 13, 2014, he was sentenced to 1 day in prison and 3 years' supervised release. He was also ordered to pay a $500.00 special assessment and $24,000 in restitution. On November 21, 2014, Haryman was ordered to forfeit $24,000.

Other Relevant Entities and Individuals

2. A Clean Slate, Inc. is a Delaware corporation with its principal place of business in Palm Beach, Florida that provides financial services and specializes in debt relief and financial recovery services. Its securities had been registered with the Commission under Exchange Act Section 12(g), but Clean Slate filed a Form 15-12G on April 13, 2012 terminating its securities registration. Clean Slate's securities are publicly quoted on the OTC Link under the symbol "DRWN," but the OTC Link website contains a warning that the company may not be making material information publicly available.

Background

3. At some point prior to September 28, 2011, an individual serving as a cooperating witness for the Federal Bureau of Investigation ("CW") arranged for Haryman and another individual ("R.G.") to meet with the Fund Manager to discuss funding for Clean Slate.

4. On or about September 28, 2011, Haryman and R.G. met with the Fund Manager and CW to discuss a potential investment of the Fund's monies in Clean Slate in exchange for a fifty percent kickback to the Fund Manager (the "September 28 Meeting").

5. Haryman and R.G. indicated that they were both willing to enter into the kickback arrangement.

6. At the September 28 Meeting, the Fund Manager, Haryman, R.G., and CW also discussed the mechanics of the funding. Haryman and R.G. were informed that

the Fund Manager would begin by investing smaller amounts in Clean Slate, while planning to increase the funding in installments, or tranches, in the future.

7. At the September 28 Meeting, the Fund Manager further discussed with Haryman and R.G. the mechanics of the kickbacks to the Fund Manager. The Fund Manager explained to Haryman and R.G. that Haryman and R.G. would be sending the kickbacks to one or more companies that the Fund Manager himself controlled. The Fund Manager discussed with Haryman and R.G. that Clean Slate would execute consulting agreements with one or more of the Fund Manager's companies, and Haryman and R.G. would pay the relevant company owned by the Fund Manager an amount equal to fifty percent of Fund monies invested in Clean Slate as purported fees for consulting services that would not, in fact, be rendered. The Fund Manager further explained to Haryman and R.G. that the Fund would not know about these kickbacks paid to him through such sham consulting agreements. After the Fund Manager had explained the scheme, Haryman and R.G. agreed to enter into the kickback arrangement.

8. On various dates between on or about September 29, 2011 and on or about November 2, 2011, Haryman and R.G. sent the Fund Manager documents related to the kickback transactions, including purported consulting agreements between Clean Slate and the Fund Manager's nominee consulting companies and phony invoices in the name of the Fund Manager 's nominee consulting companies.

9. On or about October 5, 2011, $16,000 was sent by wire transfer from a bank account maintained in Boston, Massachusetts, purportedly belonging to the Fund, to a corporate bank account of Clean Slate outside of Massachusetts. The wire transfer represented the first tranche of funding for Clean Slate.

10. On or about October 6, 2011, Haryman and R.G. caused $8,000 to be sent by wire transfer from a corporate bank account of Clean Slate outside of Massachusetts to a bank account maintained in Boston, Massachusetts, purportedly belonging to one of the Fund Manager's "nominee" companies. This wire transfer represented Haryman and R.G.'s kickback to the Fund Manager from the first tranche of funding for Clean Slate.

11. On or about October 13, 2011, Haryman and R.G. caused a stock certificate representing the shares purchased by the Fund in Clean Slate to be sent to the Fund Manager.

12. On or about October 20, 2011, $32,000 was sent by wire transfer from a bank account maintained in Boston, Massachusetts, purportedly belonging to the Fund, to a corporate bank account of Clean Slate outside of Massachusetts. This wire transfer represented the second tranche of funding for Clean Slate

13. On or about October 21, 2011, Haryman and R.G. caused $16,000 to be sent by wire transfer from a corporate bank account of Clean Slate outside of Massachusetts to a bank account maintained in Boston, Massachusetts, purportedly belonging to one of the Fund Manager's "nominee" companies. This wire transfer represented Haryman and R.G.'s kickback to the Fund Manager from the second tranche of funding to Clean Slate.

14. On or about October 24, 2011, Haryman and R.G. caused phony invoices for consulting services that were never performed to be sent to the Fund Manager by electronic mail. These phony invoices related to the monies Haryman and R.G. caused to be kicked back to the Fund Manager on or about October 6, 2011, and October 21, 2011, respectively.

15. On or about October 28, 2011, Haryman and R.G. caused a stock certificate representing the additional shares purchased by the Fund in Clean Slate to be sent to the Fund Manager.

16. On or about November 2, 2011, Haryman and R.G. caused phony invoices for consulting services that were never performed to be sent to the Fund Manager by electronic mail. These phony invoices related to the monies Haryman and R.G. agreed to kick back to the Fund Manager from a proposed third tranche of funding for Clean Slate. This proposed third tranche of funding did not, ultimately, occur.

17. As a result of the conduct described above, Haryman willfully violated Section 10(b) of the Exchange Act and Rule 10b-5(a) thereunder, which prohibit fraudulent conduct in connection with the purchase or sale of securities.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondent Haryman's Offer.

Accordingly, pursuant to Sections 15(b) and 21C of the Exchange Act, it is hereby ORDERED that:

A. Respondent Haryman shall cease and desist from committing or causing any violations and any future violations of Section 10(b) of the Exchange Act and Rule 10b-5 thereunder.

B. Respondent Haryman be, and hereby is:

> barred from participating in any offering of a penny stock, including: acting as a promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer or issuer for purposes of the issuance or trading in any penny stock, or inducing or attempting to induce the purchase or sale of any penny stock.

By the Commission.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75806 / September 1, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16774

In the Matter of **GW One, Inc.,** **Pacific Power Group, Inc.,** **PFF Bancorp, Inc.,** **Robertson Acquisitions II, Inc. (CIK No. 1554100), and** **Robertson Acquisitions II, Inc. (CIK No. 1554622),** **Respondents.**	**ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS AND NOTICE OF HEARING PURSUANT TO SECTION 12(j) OF THE SECURITIES EXCHANGE ACT OF 1934**

I.

The Securities and Exchange Commission ("Commission") deems it necessary and appropriate for the protection of investors that public administrative proceedings be, and hereby are, instituted pursuant to Section 12(j) of the Securities Exchange Act of 1934 ("Exchange Act") against Respondents GW One, Inc., Pacific Power Group, Inc., PFF Bancorp, Inc., Robertson Acquisitions II, Inc. (CIK No. 1554100), and Robertson Acquisitions II, Inc. (CIK No. 1554622).

II.

After an investigation, the Division of Enforcement alleges that:

A. RESPONDENTS

1. GW One, Inc. (CIK No. 1381976) is a void Delaware corporation located in San Francisco, California with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). GW One, Inc. is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-QSB for the period ended September 30, 2007, which reported a net loss of $37,397 from the company's May 4, 2006 inception to September 30, 2007.

2. Pacific Power Group, Inc. (CIK No. 1013628) is a Nevada corporation located in Monterey, California with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Pacific Power Group, Inc. is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-SB registration statement on July 12, 1996.

3. PFF Bancorp, Inc. (CIK No. 1004969) is a forfeited Delaware corporation located in Claremont, California with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). PFF Bancorp, Inc. is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2008, which reported a net loss of $85,845,000 for the prior six months. On December 5, 2008, the company filed a Chapter 11 petition in the U.S. Bankruptcy Court for the District of Delaware, and the case was pending as of July 3, 2014.

4. Robertson Acquisitions II, Inc. (CIK No. 1554100) is a revoked Nevada corporation located in Woodland, California with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Robertson Acquisitions II, Inc. is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10 registration statement on July 13, 2012.

5. Robertson Acquisitions II, Inc. (CIK No. 1554622) is a California corporation located in Woodland, California with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Robertson Acquisitions II, Inc. is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10 registration statement on July 24, 2012.

B. DELINQUENT PERIODIC FILINGS

6. As discussed in more detail above, all of the Respondents are delinquent in their periodic filings with the Commission, have repeatedly failed to meet their obligations to file timely periodic reports, and failed to heed delinquency letters sent to them by the Division of Corporation Finance requesting compliance with their periodic filing obligations or, through their failure to maintain a valid address on file with the Commission as required by Commission rules, did not receive such letters.

7. Exchange Act Section 13(a) and the rules promulgated thereunder require issuers of securities registered pursuant to Exchange Act Section 12 to file with the Commission current and accurate information in periodic reports, even if the registration is voluntary under Section 12(g). Specifically, Rule 13a-1 requires issuers to file annual reports, and Rule 13a-13 requires domestic issuers to file quarterly reports.

8. As a result of the foregoing, Respondents failed to comply with Exchange Act Section 13(a) and Rules 13a-1 and/or 13a-13 thereunder.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate for the protection of investors that public administrative proceedings be instituted to determine:

A. Whether the allegations contained in Section II hereof are true and, in connection therewith, to afford the Respondents an opportunity to establish any defenses to such allegations; and,

B. Whether it is necessary and appropriate for the protection of investors to suspend for a period not exceeding twelve months, or revoke the registration of each class of securities registered pursuant to Section 12 of the Exchange Act of the Respondents identified in Section II hereof, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents.

IV.

IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice [17 C.F.R. § 201.110].

IT IS HEREBY FURTHER ORDERED that Respondents shall file an Answer to the allegations contained in this Order within ten (10) days after service of this Order, as provided by Rule 220(b) of the Commission's Rules of Practice [17 C.F.R. § 201.220(b)].

If Respondents fail to file the directed Answers, or fail to appear at a hearing after being duly notified, the Respondents, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents, may be deemed in default and the proceedings may be determined against them upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f), and 310 of the Commission's Rules of Practice [17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f), and 201.310].

This Order shall be served forthwith upon Respondents personally or by certified, registered, or Express Mail, or by other means permitted by the Commission Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 120 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice [17 C.F.R. § 201.360(a)(2)].

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

By the Commission.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75807 / September 1, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16775

In the Matter of **Calico Commerce, Inc. (a/k/a CCI Liquidation Corp.),** **China Fuhua New Material Holdings, Inc.,** **China Multimedia, Inc.,** **China Water & Drinks, Inc., and** **CMR Mortgage Fund II, LLC,** **Respondents.**	**ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS AND NOTICE OF HEARING PURSUANT TO SECTION 12(j) OF THE SECURITIES EXCHANGE ACT OF 1934**

I.

The Securities and Exchange Commission ("Commission") deems it necessary and appropriate for the protection of investors that public administrative proceedings be, and hereby are, instituted pursuant to Section 12(j) of the Securities Exchange Act of 1934 ("Exchange Act") against Respondents Calico Commerce, Inc. (a/k/a CCI Liquidation Corp.), China Fuhua New Material Holdings, Inc., China Multimedia, Inc., China Water & Drinks, Inc., and CMR Mortgage Fund II, LLC.

II.

After an investigation, the Division of Enforcement alleges that:

A. RESPONDENTS

1. Calico Commerce, Inc. (a/k/a CCI Liquidation Corp.) (CIK No. 1081154) is a dissolved Delaware corporation located in Burlingame, California with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Calico Commerce is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended December 31, 2002, which reported a net loss of $883,000 for the prior nine months.

2. China Fuhua New Material Holdings, Inc. (CIK No. 1423590) is a void Delaware corporation located in Beverly Hills, California with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). China Fuhua is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended June 30, 2009, which reported a net loss of $10,000 from the company's January 8, 2008 inception to June 30, 2009.

3. China Multimedia, Inc. (CIK No. 1385211) is a revoked Nevada corporation located in Hong Kong with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). China Multimedia is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-K for the period ended September 30, 2011, which reported a net loss of $14,766 for the prior twelve months.

4. China Water & Drinks, Inc. (CIK No. 1344133) is a dissolved Nevada corporation located in Hong Kong with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). China Water & Drinks is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended March 31, 2009.

5. CMR Mortgage Fund II, LLC (CIK No. 1397396) is a California limited liability company located in San Francisco, California with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). CMR Mortgage Fund II is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2008, which reported a net loss of over $39 million for the prior nine months. On March 31, 2009, the company filed a Chapter 11 petition in the U.S. Bankruptcy Court for the Northern District of California, and the case was pending as of January 26, 2015.

B. DELINQUENT PERIODIC FILINGS

6. As discussed in more detail above, all of the Respondents are delinquent in their periodic filings with the Commission, have repeatedly failed to meet their obligations to file timely periodic reports, and failed to heed delinquency letters sent to them by the Division of Corporation Finance requesting compliance with their periodic filing obligations or, through their failure to maintain a valid address on file with the Commission as required by Commission rules, did not receive such letters.

7. Exchange Act Section 13(a) and the rules promulgated thereunder require issuers of securities registered pursuant to Exchange Act Section 12 to file with the Commission current and accurate information in periodic reports, even if the registration is voluntary under Section 12(g). Specifically, Rule 13a-1 requires issuers to file annual reports, and Rule 13a-13 requires domestic issuers to file quarterly reports.

8. As a result of the foregoing, Respondents failed to comply with Exchange Act Section 13(a) and Rules 13a-1 and/or 13a-13 thereunder.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate for the protection of investors that public administrative proceedings be instituted to determine:

A. Whether the allegations contained in Section II hereof are true and, in connection therewith, to afford the Respondents an opportunity to establish any defenses to such allegations; and,

B. Whether it is necessary and appropriate for the protection of investors to suspend for a period not exceeding twelve months, or revoke the registration of each class of securities registered pursuant to Section 12 of the Exchange Act of the Respondents identified in Section II hereof, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents.

IV.

IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice [17 C.F.R. § 201.110].

IT IS HEREBY FURTHER ORDERED that Respondents shall file an Answer to the allegations contained in this Order within ten (10) days after service of this Order, as provided by Rule 220(b) of the Commission's Rules of Practice [17 C.F.R. § 201.220(b)].

If Respondents fail to file the directed Answers, or fail to appear at a hearing after being duly notified, the Respondents, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents, may be deemed in default and the proceedings may be determined against them upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f), and 310 of the Commission's Rules of Practice [17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f), and 201.310].

This Order shall be served forthwith upon Respondents personally or by certified, registered, or Express Mail, or by other means permitted by the Commission Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 120 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice [17 C.F.R. § 201.360(a)(2)].

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75810 / September 2, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16354

In the Matter of **David B. Havanich, Jr., Carmine A. DellaSala, Matthew D. Welch, Richard Hampton Scurlock, III, RTAG Inc. d/b/a Retirement Tax Advisory Group, Jose F. Carrio, Dennis K. Karasik, Carrio, Karasik & Associates, LLP, and Michael J. Salovay,** **Respondents.**	**ORDER MAKING FINDINGS AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER PURSUANT TO SECTIONS 15(b) AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934, AND ORDERING CONTINUATION OF PROCEEDINGS AGAINST MICHAEL J. SALOVAY**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest to enter this Order Making Findings and Imposing Remedial Sanctions and a Cease-and-Desist Order Pursuant to Sections 15(b) and 21C of the Securities Exchange Act of 1934 ("Exchange Act") and Ordering Continuation of Proceedings against Michael J. Salovay ("Salovay").

II.

Salovay has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, Salovay consents to the entry of this Order Making Findings and Imposing Remedial Sanctions and a Cease-and-Desist Order Pursuant Sections 15(b) and 21C of the Securities Exchange Act of 1934 and Ordering Continuation of Proceedings Against Michael J. Salovay ("Order"), as set forth below.[1]

[1]On January 23, 2015, the Commission instituted public administrative and cease-and-desist proceedings pursuant to:

III.

On the basis of this Order and Salovay's Offer, the Commission finds that:[2]

A. RESPONDENTS

1. Havanich is 49 years old and resides in Jupiter, Florida. He was the co-founder, president, and director of Diversified Energy Group, Inc. ("Diversified") and is the president and director of St. Vincent de Paul Childrens Foundation Inc. ("St. Vincent"), a non-operating, non-profit corporation.

2. DellaSala is 54 years old and resides in Jupiter, Florida. DellaSala was the co-founder, vice president of business development, and director of Diversified and is the vice president and director of St. Vincent. DellaSala previously held a series 3 commodities license at various times between 1988 and 2002 while associated with 10 different commodities firms. In addition, DellaSala previously was a registered representative of SEC-registered broker dealers Meyers Pollock Robbins, Inc. and Joseph Charles & Assoc., Inc. between February 1997 and May 1997. The state of Kansas issued a cease-and-desist order against DellaSala as president of Apex Petroleum, Inc. ("Apex") in December 1995 in connection with the offer and sale of Apex securities. In the Matter of Apex Petroleum, Inc., et. al, Docket No. 96E046 (December 20, 1995).

3. Welch is 35 years old and resides in Gainesville, Florida. He was the vice president of investor relations of Diversified and is a board member of St. Vincent. Welch previously held a series 3 commodities license from approximately 2000-2002.

4. Scurlock is 38 years old and resides in Lexington, Kentucky. Scurlock is the owner and president, and therefore an associated person of, RTAG, a Kentucky registered investment adviser. Between 1999 and 2005, in ascending order, Scurlock was a registered representative of SEC-registered broker-dealers IDS Life Insurance Company ("IDS Life"), Ameriprise Financial Services, Inc., Ameritas Investment Corp., and Synergy Investment Group, LLC.

(a) Sections 15(b) and 21C of the Exchange Act and Section 203(f) of the Investment Advisers Act of 1940 ("Advisers Act") against Dennis K. Karasik ("Karasik") and co-respondent Richard Hampton Scurlock, III ("Scurlock");

(b) Sections 15(b) and 21C of the Exchange Act against Salovay and co-respondents Jose F. Carrio ("Carrio") and Carrio, Karasik & Associates, LLP ("CKA");

(c) Section 8A of the Securities Act of 1933 ("Securities Act") and Section 21C of the Exchange Act against co-respondents David B. Havanich, Jr. ("Havanich"), Carmine A. DellaSala ("DellaSala"), and Matthew D. Welch ("Welch"); and

(d) Sections 15(b) and 21C of the Exchange Act and Section 203(e) of the Advisers Act against RTAG Inc. d/b/a Retirement Tax Advisory Group ("RTAG").

[2]The findings herein are made pursuant to Salovay's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

5. RTAG is a Kentucky corporation and a Kentucky registered investment adviser. Scurlock is the owner and president of RTAG.

6. Carrio is 50 years old and resides in York, Pennsylvania. He is the co-founder and 50% owner of CKA, a limited liability partnership doing business in Baltimore County, Maryland. Carrio was not registered as a broker-dealer nor associated with a registered broker-dealer during the relevant period. Between 1989 and 2006, in ascending order, Carrio was a registered representative of SEC-registered broker-dealers First Investors Corporation, The Prudential Insurance Company of America, Pruco Securities Corporation, Equity Services, Inc., and New England Securities. On April 1, 2014 the Securities Division of the Office of the Maryland Attorney General ("Maryland AG") issued a consent order against Carrio in connection with his offer and sale of Diversified's bonds ordering that he cease and desist from violating certain of Maryland's anti-fraud and registration statutes and that he pay a $1,499,315.87 penalty which was waived based on his sworn financial statements. The consent order also permanently barred Carrio from engaging in the securities or investment advisory business in Maryland. In the Matter of Jose F. Carrio et al. (Case No. 2012-0463).

7. Karasik is 60 years old and resides in Reisterstown, Maryland. He is the co-founder and 50% owner of CKA. Between 1984 and 2013, in ascending order, Karasik was a registered representative of SEC-registered broker-dealers NEL Equity Services Corporation, MML Investors Services, Inc., VIP Financial Companies, Inc., Equity Services Inc., New England Securities, Multi-Financial Securities Corporation, and H. Beck, Inc. Between 2009 and 2013, Karasik was an investment adviser representative of, and associated with, first Multi-Financial Securities Corporation and later H. Beck, Inc, both dually registered as broker-dealers and investment advisers. Karasik was also a party to the Maryland AG consent order and received the same sanctions and waiver of penalty as Carrio and CKA. In the Matter of Jose F. Carrio et al. (Case No. 2012-0463).[3] On July 8, 2014, by consent, FINRA imposed a bar from association with any FINRA member firm against Karasik in connection with Karasik's offer and sale of Diversified's bonds. Dennis Keith Karasik, Letter of Acceptance, Waiver and Consent, No. 2012034750401 (Jul. 8, 2014).

8. CKA is a limited liability partnership doing business in Baltimore County, Maryland. CKA states it is an independent financial services firm for wealth management issues. Carrio and Karasik each own 50% of CKA. CKA was not registered as a broker-dealer or an investment advisor during the relevant period. CKA was also a party to the Maryland AG consent order and received the same sanctions and waiver of penalty as Carrio and Karasik. In the Matter of Jose F. Carrio et al. (Case No. 2012-0463).

9. Salovay is 44 years old and resides in Pittsburgh, Pennsylvania. Salovay's current employment status is unknown. Between 1997 and 2007, in ascending order, Salovay was a registered representative of SEC-registered broker-dealers IDS Life, American Express Financial Advisors Inc., Metropolitan Life Insurance Company, Metlife Securities Inc., First Security Investments, Inc., Midsouth Capital, Inc., Nations Financial Group, Inc. and Natcity Investments, Inc. In October 2008, he settled an action with FINRA related to his failure to disclose material information on a Form U4 by agreeing to a nine-month suspension and a $5,000 fine.

[3] In addition, the Maryland consent order revoked Karasik's Maryland investment adviser representative registration.

B. OTHER RELEVANT ENTITIES

1. Diversified was a Delaware corporation founded by Havanich and DellaSala in 2006 and located in Tequesta, Florida. Diversified was dissolved on April 28, 2014. Diversified represented that it was primarily engaged in the business of buying and selling fractional interests in oil and gas producing properties and commodities trading in the futures market. Diversified filed nine Form Ds with the Commission between 2007 and 2012 claiming exemptions under Rules 504 and 506 of the Securities Act for approximately $19 million in stock and bonds in nine purportedly separate offerings but did not file Forms D for an additional $8 million in stock and bonds in five other purported separate offerings. Diversified has never been registered with the Commission nor registered any offering of securities under the Securities Act or a class of securities under the Exchange Act.

C. SUMMARY

1. Between 2006 and 2012, Diversified and its principal officers, Havanich, DellaSala, and Welch, raised at least $17.4 million from approximately 440 investors nationwide through a series of fraudulent, unregistered offerings of stock and bonds. Diversified represented that it was primarily engaged in the business of buying and selling fractional interests in oil and gas producing properties and also engaged in commodities trading in the futures market. Ultimately, as its disclosed use of proceeds expanded, Diversified used a portion of the investor funds to buy fractional interests in oil and gas wells, cattle, a hydrogen device that purported to increase gas mileage on vehicles, trade commodities contracts, and invest in real estate. Diversified, Havanich, DellaSala, and Welch made material misrepresentations and omissions about Diversified's financial performance and use of industry experts and technologies in Diversified's offering material and correspondence to investors. Havanich, DellaSala, and Welch also touted their affiliation with a charity organization in Diversified's offering materials but that charity never had any substantive charitable activities.

2. Starting in 2009, Diversified also hired unregistered sales agents to sell Diversified's bonds paying them commissions of 5% or 10% of the investor proceeds. Diversified and DellaSala employed the unregistered sales agents to raise money for Diversified even after receiving an email and other correspondence from Diversified's outside counsel detailing the limits on Diversified's use of unregistered sales agents. Diversified's top grossing independent sales agents were (1) Scurlock and his state registered investment advisory firm RTAG, (2) Carrio, Karasik, and their limited liability partnership CKA, and (3) Salovay. Collectively, they earned approximately $985,000 in transaction-based compensation in connection with their sales activities.

D. OFFER AND SALE OF UNREGISTERED SECURITIES

1. Beginning in 2006 and continuing through approximately 2008, Diversified submitted to potential investors one or more versions of a private placement memoranda ("PPM"), offering to sell Diversified common stock at per share prices ranging from 20 cents to $1.55 (the "Stock Offerings").

2. As a result of the Stock Offerings, Diversified raised approximately $910,304 from 160 investors both inside and outside the State of Florida.

3. No registration statement was filed or in effect with the Commission pursuant to the Securities Act with respect to the Stock Offerings.

4. No exemption from registration existed with respect to the Stock Offerings.

5. Between 2006 and 2008, there was no period of six months or more in which there was no offer or sale of Diversified's stock.

6. Beginning in approximately 2009 and continuing through 2012, Diversified submitted to potential investors various versions of a brochure, PPM, and business plan as part of offers to sell Diversified bonds with maturities between 12 and 24 months and paying annual interest rates between 8% and 10.25% (the "Bond Offerings"). Some of the bonds included an option to purchase Diversified common stock.

7. As a result of the Bond Offerings, Diversified raised approximately $16.5 million from 280 investors both inside and outside the State of Florida.

8. No registration statement was filed or in effect with the Commission pursuant to the Securities Act with respect to the Bond Offerings.

9. No exemption from registration existed with respect to the Bond Offerings.

10. Between 2009 and 2012, there was no period of six months or more in which there was no offer or sale of Diversified's bonds.

11. DellaSala, Havanich, and Welch participated in the Stock Offerings and the Bond Offerings by undertaking the offerings, by drafting and reviewing the brochures and business plans, reviewing and approving the PPMs, engaging sales agents to sell the bonds, facilitating Diversified's website, participating in presentations to potential investors, and soliciting potential investors for at least one stock offering using "lead lists." In addition, Havanich and DellaSala touted Diversified's securities on radio broadcasts, where Havanich appeared under his own name and DellaSala appeared under the alias "Jim Clark."

E. <u>DIVERSIFIED AND DELLASALA'S USE OF UNREGISTERED SALES AGENTS</u>

1. Starting in April 2009, Diversified had a formal contract, titled Finder's Fee Agreement ("Finders agreement") that it used to employ unregistered sales agents to act as commissioned sales agents.

2. The unregistered sales agents solicited investors and received a commission of either 5% or 10% from Diversified based on the amount invested.

3. Diversified participated in the unregistered sales agents' solicitation of investment in Diversified bonds by entering into written agreements with the unregistered sales agents, paying them a commission, and supplying them with brochures, PPMs, and business plans relating to Diversified bonds. DellaSala participated in the unregistered sales agents' solicitation of investment in Diversified bonds by paying them commissions in his role as a principal of Diversified.

4. In connection with their efforts to obtain purchasers for Diversified bonds, the unregistered sales agents used the mails or means or instrumentality of interstate commerce.

5. The unregistered sales agents were either not associated with any registered brokers or dealers or were engaged in sales activities that occurred outside and without the knowledge of the broker-dealers with which they were associated.

F. THE UNREGISTERED SALES AGENTS' INVOLVEMENT IN THE SALE OF DIVERSIFIED'S BONDS

1. Scurlock and RTAG

a. Scurlock entered into a Finders agreement with Diversified in December 2009. That agreement stated Scurlock would be paid a 5% commission for each investor that purchased Diversified's bonds although in practice he was actually paid a 10% commission.

b. While RTAG did not enter into a Finders agreement with Diversified, starting in February 2012, Diversified paid commissions to RTAG instead of directly to Scurlock.

c. Between January 2010 and March 2012, Scurlock recommended Diversified's bonds to RTAG's clients and other investors, provided and discussed offering materials with prospective investors, highlighted the risks associated with the Diversified investment to prospective investors, assisted prospective investors with completing paperwork necessary for an investment in Diversified bonds, fielded investor inquiries, and handled investor funds.

d. Scurlock and RTAG collectively received approximately $448,000 in transaction-based compensation for selling Diversified bonds to approximately 50 investors while not registered as broker-dealers or associated with a registered broker-dealer.

2. Carrio, Karasik, and CKA

a. In November 2009, Carrio entered into a Finders agreement with Diversified that paid him a 10% commission for each investor that purchased Diversified's bonds.

b. While Karasik and CKA did not enter into Finders agreements with Diversified, starting in December 2010, Carrio and CKA began equally sharing Diversified commissions. Karasik received either all or a supermajority of the Diversified commissions paid to CKA as some of the commissions were used to pay CKA expenses.

c. Between December 2009 and March 2012 Carrio, Karasik, and CKA recommended the bonds to CKA clients, provided prospective investors with offering documents, discussed the returns of the bond offerings with prospective investors, weighed in on the merits of the bond investment, provided and directed prospective investors to complete the paperwork necessary for an investment in the bonds, and, as to Karasik and CKA, handled investor funds.

d. Carrio, Karasik, and CKA collectively received approximately $434,974 in transaction-based compensation for selling Diversified's bonds to approximately 40 investors.

e. Between December 2009 and March 2012, Carrio and CKA were not registered as broker-dealers or associated with a registered broker-dealer.

f. Between December 2010 and March 2012, Karasik's activities occurred outside and without the knowledge of the broker-dealers with which he was associated during the relevant time.

3. Salovay

a. Salovay entered into a Finders agreement with Diversified in July 2009. That agreement provided that Salovay would be paid a 10% commission for each investor that purchased Diversified bonds.

b. Between August 2009 and March 2012, Salovay recommended Diversified's bonds to his insurance clients, provided and discussed offering materials with prospective investors, highlighted the risks associated with the Diversified investment to prospective investors, assisted prospective investors with completing paperwork necessary for an investment in the bonds, fielded investor inquiries, and handled investor funds.

c. Salovay received approximately $101,790 in transaction-based compensation for selling Diversified's bonds to approximately 20 investors while not registered as a broker-dealer or associated with a registered broker-dealer.

G. MISREPRESENTATIONS AND OMISSIONS TO INVESTORS

During the course of the Bond Offerings, Diversified, Havanich, DellaSala, and Welch made numerous false and misleading statements and omissions, many of which are described below. At the time these statements and omissions were made, Diversified, Havanich, DellaSala, and Welch either knew, or should have known, or were severely reckless in not knowing their false and misleading nature.

1. <u>Misrepresentations and Omissions Concerning Diversified's Financial Performance</u>

a. The PPMs Respondents distributed beginning in 2009 and continuing through 2010 list "Operating Deficits" as one of several risk factors, stating: "The expenses of operating the Company may exceed its income, thereby requiring that the difference be paid out of the Company's capital, reducing the Company's investments and potential for profitability." Diversified omitted disclosures regarding Diversified's current or past profitability, stating only that "[a]dditional financial information is available on a confidential basis upon request." In fact, Diversified's incurring of losses was not a mere contingency. To the contrary, Diversified had suffered steadily rising losses from its inception, as described below:

YEAR	NET INCOME (LOSS)
2006	(31,200)
2007	(257,975)
2008	(564,347))
2009	(672,749)
2010	(1,114,901)

b. While Diversified's October 2011 PPM disclosed that Diversified had recently sustained losses, it omitted the five-year history of losses.

c. In addition, Diversified's brochures paint a rosy picture of the company, claiming consistently over a three-year period of deepening insolvency that its bonds would produce "reliable monthly cash flow," were backed by "continually growing" assets, and were "[s]uperior to traditional fixed income instruments," while omitting that Diversified's survival depended upon its ability to borrow greater and greater sums.

d. In a brochure distributed in 2009 to prospective bond purchasers:

i. Diversified claimed one of Diversified's "Revenue Sources" was a "Hedge Account (for asset protection)," which earned an average monthly return on investment of 14.73%.

ii. Diversified represented that as of June 2009, Diversified had $2,126,269 in "Oil and Gas Assets," and that its "Asset Allocation" was 39% "Oil and Gas Acquisition" and 61% "Hedging Portfolio," implying that its Hedging Portfolio was worth $3,325,703.

iii. Diversified presented a bar chart comparing the three year returns of the "Trading Strategy History" with the returns on the "S&P." According to the chart, the trading strategy returned 82.70% in 2006, 138.70% in 2007, and 29.4% in 2008, for a three year average of 83.60%.

e. In brochures distributed in 2010, Diversified included a chart showing Diversified's "4 YR Average Strategy History" producing an average annual return of 90.9%.

f. In brochures distributed in 2010 and 2011, Diversified included a chart showing Diversified's "5 YR Average Strategy History" producing an average annual return of 79.4%

g. As Diversified, Havanich, DellaSala, and Welch knew, the representations in the brochures distributed in 2009 and 2010 were false and misleading as to material matters. In fact, in 2006 and 2007, Diversified had no hedging assets and had engaged in no commodities trading. In 2008, Diversified never had more than $6500 in hedging assets and Diversified's portfolio had an annual return of -95%. During June 2009, Diversified had far less than $3,325,703 in its hedging portfolio—during this period the value of the Diversified portfolio ranged from $38,000 to $75,000.

h. On March 30, 2010, Welch signed and sent to at least 9 individuals in Pennsylvania who had bought Diversified bonds a letter stating: "Due to the tremendous demand for [Diversified] Bonds, and the favorable financial position in which the company finds itself, management has decided to 'call' the existing bonds and is providing you a complete repayment" of principal and interest. This statement was false and misleading:

i. as of March 30, 2010, Diversified was not in a "favorable" financial condition but had been suffering significant and increasing losses since its inception;

ii. Diversified was not calling all of its bonds, as the letter implied, but rather was only calling bonds sold to some Pennsylvania investors; and

iii. Diversified's motivation for calling the bonds was not related to the demand for Diversified's bonds or Diversified's financial condition; rather, Diversified called the bonds because Pennsylvania regulatory authorities had raised questions regarding the legality of Diversified's sale of bonds to Pennsylvania residents.

i. Within approximately one month, several of the Pennsylvania investors reinvested their returned capital and some later invested additional funds.

2. <u>Misrepresentations Concerning Diversified's Use of Industry Experts and Technologies</u>

a. In business plans distributed to prospective investors between 2006 and 2011, Diversified stated, "Diversified will from time to time retain the advice and recommendation of experts based on the prospects we are looking at. … [T]he company will look to hire the best qualified individuals to evaluate each new prospect before we make an investment."

b. In business plans distributed to prospective investors between at least 2009 and 2011, Diversified stated, "[t]he key is working with *our geologists* and industry partners to find the best prospects that meet the companies risk to reward ratio." (emphasis added).

c. Diversified's website stated that its business strategy includes, among other things, acquiring "proven producing properties which meet the standards of management and *our* independent reservoir engineering firm." (emphasis added).

d. In several 2009 and 2010 versions of Diversified's investor power point presentations, shown at investor summits in various cities and led by Havanich, DellaSala, and Welch, Diversified included the names of an independent geologist and a reservoir engineering firm as part of its "independent team."

e. In a business plan provided to a mid-2009 investor, Diversified stated, "[w]e utilize advanced 3-D seismic imaging, drilling and completion technologies to systematically evaluate domestic onshore oil and natural gas reserves." Later Diversified business plans utilized similar language until late 2010 when the language was ultimately changed to read, "...Diversified Energy Group focuses its acquisition and development activities in provinces where we believe technology and the knowledge of our technical staff can effectively maximize return and reduce risk...."

f. Diversified stated in each of its marketing brochures that it had "[a]n Experienced Location and Acquisition Team boasting a proven track record with such companies as Chesapeake Energy, Marathon Oil, Union Pacific, Hess and Torch Energy, to name a few."

g. The foregoing statements were false and misleading. In fact:

i. Diversified did not hire geologists or a reservoir engineering firm as represented to evaluate the oil and gas wells in which it invested. Diversified made at least 93 separate investments in at least 44 oil and gas prospects between 2006 and 2011, the majority of which were in producing oil and gas wells. While Diversified did retain a geologist in early 2007, that geologist only provided Diversified with 15 reports related to *non-producing* oil and gas prospects and it did not retain an independent reservoir engineering firm in connection with any of its investments;

ii. Diversified never had 3-D seismic imaging, drilling and completion technologies;

iii. Diversified did not have a technical staff; and,

iv. DellaSala, Havanich, and Welch were the sole members of Diversified's "location and acquisition team" and they had never worked with any of the major energy companies listed in the brochures.

H. <u>HAVANICH, DELLASLA, AND WELCH TOUTED THEIR AFFILIATION WITH ST. VINCENT</u>

1. In September 2006, shortly before the start of Diversified's capital raising activities, Havanich and DellaSala created St. Vincent. St. Vincent has no relationship to the St. Vincent de Paul Catholic voluntary organization.

2. In Diversified's business plans, Diversified described St. Vincent as "a non-profit corporation to benefit children in need around the world," and described DellaSala and Havanich as officers and directors of St. Vincent, and Welch as member of St. Vincent's board.

3. St. Vincent never raised any money for children or had any substantive charitable activities.

I. <u>VIOLATIONS</u>

As a result of the conduct described above, Salovay willfully violated Section 15(a) of the Exchange Act, which makes it unlawful for any broker or dealer to effect any transactions in, or to induce or attempt to induce the purchase or sale of, any security, unless such broker or dealer is registered or associated with a registered broker-dealer.

IV.

Pursuant to his Offer, Salovay agrees that disgorgement is appropriate, and further agrees to additional proceedings in this proceeding to determine (a) the amount of such disgorgement, plus prejudgment interest if ordered, and (b) whether a civil penalty is appropriate, and the amount of any such penalty, pursuant to Sections 21B and 21C of the Exchange Act. In connection with such additional proceedings, Salovay agrees: (a) he will be precluded from arguing that he did not violate the federal securities laws described in his Offer; (b) he may not challenge the validity of his Offer; (c) solely for the purposes of such additional proceedings, the allegations of the Offer shall be accepted as and deemed true by the hearing officer; and (d) the hearing officer may determine the issues raised in the additional proceedings on the basis of affidavits, declarations, excerpts of sworn deposition or investigative testimony, and documentary evidence.

V.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Salovay's Offer, and to continue proceedings to determine the amount of disgorgement and civil penalties.

Accordingly, pursuant to Sections 15(b) and 21C of the Exchange Act, it is hereby ORDERED that:

A. Salovay cease and desist from committing or causing any violations and any future violations of Section 15(a) of the Exchange Act.

B. Salovay be, and hereby is:

barred from association with any broker, dealer, investment adviser, municipal securities dealer, municipal advisor, transfer agent, or nationally recognized statistical rating organization; and

barred from participating in any offering of a penny stock, including: acting as a promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer or issuer for purposes of the issuance or trading in any penny stock, or inducing or attempting to induce the purchase or sale of any penny stock.

C. Any reapplication for association by Salovay will be subject to the applicable laws and regulations governing the reentry process, and reentry may be conditioned upon a number of factors, including, but not limited to, the satisfaction of any or all of the following: (a) any disgorgement ordered against Salovay, whether or not the Commission has fully or partially waived payment of such disgorgement; (b) any arbitration award related to the conduct that served as the basis for the Commission order; (c) any self-regulatory organization arbitration award to a customer, whether or not related to the conduct that served as the basis for the Commission order; and (d) any restitution order by a self-regulatory organization, whether or not related to the conduct that served as the basis for the Commission order.

D. Salovay shall pay disgorgement, and additional proceedings shall be held to determine (i) the amount of such disgorgement, plus prejudgment interest if ordered, and (ii) whether a civil penalty is appropriate, and the amount of any such penalty. and civil penalties, in amounts to be determined by additional proceedings.

By the Commission.

INVESTMENT ADVISERS ACT OF 1940
Release No. 4186 / September 2, 2015

INVESTMENT COMPANY ACT OF 1940
Release No. 31803 / September 2, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16776

In the Matter of **TABERNA CAPITAL MANAGEMENT, LLC** **MICHAEL FRALIN and** **RAPHAEL LICHT** **Respondents.**	**ORDER INSTITUTING ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTIONS 4C, 15(b), AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934, SECTIONS 203(e), 203(f) AND 203(k) OF THE INVESTMENT ADVISERS ACT OF 1940, SECTION 9(b) OF THE INVESTMENT COMPANY ACT OF 1940, AND RULE 102(e) OF THE COMMISSION'S RULES OF PRACTICE, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND CEASE-AND-DESIST ORDERS**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative and cease-and-desist proceedings be, and hereby are, instituted pursuant to Sections 15(b) and 21C of the Securities Exchange Act of 1934 ("Exchange Act") and Sections 203(e) and 203(k) of the Investment Advisers Act of 1940 ("Advisers Act") against Taberna Capital Management, LLC ("Taberna"), and Sections 4C and 21C of the Exchange Act, Sections 203(f) and 203(k) of the Advisers Act, Section 9(b) of the Investment Company Act of 1940 ("Company Act"), and Rule 102(e) of the Commission's Rules of Practice against Michael Fralin ("Fralin") and Raphael Licht ("Licht") (collectively with Taberna, "Respondents").

II.

In anticipation of the institution of these proceedings, Respondents have submitted Offers of Settlement (the "Offers") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over them and over the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondents consent to the entry of this Order Instituting Administrative and Cease-and-Desist Proceedings Pursuant to Sections 4C, 15(b) and 21C of the Securities Exchange Act of 1934, Sections 203(e), 203(f) and 203(k) of the Investment Advisers Act of 1940, Section 9(b) of the Investment Company Act of 1940, and Rule 102(e) of the Commission's Rules of Practice, Making Findings and Imposing Remedial Sanctions and Cease-and-Desist Orders ("Order"), as set forth below.

III.

On the basis of this Order and Respondents' Offers, the Commission finds[1] that

Summary

These proceedings arise out of Taberna's multi-year effort to charge and retain certain fees (known as "Exchange Fees") in connection with restructuring transactions undertaken between Taberna's collateralized debt obligation ("CDO") clients (the "Taberna CDOs") and the issuers of the underlying obligations in the Taberna CDOs' portfolios. Between 2009 and 2012, Taberna, a wholly-owned indirect subsidiary of RAIT, retained over $15 million of Exchange Fees. As Taberna knew, the Exchange Fees should have gone to the CDOs, and retention of the Exchange Fees was impermissible under the governing documents for the Taberna CDOs. Moreover, the Exchange Fees created actual and potential conflicts of interest that Taberna failed to disclose to its clients, in violation of Taberna's fiduciary duty as an investment adviser, and to the investors in the Taberna CDOs, including on Taberna's Forms ADV. As described further below, Michael Fralin and Raphael Licht played key roles in the relevant misconduct. Fralin had responsibility for exchange negotiations and documentation that incorporated false and misleading language about Exchange Fees. Licht, a senior Taberna executive at the time, was among those who approved Taberna's collection of Exchange Fees. Licht also had a role in supervising Fralin's efforts to generate Exchange Fees, and also failed to ensure those fees were disclosed in Taberna's Forms ADV.

Respondents

1. **Taberna** is a Delaware limited liability company with a principal place of business in Philadelphia, PA. Taberna registered with the Commission as an investment adviser in 2008 and terminated this registration in January 2015. Taberna is an indirect subsidiary of RAIT, a Maryland, SEC-registered Real Estate Investment Trust listed on the New York Stock

[1] The findings herein are made pursuant to Respondents' Offers and are not binding on any other person or entity in this or any other proceeding.

Exchange, whose primary business is investing in and managing real-estate related assets, as well as providing debt financing to real estate-related borrowers. Taberna's sole business was the management of the Taberna CDOs. Between 2010 and the end of 2014, Taberna sold or transferred the management rights to the Taberna CDOs. Taberna currently has no advisory clients.

2. **Michael Fralin**, age 40, is a resident of New York, New York. From 2007 through 2010, Fralin was employed by Taberna and RAIT, first as a Vice President, then a Managing Director, with responsibility for coordinating and negotiating restructuring transactions in the portfolios of the Taberna CDOs. Fralin continued to provide consulting services to Taberna until 2011. Prior to coming to Taberna and RAIT, Fralin worked as an attorney and as an investment banker. Fralin is a member of the New York bar and is currently practicing law.

3. **Raphael Licht**, age 47, is a resident of Philadelphia, Pennsylvania. From February 2009 to December 2014, Licht was the Chief Operating Officer of RAIT. From December 2006 to February 2009, Licht was the Chief Legal Officer and Chief Administrative Officer of RAIT. Licht joined Taberna in March 2005. Licht separated from RAIT and Taberna in December 2014. Licht is a member of the Pennsylvania bar and is currently self-employed as a real estate consultant.

Background

4. Taberna was established in 2003 for the purpose of managing a series of Collateralized Debt Obligations ("CDOs"). In 2006, RAIT acquired Taberna. At the time that RAIT acquired Taberna, Taberna was acting as the manager of seven CDOs – called in sequential order Taberna Preferred Funding I through VII. RAIT acquired Taberna with a view to continuing to issue and manage additional CDOs. Two additional domestic CDOs – Taberna VIII and IX – and two European CDOs –Taberna Europe CDO I and II – were issued after RAIT acquired Taberna (collectively Taberna I through IX and Taberna Europe CDO I and II are referred to as the "Taberna CDOs").

5. A CDO is a special-purpose vehicle that issues debt to investors and uses the proceeds to invest in fixed income securities or loans. The CDO's debt is issued in different tranches that feature varying levels of risks and returns. The senior tranche is the highest rated and is first in the priority of repayment through what is called the CDO's "waterfall." Remaining proceeds then flow to the lower-rated junior tranches, and any proceeds remaining after the junior tranches are paid flows to the lowest, or "equity," tranche. Taberna invested in the equity tranche of most of the Taberna CDOs.

6. The Taberna CDOs invested primarily in real estate, mostly in the form of trust preferred securities ("TruPS") issued by real estate investment trusts ("REITs") that, in turn, invested in commercial and residential real estate. TruPS are a form of deeply subordinated debt issued by REITs. By virtue of their investment in the TruPS, the Taberna CDOs, and their investors, essentially functioned as lenders to the REITs that issued the TruPS ("TruPS Issuers").

7. The Taberna CDOs were each governed by an indenture, which, among other things, defined whether and how cash generated by the TruPS in the CDO's portfolio would be applied towards interest and principal payments owed to the CDO investors. Each indenture also provided for the engagement of a Collateral Manager for that CDO. Taberna was engaged by each CDO as Collateral Manager, pursuant to the terms of a Collateral Management Agreement ("CMA"). The indentures for each of the Taberna CDOs (generally, the "Indenture") were substantially similar, as were the CMAs.

8. Taberna's duties as Collateral Manager were defined in the CMA and the Indenture. Among those duties were various responsibilities relating to the disposition of collateral in the CDO's portfolio. Other provisions authorized Taberna to take specific actions with respect to exchanges. In particular, Section 6.16 of the Indenture authorized Taberna to instruct the Trustee to cause the CDO to enter into 'exchanges.' An exchange, in this context, means a transaction in which the CDO returns a TruPS Issuer's securities to that issuer in return for new securities and/or other consideration.

9. As an investment adviser, Taberna owed fiduciary duties to its CDO clients. Among other things, it was obligated to act in the best interests of its CDO clients and to disclose any material conflicts of interest that it had.

10. Taberna's compensation for acting as collateral manager of the Taberna CDOs was also defined in the CMA. Pursuant to the CMA, Taberna was entitled to a "Collateral Management Fee," to be paid by the CDO, as "compensation for the performance of its services and obligations as Collateral Manager under the terms of [the CMA]." As was typical for many CDOs, the Collateral Management Fee was broken out into a senior fee, paid at the top of the CDOs' waterfall, and a subordinated fee paid out at the bottom of the waterfall, only after other investors received their principal and interest. The CMA also provided that Taberna could accept fees for services provided to the TruPS Issuers. However, the Collateral Management Fee was intended as Taberna's exclusive compensation for undertaking its defined duties as Collateral Manager, including exchanges. Prior to 2009, Collateral Management Fees represented Taberna's primary source of income.

Taberna's Multi-Year Effort to Charge and Retain Exchange Fees

11. In the wake of the global financial crisis, many of the TruPS Issuers experienced severe financial difficulties due to their heavy exposure to the real estate market. These financial difficulties threatened the ability of the TruPS Issuers to continue to make payments on the TruPS in the portfolios of the Taberna CDOs. As a result, the performance of several of the Taberna CDOs suffered.

12. Starting in early 2008, TruPS Issuers began to approach Taberna seeking to restructure their obligations under the TruPS. The TruPS Issuers typically sought a period of relief from interest rate obligations on their outstanding debts, with the goal of enhancing the TruPS Issuer's ability to survive until the real estate market stabilized. Because the TruPS were subordinated debt, a bankruptcy by a TruPS Issuer would likely lead to little, if any, recovery to the CDOs that held the TruPS.

13. As the Collateral Manager, Taberna was authorized to negotiate such restructurings on behalf of the Taberna CDOs. Restructurings could potentially take several forms: amendment, whereby the terms of the TruPS would be changed on a negotiated basis; redemption or prepayment, whereby the TruPS Issuer would redeem some or all of the TruPS, typically at a deep discount to their par value; or an exchange pursuant to Section 6.16 of the Indenture, as described above.

14. In a typical restructuring, including a typical exchange transaction, Taberna's responsibilities included negotiating transaction terms and documents; assessing the financial condition of the TruPS Issuer; valuing the TruPS held by the Taberna CDOs; and evaluating the consideration being offered by the TruPS Issuer as part of the restructuring, such as cash, amended debt terms, or, in the case of exchanges, new securities. In undertaking these activities, Taberna was acting in its capacity as Collateral Manager to the Taberna CDOs. The TruPS Issuers were Taberna's counterparties, and Taberna was not retained by the TruPS Issuers – and did not render any services to them – in connection with the restructurings.

15. In connection with several restructurings in 2008 which were not exchanges, Taberna negotiated a fee to be paid by the TruPS Issuer directly to the Taberna CDOs that held the restructured TruPS as part of consideration for the CDO agreeing to the restructuring. Such fees were paid into the waterfall of the CDOs pursuant to the provisions of the Indenture defining Interest Proceeds as including ". . . all amendments and waiver fees, all late payment fees and all other fees and commissions received during the related Due Period," and defining Principal Proceeds as including ". . .any other payments received with respect to the Collateral and not included in Interest Proceeds."

16. Initially, Taberna believed that neither the Indenture nor the CMA authorized it to charge TruPS Issuers fees in connection with exchange transactions. Starting in February 2009, Taberna reconsidered its position regarding charging such fees and Taberna then insisted that TruPS Issuers pay a fee ("Exchange Fee") directly to Taberna as consideration for Taberna's willingness to consider exchange transactions executed on behalf of the Taberna CDOs. Between 2009 and 2012, Taberna executed over fifty exchange transactions in which it collected gross Exchange Fees totaling more than $17 million. After paying third-party expenses for lawyer fees, outside advisers, or other third party costs, Taberna retained over $15 million in Exchange Fees. RAIT senior executives approved of Taberna's plan to retain Exchange Fees, and the Exchange Fees were recognized as fee income by RAIT.

17. Taberna typically sought an Exchange Fee of approximately 1% of the value of the exchanged securities, paid directly to Taberna by the TruPS Issuer. The 1% figure was not calculated in relation to actual costs incurred by Taberna in connection with the exchanges. In fact, the Exchange Fees greatly exceeded Taberna's actual out-of-pocket costs associated with the exchanges.

18. The Exchange Fees Taberna collected were significant to Taberna's business, which had been impacted by the financial crisis, and replaced some of the revenue lost when the Taberna CDOs, due to their declining performance, ceased paying subordinated management fees to Taberna. In 2009, for example, Taberna's Exchange Fees revenues actually exceeded the management fees paid by the Taberna CDOs. In May 2009, senior Taberna and RAIT

executives participated in a presentation to the RAIT Board of Trustees discussing the declining income faced by Taberna. That presentation identified as a "New Source of Fee Income" for 2009 the transformation of "our TruPS workouts into fee for service revenue."

Taberna Attempted to Obscure the Nature of the Fees by Referring to Them as Payment of "Third Party Costs"

19. In connection with exchanges, Taberna executed transaction documents on behalf of the Taberna CDOs, including term sheets and exchange agreements. Taberna acted to ensure that some of these documents were either silent on fees or mischaracterized fees as compensation only for third party expenses.

20. For example, in the template Taberna typically sought to use for exchanges, the section describing the fee in the term sheets Taberna provided to the TruPS Issuers was titled "Third Party Costs," and read "In connection with the exchange offer described herein, Taberna will engage (a) outside legal counsel to draft and negotiate the documents evidencing the new securities and (b) one or more financial advisory and/or due diligence firms to provide financial analysis, underwriting and other due diligence services solely with respect to the issuance of the new securities" and then described the Exchange Fee as being paid "to cover the foregoing third party costs incurred by Taberna in connection with the new securities." Thus, this language misrepresented that the fee was limited to third party costs, when it was not. For virtually every exchange, there were no third-party "financial advisory and/or due diligence firms" retained at all.

21. As part of the exchange process, Fralin would provide the exchange documents to an informal committee composed of Licht and others for review and approval. On at least one occasion, in early May 2009, a senior manager on this committee apparently noticed this third party cost language was false and misleading and suggested it be altered. Nothing was done in response, however, and substantially similar language was used in dozens of subsequent transactions over the next two years.

The Exchange Fees Created Actual and Potential Conflicts of Interest

22. Taberna's decision to charge Exchange Fees created actual and potential conflicts between Taberna's interests and the interests of the CDOs and the CDO investors. For instance, because Taberna retained fees paid in connection with exchanges, and not other types of restructurings, Taberna had an incentive to steer TruPS Issuers interested in a restructuring towards doing an exchange, irrespective of what form of restructuring might be most advantageous to the Taberna CDOs. Similarly, Taberna threatened some TruPS Issuers that it would walk away from certain exchange negotiations if the issuers did not agree to pay an Exchange Fee to Taberna, again irrespective of whether the exchange would benefit Taberna's clients, the Taberna CDOs. Taberna, however, recommended both exchanges and restructurings during the relevant period, and did not receive a fee in connection with every exchange.

23. Typically, the exchanges provided for a longer payment period at a reduced interest rate, but with an increased principal amount greater than the original underlying

securities. This often had the effect of at least temporarily allowing continued payments to the CDOs.

24. In some restructurings, the distressed TruPS Issuers were focused on preserving their limited available cash assets, and had a maximum amount of cash available for such exchanges. From the perspective of the TruPS Issuer, it was irrelevant whether that cash went to the Taberna CDOs, as consideration for an exchange, or to Taberna, in the form of an Exchange Fee, so long as the TruPS Issuer was receiving the relief it was seeking. Moreover, given the distressed condition of the TruPS Issuers, some exchanges involved the Taberna CDOs accepting less than the full value of the TruPS it was giving up. Therefore, in seeking Exchange Fees in those instances, Taberna effectively reduced the amount of cash available to the Taberna CDOs to bring their recovery in the exchange closer to the full value of what the CDOs were giving up.

25. In one example of the way in which the conflict manifested itself, Taberna knowingly waived a fee owed by one TruPS Issuer to several of the Taberna CDOs in favor of a new fee, payable directly to Taberna. In this case, the TruPS Issuer ("Issuer A"), pursuant to the terms of a prior restructuring in 2009, had an outstanding obligation to pay Taberna's CDO clients $250,000. When Issuer A approached Taberna to seek a new restructuring transaction in early 2010, Issuer A resisted paying an additional fee to Taberna due to the drain it would cause on Issuer A's limited available resources. Taberna was ultimately only able to obtain its 1% fee by agreeing to waive the $250,000 payment that Issuer A owed Taberna's CDO clients. Taberna recognized that it was giving up a substantial right belonging to its client; one Taberna executive referred to waiving the payment owed to the CDOs as "a huge give." Nevertheless, Taberna proceeded with the transaction without disclosing the conflict presented by waiving the fee owed to the CDO in order to collect payment for itself.

26. Taberna was on notice that its conduct with respect to Exchange Fees was inconsistent with the practices of other CDO managers. Taberna often negotiated restructuring transactions alongside another CDO manager ("Manager A"), who was Taberna's main competitor in this space. Manager A informed Taberna in early 2009 that Manager A was not retaining Exchange Fees. This information was conveyed to Taberna's senior management. In response, a senior Taberna executive said in an email, "We have different needs than [Manager A]. We need fee income, not just expense reimbursement."

27. Ultimately, Taberna retained over $15 million in net Exchange Fees to which it was not entitled.[2] The fees were paid directly to Taberna, and flowed through to its corporate parent, RAIT. Taberna itself was not a registered broker-dealer under Section 15(b) of the Exchange Act. Moreover, Taberna's affiliated broker-dealer, RAIT Securities LLC, played no role in the exchanges or exchange fee program. At one point, Taberna apparently considered using a registered broker-dealer, but opted not to, based on a belief that the structure would be "too complicated."

---

2 In 2012, in connection with the settlement of a dispute relating to Taberna VIII, Taberna paid to that CDO $2 million to reimburse it for exchange fees it had retained.

Taberna's Failure to Disclose Its Exchange Fee Practices and the Resulting Conflicts of Interest to Clients and Investors

28. Taberna did not tell its clients or the investors in the Taberna CDOs that it was retaining Exchange Fees.

29. Directors of the CDO vehicles did not receive full and accurate descriptions of the fees that Taberna was retaining.

30. Taberna also knew that fees were not disclosed in information included in regular reports from the CDO trustee to investors.

31. Taberna wrote a regular report to investors in each Taberna CDO called the "State of the CDO" report. These State of the CDO reports included detailed, narrative descriptions of the exchange transactions that had taken place. Taberna understood that the purpose of the narrative descriptions was to provide Taberna's justifications for doing the exchanges.

32. Taberna knew that investors were interested in Taberna's reasons for exchanges. The representative of the senior investors in a number of the CDOs asked whether Taberna received fees in connection with exchange work. It appears that Taberna provided, in 2009 and 2010, an ambiguous and non-specific response to that representative's questions. Moreover, at least one other investor also asked Taberna about Exchange Fees and Taberna declined to respond. Taberna was also aware that another manager's proposal to collect fees similar to the Exchange Fees was publicly criticized by investors, at least one of whom referred to the effort as "an illegal fee grab."

33. Notwithstanding this known investor interest in Taberna's motivations for exchanges, Taberna considered disclosing the Exchange Fees in State of the CDO reports but decided not to do so.

34. Taberna also made direct misrepresentations to investors in consent requests. Certain exchanges required the consent of the investors in the participating Taberna CDO(s). To obtain investor consent, investors were sent a summary of the exchange terms, as drafted by Taberna. As with other transaction documents, Taberna included in these consent solicitations a description of Exchange Fees, typically stating that the TruPS Issuer agreed to pay a certain amount "to cover outside legal costs...and to cover underwriting, placement and other due diligence costs." This language failed to disclose that, after legal costs were paid, Taberna would receive the remainder of the fee.

Taberna's Inaccurate Forms ADV

35. As a registered investment adviser, Taberna was required to file Form ADV with the Commission. In this form, Taberna was required to identify, among other things, its sources of compensation in connection with advice it provided to its clients, potential conflicts of interests it had, and how it dealt with such conflicts. Between 2009 and 2012, Taberna filed numerous Forms ADV that failed to disclose the Exchange Fees, failed to describe the conflict of interest raised by the Exchange Fees, and falsely and misleadingly described Taberna's compensation for managing the Taberna CDOs. Clients and investors were thus unaware of the

existence, nature, and extent of the conflict raised by Taberna's retention of Exchange Fees from TruPS Issuers.

36. For example, Part II, Item 13.A of Form ADV required the adviser to answer the question "Does the applicant . . . have any arrangements, oral or in writing, where it is paid cash by . . . a non-client in connection with giving advice to clients?"[3] Exchange fees, which were paid by non-clients (the TruPS Issuers) in connection with giving advice about whether to accept the exchange offer to clients (the Taberna CDOs), were responsive to this item. Taberna did not disclose the Exchange Fees as required by Item 13.A.

Fralin

37. Fralin was a Managing Director of Taberna during some of the relevant period. He was responsible for handling restructuring negotiations with the TruPS Issuers, and would present proposed exchanges to the informal committee, including Licht and Fralin's immediate supervisors at Taberna. The exchanges and other restructuring transactions occupied most of his time at Taberna.

38. Fralin viewed part of his job responsibilities as maximizing Taberna's Exchange Fee income. Because he had a background as an attorney and an investment banker, he was given some autonomy to do so. In his own words, "[m]ost of the fees [generated in 2009] were purely based on my hard work and determination." Notwithstanding this, the exchanges had to be approved by Fralin's immediate supervisors at Taberna.

39. Fralin sought, and in early 2010 obtained, from his managers at Taberna a compensation structure for himself under which Fralin would receive some portion of Exchange Fees that he helped Taberna collect while still employed by Taberna. This structure gave Fralin a personal incentive to complete exchanges he was then working on, and earn Exchange Fees for Taberna, prior to his departure in the middle of 2010.

40. Fralin was responsible for drafting language in exchange transaction documents that mischaracterized Exchange Fee payments as compensation to Taberna for actual third party costs. Fralin knew that this false and misleading language was sent to or seen by representatives of the CDOs and of the CDOs' investors. He also knew or should have known that the language was misleading. On multiple occasions, recipients of the documents outside of Taberna indicated to Fralin their understanding that the fee described in the document was meant as compensation for Taberna's actual costs incurred.

41. Fralin also knew that investors wanted to know whether Taberna was collecting fees, because they asked him and others at Taberna. He helped draft and review the descriptions of the exchanges in the State of the CDO reports, which did not disclose the Exchange Fees.

3 Form ADV was amended effective September 19, 2011. Thereafter, the same disclosure was required by Item 14.A of Part 2 of Form ADV.

Licht

42. Licht served as the Chief Administrative Officer and Chief Legal Officer of Taberna and RAIT until February 2009, and additionally as Chief Operating Officer and General Counsel of Taberna from 2009 until December 31, 2014. As an officer of Taberna, he reviewed and approved certain exchange transactions, including the Exchange Fees.

43. In addition to helping to supervise Fralin's day-to-day negotiation of exchange transactions, Licht personally negotiated some exchanges and Exchange Fees. He also helped to negotiate Fralin's compensation structure, described above, through which Fralin was paid a portion of the Exchange Fees he helped arrange.

44. Licht was also aware of language Fralin used in certain exchange transaction documents that mischaracterized Exchange Fees as compensation for third party costs.

45. Licht failed to ensure that Taberna's disclosures to clients and investors about exchanges – including disclosures in the State of the CDO reports – disclosed the Exchange Fees. Licht knew that the representative of the senior investors in several of the CDOs wanted to know about Exchange Fees and Taberna's reasons for undertaking the exchanges, because it asked him, among other Taberna personnel, whether Taberna was collecting Exchange Fees.

46. Licht also played a role in the drafting and review of Taberna's materially inaccurate Forms ADV, which included misleading descriptions of Taberna's compensation and, as Licht knew, did not include references to Taberna's collection of Exchange Fees. He was listed as a principal of Taberna on certain of the ADV filings.

Violations

47. As a result of the conduct described above, Respondent Taberna willfully violated Section 15(a) of the Exchange Act, which prohibits a person from effecting any transactions in, or inducing or attempting to induce the purchase or sale of, securities unless registered with the Commission as a broker or dealer.

48. As a result of the conduct described above, Taberna willfully violated Sections 206(1) and 206(2) of the Advisers Act, which make it unlawful for an investment adviser to employ any device, scheme or artifice to defraud clients or to engage in any transaction, practice or course of business which operates as a fraud or deceit upon any client or prospective client. Fralin and Licht willfully[4] aided and abetted and caused Taberna's violations of Section 206(2).

49. As a result of the conduct described above, Taberna willfully violated, and Respondent Fralin willfully aided and abetted and caused Taberna's violation of, Section 206(4)

[4] As used herein with respect to Fralin and Licht, a willful violation of the securities laws means merely "'that the person charged with the duty knows what he is doing.'" *Wonsover v. SEC*, 205 F.3d 408, 414 (D.C. Cir. 2000) (quoting *Hughes v. SEC*, 174 F.2d 969, 977 (D.C. Cir. 1949)). "There is no requirement that the actor 'also be aware that he is violating one of the Rules or Act.'" *Id.* (quoting *Gearhart & Otis, Inc. v. SEC*, 348 F.2d 798, 803 (D.C. Cir. 1965)).

of the Advisers Act and Advisers Act Rule 206(4)-8, which prohibit any fraudulent, deceptive, or manipulative act, practice, or course of business by an investment adviser to any investor or prospective investor in a pooled investment vehicle.

50. As a result of the conduct described above, Taberna willfully violated, and Licht willfully aided and abetted and caused Taberna's violation of, Section 207 of the Advisers Act, which makes it unlawful for any person willfully to make any untrue statement of a material fact in any registration application or report filed under the Advisers Act or willfully to omit to state in any such application or report any material fact which is required to be stated therein.

Undertakings

Taberna undertakes to the following:

A. Taberna shall not act or seek to act as an investment adviser, as defined in section 202(a)(11) of the Advisers Act for a period of three (3) years following the date of the Order.

B. Within ten (10) days of the entry of the Order, to have posted prominently on RAIT's principal website a summary of this Order and hyperlink to the entire Order. The hyperlink shall be maintained for a period of twelve (12) months from the entry of this Order.

C. Within thirty (30) days of the entry of the Order, to provide a copy of the Order to the current managers of the Taberna CDOs (to the extent known to Taberna), along with a cover letter requesting that the current managers provide notice to each Taberna CDO of the existence of the Order, and further requesting that the current managers post a hyperlink to the Order on any website maintained to communicate with investors in the Taberna CDOs.

D. To cooperate fully with the Commission in any and all investigations, litigations or other proceedings relating to or arising from the matters described in the Order. In connection with such cooperation, Taberna shall: (i) produce, without service of a notice or subpoena, any and all non-privileged documents and other information requested by the Staff subject to any restrictions under the law of any foreign jurisdiction; (ii) use its best efforts to cause its officers, employees, and directors to be interviewed by the Staff at such time as the Staff reasonably may direct; (iii) provide any certification or authentication of business records of the company as may be reasonably requested by the Staff; and (iv) use its best efforts to cause its officers, employees, and directors to appear and testify without service of a notice or subpoena in such investigations, depositions, hearings or trials as may be requested by the Staff.

E. To certify, in writing every six (6) months from the date of this Order, and continuing for three years after the date of this Order, compliance with the undertaking(s) set forth above. The certification shall identify the undertaking(s) and provide written evidence of compliance in the form of a narrative. The Commission staff may make reasonable requests for further evidence of compliance, and Taberna agrees to provide such evidence. The certification and supporting material shall be submitted to Reid A. Muoio, Assistant Director in the Division of Enforcement ("Division") (100 F St., NE, Washington, DC 20549) with a copy to the Office of Chief Counsel of the Enforcement Division (100 F St., NE, Washington, DC 20549).

Michael Fralin undertakes to the following:

A. To cooperate fully with the Commission in any and all investigations, litigations or other proceedings relating to or arising from the matters described in the Order. In connection with such cooperation, Fralin undertakes:

i. To produce, without service of a notice or subpoena, any and all documents and other information reasonably requested by the Commission's staff;

ii. To be interviewed by the Commission's staff at such times as the staff reasonably may request and to appear and testify truthfully and completely without service of a notice or subpoena in such investigations, depositions, hearings or trials as may be requested by the Commission's staff; and

iii. That in connection with any testimony of Fralin to be conducted at deposition, hearing or trial pursuant to a notice or subpoena, Fralin

a. agrees that any such notice or subpoena for his appearance and testimony may be served by regular mail on his counsel, Alan R. Friedman, Esq., Kramer Levin Naftalis & Frankel LLP, 1177 Avenue of the Americas, New York, NY 10036; and

b. agrees that any such notice or subpoena for his appearance and testimony in an action pending in a United States District Court may be served, and may require testimony, beyond the territorial limits imposed by the Federal Rules of Civil Procedure.

In determining whether to accept the Offers, the Commission has considered these undertakings.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondents' Offers.

Accordingly, pursuant to Sections 4C, 15(b), and 21C of the Exchange Act, Sections 203(e), 203(f), and 203(k) of the Advisers Act, Section 9(b) of the Company Act, and Rule 102(e) of the Commission's Rules of Practice, it is hereby ORDERED that:

A. Taberna cease and desist from committing or causing any violations and any future violations of Section 15(a) of the Exchange Act, Sections 206(1) 206(2), 206(4), and 207 of the Advisers Act, and Advisers Act Rule 206(4)-8.

B. Fralin cease and desist from committing or causing any violations and any future violations of Sections 206(2) and 206(4) of the Advisers Act, and Advisers Act Rule 206(4)-8.

C. Licht cease and desist from committing or causing any violations and any future violations of Sections 206(2) and 207 of the Advisers Act.

D. Fralin be, and hereby is:

> barred from association with any broker, dealer, investment adviser, municipal securities dealer, municipal advisor, transfer agent, or nationally recognized statistical rating organization; and
>
> prohibited from serving or acting as an employee, officer, director, member of an advisory board, investment adviser or depositor of, or principal underwriter for, a registered investment company or affiliated person of such investment adviser, depositor, or principal underwriter;
>
> with the right to apply for reentry after five (5) years to the appropriate self-regulatory organization, or if there is none, to the Commission. Any reapplication for association by Fralin will be subject to the applicable laws and regulations governing the reentry process, and reentry may be conditioned upon a number of factors, including, but not limited to, the satisfaction of any or all of the following: (a) any disgorgement ordered against Fralin, whether or not the Commission has fully or partially waived payment of such disgorgement; (b) any arbitration award related to the conduct that served as the basis for the Commission order; (c) any self-regulatory organization arbitration award to a customer, whether or not related to the conduct that served as the basis for the Commission order; and (d) any restitution order by a self-regulatory organization, whether or not related to the conduct that served as the basis for the Commission order.

E. Licht be, and hereby is:

> barred from association with any broker, dealer, investment adviser, municipal securities dealer, municipal advisor, transfer agent, or nationally recognized statistical rating organization; and
>
> prohibited from serving or acting as an employee, officer, director, member of an advisory board, investment adviser or depositor of, or principal underwriter for, a registered investment company or affiliated person of such investment adviser, depositor, or principal underwriter;
>
> with the right to apply for reentry after two (2) years to the appropriate self-regulatory organization, or if there is none, to the Commission. Any reapplication for association by Licht will be subject to the applicable laws and regulations governing the reentry process, and reentry may be conditioned upon a number of factors, including, but not limited to, the satisfaction of any or all of the following: (a) any disgorgement ordered

against Licht, whether or not the Commission has fully or partially waived payment of such disgorgement; (b) any arbitration award related to the conduct that served as the basis for the Commission order; (c) any self-regulatory organization arbitration award to a customer, whether or not related to the conduct that served as the basis for the Commission order; and (d) any restitution order by a self-regulatory organization, whether or not related to the conduct that served as the basis for the Commission order.

F. Fralin is denied, pursuant to Rule 102(e) and 102(e)(1)(iii) of the Commission's Rules of Practice, the privilege of appearing or practicing before the Commission as an attorney for five (5) years from the date of the Order.

G. Licht is denied, pursuant to Rule 102(e) and 102(e)(1)(iii) of the Commission's Rules of Practice, the privilege of appearing or practicing before the Commission as an attorney for two (2) years from the date of the Order.

H. Fralin, after five (5) years from the date of the Order, and Licht, after two (2) years from the date of the Order, may request that the Commission consider his application to resume appearing and practicing before the Commission as an attorney. The application should be sent to the attention of the Office of the General Counsel.

I. With respect to such an application by either Fralin or Licht (whichever is making such an application, "Applicant"), in support of such an application, Applicant must provide a certificate of good standing from each state bar where Applicant is a member.

J. In support of such an application, Applicant must also submit an affidavit truthfully stating, under penalty of perjury:

1. that Applicant has complied with the Order;

2. that Applicant:

   a. is not currently suspended or disbarred as an attorney by a court of the United States (or any agency of the United States) or the bar or court of any state, territory, district, commonwealth, or possession; and

   b. since the entry of the Order, has not been suspended as an attorney for an offense involving moral turpitude by a court of the United States (or any agency of the United States) or the bar or court of any state, territory, district, commonwealth, or possession, except for any suspension concerning the conduct that was the basis for the Order;

3. that Applicant, since the entry of the Order, has not been convicted of a felony or misdemeanor involving moral turpitude as set forth in Rule 102(e)(2) of the Commission's Rules of Practice; and

4. that Applicant, since the entry of the Order:

   a. has not been found by the Commission or a court of the United States to have committed a violation of the federal securities laws, except for any finding concerning the conduct that was the basis for the Order;

   b. has not been charged by the Commission or the United States with a violation of the federal securities laws, except for any charge concerning the conduct that was the basis for the Order;

   c. has not been found by a court of the United States (or any agency of the United States) or any state, territory, district, commonwealth, or possession, or any bar thereof, to have committed an offense involving moral turpitude, except for any finding concerning the conduct that was the basis for the Order; and

   d. has not been charged by the United States (or any agency of the United States) or any state, territory, district, commonwealth, or possession, or any bar thereof, with having committed an offense involving moral turpitude, except for any charge concerning the conduct that was the basis for the Order.

K. If Applicant provides the documentation required in Paragraphs I and J, and the Commission determines that he truthfully attested to each of the items required in his affidavit, he shall by Commission order be permitted to resume appearing and practicing before the Commission as an attorney.

L. If Applicant is not able to truthfully attest to the statements required in Subparagraphs J(2)(b) or J(4), Applicant shall provide an explanation as to the facts and circumstances pertaining to the matter and the Commission may hold a hearing to determine whether there is good cause to permit him to resume appearing and practicing before the Commission as an attorney.

M. Taberna shall pay disgorgement of $13,000,000, prejudgment interest of $2,000,000, and a civil penalty of $6,500,000 to the Securities and Exchange Commission. Fralin shall pay a civil penalty of $100,000 to the Securities and Exchange Commission in four installments, with $25,000 due within ten (10) days of the entry of the Order, $25,000 due 90 days after the entry of the Order, $25,000 due 180 days after the entry of the Order, and $25,000 due 270 days after the entry of the Order. Licht, within ten (10) days of the entry of the Order, shall pay a civil penalty of $75,000 to the Securities and Exchange Commission. If any payment is not made by the date payment is required by this Order, the entire outstanding balance of disgorgement, prejudgment interest, and civil penalties, plus any additional interest accrued pursuant to SEC Rule of Practice 600 and/or pursuant to 31 U.S.C. § 3717, shall be due and payable immediately, without further application. Payment must be made in one of the following ways:

(1) Respondents may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondents may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondents may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Taberna, Fralin, or Licht (as appropriate) as Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Michael Osnato, Unit Chief, Complex Financial Instruments Unit, Division of Enforcement, Securities and Exchange Commission, Brookfield Place, 200 Vesey Street, Suite 400, New York, NY 10281.

N. Amounts ordered to be paid as civil money penalties pursuant to this Order shall be treated as penalties paid to the government for all purposes, including all tax purposes. To preserve the deterrent effect of the civil penalty, Respondents each agree that in any Related Investor Action, they shall not argue that they are entitled to, nor shall they benefit by, offset or reduction of any award of compensatory damages by the amount of any part of Respondents' payment of a civil penalty in this action ("Penalty Offset"). If the court in any Related Investor Action grants such a Penalty Offset, Respondents agree that they shall, within 30 days after entry of a final order granting the Penalty Offset, notify the Commission's counsel in this action and pay the amount of the Penalty Offset to the United States Treasury. Such a payment shall not be deemed an additional civil penalty and shall not be deemed to change the amount of the civil penalty imposed in this proceeding. For purposes of this paragraph, a "Related Investor Action" means a private damages action brought against Respondents by or on behalf of one or more investors based on substantially the same facts as alleged in the Order instituted by the Commission in this proceeding.

O. A fund (the "Disgorgement Fund") shall be established for the distribution of the disgorgement and interest referenced in paragraph M above (the "Disgorgement Amounts"). The Disgorgement Fund shall be distributed pursuant to a distribution plan (the "Plan") to be administered in accordance with the Commission's Rules of Practice Governing Fair Funds and Disgorgement Funds. A Fund Administrator (the "Administrator") shall be appointed by the Commission. The Administrator will prepare, in coordination with Commission staff, the Plan to distribute the Disgorgement Fund to the injured parties in the amounts necessary to compensate them for the harm they suffered as a result of Taberna's violations. The Plan shall be subject to

Commission approval. Commission staff shall seek the appointment of a tax administrator in regard to the Disgorgement Fund as the fund constitutes a qualified settlement fund ("QSF") under section 468B(g) of the Internal Revenue Code (IRC), 26 U.S.C. § 468B(g), and related regulations, 26 C.F.R. §§ 1.468B-1 through 1.468B-5. Taxes, if any, and related administrative expenses shall be paid from the Disgorgement Fund. After the Commission makes the foregoing payments, any remaining funds consisting of the Disgorgement Amounts shall be remitted to the general fund of the United States Treasury subject to Exchange Act Section 21F(g)(3).

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondents Fralin and Licht, and further, as to Respondents Fralin and Licht, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

SECURITIES EXCHANGE ACT OF 1934
Release No. 75818 / September 2, 2015

Admin. Proc. File No. 3-16502

In the Matter of LUMINARY ACQUISITION CORP.	ORDER DISMISSING UNTIMELY PETITION FOR REVIEW

The Division of Enforcement requests that we dismiss as untimely the appeal filed by Luminary Acquisition Corp. ("Luminary") challenging the revocation of the registration of its registered securities. Luminary opposes the Division's request. For the reasons explained below, we grant the Division's request and dismiss Luminary's appeal as untimely.

I. Background

Before June 24, 2015, Luminary was a company with securities registered with the Commission pursuant to Section 12 of the Securities Exchange Act of 1934.[1] Between April 1, 2008 and March 18, 2015, Luminary did not make any periodic filings with the Commission with respect to those securities.[2] On March 19 and 20, 2015, Luminary filed 28 quarterly and annual reports on Forms 10-Q and 10-K addressing the seven-year period from 2008 to 2014. On April 14, 2015, Luminary's former auditor advised the Office of the Chief Accountant that the filings attributed audit reports to it that the auditor had not issued. Luminary acknowledged these deficiencies in an April 15, 2015 letter to Commission staff.[3]

On April 21, 2015, the Commission issued an order instituting proceedings, which asserted that Luminary and two other issuers with securities registered with the Commission had failed to file timely periodic reports as required by Exchange Act Section 13(a).[4] The OIP also

1 15 U.S.C. § 78l.

2 On March 28, 2008, Luminary filed a Form 10KSB for the year ended December 31, 2007.

3 In its petition for review, Luminary contended that a third party service provider had made "erroneous filings," which Luminary has "now corrected through a new auditor." But the EDGAR system shows that Luminary never made any corrected filings and never withdrew its March 2015 filings.

4 *Hi-Q Wason, Inc*, Exchange Act Release No. 74772, 2015 WL 1800396 (Apr. 21, 2015); 15 U.S.C. § 78m(a).

gave notice that the Commission would consider whether to revoke the registration of the respondents' registered securities in light of these violations. Consistent with Rule 141(a)(2)(ii) of the Commission's Rules of Practice, the OIP was served by express mail on Luminary on April 21, 2015 at "the most recent address shown on [its] most recent filing with the Commission."[5] The OIP was delivered to that address the following day, as reflected by tracking information obtained from the United States Postal Service website.[6]

Luminary did not respond to the OIP, and on May 12, 2015, the law judge issued an Initial Decision Making Findings and Revoking Registrations by Default with respect to Luminary's registered securities (the "Initial Decision").[7] The Initial Decision stated, among other things, that "a party may file a petition for review of this Initial Decision within twenty-one days after service of the Initial Decision." On May 14, 2015, the Commission sent the Initial Decision to Luminary via certified mail to the same addresses to which the OIP was sent.[8] The USPS website shows that unsuccessful delivery attempts were made at each address.

On June 24, 2015, a Notice that Initial Decision Has Become Final ("Finality Notice") was issued.[9] The Finality Notice explained that "[t]he time for filing a petition for review of the initial decision in this proceeding ha[d] expired," and that no respondent had filed a petition. The Finality Notice also stated that the Initial Decision had become the final decision of the Commission with respect to Luminary and the other respondents.

On July 1, 2015, Luminary filed a notice of appeal pursuant to Rule of Practice 410(a) requesting that the Commission "set aside or reverse the decision granted on June 24th 2015." The Commission then issued a briefing order requesting the views of the parties as to whether Luminary's appeal should be dismissed as untimely pursuant to Rule 410(b), which provides that a petition for review of an initial decision must be submitted within the time period identified in the initial decision.[10] In its initial brief, the Division of Enforcement requested that we dismiss Luminary's appeal as untimely. Luminary acknowledged that, "in contravention of" the Rules of

---

5 17 C.F.R. § 201.141(a)(2)(ii).

6 The OIP also was sent by express mail to the address listed on Luminary's April 15 letter to the Commission. The USPS website reflects that the OIP was returned to the Commission from that address.

7 *Hi-Q Wason, Inc*, Initial Decision Release No. 791, 2015 WL 2196504 (May 12, 2015). The decision also revoked the registration of the registered securities of the other respondents.

8 *See* Rule of Practice 141(b), 17 C.F.R. § 201.141(b) (authorizing service of subsequent orders and decisions by the same means that the OIP is served).

9 *Hi-Q Wason, Inc*, Exchange Act Release No. 75275, 2015 WL 3878333 (June 24, 2015).

10 *Luminary Acquisition Corp.*, Exchange Act Release No. 75502, 2015 WL 4465322, at *1 (July 22, 2015); Rule 410(b), 17 C.F.R. § 201.410(b) (generally providing that "[t]he petition for review of an initial decision shall be filed with the Commission within such time after service of the initial decision as prescribed by the hearing officer pursuant to Rule 360(b)").

Practice, it had filed its appeal after the 21-day period during which it could appeal the initial decision had expired. But Luminary requested that we set aside the Finality Order, continue "its status as a fully reporting company," and allow it to work with the Commission "to ensure all filings are correct and in accordance with [the] Rules of Practice."

II. We dismiss Luminary's appeal as untimely.

We find that it is appropriate to dismiss Luminary's appeal as untimely under Rule of Practice 410. Under Rule 410, Luminary was required to file any petition for review by June 8, 2015, i.e., 21 days after service of the Initial Decision, plus three days for mailing.[11] Instead, Luminary did not file its petition until July 1, 2015, i.e., 23 days after the appeal deadline and one week after the Finality Order was entered. Indeed, Luminary concedes that its appeal was untimely. Accordingly, we dismiss Luminary's petition.

Luminary argues that we should entertain its petition for three reasons. We find none of them persuasive.

First, Luminary contends that its periodic filings "were brought up to date on March 20[,] 2015, therefore negating the revoking [of] the registration of the securities." But this argument does not bear on or excuse Luminary's failure to timely file an appeal.[12] In any event, Luminary's argument appears to rest on a false premise. Although Luminary contends that it is current in its reporting obligations, it concedes that its recent filings are deficient.[13]

Second, Luminary asserts that the Initial Decision served in mid-May 2015 did not reach it because it changed its "lawyers, auditors, and registered office on April 27, 2015." It also

---

[11] Rule of Practice 160(b), 17 C.F.R. § 201.160(b) ("If service is made by mail, three days shall be added to the prescribed period for response unless an order of the Commission or the hearing officer specifies a date certain for filing."); *see also* Rule 160(a), 17 C.F.R. § 201.160(a) (providing that where a response date falls on a "Saturday, Sunday, or Federal legal holiday" the period for response "runs until the end of the next day that is not a Saturday, Sunday, or Federal legal holiday"); *see also BDO China Dahua CPA Co., Ltd.*, Exchange Act Release No. 72753, 2014 WL 3827605, at *1 n.2 (Aug. 4, 2014) (clarifying application of Rule of Practice 160).

[12] *See Walter V. Gerasimowicz*, Exchange Act Release No. 72133, 2014 WL 1826641, at *2 n.19 (May 8, 2014) ("Unmet deadlines may cut off substantive rights to review, but this is their function.") (*citing Carter v. Wash. Metro Area Transit Auth.*, 764 F.2d 854, 857 (D.C. Cir. 1985) ("[F]inality of outcome, regardless of the merits of the claim, is exactly the purpose of the statute of limitations that the legislature has enacted."), and *Kavanagh v. Noble*, 332 U.S. 535, 539 (1947) (explaining that limitations "periods are established to cut off rights, justifiable or not, that might otherwise be asserted" (citations omitted))).

[13] Moreover, we have observed that "even if an issuer has filed all delinquent periodic reports, revocation can be appropriate, particularly when . . . the delinquencies continued for an extended period without adequate explanation." *China-Biotics, Inc.*, Exchange Act Release No. 70800, 2013 WL 5883342, at *13 (Nov. 4, 2013).

suggests that the Initial Decision could have been served on it by email. But the Rules of Practice unambiguously authorized service on Luminary at the address listed in its most recent securities filing, as was done here.[14] And although it was not required, service also was attempted (unsuccessfully) at the address listed on Luminary's April 15, 2015 letter. As Luminary conceded in its initial brief, it was "its failure to correctly update" its address with the Commission that led to any delay in its receipt of the Initial Decision.

Finally, Luminary asserts that it has acted in good faith to cure its violations since it became aware of the OIP. But Luminary's state of mind is not at issue. Rule 410 provides a bright-line rule for determining the timeliness of an appeal.[15] Because Luminary did not comply with that Rule, despite proper service of the Initial Decision, its appeal accordingly is dismissed.

Accordingly, IT IS ORDERED that the petition for review of Luminary Acquisition Corp. is dismissed as untimely.

By the Commission.

Admin. Proc. File No. 3-15215

In the Matter of JAMES S. TAGLIAFERRI	ORDER GRANTING MOTION TO AMEND ORDER INSTITUTING PROCEEDINGS

The Division of Enforcement requests that we amend the order instituting proceedings in this case to add allegations regarding respondent James S. Tagliaferri's criminal conviction for, among other things, violating the securities laws, and to remove the OIP's directives to determine whether disgorgement and civil money penalties would be appropriate in the public interest. Tagliaferri asserts that the amendment would prejudice him and opposes the Division's motion. As explained below, we find that the amendment is appropriate and accordingly grant the Division's motion.

I. Background

On February 21, 2013, the Commission instituted proceedings against James S. Tagliaferri,[1] alleging that he willfully violated Sections 17(a)(1) and (3) of the Securities Act of 1933, Sections 10(b) and 15(a) of the Securities Exchange Act of 1934, and Rules 10b-5(a) and (c) thereunder, as well as Sections 206(1), (2), and (3) of the Investment Advisers Act of 1940.[2] On March 11, 2013, an administrative law judge stayed the proceeding against Tagliaferri

1 *James S. Tagliaferri*, Exchange Act Release No. 68963, 2013 WL 635053 (Feb. 21, 2013).

2 15 U.S.C. §§ 77q(a)(1) and (3), 78j(b), 78o(a), 80b-6(1), (2), and (3); 17 C.F.R. § 240.10b-5(a) and (c).

pending a parallel criminal action against him in the United States District Court for the Southern District of New York,[3] and the law judge lifted that stay on June 1, 2015.[4]

On July 24, 2014, a jury convicted Tagliaferri of one count of investment adviser fraud, one count of securities fraud, four counts of wire fraud, and six counts of violations of the Travel Act. On February 13, 2015, Tagliaferri was sentenced to 72 months' incarceration and three years' supervised release, and he was ordered to forfeit $2.5 million and certain real property. On July 2, 2015, Tagliaferri was further ordered to pay in excess of $20 million in restitution.

On July 16, 2015, the Division moved to amend the order instituting proceedings in this proceeding in three principal respects. First, the proposed amended OIP, which the Division submitted with its motion, would add allegations regarding Tagliaferri's criminal conviction. The Division asserts that the conviction provides an independent basis for establishing the violations alleged in the OIP. Such convictions also provide an independent basis for imposing sanctions.[5] Second, in light of the sentence of imprisonment and supervised release imposed on Tagliaferri, the amendment would remove the OIP's directive to determine whether civil money penalties would be appropriate in the public interest. Third, because the forfeiture and restitution orders entered in the criminal action require Tagliaferri to pay more than $20 million, the amendment would remove the OIP's directive to determine whether disgorgement would be appropriate in the public interest. The proposed amended OIP also would make some conforming changes in light of Tagliaferri's current status.

II. Analysis

Under Rule of Practice 200(d)(1), we may, at any time, upon a motion by a party, amend an OIP to include new matters of fact or law.[6] Such amendments to OIPs, which can reflect "subsequent developments" in a proceeding,[7] "should be freely granted, subject only to the

4 *James S. Tagliaferri*, Admin. Proc. Release No. 2750 (June 1, 2015), *available at* https://www.sec.gov/alj/aljorders/2015/ap-2750.pdf.

5 *See, e.g.*, Advisers Act Section 203(f), 15 U.S.C. § 80b-3(f) (referencing convictions specified in Advisers Act Section 203(e)(2) and (3)); Exchange Act Section 15(b)(6)(A)(ii), 15 U.S.C. § 78o(b)(6)(A)(ii) (referencing convictions specified in Exchange Act Section 15(b)(4)(B)).

6 17 C.F.R. § 201.200(d)(1).

7 *See Carl L. Shipley*, Exchange Act Release No. 10870, 45 SEC 589, 1974 WL 161761, at *4 (June 21, 1974).

consideration that other parties should not be surprised nor their rights prejudiced."[8] We grant the Division's motion to add the allegations specified above because Tagliaferri's criminal conviction in the parallel criminal proceeding is such a subsequent development.[9] In addition, the conviction may provide an independent basis for remedial sanctions,[10] and it is more efficient to resolve all issues related to Tagliaferri's conduct in a single proceeding.[11] We also have determined, as an exercise of our discretion, to grant the Division's motion to remove the OIP's directives to determine whether civil penalties and disgorgement are appropriate in the public interest, given Tagliaferri's prison sentence and period of supervised release, as well as the monetary obligations imposed on him in the criminal proceeding.[12]

We reject Tagliaferri's argument that the motion should be denied because his rights would be prejudiced by the amendment.[13] Tagliaferri objects to the amendment because it "would allow the Division to argue at trial [that] the criminal conviction is sufficient to find" him liable even though, in his view, the allegations of the original OIP and superseding criminal indictment "differ substantially." Tagliaferri asserts that his objection could be resolved by omitting from the amended OIP language stating that he was criminally convicted "on substantially the same allegations alleged in this case." Tagliaferri does not otherwise oppose the amendment.

8 *Robert David Beauchene*, Exchange Act Release No. 68974, 2013 WL 661619, at *2 (Feb. 25, 2013) (quoting *Charles K. Seavey*, Advisers Act Release No. 1925A, 2001 WL 228030, at *2 (Mar. 9, 2001)).

9 *See Daniel J. Gallagher*, Exchange Act Release No. 70305, 2013 WL 4716026, at *2 (Sept. 3, 2013) (granting motion for leave to amend OIP to add respondent's conviction in parallel criminal proceeding); *Beauchene*, 2013 WL 661619, at *2 (same); *cf. Shipley*, 1974 WL 161761, at *4 n.17 (noting that motions to amend "are granted routinely" to add allegations regarding injunctions entered against respondents following issuance of the OIP given that "the public interest requires that the injunction and its implications be considered in the administrative proceeding").

10 *See supra* note 5 and associated text.

11 *Gallagher*, 2013 WL 4716026, at *1; *Beauchene*, 2013 WL 661619, at *2.

12 *Gallagher*, 2013 WL 4716026, at *1 (granting Division's request to withdraw OIP's civil money penalty claim given respondent's prison sentence and period of supervised release); *Beauchene*, 2013 WL 661619, at *2 (amending OIP to withdraw disgorgement request in light of restitution order); *A.S. Goldmen & Co., Inc.*, Exchange Act Release No. 48091, 2003 WL 21468605, at *2 (June 26, 2003) (same).

13 Tagliaferri does not argue that he was surprised by the amendment. He learned of the criminal indictment no later than the date the OIP was issued. *See* http://www.justice.gov/usao-sdny/pr/manhattan-us-attorney-announces-arrest-virgin-islands-based-investment-adviser-multi. The law judge stayed this proceeding soon thereafter.

We find no undue prejudice to Tagliaferri. The Division's allegation that he is liable based on the criminal conviction does not establish prejudice sufficient to deny the amendment.[14] The OIP does not establish facts, it alleges them; Tagliaferri will have an opportunity to contest these allegations and their legal effect.[15] And to the extent that Tagliaferri's conviction provides an independent basis for sanctions, it is irrelevant whether he was convicted of the same conduct alleged in the OIP.[16]

Accordingly, IT IS ORDERED that the Division of Enforcement's motion to amend the Order Instituting Proceedings against James S. Tagliaferri is granted.[17]

By the Commission.

UNITED STATES OF AMERICA
Before the
SECURITIES AND EXCHANGE COMMISSION

SECURITIES EXCHANGE ACT OF 1934
Release No. 75819 / September 2, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16777

In the Matter of: Janet L. Waters Respondent.	ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS PURSUANT TO SECTION 15(b) OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative proceedings be, and hereby are, instituted pursuant to Section 15(b) of the Securities Exchange Act of 1934 ("Exchange Act") against Janet L. Waters ("Janet Waters" or Respondent).

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over her and the subject matter of these proceedings, which are admitted, Respondent consents to the entry of this Order Instituting Proceedings Pursuant to Section 15(b) of the Securities Exchange Act of 1934, Making Findings, and Imposing Remedial Sanctions ("Order"), as set forth below.

III.

On the basis of the foregoing, the Commission finds[1] that:

Summary

1. These proceedings arise out of Janet Waters' failure reasonably to supervise Arnett L. Waters with a view to preventing and detecting his violations of Section 10(b) of the Exchange Act and Rule 10b-5 thereunder and Section 17(a) of the Securities Act of 1933 ("Securities Act"). From at least 2009 through 2012, while Arnett Waters was a registered representative associated with A.L. Waters Capital, LLC ("Waters Capital"), he operated a fraudulent scheme through which he raised at least $839,000 from multiple investors by promising to use investor funds to purchase a portfolio of securities, and instead misappropriating the money and spending it on personal and business expenses. Throughout this period, Janet Waters was designated as the person to supervise her husband at Waters Capital.

Respondent

2. **Janet Lee Waters**, age 55, lives in Norwood, Massachusetts. She was Arnett Waters' designated supervisor, the chief compliance officer of A.L. Waters Capital, LLC, and a registered representative with the firm from April 2005 through March 9, 2012, when FINRA permanently barred her from association with any FINRA member for failing to provide documents, information, and testimony requested in FINRA's investigation. Janet Waters held Series 7, Series 24, and Series 63 licenses.

Other Relevant Entities

3. **A.L. Waters Capital, LLC,** was a Massachusetts limited liability company formed in 2005 and based in Braintree, Massachusetts. It has been registered with the Commission as a broker-dealer since 2005. On May 1, 2012, the Commission filed a civil enforcement action against Waters Capital and others based on the fraudulent conduct of Arnett Waters. On December 4, 2013, a final judgment was entered by consent against Waters Capital, permanently enjoining it from future violations of Section 17(a) of the Securities Act, Section 10(b) of the Exchange Act and Rule 10b-5 thereunder, in the civil action entitled Securities and Exchange Commission v. A.L. Waters Capital, LLC, et al., Civil Action Number 12-CV-10783, in the United States District Court for the District of Massachusetts. On December 11, 2013, the Commission announced the issuance of an Order Instituting Administrative Proceedings Pursuant to Section 15(b) of the Securities Exchange Act of 1934, Making Findings, and Imposing Remedial Sanctions against A.L. Waters Capital, LLC and simultaneously accepted Waters Capital's offer of settlement. The Order barred Waters Capital from association with any

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

broker, dealer, investment adviser, municipal securities dealer, municipal advisor, transfer agent, or nationally recognized statistical rating organization, and from participating in any offering of a penny stock, including: acting as a promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer or issuer for purposes of the issuance or trading in any penny stock, or inducing or attempting to induce the purchase or sale of any penny stock.

4. **Arnett Lanse Waters**, age 63, was a resident of Milton, Massachusetts. At all relevant times, he was the president and chief executive officer of Waters Capital. Arnett Waters was a registered representative with Waters Capital from April 2005 through March 9, 2012, when he was permanently barred from association with any FINRA member for failing to provide testimony requested in FINRA's investigation. During that period, Arnett L. Waters was the husband of Janet Waters.

Civil and Criminal Actions against Arnett Waters

5. In 1993, Arnett Waters was censured and barred for two years by the New York Stock Exchange for forging a document to secure a bank loan and refusing to comply with the Exchange's requests for information and testimony.

6. On May 1, 2012, the Commission filed a civil injunctive action against Arnett Waters and others alleging that Arnett Waters and the other defendants violated the antifraud provisions of the federal securities laws by obtaining money from various investors through false representations that Arnett Waters would invest such monies on behalf of those investors, when in fact he was selling these investors units in sham investment partnerships and spent most of the investors' funds on personal and business expenses.

7. On November 29, 2012, Arnett Waters pleaded guilty to sixteen counts of securities fraud, mail fraud, money laundering, and obstruction of justice arising out of among other things the conduct that is the subject of the Commission's May 1, 2012 civil action. The criminal information to which Arnett Waters pleaded guilty further alleged that he engaged in money laundering through two transactions totaling $77,000. Finally, Arnett Waters pleaded guilty to obstruction of justice in connection with multiple misrepresentations to Commission staff, including that there were no investors in his investment-related partnerships, in order to conceal the fact that investor money was misappropriated in a fraudulent scheme. As a result of his guilty plea to this criminal conduct, Arnett Waters was sentenced on April 26, 2013 to 17 years in federal prison and three years of supervised release, and was ordered to pay $9,025,691 in restitution and forfeiture.

8. On December 3, 2012, Arnett Waters was barred by the Commission pursuant to Section 15(b) of the Exchange Act and Section 203(f) of the Investment Advisers Act of 1940 ("Advisers Act"), based on his criminal conviction for criminal contempt of the asset freeze order entered in the Commission's May 2012 civil action against him, Waters Capital, and a second entity operated by Arnett Waters.

9. On December 4, 2013, the U.S. District Court for the District of Massachusetts entered a final judgment by consent against Arnett Waters in the civil action filed by the Commission in May 2012. Arnett Waters was enjoined from violations of Section 10(b) of the Exchange Act and Rule 10b-5 thereunder and Section 17(a) of the Securities Act, and Section 206(4) of the Advisers Act and Rule 206(4)-8 thereunder.

Arnett Waters' Misconduct

10. From at least 2009 through at least April 2012 ("the Relevant Period"), Arnett Waters engaged in a scheme to misappropriate at least $839,000 from at least 9 customers of Waters Capital by falsely representing that he would invest their funds in securities through Waters Capital. Arnett Waters and Waters Capital purported to create various private investment "funds" and offered them to potential investors, creating marketing materials and agreements related to these purported funds and distributing them to investors. All of these materials indicated that these purported funds would invest in portfolios of securities and other investment products. Arnett Waters and Waters Capital accepted investors' money under the pretense that their money would be invested in the portfolios described in the fund documents. Instead, investors' money was spent on the Waters' personal expenses. No money was invested in the manner Arnett Waters had promised. Arnett Waters and Waters Capital made multiple misrepresentations to investors, and to FINRA and Commission staff, to conceal the fact that investor money had been misappropriated in a fraudulent scheme.

Janet Waters' Failure to Supervise

11. In the Waters Capital Supervisory Procedures Manual, Janet Waters was named as the "Supervisor Designated to Conduct Day-To-Day Oversight of Producing Manager's Activity" for Arnett Waters. In this role, Janet Waters was required to "review and supervise the day-to-day customer transactions" of Arnett Waters, which included following supervisory procedures requiring transaction and correspondence reviews. She failed to perform these – or any other – supervisory duties with respect to Arnett Waters during the Relevant Period.

12. Janet Waters knew that firm customers had invested in certain investment partnerships that were offered by Waters Capital and recommended to customers by Arnett Waters and that Waters Capital handled any investments made by the partnerships. If, as Arnett Waters' supervisor, she had reviewed Arnett Waters' correspondence and the firm's transaction reports, she could have detected that the partnerships did not make any investments at all during the Relevant Period, despite what customers were being told. If Janet Waters had followed firm procedures and followed up on these red flags based on a review of the correspondence and transaction reports, she would have prevented and detected Arnett Waters' fraud.

Conclusions

13. Section 15(b)(6) of the Exchange Act, incorporating by reference Section 15(b)(4)(E) of the Exchange Act, authorizes the Commission to sanction a person who is associated, or at the time of the alleged misconduct was associated, with a broker or dealer for failing reasonably to supervise, with a view to preventing violations of the federal securities laws, another person who commits such a violation if that person is subject to the person's supervision. While serving as a registered representative of broker-dealer Waters Capital, Janet Waters was responsible for supervising Arnett Waters.

14. Based on the conduct described above, Arnett Waters violated Section 10(b) of the Exchange Act and Rule 10b-5 thereunder and Section 17(a) of the Securities Act. Janet Waters failed reasonably to follow the firm's supervisory procedures with respect to correspondence and transaction reviews, which would have revealed red flags of Arnett Waters' fraud. By failing reasonably to follow the firm's procedures that would have led to detecting Arnett Waters' fraud, Janet Waters failed reasonably to supervise Arnett Waters within the meaning of Section 15(b)(4)(E) of the Exchange Act.

Civil Penalties

15. Respondent has submitted a sworn Statement of Financial Condition dated June 17, 2014, and other evidence and has asserted her inability to pay a civil penalty.

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent's Offer.

Accordingly, it is hereby ORDERED that:

A. Respondent Janet Waters be, and hereby is:

barred from association with any broker, dealer, investment adviser, municipal securities dealer, municipal advisor, transfer agent, or nationally recognized statistical rating organization; and,

barred from participating in any offering of a penny stock, including: acting as a promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer or issuer for purposes of the issuance or trading in any penny stock, or inducing or attempting to induce the purchase or sale of any penny stock.

B. Any reapplication for association by the Respondent will be subject to the applicable laws and regulations governing the reentry process, and reentry may be conditioned upon a number of factors, including, but not limited to, the satisfaction of any or all of the following: (a) any disgorgement ordered against the Respondent, whether or not the Commission has fully or partially waived payment of such disgorgement; (b) any arbitration award related to the conduct that served as the basis for the Commission order; (c) any self-regulatory organization arbitration award to a customer, whether or not related to the conduct that served as the basis for the Commission order; and (d) any restitution order by a self-regulatory organization, whether or not related to the conduct that served as the basis for the Commission order.

C. Based upon Respondent's sworn representations in her Statement of Financial Condition dated June 17, 2014, and other documents submitted to the Commission, the Commission is not imposing a penalty against Respondent.

D. The Division of Enforcement ("Division") may, at any time following the entry of this Order, petition the Commission to: (1) reopen this matter to consider whether Respondent provided accurate and complete financial information at the time such representations were made; and (2) seek an order directing payment of the maximum civil penalty allowable under the law. No other issue shall be considered in connection with this petition other than whether the financial information provided by Respondent was fraudulent, misleading, inaccurate, or incomplete in any material respect. Respondent may not, by way of defense to any such petition: (1) contest the findings in this Order; (2) assert that payment of a penalty should not be ordered; (3) contest the imposition of the maximum penalty allowable under the law; or (4) assert any defense to liability or remedy, including, but not limited to, any statute of limitations defense.

By the Commission.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75821 / September 2, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16778

In the Matter of High Point Transport, Inc., Kohler Capital III, Corporation, Mega Group, Inc., Merci, Inc., Our Glass, Inc., and Synthetic Industries, LP Respondents.	ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS AND NOTICE OF HEARING PURSUANT TO SECTION 12(j) OF THE SECURITIES EXCHANGE ACT OF 1934

I.

The Securities and Exchange Commission ("Commission") deems it necessary and appropriate for the protection of investors that public administrative proceedings be, and hereby are, instituted pursuant to Section 12(j) of the Securities Exchange Act of 1934 ("Exchange Act") against the Respondents named in the caption.

II.

After an investigation, the Division of Enforcement alleges that:

A. RESPONDENTS[1]

1. High Point Transport, Inc. ("High Point") (CIK No. 1409154) is a dissolved Florida corporation located in Myakka City, Florida with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-QSB for the period ended September 30, 2007, which reported a net loss of $218,432 for the prior nine months. As of September 1, 2015, the common stock of High Point was not publicly quoted or traded.

[1] In cases where the short form of the issuer's name is in all capital letters, the short form is also its stock symbol.

9 of 147

2. Kohler Capital III, Corporation ("Kohler") (CIK No. 1231074) is a dissolved Florida corporation located in Sheboygan, Wisconsin with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended March 31, 2011, which reported a net loss of $6,450 for the prior nine months. As of September 1, 2015, the common stock of Kohler was not publicly quoted or traded.

3. Mega Group, Inc. ("MGINQ") (CIK No. 828942) is a dissolved New York corporation located in Washington, DC with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). MGINQ is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-QSB for the period ended September 30, 2007, which reported a net loss of $456,221 for the prior nine months. As of September 1, 2015, the common stock of MGINQ was not publicly quoted or traded.

4. Merci, Inc. ("Merci") (CIK No. 1112551) is a void Delaware corporation located in Naples, Florida with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended March 31, 2012, which reported a net loss of $1,839 for the prior three months. As of September 1, 2015, the common stock of Merci was not publicly quoted or traded.

5. Our Glass, Inc. ("Our Glass") (CIK No. 1302365) is a revoked Nevada corporation located in Naples, Florida with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended March 31, 2012, which reported a net loss of $1,835 for the prior three months. As of September 1, 2015, the common stock of Our Glass was not publicly quoted or traded.

6. Synthetic Industries, LP ("Synthetic") (CIK No. 901175) is a cancelled and voided Delaware corporation located in Chickamauga, Georgia with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-K for the period ended September 30, 1999. As of September 1, 2015, the units of limited partnership interest of Synthetic was not publicly quoted or traded.

B. DELINQUENT PERIODIC FILINGS

7. As discussed in more detail above, all of the Respondents are delinquent in their periodic filings with the Commission, have repeatedly failed to meet their obligations to file timely periodic reports, and failed to heed delinquency letters sent to them by the Division of Corporation Finance requesting compliance with their periodic filing obligations or, through their failure to maintain a valid address on file with the Commission as required by Commission rules, did not receive such letters.

8. Exchange Act Section 13(a) and the rules promulgated thereunder require issuers of securities registered pursuant to Exchange Act Section 12 to file with the Commission current and accurate information in periodic reports, even if the registration is voluntary under Section

12(g). Specifically, Rule 13a-1 requires issuers to file annual reports, and Rule 13a-13 requires domestic issuers to file quarterly reports.

9. As a result of the foregoing, Respondents failed to comply with Exchange Act Section 13(a) and Rules 13a-1 and/or 13a-13 thereunder.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate for the protection of investors that public administrative proceedings be instituted to determine:

A. Whether the allegations contained in Section II hereof are true and, in connection therewith, to afford the Respondents an opportunity to establish any defenses to such allegations; and,

B. Whether it is necessary and appropriate for the protection of investors to suspend for a period not exceeding twelve months, or revoke the registration of each class of securities registered pursuant to Section 12 of the Exchange Act of the Respondents identified in Section II hereof, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents.

IV.

IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice [17 C.F.R. § 201.110].

IT IS HEREBY FURTHER ORDERED that Respondents shall file an Answer to the allegations contained in this Order within ten (10) days after service of this Order, as provided by Rule 220(b) of the Commission's Rules of Practice [17 C.F.R. § 201.220(b)].

If Respondents fail to file the directed Answers, or fail to appear at a hearing after being duly notified, the Respondents, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents, may be deemed in default and the proceedings may be determined against it upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f), and 310 of the Commission's Rules of Practice [17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f), and 201.310].

This Order shall be served forthwith upon Respondents personally or by certified, registered, or Express Mail, or by other means permitted by the Commission Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 120 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice [17 C.F.R. § 201.360(a)(2)].

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

By the Commission.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75823 / September 2, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16779

In the Matter of INverso Corp., Madison Venture Capital Group, Inc., Plantation Lifecare Developers, Inc., Prins Recycling Corp., SCN Holdings, Inc., Skin Nutrition International, Inc., and Tecfin Corporation, Respondents.	ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS AND NOTICE OF HEARING PURSUANT TO SECTION 12(j) OF THE SECURITIES EXCHANGE ACT OF 1934

I.

The Securities and Exchange Commission ("Commission") deems it necessary and appropriate for the protection of investors that public administrative proceedings be, and hereby are, instituted pursuant to Section 12(j) of the Securities Exchange Act of 1934 ("Exchange Act") against the Respondents named in the caption.

II.

After an investigation, the Division of Enforcement alleges that:

A. RESPONDENTS[1]

1. INverso Corp. ("Inverso") (CIK No. 1295128) is a void Delaware corporation located in Jackson Center, Pennsylvania with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2009, which reported a net loss of $47,437 for the prior three months. As of September 1, 2015, the common stock of Inverso was not publicly quoted or traded.

[1]In cases where the short form of the issuer's name is in all capital letters, the short form is also its stock symbol.

2. Madison Venture Capital Group, Inc. ("Madison") (CIK No. 1398603) is a void Delaware corporation located in New York, New York with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2012, which reported a net loss of $3,261 for the prior nine months. As of September 1, 2015, the common stock of Madison was not publicly quoted or traded.

3. Plantation Lifecare Developers, Inc. ("PLDI") (CIK No. 1458704) is a Delaware corporation located in Liverpool, New York with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). PLDI is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2012, which reported a net loss of $25,561 for the prior nine months. As of September 1, 2015, the common stock of PLDI was not publicly quoted or traded.

4. Prins Recycling Corp. ("PRNSQ") (CIK No. 853529) is a dissolved New York corporation located in Newark, New Jersey with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). PRNSQ is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-QSB for the period ended March 31, 1996, which reported a net loss of $4,040,024 for the prior three months. As of September 1, 2015, the common stock of PRNSQ was not publicly quoted or traded.

5. SCN Holdings, Inc. ("SCN Holdings") (CIK No. 1448239) is a revoked Nevada corporation located in Goshen, New York with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-K for the period ended December 31, 2008, which reported a net loss of $10,000 for the period from inception on October 6, 2008 through December 31, 2008. As of September 1, 2015, the common stock of SCN Holdings was not publicly quoted or traded.

6. Skin Nutrition International, Inc. ("Skin Nutrition") (CIK No. 1349879) is a delinquent Colorado corporation located in New York, New York with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2008. As of September 1, 2015, the common stock of Skin Nutrition was not publicly quoted or traded.

7. Tecfin Corporation ("TEFN") (CIK No. 352860) is a void Delaware corporation located in Great Neck, New York with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). TEFN is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-QSB for the period ended March 31, 1999. As of September 1, 2015, the common stock of TEFN was not publicly quoted or traded.

B. DELINQUENT PERIODIC FILINGS

8. As discussed in more detail above, all of the Respondents are delinquent in their periodic filings with the Commission, have repeatedly failed to meet their obligations to file timely periodic reports, and failed to heed delinquency letters sent to them by the Division of Corporation Finance requesting compliance with their periodic filing obligations or, through their failure to maintain a valid address on file with the Commission as required by Commission rules, did not receive such letters.

9. Exchange Act Section 13(a) and the rules promulgated thereunder require issuers of securities registered pursuant to Exchange Act Section 12 to file with the Commission current and accurate information in periodic reports, even if the registration is voluntary under Section 12(g). Specifically, Rule 13a-1 requires issuers to file annual reports, and Rule 13a-13 requires domestic issuers to file quarterly reports.

10. As a result of the foregoing, Respondents failed to comply with Exchange Act Section 13(a) and Rules 13a-1 and/or 13a-13 thereunder.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate for the protection of investors that public administrative proceedings be instituted to determine:

A. Whether the allegations contained in Section II hereof are true and, in connection therewith, to afford the Respondents an opportunity to establish any defenses to such allegations; and,

B. Whether it is necessary and appropriate for the protection of investors to suspend for a period not exceeding twelve months, or revoke the registration of each class of securities registered pursuant to Section 12 of the Exchange Act of the Respondents identified in Section II hereof, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents.

IV.

IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice [17 C.F.R. § 201.110].

IT IS HEREBY FURTHER ORDERED that Respondents shall file an Answer to the allegations contained in this Order within ten (10) days after service of this Order, as provided by Rule 220(b) of the Commission's Rules of Practice [17 C.F.R. § 201.220(b)].

If Respondents fail to file the directed Answers, or fail to appear at a hearing after being duly notified, the Respondents, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents, may be deemed in default and the proceedings may be determined against it upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f), and 310 of the Commission's Rules of Practice [17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f), and 201.310].

This Order shall be served forthwith upon Respondents personally or by certified, registered, or Express Mail, or by other means permitted by the Commission Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 120 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice [17 C.F.R. § 201.360(a)(2)].

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

SECURITIES AND EXCHANGE COMMISSION

INVESTMENT ADVISERS ACT OF 1940
Release No. 4188 / September 3, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16780

In the Matter of **MACKENSEN & COMPANY, INC. AND WARREN J. MACKENSEN** **Respondents.**	**ORDER INSTITUTING ADMINISTRATIVE AND CEASE-AND DESIST PROCEEDINGS PURSUANT TO SECTIONS 203(e), 203(f) AND 203(k) OF THE INVESTMENT ADVISERS ACT OF 1940, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission" or "SEC") deems it appropriate and in the public interest that public administrative and cease-and-desist proceedings be, and hereby are, instituted pursuant to Sections 203(e), 203(f) and 203(k) of the Investment Advisers Act of 1940 ("Advisers Act") against Mackensen & Company, Inc. ("MCI"), and Warren J. Mackensen ("Mackensen") (collectively, "Respondents").

II.

In anticipation of the institution of these proceedings, Respondents have each submitted an Offer of Settlement (the "Offers") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over them and the subject matter of these proceedings, which are admitted, Respondents consent to the entry of this Order Instituting Administrative and Cease-and-Desist Proceedings Pursuant to Sections 203(e), 203(f) and 203(k) of the Investment Advisers Act of 1940, Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondents' Offers, the Commission finds[1]

A. Summary

1. This matter concerns misleading advertisements created by MCI, a New Hampshire-based registered investment adviser, and distributed by MCI and its then principal Mackensen in connection with MCI's solicitation of potential municipal clients. From late 2010 into 2012, MCI and Mackensen sent hundreds of form letters to the trustees of trust funds held by New Hampshire's municipalities. The form letter and its attachments presented what purported to be actual historical performance for MCI's model portfolios. The letters also claimed that each municipality could have earned more money by investing in MCI's model portfolio than it actually earned in its existing investments. However, the performance claimed for MCI's model portfolios in these advertisements did not represent actual past performance of any MCI model portfolio. Instead, the performance was generated by back-testing MCI's models based on their current holdings at the time each letter was sent. In reality, the model did not even exist throughout the entire time period claimed in the letters. MCI and Mackensen were responsible for distributing the letters to hundreds of municipal trustees.

2. In addition, from 2010 to May 2012, MCI failed to adopt and implement written compliance policies and procedures reasonably designed to prevent its employees from presenting performance information to clients or prospective clients in violation of the Advisers Act and its rules.

B. Respondents

3. **MCI** (SEC File No. 801-55188), is a New Hampshire corporation headquartered in Hampton, New Hampshire. MCI has been registered with the Commission as an investment adviser since 1998. MCI has 526 accounts and approximately $165 million in assets under management.

4. **Warren J. Mackensen,** age 66, is a resident of Hampton, New Hampshire. Mackensen was certified as a financial planner in 1989. From 1998 through 2012, Mackensen and his family were the sole owners of MCI and he was its President, and beginning in 2004, its Chief Compliance Officer. In 2012, Mackensen sold MCI and ceased to be its President. He ceased to be its Chief Compliance Officer in July 2014 and ceased to be an MCI employee in 2015. Mackensen has no disciplinary history.

---

[1] The findings herein are made pursuant to Respondents' Offers and are not binding on any other person or entity in this or any other proceeding.

C. Facts

5. The municipalities of New Hampshire generally each have trusts to manage funds for municipal purposes such as maintaining cemeteries. Mackensen attempted to expand MCI's business by offering to provide investment advice to the trustees of municipal trust funds across New Hampshire. Beginning in late 2010, MCI began sending out letters to trustees of trust funds for most of the towns in New Hampshire. MCI sent approximately 500 such letters starting in late 2010 and continuing into 2012. Mackensen personally signed each of those letters.

6. The first page of the letters that MCI and Mackensen sent out typically claimed that the trust funds would have earned additional investment gains if it had invested with MCI. The second page of the letter typically was entitled "Comparative Performance Report" and compared the performance of the town's current trust fund portfolio with the MCI model portfolios and computed the gain that purportedly would have been achieved if the trust had invested with MCI. It was not disclosed in the letter that the described performance was both hypothetical and back-tested. MCI generated the hypothetical and back-tested performance by inputting the investments held at that time in MCI's model municipal portfolio into Morningstar® Principia® software to create a "snapshot." The snapshot calculated how MCI's then current portfolio would have performed over the reported time period had that portfolio of investments been assembled at the earlier date, and had the balance of investments been held constant throughout the time period reflected in the report. Many of the letters offered performance comparisons for periods that included dates during 2010 and early 2011, even though the MCI model portfolio was not assembled until May 2011. In addition, while some of the letters stated that the model portfolios "do not represent actual results of investing for your town or city," this sentence did not disclose that the portfolios did not actually exist.

7. MCI received about 60 calls in response to the letters that it sent out, which ultimately resulted in an additional 20 municipal clients for the firm. When Mackensen met with potential municipal clients he typically carried with him disclosures generated by the Morningstar software that he used to calculate his performance computations. However, Mackensen failed to provide those disclosures to the trustees who were his actual or potential clients, and did not discuss with them how he calculated the purported additional gain the municipality could have received by investing with MCI.

8. Mackensen was the control person at MCI during the time of the conduct. He reviewed and signed every letter that MCI sent out to municipalities soliciting business. Mackensen failed, however, to review the Commission's rule related to advertising before the letters were sent out. He admitted that he was not familiar with the Commission's rule relating to investment adviser advertising.

9. MCI had no written policies and procedures related to performance advertising. MCI's compliance manual contained no substantive information on performance advertising, except to note that it was not used, which was not correct. Mackensen was responsible for MCI's failure to create and implement procedures designed so that its performance advertisements complied with the rules governing investment adviser advertising. Portions of MCI's compliance

manual specify that Mackensen was "solely responsible for regulatory supervision," and state that Mackensen "created Written Supervisory Procedures (WSPs) for all areas of [MCI]," trained other members of the firm on those WSPs annually, and that it was his obligation to "formally review all of the firm's compliance programs and update them to reflect new rules and regulations." Mackensen knew or was reckless in not knowing that the firm had not created or implemented procedures to comply with the performance advertising rules. *See Compliance Programs of Investment Companies and Investment Advisers* ("Compliance Rule Release") Advisers Act Rel. No. 2204 (Dec. 17, 2003).

D. Violations

10. As a result of the conduct described above, MCI and Mackensen willfully violated[2] Section 206(2) of the Advisers Act, and MCI willfully violated 206(4) of the Advisers Act and Rule 206(4)-1(a)(5) promulgated thereunder. Section 206(2) of the Advisers Act prohibits an investment adviser from engaging "in any transaction, practice, or course of business which operates as a fraud or deceit upon any client or prospective client." Section 206(4) of the Advisers Act prohibits any investment adviser from engaging in "any act, practice, or course of business which is fraudulent, deceptive, or manipulative," and authorizes the Commission to prescribe rules designed to prevent such conduct. Rule 206(4)-1(a)(5) makes it a fraudulent, deceptive, or manipulative act, practice, or course of business within the meaning of Section 206(4) of the Advisers Act for a registered investment adviser to publish, circulate, or distribute any advertisement which contains any untrue statement of a material fact, or which is otherwise false or misleading. By circulating or distributing misleading performance advertisements to prospective clients, MCI and Mackensen willfully violated Section 206(2) and MCI willfully violated 206(4) of the Advisers Act and Rule 206(4)-1(a)(5) thereunder.

11. As a result of the conduct described above, MCI also willfully violated Rule 206(4)-7 promulgated under the Advisers Act, which requires that registered advisers adopt and implement written policies and procedures reasonably designed to prevent violations of the Advisers Act and the rules that the Commission has adopted under the Act. By failing to adopt and implement such written policies or procedures reasonably designed to prevent violation of the Advisers Act and its rules in connection with the performance advertisements it sent to prospective clients, MCI willfully violated Rule 206(4)-7.

12. By sending misleading advertisements to prospective clients, Mackensen willfully aided and abetted and caused MCI to violate Section 206(4) of the Advisers Act and Rule 206(4)-1(a)(5). Also, Mackensen willfully aided and abetted and caused MCI to violate Section 206(4) of the Advisers Act and Rule 206(4)-7 by failing to adopt and implement written policies and

---

[2] A willful violation of the securities laws means merely "'that the person charged with the duty knows what he is doing.'" *Wonsover v. SEC*, 205 F.3d 408, 414 (D.C. Cir. 2000) (quoting *Hughes v SEC*, 174 F.2d 969, 977 (D.C. Cir. 1949)). There is no requirement that the actor "'also be aware that he is violating one of the Rules or Acts.'" *Id.* (quoting *Gearhart & Otis, Inc. v SEC*, 348 F.2d 798, 803 (D.C. Cir. 1965)).

procedures reasonably designed to prevent violation of the Advisers Act and the rules promulgated thereunder regarding performance presentations to prospective clients.

E. Undertakings

13. Order Notification

a. Within thirty days of the issuance of this Order, MCI undertakes to mail to each of its existing clients a copy of the Form ADV which incorporates the paragraphs contained in Section III of this Order, and which specifies that the entire Order will be posted on the homepage of MCI's website.

b. Within thirty days of the issuance of this Order, MCI also undertakes to post a copy of this Order on the homepage of MCI's website and to maintain this copy of the Order on the homepage of MCI's website for a period of six months.

14. MCI shall certify, in writing, compliance with the undertakings set forth above. The certification shall identify the undertakings, provide written evidence of compliance in the form of a narrative and be supported by exhibits sufficient to demonstrate compliance. The Commission's staff may make reasonable requests for further evidence of compliance, and MCI agrees to provide such evidence. The evidence and certification material shall be submitted to Robert Baker, Assistant Director, Boston Regional Office, Securities and Exchange Commission, 33 Arch Street, Suite 2300, Boston, MA 02110.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondents' Offers.

Accordingly, pursuant to Sections 203(e), 203(f) and 203(k) of the Advisers Act, it is hereby ORDERED that:

A. Respondents MCI and Mackensen shall cease and desist from committing or causing any violations and any future violations of Sections 206(2) and 206(4) of the Advisers Act and Rules 206(4)-1 and 206(4)-7 promulgated thereunder.

B. Respondent MCI is censured.

C. Respondent Mackensen is censured.

D. Respondents MCI and Mackensen shall, within 10 days of the entry of this Order, pay a civil money penalty in the amount of $100,000 to the Securities and Exchange Commission for transfer to the general fund of the United States Treasury in accordance with Exchange Act Section 21F(g)(3). Payment shall be made in the following installments: $25,000 on September

11, 2015, $25,000 on September 30, 2015, $25,000 on December 30, 2015, and $25,000 on March 30, 2016.

If any payment is not made by the date the payment is required by this Order, the entire outstanding balance of civil penalties, plus any additional interest accrued pursuant to 31 U.S.C. 3717, shall be due and payable immediately, without further application. MCI and Mackensen are jointly and severally liable for all payments required to be made by this paragraph. Payment must be made in one of the following ways:

(1) Respondents may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondents may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondents may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying MCI and Warren J. Mackensen as Respondents in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Robert Baker, Assistant Director, Boston Regional Office, Securities and Exchange Commission, 33 Arch Street, Suite 2300, Boston, MA 02110.

E. Respondent MCI shall comply with the undertakings enumerated in Section III, paragraph 13 above.

By the Commission.

INVESTMENT ADVISERS ACT OF 1940
Release No. 4189 / September 3, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16556

In the Matter of **STEPHEN A. COLANGELO, JR.,** **Respondent.**	**ORDER MAKING FINDINGS AND IMPOSING REMEDIAL SANCTIONS PURSUANT TO SECTION 203(f) OF THE INVESTMENT ADVISERS ACT OF 1940**

I.

The Securities and Exchange Commission ("Commission") instituted proceedings pursuant to Section 203(f) of the Investment Advisers Act of 1940 ("Advisers Act") against Stephen A. Colangelo, Jr. ("Respondent" or "Colangelo") on May 22, 2015.

II.

In connection with this proceeding, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, Respondent admits the Commission's jurisdiction over him and the subject matter of these proceedings, and the findings contained in Sections III.2 and III.5. below, and consents to the entry of this Order Making Findings and Imposing Remedial Sanctions Pursuant to Section 203(f) of the Investment Advisers Act of 1940 ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds that:

1. Colangelo founded and controlled the Brickell Fund, LLC ("Brickell Fund"), a pooled investment vehicle, and three start-up entities – Hedge Community, LLC ("Hedge Community"); Start a Hedge Fund, LLC ("Start a Hedge Fund"); and Under the Radar SEO, LLC ("Under the Radar"). From March 2009 to February 2011, Colangelo offered interests in each of these entities to investors. During the same time period, Colangelo also provided investment advisory services to private advisory clients. Colangelo is 47 years old and is incarcerated in a

federal correctional institute in Loretto, Pennsylvania. Prior to his incarceration, Colangelo resided in Congers, New York.

2. On December 19, 2013, Colangelo pleaded guilty to two counts of securities fraud and two counts of wire fraud in violation of Title 15 United States Code, Section 78j(b) and Title 18 United States Code, Section 1343, before the United States District Court for the Southern District of New York, in United States v. Stephen Colangelo, Jr., 12-CR-838. On April 10, 2014, a judgment in the criminal case was entered against Colangelo. Colangelo was sentenced to a prison term of 87 months followed by three years of supervised release and ordered to make restitution in the amount of $3,526,815.

3. The counts of the indictment to which Colangelo pleaded guilty alleged, among other things, that Colangelo held himself out as an investment adviser and solicited funds from investors by promising to invest money on the investor's behalf exchange for a percentage of any profits earned, that Colangelo defrauded investors, and that Colangelo obtained money and property from investors by making materially false and misleading statements.

4. In connection with his guilty plea, Colangelo admitted that he: (i) participated in schemes to defraud investors, one connected to the Brickell Fund and the others connected to Hedge Community, Start a Hedge Fund, and Under the Radar; (ii) held himself out as investment adviser; (iii) knowingly made false statements to investors, including false statements about purported trading returns, the use of investor funds, and Colangelo's compensation; and (iv) misappropriated investor funds.

5. On April 22, 2015, a final judgment by default was entered against Colangelo, permanently enjoining him from future violations of Section 17(a) of the Securities Act of 1933 ("Securities Act"), Section 10(b) of the Securities Exchange Act of 1934 ("Exchange Act") and Rule 10b-5 thereunder, and Sections 206(1), 206(2), and 206(4) of the Advisers Act and Rule 206(4)-8 thereunder, in the civil action entitled Securities and Exchange Commission v. Stephen A. Colangelo, Jr., Civil Action Number 7:12-cv-8439, in the United States District Court for the Southern District of New York.

6. The Commission's complaint alleged that, from April 2009 to October 2011, Colangelo made numerous material misrepresentations to investors, including misrepresentations concerning the use of investor funds and historical trading returns. The complaint also alleged that, from April 2009 to January 2011, Colangelo obtained over $1 million from three investment advisory clients, on whose behalf Colangelo promised to buy and sell securities in exchange for a percentage of any profits earned, by making similar misrepresentations. The complaint further alleged that Colangelo misappropriated investor and client funds.

IV.

In view of the foregoing, the Commission deems it in the public interest to impose the sanctions agreed to in Respondent Colangelo's Offer.

Accordingly, it is hereby ORDERED pursuant to Section 203(f) of the Advisers Act, that Respondent Colangelo be, and hereby is barred from association with any broker, dealer, investment adviser, municipal securities dealer, municipal advisor, transfer agent, or nationally recognized statistical rating organization.

Any reapplication for association by the Respondent will be subject to the applicable laws and regulations governing the reentry process, and reentry may be conditioned upon a number of factors, including, but not limited to, the satisfaction of any or all of the following: (a) any disgorgement ordered against the Respondent, whether or not the Commission has fully or partially waived payment of such disgorgement; (b) any arbitration award related to the conduct that served as the basis for the Commission order; (c) any self-regulatory organization arbitration award to a customer, whether or not related to the conduct that served as the basis for the Commission order; and (d) any restitution order by a self-regulatory organization, whether or not related to the conduct that served as the basis for the Commission order.

By the Commission.

Release No. 9900 / September 3, 2015

SECURITIES EXCHANGE ACT OF 1934
Release No. 75833 / September 3, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16781

In the Matter of **KEVIN McDONNELL,** **Respondent.**	**ORDER INSTITUTING ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933 AND SECTION 15(b) OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative and cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 8A of the Securities Act of 1933 ("Securities Act") and Section 15(b) of the Securities Exchange Act of 1934 ("Exchange Act") against Kevin McDonnell ("McDonnell" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, Respondent consents to the entry of this Order Instituting Administrative and Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act and Section 15(b) of the Exchange Act, Making Findings, Imposing Remedial Sanctions and a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds that:

Respondent

A. McDonnell, age 60, is a resident of Massapequa, New York. He was listed as the secretary and principal financial officer of Caribbean Pacific Marketing, Inc. ("Caribbean Pacific") in the company's Form S-1 registration statement filed with the Commission. During the relevant period, McDonnell participated in an offering of penny stock because he engaged in activities with an issuer for the purpose of issuing, trading and/or inducing or attempting to induce the purchase or sale of Caribbean Pacific stock, which was a penny stock.

Related Entity

B. Caribbean Pacific Marketing, Inc. was a Florida corporation based in Boca Raton, Florida. The company purported to be in the business of developing a line of all natural sun-care and skin-care products. Caribbean Pacific is defunct and was administratively dissolved as a corporate entity in September 2013 by the State of Florida.

Background

C. Caribbean Pacific was formed in 2012. Although its Form S-1 registration statement stated that the company intended to market "all-natural sun care and skin care products," investors were later told that Caribbean Pacific would serve as a public shell to engage in a reverse merger with another Florida-based company called Dreamscapes International Properties, Inc. ("Dreamscapes"). Dreamscapes purportedly had land holdings in Belize that it planned to develop into a vacation and retirement community.

D. On March 9, 2012, Caribbean Pacific filed a Form S-1 registration statement with the Commission, which it amended several times between March and August 2012. The company subsequently requested acceleration of its Form S-1, which was then declared effective on August 29, 2012. Caribbean Pacific made its filings electronically via the Commission's EDGAR system.

E. According to Caribbean Pacific's registration statement and accompanying financial statements, the company had no assets of any significance or ongoing business operations. However, it sought to raise $150,000 through a self-underwritten offer and sale of up to one million shares of common stock at $0.15 per share, to conduct its business operations. Ultimately, no securities were sold pursuant to the registration statement.

F. Caribbean Pacific's registration statement listed McDonnell as the company's principal financial officer. McDonnell and the other individual listed as the company's president signed the Form S-1 registration statement. According to the registration statement, McDonnell was primarily responsible for the development of new markets, business planning, and the facilitation of a corporate strategy at Caribbean Pacific and would oversee the launch of the company's planned Internet marketing program. McDonnell and the person listed as president in the registration statement were also named as the individuals who would sell the stock on behalf of Caribbean Pacific in the self-underwritten offering.

Caribbean Pacific's False and Misleading Form S-1 Registration Statement

G. On October 29, 2012, the Commission instituted stop order proceedings pursuant to Section 8(d) of the Securities Act against Caribbean Pacific to determine whether to suspend the effectiveness of its Form S-1 registration statement based on information indicating the registration statement might contain false and misleading statements and omissions. A settled stop order was subsequently issued on December 3, 2012 based on findings that Caribbean Pacific's Form S-1 had failed to disclose material information. Specifically, Caribbean Pacific's registration statement failed to disclose to potential investors that William J. Reilly ("Reilly"), a disbarred attorney who had previously been enjoined by the Commission for federal securities law violations and was suspended from appearing and practicing before the Commission as an attorney, was acting as a de facto executive officer and control person of the company.

H. Reilly helped form Caribbean Pacific in January 2012 and he recruited McDonnell to be an executive officer of the company at or around that time. However, McDonnell was essentially a figurehead and Reilly was one of the persons running the company from behind the scenes, along with another individual, who is also a securities fraud recidivist. For example, Reilly was responsible for choosing Caribbean Pacific's business model. He also began working on Caribbean Pacific's registration statement shortly after forming the company. In addition, he was responsible for retaining the company's securities counsel and outside auditor and was the primary contact for them regarding the contents of the Form S-1.

I. McDonnell and the other individual listed as Caribbean Pacific's president had essentially no involvement in the management of the company. Although they were purportedly the only two officers and members of the board, McDonnell and the other person listed as president never met each other in person or even spoke to one another on the telephone prior to Commission instituting stop order proceedings against the company in October 2012.

J. McDonnell falsely represented to potential investors in Caribbean Pacific's Form S-1 registration statement that he was an executive in charge of the company. Specifically, he falsely represented in the Form S-1 that he would be the person primarily responsible for the development of new markets, business planning, and the facilitation of a corporate strategy at Caribbean Pacific and would oversee the launch of the company's planned Internet marketing program. McDonnell also omitted to disclose that Reilly, a securities fraud recidivist, was helping run the company's operations. McDonnell knew that Reilly was responsible for handling Caribbean Pacific's business operations and for making management decisions. McDonnell understood that he himself had no real responsibilities at the company. In addition, McDonnell knew Reilly was barred from practicing before the Commission. He was aware that Reilly was not listed on the Form S-1 registration statement as an officer or director of Caribbean Pacific because of his disciplinary history.

Violations

K. As a result of the conduct described above, Respondent McDonnell willfully committed violations of Sections 17(a)(1) and 17(a)(3) of the Securities Act, which prohibit fraudulent conduct in the offer or sale of securities. These provisions prohibit employing devices, schemes or artifices to defraud and engaging in transactions, practices, or courses of business which operated or would operate as a fraud or deceit upon any purchaser, by the use of the mails or means or instruments of interstate commerce.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondent's Offer.

Accordingly, pursuant to Section 8A of the Securities Act and Section 15(b) of the Exchange Act, it is hereby ORDERED that:

A. Respondent McDonnell cease and desist from committing or causing any violations and any future violations of Sections 17(a)(1) and 17(a)(3) of the Securities Act.

B. Respondent McDonnell be, and here is, barred from participating in any offering of a penny stock, including: acting as a promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer or issuer for purposes of the issuance or trading in any penny stock, or inducing or attempting to induce the purchase or sale of any penny stock.

C. Respondent McDonnell be, and hereby is, prohibited from acting as an officer or director of any issuer that has a class of securities registered pursuant to Section 12 of the Exchange Act or that is required to file reports pursuant to Section 15(d) of the Exchange Act.

D. Respondent McDonnell shall, within 60 days of the entry of this Order, pay a civil money penalty in the amount of $7,500 to the Securities and Exchange Commission. If timely payment is not made, additional interest shall accrue pursuant to 31 U.S.C. 3717. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Kevin McDonnell as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to James M. Carlson, Esq., Senior Trial Counsel, United States Securities and Exchange Commission, 801 Brickell Avenue, Suite 1800, Miami, FL 33131.

RAYMOND J. LUCIA, SR.

OPINION OF THE COMMISSION

CEASE-AND-DESIST PROCEEDING

INVESTMENT ADVISER PROCEEDING

INVESTMENT COMPANY PROCEEDING

Grounds for Remedial Action

Antifraud Violations

Former registered investment adviser and its owner committed securities fraud by making material misrepresentations to prospective clients about their retirement wealth management strategy. *Held*, it is in the public interest to bar the owner from associating with an investment adviser, broker, or dealer; revoke respondents' investment adviser registrations; order respondents to cease and desist from further violations of the provisions violated; and order civil penalties of $250,000 against the investment adviser and $50,000 against the owner.

APPEARANCES

Marc J. Fagel, *Jonathan C. Dickey*, and *Mark J. Schonfeld* of Gibson, Dunn & Crutcher LLP, for Respondents.

John B. Bulgozdy, *David J. Van Havermaat*, and *Peter Del Greco*, for the Division of Enforcement.

Appeal filed:	December 27, 2013
Last brief received:	July 13, 2015
Oral Argument:	July 31, 2015

I. Introduction

Respondents have appealed, and the Division of Enforcement has cross-appealed, an initial decision finding that Raymond J. Lucia Companies, Inc. ("RJLC"), violated Sections 206(1), 206(2), and 206(4) of the Investment Advisers Act of 1940 by misleading prospective clients about its Buckets of Money ("BOM") retirement wealth management strategy, and that Raymond J. Lucia, Sr. ("Lucia" and, with RJLC, "Respondents"), aided and abetted and caused RJLC's violations.[1] In particular, the Administrative Law Judge ("ALJ") found that, at seminars Respondents conducted to pitch their BOM strategy to prospective clients, Respondents misrepresented that they had performed two backtests (one from 1966 to 2003 and another from 1973 to 1994) proving that a model portfolio following the BOM strategy during difficult historical market periods would substantially increase in value while also providing annual retirement income. Respondents' statements about the backtests were misleading, the ALJ found, because Respondents did not inform prospective clients that the backtests (i) used assumed inflation and Real Estate Investment Trust ("REIT") rates that did not reflect historical rates, (ii) did not deduct advisory fees, and (iii) did not actually follow the BOM strategy by "rebucketizing" (*i.e.*, reallocating assets between "buckets" of portfolio assets). The ALJ found that Respondents did not inform prospective clients that actual backtests would have shown their model portfolio exhausting its assets before the end of the backtest periods rather than substantially increasing in value.

For these violations, the ALJ barred Lucia from associating with an investment adviser, broker, or dealer; revoked RJLC's and Lucia's investment adviser registrations; ordered RJLC and Lucia to cease and desist from further violations of the Advisers Act; and imposed civil penalties of $250,000 on RJLC and $50,000 on Lucia.

The ALJ also found that RJLC did not violate, and Lucia did not aid and abet and cause a violation of, Advisers Act Rule 206(4)-1(a)(5) concerning fraudulent advertisements by investment advisers because he found that Respondents' live slideshow presentation did not qualify as an "advertisement" under that rule. The ALJ further found that RJLC did not violate

---

[1] *Raymond J. Lucia Cos., Inc.*, Initial Decision Release No. 540, 2013 WL 6384274 (Dec. 6, 2013). Lucia owned RJLC, which was registered with the Commission as an investment adviser from September 2002 through December 2011. Lucia, who was also a registered investment adviser, sold RJLC's assets in 2010 to his son, Raymond J. Lucia, Jr. RJLC is now defunct.

Advisers Act Section 204 concerning the maintenance of records by investment advisers.[2] The Division cross-appealed only the Rule 206(4)-1(a)(5) findings.

We find that RJLC violated, and Lucia aided and abetted and caused RJLC's violations of, Advisers Act Sections 206(1), 206(2), and 206(4), and Rule 206(4)-1(a)(5). For these violations, we impose the same sanctions as the ALJ imposed. We base our findings on an independent review of the record, except with respect to those findings not challenged on appeal.

Finally, we reject Respondents' contention that the administrative hearing was an unconstitutional procedure because the Commission ALJ who presided over this matter was not appointed in accordance with the Appointments Clause of the U.S. Constitution.[3] As we explain below, a Commission ALJ is a "mere employee"—not an "officer"—and thus the appointment of a Commission ALJ is not covered by the Clause.

II. Facts

At the center of this proceeding is a slideshow presentation[4] that Respondents projected onto a screen at seminars to pitch their BOM strategy to prospective clients; in particular, the proceeding focuses on the slideshow's discussion of two "backtests" to prove the efficacy of Respondents' BOM strategy during difficult historical market periods. At issue is, (i) whether Respondents led prospective clients to believe that they had performed backtests, as the Division claims, or hypothetical illustrations, as Respondents claim; (ii) if the former, whether Respondents had actually performed backtests; and (iii) if Respondents had not actually performed backtests but nevertheless led prospective clients to believe that they had done so, whether there is a difference between Respondents' purported backtest results and the results that actual backtests would have shown.

We begin by summarizing the undisputed facts surrounding the slideshow presentation and Respondents' calculations in support thereof. We then present the conflicting evidence regarding Respondents' assertions during that presentation, including the meaning of the term "backtest" and the parties' expert evidence on the effect that using historical inflation and REIT rates, including advisory fees, and rebucketizing would have had on Respondents' "backtest" calculations.

A. The BOM seminar presentation

The BOM strategy, which Lucia developed, generally advocates using safe portfolio assets for retirement income before depleting riskier assets, thereby giving riskier assets time to

---

2 The ALJ found that Section 204 did not apply to Respondents' backtests because they did not concern the performance of specific managed accounts or specific securities recommendations.

3 *See* U.S. Const. art. II, § 2, cl. 2.

4 Lucia has been presenting a variation of the slideshow since around 2000. Lucia used the version of the slideshow discussed herein from around 2009 to 2010.

grow.[5] From approximately 2000 through 2011, Lucia pitched the BOM strategy to prospective RJLC clients at seminars across the United States.[6] As noted, Lucia used a slideshow that he projected onto a screen during his seminar presentations.[7] The slideshow consisted of four parts:[8] (i) a general discussion of investment risks and strategies; (ii) a description of various hypothetical couples following strategies purportedly inferior to BOM; (iii) a description of the BOM strategy and how it would work for a hypothetical couple dubbed the "Bold Bucketeers"; and (iv) the 1966 and 1973 backtests at issue in this proceeding.[9]

1. The three hypothetical couples

After beginning the presentation with a lengthy discussion of various investment risks and strategies, Lucia described three hypothetical couples to illustrate problems caused by following strategies purportedly inferior to BOM. For the illustrations, each couple was assumed to have a $1 million nest egg to invest with the goals of leaving $1 million to their children and producing $60,000 in annual retirement income.[10]

a. Conservative Campbells

The slideshow stated that one couple, dubbed the "Conservative Campbells," invested their $1 million nest egg in conservative investments such as CDs, bond funds, and individual

---

5 The Division has not argued that the BOM strategy itself violates the securities laws.

6 Lucia estimates that he presented the BOM strategy at about forty seminars per year, and to over 50,000 total seminar attendees, the purpose of which was to generate leads for RJLC. To that end, Respondents gave prospective clients response cards to complete at the seminars to indicate their interest in a complimentary financial planning consultation with an RJLC advisor. Lucia also promoted the BOM strategy on his nationally syndicated radio show, *The Ray Lucia Show*, and in three books on investing for retirement that he authored: *Buckets of Money: How to Retire in Comfort and Safety* (2004); *Ready . . . Set . . . Retire!* (2007); and *The Buckets of Money Retirement Solution: The Ultimate Guide to Income for Life* (2010).

7 Lucia also used a similar version of the slideshow in pitching the BOM strategy in a video posted on RJLC's website on February 16, 2009 (the "Webinar"). The OIP does not mention the Webinar, but Respondents introduced it as evidence of what Lucia told prospective clients at the seminars.

8 It is undisputed that Lucia was responsible for, and approved the content of, the slideshow.

9 As noted, Respondents contend that they did not lead prospective clients to believe that they had performed backtests. But because Respondents used the word "backtest" in their seminars to describe their analysis of how the BOM strategy would have fared for a model portfolio from 1966 to 2003 and 1973 to 1994, we also use that word to describe their analysis. That word is also appropriate because, as discussed below, we find that Respondents led prospective clients to believe that they had performed backtests.

10 Most slides for this portion of the presentation included disclaimers that "[t]his is a hypothetical illustration and is not representative of an actual investment."

bonds. Their portfolio produced a hypothetical 6% annual return but the Campbells also withdrew $60,000 per year for income (*i.e.*, 6% of the portfolio). The slideshow stated that the problem with this strategy is that, assuming 3% annual inflation, the purchasing power of the Campbells' $60,000 annual income would diminish to $44,644 in ten years, $33,221 in twenty years, and $24,719 in thirty years. As a result, if the Campbells died after thirty years, their children would inherit $1 million but with the equivalent purchasing power of $411,987 from the initial retirement date. And if the Campbells indexed their $60,000 annual income to 3% assumed inflation every six years, they would run through their nest egg within twenty-seven years.[11]

b. High Rolling Hendersons

The slideshow stated that a second couple, dubbed the "High Rolling Hendersons," invested their $1 million nest egg in stocks because they believed that, since stocks average 10% in annual return, in thirty years their portfolio would be worth $4,203,320 after withdrawing $60,000 for annual inflation indexed income. But the Hendersons would have problems if they retired at the beginning of a big bear market. For example, the slideshow stated that if the Hendersons had retired on January 1, 1973, the beginning of a two-year period when the market declined by 41.13%, they would have exhausted their portfolio in seventeen years based on the performance of the S&P 500 for that period assuming that they had withdrawn $60,000 in annual income indexed by 3% annual inflation.[12]

c. Balanced Buttafuccos

The slideshow stated that a third couple, dubbed the "Balanced Buttafuccos," invested their $1 million nest egg 40% in bonds and 60% in stocks. The slides stated that the Buttafuccos have a "better more 'balanced' approach" than the Campbells and Hendersons. But when their strategy is "backtested" with a retirement date starting on January 1, 1973, the Buttafuccos are shown to have exhausted their retirement portfolio in twenty-one years. The slides stated that the "backtest" was based on the performance of the S&P 500, an assumed 6% constant bond return, and the Buttafuccos having withdrawn $60,000 annual income for the first six years, $71,500 annual income for the next six years, and $85,500 annual income for another six years.[13]

---

11 For indexing, the slideshow clarified that the couple would increase the amount they withdrew for annual income every six years assuming 3% inflation for each of the six years. Thus, the Conservative Campbells would withdraw $60,000 each year for six years, and then $71,500 each year for another six years, and so on.

12 Like the Campbells, the Hendersons were assumed to have increased the amount they withdrew for income every six years assuming 3% inflation for each of the six years.

13 Although not stated explicitly in the Buttafucco slides, the annual income for each six year period in Respondents' "backtest" increased assuming 3% inflation for each of the six years (*i.e.*, $60,000 with 3% annual inflation after six years equals about $71,500).

2. Description of the BOM strategy

The slideshow then described how the BOM strategy would work for a fourth hypothetical couple, dubbed the "Bold Bucketeers," who also had a $1 million nest egg.[14] In following the BOM strategy, the Bold Bucketeers divided their portfolio into three "buckets" of assets: Bucket #1 held "[s]afe money in a self-depleting bucket aimed at providing income to live on for" six years (*e.g.*, CDs, T-bills, bonds); Bucket #2 held "[s]afe, or moderately safe, money aimed at replacing Bucket #1 with inflation indexed income for the next period (6 years)" (*e.g.*, bonds, fixed annuities); and Bucket #3 held "[h]igher risk money invested for long term growth potential" (*e.g.*, stocks and REITs).[15]

In illustrating the BOM strategy, the slideshow stated that Bucket #1 was assumed to have a 4% return, Bucket #2 a 5.5% return, and Bucket #3 a 10% stock return and 7.75% REIT dividend return, and that $60,000 income was indexed by an "[a]ssumed 3% inflation" every six years.[16] At the end of the initial six year period, Bucket #1 had been fully depleted for income, at which point the assets from Bucket #2 were used for income for the next six years. After twelve years, Bucket #2 had also been fully depleted for income. But the long term assets in Bucket #3 had grown to a value of $1.4 million which, the slideshow stated, was then "[r]e-[b]ucketize[d] for another 12 years."[17]

3. Backtest slides

Finally, Lucia discussed the backtests at issue here, beginning with the backtest from 1973 to 1994, and concluding with the backtest from 1966 to 2003.

a. 1973 backtest slides

The slideshow introduced the 1973 backtest by asking, "But Can Buckets Stand Up To The Test Of The '73/'74 Grizzly Bear?" The next slide, titled "Back Tested Buckets," set forth the assumptions for the backtest, including that (i) the Bold Bucketeers invested their $1 million portfolio beginning on January 1, 1973; (ii) the portfolio was 20% invested in REITs; (iii) "actual treasury rates of return" were used "to calculate fixed income/bond returns"; (iv) "actual S&P 500 returns" were used "to calculate growth returns"; and (v) the Bold Bucketeers withdrew annual income of $60,000 from 1973 to 1978, $71,500 from 1979 to 1984,

---

14 Most slides for this portion of the slideshow included disclaimers that "[r]ates of return are hypothetical in nature and are for illustrative purposes only."

15 REITs issue equity and/or debt securities to raise capital to purchase and manage income-producing real estate, such as apartment complexes, shopping centers, and office buildings.

16 The slideshow disclaimed, inter alia, that "[i]nvesting in real estate and [REITs] involve special risk, such as: limited liquidity and demand for real property . . . ."

17 "Rebucketization" meant that portions of the assets in Bucket #3 would be reallocated to Buckets #1 and #2 after their assets had been fully depleted for income.

$85,500 from 1985 to 1990, and $96,000 from 1991 to 1994.[18] The slideshow concluded that the Bold Bucketeers' portfolio would have been worth $1,544,789 by 1994, the same point in time when the Balanced Buttafuccos' portfolio would have been worth $0.[19]

b. 1966 backtest slides

The slideshow introduced the 1966 backtest by asking, "What would have happened if you retired in 1966"?[20] The slideshow then compared 1966 backtests that Respondents calculated for three different portfolios: (i) a version of the Balanced Buttafuccos' portfolio;[21] (ii) a version of the Bold Bucketeers' portfolio without REITs; and (iii) a version of the Bold Bucketeers' portfolio with REITs. The slideshow stated that, for the 1966 backtests: (i) the "examples are based on actual market returns for the period(s) listed"; (ii) "[b]ond returns are based on US Treasury returns"; (iii) "[s]tock returns are based on S&P 500 returns"; (iv) "REIT returns are based on a 7% annual return"; and (v) "[i]nflation is based at 3% annual."[22]

For the version of the Balanced Buttafuccos' portfolio, the slideshow stated that the $1 million beginning balance was invested 60% in stocks and 40% in bonds, from which $50,000 annual income was withdrawn on a pro rata basis. The slides concluded that, by 2003, the portfolio would have been worth $30,000 with $0 remaining for annual income.

The slideshow then stated that when the BOM strategy was applied to the same $1 million portfolio invested 60% in stocks and 40% in bonds (*i.e.*, Bold Bucketeers without REITs), the $50,000 annual income was withdrawn from bonds first rather than pro rata. As a

---

18 The slides did not state the inflation or REIT rates used in the 1973 backtest or whether advisory fees, such as those charged by RJLC, were factored into the 1973 backtest. Lucia testified that annual income was indexed by 3% inflation every six years for the period of 1973 to 1990, but that Respondents made an error in calculating 3% inflation indexed income for the final period of 1991 to 1994. Respondents' expert, John Hekman, calculated that 3% inflation indexed income for that period would have been $102,092, not $96,000.

19 The slides for the 1973 backtest included a disclaimer that "[r]ates of return are hypothetical in nature and are for illustrative purposes only."

20 In the Webinar, Lucia introduced the slides by stating that he "did a backtest" for his "friend," Ben Stein, who had asked him this question concerning how the BOM strategy would have fared during the market stagnation of 1966 to 1982, a period when the Dow Jones Industrial Average began and ended at around 1,000 points. Stein is an actor, writer, and economic commentator, who spoke at some of Respondents' seminars.

21 The slides for the 1966 backtests did not mention the Balanced Buttafuccos, but the first portfolio backtested used the same balanced portfolio approach (60% stocks, 40% bonds).

22 The slides did not state whether advisory fees were factored into the backtests. Also, unlike earlier slides, the 1966 backtest slides did not include disclaimers. But in the Webinar, Lucia stated: "[L]et's pretend that from that point forward [*i.e.*, 1966], inflation was three percent. We know it was more. But we wouldn't have known that at the time." Lucia testified that he presented the backtest assumptions the same way in the seminars and Webinar.

result, by 2003, the portfolio would have been worth $1.2 million with $150,000 for annual income.

Finally, the slideshow stated that when REITs were added, the $1 million portfolio following the BOM strategy became split 40% in stocks, 40% in bonds, and 20% in REITs (*i.e.*, Bold Bucketeers with REITs), and the $50,000 annual income was withdrawn from bonds and REITs first.[23] The slideshow concluded that, by 2003, the portfolio would have been worth $4.7 million with $150,000 for annual income.

B. Respondents' actual backtest calculations

1. 1973 backtest calculations

Before the hearing, Respondents produced two spreadsheets that they claimed to have used in calculating the 1966 and 1973 backtests. But during the hearing, Respondents admitted that they did not actually use the spreadsheet they produced for the 1973 backtest to perform that backtest and that the spreadsheet included some assumptions that differed from their backtest. Respondents also admitted that they have no other documentary support for the 1973 backtest.

During the hearing, Lucia also asserted that the slideshow misstated the assumptions used for the 1973 backtest.[24] Lucia testified that rather than using actual S&P 500 returns and treasury returns for the entire twenty-one year period of the 1973 backtest (as presented in the slideshow), Respondents used those returns for only the first two years and then used a flat 10% stock return and 6% bond return for the remaining years. Lucia testified that he neglected to correct the error during his seminar presentations.[25]

But using assumptions similar to those that Lucia testified Respondents actually used in performing the 1973 backtest, Respondents' expert, John Hekman, was unable to replicate the 1973 backtest result presented in the slideshow.[26] Hekman calculated that, by 1994, the Bold

---

23 Lucia clarified in the Webinar that income is initially drained from the REIT "dividend yield" and bonds, and that the REIT itself is liquidated at a later point for income. Lucia referred in the Webinar to the REIT investment for the 1966 backtest as "direct ownership in real estate."

24 Lucia testified that he personally "did some of the work early on" for the 1973 backtest but that it was completed by an RJLC employee.

25 Respondents also concede that the 1973 backtest did not include advisory fees or rebucketize the stock investments after bonds and REITs were drained for income. As noted above, this information was not included in the slides for the 1973 backtest.

26 Hekman, who holds a Ph.D. in economics, is a managing director at FTI Consulting, a firm that provides consulting and expert testimony regarding financial matters. Hekman assumed a 6% bond rate, actual S&P 500 returns for the first two years, 10% stock returns for the remaining years, a 5% annual increase in REIT principal, and a REIT dividend rate ranging between approximately 6.6% and 7.76% per year. Hekman also adjusted the Bold Bucketeers' initial $60,000 annual income by 3% annual inflation every six years (*e.g.*, $60,000 for the first

Bucketeers' portfolio would have been worth $507,194, an amount substantially lower than the $1,544,789 claimed in the slideshow. Respondents offered no evidence related to this discrepancy or otherwise explained it. It is therefore unclear how Respondents arrived at $1,544,789.

2. 1966 backtest calculations

As noted, Respondents also produced a spreadsheet that they claimed to have used in calculating the 1966 backtest. Respondents specifically used that spreadsheet in calculating the 1966 backtest of the version of the Bold Bucketeers' portfolio with REITs.[27] Respondents did not produce any documentary support for the other two 1966 backtests.[28]

The spreadsheet shows that the backtest to which it was applicable used the following factors: (i) a $1 million investment beginning on January 1, 1966, split 40% in stocks, 40% in bonds, and 20% in REITs; (ii) $50,000 income withdrawn in 1966, adjusted each subsequent year by 3% inflation; (iii) actual annual S&P 500 returns as a proxy for stock returns; (iv) actual annual treasury returns as a proxy for bond returns; (v) a flat REIT principal of $200,000; and (vi) a flat 7% REIT dividend yield. During the first eleven years of the backtest, income was withdrawn from the $14,000 annual REIT dividend yield (7% on $200,000) with the remaining amount withdrawn from T-bills. At the end of the eleventh year, the $200,000 REIT principal was liquidated and reinvested in T-bills, and then from years twelve through fifteen the remainder of the T-bill investment was drained for income. Thereafter, from 1981 through 2003, the entire Bold Bucketeers' portfolio remained in stocks rather than being rebucketized. No advisory fees were factored into the backtest.[29]

C. The parties' experts agree that Respondents did not perform actual backtests.

Respondents' expert, Hekman, and the Division's expert, Steven Grenadier,[30] agreed that a backtest uses data from a specific historical period to evaluate how an investment strategy

---

six years, $71,500 for the next six years, etc.), and did not deduct advisory fees or rebucketize the portfolio.

27 RJLC's Director of Financial Planning, Richard Plum, testified that he performed the 1966 backtest calculations in 2004 at Lucia's request. Lucia testified that he designed the 1966 backtest.

28 Plum testified that he created spreadsheets for the 1966 backtests of the Balanced Buttafuccos' portfolio and the Bold Bucketeers' portfolio without REITs, but Respondents did not produce these spreadsheets to the Division.

29 The spreadsheet Respondents produced as empirical evidence of the 1973 backtest used the same assumptions as the 1966 backtest spreadsheet, except that it began on January 1, 1973, rather than January 1, 1966, and assumed that an initial $60,000 rather than $50,000 was needed for annual income, with that amount adjusted each subsequent year by 3% inflation.

30 Grenadier is a Professor of financial economics at Stanford University.

would have actually performed during that period.[31] Both experts also agreed that, based on their understanding of the term, the slideshow did not present the results of actual backtests.[32] Grenadier opined that Respondents did not conduct backtests because they used assumed rather than historical inflation and REIT rates, and did not include transaction costs for implementing the BOM strategy.[33] Grenadier also concluded that, by not rebucketizing, Respondents' backtest spreadsheets "concentrate[d] assets in a manner inconsistent with the [BOM] portfolio allocation strategy as outlined in the presentation."

Nonetheless, Respondents disputed that there is an established definition of "backtest" and introduced evidence that, they claimed, showed that it is standard in the financial planning industry to use assumed rates in backtests. Lucia testified that, in the financial planning industry, backtests routinely use "not only averages, for example, inflation, but also . . . hypothetical other investment returns . . . ."[34] As an example, Respondents introduced a brochure issued by American Funds (a large mutual fund house), which used a 4% assumed inflation rate for a backtest from 1961 to 2010. Lucia testified that in addition to American Funds, "there are dozens of variable annuity companies and software companies that do the same thing."

But other than the American Funds' brochure and Lucia's testimony, Respondents did not introduce any evidence of companies using assumed rather than historical data in backtests. To the contrary, Respondents introduced into evidence brochures from Fidelity Investments and Financial Engines Income+ reporting the results of backtests that appear to have used historical stock, bond, and inflation rates.

Respondents also claimed that the American Funds brochure was an example of an industry practice not to include fees in backtests. But it is unclear from the brochure if the two backtests discussed therein included fees. The brochure does not mention fees for the first backtest but it implies that the second backtest included fees by stating that the results "are at net asset value."[35] Also, although not mentioned by Respondents as an example of industry practice concerning fees, the backtest in the Financial Engines Income+ brochure discussed above

---

31 Respondents' chief compliance officer, Theresa Ochs, also testified that a backtest needs to use accurate historical data to provide an accurate indication of how a strategy may have performed in the past.

32 Hekman also testified that he understood from reviewing the slideshow that it did not purport to present the results of actual backtests.

33 Respondents' other expert, Kevin T. Gannon, also testified that he would not "use a hypothetical rate of return in a backtest" because he would use actual data in a backtest. Gannon, a Certified Public Accountant, is a managing director and president of Stanger & Co., a real estate investment banking firm.

34 Plum similarly testified that the financial planning industry has always used a mixture of "historical return rates" and "hypothetical assumed annual inflation rate[s]" in backtests.

35 "Net asset value" is "[t]he market value of a share in a mutual fund, computed by deducting any liabilities of the fund from its total assets and dividing the difference by the number of outstanding fund shares." Black's Law Dictionary 1061 (7th ed. 1999).

included fees, and the Fidelity brochure discussed above disclosed that fees were not included in its backtest.

D. The difference between Respondents' purported backtest results and what actual backtests would have shown

The Division's expert, Grenadier, analyzed the two spreadsheets Respondents produced as empirical evidence of the 1966 and 1973 backtests.[36] He concluded that the spreadsheets "use[d] important and inaccurate assumptions about inflation, investment returns and liquidity, and implementation costs that significantly affect the results and produce misleading information." Grenadier reran the calculations in the spreadsheets "[s]ubstituting actual, historical data," and produced the results discussed below showing "relatively lower ending portfolio balances than what is reflected in the presentation and spreadsheets, or portfolios that are entirely depleted resulting in substantial unmet income needs." Respondents introduced evidence, including testimony from their expert witnesses, challenging some but not all of Grenadier's findings.[37]

1. The effect from using historical inflation rates

Grenadier found that the backtest spreadsheets were significantly impacted by using a fixed and assumed 3% inflation rate rather than historical inflation for each of the years considered because many high inflation years occurred early in the backtest periods. Grenadier found that relatively higher inflation as measured by the Consumer Price Index ("CPI"),[38] such as the double-digit inflation of the late 1970s to early 1980s, would have caused the Bold Bucketeers' portfolios to deplete their assets faster in the early years "to have withdrawals that ke[pt] up with inflation," and as a result they would have had "less portfolio later to accumulate returns to consume on."[39]

---

36 While, as noted above, Respondents admitted that they mistakenly produced the 1973 backtest spreadsheet, Grenadier's analysis of it is still relevant because it contains assumptions similar to those Respondents claimed to have used in the 1973 backtest. It differs only in that it used actual S&P 500 returns and treasury returns for the length of the backtest rather than 10% stock and 6% bond returns after the first two years, and that it adjusted the amount withdrawn for income by 3% inflation each year rather than by six year increments (*i.e.*, $60,000 for the first six years, $71,500 for the next six years, etc.).

37 Respondents also introduced evidence to show that their assumed 3% inflation and 7% REIT dividend rates were reasonable to use in hypothetical illustrations. But this evidence is irrelevant because, as we find below, Respondents led prospective clients to believe that they performed backtests and not hypothetical illustrations, and backtests use historical and not assumed data.

38 CPI measures inflation and is maintained by the Bureau of Labor Statistics. Grenadier specifically used CPI-U, which is a category of CPI measuring inflation for urban consumers.

39 CPI-U was 11.3% in 1979, 13.5% in 1980, and 10.3% in 1981. Lucia agreed that investors would have experienced double digit inflation during this period.

Grenadier found that by substituting annual historical inflation rates as measured by CPI-U for Respondents' fixed 3% rate, the revised 1966 backtest spreadsheet shows the BOM portfolio being "fully depleted by 1986" and the revised 1973 backtest spreadsheet shows the BOM portfolio being "fully depleted by 1989."[40]

Respondents' expert, Hekman, countered that CPI-U overstated inflation for two reasons. First, Hekman stated that a 1996 report issued by a commission appointed by the Senate Finance Committee (the "Boskin Commission"), and a subsequent paper issued ten years later by a former commission member (Robert Gordon), found that CPI-U had been overstating increases in the annual cost of living. Hekman stated that, based on those findings, CPI-U is "too high by an average of 1.2% per year through 1996 and 1.0% thereafter." Second, Hekman stated that "the most realistic inflation rate for retirees is one that accounts for [their] declining pattern of spending," and concluded that an additional 2% should be deducted from annual CPI-U on top of the corrections suggested by the Boskin Commission and Gordon.

Based on those downward adjustments to CPI-U, Hekman ran two recalculations of the 1966 backtest spreadsheet. In the first, Hekman found that by substituting annual CPI-U adjusted by the Boskin Commission corrections (*i.e.*, annual CPI-U minus 1.2% through 1996 and 1.0% thereafter) for Respondents' fixed 3% rate, the 1966 backtest spreadsheet shows the BOM portfolio running out of money in 1994. In the second, Hekman found that by reducing annual CPI-U by an additional 2% on top of the Boskin Commission corrections to account for reduced retiree spending and substituting that data for Respondents' 3% rate, the 1966 backtest spreadsheet shows the BOM portfolio increasing to a value of over $6.6 million by 2003.

While Grenadier agreed that retirees over sixty-five tend to spend less money than non-retirees, he testified that "has nothing whatsoever to do with inflation." Grenadier testified that to account for any decrease in spending in the 1966 backtest spreadsheet, the assumed $50,000 per year income—and not inflation—should be decreased.

2. The effect from using historical REIT rates of return

Respondents acknowledge that, from 1966 to 1971, REITs were not readily available to investors. For this reason, Grenadier was unable to factor historical REIT returns into the 1966 backtest spreadsheet for that period. For the period after 1971, Grenadier also found it significant in analyzing both the 1966 and 1973 backtest spreadsheets, that Respondents' slideshow did not make clear whether Respondents were using assumed returns from publicly traded REITs, public non-traded REITs, or private REITs.[41]

---

[40] Lucia testified that he does not dispute that, if historical inflation as measured by CPI-U had been used in the 1966 or 1973 backtest spreadsheets, it would have resulted in the model BOM portfolios being fully depleted before the end of the backtest periods.

[41] Publicly traded REITs file with the Commission and have their shares traded on an exchange, public non-traded REITs file with the Commission but do not trade their shares on an exchange, and private REITs neither file with the Commission nor trade their shares on an exchange.

For the first category, Grenadier found that substituting annual historical returns for publicly traded REITs as measured by the National Association of Real Estate Investment Trusts ("NAREIT") All REIT Index[42] back through 1972 into the 1966 backtest spreadsheet (leaving all other data unchanged) resulted "in a total investment in REITs of only $85,646 at the time the REIT investment [was] liquidated, as compared to $200,000 in the original spreadsheet, and total assets of only $1.3 million at the end of 2003, as compared to $4.7 million in the original spreadsheet."[43] Grenadier also found that substituting such data into the 1973 backtest spreadsheet (leaving all other data unchanged) resulted "in a total investment in REITs of only $134,031 at the time the REIT investment [was] liquidated, as compared to $200,000 in the original spreadsheet, and total assets of only $2.8 million at the end of 2003, as compared to $4.1 million in the original spreadsheet."[44]

For the last two categories, Grenadier found that, to the extent Respondents were using public non-traded or private REITs, the backtest spreadsheets should have considered "the ability and potential cost to liquidate the REIT investment."[45] As noted, Respondents' 1966 backtest spreadsheet liquidated the $200,000 REIT principal at the end of the eleventh year after T-bills had been drained down to a level at which they could no longer cover income.[46] In doing so, Grenadier found that the spreadsheets "ignore that redemption of private and/or public non-traded REITs may be difficult and costly."

Gannon did not offer expert testimony concerning the effect on the backtests from using annual historical REIT returns.[47]

---

42 NAREIT began maintaining indices of annual returns for publicly traded REITs in 1972.

43 Gannon testified that a more reasonable index to use for historical publicly traded REIT returns is the NAREIT Equity REIT Trust Index ("NAREIT Equity Index"), which includes REITs invested only in real estate equity, because equity REITs were the subject of Respondents' backtests. Grenadier testified that he used the NAREIT All REIT Index because it was unclear whether the REIT investment in the backtests was limited to only equity or mortgage REITs. In any event, Gannon did not analyze, and it is unclear from the record, what effect substituting data from the NAREIT Equity Index into the spreadsheets would have had on the spreadsheet results.

44 The 1973 backtest in the slideshow ended in 1994, but the 1973 backtest spreadsheet was calculated through 2003.

45 While publicly traded REITs are highly liquid, non-traded REITs are substantially less liquid because they generally have a minimum required holding period after which redemption characteristics vary by REIT. Some non-traded REITs may allow investors to redeem shares once a quarter, subject to certain requirements; others link redemption to a required liquidity event after a fixed amount of time.

46 The 1973 backtest spreadsheet liquidated the $200,000 REIT principal at the end of the ninth year.

47 Respondents retained Gannon to opine on the use of a hypothetical 7% REIT rate of return in hypothetical illustrations.

3. The effect from deducting advisory fees

Grenadier found that if a strategy has implementation costs, like BOM, it is important when backtesting the strategy to include such costs because they "may reduce, and at times eliminate, the benefits of [the] strategy." Grenadier found that, by assuming zero implementation costs, Respondents' backtest spreadsheets overstated "the ending portfolio balances." In particular, Grenadier found that the backtest spreadsheets should have included "cost[s] associated with an investment in the S&P 500 Index," T-bills, and REITs. By incorporating representative mutual fund fees on the stock portfolio into the spreadsheets (leaving all other data unchanged), Grenadier found that the value of the model portfolio dropped in the (i) 1966 backtest spreadsheet to \$2.5 million from \$4.7 million by 2003; and (ii) 1973 backtest spreadsheet to \$3.1 million from \$4.1 million by 2003.[48]

Respondents offered no expert testimony on the issue of costs. And Lucia testified that he knew fees can significantly reduce a portfolio's returns over time.

4. The effect from rebucketizing

Grenadier concluded that the 1966 and 1973 backtest spreadsheets were inconsistent with the BOM strategy presented in the seminars because they did not rebucketize after T-bills and REITs had been exhausted for income and instead left all assets in stocks. Grenadier noted that for both spreadsheets, "the average S&P 500 return over the time period in which the portfolios [were] entirely invested in stocks [was] higher than the average for the time period in which the portfolios [were] also invested in other assets besides stocks." In addition, although not directly addressed by Grenadier, from the record evidence it appears that, for the period in the 1966 backtest spreadsheet that the model portfolio was entirely invested in stocks (1981 to 2003), the average S&P 500 return was substantially higher than T-bill returns and about equivalent to publicly traded REIT returns as measured by the NAREIT Equity Index. And from 1986 to 2003, when the BOM portfolio in the 1973 backtest spreadsheet was entirely invested in stocks, the average S&P 500 return was substantially higher than T-bill returns and slightly higher than publicly traded REIT returns as measured by the NAREIT Equity Index.

Respondents conceded that they did not rebucketize the 1966 or 1973 backtests and offered no expert testimony to support their approach. Lucia also admitted at the hearing that the BOM strategy does not advocate that investors leave their assets in stocks after draining other assets for income,[49] and stated in the Webinar that investors (i) should not "put a hundred percent of [their] money into the stock market" and (ii) should "never drain that stock portfolio for

---

48 Grenadier used the average equity mutual fund fee of 0.8% for 1966 to 1970 and 1% for 1971 to 1977. Thereafter he used 0.05% to match the fee charged by the least expensive mutual fund (Vanguard 500 Fund) for that period.

49 Plum similarly testified that "[p]utting a hundred percent into stocks" is "not a Buckets of Money strategy," and that RJLC did not believe investors "should be a hundred percent in stock."

income."[50] Lucia also testified that he was aware that if the 1966 backtest spreadsheet had been rebucketized, the model portfolio would have ended up with significantly less money.

Lucia testified, however, that seminar attendees would have known that the backtests were not rebucketized. While Lucia acknowledged that the slideshow made no explicit disclosure that the backtests did not rebucketize, he testified that seminar attendees would nonetheless have known that the backtests were not rebucketized because he explained to them that rebalancing is not always necessary. Lucia testified that, during the seminars, he drew out a bucket strategy by hand to show that the stock bucket does not have to be rebalanced and mentioned an academic article by Sandeep Singh, Ph.D., CFA, and John Spitzer, Ph.D., finding that retirees "could live off of the dividends and the income stream from the equity portfolio and an annuity contract" without rebalancing.

No evidence corroborates Lucia's testimony on this point. To the contrary, the Webinar shows that Lucia diagramed the bucket strategy and mentioned the Singh/Spitzer article to criticize the "rebalancing method," which involves withdrawing income from a retirement portfolio on a pro rata basis and rebalancing the entire portfolio annually. Lucia stated in the Webinar that the Singh/Spitzer article found that the "rebalancing method" is inferior to the BOM strategy. Lucia did not state in the Webinar that rebalancing was unnecessary in following the BOM strategy after Buckets #1 and #2 had been depleted.

E. Investor testimony

Two RJLC clients who had attended Respondents' seminars, Richard R. DeSipio and Dennis Wayne Chisholm, testified at the hearing.[51] DeSipio testified that, for the period of market stagnation starting in 1966, he understood that the BOM strategy was "backtested or checked out and that it held up relatively well compared to the other three investment programs," and that the 1966 backtest used "actual performance data" and "average inflation" that accurately reflected inflation during that historical era. DeSipio testified that he thought the 1966 backtest showed "that over a longer projected period of time, certainly for '66 going forward, that [the BOM strategy] held up under the various market conditions that occurred over the years."

DeSipio testified that if he knew the inflation rate used in the 1966 backtest was not the historical rate he would have "come to question" the backtest's results, and that it would have been an important factor for him to know that the model BOM portfolio would have been reduced to $0 in twenty years if Respondents had used historical inflation rates and deducted advisory fees in the backtest. DeSipio also testified that he does not recall Lucia disclosing that the 1966 backtest did not rebucketize the model BOM portfolio. DeSipio testified that he would not want his entire retirement portfolio to be invested in stocks, as was done here in backtesting the BOM strategy without rebucketizing.

---

50 Lucia also wrote in a letter to RJLC clients dated October 9, 2008, that he "would never – NEVER – advocate being 100% invested in stocks."

51 DeSipio attended a seminar in Philadelphia, Pennsylvania in 2007, and Chisholm attended a seminar in Portland, Oregon in 2007.

Chisholm testified that he understood from the seminar that a bear market "would not be an issue" for the model BOM portfolio "because [the strategy] was a proven method of investing, that it had been backtested," and "would do well over good times as well as bad times." Chisholm testified that in deciding whether to become an RJLC client, it would have been important to him to know that the model BOM portfolio would have been exhausted in sixteen years if the 1973 backtest had used historical inflation. Chisholm testified that "it would have lessened his confidence in" the backtests if he had known that 3% inflation was not the historical rate.

Chisholm testified that Lucia did not say anything at the seminar about the availability of REITs in 1966 and that he would have wanted to know if REITs were not readily available in evaluating the value of the 1966 backtest. Chisholm testified that Lucia emphasized during the seminar that portfolio assets be rebucketized but did not disclose that the 1966 and 1973 backtests did not rebucketize. Chisholm testified that he assumed that the backtests rebucketized and that he would have liked to have known that they did not rebucketize. Like DeSipio, Chisholm testified that he would not want his entire retirement portfolio invested in stocks.

III. Discussion

A. RJLC willfully violated Advisers Act Sections 206(1), (2), and (4).

1. Legal Standard

Advisers Act Sections 206(1), (2), and (4) make it unlawful for an investment adviser, by jurisdictional means,[52] "directly or indirectly: (1) to employ any device, scheme, or artifice to defraud any client or prospective client; (2) to engage in any transaction, practice, or course of business which operates as a fraud or deceit upon any client or prospective client; . . . or (4) to engage in any act, practice, or course of business which is fraudulent, deceptive, or manipulative."[53] There is significant overlap among Sections 206(1), (2), and (4),[54] the

---

52 Respondents do not dispute that RJLC was an investment adviser or that the Commission has jurisdiction by virtue of their actions in interstate commerce. Respondents also do not dispute that they acted willfully, which is shown where a person intends to commit an act that constitutes a violation; it does not require that the actor "also be aware that he is violating one of the Rules or Acts." *Wonsover v. SEC*, 205 F.3d 408, 414 (D.C. Cir. 2000) (internal quotation marks and citation omitted).

53 15 U.S.C. § 80b-6(1), (2), & (4). Section 206(4) further provides that "[t]he Commission shall, for the purposes of this paragraph (4) by rules and regulations define . . . such acts, practices, and courses of business as are fraudulent, deceptive, or manipulative." *Id.* § 80b-6(4). But to violate Section 206(4), there is no precondition that one of its underlying rules, such as Rule 206(4)-1, have been violated. *See Warwick Capital Mgmt., Inc.*, Advisers Act Release No. 2694, 2008 WL 149127, at *8-9 (Jan. 16, 2008) (finding a violation of Section 206(4) without an associated rule violation).

54 *Cf. John P. Flannery*, Advisers Act Release No. 3981, 2014 WL 7145625, at *14 (Dec. 15, 2014) (finding the subsections of Exchange Act Rule 10b-5 "to overlap," with each

boundaries of which do not need to be delineated here. For purposes of this proceeding, it is sufficient to note that all three sections encompass the making of fraudulent misstatements of material fact and omissions of material fact necessary to make statements made not misleading.[55]

Scienter, which can be established through recklessness, is necessary to violate Section 206(1).[56] Negligence is sufficient to violate Sections 206(2) and (4).[57] Lucia's conduct and his scienter or negligence are imputed to RJLC.[58]

2. Respondents made fraudulent statements and omissions in the backtest slides.

Respondents' backtest slides were misleading because: (1) they falsely stated that Respondents had backtested a model BOM portfolio; (2) they stated that backtesting proved that such a portfolio would have withstood two difficult historical market periods when actual backtesting would have shown the opposite; and (3) even using Respondents' flawed assumptions, they overstated the 1973 backtest result by over $1 million.

First, Respondents conveyed to prospective clients that they had performed actual backtests of a model portfolio following the BOM strategy. In addition to using the word "backtest" to describe their analysis, Respondents' slideshow introduced the 1966 backtest by asking, "What would have happened if you retired in 1966[?]," and introduced the 1973 backtest by asking, "Can Buckets Stand Up To The Test Of The '73/'74 Grizzly Bear?" Because of such statements, the two seminar attendees who testified at the hearing, DeSipio and Chisholm, justifiably believed that Respondents had performed backtests.

But Respondents had not actually performed backtests. The parties' experts agreed that backtests use historical data. And instead of using historical data, Respondents' backtests used

---

58 *A.J. White & Co. v. SEC*, 556 F.2d 619, 624 (1st Cir. 1977) (holding that a firm "can act only through its agents, and is accountable for the actions of its responsible officers"); *Warwick Capital Mgmt.*, 2008 WL 149127, at *9 n.33 ("A company's scienter is imputed from that of the individuals controlling it.").

assumed inflation and REIT rates. Also, it was blatantly untrue for Respondents to claim that their backtests followed the BOM strategy when they did not rebucketize the model portfolio and instead left all of its assets in stocks after safer assets had been drained for income. The BOM strategy included rebucketization and forbade investing all portfolio assets in stocks.[59]

Second, the purported results of Respondents' backtests were misleading. Had Respondents performed actual backtests beginning in 1966 and 1973 by using historical inflation and REIT rates and rebucketizing, their model portfolio would have been shown to have exhausted its assets rather than having grown in value to $4.7 million and $1,544,789, respectively, by the end of the backtest periods.

In particular, Respondents' use of a flat 3% inflation rate made the backtest results misleading because historical inflation as measured by CPI-U was substantially higher during the backtest periods. Because annual CPI-U reached double digits in the late 1970s and early 1980s, inflation adjusted annual income would have substantially increased early in the backtest periods, thereby substantially decreasing principal and ultimately causing the model portfolio to be exhausted before the backtests ended. As discussed above, this result would not change for the 1966 backtest even using Hekman's downward adjustment to CPI-U based on the Boskin Commission corrections.[60]

In addition, Respondents' use of a flat 7% REIT dividend rate on a constant $200,000 REIT principal made the backtest results misleading because it was higher than historical REIT rates of return. As Grenadier demonstrated without contradiction, substituting data from the NAREIT All REIT Index back through 1972 resulted in REIT principal dropping to $85,646 in Respondents' 1966 backtest spreadsheet and $134,031 in Respondents' 1973 backtest spreadsheet, and lower valued portfolios as a consequence.[61] The 1966 backtest was further inflated by Respondents' use of entirely fictitious REIT rates for 1966 to 1971, a period when REITs were generally unavailable to investors.

Also, Respondents' failure to rebucketize the backtests inflated their results because, during the period when the model BOM portfolio was fully invested in stocks, S&P 500 returns were substantially higher than T-bill returns and about equivalent to publicly traded REIT

---

59 As noted above, the ALJ also found that Respondents' statements about the backtests were misleading because Respondents did not inform prospective clients that the backtests did not deduct advisory fees. Given our other findings, which amply support liability and the sanctions imposed, we have determined not to reach this additional basis for liability.

60 Hekman recalculated only the 1966 backtest using the Boskin Commission corrections; he did not also recalculate the 1973 backtest. In addition, Respondents' contention, supported by Hekman's conclusion, that CPI-U should be further reduced to account for reduced retiree spending is not persuasive because, as Grenadier observed, it unjustifiably conflates spending levels with inflation.

61 Respondents did not demonstrate that Grenadier's calculations would be materially different using the NAREIT Equity Index instead of the NAREIT All REIT Index.

returns. A rebucketized model BOM portfolio would have been invested in all three assets, not just stocks.[62]

Third, Respondents overstated the 1973 backtest result by over $1 million even using their assumptions. Respondents concede that they have no documentary support for the $1,544,789 result they presented to seminar attendees, and their expert, using assumptions similar to those Respondents claim to have used, concluded that the model BOM portfolio would have been worth only $507,194 at the end of the 1973 backtest. Thus, Respondents either fabricated the 1973 backtest result or presented it to seminar attendees without ensuring its accuracy.

3. Respondents' fraudulent statements and omissions were material.

For a misleading statement to be material, "there must be a substantial likelihood that the disclosure of the omitted fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available."[63] It would have been significant to a reasonable investor in considering whether to become an RJLC client or implement the BOM strategy to know that: (i) Respondents' purported backtests did not use historical inflation or REIT rates or even follow the BOM strategy by rebucketizing; (ii) actual backtests beginning in 1966 and 1973 would have shown the model portfolio to have been exhausted by the 1980s rather than providing decades of payouts with an increase in residual principal; and (iii) Respondents presented a result for the 1973 backtest that was over $1 million higher than even their flawed assumptions would have shown.

Our conclusion is supported by testimony from prospective clients who attended Respondents' seminars. DeSipio and Chisholm testified that they would have found it important to know that Respondents' backtests did not use historical inflation and that actual backtests using historical data would have shown the model portfolio to have exhausted its assets. Chisholm also testified that he would have wanted to know that the backtests did not rebucketize and that REITs were not readily available in 1966. And DeSipio testified that that he would not want his entire portfolio to be invested in stocks, as was done here by not rebucketizing the backtests.

4. Respondents made the fraudulent misstatements and omissions with scienter.

Respondents acted at least recklessly.[64] Lucia designed the backtests and was responsible for the backtest slides. In approving and using the backtest slides, it was Lucia's decision to tell

---

62 Lucia also admitted in testimony that not rebucketizing caused the backtests to show higher portfolio returns.

63 *Basic Inc. v. Levinson*, 485 U.S. 224, 231-32 (1988).

64 The recklessness required to violate Section 206(1) "is not merely a heightened form of ordinary negligence; it is an 'extreme departure from the standards of ordinary care, . . . which presents a danger of misleading buyers or sellers that is either known to the [respondent] or is so obvious that the actor must have been aware of it.'" *Steadman*, 967 F.2d at 641-2 (quoting *Sundstrand Corp. v. Sun Chem. Corp.*, 553 F.2d 1033, 1045 (7th Cir. 1977)).

seminar attendees that he had backtested the BOM strategy to show how a portfolio implementing it in the past would have performed over historical time periods with specific negative market performance. But Lucia knew that the backtests were not based on historical data and did not rebucketize, and therefore knew or must have known of the risk of misleading prospective clients to believe that Respondents had performed actual backtests of a model BOM portfolio. Indeed, because Lucia admitted that the BOM strategy does not advocate keeping all portfolio assets in stocks, he knew or must have known that it was untrue to claim that the backtests followed the BOM strategy.

Also, Lucia knew or must have known that the backtest results he presented were misleading. Lucia knew that: (i) actual inflation was higher than 3% early in the backtests and fluctuated annually; (ii) REITs did not produce flat 7% dividend rates on flat principal; and (iii) not rebucketizing caused the backtests to show higher portfolio returns.

Finally, Lucia acted recklessly, at the very least, in presenting the 1973 backtest results without ensuring their accuracy. As discussed above, Respondents provided no support for their 1973 backtest and Hekman was unable to replicate its results. Lucia also admitted in testimony that the 1973 backtest slides misstated the methodology Respondents purportedly used for the backtest.

B. Lucia willfully aided and abetted and caused RJLC's violations of Advisers Act Sections 206(1), 206(2), and 206(4).

To establish aiding and abetting liability, the Commission must find: (i) a primary violation of the securities laws by RJLC; (ii) that Lucia substantially assisted RJLC's primary violation; and (iii) that Lucia provided such assistance with the requisite scienter.[65] The scienter requirement may be satisfied by evidence that Lucia knew of or recklessly disregarded the wrongdoing and his role in furthering it.[66]

Because the primary violations of Advisers Act Sections 206(1), 206(2), and 206(4) are premised on the imputation of Lucia's conduct and scienter to RJLC for the reasons discussed above, we find that Lucia satisfies the elements for aiding and abetting liability. Lucia substantially assisted RJLC's primary violations because he designed the backtests, was responsible for the backtest slides, and made the material misstatements about the backtests to seminar attendees. Lucia provided such assistance with scienter because he knew or must have known that the statements he made about the backtests to seminar attendees were misleading. Because we find that Lucia aided and abetted RJLC's primary violations, "he necessarily was a cause of the violations."[67]

---

[65] *Howard v. SEC*, 376 F.3d 1136, 1143 (D.C. Cir. 2004); *Eric J. Brown*, Advisers Act Release No. 3376, 2012 WL 625874, at *11 (Feb. 27, 2012).

[66] *Brown*, 2012 WL 625874, at *11.

[67] *Zion Capital Mgmt. LLC*, Advisers Act Release No. 2200, 2003 WL 22926822, at *7 (Dec. 11, 2003).

C. RJLC willfully violated, and Lucia willfully aided and abetted and caused RJLC's violation of, Advisers Act Section 206(4) and Rule 206(4)-1(a)(5) thereunder.

Advisers Act Rule 206(4)-1(a)(5) provides that it constitutes a fraudulent act, practice, or course of business within the meaning of Section 206(4) for an investment adviser "directly or indirectly, to publish, circulate, or distribute any advertisement . . . which contains any untrue statement of a material fact, or which is otherwise false or misleading."[68] The Rule defines "advertisement" to include "any notice, circular, letter *or other written communication* addressed to more than one person . . . which offers . . . investment advisory service[s] with regard to securities."[69] As the Ninth Circuit found, "[t]he term 'advertisement' is broadly defined in Rule 206(4)-1(b)" and includes "[i]nvestment advisory material which promotes advisory services for the purpose of inducing potential clients to subscribe to those services."[70]

Respondents urge us to apply the same reading of Rule 206(4)-1 as did the ALJ, who found that their slideshow presentation was not an "advertisement" because it did not qualify as a "written communication" under Rule 206(4)-1(b).[71] The ALJ based his finding on precedent that he understood to hold that a "written communication" includes "only traditional media, including books, newsletters, and newspaper and magazine advertisements."[72] And because "[t]here is no evidence that slideshow printouts or synopses thereof were handed out to seminar participants or otherwise published in printed or handwritten form at the seminars," the ALJ found that the slideshow presentation was not a "'written communication' as that term has been interpreted."[73]

But none of the cases cited by the ALJ, nor any other case, has held that only traditional media qualifies as a "written communication" under Rule 206(4)-1(b). To the contrary, the cases cited by the ALJ merely found that a "written communication" *includes* newsletters, newspaper advertisements, and books.[74] They did not exclusively define those words.

The plain language of Rule 206(4)-1(b) also does not limit a "written communication" to traditional media or require that a "written communication" be in hard-copy rather than

70 *C.R. Richmond & Co.*, 565 F.2d at 1104.

71 *Raymond J. Lucia Cos.*, 2013 WL 6384274, at *50-51.

72 *Id.* at *51. The ALJ cited the following cases as precedent: *SEC v. Suter*, No. 81-3865, 1983 WL 1287, at *11-12 (N.D. Ill. Feb. 11, 1983), *aff'd*, 732 F.2d 1294 (7th Cir. 1984); *SEC v. Lindsey-Holman Co.*, No. 78-54-MAC, 1978 WL 1129, at *2-3 (M.D. Ga. Aug. 6, 1978); *C.R. Richmond & Co.*, 565 F.2d at 1104.

73 *Raymond J. Lucia Cos.*, 2013 WL 6384274, at *51.

74 *Suter*, 1983 WL 1287, at *11-12; *Lindsey-Holman Co.*, 1978 WL 1129, at *2-3; *C.R. Richmond & Co.*, 565 F.2d at 1104.

electronic or projected form.[75] The Rule's only limitations on what qualifies as a "written communication" are that it be "written"[76] and a "communication."[77] Both of those limitations are met here. There is no question that the slideshow was written. And its projection onto a screen along with Lucia's presentation of its contents was a communication to seminar attendees. Thus, the slideshow was a "written communication" within the meaning of Rule 206(4)-1(b).

The slideshow also meets the two additional requirements of the Rule's broad definition of "advertisement." First, the slideshow was addressed to more than one person—typically to an audience of one hundred to five hundred people. Second, the slideshow offered RJLC's investment advisory services with regard to securities. Indeed, Respondents used the slideshow presentation to generate leads for RJLC. To that end, Respondents handed out response cards for seminar attendees to complete if they wanted to meet with an RJLC advisor. Lucia also repeatedly offered RJLC's services throughout the Webinar presentation of the slideshow. And Respondents treated the slideshow as marketing and advertising material requiring review by RJLC's broker-dealers.

The remaining elements of Rule 206(4)-1 have also been satisfied. By projecting the slideshow onto a screen and presenting its contents during the seminars, Lucia published, circulated, and distributed it.[78] And as set forth above, the slideshow contained untrue statements of material fact and was misleading.

---

[75] Although not specifically interpreting the phrase, "written communication," we have previously advised that, under Rule 206(4)-1, "electronically disseminated advertisements are subject to the same prohibitions against misleading disclosure as advertisements in paper." *Use of Electronic Media by Broker-Dealers, Transfer Agents, and Investment Advisers*, Advisers Act Release No. 1562, 1996 WL 242059, at *6 (May 9, 1996); *see also id.* at *2 n.4 ("[T]he antifraud provisions of . . . section 206 of the Advisers Act and the rules thereunder, apply to information delivered and communications transmitted electronically, to the same extent as they apply to information delivered in paper form.").

[76] At the time we adopted Rule 206(4)-1 in 1961, Webster's Third New International Dictionary defined "written" as the past participle of "write," which it in turn defined as, *inter alia*, (i) "to set forth in written language . . . reveal, describe, treat of, or depict by means of words"; and (ii) "to form or produce letters, words, or sentences with a pen, pencil, or machine." Webster's Third New Int'l Dictionary 2640-41 (1961).

[77] Webster's Third New International Dictionary defined "communication" as, *inter alia*, (i) "the act or action of imparting or transmitting"; (ii) "facts or information communicated"; and (iii) "interchange of thoughts or opinions." *Id.* at 460.

[78] Webster's Third New International Dictionary defined "publish" as, *inter alia*: (i) "to declare publicly"; (ii) "to impart or acknowledge to one or more persons"; and (iii) "to place before the public (as through a mass medium)." Webster's at 1837. It defined "circulate" as, *inter alia*, (i) "to spread widely"; and (ii) "to cause to pass from person to person and [usually] to become widely known." *Id.* at 409. And it defined "distribute" as, *inter alia*, "to give out or deliver esp. to the members of a group." *Id.* at 660.

Accordingly, we find that RJLC willfully violated Section 206(4) on the additional ground that its conduct constitutes a fraudulent act, practice, or course of business as defined in Rule 206(4)-1(a)(5). And because that primary violation is premised on the imputation of Lucia's conduct and scienter to RJLC as discussed above, we find that Lucia willfully aided and abetted and caused RJLC's violation of Section 206(4) and Rule 206(4)-1(a)(5).

D. Respondents' arguments against liability lack merit.

1. Respondents contend that they did not mislead prospective clients.

Respondents claim that they explicitly told seminar attendees, through both the slides and the actual words spoken by Lucia, that they were presenting hypothetical illustrations using hypothetical assumptions. Respondents claim that the slides themselves "specifically and repeatedly explained that '[r]ates of return are hypothetical in nature and are for illustrative purposes only'" and that "[t]his is a hypothetical illustration and is not representative of an actual investment." And Respondents claim that Lucia, in presenting the slides, "expressly informed seminar attendees that he was using *hypothetical, pretend, assumed* rates of return."[79]

We find that such statements did not change the overall impression that Respondents had performed backtests showing how the BOM strategy would have performed during the two historical periods.[80] In addition to using the word "backtest," Respondents' slideshow introduced the 1966 backtest by asking, "What would have happened if you retired in 1966[?]," and introduced the 1973 backtest by asking, "Can Buckets Stand Up To The Test Of The '73/'74 Grizzly Bear?" And the two seminar attendees who testified understood from Lucia's

---

79 Respondents also contend that seminar attendees would have understood that the inflation and REIT rates used were hypothetical because: (i) the attendees were "comprised primarily of retirees and near-retirees who had lived through periods of high inflation, [and no reasonable attendee] would have understood the 3% annual inflation rate . . . to be based on actual historical inflation"; and (ii) "a reasonable investor understands that in reality return rates fluctuate, and respondents' illustrations, rather than being based on real-life data, incorporated an assumed constant rate of return." But DeSipio and Chisholm did not make such assumptions. To the contrary, they justifiably understood from Respondents' presentation that Respondents had used historical rates in their backtests.

80 *Cf. C.R. Richmond & Co.*, 565 F.2d at 1106-07 (finding that advertisements were "deceptive and misleading in their overall effect," in violation of Advisers Act Section 206(4) and Rule 206(4)-1, "even though [it might be argued that] when narrowly and literally read, no single statement of a material fact was false" (quoting *Spear & Staff, Inc.*, Advisers Act Release No. 188, 1965 WL 88746, at *3 (1965))); *see also id.* at 1105 ("[C]onduct with respect to [Rule 206(4)-1] is to be measured from the viewpoint of a person unskilled and unsophisticated in investment matters, . . . and the terms 'fraud' and 'deceit' are used in a flexible and non-technical sense to effectuate the [Advisers] Act's remedial purposes.").

presentation that Respondents had performed backtests showing that the BOM strategy could increase a portfolio's value during the two historical periods.[81]

Moreover, regardless of Respondents' disclaimers about hypothetical rates, Respondents misled seminar attendees by not rebucketizing the 1966 and 1973 backtests. In other words, it would have been just as misleading for Respondents not to rebucketize if they had in fact stated that they were presenting a hypothetical illustration that purportedly followed the BOM strategy as it was for them not to rebucketize what was described as a backtest. Rebucketizing was a key aspect of the BOM strategy, and keeping all assets in stocks—the result of not rebucketizing—contravened the strategy (and substantially inflated the resulting returns). Thus, not rebucketizing made it untrue for Respondents to claim that their model portfolio, whether presented as a "hypothetical illustration" or a backtest, followed the BOM strategy.

Respondents' 1973 backtest results were also false regardless of disclaimers about hypothetical rates. As noted, Respondents' expert did not come within $1 million of the 1973 backtest results using Respondents' own hypothetical inflation rate and other assumptions similar to those that Respondents claim to have used. Consequently, even if Respondents were presenting hypothetical illustrations and not backtests, it was misleading for them to present such grossly inaccurate results.

Respondents contend that the only purpose of the seminar presentation was to compare BOM to three other strategies, and that the Division failed to show that, had Respondents "used historical data rather than hypothetical assumptions . . . [the BOM] strategy would have failed to outperform the other investment strategies illustrated."[82] For example, Respondents assert that they used the same 3% inflation rate for each of the strategies illustrated and there was no showing that, "under a higher inflation rate, Lucia's strategy would not have nonetheless outperformed the alternatives he illustrated."

We reject this argument because the purpose of the backtest slides was not only to compare strategies but also to show the efficacy of the BOM strategy during difficult historical market periods. Respondents misled seminar attendees to believe that, as Chisholm testified, BOM "was a proven method of investing, that it had been backtested," and "would do well over good times as well as bad times." But actual backtests would have shown that the BOM strategy would not have done well over the two historical "bad times" chosen. And again, regardless of

---

81 Respondents also contend that Lucia referenced "direct ownership in real estate" when discussing the period from 1966 to 1971 in the backtest. But the 1966 backtest slides specifically stated that "*REIT* returns are based on a 7% annual return," and the 1966 backtest spreadsheet referred only to REITs. And Respondents did not clarify during the seminars that REITs were generally unavailable from 1966 to 1971 and that they actually meant "direct ownership in real estate" when discussing that period.

82 Respondents similarly argue that there can be no finding of materiality here because the Division has made no "allegation (much less an evidentiary showing) . . . that, had Mr. Lucia used actual rates of return . . . and 'rebucketized,' his recommended strategy would not have outperformed the alternative approaches illustrated in the seminar."

this contention, not rebucketizing the backtests and presenting grossly inaccurate 1973 backtest results made Respondents' representations false and misleading.

Respondents also assert four reasons why their assumptions were reasonable and not used to mislead seminar attendees. First, Respondents contend that they submitted "expert testimony supporting the reasonableness of the assumed inflation rates and REIT return rates used in the illustrations." For example, Hekman "testified that the use of a 3% inflation rate for hypothetical retirement planning calculations is universally recognized," and Gannon "testified that a 7% REIT return rate for 1966-2003 . . . was reasonable and supported by available indices." We reject this argument because Hekman and Gannon made clear that their opinions about the reasonableness of Respondents' inflation and REIT rates did not apply to backtests but rather to hypothetical illustrations, and Respondents led seminar attendees to believe that they had performed backtests.

Second, Respondents contend that it was reasonable not to rebucketize the backtests because to do so "would have been highly speculative" and potentially led to accusations of manipulating rebalancing dates because the "strategy illustrated . . . did not represent an actual portfolio with specific investments, but rather a general approach to diversification," and "[d]eciding when and how to shift asset classes would turn entirely on a client's individualized holdings and the market conditions at the time." We reject this contention because, even if Respondents genuinely held these concerns, it was misleading for them not to disclose to seminar attendees that that the backtest results were inflated because they did not rebucketize. Respondents' contention also seems insincere considering that Respondents had no apparent difficulty or reservation in shifting asset classes in the backtest spreadsheets from REITs to T-bills.

Third, Respondents contend that their assumptions were reasonable because there is no established definition of "backtest" precluding the use of assumed rates. Respondents contend that to base liability here on "a firm definition not found in the securities laws," would violate due process by denying Respondents "fair notice of what conduct is required or proscribed," and be an abuse of discretion by imposing "regulatory changes through litigation" rather than rulemaking. Respondents also contend that "[e]ven if one were to posit that Mr. Lucia misused the term 'backtest,' it cannot be denied that he informed visitors of his seminars exactly how he was using it."

We reject these arguments. In finding liability, we need not define "backtest" in all contexts, we just need to assess its use by Respondents here. That use was in conjunction with other statements that misled seminar attendees to believe that Respondents had analyzed how a model portfolio would have performed had it implemented the BOM strategy in the past. Respondents never informed attendees that their assumptions would not actually show, as they claimed, whether the model BOM portfolio could "stand up to" the market challenges starting in 1966 or 1973.[83]

---

83 Respondents similarly contend that we would violate due process if we interpreted "written communication" in Rule 206(4)-1 to include their live slideshow presentation, and that

Fourth, Respondents contend that their assumptions were reasonable because it was industry practice to use assumed rates in backtests. As an example of that practice, Respondents point to the American Funds brochure "that included multiple illustrations of 'back-testing withdrawal rates,' all using hypothetical (rather than actual) inflation rates over an historical period." But Respondents introduced no expert testimony to establish industry practice, and their own inflation and REIT experts agreed that backtests use historical rates. And while the backtests in the American Funds brochure used an assumed 4% inflation rate, two other brochures in the record, from Fidelity and Financial Engines Income+, reported the results of backtests that appear to have used historical stock, bond, and inflation rates.

2. Respondents contend that their statements about the 1966 and 1973 backtests were not material.

Respondents make various other arguments that do not concern the validity of the backtests, but focus more on materiality. Respondents assert that their presentation cannot have been material because they did not recommend or sell securities at the seminars, and it is undisputed that their disclosures to attendees who eventually became Firm clients were "100% complete and accurate." But liability under Section 206 does not require that the fraudulent conduct be in connection with the offer or sale of securities.[84] To the contrary, Section 206 includes within its scope misrepresentations that are not specific to a client investment decision.[85]

Respondents also contend that they "submitted unrebutted evidence at the hearing showing that after [they] ceased using the illustrations in question once concerns were raised by the SEC examination staff [in 2010], the response rate of seminar attendees who filled out contact cards requesting to meet with an RJLC adviser did not decline." We find that the

---

"the appropriate way to bring [the rule] up to date is through rulemaking." We also reject this argument because, as discussed above, Rule 206(4)-1 has discernible parameters that gave Respondents fair notice that their conduct fell within its scope. And even if we were applying a new interpretation of the rule, "[i]t is well settled that an agency 'is not precluded from announcing new principles in an adjudicative proceeding. . . .'" *Cassell v. FCC*, 154 F.3d 478, 486 (D.C. Cir. 1998) (quoting *NLRB v. Bell Aerospace Co.*, 416 U.S. 267, 294 (1974)).

84 *SEC v. Lauer*, No. 03-80612-CIV, 2008 WL 4372896, at *24 (S.D. Fla. Sept. 24, 2008), *aff'd*, 478 F. App'x 550 (11th Cir. 2012); *see also Applicability of the Investment Advisers Act*, Advisers Act Release No. 1092, 1987 WL 112702, at *9 (Oct. 8, 1987) (staff interpretive release stating that the Section 206 provisions "do not refer to dealings in securities but are stated in terms of the effect or potential effect of prohibited conduct on the client").

85 *See, e.g., SEC v. C.R. Richmond & Co.*, 565 F.2d 1101, 1106 (9th Cir. 1977) (investment adviser violated Section 206 by making misrepresentations in a book and newsletter concerning its investment strategy and the results of a model portfolio); *see also Applicability of the Investment Advisers Act*, 1987 WL 112702, at *9 (staff interpretive release stating that "the Commission has applied Sections 206(1) and (2) in circumstances in which the fraudulent conduct arose out of the investment advisory relationship between an investment adviser and its clients, even though the conduct does not involve a securities transaction").

response cards are not determinative of materiality because they do not show whether attendees would have expressed interest in the Firm if they had been told that backtests showed the model BOM portfolio exhausting its assets during the two historical periods. This is because Respondents never told the truth about the backtests; they simply stopped using the backtest slides. And even if the response cards were relevant to materiality, Respondents introduced insufficient evidence to establish what the cards showed. Respondents' contention is based solely on vague testimony from Lucia's son that during the periods before and after Respondents stopped using the backtest slides, "basically the same" percentage of seminar attendees who filled out response cards checked a box to meet with a financial advisor.[86]

3. Respondents contend that they cannot have acted with scienter.

Respondents make various arguments that Lucia cannot have acted with scienter, and that he was, at worst, negligent in that his "hypothetical illustrations . . . were inartfully prepared." Respondents contend that Lucia "testified that he subjectively believed his use of the term 'backtest' encompassed the utilization of hypothetical information." We reject this self-serving contention because it is contradicted by Lucia's representations to seminar attendees that the backtest slides showed how a portfolio implementing the BOM strategy in 1966 or 1973 would have performed. In other words, our finding of liability does not hinge on Lucia's use of the word "backtest." Lucia made numerous other statements suggesting that the slides reflected historical results, and he knew or must have known that using hypothetical data in the backtests would not reflect historical results.

Respondents also deny any scienter by pointing to "third party review [of the backtest slides] by both the registered broker-dealers who had supervisory oversight" of the Firm,[87] as well as Commission staff in a 2003 examination of the Firm,[88] who never told Respondents "that the slides were in any way misleading." Respondents contend that they therefore were "not aware of red flags suggesting that the slides were misleading." We reject these arguments. First, Respondents were well aware of the facts that rendered the backtest slides misleading for the reasons discussed above, and thus any reliance they placed on third party review would not have been reasonable.[89] Second, there is no evidence that: (i) Respondents brought the backtests to

---

86 Lucia's son testified that based on response card data, from January to June 2010, a period when the slides were used, about 50% of seminar attendees wanted to meet with a financial advisor, and from January to June 2011, when the slides were no longer used, about 47% of seminar attendees wanted to meet with a financial advisor.

87 Respondents' registered broker-dealers, Securities America (from 2002 to 2007) and First Allied (from 2007 to 2011), reviewed RJLC's marketing and advertising material, including the slideshow, before it was distributed publicly.

88 The examination was conducted by the Division of Investment Management's compliance office, a precursor office to the Commission's Office of Compliance Inspections and Examinations ("OCIE").

89 *Cf. Flannery*, 2014 WL 7145625, at *33 (rejecting reliance-on-counsel defense, in part, because respondent "was well aware of the facts that rendered the statements at issue misleading").

the attention of the Commission staff or broker-dealers; (ii) Respondents provided any support for the backtest slides that would have permitted a meaningful review of their content; or (iii) the Commission staff or broker-dealers addressed the backtests with Respondents. Thus, we are not presented with a situation where a third party told Respondents that the backtest slides were not misleading and Respondents relied on that advice. To the contrary, the Commission staff told Respondents in a deficiency letter dated December 12, 2003, that RJLC "should not assume that [its] activities not discussed in this letter are in full compliance with the federal securities laws."

As support for this last contention, Respondents point to *SEC v. Slocum, Gordon, & Co.*, in which the court concluded that the defendant investment adviser could not be found to have intentionally omitted material facts about its account structure (which created a potential conflict of interest by commingling firm and client funds) from its Form ADV in violation of Advisers Act Section 207 and Rule 204-1(c).[90] The court found that it was reasonable for the defendant to believe that its account structure complied with the securities laws because two Commission examinations and annual independent auditor examinations failed to identify issues with it.[91] But *Slocum* is inapposite because the defendant relied on the advice of counsel in structuring its accounts and subsequently brought its account structure to the Commission's attention.[92] Here, there is no evidence that Respondents relied on counsel or brought the backtest slides to the Commission's attention.

E. Respondents' Appointments Clause argument lacks merit.

Respondents argue that the ALJ who presided over this matter and issued the initial decision, ALJ Cameron Elliot, was not appointed in a manner consistent with the Appointments Clause of the Constitution.[93] Respondents further claim that, in light of this purported constitutional violation, the proceedings "are themselves invalid and any resulting orders should be vacated." We find that the appointment of Commission ALJs is not subject to the requirements of the Appointments Clause.[94]

---

[90] 334 F. Supp. 2d 144 (D.R.I. 2004).

[91] *Id.* at 180-82.

[92] *Id.* at 160-61.

[93] Congress has empowered "[e]ach agency [to] appoint as many administrative law judges as are necessary," and it has established a comprehensive scheme to govern the details of ALJs' employment in the civil service. 5 U.S.C. §§ 3105, 1101 *et seq.*; *see also* 15 U.S.C. § 78d-1(a) (authorizing the Commission to delegate functions to "an administrative law judge"); Exchange Act Section 4(b), 48 Stat. 885 (original Exchange Act provision authorizing the Commission to appoint "examiners"). The Commission has for many decades relied upon ALJs to prepare initial decisions in its administrative proceedings.

[94] The constitutional claims raised here implicate many "threshold questions" regarding the Commission's rules and practices. *Elgin v. Dep't of Treasury*, 132 S. Ct. 2126, 2140 (2012); *see also Thunder Basin Coal Co. v. Reich*, 510 U.S. 200, 214-15 (1994). In the course of considering the constitutional claims, we address those questions and legal principles. It is important that the Commission have an opportunity to address constitutional issues in the first

Under the Appointments Clause, certain high-level government officials must be appointed in particular ways: "Principal officers" must be appointed by the President (and confirmed by the Senate), while "inferior officers" must be appointed either by the President, the heads of departments, or the courts of law.[95] The great majority of government personnel are neither principal nor inferior officers, but rather "mere employees" whose appointments are not restricted by the Appointments Clause.[96] It is undisputed that ALJ Elliot was not appointed by the President, the head of a department, or a court of law.[97] Respondents therefore contend that his appointment violates the Appointments Clause because, in their view, he should be deemed an inferior officer. The Division counters that he is an employee and thus there was no violation of the Appointments Clause.

Our consideration of this question is guided by the D.C. Circuit's decision in *Landry v. FDIC*, which addressed whether ALJs should be deemed inferior officers or employees.[98] *Landry* held that, for purposes of the Appointments Clause, ALJs at the Federal Deposit Insurance Corporation ("FDIC") who oversee administrative proceedings to remove bank executives are employees rather than inferior officers. *Landry* explained that the touchstone for determining whether adjudicators are inferior officers is the extent to which they have the power to issue "final decisions."[99] Although ALJs at the FDIC take testimony, conduct trial-like hearings, rule on the admissibility of evidence, have the power to enforce compliance with discovery orders, and issue subpoenas, they "can never render the decision of the FDIC."[100] Instead, they issue only "recommended decisions" which the FDIC Board of Directors reviews *de novo*, and "[f]inal decisions are issued only by the FDIC Board."[101] The ALJs thus function as aides who assist the Board in its duties, not officers who exercise significant authority

---

instance, as it has in the past. *See, e.g.*, *Gary M. Kornman*, Exchange Act Release No. 59403, 2009 WL 367635, at *12 (Feb. 13, 2009) (Double Jeopardy claim); *Vladen Vindman*, Securities Act Release No. 8670, 2006 WL 985308, at *11 & n.60 (Apr. 14, 2006) (Seventh Amendment claim).

95 The Clause provides that the President "by and with the advice and consent of the Senate, shall appoint . . . officers of the United States . . . but the Congress may by law vest the appointment of such inferior officers, as they think proper, in the President alone, in the courts of law, or in the heads of departments." U.S. Const. art. II, §2, cl. 2.

96 *Landry v. FDIC*, 204 F.3d 1125, 1134 (D.C. Cir. 2000) (quoting *Freytag v. Commissioner*, 501 U.S. 868, 882 (1991)); *Buckley v. Valeo*, 424 U.S. 1, 126 (1976).

97 The Commission constitutes the "head of a department" for purposes of the Appointments Clause when its commissioners act collectively. *See Free Enter. Fund v. Public Co. Accounting Oversight Bd.*, 561 U.S. 477, 512-13 (2010).

98 *Landry*, 204 F.3d at 1130-34.

99 *Id.* at 1133-34.

100 *Id.* at 1133.

101 *Id.*

independent of the Board's supervision. Because ALJs at the FDIC "have no such powers" of "final decision," the D.C. Circuit "conclude[d] that they are not inferior officers."[102]

The mix of duties and powers of the Commission's ALJs are very similar to those of the ALJs at the FDIC. Like the FDIC's ALJs, the Commission's ALJs conduct hearings, take testimony, rule on admissibility of evidence, and issue subpoenas. And like the FDIC's ALJs, the Commission's ALJs do not issue the final decisions that result from such proceedings. Just as the FDIC's ALJs issue only "recommended decisions" that are not final, the Commission's ALJs issue "initial decisions" that are likewise not final.[103] Respondents may petition us for review of an ALJ's initial decision,[104] and it is our "longstanding practice [to] grant[] virtually all petitions for review."[105] Indeed, we are unaware of any cases which the Commission has not granted a timely petition for review. Absent a petition, we may also choose to review a decision on our own initiative,[106] a course we have followed on a number of occasions.[107] In either case, our rules expressly provide that "the initial decision [of an ALJ] shall not become final."[108] Even where an aggrieved person fails to file a timely petition for review of an initial decision and we do not order review on our own initiative, our rules provide that "*the Commission* will issue an

---

102 *Id.* at 1134.

103 *See* 17 C.F.R. § 201.360(a)(1) & (d). We note that the FDIC Board has discretion to "limit the issues to be reviewed to those findings and conclusions to which opposing arguments or exceptions have been filed by the parties." 12 C.F.R. § 308.40(c)(1).

104 17 C.F.R. § 201.411(b).

105 Rules of Practice, Exchange Act Release No. 35833, 1995 WL 368865, at *80-81 (June 9, 1995); *see also* Rules of Practice, Exchange Act Release No. 33163, 1993 WL 468594, at *59 (Nov. 5, 1993) (explaining that we are "unaware of any case in which the Commission has declined to grant a petition for review"). We reiterated this policy in the context of amendments to our Rules of Practice in 2004 that eliminated the filing of oppositions to petitions for review. We deemed such oppositions pointless, "given that the Commission has long had a policy of granting petitions for review, believing that there is a benefit to Commission review when a party takes exception to a decision." Proposed Amendments to the Rules of Practice and Related Provisions, Exchange Act Release No. 48832, 2003 WL 22827684, at *13 (Nov. 23, 2003).

106 17 C.F.R. § 201.411(c); *see also* 15 U.S.C. § 78d-1(b) (providing that "the Commission shall retain a discretionary right to review the action of any . . . administrative law judge . . . upon its own initiative or upon petition").

107 *See, e.g.*, *Dian Min Ma*, Exchange Act Release No. 74887, 2015 WL 2088438, at *1 (May 6, 2015) ("determin[ing] to review the [ALJ's] decision on [our] own initiative," setting aside the initial decision in part, and providing that "as modified," the initial decision "has become the final decision of the Commission"); *Michael Lee Mendenhall*, Exchange Act Release No. 74532, 2015 WL 1247374, at *1 (Mar. 19, 2015) ("determin[ing] *sua sponte* to vacate the [ALJ's] initial decision"); *George C. Kern, Jr.*, Exchange Act Release No. 29356, 1991 WL 284804, at *1 (June 21, 1991) ("On its own initiative, the Commission ordered review of the [ALJ's] initial decision . . . .").

108 17 C.F.R. § 201.360(d)(1).

order that the decision has become final," and it "becomes final" only "upon issuance of the order" by the Commission.[109] Under our rules, no initial decision becomes final simply "on the lapse of time" by operation of law; instead, it is "the Commission's issuance of a finality order" that makes any such decision effective and final.[110] Moreover, as does the FDIC, the Commission reviews its ALJs' decisions *de novo*. Upon review, we "may affirm, reverse, modify, set aside or remand for further proceedings, in whole or in part," any initial decision.[111] And "any procedural errors" made by an ALJ in conducting the hearing "are cured" by our "thorough, de novo review of the record."[112] We may also "hear additional evidence" ourselves, and may "make any findings or conclusions that in [our] judgment are proper and on the basis of the record."[113] For this reason, although ALJs may play a significant role in helping to shape the administrative record initially, it is the Commission that ultimately controls the record for review and decides what is in the record. As we have explained before, we have "plenary authority over the course of [our] administrative proceedings and the rulings of [our] law judges—before and after the issuance of the initial decision and irrespective of whether any party has sought relief."[114]

---

109 17 C.F.R. § 201.360(d)(2) (emphasis added). The effect of this rule, which was enacted pursuant to our general rulemaking authority under the securities laws, is that our ALJs' initial decisions (like the FDIC's ALJs' recommended decisions) do not become the final and effective decision of the agency without affirmative action on our part—specifically, our issuance of a finality order. *See, e.g.*, *Goolu, Inc.*, Exchange Act Release No. 71788, 2014 WL 1213742 (Mar. 25, 2014); *L. Rex Andersen, CPA*, Exchange Act Release No. 63209, 2010 WL 4256161 (Oct. 28, 2010); *David A. Zwick*, Exchange Act Release No. 56826, 2007 WL 4145827 (Nov. 20, 2007). It is not until the issuance of such an order that the Commission's "right to exercise such review [*i.e.*, review of an initial decision on our own initiative] is declined." *See* 15 U.S.C. § 78d-1(c). In short, under our rules, an ALJ's initial decision does not "become[] the decision of the agency without further proceedings," and any theoretical distinction between the potential legal effect of an initial decision as opposed to a recommended decision is immaterial. *Cf.* 5 U.S.C. § 557(b).

110 Exchange Act Release No. 49412, 2004 WL 503739, *12 (Mar. 12, 2004); *see also* 17 CFR § 201.360(d)(2) (providing that the Commission's "order of finality shall state the date on which sanctions . . . take effect").

111 17 C.F.R. § 201.411(a); *see also* 5 U.S.C. § 557(b) ("On appeal from or review of the initial decision, the agency has all the powers which it would have in making the initial decision . . . .").

112 *Heath v. SEC*, 586 F.3d 122, 142 (2d Cir. 2009); *see also, e.g.*, *In the Matter of Anthony Fields*, Exchange Act Release No. 74344, 2015 WL 728005, *20 (Feb. 20, 2015) ("[O]ur de novo review cures any evidentiary error that the law judge may have made.").

113 17 C.F.R. §§ 201.411(a), 201.452.

114 *Michael Lee Mendenhall*, 2015 WL 1247374, at *1. This includes authority over all evidentiary and discovery-related rulings. And the fact that our ALJs may rule on evidentiary matters and discovery issues (subject to our *de novo* review) does not distinguish them from the

Notwithstanding the direct relevance of *Landry*, Respondents claim that the decision should not control here because, in their view, it "was wrongly decided." They claim that *Landry* "is inconsistent with" *Freytag v. Commissioner*, in which the Supreme Court deemed a Tax Court "special trial judge" to be an inferior officer.[115] But, as *Landry* recognized, ALJs are different from those special trial judges.[116] The far greater role and powers of the special trial judges relative to Commission ALJs, in our view, makes *Freytag* inapposite here.

First, unlike the ALJs whose decisions are reviewed *de novo*, the special trial judges made factual findings to which the Tax Court was required to defer, unless clearly erroneous.[117] *Second*, the special trial judges were authorized by statute to "render the [final] decisions of the

---

FDIC's ALJs in *Landry*. *See* 204 F.3d at 1134 (observing that the FDIC's ALJs make rulings on the "admissibility of evidence" and "discovery order[s]").

115 *Freytag*, 501 U.S. at 880-82. Respondents insist that Judge Randolph's concurring opinion in *Landry* had the better reading of *Freytag*. For the reasons given in text, we reject this argument. And in any event, Respondents would not be entitled to relief even under the reasoning of the *Landry* concurrence. Our review of ALJ's decisions—like that performed by the FDIC—is *de novo*; thus, given our "*de novo* review" and our "thorough rejection of [Respondents'] various claims of error" on the merits, Respondents "suffered no prejudice" from the manner of appointment of our ALJs. *Landry*, 204 F.3d at 1144 (Randolph, J., concurring).

116 *Landry*, 204 F.3d at 1133 (explaining that the special trial judges at issue in *Freytag* exercised "authority . . . not matched by the ALJs. . . .").

117 *See Landry*, 204 F.3d at 1133. Respondents argue that Commission ALJs exercise significant authority because the Commission accords "considerable weight" to those ALJ credibility findings that are based on witness demeanor. *Kenneth R. Ward*, Exchange Act Release No. 47535, 2003 WL 1447865, at *10 (Mar. 19, 2003), *aff'd*, 75 F. App'x 320 (5th Cir. 2003). We do not view the fact that we accord Commission ALJs deference in the context of demeanor-based credibility determinations to afford our ALJs with the type of authority that would qualify them as inferior officers. *First*, as we have repeatedly made clear, we do not accept such findings "blindly," and we will "disregard explicit determinations of credibility" when our *de novo* review of the record as a whole convinces us that a witness's testimony is credible (or not) or that the weight of the evidence warrants a different finding as to the ultimate facts at issue. *Ward*, 2003 WL 1447865, at *10; *accord Francis V. Lorenzo*, Exchange Act Release No. 74836, 2015 WL 1927763, at *10 n.32 (Apr. 29, 2015); *Ofirfan Mohammed Amanat*, Exchange Act Release No. 54708, 2006 WL 3199181, at *8 n.46 (Nov. 3, 2006); *see also Kay v. FCC*, 396 F.3d 1184, 1189 (D.C. Cir. 2005) ("The law is settled that an agency is not required to adopt the credibility determinations of an administrative law judge."). *Second*, our practice in this regard is no different from the FDIC's and so does not warrant a departure from *Landry*. *Compare [Redacted] Insured State Nonmember Bank*, FDIC-82-73a, 1984 WL 273918, at *5 (June 18, 1984) (stating, "as a general rule," that "the assessment of the credibility of witnesses" by the ALJ is given "deference" by the FDIC) *with Ramon M. Candelaria*, FDIC-95-62e, 1997 WL 211341, at *3-4 (Mar. 11, 1997) (noting that the FDIC's ALJ found respondent to be "entirely credible" but the Board rejected respondent's testimony "in light of the entire record").

Tax Court" in significant, fully-litigated proceedings involving declaratory judgments and amounts in controversy below $10,000.[118] As discussed above, our ALJs issue initial decisions that are not final unless the Commission takes some further action. *Third*, the Tax Court (and by extension the court's special tax judges) exercised "a portion of the judicial power of the United States," including the "authority to punish contempts by fine or imprisonment."[119] Commission ALJs, by contrast, do not possess such authority.[120]

Based on the foregoing, we conclude that the mix of duties and powers of our ALJs is similar in all material respects to the duties and role of the FDIC's ALJs in *Landry*.[121] Accordingly, we follow *Landry*, and we conclude that our ALJs are not "inferior officers" under the Appointments Clause.[122]

---

118 *Freytag*, 501 U.S. at 882.

119 *Id.* at 891.

120 *See* 17 C.F.R. § 201.180. The Commission's rules provide ALJs with authority to punish contemptuous conduct only in the following ways. If a person engages in contemptuous conduct before the ALJ during any proceeding, the ALJ may "exclude that person from such hearing or conference, or any portion thereof," or "summarily suspend that person from representing others in the proceeding in which such conduct occurred for the duration, or any portion of the proceeding." *Id.* 201.180(a). Finally, if a party fails to make a required filing or to cure a deficiency with a filing, then a Commission ALJ may enter a default, dismiss the case, decide the particular matter at issue against the person, or prohibit the introduction of evidence or exclude testimony concerning that matter." *Id.* 201.180(c). Any such decision would, of course, be subject to *de novo* Commission review. And while Commission ALJs may issue subpoenas to compel noncompliance, they are powerless to enforce their subpoenas. The Commission itself would need to seek an order from a federal district court to compel compliance. *See* 15 U.S.C. § 78u(c). In this respect, too, our ALJs are akin to the FDIC's ALJs that *Landry* found to be mere employees. *See* 12 C.F.R. §§ 308.25(h), 308.26(c), 308.34(c) (providing that an aggrieved party must apply to a federal district court for enforcement of a subpoena issued by a FDIC ALJ).

121 Beyond *Landry*, we believe that our ALJs are properly deemed employees (rather than inferior officers) because this is how Congress has chosen to classify them, and that decision is entitled to considerable deference. *See Burnap v. United States*, 252 U.S. 512, 516 (1920). For example, Congress created and placed ALJ positions within the competitive service system, just like most other federal employees. *See infra* footnote 93. Like most other employees, an ALJ who believes that his employing agency has engaged in a prohibited personnel practice can seek redress either through the Office of Special Counsel or the Merit Systems Protection Board. *See* 5 U.S.C. §§ 1204, 1212, 1214, 1215, 1221. And ALJs—like other employees—are subject to reductions-in-force. *See id.* § 7521(b).

122 We do not find any relevance in the fact that the federal securities laws and our regulations at times refer to ALJs as "officers" or "hearing officers." There is no indication that Congress intended "officers" or "hearing officers" to be synonymous with "Officers of the United States," U.S. Const. art. II, § 2, cl. 2, and the word "officer" in our regulations has no such meaning. We also note in this regard that the Administrative Procedure Act "consistently

IV. Sanctions

The Division requests that we affirm the sanctions imposed below, including that (i) Lucia be barred from associating with an investment adviser, broker, or dealer; (ii) Respondents' investment adviser registrations be revoked; (iii) Respondents be ordered to cease and desist from further violations of the Advisers Act; and (iv) RJLC pay civil penalties of $250,000 and Lucia pay civil penalties of $50,000. We do so for the following reasons.

A. Bar from associating with an investment adviser, broker, or dealer

We may suspend or bar Lucia from associating with an investment adviser, broker, or dealer under Advisers Act Section 203(f) if we find that (i) he was associated with an investment adviser during the relevant period, (ii) he willfully violated, or willfully aided and abetted the violation of, the Advisers Act or its rules, and (iii) the sanction is in the public interest.[123] In addition, if we find that the latter two elements have been established, we may also suspend or bar Lucia from associating with a broker or dealer under Section 15(b)(6) of the Securities Exchange Act of 1934.[124]

There is no question that Lucia was associated with an investment adviser, and, as discussed above, we find that he willfully aided and abetted and caused RJLC's violations of Advisers Act Sections 206(1), (2), and (4) and Rule 206(4)-1(a)(5). Thus, we must determine whether a bar is in the public interest.

In assessing whether an associational bar would be in the public interest, we consider: the egregiousness of the respondent's actions, the isolated or recurrent nature of the infraction, the degree of scienter involved, the respondent's recognition of the wrongful nature of his or her conduct, the sincerity of the respondent's assurances against future violations, and the likelihood that the respondent's occupation will present opportunities for future violations.[125] The remedy is intended to "protect[] the trading public from further harm," not to punish the respondent.[126] Our inquiry is flexible, and no one factor is dispositive.[127]

---

uses the term 'officer' or the term 'officer, employee, or agent'" to "refer to [agency] staff members." Kenneth Culp Davis, *Separation of Functions in Administrative Agencies,* 61 HARV. L. REV. 612, 615 & n.11 (1948); *see also* 1 U.S.C. § 1 ("'officer' includes any person authorized by law to perform the duties of the office"). *Cf.* 5 U.S.C. §§ 556, 557 (referring to official who presides over evidentiary hearing as the "presiding employee").

124 15 U.S.C. § 78o(b)(6)(A)(i).

125 *See Steadman v. SEC*, 603 F.2d 1126, 1140 (5th Cir. 1979), *aff'd on other grounds*, 450 U.S. 91 (1981).

126 *McCarthy v. SEC*, 406 F.3d 179, 188 (2d Cir. 2005).

127 *Kornman*, 2009 WL 367635, at *11.

Lucia's misconduct was egregious. As an investment adviser, Lucia owed fiduciary duties to his prospective clients.[128] Lucia violated those duties, and betrayed the trust and confidence of his prospective clients, by making the material misrepresentations and omissions discussed above. We have repeatedly stated that "conduct that violates the antifraud provisions of the securities laws is especially serious and subject to the severest of sanctions under the securities laws."[129]

Lucia's misconduct was recurrent: he made the material misrepresentations and omissions in the slideshow at dozens of seminars every year during the relevant period. Lucia also acted with a high degree of scienter as he knowingly or recklessly misled prospective clients for the purpose of increasing RJLC's client base and the fees generated therefrom. Thus, Lucia repeatedly and intentionally placed his and RJLC's own interests over those of his prospective clients.

Lucia has not recognized the wrongful nature of his misconduct, and his failure to do so casts doubt on his assurances against future violations. In addition, because Lucia disregarded his fiduciary duties in the past in the manner shown here there is reason to believe that he will disregard them in the future.

Lucia's various arguments do not undermine the need for a bar or argue for a lesser remedy. Lucia contends that the credibility of his assurances and his recognition of wrongdoing are demonstrated by his decision to immediately stop using the backtest slides and withdraw his books from circulation after receiving the deficiency letter from OCIE on December 17, 2010, that outlined the deficiencies forming the basis of this proceeding.[130] These actions do weigh in Lucia's favor but they do not outweigh the concerns raised by his intentional and recurrent fraud.[131]

Lucia asserts that his occupation will not present opportunities for future violations because he has left the securities industry.[132] Lucia states that he wound down RJLC's

---

128 *Capital Gains*, 375 U.S. at 194.

129 *Marshall E. Melton*, Advisers Act Release No. 2151, 2003 WL 21729839, at *9 (July 25, 2003); *Justin F. Ficken*, Advisers Act Release No. 2803, 2008 WL 4610345, at *3 (Oct. 17, 2008).

130 Lucia argues that his actions are comparable to those at issue in *Steadman*, in which the court vacated an injunction against an investment adviser in part because the alleged violations "were corrected immediately after the SEC notified the appellants that charges were pending." 967 F.2d at 648. But unlike our findings here, the *Steadman* court found that the defendants did not act with scienter and therefore did not violate federal securities antifraud provisions.

131 *Cf. Kornman*, 2009 WL 367635, at *11 (stating that assurances against future misconduct "are not an absolute guarantee against misconduct in the future"; the Commission weighs them against the other *Steadman* factors in assessing the public interest.).

132 Lucia claims that he "simply desires to continue serving as an in-demand public speaker, consultant, and media personality on retirement planning and other topics," and invites us to make clear that, if we impose a bar, such activity would not violate the bar. Lucia contends that

operations, sold its assets, and withdrew its investment adviser registration. Lucia also states that he is no longer associated with an investment adviser or broker-dealer, no longer holds a license as a registered representative, withdrew his own personal investment adviser registration, and has no intention of ever again being an investment adviser or registered representative of a broker-dealer. He also does not challenge the permanent revocation of his and RJLC's investment adviser registrations. Lucia contends that he has therefore demonstrated that his assurances against future violations are credible and that his occupation will not present opportunities for future violations.

But taking these steps does not ensure that Lucia will not seek to become associated again with an investment adviser, broker, or dealer. And like Lucia's decision to stop using the backtest slides, these steps do not make his assurances sufficient considering that he intentionally and repeatedly misled prospective clients to whom he owed fiduciary duties.[133] Thus, there is a reasonable likelihood that, without a bar, Lucia will again threaten the public interest by reassociating with an investment adviser, broker, or dealer.

Lucia asserts that several mitigating factors justify a lesser remedy. He contends that a bar would deter businesses from working with him in his career as a public media personality and therefore "propel[] him towards personal bankruptcy." But "[f]inancial loss to a wrongdoer as a result of his wrongdoing does not mitigate the gravity of his conduct."[134]

Lucia contends that he is a "40-year industry veteran with no disciplinary record." But his lack of previous securities law violations does not outweigh the concern that, for the reasons discussed above, Lucia will pose a continuing danger to investors if a bar is not imposed. Lucia's repeated misconduct for a prolonged period demonstrates that he has a propensity for conduct that would subject the investing public to future harm.

---

such work is protected by the publisher exclusion to the definition of "investment adviser" in Advisers Act Section 202(a)(11), 15 U.S.C. § 80b-2(a)(11)(D), and is thus outside the scope of an associational bar. But because of "the inherent difficulty of enumerating every position that [Lucia] could take that would be prohibited by, or consistent with," a bar order, granting Lucia's request would undermine the remedial purpose of imposing a bar. *See James M. Schneider, CPA*, Exchange Act Release No. 69922, 2013 WL 3327751, at *5-6 (July 2, 2013) (order denying request that the Commission clarify that its Rule 102(e) suspension order did not preclude movant from accepting non-accounting positions). In any event, we note that the publisher exclusion concerns only who is considered an investment adviser, and not whether a person is *associated with* an investment adviser. The definition for "person associated with an investment adviser" is set forth in Adviser Act Section 202(a)(17), 15 U.S.C. § 80b-2(a)(17).

[133] Also, according to FINRA's BrokerCheck, Lucia did not end his association with investment adviser RJL Wealth Management, LLC, the successor firm to RJLC, until the initial decision was first issued in July 2013, thus casting further doubt on his intention to not reenter the industry. We may take official notice of this information on BrokerCheck, available at www.finra.org/Investors/ToolsCalculators/BrokerCheck. *See* 17 C.F.R. § 201.323 (rule of practice relating to official notice).

[134] *Kornman*, 2009 WL 367635, at *9 (internal quotation and citation omitted).

Lucia contends that there are no allegations of misappropriation, investor losses, or complaints by any seminar attendees about the presentation. But the absence of injury to RJLC's clients or prospective clients is not mitigating because our public interest analysis "focus[es] . . . on the welfare of investors generally and the threat one poses to investors and the markets in the future."[135]

Lucia argues that the initial decisions in *Corbin Jones*[136] and *Joseph C. Lavin*[137] demonstrate that investor losses are an important consideration. But these cases are inapposite because they involved findings that the respondents' violations were egregious, in part, because they caused investor losses.[138] While the absence of investor injury is not mitigating, its existence may be considered in determining the egregiousness of the respondent's actions.[139] Here, even without investor injury as an aggravating factor, Lucia's misconduct was egregious and a bar is in the public interest.

As an alternative to a bar, Lucia contends that it would be more appropriate to impose a censure and require undertakings such as "retain[ing] a monitor to ensure that any public presentations he makes do not utilize 'backtests' or hypothetical illustrations of relative strategy performance." Lucia contends that such remedies would be more in line with the lesser remedies imposed in seven settled Commission proceedings.[140] But we have repeatedly found that the remedies imposed in settled actions are inappropriate comparisons because pragmatic

139 *See, e.g., Dawson*, 2010 WL 2886183, at *3 ("[O]ur finding that Dawson's conduct was egregious is based on the nature of the violation itself, not solely on any calculation of financial harm to his clients.").

140 Lucia cites *New England Inv. and Retirement Group, Inc.*, Advisers Act Release No. 3516, 2012 WL 6591597 (Dec. 18, 2012); *Modern Portfolio Mgmt., Inc.*, Advisers Act Release No. 3702, 2013 WL 5740461 (Oct. 23, 2013); *Equitas Capital Advisors, LLC*, Advisers Act Release No. 3704, 2013 WL 5740460 (Oct. 23, 2013); *Independent Fin. Group*, Advisers Act Release No. 1891, 2000 WL 1121531 (Aug. 8, 2000); *William J. Ferry*, Advisers Act Release No. 1747, 1998 WL 487681 (Aug. 19, 1998); *Meridian Inv. Mgmt. Corp.*, Advisers Act Release No. 1779, 1998 WL 898489 (Dec. 28, 1998); *LBS Capital Mgmt., Inc.*, Advisers Act Release No. 1644, 1997 WL 401055 (July 18, 1997).

considerations "such as the avoidance of time-and-manpower-consuming adversary proceedings," justify accepting lesser remedies in settlement.[141] In addition, the appropriate remedy depends on the facts and circumstances presented and cannot be determined precisely by comparison with actions taken in other cases.[142] Here, the alternative remedy that Lucia proposes do not provide sufficient protection for investors given the nature of his misconduct and the opportunity that continued association with an investment adviser, broker, or dealer would present for future violations.

Accordingly, we find that it is in the public interest to bar Lucia from associating with any investment adviser, broker, or dealer. A bar will prevent Lucia from putting investors at further risk and serve as a deterrent to others from engaging in similar misconduct.

B. Revocation of Respondents' investment adviser registrations

Under Advisers Act Section 203(e), we may suspend or revoke an investment adviser's registration if we find that (i) the investment adviser, or any person associated with it, willfully violated, or willfully aided and abetted the violation of, any provision of the Advisers Act and (ii) the sanction is in the public interest.[143] We consider the same public interest factors discussed above for determining whether to revoke an investment adviser's registration.[144]

Lucia states in his brief that "he makes no challenge to . . . ordering the registrations of [Respondents] as investment advisers permanently revoked." The evidence amply supports such revocation, for the reasons discussed above, as being necessary to protect the public interest.[145]

C. Cease-and-desist orders

Advisers Act Section 203(k) authorizes us to issue cease-and-desist orders for violations of the Advisers Act.[146] Such orders must be in the public interest, which we determine by

---

141 *Michael C. Pattison, CPA*, Exchange Act Release No. 67900, 2012 WL 4320146, at *11-12 (Sept. 20, 2012) (quoting *Nassar and Co., Inc.*, 47 SEC 20, 26 & n.37 (1978)); *Ficken*, 2008 WL 4610345, at *4. We also note that settlements are not precedent. *Citizens Capital Corp.*, Exchange Act Release No. 67313, 2012 WL 2499350, at *5 n.27 (June 29, 2012). The remedies imposed on Respondents are amply justified by our findings of violations, as discussed.

142 *Ficken*, 2008 WL 4610345, at *4; *see also Butz v. Glover Livestock Comm'n Co., Inc.*, 411 U.S. 182, 187 (1973) (holding that a sanction imposed within the authority of an administrative agency is "not rendered invalid in a particular case because it is more severe than sanctions imposed in other cases"); *Geiger v. SEC*, 363 F.3d 481, 488 (D.C. Cir. 2004) (holding that, because the "Commission is not obligated to make its sanctions uniform," the court would not compare the sanctions imposed in the case to those imposed in previous cases).

143 15 U.S.C. § 80b-3(e).

144 *See Sherwin Brown*, Advisers Act Release No. 3217, 2011 WL 2433279, at *6 (June 17, 2011).

145 Again, Lucia's conduct and level of intent are imputed to RJLC.

looking to whether there is some risk of future violation.[147] The risk "need not be very great" and is ordinarily established by a single past violation absent evidence to the contrary.[148] We also consider whether other factors demonstrate a risk of future violations, including the factors discussed above concerning Lucia's bar as well as whether the violation is recent, the degree of harm to investors or the marketplace resulting from the violation, and the remedial function to be served by the cease-and-desist order in the context of any other sanctions being sought.[149] This inquiry is flexible, and no single factor is dispositive.[150]

Here, Respondents' violations, the egregiousness of their misconduct, and the other public interest factors discussed above establish a risk of future violations. Accordingly, we find that it is in the public interest to order Respondents to cease and desist from committing or causing any violations or future violations of Advisers Act Sections 206(1), 206(2), and 206(4) and Rule 206(4)-1.

D. Civil penalties

We may impose civil penalties under Advisers Act Section 203(i) if we find that Respondents willfully violated the Advisers Act and such penalties are in the public interest.[151] Both factors are satisfied here. Respondents repeatedly made fraudulent misstatements and omissions in willful violation of the Advisers Act and their fiduciary duties. Their conduct was egregious and thus warrants the imposition of penalties as a deterrent to Respondents and others against committing similar violations. Such considerations are not outweighed by Respondents' clean disciplinary history or the lack of evidence concerning investor loss or unjust enrichment.

Also, because Respondents' violations involved fraud and were in reckless disregard of a regulatory requirement, we find that second-tier penalties are warranted.[152] Therefore, because

---

146 15 U.S.C. § 80b-3(k).

147 *Robert L. Burns*, Advisers Act Release No. 3260, 2011 WL 3407859, at *8 n.34 (Aug. 5, 2011).

148 *KPMG Peat Marwick LLP*, Exchange Act Release No. 43862, 2001 WL 47245, at *24 (Jan. 19, 2001), *pet. denied*, 289 F.3d 109 (D.C. Cir. 2002).

149 *Id.* at *26.

150 *Id.*

151 15 U.S.C. § 80b-3(i). In determining whether penalties are in the public interest, we consider: (i) whether the act or omission involved fraud; (ii) whether the act or omission resulted in harm to others; (iii) the extent to which any person was unjustly enriched; (iv) whether the individual has committed previous violations; (v) the need to deter such person and others from committing violations; and (vi) such other matters as justice may require. *Id.*

152 Section 203(i) establishes a three-tier system for calculating penalties: (i) first-tier penalties are permissible for securities law violations; (ii) second-tier penalties are permissible for securities law violations involving "fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement"; and (iii) third-tier penalties are permissible for violations that satisfy the second-tier penalty requirements and "directly or indirectly resulted in substantial

the amounts imposed by the ALJ ($250,000 upon RJLC and $50,000 upon Lucia) are within the permissible second-tier range,[153] and are in the public interest, we grant the Division's request and impose those same amounts upon Respondents.[154]

Respondents contend that penalties are unwarranted against RJLC because it has no assets or operations, is no longer registered as an investment adviser, and is a dormant corporate shell. Respondents also contend that imposing an uncollectable penalty against RJLC will prejudice Lucia without any benefit to the public interest. These contentions are meritless. If RJLC lacked the ability to pay penalties, it was required under Commission Rule 630(a) to present evidence thereof.[155] It has failed to do so.[156] Respondents also have not explained how Lucia would be prejudiced if we order RJLC to pay penalties.

Accordingly, we find that it is in the public interest to impose second-tier penalties of $250,000 upon RJLC and $50,000 upon Lucia.

---

losses or created significant risk of substantial losses to other persons or resulted in substantial pecuniary gain to the person who committed the act or omission." *Id.*; 17 C.F.R. § 201.1004.

153 The maximum second-tier penalty the Commission could impose for a single act of misconduct is $375,000 for RJLC and $75,000 for Lucia. 17 C.F.R. § 201.1004 & Pt. 201, Subpt. E, Tbl. IV.

154 Although the amounts imposed by the ALJ are within the second-tier range, he categorized them as third-tier penalties. We find that this categorization was unwarranted because the Division did not establish: (i) that Respondents' clients or prospective clients suffered any losses or were at significant risk of suffering substantial losses or (ii) whether Respondents' gain from the fraud was substantial. For the latter consideration, while the Division introduced evidence showing that Respondents' business was profitable, it did not demonstrate the extent to which Respondents' misconduct was responsible for that profit. In any event, we find that the amounts imposed are warranted as second-tier penalties for the reasons discussed above.

155 17 C.F.R. § 201.630(a).

156 Respondents also have waived their right to assert the defense of inability to pay because they did not raise the issue before the ALJ. *David Henry Disraeli*, Advisers Act Release No. 2686, 2007 WL 4481515, at *19 (Dec. 21, 2007), *aff'd*, 334 F. App'x 334 (D.C. Cir. 2009).

An appropriate order will issue.[157]

By the Commission (Chair WHITE and Commissioners AGUILAR and STEIN); Commissioners GALLAGHER and PIWOWAR, dissenting. A dissenting opinion will issue separately.

REGISTERED SECURITIES ASSOCIATION -- REVIEW OF DISCIPLINARY PROCEEDINGS

Conversion of firm funds

Associated person of member firm of registered securities association falsified an expense report and converted firm funds. *Held*, association's findings of violation and imposition of sanctions are sustained.

APPEARANCES:

Bruce M. Bettigole, Esq., of Sutherland Asbill & Brennan LLP, for Denise M. Olson.

Alan Lawhead, Esq., *Andrew Love, Esq.*, and *Gary Dernelle, Esq.*, for FINRA.

Appeal filed: June 9, 2014
Last brief received: September 9, 2014

Denise M. Olson, formerly a general securities representative and general securities sales supervisor associated with Wells Fargo Advisors, LLC ("Wells Fargo" or the "Firm"), a FINRA member, seeks review of FINRA disciplinary action based on findings that she violated FINRA Rule 2010. Rule 2010 requires that FINRA members and their associated persons "observe high standards of commercial honor and just and equitable principles of trade."[1] Olson admits that she violated the Rule by falsifying an expense report and converting Firm funds. But she challenges the bar imposed and seeks "a reduced sanction."[2] We sustain FINRA's findings of violation and the sanctions imposed based on our independent review of the record.

I. Background

Olson was associated with Wells Fargo from September 2004 to June 2010, serving as the branch manager of its Bloomington, Minnesota office. In that position, Olson was issued a corporate credit card through Wells Fargo. Under the Firm's expense allowance policy, Olson was permitted to use the corporate credit card for both business and personal expenses, but was wholly responsible for any personal expenses charged to the card.

It is undisputed that, on April 2, 2010, Olson used her corporate credit card to purchase two Apple iPods as gifts for her niece and nephew. The total charge for the iPods was $740.10. Although the charge was unquestionably personal, Olson accounted for it in Wells Fargo's expense management system as a business expense. She falsely claimed that it was incurred to purchase office equipment, entering the description "branch equip for new cof room" in the space provided to justify the outlay as a business expense. Consequently, the Firm paid the $740.10 charge.

As Olson later testified, her falsification of the expense report was "intentional," and done because she had a "fleeting thought" while completing the expense report that she had purchased two refrigerators a few months earlier for the Firm but had never sought reimbursement.[3] Olson felt that, if Wells Fargo paid for the iPods, it would compensate for the refrigerators.

Shortly thereafter, in May 2010, Wells Fargo's corporate security division began an investigation into Olson's use of the credit card when it noticed "discrepancies" in Olson's expense report. As a result, on June 2, 2010, a Firm auditor met with Olson to review the descriptions Olson had entered for each of her charges during an eight-month period (including the iPod purchase). Olson testified that when the auditor reached the $740.10 charge for the iPods, Olson read the description she had entered for it ("branch equip for new cof room"), and repeated that it was a business expense for branch office equipment that she had purchased for a

---

1 Although Rule 2010 applies to FINRA members, FINRA Rule 0140(a) provides that "[p]ersons associated with a member shall have the same duties and obligations as a member under the Rules."

2 Olson does not challenge FINRA's order that she pay costs totaling $3,378.56, which we also sustain.

3 Olson testified that she bought the refrigerators as a way "of giving back to the branch" and that she never sought reimbursement because she "didn't have any intention of being reimbursed for them."

conference room. But, according to Olson, when the auditor then asked her which conference room, Olson "looked at the dollar amount and . . . realized that [it] was actually [her] iPod purchase." Olson testified that she then volunteered that the charge was actually for a personal expense and, at the auditor's request, wrote and signed a statement to that effect.[4] Wells Fargo then immediately terminated Olson. Olson also reimbursed the Firm, at the Firm's request, for the $740.10 charge.

The Firm reported Olson's termination to FINRA, which instituted its own investigation. On October 7, 2011, FINRA's Department of Enforcement filed a complaint alleging that Olson violated Rule 2010 by filing a false expense report and converting firm funds. Because Olson conceded that she violated Rule 2010 and largely admitted the facts alleged in the complaint, the subsequent disciplinary hearing was limited to the issue of sanctions.

On January 4, 2013, a FINRA hearing panel issued a decision finding that Olson had engaged in the alleged violation and barring Olson from further association with any FINRA member firm. Olson appealed and FINRA's Board of Governors affirmed the hearing panel decision.[5] This appeal followed.

II. Olson violated FINRA Rule 2010.

We base our findings on an independent review of the record and apply the preponderance of the evidence standard for self-regulatory organization disciplinary actions.[6] Pursuant to Section 19(e)(1) of the Securities Exchange Act of 1934, in reviewing an SRO disciplinary action, we determine whether the aggrieved person engaged in the conduct found by the SRO, whether such conduct violates the SRO's rules, and whether such SRO rules are, and were applied in a manner, consistent with the purposes of the Exchange Act.[7]

As noted, Rule 2010 requires that FINRA members and associated persons "observe high standards of commercial honor and just and equitable principles of trade."[8] Falsification of

---

4 Olson also wrote in her statement that she had paid for items "for the branch and not charged the office for them," including "two [n]ew [r]efrigerators at a [c]ost of [a]pproximately $2,000," and that she "felt that in the end it would have possibly balanced itself out."

5 Olson's appeal of the hearing panel decision was to FINRA's National Adjudicatory Council, but the Board exercised its discretion to call the proceeding for review under FINRA Rule 9351(a).

6 *See Gregory Evan Goldstein*, Exchange Act Release No. 71970, 2014 WL 1494527, at *3 (Apr. 17, 2014).

7 15 U.S.C. § 78s(e)(1). Olson does not argue, and the record does not support a finding, that Rule 2010 is, or FINRA's application of it was, inconsistent with the purposes of the Exchange Act.

8 Rule 2010 encompasses "business-related conduct that is inconsistent with just and equitable principles of trade, even if that activity does not involve a security," and misconduct that "reflects on the associated person's ability to comply with the regulatory requirements of the securities business and to fulfill his fiduciary duties in handling other people's money." *Daniel*

expense reports and conversion are inconsistent with those requirements.[9] Here, Olson admitted that she falsified an expense report and converted $740.10 from Wells Fargo in violation of Rule 2010, and her admission is supported by the record evidence. The record includes, among other things, Olson's testimony admitting that she intentionally caused Wells Fargo to pay for her purchase of iPods by falsifying an expense report, Olson's handwritten statement admitting the same to Wells Fargo, and a copy of the falsified expense report. Accordingly, we find that Olson engaged in the conduct found by FINRA, and that such conduct violates Rule 2010.

III. The bar imposed is neither excessive nor oppressive.

A. Standard of review

Olson does not dispute the relevant facts or, as mentioned, that she violated Rule 2010. Rather, she asserts that the sanction is too harsh for what she describes as a "single fleeting mistake." Pursuant to Exchange Act Section 19(e)(2), we will sustain a FINRA sanction unless we find it is "excessive or oppressive" or imposes an unnecessary or inappropriate burden on competition.[10] As part of this review, we consider any aggravating or mitigating factors[11] and whether the sanctions imposed by FINRA are remedial in nature and not punitive.[12]

B. A bar is a standard sanction for conversion under FINRA's Sanction Guidelines.

FINRA's Sanction Guidelines state that "a bar is standard" for conversion "regardless of [the] amount converted."[13] This approach reflects the judgment that, absent mitigating factors,[14]

D. Manoff, Exchange Act Release No. 46708, 2002 WL 31769236, at *4 (Oct. 23, 2002) (internal quotation omitted).

9 *E.g., John M.E. Saad*, Exchange Act Release No. 62178, 2010 WL 2111287, at *4-5 (May 26, 2010), *rev'd on other grounds*, 718 F.3d 904 (D.C. Cir. 2013), *see also* Guidelines, at 36 (considering falsification of records and conversion to be Rule 2010 violations).

10 15 U.S.C. § 78s(e)(2). Olson does not claim, and the record does not show, that FINRA's action imposed an unnecessary or inappropriate burden on competition.

11 *Saad v. SEC*, 718 F.3d 904, 906 (D.C. Cir. 2013); *PAZ Sec., Inc. v. SEC*, 494 F.3d 1059, 1064-65 (D.C. Cir. 2007).

12 *Paz Sec., Inc.*, 494 F.3d at 1065; *see also* Guidelines, at 2 ("Disciplinary sanctions are remedial in nature and should be designed to deter future misconduct and to improve overall business standards in the securities industry.").

13 Although we are not bound by FINRA's Sanction Guidelines, we use them as a benchmark in conducting our review under Exchange Act Section 19(e)(2).[13] *John Joseph Plunkett,* Exchange Act Release No. 69766, 2013 WL 2898033, at *11 (June 14, 2013). In considering the Guidelines, we note that they "do not prescribe fixed sanctions for particular violations" and "are not intended to be absolute."

We further note that the Board applied the Guidelines issued in 2013, while the hearing panel applied the Guidelines issued in 2011. But that discrepancy presents no issue here because conversion "poses so substantial a risk to investors and/or the markets as to render the violator unfit for employment in the securities industry."[15] Indeed, conversion is antithetical to the basic requirement that customers and firms must be able to trust securities professionals with their money.[16]

C. Aggravating factors

The Board identified four aggravating factors that further supported its determination to impose a bar: (i) Olson's misconduct was intentional; (ii) Olson attempted to conceal her misconduct and deceive the Firm; (iii) Olson's misconduct resulted in injury to the Firm; and (iv) Olson's misconduct resulted in her monetary gain.

First, Olson admits that her misconduct was intentional and that this factor is considered aggravating under Principal Consideration 13 of the Guidelines.[17] But Olson contends that her misconduct nevertheless was done in a "foolish, fleeting moment" and was "of far less consequence than circumstances involving careful pre-meditation and elaborate planning." While it is true that Olson's misconduct did not require elaborate planning, this does not diminish Olson's high level of scienter. We also reject Olson's characterization of her misconduct and mental state as "fleeting," considering that Olson allowed her deception to continue for over a month until she was caught. If Olson's intentional misconduct was "fleeting," she would have recognized her wrongdoing and corrected it. Instead, as Olson testified, she had no concerns about what she had done between the time she submitted the false expense report and her meeting with the Firm auditor.

Second, Olson admits that she attempted to conceal her misconduct and deceive Wells Fargo. She contends, however, that this should not be considered aggravating under Principal

---

the sections applied from those versions are identical. For ease of reference, we cite to only the 2013 version of the Guidelines.

14 The Guidelines include a list of non-exhaustive aggravating and mitigating factors (*i.e.*, "Principal Considerations"), and state that, "as appropriate, Adjudicators should consider case-specific factors in addition to those listed." Guidelines, at 6-7.

15 *Charles C. Fawcett, IV*, Exchange Act Release No. 56770, 2007 WL 3306105, at *5 n.27 (Nov. 8, 2007).

16 *See John Edward Mullins*, Exchange Act Release No. 66373, 2012 WL 423413, at *18 (Feb. 10, 2012) (Conversion "is extremely serious and patently antithetical to the high standards of commercial honor and just and equitable principles of trade that underpin the self-regulation of the securities markets." (internal quotation omitted)); *Joseph H. O'Brien II*, Exchange Act Release No. 34105, 1994 WL 234279, at *3 (May 25, 1994) ("In converting [customer] funds, O'Brien abused the trust that is the cornerstone of the relationship between a securities professional and his customer.").

17 *See* Guidelines at 7 (listing as Principal Consideration 13, "Whether the respondent's misconduct was the result of an intentional act, recklessness or negligence"); *see also Mullins*, 2012 WL 423413, at *18 (finding that the seriousness of respondent's conversion was aggravated because he "acted with intent when he used the Foundation's property for himself").

Consideration 10 of the Guidelines[18] because deception is a component of conversion, not separate from it. Rather, Olson contends that the focus of Principal Consideration 10 is on attempts to mislead firm investigators and FINRA, and that "[f]ar from such evasion of responsibility, she cooperated with the investigations by Wells Fargo prior to detection. . . ." We reject these contentions.

Although deception is often present in conversion cases, it is not an element of conversion.[19] There is also no reason to believe that Principal Consideration 10 covers only concealment from firm investigators or FINRA because (i) it does not draw such a distinction; and (ii) a separate Principal Consideration—No. 12—covers attempts to conceal information from FINRA "in its examination and/or investigation of the underlying misconduct."[20] And we have previously found conversion to have been aggravated when respondents concealed it from their victims.[21] Accordingly, because Olson concealed her misconduct from the Firm for over a month, we find her deception to be a significant factor supporting a bar.[22]

Third, Olson admits that her misconduct resulted in harm to Wells Fargo and monetary gain to herself, and that these factors are considered aggravating under Principal Considerations 11 and 17.[23] But while Olson acknowledges that she was not entitled to convert Wells Fargo's money to receive reimbursement for her other purchases, she attempts to downplay the harm she caused by pointing out that she paid more for the two refrigerators and "many other purchases" for the Firm than the $740.10 that she converted from it. We do not dismiss the harm to Wells Fargo so easily.

---

18 *See* Guidelines at 6 (listing as Principal Consideration 10, "Whether the respondent attempted to conceal his or her misconduct or to lull into inactivity, mislead, [or] deceive . . . the member firm with which he or she is/was associated").

19 Guidelines, at 36 ("Conversion generally is an intentional and unauthorized taking of and/or exercise of ownership over property by one who neither owns the property nor is entitled to possess it."); *see also O'Brien*, 1994 WL 234279, at *1-3 (finding that respondent converted funds from a customer's securities account where respondent informed his customer that he was taking the funds, against the customer's wishes, to cover a disputed fee for bookkeeping services).

20 Guidelines, at 7.

21 *See Mission Sec. Corp.*, Exchange Act Release No. 63453, 2010 WL 5092727, at *13 (Dec. 7, 2010).

22 Olson also contends that her submission of a false expense report was the only act of concealment, and that "[t]here was no prolonged, elaborate subterfuge." Even assuming that this is true, that one act is sufficient to bring Principal Consideration 10 into play.

23 *See* Guidelines at 6 (listing as Principal Consideration 11, "[W]hether the respondent's misconduct resulted directly or indirectly in injury to [the member firm], and . . . the nature and extent of the injury"); *see id.* at 7 (listing as Principal Consideration 17, "Whether the respondent's misconduct resulted in the potential for the respondent's monetary or other gain").

At no time in this proceeding has Olson established that she was entitled to reimbursement for any purchases she made for the Firm. As to the refrigerators, it appears from Olson's testimony that she made a unilateral decision to purchase them without seeking prior authorization.[24] And because Olson decided not to submit an expense report for the purchase, it is unclear whether Wells Fargo would have reimbursed her. Olson also has not introduced evidence to establish specific "other purchases" she made for the Firm or their dollar amounts. We therefore find no basis for offsetting the $740.10 that she converted by the cost of the refrigerators or any other purchases she may have made. Moreover, even if Olson had established that Wells Fargo owed her money, we would not offset such amounts against the $740.10 that she converted because, as we have held, securities professionals are not entitled to self-help in this manner.[25] To do so would be to countenance conversion under such circumstances. Thus, we consider as aggravating that Wells Fargo was harmed by, and Olson was enriched by, the misconduct.

D. Mitigating factors

Olson points to several mitigating factors and we find that four of them weigh in her favor.[26] But considering the severity of Olson's intentional misconduct, and the deception involved in carrying it out, the mitigating factors here taken together do not outweigh the continuing danger that Olson poses to investors. We discuss each of Olson's contentions concerning mitigation in turn, beginning with the four in her favor.

First, Olson contends, and we agree, that the Board erred when it declined to consider as mitigating that Wells Fargo terminated her prior to regulatory detection. Principal Consideration 14 of the Guidelines specifically states that, in imposing sanctions, adjudicators must consider "[w]hether the member firm . . . disciplined the respondent for the same misconduct at issue prior to regulatory detection." Principal Consideration 14 appears to apply here because Olson's termination occurred as a result of her misconduct and because FINRA opened its investigation subsequent to the termination.

In its opinion, the Board acknowledged Principal Consideration 14 but stated that, as a general matter, it "give[s] no weight to the fact that a respondent was terminated by a firm when

---

24 Olson testified that she "made a decision to go buy new refrigerators" on the last day of office renovations because the refrigerator in storage "was filled with mold," and that she had no intention of being reimbursed. Olson's supervisor testified that when the Firm remodels an office, they "have a division at the corporation that takes care of getting chairs and appliances and TVs and everything else." The supervisor further testified that he was unaware that Olson had purchased the refrigerators.

25 *See O'Brien*, 1994 WL 234279, at *2 (finding that the president of a member firm did not have authority to remove funds from a customer's account simply because the customer owed him money).

26 Olson contends that FINRA "effectively ignored any and all mitigating factors because of excessive focus on the fact that the Guideline for 'conversion' states that a bar is 'standard' regardless of the amount converted."

determining the appropriate sanction in a disciplinary case."[27] But because that general policy contradicts FINRA's published Guidelines, we find Olson's termination by Wells Fargo to be mitigating.[28] We also find, however, that the mitigating effect from Olson's termination is no guarantee of changed behavior, and it is not enough to overcome our concern that Olson poses a continuing danger to investors and other securities industry participants (including would-be employers) for the reasons discussed above.[29]

Second, we agree with Olson that she should have received credit under Principal Considerations 8 and 9 because her single act of misconduct "was of short duration" and "did not involve a pattern of wrongdoing."[30] The Board found that, while the presence of the factors in Principal Considerations 8 and 9 might be aggravating, "their absence does not draw an inference of mitigation."[31] But the Board's finding conflicts with precedent in which we sustained a decision of the NASD, FINRA's predecessor, that credited as mitigating misconduct that was

---

27 *Denise M. Olson*, Complaint No. 2010023349601, 2014 WL 1878984, at *7 n. 19 (FINRA Bd. of Governors May 9, 2014). The Board stated that it also gave Olson no credit for her termination because "Wells Fargo terminated Olson for what it termed a 'violation of company policy,'" whereas the Board was "imposing sanctions for conversion." *Olson*, 2014 WL 1878984, at *7 n. 19. But that is a distinction without a difference because conversion was the "violation of company policy" for which Olson was terminated. Thus, Wells Fargo disciplined Olson "for the same misconduct at issue" here as contemplated by Principal Consideration 14.

28 *See Saad*, 718 F.3d at 913 (remanding in part because the Commission did not consider that "Saad's firm . . . disciplined him by terminating his employment in September of 2006, prior to regulatory detection").

29 Olson also notes certain collateral consequences of her termination. In particular, Olson states that she "is a single mother whose ex-husband provides no financial support," and that after her termination "she was unemployed for nine months, depleted her 401(k) account to pay monthly expenses for her daughter and herself, and ultimately moved in with her parents." Olson also states that when she was eventually hired as a recruiter at Ameriprise Financial, she earned substantially less—"$70,000 plus the possibility of small bonuses"—than her approximately $200,000 annual income at Wells Fargo. But we agree with the Board that such collateral consequences are not mitigating "because they are a result of [her] misconduct." *Olson*, 2014 WL 1878984, at *7 n.19 (quoting *Jason A. Craig*, Exchange Act Release No. 59137, 2008 WL 5328784, at *7 (Dec. 22, 2008)); *see also Kent M. Houston*, Exchange Act Release No. 71589A, 2014 WL 936398, at *8 (Feb. 20, 2014) (finding that collateral consequences from respondent's misconduct were not mitigating factors).

30 Guidelines, at 6 (listing as Principal Considerations 8, "Whether the respondent engaged in numerous acts and/or a pattern of misconduct"; and listing as Principal Consideration 9, "Whether the respondent engaged in the misconduct over an extended period of time"). In seeking mitigation under Principal Considerations 8 and 9, Olson also asserts that her misconduct "represented an aberrant lapse in judgment." We reject this characterization of Olson's misconduct considering that it was committed with scienter and deceit.

31 *Olson*, 2014 WL 1878984, at *7 n.18 (quoting Guidelines, at 6).

"neither numerous nor made over an extended period of time."[32] That being said, we give little weight to the mitigating effect of these factors because we agree with the Board that "[t]he Guideline for conversion, which states that a bar is standard 'regardless of [the] amount converted,' obviously indicates that a single instance of theft provides ample justification to bar an individual from the securities industry, no matter the sum involved."[33] We also find that the mitigating effect of these factors does not outweigh our concern discussed above that Olson poses a continuing danger to investors.

Third, we agree with Olson that the Board should have considered as mitigating that she has repeatedly admitted her misconduct and expressed remorse from the time she was questioned by the Firm auditor through the present, and that she promises not to repeat her misconduct.[34] While the Guidelines do not address these factors,[35] we consistently have sustained FINRA's decision to consider them mitigating.[36] Nonetheless, given the circumstances of Olson's deceit for her own profit, we find that Olson's admissions, expressions of remorse, and assurances do not outweigh our concern that she presents a continuing threat to investors.

---

32 *Michael Frederick Siegel*, Exchange Act Release No. 58737, 2008 WL 4528192, at *12 (Oct. 6, 2008), *pet. granted in part on other grounds*, 592 F.3d 147, 157 (D.C. Cir. 2010) ("Siegel does point to a number of factors that the Commission concluded had some mitigating impact: that his acts of misconduct were neither numerous nor made over an extended period of time. . . ."). If FINRA has decided to change its approach to applying Principal Considerations 8 and 9, it will need to revise its Guidelines.

33 *Olson*, 2014 WL 1878984, at *7 n.18.

34 Olson contends that her genuine remorse is uncontested, that she "was in tears for most of the hearing," and that a dissenting hearing panelist "noted [that] Ms. Olson was 'extremely credible,' 'truly remorseful,' and 'genuinely ashamed of her behavior.'" The panel's majority, however, concluded that Olson's repayment of Wells Fargo for the iPods "was a result of being caught, not of being honest or remorseful." *Dep't of Enforcement v. Olson*, No. 2010023349601, 2013 WL 2146648 (FINRA Hearing Panel Jan. 4, 2013). In any event, as discussed above, we give Olson credit for expressing remorse.

35 We consider these factors to be separate from Principal Consideration 2 concerning acceptance of responsibility. The latter concerns situations where a firm or regulator has not detected a person's misconduct, but the person nonetheless turns herself in. It generally demonstrates a much deeper understanding by the person of the wrongfulness of her conduct and ownership over it.

36 *E.g., Dante J. DiFrancesco*, Exchange Act Release No. 66113, 2012 WL 32128, at *9 (Jan. 6, 2012) (sustaining FINRA's sanctions assessment, including that "it provide[d] some measure of mitigation that DiFrancesco ha[d] been forthcoming in admitting throughout these proceedings that he" committed the alleged misconduct); *Alvin W. Gebhart, Jr.*, Exchange Act Release No. 58951, 2008 WL 4936788, at *12 (Nov. 14, 2008) ("NASD also gave only little mitigative value to the Gebharts' professed remorse, which NASD found to be 'dampened' by the Gebharts' attempts to shift blame to others involved . . . . We conclude that NASD appropriately weighed the aggravating and mitigating factors relevant to imposing sanctions for fraud under its Sanction Guidelines."), *pet. denied*, 595 F.3d 1034 (9th Cir. 2010).

Olson's remaining contentions concerning mitigation lack merit. Olson contends that she has accepted responsibility for and acknowledged her misconduct as contemplated by Principal Consideration 2, which considers acceptance of responsibility to be mitigating if made to the individual's firm or a regulator "prior to detection and intervention by the firm . . . or a regulator."[37] Olson contends that her admission came before the Firm detected her misconduct because, when the Firm auditor questioned her about the iPod charge, the auditor did not "indicat[e] any awareness that the $740.10 charge was really a personal expense" or "confront[] her with any accusation." Thus, Olson contends that she volunteered her wrongdoing without being confronted. We reject this contention.

At no point did Olson, realizing that what she had done was wrong, turn herself in to Wells Fargo in an attempt to rectify the situation and accept responsibility. To the contrary, Olson testified that between the time she submitted the false expense report and the time she was questioned by the Firm auditor, she was neither concerned nor bothered by her wrongdoing.[38] The record is also clear that Wells Fargo detected Olson's misconduct and intervened before Olson's admission. Indeed, the Firm's corporate security division contacted Olson's supervisor, Frank Mirabella, in May 2010 because it had identified "discrepancies" in Olson's expense report, and requested that Mirabella set up a meeting with Olson so that the auditor could question her. Olson testified that, when she arrived at Mirabella's office for the meeting on June 2, 2010, she did not know the purpose for the meeting and was diverted from Mirabella's office "into a room where there was an auditor and another person waiting for" her.[39] Olson testified that, after she admitted her misconduct, the auditor "left the room" and "a few moments later [Mirabella] came back and read . . . a prepared statement that [Olson] was being terminated."[40] The statement, which the Firm's human resources department apparently prepared in advance of the meeting, stated that the Firm had "been conducting an investigation into [Olson's] use of the Corporate Card" and "uncovered . . . certain personal expenses that make it clear that [Olson had] submitted a personal charge on the Corporate Card as a business expense."

---

37 Guidelines, at 6. Again, we consider Principal Consideration 2 to be separate from Olson's admissions, expressions of remorse, and assurances against future violations after she was caught. Acceptance of responsibility goes beyond these factors.

38 Olson also testified: "[W]hile I'm being terminated I realized that [the Firm] took it much more serious[ly]. I mean, obviously, I was terminated for it, so, yes, I realized when I was terminated that I should never have marked it as a business expense, whether I had paid for refrigerators out of my own pocket or not."

39 Olson testified that she arrived at Mirabella's office assuming that Mirabella wanted to discuss an upcoming meeting that Olson was hosting for advisors.

40 Olson argues that Mirabella was given the statement only after Olson admitted her misconduct, thus demonstrating no detection or intervention by the Firm before Olson's admission. But the human resources department's very preparation of the statement in advance of the meeting is strong evidence that the Firm had detected the conversion and decided to terminate Olson for it.

Thus, we find that Olson's admission came too late to be mitigating under Principal Consideration 2 because the Firm had already detected the misconduct and intervened.[41] We also find that Principal Consideration 2 is unavailable to Olson to the extent she is arguing that, regardless of whether the Firm detected her misconduct, she should receive credit for confessing without being aware of the Firm's suspicions. Considering that Olson intentionally converted her Firm's money by filing a false expense report, it seems likely that she had her misconduct in mind, and the possibility that her Firm may be suspicious, when she was being questioned about that false expense report. There is also no reason to believe that Olson would have confessed her misconduct if she had not been questioned by the auditor.

Olson contends that we should consider as mitigating her voluntary repayment to Wells Fargo, even though Wells Fargo "should have viewed [her purchase of refrigerators] as a sufficient set off" against the iPod purchase. We reject this contention because voluntary repayment is only considered mitigating under the Guidelines when made "prior to detection and intervention."[42] Here, because Olson reimbursed Wells Fargo only after it detected her misconduct and intervened, and only because it requested that she do so, we find that such reimbursement does not mitigate her misconduct. Also, we have no reason to believe that Olson would have reimbursed Wells Fargo had it not detected her misconduct. To the contrary, Olson's assertion that Wells Fargo should not have sought reimbursement indicates that she only paid back the $740.10 because she got caught.[43]

Olson contends that we should consider as mitigating that she is not motivated by greed and therefore is not at risk of committing future violations. Olson contends this is demonstrated by her "generosity regarding the refrigerators, as well as the many other times that she paid out of her own pocket to benefit the firm."[44] We disagree. Even if Olson purchased the refrigerators

---

41 Olson also disputes the Board's finding that, when questioned by the auditor, Olson "initially clung to the falsehood that the expense in question was a business expense," and that "[i]nstead of accepting responsibility, she resisted it until her lie became undeniable." Olson contends that she admitted her misconduct without evasion. But we need not decide this factual issue because we find that Olson's admission of wrongdoing came too late to be mitigating under Principal Consideration 2.

42 Guidelines, at 6 (Principal Consideration No. 4); *see, e.g., Eliezer Gurfel*, Exchange Act Release No. 41229, 1999 WL 172666, at *4 (March 30, 1999) (sustaining bar for conversion and noting that the "NASD was unimpressed by Gurfel's repayment of funds to IMMG, since Gurfel gave back the money only after he was caught, and there was no evidence suggesting Gurfel otherwise would have repaid IMMG"), *pet. denied*, 205 F.3d 400 (D.C. Cir. 2000).

43 To the extent that Olson is arguing that she should receive credit for paying Wells Fargo substantially more than she owed it, as discussed above, Olson has not established that she was entitled to reimbursement for the refrigerators. And even if she had established that fact, we still would give her no mitigation credit by setting off those amounts. To do so would be akin to finding that Olson's conversion was to some degree justified.

44 Olson states that she also "paid out of her own pocket to buy decorative items and furniture for the office and meals for the staff" and "used her own money to pay bonuses to the staff."

because she wanted to be generous with her Firm, Olson clearly had a change of heart when she decided to submit a false expense report to recoup money that she thought the Firm owed her for the purchase. And as Olson's contention above makes clear, she still believes the Firm owes her money for the refrigerators. As a result, we give Olson no credit for her purported generosity.[45]

Olson contends that she should receive credit because she did not harm any investors. But we agree with the Board that "Olson's misconduct was no less serious because it did not involve customers."[46] Moreover, our assessment of the future threat Olson poses to customers does not turn on whether she converted funds from Wells Fargo or an investor.[47]

Finally, Olson contends that her lack of disciplinary history should be considered mitigating.[48] But the Guidelines reject this factor as mitigating[49] because an associated person should not be rewarded for acting in accordance with her duties as a securities professional.[50]

---

45 *Cf. Janet Gurley Katz*, Exchange Act Release No. 61449, 2010 WL 358737, at *26 (Feb. 1, 2010) ("Katz's assertion that she was a nice person who did a good job for her clients . . . do not warrant a lesser sanction, as her misconduct demonstrated a readiness to put her own interests ahead of her clients."), *aff'd*, 647 F.3d 1156 (D.C. Cir. 2011). In any event, to the extent that Olson is entitled to any credit for generosity she has shown her Firm, such credit does not outweigh our concern discussed above that she poses a risk of committing future violations.

46 *Olson*, 2014 WL 1878984, at *7 n.17 (citing *Richard Dale Grafman*, Exchange Act Release No. 21648, 1985 WL 548687, at *2 n.2 (Jan. 14, 1985) ("[W]e do not agree with Grafman that his misconduct was somehow less serious because it did not involve public customers. The fact that he defrauded a brokerage firm instead is hardly a factor in his favor.").

47 *Blair Alexander West*, Exchange Act Release No. 74030, 2015 WL 137266, at *13 (Jan. 9, 2015) ("The absence of . . . customer harm is not mitigating, as our public interest analysis focus[es] . . . on the welfare of investors generally."). Olson notes that, at the time of the hearing, she "was employed as a recruiter for Ameriprise Financial, where she had no client contact." To the extent Olson contends that this is mitigating, we find that Olson's current employment does not guarantee that she will not have client contact in the future.

48 Olson made two additional contentions during oral argument before the NAC that she did not repeat in her briefing to us, and that are accordingly waived: (1) FINRA could have devised a sanction less than a bar, such as requiring "close heightened supervision," to ensure that Olson does not "steal money from customers"; and (2) two of Olson's supervisors (one at Wachovia Securities, Inc. before the events at issue and one at Ameriprise after) testified that Olson "is not the kind of person that . . . was ever going to do anything wrong again." Moreover, as to the former contention, Exchange Act Section 19(e)(2) requires that we determine whether the bar imposed is "excessive or oppressive," not whether a lesser sanction could have been imposed. 15 U.S.C. § 78s(e)(2); *see also PAZ Sec., Inc. v. SEC*, 566 F.3d 1172, 1176 (D.C. Cir. 2009) ("[T]he petitioners err in arguing the Commission must, in order to justify expulsion as remedial, state why a lesser sanction would be insufficient."). And as to the latter contention, we have considered the testimony from Olson's character witnesses, but find that it is outweighed by Olson's actions here, which convince us that she poses a continuing danger to investors.

E. Comparisons to other cases do not support a lesser sanction.

Olson argues that the bar imposed is more severe than the sanctions FINRA imposed for misconduct in three other cases that, while charged by FINRA as "falsification of records" rather than conversion, "easily could have been labeled [by FINRA as] 'conversion.'"[51] Olson also points to two cases in which FINRA specifically charged conversion but where, in one case, the decision to impose a bar was remanded for further consideration, and in the other case, the bar was reduced to a suspension.[52] Olson argues that the conduct in all of these cases was "considerably more egregious" and involved "less compelling" mitigating factors than here, thus demonstrating that Olson's bar was excessive, oppressive, and punitive.

The appropriate sanction, however, "depends on the facts and circumstances of each particular case and cannot be precisely determined by comparison with action take in other proceedings."[53] Moreover, the cases that Olson cites are distinguishable. As to the three cases

---

49 Guidelines, at 6 ("[W]hile the existence of a disciplinary history is an aggravating factor when determining the appropriate sanction, its absence is not mitigating.") (citing *Rooms v. SEC*, 444 F.3d 1208, 1214-15 (10th Cir. 2006)); Guidelines at 2 ("An important objective of the disciplinary process is to deter and prevent future misconduct by imposing progressively escalating sanctions on recidivists beyond those outlined in these guidelines. . . .").

50 *E.g., Houston*, 2014 WL 936398, at *7; *PAZ Sec., Inc.*, Exchange Act Release No. 57656, 2008 WL 1697153, at *8 (Apr. 11, 2008), *pet. denied*, 566 F.3d 1172 (D.C. Cir. 2009). For the same reason, we give Olson no credit for being, as she claims, an "exemplary employee" for her post-termination employer, Ameriprise, with "no issues regarding her honesty or her expense reimbursements." *World Trade Fin. Corp.*, Exchange Act Release No. 66114, 2012 WL 32121, at *16 (Jan. 6, 2012) ("Applicants also assert that they 'have been operating World Trade without further problems . . . for the last 7 years.' We have repeatedly stated that a 'lack of disciplinary history is not a mitigating factor' because 'firms and their associated persons should not be rewarded for acting in accordance with their duties.'" (quoting *Rooms*, 444 F.3d at 1214)), *pet. denied*, 739 F.3d 1243 (9th Cir. 2014). Moreover, even if we gave Olson credit for her lack of disciplinary history before and after her conversion, such credit would not outweigh our concern that she poses a continuing danger to investors.

51 *Department of Enforcement v. McCartney*, Complaint No. 2010023719601, 2012 WL 6969529 (FINRA NAC Dec. 10, 2012) (imposing six month suspension and $5,000 fine); *Department of Enforcement v. Leopold*, Complaint No. 2007011489301, 2012 WL 641038 (FINRA NAC Feb. 24, 2012) (imposing one year suspension and $25,000 fine); *Department of Enforcement v. Hunt*, Complaint No. 2009018068701, 2012 WL 6969528 (FINRA NAC Dec. 18, 2012) (imposing six month suspension and $10,000 fine).

52 *Saad*, 718 F.3d at 907; *Department of Enforcement v. Foran*, Complaint No. C8A990017, 2000 WL 1299577 (NASD NAC Sept. 1, 2000) (imposing two year suspension with requirement to requalify and $35,000 fine).

53 *Carl M. Birkelbach*, Exchange Act Release No. 69923, 2013 WL 3327752, at *28 (July 2, 2013) (quoting *PAZ Sec., Inc.*, 2008 WL 1697153, at *9), *pet. denied*, 751 F.3d 472 (7th Cir. 2014); *see also Butz v. Glover Livestock Comm'n Co.*, 411 U.S. 182, 187 (1973) ("The

that did not charge conversion—*McCartney*, *Leopold*, and *Hunt*—it is true that, like Olson, the respondents submitted false expense reports to their firms for a financial benefit to which they were not entitled. It is also true that in at least one of those cases, *McCartney*, the respondent could conceivably have been charged with conversion because, by submitting the false expense report, he obtained a $500 reimbursement from his firm for fabricated expenses from a seminar that did not occur.[54] But because FINRA only charged the respondents in these cases with "falsification of records," FINRA's National Adjudicatory Council ("NAC") was constrained to apply the more lenient Guidelines' recommendation for that charge.[55] To do otherwise might have raised fairness concerns under Exchange Act Section 15A(h)(1).[56] Here, Olson was charged with conversion and the Board therefore properly applied the Guidelines for conversion.[57]

---

employment of a sanction within the authority of an administrative agency is . . . not rendered invalid in a particular case because it is more severe than sanctions imposed in other cases.").

54 *McCartney*, 2012 WL 6969529, at *2-3. On the other hand, it appears that FINRA could not have charged the respondents in *Leopold* and *Hunt* with conversion. In *Leopold*, the parties "stipulated that Leopold did not convert [his firm's] funds or property." *Leopold*, 2012 WL 641038, at *1. This is likely because although the respondent submitted false expense reports to reduce his federal tax liability, the respondent did not receive a reimbursement from his firm. *Id.* at *3. In *Hunt*, the respondent submitted false expense reports to obtain unauthorized advance reimbursement from his firm "for real costs that he had incurred, but had not yet paid." *Hunt*, 2012 WL 6969528, at *2.

55 *See McCartney*, 2012 WL 6969529, at *4 n.9 ("The complaint did not allege conversion, and we therefore do not find that McCartney 'converted' firm funds and have not imposed sanctions based on such a finding."); *Leopold*, 2012 WL 641038, at *7 ("Enforcement . . . stipulated that it does not contend that Leopold converted [the firm's] funds or property. The absence of th[is] factor[] colors our evaluation and further supports a reduction of Leopold's sanctions" from a bar.); *Hunt*, 2012 WL 6969528, at *4 (applying Guidelines for "falsification of records"). For "falsification of records," the Guidelines recommend "suspending respondent in any or all capacities for up to two years" where mitigating factors exist, and a bar in "egregious cases." Guidelines, at 37. The Guidelines also recommend a fine ranging from $5,000 to $100,000 for "falsification of records." *Id.*

56 15 U.S.C. § 78*o*-3(h)(1) (ensuring fairness in FINRA disciplinary proceedings by requiring that FINRA "bring specific charges, notify such member or person of, and give him an opportunity to defend against, such charges, and keep a record"); *see also id.* § 78*o*-3(b)(8) (requiring FINRA to "provide a fair procedure for the disciplining of members and persons associated with members").

57 Olson notes another case, *James A. Goetz*, which also does not appear to involve a charge of conversion or an application of the Guidelines for conversion. *James A. Goetz*, Exchange Act Release No. 39796, 1998 WL 130849 (March 25, 1998) (finding that the respondent obtained a donation from his firm for his daughter's private school, for which he received a tuition offset, by misrepresenting to the firm's matching gifts program that he had contributed funds in the same amount). We also find *Goetz* distinguishable because we modified the NASD's bar upon finding

The two cases in which FINRA specifically charged conversion also are distinguishable. In *Saad v. SEC*, the D.C. Circuit remanded a decision in which we sustained a bar imposed by FINRA because the Court found that we did not "address all potentially mitigating factors."[58] But in remanding, the Court specifically took "no position on the proper outcome of th[e] case."[59] And in *Foran*, the NAC made a vague and conclusory decision to reduce the bar imposed by the hearing panel to a two-year suspension with a requirement to requalify "[b]ased on the unique facts and circumstances of th[e] case."[60] *Foran* therefore provides little guidance for our sanctions analysis.

In any event, if we were to look to other conversion cases for guidance on sanctions, we would find ample support for barring Olson. Indeed, we have consistently sustained FINRA's decision to impose a bar for conversion.[61]

---

that it was imposed for "Goetz's 'fraudulent actions'" even though Goetz "was not charged with fraud." *Id.* at *4.

58 *Saad*, 718 F.3d at 907.

59 *Id.*

60 *Foran*, 2000 WL 1299577, at *6. The respondent in *Foran* was found to have converted funds from his firm, of which he was a part owner, by misdirecting mutual fund trail commissions away from the firm's "house account" to his own commission account. *Id.* at 3.

61 *See, e.g., Mullins*, 2012 WL 423413, at *19-20; *Mission Sec. Corp.*, 2010 WL 5092727, at *13-14; *Gurfel*, 1999 WL 172666, at *4; *Ernest A. Cipriani, Jr.*, Exchange Act Release No. 33675, 1994 WL 62106, at *3 (Feb. 24, 1994); *O'Brien*, 1994 WL 234279, at *3; *Joel Eugene Shaw*, Exchange Act Release No. 34509, 1994 WL 440927, at *2 (Aug. 10, 1994).

*   *   *

We agree with FINRA that Olson's conversion of Firm funds through deception and with a scienter raises significant doubts about her integrity and fitness to remain associated with any FINRA member firm. Her misconduct demonstrates that Olson cannot be entrusted with firm or customer money, and that she therefore poses a continuing threat to investors. Imposing a bar appropriately addresses that threat. The sanction also furthers the public interest by deterring other securities professionals from engaging in similar misconduct.[62]

An appropriate order will issue.[63]

By the Commission (Chair WHITE and Commissioners GALLAGHER, STEIN, and PIWOWAR; Commissioner AGUILAR not participating).

In the Matter of the Application of

ANTHONY A. GREY

For Review of Disciplinary Action Taken By

FINRA

OPINION OF THE COMMISSION

REGISTERED SECURITIES ASSOCIATION — REVIEW OF DISCIPLINARY PROCEEDINGS

Violations of Securities Laws and Conduct Rules

Unfair and Fraudulent Markups

Interpositioning

Registered securities association found that registered representative, while associated with a member firm, interpositioned personal accounts between member firm and its customers, resulting in excessive and, in some instances, fraudulent markups to the customers. *Held*, registered securities association's findings of violations and sanctions are *sustained.*

APPEARANCES:

Peter J. Aldrich, Palm Beach Gardens, FL, for Anthony A. Grey

Alan Lawhead and *Lisa Jones Toms*, for the Financial Industry Regulatory Authority, Inc.

Appeal filed: October 31, 2014
Last brief received: February 23, 2015

I. Introduction

Anthony A. Grey, a registered General Securities Representative holding Series 3, 4, 5, 8, 24, 53, and 63 licenses,[1] formerly associated with Gardnyr Michael Capital, Inc. ("GMCI" or the "Firm"),[2] a FINRA member, appeals from FINRA disciplinary action based on his sales of municipal bonds to three retail customers between October 2008 and July 2009.

FINRA found that, with respect to each of the ten transactions involved, Grey violated MSRB[3] Rule G-17 by interpositioning and failing to disclose his deceptive and unfair practices and MSRB Rules G-17 and G-30 by charging customers unfair prices and excessive markups (ranging from 5.36% to 19.12%). In seven of those transactions, FINRA found that Grey also violated Section 10(b) of the Securities Exchange Act of 1934 and Rule 10b-5 thereunder[4] by charging fraudulently excessive markups (ranging from 8.62% to 19.12%) that he willfully failed to disclose to customers.

---

1 National Commodities Futures (Series 3); Registered Options Principal (Series 4); Interest Rate Option (Series 5); General Securities Sales Supervisor (Series 8); General Securities Principal (Series 24); Municipal Securities Principal (Series 53); Uniform Securities Agent (Series 63).

2 Grey is no longer registered with any FINRA member firm. He nonetheless remains subject to FINRA's jurisdiction for purposes of this proceeding pursuant to Article V, Section 4 of FINRA's By-Laws, because: (1) he was registered and associated with GMCI when the Complaint was filed; and (2) the Complaint charges him with misconduct committed while he was registered and associated with GMCI.

3 Rules of the Municipal Securities Rulemaking Board ("MSRB") apply because this case involves municipal securities subject to MSRB regulation. The MSRB is the self-regulatory organization charged with primary rulemaking authority for the municipal securities activities of broker-dealers, municipal securities dealers and municipal advisors. The MSRB does not have enforcement authority. FINRA administers and enforces its members' compliance with the MSRB Rules. FINRA's By-Laws provide that its members and persons registered with members agree to comply with MSRB Rules, and FINRA is authorized to impose sanctions for violations of MSRB Rules. Article IV, § 1(a)(1) (agreement by firms); Article V, § 2(a)(1) (agreement by registered persons); Article XIII, § 1(b) (authorization to impose sanctions for violation of MSRB Rules). The MSRB Rules are found at www.msrb.org.

4 15 U.S.C. § 78j(b); 17 C.F.R. § 240.10b-5.

For these violations, FINRA suspended Grey from associating with any FINRA member firm in any capacity for eighteen months, fined him $30,000, and ordered him to disgorge $15,750 (plus prejudgment interest) to FINRA.[5]

On appeal, Grey argues that he sold the bonds to customers at "wholesale" prices that were fair and reasonable and that he purchased the bonds at such distressed prices in unusual market conditions that his acquisition costs could not have represented the true prevailing market price. Grey asserts that the prevailing market price of the bonds should be based on the yield curve of bonds of like quality, rather than contemporaneous cost.

We base our findings on an independent review of the record. For the reasons set forth below, we sustain FINRA's findings and the sanctions imposed.

II. Factual Background

Grey entered the securities industry in the early 1980s and, in May 1994, became associated with the Winter Park, Florida office of GMCI. Grey was registered with GMCI until October 2012.[6] During his tenure at GMCI, Grey spearheaded the Firm's municipal bond practice, engaging in thousands of bond transactions a year and generating approximately half of his income from his personal bond trading.[7] Between October 2008 and July 2009, he conducted 99% of GMCI's municipal bond business.

In 2009, FINRA's Department of Member Regulation conducted a routine cycle examination that reviewed GMCI's municipal business from August 2008 through September 2009. During the exam, a FINRA examiner discovered a pattern of trades Grey had routed to retail customers through two personal accounts—a personal prime brokerage account with Triad Securities Corporation and an IRA account with GMCI. The examination revealed that in ten

---

5 Because FINRA found that Grey's misconduct was willful, he is also statutorily disqualified. *See* 15 U.S.C. § 78c(a)(39)(F) (an applicant who "has willfully violated any provision of the Exchange Act" is subject to statutory disqualification). FINRA also assessed hearing costs.

6 Grey voluntarily ended his employment with GMCI on October 25, 2012 and, since then, has not been associated with a FINRA member firm.

7 When asked what percentage of his income he attributed to his personal bond trading in 2008 and 2009, Grey testified, "somewhere in the vicinity of 50/50, 40/60, depending upon, you know, the month."

transactions involving six municipal bonds,[8] Grey followed the same three or four-step pattern of intermediate activity before selling the bonds to three retail customers.

The pattern began with Grey purchasing the bonds from the street either for his personal account, or through GMCI at a designated price, generally as odd-lot purchases in bid-wanted auctions. If he had originally purchased the bonds through GMCI, he then sold the bonds to his own personal account at a higher price within one business day of his initial wholesale purchase.[9] Next, Grey sold the bonds from his personal account (back) to GMCI at a higher price. Finally, on the same day, he sold the bonds from GMCI to his retail customers[10] at an even higher price. Grey alone determined the price for each transaction, and, in each transaction, the customers purchased the bonds at prices 5.36% to 22.92% higher than what Grey had paid for them no more than five trading days earlier.[11]

For each of the six bonds at issue, Grey levied the bulk of the cumulative increase in price in the sale of bonds from his personal account back to GMCI, and that sale immediately preceded his sale of the bonds to the relevant retail customer.[12] In doing so, Grey created the

---

8 The transactions at issue involved six different municipal bonds: (1) OCALA FL UTILITY SYSTEM (674564CZ0) (hereinafter, "Ocala"); (2) OSCEOLA CNTY FL IDA IDR (19464HBV2) (hereinafter, "Osceola"); (3) COLLIER CNTY FL HSG FIN (19464HBV2) (hereinafter, "Collier"); (4) FLORIDA ST MUN LN (342815KE6) (hereinafter, "Florida State"); (5) HIGHLANDS CNTY FL HEALTH (431022PT3) (hereinafter, "Highlands (Health)"); and, (6) HIGHLANDS CNTY FL SCH (43102DDK1) (hereinafter, "Highlands (School)"). FINRA examiner Barbara Walley, who discovered the pattern, testified to producing a schedule of customer transactions involving 36 municipal bonds that were executed through Grey's personal accounts during the review period. FINRA's Division of Enforcement determined to charge Grey in connection with the six municipal bonds listed on the schedule.

9 Grey purchased Osceola from the "street" through GMCI on Wednesday, October 22, 2008, at $71.250 and sold the bonds to his personal account that same day at $72.250. He purchased Collier on the "street" through GMCI on Thursday, November 6, 2008, at $76.880 and sold the bonds to his personal account that same day at $77.880. He purchased Florida State from the "street" through GMCI on Tuesday, December 16, 2008, at $59.000 and sold the bonds to his personal account that same day at $60.000. Finally, he purchased Highlands (School) from the "street" on Thursday, July 23, 2009, at $85.569 and sold the bonds to his personal account the following day (Friday, July 24, 2009) at $91.250.

10 Grey actively recruited the customers for the relevant bond investments and in some cases had discretionary authority to buy bonds from, and sell bonds to, the customers' accounts without speaking with them first.

11 Grey sold the bonds to customers one to five business days after he purchased them in inter-dealer trades on the open market.

12 For instance, the markup in price in the sale of bonds from his personal account back to GMCI constituted : (1) 12.35% of the 18.13% cumulative increase on Osceola; (2) 2.99% of the 5.36% cumulative increase on Ocala; (3) 15.79% of the 19.89% cumulative increase on Collier;

(continued . . .)

illusion that he (through GMCI) was selling the bonds to customers with markups at or around three percent, consistent with GMCI's written supervisory procedures ("WSPs").[13]

Grey conceded that he never disclosed to customers that his personal accounts were interpositioned between the interdealer market and their retail purchases, and that, as a result, he was charging much higher prices than he had paid in interdealer transactions a few days earlier. No significant movements in the prices of any of the bonds at issue or the market at large occurred between Grey's acquisition of the bonds and the sale to retail customer, nor did any interdealer trades occur on any of the bonds during the interim period.

III. Procedural Background

On December 2, 2011, FINRA's Division of Enforcement ("Enforcement") filed a complaint alleging that Grey engaged in interpositioning and charged unfair and unreasonable markups without disclosing that he had done so in violation of MSRB Rule G-17 (fair dealing) and MSRB Rule G-30 (fair pricing).[14] Enforcement further alleged that Grey's actions violated the antifraud provisions of Exchange Act Section 10(b) and Rule 10b-5.

FINRA held a hearing on February 5 and 6, 2013, before a three-person Hearing Panel. Both Enforcement and Grey presented numerous witnesses and exhibits, and Grey was called to testify. On June 20, 2013, the Hearing Panel found that Grey committed the alleged violations and imposed sanctions including a two-year suspension, fines, disgorgement, and costs. Grey timely appealed the Hearing Panel decision to the National Adjudicatory Council ("NAC").

On October 3, 2014, the NAC issued a decision affirming the findings of violations and imposing modified sanctions. The NAC reduced the term of Grey's suspension from two years to 18 months, reduced the disgorgement amount from $16,000 to $15,750 (plus prejudgment interest), and affirmed the Hearing Panel's order for Grey to pay a fine of $30,000 and hearing costs of $5,267.32.

(. . . continued)
(4) 17.54% of the 22.94% cumulative increase on Florida State; (5) 6.99% of the 9.88% cumulative increase on Highlands (Health); and (6) 4.93% of the 6.64% cumulative increase on Highlands (School).

[13] *See* text accompanying note 48, *infra*.

[14] In addition to Grey, Enforcement alleged violations against GMCI and two other general securities representatives who eventually settled the proceedings. *See Gardnyr Michael Capital, Inc.*, No. 2009016034101 (OAO Dec. 19, 2012), *available at* http://disciplinaryactions.finra.org.

IV. Analysis

A. Standard of Review

We base our findings on an independent review of the record and apply the preponderance of the evidence standard for self-regulatory organization ("SRO") disciplinary actions.[15] Pursuant to Exchange Act Section 19(e)(1),[16] in reviewing an SRO disciplinary action, we determine whether the aggrieved person engaged in the conduct found by the SRO, whether such conduct violates the relevant provisions, and whether the relevant provisions are, and were applied in a manner, consistent with the purposes of the Exchange Act.[17] We may sustain the judgment upon our independent review of the record, notwithstanding any deficiencies in the SRO's analysis.[18]

B. Grey's undisclosed interpositioning of his personal accounts to inflate the sales prices of the bonds violated MSRB Rule G-17's fair dealing requirements.

We sustain FINRA's findings that Grey willfully engaged in interpositioning in violation of MSRB Rule G-17, which provides that municipal securities dealers "shall deal fairly with all persons and shall not engage in any deceptive, dishonest, or unfair practice." Grey violated that Rule in each of the ten municipal bond transactions at issue when he interposed accounts controlled and maintained by him between his retail customer and the intermarket seller of the bonds without disclosing his personal involvement to the customers. In each step of the transactions, Grey incrementally increased the prices as the bonds were moved to and from his personal accounts, and ultimately sold them to his retail customers at prices 5.36% to 22.92% above his initial purchase prices. These trades are outlined in *Table I* below.

Grey neither disclosed to the customers that his personal accounts were involved, nor that the customers were paying a much higher price than he had paid one to five trading days earlier. To the contrary, Grey actively concealed the true size of the markups. As illustrated in *Table I* above, Grey invariably charged the bulk of the markups on the step of the transaction immediately preceding the sale of the bonds to a retail customer (*i.e.*, when Grey sold the bonds from his personal account back to GMCI). This practice made it appear as though GMCI had sold the bonds to customers with markups of around three percent—consistent with the stated maximum in the firm's WSPs.[19] Because the customer account statements for these transactions provided only the price that the customers paid for the bonds, the customers remained unaware of the markups.

Grey does not dispute his pattern of trading in these transactions, the prices he charged, or that trading in this manner generated profits for him. He also admits that he did not disclose to the customers that he routed the bonds through his personal accounts or that he incrementally increased the prices of the bonds at intermediate steps of the transactions. Instead, Grey asserts that he routed the bonds through his personal accounts only because GMCI did not have a proprietary trading account. He maintains that his interpositioning was the economic equivalent of a firm trading through a proprietary trading account. Grey argues that it is "unfair" to label his interpositioning a "scheme" when "the undisputed evidence was that the routing was the [F]irm's decision to avoid exposure [and t]here was not one particle of evidence that interpositioning was [his] idea."

We are unpersuaded by this argument. We find that Grey executed an interpositioning scheme through a series of successive, intermediate transactions designed to incrementally increase—and artificially inflate—the price of the bonds and conceal the true size of the markups he charged his retail customers. The Firm's WSPs explicitly prohibited both interpositioning and the sale of municipal securities to customers with markups exceeding three percent. Indeed, even if GMCI had a proprietary account, the trading would not have followed this pattern. If Grey's personal accounts were merely serving the Firm's need for a place to hold the bonds, as Grey states, the markups should have been in line with what the Firm would have charged—*i.e.*, a three-percent maximum markup without any of the intermediate markups—and Grey should not have enjoyed the added advantage over his customers by virtue of his concealed conflict of interest.[20]

---

[19] *See* text accompanying note 48, *infra*.

[20] Equally unpersuasive is Grey's suggestion that unlawful interpositioning could not have occurred because his practice "was fully disclosed to the [F]irm and to FINRA through years of audits." Grey does not provide any evidence that he had previously disclosed his interpositioning scheme to either the Firm or FINRA, but even if he had, such disclosure would not have absolved him of his continuing obligations under the Exchange Act or the MSRB rules. We have consistently rejected similar arguments because "associated persons cannot shift their compliance burden to FINRA." *Robert Marcus Lane*, Exchange Act Release No. 74269, 110 SEC 17, 2015 WL 627346, at *13 (Feb. 13, 2015) (rejecting argument that a firm's written

(continued . . .)

C. Grey charged the Firm's retail customers excessive markups in violation of MSRB Rules G-17 and G-30.

We sustain FINRA's findings that Grey charged his retail customers excessive markups in violation of MSRB Rules G-17 and G-30, which require municipal securities dealers to charge customers fair and reasonable prices. Rule G-30(a) provides: "No broker, dealer or municipal securities dealer shall purchase municipal securities for its own account from a customer or sell municipal securities for its own account to a customer except at an aggregate price (including any mark-down or mark-up) that is fair and reasonable, taking into consideration all relevant factors . . . ."[21] Similarly, under the duty of fair dealing imposed by Rule G-17, dealers are prohibited from charging retail customers "prices not reasonably related to the prevailing market price at the time of sale."[22]

Determining whether a dealer charged customers markups that exceeded fair and reasonable prices requires a two-step analysis. First, because "[t]he markup on a security is the difference between the price charged to the customer and the prevailing market price,"[23] we must determine the appropriate prevailing market price. When a dealer acquired the bonds in inter-dealer trades closely related in time to the customer transactions, we assume the dealer's contemporaneous cost is the best measure of prevailing market price, and it is the dealer's burden to overcome that presumption.[24]

(. . . continued)
policies could not have been deficient because they "had been tested and approved by the NASD District Office in its Annual Examinations"); *cf. Rita H. Malm*, Exchange Act Release No. 35000, 58 SEC 131, 1994 WL 665963, at *8 n.40 (Nov. 23, 1994) (rejecting contention that "because the NASD noted no markup, pricing, or other 'exceptions' during its audit . . . NASD was subsequently precluded from bringing markup or supervisory charges").

21 MSRB Manual (CCH) ¶ 3646, p. 5159 (1989). On May 8, 2014, we approved a rule filing to amend MSRB Rule G-30. *See* Exchange Act Release No. 72129 (May 8, 2014), File No. SR-MSRB-2014-01 (Jan. 29, 2014). The amendments were designed to streamline and codify existing guidance regarding MSRB fair-pricing standards previously set forth in MSRB Rules G-30 and G-18 and in interpretive guidance under those rules and Rule G-17 into a single fair-pricing rule, MSRB Rule G-30. As amended, MSRB Rule G-30 includes language similar to the above quoted text under Supplementary Material .01(d): "As part of the aggregate price to the customer, the mark-up or mark-down also must be a fair and reasonable amount, taking into account all relevant factors."

Second, we must determine whether the markups, as calculated based on prevailing market price, were fair and reasonable. Once the relevant enforcement party presents evidence demonstrating that the markups were excessive, the dealer may introduce evidence to attempt to justify the markups.[25] Under Rule G-30(a), we must "tak[e] into consideration all relevant factors" in assessing whether the dealer has met this standard.

1. Contemporaneous cost is the best measure of prevailing market price for the transactions at issue in this matter.

The main dispute in this appeal is the appropriate measure of prevailing market price. Absent countervailing evidence, the prevailing market price is "the price at which dealers trade with one another, *i.e.*, the current inter-dealer market."[26] We consider "a dealer's contemporaneous cost" to be "the best evidence of the current market" because "prices paid for a security by a dealer in actual transactions closely related in time to its sales are normally a highly reliable indication of the prevailing market."[27] We have looked to a dealer's purchases occurring within five business days of the retail transaction at issue for determining contemporaneous

That standard, which has received judicial approval, reflects the fact that prices paid for a security by a dealer in actual transactions closely related in time to his retail sales are normally a highly reliable indication of prevailing market price.'" (citing *Alstead, Dempsey & Co.*, 1984 WL 50800, at *1; *Nicholas A. Codispoti*, Exchange Act Release No. 24946, 48 SEC 842, 1987 WL 755546, at *3 (Sept. 29, 1987) ("[W]e have consistently held that, absent countervailing evidence, a dealer's contemporaneous cost is the best evidence of [the current, inter-dealer] market, a standard that has received judicial approval."))). "Contemporaneous cost" is generally defined as "the retail market price that the dealer paid for the securities in actual transactions close in time to its retail sales." *Grandon*, 147 F.3d. at 187.

costs.[28] When a dealer asserts a different prevailing market price for a bond sold to a customer, the dealer must provide sufficient evidence to overcome the presumption that contemporaneous cost is the best measure of prevailing market price.[29]

Grey argues that because he purchased the bonds at such distressed prices in unusual market conditions, it is inconceivable that his acquisition costs could have represented the true prevailing market value. Under the circumstances, he contends that the prevailing market price of the bonds should be based on the yield curve of other bonds of like quality and not contemporaneous cost. Nevertheless, we agree with the NAC that Grey failed to provide sufficient evidence that the prevailing market price differed from his contemporaneous cost, and thus, he failed to overcome the presumption that contemporaneous cost should determine the prevailing market price.

a. The circumstances of this case do not warrant a deviation from contemporaneous cost as the best measure of prevailing market price.

Grey acknowledges that "[o]rdinarily, the prevailing market price to the customer is deemed to equal the price paid by the seller (Grey) when the seller acquired the bond." He claims that a "more reliable metric" is necessary in this case, however, because "the purchase of the disputed bonds during the financial crisis in bid-wanted auctions, in odd-lots, presented a challenge for determining market value which cost-basis valuation does not answer." We disagree. As discussed below, the circumstances here unambiguously favor contemporaneous cost as the best measure of prevailing market price.

First, Grey argues that "he was able to buy the bonds below their market value" because the transactions "took place in the midst of the financial crisis when price discovery was very difficult." The tumultuous financial climate in 2008 and 2009 may well have affected the value the market ascribed to various assets—but it did not alter the fundamental concept that the *market* dictates prevailing market price.[30] We assume that prices accurately reflected the market

Gonchar*, Exchange Act Release No. 60506, 96 SEC 1845, 2009 WL 2488067, at *7 n.25 (Aug. 14, 2009) ("[O]nce NASD presents evidence of contemporaneous cost, the burden shifts to Applicants to refute that evidence."); *Powell & Assocs., Inc.*, Exchange Act Release No. 18577, 47 SEC 746, 1982 WL 32339, at *1–2 (Mar. 22, 1984).

30 Yields lost much of their predictive value during this period because the financial crisis introduced new risks for which the standard models did not account. For example, while the risk levels associated with municipal bonds are ordinarily reflected in the interest rate, many bonds became riskier investments on account of the financial crisis without any corresponding interest

(continued . . .)

demand at the time, taking into account market uncertainties, risk tolerance, liquidity, and other variables. The crisis did not unseat contemporaneous cost as the appropriate measure of prevailing market price. If anything, the financial crisis bolstered contemporaneous cost as the best evidence of prevailing market price, since interdealer trades provided the only objective measure at a time when the assumptions underlying external models were suspect and, as Grey notes, price discovery was unusually difficult.

Second, Grey argues that "[t]he very nature of the bid-wanted process precludes conclusive reliance on the auction pricing as equaling market value." Despite Grey's contention to the contrary, we treat bid-wanted auction transactions as we would any other interdealer trades when assessing contemporaneous cost. MSRB Rule G-13 provides: "If a . . . municipal securities dealer is distributing or publishing a quotation . . . such . . . dealer shall have no reason to believe that the price stated in the quotation is not based on the best judgment of the fair market value of the securities . . . ." Municipal bond dealers generally have access to firm bid and ask quotations for bonds purchased through bid-wanted auction and rely on that information to assess prevailing market price.[31] Bid-wanted auctions function as a free-market system and are designed to solicit the highest market bidder. Grey's own account of the auction process for the relevant bonds underscores its competitive nature. Grey submits that he bid on hundreds of bonds and only a tiny percentage of his bids—"perhaps 4%"—were actually accepted.

Third, Grey argues that contemporaneous cost is an improper measure of prevailing market price because he purchased the bonds in odd-lots (quantities of less than 100 bonds), and odd-lots are undesirable and difficult to sell. Even accepting Grey's argument that odd-lots trade at a discount, however, contemporaneous cost would remain the best measure of prevailing market price. Grey purchased the bonds at issue in odd-lots and sold them to retail customers in odd-lots. Any discount should have carried through to the customers because those customers would experience the same disadvantages associated with odd-lot trades if they chose to liquidate the bonds down the line.

Finally, Grey failed to demonstrate how market conditions at the time he sold the bonds to his customers changed the prevailing market price of the bonds as measured by

---

(. . . continued)
rate adjustment. The risks accompanying municipal bonds increased with the onset of the credit crisis as major bond issuers suffered ratings downgrades and default rates tripled. *See* SEC, Report on the Municipal Securities Market, at 23 nn.119–21, 49 (July 31, 2012), *available at* http://www.sec.gov/news/studies/2012/munireport073112.pdf.

31 *See, e.g.*, SEC, Report on the Municipal Securities Market, at 114 n.693, 121, 128 n.769 (July 31, 2012); United States Government Accountability Office, Report to Congressional Committees, *Municipal Securities: Overview of Market Structure, Pricing, and Regulation*, GAO-12-265, at 8 (Jan. 2012).2012), *available at* http://www.gao.gov/assets/590/587714.pdf.

contemporaneous cost.[32] Grey purchased all of the bonds in interdealer trades within five business days of the customer transaction—a period we consider close enough in time for determining contemporaneous cost in this case.[33] He presented no evidence of any major market changes during the time he held the bonds or intermediate interdealer trades at competing price points. Accordingly, Grey failed to demonstrate any need to deviate from the contemporaneous cost standard.

Grey further argues that Enforcement's expert on the issue of municipal bond pricing, James McKinney,[34] did not do enough to determine the fair market value or properly consider the extraordinary conditions of the market at the time. As an initial matter, we reiterate that Grey bore the burden of rebutting the presumption in favor of contemporaneous cost—Enforcement need not account for every potential market variable to a respondent's personal satisfaction.[35] In any event, we find McKinney's testimony to be fair, thorough, and credible. McKinney testified that a maximum markup of three percent represented the industry standard. He used Electronic Municipal Market Access ("EMMA") and Municipal Market Data ("MMD") to review the ratings and other characteristics of the relevant bonds. He noted that no intervening trades occurred in the market for the relevant bonds and testified that the prevailing market price for the bonds was the last interdealer trade (*i.e.*, the price at which Grey had acquired the bonds).

Even though no intervening trades occurred in the market for the relevant bonds following Grey's purchases, McKinney adjusted the prevailing market price for the bonds to give Grey "any benefit of any market movement" that he could glean from the MMD scale. As McKinney explained, these adjustments cut exclusively in Grey's favor: "In the cases where the market went down, I didn't nick him on that, but when the market would improve, I gave him the full benefit of the market movement during those days." The adjustments lowered the markup calculations as illustrated in *Table II* below:

---

32 *LSCO Sec., Inc.*, Exchange Act Release No. 28994, 50 SEC 518, 1991 WL 296502, at *2 (Mar. 21, 1991) ("[A]bsent some showing of a change in the prevailing market, a dealer's inter-dealer cost may be used to establish market price for a period up to five business days from the date of the dealer's purchase.").

33 We and FINRA (formerly NASD) have looked to a dealer's purchases occurring within five business days of the retail transaction at issue for determining contemporaneous costs. *See* note 28 *supra*.

34 Grey maintains that McKinney used a flawed "best execution" standard in pricing the municipal bonds based on occasions in which McKinney used that term in his testimony. While "best-execution obligations and fair-pricing obligations are closely related," Exchange Act Release No. 72956, 109 SEC 14, 2014 WL 4352319, at *2 (Sept. 2, 2014) (proposing SR-MSRB-2014-07), we independently apply existing fair pricing standards under MSRB Rule G-30 in reviewing McKinney's testimony and in determining whether Grey sold the subject bonds at prices that were fair and reasonable.

35 *See, e.g.*, *Gonchar*, 2009 WL 2488067, at *7 ("[O]nce NASD presents evidence of contemporaneous cost, the burden shifts to Applicants to refute that evidence.").

Table II		
Bond	**Raw Markup**	**McKinney Adjusted Markup**
Osceola	18.13%	**14.38%**
Ocala	5.36%	**5.36%**
Collier	19.89%	**19.12%**
Florida State	22.92%	**16.88%**
Highlands (Health)	9.88%	**8.62%**
Highlands (School)	6.64%	**6.64%**

These prevailing market price valuations—which were accepted by FINRA—are, at a minimum, reasonable.

b. Grey failed to meet his burden of proving a superior metric for prevailing market price.

In any event, we reject Grey's proposed alternative means of determining prevailing market price based on yield to customers at the time of sale. His approach, which he describes as "multi-faceted," "conscientious," and "practical," is a survey of cherry-picked data, including yield curves of unrelated bonds, historical trading points, and actual profits realized.

Grey relies heavily on the testimony of his expert, John Bagley, to argue that the yield curve, which he claims Enforcement ignored, was a better measure of where the market was at the points of sale to the customers.[36] Bagley testified that the yields for the bonds at the time of sale were "very attractive" based on his "analysis on whether [he] *felt* these bonds were sold at a fair and reasonable price." But his analysis was not scaled to any existing objective criteria that Grey should have consulted at the time of the transactions. Even though Grey purchased all of the bonds in interdealer trades within five business days of the respective customer transactions and presented no evidence of any major market changes during the time he held the bonds, Bagley generally ignored Grey's wholesale purchase prices (*i.e.*, the most recent interdealer trades) when analyzing the fair market value of the bonds at the time of the customer transactions. He explained: "I didn't look at what the fair price was between two interdealer brokers. I looked at the price [Grey's] client paid. That's what I looked at as relevant." He continued: "When I did my analysis, there were many times I threw out interdealer trades because I didn't think they were relevant or the price was wrong. So just because they are interdealer trades doesn't mean they are right."

[36] Grey also claims that unrebutted testimony indicated that "he could have sold the bonds to the street at higher prices." Aside from his own testimony before the Hearing Panel to that effect, Grey presented no evidence that he sought or received contemporaneous bids from outside dealers on any of the bonds—let alone that other dealers were ready to pay higher prices than those at which he sold the bonds to his customers.

Bagley's subjective assessment of whether Grey's customers received a good deal on the bonds—armed with the benefit of hindsight—is irrelevant to the objective question of whether Grey charged his customers prices that were reasonably related to the prices the market set for the bonds at the time of the retail sales. Grey's belief that certain bonds were sound investments did not permit him to supplant the market's price with his own assessment of value or relieve him of his responsibilities to his customers.

In sum, Grey failed to present sufficient evidence to overcome the presumption in favor of contemporaneous cost as the best measure of prevailing market price.

2. Grey's aggregate markups on the bonds were excessive, unfair, and unreasonable, and violated MSRB Rules G-17 and G-30.

Based on the contemporaneous costs of the bonds at issue, Grey charged his customers markups ranging from 5.36% to 19.12% above the prevailing market price.[37] MSRB Rule G-30 requires municipal securities dealers to charge prices that are "fair and reasonable, taking into consideration all relevant factors."[38] The MSRB lists numerous factors that may be relevant in

[37] Specifically, Grey charged cumulative markups of 5.36% on the two Ocala bond trades, 6.64% on the Highlands (School) bond trade, 8.62% on the three Highlands (Heath) bond trades, 14.38% on the Osceola bond trade, 16.88% on the Florida State bond trade, and 19.12% on the two Collier bond trades. *See Table II.* Our finding on this point refutes Grey's argument that the interpositioning was "inconsequential" because "each customer paid approximately 3% or less over the prevailing market value."

[38] MSRB Interpretations of Rule G-30, "Report on Pricing," (Sept. 26, 1980), MSRB Manual (CCH) ¶ 3646, at 5157 (hereinafter, "MSRB 'Report on Pricing'"); *accord Press v. Chemical Inv. Corp.*, Exchange Act Release No. 18628, 47 SEC 766, 1982 WL 32503, *1 (Apr. 9,

(continued . . .)

determining the fairness and reasonableness of municipal securities transaction prices, including: (1) the best judgment of the broker or dealer as to the fair market value of the securities at the time of the transaction; (2) the expense involved in effecting the transaction; (3) the fact that the broker or dealer is entitled to a reasonable profit; (4) the expertise provided by the broker or dealer; (5) the total dollar amount of the transaction; (6) the availability of the security in the market; (7) the price or yield of the security; (8) the resulting yield after the subtraction of the markup compared to the yield on other securities of comparable quality, maturity, availability; (9) the risk and the role played by the broker or dealer; and (10) the nature of the professional's business.[39] "Of the many possible relevant factors," the MSRB has stated that "resulting yield to a customer is the most important one in determining the fairness and reasonableness of price in any given transaction."[40]

In its case in chief, Enforcement presented extensive evidence that Grey engaged in a pattern of excessive markups. This included the testimony of FINRA examiner Barbara Walley, who discovered the pattern and testified to producing a schedule of customer transactions involving 36 municipal bonds that were executed through Grey's personal accounts during the review period. Enforcement also presented the expert testimony of James McKinney, who not only testified that, under standard industry practice, three percent is generally the maximum permissible markup on municipal securities, but also individually assessed the value of the relevant bonds at the time of sale.

After the presentation of Enforcement's case in chief, Grey failed to refute evidence that the markups were excessive, or to present evidence that would justify the markups. Specifically, Grey did not challenge Enforcement's evidence regarding industry practice or otherwise argue

---

(. . . continued)
1982) ("As a general rule, markups on municipal bonds are significantly lower than those for equities securities."); *id.* at *2 n.9 ("This does not mean that markups of 5% or less are necessarily 'fair and reasonable.' We note that markups on municipal securities are often as low as one or two percent in frequently traded issues, such as those in the instant case."); *SFI Inv., Inc.*, 2000 WL 33299598, at *10 (Mar. 28, 2000) ("Based on the contemporaneous costs of the bonds at issue, the prices charged to SFI's retail customers resulted in 174 transactions with excessive markups ranging from over 4% to over 8%. Absent exceptional circumstances, this is well above any acceptable benchmark for markups on municipal bonds.").

We also note that in this matter, GMCI's WSPs prohibited the Firm from selling municipal securities to customers with a markup exceeding three percent, noting that "[FINRA] will take exception to and may attempt to charge fraud for any mark-up . . . in excess of" that amount.

[39] MSRB "Report on Pricing" ¶ 3646, at 5158. We note that MSRB G-30, as amended in a consolidated fair-pricing rule, preserves the substance of dealers' existing fair-pricing obligations, and includes as Supplementary Material .02 a list of eleven relevant (but non-exclusive) factors.

[40] *Id.* at 5160.

that markups of 5.36% to 19.12% were fair and reasonable under the circumstances.[41] In fact, Grey conceded that "markups exceeding three percent are suspect and probably excessive" and that "markups well under 5% are the norm."

Furthermore, our review of the relevant facts in the record establishes that Grey has failed to demonstrate that the markups he charged the customers were fair and reasonable under the circumstances. Grey did not present persuasive evidence that the resulting yields to the customers justified the markups he charged. His expert, John Bagley, failed to compare the yield of the relevant bonds "to the yield of other securities of comparable quality, maturity, and availability."[42] Instead, Bagley concluded that the yields of the relevant bonds "were very attractive" based on his comparison of those bonds to unrelated bonds that were not actually "comparable." For example, the unrelated bonds, which Grey had personally selected for Bagley, were general obligation bonds based on round-lot trades rather than revenue bonds in odd-lot trades like the ones at issue here,[43] and many of the "comparable" trades occurred weeks after the relevant transactions.[44] Bagley also relied on MMD yields, which are equally inapposite because (1) the MMD, like the unrelated bonds Grey selected, provides yields based on general obligation bonds in round-lot transactions; and (2) MMD yields are based on bonds throughout the United States (unlike the bonds at issue here, which were all issued in Florida).

Moreover, Grey did not present evidence to establish that he was entitled to the markups he charged based on the services he provided to the customers, the risks or expenses he incurred in executing the transactions, or any other relevant factor. First, Grey purchased the bonds in bid-wanted auctions in odd-lot quantities. The record indicates that odd-lots flooded the market during the relevant period and were not in short supply. Second, to the extent Grey was exposed to risk during the periods he held the bonds in his personal accounts, those periods were brief (lasting no more than two business days), and Grey testified that he did not believe the relevant bonds were risky investments. Third, although a low dollar value transaction relative to the expense involved in effecting the transaction may, in some instances, justify a higher markup to permit a dealer to receive a reasonable profit,[45] Grey did not introduce any evidence to suggest

---

41 Grey's opening brief before us states: "Grey has never disagreed with the idea that markups exceeding 3% are suspect and probably excessive. What he has always disagreed with here is the contention that the markups actually exceeded 3%."

42 MSRB "Report on Pricing" ¶ 3646, at 5158.

43 Yields are typically lower on general obligation bonds and round-lot bonds, as compared to revenue bonds and odd-lot bonds. For this reason, Bagley's testimony that the yield curves on the bonds at issue here were higher than the "comparable" bonds is immaterial.

44 For example, the "comparable" trades Bagley considered in connection with the Ocala bond occurred more than three weeks after the subject trade. As Bagley conceded, Grey would not have had an opportunity to consider those as-yet future trades in pricing the bonds.

45 Retail-size trades of $20,000 or below tend to incur higher transactional costs and incur higher markups. *See* SEC, Report on the Municipal Securities Market, at 122–23 (July 31, 2012).

that his transaction costs were high, as was his burden if he wished to justify the markups on that basis.[46] We also observe that Grey charged his customers the same unit price for the bonds, regardless of the dollar value of the transaction, suggesting that the size of the transaction was not a factor in the markups.[47]

In addition, the nature of Grey's business as a municipal securities dealer at GMCI does not warrant the unusually high markups—in fact, GMCI's WSPs prohibited the Firm from selling municipal securities to customers with a markup exceeding three percent.[48] Nor do we credit Grey's testimony that he based the prices on his expertise, experience, and best judgment of the fair value of the bonds at the time of the sale—Grey was incapable of providing a fair assessment of value on account of his undisclosed personal interest in the transactions. Indeed, Grey's elaborate interpositioning scheme, designed to conceal the true size of the markups, reveals his implicit acknowledgement that the cumulative markups were excessive.

D. Grey's excessive markups on seven of the transactions were fraudulent and violated Exchange Act Section 10(b) and Rule 10b-5 thereunder.

We sustain FINRA's findings that, with respect to the seven customer transactions with aggregate markups of eight percent or higher (ranging from 8.62% to 19.12%),[49] Grey violated the antifraud provisions of Exchange Act Section 10(b) and Rule 10b-5 thereunder, which prohibit any person, acting with scienter, from misrepresenting or omitting a material fact in connection with the purchase or sale of a security.[50]

---

46 *See Investment Planning*, 1993 WL 289728, at *3 n.19 ("We reject applicants' argument[] . . . that it was necessary for the NASD to elicit evidence of applicants' expenses in executing each order.").

47 *See Table I.* For example, Grey charged two separate retail customers the same price for Ocala bonds on October 30, 2008—$88.77—notwithstanding the fact that one customer purchased a block of 10,000 bonds for a cost of $8,877 and the other customer purchased a block of 40,000 bonds for a cost of $35,508.

48 This portion of the WSP specifically addressed and parroted the MSRB Rules, including Rules G-17 and G-30. The WSP also prohibited interpositioning.

49 Specifically, we sustain FINRA's finding that the following markups violate the antifraud provisions: 8.62% on three of the Highlands (Health) trades, 14.38% on the Osceola trade, 16.88% on the Florida State trade, and 19.12% on two of the Collier trades.

50 *See, e.g.*, *SEC v. Monarch Funding Corp.*, 192 F.3d 295, 308 (2d Cir. 1999); *Lane*, 2015 WL 627346, at *10; SEC, Statement of the Commission Regarding Disclosure Obligations of Municipal Securities Issuers and Others, Exchange Act Release No. 7049, 56 SEC 479, 1994 WL 73628, at *4 (Mar. 9, 1994). Rule 10b-5 provides, "It shall be unlawful for any person, directly or indirectly, . . . (a) To employ any device, scheme, or artifice to defraud, (b) To make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which they were made, not

(continued . . .)

Grey concedes he did not disclose: that his personal accounts were involved in intermediary transactions before the sales; that his customers were paying higher prices as a result of those intermediary transactions; or the amount of the markups. These omitted facts were material and their omission was misleading. Under any circumstances, it would be important to investors in making their investment decision that their broker was interposing his own accounts between them and the market and causing them to pay higher prices than they would otherwise pay. This is particularly true in the seven transactions with markups between 8.62% and 19.12%—markups ranging from three to six times the industry standard.[51]

The omission of these material facts was particularly misleading because Grey actively concealed the true size of the markups by concentrating his profits in the sale of the bonds from his personal account to GMCI immediately before the retail transactions. This practice made it appear as though GMCI had sold the bonds to customers with standard markups.

The record supports a finding that Grey omitted these material facts with scienter. Scienter is "a mental state embracing intent to deceive, manipulate or defraud."[52] It may be inferred from circumstantial evidence and need not be conceded by the respondent.[53] "Where a dealer knows the circumstances indicating the prevailing market price for the securities, knows the retail price that it is charging the customer, and knows or recklessly disregards the fact that its markup is excessive, but nonetheless charges the customer the retail price, the scienter requirement is satisfied."[54] Interpositioning is widely recognized as a form of securities fraud in violation of Section 10(b).[55]

Grey acted with scienter when he intentionally routed the bonds through his personal accounts before he sold them to GMCI's retail customers with excessive and undisclosed

---

(. . . continued)
misleading, or (c) To engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person, in connection with the purchase or sale of any security." 17 C.F.R. § 240.10b-5.

51 *See, e.g.*, *Sheldon*, 1992 WL 353048, at *12 & nn.67–68 (affirming finding that undisclosed markups ranging from 6 percent to as high as 15 percent violated Rules G-17 and G-30 of the MSRB, and, to the extent the markups exceeded 8 percent, they violated Section 17(a) of the Securities Act, Sections 10(b) and 15(c)(1) of the Exchange Act, and Rules 10b–5 and 15c1–2 thereunder).

52 *Tellabs, Inc. v. Makor Issues & Rights, Ltd.*, 551 U.S. 308, 319 (2007); *Ernst & Ernst v. Hochfelder*, 425 U.S. 185, 193 n.12 (1975).

53 *See, e.g.*, *Meyer Blinder*, Exchange Act Release No. 31095, 52 SEC 1145, 1992 WL 216702, at *9 (Aug. 26, 1992).

54 *Id.*; *Powell*, 1982 WL 32339, at *1–2.

55 *See, e.g.*, *David A. Finnerty*, Exchange Act Release No. 56849, 92 SEC 9, 2007 WL 4180387, at *3 (Nov. 27, 2007).

markups.[56] Grey was aware of his contemporaneous costs and personally set the prices at each step of the transactions. The interpositioning served no purpose other than to enrich himself and deceive GMCI, GMCI's customers, and other market participants. As part of his interpositioning scheme, Grey arranged the transactions to make it appear as though the Firm charged markups of around three percent and failed to disclose the hidden markups created by his successive intermediate trades. His actions reveal his intent to deceive, manipulate, and defraud the Firm's retail customers into paying inflated prices in the relevant transactions.[57]

Grey mainly argues that he could not have acted with scienter in the disputed trades because Enforcement brought charges based on only a small number of isolated transactions. Grey contends that he could not have possessed the requisite intent to defraud with respect to the bond trades at issue because he had charged equally high markups in numerous other transactions during the same time period, sometimes with the same clients, none of which were challenged. These other excessive markups to which Grey refers—although not at issue here—hardly undermine our finding of scienter as to the ten transactions in this case. In declining to bring charges relating to these other transactions, Enforcement has not condoned these transactions, but has rather exercised its prosecutorial discretion in deciding which transactions to pursue.[58]

Similarly, Grey argues that it is "incongruous to think that [he] would simultaneously cheat the customers on one bond for insignificant compensation, while selling them numerous bonds at the same time at prices which have not been challenged as fraudulent." But there is no requirement or expectation that fraudulent transactions exclusively accompany other fraudulent transactions. In fact, fraudsters may intentionally bury fraudulent transactions among legitimate trades in an effort to avoid detection. Further, although Grey argues that his compensation was "insignificant," there is no *de minimis* exception to fraudulent conduct. It is irrelevant whether his violations impacted only a few of GMCI's customers, a random set of trades, or what he considers to be an inconsequential sum of ill-gotten gains.[59]

---

[56] *See, e.g.*, *Gonchar*, 2009 WL 2488067, at *9 (finding that applicants acted with scienter where customers relied on applicants' pricing and applicants exacerbated the lack of transparency by not disclosing the interpositioning and markups).

[57] Although Enforcement limited its charge of fraudulently excessive markups to seven transactions with markups above eight percent, we have previously noted that "undisclosed, excessive markups constituting any percentage may be fraudulent if done with scienter." *Lane*, 2015 WL 627346, at *10 n.56.

[58] This prosecutorial discretion—which is not at issue in this case—is immaterial to Grey's misconduct. *See Schellenbach v. SEC*, 989 F.2d 907, 912 (7th Cir. 1993) ("NASD disciplinary proceedings are treated as an exercise of prosecutorial discretion.").

[59] *Tellabs*, 551 U.S. at 325("While it is true that motive can be a relevant consideration, and personal financial gain may weigh heavily in favor of a scienter inference, we agree . . . that the absence of a motive allegation is not fatal.").

Accordingly, we sustain FINRA's finding that Grey willfully violated Exchange Act Section 10(b) and Rule 10b-5 when he charged markups exceeding eight percent, and failed to disclose those excessive markups and his interpositioning to his GMCI's customers.[60]

E. FINRA's sanctions are neither excessive nor oppressive.

Exchange Act Section 19(e)(2) directs us to sustain FINRA's sanctions unless we find, having due regard for the public interest and the protection of investors, that the sanctions are excessive or oppressive or impose an unnecessary or inappropriate burden on competition.[61] For Grey's interpositioning, excessive markups, and fraud violations, the NAC fined Grey $30,000, ordered him to disgorge $15,750 (plus prejudgment interest) to FINRA, and suspended him from associating with any FINRA member firm in any capacity for eighteen months. We find the sanctions imposed on Grey to be consistent with the statutory requirements, and we sustain them.

For excessive markups, FINRA's Sanction Guidelines recommend a fine of $5,000 to $100,000, plus the gross amount of the excessive markups, as well as suspension for up to 30 days.[62] In egregious cases of excessive markups, the Guidelines permit suspension of up to two

---

60 Grey claims that "[d]ue to the findings on the 10b-5 charge, in effect [he] has been banned from the industry for life." But his statutory disqualification is not a FINRA-imposed penalty or remedial sanction. Rather, FINRA found that Grey was subject to statutory disqualification under Exchange Act Section 3(a)(39)(F) because he willfully violated Section 10(b) and Rule 10b-5. An applicant is subject to statutory disqualification where, as here, the applicant "has willfully violated any provision of the Exchange Act," 15 U.S.C. § 78c(a)(39)(F). *See, e.g.*, *Lane*, 2015 WL 627346, at *1 n.2; *Richard A. Neaton*, Exchange Act Release No. 65598, 101 SEC 1009, 2011 WL 5001956, at *7–10 (Oct. 20, 2011); *Scott Mathis*, Exchange Act Release No. 61120, 97 SEC 1195, 2009 WL 4611423, at *12 & n.40 (Dec. 7, 2009), *aff'd*, *Mathis v. SEC*, 671 F.3d 210 (2d Cir. 2012). Willful violation of the securities laws means "intentionally committing the act which constitutes the violation" and does not require that the actor "also be aware that he is violating one of the Rules or Acts." *Wonsover v. SEC*, 205 F.3d 408, 414 (D.C. Cir. 2000) (internal quotation marks omitted). The record firmly establishes that Grey intentionally applied the markups to the transactions at issue without disclosing the details of those markups. We therefore agree with FINRA that he acted willfully and sustain FINRA's finding that he is subject to statutory disqualification.

61 15 U.S.C. § 78s(e)(2). Grey does not allege, and the record does not show, that FINRA's sanctions imposed an undue burden on competition.

62 *See FINRA Sanctions Guidelines*, at 6 (2013). FINRA revised its sanctions guidelines in May 2015, increasing specific fines and penalties that, if applied in this case, could warrant imposing greater fines and penalties against Grey. FINRA intended the 2015 guidelines to supersede prior versions of the guidelines, even for "pending matters." *See FINRA Sanctions Guidelines*, at 8 (2015) ("These guidelines supersede prior editions of the *FINRA Sanction Guidelines* . . . . These guidelines are effective as of the date of publication, and apply to all disciplinary matters, including pending matters"). We apply the 2013 guidelines, here, however, because they were in effect when the NAC reached the decision from which Grey appeals. *Cf.*

(continued . . .)

years or a bar.[63] For intentional or reckless misrepresentations or material omissions of fact, the Guidelines recommend a fine of $10,000 to $100,000, a suspension of up to two years, and, in egregious cases, a bar.[64]

As an initial matter, we agree with the NAC's characterization of Grey's excessive markups and misrepresentations as egregious. As we have stated, "[t]he charging of excessive markups [i]s a serious breach of [a broker's] obligation to deal fairly with its customers."[65] Grey demonstrated a complete disregard for this obligation when he repeatedly interposed himself between GMCI and his retail customers, causing them to pay markups that greatly exceeded industry standards and GMCI's internal policies, while concealing the excessive markups through his interpositioning scheme.[66] And, moreover, Grey has yet to acknowledge that his misconduct constituted a violation of the securities laws.[67] No mitigating circumstances warrant reducing the sanctions FINRA imposed. Under the circumstances, neither the $30,000 fine nor the 18-month suspension[68] is excessive or oppressive.[69]

(. . . continued)
Kent M. Houston, Exchange Act Release No. 71589, 2014 WL 651953, at *3 n.23 (Feb. 20, 2014) (noting that the NAC applied 2007 Sanction Guidelines on remand, notwithstanding FINRA's 2011 revisions, because the 2007 version was "in effect at the time [the NAC] issued its initial decision").

63 *FINRA Sanctions Guidelines*, at 90 & n.1 (2013).

64 *Id.* at 88 & n.1.

65 *Codispoti*, 1987 WL 755546, at *4.

66 *See, e.g.*, *Sheldon*, 1992 WL 353048, at *13 (finding that "interpositioning of favored accounts between the dealer market and non-favored accounts [that] resulted in fraudulent, excessive markups of as much as 10 percent" was "particularly egregious"); *Frank L. Palumbo*, Exchange Act Release No. 46427, 60 SEC 1473, 1995 WL 630926, at *9 (Oct. 26, 1995) (stating that recklessly overcharging customers without justification demonstrates "a marked insensitivity to [the] obligation to deal fairly with customers").

67 We reject Grey's argument that FINRA punished him for defending himself in a disciplinary action. The acceptance or acknowledgment of misconduct is a principal consideration in tailoring appropriate sanctions to deter future conduct. *See FINRA Sanctions Guidelines*, at 2 (2013); *Kevin Lee Otto*, Exchange Act Release No. 43296, 73 SEC 751, 2000 WL 1335346, at *4 (Sept. 15, 2000) (adjusting sanctions upward because respondent's "refusal to acknowledge his misconduct and actions demonstrate a serious misunderstanding of the obligations he owes to a customer as a registered representative," and questioning "his commitment to the high standards demanded by the securities industry"), *aff'd* 253 F.3d 960 (7th Cir. 2001).

68 Grey claims that the NAC decision, which reduced his suspension from two years to 18-months, actually lengthened his suspension for nearly a year, because the Hearing Panel originally scheduled his suspension to run from August 19, 2013 to August 18, 2015, but the
(continued . . .)

We also sustain FINRA's order for Grey to disgorge $15,750 in unlawful profits plus prejudgment interest as of July 27, 2009. Grey challenges this calculation because it includes his entire profit and not just the excessive portion (*i.e.*, the markup in excess of three percent). Although Grey is correct that the disgorgement sum includes his entire profit from the series of transactions at issue, its calculation was neither an error nor an injustice. In egregious cases involving intentional or reckless misconduct, FINRA may require respondents to disgorge their entire financial benefit.[70] We find this disgorgement sum appropriate in light of the egregious nature of Grey's misconduct.[71]

V. Conclusion

Over a period of several months, Grey repeatedly interposed his personal accounts between his customers and the market, causing his customers to pay unfair and unreasonable markups ranging from 5.36% to 19.12% above the prevailing market price. These markups were unfair and unreasonable under the circumstances of the case. Grey consistently concealed the excessive markups by using intermediate trades, routed through his personal accounts, to artificially increase the Firm's purchase price. Grey also failed to disclose to his customers that he was personally involved in the transactions and profited from the excessive markups they

---

(. . . continued)
NAC decision (dated October 3, 2014) rescheduled it for December 1, 2014 to May 31, 2016. Of course, the "'reduction' of the suspension by six months" did not "result[] in an extension of the suspension for nearly a year," as Grey claims. Rather, his choice to appeal the Hearing Panel's decision to the NAC delayed the start of the suspension. *See* FINRA Rule 9311(b) ("An appeal to the National Adjudicatory Council . . . shall operate as a stay of that decision until the National Adjudication Council issues a decision . . . ."). Grey's suspension is likewise stayed pending his application of review before this Commission. *See* FINRA Rule 9370(a) ("The filing with the SEC of an application for review by the SEC shall stay the effectiveness of any sanction, other than a bar or an expulsion, imposed in a decision constituting a final disciplinary action of FINRA . . . .").

69 All of the cases Grey cites to support his claim that the sanctions are improperly punitive are distinguishable from this case and have minimal relevance because most were settled, *see FINRA Sanctions Guidelines*, at 1 (2013) (settled cases often impose lesser sanctions), and none involved fraud (which warrants higher sanctions).

70 *See id.* at 5 ("In cases in which the record demonstrates that the respondent obtained a financial benefit from his or her misconduct, where appropriate to remediate misconduct, Adjudicators may require the disgorgement of such ill-gotten gains by fining away the amount of some or all of the financial benefit derived, directly or indirectly."); *id.* at 88 n.2 ("As set forth in General Principal No. 6, Adjudicators may increase the recommended fine amount by adding the amount of respondent's financial benefit.").

71 We likewise sustain the order for Grey to pay $5,267.32 in hearing costs.

were charged. For all of these reasons, we sustain FINRA's sanctions for Grey's violations of MSRB Rules G-17 and G-30 and Exchange Act Section 10(b).

An appropriate order will issue.[72]

By the Commission (Chair WHITE and Commissioners GALLAGHER, STEIN and PIWOWAR; Commissioner AGUILAR not participating).

SECURITIES EXCHANGE ACT OF 1934
Release No. 75840 / September 4, 2015

Admin. Proc. File No. 3-15993

In the Matter of

Accredited Business Consolidators Corporation

OPINION OF THE COMMISSION

SECTION 12(j) PROCEEDING

Grounds for Remedial Action

Failure to Comply with Periodic Filing Requirements

Company failed to timely file periodic reports in violation of Section 13(a) of the Securities Exchange Act of 1934 and Exchange Act Rules 13a-1 and 13a-13. *Held*, it is necessary and appropriate for the protection of investors to revoke the registration of the company's securities.

APPEARANCES:

Elisa Corea, Vice President, for Accredited Business Consolidators Corporation.

Thomas Bednar and *Neil J. Welch, Jr.*, for the Division of Enforcement.

Appeal filed: December 24, 2014
Last brief received: March 16, 2015

17 of 147

Accredited Business Consolidators Corp. appeals an administrative law judge's decision to revoke the registration of its common stock pursuant to Securities Exchange Act Section 12(j).[1] The law judge revoked the registration after finding that Accredited violated Exchange Act Section 13(a) and Rules 13a-1 and 13a-13[2] by failing to file any periodic reports since it filed a Form 10-Q for the period ended September 30, 2012.[3] Accredited admits that it has not filed any periodic reports since the Form 10-Q for the period ended September 30, 2012, but contends that the law judge erred by revoking its registration rather than suspending it for less than twelve months. Accredited also contends that revocation is not justified because its securities are traded on the over-the-counter market in the same manner as companies whose securities are not registered and that are not required to file periodic reports. Based on an independent review of the record, we have determined that revocation of Accredited's securities registration serves the public interest and is necessary for the protection of investors.

I. Background

Accredited is a Pennsylvania corporation located in Managua, Nicaragua with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Its stock is currently traded in the over-the-counter markets under the symbol ACDU. Accredited is delinquent in its periodic filings with the Commission, not having filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2012, which it filed on November 20, 2012. Accredited last filed a Form 10-K annual report for the year ended December 31, 2011, on March 8, 2012.[4] Accredited has not filed any Forms 12b-25 seeking an extension of time to make its periodic filings since August 16, 2013.

On July 31, 2014, we issued an Order Instituting Proceedings alleging that Accredited failed to file quarterly and annual reports as required under Exchange Act Section 13(a) and Rules 13a-1 and 13a-13 and instituting proceedings to determine whether revocation or suspension of the registration of the company's securities was necessary or appropriate to protect investors.[5] Accredited filed an answer on August 21, 2014, admitting that it was delinquent in the filing of its reports and stating that it "can and will bring the filings current as soon as practicable."

The Division of Enforcement filed a motion for summary disposition on October 6, 2014. The law judge granted the Division's motion in a December 1, 2014 initial decision. The law judge found that Accredited violated Exchange Act Section 13(a) and Rules 13a-1 and 13a-13, and determined that revoking Accredited's securities registration was in the public interest.

3 *Accredited Bus. Consolidators Corp.*, Release No. 712, 2014 WL 6737052, at *1 (Dec 1, 2014).

4 Accredited filed an amendment to this 10-K on January 28, 2013.

5 On July 31, 2014, we also issued an order pursuant to Exchange Act Section 12(k) suspending trading in Accredited's securities from July 31 through August 13, 2014.

The Commission's EDGAR database shows that Accredited continues to be delinquent in its periodic reports and has not filed the required Form 8-K announcing the engagement of an auditor, which would be necessary for the company to file its delinquent audited periodic reports.[6]

II. Analysis

A. Accredited violated Exchange Act Section 13(a) and Rules 13a-1 and 13a-13.

Exchange Act Section 13(a) requires issuers of securities registered under Exchange Act Section 12 to file with the Commission annual and quarterly reports "for the proper protection of investors and to insure fair dealing" in the company's securities.[7] Exchange Act Rules 13a-1 and 13a-13 set forth the requirements for those reports.[8] Accredited concedes that it has not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2012, which it filed on November 20, 2012. Accordingly, we find that the company violated Exchange Act Section 13(a) and Rules 13a-1 and 13a-13.

B. The *Gateway* factors justify revocation under these circumstances.

Exchange Act Section 12(j) authorizes us, as we deem necessary or appropriate for the protection of investors, to either suspend the registration of a security for a period not exceeding twelve months or to revoke it if an issuer fails to comply with any provision of the Exchange Act or its rules and regulations.[9] In determining the appropriate sanctions under Section 12(j), we are guided by the non-exclusive public interest factors first set forth in *Gateway International Holdings, Inc.*[10] They include (i) the seriousness of the issuer's violations; (ii) the isolated or recurrent nature of the violations; (iii) the degree of culpability involved; (iv) the extent of the issuer's efforts to remedy its past violations and ensure future compliance; and (v) the credibility of its assurances, if any, against further violations.[11] We find that, based on these factors, it is necessary and appropriate for the protection of investors to revoke Accredited's securities registration.

---

[6] On March 16, 2015, the Division filed a motion to adduce additional evidence. The Division seeks to adduce all EDGAR filings for Accredited as of March 16, 2015, and the trading status for Accredited's securities as of March 16, 2015. Because the additional evidence is material and was not available at the hearing, we will grant the motion. 17 C.F.R. § 201.452. We take official notice of the EDGAR filings cited in this opinion pursuant to Rule of Practice 323, 17 C.F.R. § 201.323 (permitting the Commission to take official notice of, for example, "any matter in the public official records of the Commission," such as periodic reports filed in the EDGAR database).

[7] 15 U.S.C. § 78m(a).

[8] 17 C.F.R. §§ 240.13a-1, 13a-13.

[9] 15 U.S.C. § 78*l*(j).

[10] 2006 WL 1506286, at *4.

[11] *Id.*

Accredited violations are serious, recurrent, and extend over a lengthy period. The company has not filed any periodic reports for over two years. By failing to comply with its reporting obligations, Accredited has violate[d] a central provision of the Exchange Act. It has deprived both existing and prospective holders of its registered stock of the ability to make informed investment decisions based on current and reliable information, including audited financial statements, about the Company's operations and financial condition.[12]

That Accredited knew of its reporting obligations but failed to comply with them is evidence of a high degree of culpability. Since it last filed a periodic report in 2012, Accredited has filed a number of Forms 8-K pursuant to Exchange Act provisions requiring it to report material events. It also filed several Forms 12b-25 seeking extensions of time to make its periodic filings, but has not done so since August 16, 2013, despite its continued delinquency. This shows that Accredited understands the Exchange Act reporting obligations yet has failed to make its required filings anyway. That the company has repeatedly ignored its Exchange Act reporting obligations is further evidence of a high degree of culpability. [13]

Accredited has made no credible effort to remedy its past violations or provided any credible assurance against future violations. According to a Form 8-K/A filed on May 29, 2014, Accredited dismissed its previous auditor on May 9, 2014, after that auditor's registration with PCAOB was revoked. Based on Accredited's EDGAR filings, the company thus far has failed to hire a new auditor to help it prepare its delinquent periodic reports, and it has not filed any of its delinquent periodic reports.

We have previously stated that we consider a "recurrent failure to file periodic reports as so serious that only a strongly compelling showing with respect to the other factors . . . would justify a lesser sanction than revocation."[14] Accredited has not made such a showing.

First, we reject Accredited's argument that a lesser sanction is warranted because it is traded on the over-the-counter markets "along with companies that have no registration statement and publish no information about their operations—yet the companies that publish no information are allowed to trade." As we have previously held, the "only matters relevant to [a 12(j)] proceeding" are "the fact of [an issuer's] failure to file its quarterly and annual reports" and "its present inability to cure these deficiencies." [15] The fact that companies with unregistered securities trade on the same market as Accredited is beside the point.

---

12 *See Impax Lab., Inc.*, Exchange Act Rel. No. 57864, 93 SEC Docket 6241, 6256, 2008 WL 2167956, at *7 (May 23, 2008).

13 *See America's Sports Voice, Inc.*, Exchange Act Rel. No. 55511, 90 SEC Docket 1225, 1228, 2007 WL 858747, at *3 (Mar. 22, 2007).

14 *Impax*, 2008 WL 2167956, at *8.

15 *Eagletech Commc'n, Inc.*, Exchange Act Rel. No. 54095, 88 SEC Docket 1225, 1228, 2006 WL 1835958, at *2 (July 5, 2006).

Second, we find no merit in Accredited's argument that the Division has failed to establish that revocation is necessary or appropriate for the protection of investors and that a suspension of up to twelve months is a "more appropriate remedy." Exchange Act reports are designed to provide the public with information that is "material, timely, and accurate." [16] For over two years, Accredited has failed to file its required periodic reports.[17] Nor, despite its purported willingness to return to compliance, has the Company provided a credible basis to conclude that it is capable of doing so. Revocation under such circumstances "further[s] the public interest by reinforcing the importance of full and timely compliance with the Exchange Act's reporting requirements."[18] Under the circumstances, we believe that revoking the Section 12(g) registration of the Company's common stock is warranted for the protection of investors.

An appropriate order will issue.[19]

By the Commission (Chair White and Commissioners AGUILAR, GALLAGHER, STEIN, AND PIWOWAR).

16 *America's Sports Voice*, 2007 WL 858747, at *4 (citing *SEC v. Beisinger Indus. Corp.*, 552 F.2d 15, 18 (1st Cir. 1977) (stating that the reporting requirements are "the primary tool[s] which Congress has fashioned for the protection of investors from negligent, careless, and deliberate misrepresentations in the sale of stock and securities.")); *see also United States v. Arthur Young & Co.,* 465 U.S. 805, 810 (1984) (observing that "[c]orporate financial statements are one of the primary sources of information available to guide the decisions of the investing public.").

17 In assessing the appropriate sanction, we also consider Accredited's failure to file Forms 12b-25 in connection with delays in its periodic reports, which the Company does not deny. See *Nature's Sunshine Products, Inc.*, Exchange Act Release No. 59268, 95 SEC Docket 26, 2009 WL 137145, at *6 (noting that the Commission may consider subsequent filing failures and other "matters that fall outside the [order instituting proceedings], in assessing appropriate sanctions.").

18 *Id. at *9.* Even had Accredited filed all of its delinquent reports, we may well have found revocation to be appropriate in order "to deter [Accredited] and other issuers from disregarding their obligations to present accurate and timely information to the investing public until spurred by the institution of proceedings. Deterrence is meaningful only if a lengthy delinquency, in the absence of strongly compelling circumstances regarding the other Gateway factors, results in revocation." *Absolute Potential, Inc.,* Exchange Act Rel. No. 71866, 2014 WL 1338256, at *6 (Apr. 4, 2014).

19 We have considered all of the parties' contentions. We have rejected or sustained them to the extent that they are inconsistent or in accord with the views expressed in this opinion.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75842 / September 4, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16782

In the Matter of MOSHE YEHUDA DUNOFF, Respondent.	ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS PURSUANT TO SECTION 15(b) OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative proceedings be, and hereby are, instituted pursuant to Section 15(b) of the Securities Exchange Act of 1934 ("Exchange Act") against Moshe Yehuda Dunoff ("Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement ("Offer") that the Commission has determined to accept. Respondent admits the facts set forth in Section III. below, acknowledges that his conduct violated the federal securities laws, admits the Commission's jurisdiction over him and the subject matter of these proceedings, and consents to the entry of this Order Instituting Administrative Proceedings Pursuant to Section 15(b) of the Securities Exchange Act of 1934, Making Findings, and Imposing Remedial Sanctions ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds that:

1. Dunoff, age 28, is a resident of West Palm Beach, Florida. From January 2009 through December 2010, Dunoff was associated with an unregistered broker-dealer operating under the name of Gruber and Green, Inc.

2. On August 21, 2015, a judgment was entered by consent against Dunoff, permanently enjoining him from future violations of Section 17(a) of the Securities Act of 1933, and Section 10(b) of the Exchange Act and Rule 10b-5 thereunder, in the civil action entitled *Securities and Exchange Commission v. Moshe Yehuda Dunoff*, Civil Action No. 2:15-cv-04738, in the United States District Court for the Eastern District of Pennsylvania.

3. The Commission's complaint alleged that, from January 2009 through December 2010, Dunoff participated in a fraudulent offering scheme. As part of the scheme, Dunoff set up several U.S. based bank accounts through which he funneled more than $1.5 million in illicit proceeds obtained from defrauded investors for the purchase of securities. The complaint further alleged that Dunoff never used any of these funds to purchase securities but, instead, retained between six and ten percent of the funds as a fee for his services and diverted the remainder to accounts in the Philippines, Thailand and Indonesia, controlled by individuals operating in the name of Gruber and Green, Inc.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondent Dunoff's Offer.

Accordingly, it is hereby ORDERED pursuant to Section 15(b)(6) of the Exchange Act that Respondent Dunoff be, and hereby is barred from association with any broker, dealer, investment adviser, municipal securities dealer, municipal advisor, transfer agent, or nationally recognized statistical rating organization; and barred from participating in any offering of a penny stock, including: acting as a promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer or issuer for purposes of the issuance or trading in any penny stock, or inducing or attempting to induce the purchase or sale of any penny stock.

Any reapplication for association by the Respondent will be subject to the applicable laws and regulations governing the reentry process, and reentry may be conditioned upon a number of factors, including, but not limited to, the satisfaction of any or all of the following: (a) any disgorgement ordered against the Respondent, whether or not the Commission has fully or partially waived payment of such disgorgement; (b) any arbitration award related to the conduct that served as the basis for the Commission order; (c) any self-regulatory organization arbitration award to a customer, whether or not related to the conduct that served as the basis for the Commission order; and (d) any restitution order by a self-regulatory organization, whether or not related to the conduct that served as the basis for the Commission order.

By the Commission.

ACCOUNTING AND AUDITING ENFORCEMENT
Release No. 3681 / September 4, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16783

In the Matter of **RAYMON HOLMDAHL, CPA, and** **KANAKO MATSUMOTO, CPA,** **Respondents.**	**ORDER INSTITUTING PUBLIC ADMINISTRATIVE PROCEEDINGS PURSUANT TO SECTION 4C OF THE SECURITIES EXCHANGE ACT OF 1934 AND RULE 102(e) OF THE COMMISSION'S RULES OF PRACTICE, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative proceedings be, and hereby are, instituted pursuant to Section 4C[1] of the Securities Exchange Act of 1934 ("Exchange Act") and Rule 102(e) of the Commission's Rules of Practice[2] against Raymon Holmdahl, CPA, and Kanako Matsumoto, CPA (collectively, "Respondents").

[1] Section 4C provides, in relevant part, that:

The Commission may censure any person, or deny, temporarily or permanently, to any person the privilege of appearing or practicing before the Commission in any way, if that person is found . . . to have engaged in … improper professional conduct.

[2] Rule 102(e)(1)(ii) provides, in pertinent part, that:

The Commission may . . . deny, temporarily or permanently, the privilege of appearing or practicing before it . . . to any person who is found...to have engaged in … improper professional conduct.

II.

In anticipation of the institution of these proceedings, Respondents have each submitted an Offer of Settlement (the "Offers") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over them and the subject matter of these proceedings, which are admitted, Respondents consent to the entry of this Order Instituting Public Administrative Proceedings Pursuant to Section 4C of the Securities Exchange Act of 1934 and Rule 102(e) of the Commission's Rules of Practice, Making Findings, and Imposing Remedial Sanctions ("Order"), as set forth below.

III.

On the basis of this Order and Respondents' Offers, the Commission finds[3] that:

A. SUMMARY

1. These proceedings arise out of Respondents' improper professional conduct during Peterson Sullivan, LLP's ("Peterson Sullivan") audit of a private investment fund's financial statements for fiscal year 2013 ("FY2013"). Raymon Holmdahl and Kanako Matsumoto served as the partner and manager, respectively, on this engagement to audit the financial statements of Summit Stable Value Fund ("SSVF"), a private pooled investment vehicle advised by Summit Asset Strategies Investment Management, LLC ("Investment Management").

2. SSVF's audited financial statements for the year ended December 31, 2013, which Investment Management provided to SSVF's investors, materially overstated the value of the fund's assets by approximately $1.69 million. Because Investment Management was entitled to receive SSVF's net fund profits as its compensation for advising SSVF, the overstatement allowed Investment Management to withdraw significantly more money from SSVF than was authorized under the terms of the fund's private placement memorandum ("PPM").

3. Respondents caused Peterson Sullivan to issue an audit report containing an opinion that SSVF's financial statements for the period ended December 31, 2013, which included the valuations of the fund's assets and Investment Management's draws from the fund, were presented fairly, in all material respects, in conformity with general accepted accounting principles ("GAAP"). Peterson Sullivan's audit report also stated that the audit was conducted in accordance with auditing standards generally accepted in the United States. However, Respondents' audit failed to comply with numerous American Institute of Certified Public Accountants ("AICPA") auditing standards, the applicable professional standards for the audit of SSVF. These included failing to obtain sufficient appropriate audit evidence about the existence of certain fund assets, failing to exercise appropriate professional judgment and professional skepticism, and failing to properly supervise the financial statement audit. Respondent Holmdahl also authorized the issuance of a report with an

[3] The findings herein are made pursuant to each Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

inaccurate audit opinion. Peterson Sullivan voluntarily withdrew its audit report for SSVF's 2013 financial statements based on the material overstatement of SSVF's valuation and ownership interest in certain of its assets. Respondents' conduct, as described below, constituted improper professional conduct pursuant to Rule 102(e)(1)(iv)(B)(1) and (2).

B. RESPONDENTS

4. **Raymon Holmdahl, CPA**, 57, resides in Lake Forest Park, Washington. Holmdahl is currently a partner at Peterson Sullivan, an accounting firm registered with the Public Company Accounting Oversight Board ("PCAOB"), and has worked for Peterson Sullivan since 1980. Holmdahl served as the engagement partner for Peterson Sullivan's FY2013 audit of SSVF and related audit work, and served as an engagement partner for audits of public companies. Holmdahl is a certified public accountant licensed in Washington State.

5. **Kanako Matsumoto, CPA**, 50, resides in Seattle, Washington. Matsumoto is currently a senior manager at Peterson Sullivan, and initially joined the firm in 1999. Matsumoto served as the manager for Peterson Sullivan's FY2013 audit of SSVF and related audit work, and has worked on audits of several broker-dealers. Matsumoto is a certified public accountant licensed in Washington State.

C. OTHER RELEVANT ENTITIES

6. **Summit Asset Strategies Investment Management, LLC ("Investment Management")** is a Washington limited liability company based in Bellevue, Washington and served as the investment adviser to three private investment funds, including SSVF. During the relevant timeframe, Investment Management, through its principal/CEO, made investment decisions on behalf of SSVF and was entitled to receive SSVF's net fund profits as its compensation.

7. **Summit Stable Value Fund, LLC ("SSVF")** is a Washington limited liability company based in Bellevue, Washington. SSVF is a private pooled investment vehicle formed by Investment Management's principal in 2010 and was at all times advised by Investment Management.

D. FACTS

Investment Management Materially Overstated the Value of SSVF's Assets

8. According to SSVF's PPM, Investment Management was entitled to receive SSVF's net fund profits as compensation for its work in advising SSVF. The PPM permitted Investment Management to withdraw estimated "net fund profits" (defined as the profit less principal, interest payments, and fund expenses) from the fund on a monthly basis, but also required Investment Management to "true up" any distributions to match net fund profits as "determined in the Fund's annual audit." Accordingly, it was important for Investment Management to properly value SSVF's assets, as its compensation was specifically tied to the unrealized gains and losses in those assets each year.

9. Investment Management caused SSVF to materially overstate its asset values in its FY2013 financial statements. Specifically, Investment Management falsely claimed that SSVF had purchased 500,000 shares of an entity called Prime Pacific Bank in December 2012. Because the Prime Pacific Bank security was purportedly illiquid, Investment Management developed a financial model to value this asset. For FY2013, this model showed that SSVF's interest in Prime Pacific Bank had more than tripled in value from the shares' purported purchase price of $1.00 per share to $3.22 per share by the end of the fiscal year. As such, SSVF's FY2013 financial statements presented the value of the claimed Prime Pacific Bank security as approximately $1.6 million. The putative increase in Prime Pacific Bank's value enabled Investment Management to withdraw significantly more money as net fund profits from SSVF than it would otherwise have been entitled to under the terms of SSVF's PPM.

10. In reality, SSVF did not own any shares of Prime Pacific Bank. Instead, SSVF held 250,000 shares in a different entity, Prime Pacific Financial Services, Inc. ("PPFS"), which had a quoted trading price ranging between $0.27 per share to $0.70 per share in 2012 and 2013. Accordingly, SSVF's interest in PPFS had a value worth less than $175,000 at fiscal year-end 2013. As a result of these irregularities, SSVF's financial statements for FY2013 were materially overstated.

Respondents' Deficient FY2013 Audit

11. Peterson Sullivan's audit report for SSVF's FY2013 financial statements states that the audit was conducted in accordance with "auditing standards generally accepted in the United States." These standards are codified by AICPA professional auditing standards.[4] Holmdahl, as engagement partner, was responsible for supervising the audit team and reviewing audit work for compliance with these professional standards. Holmdahl was also responsible for considering whether the audit team adequately documented in the working papers their findings, analysis, and information upon which they relied, and that the working papers provided a reasonable basis to render an audit opinion. Matsumoto, as audit manager, was principally responsible for performing the audit procedures, supervising junior staff, and assisting Holmdahl in his role as engagement partner.

12. During the FY2013 audit, Holmdahl approved the audit program and reviewed the working papers with Matsumoto. At the outset, Holmdahl and Matsumoto each recognized that the presentation of SSVF's asset values posed "significant" risk, and could result in a material misstatement of the fund's financial statements. In addition, Respondents were aware that the fund's predecessor auditor had disagreed with Investment Management's valuation of the purported Prime Pacific Bank security and subsequently resigned due to its inability to "gather adequate audit evidence to support audit opinions" regarding, among other things, the existence and valuation of assets, during the FY2013 audit. In response to these heightened risks,

[4] GAAS and the professional standards applicable to the preparation and issuance of audit reports are embodied in Statements on Auditing Standards, as issued by the Auditing Standards Board of the AICPA and codified in the *U.S. Auditing Standards-AICPA (clarified).* Relevant auditing standards will be referenced as "AU-C" herein.

Respondents specifically planned in their audit procedures to rely on third-party confirmation of all investment account balances and investment income.

13. Despite knowledge of these risks, Respondents failed to perform the fund's FY2013 audit in accordance with AICPA standards, particularly with respect to the fund's investments. Among the deficiencies, Respondents failed: (i) to obtain sufficient appropriate audit evidence about the existence of certain fund assets; (ii) to exercise appropriate professional judgment and professional skepticism; and (iii) to properly supervise the financial statement audit. Respondent Holmdahl, as engagement partner, also authorized the issuance of a report with an inaccurate audit opinion. As a result of these deficiencies, Respondents caused Peterson Sullivan to issue an unmodified opinion with respect to the fund's materially overstated financial statements.

Respondents Failed to Obtain Sufficient Appropriate Audit Evidence Regarding the Fund's Purported Investment in Prime Pacific Bank

14. AICPA Auditing Standards ("AU-C") require the auditor to "obtain sufficient appropriate audit evidence … on which to base the auditor's opinion…" (AU-C § 500.04) and to "…design and perform audit procedures that are appropriate in the circumstances for the purpose of obtaining sufficient appropriate audit evidence." (AU-C § 500.06).

15. Professional standards also require the auditor (1) to "perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure" (AU-C § 330.18); (2) to "design and implement overall responses to address the assessed risks of material misstatement at the financial statement level" (AU-C 330.05); (3) to "design and perform further audit procedures whose nature, timing, and extent are based on, and are responsive to, the assessed risks of material misstatement at the relevant assertion level" (AU-C 330.06); and (4) to "consider whether external confirmation procedures are to be performed as substantive audit procedures" (AU-C 330.19).

16. Respondents planned to obtain audit evidence of SSVF's investments through third party confirmation, but ultimately failed to send third party confirmation letters for the fund's purported investment in Prime Pacific Bank. Despite repeatedly recognizing in their workpapers the need for heightened scrutiny, Respondents did not confirm the fund's investment in PPFS with the bank or any third party for purposes of auditing the investment balance. In failing to follow their own audit plan, Respondents did not learn that the fund's purported Prime Pacific Bank investment did not exist. Had they executed on their plan to confirm the existence of investments, Respondents would have likely learned that SSVF's claimed investment in Prime Pacific Bank was nonexistent, and that it should not have been included in the fund's FY2013 financial statements.

17. In the absence of performing the planned third party confirmations, Respondents did not perform alternative or additional procedures to test the existence of SSVF's purported investment in Prime Pacific Bank. Indeed, the working papers do not reflect any audit procedures taken by Respondents to obtain sufficient appropriate audit evidence relevant to the existence of the Prime Pacific Bank security.

Respondents Committed Similar Failures With Respect to Other Assets Included in SSVF's Financial Statements

18. Respondents similarly failed to obtain sufficient appropriate audit evidence for two other assets reported in the fund's FY2013 financial statements: (1) SSVF's claimed investment in a Korean entity called Summit Asset Strategies Korea Co. Ltd. ("SASK"), which purportedly was a management consulting services company; and (2) SSVF's claimed $3.6 million receivable from SASK. For instance, Respondents planned to test the existence of SSVF's investment in SASK through third party confirmations, but ultimately failed to do so. The workpapers otherwise reflect that Respondents did not perform other audit procedures to test the existence of these supposed assets or perform any alternative procedures to obtain sufficient appropriate audit evidence regarding the existence of these assets. These assets were significant to SSVF's FY2013 financial statements and comprised 63% of the fund's reported assets as of fiscal year-end 2013.

Respondents Failed to Exercise Appropriate Professional Judgment and Professional Skepticism

19. Under GAAS, auditors must exercise appropriate professional judgment and professional skepticism. (AU-C §200.08.) Professional skepticism includes demonstrating a questioning mind and a critical assessment of audit evidence. (AU-C § 200.14). In addition, AU-C §200.17 requires auditors to "plan and perform an audit with professional skepticism, recognizing that circumstances may exist that cause the financial statements to be materially misstated."

20. Respondents did not exercise the appropriate professional judgment when conducting the audit and issuing an opinion on SSVF's financial statements for FY2013. Respondents' assessment of the risks posed by SSVF's asset values should have caused them to place greater emphasis on obtaining sufficient appropriate audit evidence regarding the existence of the fund's investments. They did not. The working papers do not document any audit procedures taken by Respondents to address these risks.

Respondents Failed to Properly Supervise the Financial Statement Audit

21. GAAS requires the engagement partner to "take responsibility for the ... direction, supervision, and performance of the audit engagement in compliance with professional standards…." (AU-C § 220.17). "The engagement partner should take responsibility for reviews being performed in accordance with the firm's review policies and procedures." (AU-C § 220.18). Moreover, the engagement partner should review the audit documentation, have discussions with the audit engagement team and "be satisfied that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued." (AU-C § 220.19).

22. Holmdahl failed to adequately supervise the FY2013 audit. Although Holmdahl appreciated the significant risks posed by the fund's valuations – as demonstrated by his approval of the audit plan – he did not adequately review the audit documentation to satisfy

himself that sufficient appropriate audit evidence was obtained about the existence of the fund's purported investments in Prime Pacific Bank and SASK.

23. GAAS provides that the engagement partner may use the assistance of other members of the engagement team and delegate certain procedures. (AU-C § 220.6 and (AU-C § 220.10). Matsumoto did not adequately supervise and review the audit team's response to the risk of material misstatement for SSVF's assets. Matsumoto knew that SSVF's asset values posed risks during the audit and planned to perform third party confirmations for SSVF's purported Prime Pacific Bank investment. Notwithstanding the plan, Matsumoto did not adequately review the work of junior staff members to consider whether: (i) the nature, timing, and extent of the work performed is appropriate and without need for revision; (ii) the work performed supports the conclusions reached and is appropriately documented; (iii) the evidence obtained is sufficient and appropriate to support the auditor's report; and (iv) the objectives of the engagement procedures have been achieved.

Holmdahl Was Responsible For Authorizing the Issuance of a Report with an Inaccurate Audit Opinion

24. GAAS requires an unmodified opinion to state that the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework, which, in the case of SSVF, is US-GAAP. (AU-C §700.35). An auditor should modify its opinion when it concludes that the financial statements as a whole are materially misstated or is unable to obtain sufficient appropriate audit evidence to conclude that they are free from material misstatement. (AU-C §705.07).

25. As audit partner with ultimate responsibility for SSVF's financial statement audit for FY2013, Holmdahl approved the issuance of an audit report containing an unmodified opinion. However, the fund's financial statements materially overstated its assets and "net fund profits," and as such, Peterson Sullivan should not have issued an audit report containing an unmodified opinion. Peterson Sullivan has since withdrawn its report and opinion based on the material overstatement of SSVF's valuation and ownership interest in its assets.

E. VIOLATIONS

26. Section 4C of the Exchange Act and Rule 102(e)(1)(iv) of the Commission's Rules of Practice define improper professional conduct with respect to persons licensed to practice as accountants. Section 4C of the Exchange Act and Rule 102(e)(1)(iv)(B) of the Commission's Rules of Practice provide that, with respect to persons licensed to practice as accountants, negligent improper professional conduct includes either (1) "[a] single instance of highly unreasonable conduct that results in a violation of applicable professional standards in circumstances in which an accountant knows, or should know, that heightened scrutiny is warranted," or (2) "[r]epeated instances of unreasonable conduct, each resulting in a violation of applicable professional standards, that indicate a lack of competence to practice before the Commission."

27. As a result of the conduct described above, Respondents engaged in improper professional conduct within the meaning of Section 4C of the Exchange Act and Rule

102(e)(1)(iv)(B)(1)&(2) of the Commission's Rules of Practice. Respondents engaged in a single instance of highly unreasonable conduct where heightened scrutiny was warranted, or alternatively, repeated instances of unreasonable conduct indicating a lack of competence to practice before the Commission.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in each Respondent's Offer.

Accordingly, pursuant to Section 4C of the Exchange Act and Rule 102(e) of the Commission's Rules of Practice, it is hereby ORDERED that:

A. Holmdahl is denied the privilege of appearing or practicing before the Commission as an accountant.

B. Matsumoto is denied the privilege of appearing or practicing before the Commission as an accountant.

C. After three years from the date of this order, either Respondent may request that the Commission consider his or her reinstatement by submitting an application (attention: Office of the Chief Accountant) to resume appearing or practicing before the Commission as:

1. a preparer or reviewer, or a person responsible for the preparation or review, of any public company's financial statements that are filed with the Commission. Such an application must satisfy the Commission that their work in their practice before the Commission will be reviewed either by the independent audit committee of the public company for which they work or in some other acceptable manner, as long as they practice before the Commission in this capacity; and/or

2. an independent accountant. Such an application must satisfy the Commission that:

(a) Respondent, or the public accounting firm with which he or she is associated, is registered with the PCAOB in accordance with the Sarbanes-Oxley Act of 2002, and such registration continues to be effective;

(b) Respondent, or the registered public accounting firm with which he or she is associated, has been inspected by the PCAOB and that inspection did not identify any criticisms of or potential defects in the quality control system relating to the work of Respondent that will indicate that Respondent will not receive appropriate supervision;

(c) Respondent has resolved all disciplinary issues with the PCAOB, and has complied with all terms and conditions of any sanctions imposed by the PCAOB (other than reinstatement by the Commission); and

(d) Respondent acknowledges his or her responsibility, as long as he or she appears or practices before the Commission as an independent accountant, to comply with all requirements of the Commission and the PCAOB, including, but not limited to, all requirements relating to registration, inspections, engagement quality reviews, and quality control standards.

D. The Commission will consider an application by Respondent to resume appearing or practicing before the Commission provided that his or her CPA license is current and he or she has resolved all other disciplinary issues with the applicable boards of accountancy. However, if CPA licensure is dependent on reinstatement by the Commission, the Commission will consider an application on its other merits. The Commission's review may include consideration of, in addition to the matters referenced above, any other matters relating to Respondent's character, integrity, professional conduct, or qualifications to appear or practice before the Commission.

By the Commission.

Release No. 3682 / September 4, 2015

Admin. Proc. File No. 3-15659

In the Matter of

THOMAS D. MELVIN, CPA

OPINION OF THE COMMISSION

RULE 102(e)(3) PROCEEDING

Grounds for Remedial Action

Civil Injunction

Certified public accountant was permanently enjoined from violating antifraud provisions of the federal securities laws. *Held*, it is in the public interest to permanently disqualify respondent from appearing or practicing before the Commission.

APPEARANCES:

C. Brian Jarrard, C. Brian Jarrard, LLC, for Thomas D. Melvin.

Joshua A. Mayes, for the Division of Enforcement.

Appeal filed: October 14, 2014
Last brief received: March 3, 2015

Thomas D. Melvin, a certified public accountant and a principal in the accounting firm of Melvin, Rooks, and Howell in Griffith, Georgia, appeals from an initial decision permanently disqualifying him from practicing before the Commission, based on his having been enjoined from violating antifraud provisions of the federal securities laws and rules thereunder.[1] We base our findings on an independent review of the record, except with respect to those findings not challenged on appeal.

I. BACKGROUND

A. Melvin consented to the entry of an injunction in federal district court.

On April 10, 2013, Melvin settled civil proceedings by consenting to the entry of a final judgment (the "Injunctive Order") that permanently enjoined him from violating Exchange Act Sections 10(b) and 14(e) and Exchange Act Rules 10b-5 and 14e-3.[2] As part of that settlement, he agreed that, "in any disciplinary proceeding before the Commission based on the entry of the injunction in this action, Melvin understands that he shall not be permitted to contest the factual allegations of the complaint in this action."

The complaint in the civil proceeding (the "Complaint") alleged that, in December 2009, Melvin learned about a pending tender offer involving the stock of Chattem, Inc., a Tennessee-based distributor of over-the-counter pharmaceutical products. Melvin learned of the tender offer from a longtime accounting client, who was a Chattem director and who consulted Melvin to "mitigat[e] the personal tax liability that would accompany [the] tender offer and forced exchange of" Chattem stock options the director held. But, according to the Complaint, the client "made clear," and Melvin understood, that the tender offer information was confidential and disclosed "solely for the purpose of obtaining tax advice." Nonetheless, within an hour of discussing the tender offer with this client, Melvin called a longstanding client of his accounting practice and told him of the pending offer, including the information that Chattem was to be acquired in the near future and that the purchase price for Chattem would be approximately $90 per share. Over the next few days, Melvin made similar disclosures to two other long-time accounting clients and a partner in his accounting practice.[3] Each of the four tippees who learned of the tender offer from Melvin traded in Chattem stock, the price of which rose

---

1 *Thomas D. Melvin, CPA*, Initial Decision Release No. 673, 2014 WL 4678751 (Sept. 22, 2014).

2 15 U.S.C. §§ 78j(b), 78n(e); 17 C.F.R. §§ 240.10b-5, 240.14e-3. Melvin also agreed to disgorge approximately $61,328 in profits and $6,995 in prejudgment interest (for which he was jointly and severally liable with other persons involved in the misconduct), and to pay a civil penalty of $108,930.05.

Melvin signed a second consent on June 28, 2013. There is no material difference between the two consents with respect to the issues on appeal.

3 Two of the accounting clients were also close friends of Melvin.

substantially on the day the tender offer was announced.[4] Moreover, Melvin's four tippees told five other people about the Chattem tender offer; these five tippees also traded in the stock, and one of them tipped two additional people, who also traded. Eventually, according to the Complaint, at least ten individuals (not including Melvin) traded the stock based on inside information obtained directly or indirectly from Melvin, profiting by more than $550,000.[5]

The Georgia Board of Accountancy Code of Professional Conduct (the "Code") expressly provided that a Georgia-licensed CPA, such as Melvin, could not, without the consent of his client, disclose any confidential information pertaining to the client that the CPA obtained in the course of performing professional services. The Complaint alleged that Melvin "[d]isregard[ed] the duty of confidentiality owed to his client and imposed on him by the [Code,] misappropriated the material non-public information . . . and disclosed" that information to others. His misappropriation and disclosures were alleged to have provided him a benefit in the form of furthering his professional and personal relationships.

B. An administrative law judge permanently disqualified Melvin from practicing before the Commission.

On December 20, 2013, we issued an Order Instituting Proceedings ("OIP"), based on the Injunctive Order and pursuant to Rule of Practice 102(e)(3)(i),[6] and temporarily suspended Melvin from appearing or practicing before the Commission.[7] In doing so, we found that suspending Melvin was "appropriate and in the public interest."[8] Melvin filed a timely petition to lift the temporary suspension,[9] which we denied.[10] We also directed that a hearing be held before a law judge to "determine[] what, if any, action may be appropriate to protect the

---

4 The acquisition price represented a roughly 33% premium over the closing price for Chattem stock on the day preceding announcement of the merger.

5 The Complaint alleges that Melvin's four tippees "and six others" traded in the securities of Chattem based on the material non-public information that Melvin disclosed, but it enumerates a total of eleven traders: Melvin's four tippees, their five tippees, and two more remote tippees. Our determination that Melvin's permanent disqualification from appearing or practicing before the Commission is an appropriate sanction would be the same whether there were ten or eleven tippees.

Commission's processes" in light of the Injunctive Order.[11] On September 22, 2014, the law judge issued an initial decision permanently disqualifying Melvin from practicing before the Commission.[12] This appeal followed.[13]

II. Analysis

A. Burden of Proof and Standard of Review

The Division introduced evidence, and it is undisputed, that Melvin was permanently enjoined from violating "provision[s] of the Federal securities laws."[14] As a result, under our rules, "the burden" passed to Melvin "to show cause" why he should not be censured or disqualified from appearing and practicing before us. In determining whether that burden has been met and assessing an appropriate sanction, we are guided by the strong and clear public interest in ensuring the integrity of our processes.[15] That assessment is, in turn, informed by our consideration of public interest factors we traditionally consider in other types of administrative proceedings, including the egregiousness of the respondent's actions, the isolated or recurrent nature of the infraction, the degree of scienter involved, the sincerity of the respondent's assurances against future violations, the respondent's recognition of the wrongful nature of his or her conduct, and the likelihood of future violations.[16] Our application of these factors is flexible

[11] *Id.* at *2. *See* Rule 102(e)(3)(iii), 17 C.F.R. § 201.102(e)(3)(iii) (providing for Commission action in response to petition filed pursuant to Rule 102(e)(3)(ii)).

[12] *Thomas D. Melvin, CPA*, 2014 WL 4678751, at *9.

[13] The Initial Decision allowed twenty-one days after service of the Initial Decision for filing petitions of review, citing Rule of Practice 360, 17 C.F.R. § 201.360. But Rule of Practice 540, 17 C.F.R. § 201.540, requires that a petition for review of an initial decision as to whether a temporary sanction shall be made permanent must be filed within ten days after service of the initial decision. The Initial Decision was served on Melvin on September 22, 2014, and Melvin filed his petition for review of October 14, 2014. Although the petition was not timely filed in accordance with Rule 540, we have determined, in an exercise of our discretion, to grant review in this instance given the longer period specified in the Initial Decision.

[14] Rules 102(e)(3)(i)(A), 102(e)(3)(iv); 17 C.F.R. §§ 201.102(e)(3)(i)(A), 102(e)(3)(iv).

[15] *See, e.g.*, *Michael C. Pattison, CPA*, Exchange Act Release No. 67900, 2012 WL 4320146, at *5 (Sept. 20, 2012) ("Rule of Practice 102(e) has been the primary tool available to the Commission to preserve the integrity of its processes . . . .") (citing additional authority).

[16] *See, e.g.*, *id.* at *8 (102(e)(3) proceeding; citing *Steadman v. SEC*, 603 F.2d 1126, 1140 (5th Cir. 1979), *aff'd on other grounds*, 450 U.S. 91 (1981)); *Chris G. Gunderson, Esq.*, Exchange Act Release No. 61234, 2009 WL 4981617, at *5 (Dec. 23, 2009) (same).

and no single factor is dispositive.[17] We also consider the extent to which a sanction may have a deterrent effect.[18]

Applying these factors, and based on our consideration of all the circumstances surrounding Melvin's misconduct, we find that he represents such a significant threat to the integrity of our processes that he must be permanently disqualified from appearing or practicing before us. Beginning almost immediately after receiving what he understood to be confidential information, Melvin, acting with scienter,[19] directly tipped three clients and his partner in separate conversations, abusing his position of trust to enhance professional relationships that could yield him pecuniary gain. By misappropriating the information and disclosing it for personal benefit, Melvin defrauded the client whose information he misused, "feigning fidelity to the source of [the misappropriated] information" and thus engaging in "fraud akin to embezzlement."[20] Melvin's four tippees continued to pass along the misappropriated information, such that Melvin's misconduct ultimately led to trading by at least ten individuals. Moreover, Melvin's disclosures were particularly serious because the non-public information related to a tender offer,[21] and the specific details he passed along about the imminence of the tender offer and the anticipated share price enhanced the tippees' ability to profit from the misappropriated information. We have stated that conduct that violates the antifraud provisions of the federal securities laws, including insider trading, is "especially serious"[22] and warrants "'the severest of sanctions.'"[23] And we have held that "'[f]idelity to the public interest' requires a severe sanction when a respondent's misconduct involves fraud because the 'securities business is

one in which opportunities for dishonesty recur constantly.'"[24] Further, we have recognized the applicability in disciplinary proceedings under Rule 102(e) of the general rule that "an antifraud injunction 'ordinarily' warrants barring participation in the securities industry."[25]

Melvin violated explicit professional conduct standards and betrayed the trust placed in him by a longtime client seeking tax accounting advice. As we previously stated in the analogous context of an investment banker who disclosed a client's confidential information in order to favor his own interest in establishing a collegial relationship,

> [t]he ability to credibly assure a client that [obviously confidential] information will be used solely to advance the client's own interests is central to any securities professional's ability to provide informed advice to clients. Disclosure of such information jeopardizes the foundation of trust and confidence crucial to any professional advising relationship.[26]

Melvin's unethical and illegal actions were, in our view, clearly egregious. The betrayal of trust, the rapidity with which he shared the confidential information, the details he passed on about the tender offer, and the tipping of multiple business associates all contribute to our assessment of the gravity of his misconduct. Although Melvin's violation involved one misappropriation of client information, it was not an 'isolated' infraction, as he passed the information along to four people at four different times. Thus, Melvin chose to breach his client's trust on four different occasions, each giving him a chance to reflect on his actions. We see little recognition by Melvin of the wrongfulness of his actions and find that, given those actions, he constitutes an unacceptable threat to our processes. We further find that Melvin's permanent disqualification serves important deterrent objectives, both for him and other securities industry professionals.[27]

---

[24] *Id.* (quoting *Gunderson*, 2009 WL 4981617, at *5).

[25] *Gunderson*, 2009 WL 4981617, at *5 (quoting *Justin F. Ficken*, Investment Advisers Act Release No. 2803, 2008 WL 4610345, at *3 (Oct. 17, 2008)).

[26] *Thomas W. Heath, III*, Exchange Act Release No. 59223, 2009 WL 56755, at *10 (Jan. 9, 2009), *petition denied*, 586 F.3d 122 (2d Cir. 2009).

[27] *Cf. Steadman*, 603 F.2d at 1140 (stating that a compelling reason supporting a bar would be that "the nature of the conduct mandates permanent debarment as a deterrent to others in the industry").

Melvin does not dispute the allegations that form the basis for the Injunctive Order,[28] but argues that they do not justify his permanent disqualification. In support, he asserts that he did not personally trade on the information or benefit financially from his actions. According to Melvin, the misappropriation was an "isolated event in an otherwise law-abiding and productive life." He further claims that he has recognized his misconduct by agreeing to settle the matter and timely pay the amounts agreed to in the settlement. Rather than permanent disqualification, Melvin argues that "[i]t is appropriate to impose a three year bar" which is consistent, he asserts, with settlement discussions he had with Division counsel.[29] Although he acknowledges that the Commission is not bound by such discussions, he asserts that it should nevertheless consider what "the SEC employee most familiar with" the case believes would be "appropriate given all that [the employee] knew of the case."

We are unpersuaded by Melvin's effort to minimize the seriousness of his misconduct. His argument that his conduct was not so bad because he was "only a tipper" fails to acknowledge how destructive that conduct was. Melvin's misconduct created substantial losses, or the risk of substantial losses, to other persons: he defrauded Chattem of the exclusive use of the tender offer information, conduct that the Supreme Court has likened to embezzlement,[30] and he undermined the integrity of the negotiating process for the tender offer, thus creating the risk of substantial losses to both the target company and the potential acquirer.[31] Moreover, the

---

28 As noted, Melvin agreed that he would not challenge allegations supporting the Injunctive Order in a related Commission disciplinary proceeding. *See* Rule of Practice 101(a)(3), 17 C.F.R. § 201.101(a)(3) (defining "disciplinary proceeding" to mean "an action pursuant to Rule 102(e)"). Melvin is therefore precluded from contesting the Complaint's allegations here, and we may consider them in determining an appropriate sanction. *See, e.g.*, *Siris v. SEC*, 773 F.3d 89, 96 (D.C. Cir. 2014) (holding that the Commission "was entitled to rely on the allegations of the complaint" in deciding whether to impose a permanent bar in a follow-on proceeding based on a consent judgment, where the terms of the consent judgment "unambiguously barred Siris from making any future challenge to the allegations in the complaint") (citations omitted); *Toby G. Scammell*, 2014 WL 5493265, at *3, 7 (refusing to consider "claims that impermissibly contradict the allegations of the complaint" in determining sanctions in follow-on proceeding based on injunction entered by consent, where Scammell had "specifically agreed [in the consent agreement] that he would not contest the factual allegations of the complaint in any administrative proceeding before the Commission").

29 Melvin asserts in his pleadings that he and Division staff agreed, in connection with discussions regarding settlement of the civil proceedings, that he also would "not be banned from practicing before the Commission . . . in excess of three years." He further asserts that he first learned that the Commission was "not honoring the agreement" several months later, after the OIP was issued. Nevertheless, Melvin concedes in his brief that "the Commission itself is not bound by the commitments of its [D]ivision counsel."

30 *See O'Hagan*, 521 U.S. at 652-54.

31 *See Litton Indus., Inc. v. Lehman Bros. Kuhn Loeb Inc.*, 967 F.2d 742, 747-51 (2d Cir. 1992) (finding that insider trading in advance of a tender offer can artificially inflate the price the acquirer must pay for the acquisition, resulting in overpayment by the acquirer and its

(continued...)

substantial gains by all of the tippees who benefited from the confidential information passed along by Melvin are attributable to Melvin, even if Melvin did not personally trade.[32] Melvin's tipping his clients and partner in the expectation that they would trade is equivalent to Melvin's trading himself and then giving the trading profits to those individuals.[33] Had Melvin not misappropriated the confidential client information and passed it along, the ensuing improper trading, which resulted in illegal profits of more than half a million dollars, would not have happened, making Melvin's conduct in some respects more "directly culpable" than that of the tippees who personally traded.[34] And, as discussed above, Melvin is not permitted to contest the fact that he personally benefitted from his unlawful disclosures by furthering personal and professional relationships.[35] Despite Melvin's attempt to minimize the benefits he received, they apparently were sufficient to motivate the multiple instances of misconduct at issue here, providing reason to believe that they could do so again. His actions reveal a highly troubling willingness to ignore a fundamental professional obligation to respect and protect client confidence along with a willingness to instigate and facilitate fraudulent stock trading activity.[36] As we have held,

> [t]he prohibitions against insider trading [in our securities laws] play an essential role in maintaining the fairness, health, and integrity of our markets. We have long recognized that the fundamental unfairness of insider trading harms not only

---

(...continued)
shareholders); *SEC v. Gaspar*, No. 83 Civ. 3037, 1985 WL 521, at *15-17 (S.D.N.Y. Apr. 16, 1985) (escalation in share price resulting from insider trading decreased attractiveness of premium offered, contributing to collapse of tender offer).

32 *See, e.g.*, *SEC v. Warde*, 151 F.3d 42, 49-50 (2d Cir. 1998) ("A tippee's gains are attributable to the tipper, regardless [of] whether benefit accrues to the tipper.").

33 *See Dirks v. SEC*, 463 U.S. 646, 659, 663-64 (1983) (citing Exchange Act Section 20(b), 15 U.S.C. § 78t(b), which "mak[es] it unlawful to do indirectly 'by means of any other person' any act made unlawful by the federal securities laws," and finding that when a person "makes a gift of confidential information to a trading relative or friend," that is equivalent to "trading by the [person] himself followed by a gift of the proceeds to the recipient").

34 *Bateman Eichler, Hill Richards, Inc. v. Berner*, 472 U.S. 299, 312-13 & n.23 (1985).

35 *See Dirks*, 463 U.S. at 663-64 (recognizing that a breach of fiduciary duty and exploitation of nonpublic information for insider trading purposes may be shown when a tipper receives a "direct or indirect personal benefit from the disclosure," such as when the tipper "makes a gift of confidential information to a trading relative or friend").

36 *See, e.g.*, *Thomas W. Heath, III*, 2009 WL 56755, at *4 (finding that investment banker who disclosed confidential client information "violated one of the most fundamental ethical standards in the securities industry").

> individual investors, but also the very foundations of our markets, by undermining investor confidence in the integrity of our markets.[37]

Our view that conduct like Melvin's merits significant sanctions is evident from a similar case in which we found that a bar was an appropriate sanction for insider trading even though the tipper was not charged with trading and received no direct economic benefit for the tip he provided.[38]

Nor do we consider it significant that, as Melvin claims, he discussed a possible settlement with our staff that would have resulted in his disqualification for a number of years

---

37 *Toby G. Scammell*, 2014 WL 5493265, at *6 (quoting *Selective Disclosure & Insider Trading*, Exchange Act Release No. 42259, 1999 WL 1217849, at *17 (Dec. 20, 1999), and citing H.R. Rep. No. 98-355, at 2 (1984), *reprinted in* 1984 U.S.C.C.A.N. 2274, 2275, 1983 WL 25397, at *2 (finding that insider trading destroys the integrity of the marketplace "by undermining the public's expectations of honest and fair securities markets where all participants play by the same rules")).

38 *See Robert Bruce Lohmann*, Exchange Act Release No. 48092, 2003 WL 21468604, at *4-5 (June 26, 2003). *Cf. SEC v. Gupta*, No. 11 Civ. 7566, 2013 WL 3784138, at *4 (S.D.N.Y. July 17, 2013) (permanently enjoining Gupta from further violations of the securities laws and imposing officer-director and associational bars "notwithstanding the fact that Gupta's long-term pecuniary gain from the insider trading conspiracy was speculative").

Melvin does not raise any argument challenging the factual premises that underlie his liability as a tipper under Exchange Act Section 10(b) or 14(e) and Exchange Act Rules 10b-5 and 14e-3. Nor can he, because as part of settling the civil proceeding he agreed not to contest the factual allegations of the Complaint in this disciplinary proceeding. Accordingly, we understand Melvin's argument that he did not personally trade as an attempt to establish a mitigating factor regarding relief, not as a challenge to his underlying liability. In any event, there would be no merit to such a challenge to his liability. The Complaint alleged that Melvin's misappropriation and disclosures were alleged to have provided him a benefit in the form of furthering both his personal and professional relationships. *See Dirks*, 463 U.S. at 663-64 ("reputational benefit that will translate into future earnings" is sufficient); *SEC v. Yun*, 327 F.3d 1263, 1280 (11th Cir. 2003) (sufficient personal benefit where tipper and tippee worked closely together and were frequently partners in real estate deals); *SEC v. Sergeant*, 229 F.3d 68, 77 (1st Cir. 2000) (tipping "to maintain a useful networking contact" is sufficient personal benefit); *United States v. Newman*, 773 F.3d 438, 452-53 (2d Cir. 2014) (tipping that "could yield future pecuniary gain," including a "referr[al]" or monetary "commission," is sufficient). The allegation that Melvin had a close personal relationship with his tippees independently supports the sufficiency of his personal benefit. *See Dirks*, 463 U.S. at 663-64; *Lohmann*, 2003 WL 21468604, at *4; *Yun*, 327 F.3d at 1275; *Sargent*, 229 F.3d at 77; *SEC v. Obus*, 693 F.3d 276, 285 (2d Cir. 2012). Finally, a breach of fiduciary duty for personal benefit is not an element of liability under Exchange Act Section 14(e) and Rule 14e-3. *See O'Hagan*, 521 U.S. at 676; *Tender Offers*, 1980 WL 20869, at *5-13 (Sept. 4, 1980).

rather than permanently. As he acknowledges, we are not bound by such discussions,[39] and we have repeatedly held that sanctions imposed in connection with settlements are frequently less severe than those that result from litigation.[40] There is no suggestion that Melvin was in any way prevented from identifying the circumstances that, according to him, led a member of our staff to conclude (or that otherwise support his position) that disqualification for a term of years is sufficient.[41] We have carefully considered the evidence he has presented and his arguments in mitigation, but conclude that they do not justify any leniency.

Although Melvin asserts that he "has recognized the wrongful nature of what transpired," his arguments on appeal support a contrary conclusion. His contention that although his conduct was bad, the conduct of his partner, who also engaged in fraudulent misconduct related to the Chattem tender offer, was worse, indicates that he does not appreciate the seriousness of his misconduct.[42]

---

39 *See, e.g.*, *CFTC v. Field*, 249 F.3d 592, 594 (7th Cir. 2001) ("[A] settlement on behalf of the United States may be enforced only if the person who entered into the settlement had actual authority to settle the litigation."). *See also* SEC Division of Enforcement, Enforcement Manual, available at http://www.sec.gov/divisions/enforce/enforcementmanual.pdf, Section 2.5.1 (noting that "most settlements of previously authorized enforcement actions . . . require Commission authorization" and describing procedure for obtaining such authorization); *Eric J. Brown*, Exchange Act Release No. 66469, 2012 WL 625874, at *19 & n.67 (Feb. 27, 2012) ("[O]ur rules are clear on this point: an offer to settle is binding only if formally submitted to, and approved by, the Commission . . . ." (citing Rule of Practice 240, 17 C.F.R. § 201.240 ("Final acceptance of any offer of settlement will occur only upon the issuance of findings and an order by the Commission.")), *aff'd on other grounds sub nom.*, *Collins v. SEC*, 736 F.3d 521 (D.C. Cir. 2013).

40 *See, e.g.*, *Pattison*, 2012 WL 4320146, at *11 ("[R]espondents who offer to settle may properly receive lesser sanctions than they otherwise might have," because in settling cases "'we take into account pragmatic considerations such as the avoidance of time-and-manpower-consuming adversary proceedings.'") (quoting *Nassar & Co.*, 47 S.E.C. 20, 26 & n.3 (1978), *aff'd*, 600 F.2d 280 (D.C. Cir. 1979)).

41 *Cf.*, *e.g.*, *Jose P. Zollino*, Exchange Act Release No. 55107, 2007 WL 98919, at *4 (Jan. 16, 2007) (although respondent in a follow-on proceeding may not challenge the allegations that provide the basis for the underlying injunctive order, he or she is "free to introduce evidence regarding the 'circumstances surrounding those allegations as a means of addressing 'whether sanctions should be imposed in the public interest'") (quoting *Schield Mgmt. Co.*, Exchange Act Release No. 53201, 2006 WL 231642, at *6 (Jan. 31, 2006)).

42 Melvin asserts that his partner "admitted to misappropriating" confidential information about the Chattem tender offer, but cites nothing to support this assertion. We are unaware of any allegations that the partner misappropriated confidential information, as opposed to trading on the basis of confidential information that Melvin disclosed to him. Based on the premise that the partner's conduct was worse than his, Melvin argues that any sanction imposed on him should be less serious than the permanent suspension from appearing or practicing as an accountant imposed on his partner.

(continued...)

C. The proceeding was timely instituted.

Melvin also challenges his disqualification on procedural grounds, arguing that "these proceedings were untimely under clearly established federal law," because the order of temporary suspension (which was included in the OIP) was not issued until December 20, 2013, more than 90 days after entry of the Injunctive Order. Under Rule of Practice 102(e)(3), the temporary suspension order had to be issued no "more than 90 days after the date on which the final judgment has become effective, whether upon completion of review or appeal procedures or because further review or appeal procedures are no longer available."[43] Melvin does not dispute that, under the Federal Rules of Appellate Procedure, he had 60 days to file a notice of appeal of the Injunctive Order, but he contends that because he waived his right to appeal the Injunctive Order, "appeal procedures [were] no longer available" within the terms of Rule 102(e)(3) from the time the Injunctive Order was entered, and that Rule 102(e)(3)'s 90-day limit therefore expired on November 12, 2013. The Division responds that, though "he was almost certain to fail, Melvin was free to file a notice of appeal and challenge the judgment" and that, therefore, the temporary suspension order was timely because it was issued within 90 days of when Melvin's period for filing an appeal expired on October 13, 2013.

The parties cite to no authority interpreting this aspect of the Rule. The relevant statutory language does not address the issue, nor do the related proposing or adopting releases.[44] Thus, we must interpret the language without any such guidance.

(...continued)

We reject this argument. Both the partner and Melvin were enjoined from antifraud violations, which, as we noted above, ordinarily warrants permanent exclusion from participation in the securities industry. Their misconduct was serious for many of the same reasons, and the fact that some particulars differed—Melvin misappropriated but didn't trade, his partner traded but didn't misappropriate, Melvin tipped four people, his partner tipped one person—does not mean that the public interest would mandate that they receive different sanctions.

We further find that Melvin deserves no special credit for making the payments he agreed to. *Cf.*, *e.g.*, *Howard Braff*, Exchange Act Release No. 66467, 2012 WL 601003, at *7 (Feb. 24, 2012) (for those who agreed to abide by FINRA's rules, compliance with obligations under those rules is not a mitigating factor in determining sanctions); *Kevin M. Glodek*, Exchange Act Release No. 80937, 2009 WL 3652429, at *8 (Nov. 4, 2009) (same), *petition denied*, 416 F. App'x 95 (2d Cir. 2011).

43 17 C.F.R. § 201.102(e)(3).

44 When the Commission adopted the amendment to then-Rule 2(e) that made "a permanent injunction against securities-laws violations or a finding of securities-laws violations . . . a basis upon which the Commission may initiate proceedings to censure or temporarily or permanently disqualify an attorney, accountant, engineer, or other professional or expert from appearing and practicing before the Commission," the amendment contained the language currently found in Rule 102(e)(3) that looks to whether "further review or appeal procedures are no longer available," among other factors, in determining whether the Commission's entry of an order of temporary suspension was timely. *Suspension or Disbarment*

(continued...)

For purposes of Rule 102(e)(3), we interpret the phrase "further review or appeal procedures are no longer available" to mean that the party is foreclosed from pursuing further review or appeal of his or her case because the time for appeal has expired. We recognize that the application of the language of the rule may be ambiguous where, as here, a party has waived the right to an appeal. Review is arguably "no longer available" in light of a waiver. But we believe the phrase "appeal procedures are no longer available" is better interpreted to refer to the procedural availability of the means for bringing an appeal under the federal rules, rather than to the viability of any substantive claim that is brought.

We do not believe it is correct to say that "appeal procedures are no longer available" simply because a person has waived the right to appeal in a consent agreement. Even where such a waiver is enforced and an appellate court dismisses the appeal because of the waiver, "appeal *procedures*" are still "available" in the sense that a person is entitled to file the appeal within the time provided by the federal rules and to obtain a ruling of some kind from the appellate court. Moreover, there are some very limited instances in which an appellate court may decide to reject a waiver and hear an appeal on the merits.[45] For these reasons, we construe the phrase "appeal procedures are no longer available" to mean that the period allotted by rule for filing a notice of appeal has expired, without regard to whether the right to appeal has been waived in a particular case or to the validity of any such waiver. Applying this interpretation, we find that Federal Rule of Appellate Procedure 4(a)(1)(B) allows 60 days for filing an appeal from a district court's final judgment in which the United States or an agency is a party, and therefore, for purposes of Rule 102(e)(3), appeal procedures were "available" to Melvin with respect to the Injunctive Order within the terms of the rule until that period ended.[46]

(...continued)
from Appearance or Practice Before the Commission, Securities Act Release No. 5147, 1971 WL 126066, at *2, 4 (May 10, 1971). There is no discussion of the phrase, "no longer available," and subsequent amendments to Rule 102(e) have not clarified the meaning of that language.

45 Appeal waivers will generally be enforced, absent exceptional circumstances such as the lack of actual consent, fraud in obtaining consent, or mistake. *See, e.g.*, *Van v. Barnhart*, 483 F.3d 600, 609 & n.5 (9th Cir. 2007) (noting general rule and citing cases that recognize exceptions); *Mock v. T.G. & Y. Stores Co.*, 971 F.2d 522, 526-27 (10th Cir. 1992) (affirming judgments of district court in favor of defendants where plaintiffs consented to judgment and did not reserve the right to appeal). Where a party has consented to a valid settlement, as Melvin did here, courts do not hesitate to enforce provisions expressly waiving the right to appeal. *E.g.*, *SEC v. Adair*, 549 F. App'x 699 (9th Cir. 2013) (dismissing appeal where litigant had expressly, voluntarily, and knowingly waived the right to appeal the district court's order); *cf. Throne v. Citicorp Inv. Servs., Inc.*, 378 F. App'x 629, 631-32 (9th Cir. 2010) (affirming district court awarding attorneys' fees and costs for appeal where appeal was filed in contravention of express waiver).

46 While this interpretation works to Melvin's detriment in that it allows the proceeding against him to continue, Melvin cannot credibly argue that his conduct would have been any different if he had known when he consented to the settlement of the civil proceeding that we

(continued...)

Melvin argues that the majority of federal courts do not generally consider the merits of appeals from consent judgments, and that no applicable exception to this general rule applies in this case. We agree with both of those assertions.[47] But, as explained above, this does not mean that "appeal procedures [were] no longer available" to Melvin; it simply means that the use of those procedures would very likely have proved unsuccessful.

Our interpretation of Rule 102(e)(3) is also supported by policy considerations. We find it preferable for reasons of efficiency, clarity, and ease of administration, to adopt a bright-line rule that bases the timeliness of temporary suspension orders in Rule 102(e)(3) disciplinary proceedings on the time for filing a notice of appeal. Federal Rule of Appellate Procedure 4(a)(1)(B) clearly sets forth such a deadline, making it easy to determine when a disciplinary proceeding must be brought. By contrast, Melvin's proposed interpretation of the phrase "no longer available" would require a case-by-case analysis as to whether a particular appeal or review proceeding would be futile or unsuccessful for reasons other than lack of timeliness. That approach would create uncertainty over the application of our deadlines in particular cases. The time for filing an appeal is a more certain and uniform starting point to gauge the running of our 90-day period.

Our approach is also supported by the approach taken by the United States Court of Appeals for the District of Columbia Circuit in *Adams v. SEC*.[48] The court there adopted a similar bright-line rule that a final disposition of an administrative proceeding became "unappealable" for the purpose of determining the timeliness of fee applications under the Equal Access to Justice Act only when the statutory period allowed for appeals from such dispositions had expired. The court rejected a rule like the one advanced by Melvin here that would have

---

(...continued)
would apply Rule 102(e)(3) in this way. The consent Melvin signed specifically alluded to the possibility of a "disciplinary proceeding before the Commission based on the entry" of the Injunctive Order. Moreover, his argument that Division counsel had discussed the possibility of a three-year suspension from practice with him demonstrates that he understood that a 102(e) proceeding could follow. Thus, this is not a situation where a respondent was deprived of fair notice of our interpretation of a rule governing the respondent's conduct in a way that impacts the fairness of a proceeding. *See, e.g.*, *Marrie v. SEC*, 374 F.3d 1196, 1208 (D.C. Cir. 2004) (finding that Commission impermissibly applied interpretation to Rule 102(e) retroactively, in part because accountants "did not have fair notice [when they engaged in conduct at issue] that they could be sanctioned for improper professional conduct even if they had been acting in good faith); *KPMG, LLC v. SEC*, 289 F.3d 109, 116, 126 (D.C. Cir. 2002) (reversing finding that "success" fee/royalty arrangement violated AICPA Rule 302 because KPMG "lacked fair notice" that the Commission would interpret the rule so as to deem that arrangement to be a prohibited contingent fee). To the contrary, adopting the interpretation Melvin urges would effectively give him a windfall, by relieving him of the need to participate in a proceeding that he knew to be a likely outcome of his actions.

[47] *See supra* note 45.

[48] 287 F.3d 183, 184, 191 (D.C. Cir. 2002).

analyzed whether a particular disposition was specifically appealable based on the standing or lack of standing of the litigant. The court recognized that adopting this bright-line rule, which was "discernible by looking at the category of order in question," "eliminate[d] the high potential for confusion" that would have resulted from determining appealability on a case-by-case basis.[49]

Melvin also argues that most federal courts hold that a consent judgment is "effective" immediately upon entry, and that we should interpret Rule 102(e)(3) the same way.[50] We understand him to be using "effective" here to mean something like "binding on the party subject to the judgment." Indeed, "effective" is used that way elsewhere in Rule 102(e)(3), when the rule states that "[a]n order of temporary suspension shall become effective upon service on the respondent."[51] In the case before us, though, the question is not whether Melvin was bound by the injunction as soon as it was entered, but rather when the time for entering an order of temporary suspension started to run. The Rule 102(e)(3) language we must interpret measures the time for entering an order of temporary suspension from "the date on which the final judgment or order entered in a judicial or administrative proceeding described in paragraph (e)(3)(i)(A) or (e)(3)(i)(B) of this section has become effective, whether upon completion of review or appeal procedures or because further review or appeal procedures are no longer available." In this context, "effective" means that review or appeal procedures have been completed or that further review or appeal procedures are no longer available.[52]

---

49 *Id.* Several other federal courts of appeals have also adopted a bright-line rule in similar circumstances. *See, e.g.*, *Impresa v. Construzioni Geom. Domenica Garufi v. United States*, 531 F.3d 1367, 1372 (Fed. Cir. 2008) (adopting a uniform rule for EAJA petitions in the Court of Federal Claims in holding that the period for filing an EAJA application started on expiration of the period for filing a petition for certiorari from the final judgment of the Federal Circuit because "a clear rule better serves the interests of litigants and the court"); *Van*, 483 F.3d at 612 (adopting bright-line rule whereby "EAJA's 30-day filing period does not begin to run until after the 60-day appeal period in Rule 4(a) has expired," even when a claimant has obtained a judgment as to which the Commissioner of the Social Security Administration has consented, in part because the possibility that consent judgments can be appealed otherwise could create uncertainty and confusion).

50 Melvin cites no authority to support this contention.

51 17 C.F.R. § 201.102(e)(3).

52 This does not mean, however, that an order or judgment is not effective or binding until all appeals have been resolved or the period for filing appeals has run. As we have repeatedly held, for example, the pendency of an appeal of a civil or criminal proceeding does not justify any delay in related "follow-on" administrative proceedings. *See, e.g.*, *Ran H. Furman*, Exchange Act Release No. 65680, 2011 WL 5231425, at *2 (Nov. 3, 2011) ("Although Furman is entitled to appeal the underlying case against him, the possibility of an appeal to the court of appeals 'does not alter the effect' of the jury's finding of securities law violations or the court's imposition of an injunction here.") (quoting *Daniel S. Lezak*, Exchange Act Release No. 50729, 2004 WL 2721400, at *2 & n.16 (Nov. 23, 2004)); *Gunderson*, 2009 WL 4981617, at *4 ("'[I]t is well established that the existence of an appeal of the district court's decision does not affect the [permanent] injunction's status as a basis for administrative action.'") (quoting *Conrad P.*

(continued...)

*   *   *

Melvin engaged in serious misconduct. He betrayed a longtime client by misappropriating sensitive and valuable information that he knew was confidential and sharing it with business associates. Although he did not personally trade on the information, his disclosures furthered his professional and personal relationships and led to fraudulent and profitable insider trading by at least ten individuals. Moreover, Melvin does not appear fully to appreciate the wrongfulness of his actions, which heightens our concerns about the possibility of future misconduct. In sum, Melvin's actions demonstrate that he poses a threat to the integrity of our processes and amply justify his permanent disqualification from appearing or practicing before us.

An appropriate order will issue.[53]

By the Commission (Chair WHITE and Commissioners AGUILAR, GALLAGHER, STEIN, and PIWOWAR).

17 CFR Part 240

[Release No. 34-75845; File No. S7-15-15]

RIN 3235-AL74

Access to Data Obtained by Security-Based Swap Data Repositories and Exemption from Indemnification Requirement

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: Pursuant to section 763(i) of Title VII ("Title VII") of the Dodd-Frank Wall Street Reform and Consumer Protcction Act of 2010 ("Dodd-Frank Act"), the Securities and Exchange Commission ("Commission") is proposing amendments to rule 13n-4 under the Securities Exchange Act of 1934 ("Exchange Act") related to regulatory access to security-based swap data held by security-based swap data repositories. The proposed rule amendments would implement the conditional Exchange Act requirement that security-based swap data repositories make data available to certain regulators and other authorities, and would set forth a conditional exemption from the statutory indemnification requirement associated with that regulatory access provision.

DATES: Submit comments on or before [insert date 45 days after publication in Federal Register].

ADDRESSES: Comments may be submitted by any of the following methods:

Electronic comments:

- Use the Commission's Internet comment form (http://www.sec.gov/rules/proposed.shtml); or

- Send an e-mail to rule-comments@sec.gov. Please include File Number S7-15-15 on the subject line; or
- Use the Federal eRulemaking Portal (http://www.regulations.gov). Follow the instructions for submitting comments.

Paper Comments:

- Send paper comments to Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549-1090.

All submissions should refer to File Number S7-15-15. This file number should be included on the subject line if e-mail is used. To help us process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet website (http://www.sec.gov/rules/proposed.shtml). Comments are also available for website viewing and printing in the Commission's Public Reference Room, 100 F Street, NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

Studies, memoranda, or other substantive items may be added by the Commission or staff to the comment file during this rulemaking. A notification of the inclusion in the comment file of any such materials will be made available on the SEC's website. To ensure direct electronic receipt of such notifications, sign up through the "Stay Connected" option at www.sec.gov to receive notifications by e-mail.

FOR FURTHER INFORMATION CONTACT: Carol McGee, Assistant Director, or Joshua Kans, Senior Special Counsel, at (202) 551-5870; Division of Trading and Markets, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549-7010.

SUPPLEMENTARY INFORMATION: The Commission is proposing to add paragraphs (b)(9) and (b)(10) to Exchange Act rule 13n-4 to implement the statutory requirement that security-based swap data repositories conditionally provide data to certain regulators and other authorities. The Commission also is proposing to add paragraph (d) to rule 13n-4 to provide a conditional exemption from the associated statutory indemnification requirement.

I. Background

A. Statutory Requirements for Access to Security-Based Swap Data Repository Information

Title VII of the Dodd-Frank Act amended the Exchange Act to provide a comprehensive regulatory framework for security-based swaps, including the regulation of security-based swap data repositories.[1]

Those amendments, among other things, require that security-based swap data repositories make data available to certain regulators and other entities. In particular, the amendments conditionally require that security-based swap data repositories "on a confidential basis pursuant to section 24, upon request, and after notifying the Commission of the request, make available all data obtained by the security-based swap data repository, including individual

---

[1] Pub. L. No. 111-203, section 761(a) (adding Exchange Act section 3(a)(75) (defining "security-based swap data repository")) and section 763(i) (adding Exchange Act section 13(n) (establishing a regulatory regime for security-based swap data repositories)).

References in this release to the terms "data repository," "trade repository," "repository" or "SDR" generally address security-based swap data repositories unless stated otherwise.

counterparty trade and position data."[2] The repositories must make that data available to: "each appropriate prudential regulator"[3]; the Financial Stability Oversight Council ("FSOC"); the Commodity Futures Trading Commission ("CFTC"); the Department of Justice; and "any other person that the Commission determines to be appropriate," including foreign financial supervisors (including foreign futures authorities), foreign central banks and foreign ministries.[4]

This access to data is conditional, however. In part, before a repository shares such data, the repository "shall receive a written agreement from each entity stating that the entity shall abide by the confidentiality requirements described in section 24 relating to the information on security-based swap transactions that is provided."[5] Moreover, before such data is shared, "each entity shall agree to indemnify the security-based swap data repository and the Commission for any expenses arising from litigation relating to the information provided under section 24."[6]

B. Prior Proposals and Comments Received

1. 2010 proposal

In 2010, the Commission proposed several rules to implement statutory provisions related to the registration process, duties and core principles applicable to security-based swap data

---

[2] Exchange Act section 13(n)(5)(G), 15 U.S.C. 78m(n)(5)(G). The confidentiality requirements addressed by Exchange Act section 24, 15 U.S.C. 78x, are addressed below. See note 84, infra.

[3] As discussed below, the term "prudential regulator" encompasses the Board of Governors of the Federal Reserve System and certain other regulators, with regard to certain categories of regulated entities. See note 44, infra.

[4] Exchange Act section 13(n)(5)(G), 15 U.S.C. 78m(n)(5)(G).

[5] Exchange Act section 13(n)(5)(H)(i), 15 U.S.C. 78m(n)(5)(H)(i).

[6] Exchange Act section 13(n)(5)(H)(ii), 15 U.S.C. 78m(n)(5)(H)(ii).

repositories.[7] That proposal, among other things, encompassed rules that incorporated the statutory language that set forth the data access provisions.[8]

In proposing those rules, the Commission recognized that "regulators may be legally prohibited or otherwise restricted from agreeing to indemnify third parties, including SDRs as well as the Commission," and that the "indemnification provision could chill requests for access to data obtained by SDRs, thereby hindering the ability of others to fulfill their regulatory mandates and responsibilities."[9] The Commission added that it expected that a repository "would not go beyond the minimum requirements of the statute so as not to preclude [recipient entities described by the statute] from obtaining the data maintained by an SDR."[10] The Commission further noted that the Commission itself had the authority to share nonpublic information with, among others, certain domestic and foreign regulatory authorities.[11]

In response, four commenters addressed the data access provisions.[12] Those commenters generally supported providing relevant authorities with access to security-based swap data maintained by repositories when the access is within the scope of those authorities' mandates, but expressed particular concerns relating to the indemnification requirement and to the scope of

11 Id.

12 Cleary Gottlieb comment (Sept. 20, 2011) at 31-32 (comment was provided in response to a joint SEC-CFTC roundtable regarding the cross-border application of Title VII, and can be found at http://www.sec.gov/comments/4-636/4-636.shtml), DTCC comment (Nov. 15, 2010) at 3, ESMA comment (Jan. 17, 2011) at 2 and Managed Funds Association comment (Jan. 24, 2011) at 3.

authorities' access to data. Two commenters concurred that relevant authorities likely would be unable to agree to indemnify data repositories or the Commission.[13] One commenter expressed the concern that the statutory requirement is vague and could result in a data repository providing

---

[13] Prior to the proposed rules, one of those commenters described the indemnification requirement as contravening the purpose of data repositories and jeopardizing market stability by diminishing regulators' ability to carry out oversight functions. See DTCC comment (Nov. 15, 2010) at 3. This comment and other comments that addressed data repository issues in response to a general request for comments regarding the implementation of Title VII are located on the Commission's website at http://www.sec.gov/comments/df-title-vii/swap-data-repositories/swap-data-repositories.shtml.

Subsequently, in response to the proposed rules, that commenter further: (1) stated that the indemnification requirement should not apply where relevant authorities carry out their regulatory responsibilities in accordance with international agreements and while maintaining the confidentiality of data provided to them; (2) suggested that the Commission provide model indemnification language; and (3) urged that "any indemnity should be limited in scope to minimize the potential reduction in value of registered SDRs to the regulatory community." See DTCC comment (Jan. 24, 2011) at 12. These and other comments addressing the proposed implementation of the data access provisions (as well as other aspects of the Commission's 2010 proposal regarding security-based swap data repository registration, duties and core principles) are located on the Commission's website at http://www.sec.gov/comments/s7-35-10/s73510.shtml.

Another commenter stated that because indemnification would not be feasible, "it would be problematic for [the Commission and the CFTC] to require non-U.S. SDRs to register with the Commissions," and that the indemnification requirement could impede effective regulatory coordination. See Cleary Gottlieb comment (Sept. 20, 2011) at 31-32.

That commenter further stated that when a non-U.S. data repository registers with the Commission "but is also subject to regulatory oversight by an appropriate non-U.S. regulator," the SEC should adopt the CFTC's interpretation "that the non-U.S. regulator is not as a result subject to Dodd-Frank's notice and indemnification provisions." See id. The Commission since then has issued final rules and interpretations regarding the cross-border application of the registration requirement for security-based swap data repositories, which exempts certain non-U.S. data repositories subject to regulation abroad from having to comply with requirements otherwise applicable to repositories. See Exchange Act Release No. 74246 (Feb. 11, 2015), 80 FR 14438, 14450-51, 14516-17, 14556 (Mar. 19, 2015) ("SDR Adopting Release") (generally stating that a non-U.S. person that performs the functions of a security-based swap data repository within the United States is required to register with the Commission absent an exemption, and adopting Exchange Act rule 13n-12 to provide an exemption from data repository requirements for certain non-U.S. persons when regulators with supervisory authority over those non-U.S. persons have entered into a memorandum of understanding ("MOU") or other arrangement with the Commission regarding the confidentiality of data collected and maintained by such non-U.S. person, access by the Commission to such data, and any other matters determined by the Commission). Also, under the preliminary interpretation discussed below, the conditions to the Exchange Act data access requirements would not restrict access when a repository registered with the Commission also is registered or licensed with a foreign authority that obtains the data pursuant to foreign law. See part IV.A, infra.

access to persons without proper authority.[14] Another commenter recommended that the Commission adopt rules to help streamline the indemnification requirement for an "efficient exchange of information."[15]

2. 2013 cross-border proposal

a. Proposed exemption to indemnification requirement

In 2013, the Commission proposed a number of rules related to the cross-border application of the Title VII security-based swap requirements. At that time, recognizing the significance of commenter concerns and understanding that certain authorities may be unable to agree to indemnify a data repository and the Commission, the Commission preliminarily concluded that the indemnification requirement could frustrate the purposes of the statutory requirement that repositories make available data to relevant authorities. The Commission further took the view that the indemnification requirement should not be applied rigidly so as to frustrate the statutory purposes of data repositories, and hinder relevant authorities' ability to fulfill their regulatory mandates and legal responsibilities.[16]

---

14 That commenter particularly expressed concern regarding the possibility of "unfettered access" to security-based swap information by regulators, including foreign financial supervisors, foreign central banks and foreign ministries, "beyond their regulatory authority and mandate." See Managed Funds Association comment (Jan. 24, 2011) at 3. That comment further recommended that the Commission take an approach similar to that taken by rules proposed by the CFTC, requiring any regulator requesting access to such data to certify the statutory authority for the request and detail the basis for the request. See id. at 3-4. The CFTC subsequently adopted that certification requirement as a final rule, but did not adopt the proposed requirement that the regulator also detail the basis for the request. See note 31, infra, and accompanying text.

15 That commenter also reiterated the notion that relevant authorities must ensure the confidentiality of security-based swap data provided to them, and that the indemnification requirement "undermines the key principle of trust according to which exchange of information [among relevant authorities] should occur." See ESMA comment (Jan. 17, 2011) at 2.

16 See Exchange Act Release No. 69490 (May 1, 2013), 78 FR 30968, 31048-49 (May 23, 2013) ("Cross-Border Proposing Release").

To address these concerns, the Commission proposed an exemption to provide that a data repository "is not required" to comply with the indemnification requirement, conditioned on: (1) an entity requesting the information "to fulfill a regulatory mandate and/or legal responsibility"; (2) the request pertaining "to a person or financial product subject to the jurisdiction, supervision or oversight of the entity"; and (3) the entity having entered into a supervisory and enforcement memorandum of understanding ("MOU") or other arrangement addressing the confidentiality of the information provided and any other matter as determined by the Commission.[17] The Commission took the preliminary view that the proposed exemption was consistent with commenters' views, including one commenter's suggestion that the indemnification requirement not apply when relevant authorities carry out their responsibilities in accordance with international agreements and while maintaining the confidentiality of data provided to them.[18]

The Commission further stated that the exemption's proposed condition that the request be for the purpose of fulfilling a relevant authority's regulatory mandate or legal responsibility was aligned with statutory requirements to protect the security-based swap information maintained by a repository, including proprietary and highly sensitive data, from unauthorized disclosure, misappropriation or misuse.[19] The Commission also expressed the preliminary view that the proposed condition that the Commission enter into an MOU or other arrangement with a relevant authority represented an effective way to streamline the indemnification requirement for

---

17 See id. at 31209 (paragraph (d) of proposed Exchange Act rule 13n-4).

18 See id. at 31049 (addressing DTCC comment from Jan. 24, 2011). The Commission also stated that the proposal was consistent with commenter suggestions that the exemption be "location agnostic" (by treating relevant domestic and foreign authorities similarly), and that the exemption was intended to help preserve the "spirit of cooperation and coordination" between regulators around the world. See id.

19 See id. at 31049-50.

an "efficient exchange of information" to help protect the confidentiality of information and further the purposes of the Dodd-Frank Act.[20]

b. Additional guidance

In the Cross-Border Proposing Release, the Commission also addressed the application of the statutory requirement that repositories notify the Commission regarding data requests. The Commission stated its preliminarily belief that repositories could satisfy that requirement by providing the Commission with notice of an initial request by a relevant authority, and maintaining records of the initial request and all subsequent requests.[21] The Commission further expressed preliminary views regarding the process for determining which additional authorities may obtain information from data repositories pursuant to these data access provisions.[22]

c. Comments

In response to this proposal, the Commission received one comment that addressed the data access provisions, including the indemnification requirement. That commenter stated that the proposal "did not erase the need for a legislative solution to clarify the scope and

---

20 See id. at 31050. The Commission moreover expressed the preliminary view that, in determining whether to enter into such an MOU or other arrangement, the Commission would consider, among other things, whether: (1) "the relevant authority needs security-based swap information from an SDR to fulfill its regulatory mandate or legal responsibilities; (2) the relevant authority agrees to protect the confidentiality of the security-based swap information provided to it; (3) the relevant authority agrees to provide the Commission with reciprocal assistance in securities matters within the Commission's jurisdiction; and (4) a supervisory and enforcement MOU or other arrangement would be in the public interest." See id. at 31049-50.

21 See id. at 31046-47.

22 See id. at 31047-48 (indicating that the Commission would make such determinations by order, and that the Commission would consider a variety of factors, including whether there is a supervisory and enforcement MOU between the Commission and the relevant authority, and whether the relevant authority has a legitimate need for the information).

applicability" of the indemnification requirement.[23] The commenter further recommended that the Commission incorporate, as part of the exemption, a "safe harbor provision from liability for information shared pursuant to global information sharing agreements."[24]

The commenter also objected to the prospect that repositories would be required to notify the Commission of an initial information request, stating that such a requirement could lead authorities to hesitate to make requests if that would trigger notice, "particularly if such request is pursuant to an investigation." The commenter instead recommended that the Commission consider the notification requirement to be satisfied if the request is made "pursuant to an established information sharing agreement."[25]

3. Final rules reserving action on the data access provisions

In February 2015, the Commission adopted a number of final rules governing the registration process, duties and core principles applicable to security-based swap data repositories.[26] Those final rules, however, neither addressed the statutory data access requirements applicable to data repositories, nor provided an exception to the indemnification requirement. The Commission instead stated that final resolution of the issue would benefit from further consideration and public comment.[27]

---

23 See DTCC cross-border comment (Aug. 21, 2013) at 6-7 (expressing concern that the indemnification provision would continue to limit data sharing across jurisdictions, leading foreign regulators to seek to establish "national" repositories that would fragment data among jurisdictions). That comment and other comments responding to the cross-border proposal are located on the Commission's website at: http://www.sec.gov/comments/s7-02-13/s70213.shtml.

24 See DTCC cross-border comment at 8.

25 See id. at 7.

26 See SDR Adopting Release.

27 See id., 80 FR at 14487-88 (further noting that repositories will have to comply with all statutory requirements, including the indemnification requirement, when the current exemptive relief from requirements applicable to repositories expires). As a result, in adopting those final rules the Commission

C. Treatment of These Issues in the Swaps Context

The Dodd-Frank Act also revised the Commodity Exchange Act ("CEA") to impose comparable data access requirements – including confidentiality and indemnification conditions – upon swap data repositories that are subject to CFTC jurisdiction.[28]

1. Certification of scope of jurisdiction

To implement those requirements, the CFTC adopted rules that in part identify the domestic[29] and foreign regulators[30] to which a swap data repository must make swap data available. The rules provide that when those regulators seek access to data maintained by a swap data repository, they must file a request with the swap data repository and certify that they are acting within the scope of their jurisdiction.[31]

2. Scope of confidentiality and indemnification requirements

The CFTC implementing rules generally require domestic and foreign regulators to execute confidentiality and indemnification agreements with the swap data repository prior to

---

reserved paragraphs (b)(9) and (b)(10) of Exchange Act rule 13n-4 (which as proposed would have addressed the data access obligations of registered security-based swap data repositories), and did not adopt the indemnification exemption proposed as paragraph (d) of rule 13n-4.

[28] See CEA sections 21(c)(7), (d), 7 U.S.C. 24a(c)(7), (d).

[29] The CFTC has defined "Appropriate Domestic Regulator" to mean: (i) the SEC; (ii) each prudential regulator "with respect to requests related to any of such regulator's statutory authorities, without limitation to the activities listed for each regulator" in the statutory definition; (iii) the Financial Stability Oversight Council; (iv) the Department of Justice; (v) any Federal Reserve Bank; (vi) the Office of Financial Research; and (vii) any other person the CFTC deems appropriate. See 17 CFR 49.17(b)(1).

[30] The CFTC has defined "Appropriate Foreign Regulator" to mean foreign regulators "with an existing memorandum of understanding or other similar type of information sharing arrangement" executed with the CFTC, and/or foreign regulators "without an MOU as determined on a case-by-case basis" by the CFTC. See 17 C.F.R. 49.17(b)(2).

[31] See 17 CFR 49.17(d)(1). In this regard, the CFTC did not adopt proposed requirements to require regulators to set forth the basis for their requests in sufficient detail, and to require a swap data repository to provide access only if it is satisfied that the regulator is acting within the scope of its authority. See 76 FR 54538, 54553 (Sept. 1, 2011).

receipt of any requested swap data.[32] The CFTC, however, also recognized that it might be difficult for certain regulators to implement those confidentiality and indemnification requirements.[33] Accordingly, the CFTC provided that a domestic regulator with regulatory jurisdiction over a swap data repository registered with it pursuant to separate statutory authority may access such data without the need to enter into confidentiality or indemnification agreements if: (i) the domestic regulator executes an MOU or similar information sharing arrangement with the CFTC; and (ii) the CFTC designates the domestic regulator to receive direct electronic access.[34]

The CFTC implementing rules further provided that a foreign regulator with supervisory responsibility over a swap data repository registered with the foreign regulator pursuant to foreign law and/or regulation would not need to enter into such confidentiality or indemnification agreements.[35] In addition, the CFTC noted that the confidentiality and

---

32 See 17 CFR 49.17(d)(6), 49.18(b).

33 See 76 FR at 54554.

34 See 17 CFR 49.17(d)(2), 49.18(c); 76 FR at 54554 (also referencing a separate statutory provision, CEA section 21(c)(4)(A), 7 U.S.C. 24a(c)(4)(A), that requires swap data repositories to provide "direct electronic access" to the CFTC and its designees).

There are differences between the Commission's proposed approach, discussed below, and the approach the CFTC has taken in adopting rules to implement the data access requirement under the CEA. In part, while the CFTC rule requires that entities accessing swap data certify that they are acting within the scope of their jurisdiction, the Commission's proposal instead anticipates considering an entity's interest in the security-based swap information when determining whether to determine that entity may access security-based swap information. See part II.A.3.a, infra. Also, the Commission's proposed exemption from the indemnification requirement is conditioned in part on an entity requesting security-based swap information in connection with a regulatory mandate, or legal responsibility or authority. See part III.B.1.a, infra.

35 See 17 CFR 49.17(d)(3), 49.18(c); 76 FR at 54555 n.166 (adding that the CFTC does not interpret the notification and indemnification provisions to apply "in circumstances in which an Appropriate Foreign Regulator possesses independent sovereign legal authority to obtain access to the information and data held and maintained by an SDR").

indemnification requirements would not apply when the CFTC itself shares information in its possession with foreign authorities.[36]

The CFTC subsequently issued an interpretative statement that the indemnification and confidentiality provisions under the CEA generally apply only to such data reported pursuant to the CEA and CFTC regulations, and that those confidentiality and indemnification provisions "should not operate to inhibit or prevent foreign regulatory authorities from accessing data in which they have an independent regulatory interest (even if that data also has been reported pursuant to the CEA and [CFTC] regulations)."[37] The CFTC further stated that a registered swap data repository would not be subject to the indemnification and confidentiality provisions under the CEA if the swap data repository is "registered, recognized or otherwise authorized in a foreign jurisdiction's regulatory regime," when the data sought to be accessed by the foreign regulatory authority has been reported to the swap data repository "pursuant to the foreign jurisdiction's regulatory regime."[38]

D. The Current Proposal

The Commission today is proposing rules related to the data access obligation applicable to security-based swap data repositories, including rules to provide a conditional exemption from the indemnification requirement. This new proposal builds upon the earlier proposals, but with certain changes.

---

36 See 76 FR at 54554.

37 See Swap Data Repositories: Interpretative Statement Regarding the Confidentiality and Indemnification Provisions of the Commodity Exchange Act, 77 FR 65177, 65180-81 (Oct. 25, 2012).

38 See id. The CFTC added that this principle applies even if the applicable data also is reported pursuant to CFTC rules, and that foreign and domestic regulatory authorities also may receive data from the CFTC (rather than the swap data repository) without execution of a confidentiality and indemnification agreement. See id. at 65181.

Among other aspects, as discussed below, the proposal would provide for the statutory confidentiality agreement requirement to be satisfied via the use of MOUs or other agreements between the Commission and the entity accessing data from a security-based swap data repository. The proposal also encompasses an indemnification exemption that would be effective when the relevant conditions are met, in contrast to the earlier proposed approach of conditionally allowing a data repository to elect whether to waive the indemnification requirement.

Taken as a whole, the proposal would provide that when the conditions to the data access provisions are satisfied – including as applicable the conditions to the indemnification exemption – a repository would be required to provide security-based swap data to relevant authorities.

II. Proposed Data Access Rules

The Commission is proposing rules, to implement the data access provisions of Exchange Act sections 13(n)(5)(G) and (H),[39] that address commenter concerns and reflect the Commission's further consideration of the issues. Under the proposal:

- Security-based swap data repositories generally would be required, on a confidential basis after notifying the Commission, to make available security-based swap data, including individual counterparty trade and position data, to certain entities that are identified in the proposed rules and any other persons that are determined by the Commission to be appropriate.[40]
- The data access requirement would be subject to a confidentiality provision that conditions the data access requirement on there being an agreement between the

[39] 15 U.S.C. 78m(n)(5)(G) and (H).

[40] See proposed Exchange Act rule 13n-4(b)(9).

Commission and the entity (in the form of an MOU or otherwise) that addresses the confidentiality of the information received.[41]

- In addition, as discussed below, there would be a conditional exemption to the statutory provision that conditions the data access on the recipient of the data agreeing to indemnify the repository and the Commission for expenses arising from litigation related to the information provided.[42]

A. Data Access Requirement

1. Application to prudential regulators and Federal Reserve Banks

The Exchange Act specifically states that a repository is conditionally obligated to make information available to, among others, "each appropriate prudential regulator."[43] The proposed rules would specifically identify, as being eligible to access data, each of the entities encompassed within the statutory "prudential regulator" definition: the Board of Governors of the Federal Reserve System ("Board"), the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation ("FDIC"), the Farm Credit Administration, and the Federal Housing Finance Agency.[44]

---

41 See proposed Exchange Act rule 13n-4(b)(10).

42 See proposed Exchange Act rule 13n-4(b)(ii).

43 See Exchange Act section 13(n)(5)(G)(i), 15 U.S.C. 78m(n)(5)(G)(i).

44 See proposed Exchange Act rule 13n-4(b)(9)(i)-(v).

Exchange Act section 3(a)(74), 15 U.S.C. 78c(a)(74), defines "prudential regulator" by reference to the CEA. The CEA, in turn, defines "prudential regulator" to encompass: (a) the Board, (b) the Office of the Comptroller of the Currency, (c) the FDIC, (d) the Farm Credit Administration or (e) the Federal Housing Finance Agency – in each case with respect to swap dealers, major swap participants, security-based swap dealers or major security-based swap participants (cumulatively, "dealers" or "major participants") that fall within the regulator's authority. See CEA section 1a(39); 7 U.S.C. 1a(39).

For example, the definition provides that the Board is a prudential regulator with regard to, among others, certain dealers and major participants that are: state-chartered banks and agencies, foreign banks that do not operate insured branches, or members of bank holding companies. Also, for example, Under this approach of specifically identifying each of those regulators, rather than generally referring to "appropriate prudential regulators," the ability of those regulators to access security-based swap data would not vary depending on whether entities regulated by the regulators are acting as security-based swap dealers, as major security-based swap participants, or in some other capacity.[45] For similar reasons, under this approach those regulators' access also would not vary depending on whether the regulator acts in a "prudential" capacity in connection with the information.[46]

The proposed rules also would include "any Federal Reserve Bank" among the entities conditionally eligible to access security-based swap data from repositories,[47] in accordance with the Exchange Act provision that extends data access to "any other person that the Commission determines to be appropriate."[48] Consistent with the standards the Commission expects to

---

the definition provides that the Office of the Comptroller of the Currency is a prudential regulator with regard to, among others, certain dealers or major participants that are national banks, federally chartered branches or agencies of foreign banks or federal saving associations.

45 This approach particularly addresses the fact that the statutory "prudential regulator" definition noted above specifically refers to those regulators in connection with dealers and major participants that fall within their authority. In the Commission's preliminary view the application of the data access provision should not vary depending on whether an entity regulated by the regulator is acting as a dealer or major participant, or in some other capacity. Such a reading would not further the purposes of Title VII, and the Dodd-Frank Act more generally, including facilitating regulator access to security-based swap information to help address the risks associated with those instruments. Accordingly, the proposed rule does not limit those regulators' access to security-based swap information based on the capacity in which a regulated entity is acting.

46 Those regulators' ability to access security-based swap data accordingly would not be limited to situations in which they act in the capacity of a prudential supervisor. Thus, for example, the FDIC would conditionally be authorized to access security-based swap data from a repository in connection with all of its statutory capacities, including its prudential supervisory capacity as well as other capacities such as the FDIC's resolution authority pursuant to the Federal Deposit Insurance Act and the Orderly Liquidation Authority provisions of Title II of the Dodd-Frank Act.

47 See proposed Exchange Act rule 13n-4(b)(9)(i).

48 See Exchange Act section 13(n)(5)(G)(v), 15 U.S.C. 78m(n)(5)(G)(v). The CFTC has identified the Federal Reserve Banks as being "appropriate domestic regulators" that may access swap data from swap data repositories. See note 29 supra.

consider in connection with determining other entities to be authorized to access such data – including consideration of a relevant authority's interest in accessing security-based swap data based on its regulatory mandate, or legal responsibility or authority[49] – the Commission preliminarily believes that it is appropriate for the Federal Reserve Banks to be able to access such data. The Commission particularly understands that the Federal Reserve Banks occupy important oversight roles under delegated authority from the Board, including supervision of banks that are under the Board's authority, and gathering and analyzing information to inform the Federal Open Market Committee regarding financial conditions.[50] We further understand that the Federal Reserve Banks, as well as the Board, would use data from security-based swap data repositories to fulfill statutory responsibilities related to prudential supervision and financial stability.[51] The Commission accordingly believes preliminarily that the Federal Reserve Banks'

---

49 See part II.A.3, infra.

50 Section 11(k) of the Federal Reserve Act grants the Board authority "to delegate, by published order or rule…any of its functions, other than those relating to rulemaking or pertaining to monetary and credit policies to…members or employees of the Board, or Federal Reserve banks." 12 U.S.C. 248(k). The Federal Reserve Banks carry out the Board's activities including the supervision, examination and regulation of financial institutions as directed by the Board and under its supervision. See the Board's Rules of Organization, sec. 3(j) FRRS 8-008 (providing that the Director of the Board's Division of Banking Supervision and Regulation "coordinates the System's supervision of banks and bank holding companies and oversees and evaluates the Reserve Banks' examination procedures"). The Board further has delegated extensive authority to the Reserve Banks with respect to numerous supervisory matters. See 12 CFR 265.11 (functions delegated by the Board to the Federal Reserve Banks).

51 We understand that the Board and the Federal Reserve Banks jointly would use the data in support of the prudential supervision of institutions under the Board's jurisdiction, such as state member banks, bank holding companies, and Edge Act corporations. See, e.g., section 9 of the Federal Reserve Act, 12 U.S.C. §§ 321-338a (supervision of state member banks); the Bank Holding Company Act, 12 U.S.C. §§ 1841-1852 (supervision of bank holding companies); the Edge Act, 12 U.S.C. §§ 610 et seq. (supervision of Edge Act corporations). We also understand that the Board and the Federal Reserve Banks would use the data in support of the implementation of monetary policy, such as through market surveillance and research. See, e.g., section 12A of the Federal Reserve Act, 12 U.S.C. § 263 (establishing the Federal Open Market Committee); and section 2A of the Federal Reserve Act, 12 U.S.C. § 225a (setting monetary policy objectives). In addition, we understand that the Board and the Federal Reserve Banks would use the data in fulfilling the Board's responsibilities with respect to assessing, monitoring and mitigating systemic risk, such as supervision of systemically important institutions. See,

access to security-based swap data held by repositories would appropriately fall within their regulatory mandate and legal responsibility or authority, and that the Federal Reserve Banks should conditionally have access to the security-based swap data.[52]

A Federal Reserve Bank's ability to access such data would be subject to conditions related to confidentiality and indemnification (as would the ability of any other entity that is identified by statute or determined by the Commission to access such data).[53]

2. FSOC, CFTC, Department of Justice and Office of Financial Research

The Exchange Act also states that FSOC, CFTC, and the Department of Justice may access security-based swap data.[54] The proposed rules accordingly would identify those entities as being conditionally authorized to access such data.[55]

---

e.g., section 113 of the Dodd-Frank Act, 12 U.S.C. § 5323 (SIFIs); and section 807 of the Dodd-Frank Act, 12 U.S.C. § 5466 (designated FMUs).

52 The Federal Reserve Banks' access to this information, like the access of the entities directly identified by the statute, would be subject to conditions related to confidentiality and indemnification as discussed below, including conditions to limit an authority's access to data by linking the scope of the exemption from the indemnification requirement to information that is related to persons or activities within an entity's regulatory mandate or its legal responsibility or authority, as specified in an MOU between the Commission and the entity. See parts II.C and III.C, infra.

In proposing to permit the Federal Reserve Banks to access security-based swap information pursuant to the data access provisions, the Commission preliminarily believes that the Federal Reserve Banks' access should not be limited to information regarding security-based swap transactions entered into by banks supervised by the Board, but should be available more generally with regard to security-based swap transaction data. This is consistent with the fact that Title VII does not limit the Board's access to data in such a way. This view also reflects the breadth of the Federal Reserve Banks' responsibilities regarding prudential supervision and financial stability, as addressed above.

53 In this regard, the Commission notes that personnel of the Board and the Reserve Banks already are subject to a number of confidentiality requirements. See 18 U.S.C. 1905 (imposing criminal sanctions on U.S. government personnel who disclose non-public information except as provided by law), 18 U.S.C. 641 (imposing criminal sanctions on the unauthorized transfer of records), 5 CFR 2635.703 (Office of Government Ethics regulations prohibiting unauthorized disclosure of nonpublic information); see also Federal Reserve Bank Code of Conduct section 3.2 (requiring Reserve Bank employees to maintain the confidentiality of nonpublic information).

54 See Exchange Act sections 13(n)(5)(G)(ii)-(iv), 15 U.S.C. 78m(n)(5)(G)(ii)-(iv).

55 See proposed Exchange Act rule 13n-4(b)(9)(vi)-(viii).

The proposed rules further would make the Office of Financial Research ("OFR") conditionally eligible to access such data,[56] in accordance with the Exchange Act provision that that extends data access to "any other person that the Commission determines to be appropriate."

The Commission preliminarily believes that such access by the OFR is appropriate in light of the OFR's regulatory mandate and legal responsibility and authority.[57] The OFR was established by Title I of the Dodd-Frank Act to support FSOC and FSOC's member agencies by identifying, monitoring and assessing potential threats to financial stability thorough the collection and analysis of financial data gathered from across the public and private sectors.[58] In connection with this statutory mandate to monitor and assess potential threats to financial stability, the OFR's access to security-based swap transaction data may be expected to help assist it in examining the manner in which derivatives exposures and counterparty risks flow through

---

56 See proposed Exchange Act rule 13n-4(b)(9)(ix), (x).

57 See proposed Exchange Act rule 13n-4(b)(9)(ix). We note that the CFTC has identified the OFR as being an "appropriate domestic regulator" that may access swap data from swap data repositories. See note 29, supra.

58 See Dodd-Frank Act section 153(a) (identifying the purpose of the OFR as: (1) collecting data on behalf of FSOC and providing such data to FSOC and its member agencies; (2) standardizing the types and formats of data reported and collected; (3) performing applied research and essential long-term research; (4) developing tools for risk measurement and monitoring; (5) performing other related services; (6) making the results of the activities of the Office available to financial regulatory agencies; and (7) assisting those member agencies in determining the types and formats of data authorized by the Dodd-Frank Act to be collected by the member agencies); Dodd-Frank Act section 154(c) (requiring that OFR's Research and Analysis Center, on behalf of FSOC, develop and maintain independent analytical capabilities and computing resources to: (A) develop and maintain metrics and reporting systems for risks to U.S. financial stability; (B) monitor, investigate, and report on changes in systemwide risk levels and patterns to FSOC and Congress; (C) conduct, coordinate, and sponsor research to support and improve regulation of financial entities and markets; (D) evaluate and report on stress tests or other stability-related evaluations of financial entities overseen by FSOC member agencies; (E) maintain expertise in such areas as may be necessary to support specific requests for advice and assistance from financial regulators; (F) investigate disruptions and failures in the financial markets, report findings and make recommendations to FSOC based on those findings; (G) conduct studies and provide advice on the impact of policies related to systemic risk; and (H) promote best practices for financial risk management).

The OFR is also required to report annually to Congress its analysis of any threats to the financial stability of the United States. See Dodd-Frank Act section 154(d).

the financial system, and in otherwise assessing those risks. The Commission accordingly believes preliminarily that the OFR's access to security-based swap data held by repositories would appropriately fall within its regulatory mandate and legal responsibility and authority, and that the OFR should conditionally have access to the security-based swap data.[59]

As with the other entities that may access data pursuant to the data access provision, the OFR's ability to access such data would be subject to conditions related to confidentiality and indemnification.[60]

3. Future Commission determination of additional entities

The proposal also would require that repositories provide data to any other person that the Commission determines to be appropriate. The Commission anticipates that entities that may seek such access would likely include foreign financial supervisors (including foreign futures authorities), foreign central banks and foreign ministries.[61] One or more self-regulatory organizations also potentially may seek such access. The proposal further would provide that the Commission will make such determinations through the issuance of Commission orders, and that

---

59 As discussed below, the conditions to the proposed indemnification exemption would limit an entity's access to data by linking the scope of the exemption to information that related to persons or activities within an entity's regulatory mandate or legal responsibility or authority, as specified in an MOU between the Commission and the entity. See part III.C, infra

60 As U.S. government personnel, OFR personnel are subject to the same general confidentiality requirements that are addressed above in the context of the Board and the Federal Reserve Banks. See note 53, supra. In addition, the OFR is required to keep data collected and maintained by the OFR data center secure and protected against unauthorized disclosure. See Dodd-Frank Act section 154(b)(3); see also 12 CFR 1600.1 (ethical conduct standards applicable to OFR employees, including post-employment restrictions linked to access to confidential information); 31 CFR 0.206 (Treasury Department prohibition on employees disclosing official information without proper authority).

61 See proposed Exchange Act rule 13n-4(b)(9)(x).

such determinations may be conditional or unconditional.[62] A relevant authority would be able to request that the Commission make such a determination.

a. Determination factors and conditions

The Commission continues to expect that it would consider a variety of factors in connection with making such a determination, and that it may impose associated conditions in connection with the determination. The Commission expects to consider the factors discussed below, as well as any other factors the Commission determines to be relevant.[63]

In part, the Commission expects to consider whether there is an MOU or other arrangement[64] between the Commission and the relevant authority that is designed to protect the confidentiality of the security-based swap data provided to the authority.[65] The Commission also

---

[62] See id. In those respects, the proposed rule would implement the corresponding statutory language, which provides the Commission with the authority to allow data access to "any other person that the Commission determines to be appropriate." See Exchange Act section 13(n)(5)(G)(v), 15 U.S.C. 78m(n)(5)(G)(v).

[63] The factors discussed below that may be expected to be relevant to a Commission's determination that a person is eligible to access security-based swap information pursuant the statutory data access provisions – including factors related to the presence of a confidentiality MOU and related to a person's regulatory mandate, or legal responsibility or authority – parallel certain of the conditions to the exemption from the indemnification requirement. See parts III.B, C, infra.

[64] The Cross-Border Proposing Release specifically referred to a "supervisory and enforcement MOU or other arrangement" in this context. See Cross-Border Proposing Release, 78 FR at 31047. The Commission is revising its proposed guidance to refer to MOUs and other arrangements generally – rather than "supervisory and enforcement" MOUs and arrangements – to allow the parties more flexibility in arriving at such confidentiality arrangements.

[65] Such an MOU or other arrangement may also satisfy the statutory requirement that a security-based swap data repository obtain a confidentiality agreement from the authority. See part II.B.1, infra (proposed Exchange Act rule 13n-4(b)(10)(i) would permit an agreement between the Commission and a relevant authority to satisfy the statutory condition that the repository obtain a confidentiality agreement from the authority).

Moreover, this MOU or other arrangement further may satisfy the proposed indemnification exemption's condition that there be an arrangement between the Commission and an entity regarding the confidentiality of the information provided. See part III.C, infra. To the extent that a relevant authority's needs access to additional information, the relevant authority may request that the Commission consider revising its determination order, and MOU or other arrangement, as applicable.

expects to consider whether information accessed by the applicable authority would be subject to robust confidentiality safeguards. The Commission believes that these factors are important given the proprietary and highly sensitive nature of the data maintained by the repository.[66]

In making a determination the Commission also may consider the relevant authority's interest in access to security-based swap data based on the relevant authority's regulatory mandate, or legal responsibility or authority. Limiting the amount of information accessed by an authority in this manner may help minimize the risk of unauthorized disclosure, misappropriation, or misuse of security-based swap data because each relevant authority will only have access to information within its regulatory mandate, or legal responsibility or authority.

Consistent with this factor, the Commission preliminarily expects that such determination orders typically would incorporate conditions that specify the scope of a relevant authority's access to data, and that limit this access in a manner that reflects the relevant authority's regulatory mandates or legal responsibility or authority.[67] Depending on the nature of the relevant authority's interest in the data, such conditions potentially could address factors such as the domicile of the counterparties to the security-based swap, and the domicile of the underlying

---

66 See Exchange Act section 13(n)(5)(H)(i).

67 To appropriately limit a relevant authority's access to only security-based swap data that is consistent with the MOU between the Commission and the relevant authority, a repository may, for example, need to customize permissioning parameters to reflect each relevant authority's electronic access to security-based swap data. See generally note 103, infra (discussing access criteria currently used by DTCC in connection with current voluntary disclosure practices).

reference entity.[68] Focusing access to data in this way should help address one commenter's concerns regarding "unfettered access" to such proprietary data.[69]

The Commission further anticipates taking into account any other factors that are appropriate to the determination, including whether such a determination would be in the public interest. This consideration likely would include whether the relevant authority agrees to provide the Commission and other U.S. authorities with reciprocal assistance in matters within their jurisdiction.

b. Additional matters related to the determinations

The Commission contemplates taking various approaches in deciding whether to impose additional conditions in connection with its consideration of requests for determination orders. For example, the Commission may issue a determination order that is for a limited time. The Commission further may revoke a determination at any time. For example, the Commission may revoke a determination or request additional information from a relevant authority to support the continuation of the determination if for example a relevant authority fails to comply with the MOU, such as by failing to keep confidential security-based swap data provided to it by a repository. Even absent such a revocation, moreover, an authority's access to data pursuant to

---

[68] See note 105, infra, and accompanying text (discussing application of those factors in the context of the indemnification exemption).

[69] See note 14, supra (comment voicing concerns about "unfettered access" to security-based swap information by regulators, including foreign financial supervisors, foreign central banks and foreign ministries, beyond their regulatory authority and mandate).

As discussed below, moreover, the availability of the proposed indemnification exemption would similarly be conditioned to reflect the recipient's regulatory mandates or legal responsibility or authority. See part III.C, infra. Accordingly, based on the expectation that persons who seek access pursuant to these provisions would rely on the indemnification exemption, there would be comparable limitations to access applicable to persons directly identified by Exchange Act sections 15(n)(5)(i) through (iv) (the "prudential regulators," FSOC, CFTC and Department of Justice) or added by the proposed rules (the Federal Reserve Banks and the OFR).

these provisions also would cease upon the termination of the MOU or other arrangement used to satisfy the confidentiality condition, or, as applicable, the indemnification exemption.[70]

The Commission preliminarily believes that the determination process described above represents a reasonable approach toward providing appropriate access to relevant authorities. Moreover, the Commission preliminarily believes that this process – particularly the link between access and the authority's interest in the information – appropriately builds upon existing voluntary frameworks, in accordance with one commenter's suggestion that the applicable framework incorporate other cooperative efforts with regard to access to information.[71]

The Commission expects that repositories will provide relevant authorities with access to security-based swap data in accordance with the determination orders, and the Commission generally does not expect to be involved in reviewing, signing-off on or otherwise approving relevant authorities' requests for security-based swap data from repositories that are made in

---

70 See parts II.B and III.B, C, supra.

71 See DTCC comment (June 3, 2011) at 6-7 ("It is critical that the United States, the European Union and the other major global markets align their regulatory regimes to limit opportunities for market distorting arbitrage. The creation of a global credit default swap repository would not have occurred without the global regulatory cooperation achieved through the OTC Derivatives Regulators' Forum ('ODRF') and the OTC Derivatives Regulators Supervisors Group ('ODSG'). It is important that the global SDR framework incorporate their efforts, particularly the ODRF's guidelines on regulatory access to information stored in trade repositories for over-the-counter derivatives."); DTCC comment (Jan. 24, 2011) at 3 ("DTCC relies upon the direction provided by the OTC Derivatives Regulators' Forum ('ODRF'), whose membership includes the SEC and the Commodity Futures Trading Commission ('CFTC'). DTCC's Trade Information Warehouse (the 'Warehouse' or 'TIW') has followed the ODRF's guidance, recognizing that broad agreement among global regulators is difficult to achieve. DTCC is committed to complying with the policies adopted by the regulators and working with the Commission in this regard.").

In this regard, DTCC further has stated that it routinely provides U.S. regulators with credit default swap data related to overseas transactions entered into by non-U.S. persons on U.S. reference entities, and that it provides European regulators with data related to transactions in the U.S. by U.S. persons on European reference entities. See DTCC comment (Jan. 24, 2011) at 12; see also DTCC comment (June 3, 2011) at 7-8.

accordance with a determination order. Moreover, the Commission continues preliminarily to believe that it is not necessary to prescribe by rule specific processes to govern a repository's treatment of requests for access.[72]

Finally, the Commission notes that it may elect to apply these determination factors and consider applying protections similar to those in the data access provisions of Exchange Act sections 13(n)(5)(G) and (H) when designating authorities to receive direct access under section 13(n)(5)(D). Section 13(n)(5)(D) states that a repository must provide direct electronic access to the Commission "or any designee of the Commission, including another registered entity."[73] In practice, the Commission expects that security-based swap data repositories may satisfy their obligation to make available data pursuant to sections 13(n)(5)(G) and (H) by providing electronic access to appropriate authorities. To the extent a repository were to satisfy those requirements by some method other than electronic access, however, the Commission separately may consider whether to also designate particular authorities as being eligible for electronic access to the repository pursuant to section 13(n)(5)(D). In making such assessments under section 13(n)(5)(D), the Commission preliminarily believes that it may consider factors similar to the above determination factors, including the presence of confidentiality safeguards, and the authority's interest in the information based on its regulatory mandate or legal responsibility or authority.

---

72 See Cross-Border Proposing Release, 78 FR 31047-48. One commenter suggested that the Commission adopt an approach proposed by the CFTC, whereby a regulator requesting access to data first file a request for access and certify the statutory authority for the request and detail the basis for the request. See Managed Funds Association comment (Jan. 24, 2011) at 3-4. In contrast to that proposal, however, the final CFTC rules do not require relevant authorities to detail the basis for their requests, and do not require a swap data repository to provide access only if it is satisfied that the regulator is acting within the scope of its authority. See note 31, supra.

73 15 U.S.C. 78m(n)(5)(D).

4. Notification requirement

The proposal would implement the statutory notification requirement – which states that a repository must notify the Commission when an entity requests that the repository make available security-based swap data[74] – by requiring the repository to inform the Commission upon its receipt of the first request for data from a particular entity (which may include any request that the entity be provided ongoing online or electronic access to the data).[75] A repository must keep such notifications and any related requests confidential.[76]

The repository further would have to maintain records of all information related to the initial and all subsequent requests for data access requests from that entity, including records of all instances of online or electronic access, and records of all data provided in connection with such requests or access.[77] For these purposes, we believe that "all information related to" such

---

[74] See Exchange Act section 13(n)(5)(G), 15 U.S.C. 78m(n)(5)(G). As discussed below, see part IV, infra, the notification requirement does not apply to circumstances in which disclosures are made outside of the requirements of Exchange Act section 13(n)(5)(G), 15 U.S.C. 78m(n)(5)(G), particularly when a dually regulated data repository makes disclosure pursuant to foreign law, or when the Commission provides security-based swap data to an entity.

[75] See proposed Exchange Act rule 13n-4(e). The rule does not require the repository to proactively inform the Commission of subsequent requests.

[76] Exchange Act section 13(n)(5)(G), 15 U.S.C. 78m(n)(5)(G), and proposed rule 13n-4(b)(9) both require that a repository must make data available "on a confidential basis." Failure by a repository to treat such notifications and requests as confidential could have adverse effects on the underlying basis for the requests. If, for example, a regulatory use of the data is improperly disclosed, such disclosure could signal a pending investigation or enforcement action, which could have detrimental effects.

[77] See proposed Exchange Act rule 13n-4(e).

We note that Exchange Act rule 13n-7(b)(1) requires security-based swap data repositories to maintain copies of "all documents and policies and procedures required by the Act and the rules and regulations thereunder, correspondence, memoranda, papers, books, notices, accounts and other such records as shall be made or received by it in the course of its business as such." See also SDR Adopting Release, 80 FR at 14501 ("This rule includes all electronic documents and correspondence, such as data dictionaries, e-mails and instant messages, which should be furnished in their original electronic format."). Proposed Exchange Act rule 13n-4(e) identifies specific types of records that must be maintained in the specific context of access request to repositories.

requests would likely include, among other things: the identity of the requestor or person accessing the data; the date, time and substance of the request or access; and copies of all data reports or other aggregations of data provided in connection with the request or access.

In the Commission's preliminary view, the proposed notification requirement is designed to account for the way in which we believe entities are likely to access such data from repositories, by distinguishing steps that an entity takes to arrange access from subsequent electronic instructions and other means by which the recipient obtains data. By making relevant data available to the Commission in this manner, the proposed approach would place the Commission on notice that a recipient has the ability to access security-based swap data, and place the Commission in a position to examine such access as appropriate, while avoiding the inefficiencies that would accompany an approach whereby a repository must direct to the Commission information regarding each instance of access by each recipient. Moreover, the proposed approach would be consistent with the manner in which the Commission examines the records of regulated entities under the Commission's authority.

The Commission recognizes that one commenter opposed any requirement that the Commission receive notice of a recipient's initial request, on the grounds that such notice may cause other authorities to hesitate to make such requests.[78] While the Commission appreciates the commenter's concerns, the Commission preliminarily believes that it is necessary for the Commission to be informed of the initial request from a particular entity so that the Commission

---

[78] See DTCC comment (Aug. 13, 2013) ("DTCC discourages the Commission from requiring a notification requirement upon initial request as suggested by the Cross-Border Proposal. Authorities will likely be hesitant to make such request to an SDR if it triggers a notice to another authority, particularly if such request is pursuant to an investigation. DTCC proposes that the Commission consider notification to be deemed satisfied if the request is made by an entity to the SDR pursuant to an established information sharing arrangement[.]").

may assess whether the initial conditions to data access (i.e., MOUs or other arrangements as needed to satisfy the confidentiality condition and the indemnification exemption[79]) have been met at the time the repository first is requested to provide the entity with information pursuant to the data access provisions, and, more generally, to facilitate the Commission's ongoing assessment of the repository's compliance with the data access provisions. The Commission also believes that commenter concerns that other regulators may be reluctant to place the Commission on notice of such initial requests are mitigated by the Commission's long history of cooperation with other authorities in supervisory and enforcement matters.[80]

5. Limitation to "security-based swap data"

Repositories that obtain security-based swap data may also obtain data regarding other types of financial instruments, such as swaps under the CFTC's jurisdiction. We do not read the data access provisions of Exchange Act sections 13(n)(5)(G) and (H) – which were added by Subtitle B of Title VII (which focused on the regulatory treatment of security-based swaps)[81] to the Exchange Act (which generally addresses the regulation of securities such as security-based swaps) – to require a repository to make available data that does not involve security-based swaps. The statutory confidentiality condition to the data access requirement further suggests

---

79 See parts II.B and III.B, infra.

80 The Commission also recognizes that the same commenter stated that "regulators want direct electronic access to data in SDRs where that data is needed to fulfill regulatory responsibilities" rather than access "by request, with notice to another regulatory authority." See DTCC comment (Jan. 24, 2011) at 11-12. Data repositories in fact can provide direct electronic access to relevant authorities under the proposed interpretation. The proposed requirement that the repository inform the Commission when the relevant authority first requests access to security-based swap data maintained by the repository, and to retain records of subsequent access, is designed to facilitate such direct access.

81 See Dodd-Frank Act section 763(i) (addressing "public reporting and repositories for security-based swaps," including the addition of section 13(n), 15 U.S.C. 78m(n), to the Exchange Act to address security-based swap data repositories); see generally Subtitle B to Title VII of the Dodd-Frank Act, section 761 et seq. (addressing "Regulation of Security-Based Swap Markets").

that the data access provisions are intended to apply only to security-based swap data.[82] Accordingly, the proposed rules specifically address access to "security-based swap data" obtained by a security-based swap data repository.[83]

B. Confidentiality Condition

The Exchange Act provides that, prior to providing data, a repository "shall receive a written agreement from each entity stating that the entity shall abide by the confidentiality requirements described in section 24 relating to the information on security-based swap transactions that is provided."[84]

The proposed rule implementing this condition would require that, before a repository provides information pursuant to the data access provisions, "there shall be in effect an arrangement between the Commission and the entity (in the form of a memorandum of understanding or otherwise) to address the confidentiality of the security-based swap information

---

82 In particular, the confidentiality condition to the data access provisions specifically requires that the recipient entity abide by confidentiality requirements for "the information on security-based swap transactions that is provided," suggesting that the Exchange Act data access provisions are intended solely to address security-based swap data. See Exchange Act section 13(n)(5)(H)(i), 15 U.S.C. 78m(n)(5)(H)(i).

Moreover, this approach is consistent with the CFTC's comparable rules, which apply only to swap data. See 17 CFR 49.17(d) and 49.18 (discussing regulators' access to swap data under the CEA).

83 See proposed Exchange Act rule 13n-4(b)(9).

84 See Exchange Act section 13(n)(5)(H)(i), 15 U.S.C. 78m(n)(5)(H)(i).

Exchange Act section 24, 15 U.S.C. 78x, generally addresses disclosures of information by the Commission and its personnel. In relevant part it provides that the Commission may, "in its discretion and upon a showing that such information is needed," provide all records and other information "to such persons, both domestic and foreign, as the Commission by rule deems appropriate if the person receiving such records or information provides such assurances of confidentiality as the Commission deems appropriate." See Exchange Act section 24(c), 15 U.S.C 78x(c); see also Exchange Act rule 24c-1(b) (providing that the Commission may, upon "such assurances of confidentiality as the Commission deems appropriate," provide non-public information to persons such as domestic and foreign governments or their political subdivisions, authorities, agencies or instrumentalities, self-regulatory organizations and foreign financial authorities).

made available to the entity."[85] The proposed rule further would provide that this arrangement would be deemed to satisfy the statutory requirement that the repository receive a written confidentiality agreement from the entity.[86]

This proposed approach to implementing the confidentiality condition, in other words, would use an arrangement between the Commission and a regulator or other recipient entity to satisfy the statutory confidentiality condition. The approach would not necessitate the use of confidentiality agreements entered into by repositories.[87]

In the Commission's preliminary view, this approach reflects an appropriate way to satisfy the interests associated with the confidentiality condition, while facilitating the statutory data access provision's goal of promoting the flow of information to authorities. The approach further would build upon the Commission's experience in negotiating MOUs with other regulators in connection with enforcement and supervision, particularly the Commission's experience in connection with the development of provisions related to maintaining the confidentiality of information.

---

85 See proposed Exchange Act rule13n-4(b)(10).

86 See Exchange Act section 13(n)(5)(H)(1). As discussed below, see part IV, infra, the confidentiality condition does not apply to circumstances in which disclosures are made outside of the requirements of Exchange Act section 13(n)(5)(G), 15 U.S.C. 78m(n)(5)(G), particularly when a dually regulated data repository makes disclosure pursuant to foreign law, or when the Commission provides security-based swap data to an entity.

87 In this regard, the Commission notes that the statute does not require that the security-based swap data repository "agree" with the entity, "enter into" an agreement, or otherwise be a party to the confidentiality agreement. The statute merely states that the repository "receive" such an agreement. See Exchange Act section 13(n)(5)(H)(i), 15 U.S.C. 78m(n)(5)(H)(i). Accordingly, we believe that, at a minimum, the statutory language is ambiguous as to whether the data repository must itself be a party to the confidentiality agreement. In light of this ambiguity, we have preliminarily determined to read the statute to permit the Commission to enter into confidentiality agreements with the entity, with the repository receiving the benefits of the agreement. Accordingly, the Commission believes that it is appropriate to view a security-based swap data repository as having received a confidentiality agreement when the entity enters into a confidentiality agreement with the Commission and that agreement runs to the benefit of the repository.

As a result, the approach would potentially obviate the need for each individual repository to negotiate and enter into dozens of confidentiality agreements. By building upon the Commission's experience and expertise in this area, moreover, the Commission expects that this approach also would help avoid the possibility of uneven and potentially inconsistent application of confidentiality protections across data repositories and recipient entities.

In proposing this approach, the Commission also is mindful that the statutory provision specifically references the "confidentiality requirements described in section 24" of the Exchange Act. In the Commission's preliminary view this statutory language articulates a standard which requires that there be adequate confidentiality assurances. Thus, the Commission preliminarily believes that the proposed provision, under which the Commission would negotiate and enter into agreements providing such confidentiality assurances, appropriately implements the statutory reference to section 24.

C. Request for Comment

The Commission requests comment regarding all aspects of these proposed rules regarding access to security-based swap data from repositories. Among other things, commenters particularly are invited to address the proposal that the confidentiality agreement requirement would be satisfied by an MOU or other agreement between the Commission and another entity. Commenters also are invited to address: the proposed limitation of the data access requirement to security-based swap data; the proposed provisions related to access by prudential regulators, the Federal Reserve Banks and the OFR; the criteria that the Commission should consider in evaluating whether to determine to permit additional entities to access data from repositories; whether the orders that make such determinations generally should encompass conditions that limit a relevant authority's access to information to reflect its regulatory mandate or legal responsibility or authority; whether the Commission should prescribe specific processes to govern requests for such access; and whether the Commission should prescribe a process to govern a repository's treatment of requests for access.

In addition, commenters are invited to address the proposed rules implementing the notification requirement, including the proposed provisions regarding the maintenance of information related to data requests. In this regard, is there an alternative to requiring repositories to maintain copies of all data they provide in connection with the data access provisions that would still permit the Commission to assess the repository's ongoing compliance with those provisions? For example, are alternative approaches available such that the Commission should not require repositories to maintain actual copies of all reports or other aggregations of data provided pursuant to the data access provisions, such as if the repository instead implements policies and procedures sufficient to demonstrate a process for creating records that reflect the data provided, and the repository produces promptly copies of such records upon request by a representative of the Commission?[88] Would such an alternative approach reduce the burdens on repositories while still permitting the Commission to assess ongoing compliance?

Commenters further are invited to address whether the Commission should determine that other domestic authorities, such as one or more self-regulatory organizations, should be

---

[88] For example, in adopting Exchange Act rule 17a-4(b)(13) to provide that broker-dealers must preserve certain written policies and procedures in connection with creditworthiness assessments, the Commission stated that although the rule does not require that a broker-dealer maintain a record of each such creditworthiness determination, a broker-dealer would need to be able to support each such determination, and that the broker-dealer may do so by either maintaining documentation of those determinations or by being in a position to "replicate the original credit risk determination using the same process, information, and inputs employed to make the original determination." See Exchange Act Release No. 71194 (Dec. 27, 2013), 79 FR 1522, 1528-29, 1550 (Jan. 8, 2014).

eligible to access security-based swap data pursuant to these provisions. If so, should the access of such self-regulatory organizations be limited in any particular respects?

III. Proposed Exemption from the Indemnification Requirement

A. Proposed Exemption

The Exchange Act also conditions the data access requirement on each recipient entity agreeing "to indemnify the security-based swap data repository and the Commission for any expenses arising from litigation relating to information provided under section 24."[89]

Pursuant to the Commission's authority under Exchange Act section 36,[90] the Commission is proposing a conditional exemption from that statutory indemnification requirement. This proposed exemption would be effective whenever the applicable conditions are met, in contrast with the earlier proposal, which would have conditionally exempted regulators and other authorities from the indemnification requirement only at the election of the data repository.[91]

---

89 Exchange Act section 13(n)(5)(H)(ii), 15 U.S.C. 78m(n)(5)(H)(ii). As discussed below, see part IV, infra, the statutory indemnification requirement would not always be triggered by the disclosure of security-based swap information.

In the event that the proposed exemption is unavailable, the Commission agrees with one commenter's view that "any indemnity should be limited in scope to minimize the potential reduction in value of registered SDRs to the regulatory community." See DTCC comment (Jan. 24, 2011) at 12. Consistent with that view, as stated in the Cross-Border Proposing Release, the Commission would not expect that an indemnification agreement would include a provision requiring a relevant authority to indemnify the repository from the repository's own wrongful or negligent acts. See Cross-Border Proposing Release, 78 FR at 31051 n.829.

90 15 U.S.C. 78mm (providing the Commission with general exemptive authority . . . "to the extent that such exemption is necessary or appropriate in the public interest, and is consistent with the protection of investors").

91 To implement this approach, the Commission proposes in relevant part that the indemnification requirement conditionally "shall not be applicable" with regard to the repository's disclosure of security-based swap information. See proposed Exchange Act rule 13n-4(d)(1). The earlier proposal would have conditionally provided that a registered security-based swap data repository "is not required to comply"

This proposed exemption reflects the Commission's preliminary concern that requiring authorities to agree to provide indemnification could lead to negative consequences in practice. The Commission continues to understand that certain authorities may be legally prohibited or otherwise limited from agreeing to indemnify data repositories or the Commission for expenses arising in connection with the information received from a repository.[92]

As a result, application of the indemnification requirement may chill some requests by regulators or other authorities for access to security-based swap data, which would hinder those authorities' ability to address their own regulatory mandate or legal responsibility or authority.[93] The resulting lack of access also may impair coordination among regulators with regard to the

---

with the indemnification requirement. See Cross-Border Proposing Release, 78 FR at 31209 (paragraph (d) of proposed rule 13n-4).

[92] As stated in the Cross-Border Proposing Release, the Commission recognizes that certain domestic authorities, including some of those expressly identified in Exchange Act section 13(n)(5)(G), 15 U.S.C. 78m(n)(5)(G), as a matter of law cannot provide an open-ended indemnification agreement. See Cross-Border Proposing Release, 78 FR at 31048-49 (particularly noting that the Antideficiency Act prohibits certain U.S. federal agencies from obligating or expending federal funds in advance or in excess of an appropriation, apportionment, or certain administrative subdivisions of those funds, e.g., through an unlimited or unfunded indemnification).

[93] See DTCC cross-border comment (Aug. 21, 2013) at 6 ("The continued presence of the Indemnification Provision (even as modified by the exemption in the Cross-Border Proposal) may pose problems for Commission-regulated, U.S.-based SDRs and their ability to share information with third-party regulatory authorities. As a result, foreign regulators may seek to establish their own 'national' repositories to ensure access to the information they need, fragmenting the data among jurisdictions. Similarly, non-U.S. trade repositories may find themselves subject to similar reciprocal impediments to sharing information with the Commission or other U.S. regulatory agencies absent a confidentiality and indemnification agreement."); see also DTCC comment (Nov. 15, 2010) at 3 ("DTCC remains concerned that regulators are not likely to grant SDRs indemnification in exchange for access to the information and, accordingly, regulators may actually receive less aggregated market data. Such an outcome would result in a reduction of information accessible to regulators on a timely basis both domestically and internationally, which contravenes the purpose of SDRs and jeopardizes market stability."); Cleary Gottlieb comment (Sept. 20, 2011) at 31 ("[T]he indemnification requirement could be a significant impediment to effective regulatory coordination, since non-US regulators may establish parallel requirements for U.S. regulators to access swap data reported in their jurisdictions."); ESMA comment (Jan. 17, 2011) at 2 ("We believe that ensuring confidentiality is essential for exchanging information among regulators and such indemnification agreement undermines the key principle of trust according to which exchange of information should occur.").

oversight of market participants that engage in security-based swap transactions across national boundaries. For example, European Union ("EU") law provides that the ability of certain non-EU regulators to access data from EU repositories is conditioned on there being an international agreement that ensures that EU authorities have "immediate and continuous access to all of the information needed for the exercise of their duties."[94] As a result, application of the indemnification requirement without an exemption being available potentially could preclude EU authorities from accessing data from U.S. security-based swap data repositories. Under such circumstances, it is possible that EU authorities may be unwilling to permit the Commission and other U.S. regulators to access security-based swap data from EU repositories. The resulting concerns associated with a lack of regulatory access to security-based swap data are particularly significant given that data access allows relevant authorities to be in a better position to, among other things, monitor risk exposures of individual counterparties to swap and security-based swap transactions, monitor concentrations of risk exposures and evaluate risks to financial stability.[95]

Such a result associated with application of the indemnification requirement further may make substituted compliance unavailable in connection with security-based swap data reporting

---

[94] See EU regulation 648/2012 ("EMIR"), art. 75(2).

[95] See Darrell Duffie, Ada Li, and Theo Lubke, Policy Perspectives of OTC Derivatives Market Infrastructure, Federal Reserve Bank of New York Staff Report No. 424, dated January 2010, as revised March 2010 (with data from repositories regulators can "explore the sizes and depths of the markets, as well as the nature of the products being traded. With this information, regulators are better able to identify and control risky market practices, and are better positioned to anticipate large market movements."); see also DTCC comment (June 3, 2011) at 5 (noting that a data repositories should be able to provide: (i) enforcement authorities with necessary trading information; (ii) regulatory agencies with counterparty-specific information about systemic risk based on trading activity; (iii) aggregate trade information on market-wide activity and aggregate gross and net open interest for publication; and (iv) real-time reporting from [security-based swap execution facilities] and bilateral counterparties and related dissemination).

requirements, given that under rules adopted by the Commission the availability of substituted compliance for those requirements is predicated in part on the Commission's ability to directly access data in foreign repositories.[96]

The Commission recognizes that indemnification may help support confidentiality safeguards by making a recipient liable for expenses that a repository or the Commission incurs in connection with breaches of confidentiality. Nonetheless, the countervailing considerations noted above indicate that indemnification – of either the repository or the Commission – should not be required so long as appropriate confidentiality protections are provided in other ways.

For these reasons the Commission preliminarily believes that it is necessary and appropriate in the public interest, and consistent with the protection of investors, that the indemnification requirement be subject to an exemption that applies whenever the applicable conditions are satisfied.[97]

---

[96] See Regulation SBSR, rule 908(c) (2)(iii)(C), 17 CFR 242.908(c)(2)(iii)(C) (conditioning the availability of substituted compliance in part on the Commission having "direct electronic access to the security-based swap data held by a trade repository or foreign regulatory authority to which security-based swaps are reported pursuant to the rules of that foreign jurisdiction"); see also Exchange Act Release No. 74244 (Feb. 11, 2015), 80 FR 14564, 14661 (Mar.19, 2015) ("Regulation SBSR Adopting Release") ("granting substituted compliance without direct electronic access would not be consistent with the underlying premise of substituted compliance: That a comparable regulatory result is reached through compliance with foreign rules rather than with the corresponding U.S. rules.").

[97] The Commission is not incorporating a commenter's suggestion that there be "a safe harbor provision from liability for information shared pursuant to global information sharing agreements into the Indemnification Exemption for SDRs operating pursuant to information sharing arrangements, as defined in the Indemnification Exemption, or comparable to those published by the OTC Derivatives Regulators Forum ("ODRF") or CPSS-IOSCO." See DTCC cross-border comment (Aug. 21, 2013) at 7; see also DTCC comment (Jan. 24, 2011) at 3 (urging the Commission to aim for regulatory comity as reflected in ODRF and CPSS-IOSCO standards); DTCC comment (June 3, 2011) at 6-7 (urging that the global framework incorporate efforts of the ODRF and the OTC Derivatives Regulators Supervisors Group).

To the extent that the commenter suggests that there be a safe harbor from the indemnification requirement, the Commission preliminarily believes that this proposed exemption, which is more narrowly tailored than the commenter's suggestion, would sufficiently address a repository's need for certainty. The Commission further notes that a repository's statutory duty to maintain the privacy of the

B. Confidentiality Arrangement Condition

The proposal in part would condition the indemnification exemption upon there being in effect one or more arrangements (in the form of an MOU or otherwise) between the Commission and the entity that addresses the confidentiality of the security-based swap information provided and other matters as determined by the Commission.[98] The Commission preliminarily believes that such an MOU or other arrangement would address similar confidentiality interests that appear to be reflected by the statutory indemnification requirement, particularly given that the disclosure of confidential information inconsistent with such arrangements can lead to the termination of the arrangement and the loss of data access. Just as an indemnification agreement may be expected to incentivize the confidential treatment of information, such a confidentiality arrangement would help strengthen the authority's incentive to maintain the confidentiality of information.

The Commission anticipates that in determining whether to enter into such an MOU or other arrangement, it would consider, among other things, whether: (a) security-based swap information from a repository would help fulfill the relevant authority's regulatory mandate, or legal responsibility or authority; (b) the relevant authority provides such assurances of confidentiality as the Commission deems appropriate with respect to the security-based swap information provided to the authority; (c) the relevant authority is subject to statutory and/or regulatory confidentiality safeguards; (d) the relevant authority agrees to provide the

---

information received is separate and distinct from its statutorily mandated duty to provide security-based swap data to relevant authorities when specific conditions are satisfied, and that the privacy of security-based swap data provided to relevant authorities was addressed by Congress through the confidentiality agreement requirement in Exchange Act section 13(n)(5)(H), 15 U.S.C. 78m(n)(5)(H).

98 See proposed Exchange Act rule 13n-4(d)(2)(ii).

Commission with reciprocal assistance in matters within the Commission's jurisdiction; and (e) an MOU or other arrangement would be in the public interest. These considerations are comparable to the criteria that the Commission anticipates considering as it determines whether an entity is eligible to access information pursuant to the data access provisions.[99] Accordingly, for regulators or other authorities whose access is subject to a determination order, the same confidentiality MOUs or other agreements that are needed to satisfy the indemnification exemption may also serve to satisfy those prerequisites to the determinations.[100]

C. Condition Regarding Regulatory Mandate or Legal Responsibility or Authority

The proposal further would condition the indemnification exemption on the requirement that the information relate to persons or activities within the recipient entity's regulatory mandate, or legal responsibility or authority.[101] This proposed condition should reduce the potential for disclosure of confidential information by limiting the quantity of information each recipient may access. This limitation on access also should help address commenter concerns regarding "unfettered access" to security-based swap data.[102] This approach of limiting the availability of data to reflect such considerations also has parallels to the approach that one commenter indicated that it follows on a voluntary basis for providing relevant authorities with access to certain credit default swap information.[103]

---

99 See notes 64 through 69, supra, and accompanying text.

100 Those entities that are expressly identified in the statute or the implementing rules (and thus are not subject to the determination process) also would need to enter into a separate MOU or other agreement to satisfy the confidentiality agreement condition.

101 See proposed Exchange Act rule 13n-4(d)(1).

102 See note 14, supra.

103 See note 71, supra (DTCC statement that it routinely provides U.S. regulators with data related to overseas credit default swap transactions entered into by non-U.S. persons on U.S. reference entities, and

The proposal would implement this requirement by further conditioning the indemnification exemption by requiring that the MOU or other arrangement between the Commission and the entity accessing the data would specify the types of security-based swap information that would relate to the recipient entity's regulatory mandate, or legal responsibility or authority.[104] While the relevant factors for specifying which information is within an entity's regulatory mandate, or legal responsibility or authority for these purposes may vary depending on the relevant facts and circumstances, such factors potentially would include the location of a counterparty to the transaction and the location of the reference entity.[105] In this way, the MOU or other arrangement would help reduce uncertainty regarding how the associated condition to the indemnification exemption may apply to particular types of information requests, and would

---

that it provides European regulators with data related to credit default swap transactions in the U.S. by U.S. persons on European reference entities).

[104] See proposed Exchange Act rule 13n-4(d)(2)(ii).

[105] As an example, in the event of a request for access by a foreign authority that is responsible for security-based swap market surveillance and enforcement – and subject to negotiation of such an MOU or other arrangement between the Commission and that authority – criteria indicative of data regarding a transaction being within the authority's regulatory mandate or legal responsibility or authority may include: (i) one or more of the counterparties to the transaction being domiciled or having a principal place of business in the foreign jurisdiction (including branches of entities that are domiciled or that have a principal place of business in that jurisdiction); (ii) one or more of the counterparties being a subsidiary of a person domiciled or having a principal place of business in the foreign jurisdiction; (iii) one or more of the counterparties being a fund or other collective investment vehicle with an adviser that is domiciled or that have a principal place of business in the foreign jurisdiction; (iv) one or more of the counterparties being registered with the authority as a dealer or in some other capacity; or (v) the reference entity for the security-based swap being domiciled or having a principal place of business in the foreign jurisdiction.

As another example, in the case of a foreign authority that is responsible for prudential regulation, criteria indicative of data regarding a transaction being within the entity's regulatory mandate or legal responsibility or authority may include one or more of the counterparties to the transaction being part of a consolidated organization that is supervised by the prudential authority, including all affiliates within that consolidated organization.

provide direction to repositories regarding which disclosures would be covered by the indemnification exemption.[106]

D. Request for Comment

The Commission requests comment on all aspects of the proposed exemption to the statutory indemnification requirement. Commenters particularly are invited to address whether the exemption's proposed scope would adequately address the concerns associated with implementing the indemnification requirement. Among other things, commenters are invited to address whether alternative approaches or other considerations more effectively reflect the access and confidentiality interests associated with the Dodd-Frank Act? Also, should additional conditions be incorporated into the exemption?

Commenters further are invited to address whether the proposal appropriately would make use of an MOU or other arrangement to provide sufficient guidance to a repository regarding an entity's regulatory mandate, or legal responsibility or authority in connection with a request for security-based swap data. In this respect, would the proposed approach provide a repository with an adequate degree of guidance regarding which disclosures of information may or may not be subject to protection? Are there particular criteria that would be useful for incorporating into the MOU or other arrangement to help delimit which information would fall within an entity's regulatory mandate, or legal responsibility or authority?

---

106 The Commission anticipates that data repositories would be able to rely on the guidance provided by such arrangements when assessing whether particular information would be subject to the indemnification exemption, thus permitting an authority to access that information without an indemnification agreement.

IV. Applicability of Exchange Act Data Access and Indemnification Provisions

The Exchange Act provisions addressed above – sections 13(n)(5)(G) and (H)[107] – establish one means by which certain regulators and other authorities may access security-based swap data from repositories. It is important to recognize, however, that those provisions do not exclusively govern the means by which such regulators or other authorities might access security-based swap data.

In particular, in the circumstances discussed below, regulators and other authorities in certain circumstances may access security-based swap data via authority that is independent of the above provisions. In those circumstances, the Commission preliminarily believes that the conditions associated with those data access provisions – particularly the provisions regarding indemnification, notification and confidentiality agreements – should not govern access arising from such independent authority.

A. Data Access Authorized by Foreign Law

The Commission continues to believe preliminarily, as discussed in the Cross-Border Proposing Release, that "the Indemnification Requirement does not apply when an SDR is registered with the Commission and is also registered or licensed with a foreign authority and that authority is obtaining security-based swap information directly from the SDR pursuant to that foreign authority's regulatory regime."[108] In those circumstances, the dually registered data repository would be subject to a data access obligation that is independent of the Exchange Act data access obligation, and the notification, confidentiality and indemnification conditions to the Exchange Act data access provision would not apply.

---

[107] 15 U.S.C. 78m(n)(5)(G) and (H).

[108] See Cross-Border Proposing Release, 78 FR at 31049 n.807.

B. Receipt of Information Directly from the Commission

The Exchange Act also provides that relevant authorities may obtain security-based swap data from the Commission, rather than directly from data repositories.[109]

First, Exchange Act section 21(a)(2)[110] states that, upon request of a foreign securities authority, the Commission may provide assistance in connection with an investigation the foreign securities authority is conducting to determine whether any person has violated, is violating or is about to violate any laws or rules relating to securities matters that the requesting authority administers or enforces.[111] That section further provides that, as part of this assistance, the Commission in its discretion may conduct an investigation to collect information and evidence pertinent to the foreign securities authority's request for assistance.[112]

In addition, the Commission may share "nonpublic information in its possession" with, among others, any "federal, state, local, or foreign government, or any political subdivision, authority, agency or instrumentality of such government . . . [or] a foreign financial regulatory

---

109 See Cross-Border Proposing Release, 78 FR at 31045.

110 15 U.S.C. 78u(a)(2).

111 Exchange Act section 3(a)(50), 15 U.S.C. 78c(a)(50), broadly defines "foreign securities authority" to include "any foreign government, or any governmental body or regulatory organization empowered by a foreign government to administer or enforce its laws as they relate to securities matters."

112 Exchange Act section 21(a)(2), 15 U.S.C. 78u(a)(2), also states that the Commission may provide such assistance without regard to whether the facts stated in the request also would constitute a violation of U.S. law.

That section further states that when the Commission decides whether to provide such assistance to a foreign securities authority, the Commission shall consider whether the requesting authority has agreed to provide reciprocal assistance in securities matters to the United States, and whether compliance with the request would prejudice the public interest of the United States.

authority."[113] This authority is subject to the recipient providing "such assurances of confidentiality as the Commission deems appropriate."[114]

In the Commission's view, and consistent with Commission practice for many years, these sections provide the Commission with separate, additional authority to assist domestic and foreign authorities in certain circumstances, such as, for example, by providing security-based swap data directly to the authority. At those times, the authority would receive information not from the data repository, but instead from the Commission.

C. Request for Comment

The Commission requests comment on these preliminary interpretations regarding the scope of the data access requirement and conditions set forth in Exchange Act sections 13(n)(5)(G) and (H).

V. Paperwork Reduction Act

Certain provisions of the proposed rules contain "collection of information" requirements within the meaning of the Paperwork Reduction Act of 1995 ("PRA").[115] The SEC has submitted them to the Office of Management and Budget ("OMB") for review in accordance with 44 U.S.C. 3507 and 5 CFR 1320.11. The title of the new collection of information is "Security-Based Swap Data Repository Data Access Requirements." An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless

---

113 See Exchange Act rule 24c-1(c) (implementing Exchange Act section 24(c), 15 U.S.C. 78x(c), which states that the Commission may, "in its discretion and upon a showing that such information is needed," provide records and other information "to such persons, both domestic and foreign, as the Commission by rule deems appropriate," subject to assurances of confidentiality).

114 See id.

115 44 U.S.C. 3501 et seq.

it displays a currently valid OMB control number. OMB has not yet assigned a control number to the new collection of information.

A. Summary of Collection of Information

The proposal would require security-based swap data repositories to make security-based swap data available to other parties, including certain government bodies. This data access obligation would be conditioned on confidentiality and indemnification requirements, and the indemnification requirement itself would be subject to a conditional exemption. The proposal further would require such repositories to create and maintain information regarding such data access.

B. Proposed Use of Information

The data access requirement and associated conditions would provide the regulators and other authorities that receive the relevant security-based swap data with tools to assist with the oversight of the security-based swap market and of dealers and other participants in the market, and to assist with the monitoring of risks associated with that market.

C. Respondents

The data access requirement will apply to every person required to be registered with the Commission as a security-based swap data repository – that is every U.S. person performing the functions of a security-based swap data repository, and to every non-U.S. person performing the functions of a security-based swap data repository within the United States absent an exemption.[116] Commission staff is aware of seven persons that have, to date, filed applications

---

[116] As discussed above, see note 13, supra, the Commission has determined that a non-U.S. person that performs the functions of a security-based swap data repository within the United States is required to register with the Commission absent an exemption. The Commission also has adopted Exchange Act rule 13n-12 to provide an exemption from data repository requirements for certain non-U.S. persons.

for registration with the CFTC as swap data repositories, three of which have withdrawn their applications and four of which are provisionally registered with the CFTC. It is reasonable to estimate that a similar number of persons provisionally registered with the CFTC may seek to register with the Commission as security-based swap data repositories. Therefore, the Commission estimates, for PRA purposes, that ten persons might register with the Commission as security-based swap data repositories.[117]

The conditions to data access under these proposed rules further will affect all persons that may seek access to security-based swap data pursuant to these provisions. As discussed below, these may include up to 30 domestic entities.

D. Total Annual Reporting and Recordkeeping Burden

1. Data access generally

The data access provisions may implicate various types of PRA burdens and costs: (i) burdens and costs that regulators and other authorities incur in connection with negotiating MOUs or other arrangements with the Commission in connection with the data access provisions; (ii) burdens and costs that certain authorities that have not been determined by statute or Commission rule may incur in connection with requesting that the Commission grant them access to repository data;[118] (iii) burdens and costs associated with information technology systems that repositories develop in connection with providing data to regulators and other authorities; and (iv) burdens and costs associated with the requirement that repositories notify the

---

117 The Commission used the same estimate when adopting final rules to implement statutory provisions related to the registration process, duties and core principles applicable to security-based swap data repositories. See SDR Adopting Release, 80 FR at 14521.

118 These include MOUs and other arrangements in connection with: the determination of additional entities that may access security-based swap data (see part II.A.3, supra), the confidentiality condition (see part II.B.1, supra) and the indemnification exemption (see parts III.B.2, 3, supra).

Commission of requests for access to security-based swap data, including associated recordkeeping requirements.

a. MOUs

As discussed above, entities that access security-based swap data pursuant to these data access provisions would be required to enter into MOUs or other arrangements with the Commission to address the confidentiality condition and the indemnification exemption. In some cases, those entities also would enter into MOUs or other arrangements in connection with the Commission's determination of the entity as authorized to access such data (to the extent that the entity's access is already determined by statute or by the proposed rules). For purposes of the PRA requirements, the Commission estimates that up to 30 domestic entities potentially might enter into such MOUs or other arrangements, reflecting the nine entities specifically identified by statute or the proposed rules, and up to 21 additional domestic governmental entities or self-regulatory organizations that may seek access to such data. Based on the Commission's experience in negotiating similar MOUs that address regulatory cooperation, including confidentiality issues associated with regulatory cooperation, the Commission preliminarily believes that each regulator on average would expend 500 hours in negotiating such MOUs.[119]

[119] It may be expected that the initial MOU or other arrangement that is entered into between the Commission and another regulator may take up to 1,000 hours for that regulator to negotiate. In practice, however, subsequent MOUs and other arrangements involving other recipient entities would be expected to require significantly less time on average, by making use of using the prior MOUs as a basis for negotiation. Based on these principles, the Commission preliminarily estimates that the average amount of time that domestic and foreign recipients of data would incur in connection with negotiating these arrangements would be 500 hours.

To the extent that each of those 30 domestic entities were to seek to access data pursuant to these provisions, and each of the applicable MOUs or other arrangements were to take 500 hours on average, the total burden would amount to 15,000 hours.

b. Requests for access

Separately, certain entities that are not identified by statute and/or the proposed rules may request that the Commission determine that they may access such security-based swap data. For those entities, in light of the relevant information that the Commission preliminarily would consider in connection with such determinations (apart from the MOU issues addressed above) – including information regarding how the entity would be expected to use the information, information regarding the entity's regulatory mandate or legal responsibility or authority, and information regarding reciprocal access – the Commission preliminarily estimates that each such entity would expend 40 hours in connection with such request. As noted above, the Commission estimates that 21 domestic entities not encompassed in the proposed rule may seek access to the data. Accordingly, to the extent that 21 domestic entities were to request access (apart from the nine entities identified by statute or the proposed rule), the Commission estimates a total burden of 840 hours for these entities to prepare and submit requests for access.

c. Systems costs

The Commission previously addressed the PRA costs associated with the Exchange Act's data access requirement in 2010, when the Commission initially proposed rules to implement those data access requirements in conjunction with other rules to implement the duties applicable to security-based swap data repositories. At that time, based on discussions with market participants, the Commission estimated that a series of proposed rules to implement duties applicable to security-based swap data repositories – including the proposed data access rules as well as other rules regarding repository duties (e.g., proposed rules requiring repositories to accept and maintain data received from third parties, to calculate and maintain position information, and to provide direct electronic access to the Commission and its designees) – together would result in an average one-time start-up burden per repository of 42,000 hours and

$10 million in information technology costs for establishing systems compliant with all of those requirements. The Commission further estimated the average per-repository ongoing annual costs of such systems to be 25,200 hours and $6 million.[120]

The Commission incorporated those same burden estimates earlier this year, when the Commission adopted final rules to implement the duties applicable to security-based swap data repositories, apart from the data access requirement.[121]

Subject to the connectivity issues addressed below, the Commission believes that the burden estimates associated with the 2010 proposed repository rules encompassed the costs and burdens associated with the proposed data access requirements in conjunction with other system-related requirements applicable to security-based swap dealers. To comply with those other system-related requirements – including in particular requirements that repositories provide direct electronic access to the Commission and its designees – we preliminarily believe that it is reasonable to expect that repositories may use the same systems as they would also use to comply with the data access requirements at issue here, particularly given that both types of access requirements would require repositories to provide security-based swap information to particular recipients subject to certain parameters.[122] As a result, subject to per-recipient

---

120 See SDR Proposing Release, 75 FR at 77348-49. The Commission previously estimated, for PRA purposes, that ten persons may register with the Commission as security-based swap data repositories. See SDR Adopting Release, 80 FR at 14521, 14523. Based on the estimate of ten respondents, the Commission estimated total one-time costs of 420,000 hours and $10 million, and total annual ongoing systems costs of 252,000 and $60 million. See SDR Proposing Release, 75 FR at 77349.

121 See SDR Adopting Release, 80 FR at 14523. The Commission submitted the PRA burden associated with that release to OMB for approval, and the OMB has approved that collection of information.

122 The Commission also anticipates that repositories would use the same systems in connection with the Exchange Act data access requirements as they use in connection with the corresponding requirements under the CEA.

connectivity burdens addressed below, the Commission preliminarily believes that would be no additional burdens associated with information technology costs to implement the data access requirements of the proposed rule.

The Commission also recognizes, however, that once the relevant systems have been set up, repositories may be expected to incur addition incremental burdens and costs associated with setting up access to security-based swap data consistent with the recipient's regulatory mandate or legal responsibility or authority.[123] The Commission preliminarily believes that, for any particular recipient, security-based swap data repositories on average would incur a burden of 26 hours.[124] As discussed below, based on the estimate that approximately 300 relevant authorities may make requests for data from security-based swap data repositories,[125] the Commission preliminarily estimates that each repository would incur a one-time burden of 7,800 hours in connection with providing that connectivity.[126]

---

[123] In addressing those burdens, the Commission expects that the MOUs or other arrangements that are used to satisfy the conditions of the indemnification exemption will set forth objective criteria that delimit the scope of a recipient's ability to access security-based swap data pursuant to the indemnification exemption. The Commission further expects that repositories would use those criteria to program their data systems to reflect the scope of the recipient's access to repository data. Absent such objective and programmable criteria, repositories would be expected to incur greater burdens to assess whether an authority's request satisfies the relevant conditions, particularly with regard to whether particular information relates to persons or activities within the entity's regulatory mandate or legal responsibility or authority.

[124] This estimate is based on the view that for each recipient requesting data, a repository would incur a 25 hour burden associated with programming or otherwise inputting the relevant parameters, encompassing 20 hours of programmer analyst time and five hours of senior programmer time. The estimate also encompasses one hour of attorney time in connection with each such recipient.

[125] See part VI.C.3.ii, infra.

[126] Across an estimated ten repositories, accordingly, the Commission estimates that repositories cumulatively would incur a one-time burden of 78,000 hours in connection with providing such connectivity.

d. Providing notification of requests, and associated records requirements

Under the proposed rules, repositories would be required to inform the Commission when they receive the first request for security-based swap data from a particular entity.[127] As discussed below, based on the estimate that approximately 300 relevant authorities may make requests for data from security-based swap data repositories, the Commission estimates that each repository would provide the Commission with actual notice approximately 300 times.[128] Moreover, based on the estimate that ten persons may register with the Commission as security-based swap data repository, the Commission estimates that repositories in the aggregate would provide the Commission with actual notice a total of 3,000 times. The Commission preliminarily estimates that each such notice would take no more than one-half hour to make on average, leading to a cumulative estimate of 1,500 hours associated with the notice requirement.

The proposed rule further requires that repositories must maintain records of all information related to the initial and all subsequent requests for data access, including records of all instances of online or electronic access, and records of all data provided in connection with such access.[129] The Commission estimates that there cumulatively may be 360,000 subsequent data requests or access per year across all security-based swap data repositories, for which repositories must maintain records as required by the proposed rule.[130] Based on its experience with recordkeeping costs associated with security-based swaps generally, the Commission preliminarily estimates that for each repository this requirement would create an initial burden of

---

127 See proposed Exchange Act rule 13n-4(e) (further requiring the repository to maintain records of the initial and all subsequent requests).

128 See part VI.C.3.a.ii, infra.

129 See proposed Exchange Act rule 13n-4(e).

130 See part VI.C.3.a.ii, infra.

roughly 360 hours, and an annualized burden of roughly 280 hours and $40,000 in information technology costs.[131]

2. Confidentiality condition

The Commission preliminarily does not believe that the confidentiality provision of the proposal would be associated with collections of information that would result in a reporting or recordkeeping burden for security-based swap data repositories. This is because, under the proposal, the confidentiality condition would be satisfied by an MOU or other arrangement between the Commission and the recipient entity (i.e., another regulatory authority) addressing confidentiality. We preliminarily expect that in practice that the condition will be addressed by MOUs or other arrangements entered into by the Commission, and that repositories accordingly would not be involved in the drafting or negotiation of confidentiality agreements.

As discussed above, moreover, the confidentiality provision would be expected to impose burdens on authorities that seek to access data pursuant to these provisions, as a result of the need to negotiate confidentiality MOUs or other arrangements.[132]

E. Collection of Information is Mandatory

The conditional data access requirements of Exchange Act sections 13(n)(5)(G) and (H) and the underlying rules are mandatory for all security-based swap data repositories. The confidentiality condition is mandatory for all entities that seek access to data under those requirements. Also, the conditions to the indemnification exemption are mandatory to entities

---

131 Across an estimated ten repositories, accordingly, the Commission preliminarily estimates that repositories cumulatively will incur an initial burden of roughly 3,600 hours in information technology costs, and an annualized burden of roughly 2,800 hours and $400,000 in information technology costs.

132 See part V.D.1.a, supra.

that seek to rely on the exemption, which the Commission believes will be all entities that seek data pursuant to these requirements.

F. Confidentiality

The Commission will make public requests for a determination that an authority is appropriate to conditionally access security-based swap data, as well as Commission determinations issued in response to such requests. The Commission preliminarily expects that it will make publicly available the MOUs or other arrangements with the Commission used to satisfy the confidentiality and indemnification conditions.

Initial notices of requests for access provided to the Commission by repositories will be kept confidential, subject to the provisions of applicable law. To the extent that the Commission obtains subsequent requests for access that would be required to be maintained by the repositories, the Commission also will keep those records confidential, subject to the provisions of applicable law.

G. Request for Comment

We request comment on our approach and the accuracy of the current estimates. Pursuant to 44 U.S.C. 3506(c)(2)(A), the Commission solicits comments to: (1) evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) evaluate the accuracy of the Commission's estimate of burden of the collection of information; (3) determine whether there are ways to enhance the quality, utility and clarity of the information to be collected; and (4) evaluate whether there are ways to minimize the burden of the collection of information on those who are required to respond, including through the use of automated collection techniques or other forms of information technology.

In this regard, the Commission particularly requests comment regarding the systems-related costs associated with these data access requirements. Among other things, commenters are invited to address the burdens associated with establishing and programming systems to provide regulators and other authorities with connectivity to repository data systems, including whether such costs would be incremental to the systems-related costs associated with the existing rule requiring that repositories provide direct electronic access to the Commission and its designees, and whether such systems-related costs would encompass capacity-related elements linked to the total number of regulators and other authorities that access repositories pursuant to these data access provisions. Commenters also are invited to address the estimated burdens associated with the requirement that repositories maintain records in connection with the notification requirement.

The Commission further requests comment regarding the burdens associated with the negotiation of MOUs or other arrangements between the Commission and other authorities, including the average time required for those regulators to negotiate such MOUs or other arrangements, and whether those other authorities may incur costs to retain outside counsel in connection with such negotiations.

Persons submitting comments on the collection of information requirements should direct the comments to the Office of Management and Budget, Attention: Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Washington, DC 20503, and send a copy to Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549-1090, with reference to File No. S7-_____. Requests for materials submitted to OMB by the Commission with regard to these collections of information should be in writing, refer to File No. S7-_____, and be submitted to the Securities and Exchange Commission, Office of FOIA Services, 100 F Street, NE, Washington, DC 20549-2736. OMB is required to make a decision concerning the collection of information between 30 and 60 days after publication of this release. Consequently, a comment to OMB is assured of having its full effect if OMB receives it within 30 days of publication.

VI. Economic Analysis

As discussed above, the Commission is proposing rules to implement data access requirements for relevant authorities other than the Commission that the Dodd-Frank Act imposes on security-based swap repositories, and to provide an exemption from the associated indemnification requirement. To carry out their regulatory mandate, or legal responsibility or authority, certain relevant entities other than the Commission may periodically need access to security-based swap data collected and maintained by SEC-registered security-based swap data repositories, and the proposed rules are intended to facilitate such access.

The Commission is sensitive to the economic effects of its rules, including the costs and benefits and the effects of its rules on efficiency, competition, and capital formation. Section 3(f)[133] of the Exchange Act requires the Commission, whenever it engages in rulemaking pursuant to the Exchange Act, to consider or determine whether an action is necessary or appropriate in the public interest, and to consider, in addition to the protection of investors, whether the action would promote efficiency, competition, and capital formation. In addition, section 23(a)(2)[134] of the Exchange Act requires the Commission, when promulgating rules under the Exchange Act, to consider the impact such rules would have on competition. Exchange Act section 23(a)(2) also provides that the Commission shall not adopt any rule which

---

[133] 15 U.S.C. 78c(f).

[134] 15 U.S.C. 78w(a)(2).

would impose a burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act.

A. Economic Considerations

1. Title VII Transparency Framework

The security-based swap market prior to the passage of the Dodd-Frank Act has been described as being opaque, in part because transaction-level data were not widely available to market participants or to regulators.[135] To increase the transparency of the over-the-counter derivatives market to both market participants and regulatory authorities, Title VII requires the Commission to undertake a number of rulemakings, including rules the Commission adopted earlier this year to address the registration process, duties and core principles applicable to security-based swap data repositories,[136] and to address regulatory reporting and public dissemination of security-based swap information.[137] Among other matters, those rules address market transparency by requiring security-based swap data repositories, absent an exemption, to collect and maintain accurate security-based swap transaction data, and address regulatory transparency by requiring security-based swap data repositories to provide the Commission with

---

135 With respect to one type of security-based swap, credit default swaps ("CDSs"), the Government Accountability Office found that "comprehensive and consistent data on the overall market have not been readily available," "authoritative information about the actual size of the [CDS] market is generally not available" and regulators currently are unable "to monitor activities across the market." Government Accountability Office, GAO-09-397T, <u>Systemic Risk: Regulatory Oversight and Recent Initiatives to Address Risk Posed by Credit Default Swaps</u>, at 2, 5, 27, (2009) <u>available at</u>: http://www.gao.gov/new.items/d09397t.pdf; <u>see also</u> Robert E. Litan, <u>The Derivatives Dealers' Club and Derivatives Market Reform: A Guide for Policy Makers, Citizens and Other Interested Parties</u>, Brookings Institution (Apr. 7, 2010), http://www.brookings.edu/~/media/research/files/papers/2010/4/07%20derivatives%20litan/0407_derivatives_litan.pdf; Michael Mackenzie, <u>Era of an Opaque Swaps Market Ends</u>, Financial Times, June 25, 2010, <u>available at</u>: http://www.ft.com/intl/cms/s/0/f49f635c-8081-11df-be5a-00144feabdc0.html#axzz3HLUjYNI7.

136 <u>See</u> SDR Adopting Release, note 13, <u>supra</u>.

137 <u>See</u> Regulation SBSR Adopting Release.

direct electronic access to such data.[138]

Consistent with the goal of increasing transparency to regulators, the data access provisions at issue here set forth a framework for security-based swap data repositories to provide access to security-based swap data to relevant authorities other than the Commission. The proposed rules would implement that framework for repositories to provide data access to other relevant entities in order to fulfill their regulatory mandate, or legal responsibility or authority.

2. Transparency In the Market For Security-Based Swaps

The proposed data access rules and indemnification exemption, in conjunction with the transparency-related requirements generally applicable to security-based swap data repositories, are designed to, among other things, make available to the Commission and other relevant authorities data that will provide a broad view of the security-based swap market and help monitor for pockets of risk and potential market abuses that might not otherwise be observed by those authorities.[139] Unlike most other securities transactions, security-based swaps involve ongoing financial obligations between counterparties during the life of transactions that typically span several years. Counterparties to a security-based swap rely on each other's creditworthiness and bear this credit risk and market risk until the security-based swap terminates or expires. This can lead to market instability when a large market participant, such as a security-based swap

---

[138] See Exchange Act rule 13n-5 (requiring repositories to comply with data collection and data maintenance standards related to transaction and position data); Exchange Act rule 13n-4(b)(5) (requiring repositories to provide direct electronic access to the Commission and its designees).

[139] See, e.g., Exchange Act section 13(n)(5)(D), 15 U.S.C. 78m(n)(5)(D), and rule 13n-4(b)(5) (requiring SDRs to provide direct electronic access to the Commission). See also 156 Cong. Rec. S5920 (daily ed. July 15, 2010) (statement of Sen. Lincoln) ("These new 'data repositories' will be required to register with the CFTC and the SEC and be subject to the statutory duties and core principles which will assist the CFTC and the SEC in their oversight and market regulation responsibilities.").

dealer, major security-based swap market participant, or central counterparty ("CCP") becomes financially distressed. The default of a large market participant could introduce the potential for sequential counterparty failure; the resulting uncertainty could reduce the willingness of market participants to extend credit, and substantially reduce liquidity and valuations for particular types of financial instruments.[140]

A broad view of the security-based swap market, including information regarding aggregate market exposures to particular reference entities (or securities), positions taken by individual entities or groups, and data elements necessary to determine the market value of the transaction, may be expected to provide the Commission and other relevant authorities with a better understanding of the actual and potential risks in the market and promote better risk monitoring efforts. The information provided by security-based swap data repositories also may be expected to help the Commission and other relevant authorities investigate market manipulation, fraud and other market abuses.

3. Global Nature of the Security-Based Swap Market

As highlighted in more detail in the Economic Baseline below, the security-based swap market is a global market. Based on market data in the Depository Trust and Clearing Corporation's Trade Information Warehouse ("DTCC-TIW"), the Commission estimates that only 12 percent of the global transaction volume that involves either a U.S.-domiciled counterparty or a U.S-domiciled reference entity (as measured by gross notional) between 2008 and 2014 was between two U.S.-domiciled counterparties, compared to 48 percent entered into

140 See, e.g., Markus K. Brunnermeier and Lasse Heje Pedersen, Market Liquidity and Funding Liquidity, 22 Review of Financial Studies 2201 (2009); Denis Gromb and Dimitri Vayanos, A Model of Financial Market Liquidity Based on Intermediary Capital, 8 Journal of the European Economic Association 456 (2010).

between one U.S.-domiciled counterparty and a foreign-domiciled counterparty and 40 percent entered into between two foreign-domiciled counterparties.[141]

In light of the security-based swap market's global nature there is the possibility that regulatory data may be fragmented across jurisdictions, particularly because a large fraction of transaction volume includes at least one counterparty that is not a U.S. person[142] and the applicable U.S. regulatory reporting rules depend on the U.S. person status of the counterparties.[143] As discussed further below, fragmentation of data can increase the difficulty in consolidating and interpreting security-based swap market data from repositories, potentially reducing the general economic benefits derived from transparency of the security-based swap market to regulators. Absent a framework for the cross-border sharing of data reported pursuant to regulatory requirements in various jurisdictions, the relevant authorities responsible for monitoring the security-based swap market may not be able to access data consistent with their regulatory mandate, or legal responsibility or authority.

---

141 The data the Commission receives from the DTCC-TIW does not include transactions between two non-U.S. domiciled counterparties that reference a non-U.S. entity or security. This is approximately 19 percent of global transaction volume. See note 152, infra. Therefore, factoring in these transactions, approximately 10 percent of global transaction volume involves two U.S.-domiciled counterparties, 39 percent involve one U.S.-domiciled counterparty and one foreign counterparty, and 51 percent are between two foreign-domiciled counterparties.

142 This statement is based on staff analysis of voluntary CDS transaction data reported to the DTCC-TIW, which includes self-reported counterparty domicile. See note 161, infra. The Commission notes that the DTCC-TIW entity domicile may not be completely consistent with the Commission's definition of "U.S. person" in all cases but preliminarily believes that these two characteristics have a high correlation.

143 See Regulation SBSR rule 908(a) (generally requiring regulatory reporting and public dissemination when at least one direct or indirect counterparty is a U.S. person). Note that current voluntary reporting considers the self-reported domicile of the counterparty but the recently adopted SBSR rules consider the counterparty's status as a U.S. person.

4. Economic Purposes of the Rulemaking

The proposed data access requirements and indemnification exemption are designed to increase the quality and quantity of transaction and position information available to relevant authorities about the security-based swap market while helping to maintain the confidentiality of that information. The increased availability of security-based swap information may be expected to help relevant authorities act in accordance with their regulatory mandate, or legal responsibility or authority, and to respond to market developments.

Moreover, by facilitating access to security-based swap data for relevant authorities, including non-U.S. authorities designated by the Commission, the Commission anticipates an increased likelihood that the Commission itself will have commensurate access to security-based swap data stored in trade repositories located in foreign jurisdictions.[144] This may be particularly important in identifying transactions in which the Commission has a regulatory interest (e.g., transactions involving a U.S. reference entity or security) but may not have been reported to a registered security-based swap data repository due to the transactions occurring outside of the U.S. between two non-U.S. persons.[145] This should assist the Commission in fulfilling its

---

[144] As discussed above, for example, EU law conditions the ability of non-EU authorities to access data from EU repositories on EU authorities having "immediate and continuous" access to the information they need. See note 94, supra, and accompanying text.

Also, as discussed above, the Commission anticipates considering whether or not the relevant authority requesting access agrees to provide the Commission and other U.S. authorities with reciprocal assistance in matters within their jurisdiction when making a determination as to whether the requesting authority shall be granted access to security-based swap data held in registered SDRs. See part II.A.3(a) supra.

[145] For example, it is possible to replicate the economic exposure of either a long or short position in a debt security that trades in U.S. markets by trading in U.S. treasury securities and credit default swaps that reference the debt security. Transactions between two non-U.S. persons on a U.S. reference entity supervised by the Commission or novations between two non-U.S. persons that reduce exposure to a U.S. registrant may provide information to the Commission about the market's views concerning the financial stability or creditworthiness of the registered entity.

regulatory mandate and legal responsibility and authority, including by facilitating the Commission's ability to detect and investigate market manipulation, fraud and other market abuses, by providing the Commission with greater access to security-based swap information than that provided under the current voluntary reporting regime.[146]

Such data access may be especially critical during times of market turmoil, by giving the Commission and other relevant authorities information to examine risk exposures incurred by individual entities or in connection with particular reference entities. Increasing the available data about the security-based swap market should further give the Commission and other relevant authorities better insight into how regulations are affecting or may affect the market, which may allow the Commission and other regulators to better craft regulations to achieve desired goals, and therefore increase regulatory effectiveness.

B. Baseline

To assess the economic impact of the proposed data access rules and indemnification exemption, the Commission is using as a baseline the security-based swap market as it exists today, including applicable rules that have already been adopted and excluding rules that have been proposed but not yet finalized. Thus we include in the baseline the rules that the Commission adopted earlier this year to govern the registration process, duties and core principles applicable to security-based swap data repositories, and to govern regulatory reporting and public dissemination of security-based swap transactions.

Because those rules were adopted only recently, there are not yet any registered swap data repositories, and the Commission does not yet have access to regulatory reporting data.

---

146 See part VI.B, supra, for a description of the data the Commission receives from DTCC-TIW under the current voluntary reporting regime.

Hence, our characterization of the economic baseline, including the quantity and quality of security-based swap data available to the Commission and other relevant authorities and the extent to which data are fragmented, considers the anticipated effects of the final SDR rules and Regulation SBSR. The Commission acknowledges limitations in the degree to which it can quantitatively characterize the current state of the security-based swap market. As described in more detail below, because the available data on security-based swap transactions do not cover the entire market, the Commission has developed an understanding of market activity using a sample that includes only certain portions of the market.

1. Regulatory Transparency in the Security-Based Swap Market

There currently is no robust, widely accessible source of information about individual security-based swap transactions. In 2006, a group of major dealers expressed their commitment in support of DTCC's initiative to create a central trade industry warehouse for credit derivatives.[147] Moreover, in 2009, the leaders of the G20 – whose members include the United States, 18 other countries, and the European Union – called for global improvements in the functioning, transparency, and regulatory oversight of over-the-counter ("OTC") derivatives markets and agreed, among other things, that OTC derivatives contracts should be reported to trade repositories.[148] A single repository, the DTCC-TIW, makes the data reported to it under the voluntary reporting regime available to the Commission and other relevant authorities in accordance with the agreement between DTCC-TIW and the OTC Derivatives Regulatory

---

[147] See Letter to Timothy Geithner, President, Federal Reserve Bank of New York, Mar. 10, 2006, available at: http://www.newyorkfed.org/newsevents/news/markets/2006/industryletter2.pdf.

[148] See G20 Leaders Statement from the 2009 Pittsburgh Summit, available at: http://www.g20.utoronto.ca/2009/2009communique0925.html.

Forum ("ODRF"), of which the Commission is a member.[149] Although many jurisdictions have implemented rules concerning reporting of security-based swaps to trade repositories,[150] the Commission understands that many market participants continue to report voluntarily to the DTCC-TIW.

The data that the Commission receives from DTCC-TIW do not encompass CDS transactions that both: (i) do not involve any U.S. counterparty, and (ii) are not based on a U.S. reference entity.[151] Based on a comparison of weekly transaction volume publicly disseminated by DTCC-TIW with data provided to the Commission under the voluntary arrangement, we estimate that the transaction data provided to the Commission covers approximately 77 percent of the global single-name credit default swap market.[152]

While DTCC-TIW generally provides detailed data on positions and transactions to regulators that are members of the ODRF, DTCC-TIW makes only summary information available to the public.[153]

---

[149] See note 71, supra.

[150] See Eighth Progress Report on Implementation of OTC Derivatives Market Reforms (Nov. 2014), available at: http://www.financialstabilityboard.org/wp-content/uploads/r_141107.pdf.

[151] The Commission notes that the identification of entity domicile in the voluntary data reported to DTCC-TIW may not be consistent with the Commission's definition of "U.S. person" in all cases.

[152] In 2014, DTCC-TIW reported on its website new trades in single-name CDSs with gross notional of $15.4 trillion. During the same period, data provided to the Commission by DTCC-TIW, which include only transactions with a U.S. counterparty or transactions written on a U.S. reference entity or security, included new trades with gross notional equaling $12.4 trillion, or 81% of the total reported by DTCC-TIW.

[153] The DTCC-TIW publishes weekly transaction and position reports for single-name credit default swaps. In addition, ICE Clear Credit provides aggregated volumes of clearing activity, and large multilateral organizations periodically further report measures of market activity. For example, the Bank for International Settlements ("BIS") reports gross notional outstanding for single-name credit default swaps and equity forwards and swaps semiannually.

2. Current Security-Based Swap Market

The Commission's analysis of the current state of the security-based swap market is based on data obtained from DTCC-TIW, particularly data regarding the activity of market participants for single-name credit-default swaps from 2008 to 2014. While other repositories also may collect data on transactions in total return swaps on equity and debt, the Commission does not currently have access to such data for those products (or for other products that are security-based swaps). Although the definition of "security-based swap" is not limited to single-name credit-default swaps, the Commission believes that the single-name credit default swap data are sufficiently representative of the security-based swap market and therefore can directly inform the analysis of the state of the current security-based swap market.[154] The Commission believes that DTCC-TIW's data for single-name credit default swaps appear reasonably comprehensive because they include data on almost all single-name credit default swap transactions and market participants trading in single-name credit default swaps.[155]

---

154 According to data published by BIS, the global notional amount outstanding in equity forwards and swaps as of December 2014 was $2.50 trillion. The notional amount outstanding was approximately $9.04 trillion for single-name CDSs, approximately $6.75 trillion for multi-name index CDSs, and approximately $0.61 trillion for multi-name, non-index CDSs. See Bank of International Settlement, BIS Quarterly Review, Statistical Annex, Table 19 (June 2015), available at: http://www.bis.org/publ/qtrpdf/r_qt1506.htm. For purposes of this analysis, the Commission assumes that multi-name index CDSs are not narrow-based security index CDSs, and therefore do not fall within the definition of security-based swap. See Exchange Act section 3(a)(68)(A), 15 U.S.C. 78c(a)(68)(A); see also Further Definition of "Swap," "Security-Based Swap," and "Security-Based Swap Agreement"; Mixed Swaps; Security-Based Swap Agreement Recordkeeping, Exchange Act Release No. 67453 (July 18, 2012), 77 FR 48207 (Aug. 13, 2012). The Commission also assumes that instruments reported as equity forwards and swaps include instruments such as total return swaps on individual equities that fall with the definition of security-based swap. Based on these assumptions, single-name CDS appear to constitute roughly 80 percent of the security-based swap market. Although the BIS data reflects the global OTC derivatives market, and not only the U.S. market, the Commission is not aware of any reason to believe that these ratios differ significantly in the U.S. market.

155 See ISDA, CDS Marketplace, Exposures & Activity, available at: http://www.isdacdsmarketplace.com/exposures_and_activity ("DTCC Deriv/SERV's Trade Information Warehouse is the only comprehensive trade repository and post-trade processing infrastructure for OTC

Based on this information, our analysis below indicates that the current security-based swap market: (i) is global in scope, and (ii) is concentrated among a small number of dealing entities. Although under the voluntary reporting regime discussed above there was a single repository, as various jurisdictions have implemented mandatory reporting rules in their jurisdictions the number of trade repositories holding security-based swap data has grown.[156]

a. Security-Based Swap Market Participants

A key characteristic of security-based swap activity is that it is concentrated among a relatively small number of entities that engage in dealing activities.[157] Based on the Commission's analysis of DTCC-TIW data, there were 1,879 entities engaged directly in trading credit default swaps between November 2006 and December 2014.[158] Table 1 below highlights that of these entities, there were 17, or approximately 0.9 percent, that were ISDA-recognized dealers.[159] ISDA-recognized dealers executed the vast majority of transactions (82.6 percent)

---

credit derivatives in the world. Its Deriv/SERV matching and confirmation service electronically matches and confirms more than 98% of credit default swaps transactions globally.").

156 See, for example, the list of trade repositories registered by ESMA, available at: http://www.esma.europa.eu/content/List-registered-Trade-Repositories. As of May 28, 2015, there were six repositories registered by ESMA, all of which are authorized to receive data on credit derivatives.

157 See Exchange Act Release No.72472 (Jun. 25, 2014), 79 FR 47278, 47293 (Aug. 12, 2014) ("Cross-Border Definitions Adopting Release"). All data in this section cites updated data from that release and its accompanying discussion.

158 These 1,879transacting agents represent over 10,000 accounts representing principal risk holders. See Cross-Border Definitions Adopting Release, 79 FR at 47293-94 (discussing the number of transacting agents and accounts of principal risk holders).

As noted above, the data provided to the Commission by the DTCC-TIW only includes transactions that either include at least one U.S.-domiciled counterparty or reference a U.S. entity or security. Therefore, any entity that is not domiciled in the U.S., never trades with a U.S.-domiciled entity and never buys or sells protection on a U.S. reference entity or security would not be included in this analysis.

159 For the purpose of this analysis, the ISDA-recognized dealers are those identified by ISDA as a recognized dealer in any year during the relevant period. Dealers are only included in the ISDA-recognized dealer category during the calendar year in which they are so identified. The complete list of

measured by the number of counterparties (each transaction has two counterparties or transaction sides). Many of these dealers are regulated by entities other than, or in addition to, the Commission. In addition, thousands of other market participants appear as counterparties to security-based swap transactions, including, but not limited to, investment companies, pension funds, private (hedge) funds, sovereign entities, and non-financial companies.

Table 1. The number of transacting agents in the single-name CDS market by counterparty type and the fraction of total trading activity, from November 2006 through December 2014, represented by each counterparty type.

Transacting Agents	Number	Percent	Transaction share
Investment Advisers	1,419	75.5%	10.9%
- SEC registered	*572*	*30.4%*	*6.9%*
Banks	260	13.8%	5.0%
Pension Funds	29	1.5%	0.1%
Insurance Companies	38	2.0%	0.3%
ISDA-Recognized Dealers[160]	17	0.9%	82.6%
Other	116	6.2%	1.2%
Total	1,879	100%	100%

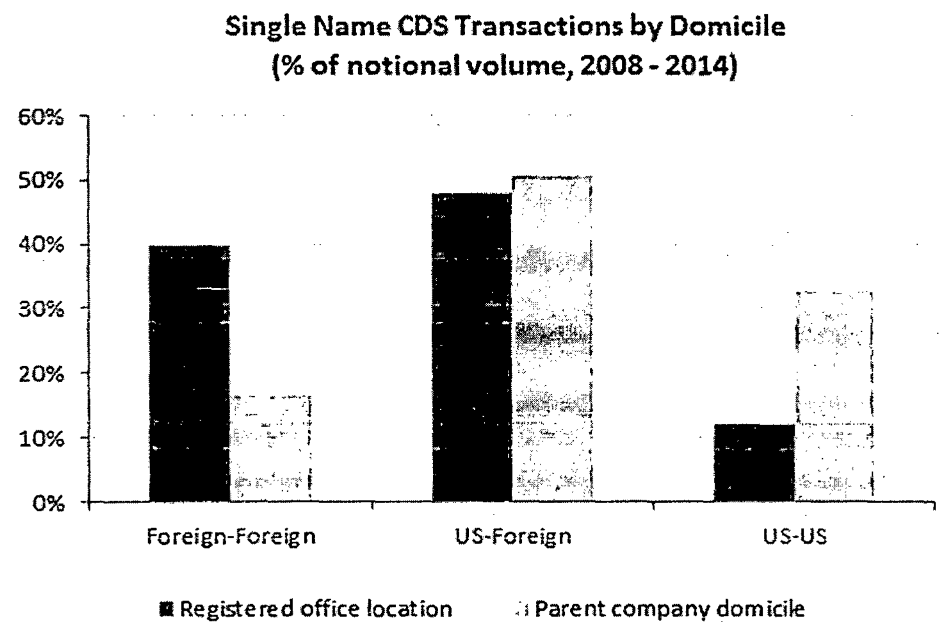
Although the security-based swap market is global in nature, approximately 60 percent of the transaction volume in the 2008-2014 period included at least one U.S.-domiciled entity (see

ISDA recognized dealers is: JP Morgan Chase NA (and Bear Stearns), Morgan Stanley, Bank of America NA (and Merrill Lynch), Goldman Sachs, Deutsche Bank AG, Barclays Capital, Citigroup, UBS, Credit Suisse AG, RBS Group, BNP Paribas, HSBC Bank, Lehman Brothers, Société Générale, Credit Agricole, Wells Fargo, and Nomura. See ISDA, Operations Benchmarking Surveys, available at: http://www2.isda.org/functional-areas/research/surveys/operations-benchmarking-surveys.

160 For the purpose of this analysis, the ISDA-recognized dealers are those identified by ISDA as belonging to the G14 or G16 dealer group during the period: JP Morgan Chase NA (and Bear Stearns), Morgan Stanley, Bank of America NA (and Merrill Lynch), Goldman Sachs, Deutsche Bank AG, Barclays Capital, Citigroup, UBS, Credit Suisse AG, RBS Group, BNP Paribas, HSBC Bank, Lehman Brothers, Société Générale, Credit Agricole, Wells Fargo and Nomura. See, e.g., http://www.isda.org/c_and_a/pdf/ISDA-Operations-Survey-2010.pdf.

Figure 1). Moreover, 48 percent of the single-name CDS transactions reflected in DTCC-TIW data that include at least one U.S.-domiciled counterparty or a U.S. reference entity or security were between U.S.-domiciled entities and foreign-domiciled counterparties.

Figure 1: The fraction of notional volume in North American corporate single-name CDSs between (1) two U.S.-domiciled accounts, (2) one U.S.-domiciled account and one non-U.S.-domiciled account, and (3) two non-U.S.-domiciled accounts, computed from January 2008 through December 2014.



The fraction of new accounts with transaction activity that are domiciled in the U.S. fell through the 2008-2014 period. Figure 2 below is a chart of: (1) the percentage of new accounts with a domicile in the United States,[161] (2) the percentage of new accounts with a domicile

161 The domicile classifications in DTCC-TIW are based on the market participants' own reporting and have not been verified by Commission staff. Prior to enactment of the Dodd-Frank Act, account holders did not formally report their domicile to DTCC-TIW because there was no systematic requirement to do so. After enactment of the Dodd-Frank Act, the DTCC-TIW has collected the registered office location of the account. This information is self-reported on a voluntary basis. It is possible that some market participants may misclassify their domicile status because the databases in DTCC-TIW do not assign a unique legal entity identifier to each separate entity. It is also possible that

outside the United States, and (3) the percentage of new accounts that are domiciled outside the United States but managed by a U.S. entity, foreign accounts that include new accounts of a foreign branch of a U.S. bank, and new accounts of a foreign subsidiary of a U.S. entity. Over time, a greater share of accounts entering the DTCC-TIW data either have had a foreign domicile or have had a foreign domicile while being managed by a U.S. person. The increase in foreign accounts may reflect an increase in participation by foreign accountholders, and the increase in foreign accounts managed by U.S. persons may reflect the flexibility with which market participants can restructure their market participation in response to regulatory intervention, competitive pressures and other factors. There are, however, alternative explanations for the shifts in new account domicile in Figure 2. Changes in the domicile of new accounts through time may reflect improvements in reporting by market participants to DTCC-TIW. Additionally, because the data include only accounts that are domiciled in the United States, transact with U.S.-domiciled counterparties or transact in single-name CDSs with U.S. reference entities or securities, changes in the domicile of new accounts may reflect increased transaction activity between U.S. and non-U.S. counterparties.

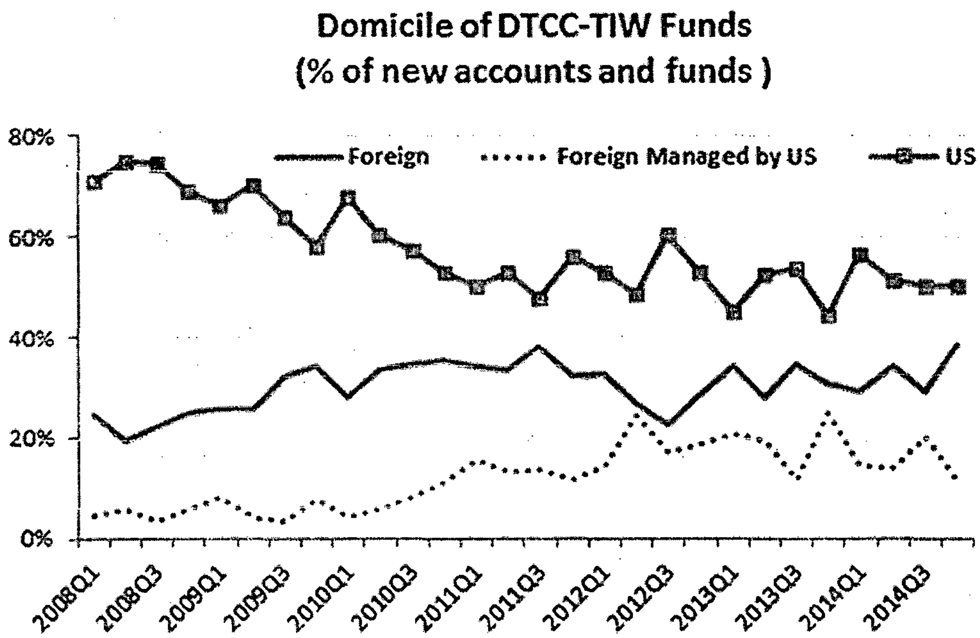
We note that cross-border rules related to regulatory reporting and public dissemination of security-based swap transactions depend on, among other things, the U.S. person status of the counterparties.[162] The analyses behind Figures 1 and 2 show that the security-based swap market is global, with an increasing share of the market characterized by cross-border trade.

---

the domicile classifications may not correspond precisely to the definition of "U.S. person" under the rules defined in Exchange Act rule 3a71-3(a)(4), 17 CFR 240.3a71-3(a)(4). Notwithstanding these limitations, the Commission believes that the cross-border and foreign activity demonstrates the nature of the single-name CDS market.

162 See note 143, supra.

Figure 2: The percentage of (1) new accounts with a domicile in the United States (referred to below as "US"), (2) new accounts with a domicile outside the United States (referred to below as "Foreign"), and (3) new accounts outside the United States, but managed by a U.S. entity, new accounts of a foreign branch of a U.S. bank, and new accounts of a foreign subsidiary of a U.S. entity (collectively referred to below as "Foreign Managed by US").[163] Unique, new accounts are aggregated each quarter and shares are computed on a quarterly basis, from January 2008 through December 2014.



b. Security-Based Swap Data Repositories

No security-based swap data repositories are currently registered with the Commission. The Commission is aware of one entity in the market (i.e., the DTCC-TIW) that has been

[163] Following publication of the Warehouse Trust Guidance on CDS data access, TIW surveyed market participants, asking for the physical address associated with each of their accounts (i.e., where the account is organized as a legal entity). This is designated the registered office location by TIW. When an account does not report a registered office location, we have assumed that the settlement country reported by the investment adviser or parent entity to the fund or account is the place of domicile. This treatment assumes that the registered office location reflects the place of domicile for the fund or account.

accepting voluntary reports of single-name and index credit default swap transactions. In 2014, DTCC-TIW received approximately 4 million records of single-name credit default swap transactions, of which approximately 868,000 were price-forming transactions.[164]

The CFTC has provisionally registered four swap data repositories.[165] These swap data repositories are: BSDR LLC, Chicago Mercantile Exchange Inc., DTCC Data Repository LLC, and ICE Trade Vault, LLC. The Commission believes that these entities will likely register with the Commission as security-based swap data repositories and that other persons may seek to register with both the CFTC and the Commission as swap data repositories and security-based swap data repositories, respectively.[166]

Efforts to regulate the swap and security-based swap markets are underway not only in the United States, but also abroad. Consistent with the call of the G20 leaders for global improvements in the functioning, transparency and regulatory oversight of OTC derivatives markets,[167] substantial progress has been made in establishing the trade repository infrastructure to support the reporting of OTC derivatives transactions.[168] Currently, multiple trade repositories operate, or are undergoing approval processes to do so, in a number of different jurisdictions.[169]

---

164 Price-forming credit default swap transactions include all new transactions, assignments, modifications to increase the notional amounts of previously executed transactions and terminations of previously executed transactions. Transactions terminated or entered into in connection with a compression exercise, and expiration of contracts at maturity, are not considered price-forming and are therefore excluded, as are replacement trades and all bookkeeping-related trades.

165 CFTC rule 49.3(b) provides for provisional registration of a swap data repository. 17 CFR 49.3(b).

166 For the purpose of estimating PRA related costs, the number of swap data repositories is estimated to be as high as ten. See part V.C, supra.

167 See note 148, supra, and accompanying text.

168 See Eighth Progress Report on Implementation of OTC Derivatives Market Reforms (Nov. 2014), available at: http://www.financialstabilityboard.org/wp-content/uploads/r_141107.pdf.

169 Id.

Combined with the fact that the requirements for trade reporting differ across jurisdictions, the result is that security-based swap data is fragmented across many locations, stored in a variety of formats, and subject to many different rules for authorities' access. The data in these trade repositories accordingly will need to be aggregated in various ways if authorities are to obtain a comprehensive and accurate view of the global OTC derivatives markets.

C. Economic Costs and Benefits, Including Impact on Efficiency, Competition, and Capital Formation

As discussed above, the security-based swap market to date largely has developed as an opaque OTC market with limited dissemination of transaction-level price and volume information.[170] Accordingly, the Commission envisions that registered security-based swap data repositories, by storing the security-based swap transaction and position data required to be reported to them by market participants, will become an essential part of the infrastructure of the market in part by providing the data to relevant authorities in accordance with their regulatory mandate, or legal responsibility or authority.

In proposing these rules to implement the Exchange Act data access requirement and to provide a conditional exemption from the indemnification requirement, the Commission has attempted to balance different goals. On the one hand, the Commission preliminarily believes that the proposed rules will facilitate the sharing of information held by repositories with relevant authorities, which should assist those authorities in acting in accordance with their regulatory mandate, or legal responsibility or authority. At the same time, although regulatory access raises important issues regarding the confidentiality of the information, the Commission preliminarily

[170] See part VI.B.1, supra (addressing limited information currently available to market participants and regulators).

believes that the proposed rules should appropriately reduce the risk of breaching the confidentiality of the data by providing for a reasonable assurance that confidentiality will be maintained before access is granted.

Additionally, we note that the magnitude of the costs and benefits of the proposed rules depend in part on the type of access granted to relevant authorities. Ongoing, unrestricted direct electronic access by relevant authorities may be most beneficial in terms of facilitating efficient access to data necessary for those authorities to act in accordance with their regulatory mandate, or legal responsibility or authority, but at the cost of increasing the risk of improper disclosure of confidential information. Restricting each relevant authority's access to only that data consistent with that authority's regulatory mandate, or legal responsibility or authority reduces the quantity of data that could become subject to improper disclosure. On the other hand, restricting a relevant authority's access to data may make it more difficult for it to effectively act in accordance with its regulatory mandate or legal responsibility or authority.

The potential economic effects stemming from the proposed rules can be grouped into several categories. In this section, we first discuss the general costs and benefits of the proposed rules, including the benefits of reducing data fragmentation, data duplication and enhancing regulatory oversight, as well as the risks associated with potential breaches of data confidentiality. Next, we discuss the effects of the rules on efficiency, competition and capital formation. Finally, we discuss specific costs and benefits linked to the proposed rules.

1. General Costs and Benefits

As discussed above, the proposed rules would implement the statutory provisions that require a security-based swap data repository to disclose information to certain relevant authorities, conditional upon the authority agreeing to keep the information confidential and to indemnify the repository and the Commission for any expenses arising from litigation relating to the information provided. The proposal also would set forth a conditional exemption from the requirement that entities requesting data agree to provide indemnification. The exemption would be conditional on the requested information relating to a regulatory mandate and/or legal responsibility of the entity requesting the data, and on the entity entering into an MOU with the Commission addressing the confidentiality of the information provided and any other matters as determined by the Commission.

a. Anticipated benefits

The proposed rules should facilitate access to security-based swap transaction and position data by entities that require such information to fulfill their regulatory mandate or legal responsibility or authority. Market participants accordingly should benefit from relevant domestic authorities other than the Commission having access to the data necessary to fulfill their responsibilities. In particular, such access could help promote stability in the security-based swap market particularly during periods of market turmoil,[171] and thus could indirectly contribute to improved stability in related financial markets, including equity and bond markets.[172]

Moreover, as noted in part II.A(3)(a), the Commission anticipates, when making a determination concerning a relevant authority's access to security-based swap data, considering whether the relevant authority agrees to provide the Commission and other U.S. authorities with

---

[171] SDR Adopting Release, 80 FR at 14531 ("Enhanced transparency could produce additional market-wide benefits by promoting stability in the [security-based swap] market, particularly during periods of market turmoil, and it should indirectly contribute to improved stability in related financial markets, including equity and bond markets.").

[172] See Darrell Duffie, Ada Li, and Theo Lubke, Policy Perspectives of OTC Derivatives Market Infrastructure, Federal Reserve Bank of New York Staff Report No. 424 (Jan. 2010, as revised Mar. 2010), note 95, supra ("Transparency can have a calming influence on trading patterns at the onset of a potential financial crisis, and thus act as a source of market stability to a wider range of markets, including those for equities and bonds.").

reciprocal assistance in matters within their jurisdiction. Allowing access to security-based swap data held by registered security-based swap data repositories by non-U.S. authorities may be expected to help facilitate the Commission's own ability to access data held by repositories outside the United States.[173] Accordingly, to the extent the Commission obtains access, the proposed rules further may be expected to assist the Commission in fulfilling its regulatory responsibilities, including by detecting market manipulation, fraud and other market abuses by providing the Commission with greater access to global security-based swap information.[174]

The ability of other relevant authorities to access data held in trade repositories registered with the Commission, as well as the ability of the Commission to access data held in repositories registered with other regulators, may be especially crucial during times of market turmoil. Increased data sharing should provide the Commission and other relevant authorities more-complete information to monitor risk exposures taken by individual entities and exposures connected to particular reference entities, and should promote global stability through enhanced regulatory transparency. Security-based swap data repositories registered with the Commission are required to retain complete records of security-based swap transactions and maintain the

---

173 See note 94, supra, and accompanying text.

174 See SDR Adopting Release, 80 FR at 14450 ("Requiring U.S. persons that perform the functions of an SDR to be operated in a manner consistent with the Title VII regulatory framework and subject to the Commission's oversight, among other things, helps ensure that relevant authorities are able to monitor the build-up and concentration of risk exposure in the [security-based swap] market, reduce operational risk in that market, and increase operational efficiency."); id. at 14529 ("In conjunction with Regulation SBSR, the SDR Rules should assist the Commission in fulfilling its regulatory mandates and legal responsibilities such as detecting market manipulation, fraud, and other market abuses by providing it with greater access to [security-based swap] information than that provided under the voluntary reporting regime."); see also DTCC comment (Nov. 15, 2010) at 1 ("A registered SDR should be able to provide (i) enforcement agents with necessary information on trading activity; (ii) regulatory agencies with counterparty-specific information about systemic risk based on trading activity; (iii) aggregate trade information for publication on market-wide activity; and (iv) a framework for real-time reporting from swap execution facilities and derivatives clearinghouses.").

integrity of those records.[175] Based on discussions with other regulators, the Commission believes repositories registered with other authorities are likely to have comparable requirements. As a result, rules to facilitate regulatory access to those records in line with the recipient authorities' regulatory mandate, or legal responsibility or authority are designed to help position the Commission and other authorities to: detect market manipulation, fraud and other market abuses; monitor the financial responsibility and soundness of market participants; perform market surveillance and macroprudential supervision; resolve issues and positions after an institution fails; monitor compliance with relevant regulatory requirements; and respond to market turmoil.[176]

Additionally, improving the availability of data regarding the security-based swap market should give the Commission and other relevant authorities improved insight into how regulations are affecting, or may affect, the market. This may be expected to help increase regulatory

---

[175] See SDR Adopting Release, 80 FR at 14531 ("The SDR Requirements [Exchange Act section 13(n) and the rules and regulations thereunder], including requirements that SDRs register with the Commission, retain complete records of [security-based swap] transactions, maintain the integrity and confidentiality of those records, and disseminate appropriate information to the public are intended to help ensure that the data held by SDRs is reliable and that the SDRs provide information that contributes to the transparency of the [security-based swap] market while protecting the confidentiality of information provided by market participants."); see also Exchange Act section 13(n)(5)(C), 15 U.S.C. 78m(n)(5)(c) (requiring SDRs to maintain security-based swap data)); Exchange Act rules 13n-5(b)(3) and (4) (requiring SDRs to establish, maintain, and enforce policies and procedures reasonably designed to ensure that transaction data and positions are accurate and to maintain the transaction data and positions for specified periods of time).

[176] See, e.g., SDR Proposing Release, 75 FR at 77307, 77356, corrected at 76 FR 79320 (stating that the "data maintained by an SDR may also assist regulators in (i) preventing market manipulation, fraud, and other market abuses; (ii) performing market surveillance, prudential supervision, and macroprudential (systemic risk) supervision; and (iii) resolving issues and positions after an institution fails," and further stating that "increased transparency on where exposure to risk reside in financial markets . . . will allow regulators to monitor and act before the risks become systemically relevant. Therefore, SDRs will help achieve systemic risk monitoring."); Cross-Border Proposing Release, 78 FR at 31186-31187 (discussing benefits of providing relevant foreign authorities with access to data maintained by SDRs).

effectiveness by allowing the Commission and other regulators to better craft regulation to achieve desired goals.

In addition, the Commission believes that providing relevant foreign authorities with access to data maintained by repositories may help reduce costs to market participants by reducing the potential for duplicative security-based swap transaction reporting requirements in multiple jurisdictions.[177] The Commission anticipates that relevant foreign authorities will likely impose their own reporting requirements on market participants within their jurisdictions.[178] Given the global nature of the security-based swap market and the large number of cross-border transactions, the Commission recognizes that it is likely that such transactions may be subject to the reporting requirements of at least two jurisdictions.[179] However, the Commission preliminarily believes that if relevant authorities are able to access security-based swap data in trade repositories outside their jurisdiction, such as repositories registered with the Commission, as needed, then relevant authorities may be more inclined to permit market participants involved in such transactions to fulfill their reporting requirements by reporting the transactions to a single

---

177 Cf. Cleary Gottlieb comment (Sept. 20, 2011) at 31 (the indemnification requirement "could be a significant impediment to effective regulatory coordination, since non-U.S. regulators may establish parallel requirements for U.S. regulators to access swap data reported in their jurisdictions.").

178 For example, EU law requires that counterparties to derivatives contracts report the details of the contract to a trade repository, registered or recognized in accordance with EU law, no later than the working day following the conclusion, modification or termination of the contract. See EMIR art. 9; see also EC Delegated Regulation no. 148/2013 (regulatory technical standards implementing the reporting requirement).

179 For example, as noted above, market data regarding single-name CDS transactions involving U.S.-domiciled counterparties and/or U.S.-domiciled reference entities indicates that 13 percent of such transactions involve two U.S.-domiciled counterparties, while 48 percent involve a U.S.-domiciled counterparty and a foreign-domiciled counterparty. See note 141, supra, and accompanying text.

trade repository.[180] If market participants can report a transaction to a single trade repository rather than to separate trade repositories in each applicable jurisdiction, their compliance costs may be reduced. Similarly, to the extent that security-based swap data repositories provide additional ancillary services,[181] if market participants choose to make use of such services, they would likely find such services that make use of all of their data held in a single trade repository more useful than services that are applied only to a portion of that market participant's transactions. Ancillary services applied to only a portion of a participant's transactions could result if data were divided across multiple repositories as a result of regulations requiring participants to report data to separate trade repositories in each applicable jurisdiction.

b. Anticipated costs

The Commission believes that although there are benefits to security-based swap data repositories providing access to relevant authorities to data maintained by the repositories, such access will likely involve certain costs and potential risks. For example, the Commission expects that repositories will maintain data that are proprietary and highly sensitive[182] and that are

---

180 For example, EU law anticipates the possibility that market participants may be able to satisfy their EU reporting obligations by reporting to a trade repository established in a third country, so long as that repository has been recognized by the European Securities and Markets Authority. See EMIR art. 77; see also Regulation SBSR, rule 908(c) (providing that to the extent that the Commission has issued a substituted compliance order/determination, compliance with Title VII regulatory reporting and public dissemination requirements may be satisfied by compliance with the comparable rules of a foreign jurisdiction).

181 According to one commenter, ancillary services "may include: asset servicing, confirmation, verification and affirmation facilities, collateral management, settlement, trade compression and netting services, valuation, pricing and reconciliation functionalities, position limits management, dispute resolution, counterparty identity verification and others." See MarkitSERV comment (Jan. 24, 2011) at 4 (comment in response to SDR Proposing Release).

182 As the Commission noted in the SDR Proposing Release, such data could include information about a market participant's trades or its trading strategy; it may also include non-public personal information. SDR Proposing Release, 75 FR at 77339.

subject to strict privacy requirements.[183] Extending access to such data to anyone, including relevant authorities, increases the risk that the confidentiality of the data maintained by repositories may not be preserved.[184] A relevant authority's inability to protect the confidentiality of data maintained by repositories could erode market participants' confidence in the integrity of the security-based swap market and increase the overall risks associated with trading.[185] As we discuss below, this may ultimately lead to reduced trading activity and liquidity in the market, hindering price discovery and impeding the capital formation process.[186]

To help mitigate these risks and potential costs to market participants, the Exchange Act and the proposed rules impose certain conditions on relevant authorities' access to data maintained by repositories.[187] In part, the Exchange Act and the proposed rules limit the authorities that may access data maintained by a security-based swap data repository to a specific list of domestic authorities and other persons, including foreign authorities, determined by the

---

183 See Exchange Act section 13(n)(5)(F), 15 U.S.C. 78m(n)(5)(F) (requiring an SDR to maintain the privacy of security-based swap transaction information); Exchange Act rules 13n-4(b)(8) and 13n-9 (implementing Exchange Act section 13(n)(5)(F)).

184 See, e.g., ESMA comment (Jam. 17, 2011) at 2 (noting that relevant authorities must ensure the confidentiality of security-based swap data provided to them).

185 For example, should it become generally known by market participants that a particular dealer had taken a large position in order to facilitate a trade by a customer and was likely to take offsetting positions to reduce its exposure, other market participants may take positions in advance of the dealer attempting to take its offsetting positions. This "front running" of the dealer's trades would likely raise its trading costs. Should the dealer believe that its market exposure may become public before it has the opportunity to hedge, the price quote offered to its customer to establish the original position would reflect the increased hedging cost.

186 See SDR Proposing Release, 75 FR at 77307 ("Failure to maintain privacy of [SDR data] could lead to market abuse and subsequent loss of liquidity.").

187 Exchange Act section 13(n)(5)(G) and (H), 15 U.S.C. 78m(n)(5)(G) and (H); see also Exchange Act rules 13n-4(b)(9) (implementing Exchange Act sections 13(n)(5)(G), 15 U.S.C. 78m(n)(5)(G)) and (b)(10) (implementing Exchange Act section 13(n)(5)(H), 15 U.S.C. 78m(n)(5)(H)).

Commission to be appropriate,[188] and further require that a repository notify the Commission when the repository receives an authority's initial request for data maintained by the repository.[189] Restricting access to security-based swap data available to relevant authorities should reduce the risk of unauthorized disclosure, misappropriation or misuse of security-based swap data because each relevant authority will only have access to information within its regulatory mandate, or legal responsibility or authority.

The proposed rules further require that, before a repository shares security-based swap information with a relevant authority, there must be an arrangement (in the form of a MOU or otherwise) between the Commission and the relevant authority that addresses the confidentiality of the security-based swap information provided, and under which the relevant authority agrees to indemnify the Commission and the repository for any expenses arising from litigation relating to the information provided.[190] While the proposal also conditionally exempts the relevant authority requesting data from the indemnification requirement, it does so only if the requested information relates to a regulatory mandate or legal responsibility or authority of the entity requesting the data, and there is in effect an arrangement between the Commission and such relevant authority that addresses the confidentiality of the information provided.[191] The arrangement should further reduce the likelihood of confidential trade or position data being inadvertently made public.

---

188 As discussed above in part II.A.3(a), the Commission anticipates that such determinations may be conditioned, in part, by specifying the scope of a relevant authority's access to data, and may limit this access to reflect the relevant authority's regulatory mandate, or legal responsibility or authority.

189 See Exchange Act section 13(n)(5)(G), 15 U.S.C. 78m(n)(5)(G); proposed Exchange Act rule 13n-4(b)(9).

190 See Exchange Act section 13(n)(5)(H), 15 U.S.C. 78m(n)(5)(H); proposed Exchange Act rule 13n-4(b)(10).

191 See proposed Exchange Act rule 13n-4(d).

Although the statutory indemnification requirement could provide a strong incentive for relevant authorities to take appropriate care in safeguarding data they might receive from a registered SDR, the Commission recognizes the significance of commenter concerns regarding the impact of requiring indemnification,[192] and understands that certain authorities may be unable to agree to indemnify a data repository and the Commission. Therefore, the Commission preliminarily believes that the indemnification requirement could frustrate the purposes of the statutory requirement that repositories make available data to relevant authorities. The Commission preliminarily believes that the proposed approach appropriately balances confidentiality concerns associated with regulatory access with the benefits accruing to security-based swap market participants from increased regulatory transparency.

2. Effects on Efficiency, Competition and Capital Formation

The rules described in this proposal are intended to facilitate access for relevant authorities to data stored in SEC-registered repositories and therefore affect such repositories, but do not directly affect security-based swap market participants. As discussed below, access by relevant authorities to security-based swap data could indirectly affect market participants through the benefits that accrue from the relevant authorities' improved ability to fulfill their regulatory mandate or legal responsibility or authority as well as the potential impact of disclosure of confidential data. However, because the Commission preliminarily believes that its rules will condition access to security-based swap data on the agreement of the relevant authorities to protect the confidentiality of the data, the Commission expects these rules to have little effect on the structure or operations of the security-based swap market. Therefore, the

---

[192] See note 13, supra.

Commission preliminarily believes that effects of the proposed rules on efficiency, competition and capital formation will be small.[193] Nevertheless, there are some potential effects, particularly with respect to efficiency and capital formation, which flow from efficient collection and aggregation of security-based swap data. We describe these effects below.

In part VI.B of this release, the Commission describes the baseline used to evaluate the economic impact of the proposed rules, including the impact on efficiency, competition and capital formation. In particular, the Commission noted that the security-based swap data currently available from the DTCC-TIW is the result of a voluntary reporting system and access to that data is made consistent with guidelines published by the ODRF.

Under the voluntary reporting regime, CDS transaction data involving counterparties and reference entities from most jurisdictions is reported to a single entity, the DTCC-TIW. The DTCC-TIW, using the ODRF guidelines, then allows relevant authorities, including the Commission, to obtain data necessary to carry out their respective authorities and responsibilities with respect to OTC derivatives and the regulated entities that use derivatives.[194] As various regulators implement reporting rules within their jurisdictions, counterparties within those jurisdictions may or may not continue to report to the DTCC-TIW. As a result, the ability of the Commission and other relevant authorities to obtain the data required consistent with their regulatory mandate, or legal responsibility or authority, may require the ability to access data held in a trade repository outside of their own jurisdictions. That is, because the market is global and interconnected, effective regulatory monitoring of the security-based swap market may

---

[193] See part VI.C.1b above for a discussion of the potential impact on capital formation of inadequate data confidentiality protections. The Commission preliminarily believes that the proposed approach balances the need for data confidentiality and the need for regulatory transparency.

[194] See note 149, supra.

require regulators to have access to information on the global market, particularly during times of market turmoil. The proposed data access rule amendments and indemnification exemption should facilitate access of relevant authorities other than the Commission to security-based swap data held in repositories, and may indirectly facilitate Commission access to data held by trade repositories registered with regulators other than the Commission. To the extent that the proposed data access rules and indemnification exemption facilitate the ability of repositories to collect security-based swap information involving counterparties across multiple jurisdictions, there may be benefits in terms of efficient collection and aggregation of security-based swap data.

To the extent that the proposed data access provisions and the indemnification exemption increase the quantity of transaction and position information available to regulatory authorities about the security-based swap market, the ability of the Commission and other relevant authorities to respond in an appropriate and timely manner to market developments could enhance investor protection through improved detection, and facilitating the investigation of fraud and other market abuses. Moreover, as noted above, we do not anticipate that the proposed rules would directly affect market participants, such enhancements in investor protections may decrease the risks and indirect costs of trading and could therefore encourage greater participation in the security-based swap market for a wider range of entities seeking to engage in a broad range of hedging and trading activities.[195] While we believe that increased participation is a possible outcome of the Commission's transparency initiatives, including these proposed

---

[195] Indirect trading costs refer to costs other than direct transaction costs. Front running costs described above provide an example of indirect trading costs. In the context of investor protection, the risk of fraud represents a cost of trading in a market with few investor protections or safeguards.

rules, relative to the level of participation in this market if these initiatives were not undertaken, we preliminarily believe that the benefits that flow from improved detection, facilitating the investigation of fraud and other market abuses, and more-efficient data aggregation are the more direct benefits of the rules.

In addition, the improvement in the quantity of data available to regulatory authorities, including the Commission, should improve their ability to monitor concentrations of risk exposures and evaluate risks to financial stability and could promote the overall stability in the capital markets.[196]

Aside from the effects that the proposed data access rules may have on regulatory oversight and market participation, we expect the proposed rules potentially to affect how SDRs are structured. In particular, the proposed data access rules and indemnification exemption could reduce the potential for SDRs to be established along purely jurisdictional lines, with multiple repositories established in different countries or jurisdictions. That is, effective data sharing may reduce the need for repositories to be established along jurisdictional lines, reducing the likelihood that a single security-based swap transaction must be reported to multiple swap-data repositories. As noted previously by the Commission, due to high fixed costs and increasing economies of scale, the total cost of providing trade repository services to the market for security-based swaps may be lower if the total number of repositories is not increased due to a regulatory environment that results in trade repositories being established along jurisdictional lines.[197] To the extent that the proposed rules result in fewer repositories that potentially

---

196 See note 95, supra.

197 See SDR Adopting Release, 80 FR at 14533 (discussion of high fixed costs and increasing economies of scale in the provision of security-based swap data repository services); see also SDR

compete across jurisdictional lines, cost savings realized by fewer repositories operating on a larger scale could result in reduced fees, with the subsequent cost to market participants to comply with reporting requirements being lower.[198]

Furthermore, multiple security-based swap data repositories with duplication of reporting requirements for cross-border transactions increase data fragmentation and data duplication, both of which increase the potential for difficulties in data aggregation. To the extent that the proposed data access rule amendments and indemnification exemption facilitate the establishment of SDRs that accept transactions from multiple jurisdictions, there may be benefits in terms of efficient collection and aggregation of security-based swap data. As discussed above, to the extent that the indemnification exemption allows relevant authorities to have better access to the data necessary to form a more complete picture of the security-based swap market – including information regarding risk exposures and asset valuations – the exemption should help the Commission and other relevant authorities perform their oversight functions in a more effective manner.

However, while reducing the likelihood of having multiple SDRs established along jurisdictional lines would resolve many of the challenges involved in aggregating security-based swap data, there may be costs associated with having fewer repositories. In particular, the existence of multiple repositories may reduce operational risks, such as the risk that a

---

Adopting Release, 80 FR at 14479 (discussion of rule 13n-4(c)(1)(i), which requires each SDR to ensure that any dues, fees or other charges that it imposes, and any discounts or rebates that it offers, are fair and reasonable and not unreasonably discriminatory; particularly noting that "[o]ne factor that the Commission has taken into consideration to evaluate the fairness and reasonableness of fees, particularly those of a monopolistic provider of a service, is the cost incurred to provide the service")."

198 Alternatively, fewer repositories could result in those few repositories having the ability to take advantage of the reduced level of competition to charge higher prices.

catastrophic event or the failure of a repository leaves no registered repositories to which transactions can be reported, impeding the ability of the Commission and relevant authorities to obtain information about the security-based swap market.

Finally, as we noted above, a relevant authority's inability to protect the privacy of data maintained by repositories could erode market participants' confidence in the integrity of the security-based swap market. More specifically, confidentiality breaches, including the risk that trading strategies may no longer be anonymous due to a breach, may increase the overall risks associated with trading or decrease the profits realized by certain traders. Increased risks or decreased profits may reduce incentives to participate in the security-based swap markets, which may lead to reduced trading activity and liquidity in the market. Depending on the extent of confidentiality breaches, as well as the extent to which such breaches lead to market exits, disclosures of confidential information could hinder price discovery and impede the capital formation process.[199]

3. Additional Costs and Benefits of Specific Rules

Apart from the general costs and benefits associated with the structure of the Exchange Act data access provisions and proposed implementing rules, certain discrete aspects of the proposed rules and related interpretation raise additional issues related to economic costs and benefits.

---

[199] See SDR Proposing Release, 75 FR at 77307 ("Failure to maintain privacy of [SDR data] could lead to market abuse and subsequent loss of liquidity.").

a. Benefits

i. Determination of recipient authorities

The Commission is proposing an approach to determining whether an authority, other than those expressly identified in the Exchange Act and the implementing rules,[200] should be provided access to data maintained by SDRs. The Commission believes that this proposed approach has the benefit of appropriately limiting relevant authorities' access to data maintained by repositories to protect the confidentiality of the data.[201] The Commission expects that relevant authorities from a number of jurisdictions may seek to obtain a determination by the Commission that they may appropriately have access to repository data. Each of these jurisdictions may have a distinct approach to supervision, regulation or oversight of its financial markets or market participants and to the protection of proprietary and other confidential information. The Commission believes that the proposed factors – which among other things would consider whether an authority has an interest in access to security-based swap data based on the relevant authority's regulatory mandate or legal responsibility or authority, whether there is an MOU or other arrangement between the Commission and the relevant authority that addresses the confidentiality of the security-based swap data provided to the authority, and whether information accessed by the applicable authority would be subject to robust confidentiality safeguards[202] – appropriately condition an authority's ability to access data on the confidentiality protections the authority will afford that data. This focus further would be strengthened by the Commission's ability to revoke its determination where necessary,

---

200 See part II.A for a discussion of specific authorities included in the implementing rules.

201 See ESMA comment (Jan. 17, 2011) at 2 (noting that relevant authorities must ensure the confidentiality of security-based swap data provided to them).

202 See part II.A.3.a, supra.

including, for example, if a relevant authority fails to keep such data confidential.[203] This approach should increase market participants' confidence that their confidential trade data will be protected, reducing perceived risks of transacting in security-based swaps.

The Commission also believes that its proposed approach in determining the appropriate relevant authorities would reduce the potential for fragmentation and duplication of security-based swap data among trade repositories by facilitating mutual access to the data. Narrower approaches such as allowing regulatory access to security-based swap data only to those entities specifically identified in the Exchange Act[204] may increase fragmentation and duplication, and hence increase the difficulty in consolidating and interpreting security-based swap market data from repositories, potentially reducing the general economic benefits discussed above.

Furthermore, the Commission believes that its proposed approach in conditioning access to security-based swap data held in SDRs by requiring there to be in effect an arrangement between the Commission and the authority in the form of a MOU would promote the intended benefits of access by relevant authorities to data maintained by SDRs. Under the proposed approach, rather than requiring regulatory authorities to negotiate confidentiality agreements with multiple SDRs, a single MOU between the Commission and the relevant authority can serve as the confidentiality agreement that will satisfy the requirement for a written agreement stating that the relevant authority will abide by the confidentiality requirements described in section 24 of the Exchange Act relating to the security-based swap data. The Commission routinely negotiates MOUs or other arrangements with relevant authorities to secure mutual assistance or

203 See part II.A.4, supra.

204 See Exchange Act section 3(a)(74), 15 U.S.C. 78c(a)(74).

for other purposes, and the Commission preliminarily believes that the proposed approach is generally consistent with this practice.

The Commission further preliminarily believes that negotiating a single such agreement with the Commission will be less costly for the authority requesting data than negotiating directly with each registered SDR and eliminate the need for each SDR to negotiate as many as 200 confidentiality agreements with requesting authorities. This approach would also avoid the difficulties that may be expected to accompany an approach that requires SDRs to enter into confidentiality agreements – particularly questions regarding the parameters of an adequate confidentiality agreement, and the presence of uneven and potentially inconsistent confidentiality protections across SDRs and recipient entities.

ii. Notification requirement

The Commission is proposing an approach by which SDRs may satisfy the notification requirement by notifying the Commission upon the initial request for security-based swap data by a relevant authority and maintaining records of the initial request and all subsequent requests.[205] The Commission estimates that approximately 300 relevant authorities may make requests for data from security-based swap data repositories.[206] Based on the Commission's

205 See proposed Exchange Act rule 13n-4(e).

206 See proposed Exchange Act rule 13n-4(b)(9)(i)-(v) for a list of prudential regulators that may request data maintained by SDRs from SDRs. The Exchange Act also states that FSOC, the CFTC, and the Department of Justice may access security-based swap data. See parts II.A.1, 2, supra. The Commission also expects that certain self-regulatory organizations and registered futures associations may request security-based swap data from repositories. Therefore, the Commission estimates that up to approximately 30 relevant authorities in the United States may seek to access security-based swap data from repositories. The Commission preliminarily believes that most requests will come from authorities in G20 countries, and estimates that each of the G20 countries will also have no more and likely fewer than 30 relevant authorities that may request data from SDRs. Certain authorities from outside the G20 also may request data. Accounting for all of those entities, the Commission estimates that there will

experience in making requests for security-based swap data from trade repositories, the Commission estimates that each relevant authority will access security-based swap data held in SDRs using electronic access. Such access may be to satisfy a narrow request concerning a specific counterparty or reference entity or security, to create a summary statistic of trading activity or outstanding notional, or to satisfy a large request for detailed transaction and position data. Requests may occur as seldom as once per month if the relevant authority is downloading all data to which it has access in order to analyze it on its own systems, or may occur 100 or more times per month if multiple staff of the relevant authority are making specific electronic requests concerning particular counterparties or reference entities and associated positions or transactions. Therefore, under the Commission's proposed approach to notification requirement compliance, the Commission estimates based on staff experience that each repository would provide the Commission with actual notice as many as 300 times, and that repositories cumulatively would maintain records of as many as 360,000 subsequent data requests per year.[207] The proposed rule would be expected to permit repositories to respond to requests for data by relevant authorities more promptly and at lower cost than if notification was required for each request for data access, while helping to preserve the Commission's ability to monitor whether the repository provides data to each relevant entity consistent with the applicable conditions.

---

likely be a total of no more than 300 relevant domestic and foreign authorities that may request security-based swap data from repositories.

[207] The annual estimate of 360,000 is calculated based on 300 recipient entities each making 100 requests per month cumulatively across all repositories. The estimate of 100 requests per authority is based on staff experience with similar data requests in other contexts.

The Commission's proposed rule would also simplify relevant authorities' direct access to security-based swap data needed in connection with their regulatory mandate or legal responsibility or authority, because repositories would not be required to provide the Commission with actual notice of every request prior to providing access to the requesting relevant authority.

iii. Use of confidentiality agreements between the Commission and recipient authorities

The proposed rules in part would condition regulatory access on there being an arrangement between the Commission and the recipient entity, in the form of an MOU or otherwise, addressing the confidentiality of the security-based swap information made available to the recipient. The proposed rules add that those arrangements shall be deemed to satisfy the statutory requirement for a written confidentiality agreement.[208]

As discussed above, the Commission preliminarily believes that this approach reflects an appropriate way to satisfy the interests associated with the confidentiality condition. The benefits associated with this approach include obviating the need for repositories to negotiate and enter into multiple confidentiality agreements, avoiding difficulties regarding the parameters of an adequate confidentiality agreement, and avoiding uneven and potentially inconsistent confidentiality protections. The proposed approach also would build upon the Commission's experience in negotiating such agreements.[209]

---

208 See proposed Exchange Act rule 13n-4(10)(i).

209 See part II.B.1, supra.

iv. Indemnification exemption

The Commission also is proposing a conditional indemnification exemption, recognizing that application of the indemnification requirement could prevent some relevant domestic and foreign authorities from obtaining security-based swap information from repositories, because they cannot provide an indemnification agreement.[210] Effectively prohibiting some authorities other than the Commission from obtaining access to security-based swap data maintained by repositories potentially would greatly reduce the market transparency to regulators provided by Title VII.[211] Moreover, although relevant authorities could obtain security-based swap data from the Commission,[212] repositories are likely to have systems in place and expertise that allows them to provide such data to relevant authorities quickly, and economic incentives to minimize their own cost of providing data.

The Commission also preliminarily believes that the absence of an exemption to the indemnification requirement could increase the likelihood that foreign authorities would require duplicate reporting of cross-border transactions to repositories within the foreign jurisdiction. To the extent that relevant foreign authorities are effectively restricted in obtaining data maintained by SEC-registered repositories, the Commission's own ability to access security-based swap data may similarly be restricted.[213] More generally, the resulting restrictions on regulatory access may likely lead to duplication and fragmentation of security-based swap data among trade

---

210 See part III.A, supra.

211 See Proposing Release, 75 FR at 77307 (describing expected benefits of SDRs, including the market transparency benefits of access by regulators); id. at 77356 ("The ability of the Commission and other regulators to monitor risk and detect fraudulent activity depends on having access to market data."); see also part VI.B.1 of this release discussing transparency in the security-based swap market.

212 See part IV.B, supra (discussing information sharing under Exchange Act sections 21 and 24); see also Proposing Release, 75 FR at 77319.

213 See note 94, supra, and accompanying text.

repositories in multiple jurisdictions, which may increase other costs that relevant authorities may incur, including, for example, the difficulty of aggregating data across multiple repositories.[214]

The Commission preliminarily believes that the proposed indemnification exemption further would be beneficial by mitigating the risks associated with permitting relevant authorities to obtain access to data maintained by repositories. The exemption would be available only for requests that are consistent with each requesting authority's regulatory mandate, or legal responsibility or authority. The Commission preliminarily believes that these conditions would significantly reduce the confidentiality concerns relating to relevant authorities' access to data maintained by repositories.[215] Limiting an authority's access to data to that relating to its mandate, or legal responsibility or authority would reduce the opportunity for improper disclosure of the data in part because such limits reduce the quantity of data that is subject to potential improper disclosure, and because an authority is likely to be familiar with the need to maintain the confidentiality of data that relates to its mandate or legal responsibility or authority. Further, the Commission will have an opportunity to evaluate the confidentiality protections provided by the relevant authority in the context of negotiations of an MOU or other arrangement.[216] Should the Commission believe the relevant authority has failed to comply with

---

214 See Proposing Release, 75 FR at 77358. The costs associated with aggregating the data of multiple repositories would likely be significantly higher under the circumstances described here, as different jurisdictions might impose different requirements regarding how data is to be reported and maintained.

215 See, e.g., ESMA comment (Jan. 17, 2011) at 2 (noting that relevant authorities must ensure the confidentiality of security-based swap data provided to them).

216 For the indemnification exemption to apply to the requests of a particular requesting authority, the authority would be required to enter into an MOU or other arrangement with the Commission, which would enable the Commission to determine, prior to operation of the indemnification exemption, that the authority has a regulatory mandate, or legal responsibility or authority to access data maintained by

the confidentiality provisions of the MOU, it may terminate access by revoking a determination by the Commission that the relevant entity was appropriate, or by terminating the MOU or other arrangement used to satisfy the confidentiality condition, or, as applicable, the indemnification exemption.[217]

b. Costs

The Commission recognizes that the proposed approach to providing access to relevant authorities other than the Commission to security-based swap data held in repositories has the potential to involve certain costs and risks.

The relevant authorities requesting securities-based swap data would incur some costs in seeking a Commission order deeming the authority appropriate to receive security-based swap data. These costs would include the negotiation of an MOU to address the confidentiality of the security-based swap information it seeks to obtain and providing information to justify that the security-based swap data relates to the entity's regulatory mandate or legal responsibility or authority. As discussed above, the Commission estimates that up to 300 entities potentially might enter into such MOUs or other arrangements.[218] Based on the Commission staff's experience in negotiating MOUs that address regulatory cooperation, the Commission preliminarily estimates the cost to each relevant authority requesting data associated with

---

SDRs, that the authority agrees to protect the confidentiality of any security-based swap information provided to it and that the authority will provide reciprocal assistance in securities matters within the Commission's jurisdiction. See part III, supra (discussing the proposed indemnification exemption).

217 See part II.A.3, supra.

218 See part VI.C.3.a.ii, supra.

negotiating such an arrangement of approximately $205,000 per entity for a total of $61,500,000.[219]

In addition, authorities that are not specified by the proposed rule may request that that the Commission determine them to be appropriate to receive access to such security-based swap data. Given the relevant information that the Commission preliminarily would consider in connection with such designations (apart from the MOU issues addressed above) – including information regarding how the authority would be expected to use the information, information regarding the authority's regulatory mandate or legal responsibility or authority, and information regarding reciprocal access – the Commission preliminarily estimates the cost associated with such a request to be approximately $15,200 per requesting entity for a total of $4,560,000.[220]

Security-based swap data repositories would incur some costs to verify that an entity requesting data entered into the requisite agreements concerning confidentiality with the Commission, and that the entity either has agreed to indemnify the Commission and the repository, or that the indemnification exemption applies. The Commission generally expects

---

219 These figures are based on 300 entities each requiring 500 personnel hours on average to negotiate an MOU. See part V.D.1.a, supra. The cost per entity is 400 hours x attorney at $380 per hour + 100 hours x deputy general counsel at $530 per hour = $205,000, or a total of $61,500,000. We use salary figures from SIFMA's Management & Professional Earnings in the Securities Industry 2013, modified by SEC staff to account for a 1800-hour year-week and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead.

220 These figures are based on roughly 300 entities (noting that certain entities designated by statute or rule would not need to prepare such requests) requiring 40 personnel hours to prepare a request for access. See part V.D.1.b, supra. The cost per entity is 40 hours x attorney at $380 per hour = $15,200, or a total of $4,560.000. We use salary figures from SIFMA's Management & Professional Earnings in the Securities Industry 2013, modified by SEC staff to account for a 1800-hour year-week and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead.

that such verification costs would be minimal because information regarding such Commission arrangements would generally be readily available.[221]

To the extent that the security-based swap data repository provides the requested data through direct electronic means, the repository may incur some cost in providing the requesting authority access to the system that provides such access and setting data permissions to allow access only to the information that relates to the authority's regulatory mandate, or legal responsibility or authority. The Commission preliminarily believes most of the costs associated with providing such access would be the fixed costs incurred in designing and building the systems to provide the direct electronic access required by the recently adopted SDR rules.[222] The Commission preliminarily believes the marginal cost of providing access to an additional relevant authority and setting the associated permissions is approximately \$6,295.[223] Based on an estimated 300 entities requesting access to each of ten registered SDRs, we estimate the total cost of connecting entities to SDRs to be approximately \$18,885,000.

The Commission further recognizes that the conditions in the proposed indemnification exemption would not necessarily provide repositories and the Commission with the same level of

---

221 As a general matter, the Commission provides a list of MOUs and other arrangements on its public website, which are available at: http://www.sec.gov/about/offices/oia/oia_cooparrangements.shtml.

222 See SDR Adopting Release, 80 FR at 14523 (estimating the aggregate one-time systems costs for ten respondents to be 420,000 hours and \$10 million, and estimating the aggregate ongoing systems costs as being 252,000 hours and \$60 million); see also part IV.D.1.c, supra.

223 This figure is based on the view that, for each recipient requesting data, a repository would incur an 25 hour burden associated with programming or otherwise inputting the relevant parameters, encompassing 20 hours of programmer analyst time and five hours of senior programmer time. The estimate also encompasses one hour of attorney time in connection with each such recipient. See part V.D.1.c, supra. The cost per entity is 20 hours x programmer analyst at \$220 per hour + 5 hours x senior programmer at \$303 per hour + 1 hour x attorney at \$380 per hour = \$6,295, We use salary figures from SIFMA's Management & Professional Earnings in the Securities Industry 2013, modified by SEC staff to account for a 1800-hour year-week and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead.

confidentiality-related protection that an indemnification agreement would provide (i.e., coverage for any expenses arising from litigation relating to information provided to a relevant authority). The Commission preliminarily believes, however, that the conditions in the proposed indemnification exemption, related to the need for a confidentiality arrangement and requiring that the information provided relate to a regulatory mandate, or legal responsibility or authority of the recipient entity, would provide appropriate protection of the confidentiality of data maintained by SDRs, albeit one that is different from the protection provided by an indemnification agreement that addresses potential costs of litigation associated with the data provided to it by the SDR.

In addition, under the Commission's proposed notification compliance rule, SDRs would be required to notify the Commission of the initial request for data but would not have to inform the Commission of all relevant authorities' requests for data prior to a SDR fulfilling such requests. Based on the estimate that approximately 300 relevant authorities may make requests for data from security-based swap data repositories, the Commission estimates that a repository would provide the Commission with actual notice approximately 300 times.[224] Moreover, based on the estimate that ten persons may register with the Commission as SDRs,[225] this suggests that repositories in the aggregate would provide the Commission with actual notice up to a total of 3,000 times. The Commission preliminarily estimates that the total of providing such notice to be $57,000 per SDR for a total of $570,000.[226]

---

224 See part VI.C.3.ii, supra.

225 See note 117, supra, and accompanying text

226 These figures are based each of ten SDRs providing notice for each of 300 requesting entities. See part V.D.1.d, supra. The cost per SDR is 300 requesting entities x 0.5 hours x attorney at $380 per hour = $57,000, or a total of $570,000. We use salary figures from SIFMA's Management &

Pursuant to rule, SDRs would be required to maintain records of subsequent requests.[227] Not receiving actual notice of all requests may impact the Commission's ability to track such requests, but the Commission preliminarily believes that the benefits of receiving actual notice of each request would not justify the additional costs that repositories would incur in providing such notices and the potential delay in relevant authorities receiving data that they need to fulfill their regulatory mandate, or legal responsibility or authority. At the same time, providing notice of initial requests will help to preserve the Commission's ability to monitor whether the repository provides data to each relevant entity consistent with the applicable conditions. As discussed above, the Commission preliminarily estimates that the average initial paperwork burden associated with maintaining certain records related to data requests or access would be roughly 360 hours, and that the annualized burden would be roughly 280 hours and $120,000 for each repository.[228] Assuming a maximum of ten security-based swap data repositories, the estimated aggregate one-time dollar cost would be roughly $1 million,[229] and the estimated aggregate annualized dollar cost would be roughly $1.2 million.[230]

Professional Earnings in the Securities Industry 2013, modified by SEC staff to account for a 1800-hour year-week and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead.

[227] See part V.D.1.d, supra. As noted above, existing rules require SDRs to maintain copies of all documents they make or receive in their course of business, including electronic documents. See note 77, supra.

[228] See part V.D.1.d, supra.

[229] The Commission preliminarily anticipates that a repository would assign the associated responsibilities primarily to a compliance manager and a senior systems analyst. The total estimated dollar cost would be roughly $100,000 per repository, reflecting the cost of a compliance manager at $283 per hour for 300 hours, and a senior systems analyst at $260 per hour for 60 hours. Across the estimated ten repositories, this would amount to roughly $1 million.

[230] The Commission preliminarily anticipates that a repository would assign the associated responsibilities primarily to a compliance manager. The total estimated dollar cost would be roughly $120,000 per repository, reflecting $40,000 annualized information technology costs, as well as a

D. Alternatives

The Commission considered a number of alternative approaches to implementing the Exchange Act data access provisions, including the indemnification requirement, but, for the reasons discussed below, is not proposing them.

1. No indemnification exemption

The Commission considered not proposing any exemptive relief from the indemnification requirement. As discussed above, application of the indemnification requirement may prevent some relevant authorities from accessing security-based swap data directly from repositories registered with the Commission.[231] Although relevant authorities could obtain such data from the Commission,[232] that alternative would be expected to be associated with delays and higher costs, particularly during periods of market stress and particularly since repositories are likely to have expertise in providing such data to relevant authorities and economic incentives for doing so efficiently.[233]

To the extent that relevant foreign authorities are effectively restricted in obtaining data maintained by SEC-registered repositories, the Commission's own ability to access security-based swap data may similarly be restricted.[234] More generally, the resulting restrictions on regulatory access may likely lead to duplication and fragmentation of security-based swap data

---

compliance manager at $283 per hour for 280 hours. Across the estimated ten repositories, this would amount to roughly $1.2 million.

231 See, e.g., DTCC comment (Nov. 15, 2010) at 3 (discussing how the indemnification requirement would result in the reduction of information accessible to regulators on a timely basis and would greatly diminish regulators' ability to carry out oversight functions).

232 See part IV.B, supra, discussing information sharing under Exchange Act sections 21 and 24; see also SDR Proposing Release, 75 FR at 77319.

233 See part VI.C.3.a.iv, supra.

234 See note 94, supra, and accompanying text.

among trade repositories in multiple jurisdictions, which may increase other costs that relevant authorities may incur, including, for example, the difficulty of aggregating data across multiple repositories.[235]

2. Repository option to waive indemnification

The Commission also considered whether to adopt the approach set forth in the Cross-Border Proposing Release, to allow the SDR the option to waive the indemnification requirement.[236] As discussed above, however, the Commission preliminarily believes that the proposed approach would more effectively address the relevant concerns associated with implementing the indemnification provision.[237] Also, requiring each repository to elect whether to waive the indemnification requirement for each requesting entity would likely impose additional costs on repositories and may result in inconsistent treatment of data requests across repositories.

3. Additional conditions to indemnification requirement or proposed indemnification exemption

The Commission also considered whether to prescribe additional conditions or limitations to the indemnification requirement or the proposed indemnification exemption. In part, the Commission considered one commenter's suggestion that the Commission provide model indemnification language in connection with the indemnification requirement, but concluded preliminarily that the benefits of such model language are largely mitigated by an indemnification exemption that would condition the indemnification exemption upon there being in effect one or more arrangements (in the form of an MOU or otherwise) between the

---

235 See note 214, supra

236 See note 91, supra, and accompanying text.

237 See part III.A, supra.

Commission and the entity that addresses the confidentiality of the security-based swap information provided and other matters as determined by the Commission.[238]

4. Use of confidentiality arrangements directly between repositories and recipients

The Commission considered the alternative approach of permitting confidentiality agreement between SDRs and the recipient of the information to satisfy the confidentiality condition to the data access requirement. The Commission preliminarily believes, however, that the proposed approach, which would make use of confidentiality arrangements between the Commission and the recipients of the data, would avoid difficulties such as questions regarding the parameters of the confidentiality agreement, and the presence of uneven and inconsistent confidentiality protections.[239] This also would avoid the need for SDRs to potentially negotiate and enter into dozens of confidentiality agreements, instead such costs would be borne by the Commission.

6. Notice of individual requests for data access

Finally, the Commission considered requiring repositories to provide notice to the Commission of all requests for data prior to repositories fulfilling such requests, rather than the proposed approach of requiring such notice only of the first request from a particular recipient, with the repository maintaining records of all subsequent requests.[240] The Commission preliminarily believes that the benefits of receiving actual notice for each and every request would not justify the additional costs that would be imposed on repositories to provide such

---

238 See note 98, supra.

239 See part II.B.1, supra.

240 See part II.A.4, supra.

notice, and providing notice of subsequent requests may not be feasible if data is provided by direct electronic access.

E. Comments on the Economic Analysis

The Commission requests comment on all aspects of this economic analysis. Commenters particularly are requested to address whether there are other costs or benefits – not addressed above – that the Commission should take into account when adopting final rules. Commenters also are requested to address whether the Commission has appropriately weighed the costs and benefits of the potential alternative approaches addressed above, and whether there are other potential alternative approaches that the Commission should assess.

VII. Consideration of Impact on the Economy

For purposes of the Small Business Regulatory Enforcement Fairness Act of 1996 ("SBREFA")[241] the Commission must advise OMB whether the proposed regulation constitutes a "major" rule. Under SBREFA, a rule is considered "major" where, if adopted, it results or is likely to result in: (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers or individual industries; or (3) significant adverse effect on competition, investment or innovation.

The Commission requests comment on the potential impact of the proposed rules and amendments on the economy on an annual basis. Commenters are requested to provide empirical data and other factual support for their views to the extent possible.

---

[241] Pub. L. No. 104-121, Title II, 110 Stat. 857 (1996) (codified in various sections of 5 U.S.C., 15 U.S.C. and as a note to 5 U.S.C. 601).

VIII. Regulatory Flexibility Act Certification

Section 3(a) of the Regulatory Flexibility Act of 1980 ("RFA")[242] requires the Commission to undertake an initial regulatory flexibility analysis of the proposed rules on "small entities." Section 605(b) of the RFA[243] provides that this requirement shall not apply to any proposed rule or proposed rule amendment which, if adopted, would not have a significant economic impact on a substantial number of small entities. Pursuant to 5 U.S.C. 605(b), the Commission hereby certifies that the proposed rules would not, if adopted, have a significant economic impact on a substantial number of small entities. In developing these proposed rules, the Commission has considered their potential impact on small entities. For purposes of Commission rulemaking in connection with the RFA, a small entity includes: (1) when used with reference to an "issuer" or a "person," other than an investment company, an "issuer" or "person" that, on the last day of its most recent fiscal year, had total assets of $5 million or less;[244] or (2) a broker-dealer with total capital (net worth plus subordinated liabilities) of less than $500,000 on the date in the prior fiscal year as of which its audited financial statements were prepared pursuant to Rule 17a-5(d) under the Exchange Act,[245] or, if not required to file such statements, a broker-dealer with total capital (net worth plus subordinated liabilities) of less than $500,000 on the last day of the preceding fiscal year (or in the time that it has been in

---

242 5 U.S.C. 603(a).

243 5 U.S.C. 605(b).

244 See 17 CFR 240.0-10(a).

245 17 CFR 240.17a-5(d).

business, if shorter); and is not affiliated with any person (other than a natural person) that is not a small business or small organization.[246]

In initially proposing rules regarding the registration process, duties and core principles applicable to SDRs, the Commission stated that it preliminarily did not believe that any persons that would register as repositories would be considered small entities.[247] The Commission further stated that it preliminarily believed that most, if not all, SDRs would be part of large business entities with assets in excess of $5 million and total capital in excess of $500,000, and, as a result, the Commission certified that the proposed rules would not have a significant impact on a substantial number of small entities and requested comments on this certification.[248] The Commission reiterated that conclusion earlier this year in adopting final rules generally addressing repository registration, duties and core principles.[249]

The Commission continues to hold the view that any persons that would register as SDRs would not be considered small entities. Accordingly, the Commission certifies that the proposed rules – related to regulatory access to data held by SDRs and providing a conditional exemption from the associated indemnification requirement – would not have a significant economic impact

---

[246] See 17 CFR 240.0-10(c).

For purposes of the Regulatory Flexibility Act, the definition of "small entity" also encompasses "small governmental jurisdictions," which in relevant part means governments of locales with a population of less than fifty thousand. 5 U.S.C. 601(5), (6). Although the Commission anticipates that this proposal may be expected to have an economic impact on various governmental entities that access data pursuant to Dodd-Frank's data access provisions, the Commission does not anticipate that any of those governmental entities would be small entities.

[247] See 75 FR at 77365.

[248] See id. (basing the conclusions on review of public sources of financial information about the current repositories that are providing services in the OTC derivatives market).

[249] See SDR Adopting Release, 80 FR at 14549 (noting that the Commission did not receive any comments that specifically addressed whether the applicable rules would have a significant economic impact on small entities).

on a substantial number of small entities for purposes of the RFA. The Commission encourages written comments regarding this certification. The Commission solicits comment as to whether the proposed rules could have an effect on small entities that has not been considered. The Commission requests that commenters describe the nature of any impact on small entities and provide empirical data to support the extent of such impact.

Statutory Basis and Text of Proposed Rules

Pursuant to the Exchange Act, and particularly sections 3(b), 13(n), 23(a) and 36 thereof, 15 U.S.C. 78c(b), 78m(n), 78w(a) and 78mm, the Commission is proposing to amend rule 13n-4 by adding paragraphs (b)(9), (b)(10), (d) and (e) to that rule.

List of Subjects in 17 CFR Part 240

[Confidential business information, Reporting and recordkeeping requirements, Securities.]

Text of Proposed Rules

For the reasons stated in the preamble, the Commission is proposing to amend Title 17, Chapter II, of the Code of Federal Regulations as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 continues to read, in part, as follows:

Authority: 15 U.S.C. 77c, 77d, 77g, 77j, 77s, 77z-2, 77z-3, 77eee, 77ggg, 77nnn, 77sss, 77ttt, 78c, 78c-3, 78c-5, 78d, 78e, 78f, 78g, 78i, 78j, 78j-1, 78k, 78k-1, 78*l*, 78m, 78n, 78n-1, 78*o*, 78*o*-4, 78*o*-10, 78p, 78q, 78q-1, 78s, 78u-5, 78w, 78x, 78*ll*, 78mm, 80a-20, 80a-23, 80a-29, 80a-37, 80b-3, 80b-4, 80b-11, 7201 *et seq.*, and 8302; 7 U.S.C. 2(c)(2)(E); 12 U.S.C. 5221(e)(3); 18 U.S.C. 1350; and Pub. L. 111-203, 939A, 124 Stat. 1376 (2010), unless otherwise noted.

*   *   *   *   *

2. Amend § 240.13n-4 by revising paragraph (b)(8) to remove the "and" at the end of the line and adding paragraphs (b)(9), (b)(10), (d) and (e) to read as follows:

§ 240.13n–4 Duties and core principles of security-based swap data repository.

* * * * *

(b) Duties. * * *

(9) On a confidential basis, pursuant to section 24 of the Act (15 U.S.C. 78x), upon request, and after notifying the Commission of the request in a manner consistent with paragraph (e) of this section, make available security-based swap data obtained by the security-based swap data repository, including individual counterparty trade and position data, to the following:

(i) The Board of Governors of the Federal Reserve System and any Federal Reserve Bank;

(ii) The Office of the Comptroller of the Currency;

(iii) The Federal Deposit Insurance Corporation;

(iv) The Farm Credit Administration;

(v) The Federal Housing Finance Agency;

(vi) The Financial Stability Oversight Council;

(vii) The Commodity Futures Trading Commission;

(viii) The Department of Justice;

(ix) The Office of Financial Research;

and

(x) Any other person that the Commission determines to be appropriate, conditionally or unconditionally, by order, including, but not limited to –

(A) Foreign financial supervisors (including foreign futures authorities);

(B) Foreign central banks; and

(C) Foreign ministries;

(10) Before sharing information with any entity described in paragraph (b)(9) of this section, there shall be in effect an arrangement between the Commission and the entity (in the form of a memorandum of understanding or otherwise) to address the confidentiality of the security-based swap information made available to the entity; this arrangement shall be deemed to satisfy the requirement, set forth in section 13(n)(5)(H)(i) of the Act (15 U.S.C. 78m(n)(5)(H)(i)), that the security-based swap data repository receive a written agreement from the entity stating that the entity shall abide by the confidentiality requirements described in section 24 of the Act (15 U.S.C. 78x) relating to the information on security-based swap transactions that is provided; and

* * * * *

(d) Exemption from the indemnification requirement. The indemnification requirement set forth in section 13(n)(5)(H)(ii) of the Act (15 U.S.C. 78m(n)(5)(H)(ii)) shall not be applicable to an entity described in paragraph (b)(9) of this section with respect to disclosure of security-based swap information by the security-based swap data repository to such entity if:

(1) Such information relates to persons or activities within the entity's regulatory mandate, or legal responsibility or authority; and

(2) There is in effect one or more arrangements (in the form of memoranda of understanding or otherwise) between the Commission and such entity that:

(i) Address the confidentiality of the security-based swap information provided and any other matters as determined by the Commission; and

(ii) Specify the types of security-based swap information that would relate to persons or activities within the entity's regulatory mandate, legal responsibility or authority for purposes of paragraph (d)(1) of this section.

(e) Notification requirement compliance. To satisfy the notification requirement of the data access provisions of paragraph (b)(9) of this section, a security-based swap data repository shall inform the Commission upon its receipt of the first request for security-based swap data from a particular entity (which may include any request to be provided ongoing online or electronic access to the data), and the repository shall maintain records of all information related to the initial and all subsequent requests for data access from that entity, including records of all instances of online or electronic access, and records of all data provided in connection with such requests or access.

By the Commission.

Brent J. Fields
Secretary

Date: September 4, 2015

UNITED STATES OF AMERICA
Before the
SECURITIES AND EXCHANGE COMMISSION

SECURITIES EXCHANGE ACT OF 1934
Release No. 75847 / September 4, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16784

In the Matter of **Robert A. Hanner,** **Respondent.**	**ORDER INSTITUTING CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 21C OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 21C of the Securities Exchange Act of 1934 ("Exchange Act"), against Robert A. Hanner ("Hanner" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Instituting Cease-and-Desist Proceedings Pursuant to Section 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

Summary

1. This matter involves insider trading by Respondent in the securities of Pioneer Behavioral Health, Inc. ("PHC") in advance of the May 24, 2011 announcement that Acadia Healthcare Company, Inc. ("Acadia") had agreed to acquire PHC.

2. In late March 2011, while at Acadia's headquarters discussing a potential business relationship between Hanner and Acadia, Hanner learned material nonpublic information about the proposed acquisition of PHC by Acadia. Hanner knew that this information about the proposed acquisition was material and nonpublic.

3. On May 4, 2011, Respondent made his first purchase of PHC shares. Respondent made additional purchases of PHC shares on May 12, 13, and 16. Respondent purchased these shares based on the information he had received that Acadia would be acquiring PHC. As a result of his improper use of the insider information, Respondent generated gains of $20,805.

4. As a result of the conduct described above, Hanner violated Section 10(b) of the Exchange Act and Rule 10b-5 thereunder.

Respondent

5. *Robert A. Hanner*, age 51, resides in Columbia, SC. During the relevant time, Hanner was engaged in confidential discussions with Acadia and then was employed by Acadia as a Vice-President of Development.

Other Relevant Persons

6. *Pioneer Behavioral Health, Inc.* was a Massachusetts company headquartered in Peabody, MA. It provided behavioral health services. Its common stock was registered with the Commission pursuant to Section 12(b) of the Exchange Act until after it was acquired by Acadia. PHC's common stock traded on the American Stock Exchange (former ticker symbol PHC).

7. *Acadia Healthcare Company, Inc.* is an SEC reporting company incorporated in Delaware and headquartered in Franklin, TN. It provides behavioral health services. Its common stock is registered with the Commission pursuant to Section 12(b) of the Exchange Act. Acadia's common stock is quoted on NASDAQ Global Market under the ticker symbol ACHC.

---

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

Facts

8. For several years, until approximately November 2010, Hanner worked at another behavioral health company. While there, Hanner worked closely with several other individuals, many of whom were executives at the behavioral health company.

9. In January 2011, Hanner's former colleagues joined Acadia, many of them in senior executive positions.

10. On or around January 31, 2011, Acadia's Chief Executive Officer contacted PHC's Chief Executive Officer to discuss Acadia's proposed acquisition of PHC. Discussions concerning Acadia's proposed acquisition of PHC continued throughout the next few months. Negotiations culminated in the execution of a final agreement on May 23, 2011. The agreement was announced publicly on the morning of May 24, 2011.

11. In March and April 2011, Hanner engaged in discussions with his former colleagues, who were then senior executives at Acadia. These discussions initially concerned Hanner's proposal that Acadia participate in the acquisition of a proposed behavioral health facility that Hanner was developing, and later culminated in Acadia offering Hanner in April a position as its Vice-President of Development.

12. In late March 2011, Hanner traveled to Acadia's headquarters in Franklin, TN to discuss with his former colleagues the potential business relationship. While Hanner was at Acadia's headquarters, he learned that Acadia would be acquiring PHC soon. Hanner knew that the information about the impending acquisition was confidential.

13. On May 2, 2011, Hanner traveled to Acadia's Atlanta office, where he met with the co-President of Acadia and accepted his offer of employment.

14. On May 4, 2011, Hanner made his first purchase of PHC securities. On May 12, 13 and 16, 2011, Hanner purchased additional shares of PHC. Hanner purchased these shares on the basis of the material nonpublic information he had learned regarding Acadia's impending acquisition of PHC. On May 17, Respondent began work at Acadia as Vice President of Development.

15. On May 23, 2011, PHC and Acadia executed the merger agreement. At 8:45 a.m. on May 24, 2011, PHC and Acadia issued joint press releases announcing that the companies had entered into a definitive merger agreement.

16. The market reacted positively to the news. The closing last sale price of PHC on the day of the announcement was $3.61, an increase of approximately 20% over the prior day's close. Trading volume on the day of the announcement was 1.8 million shares, compared to PHC's historical average daily volume of approximately 56,700 shares.

17. As of the close of market on May 24, 2011, the PHC shares Hanner had purchased in May 2011 had increased in value by $20,805.

18. At the time that he purchased PHC securities, Hanner had a duty to Acadia to maintain the information about Acadia's impending acquisition of PHC in confidence and to refrain from trading on it. Hanner knew or was reckless in not knowing that he violated that duty when he traded on the basis of material nonpublic information about PHC.

19. As a result of the conduct described above, Hanner violated Section 10(b) of the Exchange Act and Rule 10b-5 thereunder, which prohibit fraudulent conduct in connection with the purchase or sale of securities.

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent Hanner's Offer.

Accordingly, it is hereby ORDERED that:

A. Pursuant to Section 21C of the Exchange Act, Respondent Hanner cease and desist from committing or causing any violations and any future violations of Section 10(b) of the Exchange Act and Rule 10b-5 thereunder.

B. Respondent shall, within 10 days of the entry of this Order, pay disgorgement of $20,805, which represents profits gained as a result of the conduct described herein; prejudgment interest of $2,490; and a civil money penalty in the amount of $20,805 to the Securities and Exchange Commission for transfer to the general fund of the United States Treasury, subject to Exchange Act Section 21F(g)(3). If timely payment is not made, additional interest shall accrue pursuant to SEC Rule of Practice 600 or pursuant to 31 U.S.C. § 3717. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Robert A. Hanner as a Respondent in these proceedings, and the file number of these proceedings;

a copy of the cover letter and check or money order must be sent to Scott Friestad, Division of Enforcement, Securities and Exchange Commission, 100 F St., NE, Washington, DC 20549-5010.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

SECURITIES AND EXCHANGE COMMISSION

SECURITIES EXCHANGE ACT OF 1934
Release No. 75848 / September 4, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16785

In the Matter of **DONALD E. ROBAR,** **Respondent.**	**ORDER INSTITUTING CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 21C OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 21C of the Securities Exchange Act of 1934 ("Exchange Act"), against Donald E. Robar ("Robar" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Instituting Cease-and-Desist Proceedings Pursuant to Section 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

Summary

1. This matter involves insider trading by Respondent in the securities of Pioneer Behavioral Health, Inc. ("PHC") in advance of the May 24, 2011 announcement that Acadia Healthcare Company, Inc. ("Acadia") had agreed to acquire PHC.

2. On or about January 31, 2011, through his role as a director on PHC's board, Robar received material nonpublic information about the proposed acquisition of PHC by Acadia. Robar knew that he had a fiduciary duty to maintain this information in confidence.

3. On February 10, 2011, Respondent placed trades in a family member's brokerage account on the basis of the information he had received. As a result of his improper use of the insider information, Respondent generated gains of $4,617.25.

4. As a result of the conduct described above, Robar violated Section 10(b) of the Exchange Act and Rule 10b-5 thereunder.

Respondent

5. *Donald E. Robar*, age 77, resides in New London, NH. During the relevant time, Robar was a director on the board of PHC and resided in New London, NH.

Other Relevant Persons

6. *Pioneer Behavioral Health, Inc.* was a Massachusetts company headquartered in Peabody, MA. It provided behavioral health services. Its common stock was registered with the Commission pursuant to Section 12(b) of the Exchange Act until after it was acquired by Acadia. PHC's common stock traded on the American Stock Exchange (former ticker symbol PHC).

7. *Acadia Healthcare Company, Inc.* is an SEC reporting company incorporated in Delaware and headquartered in Franklin, TN. It provides behavioral health services. Its common stock is quoted on NASDAQ Global Market under the ticker symbol ACHC.

8. *Individual A* is a member of Robar's family. Individual A resided in Minnesota during the relevant time period, and currently resides in Minnesota. Individual A holds an

---

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

individual retirement account at a brokerage firm. Individual A provided Robar with login and password to this IRA account, for the purpose of permitting Robar to make trades in the account.

Facts

9. On or around January 31, 2011, Acadia's Chief Executive Officer contacted PHC's Chief Executive Officer to discuss Acadia's proposed acquisition of PHC. That same day, the PHC CEO updated the PHC board of directors, including Donald Robar, on the discussions with Acadia and the proposed acquisition. Discussions continued throughout the next few months. Negotiations culminated in the execution of a final agreement on May 23, 2011. The agreement was announced publicly on the morning of May 24, 2011.

10. Donald Robar learned of the possible acquisition of PHC by Acadia on January 31, 2011, through a discussion between PHC's CEO and the PHC board of directors, of which Robar was a member. Robar knew that the information about the possible acquisition of PHC by Acadia was material and nonpublic, and that he had an obligation to maintain the confidentiality of the information. Robar violated his fiduciary duty to PHC and PHC's shareholders by trading while in possession of this information.

11. Between February 1 and February 5, 2011, Robar visited family members in Minnesota. During this visit, Robar discussed with Individual A the sale of all of the securities held in the IRA retirement account at that time, and the purchase of PHC shares in the same account.

12. On February 9, 2011, Robar used Individual A's login and password to access Individual A's brokerage account. Robar proceeded to sell all of the securities held in Individual A's IRA account at that time.

13. On February 10, 2011, Robar again used Individual A's login and password to access the IRA account. He used the funds in the account, made available by the previous day's sales, to purchase shares of PHC.

14. On May 23, 2011, PHC and Acadia executed the merger agreement. At 8:45 a.m. on May 24, 2011, PHC and Acadia issued joint press releases announcing that the companies had entered into a definitive merger agreement.

15. The market reacted positively to the news. The closing last sale price of PHC on the day of the announcement was $3.61, an increase of approximately 20% over the prior day's close. Trading volume on the day of the announcement was 1.8 million shares, compared to PHC's historical average daily volume of approximately 56,700 shares.

16. On May 24, 2011, at approximately 7:30 p.m., Robar used Individual A's login and password to access the brokerage account. As of the close of market on May 24, 2011, the PHC shares purchased on February 10, 2011 had increased in value by $4,617.25.

17. Robar's purchase of PHC shares on February 10, 2011 was while in possession of material, nonpublic information about the proposed acquisition of PHC. Robar had learned this information through his role as a PHC director, and knew that he had a fiduciary duty to maintain the information in confidence and to refrain from trading on it.

18. As a result of the conduct described above, Robar violated Section 10(b) of the Exchange Act and Rule 10b-5 thereunder, which prohibit fraudulent conduct in connection with the purchase or sale of securities.

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent Robar's Offer.

Accordingly, it is hereby ORDERED that:

A. Pursuant to Section 21C of the Exchange Act, Respondent Robar cease and desist from committing or causing any violations and any future violations of Section 10(b) of the Exchange Act and Rule 10b-5 thereunder.

B. Respondent Robar is prohibited from acting as an officer or director of any issuer that has a class of securities registered pursuant to Section 12 of the Exchange Act [15 U.S.C. § 78l] or that is required to file reports pursuant to Section 15(d) of the Exchange Act [15 U.S.C. § 78o(d)].

C. Respondent shall, within 10 days of the entry of this Order, pay disgorgement of $4,617.25, which represents profits gained as a result of the conduct described herein; prejudgment interest of $446.72; and a civil money penalty in the amount of $4,617.25 to the Securities and Exchange Commission for transfer to the general fund of the United States Treasury, subject to Exchange Act Section 21F(g)(3). If timely payment is not made, additional interest shall accrue pursuant to SEC Rule of Practice 600 or pursuant to 31 U.S.C. § 3717. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Donald Robar as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Scott Friestad, Division of Enforcement, Securities and Exchange Commission, 100 F St., NE, Washington, DC 20549-5010.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

ACCOUNTING AND AUDITING ENFORCEMENT
Release No. 3683 / September 8, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16786

In the Matter of

BANKRATE, INC.,

Respondent.

ORDER INSTITUTING CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933 AND SECTION 21C OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING CEASE-AND-DESIST ORDER AND CIVIL PENALTY

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 8A of the Securities Act of 1933 ("Securities Act") and Section 21C of the Securities Exchange Act of 1934 ("Exchange Act"), against Bankrate, Inc. ("Bankrate" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over it and the subject matter of these proceedings, which are admitted, Respondent consents to the entry of this Order Instituting Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933 and Section 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing Cease-and-Desist Order and Civil Penalty ("Order") as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

SUMMARY

This proceeding results from Bankrate, through its chief financial officer, Edward DiMaria, vice president and director of accounting, Matthew Gamsey, and vice president of finance, Hyunjin Lerner, intentionally manipulating its financial results for the second quarter of 2012 in order to meet and/or exceed analyst consensus estimates for key financial metrics. As a result of this manipulation, Bankrate materially overstated its financial results for the second quarter of 2012.

After reviewing Bankrate's preliminary financial results for the second quarter 2012, which fell short of analyst estimates for certain key metrics, DiMaria arbitrarily decided to increase Bankrate's revenue following the end of the quarter in order to meet those metrics. As a result, DiMaria, through Lerner, improperly directed two Bankrate divisions, the Insurance and Credit Cards divisions, to book additional revenue of $300,000 and $500,000, respectively, without any support or analysis.

The Insurance division immediately booked the $300,000 of revenue directed by DiMaria to a dormant customer account, with no intention of justifying the revenue until the company's outside auditor asked for additional information about it five days later. In response to the auditor's inquiry, the Insurance division quickly devised a purported justification for the improperly booked revenue – a justification that changed shortly thereafter. These purported justifications were not, however, provided to Bankrate's auditor. Instead, Lerner sent a misleading, generic explanation to the auditor – an explanation that was reviewed and approved by DiMaria and Gamsey. Further, although the Insurance division's ultimate justification was reviewed and approved by DiMaria, Gamsey, and Lerner, the three most senior employees in Bankrate's accounting department, each of them knew, or was reckless in not knowing, that the purported justification did not support the recognition of revenue under Generally Accepted Accounting Principles ("GAAP").

The accountants from the Credit Cards division were only willing to record $176,000 of the $500,000 in revenue directed by DiMaria, thereby infuriating DiMaria. Refusing to accept the Credit Cards division's unwillingness to record the full $500,000 of revenue he had directed, DiMaria insisted that the approximate difference be recorded as revenue on the books of Bankrate's mortgage business, Bankrate Core. As a result, Bankrate recorded an additional $305,000 of unsupported revenue to two arbitrary Bankrate Core customers. After learning of the Commission staff's investigation in this matter, DiMaria further attempted to conceal this fraud by retroactively attributing this revenue to a purported contractual dispute with an Insurance division

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

customer. In fact, this dispute had been resolved several months earlier. In addition, Bankrate's recording of both the $176,000 and the $305,000 in revenue was contrary to GAAP.

Further manipulating Bankrate's financial results for the second quarter, DiMaria, without any support or analysis, improperly directed a Bankrate Core accountant to reduce the accrual for certain marketing expenses by $400,000. Bankrate, through DiMaria and with Lerner's knowledge, had been allowing this marketing accrual account to accrue as a "cushion" account for more than a year, and then selectively decided to reduce the accrual in the second quarter of 2012 in order to improve the company's financial results. In the second quarter 2012, DiMaria improperly reversed $400,000 of the accrual amount, thereby reducing second quarter expenses, to help Bankrate meet analyst estimates. Finally, as part of its effort to artificially inflate its financial results to meet or exceed analyst estimates for the second quarter 2012, Bankrate intentionally failed to book approximately $99,000 in known accounting expenses that had been incurred in the second quarter.

As a result of these improper accounting entries, entries that the company reversed as part of a broader restatement on June 17, 2015, Bankrate's second quarter 2012 earnings release and associated Form 8-K, filed on July 31, 2012, reported adjusted earnings before interest, taxes, depreciation, and amortization ("Adjusted EBITDA") of $37.5 million, exceeding analyst consensus estimates by approximately $300,000, and adjusted earnings per share ("Adjusted EPS") of $0.18, thereby meeting analyst consensus estimates.[2] Further, due to these improper accounting entries, Bankrate materially overstated its second quarter 2012 net income reported in its Form 10-Q filed on August 13, 2012. During the two week period following the issuance of Bankrate's second quarter 2012 earnings release, DiMaria and Lerner each sold Bankrate stock, thereby profiting from a stock price that had been artificially inflated by the company's materially overstated financial results.

RESPONDENT

1. **Bankrate, Inc.** is a Delaware corporation based in North Palm Beach, Florida, that owns and operates an Internet-based consumer banking and personal finance network. Bankrate's common stock is registered with the Commission pursuant to Exchange Act Section 12(b) and traded on the New York Stock Exchange (ticker: RATE). Bankrate files periodic reports, including Forms 10-K, 10-Q, and 8-K, with the Commission pursuant to Section 13(a) of the Exchange Act and the related rules thereunder. On June 17, 2011, Bankrate filed an S-8 registration statement for an offering relating to its equity compensation plan. This offering, which was ongoing at the time of the misconduct described herein, incorporated future company filings with the Commission, including the Form 8-K containing the company's materially false second quarter 2012 earnings release and the second quarter 2012 Form 10-Q that materially overstated the company's net income.

---

[2] Bankrate defines Adjusted EBITDA as earnings before interest, taxes, depreciation and amortization, excluding stock based compensation expense and IPO and deal related expenses, and defines Adjusted EPS as earnings per fully diluted share, excluding stock based compensation expense, amortization, IPO and deal related expenses.

FACTS

Bankrate's Business And Structure.

2. Bankrate is engaged in the business of providing consumers with personal finance information across multiple vertical categories including mortgages, deposits, insurance, credit cards, and other categories, such as retirement, automobile loans, and taxes. Bankrate also aggregates rate information from over 4,800 institutions on more than 300 financial products. Its principal platform is its Bankrate.com Internet website.

3. During the relevant period, Bankrate had three primary divisions: (1) Bankrate Core, the original mortgage information business; (2) Bankrate Insurance, comprised of numerous insurance information companies acquired by Bankrate; and (3) Bankrate Credit Cards, comprised of a number of credit card information companies acquired by Bankrate.

4. Bankrate generates revenue by selling consumer information ("leads") gleaned from users of its websites in the insurance and credit cards vertical categories. Its other sources of revenue include display advertising, performance-based advertising, distribution arrangements, and traditional media avenues, such as syndication of editorial content and subscriptions. Some of its customers pay Bankrate each time that a consumer clicks through a link on Bankrate's website to the customer's website.

Bankrate's Manipulation Of Second Quarter 2012 Revenue and Expenses.

5. On July 6, 2012, after being provided with preliminary second quarter financial results for Bankrate Core and Credit Cards (the Insurance division's financial results had not yet been added to the consolidated numbers), DiMaria, unwilling to accept the company's second quarter 2012 financial results, informed Lerner that Adjusted EBITDA needed to be $37 million for the quarter.

6. On July 7, 2012, the first version of Bankrate's consolidated financial results was circulated to DiMaria, Lerner, and Gamsey, as well as others on the accounting team, reflecting current Adjusted EBITDA for the second quarter of $36,144,000, which DiMaria knew was below analyst consensus estimates.

7. Three days later, after realizing it had double-counted $286,000 of revenue, the Credit Cards division submitted revised financials for consolidation. The next day, DiMaria was informed that Bankrate's second quarter revenue had decreased by $286,000 due to the correction for the Credit Cards division's double-counting of revenue, further jeopardizing the company's prospects of meeting its metrics. Shortly thereafter, at DiMaria's instruction, Lerner emailed the Insurance and Credit Cards divisions directing them to book additional revenue of $300,000 and $500,000, respectively. Lerner's July 11, 2012 email instructions to both Credit Cards and Insurance, which were copied to DiMaria, did not specify a legitimate justification for the revenue, but rather contained an ambiguous description of what the revenue purportedly related to, and did not identify any specific customers with which it was associated.

8. Within a few minutes of sending these email instructions, Lerner forwarded the emails (and subsequent related emails) to Gamsey. In emails between themselves using strong expletives, Lerner and Gamsey expressed serious concerns about the validity of the revenue the divisions had just been directed to book and commiserated about the improper accounting entries directed by DiMaria. Their emails also stated that DiMaria's improper accounting entries would have to be reversed in the third quarter, thereby creating an even larger revenue shortfall and a need to record additional improper revenue in the third quarter.

Bankrate Insurance Records $300,000 in Baseless Revenue.

9. Without any support or analysis, the Insurance division immediately recorded the $300,000 of additional revenue directed by DiMaria, booking the revenue to a dormant customer account. Although the Insurance division did not have any intention of justifying the $300,000 of additional revenue, on July 16, 2012, five days after the revenue was booked, Bankrate's auditors asked for an explanation for the $300,000 as part of its accounts receivable variance review, thereby prompting Bankrate to quickly create a purported explanation for this revenue.

10. Within twenty-four hours of Bankrate's auditors asking about the $300,000 entry, the Insurance division, with the knowledge and/or involvement of DiMaria, Lerner, Gamsey, and others, prepared a draft chart purportedly supporting the $300,000 in revenue – a chart that was changed shortly thereafter. Tellingly, although this second chart changed the amounts of revenue assigned to certain categories and replaced certain initial explanations for the revenue with new purported explanations for the revenue, the second chart still totaled the $300,000 in revenue that DiMaria and Lerner had directed the Insurance division to book.

11. The purported explanations for the $300,000 in revenue were baseless. For example, in the second purported explanation for the $300,000 in revenue, $179,000 related to estimated June 2012 revenue from a brand new bonus provision with a customer of the Insurance division. However, as DiMaria, Gamsey, and Lerner knew, at the time this revenue was recognized, the Insurance division did not have any actual data from the customer indicating that a June bonus had been earned. In addition, both Gamsey and Lerner knew that the Insurance division was not performing at a level that would have triggered a bonus in the months leading up to June 2012. Similarly, DiMaria knew, or was reckless in not knowing, that a few weeks prior to the purported justification attributing $179,000 to this bonus, the Insurance division had estimated only a medium probability of a $30,000 bonus by August 2012. Indeed, the Insurance division employee who prepared the high-level, conclusory "support" for the bonus revenue advised Lerner at the time that she was not comfortable with the Insurance division recognizing revenue on the basis of this type of analysis in the future. When the actual data on which a potential bonus was based were later reported to the Insurance division, the Insurance division's performance did not qualify for a bonus. In fact, the Insurance division missed the bonus under the two applicable bonus formulas by approximately 50% and 200%, respectively.

12. For these reasons, among others, Bankrate's recognition of the $300,000 in revenue was contrary to GAAP.[3]

13. In addition, Bankrate did not share either of the purported explanations for the $300,000 in revenue with its auditor, despite the auditor specifically asking for information about the $300,000. Rather, at approximately the same time the initial chart attempting to explain the $300,000 entry was being circulated internally, Lerner sent a misleading, generic explanation that had been reviewed and approved by DiMaria and Gamsey to the auditor, implicitly affirming that the revenue was associated with the single customer account to which it was booked. Moreover, Bankrate did not forward either chart to its auditor, nor did Bankrate update its misleading, generic explanation for the $300,000 in revenue.

Credit Cards Does not Fully Comply with the Directive to Book Baseless Revenue, Causing Bankrate to Immediately and Arbitrarily Record Revenue to A Different Business Unit.

14. Unlike Insurance, the Credit Cards accountants initially refused to book the $500,000 of unsupported revenue directed by DiMaria. Unwilling to accept, and angered by, the Credit Cards accountants' reaction to his improper directive, DiMaria told other Bankrate personnel that he was "going to rip [the Credit Cards CEO's] f[***]ing head off" and fire the Credit Cards accountants if they "f[***] up the accounting."

15. Credit Cards personnel eventually recorded an additional $176,000 in revenue to the second quarter 2012, revenue that was contrary to Bankrate's revenue recognition policy. On July 12, 2012, upon learning that Credit Cards had only booked $176,000 of the $500,000 in additional revenue he had directed, DiMaria informed Lerner that the difference should be booked to Bankrate Core. Thirty-five minutes later, Lerner instructed the Bankrate Core accounting personnel to book $305,000 in additional revenue. Conveniently using two of the Core customers on a revenue spreadsheet that had legitimate revenue listed as $234,000 and $71,000, Bankrate Core simply doubled the revenue attributable to these customers without any basis to arrive at the $305,000 of additional revenue, a fact that soon became known to DiMaria, Lerner, and Gamsey.

16. By adding this improper revenue directly to the revenue spreadsheet rather than through a manual journal entry, Bankrate avoided the questions that its auditors typically directed toward post-quarter manual journal entries. This manner of booking the $305,000 also circumvented Bankrate's accounting controls, as the revenue spreadsheet had already been approved for entry into the general ledger and did not require additional approvals.

---

[3] The Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 605-10-25-1 provides that revenue may be properly recognized only when it is both a) realized or realizable and b) earned. See also Staff Accounting Bulletin Topic 13, *Revenue Recognition,* as codified in ASC 605-10-S99, which provides that revenue is generally realized or realizable and earned when all of the following criteria are met: 1) persuasive evidence of an arrangement exists; 2) delivery has occurred or services have been rendered; 3) the seller's price to the buyer is fixed or determinable; and 4) collectability is reasonably assured.

17. In approximately September 2012, after learning of the staff's investigation in this matter, DiMaria for the first time attributed the $305,000 revenue item to an alleged contractual dispute with an Insurance customer. After DiMaria offered this justification, the $305,000 of previously unexplained revenue was transferred from Bankrate Core's books to the Insurance division's books.

18. Notwithstanding DiMaria's retroactive justification of the $305,000, the alleged contractual dispute with the Insurance customer had been resolved by June 2012. In fact, in August 2012, Bankrate confirmed with the customer that the only outstanding money owed by the customer was for June and July 2012 invoices.

19. For these reasons, among others, the recognition of both the $176,000 in revenue booked with the Credit Cards division and the $305,000 in revenue booked with Bankrate Core was contrary to GAAP.

<u>Bankrate Makes Additional Baseless Reductions In Marketing Expense Accrual.</u>

20. On July 13, 2012, the day after Bankrate improperly recorded $305,000 of additional revenue on Bankrate Core's books, a revised version of Bankrate's consolidated financial results for the second quarter 2012 was circulated to DiMaria, Lerner, and Gamsey that reflected Adjusted EBITDA of $36,656,000.

21. Shortly after the circulation of the revised financial results, results that continued to fall short of the $37 million in Adjusted EBITDA dictated by DiMaria one week earlier, DiMaria directed a Core accountant to reduce a marketing accrual account for Search Engine Marketing (known as "SEM") by $400,000. Reducing the SEM accrual (a balance sheet account) led to a corresponding reduction in the SEM expense (an income statement account), thereby artificially increasing Bankrate's quarterly earnings.

22. DiMaria's email instruction to the Core accountant did not reference or contain any support for the accounting entry. Similarly, the manual journal entry executing DiMaria's instruction to reduce the SEM marketing accrual by $400,000 did not have any support beyond DiMaria's email instruction.

23. Upon learning of this $400,000 reduction in the SEM accrual, Gamsey questioned Lerner as to whether there was any basis for DiMaria's reduction in the SEM accrual, or whether DiMaria directed this entry instead of additional unsupported revenue entries.

24. In fact, Bankrate had been using the SEM accrual account as one of its "cushion" or "cookie jar reserve" accounts (i.e., an account known to have excess accruals that could be selectively used to boost the financial results of particular quarters) since at least early 2011. It was inappropriate for Bankrate to use the SEM account as a "cushion" account, and to reduce the SEM accrual without a proper basis, in order to meet the Adjusted EBITDA number being dictated by DiMaria.

25. Following the booking of this $400,000 reduction in the SEM accrual, a revised version of Bankrate's second quarter 2012 financial results was circulated to DiMaria, Lerner, and Gamsey, reflecting Adjusted EBITDA of $37,056,000.

Bankrate Fails to Book Additional Second Quarter Expenses.

26. The baseless accounting entries detailed above were not the only steps in Bankrate's scheme to meet analyst estimates. On July 6, 2012 – indeed, within a few hours of being told by DiMaria that second quarter Adjusted EBITDA needed to be $37 million – Lerner instructed Bankrate Core to reverse certain second quarter accounting fees associated with Bankrate's Sarbanes-Oxley compliance provider. This instruction was made without any basis.

27. After realizing that accounting fees incurred in the second quarter had not yet been recorded, Lerner, instead of reversing these fees, decided not to record the proper amount of fees to the second quarter, but to instead record those fees to the third quarter. As a result, Bankrate improperly failed to book at least $99,000 in known accounting fees that were incurred during the second quarter.

Bankrate's Reported Financial Results Met And/Or Exceeded Analyst Consensus Estimates.

28. As a result of its improper entries as described above, Bankrate released artificially inflated financial results on July 31, 2012, and just met analyst targets. Analyst consensus estimates for Bankrate's second quarter 2012 financial results were $37.2 million for Adjusted EBITDA and $0.18 for Adjusted EPS. In its July 31, 2012 earnings release, which was incorporated in a Form 8-K filed by Bankrate on the same date, Bankrate reported second quarter 2012 Adjusted EBITDA of $37.5 million and Adjusted EPS of $0.18. The above-described improper entries were therefore material, as they allowed Bankrate to meet and/or exceed analyst consensus estimates for these key financial metrics. Due to the improper entries, Bankrate also materially misstated its reported net income in its second quarter 2012 Form 10-Q, filed on August 13, 2012.

29. The day after Bankrate's announcement of its financial results for the second quarter 2012 on July 31, 2012, Bankrate's stock price rose from $15.95 to $17.57 per share. Both DiMaria and Lerner sold Bankrate stock during the two-week period following the announcement of Bankrate's second quarter 2012 financial results, a period during which Bankrate's stock price was artificially inflated as a result of Bankrate's scheme to inflate its financial results.

VIOLATIONS

30. As a result of the conduct described above, Bankrate violated Section 17(a) of the Securities Act, which prohibits fraudulent conduct in the offer or sale of securities, and Section 10(b) of the Exchange Act and Rule 10b-5 thereunder, which prohibit fraudulent conduct in connection with the purchase or sale of securities.

31. Also as a result of the conduct described above, Bankrate violated Section 13(a) of the Exchange Act and Rules 13a-11, 13a-13, and 12b-20 thereunder, which require that every issuer of a security registered pursuant to Section 12 of the Exchange Act file with the

Commission, among other things, information, documents, quarterly reports, and current reports as the Commission may require, and mandate that periodic reports contain such further material information as may be necessary to make the required statements not misleading.

32. Because Bankrate improperly recorded its revenue, expenses, and accruals, its books, records, and accounts did not, in reasonable detail, accurately and fairly reflect its transactions and dispositions of assets.

33. In addition, Bankrate failed to implement internal accounting controls relating to its revenue, expense, and accrual accounts which were sufficient to provide reasonable assurances that these accounts were accurately stated in accordance with GAAP.

34. As a result of the conduct described above, Bankrate violated Sections 13(b)(2)(A) and 13(b)(2)(B) of the Exchange Act, which require reporting companies to make and keep books, records and accounts which, in reasonable detail, accurately and fairly reflect their transactions and dispositions of their assets, and to devise and maintain a system of internal accounting controls sufficient to provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP.

Bankrate's Remedial Efforts

In determining to accept Bankrate's Offer, the Commission considered remedial acts undertaken by Bankrate.

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent Bankrate's Offer.

Accordingly, it is hereby ORDERED that:

A. Pursuant to Section 8A of the Securities Act and Section 21C of the Exchange Act, Respondent Bankrate cease and desist from committing or causing any violations and any future violations of Section 17(a) of the Securities Act and Sections 10(b), 13(a), 13(b)(2)(A), and 13(b)(2)(B) of the Exchange Act, and Rules 10b-5, 12b-20, 13a-11, and 13a-13 thereunder.

B. Respondent Bankrate shall, within 14 days of the entry of this Order, pay a civil money penalty in the amount of $15,000,000 to the Securities and Exchange Commission. The Commission may distribute civil money penalties collected in this proceeding if, in its discretion, the Commission orders the establishment of a Fair Fund pursuant to 15 U.S.C. § 7246, Section 308(a) of the Sarbanes-Oxley Act of 2002, as amended. The Commission will hold funds paid pursuant to this paragraph in an account at the United States Treasury pending a decision whether the Commission, in its discretion, will seek to distribute funds or, subject to Exchange Act Section 21F(g)(3), transfer them to the general fund of the United States Treasury. If timely payment is not made, additional interest shall accrue pursuant to 31 U.S.C. §3717. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Bankrate as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Ian Karpel, Assistant Regional Director, Division of Enforcement, Securities and Exchange Commission, 1961 Stout Street, Denver, CO 80294-1961.

C. Regardless of whether the Commission in its discretion orders the creation of a Fair Fund for the penalties ordered in this proceeding, amounts ordered to be paid as civil money penalties pursuant to this Order shall be treated as penalties paid to the government for all purposes, including all tax purposes. To preserve the deterrent effect of the civil penalty, Respondent agrees that in any Related Investor Action, it shall not argue that it is entitled to, nor shall it benefit by, offset or reduction of any award of compensatory damages by the amount of any part of Respondent's payment of a civil penalty in this action ("Penalty Offset"). If the court in any Related Investor Action grants such a Penalty Offset, Respondent agrees that it shall, within 30 days after entry of a final order granting the Penalty Offset, notify the Commission's counsel in this action and pay the amount of the Penalty Offset to the Securities and Exchange Commission. Such a payment shall not be deemed an additional civil penalty and shall not be deemed to change the amount of the civil penalty imposed in this proceeding. For purposes of this paragraph, a "Related Investor Action" means a private damages action brought against Respondent by or on behalf of one or more investors based on substantially the same facts as alleged in the Order instituted by the Commission in this proceeding.

By the Commission.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75850 / September 8, 2015

ACCOUNTING AND AUDITING ENFORCEMENT
Release No. 3684 / September 8, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16787

In the Matter of **HYUNJIN LERNER, CPA,** **Respondent.**	**ORDER INSTITUTING PUBLIC ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933, SECTIONS 4C AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934, AND RULE 102(e) OF THE COMMISSION'S RULES OF PRACTICE, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that public administrative and cease-and-desist proceedings be, and hereby are, instituted against Hyunjin Lerner ("Respondent" or "Lerner") pursuant to Section 8A of the Securities Act of 1933 ("Securities Act"), Sections 4C[1] and 21C of the Securities Exchange Act of 1934 ("Exchange Act") and Rule 102(e)(1)(iii) of the Commission's Rules of Practice.[2]

[1] Section 4C provides, in relevant part, that:

> The Commission may censure any person, or deny, temporarily or permanently, to any person the privilege of appearing or practicing before the Commission in any way, if that person is found . . . (1) not to possess the requisite qualifications

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, Respondent consents to the entry of this Order Instituting Public Administrative and Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933, Sections 4C and 21C of the Securities Exchange Act of 1934, and Rule 102(e) of the Commission's Rules of Practice, Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[3] that:

SUMMARY

This proceeding results from Bankrate, Inc., through its chief financial officer, Edward DiMaria, vice president and director of accounting, Matthew Gamsey, and vice president of finance, Hyunjin Lerner, intentionally manipulating its financial results for the second quarter of 2012 in order to meet and/or exceed analyst consensus estimates for key financial metrics. As a result of this manipulation, Bankrate materially overstated its financial results for the second quarter of 2012.

> to represent others . . . (2) to be lacking in character or integrity, or to have engaged in unethical or improper professional conduct; or (3) to have willfully violated, or willfully aided and abetted the violation of, any provision of the securities laws or the rules and regulations thereunder.

[2] Rule 102(e)(1)(iii) provides, in pertinent part, that:

> The Commission may . . . deny, temporarily or permanently, the privilege of appearing or practicing before it . . . to any person who is found...to have willfully violated, or willfully aided and abetted the violation of any provision of the Federal securities laws or the rules and regulations thereunder.

[3] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

After reviewing Bankrate's preliminary financial results for the second quarter 2012, which fell short of analyst estimates for certain key metrics, DiMaria arbitrarily decided to increase Bankrate's revenue following the end of the quarter in order to meet those metrics. As a result, DiMaria, through Lerner, improperly directed two Bankrate divisions, the Insurance and Credit Cards divisions, to book additional revenue of $300,000 and $500,000, respectively, without any support or analysis.

The Insurance division immediately booked the $300,000 of revenue directed by DiMaria to a dormant customer account, with no intention of justifying the revenue until the company's outside auditor asked for additional information about it five days later. In response to the auditor's inquiry, the Insurance division quickly devised a purported justification for the improperly booked revenue – a justification that changed shortly thereafter. These purported justifications were not, however, provided to Bankrate's auditor. Instead, Lerner sent a misleading, generic explanation to the auditor – an explanation that was reviewed and approved by DiMaria and Gamsey. Further, although the Insurance division's ultimate justification was reviewed and approved by Lerner and others, Lerner knew, or was reckless in not knowing, that the purported justification did not support the recognition of revenue under Generally Accepted Accounting Principles ("GAAP").

The accountants from the Credit Cards division were only willing to record $176,000 of the $500,000 in revenue directed by DiMaria, thereby infuriating DiMaria. Refusing to accept the Credit Cards division's unwillingness to record the full $500,000 of revenue he had directed, DiMaria insisted that the approximate difference be recorded as revenue on the books of Bankrate's mortgage business, Bankrate Core. As a result, Bankrate recorded an additional $305,000 of unsupported revenue to two arbitrary Bankrate Core customers. Bankrate's recording of both the $176,000 and the $305,000 in revenue was contrary to GAAP.

Further manipulating Bankrate's financial results for the second quarter, DiMaria, without any support or analysis, improperly directed a Bankrate Core accountant to reduce the accrual for certain marketing expenses by $400,000, which was known to Lerner. Bankrate, through DiMaria and with Lerner's knowledge, had been allowing this marketing accrual account to accrue as a "cushion" account for more than a year, and then selectively decided to reduce the accrual in the second quarter of 2012 in order to improve the company's financial results. In the second quarter 2012, DiMaria improperly reversed $400,000 of the accrual amount, thereby reducing second quarter expenses, to help Bankrate meet analyst estimates. Finally, as part of its effort to artificially inflate its financial results to meet or exceed analyst estimates for the second quarter 2012, Bankrate, through Lerner and others, intentionally failed to book approximately $99,000 in known accounting expenses that had been incurred in the second quarter.

As a result of these improper accounting entries, entries that the company reversed as part of a broader restatement, Bankrate's second quarter 2012 earnings release and associated Form 8-K, filed on July 31, 2012, reported adjusted earnings before interest, taxes, depreciation, and amortization ("Adjusted EBITDA") of $37.5 million, exceeding analyst consensus estimates by approximately $300,000, and adjusted earnings per share ("Adjusted EPS") of $0.18, thereby meeting analyst consensus estimates.[4] Further, due to these improper accounting entries, Bankrate materially overstated its second quarter 2012 net income reported in its Form 10-Q filed on August 13, 2012. During the two week period following the issuance of Bankrate's second quarter 2012 earnings release, DiMaria and Lerner each sold Bankrate stock, thereby profiting from a stock price that had been artificially inflated by the company's materially overstated financial results.

RESPONDENT

1. **Hyunjin Lerner**, age 46, is a resident of Stuart, Florida. During the relevant period, Lerner was Bankrate's vice president of finance. Lerner obtained his certified public accountant license in California in 1996, but his license is currently delinquent. Lerner, whose employment was terminated by Bankrate due to the improper accounting practices described herein, sold $30,045 worth of Bankrate stock on August 6, 2012, six days after Bankrate issued its materially false second quarter 2012 earnings release.

OTHER RELEVANT ENTITY

2. **Bankrate, Inc.** is a Delaware corporation based in North Palm Beach, Florida, that owns and operates an Internet-based consumer banking and personal finance network. Bankrate's common stock is registered with the Commission pursuant to Exchange Act Section 12(b) and trades on the New York Stock Exchange (ticker: RATE). Bankrate files periodic reports, including Forms 10-K, 10-Q, and 8-K, with the Commission pursuant to Section 13(a) of the Exchange Act and the related rules thereunder. On June 17, 2011, Bankrate filed an S-8 registration statement for an offering relating to its equity compensation plan. This offering, which was ongoing at the time of the misconduct described herein, incorporated future company filings with the Commission, including the Form 8-K containing the company's materially false second quarter 2012 earnings release and the second quarter 2012 Form 10-Q that materially overstated the company's net income.

FACTS

<u>Bankrate's Business And Structure.</u>

3. Bankrate is engaged in the business of providing consumers with personal finance information across multiple vertical categories including mortgages, deposits, insurance, credit cards, and other categories, such as retirement, automobile loans, and taxes. Bankrate also aggregates rate information from over 4,800 institutions on more than 300 financial products. Its principal platform is its Bankrate.com Internet website.

---

[4] Bankrate defines Adjusted EBITDA as earnings before interest, taxes, depreciation and amortization, excluding stock based compensation expense and IPO and deal related expenses, and defines Adjusted EPS as earnings per fully diluted share, excluding stock based compensation expense, amortization, IPO and deal related expenses.

4. During the relevant period, Bankrate had three primary divisions: (1) Bankrate Core, the original mortgage information business; (2) Bankrate Insurance, comprised of numerous insurance information companies acquired by Bankrate; and (3) Bankrate Credit Cards, comprised of a number of credit card information companies acquired by Bankrate.

5. Bankrate generates revenue by selling consumer information ("leads") gleaned from users of its websites in the insurance and credit cards vertical categories. Its other sources of revenue include display advertising, performance-based advertising, distribution arrangements, and traditional media avenues, such as syndication of editorial content and subscriptions. Some of its customers pay Bankrate each time that a consumer clicks through a link on Bankrate's website to the customer's website.

Bankrate's Manipulation Of Second Quarter 2012 Revenue And Expenses.

6. On July 6, 2012, after being provided with preliminary second quarter financial results for Bankrate Core and Credit Cards (the Insurance division's financial results had not yet been added to the consolidated numbers), DiMaria, unwilling to accept the company's second quarter 2012 financial results, informed Lerner that Adjusted EBITDA needed to be $37 million for the quarter.

7. On July 7, 2012, the first version of Bankrate's consolidated financial results was circulated to DiMaria, Lerner, and Gamsey, as well as others on the accounting team, reflecting current Adjusted EBITDA for the second quarter of $36,144,000, which DiMaria knew was below analyst consensus estimates.

8. Three days later, after realizing it had double-counted $286,000 of revenue, the Credit Cards division submitted revised financials for consolidation. The next day, DiMaria was informed that Bankrate's second quarter revenue had decreased by $286,000 due to the correction for the Credit Cards division's double-counting of revenue, further jeopardizing the company's prospects of meeting its metrics. Shortly thereafter, at DiMaria's instruction, Lerner emailed the Insurance and Credit Cards divisions directing them to book additional revenue of $300,000 and $500,000, respectively. Lerner's July 11, 2012 email instructions to both Credit Cards and Insurance, which were copied to DiMaria, did not specify a legitimate justification for the revenue, but rather contained an ambiguous description of what the revenue purportedly related to, and did not identify any specific customers with which it was associated.

9. Within a few minutes of sending these email instructions, Lerner forwarded the emails (and subsequent related emails) to Gamsey. In emails between themselves using strong expletives, Lerner and Gamsey expressed serious concerns about the validity of the revenue the divisions had just been directed to book and commiserated about the improper accounting entries directed by DiMaria. Their emails also stated that DiMaria's improper accounting entries would have to be reversed in the third quarter, thereby creating an even larger revenue shortfall and a need to record additional improper revenue in the third quarter.

<u>Bankrate Insurance Records $300,000 in Baseless Revenue.</u>

10. Without any support or analysis, the Insurance division immediately recorded the $300,000 of additional revenue directed by DiMaria, booking the revenue to a dormant customer account. Although the Insurance division did not have any intention of justifying the $300,000 of additional revenue, on July 16, 2012, five days after the revenue was booked, Bankrate's auditors asked for an explanation for the $300,000 as part of its accounts receivable variance review, thereby prompting Bankrate to quickly create a purported explanation for this revenue.

11. Within twenty-four hours of Bankrate's auditors asking about the $300,000 entry, the Insurance division, with the knowledge and/or involvement of DiMaria, Lerner, Gamsey, and others, prepared a draft chart purportedly supporting the $300,000 in revenue – a chart that was changed shortly thereafter. Tellingly, although this second chart changed the amounts of revenue assigned to certain categories and replaced certain initial explanations for the revenue with new purported explanations for the revenue, the second chart still totaled the $300,000 in revenue that DiMaria and Lerner had directed the Insurance division to book.

12. The purported explanations for the $300,000 in revenue were baseless. For example, in the second purported explanation for the $300,000 in revenue, $179,000 related to estimated June 2012 revenue from a brand new bonus provision with a customer of the Insurance division. However, as DiMaria, Gamsey, and Lerner knew, at the time this revenue was recognized, the Insurance division did not have any actual data from the customer indicating that a June bonus had been earned. In addition, both Gamsey and Lerner knew that the Insurance division was not performing at a level that would have triggered a bonus in the months leading up to June 2012. Indeed, the Insurance division employee who prepared the high-level, conclusory "support" for the bonus revenue advised Lerner at the time that she was not comfortable with the Insurance division recognizing revenue on the basis of this type of analysis in the future. When the actual data on which a potential bonus was based were later reported to the Insurance division, the Insurance division's performance did not qualify for a bonus. In fact, the Insurance division missed the bonus under the two applicable bonus formulas by approximately 50% and 200%, respectively.

13. For these reasons, among others, Bankrate's recognition of the $300,000 in revenue was contrary to GAAP.[5]

---

[5] The Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 605-10-25-1 provides that revenue may be properly recognized only when it is both a) realized or realizable and b) earned. <u>See also</u> Staff Accounting Bulletin Topic 13, *Revenue Recognition,* as codified in ASC 605-10-S99, which provides that revenue is generally realized or realizable and earned when all of the following criteria are met: 1) persuasive evidence of an arrangement exists; 2) delivery has occurred or services have been rendered; 3) the seller's price to the buyer is fixed or determinable; and 4) collectability is reasonably assured.

14. In addition, Bankrate did not share either of the purported explanations for the $300,000 in revenue with its auditor, despite the auditor specifically asking for information about the $300,000. Rather, at approximately the same time the initial chart attempting to explain the $300,000 entry was being circulated internally, Lerner sent a misleading, generic explanation that had been reviewed and approved by DiMaria and Gamsey to the auditor, implicitly affirming that the revenue was associated with the single customer account to which it was booked. Moreover, Bankrate did not forward either chart to its auditor, nor did Bankrate update its misleading, generic explanation for the $300,000 in revenue.

Credit Cards Does not Fully Comply with the Directive to Book Baseless Revenue, Causing Bankrate to Immediately and Arbitrarily Record Revenue to A Different Business Unit.

15. Unlike Insurance, the Credit Cards accountants initially refused to book the $500,000 of unsupported revenue directed by DiMaria. Unwilling to accept, and angered by, the Credit Cards accountants' reaction to his improper directive, DiMaria told other Bankrate personnel that he was "going to rip [the Credit Cards CEO's] f[***]ing head off" and fire the Credit Cards accountants if they "f[***] up the accounting."

16. Credit Cards personnel eventually recorded an additional $176,000 in revenue to the second quarter 2012, revenue that was contrary to Bankrate's revenue recognition policy. On July 12, 2012, upon learning that Credit Cards had only booked $176,000 of the $500,000 in additional revenue he had directed, DiMaria informed Lerner that the difference should be booked to Bankrate Core. Thirty-five minutes later, Lerner instructed the Bankrate Core accounting personnel to book $305,000 in additional revenue. Conveniently using two of the Core customers on a revenue spreadsheet that had legitimate revenue listed as $234,000 and $71,000, Bankrate Core simply doubled the revenue attributable to these customers without any basis to arrive at the $305,000 of additional revenue, a fact that soon became known to DiMaria, Lerner, and Gamsey.

17. By adding this improper revenue directly to the revenue spreadsheet rather than through a manual journal entry, Bankrate avoided the questions that its auditors typically directed toward post-quarter manual journal entries. This manner of booking the $305,000 also circumvented Bankrate's accounting controls, as the revenue spreadsheet had already been approved for entry into the general ledger and did not require additional approvals.

18. For these reasons, among others, the recognition of both the $176,000 in revenue booked with the Credit Cards division and the $305,000 in revenue booked with Bankrate Core was contrary to GAAP.

Bankrate Makes Additional Baseless Reductions In Marketing Expense Accrual.

19. On July 13, 2012, the day after Bankrate improperly recorded $305,000 of additional revenue on Bankrate Core's books, a revised version of Bankrate's consolidated financial results for the second quarter 2012 was circulated to DiMaria, Lerner, and Gamsey that reflected Adjusted EBITDA of $36,656,000.

20. Shortly after the circulation of the revised financial results, results that continued to fall short of the $37 million in Adjusted EBITDA dictated by DiMaria one week earlier, DiMaria directed a Core accountant to reduce a marketing accrual account for Search Engine Marketing (known as "SEM") by $400,000. Reducing the SEM accrual (a balance sheet account) led to a corresponding reduction in the SEM expense (an income statement account), thereby artificially increasing Bankrate's quarterly earnings.

21. DiMaria's email instruction to the Core accountant did not reference or contain any support for the accounting entry. Similarly, the manual journal entry executing DiMaria's instruction to reduce the SEM marketing accrual by $400,000 did not have any support beyond DiMaria's email instruction.

22. Upon learning of this $400,000 reduction in the SEM accrual, Gamsey questioned Lerner as to whether there was any basis for DiMaria's reduction in the SEM accrual, or whether DiMaria directed this entry instead of additional unsupported revenue entries.

23. In fact, Bankrate, through DiMaria and Lerner, had been using the SEM accrual account as one of its "cushion" or "cookie jar reserve" accounts (i.e., an account known to have excess accruals that could be selectively used to boost the financial results of particular quarters) since at least early 2011. It was inappropriate for Bankrate to use the SEM account as a "cushion" account, and to reduce the SEM accrual without a proper basis, in order to meet the Adjusted EBITDA number being dictated by DiMaria.

24. Given these circumstances, Lerner knew, or was reckless in not knowing, that the $400,000 SEM adjustment was improper.

25. Following the booking of this $400,000 reduction in the SEM accrual, a revised version of Bankrate's second quarter 2012 financial results was circulated to DiMaria, Lerner, and Gamsey, reflecting Adjusted EBITDA of $37,056,000.

Bankrate Fails to Book Additional Second Quarter Expenses.

26. The baseless accounting entries detailed above were not the only steps in Bankrate's scheme to meet analyst estimates. On July 6, 2012 – indeed, within a few hours of being told by DiMaria that second quarter Adjusted EBITDA needed to be $37 million – Lerner instructed Bankrate Core to reverse certain second quarter accounting fees associated with Bankrate's Sarbanes-Oxley compliance provider. This instruction was made without any basis.

27. After realizing that accounting fees incurred in the second quarter had not yet been recorded, Lerner, instead of reversing these fees, decided not to record the proper amount of fees to the second quarter, but to instead record those fees to the third quarter. As a result, Bankrate improperly failed to book at least $99,000 in known accounting fees that were incurred during the second quarter.

Lerner, Together with DiMaria and Gamsey, Made Material Misrepresentations and Omissions to Bankrate's Auditor Concerning the Improper Accounting Entries in the Second Quarter 2012.

28. As set forth in paragraph 14 above, Lerner, after receiving approval from DiMaria and Gamsey, provided Bankrate's auditor with a generic and misleading explanation for the $300,000 in improper revenue booked by the Insurance division, and took no steps to advise the auditor that Bankrate's explanation for this revenue later changed significantly.

29. In addition, Lerner and others again made material misrepresentations and omissions to Bankrate's auditor in the August 13, 2012 management representation letter that he (and others) signed for the second quarter 2012. Although Lerner knew about the improper accounting practices taking place at the company, he falsely represented to the company's auditor that: 1) the company's financial statements had been prepared and were fairly presented in conformity with GAAP; 2) there were no material transactions that had not been properly recorded in the company's accounting records; and 3) he had no knowledge of fraud or suspected fraud affecting the company involving management, employees with significant internal control roles, or others where the fraud could materially affect the company's financial statements.

Bankrate's Reported Financial Results Met And/Or Exceeded Analyst Consensus Estimates.

30. As a result of its improper entries as described above, Bankrate released artificially inflated financial results on July 31, 2012, and just met analyst targets. Analyst consensus estimates for Bankrate's second quarter 2012 financial results were $37.2 million for Adjusted EBITDA and $0.18 for Adjusted EPS. In its July 31, 2012 earnings release, which was incorporated in a Form 8-K filed by Bankrate on the same date, Bankrate reported second quarter 2012 Adjusted EBITDA of $37.5 million and Adjusted EPS of $0.18. The above-described improper entries were therefore material, as they allowed Bankrate to meet and/or exceed analyst consensus estimates for these key financial metrics. Due to the improper entries, Bankrate also materially misstated its reported net income in its second quarter 2012 Form 10-Q, filed on August 13, 2012.

31. The day after Bankrate's announcement of its financial results for the second quarter 2012 on July 31, 2012, Bankrate's stock price rose from $15.95 to $17.57 per share. Lerner sold Bankrate stock during a one-week period following the announcement of Bankrate's second quarter 2012 financial results, a period during which Bankrate's stock price was artificially inflated as a result of Bankrate's scheme to inflate its financial results.

32. At the time Lerner sold Bankrate stock on August 6, 2012, he was in possession of material, nonpublic information concerning Bankrate's reported second quarter financial results (*i.e.*, that Bankrate had overstated its financial results as a result of the improper accounting entries described herein). As a result of these stock sales, Lerner improperly benefited by as much as $30,045.

VIOLATIONS

33. As a result of the conduct described above, Lerner willfully[6] violated Section 17(a) of the Securities Act, which prohibits fraudulent conduct in the offer or sale of securities, and Section 10(b) of the Exchange Act and Rule 10b-5 thereunder, which prohibit fraudulent conduct in connection with the purchase or sale of securities.

34. As a result of the conduct described above, Lerner also willfully violated Section 13(b)(5) of the Exchange Act and Rule 13b2-1 thereunder, which prohibit persons from knowingly circumventing or knowingly failing to implement a system of internal accounting controls, knowingly falsifying any book, record or account, and directly or indirectly falsifying or causing to be falsified any book, record, or account.

35. In addition, as a result of the conduct described above, Lerner willfully violated Rule 13b2-2 of the Exchange Act, which prohibits an officer or director of an issuer from, directly or indirectly: (1) making or causing to be made a materially false or misleading statement to an accountant or (2) omitting to state, or causing another person to omit to state, any material fact necessary in order to make statements made, in light of the circumstances under which such statements were made, not misleading, to an accountant in connection with, among other things, a required audit, review or examination of the issuer's financial statements or the preparation or filing of any document or report required to be filed with the Commission.

36. Also as a result of the conduct described above, Lerner willfully aided and abetted and caused Bankrate's violation of Section 13(a) of the Exchange Act and Rules 13a-11, 13a-13, and 12b-20 thereunder, which require that every issuer of a security registered pursuant to Section 12 of the Exchange Act file with the Commission, among other things, information, documents, quarterly reports, and current reports as the Commission may require, and mandate that periodic reports contain such further material information as may be necessary to make the required statements not misleading.

37. Because Bankrate improperly recorded its revenue, expenses, and accruals, its books, records, and accounts did not, in reasonable detail, accurately and fairly reflect its transactions and dispositions of assets.

38. In addition, Bankrate failed to implement internal accounting controls relating to its revenue, expense, and accrual accounts which were sufficient to provide reasonable assurances that these accounts were accurately stated in accordance with GAAP.

39. As a result of the conduct described above, Lerner willfully aided and abetted and caused Bankrate's violation of Sections 13(b)(2)(A) and 13(b)(2)(B) of the Exchange Act, which

[6] A willful violation of the securities laws means merely "'that the person charged with the duty knows what he is doing.'" Wonsover v. SEC, 205 F.3d 408, 414 (D.C. Cir. 2000) (quoting Hughes v. SEC, 174 F.2d 969, 977 (D.C. Cir. 1949)).

require reporting companies to make and keep books, records and accounts which, in reasonable detail, accurately and fairly reflect their transactions and dispositions of their assets, and to devise and maintain a system of internal accounting controls sufficient to provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP.

40. Exchange Act Section 4C(a)(3) and Rule 102(e)(1)(iii) of the Commission's Rules of Practice provide, in pertinent part, that "[t]he Commission may censure a person or deny, temporarily or permanently, the privilege of appearing or practicing before it in any way to any person who is found . . . [t]o have willfully violated, or willfully aided and abetted the violation of, any provision of the Federal securities laws or the rules and regulations thereunder." 17 C.F.R. § 201.102(e)(1)(iii). As a result of the conduct described above, Lerner willfully violated, and willfully aided and abetted the violation of, the aforementioned provisions of the Securities Act and Exchange Act within the meaning of Section 4C(a)(3) and Rule 102(e)(1)(iii).

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent Lerner's Offer.

Accordingly, pursuant to Section 8A of the Securities Act, Sections 4C and 21C of the Exchange Act, and Rule 102(e)(1)(iii) of the Commission's Rules of Practice it is hereby ORDERED that:

A. Respondent Lerner cease and desist from committing or causing any violations and any future violations of Section 17(a) of the Securities Act and Sections 10(b), 13(a), 13(b)(2)(A), 13(b)(2)(B), and 13(b)(5) of the Exchange Act, and Rules 10b-5, 12b-20, 13a-11, 13a-13, 13b2-1, and 13b2-2 thereunder.

B. Respondent Lerner is denied the privilege of appearing or practicing before the Commission as an accountant.

C. After 5 years from the date of this Order, Respondent may request that the Commission consider his reinstatement by submitting an application (Attention: Office of the Chief Accountant) to resume appearing or practicing before the Commission as:

1. a preparer or reviewer, or a person responsible for the preparation or review, of any public company's financial statements that are filed with the Commission. Such an application must satisfy the Commission that Respondent's work in his practice before the Commission will be reviewed either by the independent audit committee of the public company for which he works or in some other acceptable manner, as long as he practices before the Commission in this capacity; and/or

2. an independent accountant. Such an application must satisfy the Commission that:

(a) Respondent, or the public accounting firm with which he is associated, is registered with the Public Company Accounting Oversight Board ("Board") in accordance with the Sarbanes-Oxley Act of 2002, and such registration continues to be effective;

(b) Respondent, or the registered public accounting firm with which he is associated, has been inspected by the Board and that inspection did not identify any criticisms of or potential defects in the respondent's or the firm's quality control system that would indicate that the respondent will not receive appropriate supervision;

(c) Respondent has resolved all disciplinary issues with the Board, and has complied with all terms and conditions of any sanctions imposed by the Board (other than reinstatement by the Commission); and

(d) Respondent acknowledges his responsibility, as long as Respondent appears or practices before the Commission as an independent accountant, to comply with all requirements of the Commission and the Board, including, but not limited to, all requirements relating to registration, inspections, concurring partner reviews and quality control standards.

D. The Commission will consider an application by Respondent to resume appearing or practicing before the Commission provided that his state CPA license is current and he has resolved all other disciplinary issues with the applicable state boards of accountancy. However, if state licensure is dependent on reinstatement by the Commission, the Commission will consider an application on its other merits. The Commission's review may include consideration of, in addition to the matters referenced above, any other matters relating to Respondent's character, integrity, professional conduct, or qualifications to appear or practice before the Commission.

E. Respondent Lerner is prohibited for a period of 5 years from the date of this Order from acting as an officer or director of any issuer that has a class of securities registered pursuant to Section 12 of the Exchange Act or that is required to file reports pursuant to Section 15(d) of the Exchange Act.

F. Respondent Lerner shall, within 14 days of the entry of this Order, pay a civil money penalty in the amount of $150,000 and disgorgement of $30,045 and prejudgment interest of $2,571 to the Securities and Exchange Commission. The Commission will hold funds paid pursuant to this paragraph in an account at the United States Treasury pending a decision whether the Commission, in its discretion, will seek to distribute funds or, subject to Section 21F(g)(3), transfer them to the general fund of the United States Treasury. The Commission may distribute civil money penalties collected in this proceeding if, in its discretion, the Commission orders the establishment of a Fair Fund pursuant to 15 U.S.C. § 7246, Section 308(a) of the Sarbanes-Oxley Act of 2002, as amended. If timely payment is not made, additional interest shall accrue pursuant to Rule 600 of the Commission's Rules of Practice or 31 U.S.C. §3717, as applicable. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Lerner as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Ian Karpel, Assistant Regional Director, Division of Enforcement, Securities and Exchange Commission, 1961 Stout Street, Denver, CO 80294-1961.

G. Regardless of whether the Commission in its discretion orders the creation of a Fair Fund for the penalties ordered in this proceeding, amounts ordered to be paid as civil money penalties pursuant to this Order shall be treated as penalties paid to the government for all purposes, including all tax purposes. To preserve the deterrent effect of the civil penalty, Respondent agrees that in any Related Investor Action, he shall not argue that he is entitled to, nor shall he benefit by, offset or reduction of any award of compensatory damages by the amount of any part of Respondent's payment of a civil penalty in this action ("Penalty Offset"). If the court in any Related Investor Action grants such a Penalty Offset, Respondent agrees that he shall, within 30 days after entry of a final order granting the Penalty Offset, notify the Commission's counsel in this action and pay the amount of the Penalty Offset to the Securities and Exchange Commission. Such a payment shall not be deemed an additional civil penalty and shall not be deemed to change the amount of the civil penalty imposed in this proceeding. For purposes of this paragraph, a "Related Investor Action" means a private damages action brought against

Respondent by or on behalf of one or more investors based on substantially the same facts as alleged in the Order instituted by the Commission in this proceeding.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

By the Commission.

Brent J. Fields

SECURITIES AND EXCHANGE COMMISSION

SECURITIES ACT OF 1933
Release No. 9903 / September 8, 2015

SECURITIES EXCHANGE ACT OF 1934
Release No. 75851 / September 8, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16788

In the Matter of

MusclePharm Corporation,

Respondent.

ORDER INSTITUTING CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933 AND SECTION 21C OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING A CEASE-AND-DESIST ORDER

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 8A of the Securities Act of 1933 ("Securities Act") and Section 21C of the Securities Exchange Act of 1934 ("Exchange Act"), against MusclePharm Corporation ("MSLP" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over it and the subject matter of these proceedings, which are admitted, Respondent consents to the entry of this Order Instituting Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933 and Section 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

Summary

MSLP is a Denver-based sports nutrition company that develops, manufactures, and markets sports nutrition products. When MSLP became a public company in 2010, it was unprepared for the Commission's reporting requirements and lacked sufficient infrastructure to support its rapid growth. MSLP's revenues greatly increased each year (MSLP's reported revenue was $3M in 2010, $17M in 2011, $67M in 2012 and $111M in 2013). MSLP's senior management lacked public company or accounting experience. While the company focused on revenue growth, it failed to establish sufficient internal controls and keep proper books and records. As a result, between 2010 and 2013, MSLP engaged in a series of accounting and disclosure failures that resulted in the company filing materially false and misleading filings with the Commission from 2010 through July 2014. Specifically, as described further below, MSLP failed to disclose perquisite compensation to its executive officers, failed to disclose related party transactions, failed to disclose bankruptcies of its executive officers, and committed other financial statement, accounting, and disclosure failures. Additionally, MSLP engaged in the unregistered offer and sale of its securities.

Respondent

1. MSLP is a Nevada corporation, based in Denver, Colorado, that manufactures and markets sports nutrition products. From 2010 to present, MSLP's common stock was registered with the Commission pursuant to Section 12(g) of the Exchange Act and was quoted on the OTC Bulletin Board.

MSLP's Failure to Disclose Perquisites from 2010 through July 2014

2. From 2010 through July 2014, MSLP significantly understated its disclosed perquisites by approximately $482,000 or 76% in Forms 10-K, Forms S-1, and proxy statements filed with the Commission. MSLP understated its disclosed perquisites in (1) 2010 by approximately $37,000 or 100%; (2) in 2011 by approximately $160,000 or 100%; (3) in 2012 by approximately $214,000 or 93%; and (4) in 2013 by approximately $71,000 or 35%.

3. MSLP paid its chief executive officer ("CEO") approximately $244,000 of undisclosed perquisites during this time period. The perquisites included perquisites related to meals, autos, apparel, personal professional tax and legal services, and two golf club memberships. During this time, MSLP also paid for perquisites of other executives that were not disclosed, including items such as the medical costs of the birth of a child, eye surgery, and personal golf club memberships.

---

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

4. From 2010 until mid-2012, MSLP executives knew or should have known that executive compensation was required to be disclosed in Commission filings and failed to educate themselves regarding the required reporting of executive compensation in Commission filings or what were considered perquisites with respect to executive officers. As a consequence, MSLP did not disclose any perquisites in its filings with the Commission prior to October 2012.

5. From mid-2012 through 2013, MSLP executives failed to properly identify or fully investigate undisclosed perquisites. As a consequence, MSLP continued to fail to identify or disclose many perquisites in its filings with the Commission through July 2014.

6. In September 2012, the MSLP board of directors determined perquisites related to autos, golf club memberships, and private plane usage would be disclosed in Commission filings. MSLP, however, filed several Commission filings through July 2014, which failed to include complete disclosure of the perquisites identified at the board meeting and otherwise known by senior management.

7. By summer 2013, MSLP began an internal review to determine the amount of undisclosed perquisites paid by MSLP to its executives since 2010. MSLP identified over $100,000 of undisclosed perquisites, including jet use, autos, and golf club memberships. MSLP, however, filed a Form S-1 in August 2013 with incorrect perquisite disclosures that were identical to amounts previously disclosed before the internal review began.

8. MSLP continued its internal investigation of undisclosed perquisites from fall 2013 through spring 2014. On March 31, 2014, MSLP filed its 2013 Form 10-K. In the summary compensation table, MSLP set forth previously undisclosed perquisites for 2011 and 2012 totaling approximately $189,000 (previously undisclosed perquisites of $74,000 for 2011 and $115,000 for 2012). The table also disclosed approximately $134,000 of perquisites in 2013. These disclosures, however, still significantly understated perquisites paid to MSLP executives.

9. MSLP reexamined its perquisite investigation results from spring 2014 through fall 2014. On October 31, 2014, MSLP filed amended Forms 10-K for the years ended 2012 and 2013. The 2013 Form 10-K/A disclosed an additional $252,000 of undisclosed perquisites that were not included in the 2013 Form 10-K or its July 2014 proxy statement. The 2012 Form 10-K/A disclosed an additional $37,000 of perquisites for 2010. In total, MSLP failed to report perquisites totaling approximately $482,000 from 2010-2013.

MSLP's Failure to Disclose Related Party Transactions with a Major Customer from 2011 through 2012

10. MSLP knew or should have known that policies regarding identifying and disclosing related party transactions were required and MSLP failed to implement sufficient policies regarding identifying and disclosing related party transactions. As a result, from May 2011 through 2012, MSLP failed to disclose in Commission filings significant related party transactions with a major customer.

11. In May 2011, MSLP hired a new chief marketing officer ("CMO"). The CMO was a former executive and co-founder of a major customer of MSLP. The CMO's brother remained the CEO of the major customer and a greater than 10% owner of the major customer. From May 2011 to April 2012, MSLP did not identify the related party relationship or consider if disclosure was necessary.

12. In March 2012, MSLP's auditor informed MSLP that transactions with the major customer were related party transactions requiring disclosure. In April 2012, MSLP provided a memo to its auditors concluding that transactions with the major customer did not require disclosure under generally accepted accounting principles ("GAAP"). The memo contained inaccurate information about the relationship between MSLP, the CMO, and the major customer. MSLP did not consider whether transactions with its major customer needed to be disclosed as related party transactions under Item 404 of Regulation S-K. The 2011 Form 10-K was filed three days after the memo, without any related party disclosure regarding the major customer.

13. In July 2012, MSLP hired a new CFO. The CFO had previously been CFO of MSLP's major customer (where the CMO's brother was CEO) and acquired a 1.75% indirect interest in the major customer. The CFO also continued to perform work for the CEO of the major customer personally at no charge while he worked at MSLP.

14. In August 2012, MSLP's auditor requested that MSLP update the April 2012 memo to address whether the major customer was a related party requiring disclosure under GAAP, specifically due to the CMO's or CFO's employment. The August memo concluded that transactions with the major customer did not require disclosure under GAAP. The memo contained inaccurate information about the relationship between MSLP, the CMO, the CFO, and the major customer. As a result, MSLP failed to disclose transactions with its major customer as related party transactions in Commission filings until it filed its Form 10-Q for the quarter ended March 30, 2013 in May 2013.

MSLP's Failure to Disclose Bankruptcies Related to Executive Officers from 2010-2012

15. MSLP's CEO filed for personal bankruptcy in 2008 in the United States District Court for the District of Colorado. Two companies owned by one of MSLP's former CFOs also filed for bankruptcy in 2008 in the United States District Court for the Southern District of Florida. From April 2011 through July 2012, MSLP's filings did not include disclosure of the CEO's bankruptcy. MSLP never disclosed the bankruptcies of the CFO's former companies. From April 2011 through October 2012, MSLP's filings also included a misstatement that "[n]one of the members of the board of directors or other executives has been involved in any bankruptcy proceedings."

Other Financial Statement, Accounting, and Disclosure Failures from 2010-2013

16. MSLP improperly accounted for advertising and promotional related costs for 2010 and 2011. Instead of accounting for advertising and promotional related costs as a reduction of revenue as required under GAAP, MSLP recorded these costs as advertising expenses resulting in it overstating revenue by $845,000 or 26% in 2010 and $3.6 million or 21%

in 2011. As a result, MSLP filed an amended Form 10-K for the year ended December 31, 2011 on July 2, 2012 restating its 2010 and 2011 financial statements.

17. MSLP recorded approximately $1.5 million of loss on settlement of accounts payable in the first quarter of 2011, when GAAP required it be disclosed in 2010. By reporting the loss in the wrong quarter, MSLP understated its 2010 loss on settlement of accounts payable as presented on its income statement by 78% and overstated it by 455% in the first quarter of 2011. MSLP's net loss was understated 8% in 2010 and overstated 42% in 2011.

18. MSLP failed to disclose continuing sponsorship commitments in its Form 10-K for the year ended December 31, 2011 and its Forms S-1 filed during 2012 as required under GAAP. The future sponsorship commitments required MSLP to make future payments totaling $6.9 million through 2013.

19. MSLP failed to disclose that it had one supplier that accounted for nearly 100% of its product purchases in its 2011 and 2012 Commission filings as required under GAAP.

20. MSLP failed to disclose $100,000 of rent expense related to an August 2012 aircraft lease agreement in its 2012 Commission filings as required under GAAP. As a result, MSLP understated its disclosed rent expense by 23%.

21. MSLP failed to disclose the amount of its international sales in its 2011 through 2013 Commission filings as required under GAAP. MSLP's international sales accounted for 23%, 30% and 31% of its sales for 2011, 2012, and 2013 respectively.

Stock Issuances without a Registration Statement

22. In 2011, MSLP lacked funds to pay approximately $1.1 million of outstanding invoices to vendors dating back to services and products purchased in 2009 and 2010. To pay off the vendors, MSLP entered into numerous transactions with third-parties who were willing to pay MSLP's vendors in cash in exchange for shares of MSLP stock that the third-parties immediately sold into the market after counsel representing MSLP opined to the transfer agent that the shares could be issued without a restrictive legend. No registration statement was filed with the Commission for these transactions and no exemption from registration was available.

Retention of Signature Pages for Commission Filings

23. MSLP failed to maintain signed signature pages for most of its filings with the Commission from 2010 through 2013 as required under Rule 302 of Regulation S-T. MSLP failed to receive or maintain any manually signed signature pages prior to December 2012. After December 2012, while MSLP had made over 23 Commission filings, MSLP only received or maintained original signature pages for all signatories on eight filings.

Books, Records, and Lack of Internal Controls

24. Because MSLP improperly recorded and/or reported its perquisites, related parties, revenue, losses on settlement of accounts payable, sponsorship commitments, manufacturing concentration, leases, and international sales, its books, records and accounts did not, in reasonable detail, accurately and fairly reflect its transactions and dispositions of assets.

25. In addition, MSLP failed to implement internal accounting controls relating to its perquisites, related parties, revenue, losses on settlement of accounts payable, sponsorship commitments, manufacturing concentration, leases, and international sales, which were sufficient to provide reasonable assurances that transactions were recorded as necessary to permit the preparation of financial statements in conformity with GAAP and to maintain the accountability of assets.

Violations

26. As a result of the conduct described above, MSLP violated Sections 17(a)(2) and 17(a)(3) of the Securities Act, which make it unlawful for any person in the offer or sale of any securities by the use of interstate commerce to obtain money or property by means of any untrue statement of a material fact or any omission to state a material fact necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading; and to engage in any transaction, practice, or course of business which operates or would operate as a fraud or deceit upon the purchaser.

27. As a result of the conduct described above, MSLP violated Sections 5(a) and 5(c) of the Securities Act, which prohibits directly or indirectly offering to sell, selling, and delivering after sale to the public, or offering to sell or to buy through the use or medium of any prospectus or otherwise, certain securities, as to which no registration statement was or is in effect or on file with the Commission, and for which no exemption was or is available.

28. As a result of the conduct described above, MSLP violated Section 14(a) of the Exchange Act and Rule 14a-9 thereunder, which prohibits solicitations by means of a proxy statement, form of proxy, notice of meeting or other communication, written or oral, containing a statement which, at the time and in the light of the circumstances under which it was made, was false or misleading with respect to any material fact, or which omitted to state any material fact necessary in order to make the statements therein not false or misleading or necessary to correct any statement in any earlier communication with respect to the solicitation of a proxy for the same meeting or subject matter which has become false or misleading.

29. As a result of the conduct described above, MSLP violated Section 13(a) of the Exchange Act and Rules 13a-1, 13a-13, and 12b-20 thereunder, which require every issuer of a security registered pursuant to Section 12 of the Exchange Act file with the Commission information, documents, and annual and quarterly reports as the Commission may require, and mandate that periodic reports contain such further material information as may be necessary to make the required statements not misleading.

30. As a result of the conduct described above, MSLP violated Section 13(b)(2)(A) of the Exchange Act, which requires reporting companies to make and keep books, records and accounts, which in reasonable detail, accurately and fairly reflect their transactions and dispositions of assets.

31. Aa result of the conduct described above, MSLP violated Section 13(b)(2)(B) of the Exchange Act, which require all reporting companies to devise and maintain a system of internal accounting controls sufficient to provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP and to maintain the accountability of assets.

32. Lastly, as a result of the conduct described above, MSLP violated Rule 302 of Regulation S-T of the Exchange Act, which requires that (1) a signatory to an electronic filing manually sign the signature page either before or at the time of the electronic filing; (2) the filer retain the original executed document for five years; and (3) that the filer provide the Commission staff with a copy of the document upon request.

IV.

Undertakings

Respondent has undertaken to:

Retain an independent consultant (the "Independent Consultant") for a period of one year, not unacceptable to the staff of the Commission, to conduct a comprehensive review of MSLP's policies, procedures, controls, and training relating to payment of expenses, related party transactions, and required financial statement disclosures in accordance with GAAP; and to recommend, if and where appropriate, policies, procedures, controls, and training reasonably designed to ensure:

(a) MSLP's compliance with Item 402 of Regulation S-K requiring, among other things, the disclosure of perquisites as executive compensation;

(b) MSLP has processes and internal controls in place to reasonably ensure payments for private club memberships, private airplane use, meals and entertainment, financial services, and other expenses that have a personal element are properly evaluated for perquisite disclosure;

(c) MSLP's related party disclosures are complete, not misleading, and in accordance with Item 404 of Regulation S-K and FASB ASC Topic 850, Related Party Disclosures; and

(d) MSLP's financial statements, including related notes, for external purposes are prepared in accordance with GAAP.

Require the Independent Consultant to enter into an agreement that provides that for the period of engagement and for a period of two years from completion of the engagement, the

Independent Consultant shall not enter into any employment, consultant, attorney-client, auditing or other professional relationship with MSLP, or any of its present or former affiliates, directors, officers, employees, or agents acting in their capacity. The agreement will also provide that the Independent Consultant will require that any firm with which he/she is affiliated or of which he/she is a member, and any person engaged to assist the Independent Consultant in performance of his/her duties under this Order shall not, without prior written consent of the Denver Regional Office of the Commission, enter into any employment, consultant, attorney-client, auditing or other professional relationship with MSLP or any of its present or former affiliates, directors, officers, employees, or agents acting in their capacity as such for the period of the engagement and for a period of two years after the engagement.

Certify, in writing, compliance with the undertaking(s) set forth above. The certification shall identify the undertaking(s), provide written evidence of compliance in the form of a narrative, and be supported by exhibits sufficient to demonstrate compliance. The Commission staff may make reasonable requests for further evidence of compliance, and Respondent agrees to provide such evidence. The certification and supporting material shall be submitted to Mary S. Brady, Assistant Regional Director, with a copy to the Office of Chief Counsel of the Enforcement Division, no later than sixty (60) days from the date of the completion of the undertakings.

V.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent MSLP's Offer.

Accordingly, it is hereby ORDERED that:

A. Pursuant to Section 8A of the Securities Act and Section 21C of the Exchange Act, Respondent MSLP cease and desist from committing or causing any violations and any future violations of Sections 5(a), 5(c), 17(a)(2) and 17(a)(3) of the Securities Act, Sections 13(a), 13(b)(2)(A), 13(b)(2)(B), and 14(a) of the Exchange Act and Rules 12b-20, 13a-1, 13a-13, and 14a-9 thereunder, and Rule 302 of Regulation S-T of the Exchange Act.

B. Respondent shall comply with the undertakings enumerated in Section IV above.

C. Respondent shall pay civil penalties of $700,000 to the Commission. Payment shall be made in the following installments:

a. $175,000.00 within 10 days of the entry of this Order;
b. $175,000.00 within 120 days of the entry of this Order;
c. $175,000.00 within 240 days of the entry of this Order;
d. $175,000.00 plus interest on the payments described in Section V.C(a)-(d) pursuant to 31 U.S.C. 3717 within 365 days of the entry of this Order.

Prior to making the payment described in Section V.C(d), MSLP shall contact the Commission staff to ensure the inclusion of interest. If any payment is not made by the date the payment is required by this Order, the entire outstanding balance of civil penalties, plus any additional interest accrued pursuant to 31 U.S.C. 3717, shall be due and payable immediately, at the discretion of the Commission staff, without further application. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying MSLP as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Thomas J. Krysa, Division of Enforcement, Securities and Exchange Commission, 1961 Stout Street, Suite 1700, Denver, CO 80294.

By the Commission.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75852 / September 8, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16789

In the Matter of Brad J. Pyatt, Respondent.	**ORDER INSTITUTING CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933 AND SECTION 21C OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 8A of the Securities Act of 1933 ("Securities Act") and Section 21C of the Securities Exchange Act of 1934 ("Exchange Act"), against Brad J. Pyatt ("Pyatt" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Instituting Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933 and Section 21C of the Exchange Act of 1934, Making Findings, and Imposing a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

Summary

Pyatt served as the chief executive officer ("CEO") of the MusclePharm Corporation ("MSLP") since it became a public company in 2010. MSLP is a Denver-based sports nutrition company that develops, manufactures, and markets sports nutrition products. When MSLP became a public company, it was unprepared for the Commission's reporting requirements and lacked sufficient infrastructure to support its rapid growth. MSLP's revenues greatly increased each year (MSLP's reported revenue was $3M in 2010, $17M in 2011, $67M in 2012 and $111M in 2013). Pyatt lacked public company or accounting experience and failed to hire executives with the required expertise. While Pyatt focused on revenue growth, he failed to ensure sufficient internal controls were enacted and proper books and records were kept. As a result, between 2010 and 2013, MSLP had a series of accounting and disclosure failures that resulted in the company filing materially false and misleading filings with the Commission from 2010 through July 2014. Specifically, as described further below, MSLP failed to disclose perquisite compensation to its executive officers, failed to disclose related party transactions, failed to disclose Pyatt's bankruptcy, and failed to properly disclose rent expense in the financial statements in Commission filings that Pyatt reviewed, approved, and signed. Additionally, MSLP and Pyatt engaged in the unregistered offer and sale of its securities.

Respondent

1. Brad J. Pyatt, age 34, is the current chairman of the board and CEO of MSLP. Pyatt co-founded MSLP in 2008.

Relevant Entity

2. MSLP is a Nevada corporation, based in Denver, Colorado, that manufactures and markets sports nutrition products. From 2010 to present, MSLP's common stock was registered with the Commission pursuant to Section 12(g) of the Exchange Act and was quoted on the OTC Bulletin Board.

MSLP's Failure to Disclose Perquisites from 2010 through July 2014

3. From 2010 through July 2014, MSLP significantly understated its disclosed perquisites by approximately $482,000 or 76% in Forms 10-K, Forms S-1, and proxy statements filed with the Commission that were reviewed, approved, and signed by Pyatt. MSLP understated

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

its disclosed perquisites in (1) 2010 by approximately $37,000 or 100%; (2) in 2011 by approximately $160,000 or 100%; (3) in 2012 by approximately $214,000 or 93%; and (4) in 2013 by approximately $71,000 or 35%.

4. Pyatt knew or should have known that executive compensation was required to be disclosed in Commission filings and failed to educate himself regarding the required reporting of executive compensation in the Commission filings or what were considered perquisites with respect to executive officers, despite being involved in approving expense reports. As a consequence, MSLP did not disclose any perquisites in its filings with the Commission prior to October 2012.

5. From 2010 through 2013, Pyatt received approximately $244,000 of undisclosed perquisites. The perquisites included perquisites related to meals, autos, apparel, personal professional tax and legal services, and two golf club memberships. Pyatt made material omissions and misrepresentations to the auditors about his receipt of perquisites. During this time, Pyatt also approved MSLP's payment for perquisites of other executives that were not disclosed, including items such as the medical costs of the birth of a child, eye surgery, and personal golf club memberships.

6. In September 2012, at a meeting attended by Pyatt, who was also chairman of the board of directors, the MSLP board of directors determined perquisites related to autos, golf club memberships, and private plane usage would be disclosed in Commission filings. MSLP, however, filed several Commission filings through July 2014, reviewed, approved, and signed by Pyatt, which failed to include complete disclosure of the perquisites identified at the board meeting and otherwise known by Pyatt.

7. In January 2013, Pyatt distributed a letter to the MSLP executives specifically instructing that there would be "no more payment of personal items" and requiring that all reimbursed expenses must be supported by receipt. Executives, however, including Pyatt, continued to submit reimbursement forms and make charges on company credit cards for personal items without providing original receipts. MSLP continued paying for these items without properly identifying them as perquisites.

8. By summer 2013, MSLP was conducting an internal review to determine the amount of undisclosed perquisites paid by MSLP to its executives since 2010. By July 2013, at least $100,000 of undisclosed perquisites had been identified. This review was discussed at an August board meeting attended by Pyatt. Despite not having completed its perquisite review, MSLP filed a Form S-1, reviewed, approved, and signed by Pyatt, in August 2013 with incorrect perquisite disclosures that were identical to amounts previously disclosed before the internal review began.

9. MSLP continued its internal investigation of undisclosed perquisites from fall 2013 through spring 2014. On March 31, 2014, MSLP filed its 2013 Form 10-K, which was reviewed, approved, and signed by Pyatt. In the summary compensation table, MSLP set forth previously undisclosed perquisites for 2011 and 2012 totaling approximately $189,000 (previously

undisclosed perquisites of $74,000 for 2011 and $115,000 for 2012). The table also disclosed approximately $134,000 of perquisites in 2013. These disclosures, however, still significantly understated perquisites paid to MSLP executives, including perquisites received by Pyatt.

10. MSLP reexamined its perquisite investigation results from spring 2014 through fall 2014. On October 31, 2014, MSLP filed amended Forms 10-K for the years ended 2012 and 2013, which were reviewed, approved, and signed by Pyatt. The 2013 Form 10-K/A disclosed an additional $252,000 of undisclosed perquisites that were not included in the 2013 Form 10-K or its July 2014 proxy statement. The 2012 Form 10-K/A disclosed an additional $37,000 of perquisites for 2010. In total, MSLP failed to report perquisites totaling approximately $482,000 from 2010-2013.

MSLP's Failure to Disclose Related Party Transactions with a Major Customer from 2011 through 2012

11. As CEO and chairman of the board of directors, Pyatt was responsible for reviewing related party transactions at MSLP. Pyatt knew or should have known that policies regarding identifying and disclosing related party transactions were required and Pyatt failed to identify or implement sufficient policies regarding identifying and disclosing related party transactions. As a result, from May 2011 through 2012, MSLP failed to disclose significant related party transactions with a major customer in Commission filings that were reviewed, approved, and signed by Pyatt.

12. In May 2011, MSLP hired a new chief marketing officer ("CMO"). The CMO was a former executive and co-founder of a major customer of MSLP. Pyatt knew that the CMO's brother remained the CEO of the major customer. The CMO's brother was also a greater than 10% owner of the major customer. From May 2011 to April 2012, Pyatt did not identify the related party relationship or consider if disclosure was necessary.

13. In March 2012, MSLP's auditor informed MSLP that transactions with the major customer were related party transactions requiring disclosure. In April 2012, MSLP provided a memo to its auditors concluding that transactions with the major customer did not require disclosure under generally accepted accounting principles "GAAP." Pyatt reviewed, edited, and signed the memo. The memo contained inaccurate information about the relationship between MSLP, the CMO, and the major customer. Pyatt did not consider whether transactions with the major customer needed to be disclosed as related party transactions under Item 404 of Regulation S-K. The 2011 Form 10-K was filed three days after the memo, without any related party disclosure regarding the major customer.

14. In July 2012, MSLP hired a new CFO. Pyatt was aware that the CFO had previously been CFO of MSLP's major customer (where the CMO's brother was CEO) and acquired a 1.75% indirect interest in the major customer. The CFO also continued to perform work for the CEO of the major customer personally at no charge while he worked at MSLP.

15. In August 2012, MSLP's auditor requested that MSLP update the April 2012 memo to address whether the major customer was a related party requiring disclosure under GAAP, specifically due to the CMO's or CFO's employment. The August memo concluded that transactions with the major customer did not require disclosure under GAAP. Pyatt reviewed, edited, and signed the memo. The memo contained inaccurate information about the relationship between MSLP, the CMO, the CFO, and the major customer. As a result, MSLP failed to disclose transactions with its major customer as related party transactions in Commission filings that were reviewed, approved, and signed by Pyatt, until it filed its Form 10-Q for the quarter ended March 30, 2013 in May 2013.

Pyatt's Failure to Disclose his Personal Bankruptcy from 2011-2012

16. Pyatt filed for personal bankruptcy in 2008 in the United States District Court for the District of Colorado. From April 2011 through July 2012, MSLP's Commission filings, which Pyatt, reviewed, approved, and signed, did not include disclosure of Pyatt's bankruptcy. From April 2011 through October 2012, MSLP's Commission filings, which Pyatt, reviewed, approved, and signed, included a misstatement that "[n]one of the members of the board of directors or other executives has been involved in any bankruptcy proceedings." Pyatt did not correct the misstatement or omission in the Commission filings. Pyatt also misrepresented to the auditors that he had not filed for bankruptcy.

Other Financial Statement, Accounting, and Disclosure Failures from 2010-2013

17. MSLP failed to disclose $100,000 of rent expense related to an August 2012 aircraft lease agreement in its 2012 Commission filings as required under GAAP. As a result, MSLP understated its disclosed rent expense by 23%. Pyatt, who negotiated and signed the August 2012 contract, failed to provide the contract to the CFO.

Stock Issuances without a Registration Statement

18. In 2011, MSLP lacked funds to pay approximately $1.1 million of outstanding invoices to vendors dating back to services and products purchased in 2009 and 2010. To pay off the vendors, MSLP entered into numerous agreements, negotiated and signed by Pyatt, with third-parties who were willing to pay MSLP's vendors in cash in exchange for shares of MSLP stock that the third-parties immediately sold into the market after counsel representing MSLP opined to the transfer agent that the shares could be issued without a restrictive legend. No registration statement was filed with the Commission for these transactions and no exemption from registration was available.

Books, Records, and Lack of Internal Controls

19. Because MSLP improperly recorded and/or reported its perquisites, related parties, and leases, its books, records and accounts did not, in reasonable detail, accurately and fairly reflect its transactions and dispositions of assets.

20. In addition, MSLP failed to implement internal accounting controls relating to its perquisites, related parties, and leases, which were sufficient to provide reasonable assurances that transactions were recorded as necessary to permit the preparation of financial statements in conformity with GAAP and to maintain the accountability of assets.

Violations

21. As a result of the conduct described above, Pyatt violated Sections 17(a)(2) and 17(a)(3) of the Securities Act and caused MSLP's violations of Sections 17(a)(2) and 17(a)(3) of the Securities Act, which make it unlawful for any person in the offer or sale of any securities by the use of interstate commerce to obtain money or property by means of any untrue statement of a material fact or any omission to state a material fact necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading; and to engage in any transaction, practice, or course of business which operates or would operate as a fraud or deceit upon the purchaser.

22. As a result of the conduct described above, Pyatt violated Sections 5(a) and 5(c) of the Securities Act, which prohibits directly or indirectly offering to sell, selling, and delivering after sale to the public, or offering to sell or to buy through the use or medium of any prospectus or otherwise, certain securities, as to which no registration statement was or is in effect or on file with the Commission, and for which no exemption was or is available.

23. As a result of the conduct described above, Pyatt violated Section 14(a) of the Exchange Act and Rule 14a-9 thereunder, which prohibits solicitations by means of a proxy statement, form of proxy, notice of meeting or other communication, written or oral, containing a statement which, at the time and in the light of the circumstances under which it was made, was false or misleading with respect to any material fact, or which omitted to state any material fact necessary in order to make the statements therein not false or misleading or necessary to correct any statement in any earlier communication with respect to the solicitation of a proxy for the same meeting or subject matter which has become false or misleading.

24. As a result of the conduct described above, Pyatt caused MSLP's violations of Section 13(a) of the Exchange Act and Rules 13a-1, 13a-13, and 12b-20 thereunder, which require every issuer of a security registered pursuant to Section 12 of the Exchange Act file with the Commission information, documents, and annual and quarterly reports as the Commission may require, and mandate that periodic reports contain such further material information as may be necessary to make the required statements not misleading.

25. As a result of the conduct described above, Pyatt caused MSLP's violations of Section 13(b)(2)(A) of the Exchange Act, which requires reporting companies to make and keep books, records and accounts, which in reasonable detail, accurately and fairly reflect their transactions and dispositions of assets.

26. As result of the conduct described above, Pyatt caused MSLP's violations of Section 13(b)(2)(B) of the Exchange Act and violated Rule 13b2-1 thereunder, which require all

reporting companies to devise and maintain a system of internal accounting controls sufficient to provide reasonable assurances that transactions are recorded as necessary to permit the preparation of financial statements in conformity with GAAP and to maintain the accountability of assets; and prohibit persons from directly or indirectly falsifying or causing to be falsified any book, record, or account.

27. Lastly, as a result of the conduct described above, Pyatt violated Exchange Act Rule 13b2-2, which prohibits any director or officer of an issuer from, directly or indirectly: (a) making or causing to be made a materially false or misleading statement; or (b) omitting or causing another person to omit to state a material fact necessary in order to make statements made, in light of the circumstances under which such statements were made, not misleading, to an accountant in connection with financial statement audits, reviews, or examinations or the preparation or filing of any document or report required to be filed with the Commission.

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent Pyatt's Offer.

Accordingly, it is hereby ORDERED that:

A. Pursuant to Section 8A of the Securities Act and Section 21C of the Exchange Act, Respondent Pyatt cease and desist from committing or causing any violations and any future violations of Sections 5(a), 5(c), 17(a)(2), and 17(a)(3) of the Securities Act and Sections 13(a), 13(b)(2)(A), 13(b)(2)(B), and 14(a) of the Exchange Act and Rules 12b-20, 13a-1, 13a-13, 13b2-1, 13b2-2, and 14a-9 thereunder.

B. Respondent shall pay civil penalties of $150,000 to the Commission. Payment shall be made in the following installments:

a. $37,500.00 within 10 days of the entry of this Order;
b. $37,500.00 within 120 days of the entry of this Order;
c. $37,500.00 within 240 days of the entry of this Order;
d. $37,500.00 plus interest on the payments described in Section IV.B(a)-(d) pursuant to 31 U.S.C. 3717 within 365 days of the entry of this Order.

Prior to making the payment described in Section IV.B(d), Pyatt shall contact the Commission staff to ensure the inclusion of interest. If any payment is not made by the date the payment is required by this Order, the entire outstanding balance of civil penalties, plus any additional interest accrued pursuant to 31 U.S.C. 3717, shall be due and payable immediately, at the discretion of the Commission staff, without further application. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Brad J. Pyatt as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Thomas J. Krysa, Division of Enforcement, Securities and Exchange Commission, 1961 Stout Street, Suite 1700, Denver, CO 80294.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

By the Commission.

ADMINISTRATIVE PROCEEDING
File No. 3-16790

In the Matter of **Lawrence S. Meer, CPA,** **Respondent.**	**ORDER INSTITUTING PUBLIC ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933, SECTIONS 4C AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934, AND RULE 102(e) OF THE COMMISSION'S RULES OF PRACTICE, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that public administrative and cease-and-desist proceedings be, and hereby are, instituted against, Lawrence S. Meer, CPA ("Respondent" or "Meer") pursuant to Section 8A of the Securities Act of 1933 ("Securities Act"), Sections 4C[1] and 21C of the Securities Exchange Act of 1934 ("Exchange Act"), and Rule 102(e)(1)(iii) of the Commission's Rules of Practice.[2]

[1] Section 4C provides, in relevant part, that:

> The Commission may censure any person, or deny, temporarily or permanently, to any person the privilege of appearing or practicing before the Commission in any way, if that person is found . . . (1) not to possess the requisite qualifications

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, Respondent consents to the entry of this Order Instituting Public Administrative and Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933, Sections 4C and 21C of the Securities Exchange Act of 1934, and Rule 102(e) of the Commission's Rules of Practice, Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[3] that:

Summary

Meer served as the chief financial officer ("CFO") of the MusclePharm Corporation ("MSLP") from July 1, 2010 through July 2, 2012. MSLP is a Denver-based sports nutrition company that develops, manufactures, and markets sports nutrition products. When MSLP became a public company in 2010, Meer was unprepared for the Commission's reporting requirements and failed to develop sufficient infrastructure to support its rapid growth. MSLP's revenues greatly increased each year (MSLP's reported revenue was \$3M in 2010, \$17M in 2011, and \$67M in 2012). Meer lacked public company experience and failed to educate himself with the required expertise. Meer failed to ensure sufficient internal controls were enacted and proper books and records were kept. As a result, between 2010 and July 2012, when Meer ceased being

> to represent others . . . (2) to be lacking in character or integrity, or to have engaged in unethical or improper professional conduct; or (3) to have willfully violated, or willfully aided and abetted the violation of, any provision of the securities laws or the rules and regulations thereunder.

[2] Rule 102(e)(1)(iii) provides, in pertinent part, that:

> The Commission may . . . deny, temporarily or permanently, the privilege of appearing or practicing before it . . . to any person who is found...to have willfully violated, or willfully aided and abetted the violation of any provision of the Federal securities laws or the rules and regulations thereunder.

[3] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

CFO, MSLP had a series of accounting and disclosure failures that resulted in the company filing materially false and misleading filings with the Commission. Specifically, as described further below, MSLP failed to disclose perquisite compensation to its executive officers, failed to disclose related party transactions, failed to disclose bankruptcies related to Meer's companies, and committed other financial statement, accounting, and disclosure failures.

Respondent

1. Lawrence S. Meer, CPA, age 54, was the CFO of MSLP from July 1, 2010 through July 2, 2012. From October 2009 until July 1, 2010, Meer was the Director of Finance of MSLP. Meer then served as treasurer of MSLP from July 2, 2012 through March 1, 2013. Meer was licensed as a CPA in Colorado from approximately 1987 to 2002, when his license lapsed.

Relevant Entity

2. MSLP is a Nevada corporation, based in Denver, Colorado, that manufactures and markets sports nutrition products. From 2010 to present, MSLP's common stock was registered with the Commission pursuant to Section 12(g) of the Exchange Act and was quoted on the OTC Bulletin Board.

MSLP's Failure to Disclose Perquisites from 2010 through 2012

3. From 2010 through 2012, MSLP materially understated its disclosed perquisites by approximately $411,000 or 96% in Forms 10-K, Forms S-1, and proxy statements filed with the Commission. Meer reviewed, approved, and signed Forms 10-K and Forms S-1 while CFO. MSLP understated its disclosed perquisites in (1) 2010 by approximately $37,000 or 100%; (2) in 2011 by approximately $160,000 or 100%; and (3) in 2012 by approximately $214,000 or 93%.

4. From 2010 until July 2012, Meer reviewed expense reimbursements and charges coming through the accounting department. Meer knew or should have known that executive compensation was required to be disclosed in Commission filings and Meer failed to educate himself regarding the required reporting of executive compensation in Commission filings or what were considered perquisites with respect to executive officers. Meer failed to ensure sufficient internal controls were enacted relating to perquisites and proper books and records were kept. Meer did not identify any potential perquisites. As a consequence, MSLP did not disclose any perquisites in its filings with the Commission while Meer was CFO.

5. From 2010 through 2012, MSLP's chief executive officer ("CEO") received approximately $198,000 of undisclosed perquisites. The perquisites included perquisites related to meals, autos, apparel, personal professional tax and legal services, and two golf club memberships. During this time, MSLP also paid for perquisites of other executives that were not disclosed, including items such as the medical costs of the birth of a child, eye surgery, and personal golf club memberships. Additionally, Meer received approximately $22,000 in perquisites from MSLP, which Meer also failed to record as additional compensation in the form of perquisites. Meer also made material omissions and misrepresentations to the auditors about receipt of perquisites.

6. After Meer was no longer working for MSLP, on October 31, 2014, MSLP filed amended Forms 10-K for the years ended 2012 and 2013. In total, MSLP failed to report perquisites totaling approximately $411,000 from 2010-2012.

MSLP's Failure to Disclose Related Party Transactions with a Major Customer from 2011 through 2012

7. Meer knew or should have known that policies regarding identifying and disclosing related party transactions were required and Meer failed to identify or implement sufficient policies regarding identifying and disclosing related party transactions. As a result, from May 2011 through July 2, 2012, while Meer was CFO, MSLP failed to disclose material related party transactions with a major customer in Commission filings that were reviewed, approved, and signed by Meer.

8. In May 2011, MSLP hired a new chief marketing officer ("CMO"). The CMO was a former executive and co-founder of a major customer of MSLP. Meer knew that the CMO's brother remained the CEO of the major customer. The CMO's brother was also a greater than 10% owner of the major customer. From May 2011 to April 2012, Meer did not identify the related party relationship or consider if disclosure was necessary.

9. In March 2012, MSLP's auditor informed MSLP that transactions with the major customer were related party transactions requiring disclosure. In April 2012, MSLP provided a memo to its auditors concluding that transactions with the major customer did not require disclosure under generally accepted accounting principles "GAAP." Meer reviewed and signed the memo. The memo misapplied GAAP, which Meer, the only accountant signing the memo, did not correct. The memo also contained inaccurate information about the relationship between MSLP, the CMO, and the major customer that Meer did not correct. Meer did not consider whether transactions with the major customer needed to be disclosed as related party transactions under Item 404 of Regulation S-K. The 2011 Form 10-K was filed three days after the memo was reviewed, approved, and signed by Meer, without any related party disclosure regarding the major customer.

10. MSLP continued to fail to disclose transactions with its major customer as related party transactions in Commission filings, until it filed its Form 10-Q for the quarter ended March 30, 2013 in May 2013.

Meer's Failure to Disclose the Bankruptcies of his Former Companies from 2010-2012

11. Two companies owned by Meer filed for bankruptcy in 2008 in the United States District Court for the Southern District of Florida. MSLP never disclosed the bankruptcies of Meer's former companies in Commission filings. From April 2011 through October 2012, MSLP's filings also included a misstatement that "[n]one of the members of the board of directors or other executives has been involved in any bankruptcy proceedings." Meer did not correct the misstatement or omissions in the Commission filings that he reviewed, approved, and signed. Meer also omitted to inform the auditors that his companies had filed for bankruptcy.

Other Financial Statement, Accounting, and Disclosure Failures from 2010-2012

12. MSLP improperly accounted for advertising and promotional related costs for 2010 and 2011. Instead of accounting for advertising and promotional related costs as a reduction of revenue as required under GAAP, MSLP recorded these costs as advertising expenses resulting in it overstating revenue by $845,000 or 26% in 2010 and $3.6 million or 21% in 2011. As a result, MSLP filed an amended Form 10-K for the year ended December 31, 2011 on July 2, 2012 restating its 2010 and 2011 financial statements. Meer did not read the applicable GAAP and did not evaluate the accounting for the various sales incentives MSLP offered. This issue was first raised by MSLP's auditor in mid-2012.

13. MSLP recorded approximately $1.5 million of loss on settlement of accounts payable in the first quarter of 2011, when GAAP required it be disclosed in 2010. By reporting the loss in the wrong quarter, MSLP understated its 2010 loss on settlement of accounts payable as presented on its income statement by 78% and overstated it by 455% in the first quarter of 2011. MSLP's net loss was understated 8% in 2010 and overstated 42% in 2011. Meer was aware of MSLP's past due accounts payable and the eventual settlement in early 2011 using MSLP stock. Meer, however, failed to consider whether the settlements should have been booked in the prior accounting period.

14. MSLP failed to disclose continuing sponsorship commitments in its Form 10-K for the year ended December 31, 2011 and its Forms S-1 filed during 2012 as required under GAAP. The future sponsorship commitments required MSLP to make future payments totaling $6.9 million through 2013. Meer failed to consider whether the scheduled future payments needed to be disclosed.

15. MSLP failed to disclose that it had one supplier that accounted for nearly 100% of its product purchases in its 2011 and 2012 Commission filings as required under GAAP. Meer did not identify that this was required to be disclosed.

16. MSLP failed to disclose the amount of its international sales in its 2011 through 2012 Commission filings as required under GAAP. MSLP's international sales accounted for 23% for 2011 and 30% for 2012. Meer did not identify that this was required to be disclosed.

Books, Records, and Lack of Internal Controls

17. Because MSLP improperly recorded and/or reported its perquisites, related parties, revenue, losses on settlement of accounts payable, sponsorship commitments, manufacturing concentration, and international sales, its books, records and accounts did not, in reasonable detail, accurately and fairly reflect its transactions and dispositions of assets.

18. In addition, MSLP failed to implement internal accounting controls relating to its perquisites, related parties, revenue, losses on settlement, sponsorship commitments, manufacturing concentration, and international sales, which were sufficient to provide reasonable

assurances that transactions were recorded as necessary to permit the preparation of financial statements in conformity with GAAP and to maintain the accountability of assets.

Violations

19. As a result of the conduct described above, Meer willfully[4] violated Sections 17(a)(2) and 17(a)(3) of the Securities Act and was a cause of MSLP's violations of Sections 17(a)(2) and 17(a)(3) of the Securities Act, which make it unlawful for any person in the offer or sale of any securities by the use of interstate commerce to obtain money or property by means of any untrue statement of a material fact or any omission to state a material fact necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading; and to engage in any transaction, practice, or course of business which operates or would operate as a fraud or deceit upon the purchaser.

20. As a result of the conduct described above, Meer was a cause of MSLP's violations of Section 14(a) of the Exchange Act and Rule 14a-9 thereunder, which prohibits solicitations by means of a proxy statement, form of proxy, notice of meeting or other communication, written or oral, containing a statement which, at the time and in the light of the circumstances under which it was made, was false or misleading with respect to any material fact, or which omitted to state any material fact necessary in order to make the statements therein not false or misleading or necessary to correct any statement in any earlier communication with respect to the solicitation of a proxy for the same meeting or subject matter which has become false or misleading.

21. As a result of the conduct described above, Meer was a cause of MSLP's violations of Section 13(a) of the Exchange Act and Rules 13a-1, 13a-13, and 12b-20 thereunder, which require every issuer of a security registered pursuant to Section 12 of the Exchange Act file with the Commission information, documents, and annual and quarterly reports as the Commission may require, and mandate that periodic reports contain such further material information as may be necessary to make the required statements not misleading.

22. As a result of the conduct described above, Meer was a cause of MSLP's violations of Section 13(b)(2)(A) of the Exchange Act, which requires reporting companies to make and keep books, records and accounts, which in reasonable detail, accurately and fairly reflect their transactions and dispositions of assets.

23. Aa result of the conduct described above, Meer was a cause of MSLP's violations of Section 13(b)(2)(B) of the Exchange Act and willfully violated Rule 13b2-1 thereunder, which

[4] A willful violation of the securities laws means merely "'that the person charged with the duty knows what he is doing.'" *Wonsover v. SEC*, 205 F.3d 408, 414 (D.C. Cir. 2000) (quoting *Hughes v. SEC*, 174 F.2d 969, 977 (D.C. Cir. 1949)). There is no requirement that the actor "'also be aware that he is violating one of the Rules or Acts.'" *Id.* (quoting *Gearhart & Otis, Inc. v. SEC*, 348 F.2d 798, 803 (D.C. Cir. 1965)).

require all reporting companies to devise and maintain a system of internal accounting controls sufficient to provide reasonable assurances that transactions are recorded as necessary to permit the preparation of financial statements in conformity with GAAP and to maintain the accountability of assets; and prohibit persons from directly or indirectly falsifying or causing to be falsified any book, record, or account.

24. As a result of the conduct described above, Meer willfully violated Exchange Act Rule 13b2-2, which prohibits any director or officer of an issuer from, directly or indirectly: (a) making or causing to be made a materially false or misleading statement; or (b) omitting or causing another person to omit to state a material fact necessary in order to make statements made, in light of the circumstances under which such statements were made, not misleading, to an accountant in connection with financial statement audits, reviews, or examinations or the preparation or filing of any document or report required to be filed with the Commission.

Disgorgement and Civil Penalties

Respondent has submitted a sworn Statement of Financial Condition dated February 4, 2015 and other evidence and has asserted his inability to pay a civil penalty.

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent Meer's Offer.

Accordingly, it is hereby ORDERED, effective immediately, that:

A. Meer shall cease and desist from committing or causing any violations and any future violations of Sections 17(a)(2) and 17(a)(3) of the Securities Act and Sections 13(a), 13(b)(2)(A), 13(b)(2)(B), and 14(a) of the Exchange Act and Rules 12b-20, 13a-1, 13a-13, 13b2-1, 13b2-2, and 14a-9 promulgated thereunder.

B. Meer is denied the privilege of appearing or practicing before the Commission as an accountant.

C. After three years from the date of this Order, Respondent may request that the Commission consider his reinstatement by submitting an application (attention: Office of the Chief Accountant) to resume appearing or practicing before the Commission as:

1. a preparer or reviewer, or a person responsible for the preparation or review, of any public company's financial statements that are filed with the Commission. Such an application must satisfy the Commission that Respondent's work in his practice before the Commission will be reviewed either by the independent audit committee of the public company

for which he works or in some other acceptable manner, as long as he practices before the Commission in this capacity; and/or

2. an independent accountant. Such an application must satisfy the Commission that:

(a) Respondent, or the public accounting firm with which he is associated, is registered with the Public Company Accounting Oversight Board ("Board") in accordance with the Sarbanes-Oxley Act of 2002, and such registration continues to be effective;

(b) Respondent, or the registered public accounting firm with which he is associated, has been inspected by the Board and that inspection did not identify any criticisms of or potential defects in the respondent's or the firm's quality control system that would indicate that the respondent will not receive appropriate supervision;

(c) Respondent has resolved all disciplinary issues with the Board, and has complied with all terms and conditions of any sanctions imposed by the Board (other than reinstatement by the Commission); and

(d) Respondent acknowledges his responsibility, as long as Respondent appears or practices before the Commission as an independent accountant, to comply with all requirements of the Commission and the Board, including, but not limited to, all requirements relating to registration, inspections, concurring partner reviews and quality control standards.

D. The Commission will consider an application by Respondent to resume appearing or practicing before the Commission provided that his state CPA license is current and he has resolved all other disciplinary issues with the applicable state boards of accountancy. However, if state licensure is dependent on reinstatement by the Commission, the Commission will consider an application on its other merits. The Commission's review may include consideration of, in addition to the matters referenced above, any other matters relating to Respondent's character, integrity, professional conduct, or qualifications to appear or practice before the Commission.

E. Based upon Respondent's sworn representations in his Statement of Financial Condition dated February 4, 2015 and other documents submitted to the Commission, the Commission is not imposing a penalty against Respondent.

F. The Division of Enforcement ("Division") may, at any time following the entry of this Order, petition the Commission to: (1) reopen this matter to consider whether Respondent provided accurate and complete financial information at the time such representations were made; and (2) seek an order directing payment of the maximum civil penalty allowable under the law. No other issue shall be considered in connection with this petition other than whether the financial information provided by Respondent was fraudulent, misleading, inaccurate, or incomplete in any material respect. Respondent may not, by way of defense to any such petition: (1) contest the findings in this Order; (2) assert that payment of a penalty should not be ordered; (3) contest the imposition of the maximum penalty allowable under the law; or (4) assert any defense to liability or remedy, including, but not limited to, any statute of limitations defense.

By the Commission.

Release No. 75854 / September 8, 2015

ACCOUNTING AND AUDITING ENFORCEMENT
Release No. 3686 / September 8, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16791

In the Matter of **L. Gary Davis, CPA,** **Respondent.**	**ORDER INSTITUTING PUBLIC ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933, SECTIONS 4C AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934, AND RULE 102(e) OF THE COMMISSION'S RULES OF PRACTICE, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that public administrative and cease-and-desist proceedings be, and hereby are, instituted against L. Gary Davis, CPA ("Respondent" or "Davis") pursuant to Section 8A of the Securities Act of 1933 ("Securities Act"), Sections 4C[1] and 21C of the Securities Exchange Act of 1934 ("Exchange Act"), and Rule 102(e)(1)(iii) of the Commission's Rules of Practice.[2]

---

[1] Section 4C provides, in relevant part, that:

> The Commission may censure any person, or deny, temporarily or permanently, to any person the privilege of appearing or practicing before the Commission in any way, if that person is found . . . (1) not to possess the requisite qualifications to represent others . . . (2) to be lacking in character or integrity, or to have engaged in unethical or improper professional conduct; or (3) to have willfully

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Instituting Public Administrative and Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933, Sections 4C and 21C of the Securities Exchange Act of 1934, and Rule 102(e) of the Commission's Rules of Practice, Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[3] that:

Summary

Davis served as the chief financial officer ("CFO") of the MusclePharm Corporation ("MSLP") from July 3, 2012 until April 15, 2014. MSLP is a Denver-based sports nutrition company that develops, manufactures, and markets sports nutrition products. When Davis became CFO of MSLP, he discovered that MSLP had almost no internal controls, policies or procedures. Davis worked to bring MSLP's accounting and disclosures in compliance with generally accepted accounting principles ("GAAP") and the Commission's reporting requirements. During his tenure as CFO, however, Davis failed to ensure sufficient internal controls were enacted and proper books and records were kept. Additionally, Davis became aware of issues regarding undisclosed perquisites and undisclosed related parties, yet continued to sign MSLP Commission filings with misstatements and omissions. As a result, between July 2012 and April 2014, when Davis ceased being CFO, MSLP had a series of accounting and disclosure failures that resulted in the company

---

> violated, or willfully aided and abetted the violation of, any provision of the securities laws or the rules and regulations thereunder.

[2] Rule 102(e)(1)(iii) provides, in pertinent part, that:

> The Commission may . . . deny, temporarily or permanently, the privilege of appearing or practicing before it . . . to any person who is found...to have willfully violated, or willfully aided and abetted the violation of any provision of the Federal securities laws or the rules and regulations thereunder.

[3] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

filing materially false and misleading filings with the Commission. Specifically, as described further below, MSLP failed to disclose perquisite compensation to its executive officers, failed to disclose related party transactions, and failed to properly disclose manufacturing concentration, rent expense, and international sales in the financial statements in Commission filings that Davis reviewed, approved, and signed.

Respondent

1. L. Gary Davis, CPA, was the CFO of MSLP from July 3, 2012 through April 15, 2014. Davis continued to be employed by MSLP in a special projects role until December 31, 2014. Davis has been licensed as a CPA in Ohio since 1985 and licensed in Idaho since 1992.

Relevant Entity

2. MSLP is a Nevada corporation, based in Denver, Colorado, that manufactures and markets sports nutrition products. From 2010 to present, MSLP's common stock was registered with the Commission pursuant to Section 12(g) of the Exchange Act and was quoted on the OTC Bulletin Board.

MSLP's Failure to Disclose Perquisites from 2012 through 2014

3. From 2012 through April 2014, MSLP materially understated its disclosed perquisites by approximately $285,000 or 66% in Forms 10-K and Forms S-1 filed with the Commission. Davis reviewed, approved, and signed Forms 10-K and Forms S-1 while CFO. MSLP understated its disclosed perquisites in 2012 by approximately $214,000 or 93% and in 2013 by approximately $71,000 or 35%. From 2012 through 2013, MSLP's chief executive officer ("CEO") received approximately $152,000 of undisclosed perquisites. The perquisites included perquisites related to meals, autos, apparel, and two golf club memberships.

4. In July 2012, MSLP hired Davis as the CFO. Davis realized that MSLP had almost no internal controls or policies or procedures. Davis focused on maintaining MSLP's daily operations and focused on developing the accounting department by hiring additional accounting staff with CPAs. Soon after starting, however, Davis received information that MSLP was reimbursing executives for expenses, including a golf club membership and executive auto use, which were not disclosed as perquisites.

5. In October 2012, Davis received a draft Form S-1, which included a summary compensation table that for the first time included disclosure amounts under the "All Other Compensation" column for 2009, 2010, and 2011. A few weeks later, on October 26, MSLP filed the final Form S-1, which had removed items from the draft and failed to list several undisclosed perquisites. Davis reviewed, approved, and signed the Form S-1.

6. Beginning in November 2012, Davis began to implement travel and expense policies, which required MSLP employees to provide original receipts for their expenses. Davis, however, did not implement any formal policies or procedures to ensure perquisites were being

properly identified and disclosed. Executives continued to submit reimbursement forms and make charges on company credit cards for personal items without providing original receipts. MSLP continued paying for these items without properly identifying them as perquisites. As a result, MSLP filed several Commission filings through April 2014, which failed to include complete disclosure of the perquisites.

7. By summer 2013, Davis had begun conducting an internal review to determine the amount of undisclosed perquisites paid by MSLP to its executives since 2010. In July 2013, Davis identified at least $100,000 of undisclosed perquisites. Despite the perquisite review not being complete, MSLP filed a Form S-1 in August 2013 with incorrect perquisite disclosures that were identical to amounts previously disclosed before the internal review began. Davis reviewed, approved, and signed the Form S-1.

8. On March 31, 2014, MSLP filed its 2013 Form 10-K, which was reviewed, approved, and signed by Davis. In the summary compensation table, MSLP set forth previously undisclosed perquisites for 2011 and 2012 totaling approximately $189,000 (previously undisclosed perquisites of $74,000 for 2011 and $115,000 for 2012). The table also disclosed approximately $134,000 of perquisites in 2013. These disclosures, however, still understated perquisites paid to MSLP executives.

9. After Davis was no longer working for MSLP, on October 31, 2014, MSLP filed amended Forms 10-K for the years ended 2012 and 2013. In total, MSLP failed to report perquisites totaling approximately $285,000 from 2012-2013.

MSLP's Failure to Disclose Related Party Transactions with a Major Customer

10. From August 2012 through the end of the year, MSLP failed to disclose material related party transactions with a major customer in Commission filings that were reviewed, approved, and signed by Davis.

11. In May 2011, MSLP had hired a new chief marketing officer ("CMO"). The CMO was a former executive and co-founder of a major customer of MSLP. Davis knew that the CMO's brother remained the CEO of the major customer. The CMO's brother was also a greater than 10% owner of the major customer. Additionally, Davis had previously been CFO of MSLP's major customer (where the CMO's brother was CEO) and acquired a 1.75% indirect interest in the major customer. Davis also continued to perform work for the CEO of the major customer personally at no charge while he worked at MSLP.

12. In August 2012, MSLP's auditor requested that MSLP update an April 2012 memo it had provided to the auditors addressing whether the major customer was a related party requiring disclosure under GAAP, specifically due to the CMO's or Davis' employment. The August memo concluded that transactions with the major customer did not require disclosure under GAAP. The memo misapplied GAAP, which Davis, the only accountant signing the memo, did not correct. The memo also contained inaccurate information about the relationship between MSLP, the CMO,

Davis, and the major customer. As a result, MSLP failed to disclose transactions with its major customer as related party transactions in Commission filings until it filed its Form 10-Q for the quarter ended March 30, 2013 in May 2013.

Other Financial Statement, Accounting, and Disclosure Failures from 2012-2013

13. MSLP, while Davis was CFO, failed to disclose that it had one supplier that accounted for nearly 100% of its product purchases in its 2012 Commission filings as required under GAAP.

14. MSLP, while Davis was CFO, failed to disclose $100,000 of rent expense related to an August 2012 aircraft lease agreement in its 2012 Form 10-K as required under GAAP. As a result, MSLP understated its disclosed rent expense by 23%. In addition, MSLP, while Davis was CFO, instead of recognizing no gain or loss on the settlement since the $100,000 paid equaled the $100,000 owed per the lease agreement, MSLP recorded a $35,000 gain in 2013 related to the January 2013 settlement.

15. MSLP, while Davis was CFO, failed to disclose the amount of its international sales in its 2012 and 2013 Commission filings as required under GAAP. MSLP's international sales accounted for 30% for 2012 and 31% for 2013.

Books, Records, and Lack of Internal Controls

16. Because MSLP improperly recorded and/or reported its perquisites, related parties, manufacturing concentration, leases, and international sales, its books, records and accounts did not, in reasonable detail, accurately and fairly reflect its transactions and dispositions of assets.

17. In addition, MSLP failed to implement internal accounting controls relating to its perquisites, related parties, manufacturing concentration, leases, and international sales, which were sufficient to provide reasonable assurances that transactions were recorded as necessary to permit the preparation of financial statements in conformity with GAAP and to maintain the accountability of assets.

Violations

18. As a result of the conduct described above, Davis willfully[4] violated Sections 17(a)(2) and 17(a)(3) of the Securities Act and caused MSLP's violations of Sections 17(a)(2) and 17(a)(3) of the Securities Act, which make it unlawful for any person in the offer or sale of any

[4] A willful violation of the securities laws means merely "'that the person charged with the duty knows what he is doing.'" *Wonsover v. SEC*, 205 F.3d 408, 414 (D.C. Cir. 2000) (quoting *Hughes v. SEC*, 174 F.2d 969, 977 (D.C. Cir. 1949)). There is no requirement that the actor "'also be aware that he is violating one of the Rules or Acts.'" *Id.* (quoting *Gearhart & Otis, Inc. v. SEC*, 348 F.2d 798, 803 (D.C. Cir. 1965)).

securities by the use of interstate commerce to obtain money or property by means of any untrue statement of a material fact or any omission to state a material fact necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading; and to engage in any transaction, practice, or course of business which operates or would operate as a fraud or deceit upon the purchaser.

19. As a result of the conduct described above, Davis caused MSLP's violations of Section 13(a) of the Exchange Act Rules 13a-1, 13a-13, and 12b-20 thereunder, which require every issuer of a security registered pursuant to Section 12 of the Exchange Act file with the Commission information, documents, and annual and quarterly reports as the Commission may require, and mandate that periodic reports contain such further material information as may be necessary to make the required statements not misleading.

20. As a result of the conduct described above, Davis caused MSLP's violations of Section 13(b)(2)(A) of the Exchange Act, which requires reporting companies to make and keep books, records and accounts, which in reasonable detail, accurately and fairly reflect their transactions and dispositions of assets.

21. As a result of the conduct described above, Davis caused MSLP's violations of Section 13(b)(2)(B) of the Exchange Act and willfully violated Rule 13b2-1 thereunder, which require all reporting companies to devise and maintain a system of internal accounting controls sufficient to provide reasonable assurances that transactions are recorded as necessary to permit the preparation of financial statements in conformity with GAAP and to maintain the accountability of assets; and prohibit persons from directly or indirectly falsifying or causing to be falsified any book, record, or account.

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent Davis' Offer.

Accordingly, it is hereby ORDERED, effective immediately, that:

A. Davis shall cease and desist from committing or causing any violations and any future violations of Sections 17(a)(2) and 17(a)(3) of the Securities Act and Sections 13(a), 13(b)(2)(A), and 13(b)(2)(B) of the Exchange Act and Rules 12b-20, 13a-1, 13a-13, and 13b2-1 promulgated thereunder.

B. Davis is denied the privilege of appearing or practicing before the Commission as an accountant.

C. After two years from the date of this order, Respondent may request that the Commission consider his reinstatement by submitting an application (attention: Office of the Chief Accountant) to resume appearing or practicing before the Commission as:

1. a preparer or reviewer, or a person responsible for the preparation or review, of any public company's financial statements that are filed with the Commission. Such an application must satisfy the Commission that Respondent's work in his practice before the Commission will be reviewed either by the independent audit committee of the public company for which he works or in some other acceptable manner, as long as he practices before the Commission in this capacity; and/or

2. an independent accountant. Such an application must satisfy the Commission that:

   (a) Respondent, or the public accounting firm with which he is associated, is registered with the Public Company Accounting Oversight Board ("Board") in accordance with the Sarbanes-Oxley Act of 2002, and such registration continues to be effective;

   (b) Respondent, or the registered public accounting firm with which he is associated, has been inspected by the Board and that inspection did not identify any criticisms of or potential defects in the respondent's or the firm's quality control system that would indicate that the respondent will not receive appropriate supervision;

   (c) Respondent has resolved all disciplinary issues with the Board, and has complied with all terms and conditions of any sanctions imposed by the Board (other than reinstatement by the Commission); and

   (d) Respondent acknowledges his responsibility, as long as Respondent appears or practices before the Commission as an independent accountant, to comply with all requirements of the Commission and the Board, including, but not limited to, all requirements relating to registration, inspections, concurring partner reviews and quality control standards.

D. The Commission will consider an application by Respondent to resume appearing or practicing before the Commission provided that his state CPA license is current and he has resolved all other disciplinary issues with the applicable state boards of accountancy. However, if state licensure is dependent on reinstatement by the Commission, the Commission will consider an application on its other merits. The Commission's review may include consideration of, in addition to the matters referenced above, any other matters relating to Respondent's character, integrity, professional conduct, or qualifications to appear or practice before the Commission.

E. Respondent shall, within 10 days of the entry of this Order, pay a civil money penalty in the amount of $30,000 to the Securities and Exchange Commission. If timely payment is not made, additional interest shall accrue pursuant to 31 U.S.C. 3717. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying L. Gary Davis as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Thomas J. Krysa, Division of Enforcement, Securities and Exchange Commission, 1961 Stout Street, Suite 1700, Denver, CO 80294.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

SECURITIES ACT OF 1933
Release No. 9907 / September 8, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16794

In the Matter of **Ditto Holdings, Inc. (now known as SoVesTech, Inc.)** **Respondent.**	**ORDER INSTITUTING CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933, MAKING FINDINGS, AND IMPOSING A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that public cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 8A of the Securities Act of 1933 ("Securities Act") against Ditto Holdings, Inc. ("Ditto Holdings" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over it and the subject matter of these proceedings, which are admitted, Respondent consents to the entry of this Order Instituting Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933, Making Findings, and Imposing a Cease-and-Desist Order ("Order"), as set forth below:

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

Respondent

1. **Ditto Holdings, Inc.** is a Delaware corporation with offices in Los Angeles, California and Chicago, Illinois.[2] It is not registered with the Commission in any capacity. Ditto Holdings owns 100% of Ditto Trade, Inc. ("Ditto Trade"), an Illinois corporation with headquarters in Chicago, Illinois. According to its website, Ditto Trade is a "first-of-its-kind social brokerage firm." Ditto Trade has been registered with the Commission as a broker-dealer pursuant to Section 15 of the Exchange Act since July 2010.

Offerings of Ditto Holdings, Inc. Securities

2. From April 2009 to September 2013, Ditto Holdings raised approximately $10 million from more than two hundred investors located throughout the United States through a series of common and preferred stock offerings as follows:

a. Ditto Holdings raised approximately $2.1 million from the sale of common stock to at least 68 individual investors from April 2009 to March 2012. At least 13 non-accredited investors purchased common stock from Ditto Holdings during those offerings.

b. Ditto Holdings raised approximately $1.7 million from the sale of Series A preferred stock to at least 36 accredited investors from April 2011 to June 2012.

c. Ditto Holdings raised approximately $2.6 million from the sale of Series B preferred stock to at least 39 individual investors from June 2012 to January 2013. At least 10 non-accredited investors purchased preferred stock from Ditto Holdings during those offerings.

d. Ditto Holdings raised approximately $3.8 million from the sale of common stock to at least 104 individual investors from December 2012 to September 2013. At least 31 non-accredited investors purchased common stock from Ditto Holdings during those offerings.

3. Ditto Holdings did not maintain a complete and accurate set of financial records from its inception through at least September 2013. Ditto Holdings did not regularly prepare financial statements during that time period and has never had an audit performed on any of its financial statements.[3]

4. Ditto Holdings prepared offering documents for several of its securities offerings, but it did not provide the offering documents to everyone who was offered the opportunity to

[2] Ditto Holdings, Inc. was formed in December 2010 as a successor to FB Financial Group, Inc., an Illinois corporation that was formed in January 2009. Ditto Holdings changed its name to SoVesTech, Inc. in December 2014. For simplicity, we refer to all of these entities as Ditto Holdings throughout this Order.

[3] Ditto Trade, Ditto Holdings' sole operating subsidiary, has had its financial statements audited annually since 2010. Some investors were provided with certain historical and projected financial information about Ditto Trade.

purchase its securities. Further, the offering documents did not include financial statements or certain other required financial information about Ditto Holdings, and Ditto Holdings did not otherwise provide this information to any investors.

5. Beginning in August 2012, Ditto Holdings entered into a series of agreements with Marc Mandel ("Mandel"). Under the agreements, Mandel agreed to co-develop with Ditto Holdings an internet-based radio show covering the stock markets and provided a number of services to Ditto Holdings, including, among other things, marketing, product offerings, industry trends, and investor offerings. Mandel also hosted a radio program, on which Ditto Trade advertised, and distributed an investing newsletter. Mandel introduced his newsletter subscribers to Ditto Holding's securities offerings and also to Ditto Trade's features and services. From September 2012 to September 2013, Ditto Holdings paid Mandel at least $265,000 and granted him warrants to purchase more than 800,000 shares of Ditto Holdings' common stock at a favorable exercise price.

6. Mandel sent numerous emails to his roughly 350 newsletter subscribers about Ditto Holdings and hosted a series of online webinars and in-person meetings for investors with Ditto Holdings' Chief Executive Officer.

7. From late 2012 to September 2013, more than seventy of Mandel's subscribers purchased securities from Ditto Holdings at a total cost of approximately $3.7 million.

8. No registration statement was filed in connection with any of Ditto Holdings' securities offerings, and an exemption from registration was not available to all of the transactions.

Violation

9. As a result of the conduct described above, Ditto Holdings violated Sections 5(a) and 5(c) of the Securities Act, which prohibit the direct or indirect offer and sale of securities through the mails or interstate commerce unless a registration statement has been filed or is in effect or an exemption from registration is available.

Undertaking

10. In determining whether to accept the Respondent's Offer, the Commission has considered the following undertaking:

a. Respondent agrees to cooperate fully with the Commission with respect to this action and any judicial or administrative proceeding or investigation commenced by the Commission or to which the Commission is a party relating to the matters in this Order or other matters related to Ditto Holdings' securities or officers. Respondent's cooperation shall include, but is not limited to:

i. Production of Information. At the Commission's request on reasonable notice and without a subpoena, Respondent shall truthfully and completely disclose information and documents requested by

Commission staff in connection with the Commission's related investigation, litigation or other proceedings. Respondent will have no obligation to provide information or documents voluntarily that it is not able to provide without a subpoena.

ii. Production of Cooperative Personnel. At the Commission's request on reasonable notice and without a subpoena, Respondent shall use reasonable efforts to secure the attendance and truthful statements or testimony of any current partner, officer, agent, or employee of Respondent, at any meeting, interview, testimony, deposition, trial or other legal proceeding.

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent's Offer.

Accordingly, it is hereby ORDERED that:

1. Pursuant to Section 8A of the Securities Act, Respondent Ditto Holdings cease and desist from committing or causing any violations and any future violations of Sections 5(a) and 5(c) of the Securities Act;

2. Respondent Ditto Holdings shall pay a civil money penalty in the amount of $50,000 to the Securities and Exchange Commission. Payment shall be made in the following installments:

(1) $16,667 within twenty days of entry of this Order;

(2) $16,667 within eighty days of entry of this Order; and

(3) $16,666 within one hundred forty days of entry of this Order.

If any payment is not made by the date the payment is required by this Order, the entire outstanding balance of civil penalties, plus any additional interest accrued pursuant to 31 U.S.C. 3717, shall be due and payable immediately, without further application. Payment must be made in one of the following ways:

(1) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(2) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341

6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Ditto Holdings, Inc. as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Anne C. McKinley, Assistant Regional Director, Division of Enforcement, Securities and Exchange Commission, Chicago Regional Office, 175 West Jackson Boulevard, Suite 900, Chicago, Illinois 60604.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75857 / September 8, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16795

In the Matter of Joseph J. Fox, Respondent.	ORDER INSTITUTING ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933 AND SECTION 15(b) OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER AND NOTICE OF HEARING

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that public administrative and cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 8A of the Securities Act of 1933 ("Securities Act") and Section 15(b) of the Securities Exchange Act of 1934 ("Exchange Act") against Joseph J. Fox ("Fox" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer"), which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section VI, Respondent consents to the entry of this Order Instituting Administrative and Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933 and Section 15(b) of the Securities Exchange Act of 1934, Making Findings, Imposing Remedial Sanctions and a Cease-and-Desist Order and Notice of Hearing ("Order"), as set forth below:

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

Respondent

1. **Joseph J. Fox**, also known as Yosef Yehuda Fox, age 49, is a resident of Los Angeles, California. He is the current Chief Executive Officer of Ditto Holdings, Inc. and served as the Chief Executive Officer of Ditto Trade, Inc. from its inception until December 2014. Fox held various FINRA licenses between 1993 and 2003, and since 2010 he has held the following FINRA licenses: Series 7 (General Securities Representative), Series 24 (General Securities Principal), Series 28 (Introducing Broker/Dealer Financial and Operations Principal) and Series 63 (Uniform Securities Agent State Law Examination). He was a registered representative with Ditto Trade from 2010 to December 2014. Fox voluntarily withdrew his broker's license in December 2014.

Relevant Entity

2. **Ditto Holdings, Inc.** is a Delaware corporation with offices in Los Angeles, California and Chicago, Illinois.[2] It is not registered with the Commission in any capacity. Ditto Holdings owns 100% of Ditto Trade, Inc. ("Ditto Trade"), an Illinois corporation with headquarters in Chicago, Illinois. According to its website, Ditto Trade is a "first-of-its-kind social brokerage firm." Ditto Trade has been registered with the Commission as a broker-dealer pursuant to Section 15 of the Exchange Act since July 2010.

Ditto Holdings, Inc.'s Securities Offerings

3. As Chief Executive Officer and a member of the Board of Directors of Ditto Holdings, Fox played an integral role in Ditto Holdings' efforts to raise capital. Among other things, Fox was involved in determining when Ditto Holdings would offer to sell securities, what types of securities it would offer to sell, the terms of the securities offerings, and the manner in which the securities offerings would be communicated to potential investors.

4. From April 2009 to September 2013, Ditto Holdings raised approximately $10 million from more than two hundred investors located throughout the United States through a series of common and preferred stock offerings as follows:

   a. Ditto Holdings raised approximately $2.1 million from the sale of common stock to at least 68 individual investors from April 2009 to March 2012. At least 13 non-accredited investors purchased common stock from Ditto Holdings during those offerings.

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

[2] Ditto Holdings, Inc. was formed in December 2010 as a successor to FB Financial Group, Inc., an Illinois corporation that was formed in January 2009. Ditto Holdings changed its name to SoVesTech, Inc. in December 2014. For simplicity, we refer to all of these entities as Ditto Holdings throughout this Order.

b. Ditto Holdings raised approximately $1.7 million from the sale of Series A preferred stock to at least 36 accredited investors from April 2011 to June 2012.

c. Ditto Holdings raised approximately $2.6 million from the sale of Series B preferred stock to at least 39 individual investors from June 2012 to January 2013. At least 10 non-accredited investors purchased preferred stock from Ditto Holdings during those offerings.

d. Ditto Holdings raised approximately $3.8 million from the sale of common stock to at least 104 individual investors from December 2012 to September 2013. At least 31 non-accredited investors purchased common stock from Ditto Holdings during those offerings.

5. Ditto Holdings did not maintain a complete and accurate set of financial records from its inception through at least September 2013. Ditto Holdings did not regularly prepare financial statements during that time period and has never had an audit performed on any of its financial statements.[3]

6. Ditto Holdings prepared offering documents for several of its securities offerings, but it did not provide the offering documents to everyone who was offered the opportunity to purchase its securities. Further, the offering documents did not include financial statements or certain other required financial information about Ditto Holdings, and Ditto Holdings did not otherwise provide this information to any investors.

7. Beginning in August 2012, Ditto Holdings entered into a series of agreements with Marc Mandel ("Mandel"). Under the agreements, Mandel agreed to co-develop with Ditto Holdings an internet-based radio show covering the stock markets and provided a number of services to Ditto Holdings, including, among other things, advice on marketing, product offerings, industry trends, and investor offerings. Mandel also hosted a radio program, on which Ditto Trade advertised, and distributed an investing newsletter. Mandel introduced his newsletter subscribers to Ditto Holding's securities offerings and also to Ditto Trade's features and services. From September 2012 to September 2013, Ditto Holdings paid Mandel at least $265,000 and granted him warrants to purchase more than 800,000 shares of Ditto Holdings' common stock at a favorable exercise price.

8. Mandel sent numerous emails to his roughly 350 newsletter subscribers about Ditto Holdings and hosted a series of online webinars and in-person meetings for investors with Fox.

9. From late 2012 to September 2013, more than seventy of Mandel's subscribers purchased securities from Ditto Holdings at a total cost of approximately $3.7 million.

[3] Ditto Trade, Ditto Holdings' sole operating subsidiary, has had its financial statements audited annually since 2010. Some investors were provided with certain historical and projected financial information about Ditto Trade.

10. No registration statement was filed in connection with any of Ditto Holdings' securities offerings, and an exemption from registration was not available to all of the transactions.

Fox's Sales of Ditto Holdings, Inc. Securities

11. At the time that Ditto Holdings was formed in 2009, it issued shares of common stock to its founders, including Fox.

12. Beginning in February 2013, Fox discussed selling some of Fox's shares of Ditto Holdings common stock with Mandel. Fox discussed with Mandel whether any of his newsletter subscribers were interested in purchasing any of the shares. Fox provided Mandel with a stock purchase agreement, which included instructions for how to wire investment funds to Fox, and told Mandel that the stock purchase agreement was the only document interested purchasers would need to complete.

13. In March 2013, Mandel began sending emails to some of his roughly 350 newsletter subscribers praising Ditto Holdings and telling them about the opportunity to buy shares of Ditto Holdings stock. When individuals indicated an interest in buying shares of Ditto Holdings stock, Mandel provided them with a copy of the stock purchase agreement and told them to contact Fox if they needed more information.

14. From April 2013 to July 2013, approximately 28 of Mandel's subscribers purchased approximately 1.21 million shares of stock from Fox at a total cost of approximately $1.25 million. Fox did not sell shares to anyone who was not associated with Mandel.

15. During the same period, Fox paid Mandel at least $124,000 in three installments. The payments Fox made to Mandel corresponded to roughly 10% of the amount of Fox's sales.

16. Neither Fox nor anyone acting on his behalf took any steps to determine whether any of the individuals who purchased Fox's shares of Ditto Holdings stock were sophisticated investors. At least two of the purchasers had previously identified themselves to Ditto Holdings as non-accredited investors.

17. The investors did not have access to financial statements or other required information about Ditto Holdings in connection with Fox's sales of Ditto Holdings common stock.

18. No registration statement was filed in connection with any of Ditto Holdings' securities, and no exemption from registration was applicable to Fox's sales.

Violation

19. As a result of the conduct described above, Fox willfully violated Sections 5(a) and 5(c) of the Securities Act, which prohibit the direct or indirect offer and sale of securities through the mails or interstate commerce unless a registration statement has been filed or is in effect or an exemption from registration is available.[4]

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent's Offer.

Accordingly, pursuant to Section 8A of the Securities Act and Section 15(b) of the Exchange Act, it is hereby ORDERED that:

1. Respondent Fox cease and desist from committing or causing any violations and any future violations of Sections 5(a) and 5(c) of the Securities Act;

2. Respondent shall pay disgorgement of $125,210, which represents profits gained as a result of the conduct described herein, prejudgment interest of $5,426, and a civil penalty of $75,000 to the Securities and Exchange Commission. Payment shall be made in the following installments:

(1) $10,000 within 14 days of entry of this Order;

(2) $10,000 within 104 days of entry of this Order;

(3) $10,000 within 194 days of entry of this Order; and

(4) $175,636 within 284 days of entry of this Order.

If any payment is not made by the date the payment is required by this Order, the entire outstanding balance of disgorgement, prejudgment interest and civil penalties, plus any additional interest accrued pursuant to SEC Rule of Practice 600 or pursuant to 31 U.S.C. 3717, shall be due and payable immediately, without further application. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

---

[4] A willful violation of the securities laws means merely "'that the person charged with the duty knows what he is doing.'" Wonsover v. SEC, 205 F.3d 408, 414 (D.C. Cir. 2000) (quoting Hughes v. SEC, 174 F.2d 969, 977 (D.C. Cir. 1949)). There is no requirement that the actor "'also be aware that he is violating one of the Rules or Acts.'" Id. (quoting Gearhart & Otis, Inc. v. SEC, 348 F.2d 798, 803 (D.C. Cir. 1965)).

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Joseph Fox as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Anne C. McKinley, Assistant Regional Director, Division of Enforcement, Securities and Exchange Commission, Chicago Regional Office, 175 West Jackson Boulevard, Suite 900, Chicago, Illinois 60604.

IT IS FURTHER ORDERED, pursuant to Rule 100(c) of the Commission's Rules of Practice, 17 C.F.R. § 201.100(c), in the interest of justice and without prejudice to any party to the proceeding, that a public hearing for the purpose of taking evidence on the questions set forth in Section V hereof shall be convened at a time and place to be fixed by, and before, an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice, 17 C.F.R. § 201.110.

If Respondent Fox fails to appear at a hearing after being duly notified, he may be deemed in default and the proceedings may be determined against him upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 221(f), and 310 of the Commission's Rules of Practice, 17 C.F.R. §§ 201.155(a), 201.221(f), and 201.310.

This Order shall be served forthwith upon Respondent Fox as provided for in the Commission's Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 300 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice.

V.

Pursuant to this Order, Respondent agrees to additional proceedings in this proceeding to determine what, if any, additional non-financial remedial sanctions against Respondent pursuant to Section 15(b)(6) of the Exchange Act are in the public interest. In connection with such additional proceedings: (a) Respondent agrees that he will be precluded from arguing that he did not violate the federal securities laws as described in this Order; (b) Respondent agrees that he may not challenge the validity of this Order; (c) solely for the purposes of such additional proceedings, the findings of this Order shall be accepted as and deemed true by the hearing officer; and (d) the hearing officer may determine the issues raised in the additional proceedings on the basis of affidavits, declarations, excerpts of sworn deposition or investigative testimony, and documentary evidence or in-person testimony at a public hearing.

VI.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

VII.

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

By the Commission.

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Instituting Administrative and Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933 and Sections 15(b) and 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order ("Order"), as set forth below:

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

Respondent

1. **Marc S. Mandel**, age 63, is a resident of Boulder, Colorado. Since 1998, he has been the President and Chief Executive Officer of Wall Street Radio, Inc., through which he hosts a daily financial talk radio program and distributes a financial newsletter to paid subscribers.

Relevant Entity & Individual

2. **Ditto Holdings, Inc.** ("Ditto Holdings") is a Delaware corporation with offices in Los Angeles, California and Chicago, Illinois.[2] It is not registered with the Commission in any capacity. Ditto Holdings owns 100% of Ditto Trade, Inc. ("Ditto Trade"), an Illinois corporation with headquarters in Chicago, Illinois. According to its website, Ditto Trade is a "first-of-its-kind social brokerage firm." Ditto Trade has been registered with the Commission as a broker-dealer pursuant to Section 15 of the Exchange Act since July 2010.

3. **Joseph J. Fox** ("Fox"), also known as Yosef Yehuda Fox, age 49, is a resident of Los Angeles, California. He is the current Chief Executive Officer of Ditto Holdings and served as the Chief Executive Officer of Ditto Trade from its inception until December 2014. He was a registered representative with Ditto Trade from 2010 to December 2014.

Ditto Holdings, Inc.'s Securities Offerings

4. Ditto Holdings conducted a series of common and preferred stock offerings ending in September 2013.

5. Beginning in late 2012, Ditto Holdings sought help from Mandel to, among other things, introduce his newsletter subscribers to Ditto Trade's services and Ditto Holdings' securities offerings.

6. Mandel discussed Ditto Holdings' securities offerings with Fox and obtained special pricing and incentives for the investors that he brought to Ditto Holdings.

7. Mandel sent a number of emails to his roughly 350 newsletter subscribers describing Ditto Holdings as the "best opportunity of his lifetime" and suggesting that Ditto

---

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

[2] Ditto Holdings, Inc. was formed in December 2010 as a successor to FB Financial Group, Inc., an Illinois corporation that was formed in January 2009. Ditto Holdings changed its name to SoVesTech, Inc. in December 2014. For simplicity, we refer to all of these entities as Ditto Holdings throughout this Order.

Holdings planned to conduct an initial public offering during 2014 at a price that was nearly ten times higher than the price at which Ditto Holdings was then selling its shares. He also co-hosted a series of online webinars and in-person meetings for investors with Fox.

8. From late 2012 to September 2013, more than seventy of Mandel's subscribers purchased securities from Ditto Holdings at a total cost of approximately $3.7 million. Mandel took possession of some of the investors' funds before transferring them to Ditto Holdings.

9. Several of Mandel's subscribers who purchased securities from Ditto Holdings identified themselves to Ditto Holdings as non-accredited investors. The investors were not given financial statements or certain other required financial information about Ditto Holdings.

<u>Fox's Offering of Ditto Holdings, Inc.'s Securities</u>

10. Beginning in February 2013, Fox sought Mandel's help in selling some of Fox's personal shares of Ditto Holdings common stock. Fox told Mandel that he wanted to sell approximately one million shares of Ditto Holdings stock and asked Mandel to see if any of Mandel's newsletter subscribers were interested in purchasing shares. Fox provided Mandel with a stock purchase agreement, which included instructions for how to wire investment funds to Fox, and told him that the stock purchase agreement was the only document interested purchasers would need to complete.

11. In March 2013, Mandel began sending emails to some of his roughly 350 newsletter subscribers describing Ditto Holdings as an excellent investment opportunity, stating that Ditto Holdings planned to have an initial public offering at $10 per share during 2014, and telling them that he had "worked out a sweetheart deal" with Fox to gain access to one million shares at $1 per share. He also co-hosted a series of online webinars and in-person meetings with Fox for investors.

12. When individuals indicated an interest in purchasing shares of Ditto Holdings stock from Fox, Mandel provided them with a copy of the stock purchase agreement and put them in contact with Fox if they wanted more information.

13. From April 2013 to July 2013, approximately 28 of Mandel's subscribers purchased stock from Fox at a total cost of approximately $1.25 million.

14. During the same period, Fox paid Mandel at least $124,000 in three installments. Each of the payments was worth approximately 10% of the amount of money that Fox had received from his sales of Ditto Holdings stock as of the date of the payment.

15. Mandel took no steps to determine whether any of the individuals who purchased Fox's shares of Ditto Holdings stock were sophisticated investors. At least two of the purchasers had previously identified themselves to Ditto Holdings as non-accredited investors.

16. Mandel did not provide the purchasers with access to any financial statements or other required information about Ditto Holdings.

17. During 2012 and 2013, Mandel was not registered with the Commission in any capacity or associated with a registered broker or dealer.

18. No registration statement was filed in connection with any of Ditto Holdings' securities, and no exemption from registration was applicable to either Ditto's or Fox's sales through Mandel.

Violations

19. As a result of the conduct described above, Mandel willfully violated Sections 5(a) and 5(c) of the Securities Act, which prohibit the direct or indirect offer and sale of securities through the mails or interstate commerce unless a registration statement has been filed or is in effect or an exemption from registration is available.[3]

20. As a result of the conduct described above, Mandel willfully violated Section 15(a) of the Exchange Act, which prohibits the use of the mails or any means or instrumentality of interstate commerce to effect any transaction in, or to induce or attempt to induce the purchase or sale of, any security without being registered with the Commission pursuant to Section 15(b) of the Exchange Act or being associated with a registered broker or dealer.

Disgorgement and Civil Penalties

21. Respondent has submitted a sworn Statement of Financial Condition dated September 20, 2014 (updated March 18, 2015) and other evidence and has asserted his inability to pay disgorgement plus prejudgment interest and a civil penalty.

Undertaking

22. In determining whether to accept the Respondent's Offer, the Commission has considered the following undertaking:

a. Respondent agrees to cooperate fully with the Commission with respect to this action and any judicial or administrative proceeding or investigation commenced by the Commission or to which the Commission is a party relating to the matters in this Order or other matters related to Ditto Holdings' securities or officers. Respondent's cooperation shall include, but is not limited to:

   i. Production of Information. At the Commission's request on reasonable notice and without a subpoena, Respondent shall truthfully and completely disclose information and documents requested by Commission staff in connection with the Commission's related

[3] A willful violation of the securities laws means merely "'that the person charged with the duty knows what he is doing.'" Wonsover v. SEC, 205 F.3d 408, 414 (D.C. Cir. 2000) (quoting Hughes v. SEC, 174 F.2d 969, 977 (D.C. Cir. 1949)). There is no requirement that the actor "'also be aware that he is violating one of the Rules or Acts.'" Id. (quoting Gearhart & Otis, Inc. v. SEC, 348 F.2d 798, 803 (D.C. Cir. 1965)).

investigation, litigation or other proceedings. Respondent will have no obligation to provide information voluntarily that it is not able to provide without a subpoena.

ii. Statements and Testimony. At the Commission's request on reasonable notice and without a subpoena, Respondent shall attend and provide truthful statements or testimony at any meeting, interview, testimony, deposition, trial or other legal proceeding in connection with the Commission's related investigation, litigation or other proceedings.

IV.

In view of the foregoing, the Commission deems it appropriate, in the public interest, and for the protection of investors to impose the sanctions agreed to in Respondent's Offer.

Accordingly, pursuant to Section 8A of the Securities Act and Section 15(b) and 21C of the Exchange Act, it is hereby ORDERED that:

A. Respondent Mandel cease and desist from committing or causing any violations and any future violations of Sections 5(a) and 5(c) of the Securities Act and Section 15(a) of the Exchange Act;

B. Respondent Mandel be, and hereby is:

barred from association with any broker, dealer, investment adviser, municipal securities dealer, municipal advisor, transfer agent, or nationally recognized statistical rating organization; and

barred from participating in any offering of a penny stock, including: acting as a promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer or issuer for purposes of the issuance or trading in any penny stock, or inducing or attempting to induce the purchase or sale of any penny stock

with the right to apply for reentry after two (2) years to the appropriate self-regulatory organization, or if there is none, to the Commission.

C. Any reapplication for association by the Respondent will be subject to the applicable laws and regulations governing the reentry process, and reentry may be conditioned upon a number of factors, including, but not limited to, the satisfaction of any or all of the following: (a) any disgorgement ordered against the Respondent, whether or not the Commission has fully or partially waived payment of such disgorgement; (b) any arbitration award related to the conduct that served as the basis for the Commission order; (c) any self-regulatory organization arbitration award to a customer, whether or not related to the conduct that served as the basis for the Commission order; and (d) any restitution order by a self-regulatory organization, whether or not related to the conduct that served as the basis for the Commission order.

D. Respondent shall pay disgorgement of $124,000 which represents profits gained as a result of the conduct described herein, and prejudgment interest of $5,374, but that payment of such amount except for $62,000 is waived and the Commission is not imposing a penalty against Respondent based upon Respondent's sworn representations in his Statement of Financial Condition dated September 20, 2014 (updated March 18, 2015) and other documents submitted to the Commission. The payment required by this Order shall be made to the Securities and Exchange Commission. Payment shall be made in the following installments:

(1) $1,033 no later than the 28th day of each month beginning in September 2015 and continuing through July 2020; and

(2) $1,053 no later than the 28th day of August 2020.

If any payment is not made by the date the payment is required by this Order, the entire outstanding balance of disgorgement, plus any additional interest accrued pursuant to SEC Rule of Practice 600, shall be due and payable immediately, without further application. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Marc Mandel as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Anne C. McKinley, Assistant Regional Director, Division of Enforcement, Securities and Exchange Commission, Chicago Regional Office, 175 West Jackson Boulevard, Suite 900, Chicago, Illinois 60604.

E. The Division of Enforcement ("Division") may, at any time following the entry of this Order, petition the Commission to: (1) reopen this matter to consider whether Respondent provided accurate and complete financial information at the time such representations were made; (2) seek an order directing payment of disgorgement and pre-judgment interest; and (3) seek an order directing payment of the maximum civil penalty allowable under the law. No other issue shall be considered in connection with this petition other than whether the financial information provided by Respondent was fraudulent, misleading, inaccurate, or incomplete in any material respect. Respondent may not, by way of defense to any such petition: (1) contest the findings in this Order; (2) assert that payment of disgorgement and interest should not be ordered; (3) contest the amount of disgorgement and interest to be ordered; or (4) assert any defense to liability or remedy, including, but not limited to, any statute of limitations defense.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

By the Commission.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75855 / September 8, 2015

ACCOUNTING AND AUDITING ENFORCEMENT
Release No. 3687 / September 8, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16792

In the Matter of **Donald W. Prosser, CPA,** **Respondent.**	**ORDER INSTITUTING CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 21C OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 21C of the Securities Exchange Act of 1934 ("Exchange Act"), against Donald W. Prosser ("Prosser" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Instituting Cease-and-Desist Proceedings Pursuant to Section 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

Summary

MusclePharm Corporation ("MSLP") is a Denver-based sports nutrition company that develops, manufactures, and markets sports nutrition products. When MSLP became a public company in 2010, it was unprepared for the Commission's reporting requirements and lacked sufficient infrastructure to support its rapid growth. MSLP's revenues greatly increased each year (MSLP's reported revenue was $3M in 2010, $17M in 2011, $67M in 2012 and $111M in 2013). MSLP's senior management lacked public company or accounting experience. While the company focused on revenue growth, it failed to establish sufficient internal controls and keep proper books and records. From July 2012 through April 10, 2014, Prosser was a member of MSLP's board of directors and chair of the audit committee. Beginning in September 2012, Prosser, the board of directors and members of senior management had reason to know that MSLP had not disclosed certain perquisite compensation paid to its executive officers. Prosser, however, knew or should have known that he signed materially false and misleading filings with the Commission that failed to disclose all perquisites MSLP was required to disclose under the securities laws. By summer 2013, MSLP began an internal review to determine the amount of undisclosed perquisites paid by MSLP to its executives since 2010. In July 2013, Prosser became directly involved in MSLP's internal perquisite review. MSLP nevertheless continued to make filings with the Commission that materially understated perquisite compensation through July 2014.

Respondent

1. Donald W. Prosser, CPA, age 64, a resident of Denver, Colorado, was a member of the MSLP board of directors from July 2012 through April 10, 2014. As an independent member of the MSLP board of directors, Prosser served as chair of the audit committee, a member of the compensation committee, and a member of the nominating and governance committee. From April 10, 2014 through March 2, 2015, Prosser served as interim chief financial officer ("CFO") of MSLP. Prosser has been licensed as a certified public accountant ("CPA") in Colorado since 1977, except for the three year period from June 1, 1998 to June 26, 2001.

Relevant Entity

2. MSLP is a Nevada corporation, based in Denver, Colorado, that manufactures and markets sports nutrition products. From 2010 to present, MSLP's common stock was registered with the Commission pursuant to Section 12(g) of the Exchange Act and was quoted on the OTC Bulletin Board.

---

1 The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

Prosser's Role in MSLP's Executive Compensation Disclosures

3. In September 2012, according to the MSLP board minutes, Prosser attended a meeting of the MSLP board of directors and compensation committee. During the meeting, the MSLP board of directors determined perquisites related to autos, golf club memberships, and private plane usage would be disclosed in Commission filings. MSLP, however, filed several Commission filings in the form of Forms 10-K and Forms S-1, as well as amendments thereto, through July 2014, which failed to include complete disclosure of the perquisites identified at the September 2012 board meeting and otherwise known by senior management. Prosser signed these filings as a director.

4. On January 4, 2013, Prosser attended a meeting of the MSLP Compensation Committee of the board of directors. During the meeting, it was resolved that the cost of the use of a private plane from non-employee relatives of MSLP officers in 2012 would be imputed to the executives. MSLP, however, filed several Commission filings in the form of Forms 10-K and Forms S-1, as well as amendments thereto, through March 2014, which failed to include perquisites related to officer spousal use of a private plane in 2012. Prosser signed these filings as a director.

5. By summer 2013, MSLP began an internal review of its records to determine the amount of undisclosed perquisites paid by MSLP to its executives since 2010. MSLP's CFO began this review and in July identified over $100,000 of undisclosed perquisites, including jet use, autos, and golf club memberships and informed Prosser of the amount of undisclosed perquisites located to date.

6. In July 2013, the audit committee, with Prosser as its chair, became directly involved in MSLP's perquisite review process. MSLP hired an outside consultant to perform a factual review of documents and information related to potential perquisites. MSLP, however, filed a Form S-1 in August 2013 with incorrect perquisite disclosures that were identical to amounts previously disclosed before the internal review. Prosser signed this filing as a director.

7. After the August Form S-1 was filed, Prosser assisted and supervised the independent consultant in connection with his review of perquisites. Prosser also approved the independent consultant's work plan and consulted with the independent consultant during the review.

8. In December 2013, MSLP stopped using the independent consultant. The board approved and MSLP hired an internal auditor and assigned the perquisite review to the internal auditor. Prosser assisted and supervised the work of the internal auditor and consulted with the internal auditor during the review.

9. On March 31, 2014, MSLP filed its Form 10-K for the year ended December 31, 2013. Prosser approved and signed this filing. The 2013 Form 10-K included a revised executive compensation table for the years 2011-2013. In the table, MSLP set forth previously undisclosed perquisites for 2011 and 2012 totaling approximately $189,000 ($73,000 for 2011 and $115,000

for 2012). The table also disclosed approximately $130,000 of perquisites in 2013. These disclosures, however, still significantly understated perquisites paid to MSLP executives.

10. On April 14, 2014, Prosser resigned from the MSLP board, including as a member of the audit committee as its chair, and became MSLP's interim CFO.

11. On July 23, 2014, MSLP filed a Definitive Proxy Statement, which included the same deficient perquisite disclosure as the 2013 Form 10-K.

12. MSLP and its audit committee reexamined its perquisite investigation results from spring 2014 through fall 2014. On October 31, 2014, MSLP filed amended Forms 10-K for the years ended 2012 and 2013. Prosser signed these filings as the Principal Financial Officer and Principal Accounting Officer. The 2013 Form 10-K/A disclosed approximately $252,000 of additional perquisites for the years 2011, 2012, and 2013 that were not included in the 2013 Form 10-K or MSLP's July 2014 proxy statement. The 2012 Form 10-K/A disclosed approximately $37,000 of additional perquisites for 2010. In total, MSLP failed to report perquisites totaling approximately $482,000 from 2010-2013.

13. Because MSLP did not properly identify and record perquisites paid to its executives, MSLP's books, records and accounts did not, in reasonable detail, accurately and fairly reflect its transactions and dispositions of assets and its filings with the Commission were materially false and misleading.

Violations

14. As a result of the conduct described above, Prosser caused MSLP's violations of Section 14(a) of the Exchange Act and Rule 14a-9 thereunder, which prohibits solicitations by means of a proxy statement, form of proxy, notice of meeting or other communication, written or oral, containing a statement which, at the time and in the light of the circumstances under which it was made, was false or misleading with respect to any material fact, or which omitted to state any material fact necessary in order to make the statements therein not false or misleading or necessary to correct any statement in any earlier communication with respect to the solicitation of a proxy for the same meeting or subject matter which has become false or misleading.

15. As a result of the conduct described above, Prosser caused MSLP's violations of Section 13(a) of the Exchange Act Rules 13a-1 and 12b-20 thereunder, which require every issuer of a security registered pursuant to Section 12 of the Exchange Act file with the Commission information, documents, and annual and quarterly reports as the Commission may require, and mandate that periodic reports contain such further material information as may be necessary to make the required statements not misleading.

16. As a result of the conduct described above, Prosser caused MSLP's violations of Section 13(b)(2)(A) of the Exchange Act, which requires reporting companies to make and keep books, records and accounts, which in reasonable detail, accurately and fairly reflect their transactions and dispositions of assets.

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent Prosser's Offer.

Accordingly, it is hereby ORDERED that:

A. Pursuant to Section 21C of the Exchange Act, Respondent Prosser cease and desist from committing or causing any violations and any future violations of Sections 13(a), 13(b)(2)(A), and 14(a) of the Exchange Act and Rules 12b-20, 13a-1, and 14a-9 thereunder.

B. Respondent shall, within 10 days of the entry of this Order, pay a civil money penalty in the amount of $30,000 to the Securities and Exchange Commission. If timely payment is not made, additional interest shall accrue pursuant to 31 U.S.C. 3717. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Donald W. Prosser as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Thomas J. Krysa, Division of Enforcement, Securities and Exchange Commission, 1961 Stout Street, Suite 1700, Denver, CO 80294.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

ADMINISTRATIVE PROCEEDING
File No. 3-16801

In the Matter of **BENNETT GROUP FINANCIAL SERVICES, LLC** **and** **DAWN J. BENNETT,** **Respondents.**	**ORDER INSTITUTING ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933, SECTIONS 15(b) AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934, SECTIONS 203(e), 203(f), AND 203(k) OF THE INVESTMENT ADVISERS ACT OF 1940, AND SECTION 9(b) OF THE INVESTMENT COMPANY ACT OF 1940**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative and cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 8A of the Securities Act of 1933 ("Securities Act"), Sections 15(b) and 21C of the Securities Exchange Act of 1934 ("Exchange Act"), Sections 203(e), 203(f), and 203(k) of the Investment Advisers Act of 1940 ("Advisers Act"), and Section 9(b) of the Investment Company Act of 1940 ("Investment Company Act") against Bennett Group Financial Services, LLC ("Bennett Group") and Dawn J. Bennett ("Bennett").

II.

After an investigation, the Division of Enforcement alleges that:

A. SUMMARY

1. From at least 2009 through February 2011, Bennett Group and its founder, majority owner, and Chief Executive Officer, Bennett, made material misstatements and omissions regarding assets that were purportedly "managed" for investors and regarding investment returns for the purpose of retaining existing customers and attracting new customers. Then, during the investigation of this matter, Bennett and Bennett Group made additional misstatements in an effort to obstruct the investigation and to "cover up" their prior fraud.

2. In short, Bennett and Bennett Group grossly overstated the amount of assets they "managed," by at least $1.5 billion, in a calculated effort to inflate their profile and prestige. They made the false and fraudulent claims to a national financial advisor ranking service knowing that the ranking service would publish the misstatements. They also made the misstatements on a Washington, D.C.–area radio program hosted by Bennett, and in a variety of other advertisements and communications with existing and prospective customers and clients. The purpose of these overstatements was to create the impression that Bennett and Bennett Group were larger and more successful players in the industry than they were.

3. Bennett and Bennett Group also made material misstatements and omissions during the radio show regarding Bennett Group's investment returns and performance. Bennett frequently touted her firm's highly profitable investment returns and claimed that those returns placed Bennett Group in the "top 1%" of firms worldwide. In violation of her legal disclosure duties and specific advice she received, Bennett failed to disclose that the purported "returns" were simply those of a "model portfolio" and did not reflect actual customer returns.

4. In addition to the material misstatements and omissions about these matters, Bennett and Bennett Group failed to adopt and to implement adequate written policies and procedures related to the calculation and advertisement of assets managed and of investment returns.

5. During the investigation of this matter, in order to substantiate their prior fraudulent claims regarding assets managed and to obstruct this investigation, Respondents made additional false statements. They falsely asserted that they gave advice regarding short-term cash management to three corporate clients regarding over $1.5 billion in corporate assets. In reality, they never provided the advice, and these were simply lies meant to deceive the Division of Enforcement. Bennett and Bennett Group never provided any form of management for assets in excess of approximately $407 million.

B. RESPONDENTS

6. Bennett Group is a Delaware limited liability company and financial services firm headquartered in Chevy Chase, Maryland. At the relevant time, most key Bennett Group employees were registered representatives associated with Western International Securities, Inc. ("Western Securities"), a broker-dealer registered with the Commission, and almost all of Bennett Group's revenue was generated through commissions earned by the registered representatives, who provided nondiscretionary services. In 2008, Bennett Group registered with the Commission as an investment adviser and withdrew that registration in October 2013. Bennett owns approximately ninety-five percent of Bennett Group and controls (and at all relevant times controlled) all aspects of Bennett Group's operations.

7. Bennett, age 53, lives in Chevy Chase, Maryland. She is, and at all relevant times was, the founder, Chief Executive Officer, and majority owner of Bennett Group. Bennett has been a registered representative affiliated with various registered broker-dealers since at least February 1987. Bennett holds, and at all relevant times held, Series 7, 63, and 65 securities licenses. Bennett was the subject of two arbitration proceedings in 2014 in which the complainants were awarded compensation as a result of churning, unauthorized trading, and unsuitability.

C. FACTS

(i) BENNETT AND HER FIRM MADE MATERIAL MISSTAMENTS AND OMISSIONS REGARDING ASSETS "MANAGED"

8. From at least 2009 through 2011, Bennett and Bennett Group falsely claimed to be managing assets totaling \$1.1 billion to over \$2 billion, including through a nationally circulated industry periodical that ranked financial advisors and through a variety of other advertisements and communications directed to existing and prospective customers and clients. In reality, the most Bennett and her firm could, in any sense, be said to be managing during the relevant period was approximately \$407 million.

9. Bennett and her firm misrepresented the amount of assets managed in order to inflate their stature and thereby attract new customers and clients to the firm by creating the impression that they were larger and more successful players than they in fact were. At the time Respondents made these misstatements, they had a fledgling investment advisory business that they hoped to bolster by attracting new advisory clients, lured by their claims of industry success and impressive investment returns.

10. After Bennett and Bennett Group made their false and fraudulent claims regarding assets managed, prospective customers and clients became customers and clients,

thereby generating compensation for Bennett and Bennett Group, including in the form of brokerage commissions generated through the purchase or sale of securities. Further, existing customers and clients bought or sold securities through Bennett and her firm after receiving the false and fraudulent communications, which generated compensation, including commissions, for Bennett and her firm.

11. From 2009 through 2011, Bennett and Bennett Group made three submissions to Barron's magazine for its rankings of independent financial advisors.

12. In these submissions to Barron's, Bennett and Bennett Group falsely claimed that they managed assets of between \$1.1 billion and \$1.8 billion. Barron's used these submissions when compiling and publishing various rankings of financial advisors. As a result of the submissions, Barron's: (a) ranked Bennett fifth in the category of "Top 100 Women Financial Advisors" in its June 9, 2009, issue (based on purported managed assets of \$1.1 billion); (b) ranked Bennett twenty-sixth in the category entitled "Top 100 Independent Financial Advisors" in its August 9, 2009, issue (based on purported managed assets of \$1.3 billion); and (c) ranked Bennett second in its listing of the "2011 Top Advisors" in Washington, D.C. (based on purported managed assets of \$1.8 billion).

13. Bennett and her firm made additional false statements to Barron's, which, in turn, were published by the magazine. In 2011, Bennett and her firm claimed that the typical size of a Bennett Group account was \$3 million. In reality, at the time, only 1% of Bennett Group customers and clients had account values of \$3 million or more. Bennett and her firm also falsely claimed in 2011 that the firm's minimum account size was \$2 million. In fact, at the time, 98% of customer and client accounts were under that threshold. As with the fraudulent claims about assets managed, the Respondents made these fraudulent statements to Barron's knowing that they would be reprinted and distributed to the public, including to current and prospective customers and clients, and that their publication would bolster Bennett and Bennett Group, thereby inducing existing customers and clients to remain and enticing prospective clients and customers to hire Bennett Group.

14. After publication in Barron's, Bennett and Bennett Group promoted their Barron's rankings and repeated the misrepresentations contained in the Barron's publications through e-mail, the firm's Web site, social media, article reprints, and other means to existing and prospective customers and clients.

15. For example, Bennett directed firm employees to send marketing e-mails to current and prospective customers and clients touting her ranking as "#4 [sic] on Barron's list of 'Top 100 Women Financial Advisors'" and claiming that she and the firm had "assets under management of \$1.5 billion."

16. On or about June 26, 2010, Bennett Group ordered 1,125 copies of the Barron's issue ranking Bennett as fifth in its "Top 100 Women Financial Advisors." Bennett Group then sent at least 125 copies of the Barron's article to existing and prospective customers and clients.

17. In at least 2010 and 2011, Bennett Group's Web site linked users to various articles written by Bennett in which she touted the Barron's rankings. In addition, Bennett and Bennett Group frequently referred to the Barron's rankings in e-mail messages and other communications with existing and prospective customers and clients.

18. On or about May 9, 2010, Bennett began hosting a weekly radio show called "Financial Myth Busting with Dawn Bennett" ("Financial Myth Busting") on a Washington, D.C.–area AM radio station. Bennett Group paid for the show, and Bennett hosted it and determined all of its content.

19. On "Financial Myth Busting," Bennett would tout Bennett Group and its services. And Bennett and the firm would promote the show to existing and prospective customers and clients, including by adding references to "our highly regarded weekly talk radio program-Financial Mythbusting" (or the like) to proposal packages prepared for prospective customers and clients and to e-mail messages sent by Bennett Group employees.

20. During at least 18 "Financial Myth Busting" radio programs aired from May 9, 2010, through January 30, 2011, Bennett falsely claimed that she and Bennett Group managed assets ranging from \$1.5 billion to over \$2 billion. Bennett and Bennett Group also fraudulently claimed that they managed "\$1.5 billion of client assets" on the "Facebook" information page they maintained for the "Financial Myth Busting" show.

21. Contrary to their claims regarding managed assets, Bennett and Bennett Group never provided any form of management for assets in excess of at most approximately \$407 million (which included approximately \$1.1 million in advisory assets, \$67 million in pension consulting assets, and \$338 million in brokerage assets).

22. Bennett's and Bennett Group's misstatements and omissions regarding assets managed were material. Among other things, investors use facts about assets managed to draw conclusions about a firm's size, skills, and abilities.

23. With respect to the above-referenced misstatements and omissions, Bennett and Bennett Group acted with scienter, in that, inter alia, they knew or were reckless in not knowing that the information that they were providing to existing and prospective customers and clients was wholly contrived and unsubstantiated.

(ii) DURING THE STAFF'S EXAMINATION AND INVESTIGATION, BENNETT AND BENNETT GROUP PROVIDED FALSE INFORMATION ABOUT ASSETS MANAGED, IN ORDER TO "SUBSTANTIATE" HER CLAIMS AND TO OBSTRUCT THE INVESTIGATION

24. When questioned during the examination and subsequent investigation about the basis for the claims of assets managed, Bennett and Bennett Group made a series of false statements, in an effort to substantiate the claims and to obstruct the staff's examination and investigation.

25. Among other things, Bennett and her firm asserted that the claims of approximately $2 billion of assets managed were defensible because she provided uncompensated short-term cash management advice to three corporate clients, "Company A," "Company B," and "Company C." Bennett even went so far as to identify individuals at the clients, with whom she had communicated about short-term cash management or otherwise would be knowledgeable about the subject. Further, she produced copies of "Project Request Forms" and other documents that purported to set forth information relating to the advice given to these clients. According to Bennett and Bennett Group, the aggregate assets of those Companies, brokerage assets, pension funds, and other advisory assets, substantiated the claims in Barron's, on the radio show, and in other communications.

26. Bennett's and Bennett Group's claims regarding short-term cash management advice for Company A, Company B, and Company C were entirely fictitious. Individuals at Companies A, B, and C (including, in certain instances, ones identified by Bennett) either did not know her or her firm, did not communicate with them regarding short-term cash management, were not at the respective company at the time, or were incapacitated or dead. Further, as to the "Project Request Forms" and other documents, when asked to produce for inspection the originals thereof, Bennett and Bennett Group were unable to do so, claiming that they were "lost" in an office move after the inception of the staff's investigation.

27. In any event, the supposed communications by Bennett with Company A, Company B, and Company C do not constitute the "management" of assets in any sense of the term. Informal and uncompensated conversations about what entities might want to do with assets (which are not held in any account serviced by the brokerage or advisory firm) cannot meaningfully be described as the management of those assets. At a minimum, if Bennett and Bennett Group wanted to "count" such assets among those promoted or advertised as managed by them, then they needed to fully disclose the nature of such "management," including that it merely consisted of informal advice regarding funds not held in any brokerage or investment advisory account serviced by Bennett Group and that Bennett and Bennett Group received no compensation for the service. No such disclosures were ever provided.

(a) Company A

28. Company A is a South Africa–based telecommunications firm.

29. From approximately March 1, 2006, through March 31, 2011, Bennett served as financial advisor to the investment committee overseeing the 401(k) retirement plan for Company A's employees in the United States. In this role, she communicated with Company A's human resources director in Virginia, occasionally attended meetings of the company's 401(k) committee, provided investment recommendations for the 401(k) plan, and monitored the performance of the selected mutual funds. The total amount of

employee assets in the 401(k) plan during her tenure as advisor was approximately $40 million.

30. During a 2011 examination, Bennett and Bennett Group said that they included within the assets managed figure approximately $706 million of Company A's cash assets, for which Bennett and Bennett Group supposedly provided short-term investment advice.

31. When Bennett first testified during the investigation in December 2013, she said that, during weekly telephone calls between 2005 and 2011, she gave advice to the Chief Financial Officer of Company A's U.S.-based business unit ("CFO"), about how to manage over $1 billion in Company A cash. However, CFO had left Company A in February 2006. Upon testifying a second time in January 2015, Bennett changed her story and said that she actually provided the advice to CFO's successor ("Successor"). This iteration of Bennett's story was also false and was undercut by Successor's testimony that he never received such advice from Bennett or anyone else at Bennett Group.

32. Bennett and Bennett Group also produced—between her first and second testimonies —copies of "Project Request Forms" and other documents that purportedly substantiated her claim to have given short-term cash management advice to Company A with respect to as much as $1.575 billion in cash. These documents had been called for by subpoena prior to the first testimony but were not produced until later. Bennett and Bennett Group failed to produce the originals of these documents because they purportedly were lost during a move of the Bennett Group's offices.

33. Bennett also produced an affidavit from Company A's former Chief Operating Officer ("COO"), in which he purported to have indirect knowledge of the short-term cash management advice that Bennett provided. According to the affidavit, COO received "regular briefings" from CFO and Successor about the advice. But, at subsequent testimony, COO retracted the pertinent parts of the affidavit. Given this testimony, it is unclear why COO made the initial averments, but it came to light during Bennett's second testimony that she and COO had a personal relationship.

34. Not only was it the case that no Company A representative would substantiate Bennett's claims, but Company A did not even have that much cash during the relevant period. Indeed, a high-ranking, South Africa–based Company A executive gave the staff a declaration stating that: company investment decisions were made by officials in South Africa (and not the United States); he had never communicated with Bennett or any other Bennett Group employee; he had never heard of Bennett or her firm before; and, in fact, since 2000, the company at no time had more than $650 million in cash assets.

35. In short, Bennett's claims of providing advice to Company A were fictitious, and it appears that Bennett attempted to mislead the Division of Enforcement and obstruct this investigation.

(b) Company B

36. Company B is a Virginia-based travel agency. Bennett and Bennett Group advised Company B's 401(k) plan from approximately 1988 until 2012, when she was terminated by Company B. The largest amount of employee assets in the plan during Bennett's tenure was approximately $35 million.

37. In addition to the $35 million, Bennett testified that she advised Company B on short-term investments of approximately $150 million. Bennett also claimed the first time she testified that her communications about this subject were limited to weekly conversations with Company B's founder and owner ("Company B Founder"). However, Company B Founder's widow ("Widow") said that Company B Founder died in 2011, had been incapacitated by illness since 2004, and was not involved in Company B's business after the onset of his illness. Widow (who herself was involved in Company B's business) also stated that she had never spoken to Bennett about short-term investments, that Bennett Group's only role vis-à-vis Company B was with respect to the 401(k) plan, and that from at least 2008 Company B had no assets available for short-term or other investment.

38. Upon being confronted with the fact that Company B Founder was either deceased or incapacitated at the time Bennett claimed to be speaking with him, Bennett changed her story. Bennett testified that the communications regarding short-term cash management had been with Widow and not her husband. As noted above, Widow does not support this new story either.

(c) Company C

39. Bennett provided financial advisory services to the investment committee of Company C from 2006 to October 27, 2009. Company C is a Virginia-based historical preservation group. From 2006 to 2009, Company C had endowment funds of approximately $100 million.

40. On October 27, 2009—the date Company C terminated her services—Company C directed Bennett to immediately transfer all funds she managed to Company C's bank account.

41. Despite this, Bennett and Bennett Group produced documents during this investigation to support the assertion that she continued to provide short-term cash management advice free of charge through April 2010. And, at her second testimony, Bennett claimed that the advice to Company C likely continued into 2010, which, as noted above, was after the time of her termination.

(iii) BENNETT AND BENNETT GROUP ALSO MADE MATERIAL MISREPRESENTATIONS AND OMISSIONS REGARDING THEIR INVESTMENT RETURNS

42. Bennett touted Bennett Group's investment returns and performance during her "Financial Myth Busting" radio program without disclosing that the returns were for a Bennett Group "model portfolio" and were not representative of actual investor performance. Bennett Group reported model returns and compared them to benchmarks such as the Standard & Poor's 500 index ("S&P 500"): 6.06% (vs. negative 37% for S&P 500) in 2008; 42.48% (vs. 26.47% for S&P 500) in 2009; and 31.06 % (vs. 15.06 % for S&P 500) in 2010.

43. During various "Financial Myth Busting" broadcasts occurring between May 2010 and February 2011, Bennett represented these returns as actual returns. She also claimed on numerous occasions that Bennett Group's returns ranked in the top 1% of investment advisers worldwide in investment performance. In reality, a significant portion of Bennett Group customer accounts were not invested in accordance with the model.

44. At no time during the radio shows did Bennett disclose that the returns she touted were model returns or the fact that actual client returns may differ. Indeed, Bennett Group had actually retained an accounting firm to assist with respect to the model portfolio, and the accounting firm had advised Bennett that such disclosures should be made when making representations regarding returns based on the model portfolio. Despite this—as well as her obligations under the federal securities laws—those disclosures were never made on the radio show.

45. Bennett's and Bennett Group's misstatements and omissions regarding investment returns were material. Investors use facts about investment returns to draw conclusions about a firm's skills and abilities. Further, Bennett and Bennett Group made the above-referenced misstatements and omissions with scienter, in that, inter alia, they knew or were reckless in not knowing that they were making material misstatements and omissions.

(iv) BENNETT GROUP LACKED ADEQUATE COMPLIANCE PROCEDURES AND FAILED TO IMPLEMENT THE PROCEDURES IT HAD

46. Bennett Group adopted a "Written Supervisory Policies and Procedures Manual" in June 2009, which was updated at least in June 2010. In adopting such written supervisory policies and procedures, BGFS used an "off-the-shelf" compliance manual that it did not tailor to BGFS's specific operations and needs, including for calculation and review of managed assets and appropriate review of advertising and promotional content such as the "Financial Myth Busting" radio show. As a result, BGFS did not adopt a full set of compliance policies and procedures that were customized for its advisory business and reasonably designed to prevent violations by BGFS of the Advisers Act and the rules thereunder.

47. Further, even the inadequate policies and procedures were not implemented. For instance, Bennett made the decisions for the firm—including determination of assets managed and how investment returns would be described on the radio show—with effectively no supervision from anyone at Bennett Group. The manual also specifically detailed the appropriate disclosures for discussions of model performance returns, including disclosures of costs, risks, strategies, and variations from actual client performance, and prohibited advertising that contained any untrue or misleading statements. These provisions, too, were not implemented.

48. Bennett was essentially able to operate Bennett Group unchecked, and her firm's policies and procedures otherwise were not implemented with respect to her claims about assets managed and investment returns. She exploited that circumstance to make outlandish claims to bolster her reputation and that of her firm, so that existing customers and clients would be kept and new ones could be obtained. Once caught, she dissembled further, citing nonexistent conversations with a departed CFO and an incapacitated former executive, regarding entirely fictitious assets.

D. TOLLING OF ANY APPLICABLE LIMITATION PERIODS

49. Bennett and Bennett Group, respectively, signed tolling agreements that tolled any applicable statute of limitations for the period from July 31, 2014, through October 1, 2014, and signed additional tolling agreements that further tolled any applicable statute of limitations for the period from October 1, 2014, through January 2, 2015.

E. VIOLATIONS

50. As a result of the conduct described above, Bennett and Bennett Group willfully violated Section 17(a) of the Securities Act and Section 10(b) of the Exchange Act and Rule 10b-5 thereunder, which prohibit fraudulent conduct in the offer and sale of securities and in connection with the purchase or sale of securities.

51. As a result of the conduct described above, Bennett and Bennett Group willfully violated Sections 206(1) and 206(2) of the Advisers Act, which prohibit fraudulent conduct by an investment adviser.

52. As a result of the conduct described above, Bennett Group willfully violated, and Bennett willfully aided and abetted and caused the violations of, Section 206(4) of the Advisers Act and Rule 206(4)-1(a)(5) thereunder, which make it unlawful for an investment adviser to, directly or indirectly, publish, circulate, or distribute any advertisement, which contains any untrue statement of a material fact or which is otherwise false or misleading.

53. As a result of the conduct described above, Bennett Group willfully violated, and Bennett willfully aided and abetted and caused the violations of, Section 206(4) of the Advisers Act and Rule 206(4)-7 thereunder, which require an investment

adviser to adopt and implement written policies and procedures reasonably designed to prevent violations of the Advisers Act and the rules promulgated thereunder.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate in the public interest that public administrative and cease-and-desist proceedings be instituted to determine:

A. Whether the allegations set forth in Section II hereof are true and, in connection therewith, to afford Respondents an opportunity to establish any defenses to such allegations;

B. What, if any, remedial action is appropriate in the public interest against Respondents Bennett and Bennett Group pursuant to Section 15(b) of the Exchange Act including, but not limited to, disgorgement and civil penalties pursuant to Section 21B of the Exchange Act;

C. What, if any, remedial action is appropriate in the public interest against Respondent Bennett Group pursuant to Section 203(e) of the Advisers Act including, but not limited to, disgorgement and civil penalties pursuant to Section 203 of the Advisers Act;

D. What, if any, remedial action is appropriate in the public interest against Respondent Bennett pursuant to Section 203(f) of the Advisers Act including, but not limited to, disgorgement and civil penalties pursuant to Section 203 of the Advisers Act;

E. What, if any, remedial action is appropriate in the public interest against Respondents Bennett and Bennett Group pursuant to Section 9(b) of the Investment Company Act including, but not limited to, disgorgement and civil penalties pursuant to Section 9 of the Investment Company Act; and

F. Whether, pursuant to Section 8A of the Securities Act, Section 21C of the Exchange Act, and Section 203(k) of the Advisers Act, Respondents should be ordered to cease and desist from committing or causing violations of and any future violations of Section 17(a) of the Securities Act, Section 10(b) of the Exchange Act and Rule 10b-5 thereunder, Sections 206(1), 206(2), and 206(4) of the Advisers Act and Rules 206(4)-1(a)(5) and 206(4)-7 thereunder, whether Respondents should be ordered to pay civil penalties pursuant to Section 8A(g) of the Securities Act, Section 21B(a) of the Exchange Act, and Section 203(i) of the Advisers Act, and whether Respondents should be ordered to pay disgorgement pursuant to Section 8A(e) of the Securities Act, Sections 21B(e) and 21C(e) of the Exchange Act, and Section 203 of the Advisers Act.

IV.

IT IS ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened not earlier than 30 days and not later than 60 days from service of this Order at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice, 17 C.F.R. § 201.110.

IT IS FURTHER ORDERED that Respondents shall file Answers to the allegations contained in this Order within twenty (20) days after service of this Order, as provided by Rule 220 of the Commission's Rules of Practice, 17 C.F.R. § 201.220.

If any Respondent fails to file the directed answer, or fails to appear at a hearing after being duly notified, Respondent may be deemed in default and the proceedings may be determined against it or her upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f) and 310 of the Commission's Rules of Practice, 17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f) and 201.310.

This Order shall be served forthwith upon Respondents as provided for in the Commission's Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 300 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice.

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

By the Commission.

SECURITIES AND EXCHANGE COMMISSION
(Release No. 34-75867)

ISE Mercury, LLC; Order Granting Application for a Conditional Exemption Pursuant to Section 36(a) of the Exchange Act from Certain Requirements of Rules 6a-1 and 6a-2 under the Exchange Act

September 9, 2015

I. Introduction

On September 29, 2014, ISE Mercury, LLC ("Applicant") submitted to the Securities and Exchange Commission ("Commission") an application on Form 1 under the Securities Exchange Act of 1934 ("Exchange Act") to register as a national securities exchange. In connection with this application, the Applicant, pursuant to Exchange Act Rule 0-12,[1] has requested an exemption under Section 36(a)(1) of the Exchange Act[2] from certain requirements of Exchange Act Rules 6a-1(a) and 6a-2 ("Exemption Request").[3] This order grants the Applicant's request for exemptive relief, subject to the satisfaction of certain conditions, which are outlined below.

II. Application for Conditional Exemption from Certain Requirements of Exchange Act Rules 6a-1 and 6a-2

A. Filing Requirements under Exchange Act Rule 6a-1(a)

Exchange Act Rule 6a-1(a) requires an applicant for registration as a national securities exchange to file an application with the Commission on Form 1. Exhibit C to Form 1 requires the applicant to provide certain information with respect to each of its subsidiaries and affiliates.[4]

---

1 17 CFR 240.0-12.

2 15 U.S.C. 78mm(a)(1).

3 17 CFR 240.6a-1(a) and 6a-2. See letter from Michael Simon, Secretary and General Counsel, ISE Mercury, LLC, to Brent J. Fields, Secretary, Commission, dated June 26, 2015.

4 Specifically, Exhibit C requires the applicant to provide, for each subsidiary or affiliate, and for any entity with whom the applicant has a contractual or other agreement relating

For purposes of Form 1, an "affiliate" is "[a]ny person that, directly or indirectly, controls, is under common control with, or is controlled by, the national securities exchange . . . including any employees."[5] Form 1 defines "control" as "[t]he power, directly or indirectly, to direct the management or policies of a company, whether through ownership of securities, by contract, or otherwise . . . ."[6] Form 1 provides, further, that any person that directly or indirectly has the right to vote 25% or more of a class of voting securities, or has the power to sell or direct the sale of 25% or more of a class of voting securities, is presumed to control the entity.[7]

Exhibit D to Form 1 requires an applicant for registration as a national securities exchange to provide unconsolidated financial statements for the latest fiscal year for each subsidiary or affiliate. Exhibit D requires the financial statements to include, at a minimum, a balance sheet and an income statement with such footnotes and other disclosures as are necessary to avoid rendering the financial statements misleading. Exhibit D provides, in addition, that if any affiliate or subsidiary of the applicant is required by another Commission rule to submit

---

to the operation of an electronic trading system used to effect transactions on the exchange: (1) the name and address of the organization; (2) the form of organization; (3) the name of the state and statute citation under which it is organized, and the date of its incorporation in its present form; (4) a brief description of the nature and extent of the affiliation; (5) a brief description of the organization's business or functions; (6) a copy of the organization's constitution; (7) a copy of the organization's articles of incorporation or association, including all amendments; (8) a copy of the organization's by-laws or corresponding rules or instruments; (9) the name and title of the organization's present officers, governors, members of all standing committees, or persons performing similar functions; and (10) an indication of whether the business or organization ceased to be associated with the applicant during the previous year, and a brief statement of the reasons for termination of the association.

5 Form 1 Instructions, Explanation of Terms, 17 CFR 249.1.

6 Id.

7 Id.

annual financial statements, a statement to that effect, with a citation to the other Commission rule, may be provided in lieu of the financial statements required in Exhibit D.

A Form 1 application is not considered filed until all necessary information, including financial statements and other required documents, have been furnished in the proper form.[8]

B. Filing Requirements under Exchange Act Rule 6a-2

Exchange Act Rule 6a-2(a)(2) requires a national securities exchange to update the information provided in Exhibit C within 10 days of any action that causes the information provided in Exhibit C to become inaccurate or incomplete. In addition, Exchange Act Rule 6a-2(b)(1) requires a national securities exchange to file Exhibit D on or before June 30 of each year, and Exchange Act Rule 6a-2(c) requires a national securities exchange to file Exhibit C every three years.

C. Exemption Request

On June 26, 2015, the Applicant requested that the Commission grant an exemption under Section 36 of the Exchange Act from the requirement under Exchange Act Rule 6a-1 to file the information requested of the Applicant in Exhibits C and D to Form 1 for the "Foreign Indirect Affiliates," as defined below.[9] In addition, the Applicant requested an exemption, subject to certain conditions, with respect to the Foreign Indirect Affiliates from the requirements under: (1) Exchange Act Rule 6a-2(a)(2) to amend Exhibit C within 10 days if the information

---

8 17 CFR 202.3(b)(2). See also 17 CFR 240.0-3(a). Defective Form 1 applications "may be returned with a request for correction or held until corrected before being accepted as a filing." See 17 CFR 202.3(b)(2). See also Securities Exchange Act Release No. 40760 (December 8, 1998), 63 FR 70844, 70881 (December 22, 1998) ("Regulation ATS Adopting Release") at note 329 and accompanying text.

9 See Exemption Request, supra note 3.

in Exhibit C becomes inaccurate or incomplete; and (2) Exchange Act Rules 6a-2(b)(1) and (c) to file periodic updates to Exhibits C and D.

The Applicant is a wholly-owned subsidiary of International Securities Exchange Holdings, Inc. ("ISE Holdings").[10] ISE Holdings is a wholly-owned subsidiary of U.S. Exchange Holdings, Inc., which is 15% owned by Deutsche Börse AG ("Deutsche Börse") and 85% owned by a German stock corporation, Eurex Frankfurt AG ("Eurex Frankfurt"). Eurex Frankfurt is wholly-owned by Deutsche Börse. According to the Applicant, the parent ownership structure of U.S. Exchange Holdings, Inc. is comprised entirely of foreign entities, Eurex Frankfurt and Deutsche Börse (collectively, the "Foreign Direct Affiliates"), which in turn hold ownership interests, either directly or indirectly, in excess of 25% in a large number of other foreign entities, some of which also own interests in other entities in excess of 25% as well (such Foreign Direct Affiliate-owned entities are referred to, collectively, as the "Foreign Indirect Affiliates").[11]

Because of the limited and indirect nature of its connection to the Foreign Indirect Affiliates, the Applicant believes that the corporate and financial information of the Foreign Indirect Affiliates required by Exhibits C and D of Form 1 would have little relevance to the Commission's review of the Applicant's Form 1 application or, if the Commission were to approve the Applicant's Form 1 application, as amended, to the Commission's ongoing oversight of the Applicant as a national securities exchange.[12] In this regard, the Exemption Request states that the Foreign Indirect Affiliates have no ability to influence the management, policies, or

---

10 See Exemption Request, supra note 3, at 2.

11 See id.

12 See id. at 2-3.

finances of the Applicant and no obligation to provide funding to, or ability to materially affect the funding of, the Applicant.[13] The Exemption Request also states that: (1) the Foreign Indirect Affiliates have no ownership interest in the Applicant or in any of the controlling shareholders of the Applicant; and (2) there are no commercial dealings between the Applicant and the Foreign Indirect Affiliates.[14] Further, the Exemption Request states that obtaining detailed corporate and financial information with respect to the Foreign Indirect Affiliates (1) is unnecessary for the protection of investors and the public interest and (2) would be unduly burdensome and inefficient because these affiliates are located in foreign jurisdictions and the disclosure of such information could implicate foreign information sharing restrictions in such jurisdictions.[15]

As a condition to the granting of exemptive relief, the Applicant has agreed to provide: (i) a listing of the names of the Foreign Indirect Affiliates; (ii) an organizational chart setting forth the affiliation of the Foreign Indirect Affiliates and the Foreign Direct Affiliates and the Applicant; and (iii) in Exhibit C of the Applicant's Form 1 application, a description of the nature of the Foreign Indirect Affiliates' affiliation with the Foreign Direct Affiliates and the Applicant. In addition, as a condition to the granting of exemptive relief from the requirements of Exchange Act Rule 6a-2(a)(2), 6a-2(b)(1), and 6a-2(c), as described above, the Applicant has agreed to provide amendments to the information required under conditions (i) through (iii)

---

13 See Exemption Request, supra note 3, at 3.

14 See id. The Applicant states that "commercial dealings" means any direct or indirect arrangement, agreement, or understanding or any other relationship including, but not limited to, the providing of hardware, software, technology services or any other goods or services that support the operation of ISE Mercury or any facility of ISE Mercury. See id., supra note 3, at 3 n. 5.

15 See id. The Applicant also believes that providing the information required by Exhibits C and D with respect to the Foreign Indirect Affiliates could raise confidentiality concerns because many of the Foreign Indirect Affiliates are not public companies. Id.

above on or before June 30th of each year. Further, the Applicant notes that it will provide the information required by Exhibits C and D for all of its affiliates other than the Foreign Indirect Affiliates, including the Foreign Direct Affiliates.[16]

III. Order Granting Conditional Section 36 Exemption

Section 6 of the Exchange Act[17] sets forth a procedure for an exchange to register as a national securities exchange.[18] Exchange Act Rule 6a-1(a)[19] requires an application for registration as a national securities exchange to be filed on Form 1 in accordance with the instructions in Form 1. A Form 1 application is not considered filed until all necessary information, including financial statements and other required documents, has been furnished in the proper form.[20] Exchange Act Rule 6a-2 establishes ongoing requirements to file certain amendments to Form 1.

Section 36(a)(1) of the Exchange Act provides that "the Commission, by rule, regulation, or order, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of [the Exchange Act] or of any rule or regulation thereunder, to the extent that such exemption is necessary or appropriate in the public interest, and is consistent with the protection of

---

16 See Exemption Request, supra note 3, at 3.

17 15 U.S.C. 78f.

18 Specifically, Section 6(a) of the Exchange Act states that "[a]n exchange may be registered as a national securities exchange . . . by filing with the Commission an application for registration in such form as the Commission, by rule, may prescribe containing the rules of the exchange and such other information and documents as the Commission, by rule, may prescribe as necessary or appropriate in the public interest or for the protection of investors." Section 6 of the Exchange Act also sets forth various requirements to which a national securities exchange is subject.

19 17 CFR 240.6a-1(a).

20 17 CFR 202.3(b)(2). See also supra note 8.

investors."[21] For the reasons discussed below, the Commission believes that it is appropriate in the public interest and consistent with the protection of investors to exempt the Applicant from the requirement under Exchange Act Rule 6a-1 to provide the information required in Exhibits C and D to Form 1 with respect to the Foreign Indirect Affiliates, subject to the following conditions:

(1) the Applicant must provide a list of the names of the Foreign Indirect Affiliates;

(2) the Applicant must provide an organizational chart setting forth the affiliation of the Foreign Indirect Affiliates and the Foreign Direct Affiliates and the Applicant; and

(3) as part of Exhibit C to the Applicant's Form 1 Application, the Applicant must provide a description of the nature of the affiliation between the Foreign Indirect Affiliates and the Foreign Direct Affiliates and the Applicant.

The Commission believes, further, that it is appropriate in the public interest and consistent with the protection of investors to exempt the Applicant, with respect to the Foreign Indirect Affiliates, from the requirements under: (a) Exchange Act Rule 6a-2(a)(2) to amend Exhibit C within 10 days of any action that renders the information in Exhibit C inaccurate or incomplete; (b) Exchange Act Rules 6a-2(c) to provide periodic updates of Exhibit C; and (c) Exchange Act Rules 6a-2(b)(1) to provide periodic updates of Exhibit D, subject to the condition that the Applicant provide amendments to the information required under conditions (1) through (3) above on or before June 30th of each year.

As part of an application for exchange registration, the information included in Exhibits C and D is designed to help the Commission make the determinations required under Sections

---

21 15 U.S.C. 78mm(a)(1).

6(b) and 19(a) of the Exchange Act[22] with respect to the application. The updated Exhibit C and D information required under Exchange Act Rule 6a-2 is designed to help the Commission exercise its oversight responsibilities with respect to national securities exchanges. Specifically, Exhibit D is designed to provide the Commission with information concerning the financial status of an exchange and its affiliates and subsidiaries,[23] and Exhibit C is designed to provide the Commission with the names and organizational documents of these affiliates and subsidiaries.[24] Such information is designed to help the Commission determine whether an applicant for exchange registration would have, and a national securities exchange continues to have, the ability to carry out its obligations under the Exchange Act.

Since the most recent amendments to Form 1 in 1998,[25] many national securities exchanges that previously were member-owned organizations with few affiliated entities have demutualized. Some of these demutualized exchanges have consolidated under holding companies with numerous affiliates that, in some cases, have only a limited and indirect connection to the national securities exchange, with no ability to influence the management or policies of the registered exchange, and no obligation to fund, or to materially affect the funding of, the registered exchange. The Commission believes that, for these affiliated entities, the information required under Exhibits C and D would have limited relevance to the Commission's review of an application for exchange registration or to its oversight of a registered exchange.

---

22 15 U.S.C. 78f(b) and 78s(a).

23 See Securities Exchange Act Release No. 18843 (June 25, 1982), 47 FR 29259 (July 6, 1982) (proposing amendments to Form 1); see also Form 1, 17 CFR 249.1, and supra Section II.A.

24 Form 1, 17 CFR 249.1. See also supra note 4.

25 See Regulation ATS Adopting Release, supra note 8, at Section IV.C.

Based on the Applicant's representations, the indirect nature of the relationship between the Applicant and the Foreign Indirect Affiliates, and the information that the Applicant will provide with respect to the Foreign Direct Affiliates and the Foreign Indirect Affiliates, the Commission believes that it will have sufficient information to review the Applicant's Form 1 application and to make the determinations required under Sections 6(b) and 19(a) of the Exchange Act with respect to its application for registration as a national securities exchange.[26] The Commission believes, further, that if the Commission were to approve the Applicant's Form 1 application, it will have the information necessary to oversee the Applicant's activities as a national securities exchange. In particular, the Commission notes that the Applicant has represented that it would have no direct connection to the Foreign Indirect Affiliates, that the Foreign Indirect Affiliates would have no ability to influence the management or policies of the Applicant, and that the Foreign Indirect Affiliates would have no obligation to fund, or ability to materially affect the funding of, the Applicant. In addition, the Commission notes that the Applicant has represented that: (1) the Foreign Indirect Affiliates have no ownership interest in the Applicant or in any of the controlling equity holders of the Applicant; and (2) there are no commercial dealings between the Applicant and the Foreign Indirect Affiliates.[27]

Given the limited and indirect relationship between the Applicant and the Foreign Indirect Affiliates, as described above, the Commission believes that the detailed corporate and financial information required in Exhibits C and D with respect to the Foreign Indirect Affiliates

[26] 15 U.S.C. 78f(b) and 78s(a). Section 6(b) of the Exchange Act enumerates certain determinations that the Commission must make with respect to an exchange before granting the registration of the exchange as a national securities exchange. The Commission will not grant an exchange registration as a national securities exchange unless the Commission determines that the exchange meets these requirements. See Regulation ATS Adopting Release, supra note 8, at Section IV.B.

[27] See Exemption Request, supra note 3, at 3; supra note 15.

is unnecessary for the Commission's review of the Applicant's Form 1 application and would be unnecessary for the Commission's oversight of the Applicant as a registered national securities exchange following any Commission approval of its Form 1 application.

For the reasons discussed above, the Commission finds that the conditional exemptive relief requested by the Applicant is appropriate in the public interest and is consistent with the protection of investors.

The Commission may modify by order the terms, scope or conditions of this exemption if it determines that such modification is necessary or appropriate in the public interest, or is consistent with the protection of investors. Furthermore, the Commission may limit, suspend, or revoke this exemption if it finds that the Applicant has failed to comply with, or is unable to comply with, any of the conditions set forth in this order, if such action is necessary or appropriate in the public interest, or is consistent with the protection of investors.

IT IS ORDERED, pursuant to Section 36 of the Exchange Act,[28] that the Applicant is exempt from the requirements to: (1) include in its Form 1 application the information required in Exhibits C and D to Form 1 with respect to the Foreign Indirect Affiliates; and (2) with respect to the Foreign Indirect Affiliates, update the information in Exhibits C and D to Form 1 as required by Exchange Act Rules 6a-2(a)(2), 6a-2(b)(1), and 6a-2(c) subject to the following conditions:

(i) the Applicant must provide a list of the names of the Foreign Indirect Affiliates;

(ii) the Applicant must provide an organizational chart setting forth the affiliation of the Foreign Indirect Affiliates and the Foreign Direct Affiliates and the Applicant; and

---

28 15 U.S.C. 78mm.

(iii) as part of Exhibit C to the Applicant's Form 1 Application, the Applicant must provide a description of the nature of the affiliation between the Foreign Indirect Affiliates and the Foreign Direct Affiliates and the Applicant.

In addition, the Applicant must provide amendments to the information required under conditions (i) through (iii) above on or before June 30th of each year.

By the Commission.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75859 / September 9, 2015

ACCOUNTING AND AUDITING ENFORCEMENT
Release No. 3689 / September 9, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16797

In the Matter of	ORDER INSTITUTING PUBLIC ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTIONS 4C AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934, AND RULE 102(e) OF THE COMMISSION'S RULES OF PRACTICE, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER
Sean C. Henaghan, CPA, John E. Rainis, CPA, Leland E. Graul, CPA, James J. Gerace, CPA, and Wendy M. Hambleton, CPA,	
Respondents.	

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that public administrative and cease-and-desist proceedings be, and hereby are, instituted pursuant to Sections 4C[1] and 21C of the Securities Exchange Act of 1934 ("Exchange Act") and Rule 102(e)(1)(ii) of the Commission's Rules of Practice[2] against Sean C. Henaghan, CPA ("Henaghan"), John E.

[1] Section 4C provides, in relevant part, that:

> The Commission may censure any person, or deny, temporarily or permanently, to any person the privilege of appearing or practicing before the Commission in any way, if that person is found . . . (2) . . . to have engaged in unethical or improper professional conduct.

[2] Rule 102(e)(1) provides, in relevant part:

> The Commission may censure a person or deny, temporarily or permanently, the privilege of appearing or practicing before it in any way to any person who is found . . .

* * *

Rainis, CPA ("Rainis"), Leland E. Graul, CPA ("Graul"), and James J. Gerace, CPA ("Gerace"), and pursuant to Section 21C of the Exchange Act against Wendy M. Hambleton, CPA ("Hambleton") (Henaghan, Rainis, Graul, Gerace, and Hambleton are referred to collectively as "Respondents").

II.

In anticipation of the institution of these proceedings, Respondents have submitted Offers of Settlement (the "Offers") that the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over them and the subject matter of these proceedings, which is admitted, and except as provided herein in Section V, Respondents consent to the entry of this Order Instituting Public Administrative and Cease-and-Desist Proceedings Pursuant to Sections 4C and 21C of the Securities Exchange Act of 1934, and Rule 102(e) of the Commission's Rules of Practice, Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order (the "Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offers, the Commission finds[3] that:

A. SUMMARY

1. This matter involves improper professional conduct in BDO USA, LLP's ("BDO")[4] audits of General Employment Enterprises, Inc. ("GEE" or the "Company"), a staffing services

---

> (ii) to have engaged in unethical or improper professional conduct.
>
> * * *
>
> (iv) with respect to persons licensed to practice as accountants, "improper professional conduct" under Rule 102(e)(1)(ii) means:
>
> * * *
>
> (B) either of the following two types of negligent conduct:
>
> > (1) A single instance of highly unreasonable conduct that results in a violation of applicable professional standards in circumstances in which an accountant knows, or should know, that heightened scrutiny is warranted.
> >
> > (2) Repeated instances of unreasonable conduct, each resulting in a violation of applicable professional standards, that indicate a lack of competence to practice before the Commission.

[3] The findings herein are made pursuant to Respondents' Offers of Settlement and are not binding on any other person or entity in this or any other proceeding.

company whose stock trades on the NYSE MKT. During BDO's 2009 audit of GEE's financial statements for its fiscal year ended September 30, 2009, Respondents learned that $2.3 million (comprising approximately half of GEE's assets and substantially all of its cash) was unaccounted for when GEE's chief financial officer (the "GEE CFO") advised BDO, in November 2009, that (a) GEE's purported 90-day non-renewable certificate of deposit ("CD") at a New York bank had not been repaid by the bank after the stated maturity date in mid-October, (b) GEE was missing documentation supporting the CD, and (c) a bank employee had told GEE's CFO that the bank had no record of a CD. Thereafter, BDO received multiple conflicting stories from GEE management and board members concerning both the status of the CD and a series of transfers totaling $2.3 million made to GEE by three entities unaffiliated with the bank, one of which BDO had been told was owned by GEE's Chairman and majority shareholder. After BDO raised questions about these deposits, GEE's chief executive officer claimed the deposits were the proceeds of an agreement to assign the CD to a purported unrelated party.

2. Henaghan, BDO's engagement partner, and Rainis, BDO's concurring partner, consulted with senior BDO partners, including Gerace, the assigned BDO regional technical director, Graul, BDO's national director of accounting and risk management partner, and Hambleton, BDO's national SEC practice director. The consultation resulted in BDO issuing a five-page letter, dated December 21, 2009, in which BDO advised GEE of its belief that BDO had not been provided sufficient audit evidence to formally conclude on the matter and demanded that GEE's audit committee commission a full investigation of the matter by an independent firm. BDO received conflicting information from various sources as to the existence of the CD and never received rational explanations as to why the $2.3 million went missing and why an equivalent amount was later received under suspect circumstances. Only days later, however, after GEE's chief executive officer resigned, Respondents agreed to withdraw BDO's demand for an independent investigation and BDO issued an audit report containing an unqualified opinion on GEE's financial statements. Those financial statements, included in GEE's Form 10-K filed on January 8, 2010, represented that GEE had a $2.3 million cash equivalent in the form of CD as of September 30, 2009, and had entered into an assignment agreement to sell the CD for full face value to an unrelated party.

3. Approximately two months after GEE filed its 2009 Form 10-K with BDO's unqualified audit opinion, Respondents learned of a criminal complaint against the New York bank president. The criminal complaint alleged, in connection with a wide-ranging conspiracy involving, among others, GEE's then-chief executive officer and GEE's then-majority shareholder and chairman of the board, that (i) GEE's purported $2.3 million CD never existed, (ii) the bank president signed a false confirmation to BDO, (iii) GEE's $2.3 million was used to attempt to conceal a loan default connected to the broader conspiracy, and (iv) the entities that transferred the $2.3 million back to GEE were related to the bank president's co-conspirators, including GEE's then-majority shareholder and chairman of the board. The bank president pled guilty in October

---

[4] BDO, formerly known as BDO Seidman, LLP, is a Delaware limited liability partnership and a PCAOB-registered public accounting firm with its headquarters in Chicago, Illinois. BDO served as GEE's independent auditor from 2004 through 2012.

2010. Despite this additional new information, Respondents failed to either perform or confirm that others performed appropriate audit procedures to determine whether this new information had any impact on GEE's 2009 financial statements or BDO's audit report thereon. In addition, BDO failed to adequately consider this information during its subsequent audit when it provided an audit report containing an unqualified opinion on GEE's financial statements included in the Company's 2010 Form 10-K.

4. Specifically, among other audit failures during the 2009 and 2010 audits of GEE, BDO: (1) failed to adequately plan, design, and perform audit procedures necessary to determine the existence of a disputed asset and the existence of related party transactions; (2) failed to obtain sufficient competent evidential matter; (3) failed to exercise professional skepticism and due professional care; (4) ignored red flags of fraud, potential illegal acts by GEE's agents, and unidentified related party transactions; (5) placed improper reliance on management representations from individuals they did not trust; and (6) failed to appropriately consider the discovery of new facts.

5. BDO issued audit reports containing unqualified opinions on the financial statements in GEE's 2009 and 2010 Form 10-Ks, which incorrectly stated that GEE had a cash equivalent of \$2.3 million as of September 30, 2009, and did not disclose that the \$2.3 million was returned by entities related to GEE's chairman of the board. BDO's reports, which Respondents knew would be filed with GEE's Form 10-Ks, inaccurately stated that the audits had been conducted in accordance with standards adopted by the Public Company Accounting Oversight Board ("PCAOB") and that GEE's financial statements presented fairly, in all material respects, the company's position and results at September 30, 2009, in conformity with generally accepted accounting principles in the United States of America ("GAAP").

B. RESPONDENTS

6. **Henaghan**, age 42, is a Certified Public Accountant ("CPA") licensed to practice in Illinois and was licensed in Florida from 2010 through 2012. Henaghan served as the BDO engagement partner on the 2009 and 2010 audits of GEE and had final responsibility for the audits.

7. **Rainis**, age 57, is a CPA licensed to practice in Illinois. Rainis served as the BDO concurring reviewer on the 2009 and 2010 audits of GEE.

8. **Graul**, age 66, is a CPA licensed to practice in Illinois. Prior to his retirement, Graul served as BDO's national director of accounting and risk management partner when he was consulted during the 2009 and 2010 audits of GEE.

9. **Gerace**, age 54, is a CPA licensed to practice in Illinois. Gerace served as the regional technical director of BDO when he was consulted during the 2009 and 2010 audits of GEE.

10. **Hambleton**, age 53, is a CPA licensed to practice in Illinois. Hambleton served as BDO's national SEC practice director when she was consulted during the 2009 and 2010 audits of GEE.

C. ISSUER AND OTHER RELEVANT ENTITIES AND INDIVIDUALS

11. **GEE** is an Illinois corporation headquartered in Oakbrook Terrace, Illinois that provides professional placement services and temporary staffing services in certain industries. GEE's common stock is registered with the Commission pursuant to Section 12(b) of the Exchange Act and trades on the NYSE MKT stock exchange. GEE files periodic reports, including Forms 10-K and 10-Q, with the Commission pursuant to Section 13(a) of the Exchange Act and related rules thereunder.

12. **River Falls Financial Services, LLC** ("River Falls Financial"), **River Falls Investments, LLC f/k/a Oxygen Unlimited II, LLC** ("River Falls Investments"), **River Falls Holdings, LLC** ("RFH"), **Accredited Investor Resources, LLC f/k/a Oxygen Investment Partners, LLC** ("AIR"), **Oxygen Unlimited, LLC** ("Oxygen"), **O2HR, LLC** ("O2HR"), **SDH Realty, LLC** ("SDH"), **WTS Acquisition LLC** ("WTS"), **H2H Holdings, LLC** ("H2H"), and **PSQ, LLC** ("PSQ") (collectively, the "Affiliated Entities") are purported holding, investment, employment-related, and insurance companies. During at least 2009 and 2010, **Wilbur Anthony Huff** ("Huff")[5] exercised substantial financial and management control over numerous entities, including, among others, the Affiliated Entities and their holdings. Huff installed other business partners to perform day-to-day operational functions and/or serve as the listed owners, directors, or managers. As a convicted felon, Huff faced legal and practical barriers to operating business entities in his own name, particularly business in regulated industries, including employment-related, insurance, and banking companies.

13. **Park Avenue Bank** ("PAB" or "the Bank") was a New York State chartered bank until it was closed by the New York State Banking Department on March 12, 2010, and the Federal Deposit Insurance Corporation was named Receiver. The Affiliated Entities primarily conducted their banking business through PAB. **Charles J. Antonucci, Sr.** ("Antonucci") served

[5] Huff pled guilty to federal mail fraud charges for obtaining insurance premium finance loans under false pretenses in the Western District of Kentucky in 2003. In 2008, the Commission filed charges against Huff related to a scheme to misappropriate assets from and to record fake letters of credit at Certified Services, Inc. ("Certified"). *SEC v. Huff*, 08-CV-60315 (S.D. Fla.). On October 22, 2010, the Court entered judgment for the Commission against Huff requiring him to pay more than $13 million, among other relief. Separately, after an October 2012 indictment against him, Huff pled guilty on December 23, 2014 to an information, which alleged, among other things, that: (1) Huff controlled GEE, in whole or in part, by installing other individuals; (2) Huff participated with Antonucci in a conspiracy in which they stole $2.3 million from GEE and Huff later returned the $2.3 million to GEE from three companies he controlled; and (3) a large portion of the $2.3 million received by GEE were funds entrusted to Oxygen by its clients for payment of the clients' employment tax and other obligations. *U.S. v. Huff*, 12-CR-750 (S.D.N.Y.).

as the president and CEO of PAB from June 2004 until October 2009. In October 2010, Antonucci pled guilty to multiple criminal charges, including securities fraud, bank bribery, embezzlement, and providing a false confirmation to BDO of GEE's purported CD at PAB. Separately, **Park Avenue Insurance** was a private insurance company owned by Antonucci that was not affiliated with PAB.

14. **Stephen B. Pence** ("Pence") served as the chairman of the board of GEE from July 1, 2009, through November 17, 2010. Although Pence purported to be the sole member and owner of PSQ, whose sole asset was the GEE shares representing a controlling stake in the Company as of July 1, 2009, PSQ was one of the Affiliated Entities over which Huff exercised substantial financial and management control. PSQ's acquisition of GEE stake was funded by AIR and Oxygen. Pence also represented to BDO that he was the 100% owner of River Falls Financial, another of the Affiliated Entities. Huff directed substantial monthly payments to Pence ($25,000) from several of the Affiliated Entities to ensure his control over, and ability to influence, GEE's operations. Pence formerly served as the lieutenant governor of Kentucky from 2003 to 2007 and the United States Attorney for the Western District of Kentucky from 2001 to 2003.

15. **Ronald E. Heineman** ("Heineman") was appointed as the chief executive officer ("CEO") of GEE on July 1, 2009, in connection with PSQ's acquisition of a controlling stake in GEE. Heineman served as CEO until his resignation on December 23, 2009, in connection with the events described herein. Huff directed substantial monthly payments to Heineman ($15,000) from the Affiliated Entities during this time period.

16. **Salvatore J. Zizza** ("Zizza") served as the CEO of GEE from December 23, 2009, through December 2012. Prior to his appointment as CEO, Zizza received monthly payments of $20,000 from PSQ, which were funded by several of the Affiliated Entities, for purported consulting services, and Zizza frequently attended GEE board meetings as an "invited guest." In 2009, businesses owned or operated by Zizza received loans in excess of $1 million that Huff directed from certain of the Affiliated Entities.

17. **Associate-1** was another of Huff's business partners and was listed or served at various times as a manager of River Falls Investments, Oxygen, and O2HR, and as co-manager of River Falls Financial with Heineman. Associate-1 was also involved in PSQ's acquisition of a controlling stake in GEE and attended several GEE board meetings in 2009. In addition, from July 2009 until September 2009, Associate-1 was a signatory on GEE's bank account at PAB despite the fact that Associate-1 was not an official employee, officer, or director of the Company. Associate-1 also purported to be the owner of WTS (another of the Affiliated Entities), a holding company of **On-Site Services, Inc.** ("On-Site") and **Ameritemps, Inc.** ("Ameritemps"), which WTS had acquired in January 2009 with funding from other Affiliated Entities. Almost immediately after PSQ's acquisition of a controlling stake in GEE, Heineman began presenting proposals to GEE's board for GEE to acquire these companies. For example, at an August 10, 2009, GEE board meeting, attended by Pence and Zizza, the board authorized Heineman to enter into a letter of intent with WTS to acquire On-Site, and Heineman reported that he would present another acquisition candidate, Ameritemps, at the September board meeting.

D. BACKGROUND

18. GEE's May 18, 2009, definitive proxy statement disclosed that, in January 2009, GEE began discussions with representatives of River Falls Financial, including Heineman and Pence, concerning the possibility of a tender offer and direct cash investment in GEE. As Henaghan learned later in 2009, Huff was also present for one of the relevant meetings. The proxy statement further disclosed that, on February 11, 2009, River Falls Financial and PSQ, a special purpose vehicle purportedly formed by Pence, entered into a non-binding letter of intent with GEE for a purchase and tender offer agreement to obtain a controlling stake in GEE.

19. According to GEE's May 18, 2009, definitive proxy statement, on March 30, 2009, after negotiations continued following the February 2009 non-binding letter of intent, Pence signed on behalf of PSQ a definitive securities purchase and tender offer agreement (the "Purchase Agreement"). The Purchase Agreement provided that, subject to shareholder approval, PSQ would acquire a controlling stake in GEE by (1) purchasing 7,700,000 newly-issued shares of GEE common stock in a private placement transaction at a purchase price of $0.25 per share for a total purchase price of $1,925,000; (2) commencing a cash tender offer to purchase from the Company's shareholders up to 2,500,000 shares of common stock at a purchase price of $0.60 per share; (3) appointing three directors to a five-member board of directors, including Pence becoming the chairman of the board; and (4) designating Heineman GEE's CEO. On June 22, 2009, a GEE press release announced that shareholders approved the Purchase Agreement and the closing of the Purchase Agreement was announced on July 1, 2009. As a result, PSQ acquired more than 65% ownership of the Company, Pence became GEE's chairman and appointed two other directors, and Heineman became GEE's CEO.

20. As part of the July 2009 closing of PSQ's purchase agreement with GEE, GEE opened a checking account at PAB into which PSQ's escrowed $1,925,000 would be deposited upon the closing. According to PAB records received by Henaghan in 2009, in June 2009, Associate-1 coordinated with GEE's chief financial officer (the "GEE CFO") to have the GEE checking account opened at PAB and the authorized signatories on the account were the GEE CFO, Pence, and Associate-1. Those PAB records also indicated that the GEE CFO, Pence, and Associate-1 remained the only authorized signatories on the account until September 2009, at which time Associate-1 was removed and Heineman was added. Following the closing in early July 2009, GEE transferred an additional $750,000 from GEE's accounts at other banks to the GEE PAB checking account. The approximately $2.6 million deposited in the GEE PAB checking account constituted substantially all of GEE's cash and half of its assets.

21. According to information received by BDO's engagement partner, Henaghan, GEE's CFO identified that $2.3 million had been withdrawn from the GEE PAB operating account on July 23, 2009, without the GEE CFO's knowledge. The GEE CFO reported to Henaghan that when he asked about the withdrawn funds, GEE's CEO Heineman claimed that he had authorized GEE to invest $2.3 million into a CD at PAB. The GEE CFO also informed Henaghan that, although he had repeatedly requested documentation concerning the purported CD, such as a written approval or account agreement—and cited the lack of documentation as a control deficiency—Heineman only provided the GEE CFO with a one-page PDF of a typewritten

"Certificate of Deposit Receipt" for $2.3 million with a single maturity date of October 21, 2009 and interest rate of two percent.

E. BDO RECEIVED INCONSISTENT EVIDENCE CONCERNING THE PURPORTED CD AND THE EXISTENCE OF RELATED PARTY TRANSCTIONS

22. GEE's fiscal year ended on September 30, 2009. As part of its audit of GEE, BDO addressed confirmations for GEE's bank accounts, including the purported CD, to a PAB vice president and branch manager. In October, BDO received a confirmation signed by that vice president for the operating account and a confirmation signed by the PAB president Antonucci for the purported CD. BDO concurring partner Rainis noted that it was "unusual" for the PAB president to sign the confirmation.

23. On October 19, 2009, the GEE CFO provided to audit committee members and BDO's engagement partner, Henaghan, a report of the evaluation of internal control for fiscal year 2009, which noted the purported PAB CD as an identified control deficiency. The report noted that"[t]he transaction was not executed by the office of the Treasurer, and no written approval or account agreement was provided to the accounting department" and that "it did not conform to the company's investment guidelines" because it did not provide sufficient diversification and PAB did not meet GEE's size requirement. However, the report concluded that the control deficiency did not constitute a material weakness. BDO concurred with this assessment.

24. In early November 2009, the GEE CFO noticed that PAB had not remitted the proceeds of the purported CD of $2.3 million plus interest into GEE's operating account upon the maturity date, October 21, 2009. When the GEE CFO contacted PAB, a PAB representative stated that the Bank had no record of the purported CD in its system and then refused to investigate the matter any further. On November 18, 2009, the GEE CFO conveyed this information to the BDO engagement partner Henaghan. The GEE CFO also communicated this information to GEE's audit committee chairman (the "AC Chair").

25. Also in November 2009, BDO partners Henaghan, the engagement partner, Graul, BDO's national director of accounting and risk management partner, and Gerace, the assigned BDO regional technical director, reviewed background check reports of Heineman and Associate-1 that identified potential concerns. As part of BDO's client retention procedures, BDO had procured a background check of Heineman because he was the new CEO of GEE and of Associate-1 because he purportedly owned On-Site, a subsidiary of WTS that GEE intended to acquire and which BDO agreed to audit, with Henaghan serving as the engagement partner on that audit. Those background checks revealed that:

- A 2009 lawsuit named GEE's CEO Heineman as a defendant and alleged that he received a fraudulent distribution of in excess of $2 million in cash from a bankrupt company he formally ran.

- Associate-1 served as the chief operating officer of a subsidiary of Certified. The Commission had alleged in a 2008 complaint that Huff was an "undisclosed control person" who, with others, stole $30 million from Certified.

- Associate-1 and Heineman were co-managers of River Falls Financial, and participated in negotiating PSQ's acquisition of GEE shares.

- Heineman and Associate-1 had several substantial personal tax liens.

26. At a November 23, 2009, audit committee meeting, attended by BDO engagement partner Henaghan and concurring partner Rainis, the GEE CFO reported his concerns that GEE had little documentation supporting the purported CD, including no written authorization from an account signatory and no deposit agreement. According to the audit committee minutes, Heineman claimed that he authorized the purported CD at Pence's direction, and claimed the lack of documentation was due to "the rapid pace of the transactions in which he had been involved, coupled with reorganization and personnel changes at Park Avenue Bank." Heineman next stated that he had anticipated that the CD would be maintained on a continuing renewal basis but he had asked Pence to liquidate the purported CD and have the funds transferred into the PAB checking account by the end of the week. The minutes also state that Henaghan "said that the audit was substantially completed, pending resolution of the missing funds issue, receipt of legal letters from counsel, and the executed management representation letter" and that BDO "would be issuing an unqualified opinion on the consolidated financial statements."

27. On November 24, 2009, Henaghan emailed the AC Chair, stating that the GEE CFO had "indicated there was an update on the CD and that the funds would be returned in installments. I am not sure if you can provide any further clarity on why this would be. I wanted to check with you before I had another discussion with [Heineman]." The AC Chair replied that he "[could] not provide any clarity" and expressed concern that one of the audit committee members (the "AC Member") "seems to be tied in with this group." The AC Member had been appointed by Pence in connection with the PSQ transaction in July.

28. Henaghan replied to the AC Chair the following day, November 25, 2009, that he had spoken to Heineman that morning and Heineman indicated that Pence and the AC Member "were taking the lead on this as they have a previous working relationship with the bank." Henaghan also noted that Heineman, however, had "disagreed with the fact that the CD would be 'paid back in installments'" and had "indicated that the proceeds of the CD would be in the Company's bank account by Monday."

29. By the following Monday, November 30, 2009, GEE still had not obtained the $2.3 million in proceeds of the purported CD from PAB. That day, Pence, Heineman, and Zizza attended a GEE board of directors meeting. Zizza, who had no formal role at GEE at this time, attended as an "invited guest." The board minutes indicate that the AC Chair explained that the Company's Form 10-K had not yet been filed because BDO's "final" opinion was predicated on the satisfactory accounting for the PAB CD and an explanation for where GEE's funds had been since the CD matured on October 21. During this November 30, 2009, board meeting, the AC

Member stated he believed that the situation occurred as a result of administrative errors on the part of the Bank, and Pence said that the AC Member had agreed to pursue the matter with PAB. Neither Pence nor Heineman mentioned anything about GEE selling or assigning the purported CD to a third party.[6]

30. By December 3, 2009, Henaghan learned that GEE had received four transfers from SDH and Oxygen totaling $1 million. On December 3, 2009, the AC Member, who had been tasked by Pence with contacting PAB about the purported CD, told the AC Chair and BDO engagement partner Henaghan that PAB was sending GEE the $2.3 million proceeds of the purported CD. The AC Member also told Henaghan that the Bank had made an "administrative error" and would provide a short apology note.

31. After consulting with fellow BDO partners Rainis and Gerace, Henaghan sent GEE's AC Chair an email on December 4, 2009, summarizing the open items requiring resolution prior to the issuance of BDO's audit report: (1) the purported CD; (2) identification of potential related parties to Pence; and (3) additional subsequent event procedures. The email begins by noting that after the CD had matured in October 2009, when the GEE CFO had contacted the Bank, a PAB representative informed the GEE CFO that there was no record of the purported CD and that after some investigation by the AC Member, "in late November it was determined that the funds would be returned to GEE in installments." The email then notes that GEE had received the following wire transfers: (i) November 24: $300,000 wire transfer from SDH; (ii) November 25: $300,000 wire transfer from Oxygen; (iii) November 27: $300,000 wire transfer from SDH; and (iv) December 1: $100,000 wire transfer from Oxygen. Henaghan's email then noted that he had discussed the matter with Heineman and Pence, who both referred him to the AC Member who was working directly with PAB on the matter, and that the AC Member left him a voicemail "indicating the bank continues to put money against the CD they owe [GEE] and it should be fully repaid by the close of business on Monday, Dec. 7" and that the Bank would provide a short apology note. Henaghan's email continued:

> [G]iven the highly unusual nature of this issue and the significant amount of time it is taking to recover the funds, it is critical that we understand both the nature of the administrative error as well as the underlying cause of this error.... As I have never encountered such an issue with a bank or CD and any reasonable person (including the PCAOB or SEC) would certainly question such an issue, I need to be in a position to <u>fully explain</u> exactly what occurred.... As such, from an audit perspective I will require the following prior to issuance of the fiscal 2009 financial statements:
>
> > -Source documents (bank statements, etc.) showing the flow of funds from the closing of the PSQ transaction through the date the funds are fully

[6] BDO engagement partner Henaghan and concurring partner Rainis confirmed in the workpaper index that they reviewed all of the minutes for the GEE board and audit committee meetings discussing the purported CD issue.

transferred to Chase bank in December 2009 (including an understanding of where the CD funds were disbursed upon maturity of the CD in October)

-Explanation as to why the funds received in November and December are being wire transferred from entities other than Park Avenue Bank

-To corroborate this documentation, we may request to meet with someone at Park Avenue Bank to understand the nature of the administrative error

-A written report by management or others to fully explain the circumstances surrounding the matter including steps [GEE] took to gain its understanding of what transpired....

Also, as the $2.3 million is critical to our assessment of the Company's ability to continue as a going concern, it is important for us to understand this situation so as to gain comfort that the funds will remain available to the Company to fund operations as needed.

32. Henaghan's December 4 email also noted as an open item that he had a conversation with Pence that day "to gain an understanding of other investments he has to make sure we have appropriately identified any potential related parties and may have a few follow up questions regarding that matter." One of the items Henaghan had spoken to Pence about was the ownership of River Falls Financial, of which Pence had indicated he was the 100% owner.

33. Shortly after receiving it, the AC Chair forwarded Henaghan's email to Heineman, Pence, the AC Member, the GEE CFO, and GEE's board, noting: "Multiple representatives of BDO have told me that they will not sign off on the GEE Audit . . . until they have sufficient documentation of what has transpired. [BDO's] position is that the Liabilities associated with a sign-off far exceed any past or potential future Audit Fees that [they] have received or will receive. The high level message is that a letter of apology from Park Avenue Bank will not be sufficient." Henaghan received a copy of this email and replied to all: "To clarify, [our] primary concern is getting an understanding of exactly what has occurred in order to allow us to complete our audit procedures. As I am sure everyone would agree, what has transpired over the last few weeks with the funds at [PAB] has been highly unusual. I know everyone has been working to resolve the issue. However, time continues to pass and [GEE's] filing deadline will be here before we know it. As such, I wanted to clarify the importance of appropriately addressing the issue as quickly as possible to allow us to complete the audit."

34. Later in the day on December 4, the AC Chair sent an email to Henaghan and Rainis summarizing his call with the AC Member, stating that when he spoke with the AC Member "he told me that [PAB] had reported these transaction [sic] to the FDIC and that the money sent to the various entities that are now sending GEE the money are sending us the banks money rather than sending it back to the bank." The AC Chair continued: "This makes absolutely no sense. It looks like [PAB] is on the verge of failing. The FDIC and a bankruptcy estate are

going to require [PAB] to collect every cent they can under loans or other arrangements to settle with the creditors of the bank before they send money to third parties."

35. The following day, on December 5, 2009, the AC Chair emailed GEE's board and Heineman calling for a special audit committee meeting on December 9 because of "several unanswered questions related to $2.3 million of the Company's cash which supposedly was invested in a Certificate of Deposit ('CD') at Park Avenue Bank which will need to be answered before BDO will complete their Audit Report for the Company's fiscal year ended September 30, 2009." The AC Chair's email noted several issues, including that (i) there was no account agreement with PAB or regular reporting on the CD; (ii) PAB did not remit the proceeds of the CD into GEE's operating account when it reached its maturity date on October 21, 2009; (iii) PAB provided no explanation to the GEE CFO when he attempted to investigate; and (iv) the AC Member who took the lead on this matter with PAB "was informed on or about November 21, 2009 that the funds would be returned to [GEE] in a series of deposits." The email also provided a chart of seven wire transfers totaling $1.7 million, which included the four noted in Henaghan's December 4 email plus a December 2, 2009, wire transfer from Oxygen for $100,000, a December 2, 2009, wire transfer from River Falls Financial of $300,000, and a December 3, 2009, wire transfer from River Falls Financial also for $300,000. The address listed for both SDH and River Falls Financial on each of their wire transfers in the chart was 11921 Brinley Ave, Louisville, KY. BDO's engagement partner Henaghan received a copy of the AC Chair's December 5 email and forwarded it to Rainis, Gerace, and BDO's general counsel.

36. River Falls Financial was the entity that Henaghan had just been told was 100% owned by Pence. BDO had also learned in conducting background investigations that Associate-1 and Heineman were co-managers of River Falls Financial.

37. On December 4 and December 9, 2009, GEE received two additional wire transfers from River Falls Financial for $300,000 each, bringing the total amount received by GEE from River Falls Financial to $1.2 million and the total of the nine wire transfers to $2.3 million, the same amount that Heineman had purported to invest in a CD.

38. On December 8, the AC Chair emailed Henaghan, providing some links he suggested Henaghan review before Henaghan had a conversation with the AC Member and any representatives of PAB, "particularly the Anthony Huff links" and explained that he "met Anthony Huff when we went to New York" to negotiate PSQ's acquisition. The email included links to a press release announcing the Commission's lawsuit against Huff, a link to Huff's website noting the address 11921 Brinley Avenue, Louisville, KY in the text of the email, and a link to the website for Oxygen noting the identical address. This is the same address that appeared in the wires sent to GEE by River Falls Financial and SDH, as noted in the AC Chair's December 5 email described in paragraph 36, above. Also, Huff's website at the time contained references to River Falls Investments, SDH, Oxygen, and O2HR.

39. In addition to the background checks of Heineman and Associate-1 discussed in paragraph 26, on November 23 and December 21, Henaghan, Rainis, and Gerace participated in

phone calls with Associate-1. According to Henaghan's notes of the calls, they discussed Huff's connections to River Falls Financial and River Falls Investments and the Commission's lawsuit against Huff "alleging fraudulent transfer of assets & non-disclosure of related party transactions." Associate-1 told them that Huff's wife was the original 100% owner of River Falls Financial before it was sold to Pence. Associate-1 also told them that, through a family trust, Huff had a 70% ownership interest in River Falls Investments.

40. Also on December 8, 2009, the day before the special audit committee meeting, the AC Chair received an email from Heineman to the audit committee with several attachments. Heineman's email purported to offer a new explanation for why GEE had received $2.3 million from the three entities rather than PAB. Heineman claimed that he had negotiated an assignment agreement with the manager of River Falls Investments (Associate-1), who "offered to purchase" the purported CD from GEE at face value. Heineman also attached to his email an unsigned, draft assignment agreement and a letter from Heineman to PAB, dated July 21, 2009, that purportedly authorized the $2.3 million CD investment. Heineman's email also attached a July 2009 monthly statement for GEE's operating account at PAB, which included the description of the $2.3 million withdrawal as a debit on July 23 with a debit memo stating in handwriting: "To: Park Avenue Insurance, See Attachment Approval, $2,300,000.00."

41. The AC Chair responded to Heineman's email that day, stating: "Given the chain of event[s] you described below, why was GEE not informed immediately when River Falls Investments purchased the CD and why are we just now learning that a law firm has been engaged to document the assignment of the CD? We have been asking questions about the CD now for nearly a month." BDO engagement partner Henaghan received a copy of Heineman's email with attachments and the AC Chair's reply email. On a printout of the AC Chair's reply email, BDO engagement partner Henaghan wrote "$ Anthony Huff."

42. Henaghan also exchanged emails with the AC Chair later that day, noting his agreement with the AC Chair's questions to Heineman and that "the sale of the CD would constitute a related party transaction which typically should be approved by the board." The AC Chair replied to Henaghan that he had just spoken to Heineman and Heineman "claims that RFI (River Falls Investment) is 100% owned by [Associate-1] and is not related to River Falls Financial Services or any of the other entities." Henaghan replied, "That is consistent with what [] Pence told me in my conversation with him. The common names are a little strange though."

43. Prior to the December 9, 2009, special audit committee meeting, BDO had learned of several indications of fraud relating to the purported CD. Moreover, during the 2009 audit of GEE, BDO became aware of multiple indications that the purported assignment agreement with River Falls Investments was a related party transaction, including:

- the common names of River Falls Investments (purportedly owned by a Huff family trust and Associate-1) and River Falls Financial (purportedly owned by Pence, GEE's chairman);

- River Falls Financial had sent GEE $1.2 million in four installments in connection with the assignment agreement ;

- Heineman and Associate-1 were co-managers of River Falls Financial;

- Associate-1 was a signatory for GEE's operating account at PAB from July to September 2009, when the $2.3 million was purportedly invested in a CD;

- Heineman's email address was rheineman@riverfallsfinancialgroup.com;

- The validity of a business purpose for River Falls Investments to purchase the CD at face value was questionable given that (i) PAB stated that it had no record of the purported CD in its system; and (ii) GEE did not have a binding agreement in its possession concerning its purported purchase of the CD with PAB;

- River Falls Investments was not listed in GEE's banking records as the originator of the wire transfers that were purported to be in connection with the assignment agreement. GEE received the payments from SDH, River Falls Financial, and Oxygen—all of which were made before a binding agreement with River Falls Investments was executed; and

- River Falls Financial, River Falls Investments, SDH, Oxygen, and Huff all shared a common address: 11921 Brinley Avenue in Louisville, KY 40234.

44. Prior to the GEE special audit committee meeting scheduled for December 9, 2009, Henaghan alerted Rainis, Gerace, and BDO's Midwest Regional Business Line Leader (the "BDO Midwest Leader") of Heineman's new explanation concerning the assignment agreement and each of them attended the meeting. According to the audit committee meeting minutes:

- Henaghan expressed concern that BDO still did not have a clear understanding of the purported CD transaction.

- Henaghan said that BDO needed to understand the nature of the purported administrative errors at PAB that he had been told were responsible for the lack of proper documentation regarding the CD transaction. Henaghan also explained that BDO required documentation validating the banking transactions, and an explanation as to why there was no existence of an account agreement with the Bank or no record of the CD being at the bank.

- The BDO Midwest Leader said he believed members of GEE's senior management appeared hesitant to provide information related to these transactions.

- Henaghan stated that the assignment agreement did not resolve the outstanding issues as BDO still needed to know what transpired within PAB and make a determination of whether the assignment agreement with River Falls Investments was a related party transaction.

- BDO also advised that although the assignment agreement "may reduce or eliminate the need for going concern disclosure, it would increase the requirement that management provide sufficient disclosure regarding any related party conflicts."

45. On December 14, 2009, GEE's outside counsel sent PAB a formal letter requesting all documentation and information concerning the purported CD. BDO received a copy of this letter. PAB's December 16, 2009, response, also received by BDO, provided only documents relating to GEE's checking account and did not provide any documents or other information about the purported CD. The checking account documentation, however, indicated that only Associate-1, the GEE CFO, and Pence were authorized signers on GEE's account from July to September 2009—not Heineman—and the checking account statements reflected a debit memo for the transfer of $2.3 million of GEE's cash to Park Avenue Insurance on July 23, 2009.

46. On Friday, December 18, 2009, BDO received a letter from GEE's general counsel that attached the final assignment agreement, dated December 11, and a letter from Associate-1 claiming that the $2.3 million sent to GEE by SDH, Oxygen, and River Falls Financial originated from River Falls Investments and its "wholly owned subsidiaries or affiliates." The letter concluded: "The entirety, sans interest, used by the Company for the purchase of the CD was received into the Company's Chase bank account.... Since time is certainly of the essence to complete the audit work for the Form 10-K to be filed by the Company no later than December 31, 2009, we believe that any open concerns your firm had with respect to the source of the initial concerns over the CD are now resolved." The letter did not provide any additional information concerning what had happened with the purported CD and why Associate-1 and River Falls Investments would pay face value for the purported CD which PAB had not honored and had no records to support.

47. Following the receipt of the December 18 letter, BDO partners Henaghan, Rainis, and Gerace requested consultation with Graul, BDO's national director of accounting and risk management partner, Hambleton, BDO's national director of SEC practice, and BDO's general counsel. After discussion of the situation, these BDO partners agreed they should inform GEE that the December 18 letter did not fully address the questions BDO had raised and demand that the audit committee commission an independent investigation to determine exactly what happened.

F. BDO DEMANDED AN INDEPENDENT INVESTIGATION AND, SHORTLY THEREAFTER, WITHDREW THE DEMAND

48. On Monday, December 21, 2009, Henaghan sent an email to Graul and Hambleton, copying Rainis and Gerace, stating: "This morning we informed the [AC Chair] that we will require an independent investigation of the CD matter in order to conclude the audit of General Employment (consistent with our discussions with you on Friday.) Attached is our proposed written communication." The five-page draft communication described in detail much of the inconsistent evidence BDO had received concerning the purported CD and the purported assignment agreement with River Falls Investments and also included a number of proposed questions. Graul responded:

We do not owe the Board any explanation other than our "audit" of the CD in question is incomplete because we have been unable to obtain sufficient evidence to support the existence and ownership of this asset. You could say that we have obtained bits and pieces of evidence[] but are not satisfied with the sufficiency of such evidence to support our opinion on the financial statements. You could also say that because of the unusual circumstances surrounding the evidence provided thus far, we concluded that the Board should undertake a full investigation of the matter.

49. Later that day, Hambleton replied to Graul's email, asking whether they "should go into detail of the issues in the letter." Graul responded to Hambleton: "Short of saying we think there is fraud, the point is we have been looking for support for months and don't have anything satisfactory to support a final opinion. If we give a list of questions, we'll get answers to those questions and still not know what is really going on. An independent investigation is the only way to get to the bottom of this. The list doesn't look like it would get us there."

50. Also on December 21, 2009, BDO partners Henaghan, Rainis, and Gerace questioned Associate-1 about the assignment agreement and Huff's involvement with GEE, River Falls Financial, and River Falls Investments. According to summary notes of the call, Associate-1's explanation for why River Falls Financial, purportedly owned by Pence, wired payments of $300,000 each to GEE on four days (December 2, 3, 4, and 9), was that the funds were "initially inadvertently transferred to the [River Falls Financial] account rather than the GEE account." Associate-1 also informed them that Huff's wife was the original 100% owner of River Falls Financial and that Pence acquired the company in 2009. The notes also reflect that Associate-1 conveyed that through a trust Huff has an ownership interest in River Falls Investments. Associate-1 further told them that he was familiar with Park Avenue Insurance and he believes it "is insolvent at this point."

51. Ultimately it was determined that the detailed letter would be sent and, early on December 22, 2009, Henaghan sent GEE's AC Chair a five-page letter, dated December 21, 2009, in substantially the same form as Henaghan had internally circulated earlier. Henaghan's letter identified a number of inconsistencies in the audit evidence BDO had received regarding the purported CD:

- BDO had not received "sufficient audit evidence" to support the existence of a CD investment as of September 30, 2009. The questions raised in regards to the CD at both the November and December audit committee meetings remained unaddressed.

- BDO had not received an adequate explanation from PAB as to the whereabouts of the $2.3 million after July 23, 2009, because the Bank claimed to have no record of a CD in its system. PAB never "repaid the CD proceeds or provided an adequate explanation regarding the status of the CD."

- BDO had "requested (but not been granted) an opportunity to speak directly with [PAB] regarding this matter."[7]

- The July 2009 PAB statement "indicates the amount was transferred to Park Avenue Insurance. We would like to understand why it appears that the funds were transferred to Park Avenue Insurance and were not invested into a CD. . . . [M]anagement has provided no explanation for this. The documentation also appears to indicate that prior to September 2009, [Associate-1] was an authorized signor on the Company's operating account."

- Heineman's statements to BDO: (1) claiming on November 23 that "the issue would be resolved and the funds deposited in the Company's bank account within a few days"—which did not happen; (2) stating on November 25 that the money would not be "paid back in installments"—which did happen; (3) claiming GEE would have the proceeds by November 30—which did not happen; (4) asserting on December 8 that he negotiated the assignment with Associate-1—but "during [BDO's] earlier discussions with Mr. Heineman he had represented that he was not involved in the process of resolving the issues related to the CD."

- BDO received conflicting reports regarding the return of the CD funds: (1) the AC Member stated on December 4 that "the bank continues to put money against the CD they owe the Company and it should be fully repaid"; (2) Pence and Heineman referred BDO to the AC Member; and (3) "In all discussions leading up to December 7, 2009, no one ever indicated that the CD had been assigned to [Associate-1]."

- "At the December 9, 2009 audit committee meeting, general counsel and one audit committee member requested that BDO not be present for the discussion regarding the CD matter."

- BDO had not received a clear explanation as to why River Falls Investments would purchase the CD that the Bank has said does not exist, why River Falls Investments would transfer funds to GEE before an assignment agreement had been executed, and whether Associate-1's intent to sell companies to GEE was related to his agreement to purchase the CD.

- "Approximately $900,000 of the proceeds recovered by the Company was received from River Falls Financial Services. [BDO] had previously been informed that River Falls Financial Services was 100% owned by Steve Pence. However, in a December 18, 2009 telephone conversation with Steve Pence, he was unable to explain why these amounts were transferred from River Falls Financial Services (as the proceeds were for [Associate-1's] purchase of the CD)."

---

[7] BDO never contacted PAB or spoke to anyone from PAB after learning that PAB failed to repay the CD proceeds.

52. Henaghan's letter indicated that he included specific facts in the letter "to illustrate that it appears that management has not been forthcoming with information surrounding this matter. This fact pattern has caused us to raise the level of scrutiny surrounding this issue."

53. At the end of his letter, Henaghan stated that BDO did not have sufficient audit evidence at that time to formally conclude the audit and demanded an independent investigation:

> While BDO recognizes that the issue related to the CD may be the result of potential administrative or other errors at [PAB], we do not believe we have been provided sufficient audit evidence to formally conclude on this matter at this point. As a result of the fact that almost one month has passed since the first audit committee meeting discussing this matter, that it appears management has not been fully forthcoming on how it was resolving the issue, and certain question remain unanswered, we will <u>require</u> the audit committee to commission a full investigation of this matter prior to the completion of our audit for the year ended September 30, 2009. This investigation should be conducted by an independent firm that is acceptable to our firm and should address the following unexplained matters:
>
> - Why would the Company maintain $2.3 million at Park Avenue Bank in direct violation of its own investment policy?
> - Why was [Associate-1] an authorized signor on the Company's account at Park Avenue Bank?
> - What happened to the CD? We would like an explanation for all of the facts noted above surrounding the situation.
> - Why did the Company not pursue legal action against the bank and report the situation to the FDIC when the bank failed to reimburse the Company when the CD matured?
> - Why would Mr. Heineman & Mr. Pence represent they were unaware of the status of the CD resolution and why funds were being received from entities other than Park Avenue Bank when it appears they were aware of the assignment agreement with [Associate-1]?
> - Why would [Associate-1] be willing to purchase an asset whose value is in question when he has no relationship to the Company?
> - Why did River Falls Financial Services reimburse the Company for the CD if they did not have any relationship with [Associate-1] and were not a party to the assignment agreement?
> - We would like a clear understanding of the relationships between [Associate-1], Mr. Pence and Mr. Heineman and any entities where they may have joint ownership?
> - What is the relationship between [Associate-1], Mr. Pence, Mr. Heineman and Park Avenue Bank?
>
> Please note that the issues listed above represent[] some of the areas of concern based on our current understanding of the facts. The above items should not be

considered an all-inclusive list and the investigation should not be limited to the above identified items. We may identify additional questions and require additional audit evidence based on the results of the investigation. BDO recommends that this investigation be commissioned as soon as possible.

54. On the evening of December 22, 2009, Respondents learned that the audit committee meeting that was scheduled for the following day had been cancelled, Zizza, an advisor to Pence who had attended GEE board meetings through the fall of 2009, would be taking over as CEO, and that Pence and Associate-1 intended to prepare written responses to each of the issues identified in the December 21 letter. In email exchanges that evening and the following morning regarding these events, Henaghan, Gerace, Hambleton, and the BDO Midwest Leader agreed that BDO should communicate to GEE in writing that BDO "will continue to require an independent investigation."

55. Following Zizza's appointment as GEE's new CEO, BDO partners Henaghan, Rainis, Gerace, and the BDO Midwest Leader spoke to Zizza and the AC Chair on December 24, 2009. A senior partner in BDO's New York office (the "NY Partner") also attended the call because he handled some of Zizza's other business relationships with BDO, including audit or tax work for Zizza's private company and three public companies for which Zizza served as a board member. Henaghan later wrote a memo describing the December 24 call, stating that Zizza "requested that BDO conclude the audit without the need for an independent investigation" because of "the change in management and the fact that the Company had recovered full control of the $2.3 million in question" and that the AC Chair agreed. The memo also indicates that both Zizza and the AC Chair "acknowledged that some inappropriate actions were taken within the Company and that it was likely that even more inappropriate actions were taken at the Bank" and that both "felt that with [Heineman's] removal from the management team, the inappropriate actions within the Company would stop."

56. Also on December 24, BDO partners Henaghan, Rainis, and Gerace had a telephone conversation with Pence, Zizza, and the AC Chair. According to a memo Henaghan later wrote describing this call, Pence indicated he asked GEE to move its business to PAB because of his prior working relationship as an attorney for Antonucci, PAB's then-President, and Associate-1's association with PAB as a customer. The memo also indicates that Pence had told BDO that the reason he represented he was unaware of the status of the CD resolution and why funds were being received from entities other than PAB was because "he was unaware of the assignment agreement until after the funds were returned to the Company." The memo further noted that Associate-1's explanation for why River Falls Financial transferred funds to GEE was because River Falls Financial "also has an operating account" at the same bank and "[t]he funds were transferred from one of his companies to [River Falls Financial] in error," and as such, River Falls Financial "then had to transfer the funds to GEE."

57. After these calls with Zizza, Pence, and the AC Chair, Henaghan sent Rainis, Graul, Gerace, Hambleton, the NY Partner, the BDO Midwest Leader, and BDO's general counsel an email on December 24, 2009, asking for their availability for a call and stating he was drafting a

memo summarizing current facts. Graul responded: "Unless there is something new that hasn't been discussed in the last few calls, what's the purpose?" The NY Partner replied: "The purpose is to try to salvage an account where they made [] changes in the management because of the alleged wrongdoing." Graul responded: "Did they change the guy that can't support the $2 million that supposedly was put into company? What about the two audit committee members that stalled the investigation and the lawyer that wouldn't let us participate in a board meeting to preserve privilege. There's something funny going on here." The NY Partner replied that he had no disagreement with Graul on the last point.

58. BDO's 2009 Assurance Manual required Henaghan to consult with Graul, Hambleton, and Gerace in the circumstances presented here. The Manual required the engagement partner seeking consultation to prepare a memorandum concerning all consultations, which should, among other things, define the issues; "identify client source documents/evidence reviewed"; summarize the proper accounting treatment; summarize the impact on the financial statement presentation and disclosure; and describe any alternative solutions considered and why they were rejected. Finally, BDO's 2009 Assurance Manual required the memorandum to be sent to all consultants, who "should acknowledge their agreement with the memorandum."

59. Early in the morning on December 28, Henaghan sent a draft memo to Rainis, Graul, Gerace, Hambleton, the NY Partner, the BDO Midwest Leader, and BDO's general counsel. The memo summarized BDO's calls with Zizza, the AC Chair, Pence, and Associate-1, and attempted to answer the questions posed in Henaghan's letter to the AC Chair dated December 21, 2009. The memo concluded: "the engagement team believes it is appropriate to reconsider the need for an independent investigation and as such is requesting a consultation on this matter."

60. That same day, Henaghan, Graul, Gerace, Hambleton, the NY Partner, the BDO Midwest Leader, and BDO's general counsel discussed GEE for approximately one hour. Despite the existence of multiple, unanswered questions, they ultimately agreed to drop the demand for an independent investigation if GEE agreed to include commentary on two material weaknesses in internal controls, including certain circumstances surrounding the purported CD, in a Form 8-K and that Associate-1 would not become part of management, among other things. A memo later written by Henaghan to document the discussion notes as considerations, among other things, that Zizza—whom BDO trusted—had replaced Heineman as CEO and that the AC Chair, who had initially supported the independent investigation, no longer believed that it was required.

61. Following their call, the NY Partner spoke to Zizza and Henaghan spoke to the AC Chair about the statements BDO wanted made in the Form 8-K and Associate-1's contemplated role with GEE. Henaghan emailed an update to Rainis, Graul, Gerace, Hambleton, the NY Partner, the BDO Midwest Leader, and BDO's general counsel, stating that the AC Chair indicated that GEE was contemplating an acquisition that would make Associate-1 an approximate 20% shareholder of GEE, but not an officer, director, or part of management. Graul responded: "I don't like it but won't object provided [that Associate-1] is not a board member and has no managerial responsibilities, even with respect to the business he is selling. Please make it perfectly clear that this is the last accommodation that I am willing to make from a risk management perspective."

62. Also following their December 28 call, Hambleton sent an email to the other BDO partners asking whether they were comfortable with the classification of the $2.3 million as cash at September 30. Henaghan responded: "we have a confirmation from Park Ave Bank & the subsequent execution and funding of the assignment agreement as evidence of the existence of the CD at 9/30." Henaghan did not mention any of the inconsistent evidence that he identified in his letter to the AC Chair dated December 21, 2009, and that indicated that no such CD or other cash equivalent existed as of September 30, 2009. Neither Hambleton nor any of the other BDO partners responded or commented on these omissions.

63. BDO provided a draft Form 8-K disclosure to GEE, and reviewed and agreed to the language ultimately included in GEE's Form 8-K filed on December 30, 2009. The Form 8-K disclosed Heineman's resignation, Zizza's appointment as CEO, and the fact that Zizza was paid $20,000 per month since March 2009 to consult for Pence. The Form 8-K also stated:

> In July 2009, the Registrant purchased a $2.3 million certificate of deposit ("CD") at a New York bank. When the CD matured in October 2009, the bank did not timely credit the proceeds of the CD to the Registrant's account. Although the Registrant has made a formal inquiry of the bank, to date the Company has not received an adequate explanation for the bank's non-performance relating to the CD. In December 2009, the Registrant was reimbursed in full through a non-recourse assignment of the CD for face value to an unrelated party, who has other business interests with the bank. The purchaser of the CD is neither an employee nor a director of the Registrant.

64. The Form 8-K also disclosed two material weaknesses: (1) "the size of the New York bank from which the CD was purchased did not meet the minimum requirements of [GEE]'s investment policy"; and (2) the Company "authorized an individual that was neither an employer nor a director as an authorized signor on the Registrant's bank account." The Form 8-K did not indicate that Associate-1 was both the authorized signatory and the purportedly "unrelated party" who purchased the purported CD.

65. On January 4, 2010, Henaghan sent an email to Rainis, Graul, Gerace, Hambleton, the BDO Midwest Leader, and BDO's general counsel attaching the Form 8-K, the December 21, 2009, letter to the AC Chair demanding an independent investigation, Heineman's resignation email, and a final memo discussing BDO's calls with the AC Chair, Pence, Zizza, and Associate-1 and concluding that BDO should issue its opinion on GEE's financial statements. The final memo noted that Zizza and the AC Chair "acknowledged that some inappropriate actions were taken within the Company and that it was likely that even more inappropriate actions were taken at the Bank.... Both men also acknowledged that they felt that with [Heineman's] removal from the management team, the inappropriate actions within the Company would stop." The memo noted that "without the cooperation of [Heineman] and the Bank – neither of which anyone was likely to obtain, it was highly unlikely that the motivations or even all of the actions would ever be learned." BDO did not attempt to contact Heineman following his resignation nor did BDO attempt to contact PAB at any time after this issue arose.

66. The memo also stated that Zizza "represented to BDO that [Associate-1] will not become an employee or director of the Company" and concluded: "To the extent any new adverse information related to the transaction comes to our attention we will again consult with BDO's risk management and National SEC groups in regards to continued client retention." Rainis, Graul, Gerace, and Hambleton each reviewed the memo and concurred with the decision to drop the demand for an independent investigation. BDO's general counsel also agreed with the approach outlined in the memo.

67. On January 5, 2010, after Respondents had already decided that GEE's Form 8-K disclosure concerning the purported CD was adequate and informed GEE that BDO would withdraw its demand for an investigation and issue an unqualified audit opinion, Hambleton asked BDO's general counsel, Henaghan, Rainis, Graul, Gerace, and the NY Partner: "I want to make sure we believe the company's response is a sufficient response to a potential illegal act. Although we didn't specifically say we thought there was a potential illegal act in the [December 21] letter, we did include enough issues that would lead someone to that view as does the memo's statement about some 'inappropriate actions.'" BDO's general counsel responded: "I do believe the company's response was appropriate under the circumstances."

68. On January 8, 2010, GEE filed its Form 10-K, which classified the $2.3 million purported CD as a cash equivalent and stated in footnote disclosure to the financial statements:

> In July 2009, the Company purchased a $2,300,000 certificate of deposit ("CD") at a New York bank. When the CD matured in October 2009, the bank did not timely credit the proceeds of the CD to the Company's account. Although the Company has made a formal inquiry of the bank, to date the Company has not received an adequate explanation for the bank's non-performance relating to the CD. In December 2009, the Company was reimbursed in full through a non-recourse assignment of the CD for face value to an unrelated party, who has other business interests with the bank. The purchaser of the CD is neither an employee nor a director of the Company.

69. GEE's Form 10-K filed on January 8, 2010 contained an audit report from BDO that stated BDO's audits were conducted "in accordance with the standards of the Public Company Accounting Oversight Board (United States)" and that GEE's financial statements presented fairly, in all material respects, the company's position and results at September 30, 2009, in conformity with GAAP.

G. IN 2010, BDO LEARNED OF FACTUAL ALLEGATIONS IN A CRIMINAL COMPLAINT AGAINST THE PAB PRESIDENT ALLEGING THAT THE PURPORTED CD DID NOT EXIST

70. On January 19, 2010, just days after BDO issued its unqualified opinion and GEE filed its 2009 Form 10-K, Henaghan sent an email to Rainis, Graul, Gerace, Hambleton, the BDO Midwest Leader, and NY Partner attaching a January 12, 2010, Grand Jury Subpoena, issued to the

AC Chair seeking his appearance and production of "any and all documents relating to any account maintained at Park Avenue Bank."

71. On March 13, 2010, the United States of America filed a 44-page criminal Complaint against former PAB president Antonucci (the "Antonucci Complaint"), alleging a scheme and conspiracy involving a $6.5 million round-trip transaction in which GEE's $2.3 million was diverted as part of the conspiracy. Huff, Heineman, and Pence are referred to and identifiable as designated "co-conspirator[s] not named herein" in certain aspects of that conspiracy. The allegations in the Antonucci Complaint contained several details that indicated that GEE did not have a CD with PAB, that River Falls Financial, River Falls Investments, Oxygen, SDH, and PSQ were related parties, and that Heineman had authorized the money to be transferred to Park Avenue Insurance as part of the conspiracy, and not to purchase a CD:

- "To hide the improper diversion of GEE's funds from GEE's auditors and Board of Directors, [Antonucci] and others created a counterfeit certificate of deposit [], falsely representing that GEE's $2.3 million had been invested in a 90-day certificate of deposit at the Bank. In fact, and as [Antonucci] well knew, there was no $2.3 million CD."

- GEE's $2.3 million had been transferred to Park Avenue Insurance, which was controlled by Antonucci. According to the Bank records, Heineman authorized this transfer.

- Antonucci fraudulently signed the BDO confirmation of the $2.3 million CD, when Antonucci knew it did not exist.

The Antonucci Complaint further identified several "Oxygen-related entities" as participants in the conspiracy, including, River Falls Financial (which Pence said he owned), PSQ (Pence's entity that purchased the majority stake in GEE), and Oxygen and SDH—two companies that paid GEE purportedly under the assignment agreement with River Falls Investments (which Associate-1 said he and a Huff family trust owned). It further alleged that a group of five associates (including Huff and Pence) were listed on some of the accounts of the Oxygen-related entities, which shared a common address in Louisville, Kentucky.

72. On April 27, 2010, Henaghan sent an email attaching the Antonucci Complaint to Rainis, Graul, Gerace, Hambleton, the BDO Midwest Leader, and BDO's general counsel. Henaghan's email also attached a March 10, 2010 Grand Jury Subpoena issued to GEE, requesting (i) documents relating to Huff, Pence, Heineman, the purported CD, SDH, Oxygen, O2HR, and River Falls Financial and (ii) documents reflecting any payments to Heineman, Pence, Associate-1, or the AC Member. Henaghan further attached a client retention memo addressed to Graul, Hambleton, Gerace, the BDO Midwest Leader, and BDO's general counsel. The memo stated: "As I believe everyone is aware, in March 2010, Charles Antonucci, the president of Park Avenue Bank was arrested related to allegations of criminal acts in his role as bank president, including signing a counterfeit CD and our confirmation when he had in fact diverted the funds for his own personal use." The memo also noted that Pence was an unnamed co-conspirator. The memo concluded that the engagement team recommended that BDO continue its relationship with GEE because, among other factors, "Pence has not been formally charged yet with any criminal wrong-

doing." However, the memo did not address what impact the Antonucci Complaint's allegations might have on the representations contained in GEE's financial statements (issued two months before the complaint) concerning the purported CD.

73. On April 28, 2010, Graul responded to Henaghan's email requesting that he obtain additional information concerning certain allegations in connection with client retention concerns. Specifically, Graul indicated that Gerace had confirmed to him that "[w]hen the missing company funds were 'dribbling' in from other sources" those sources included entities linked to the conspiracy alleged in the Antonucci Complaint. Graul asked Henaghan to determine (i) whether any related party transactions might involve the entities mentioned in the complaint; (ii) who authorized the funds to be paid to GEE from the "Oxygen-related entities" River Falls Financial, SDH, and Oxygen; and (iii) whether the AC Chair and Zizza are comfortable working with Pence because "the preponderance of the accusations seem pretty bad for Mr. Pence." Hambleton responded to all, stating: "I agree with [Graul]. It seems there are more potential connections here." However, neither Graul, Hambleton, Gerace, nor Rainis ever followed up with Henaghan to learn whether he had identified those "potential connections." Nevertheless, Graul and Gerace subsequently approved the retention of GEE as a client.

74. In a May 25, 2010, email, Henaghan told Zizza that he would like to discuss certain issues regarding the Antonucci Complaint. Henaghan wrote that he wanted to discuss the allegations that "Pence purchased a 25% interest in Bedford Consulting from Antonucci for $6.5 million in what the complaint describes as an 'artifice designed to cover up the true source of the $6.5 million.'" Henaghan also wrote: "The Complaint indicates that River Falls is owned by Pence, [Associate-1], and Heineman. All previous information disclosed to us by Heineman and Pence indicated that Pence owned 100% of River Falls." He further noted that the Complaint indicated that PSQ borrowed money from River Falls to buy the GEE shares. Henaghan's email to Zizza did not address the allegations in the Antonucci Complaint denying the existence of the purported CD or indicating related party issues concerning the funds received by the "Oxygen-related entities."

75. On June 1, 2010, in connection with the allegations contained in the Antonucci Complaint, an Assistant United States Attorney for the Southern District of New York interviewed Henaghan in detail about BDO's 2009 audit, including the information BDO received about the ownership structures of River Falls Financial, River Falls Investments, WTS, On-Site, Oxygen, and AIR.

76. Other than Henaghan's single discussion with Pence (who denied the allegations) and further communications with Zizza (who stated that he still trusted Pence), BDO did not perform any additional procedures specific to the allegations in the Antonucci Complaint concerning GEE, its chairman and former CEO, or the purported CD. BDO's workpapers do not include any information about what BDO did to investigate the allegation that PAB records indicated that Heineman authorized the transfer of $2.3 million to Park Avenue Insurance. BDO's workpapers also do not include any analysis of the impact on GEE's financial statements if Heineman had conspired with Antonucci to steal GEE's $2.3 million, by authorizing the transfer of

the money to Antonucci's company, Park Avenue Insurance, as alleged in the Antonucci Complaint. The workpapers do not include an analysis of whether the assignment agreement with River Falls Investments, in which GEE received $2.3 million from SDH, Oxygen, or River Falls Financial, was a related party transaction. In fact, Henaghan did not document any answers he received pursuant to his discussions with Pence or Zizza. Moreover, the client retention memo approved by Graul and Gerace and "matters for reviewer concern" memo reviewed by Henaghan and Rainis, which were retained in the workpapers for the 2010 audit, make no reference to the Antonucci Complaint or guilty plea.

77. In October 2010, Antonucci pled guilty to multiple criminal charges in a criminal information, including securities fraud, bank bribery, and embezzlement of bank funds. As part of his guilty plea, Antonucci admitted that he and his co-conspirators caused GEE to use $2.3 million of its funds to make PAB whole on a loan PAB made to a company controlled by his co-conspirators that had gone bankrupt, that the purported CD had never existed, and that he had signed a false confirmation that the bank had issued a CD to GEE that he then sent to BDO. BDO learned of this guilty plea shortly thereafter.

78. Henaghan, Rainis, and Gerace learned, through GEE's November 2010 Form 8-K filing and publicly available information, that Pence purportedly sold PSQ to a person associated with Huff ("Associate-2"). After Associate-2 became the majority owner of GEE, a BDO senior manager on the GEE audit noted that Google showed that Associate-2 was connected to O2HR, Huff, and Associate-1. According to the Form 8-K, Associate-2 paid nothing for PSQ; he just assumed promissory notes issued by Pence to AIR for approximately $3 million, which funded PSQ's purchase of the majority of GEE shares in July 2009. Associate-1 had previously informed Henaghan in a December 21, 2009 email that AIR had "investments received and invested in" River Falls Investments, the entity that purchased the purported CD from GEE.

79. Despite all of these additional indications of affiliation among AIR, River Falls Investments, River Falls Financial, Pence, Associate-1, and Huff, BDO did not perform additional audit procedures in 2010 to determine whether the purported purchase by River Falls Investments of the purported CD from GEE (i) was fairly characterized in GEE's financial statements or (ii) should have been identified as a related party transaction in GEE's financial statements. Instead, Henaghan and Rainis relied on GEE management and director representations that there were no undisclosed related party transactions. BDO also relied on Associate-1's representations although, as Graul acknowledged to Gerace and Henaghan on August 10, 2010: "Anything and everything that involves [Associate-1] should be scrutinized carefully . . . [Associate-1] is not to be trusted and everyone on the engagement should be made aware of this." Nevertheless, Henaghan, as engagement partner, Rainis, as concurring partner, and Gerace, as the assigned regional technical director, each agreed in those capacities that BDO could issue an unqualified audit opinion.

80. GEE's Form 10-K filed on December 28, 2010, for its fiscal year ended September 30, 2010, classified the $2.3 million CD as a cash equivalent as of September 30, 2009, included a similar disclosure as the disclosure in the Form 10-K filed in January 2010:

> In November 2009, the Company discovered that it did not receive the proceeds from a bank for a $2,300,000 certificate of deposit that was scheduled to mature in October 2009. Although the Company made a formal inquiry of the bank, it did not receive an adequate explanation for the bank's non-performance related to the deposit. In December 2009, the Company entered into an agreement to assign its interests in the certificate of deposit, without recourse, to an unrelated party that has other business interests with the bank, and the Company was reimbursed for the face value of the deposit.

81. GEE's Form 10-K filed on December 28, 2010, as amended on April 15, 2011, contained an audit report from BDO that stated BDO's audits were conducted in accordance with PCAOB standards and that GEE's financial statements presented fairly, in all material respects, the company's position and results at September 30, 2010 and 2009, in conformity with GAAP.

H. VIOLATIONS

RULE 102(e) AND SECTION 4C OF THE EXCHANGE ACT

82. BDO's 2009 and 2010 audits were deficient and not performed in accordance with PCAOB standards.[8] Section 4C(b) and Rule 102(e)(1)(iv) define improper professional conduct with respect to persons licensed to practice as accountants. Pursuant to these provisions, "improper professional conduct" includes two types of negligent conduct: (1) a single instance of highly unreasonable conduct that results in a violation of professional standards in circumstances in which heightened scrutiny is warranted; or (2) repeated instances of unreasonable conduct, each resulting in violations of professional standards, that indicate a lack of competence.

Failed to exercise due professional care and an attitude of professional skepticism (AU § 230)

83. PCAOB standards require auditors to exercise due professional care in the planning and performance of the audit and the preparation of the report. (AU § 230.01) Auditors must maintain an attitude of professional skepticism, which includes "a questioning mind and a critical assessment of audit evidence." (AU § 230.07) In addition, the auditor should "consider the competency and sufficiency of the evidence. Since evidence is gathered and evaluated throughout the audit, professional skepticism should be exercised throughout the audit

[8] References to auditing standards in this Order are to PCAOB standards in effect at the time the audit work was performed.

process." (AU § 230.08) The Commission and courts have held that related party transactions require heightened scrutiny.[9]

84. As set forth above, Henaghan, Rainis, Graul, and Gerace knew or should have known facts that cast substantial doubt on the existence of the purported CD given, among other things, (1) significant integrity issues with Heineman, the person who claimed to have authorized the investment, and Associate-1, the person with whom Heineman purportedly "negotiated" the assignment agreement; (2) PAB had told GEE that it had no record of the purported CD; and (3) PAB had provided GEE and BDO with documentation showing the $2.3 million actually had been transferred to Park Avenue Insurance on July 23, 2009.

85. Henaghan, Rainis, Graul, and Gerace also knew or should have known that the circumstances presented by the purported $2.3 million CD that was not honored by PAB, the subsequent receipt by GEE of $2.3 million from River Falls Financial, SDH, and Oxygen, and the purported assignment agreement with River Falls Investments warranted heightened scrutiny. Notwithstanding the many red flags concerning the purported CD and the assignment agreement discussed above, BDO issued audit reports in both 2009 and 2010 containing unqualified opinions that were filed with GEE's financial statements in the Form 10-Ks. In those reports, BDO inaccurately stated that the audit had been conducted in accordance with PCAOB standards and that GEE's financial statements presented fairly, in all material respects, the company's position and results in conformity with GAAP.

86. As a result of their above-described conduct, Henaghan, Rainis, Graul, and Gerace failed to exercise due professional care and an attitude of professional skepticism in BDO's 2009 and 2010 audits of GEE.

Failed to obtain sufficient competent evidential matter concerning the purported CD (AU §§ 326 and 333)

87. PCAOB standards require auditors to obtain sufficient competent evidential matter to afford a reasonable basis for an opinion with respect to the financial statements under audit. To be "competent," evidence "must be both valid and relevant." (AU § 326.21) "The amount and kinds of evidential matter required to support an informed opinion are matters for the auditor to determine in the exercise of his or her professional judgment after a careful study of the circumstance in the particular case." (AU § 326.22) This includes evaluating the reliability of the evidence,[10] and weighing all of the evidence obtained. The validity and sufficiency of required evidence depends on the circumstances and the auditors' judgment, but should be "persuasive" though it need not be "convincing." (AU § 326.22)

---

[9] *See McCurdy v. SEC*, 396 F.3d 1258, 1261 (D.C. Cir. 2005) (citing *Howard v. SEC*, 376 F.3d 1136, 1149 (D.C. Cir. 2004)) (noting that related party transactions "are viewed with extreme skepticism in all areas of finance").

[10] AU § 330.33: "the auditor should consider (a) the reliability of the confirmations…."

88. PCAOB standards also provide that management representations "are not a substitute for the application of th[e] auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit," that "the auditor obtains written representations from management to complement other auditing procedures," and that "[i]n exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest." (AU §§ 333.02, 333.03, 230.09)[11]

89. As a result of his above-described conduct, Henaghan failed to obtain sufficient evidence supporting assertions in GEE's 2009 and 2010 Form 10-K financial statements that the purported CD existed and was a cash equivalent as of September 30, 2009, and that GEE entered into an assignment agreement with an unrelated party.[12]

Failed to determine whether fraud or potential illegal acts may have impacted GEE's fiscal year 2009 and 2010 financial statements (AU §§ 316, 317)

90. Under AU § 316.01, an auditor must plan and perform an audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. The auditors must brainstorm "how and where they believe the entity's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated." (AU § 316.14) AU § 316.06 states that there are "[t]wo types of misstatements relevant to the auditor's consideration of fraud—misstatements arising from fraudulent financial reporting and misstatements arising from misappropriation of assets." It explains that financial reporting may be accomplished by falsification of supporting documentation, or misrepresentations of events, transactions, or other significant information. It further instructs that fraudulent financial reporting "need not be the result of a grand plan or conspiracy" and may instead "be that management representatives rationalize the appropriateness of a material misstatement ... as a temporary misstatement of financial statement ... expected to be corrected later." It instructs that that misappropriation of assets may be accompanied by "false or misleading records or documents, possibly created by circumventing controls." AU § 316.09 also notes that management engaged in fraud will take steps to conceal the fraud from auditors. AU § 316.10 further states that fraud may be concealed through collusion among management and third parties. For these reasons, AU § 316.13 requires auditors to exercise professional skepticism when considering the risk of material misstatement due to fraud.

---

[11] AU § 508.20 also provided that "[c]ertain circumstances may require a qualified opinion ... [when] "[t]here is a lack of sufficient competent evidential matter or there are restrictions on the scope of the audit that have led the auditor to conclude that he or she cannot express an unqualified opinion...."

[12] In addition, AS § 3.12 required BDO to "document significant audit findings or issues, actions taken to address them (including additional evidence obtained), and the basis for the conclusions reached." Henaghan failed to comply with this documentation requirement with respect to each of the major auditing issues encountered during the 2009 and 2010 audits.

91. AU § 316.68 lists conditions that may be identified during the fieldwork that are indicators of potential fraud, including (i) unsupported or unauthorized balances or transactions; (ii) missing documents; (iii) unusual discrepancies between the entity's records and confirmation replies; (iv) inconsistent, vague or implausible responses from management or employees; and (v) denial of access to records, facilities, certain employees, customers, vendors or others from whom audit evidence might be sought.

92. AU § 317.10 notes that auditors may become aware of possible illegal acts during the course of their audit: "When the auditor becomes aware of information concerning a possible illegal act, the auditor should obtain an understanding of the nature of the act, the circumstances in which it occurred and sufficient other information to evaluate the effect on the financial statements."

93. As a result of his above-described conduct, Henaghan failed to adhere to these PCAOB standards during BDO's 2009 or 2010 audits of GEE.

Failed to obtain sufficient audit evidence to determine whether the assignment agreement was a related party transaction (AU §§ 326 and 334)

94. PCAOB standards require that "[an] auditor should view related party transactions within the framework of existing [accounting] pronouncements, placing primary emphasis on the adequacy of disclosure. In addition, the auditor should be aware that the substance of a particular transaction could be significantly different from its form and that the financial statements should recognize the substance of particular transactions rather than merely their legal form." (AU § 334.02)

95. PCAOB standards require an auditor to obtain sufficient competent evidential matter to afford a reasonable basis for an opinion regarding the financial statements under audit. (AU § 326.01) In selecting particular substantive tests to achieve the audit objectives, an auditor considers, among other things, the risk of material misstatement of the financial statements. (AU § 326.11) With respect to related party transactions, PCAOB standards require that after an auditor identifies related party transactions, he or she should apply the procedures considered necessary to obtain satisfaction concerning their purpose, nature, and extent and their effect on the financial statements. (AU § 334.09) For each related party transaction for which disclosure is required, PCAOB standards require that the auditor satisfy himself that the transaction is adequately disclosed in the financial statements. (AU § 334.11)

96. The failure to disclose the assignment agreement as a related party transaction caused the financial statements to be misleading. Financial Accounting Standards Board Accounting Standards Codification ("ASC") Topic 850, *Related Party Disclosures* required that the following must be disclosed concerning related party transactions: (a) the nature of the relationship involved; (b) a description of the transaction; (c) the dollar amount of the transaction; and (d) amounts due from or to related parties and, if not otherwise apparent, the terms and manner of settlement. Related party transactions cannot be presumed to have been conducted at arm's-length. GAAP requires these disclosures so the reader can be alerted to their existence, so as to

help the reader of the financial statements detect and explain possible differences in financial statements of a company that engaged in related party transactions to those that did not.[13] Such disclosure helps the reader evaluate the substance of the related party transaction.

97. As a result of his above-described conduct, Henaghan failed to exercise the requisite level of care, failed to perform sufficient procedures to identify related party transactions, failed to obtain sufficient audit evidence to determine whether the assignment agreement was a related party transaction during BDO's 2009 or 2010 audits of GEE, and failed to follow up on evidence indicating that assertions regarding the purported CD and assignment agreement were unsubstantiated. Respondents also failed to ensure the issuance of an accurate audit report in 2009 and 2010, which misrepresented that GEE's financial statements were presented fairly, in all material respects, in accordance with GAAP.

Failed to Investigate Newly Discovered Facts in 2010 (AU § 561)

98. AU § 561.04 states that when an auditor becomes aware of information that he would have investigated if it had come to his attention during the course of the audit, he must determine if the information is reliable and whether the facts existed at the date of his report. If the information is reliable and existed at the date of the report, the auditor must determine if his report would have been affected and people relying on the financial statements would find it important. (AU § 561.05.)

99. As a result of his above-described conduct, Henaghan failed to adhere to this PCAOB Standard after learning of, among other things, the Antonucci Complaint in March 2010 and subsequent guilty plea in October 2010, as it concerned GEE's 2009 financial statements.

Rainis's Failure to Comply with Concurring Review Standard

100. The concurring partner reviewer's responsibility is to perform an objective review of significant auditing, accounting, and financial reporting matters and to conclude, based on all the relevant facts and circumstances of which the concurring partner reviewer has knowledge, that no matters that have come to his or her attention would cause the concurring partner reviewer to believe that the client's financial statements covered by the firm's audit report are not in conformity with generally accepted accounting principles in all material respects or that the audit was not performed in accordance with generally accepted auditing standards. SEC Practice Section §1000.39 (Appendix E).

101. As a result of his above-described conduct, Rainis failed to adhere to this standard during BDO's 2009 or 2010 audits of GEE.

---

[13] ASC 850-10-05-2.

Finding

102. As a result of the conduct described above, the Commission finds that Henaghan, Rainis, Graul, and Gerace engaged in improper professional conduct within the meaning of Sections 4C(a)(2), 4C(b)(2)(A), and 4C(b)(2)(B) of the Exchange Act and Rules 102(e)(1)(ii), 102(e)(1)(iv)(B)(1), and 102(e)(1)(iv)(B)(2) of the Commission's Rules of Practice. The conduct by Henaghan, Rainis, Graul, and Gerace in the 2009 and 2010 audits of GEE involved repeated instances of unreasonable conduct, each resulting in violations of PCAOB standards and indicating a lack of competence, and also satisfies the standard of highly unreasonable conduct resulting in violations of PCAOB standards in circumstances in which heightened scrutiny was warranted.

CAUSING VIOLATIONS OF SECTION 10A OF THE EXCHANGE ACT

103. Section 10A(a)(1) of the Exchange Act requires each audit conducted of an issuer by a registered public accounting firm to include "procedures designed to provide reasonable assurance of detecting illegal acts that would have a direct and material effect on the determination of financial statement amounts." Section 10A(a)(2) of the Exchange Act requires each audit conducted of an issuer by a registered public accounting firm to include "procedures designed to identify related party transactions that are material to the financial statements or otherwise require disclosure therein." Section 10A(b)(1) requires a registered public accounting firm to, in accordance with PCAOB standards, "determine whether it is likely that an illegal act has occurred" if the firm "detects or otherwise becomes aware of information indicating that an illegal act (whether or not perceived to have a material effect on the financial statements of the issuer) has or may have occurred." No showing of scienter is necessary to establish a violation of Section 10A. *See SEC v. Solucorp Indus., Ltd.*, 197 F. Supp. 2d. 4, 10-11 (S.D.N.Y. 2002).

104. In connection with the 2009 and 2010 GEE audits, BDO violated Section 10A(a)(1) of the Exchange Act by failing to plan, design, and carry out audit procedures to provide reasonable assurance of detecting illegal acts that would have a direct and material effect on the determination of financial statements amounts. As a result of Respondents' conduct described above, Respondents were each a cause of BDO's violations in circumstances in which each knew or should have known that their respective acts and omissions would contribute to BDO's violations.

105. In connection with the 2009 and 2010 GEE audits, BDO violated Section 10A(a)(2) of the Exchange Act by failing to plan, design, and carry out audit procedures to identify GEE's material related party transactions that required disclosure in the financial statements. As a result of Respondents' conduct described above, Respondents were each a cause of BDO's violations in circumstances in which each knew or should have known that their respective acts and omissions would contribute to BDO's violations.

106. In connection with the 2009 and 2010 GEE audits, BDO violated Section 10A(b)(1) of the Exchange Act by failing to determine whether it was likely that an illegal act had occurred after BDO was made aware of information indicating that an illegal act may have

occurred. As a result of Respondents' conduct described above, Respondents were each a cause of BDO's violations in circumstances in which each knew or should have known that their respective acts and omissions would contribute to BDO's violations.

107. As a result of the conduct described above, the Commission finds that Respondents were each a cause of BDO's violations of Sections 10A(a)(1), (a)(2), and (b)(1) of the Exchange Act.

CAUSING VIOLATIONS OF SECTION 13(a) OF
THE EXCHANGE ACT AND RULE 13a-1 THEREUNDER

108. Section 13(a) of the Exchange Act and Rule 13a-1 thereunder require that every issuer of a security registered pursuant to Section 12 of the Exchange Act file with the Commission annual reports (i.e., Form 10-K) as the Commission may require, and mandate that periodic reports contain such further material information as may be necessary to make the required statements not misleading. The obligation to file such reports embodies the requirement that they be true and correct.

109. GEE's annual reports on Form 10-K for fiscal years 2009 and 2010 included audit reports from BDO that stated BDO's audits were conducted "in accordance with the standards of the Public Company Accounting Oversight Board (United States)" and that GEE's financial statements presented fairly, in all material respects, the company's position and results. These statements were materially misleading. As a result of Respondents' above-described conduct, BDO's 2009 and 2010 audits were not conducted in accordance with PCAOB standards and the financial statements included in GEE's 2009 and 2010 Form 10-Ks were materially misstated because, among other things, they incorrectly represented GEE had a $2.3 million CD and classified it as a cash equivalent as of September 30, 2009, and did not disclose the assignment agreement as a related party transaction, contrary to GAAP. At a minimum, each of the Respondents knew or should have known that their acts or omissions would contribute to GEE's filing of inaccurate 2009 and 2010 Form 10-Ks.

110. As a result of the conduct described above, the Commission finds that Respondents were a cause of GEE's violations of Section 13(a) of the Exchange Act and Rule 13a-1 thereunder.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondents' Offers.

Accordingly, it is hereby ORDERED, effective immediately, that:

A. Pursuant to Section 21C of the Exchange Act, Henaghan, Rainis, Graul, Gerace, and Hambleton shall cease and desist from committing or causing any violations and any future violations and any future violations of Sections 10A and 13(a) of the Exchange Act and Rule 13a-1 thereunder.

B. Henaghan is denied the privilege of appearing or practicing before the Commission as an accountant.

1. After three years from the date of this Order, Henaghan may request that the Commission consider his reinstatement by submitting an application (attention: Office of the Chief Accountant) to resume appearing or practicing before the Commission as:

a. a preparer or reviewer, or a person responsible for the preparation or review, of any public company's financial statements that are filed with the Commission. Such an application must satisfy the Commission that Henaghan's work in his practice before the Commission will be reviewed either by the independent audit committee of the public company for which he works or in some other acceptable manner, as long as he practices before the Commission in this capacity; and/or

b. an independent accountant. Such an application must satisfy the Commission that:

(1) Henaghan, or the public accounting firm with which he is associated, is registered with the PCAOB in accordance with the Sarbanes-Oxley Act of 2002, and such registration continues to be effective;

(2) Henaghan, or the registered public accounting firm with which he is associated, has been inspected by the PCAOB and that inspection did not identify any criticisms of or potential defects in his or the firm's quality control system that would indicate that Henaghan will not receive appropriate supervision;

(3) Henaghan, has resolved all disciplinary issues with the PCAOB, and has complied with all terms and conditions of any sanctions imposed by the PCAOB (other than reinstatement by the Commission); and

(4) Henaghan acknowledges his responsibility, as long as Henaghan appears or practices before the Commission as an independent accountant, to comply with all requirements of the Commission and the PCAOB, including, but not limited to, all requirements relating to registration, inspections, engagement quality review, and quality control standards.

2. The Commission will consider an application by Henaghan to resume appearing or practicing before the Commission provided that his CPA license is current and he has resolved all other disciplinary issues with the applicable boards of

accountancy. However, if CPA licensure is dependent on reinstatement by the Commission, the Commission will consider an application on its other merits. The Commission's review may include consideration of, in addition to the matters referenced above, any other matters relating to Henaghan's character, integrity, professional conduct, or qualifications to appear or practice before the Commission.

C. Rainis is denied the privilege of appearing or practicing before the Commission as an accountant.

1. After two years from the date of this Order, Rainis may request that the Commission consider his reinstatement by submitting an application (attention: Office of the Chief Accountant) to resume appearing or practicing before the Commission as:

a. a preparer or reviewer, or a person responsible for the preparation or review, of any public company's financial statements that are filed with the Commission. Such an application must satisfy the Commission that Rainis's work in his practice before the Commission will be reviewed either by the independent audit committee of the public company for which he works or in some other acceptable manner, as long as he practices before the Commission in this capacity; and/or

b. an independent accountant. Such an application must satisfy the Commission that:

(1) Rainis, or the public accounting firm with which he is associated, is registered with the PCAOB in accordance with the Sarbanes-Oxley Act of 2002, and such registration continues to be effective;

(2) Rainis, or the registered public accounting firm with which he is associated, has been inspected by the PCAOB and that inspection did not identify any criticisms of or potential defects in his or the firm's quality control system that would indicate that Rainis will not receive appropriate supervision;

(3) Rainis, has resolved all disciplinary issues with the PCAOB, and has complied with all terms and conditions of any sanctions imposed by the PCAOB (other than reinstatement by the Commission); and

(4) Rainis acknowledges his responsibility, as long as Rainis appears or practices before the Commission as an independent accountant, to comply with all requirements of the Commission and the PCAOB, including, but not limited to, all requirements relating to registration, inspections, engagement quality review, and quality control standards.

2. The Commission will consider an application by Rainis to resume appearing or practicing before the Commission provided that his CPA license is current and he has resolved all other disciplinary issues with the applicable boards of accountancy. However, if CPA licensure is dependent on reinstatement by the Commission, the Commission will consider an application on its other merits. The Commission's review may include consideration of, in addition to the matters referenced above, any other matters relating to Rainis's character, integrity, professional conduct, or qualifications to appear or practice before the Commission.

D. Gerace is denied the privilege of appearing or practicing before the Commission as an accountant.

1. After one year from the date of this Order, Gerace may request that the Commission consider his reinstatement by submitting an application (attention: Office of the Chief Accountant) to resume appearing or practicing before the Commission as:

a. a preparer or reviewer, or a person responsible for the preparation or review, of any public company's financial statements that are filed with the Commission. Such an application must satisfy the Commission that Gerace's work in his practice before the Commission will be reviewed either by the independent audit committee of the public company for which he works or in some other acceptable manner, as long as he practices before the Commission in this capacity; and/or

b. an independent accountant. Such an application must satisfy the Commission that:

(1) Gerace, or the public accounting firm with which he is associated, is registered with the PCAOB in accordance with the Sarbanes-Oxley Act of 2002, and such registration continues to be effective;

(2) Gerace, or the registered public accounting firm with which he is associated, has been inspected by the PCAOB and that inspection did not identify any criticisms of or potential defects in his or the firm's quality control system that would indicate that Gerace will not receive appropriate supervision;

(3) Gerace, has resolved all disciplinary issues with the PCAOB, and has complied with all terms and conditions of any sanctions imposed by the PCAOB (other than reinstatement by the Commission); and

(4) Gerace acknowledges his responsibility, as long as Gerace appears or practices before the Commission as an independent accountant, to comply with all requirements of the Commission and the PCAOB,

including, but not limited to, all requirements relating to registration, inspections, engagement quality review, and quality control standards.

2. The Commission will consider an application by Gerace to resume appearing or practicing before the Commission provided that his CPA license is current and he has resolved all other disciplinary issues with the applicable boards of accountancy. However, if CPA licensure is dependent on reinstatement by the Commission, the Commission will consider an application on its other merits. The Commission's review may include consideration of, in addition to the matters referenced above, any other matters relating to Gerace's character, integrity, professional conduct, or qualifications to appear or practice before the Commission.

E. Graul is denied the privilege of appearing or practicing before the Commission as an accountant.

1. After one year from the date of this Order, Graul may request that the Commission consider his reinstatement by submitting an application (attention: Office of the Chief Accountant) to resume appearing or practicing before the Commission as:

a. a preparer or reviewer, or a person responsible for the preparation or review, of any public company's financial statements that are filed with the Commission. Such an application must satisfy the Commission that Graul's work in his practice before the Commission will be reviewed either by the independent audit committee of the public company for which he works or in some other acceptable manner, as long as he practices before the Commission in this capacity; and/or

b. an independent accountant. Such an application must satisfy the Commission that:

(1) Graul, or the public accounting firm with which he is associated, is registered with the PCAOB in accordance with the Sarbanes-Oxley Act of 2002, and such registration continues to be effective;

(2) Graul, or the registered public accounting firm with which he is associated, has been inspected by the PCAOB and that inspection did not identify any criticisms of or potential defects in his or the firm's quality control system that would indicate that Graul will not receive appropriate supervision;

(3) Graul, has resolved all disciplinary issues with the PCAOB, and has complied with all terms and conditions of any sanctions imposed by the PCAOB (other than reinstatement by the Commission); and

(4) Graul acknowledges his responsibility, as long as Graul appears or practices before the Commission as an independent accountant, to comply with all requirements of the Commission and the PCAOB, including, but not limited to, all requirements relating to registration, inspections, engagement quality review, and quality control standards.

2. The Commission will consider an application by Graul to resume appearing or practicing before the Commission provided that his CPA license is current and he has resolved all other disciplinary issues with the applicable boards of accountancy. However, if CPA licensure is dependent on reinstatement by the Commission, the Commission will consider an application on its other merits. The Commission's review may include consideration of, in addition to the matters referenced above, any other matters relating to Graul's character, integrity, professional conduct, or qualifications to appear or practice before the Commission.

F. Respondents shall each, within 14 days of the entry of this Order, pay the civil money penalties indicated below:

(i) $30,000 for Henaghan;
(ii) $15,000 for Rainis;
(iii) $10,000 for Gerace;
(iv) $10,000 for Graul; and
(v) $10,000 for Hambleton.

to the Commission for transfer to the general fund of the United States Treasury in accordance with Exchange Act Section 21F(g)(3). If timely payment is not made additional interest shall accrue pursuant to 31 U.S.C. § 3717. Payments ordered in this paragraph must be made in one of the following ways:

(1) Respondents may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondents may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondents may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Henaghan, Rainis, Graul, Gerace, or Hambleton as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Timothy Casey, New York Regional Office, Securities and Exchange Commission, 200 Vesey Street, New York, NY 10281-1022.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. § 523, the findings in this Order are true and admitted by Respondents, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondents under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondents of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. § 523(a)(19).

SECURITIES AND EXCHANGE COMMISSION

SECURITIES EXCHANGE ACT OF 1934
Release No. 75860 / September 9, 2015

ACCOUNTING AND AUDITING ENFORCEMENT
Release No. 3690 / September 9, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16798

In the Matter of RONALD E. HEINEMAN, Respondent.	**ORDER INSTITUTING CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 21C OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING A CEASE-AND-DESIST ORDER AND CIVIL PENALTY**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 21C of the Securities Exchange Act of 1934 ("Exchange Act") against Ronald E. Heineman ("Heineman" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Instituting Cease-and-Desist Proceedings Pursuant to Section 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

A. SUMMARY

1. These proceedings concern materially misleading statements and omissions made by Heineman, the chief executive officer ("CEO") of General Employment Enterprises, Inc. ("GEE" or the "Company") in 2009, to the Company's auditors after substantially all of the Company's cash—$2.3 million—was unaccounted for.

B. RESPONDENT

2. **Heineman**, age 57 and a resident of Cincinnati, Ohio, served as the CEO of GEE from July 1, 2009 through December 23, 2009. Heineman also served as manager of River Falls Financial Services, LLC from as early as January 2009 through April 29, 2011.

C. RELEVANT ENTITIES AND INDIVIDUALS

3. **GEE** is an Illinois corporation headquartered in Oakbrook Terrace, Illinois that provides professional placement services and temporary staffing services in certain industries. GEE's common stock is registered with the Commission pursuant to Section 12(b) of the Exchange Act and trades on the NYSE MKT stock exchange. GEE files periodic reports, including Forms 10-K and 10-Q, with the Commission pursuant to Section 13(a) of the Exchange Act and related rules thereunder.

4. **River Falls Financial Services, LLC** ("River Falls Financial"), **River Falls Investments, LLC f/k/a Oxygen Unlimited II, LLC** ("River Falls Investments"), **River Falls Holdings, LLC** ("RFH"), **Accredited Investor Resources, LLC f/k/a Oxygen Investment Partners, LLC** ("AIR"), **Oxygen Unlimited, LLC** ("Oxygen"), **O2HR, LLC** ("O2HR"), **SDH Realty, LLC** ("SDH"), **WTS Acquisition LLC** ("WTS"), **H2H Holdings, LLC** ("H2H"), and **PSQ, LLC** ("PSQ") (collectively, the "Affiliated Entities") are purported holding, investment, employment-related, and insurance companies. River Falls Financial, AIR's administrative member, purportedly owned at least 99% of AIR's common units and millions of dollars of AIR's preferred units. AIR was purportedly an investment company designed to make investments in River Falls Investments and certain other of the Affiliated Entities. River Falls Investments was a purported holding company of Oxygen, which was a purported holding company of O2HR, a professional employer organization. RFH was the purported holding company of River Falls Investments. PSQ was a purported holding company whose sole asset was GEE shares representing a controlling stake in the Company acquired as of July 1, 2009.

---

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

5. During at least 2009 and 2010, **Wilbur Anthony Huff** ("Huff")[2] exercised substantial financial and management control during at least 2009 and 2010 over numerous entities, including, among others, the Affiliated Entities and their holdings. As a convicted felon, Huff faced legal and practical barriers to operating business entities in his own name, particularly business in regulated industries, including employment-related, insurance, and banking companies. Huff installed other business partners, including Heineman, to perform day-to-day operational functions and/or serve as the listed owners, directors, or managers. From as early as May 2008 through at least November 2009, Huff paid Heineman as much as $15,000 per month through the Affiliated Entities, mostly through River Falls Investments. In exchange, Heineman agreed to serve as the listed officer, director, or manager for GEE, River Falls Financial, and many of the Affiliated Entities and also purportedly advised Huff on various matters.

6. **Park Avenue Bank** ("PAB" or "the Bank") was a New York State chartered bank until it was closed by the New York State Banking Department on March 12, 2010, and the Federal Deposit Insurance Corporation was named Receiver. The Affiliated Entities primarily conducted their banking business through PAB. **Charles J. Antonucci, Sr.** ("Antonucci") served as the president and CEO of PAB from June 2004 until October 2009. In October 2010, Antonucci pled guilty to multiple criminal charges, including securities fraud, bank bribery, embezzlement, and providing a false confirmation to BDO of GEE's purported CD at PAB. Separately, **Park Avenue Insurance** was a private insurance company owned by Antonucci that was not affiliated with PAB.

7. **BDO USA, LLP** ("BDO"), formerly known as BDO Seidman, LLP, is a Delaware limited liability partnership and a PCAOB-registered public accounting firm with its headquarters in Chicago, Illinois. BDO served as GEE's independent auditor from 2004 through 2012.

8. **Stephen B. Pence** ("Pence"), age 60 and a resident of Louisville, Kentucky. As of July 1, 2009, Pence became a beneficial owner of a majority of GEE's common stock through a holding company, PSQ, LLC ("PSQ"), with the right to appoint three directors, including himself as chairman of the board, and to designate a CEO, a position he assigned to Heineman. Pence served as the chairman of the board of GEE until November 17, 2010. Pence formerly served as

---

[2] Huff pled guilty to federal mail fraud charges for obtaining insurance premium finance loans under false pretenses in the Western District of Kentucky in 2003. In 2008, the Commission filed charges against Huff related to a scheme to misappropriate assets from and to record fake letters of credit at Certified Services, Inc. ("Certified"). *SEC v. Huff*, 08-CV-60315 (S.D. Fla.). On October 22, 2010, the Court entered judgment for the Commission against Huff requiring him to pay more than $13 million, among other relief. Separately, after an October 2012 indictment against him, Huff pled guilty on December 23, 2014 to an information, which alleged, among other things, that: (1) Huff controlled GEE, in whole or in part, by installing other individuals; (2) Huff participated with Antonucci in a conspiracy in which they stole $2.3 million from GEE and Huff later returned the $2.3 million to GEE from three companies he controlled; and (3) a large portion of the $2.3 million received by GEE were funds entrusted to Oxygen by its clients for payment of the clients' employment tax and other obligations. *U.S. v. Huff*, 12-CR-750 (S.D.N.Y.).

the lieutenant governor of Kentucky from 2003 to 2007 and the United States Attorney for the Western District of Kentucky from 2001 to 2003.

9. **Salvatore J. Zizza** ("Zizza") served as CEO of GEE from December 23, 2009, the day that Heineman resigned as CEO, through December 2012. Prior to his appointment as CEO, Zizza received monthly payments of $20,000 from PSQ, which were funded by several of the Affiliated Entities, for purported consulting services, and Zizza frequently attended GEE board meetings as an "invited guest." In 2009, businesses owned or operated by Zizza received loans in excess of $1 million that Huff directed from certain of the Affiliated Entities.

10. **Associate-1** was another of Huff's business partners and was listed or served at various times as a manager of River Falls Investments, Oxygen, and O2HR, and as co-manager of River Falls Financial with Heineman. Associate-1 was also involved in PSQ's acquisition of a controlling stake in GEE and attended several GEE board meetings in 2009. In addition, from July 2009 until September 2009, Associate-1 was a signatory on GEE's bank account at PAB despite the fact that Associate-1 was not an official employee, officer, or director of the Company. Associate-1 also purported to be the owner of WTS (another of the Affiliated Entities), a holding company of **On-Site Services, Inc.** ("On-Site") and **Ameritemps, Inc.** ("Ameritemps"), which WTS had acquired in January 2009 with funding from other Affiliated Entities. Almost immediately after PSQ's acquisition of a controlling stake in GEE, Heineman began presenting proposals to GEE's board for GEE to acquire these companies. For example, at a GEE board meeting on August 10, 2009, attended by Pence and Zizza, the board authorized Heineman to enter into a letter of intent with WTS to acquire On-Site, and Heineman reported that he would present another acquisition candidate, Ameritemps, at the September board meeting.

D. BACKGROUND

11. GEE's May 18, 2009, definitive proxy statement disclosed that in January 2009, GEE began discussions with representatives of River Falls Financial concerning the possibility of a tender offer and direct cash investment in GEE. The River Falls Financial representatives included Heineman and Pence, and Huff was present for one of the relevant meetings. The proxy statement further disclosed that, on February 11, 2009, River Falls Financial and PSQ, a special purpose vehicle purportedly formed by Pence, entered into a non-binding letter of intent with GEE for a purchase and tender offer agreement to obtain a controlling stake in GEE.

12. According to GEE's May 18, 2009, definitive proxy statement, on March 30, 2009, after negotiations continued following the February 2009 non-binding letter of intent, Pence signed on behalf of PSQ a definitive securities purchase and tender offer agreement (the "Purchase Agreement"). The Purchase Agreement provided that, subject to shareholder approval, PSQ would acquire a controlling stake in GEE by (1) purchasing 7,700,000 newly-issued shares of GEE common stock in a private placement transaction at a purchase price of $0.25 per share for a total purchase price of $1,925,000; (2) commencing a cash tender offer to purchase from the Company's shareholders up to 2,500,000 shares of common stock at a purchase price of $0.60 per share; (3) appointing three directors to a five-member board of directors, including Pence becoming the chairman of the board; and (4) designating Heineman GEE's CEO. On June 22, 2009, a GEE press released announced shareholders approved the Purchase Agreement and the closing of the

Purchase Agreement was announced on July 1, 2009. As a result, PSQ acquired more than 65% ownership of the Company, Pence became GEE's chairman and appointed two other directors, and Heineman became GEE's CEO.

13. Although Pence purported to be sole member and owner of PSQ, as Heineman knew, PSQ was one of the Affiliated Entities over which Huff exercised substantial financial and management control. Virtually all of the funds deposited in PSQ's bank accounts during 2009 were deposits made directly from several of the Affiliated Entities, including AIR, Oxygen, River Falls Financial, and RFH, typically at the direction of Huff. Specifically, in almost every instance in which PSQ needed to make a payment, PSQ received the necessary funds from one of the Affiliated Entities and immediately paid the obligation with the deposited funds. For example, to fund PSQ's obligations under the Purchase Agreement, AIR transferred $1,925,000 to PSQ, and to cover PSQ's tender offer obligations, AIR transferred $850,000 and Oxygen transferred $372,000 (a total of $1,222,000) to PSQ. In exchange, Huff required Pence to sign two purported promissory notes to AIR in his personal capacity for these amounts ($1,925,000 and $1,222,000), even though $372,000 had been provided by Oxygen. Although the two promissory notes required Pence to pay annual interest of 5%, Huff did not actually require Pence to make any interest payments to AIR and no payments were made.

14. In late June 2009, Pence arranged for Associate-1 to become a signatory on GEE's bank account at PAB and Associate-1 remained a signatory from July 2009 until September 2009. In addition, Associate-1 negotiated certain employment and other agreements on behalf of GEE, and Associate-1 attended several GEE board meetings in 2009. At the same time, Huff and Associate-1 controlled WTS, which owned a number of companies that Huff and Associate-1 intended to sell to GEE. Because Huff and Associate-1 controlled WTS, Pence did not appoint Associate-1 to be an officer, director, or employee of GEE, which avoided scrutiny of this clear conflict of interest.

15. Huff and his business partners—including Pence, Heineman, and Associate-1—created a number of oral and written side agreements regarding ownership, profit sharing, and management of the Affiliated Entities. For example, at the time AIR purportedly loaned Pence the funds for PSQ's transaction with GEE, Pence had no ability to repay the loans without fully liquidating the GEE shares purchased by PSQ. Thus, in consideration for AIR's purported loans to Pence, Pence and Huff orally agreed that if GEE's stock price increased Pence would compensate AIR with GEE shares in addition to repaying the amounts of the promissory notes. As a result, Huff and AIR had a beneficial ownership interest in the GEE shares held by PSQ, which was not disclosed.

16. From March 2009 through at least April 2010, in connection with PSQ's majority ownership of GEE, PSQ paid Zizza $20,000 per month purportedly for consulting work. Huff funded PSQ's payments to Zizza through the Affiliated Entities. For example, Pence notified Huff on January 2, 2010 that PSQ needed to pay Zizza for consulting and specifically asked Huff and Huff's assistant to deposit money into PSQ's account so PSQ could pay Zizza. Huff's assistant sent PSQ a check from a River Falls Financial account on January 4, 2010, and Pence sent Zizza a check from PSQ's account for $20,000 on the same date. Zizza advised Pence and Huff on several acquisitions that GEE was considering in 2009. Huff and Pence also promised Zizza that if GEE's

stock price increased, they would compensate Zizza with at least 500,000 GEE shares. Zizza became the CEO of GEE on December 23, 2009.

17. As part of his arrangement with Huff, Heineman served in various roles at several of the Affiliated Entities and signed numerous agreements involving the Affiliated Entities, including:

- Heineman signed a December 2008 agreement on behalf of WTS in which WTS purchased the Ohio assets of Ameritemps, Inc., which later became two companies that GEE purchased in 2010, RFFG of Cleveland, LLC and DMCC Staffing, LLC.

- At Huff's direction, Heineman personally guaranteed a loan of $1.5 million made by PAB to a Affiliated Entity called Aviation Solutions, LLC.

- Heineman served as an authorized signer on several bank accounts that certain Affiliated Entities had with PAB.

- At Huff's direction, Heineman signed a November 2010 agreement, as manager of River Falls Financial and on behalf of AIR, in which AIR agreed that PSQ would assume Pence's $3 million promissory notes issued to AIR.

18. Huff covertly exercised influence and control over GEE operations through Pence and Heineman as a result of his control over AIR, which financed PSQ's investment in GEE. Huff also sent substantial monthly payments to Pence ($25,000), Zizza ($20,000), and Heineman ($15,000) from various Affiliated Entities in an attempt to ensure his control over, and ability to influence, GEE operations.

19. Huff exerted control over GEE by, among other things, causing GEE to acquire several entities owned by WTS, which Huff and Associate-1 controlled. For example, at an August 10, 2009, GEE board meeting, attended by Pence and Zizza (as Pence's guest), Heineman convinced the GEE board of directors to authorize him to enter into a letter of intent with WTS to acquire its subsidiary On-Site, which was publicly announced on September 6, 2009. In June 2010, while Zizza was GEE's CEO, GEE acquired On-Site, resulting in a financial benefit to Huff. In November 2010, GEE acquired additional assets of WTS doing business as Ameritemps, RFFG of Cleveland, LLC and DMCC Staffing, LLC, again resulting in a financial benefit to Huff. During 2010, Zizza had numerous discussions with Huff concerning these acquisitions.

E. HEINEMAN KNEW OR SHOULD HAVE KNOWN THAT THE PURPORTED $2.3 MILLION CD ASSIGNMENT WAS FRAUDULENT

20. As part of the July 2009 closing of PSQ's Purchase Agreement with GEE, GEE opened a checking account at PAB into which PSQ's escrowed $1,925,000 would be deposited upon the closing. In June 2009, Associate-1 coordinated with GEE's chief financial officer (the "GEE CFO") to have the GEE checking account opened at PAB and the authorized signatories on the account were the GEE CFO, Pence, and Associate-1. The GEE CFO, Pence, and Associate-1 remained the only authorized signatories on the account until September 2009, at which time

Associate-1 was removed and Heineman was added. Following the closing, Heineman directed the GEE CFO to transfer an additional $750,000 from GEE's accounts at other banks to the GEE PAB checking account. The approximately $2.6 million deposited in the GEE PAB checking account constituted substantially all of GEE's cash and half of its assets. Heineman understood that GEE opened the bank account with PAB because of Huff's business relationship with Antonucci, PAB's president. Heineman also knew or should have known that the Affiliated Entities primarily maintained their bank accounts at PAB and that Huff and the Affiliated Entities had other business dealings with Antonucci.

21. In approximately July 2009, Huff discussed with Pence the possibility of GEE investing money in Park Avenue Insurance to achieve greater returns on GEE's cash. Pence told Heineman about Huff's idea and involved Heineman in exploring the terms for GEE's potential investment. Heineman knew or should have known that Park Avenue Insurance was privately owned by Antonucci and that Pence had served as Park Avenue Insurance's president during part of 2009.

22. On July 14, 2009, Heineman received a draft promissory note from Huff's attorney that proposed that GEE make a one-year loan to Park Avenue Insurance in the amount of $2.4 million with four percent interest. Heineman responded that the promissory note should be changed to $2.7 million. No promissory note between GEE and Park Avenue Insurance appears to have been actually executed.

23. However, in August 2009, the GEE CFO reviewed the July 2009 PAB monthly statement indicating that $2.3 million had been withdrawn from the GEE PAB operating account on July 23, 2009, without his knowledge. When asked about the missing funds, Heineman claimed that he had authorized GEE to invest $2.3 million into a certificate of deposit account at PAB. Although the GEE CFO repeatedly requested that Heineman provide documentation concerning the purported CD, such as a written authorization, account agreement, and account statements—and cited the lack of documentation as a control deficiency—Heineman only provided the GEE CFO with a one-page PDF of a typewritten "Certificate of Deposit Receipt" for $2.3 million with a single maturity date of October 21, 2009, and interest rate of two percent.

24. GEE's fiscal year ended on September 30, 2009. On October 19, 2009, the GEE CFO provided to audit committee members and BDO a report of the evaluation of internal control for fiscal year 2009, which noted the purported PAB CD as an identified control deficiency. The report noted that "[t]he transaction was not executed by the office of the Treasurer, and no written approval or account agreement was provided to the accounting department" and that "it did not conform to the company's investment guidelines" because it did not provide sufficient diversification and PAB did not meet GEE's size requirement. However, the report concluded that the control deficiency did not constitute a material weakness. BDO concurred with this assessment. In response, Heineman did not provide any additional information or documentation to the GEE CFO.

25. In early November 2009, the GEE CFO noticed that PAB had not remitted the proceeds of the purported CD of $2.3 million plus interest into GEE's checking account upon the maturity date, October 21, 2009. When the GEE CFO contacted PAB, a PAB representative stated

that the Bank had no record of the purported CD in its system. The GEE CFO then pressed both Heineman and Pence for an explanation. On November 9, 2009, Pence asked Heineman for information about the purported CD; Heineman responded that Huff would contact PAB on GEE's behalf.

26. According to the minutes of a November 23, 2009, audit committee meeting, attended by BDO, the GEE CFO reported his concerns that GEE had little documentation supporting the purported CD, including no written authorization from an account signatory and no deposit agreement. According to the minutes, Heineman claimed that he authorized the purported CD at Pence's direction, and claimed the lack of documentation was due to "the rapid pace of the transactions in which he had been involved, coupled with reorganization and personnel changes at Park Avenue Bank." Heineman next stated that he had anticipated that the CD would be maintained on a continuing renewal basis but he had asked Pence to liquidate the purported CD and have the funds transferred into the PAB checking account by the end of the week. The minutes also state that the BDO engagement partner "said that the audit was substantially completed, pending resolution of the missing funds issue, receipt of legal letters from counsel, and the executed management representation letter" and that BDO "would be issuing an unqualified opinion on the consolidated financial statements."

27. On November 24, 2009, the BDO engagement partner emailed the GEE audit committee chairman (the "AC Chair"), stating that the GEE CFO had "indicated there was an update on the CD and that the funds would be returned in installments. I am not sure if you can provide any further clarity on why this would be. I wanted to check with you before I had another discussion with [Heineman]." The AC Chair replied that he "[could] not provide any clarity" and expressed concern that one of the audit committee members (the "AC Member") "seems to be tied in with this group." The AC Member had been appointed by Pence in connection with the PSQ transaction in July.

28. The BDO engagement partner replied to the AC Chair the following day, November 25, 2009, that he had spoken to Heineman that morning and Heineman indicated that Pence and the AC Member "were taking the lead on this as they have a previous working relationship with the bank." BDO's engagement partner also noted that Heineman, however, had "disagreed with the fact that the CD would be 'paid back in installments'" and had "indicated that the proceeds of the CD would be in the Company's bank account by Monday."

29. On November 24, 25, and 27, 2009, Huff directed and caused a total of $900,000 to be transferred to GEE's bank accounts in installment payments of $300,000 on each such date from the bank accounts of two of the Affiliated Entities: SDH and Oxygen.

30. On November 30, 2009, GEE's CFO asked Heineman if he knew anything concerning two $300,000 wire transfers that GEE had unexpectedly received from SDH and Oxygen. Heineman claimed that he did not know why those transfers had occurred. Heineman's statement was materially misleading.

31. Also on November 30, 2009, Pence, Zizza, and Heineman attended a GEE board of directors meeting. Zizza, who had no formal role at GEE at this time, attended as an "invited

guest." The board minutes indicate that the AC Chair explained that the Company's Form 10-K had not yet been filed because BDO's "final" opinion was predicated on the satisfactory accounting for the PAB CD and an explanation for where GEE's funds had been since the CD matured on October 21. During this November 30, 2009, board meeting, the AC Member stated he believed that the situation occurred as a result of administrative errors on the part of the Bank, and Pence said that the AC Member had agreed to pursue the matter with PAB. Neither Pence nor Heineman (or anyone else) mentioned anything about GEE selling or assigning the purported CD to a third party.

32. On December 4, 2009, the BDO engagement partner on the GEE audit sent an email to the AC Chair, Heineman, and Pence, among others, summarizing the open items requiring resolution prior to the issuance of BDO's audit report. The email begins by noting that after the CD had matured in October 2009, when the GEE CFO had contacted the Bank, a PAB representative informed the GEE CFO that there was no record of the purported CD and that after some investigation by the AC Member, "in late November it was determined that the funds would be returned to GEE in installments." The email then notes that GEE had received the following wire transfers: (i) November 24: $300,000 wire transfer from SDH; (ii) November 25: $300,000 wire transfer from Oxygen; (iii) November 27: $300,000 wire transfer from SDH; and (iv) December 1: $100,000 wire transfer from Oxygen. It then stated that the BDO engagement partner had discussed the matter with Heineman and Pence, who both referred him to the AC Member who was working directly with PAB on the matter, and that the AC Member left him a voicemail "indicating the bank continues to put money against the CD they owe [GEE] and it should be fully repaid by the close of business on Monday, Dec. 7" and that the Bank would provide a short apology note.

33. Shortly after receiving it, the AC Chair forwarded the December 4, 2009, email from the BDO engagement partner to Heineman, Pence, the AC Member, the GEE CFO, and GEE's board, noting: "Multiple representatives of BDO have told me that they will not sign off on the GEE Audit . . . until they have sufficient documentation of what has transpired. [BDO's] position is that the Liabilities associated with a sign-off far exceed any past or potential future Audit Fees that [they] have received or will receive. The high level message is that a letter of apology from Park Avenue Bank will not be sufficient." The BDO engagement partner received a copy of this email and replied to all: "To clarify, [our] primary concern is getting an understanding of exactly what has occurred in order to allow us to complete our audit procedures. As I am sure everyone would agree, what has transpired over the last few weeks with the funds at [PAB] has been highly unusual. I know everyone has been working to resolve the issue. However, time continues to pass and [GEE's] filing deadline will be here before we know it. As such, I wanted to clarify the importance of appropriately addressing the issue as quickly as possible to allow us to complete the audit."

34. Later in the day on December 4, the AC Chair sent an email to the BDO engagement partner and concurring partner summarizing his call with the AC Member, stating that when he spoke with the AC Member "he told me that [PAB] had reported these transaction [sic] to the FDIC and that the money sent to the various entities that are now sending GEE the money are sending us the banks money rather than sending it back to the bank." The AC Chair continued: "This makes absolutely no sense. It looks like [PAB] is on the verge of failing. The FDIC and a

bankruptcy estate are going to require [PAB] to collect every cent they can under loans or other arrangements to settle with the creditors of the bank before they send money to third parties."

35. The following day, on December 5, 2009, the AC Chair emailed GEE's board (including Pence) and Heineman calling for a special audit committee meeting on December 9 because of "several unanswered questions related to $2.3 million of the Company's cash which supposedly was invested in a Certificate of Deposit ('CD') at Park Avenue Bank which will need to be answered before BDO will complete their Audit Report for the Company's fiscal year ended September 30, 2009." The AC Chair's email noted several issues, including that (i) there was no account agreement with PAB or regular reporting on the CD; (ii) PAB did not remit the proceeds of the CD into GEE's operating account when it reached its maturity date on October 21, 2009; (iii) PAB provided no explanation to the GEE CFO when he attempted to investigate; and (iv) the AC Member who took the lead on this matter with PAB "was informed on or about November 21, 2009, that the funds would be returned to [GEE] in a series of deposits." The email also provided a chart of seven wire transfers totaling $1.7 million, which included the four noted in Henaghan's December 4 email plus a December 2, 2009, wire transfer from Oxygen for $100,000, a December 2, 2009, wire transfer from River Falls Financial of $300,000, and a December 3, 2009, wire transfer from River Falls Financial also for $300,000. The address listed for both SDH and River Falls Financial on each of their wire transfers in the chart was 11921 Brinley Ave, Louisville, KY.

36. On December 4 and December 9, 2009, GEE received two additional wire transfers from River Falls Financial for $300,000 each, bringing the total amount received by GEE from River Falls Financial to $1.2 million and the total of the nine wire transfers to $2.3 million, the same amount that Heineman had purported to invest in a CD. Heineman knew or should have known that Huff, in conjunction with Associate-1, directed the transfers from SDH, Oxygen, and River Falls Financial to return the missing funds to GEE.

37. On December 8, the AC Chair emailed the BDO engagement partner, providing some links he suggested the BDO engagement partner review before he had a conversation with the AC Member and any representatives of PAB, "particularly the Anthony Huff links" and explained that he "met Anthony Huff when we went to New York" to negotiate PSQ's acquisition. The email included links to a press release announcing the Commission's lawsuit against Huff, a link to Huff's website noting the address 11921 Brinley Avenue, Louisville, KY in the text of the email, and a link to the website for Oxygen noting the identical address. This is the same address that appeared in the wires sent to GEE by River Falls Financial and SDH, as noted in the AC Chair's December 5 email described in paragraph 36, above. Also, Huff's website at the time contained references to River Falls Investments, SDH, Oxygen, and O2HR.

38. Also on December 8, 2009, the day before the special audit committee meeting, the AC Chair received an email from Heineman to the audit committee with several attachments. Heineman's email purported to offer a new explanation for why GEE had received $2.3 million from the three entities rather than PAB. Heineman claimed that he had negotiated an assignment agreement with the manager of River Falls Investments (Associate-1), who "offered to purchase" the purported CD from GEE at face value. Heineman also attached to his email an unsigned, draft assignment agreement and a letter from Heineman to PAB, dated July 21, 2009, that purportedly authorized the $2.3 million CD investment. Heineman's email also attached a July 2009 monthly

statement for GEE's operating account at PAB, which included the description of the $2.3 million withdrawal as a debit on July 23 with a debit memo stating in handwriting: "To: Park Avenue Insurance, See Attachment Approval, $2,300,000.00." Park Avenue Insurance was a private insurance company separately owned by Antonucci that was not affiliated with PAB.

39. The AC Chair responded to Heineman's email that day, stating: "Given the chain of event[s] you described below, why was GEE not informed immediately when River Falls Investments purchased the CD and why are we just now learning that a law firm has been engaged to document the assignment of the CD? We have been asking questions about the CD now for nearly a month."

40. The BDO engagement partner also exchanged emails with the AC Chair later that day, noting his agreement with the AC Chair's questions to Heineman and that "the sale of the CD would constitute a related party transaction which typically should be approved by the board." The AC Chair replied to the BDO engagement partner that he had just spoken to Heineman and Heineman "claims that RFI (River Falls Investment) is 100% owned by [Associate-1] and is not related to River Falls Financial [] or any of the other entities." The BDO engagement partner replied, "That is consistent with what [] Pence told me in my conversation with him. The common names are a little strange though."

41. Heineman's aforementioned statements to BDO around December 2009 were materially misleading because, among other things, Heineman knew or should have known that:

a. he did not negotiate an assignment agreement with Associate-1 (or anyone else);

b. Huff controlled River Falls Investments, which was a related party; indeed, River Falls Investments had been making substantial monthly payments to Heineman since May 2008;

c. Huff had directed the three Affiliated Entities to transfer funds to GEE in late November and early December to preserve the financial viability of GEE for the benefit of Huff and PSQ;

d. his assignment agreement story had falsely explained why GEE had received those payments from the Affiliated Entities;

e. Pence did not actually own or control River Falls Financial, Huff did; and

f. Pence, Huff, Associate-1, and Heineman had an unwritten agreement to divide amongst themselves any financial windfalls associated with the market performance of GEE's stock.

42. Along with his December 8, 2009, email to the audit committee, Heineman attached a letter, dated July 21, 2009, signed by him and addressed to the president of PAB, stating: "Please transfer $2,300,000 from the GEE checking account to a 90-day automatic renewal Certificate of Deposit." Heineman had drafted this July 2009 letter in late 2009 and

presented it to GEE's audit committee to convince everyone that he had authorized the purchase of the purported CD in light of the increased scrutiny concerning GEE's missing funds.

43. According to the minutes of GEE's audit committee meeting on December 9, 2009:

- The BDO engagement partner expressed concern that BDO still did not have a clear understanding of the purported CD transaction.

- The BDO engagement partner said that BDO needed to understand the nature of the purported administrative errors at PAB that he had been told were responsible for the lack of proper documentation regarding the CD transaction. He also explained that BDO required documentation validating the banking transactions, and an explanation as to why there was no existence of an account agreement with the Bank or no record of the CD being at the bank.

- Another BDO partner, BDO's Midwest Regional Business Line Leader, said he believed members of GEE's senior management appeared hesitant to provide information related to these transactions.

- The BDO engagement partner stated that the assignment agreement did not resolve the outstanding issues as BDO still needed to know what transpired within PAB and make a determination of whether the assignment agreement with River Falls Investments was a related party transaction.

- BDO also advised that although the assignment agreement "may reduce or eliminate the need for going concern disclosure, it would increase the requirement that management provide sufficient disclosure regarding any related party conflicts."

44. On December 14, 2009, GEE's outside counsel sent PAB a formal letter requesting all documentation and information concerning the purported CD. PAB's December 16, 2009, response provided only documents relating to GEE's checking account and did not provide any documents or other information about the purported CD. The checking account documentation, however, indicated that only Associate-1, the GEE CFO, and Pence were authorized signers on GEE's account from July to September 2009—not Heineman—and the checking account statements reflected a debit memo for the transfer of $2.3 million of GEE's cash to Park Avenue Insurance on July 23, 2009.

45. On December 22, 2009, BDO sent the AC Chair a letter stating that BDO did not have sufficient audit evidence to formally conclude the audit and demanded an independent investigation ("BDO's demand letter"). BDO's demand letter identified multiple inconsistencies and problems in the audit evidence BDO had received regarding the purported CD, including that a number of significant questions remained unanswered concerning both the existence of the purported CD (e.g., why bank records provided by PAB showed a transfer of $2.3 million to Park Avenue Insurance) and the manner in which $2.3 million had been transferred to the Company by the Affiliated Entities (e.g., why Associate-1 would pay 100% of the face value of the purported

CD after the maturity date had expired without payment by PAB, why had River Falls Financial—purportedly owned by Pence—transferred approximately $1 million to GEE in connection with the alleged assignment of the purported CD to River Falls Investments, and why Heineman had made inconsistent representations about his involvement in negotiating the alleged assignment with Associate-1). Pence reviewed the letter and told Huff that he was very concerned. Pence also forwarded BDO's demand letter to Zizza and Associate-1, the purported manager of River Falls Investments.

46. On the evening of December 22, 2009, BDO learned that the Audit Committee meeting that was scheduled for the following day had been cancelled, Zizza, an advisor to Pence who had attended GEE board meetings through the fall of 2009, would be taking over as CEO, and that Pence and Associate-1 intended to prepare written responses to each of the issues identified in the December 21 letter. On December 23, 2009, Heineman formally resigned as GEE's CEO and that same day Pence appointed Zizza, who had previously brought new business to BDO in the form of several auditing clients, to be GEE's new CEO.

F. VIOLATIONS

47. Rule 13b2-2 of the Exchange Act prohibits officers and directors from, directly or indirectly, making or causing to be made materially false or misleading statements or omissions to accountants in connection with an audit or preparation of reports to be filed with the Commission.

48. As a result of the conduct described above, Heineman violated Rule 13b2-2 under the Exchange Act.

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent's Offer.

Accordingly, it is hereby ORDERED that:

A. Pursuant to Section 21C of the Exchange Act, Respondent cease and desist from committing or causing any violations and any future violations of Exchange Act Rule 13b2-2.

B. Respondent shall pay a civil penalty of $150,000 to the Commission for transfer to the general fund of the United States Treasury in accordance with Exchange Act Section 21F(g)(3). Payment shall be made in the following installments: (1) $40,000 within 10 days of the entry of this Order; (2) $40,000 within 120 days of the entry of this Order; (3) $40,000 within 240 days of the entry of this Order; and (4) $30,000 within 360 days of the entry of this Order. If any payment is not made by the date the payment is required by this Order, the entire outstanding balance of civil penalties, plus any additional interest accrued pursuant to 31 U.S.C. § 3717, shall be due and payable immediately, without further application. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Heineman as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Timothy Casey, New York Regional Office, Securities and Exchange Commission, 200 Vesey Street, New York, NY 10281-1022.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

By the Commission.

Release No. 75861 / September 9, 2015

ACCOUNTING AND AUDITING ENFORCEMENT
Release No. 3691 / September 9, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16799

In the Matter of **SALVATORE J. ZIZZA,** **Respondent.**	**ORDER INSTITUTING CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 21C OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING A CEASE-AND-DESIST ORDER AND CIVIL PENALTY**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 21C of the Securities Exchange Act of 1934 ("Exchange Act") against Salvatore J. Zizza ("Zizza" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Instituting Cease-and-Desist Proceedings Pursuant to Section 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

A. SUMMARY

1. These proceedings concern materially misleading statements and omissions made by Zizza, the chief executive officer ("CEO") of General Employment Enterprises, Inc. ("GEE" or the "Company"), to the Company's auditors concerning the return of $2.3 million from related parties after the money was unaccounted for.

B. RESPONDENT

2. **Zizza**, age 69 and a resident of New York, New York, served as the CEO of GEE from December 23, 2009, through December 2012.

C. RELEVANT ENTITIES AND INDIVIDUALS

3. **GEE** is an Illinois corporation headquartered in Oakbrook Terrace, Illinois that provides professional placement services and temporary staffing services in certain industries. GEE's common stock is registered with the Commission pursuant to Section 12(b) of the Exchange Act and trades on the NYSE MKT stock exchange. GEE files periodic reports, including Forms 10-K and 10-Q, with the Commission pursuant to Section 13(a) of the Exchange Act and related rules thereunder.

4. **River Falls Financial Services, LLC** ("River Falls Financial"), **River Falls Investments, LLC f/k/a Oxygen Unlimited II, LLC** ("River Falls Investments"), **River Falls Holdings, LLC** ("RFH"), **Accredited Investor Resources, LLC f/k/a Oxygen Investment Partners, LLC** ("AIR"), **Oxygen Unlimited, LLC** ("Oxygen"), **O2HR, LLC** ("O2HR"), **SDH Realty, LLC** ("SDH"), **WTS Acquisition LLC** ("WTS"), **H2H Holdings, LLC** ("H2H"), and **PSQ, LLC** ("PSQ") (collectively, the "Affiliated Entities") are purported holding, investment, employment-related, and insurance companies. River Falls Financial, AIR's administrative member, purportedly owned at least 99% of AIR's common units and millions of dollars of AIR's preferred units. AIR was purportedly an investment company designed to make investments in River Falls Investments and certain other of the Affiliated Entities. River Falls Investments was a purported holding company of Oxygen, which was a purported holding company of O2HR, a professional employer organization. RFH was the purported holding company of River Falls Investments. PSQ was a purported holding company whose sole asset was GEE shares representing a controlling stake in the Company acquired as of July 1, 2009.

5. During at least 2009 and 2010, **Wilbur Anthony Huff** ("Huff")[2] exercised substantial financial and management control over numerous entities, including, among others, the

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

Affiliated Entities and their holdings. As a convicted felon, Huff faced legal and practical barriers to operating business entities in his own name, particularly business in regulated industries, including employment-related, insurance, and banking companies. Huff installed other business partners, including Pence, to perform day-to-day operational functions and/or serve as the listed owners, directors, or managers. Zizza first met Huff and Pence in 2008 when Huff asked for Zizza's help raising money for Oxygen and River Falls Investments. Zizza also attended a conference at which Huff discussed various AIR-related investments.

6. **Park Avenue Bank** ("PAB" or "the Bank") was a New York State chartered bank until it was closed by the New York State Banking Department on March 12, 2010, and the Federal Deposit Insurance Corporation was named Receiver. The Affiliated Entities primarily conducted their banking business through PAB. **Charles J. Antonucci, Sr.** ("Antonucci") served as the president and CEO of PAB from June 2004 until October 2009. In October 2010, Antonucci pled guilty to multiple criminal charges, including securities fraud, bank bribery, embezzlement, and providing a false confirmation to BDO of GEE's purported CD at PAB. Separately, **Park Avenue Insurance** was a private insurance company owned by Antonucci that was not affiliated with PAB.

7. **BDO USA, LLP** ("BDO"), formerly known as BDO Seidman, LLP, is a Delaware limited liability partnership and a PCAOB-registered public accounting firm with its headquarters in Chicago, Illinois. BDO served as GEE's independent auditor from 2004 through 2012.

8. **Stephen B. Pence** ("Pence") served as the chairman of the board of GEE from July 1, 2009, through November 17, 2010. Although Pence purported to be the sole member and owner of PSQ, whose sole asset was the GEE shares representing a controlling stake in the Company as of July 1, 2009, PSQ was one of the Affiliated Entities over which Huff exercised substantial financial and management control. PSQ's acquisition of GEE stake was funded by AIR and Oxygen. Pence also represented to BDO that he was the 100% owner of River Falls Financial, another of the Affiliated Entities. Huff directed substantial monthly payments to Pence ($25,000) from several of the Affiliated Entities to ensure his control over, and ability to influence, GEE's operations. Pence formerly served as the lieutenant governor of Kentucky from 2003 to 2007 and the United States Attorney for the Western District of Kentucky from 2001 to 2003.

---

[2] Huff pled guilty to federal mail fraud charges for obtaining insurance premium finance loans under false pretenses in the Western District of Kentucky in 2003. In 2008, the Commission filed charges against Huff related to a scheme to misappropriate assets from and to record fake letters of credit at Certified Services, Inc. *SEC v. Huff*, 08-CV-60315 (S.D. Fla.). On October 22, 2010, the Court entered judgment for the Commission against Huff requiring him to pay more than $13 million, among other relief. Separately, after an October 2012 indictment against him, Huff pled guilty on December 23, 2014 to an information, which alleged, among other things, that: (1) Huff controlled GEE, in whole or in part, by installing other individuals; (2) Huff participated with Antonucci in a conspiracy in which they stole $2.3 million from GEE and Huff later returned the $2.3 million to GEE from three companies he controlled; and (3) a large portion of the $2.3 million received by GEE were funds entrusted to Oxygen by its clients for payment of the clients' employment tax and other obligations. *U.S. v. Huff*, 12-CR-750 (S.D.N.Y.).

9. **Ronald E. Heineman** ("Heineman") was appointed as the CEO of GEE on July 1, 2009, in connection with PSQ's acquisition of a controlling stake in GEE. Heineman served as CEO until his resignation on December 23, 2009, in connection with the events described herein. Zizza was appointed as GEE's CEO to replace Heineman on the same day. Huff directed substantial monthly payments to Heineman ($15,000) from the Affiliated Entities during this time period.

10. **Associate-1** was another of Huff's business partners and was listed or served at various times as a manager of River Falls Investments, Oxygen, and O2HR, and as co-manager of River Falls Financial with Heineman. Associate-1 was also involved in PSQ's acquisition of a controlling stake in GEE and attended several GEE board meetings in 2009. In addition, from July 2009 until September 2009, Associate-1 was a signatory on GEE's bank account at PAB despite the fact that Associate-1 was not an official employee, officer, or director of the Company. Associate-1 also purported to be the owner of WTS (another of the Affiliated Entities), a holding company of **On-Site Services, Inc.** ("On-Site") and **Ameritemps, Inc.** ("Ameritemps"), which WTS had acquired in January 2009 with funding from other Affiliated Entities.

D. BACKGROUND

11. Zizza became CEO of GEE on December 23, 2009, after a period of prior business dealings with Huff, Pence, and other entities and individuals associated with them. In December 2009, shortly before and after he became GEE's CEO, Zizza engaged in a series of conversations with the company's auditor, BDO, concerning the circumstances surrounding the return of $2.3 million that GEE had purportedly invested in a CD issued by PAB.

12. GEE's May 18, 2009, definitive proxy statement disclosed that in January 2009, GEE began discussions with representatives of River Falls Financial concerning the possibility of a tender offer and direct cash investment in GEE. The River Falls Financial representatives included Heineman and Pence, and Huff was present for one of the relevant meetings. At all relevant times, Zizza was aware that Huff was a convicted felon. The proxy statement further disclosed that, on February 11, 2009, River Falls Financial and PSQ, a special purpose vehicle purportedly formed by Pence, entered into a non-binding letter of intent with GEE for a purchase and tender offer agreement to obtain a controlling stake in GEE.

13. In 2009, Zizza understood that Pence had a managerial role with certain of the Affiliated Entities, including River Falls Financial and River Falls Investments. In the spring of 2009, Zizza signed a loan commitment term sheet on behalf of Metropolitan Paper Recycling, Inc. ("MPR"), a company 50% owned by Zizza, in which River Falls Investments agreed to provide $3 million in financing to MPR. Zizza signed the agreement as MPR's chairman, and Pence signed as River Falls Investments's manager. While Zizza understood that Pence had a managerial role with River Falls Investments, he also knew or should have known that Huff exercised substantial financial and management control over River Falls Investments. Zizza also knew or should have known that Huff exercised substantial financial and management control over River Falls Financial because on January 4, 2010, MPR received a loan of $200,000 from River Falls Financial at Huff's direction.

14. According to GEE's May 18, 2009, definitive proxy statement, on March 30, 2009, after negotiations continued following the February 2009 non-binding letter of intent, Pence signed on behalf of PSQ a definitive securities purchase and tender offer agreement (the "Purchase Agreement"). The Purchase Agreement provided that, subject to shareholder approval, PSQ would acquire a controlling stake in GEE by (1) purchasing 7,700,000 newly-issued shares of GEE common stock in a private placement transaction at a purchase price of $0.25 per share for a total purchase price of $1,925,000; (2) commencing a cash tender offer to purchase from the Company's shareholders up to 2,500,000 shares of common stock at a purchase price of $0.60 per share; (3) appointing three directors to a five-member board of directors, including Pence becoming the chairman of the board; and (4) designating Heineman GEE's CEO. On June 22, 2009, a GEE press release announced that shareholders approved the Purchase Agreement and the closing of the Purchase Agreement was announced on July 1, 2009. As a result, PSQ acquired more than 65% ownership of the Company, Pence became GEE's chairman and appointed two other directors, and Heineman became GEE's CEO.

15. Although Pence purported to be sole member and owner of PSQ, as Zizza knew or should have known, PSQ was one of the Affiliated Entities over which Huff exercised substantial financial and management control. Virtually all of the funds deposited in PSQ's bank accounts during 2009 were deposits made directly from several of the Affiliated Entities, including AIR, Oxygen, River Falls Financial, and RFH, typically at the direction of Huff. Specifically, in almost every instance in which PSQ needed to make a payment, PSQ received the necessary funds from one of the Affiliated Entities and immediately paid the obligation with the deposited funds. For example, to fund PSQ's obligations under the Purchase Agreement, AIR transferred $1,925,000 to PSQ, and to cover PSQ's tender offer obligations, AIR transferred $850,000 and Oxygen transferred $372,000 (a total of $1,222,000) to PSQ. In exchange, Huff required Pence to sign two purported promissory notes to AIR in his personal capacity for these amounts ($1,925,000 and $1,222,000), even though $372,000 had been provided by Oxygen. Although the two promissory notes required Pence to pay annual interest of 5%, Huff did not actually require Pence to make any interest payments to AIR and no payments were made.

16. In late June 2009, Pence arranged for Associate-1 to become a signatory on GEE's bank account at PAB and Associate-1 remained a signatory from July 2009 until September 2009. In addition, Associate-1 negotiated certain employment and other agreements on behalf of GEE, and Associate-1 attended several GEE board meetings in 2009. At the same time, Huff and Associate-1 controlled WTS, which owned a number of companies that Huff and Associate-1 intended to sell to GEE. Because Huff and Associate-1 controlled WTS, Pence did not appoint Associate-1 to be an officer, director, or employee of GEE, which avoided scrutiny of this clear conflict of interest.

17. Huff and his business partners—including Pence, Heineman, and Associate-1—created a number of oral and written side agreements regarding ownership, profit sharing, and management of the Affiliated Entities. For example, at the time AIR purportedly loaned Pence the funds for PSQ's transaction with GEE, Pence had no ability to repay the loans without fully liquidating the GEE shares purchased by PSQ. Thus, in consideration for AIR's purported loans to Pence, Pence and Huff orally agreed that if GEE's stock price increased Pence would compensate AIR with GEE shares in addition to repaying the amounts of the promissory notes. As a result,

Huff and AIR had a beneficial ownership interest in the GEE shares held by PSQ, which was not disclosed.

18. From March 2009 through at least April 2010, in connection with PSQ's majority ownership of GEE, PSQ paid Zizza $20,000 per month for consulting work. Huff funded PSQ's payments to Zizza through the Affiliated Entities. For example, Pence notified Huff on January 2, 2010 that PSQ needed to pay Zizza for consulting and specifically asked Huff and Huff's assistant to deposit money into PSQ's account so PSQ could pay Zizza. Huff's assistant sent PSQ a check from a River Falls Financial account on January 4, 2010, and Pence sent Zizza a check from PSQ's account for $20,000 on the same date. Zizza advised Pence and Huff on several acquisitions that GEE was considering in 2009. Huff and Pence also promised Zizza that if GEE's stock price increased, they would compensate Zizza with at least 500,000 GEE shares. Zizza learned that AIR had financed PSQ's purchase of the controlling stake in GEE. Zizza subsequently became the CEO of GEE on December 23, 2009.

19. Huff covertly exercised influence and control over GEE operations through Pence and Heineman as a result of his control over AIR, which financed PSQ's investment in GEE. Huff also sent substantial monthly payments to Pence ($25,000), Zizza ($20,000), and Heineman ($15,000) from several of the Affiliated Entities in an attempt to ensure his control over, and ability to influence, GEE operations.

20. Huff exerted control over GEE by, among other things, causing GEE to acquire several entities owned by WTS, which Huff and Associate-1 controlled. For example, at a GEE board meeting on August 10, 2009, attended by Pence and Zizza (as Pence's guest), Heineman convinced the GEE board of directors to authorize him to enter into a letter of intent with WTS to acquire its subsidiary On-Site, which was publicly announced on September 6, 2009. Thereafter, in June 2010, while Zizza was GEE's CEO, GEE acquired On-Site, resulting in a financial benefit to Huff. In November 2010, GEE acquired additional assets of WTS doing business as Ameritemps, RFFG of Cleveland, LLC and DMCC Staffing, LLC, again resulting in a financial benefit to Huff. During 2010, Zizza had numerous discussions with Huff concerning these acquisitions.

E. ZIZZA KNEW OR SHOULD HAVE KNOWN THAT THE PURPORTED $2.3 MILLION CD ASSIGNMENT WAS A RELATED PARTY TRANSACTION

21. As part of the July 2009 closing of PSQ's Purchase Agreement with GEE, GEE opened a checking account at PAB into which PSQ's escrowed $1,925,000 would be deposited upon the closing. In June 2009, Associate-1 coordinated with GEE's chief financial officer (the "GEE CFO") to have the GEE checking account opened at PAB and the authorized signatories on the account were the GEE CFO, Pence, and Associate-1. The GEE CFO, Pence, and Associate-1 remained the only authorized signatories on the account until September 2009, at which time Associate-1 was removed and Heineman was added. Following the closing, in early July 2009, GEE transferred an additional $750,000 from GEE's accounts at other banks to the GEE PAB checking account. The approximately $2.6 million deposited in the GEE PAB checking account constituted substantially all of GEE's cash and half of its assets.

22. In approximately July 2009, in a conversation in which Zizza did not participate, Huff discussed with Pence, GEE's chairman, the possibility of the Company investing money in Park Avenue Insurance to achieve greater returns on GEE's cash. Park Avenue Insurance was a private insurance company owned by Antonucci that was not affiliated with PAB and Pence had served as Park Avenue Insurance's president during part of 2009.

23. GEE's fiscal year ended on September 30, 2009. GEE's CFO identified that $2.3 million had been withdrawn from the GEE PAB operating account on July 23, 2009, without the GEE CFO's knowledge. The GEE CFO reported that when he asked about the withdrawn funds, GEE's CEO Heineman claimed that he had authorized GEE to invest $2.3 million into a CD at PAB. The GEE CFO also reported that, although he had repeatedly requested documentation concerning the purported CD, such as a written approval or account agreement—and cited the lack of documentation as a control deficiency—Heineman only provided the GEE CFO with a one-page PDF of a typewritten "Certificate of Deposit Receipt" for $2.3 million with a single maturity date of October 21, 2009, and interest rate of two percent. This information became known to Zizza before he became GEE's CEO on December 23, 2009.

24. In early November 2009, the GEE CFO noticed that PAB had not remitted the proceeds of the purported CD of $2.3 million plus interest into GEE's operating account upon the maturity date, October 21, 2009. When the GEE CFO contacted PAB, a PAB representative stated that the Bank had no record of the purported CD in its system. The GEE CFO then pressed both Heineman and Pence for an explanation. On November 9, 2009, Pence asked Heineman for information about the purported CD; Heineman responded to Pence that Huff would contact PAB on GEE's behalf.

25. According to the minutes of a November 23, 2009, audit committee meeting, attended by BDO, the GEE CFO reported his concerns that GEE had little documentation supporting the purported CD, including no written authorization from an account signatory and no deposit agreement. According to the minutes, Heineman claimed that he authorized the purported CD at Pence's direction, and claimed the lack of documentation was due to "the rapid pace of the transactions in which he had been involved, coupled with reorganization and personnel changes at Park Avenue Bank." Heineman next stated that he had anticipated that the CD would be maintained on a continuing renewal basis but he had asked Pence to liquidate the purported CD and have the funds transferred into the PAB checking account by the end of the week. The minutes also state that the BDO engagement partner "said that the audit was substantially completed, pending resolution of the missing funds issue, receipt of legal letters from counsel, and the executed management representation letter" and that BDO "would be issuing an unqualified opinion on the consolidated financial statements."

26. On November 24, 25, and 27, 2009, Huff directed and caused a total of $900,000 to be transferred to GEE's bank accounts in installment payments of $300,000 on each such date from the bank accounts of two Affiliated Entities: SDH and Oxygen.

27. On November 28, 2009, Pence emailed Zizza that an audit committee member, whom Pence had appointed in connection with the PSQ transactions in July (the "AC Member"), "is going to handle the issue with the CD" at the GEE board of directors meeting on November 30,

2009. Pence stated: "I would like for you to talk with him before then . . . . I think he has a good idea." Zizza replied: "Ok will do."

28. On November 30, 2009, Pence, Zizza, Heineman, and the AC Member attended a GEE board of directors meeting. Zizza, who had no formal role at GEE at this time, attended as an "invited guest." The board minutes indicate that the audit committee chairman (the "AC Chair") explained that the Company's Form 10-K had not yet been filed because BDO's "final" opinion was predicated on the satisfactory accounting for the PAB CD and an explanation for where GEE's funds had been since the CD matured on October 21. During this November 30, 2009, board meeting, the AC Member stated he believed that the situation occurred as a result of administrative errors on the part of the Bank, and Pence said that the AC Member had agreed to pursue the matter with PAB. Neither Pence nor Heineman (or anyone else) mentioned anything about GEE selling or assigning the purported CD to a third party.

29. On December 4, 2009, the BDO engagement partner on the GEE audit sent an email to the AC Chair, Heineman, and Pence, among others, summarizing the open items requiring resolution prior to the issuance of BDO's audit report. The email begins by noting that after the CD had matured in October 2009, when the GEE CFO had contacted the Bank, a PAB representative informed the GEE CFO that there was no record of the purported CD and that after some investigation by the AC Member, "in late November it was determined that the funds would be returned to GEE in installments." The email then notes that GEE had received the following wire transfers: (i) November 24: \$300,000 wire transfer from SDH; (ii) November 25: \$300,000 wire transfer from Oxygen; (iii) November 27: \$300,000 wire transfer from SDH; and (iv) December 1: \$100,000 wire transfer from Oxygen. It then stated that the BDO engagement partner had discussed the matter with Heineman and Pence, who both referred him to the AC Member who was working directly with PAB on the matter, and that the AC Member left him a voicemail "indicating the bank continues to put money against the CD they owe [GEE] and it should be fully repaid by the close of business on Monday, Dec. 7" and that the Bank would provide a short apology note.

30. Later in the day on December 4, the AC Chair sent an email to the BDO engagement partner and concurring partner summarizing his call with the AC Member, stating that when he spoke with the AC Member "he told me that [PAB] had reported these transaction [sic] to the FDIC and that the money sent to the various entities that are now sending GEE the money are sending us the banks money rather than sending it back to the bank." The AC Chair continued: "This makes absolutely no sense. It looks like [PAB] is on the verge of failing. The FDIC and a bankruptcy estate are going to require [PAB] to collect every cent they can under loans or other arrangements to settle with the creditors of the bank before they send money to third parties."

31. The following day, on December 5, 2009, the AC Chair emailed GEE's board (including Pence) and Heineman calling for a special audit committee meeting on December 9 because of "several unanswered questions related to \$2.3 million of the Company's cash which supposedly was invested in a Certificate of Deposit ('CD') at Park Avenue Bank which will need to be answered before BDO will complete their Audit Report for the Company's fiscal year ended September 30, 2009." The AC Chair's email noted several issues, including that (i) there was no

account agreement with PAB or regular reporting on the CD; (ii) PAB did not remit the proceeds of the CD into GEE's operating account when it reached its maturity date on October 21, 2009; (iii) PAB provided no explanation to the GEE CFO when he attempted to investigate; and (iv) the AC Member who took the lead on this matter with PAB "was informed on or about November 21, 2009, that the funds would be returned to [GEE] in a series of deposits." The email also provided a chart of seven wire transfers totaling $1.7 million, which included the four noted in Henaghan's December 4 email plus a December 2, 2009, wire transfer from Oxygen for $100,000, a December 2, 2009, wire transfer from River Falls Financial of $300,000, and a December 3, 2009, wire transfer from River Falls Financial also for $300,000. The address listed for both SDH and River Falls Financial on each of their wire transfers in the chart was 11921 Brinley Ave, Louisville, KY.

32. On December 4 and December 9, 2009, GEE received two additional wire transfers from River Falls Financial for $300,000 each, bringing the total amount received by GEE from River Falls Financial to $1.2 million and the total of the nine wire transfers to $2.3 million, the same amount that Heineman had purported to invest in a CD. Zizza knew or should have known that Huff, in conjunction with Associate-1, directed the transfers from SDH, Oxygen, and River Falls Financial to return the missing funds to GEE.

33. On December 8, the AC Chair emailed the BDO engagement partner, providing some links he suggested the BDO engagement partner review before he had a conversation with the AC Member and any representatives of PAB, "particularly the Anthony Huff links" and explained that he "met Anthony Huff when we went to New York" to negotiate PSQ's acquisition. The email included links to a press release announcing the Commission's lawsuit against Huff, a link to Huff's website noting the address 11921 Brinley Avenue, Louisville, KY in the text of the email, and a link to the website for Oxygen noting the identical address. This is the same address that appeared in the wires sent to GEE by River Falls Financial and SDH, as noted in the AC Chair's December 5 email described in paragraph 31, above. Also, Huff's website at the time contained references to River Falls Investments, SDH, Oxygen, and O2HR.

34. Also on December 8, 2009, the day before the special audit committee meeting, the AC Chair received an email from Heineman to the audit committee with several attachments. Heineman's email purported to offer a new explanation for why GEE had received $2.3 million from the three entities rather than PAB. Heineman claimed that he had negotiated an assignment agreement with the manager of River Falls Investments (Associate-1), who "offered to purchase" the purported CD from GEE at face value. Heineman also attached to his email an unsigned, draft assignment agreement and a letter from Heineman to PAB, dated July 21, 2009, that purportedly authorized the $2.3 million CD investment. Heineman's email also attached a July 2009 monthly statement for GEE's operating account at PAB, which included the description of the $2.3 million withdrawal as a debit on July 23 with a debit memo stating in handwriting: "To: Park Avenue Insurance, See Attachment Approval, $2,300,000.00." Park Avenue Insurance was a private insurance company separately owned by Antonucci that was not affiliated with PAB.

35. According to the minutes of GEE's audit committee meeting on December 9, 2009:

- The BDO engagement partner expressed concern that BDO still did not have a clear understanding of the purported CD transaction.

- The BDO engagement partner said that BDO needed to understand the nature of the purported administrative errors at PAB that he had been told were responsible for the lack of proper documentation regarding the CD transaction. He also explained that BDO required documentation validating the banking transactions, and an explanation as to why there was no existence of an account agreement with the Bank or no record of the CD being at the bank.

- Another BDO partner, BDO's Midwest Regional Business Line Leader, said he believed members of GEE's senior management appeared hesitant to provide information related to these transactions.

- The BDO engagement partner stated that the assignment agreement did not resolve the outstanding issues as BDO still needed to know what transpired within PAB and make a determination of whether the assignment agreement with River Falls Investments was a related party transaction.

- BDO also advised that although the assignment agreement "may reduce or eliminate the need for going concern disclosure, it would increase the requirement that management provide sufficient disclosure regarding any related party conflicts."

36. On December 14, 2009, GEE's outside counsel sent PAB a formal letter requesting all documentation and information concerning the purported CD. PAB's December 16, 2009, response provided only documents relating to GEE's checking account and did not provide any documents or other information about the purported CD. The checking account documentation, however, indicated that only Associate-1, the GEE CFO, and Pence were authorized signers on GEE's account from July to September 2009—not Heineman—and the checking account statements reflected a debit memo for the transfer of $2.3 million of GEE's cash to Park Avenue Insurance on July 23, 2009. At some point in December 2009, Zizza understood that a debit memo attached to the GEE PAB July 2009 account statement stated that the $2.3 million had been transferred to Park Avenue Insurance, not into a purported CD.

37. On the evening of December 17, 2009, Zizza emailed Pence that BDO's Midwest Regional Business Line Leader "w[ould] take a call from us to resolve the Bank issue and then issue the statement." The following day, Pence emailed Zizza stating, "We need to decide [Heineman's] fate quickly." Zizza spoke to BDO's Midwest Regional Business Line Leader concerning GEE.

38. On December 22, 2009, BDO sent the AC Chair a letter stating that BDO did not have sufficient audit evidence to formally conclude the audit and demanded an independent investigation ("BDO's demand letter"). BDO's demand letter noted identified multiple inconsistencies and problems in the audit evidence BDO had received regarding the purported CD, including that a number of significant questions remained unanswered concerning both the existence of the purported CD (e.g., why bank records provided by PAB showed a transfer of $2.3 million to Park Avenue Insurance) and the manner in which $2.3 million had been transferred to the Company by the Affiliated Entities (e.g., why Associate-1 would pay 100% of the face value of

the purported CD after the maturity date had expired without payment by PAB, why had River Falls Financial—purportedly owned by Pence—transferred approximately $1 million to GEE in connection with the alleged assignment of the purported CD to River Falls Investments, and why Heineman had made inconsistent representations about his involvement in negotiating the alleged assignment with Associate-1). Pence forwarded BDO's demand letter to Zizza and Associate-1, the purported manager of River Falls Investments.

39. On the evening of December 22, 2009, BDO learned that the audit committee meeting that was scheduled for the following day had been cancelled, Zizza, an advisor to Pence who had attended GEE board meetings through the fall of 2009, would be taking over as CEO, and that Pence and Associate-1 intended to prepare written responses to each of the issues identified in the December 21 letter. On December 23, 2009, Heineman formally resigned as GEE's CEO and that same day Pence appointed Zizza to be GEE's new CEO.

40. Zizza, over the course of many years, had brought new business to BDO in the form of several auditing clients. A senior partner in BDO's New York office (the "BDO NY Partner") handled some of Zizza's other business relationships with BDO, including audit or tax work for Zizza's private company and three public companies for which Zizza served as a board member. Thereafter, the NY Partner reached out to auditors in BDO's Chicago and national offices to vouch for Zizza.

41. On December 24, 2009, after reviewing BDO's demand letter, Zizza participated in two calls with BDO, one that included the AC Chair and another that included both the AC Chair and Pence. The BDO NY Partner also participated in the call with Zizza and the AC Chair. During those calls, Zizza requested that BDO conclude the audit without the need for an independent investigation because GEE had full control of the $2.3 million in question and because he had replaced Heineman as CEO. When BDO asked Zizza about the CD and the assignment agreement, Zizza stated that he was comfortable with issuing the financial statements because GEE had control over the $2.3 million that had been missing.

42. Although a number of critical questions raised in BDO's demand letter remained unanswered, shortly after the December 24 telephone conversations with Zizza, BDO issued an audit report containing an unqualified opinion on GEE's 2009 financial statements. Zizza also advised GEE's audit committee that, in his opinion, there was no need to investigate the potential related party issues arising out of the assignment agreement between GEE and River Falls Investments.

43. On January 8, 2010, Zizza signed a representation letter to BDO that stated the following:

> The following, where applicable and material, have been properly recorded or disclosed in the consolidated financial statements: (a) Related-party transactions (e.g., transactions with unconsolidated subsidiaries; affiliates under common control with the Company or that are directly or indirectly controlled by the Company; principal owners of record or known beneficial interest of 10 percent or more of the Company's voting stock, directors, management, and members of

their immediate families), including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties . . .

In July 2009 the Company purchased a $2.3 million certificate of deposit (CD) at Park Avenue Bank. When the CD matured in October 2009 the bank did not refund the proceeds to the Company. To date the Company has not received an adequate explanation for the bank's non-performance relating to the CD. The Company is not aware of why the Company did not receive the proceeds from its Park Avenue Bank certificate of deposit upon its maturity and has provided you all information available to it in regards to this matter. In December 2009 the Company was reimbursed in full through a non-recourse assignment of the CD to an unrelated party, who has a business interest in the viability of bank. There are no side letters, e-mails, or other agreements (oral or written) that materially alter the terms of the assignment agreement.

44. Zizza's representations to BDO in phone calls and in the management representation letter were materially misleading because, among other things, Zizza knew or should have known that:

a. On paper, Pence was an indirect owner of River Falls Investments, the entity that signed the alleged assignment agreement and had signed loan agreements as River Falls Investments's manager;

b. Huff controlled River Falls Investments and River Falls Financial;

c. Huff had directed the Affiliated Entities to transfer $2.3 million to GEE to preserve the financial viability of GEE for the benefit of AIR, Huff, and PSQ; and

d. Pence, Zizza, Huff and Associate-1 had unwritten agreements, as described in paragraphs 17 and 18 above, whereby they would benefit from the rise in GEE's stock price.

45. Among other things, Zizza also knew or should have known that the assignment agreement between GEE and River Falls Investments was a related party transaction given Huff's influence and control—and Pence's control, on paper—over both entities.

46. On January 8, 2010, Zizza signed GEE's Form 10-K, which classified the $2.3 million purported CD as a cash equivalent and stated in a footnote disclosure to the financial statements:

In July 2009, the Company purchased a $2,300,000 certificate of deposit ("CD") at a New York bank. When the CD matured in October 2009, the bank did not timely credit the proceeds of the CD to the Company's account. Although the Company has made a formal inquiry of the bank, to date the Company has not received an adequate explanation for the bank's non-performance relating to the CD. In December 2009, the Company was reimbursed in full through a non-recourse assignment of the CD for face value to an unrelated party, who has other business interests with the bank. The purchaser of the CD is neither an employee nor a director of the Company.

47. GEE's 2009 Form 10-K was materially misstated because, among other things, it incorrectly represented GEE had a $2.3 million CD and classified it as a cash equivalent as of September 30, 2009, and did not disclose the assignment agreement as a related party transaction given Huff's influence and control—and Pence's control, on paper—over both entities.

48. On March 13, 2010, the United States of America filed a 44-page criminal Complaint against former PAB president Antonucci (the "Antonucci Complaint"), alleging a scheme and conspiracy involving a $6.5 million round-trip transaction in which GEE's $2.3 million was diverted as part of the conspiracy. Huff, Heineman, and Pence are referred to and identifiable as designated "co-conspirator[s] not named herein" in certain aspects of that conspiracy. The allegations in the Antonucci Complaint contained several details that indicated that GEE did not have a CD with PAB, that River Falls Financial, River Falls Investments, Oxygen, SDH, and PSQ were related parties, and that Heineman had authorized the money to be transferred to Park Avenue Insurance as part of the conspiracy, and not to purchase a CD:

- "To hide the improper diversion of GEE's funds from GEE's auditors and Board of Directors, [Antonucci] and others created a counterfeit certificate of deposit [], falsely representing that GEE's $2.3 million had been invested in a 90-day certificate of deposit at the Bank. In fact, and as [Antonucci] well knew, there was no $2.3 million CD."

- GEE's $2.3 million had been transferred to Park Avenue Insurance, which was controlled by Antonucci. According to the Bank records, Heineman authorized this transfer.

- Antonucci fraudulently signed the BDO confirmation of the $2.3 million CD, when Antonucci knew it did not exist.

The Antonucci Complaint further identified several "Oxygen-related entities" as participants in the conspiracy, including, River Falls Financial (which Pence said he owned), PSQ (Pence's entity that purchased the majority stake in GEE), and Oxygen and SDH—two companies that paid GEE purportedly under the assignment agreement with River Falls Investments (which [Associate-1] said he and a Huff family trust owned). It further alleged that a group of five associates (including Huff and Pence) were listed on some of the accounts of the Oxygen-related entities, which shared a common address in Louisville, Kentucky.

49. In a May 25, 2010 email, the BDO engagement partner told Zizza that he would like to discuss certain issues regarding the Antonucci Complaint. The BDO engagement partner wrote that he wanted to discuss the allegations that "Pence purchased a 25% interest in Bedford Consulting from Antonucci for $6.5 million in what the complaint describes as an 'artifice designed to cover up the true source of the $6.5 million.'" He also wrote: "The Complaint indicates that River Falls is owned by Pence, [Associate-1], and Heineman. All previous

information disclosed to us by Heineman and Pence indicated that Pence owned 100% of River Falls." He further noted that the Complaint indicated that PSQ borrowed money from River Falls to buy the GEE shares. The email to Zizza did not address the allegations in the Antonucci Complaint denying the existence of the purported CD or indicating related party issues concerning the funds received by the "Oxygen-related entities."

50. During his conversation with BDO, Zizza withheld material information that bore upon the accuracy of GEE's previously-filed 10-K and future filings addressing the purported CD. Specifically, Zizza failed to disclose to BDO the same material facts identified in paragraph 44 of this Order.

51. Later throughout 2010, Zizza failed to disclose to BDO facts that he knew or should have known, including that companies acquired by GEE, including On-Site, RFFG of Cleveland, LLC, and DMCC Staffing, LLC were partially controlled by Huff. Zizza's materially false or misleading statements and omissions were relevant to BDO's audit of GEE for 2010 and the Company's preparation of its Form 10-K.

52. In December 2010, Zizza signed a representation letter that included similar language to the representation letter discussed in paragraph 43 of this Order concerning related parties, the purported CD with PAB, and the assignment agreement. For the same reasons, Zizza's representations in that management representation letter were materially misleading.

53. GEE's Form 10-K filed on December 28, 2010, for its fiscal year ended September 30, 2010, classified the $2.3 million CD as a cash equivalent as of September 30, 2009, included a similar disclosure as the disclosure in the Form 10-K filed in January 2010 and was materially misleading for the same reasons:

> In November 2009, the Company discovered that it did not receive the proceeds from a bank for a $2,300,000 certificate of deposit that was scheduled to mature in October 2009. Although the Company made a formal inquiry of the bank, it did not receive an adequate explanation for the bank's non-performance related to the deposit. In December 2009, the Company entered into an agreement to assign its interests in the certificate of deposit, without recourse, to an unrelated party that has other business interests with the bank, and the Company was reimbursed for the face value of the deposit.

F. VIOLATIONS

54. Rule 13b2-2 of the Exchange Act prohibits officers and directors from, directly or indirectly, making or causing to be made materially false or misleading statements or omissions to accountants in connection with an audit or preparation of reports to be filed with the Commission.

55. As a result of the conduct described above, Zizza violated Rule 13b2-2 under the Exchange Act.

IV.

In view of the foregoing, the Commission deems it appropriate to impose the sanctions agreed to in Respondent's Offer.

Accordingly, it is hereby ORDERED that:

A. Pursuant to Section 21C of the Exchange Act, Respondent cease and desist from committing or causing any violations and any future violations of Exchange Act Rule 13b2-2.

B. Respondent shall within 14 days of the entry of this Order, pay a civil money penalty of $150,000 to the Commission for transfer to the general fund of the United States Treasury in accordance with Exchange Act 21F(g)(3). If timely payment is not made, additional interest shall accrue pursuant to 31 U.S.C. § 3717. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Zizza as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Timothy Casey, New York Regional Office, Securities and Exchange Commission, 200 Vesey Street, New York, NY 10281-1022.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by

Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

By the Commission.

SECURITIES AND EXCHANGE COMMISSION

SECURITIES EXCHANGE ACT OF 1934
Release No. 75862 / September 9, 2015

ACCOUNTING AND AUDITING ENFORCEMENT
Release No. 3692 / September 9, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16800

In the Matter of **BDO USA, LLP,** **Respondent.**	**ORDER INSTITUTING PUBLIC ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTIONS 4C AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934, AND RULE 102(e) OF THE COMMISSION'S RULES OF PRACTICE, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that public administrative and cease-and-desist proceedings be, and hereby are, instituted pursuant to Sections 4C[1] and 21C of the Securities Exchange Act of 1934 ("Exchange Act") and Rule 102(e)(1)(ii) of the Commission's Rules of Practice[2] against BDO USA, LLP ("BDO" or "Respondent").

---

[1] Section 4C provides, in relevant part, that:

> The Commission may censure any person, or deny, temporarily or permanently, to any person the privilege of appearing or practicing before the Commission in any way, if that person is found . . . (2) . . . to have engaged in unethical or improper professional conduct.

[2] Rule 102(e)(1) provides, in relevant part:

> The Commission may censure a person . . . who is found . . .
>
> * * *
>
> (ii) to have engaged in unethical or improper professional conduct.
>
> * * *

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement ("Offer") that the Commission has determined to accept. Respondent admits the facts set forth in Sections III.B., C., and E. through H. below, acknowledges that its conduct violated the federal securities laws, admits the Commission's jurisdiction over it and the subject matter of these proceedings, and consents to the entry of this Order Instituting Public Administrative and Cease-and-Desist Proceedings Pursuant to Sections 4C and 21C of the Securities Exchange Act of 1934 and Rule 102(e) of the Commission's Rules of Practice, Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order (the "Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[3] that:

A. SUMMARY

1. This matter involves improper professional conduct by BDO while serving as the auditor for General Employment Enterprises, Inc. ("GEE" or the "Company"), a staffing services company whose stock trades on the NYSE MKT. During BDO's 2009 audit of GEE's financial statements for its fiscal year ended September 30, 2009, BDO learned that $2.3 million (comprising approximately half of GEE's assets and substantially all of its cash) was unaccounted for when GEE's chief financial officer (the "GEE CFO") advised BDO, in November 2009, that (a) GEE's purported 90-day non-renewable certificate of deposit ("CD") at a New York bank had not been repaid by the bank after the stated maturity date in mid-October, (b) GEE was missing documentation supporting the CD, and (c) a bank employee had told GEE's CFO that the bank had no record of a CD. Thereafter, BDO received multiple conflicting stories from GEE management

---

> (iv) with respect to persons licensed to practice as accountants, "improper professional conduct" under Rule 102(e)(1)(ii) means:
>
> * * *
>
> (B) either of the following two types of negligent conduct:
>
> > (1) A single instance of highly unreasonable conduct that results in a violation of applicable professional standards in circumstances in which an accountant knows, or should know, that heightened scrutiny is warranted.
> >
> > (2) Repeated instances of unreasonable conduct, each resulting in a violation of applicable professional standards, that indicate a lack of competence to practice before the Commission.

[3] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

and board members concerning both the status of the CD and a series of transfers totaling $2.3 million made to GEE by three entities unaffiliated with the bank, one of which BDO had been told was owned by GEE's Chairman and majority shareholder. After BDO raised questions about these deposits, GEE's chief executive officer claimed the deposits were the proceeds of an agreement to assign the CD to a purported unrelated party.

2. BDO's engagement and concurring partners consulted with senior BDO partners, including the assigned BDO regional technical director, BDO's national director of accounting, and BDO's national SEC practice director. The consultation resulted in BDO issuing a five-page letter, dated December 21, 2009, in which BDO advised GEE of its belief that BDO had not been provided sufficient audit evidence to formally conclude on the matter and demanded that GEE's audit committee commission a full investigation of the matter by an independent firm. BDO received conflicting information from various sources as to the existence of the CD and never received rational explanations as to why the $2.3 million went missing and why an equivalent amount was later received under suspect circumstances. Only days later, however, after GEE's chief executive officer resigned, BDO agreed to withdraw its demand for an independent investigation and issued an audit report containing an unqualified opinion on GEE's financial statements. Those financial statements, included in GEE's Form 10-K filed on January 8, 2010, represented that GEE had a $2.3 million cash equivalent in the form of CD as of September 30, 2009, and had entered into an assignment agreement to sell the CD for full face value to an unrelated party.

3. Approximately two months after GEE filed its 2009 Form 10-K with BDO's unqualified audit opinion, BDO learned of a criminal complaint against the New York bank president. The criminal complaint alleged, in connection with a wide-ranging conspiracy involving, among others, GEE's then-chief executive officer and GEE's then-majority shareholder and chairman of the board, that (i) GEE's purported $2.3 million CD never existed, (ii) the bank president signed a false confirmation to BDO, (iii) GEE's $2.3 million was used to attempt to conceal a loan default connected to the broader conspiracy, and (iv) the entities that transferred the $2.3 million back to GEE were related to the bank president's co-conspirators, including GEE's then-majority shareholder and chairman of the board. The bank president pled guilty in October 2010. Despite this additional new information, which was conveyed to senior partners in BDO's regional and national offices, BDO failed to perform appropriate audit procedures to determine whether this new information had any impact on GEE's 2009 financial statements or BDO's audit report thereon. In addition, BDO failed to adequately consider this information during its subsequent audit when it provided an audit report containing an unqualified opinion on GEE's financial statements included in the Company's 2010 Form 10-K.

4. Specifically, among other audit failures during the 2009 and 2010 audits of GEE, BDO: (1) failed to adequately plan, design, and perform audit procedures necessary to determine the existence of a disputed asset and the existence of related party transactions; (2) failed to obtain sufficient competent evidential matter; (3) failed to exercise professional skepticism and due professional care; (4) ignored red flags of fraud, potential illegal acts by GEE's agents, and unidentified related party transactions; (5) placed improper reliance on management representations from individuals they did not trust; and (6) failed to appropriately consider the discovery of new facts.

5. BDO issued audit reports containing unqualified opinions on the financial statements in GEE's 2009 and 2010 Form 10-Ks, which incorrectly stated that GEE had a cash equivalent of $2.3 million as of September 30, 2009, and did not disclose that the $2.3 million was returned by entities related to GEE's chairman of the board. BDO's reports, which BDO knew would be filed with GEE's Form 10-Ks, inaccurately stated that the audits had been conducted in accordance with standards adopted by the Public Company Accounting Oversight Board ("PCAOB") and that GEE's financial statements presented fairly, in all material respects, the company's position and results at September 30, 2009, in conformity with generally accepted accounting principles in the United States of America ("GAAP").

B. RESPONDENT

6. **BDO**, formerly known as BDO Seidman, LLP, is a Delaware limited liability partnership and a PCAOB-registered public accounting firm with its headquarters in Chicago, Illinois. BDO served as GEE's independent auditor from 2004 through 2012.

C. RELEVANT BDO PROFESSIONALS

7. **Sean C. Henaghan** ("Henaghan"), age 42, is a Certified Public Accountant ("CPA") licensed to practice in Illinois and was licensed in Florida from 2010 through 2012. Henaghan served as the BDO engagement partner on the 2009 and 2010 audits of GEE and had final responsibility for the audits.

8. **John E. Rainis** ("Rainis"), age 57, is a CPA licensed to practice in Illinois. Rainis served as the BDO concurring reviewer on the 2009 and 2010 audits of GEE.

9. **Leland E. Graul** ("Graul"), age 66, is a CPA licensed to practice in Illinois. Prior to his retirement, Graul served as BDO's national director of accounting and risk management partner when he was consulted during the 2009 and 2010 audits of GEE.

10. **James J. Gerace** ("Gerace"), age 54, is a CPA licensed to practice in Illinois. Gerace served as the regional technical director of BDO when he was consulted during the 2009 and 2010 audits of GEE.

11. **Wendy M. Hambleton** ("Hambleton"), age 53, is a CPA licensed to practice in Illinois. Hambleton served as BDO's national SEC practice director when she was consulted during the 2009 and 2010 audits of GEE.

D. ISSUER AND OTHER RELEVANT ENTITIES AND INDIVIDUALS

12. **GEE** is an Illinois corporation headquartered in Oakbrook Terrace, Illinois that provides professional placement services and temporary staffing services in certain industries. GEE's common stock is registered with the Commission pursuant to Section 12(b) of the Exchange Act and trades on the NYSE MKT stock exchange. GEE files periodic reports, including Forms 10-K and 10-Q, with the Commission pursuant to Section 13(a) of the Exchange Act and related rules thereunder.

13. **River Falls Financial Services, LLC** ("River Falls Financial"), **River Falls Investments, LLC f/k/a Oxygen Unlimited II, LLC** ("River Falls Investments"), **River Falls Holdings, LLC** ("RFH"), **Accredited Investor Resources, LLC f/k/a Oxygen Investment Partners, LLC** ("AIR"), **Oxygen Unlimited, LLC** ("Oxygen"), **O2HR, LLC** ("O2HR"), **SDH Realty, LLC** ("SDH"), **WTS Acquisition LLC** ("WTS"), **H2H Holdings, LLC** ("H2H"), and **PSQ, LLC** ("PSQ") (collectively, the "Affiliated Entities") are purported holding, investment, employment-related, and insurance companies. During at least 2009 and 2010, **Wilbur Anthony Huff** ("Huff")[4] exercised substantial financial and management control over numerous entities, including, among others, the Affiliated Entities and their holdings. Huff installed other business partners to perform day-to-day operational functions and/or serve as the listed owners, directors, or managers. As a convicted felon, Huff faced legal and practical barriers to operating business entities in his own name, particularly business in regulated industries, including employment-related, insurance, and banking companies.

14. **Park Avenue Bank** ("PAB" or "the Bank") was a New York State chartered bank until it was closed by the New York State Banking Department on March 12, 2010, and the Federal Deposit Insurance Corporation was named Receiver. The Affiliated Entities primarily conducted their banking business through PAB. **Charles J. Antonucci, Sr.** ("Antonucci") served as the president and CEO of PAB from June 2004 until October 2009. In October 2010, Antonucci pled guilty to multiple criminal charges, including securities fraud, bank bribery, embezzlement, and providing a false confirmation to BDO of GEE's purported CD at PAB. Separately, **Park Avenue Insurance** was a private insurance company owned by Antonucci that was not affiliated with PAB.

15. **Stephen B. Pence** ("Pence") served as the chairman of the board of GEE from July 1, 2009, through November 17, 2010. Although Pence purported to be the sole member and owner of PSQ, whose sole asset was the GEE shares representing a controlling stake in the Company as of July 1, 2009, PSQ was one of the Affiliated Entities over which Huff exercised substantial financial and management control. PSQ's acquisition of GEE stake was funded by AIR and Oxygen. Pence also represented to BDO that he was the 100% owner of River Falls Financial, another of the Affiliated Entities. Huff directed substantial monthly payments to Pence ($25,000)

---

[4] Huff pled guilty to federal mail fraud charges for obtaining insurance premium finance loans under false pretenses in the Western District of Kentucky in 2003. In 2008, the Commission filed charges against Huff related to a scheme to misappropriate assets from and to record fake letters of credit at Certified Services, Inc. ("Certified"). *SEC v. Huff*, 08-CV-60315 (S.D. Fla.). On October 22, 2010, the Court entered judgment for the Commission against Huff requiring him to pay more than $13 million, among other relief. Separately, after an October 2012 indictment against him, Huff pled guilty on December 23, 2014 to an information, which alleged, among other things, that: (1) Huff controlled GEE, in whole or in part, by installing other individuals; (2) Huff participated with Antonucci in a conspiracy in which they stole $2.3 million from GEE and Huff later returned the $2.3 million to GEE from three companies he controlled; and (3) a large portion of the $2.3 million received by GEE were funds entrusted to Oxygen by its clients for payment of the clients' employment tax and other obligations. *U.S. v. Huff*, 12-CR-750 (S.D.N.Y.).

from several of the Affiliated Entities to ensure his control over, and ability to influence, GEE's operations. Pence formerly served as the lieutenant governor of Kentucky from 2003 to 2007 and the United States Attorney for the Western District of Kentucky from 2001 to 2003.

16. **Ronald E. Heineman** ("Heineman") was appointed as the chief executive officer ("CEO") of GEE on July 1, 2009, in connection with PSQ's acquisition of a controlling stake in GEE. Heineman served as CEO until his resignation on December 23, 2009, in connection with the events described herein. Huff directed substantial monthly payments to Heineman ($15,000) from the Affiliated Entities during this time period.

17. **Salvatore J. Zizza** ("Zizza") served as the CEO of GEE from December 23, 2009, through December 2012. Prior to his appointment as CEO, Zizza received monthly payments of $20,000 from PSQ, which were funded by several of the Affiliated Entities, for purported consulting services, and Zizza frequently attended GEE board meetings as an "invited guest." In 2009, businesses owned or operated by Zizza received loans in excess of $1 million that Huff directed from certain of the Affiliated Entities.

18. **Associate-1** was another of Huff's business partners and was listed or served at various times as a manager of River Falls Investments, Oxygen, and O2HR, and as co-manager of River Falls Financial with Heineman. Associate-1 was also involved in PSQ's acquisition of a controlling stake in GEE and attended several GEE board meetings in 2009. In addition, from July 2009 until September 2009, Associate-1 was a signatory on GEE's bank account at PAB despite the fact that Associate-1 was not an official employee, officer, or director of the Company. Associate-1 also purported to be the owner of WTS (another of the Affiliated Entities), a holding company of **On-Site Services, Inc.** ("On-Site") and **Ameritemps, Inc.** ("Ameritemps"), which WTS had acquired in January 2009 with funding from other Affiliated Entities. Almost immediately after PSQ's acquisition of a controlling stake in GEE, Heineman began presenting proposals to GEE's board for GEE to acquire these companies. For example, at an August 10, 2009, GEE board meeting, attended by Pence and Zizza, the board authorized Heineman to enter into a letter of intent with WTS to acquire On-Site, and Heineman reported that he would present another acquisition candidate, Ameritemps, at the September board meeting.

E. BACKGROUND

19. GEE's May 18, 2009, definitive proxy statement disclosed that, in January 2009, GEE began discussions with representatives of River Falls Financial, including Heineman and Pence, concerning the possibility of a tender offer and direct cash investment in GEE. As BDO learned later in 2009, Huff was also present for one of the relevant meetings. The proxy statement further disclosed that, on February 11, 2009, River Falls Financial and PSQ, a special purpose vehicle purportedly formed by Pence, entered into a non-binding letter of intent with GEE for a purchase and tender offer agreement to obtain a controlling stake in GEE.

20. According to GEE's May 18, 2009, definitive proxy statement, on March 30, 2009, after negotiations continued following the February 2009 non-binding letter of intent, Pence signed on behalf of PSQ a definitive securities purchase and tender offer agreement (the "Purchase Agreement"). The Purchase Agreement provided that, subject to shareholder approval, PSQ would

acquire a controlling stake in GEE by (1) purchasing 7,700,000 newly-issued shares of GEE common stock in a private placement transaction at a purchase price of $0.25 per share for a total purchase price of $1,925,000; (2) commencing a cash tender offer to purchase from the Company's shareholders up to 2,500,000 shares of common stock at a purchase price of $0.60 per share; (3) appointing three directors to a five-member board of directors, including Pence becoming the chairman of the board; and (4) designating Heineman GEE's CEO. On June 22, 2009, a GEE press release announced that shareholders approved the Purchase Agreement and the closing of the Purchase Agreement was announced on July 1, 2009. As a result, PSQ acquired more than 65% ownership of the Company, Pence became GEE's chairman and appointed two other directors, and Heineman became GEE's CEO.

21. As part of the July 2009 closing of PSQ's purchase agreement with GEE, GEE opened a checking account at PAB into which PSQ's escrowed $1,925,000 would be deposited upon the closing. According to PAB records received by BDO in 2009, in June 2009, Associate-1 coordinated with GEE's chief financial officer (the "GEE CFO") to have the GEE checking account opened at PAB and the authorized signatories on the account were the GEE CFO, Pence, and Associate-1. Those PAB records also indicated that the GEE CFO, Pence, and Associate-1 remained the only authorized signatories on the account until September 2009, at which time Associate-1 was removed and Heineman was added. Following the closing in early July 2009, GEE transferred an additional $750,000 from GEE's accounts at other banks to the GEE PAB checking account. The approximately $2.6 million deposited in the GEE PAB checking account constituted substantially all of GEE's cash and half of its assets.

22. According to information received by BDO, GEE's CFO identified that $2.3 million had been withdrawn from the GEE PAB operating account on July 23, 2009, without the GEE CFO's knowledge. The GEE CFO reported to BDO that when he asked about the withdrawn funds, GEE's CEO Heineman claimed that he had authorized GEE to invest $2.3 million into a CD at PAB. The GEE CFO also informed BDO that, although he had repeatedly requested documentation concerning the purported CD, such as a written approval or account agreement—and cited the lack of documentation as a control deficiency—Heineman only provided the GEE CFO with a one-page PDF of a typewritten "Certificate of Deposit Receipt" for $2.3 million with a single maturity date of October 21, 2009 and interest rate of two percent.

F. BDO RECEIVED INCONSISTENT EVIDENCE CONCERNING THE PURPORTED CD AND THE EXISTENCE OF RELATED PARTY TRANSCTIONS

23. GEE's fiscal year ended on September 30, 2009. As part of its audit of GEE, BDO addressed confirmations for GEE's bank accounts, including the purported CD, to a PAB vice president and branch manager. In October, BDO received a confirmation signed by that vice president for the operating account and a confirmation signed by the PAB president Antonucci for the purported CD. BDO concurring partner Rainis noted that it was "unusual" for the PAB president to sign the confirmation.

24. On October 19, 2009, the GEE CFO provided to audit committee members and BDO a report of the evaluation of internal control for fiscal year 2009, which noted the purported

PAB CD as an identified control deficiency. The report noted that"[t]he transaction was not executed by the office of the Treasurer, and no written approval or account agreement was provided to the accounting department" and that "it did not conform to the company's investment guidelines" because it did not provide sufficient diversification and PAB did not meet GEE's size requirement. However, the report concluded that the control deficiency did not constitute a material weakness. BDO concurred with this assessment.

25. In early November 2009, the GEE CFO noticed that PAB had not remitted the proceeds of the purported CD of $2.3 million plus interest into GEE's operating account upon the maturity date, October 21, 2009. When the GEE CFO contacted PAB, a PAB representative stated that the Bank had no record of the purported CD in its system and then refused to investigate the matter any further. On November 18, 2009, the GEE CFO conveyed this information to the BDO engagement partner Henaghan. The GEE CFO also communicated this information to GEE's audit committee chairman (the "AC Chair").

26. Also in November 2009, BDO partners Henaghan, Graul, and Gerace reviewed background check reports of Heineman and Associate-1 that identified potential concerns. As part of BDO's client retention procedures, BDO had procured a background check of Heineman because he was the new CEO of GEE and of Associate-1 because he purportedly owned On-Site, a subsidiary of WTS that GEE intended to acquire and which BDO agreed to audit. Those background checks revealed that:

- A 2009 lawsuit named GEE's CEO Heineman as a defendant and alleged that he received a fraudulent distribution of in excess of $2 million in cash from a bankrupt company he formally ran.

- Associate-1 served as the chief operating officer of a subsidiary of Certified. The Commission had alleged in a 2008 complaint that Huff was an "undisclosed control person" who, with others, stole $30 million from Certified.

- Associate-1 and Heineman were co-managers of River Falls Financial, and participated in negotiating PSQ's acquisition of GEE shares.

- Heineman and Associate-1 had several substantial personal tax liens.

27. At a November 23, 2009, audit committee meeting, attended by BDO engagement partner Henaghan and concurring partner Rainis, the GEE CFO reported his concerns that GEE had little documentation supporting the purported CD, including no written authorization from an account signatory and no deposit agreement. According to the audit committee minutes, Heineman claimed that he authorized the purported CD at Pence's direction, and claimed the lack of documentation was due to "the rapid pace of the transactions in which he had been involved, coupled with reorganization and personnel changes at Park Avenue Bank." Heineman next stated that he had anticipated that the CD would be maintained on a continuing renewal basis but he had asked Pence to liquidate the purported CD and have the funds transferred into the PAB checking account by the end of the week. The minutes also state that Henaghan "said that the audit was substantially completed, pending resolution of the missing funds issue, receipt of legal letters from

counsel, and the executed management representation letter" and that BDO "would be issuing an unqualified opinion on the consolidated financial statements."

28. On November 24, 2009, Henaghan emailed the AC Chair, stating that the GEE CFO had "indicated there was an update on the CD and that the funds would be returned in installments. I am not sure if you can provide any further clarity on why this would be. I wanted to check with you before I had another discussion with [Heineman]." The AC Chair replied that he "[could] not provide any clarity" and expressed concern that one of the audit committee members (the "AC Member") "seems to be tied in with this group." The AC Member had been appointed by Pence in connection with the PSQ transaction in July.

29. Henaghan replied to the AC Chair the following day, November 25, 2009, that he had spoken to Heineman that morning and Heineman indicated that Pence and the AC Member "were taking the lead on this as they have a previous working relationship with the bank." Henaghan also noted that Heineman, however, had "disagreed with the fact that the CD would be 'paid back in installments'" and had "indicated that the proceeds of the CD would be in the Company's bank account by Monday."

30. By the following Monday, November 30, 2009, GEE still had not obtained the $2.3 million in proceeds of the purported CD from PAB. That day, Pence, Heineman, and Zizza attended a GEE board of directors meeting. Zizza, who had no formal role at GEE at this time, attended as an "invited guest." The board minutes indicate that the AC Chair explained that the Company's Form 10-K had not yet been filed because BDO's "final" opinion was predicated on the satisfactory accounting for the PAB CD and an explanation for where GEE's funds had been since the CD matured on October 21. During this November 30, 2009, board meeting, the AC Member stated he believed that the situation occurred as a result of administrative errors on the part of the Bank, and Pence said that the AC Member had agreed to pursue the matter with PAB. Neither Pence nor Heineman mentioned anything about GEE selling or assigning the purported CD to a third party.[5]

31. By December 3, 2009, BDO learned that GEE had received four transfers from SDH and Oxygen totaling $1 million. On December 3, 2009, the AC Member, who had been tasked by Pence with contacting PAB about the purported CD, told the AC Chair and BDO engagement partner Henaghan that PAB was sending GEE the $2.3 million proceeds of the purported CD. The AC Member also told Henaghan that the Bank had made an "administrative error" and would provide a short apology note.

32. After consulting with fellow BDO partners Rainis and Gerace, Henaghan sent GEE's AC Chair an email on December 4, 2009, summarizing the open items requiring resolution prior to the issuance of BDO's audit report: (1) the purported CD; (2) identification of potential

[5] BDO engagement partner Henaghan and concurring partner Rainis confirmed in the workpaper index that they reviewed all of the minutes for the GEE board and audit committee meetings discussing the purported CD issue.

related parties to Pence; and (3) additional subsequent event procedures. The email begins by noting that after the CD had matured in October 2009, when the GEE CFO had contacted the Bank, a PAB representative informed the GEE CFO that there was no record of the purported CD and that after some investigation by the AC Member, "in late November it was determined that the funds would be returned to GEE in installments." The email then notes that GEE had received the following wire transfers: (i) November 24: $300,000 wire transfer from SDH; (ii) November 25: $300,000 wire transfer from Oxygen; (iii) November 27: $300,000 wire transfer from SDH; and (iv) December 1: $100,000 wire transfer from Oxygen. Henaghan's email then noted that he had discussed the matter with Heineman and Pence, who both referred him to the AC Member who was working directly with PAB on the matter, and that the AC Member left him a voicemail "indicating the bank continues to put money against the CD they owe [GEE] and it should be fully repaid by the close of business on Monday, Dec. 7" and that the Bank would provide a short apology note. Henaghan's email continued:

> [G]iven the highly unusual nature of this issue and the significant amount of time it is taking to recover the funds, it is critical that we understand both the nature of the administrative error as well as the underlying cause of this error.... As I have never encountered such an issue with a bank or CD and any reasonable person (including the PCAOB or SEC) would certainly question such an issue, I need to be in a position to fully explain exactly what occurred.... As such, from an audit perspective I will require the following prior to issuance of the fiscal 2009 financial statements:
>
> > -Source documents (bank statements, etc.) showing the flow of funds from the closing of the PSQ transaction through the date the funds are fully transferred to Chase bank in December 2009 (including an understanding of where the CD funds were disbursed upon maturity of the CD in October)
> >
> > -Explanation as to why the funds received in November and December are being wire transferred from entities other than Park Avenue Bank
> >
> > -To corroborate this documentation, we may request to meet with someone at Park Avenue Bank to understand the nature of the administrative error
> >
> > -A written report by management or others to fully explain the circumstances surrounding the matter including steps [GEE] took to gain its understanding of what transpired....
>
> Also, as the $2.3 million is critical to our assessment of the Company's ability to continue as a going concern, it is important for us to understand this situation so as to gain comfort that the funds will remain available to the Company to fund operations as needed.

33. Henaghan's December 4 email also noted as an open item that he had a conversation with Pence that day "to gain an understanding of other investments he has to make sure we have appropriately identified any potential related parties and may have a few follow up

questions regarding that matter." One of the items Henaghan had spoken to Pence about was the ownership of River Falls Financial, of which Pence had indicated he was the 100% owner.

34. Shortly after receiving it, the AC Chair forwarded Henaghan's email to Heineman, Pence, the AC Member, the GEE CFO, and GEE's board, noting: "Multiple representatives of BDO have told me that they will not sign off on the GEE Audit . . . until they have sufficient documentation of what has transpired. [BDO's] position is that the Liabilities associated with a sign-off far exceed any past or potential future Audit Fees that [they] have received or will receive. The high level message is that a letter of apology from Park Avenue Bank will not be sufficient." Henaghan received a copy of this email and replied to all: "To clarify, [our] primary concern is getting an understanding of exactly what has occurred in order to allow us to complete our audit procedures. As I am sure everyone would agree, what has transpired over the last few weeks with the funds at [PAB] has been highly unusual. I know everyone has been working to resolve the issue. However, time continues to pass and [GEE's] filing deadline will be here before we know it. As such, I wanted to clarify the importance of appropriately addressing the issue as quickly as possible to allow us to complete the audit."

35. Later in the day on December 4, the AC Chair sent an email to Henaghan and Rainis summarizing his call with the AC Member, stating that when he spoke with the AC Member "he told me that [PAB] had reported these transaction [sic] to the FDIC and that the money sent to the various entities that are now sending GEE the money are sending us the banks money rather than sending it back to the bank." The AC Chair continued: "This makes absolutely no sense. It looks like [PAB] is on the verge of failing. The FDIC and a bankruptcy estate are going to require [PAB] to collect every cent they can under loans or other arrangements to settle with the creditors of the bank before they send money to third parties."

36. The following day, on December 5, 2009, the AC Chair emailed GEE's board and Heineman calling for a special audit committee meeting on December 9 because of "several unanswered questions related to $2.3 million of the Company's cash which supposedly was invested in a Certificate of Deposit ('CD') at Park Avenue Bank which will need to be answered before BDO will complete their Audit Report for the Company's fiscal year ended September 30, 2009." The AC Chair's email noted several issues, including that (i) there was no account agreement with PAB or regular reporting on the CD; (ii) PAB did not remit the proceeds of the CD into GEE's operating account when it reached its maturity date on October 21, 2009; (iii) PAB provided no explanation to the GEE CFO when he attempted to investigate; and (iv) the AC Member who took the lead on this matter with PAB "was informed on or about November 21, 2009 that the funds would be returned to [GEE] in a series of deposits." The email also provided a chart of seven wire transfers totaling $1.7 million, which included the four noted in Henaghan's December 4 email plus a December 2, 2009, wire transfer from Oxygen for $100,000, a December 2, 2009, wire transfer from River Falls Financial of $300,000, and a December 3, 2009, wire transfer from River Falls Financial also for $300,000. The address listed for both SDH and River Falls Financial on each of their wire transfers in the chart was 11921 Brinley Ave, Louisville, KY. BDO's engagement partner Henaghan received a copy of the AC Chair's December 5 email and forwarded it to Rainis, Gerace, and BDO's general counsel.

37. River Falls Financial was the entity that Henaghan had just been told was 100% owned by Pence. BDO had also learned in conducting background investigations that Associate-1 and Heineman were co-managers of River Falls Financial.

38. On December 4 and December 9, 2009, GEE received two additional wire transfers from River Falls Financial for $300,000 each, bringing the total amount received by GEE from River Falls Financial to $1.2 million and the total of the nine wire transfers to $2.3 million, the same amount that Heineman had purported to invest in a CD.

39. On December 8, the AC Chair emailed Henaghan, providing some links he suggested Henaghan review before Henaghan had a conversation with the AC Member and any representatives of PAB, "particularly the Anthony Huff links" and explained that he "met Anthony Huff when we went to New York" to negotiate PSQ's acquisition. The email included links to a press release announcing the Commission's lawsuit against Huff, a link to Huff's website noting the address 11921 Brinley Avenue, Louisville, KY in the text of the email, and a link to the website for Oxygen noting the identical address. This is the same address that appeared in the wires sent to GEE by River Falls Financial and SDH, as noted in the AC Chair's December 5 email described in paragraph 36, above. Also, Huff's website at the time contained references to River Falls Investments, SDH, Oxygen, and O2HR.

40. In addition to the background checks of Heineman and Associate-1 discussed in paragraph 26, on November 23 and December 21, Henaghan, Rainis, and Gerace participated in phone calls with Associate-1. According to Henaghan's notes of the calls, they discussed Huff's connections to River Falls Financial and River Falls Investments and the Commission's lawsuit against Huff "alleging fraudulent transfer of assets & non-disclosure of related party transactions." Associate-1 told BDO that Huff's wife was the original 100% owner of River Falls Financial before it was sold to Pence. Associate-1 also told BDO that, through a family trust, Huff had a 70% ownership interest in River Falls Investments.

41. Also on December 8, 2009, the day before the special audit committee meeting, the AC Chair received an email from Heineman to the audit committee with several attachments. Heineman's email purported to offer a new explanation for why GEE had received $2.3 million from the three entities rather than PAB. Heineman claimed that he had negotiated an assignment agreement with the manager of River Falls Investments (Associate-1), who "offered to purchase" the purported CD from GEE at face value. Heineman also attached to his email an unsigned, draft assignment agreement and a letter from Heineman to PAB, dated July 21, 2009, that purportedly authorized the $2.3 million CD investment. Heineman's email also attached a July 2009 monthly statement for GEE's operating account at PAB, which included the description of the $2.3 million withdrawal as a debit on July 23 with a debit memo stating in handwriting: "To: Park Avenue Insurance, See Attachment Approval, $2,300,000.00."

42. The AC Chair responded to Heineman's email that day, stating: "Given the chain of event[s] you described below, why was GEE not informed immediately when River Falls Investments purchased the CD and why are we just now learning that a law firm has been engaged to document the assignment of the CD? We have been asking questions about the CD now for

nearly a month." BDO engagement partner Henaghan received a copy of Heineman's email with attachments and the AC Chair's reply email. On a printout of the AC Chair's reply email, BDO engagement partner Henaghan wrote "$ Anthony Huff."

43. Henaghan also exchanged emails with the AC Chair later that day, noting his agreement with the AC Chair's questions to Heineman and that "the sale of the CD would constitute a related party transaction which typically should be approved by the board." The AC Chair replied to Henaghan that he had just spoken to Heineman and Heineman "claims that RFI (River Falls Investment) is 100% owned by [Associate-1] and is not related to River Falls Financial Services or any of the other entities." Henaghan replied, "That is consistent with what [] Pence told me in my conversation with him. The common names are a little strange though."

44. Prior to the December 9, 2009, special audit committee meeting, BDO had learned of several indications of fraud relating to the purported CD. Moreover, during the 2009 audit of GEE, BDO became aware of multiple indications that the purported assignment agreement with River Falls Investments was a related party transaction, including:

- the common names of River Falls Investments (purportedly owned by a Huff family trust and Associate-1) and River Falls Financial (purportedly owned by Pence, GEE's chairman);

- River Falls Financial had sent GEE $1.2 million in four installments in connection with the assignment agreement;

- Heineman and Associate-1 were co-managers of River Falls Financial;

- Associate-1 was a signatory for GEE's operating account at PAB from July to September 2009, when the $2.3 million was purportedly invested in a CD;

- Heineman's email address was rheineman@riverfallsfinancialgroup.com;

- The validity of a business purpose for River Falls Investments to purchase the CD at face value was questionable given that (i) PAB stated that it had no record of the purported CD in its system; and (ii) GEE did not have a binding agreement in its possession concerning its purported purchase of the CD with PAB;

- River Falls Investments was not listed in GEE's banking records as the originator of the wire transfers that were purported to be in connection with the assignment agreement. GEE received the payments from SDH, River Falls Financial, and Oxygen—all of which were made before a binding agreement with River Falls Investments was executed; and

- River Falls Financial, River Falls Investments, SDH, Oxygen, and Huff all shared a common address: 11921 Brinley Avenue in Louisville, KY 40234.

45. Prior to the GEE special audit committee meeting scheduled for December 9, 2009, Henaghan alerted Rainis, Gerace, and BDO's Midwest Regional Business Line Leader (the "BDO

Midwest Leader") of Heineman's new explanation concerning the assignment agreement and each of them attended the meeting. According to the audit committee meeting minutes:

- Henaghan expressed concern that BDO still did not have a clear understanding of the purported CD transaction.

- Henaghan said that BDO needed to understand the nature of the purported administrative errors at PAB that he had been told were responsible for the lack of proper documentation regarding the CD transaction. Henaghan also explained that BDO required documentation validating the banking transactions, and an explanation as to why there was no existence of an account agreement with the Bank or no record of the CD being at the bank.

- The BDO Midwest Leader said he believed members of GEE's senior management appeared hesitant to provide information related to these transactions.

- Henaghan stated that the assignment agreement did not resolve the outstanding issues as BDO still needed to know what transpired within PAB and make a determination of whether the assignment agreement with River Falls Investments was a related party transaction.

- BDO also advised that although the assignment agreement "may reduce or eliminate the need for going concern disclosure, it would increase the requirement that management provide sufficient disclosure regarding any related party conflicts."

46. On December 14, 2009, GEE's outside counsel sent PAB a formal letter requesting all documentation and information concerning the purported CD. BDO received a copy of this letter. PAB's December 16, 2009, response, also received by BDO, provided only documents relating to GEE's checking account and did not provide any documents or other information about the purported CD. The checking account documentation, however, indicated that only Associate-1, the GEE CFO, and Pence were authorized signers on GEE's account from July to September 2009—not Heineman—and the checking account statements reflected a debit memo for the transfer of $2.3 million of GEE's cash to Park Avenue Insurance on July 23, 2009.

47. On Friday, December 18, 2009, BDO received a letter from GEE's general counsel that attached the final assignment agreement, dated December 11, and a letter from Associate-1 claiming that the $2.3 million sent to GEE by SDH, Oxygen, and River Falls Financial originated from River Falls Investments and its "wholly owned subsidiaries or affiliates." The letter concluded: "The entirety, sans interest, used by the Company for the purchase of the CD was received into the Company's Chase bank account.... Since time is certainly of the essence to complete the audit work for the Form 10-K to be filed by the Company no later than December 31, 2009, we believe that any open concerns your firm had with respect to the source of the initial concerns over the CD are now resolved." The letter did not provide any additional information concerning what had happened with the purported CD and why Associate-1 and River Falls Investments would pay face value for the purported CD which PAB had not honored and had no records to support.

48. Following the receipt of the December 18 letter, BDO partners Henaghan, Rainis, and Gerace requested consultation with Graul, BDO's national director of accounting and risk management partner, Hambleton, BDO's national director of SEC practice, and BDO's general counsel. After discussion of the situation, these BDO partners agreed they should inform GEE that the December 18 letter did not fully address the questions BDO had raised and demand that the audit committee commission an independent investigation to determine exactly what happened.

G. BDO DEMANDED AN INDEPENDENT INVESTIGATION AND, SHORTLY THEREAFTER, WITHDREW THE DEMAND

49. On Monday, December 21, 2009, Henaghan sent an email to Graul and Hambleton, copying Rainis and Gerace, stating: "This morning we informed the [AC Chair] that we will require an independent investigation of the CD matter in order to conclude the audit of General Employment (consistent with our discussions with you on Friday.) Attached is our proposed written communication." The five-page draft communication described in detail much of the inconsistent evidence BDO had received concerning the purported CD and the purported assignment agreement with River Falls Investments and also included a number of proposed questions. Graul responded:

> We do not owe the Board any explanation other than our "audit" of the CD in question is incomplete because we have been unable to obtain sufficient evidence to support the existence and ownership of this asset. You could say that we have obtained bits and pieces of evidence[] but are not satisfied with the sufficiency of such evidence to support our opinion on the financial statements. You could also say that because of the unusual circumstances surrounding the evidence provided thus far, we concluded that the Board should undertake a full investigation of the matter.

50. Later that day, Hambleton replied to Graul's email, asking whether they "should go into detail of the issues in the letter." Graul responded to Hambleton: "Short of saying we think there is fraud, the point is we have been looking for support for months and don't have anything satisfactory to support a final opinion. If we give a list of questions, we'll get answers to those questions and still not know what is really going on. An independent investigation is the only way to get to the bottom of this. The list doesn't look like it would get us there."

51. Also on December 21, 2009, BDO partners Henaghan, Rainis, and Gerace questioned Associate-1 about the assignment agreement and Huff's involvement with GEE, River Falls Financial, and River Falls Investments. According to summary notes of the call, Associate-1's explanation for why River Falls Financial, purportedly owned by Pence, wired payments of $300,000 each to GEE on four days (December 2, 3, 4, and 9), was that the funds were "initially inadvertently transferred to the [River Falls Financial] account rather than the GEE account." Associate-1 also informed BDO that Huff's wife was the original 100% owner of River Falls Financial and that Pence acquired the company in 2009. The notes also reflect that Associate-1 conveyed that through a trust Huff has an ownership interest in River Falls Investments. Associate-1 further told BDO that he was familiar with Park Avenue Insurance and he believes it "is insolvent at this point."

52. Ultimately it was determined that the detailed letter would be sent and, early on December 22, 2009, Henaghan sent GEE's AC Chair a five-page letter, dated December 21, 2009, in substantially the same form as Henaghan had internally circulated earlier. Henaghan's letter identified a number of inconsistencies in the audit evidence BDO had received regarding the purported CD:

- BDO had not received "sufficient audit evidence" to support the existence of a CD investment as of September 30, 2009. The questions raised in regards to the CD at both the November and December audit committee meetings remained unaddressed.

- BDO had not received an adequate explanation from PAB as to the whereabouts of the $2.3 million after July 23, 2009, because the Bank claimed to have no record of a CD in its system. PAB never "repaid the CD proceeds or provided an adequate explanation regarding the status of the CD."

- BDO had "requested (but not been granted) an opportunity to speak directly with [PAB] regarding this matter."[6]

- The July 2009 PAB statement "indicates the amount was transferred to Park Avenue Insurance. We would like to understand why it appears that the funds were transferred to Park Avenue Insurance and were not invested into a CD. . . . [M]anagement has provided no explanation for this. The documentation also appears to indicate that prior to September 2009, [Associate-1] was an authorized signor on the Company's operating account."

- Heineman's statements to BDO: (1) claiming on November 23 that "the issue would be resolved and the funds deposited in the Company's bank account within a few days"—which did not happen; (2) stating on November 25 that the money would not be "paid back in installments"—which did happen; (3) claiming GEE would have the proceeds by November 30—which did not happen; (4) asserting on December 8 that he negotiated the assignment with Associate-1—but "during [BDO's] earlier discussions with Mr. Heineman he had represented that he was not involved in the process of resolving the issues related to the CD."

- BDO received conflicting reports regarding the return of the CD funds: (1) the AC Member stated on December 4 that "the bank continues to put money against the CD they owe the Company and it should be fully repaid"; (2) Pence and Heineman referred BDO to the AC Member; and (3) "In all discussions leading up to December 7, 2009, no one ever indicated that the CD had been assigned to [Associate-1]."

- "At the December 9, 2009 audit committee meeting, general counsel and one audit committee member requested that BDO not be present for the discussion regarding the CD matter."

---

[6] BDO never contacted PAB or spoke to anyone from PAB after learning that PAB failed to repay the CD proceeds.

- BDO had not received a clear explanation as to why River Falls Investments would purchase the CD that the Bank has said does not exist, why River Falls Investments would transfer funds to GEE before an assignment agreement had been executed, and whether Associate-1's intent to sell companies to GEE was related to his agreement to purchase the CD.

- "Approximately $900,000 of the proceeds recovered by the Company was received from River Falls Financial Services. [BDO] had previously been informed that River Falls Financial Services was 100% owned by Steve Pence. However, in a December 18, 2009 telephone conversation with Steve Pence, he was unable to explain why these amounts were transferred from River Falls Financial Services (as the proceeds were for [Associate-1's] purchase of the CD)."

53. Henaghan's letter indicated that he included specific facts in the letter "to illustrate that it appears that management has not been forthcoming with information surrounding this matter. This fact pattern has caused us to raise the level of scrutiny surrounding this issue."

54. At the end of his letter, Henaghan stated that BDO did not have sufficient audit evidence at that time to formally conclude the audit and demanded an independent investigation:

> While BDO recognizes that the issue related to the CD may be the result of potential administrative or other errors at [PAB], we do not believe we have been provided sufficient audit evidence to formally conclude on this matter at this point. As a result of the fact that almost one month has passed since the first audit committee meeting discussing this matter, that it appears management has not been fully forthcoming on how it was resolving the issue, and certain question remain unanswered, we will require the audit committee to commission a full investigation of this matter prior to the completion of our audit for the year ended September 30, 2009. This investigation should be conducted by an independent firm that is acceptable to our firm and should address the following unexplained matters:
>
> - Why would the Company maintain $2.3 million at Park Avenue Bank in direct violation of its own investment policy?
> - Why was [Associate-1] an authorized signor on the Company's account at Park Avenue Bank?
> - What happened to the CD? We would like an explanation for all of the facts noted above surrounding the situation.
> - Why did the Company not pursue legal action against the bank and report the situation to the FDIC when the bank failed to reimburse the Company when the CD matured?
> - Why would Mr. Heineman & Mr. Pence represent they were unaware of the status of the CD resolution and why funds were being received from entities other than Park Avenue Bank when it appears they were aware of the assignment agreement with [Associate-1]?

- Why would [Associate-1] be willing to purchase an asset whose value is in question when he has no relationship to the Company?
- Why did River Falls Financial Services reimburse the Company for the CD if they did not have any relationship with [Associate-1] and were not a party to the assignment agreement?
- We would like a clear understanding of the relationships between [Associate-1], Mr. Pence and Mr. Heineman and any entities where they may have joint ownership?
- What is the relationship between [Associate-1], Mr. Pence, Mr. Heineman and Park Avenue Bank?

Please note that the issues listed above represent[] some of the areas of concern based on our current understanding of the facts. The above items should not be considered an all-inclusive list and the investigation should not be limited to the above identified items. We may identify additional questions and require additional audit evidence based on the results of the investigation. BDO recommends that this investigation be commissioned as soon as possible.

55. On the evening of December 22, 2009, BDO learned that the audit committee meeting that was scheduled for the following day had been cancelled, Zizza, an advisor to Pence who had attended GEE board meetings through the fall of 2009, would be taking over as CEO, and that Pence and Associate-1 intended to prepare written responses to each of the issues identified in the December 21 letter. In email exchanges that evening and the following morning regarding these events, Henaghan, Gerace, Hambleton, and the BDO Midwest Leader agreed that BDO should communicate to GEE in writing that BDO "will continue to require an independent investigation."

56. Following Zizza's appointment as GEE's new CEO, BDO partners Henaghan, Rainis, Gerace, and the BDO Midwest Leader spoke to Zizza and the AC Chair on December 24, 2009. A senior partner in BDO's New York office (the "NY Partner") also attended the call because he handled some of Zizza's other business relationships with BDO, including audit or tax work for Zizza's private company and three public companies for which Zizza served as a board member. Henaghan later wrote a memo describing the December 24 call, stating that Zizza "requested that BDO conclude the audit without the need for an independent investigation" because of "the change in management and the fact that the Company had recovered full control of the $2.3 million in question" and that the AC Chair agreed. The memo also indicates that both Zizza and the AC Chair "acknowledged that some inappropriate actions were taken within the Company and that it was likely that even more inappropriate actions were taken at the Bank" and that both "felt that with [Heineman's] removal from the management team, the inappropriate actions within the Company would stop."

57. Also on December 24, BDO partners Henaghan, Rainis, and Gerace had a telephone conversation with Pence, Zizza, and the AC Chair. According to a memo Henaghan later wrote describing this call, Pence indicated he asked GEE to move its business to PAB because of his prior working relationship as an attorney for Antonucci, PAB's then-President, and

Associate-1's association with PAB as a customer. The memo also indicates that Pence had told BDO that the reason he represented he was unaware of the status of the CD resolution and why funds were being received from entities other than PAB was because "he was unaware of the assignment agreement until after the funds were returned to the Company." The memo further noted that Associate-1's explanation for why River Falls Financial transferred funds to GEE was because River Falls Financial "also has an operating account" at the same bank and "[t]he funds were transferred from one of his companies to [River Falls Financial] in error," and as such, River Falls Financial "then had to transfer the funds to GEE."

58. After these calls with Zizza, Pence, and the AC Chair, Henaghan sent Rainis, Graul, Gerace, Hambleton, the NY Partner, the BDO Midwest Leader, and BDO's general counsel an email on December 24, 2009, asking for their availability for a call and stating he was drafting a memo summarizing current facts. Graul responded: "Unless there is something new that hasn't been discussed in the last few calls, what's the purpose?" The NY Partner replied: "The purpose is to try to salvage an account where they made [] changes in the management because of the alleged wrongdoing." Graul responded: "Did they change the guy that can't support the $2 million that supposedly was put into company? What about the two audit committee members that stalled the investigation and the lawyer that wouldn't let us participate in a board meeting to preserve privilege. There's something funny going on here." The NY Partner replied that he had no disagreement with Graul on the last point.

59. BDO's 2009 Assurance Manual required Henaghan to consult with Graul, Hambleton, and Gerace in the circumstances presented here. The Manual required the engagement partner seeking consultation to prepare a memorandum concerning all consultations, which should, among other things, define the issues; "identify client source documents/evidence reviewed"; summarize the proper accounting treatment; summarize the impact on the financial statement presentation and disclosure; and describe any alternative solutions considered and why they were rejected. Finally, BDO's 2009 Assurance Manual required the memorandum to be sent to all consultants, who "should acknowledge their agreement with the memorandum."

60. Early in the morning on December 28, Henaghan sent a draft memo to Rainis, Graul, Gerace, Hambleton, the NY Partner, the BDO Midwest Leader, and BDO's general counsel. The memo summarized BDO's calls with Zizza, the AC Chair, Pence, and Associate-1, and attempted to answer the questions posed in Henaghan's letter to the AC Chair dated December 21, 2009. The memo concluded: "the engagement team believes it is appropriate to reconsider the need for an independent investigation and as such is requesting a consultation on this matter."

61. That same day, Henaghan, Graul, Gerace, Hambleton, the NY Partner, the BDO Midwest Leader, and BDO's general counsel discussed GEE for approximately one hour. Despite the existence of multiple, unanswered questions, they ultimately agreed to drop the demand for an independent investigation if GEE agreed to include commentary on two material weaknesses in internal controls, including certain circumstances surrounding the purported CD, in a Form 8-K and that Associate-1 would not become part of management, among other things. A memo later written by Henaghan to document the discussion notes as considerations, among other things, that Zizza—whom BDO trusted—had replaced Heineman as CEO and that the AC Chair, who had initially supported the independent investigation, no longer believed that it was required.

62. Following their call, the NY Partner spoke to Zizza and Henaghan spoke to the AC Chair about the statements BDO wanted made in the Form 8-K and Associate-1's contemplated role with GEE. Henaghan emailed an update to Rainis, Graul, Gerace, Hambleton, the NY Partner, the BDO Midwest Leader, and BDO's general counsel, stating that the AC Chair indicated that GEE was contemplating an acquisition that would make Associate-1 an approximate 20% shareholder of GEE, but not an officer, director, or part of management. Graul responded: "I don't like it but won't object provided [that Associate-1] is not a board member and has no managerial responsibilities, even with respect to the business he is selling. Please make it perfectly clear that this is the last accommodation that I am willing to make from a risk management perspective."

63. Also following their December 28 call, Hambleton sent an email to the other BDO partners asking whether they were comfortable with the classification of the $2.3 million as cash at September 30. Henaghan responded: "we have a confirmation from Park Ave Bank & the subsequent execution and funding of the assignment agreement as evidence of the existence of the CD at 9/30." Henaghan did not mention any of the inconsistent evidence that he identified in his letter to the AC Chair dated December 21, 2009, and that indicated that no such CD or other cash equivalent existed as of September 30, 2009. Neither Hambleton nor any of the other BDO partners responded or commented on these omissions.

64. BDO provided a draft Form 8-K disclosure to GEE, and reviewed and agreed to the language ultimately included in GEE's Form 8-K filed on December 30, 2009. The Form 8-K disclosed Heineman's resignation, Zizza's appointment as CEO, and the fact that Zizza was paid $20,000 per month since March 2009 to consult for Pence. The Form 8-K also stated:

> In July 2009, the Registrant purchased a $2.3 million certificate of deposit ("CD") at a New York bank. When the CD matured in October 2009, the bank did not timely credit the proceeds of the CD to the Registrant's account. Although the Registrant has made a formal inquiry of the bank, to date the Company has not received an adequate explanation for the bank's non-performance relating to the CD. In December 2009, the Registrant was reimbursed in full through a non-recourse assignment of the CD for face value to an unrelated party, who has other business interests with the bank. The purchaser of the CD is neither an employee nor a director of the Registrant.

65. The Form 8-K also disclosed two material weaknesses: (1) "the size of the New York bank from which the CD was purchased did not meet the minimum requirements of [GEE]'s investment policy"; and (2) the Company "authorized an individual that was neither an employer nor a director as an authorized signor on the Registrant's bank account." The Form 8-K did not indicate that Associate-1 was both the authorized signatory and the purportedly "unrelated party" who purchased the purported CD.

66. On January 4, 2010, Henaghan sent an email to the other BDO partners attaching the Form 8-K, the December 21, 2009, letter to the AC Chair demanding an independent investigation, Heineman's resignation email, and a final memo discussing BDO's calls with the AC Chair, Pence, Zizza, and Associate-1 and concluding that BDO should issue its opinion on GEE's financial statements. The final memo noted that Zizza and the AC Chair "acknowledged

that some inappropriate actions were taken within the Company and that it was likely that even more inappropriate actions were taken at the Bank.... Both men also acknowledged that they felt that with [Heineman's] removal from the management team, the inappropriate actions within the Company would stop." The memo noted that "without the cooperation of [Heineman] and the Bank – neither of which anyone was likely to obtain, it was highly unlikely that the motivations or even all of the actions would ever be learned." BDO did not attempt to contact Heineman following his resignation nor did BDO attempt to contact PAB at any time after this issue arose.

67. The memo also stated that Zizza "represented to BDO that [Associate-1] will not become an employee or director of the Company" and concluded: "To the extent any new adverse information related to the transaction comes to our attention we will again consult with BDO's risk management and National SEC groups in regards to continued client retention." Rainis, Graul, Gerace, and Hambleton each reviewed the memo and concurred with the decision to drop the demand for an independent investigation. BDO's general counsel also agreed with the approach outlined in the memo.

68. On January 5, 2010, after BDO had already decided that GEE's Form 8-K disclosure concerning the purported CD was adequate and informed GEE that it would withdraw its demand for an investigation and issue an unqualified audit opinion, Hambleton asked BDO's general counsel, Henaghan, Rainis, Graul, Gerace, and the NY Partner: "I want to make sure we believe the company's response is a sufficient response to a potential illegal act. Although we didn't specifically say we thought there was a potential illegal act in the [December 21] letter, we did include enough issues that would lead someone to that view as does the memo's statement about some 'inappropriate actions.'" BDO's general counsel responded: "I do believe the company's response was appropriate under the circumstances."

69. On January 8, 2010, GEE filed its Form 10-K, which classified the $2.3 million purported CD as a cash equivalent and stated in footnote disclosure to the financial statements:

> In July 2009, the Company purchased a $2,300,000 certificate of deposit ("CD") at a New York bank. When the CD matured in October 2009, the bank did not timely credit the proceeds of the CD to the Company's account. Although the Company has made a formal inquiry of the bank, to date the Company has not received an adequate explanation for the bank's non-performance relating to the CD. In December 2009, the Company was reimbursed in full through a non-recourse assignment of the CD for face value to an unrelated party, who has other business interests with the bank. The purchaser of the CD is neither an employee nor a director of the Company.

70. GEE's Form 10-K filed on January 8, 2010 contained an audit report from BDO that stated BDO's audits were conducted "in accordance with the standards of the Public Company Accounting Oversight Board (United States)" and that GEE's financial statements presented fairly, in all material respects, the company's position and results at September 30, 2009, in conformity with GAAP.

H. IN 2010, BDO LEARNED OF FACTUAL ALLEGATIONS IN A CRIMINAL COMPLAINT AGAINST THE PAB PRESIDENT ALLEGING THAT THE PURPORTED CD DID NOT EXIST

71. On January 19, 2010, just days after BDO issued its unqualified opinion and GEE filed its 2009 Form 10-K, Henaghan sent an email to Rainis, Graul, Gerace, Hambleton, the BDO Midwest Leader, and NY Partner attaching a January 12, 2010, Grand Jury Subpoena, issued to the AC Chair seeking his appearance and production of "any and all documents relating to any account maintained at Park Avenue Bank."

72. On March 13, 2010, the United States of America filed a 44-page criminal Complaint against former PAB president Antonucci (the "Antonucci Complaint"), alleging a scheme and conspiracy involving a $6.5 million round-trip transaction in which GEE's $2.3 million was diverted as part of the conspiracy. Huff, Heineman, and Pence are referred to and identifiable as designated "co-conspirator[s] not named herein" in certain aspects of that conspiracy. The allegations in the Antonucci Complaint contained several details that indicated that GEE did not have a CD with PAB, that River Falls Financial, River Falls Investments, Oxygen, SDH, and PSQ were related parties, and that Heineman had authorized the money to be transferred to Park Avenue Insurance as part of the conspiracy, and not to purchase a CD:

- "To hide the improper diversion of GEE's funds from GEE's auditors and Board of Directors, [Antonucci] and others created a counterfeit certificate of deposit [], falsely representing that GEE's $2.3 million had been invested in a 90-day certificate of deposit at the Bank. In fact, and as [Antonucci] well knew, there was no $2.3 million CD."
- GEE's $2.3 million had been transferred to Park Avenue Insurance, which was controlled by Antonucci. According to the Bank records, Heineman authorized this transfer.
- Antonucci fraudulently signed the BDO confirmation of the $2.3 million CD, when Antonucci knew it did not exist.

The Antonucci Complaint further identified several "Oxygen-related entities" as participants in the conspiracy, including, River Falls Financial (which Pence said he owned), PSQ (Pence's entity that purchased the majority stake in GEE), and Oxygen and SDH—two companies that paid GEE purportedly under the assignment agreement with River Falls Investments (which Associate-1 said he and a Huff family trust owned). It further alleged that a group of five associates (including Huff and Pence) were listed on some of the accounts of the Oxygen-related entities, which shared a common address in Louisville, Kentucky.

73. On April 27, 2010, Henaghan sent an email attaching the Antonucci Complaint to Rainis, Graul, Gerace, Hambleton, the BDO Midwest Leader, and BDO's general counsel. Henaghan's email also attached a March 10, 2010 Grand Jury Subpoena issued to GEE, requesting (i) documents relating to Huff, Pence, Heineman, the purported CD, SDH, Oxygen, O2HR, and River Falls Financial and (ii) documents reflecting any payments to Heineman, Pence, Associate-1, or the AC Member. Henaghan further attached a client retention memo addressed to Graul, Hambleton, Gerace, the BDO Midwest Leader, and BDO's general counsel. The memo stated:

"As I believe everyone is aware, in March 2010, Charles Antonucci, the president of Park Avenue Bank was arrested related to allegations of criminal acts in his role as bank president, including signing a counterfeit CD and our confirmation when he had in fact diverted the funds for his own personal use." The memo also noted that Pence was an unnamed co-conspirator. The memo concluded that the engagement team recommended that BDO continue its relationship with GEE because, among other factors, "Pence has not been formally charged yet with any criminal wrong-doing." However, the memo did not address what impact the Antonucci Complaint's allegations might have on the representations contained in GEE's financial statements (issued two months before the complaint) concerning the purported CD.

74. On April 28, 2010, Graul responded to Henaghan's email requesting that he obtain additional information concerning certain allegations in connection with client retention concerns. Specifically, Graul indicated that Gerace had confirmed to him that "[w]hen the missing company funds were 'dribbling' in from other sources" those sources included entities linked to the conspiracy alleged in the Antonucci Complaint. Graul asked Henaghan to determine (i) whether any related party transactions might involve the entities mentioned in the complaint; (ii) who authorized the funds to be paid to GEE from the "Oxygen-related entities" River Falls Financial, SDH, and Oxygen; and (iii) whether the AC Chair and Zizza are comfortable working with Pence because "the preponderance of the accusations seem pretty bad for Mr. Pence." Hambleton responded to all, stating: "I agree with [Graul]. It seems there are more potential connections here." However, neither Graul, Hambleton, Gerace, nor Rainis ever followed up with Henaghan to learn whether he had identified those "potential connections."

75. In a May 25, 2010, email, Henaghan told Zizza that he would like to discuss certain issues regarding the Antonucci Complaint. Henaghan wrote that he wanted to discuss the allegations that "Pence purchased a 25% interest in Bedford Consulting from Antonucci for $6.5 million in what the complaint describes as an 'artifice designed to cover up the true source of the $6.5 million.'" Henaghan also wrote: "The Complaint indicates that River Falls is owned by Pence, [Associate-1], and Heineman. All previous information disclosed to us by Heineman and Pence indicated that Pence owned 100% of River Falls." He further noted that the Complaint indicated that PSQ borrowed money from River Falls to buy the GEE shares. Henaghan's email to Zizza did not address the allegations in the Antonucci Complaint denying the existence of the purported CD or indicating related party issues concerning the funds received by the "Oxygen-related entities."

76. On June 1, 2010, in connection with the allegations contained in the Antonucci Complaint, an Assistant United States Attorney for the Southern District of New York interviewed Henaghan in detail about BDO's 2009 audit, including the information BDO received about the ownership structures of River Falls Financial, River Falls Investments, WTS, On-Site, Oxygen, and AIR.

77. Other than Henaghan's single discussion with Pence (who denied the allegations) and further communications with Zizza (who stated that he still trusted Pence), BDO did not perform any additional procedures specific to the allegations in the Antonucci Complaint concerning GEE, its chairman and former CEO, or the purported CD. BDO's workpapers do not

include any information about what BDO did to investigate the allegation that PAB records indicated that Heineman authorized the transfer of $2.3 million to Park Avenue Insurance. BDO's workpapers also do not include any analysis of the impact on GEE's financial statements if Heineman had conspired with Antonucci to steal GEE's $2.3 million, by authorizing the transfer of the money to Antonucci's company, Park Avenue Insurance, as alleged in the Antonucci Complaint. The workpapers do not include an analysis of whether the assignment agreement with River Falls Investments, in which GEE received $2.3 million from SDH, Oxygen, or River Falls Financial, was a related party transaction. In fact, Henaghan did not document any answers he received pursuant to his discussions with Pence or Zizza. Moreover, the client retention memo and "matters for reviewer concern" memo retained in the workpapers for the 2010 audit make no reference to the Antonucci Complaint or guilty plea.

78. In October 2010, Antonucci pled guilty to multiple criminal charges in a criminal information, including securities fraud, bank bribery, and embezzlement of bank funds. As part of his guilty plea, Antonucci admitted that he and his co-conspirators caused GEE to use $2.3 million of its funds to make PAB whole on a loan PAB made to a company controlled by his co-conspirators that had gone bankrupt, that the purported CD had never existed, and that he had signed a false confirmation that the bank had issued a CD to GEE that he then sent to BDO. BDO learned of this guilty plea shortly thereafter.

79. BDO also learned, through GEE's November 2010 Form 8-K filing and publicly available information, that Pence purportedly sold PSQ to a person associated with Huff ("Associate-2"). After Associate-2 became the majority owner of GEE, a BDO senior manager on the GEE audit noted that Google showed that Associate-2 was connected to O2HR, Huff, and Associate-1. According to the Form 8-K, Associate-2 paid nothing for PSQ; he just assumed promissory notes issued by Pence to AIR for approximately $3 million, which funded PSQ's purchase of the majority of GEE shares in July 2009. Associate-1 had previously informed Henaghan in a December 21, 2009 email that AIR had "investments received and invested in" River Falls Investments, the entity that purchased the purported CD from GEE.

80. Despite all of these additional indications of affiliation among AIR, River Falls Investments, River Falls Financial, Pence, Associate-1, and Huff, BDO did not perform additional audit procedures in 2010 to determine whether the purported purchase by River Falls Investments of the purported CD from GEE (i) was fairly characterized in GEE's financial statements or (ii) should have been identified as a related party transaction in GEE's financial statements. Instead, BDO relied on GEE management and director representations that there were no undisclosed related party transactions. BDO also relied on Associate-1's representations although, as Graul acknowledged to Gerace and Henaghan on August 10, 2010: "Anything and everything that involves [Associate-1] should be scrutinized carefully . . . [Associate-1] is not to be trusted and everyone on the engagement should be made aware of this."

81. GEE's Form 10-K filed on December 28, 2010, for its fiscal year ended September 30, 2010, classified the $2.3 million CD as a cash equivalent as of September 30, 2009, included a similar disclosure as the disclosure in the Form 10-K filed in January 2010:

In November 2009, the Company discovered that it did not receive the proceeds from a bank for a $2,300,000 certificate of deposit that was scheduled to mature in October 2009. Although the Company made a formal inquiry of the bank, it did not receive an adequate explanation for the bank's non-performance related to the deposit. In December 2009, the Company entered into an agreement to assign its interests in the certificate of deposit, without recourse, to an unrelated party that has other business interests with the bank, and the Company was reimbursed for the face value of the deposit.

82. GEE's Form 10-K filed on December 28, 2010, as amended on April 15, 2011, contained an audit report from BDO that stated BDO's audits were conducted in accordance with PCAOB standards and that GEE's financial statements presented fairly, in all material respects, the company's position and results at September 30, 2010 and 2009, in conformity with GAAP.

I. VIOLATIONS

RULE 102(e) AND SECTION 4C OF THE EXCHANGE ACT

83. BDO's 2009 and 2010 audits were deficient and not performed in accordance with PCAOB standards.[7] Section 4C(b) and Rule 102(e)(1)(iv) define improper professional conduct with respect to persons licensed to practice as accountants. Pursuant to these provisions, "improper professional conduct" includes two types of negligent conduct: (1) a single instance of highly unreasonable conduct that results in a violation of professional standards in circumstances in which heightened scrutiny is warranted; or (2) repeated instances of unreasonable conduct, each resulting in violations of professional standards, that indicate a lack of competence.

84. As set forth above, BDO knew or should have known facts that cast substantial doubt on the existence of the purported CD given, among other things, (1) significant integrity issues with Heineman, the person who claimed to have authorized the investment, and Associate-1, the person with whom Heineman purportedly "negotiated" the assignment agreement; (2) PAB had told GEE that it had no record of the purported CD; and (3) PAB had provided GEE and BDO with documentation showing the $2.3 million actually had been transferred to Park Avenue Insurance on July 23, 2009.

85. BDO also knew or should have known that the circumstances presented by the purported $2.3 million CD that was not honored by PAB, the subsequent receipt by GEE of $2.3 million from River Falls Financial, SDH, and Oxygen, and the purported assignment agreement with River Falls Investments warranted heightened scrutiny. Notwithstanding the many red flags concerning the purported CD and the assignment agreement discussed above, BDO issued audit reports in both 2009 and 2010 containing unqualified opinions that were filed with GEE's financial

[7] References to auditing standards in this Order are to PCAOB standards in effect at the time the audit work was performed.

statements in the Form 10-Ks. In those reports, BDO inaccurately stated that the audit had been conducted in accordance with PCAOB standards and that GEE's financial statements presented fairly, in all material respects, the company's position and results in conformity with GAAP.

Failed to exercise due professional care and an attitude of professional skepticism (AU § 230)

86. PCAOB standards require auditors to exercise due professional care in the planning and performance of the audit and the preparation of the report. (AU § 230.01) Auditors must maintain an attitude of professional skepticism, which includes "a questioning mind and a critical assessment of audit evidence." (AU § 230.07) In addition, the auditor should "consider the competency and sufficiency of the evidence. Since evidence is gathered and evaluated throughout the audit, professional skepticism should be exercised throughout the audit process." (AU § 230.08) The Commission and courts have held that related party transactions require heightened scrutiny.[8]

87. As a result of BDO's conduct described above, BDO failed to exercise due professional care and an attitude of professional skepticism in its 2009 and 2010 audits of GEE.

Failed to obtain sufficient competent evidential matter concerning the purported CD (AU §§ 326 and 333)

88. PCAOB standards require auditors to obtain sufficient competent evidential matter to afford a reasonable basis for an opinion with respect to the financial statements under audit. To be "competent," evidence "must be both valid and relevant." (AU § 326.21) "The amount and kinds of evidential matter required to support an informed opinion are matters for the auditor to determine in the exercise of his or her professional judgment after a careful study of the circumstance in the particular case." (AU § 326.22) This includes evaluating the reliability of the evidence,[9] and weighing all of the evidence obtained. The validity and sufficiency of required evidence depends on the circumstances and the auditors' judgment, but should be "persuasive" though it need not be "convincing." (AU § 326.22)

89. PCAOB standards also provide that management representations "are not a substitute for the application of th[e] auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit," that "the auditor obtains written representations from management to complement other auditing procedures," and that "[i]n

[8] *See McCurdy v. SEC*, 396 F.3d 1258, 1261 (D.C. Cir. 2005) (citing *Howard v. SEC*, 376 F.3d 1136, 1149 (D.C. Cir. 2004)) (noting that related party transactions "are viewed with extreme skepticism in all areas of finance").

[9] AU § 330.33: "the auditor should consider (a) the reliability of the confirmations . . ."

exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest." (AU §§ 333.02, 333.03, 230.09)[10]

90. As a result of BDO's conduct described above, BDO failed to obtain sufficient evidence supporting assertions in GEE's 2009 and 2010 Form 10-K financial statements that the purported CD existed and was a cash equivalent as of September 30, 2009, and that GEE entered into an assignment agreement with an unrelated party.[11]

Failed to determine whether fraud or potential illegal acts may have impacted GEE's fiscal year 2009 and 2010 financial statements (AU §§ 316, 317)

91. Under AU § 316.01, an auditor must plan and perform an audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. The auditors must brainstorm "how and where they believe the entity's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated." (AU § 316.14) AU § 316.06 states that there are "[t]wo types of misstatements relevant to the auditor's consideration of fraud—misstatements arising from fraudulent financial reporting and misstatements arising from misappropriation of assets." It explains that financial reporting may be accomplished by falsification of supporting documentation, or misrepresentations of events, transactions, or other significant information. It further instructs that fraudulent financial reporting "need not be the result of a grand plan or conspiracy" and may instead "be that management representatives rationalize the appropriateness of a material misstatement ... as a temporary misstatement of financial statement ... expected to be corrected later." It instructs that that misappropriation of assets may be accompanied by "false or misleading records or documents, possibly created by circumventing controls." AU § 316.09 also notes that management engaged in fraud will take steps to conceal the fraud from auditors. AU § 316.10 further states that fraud may be concealed through collusion among management and third parties. For these reasons, AU § 316.13 requires auditors to exercise professional skepticism when considering the risk of material misstatement due to fraud.

92. AU § 316.68 lists conditions that may be identified during the fieldwork that are indicators of potential fraud, including (i) unsupported or unauthorized balances or transactions; (ii) missing documents; (iii) unusual discrepancies between the entity's records and confirmation replies; (iv) inconsistent, vague or implausible responses from management or employees; and

[10] AU § 508.20 also provided that "[c]ertain circumstances may require a qualified opinion ... [when] "[t]here is a lack of sufficient competent evidential matter or there are restrictions on the scope of the audit that have led the auditor to conclude that he or she cannot express an unqualified opinion...."

[11] In addition, AS § 3.12 required BDO to "document significant audit findings or issues, actions taken to address them (including additional evidence obtained), and the basis for the conclusions reached." BDO failed to comply with this documentation requirement with respect to each of the major auditing issues encountered during the 2009 and 2010 audits.

(v) denial of access to records, facilities, certain employees, customers, vendors or others from whom audit evidence might be sought.

93. AU § 317.10 notes that auditors may become aware of possible illegal acts during the course of their audit: "When the auditor becomes aware of information concerning a possible illegal act, the auditor should obtain an understanding of the nature of the act, the circumstances in which it occurred and sufficient other information to evaluate the effect on the financial statements."

94. As a result of BDO's conduct described above, BDO failed to adhere to these PCAOB standards during its 2009 or 2010 audits of GEE.

Failed to obtain sufficient audit evidence to determine whether the assignment agreement was a related party transaction (AU §§ 326 and 334)

95. PCAOB standards require that "[an] auditor should view related party transactions within the framework of existing [accounting] pronouncements, placing primary emphasis on the adequacy of disclosure. In addition, the auditor should be aware that the substance of a particular transaction could be significantly different from its form and that the financial statements should recognize the substance of particular transactions rather than merely their legal form." (AU § 334.02)

96. PCAOB standards require an auditor to obtain sufficient competent evidential matter to afford a reasonable basis for an opinion regarding the financial statements under audit. (AU § 326.01) In selecting particular substantive tests to achieve the audit objectives, an auditor considers, among other things, the risk of material misstatement of the financial statements. (AU § 326.11) With respect to related party transactions, PCAOB standards require that after an auditor identifies related party transactions, he or she should apply the procedures considered necessary to obtain satisfaction concerning their purpose, nature, and extent and their effect on the financial statements. (AU § 334.09) For each related party transaction for which disclosure is required, PCAOB standards require that the auditor satisfy himself that the transaction is adequately disclosed in the financial statements. (AU § 334.11)

97. The failure to disclose the assignment agreement as a related party transaction caused the financial statements to be misleading. Financial Accounting Standards Board Accounting Standards Codification ("ASC") Topic 850, *Related Party Disclosures* required that the following must be disclosed concerning related party transactions: (a) the nature of the relationship involved; (b) a description of the transaction; (c) the dollar amount of the transaction; and (d) amounts due from or to related parties and, if not otherwise apparent, the terms and manner of settlement. Related party transactions cannot be presumed to have been conducted at arm's-length. GAAP requires these disclosures so the reader can be alerted to their existence, so as to help the reader of the financial statements detect and explain possible differences in financial

statements of a company that engaged in related party transactions to those that did not.[12] Such disclosure helps the reader evaluate the substance of the related party transaction.

98. As a result of BDO's above-described conduct, BDO failed to exercise the requisite level of care, failed to perform sufficient procedures to identify related party transactions, failed to obtain sufficient audit evidence to determine whether the assignment agreement was a related party transaction during its 2009 or 2010 audits of GEE, and failed to follow up on evidence indicating that assertions regarding the purported CD and assignment agreement were unsubstantiated. BDO also failed to ensure the issuance of an accurate audit report in 2009 and 2010, which misrepresented that GEE's financial statements were presented fairly, in all material respects, in accordance with GAAP.

Failed to Investigate Newly Discovered Facts in 2010 (AU § 561)

99. AU § 561.04 states that when an auditor becomes aware of information that he would have investigated if it had come to his attention during the course of the audit, he must determine if the information is reliable and whether the facts existed at the date of his report. If the information is reliable and existed at the date of the report, the auditor must determine if his report would have been affected and people relying on the financial statements would find it important. (AU § 561.05.)

100. As a result of BDO's conduct described above, BDO failed to adhere to this PCAOB Standard after learning of, among other things, the Antonucci Complaint in March 2010 and subsequent guilty plea in October 2010, as it concerned GEE's 2009 financial statements.

Finding

101. As a result of the conduct described above, the Commission finds that BDO engaged in improper professional conduct within the meaning of Sections 4C(a)(2), 4C(b)(2)(A), and 4C(b)(2)(B) of the Exchange Act and Rules 102(e)(1)(ii), 102(e)(1)(iv)(B)(1), and 102(e)(1)(iv)(B)(2) of the Commission's Rules of Practice. BDO's conduct in the 2009 and 2010 audits of GEE involved repeated instances of unreasonable conduct, each resulting in violations of PCAOB standards and indicating a lack of competence, and also satisfies the standard of highly unreasonable conduct resulting in violations of PCAOB standards in circumstances in which heightened scrutiny was warranted.

BDO VIOLATED SECTION 10A OF THE EXCHANGE ACT

102. Section 10A(a)(1) of the Exchange Act requires each audit conducted of an issuer by a registered public accounting firm to include "procedures designed to provide reasonable assurance of detecting illegal acts that would have a direct and material effect on the determination of financial statement amounts." Section 10A(a)(2) of the Exchange Act requires

[12] ASC 850-10-05-2.

each audit conducted of an issuer by a registered public accounting firm to include "procedures designed to identify related party transactions that are material to the financial statements or otherwise require disclosure therein." Section 10A(b)(1) requires a registered public accounting firm to, in accordance with PCAOB standards, "determine whether it is likely that an illegal act has occurred" if the firm "detects or otherwise becomes aware of information indicating that an illegal act (whether or not perceived to have a material effect on the financial statements of the issuer) has or may have occurred." No showing of scienter is necessary to establish a violation of Section 10A. *See SEC v. Solucorp Indus.*, Ltd., 197 F. Supp. 2d. 4, 10-11 (S.D.N.Y. 2002).

103. In connection with the 2009 and 2010 GEE audits, BDO violated Section 10A(a)(1) of the Exchange Act by failing to plan, design, and carry out audit procedures to provide reasonable assurance of detecting illegal acts that would have a direct and material effect on the determination of financial statements amounts.

104. In connection with the 2009 and 2010 GEE audits, BDO violated Section 10A(a)(2) of the Exchange Act by failing to plan, design, and carry out audit procedures to identify GEE's material related party transactions that required disclosure in the financial statements.

105. In connection with the 2009 and 2010 GEE audits, BDO violated Section 10A(b)(1) of the Exchange Act by failing to determine whether it was likely that an illegal act had occurred after BDO was made aware of information indicating that an illegal act may have occurred.

106. As a result of the conduct described above, the Commission finds that BDO violated Sections 10A(a)(1), (a)(2), and (b)(1) of the Exchange Act.

BDO WAS A CAUSE OF VIOLATIONS OF SECTION 13(a) OF
THE EXCHANGE ACT AND RULE 13a-1 THEREUNDER

107. Section 13(a) of the Exchange Act and Rule 13a-1 thereunder require that every issuer of a security registered pursuant to Section 12 of the Exchange Act file with the Commission annual reports (i.e., Form 10-K) as the Commission may require, and mandate that periodic reports contain such further material information as may be necessary to make the required statements not misleading. The obligation to file such reports embodies the requirement that they be true and correct.

108. GEE's annual reports on Form 10-K for fiscal years 2009 and 2010 included audit reports from BDO that stated BDO's audits were conducted "in accordance with the standards of the Public Company Accounting Oversight Board (United States)" and that GEE's financial statements presented fairly, in all material respects, the company's position and results. These statements were materially misleading. As a result of BDO's above-described conduct, BDO's 2009 and 2010 audits were not conducted in accordance with PCAOB standards and the financial statements included in GEE's 2009 and 2010 Form 10-Ks were materially misstated because, among other things, they incorrectly represented GEE had a $2.3 million CD and classified it as a

cash equivalent as of September 30, 2009, and did not disclose the assignment agreement as a related party transaction, contrary to GAAP. At a minimum, BDO knew or should have known that its unreasonable conduct would contribute to GEE's filing of inaccurate 2009 and 2010 Form 10-Ks.

109. As a result of the conduct described above, the Commission finds that BDO was a cause of GEE's violations of Section 13(a) of the Exchange Act and Rule 13a-1 thereunder.

J. UNDERTAKINGS

110. BDO's Review. Within one hundred and twenty days after the entry of this Order, BDO shall perform and complete a review and evaluation ("BDO's Review") of the sufficiency and adequacy of BDO's quality controls set forth in its audit manual, including its policies and procedures set forth therein for audit and interim review procedures, regarding the following (hereinafter referred to as "BDO's Policies"):

(i) client acceptance and retention;

(ii) the exercise of due professional care and professional skepticism (as set forth in AU § 230);

(iii) the identification and consideration of disclosures of related parties and related party transactions (as set forth in Auditing Standard No. 18 and AU § 334);

(iv) fraud detection (as set forth in AU § 316);

(v) compliance with the requirements of AU § 317, including the identification of "illegal acts" as defined in AU § 317.02: "Illegal acts by clients are acts attributable to the entity whose financial statements are under audit or acts by management or employees acting on behalf of the entity. Illegal acts by clients do not include personal misconduct by the entity's personnel unrelated to their business activities";

(vi) compliance with Section 10A of the Securities Exchange Act of 1934, including designing procedures to provide reasonable assurance of detecting illegal acts that would have a direct and material effect on the determination of financial statement amounts, and to comply with all requirements under the standards of the Commission, the PCAOB, and Section 10A to evaluate and report suspected illegal acts;

(vii) obtaining sufficient appropriate audit evidence (as set forth in Auditing Standard No. 15);

(viii) evaluation of and reliance upon management representations (as set forth in AU § 333);

(ix) third-party confirmations (as set forth in AU § 330), including evaluating the results of the confirmation procedures in accordance with AU § 330.33, "In performing that evaluation, the auditor should consider (a) the reliability of the confirmations and alternative procedures; (b) the nature of any exceptions, including the implications, both quantitative and qualitative, of those exceptions; (c) the evidence provided by other procedures; and (d) whether additional evidence is needed."

(x) consultations with local, regional or national office technical oversight professionals;

(xi) adequate audit documentation, including work paper sign-off, archiving, and dating (as set forth in Auditing Standard No. 3);

(xii) document retention; and

(xiii) the response to the discovery of new facts subsequent to the issuance of audit report (as set forth in AU § 561).

BDO's Review shall assess the forgoing areas to determine whether BDO's Policies are adequate and sufficient to provide reasonable assurance of compliance with all relevant Commission regulations and PCAOB standards and rules.

111. <u>BDO Report.</u> Within sixty days of completing the BDO Review, BDO shall deliver to the Commission staff a detailed written report ("BDO Report") summarizing its review and changes to BDO's Policies, if any, to provide reasonable assurance of compliance with all relevant Commission regulations and PCAOB standards and rules. The BDO Report shall identify the undertaking, provide written evidence of compliance in the form of a narrative, and be supported by exhibits sufficient to demonstrate compliance. The Commission staff may make reasonable requests for further evidence of compliance, and BDO agrees to provide such evidence.

112. <u>Independent Consultant's Review.</u> BDO has undertaken to retain, within one hundred and eighty days after the entry of this Order, an independent consultant ("Independent Consultant"), not unacceptable to the Commission staff. BDO shall provide to the Commission staff a copy of the engagement letter detailing the scope of the Independent Consultant's responsibilities. The Independent Consultant's compensation and expenses shall be borne exclusively by BDO. BDO shall deliver to the Independent Consultant the BDO Report at the same time as BDO provides such report to the Commission staff as specified in paragraph 111 above. BDO shall require that the Independent Consultant perform a review (the "IC Review") of BDO's Policies to determine whether BDO's Policies are adequate and sufficient to provide reasonable assurance of compliance with all relevant Commission regulations and PCAOB standards and rules. BDO shall cooperate fully with the Independent Consultant and shall provide reasonable access to firm personnel, information, and records as the Independent Consultant may reasonably request for the IC Review (including training materials pertaining to the undertaking in paragraph 116), subject to BDO's right to withhold from disclosure any information or records protected by any applicable protection or privilege such as the attorney-client privilege or the attorney work product doctrine.

113. Independent Consultant's Report. After the IC Review is completed, but no later than ninety days after receiving the BDO Report, the Independent Consultant shall issue a detailed written report (the "IC Report") to BDO: (a) summarizing the IC Review; and (b) making recommendations, where appropriate, reasonably designed to ensure that BDO's Policies are adequate and sufficient to provide reasonable assurance of compliance with all relevant Commission regulations and PCAOB standards and rules. BDO shall require the Independent Consultant to provide a copy of the IC Report to the Commission staff and the PCAOB staff when the IC Report is issued.

114. BDO shall adopt, as soon as practicable, all recommendations of the Independent Consultant in the IC Report. Provided, however, that within thirty days of issuance of the IC Report, BDO may advise the Independent Consultant in writing of any recommendation that it considers to be unnecessary, outside the scope of this Order, unduly burdensome, or impractical. BDO need not adopt any such recommendation at that time, but instead may propose in writing to the Independent Consultant and the Commission staff an alternative policy or procedure designed to achieve the same objective or purpose. BDO and the Independent Consultant shall engage in good-faith negotiations in an effort to reach agreement on any recommendations objected to by BDO. In the event that the Independent Consultant and BDO are unable to agree on an alternative proposal within sixty days, BDO shall abide by the determinations of the Independent Consultant.

115. Certification by BDO's CEO. Within sixty days of issuance of the IC Report, but not sooner than thirty days after a copy of the IC Report is provided to the Commission staff, BDO's chief executive officer ("CEO") must certify to the Commission staff in writing that (i) BDO has adopted and has implemented or will implement all recommendations of the Independent Consultant, if any; and (ii) the Independent Consultant agrees with BDO's adoption and implementation of the recommendations. To the extent that BDO has not implemented all recommendations of the Independent Consultant within sixty days of issuance of the IC Report, BDO's CEO must certify to the Commission staff in writing, thirty days after their implementation, that (i) BDO has adopted and has implemented all recommendations of the Independent Consultant; and (ii) the Independent Consultant agrees that the recommendations have been adequately adopted and implemented by BDO. The certifications by BDO's CEO shall identify the undertakings, provide written evidence of compliance in the form of a narrative, and be supported by exhibits sufficient to demonstrate compliance. The Commission staff may make reasonable requests for further evidence of compliance, and BDO agrees to provide such evidence.

116. Undertakings Regarding Audit Training. Prior to September 30, 2016, BDO shall require each audit professional serving public company audits to complete successfully:

a. A Minimum of 24 Hours of Audit-Related Training. The audit-related training requirement shall cover the topics specified in paragraph 110(i)-(xiii). A minimum of four hours must be allocated to each of these two topics: (i) potential illegal acts and Section 10A of the Exchange Act, and (ii) identification and disclosure of related party transactions. The audit-related training requirement may be fulfilled by completing course(s) conducted in accordance with the applicable state boards of accountancy.

b. <u>A Minimum of 8 Hours of Fraud-Detection Training</u>. BDO shall ensure that audit professionals assigned to public company engagements undergo fraud detection training. The training shall include techniques in detecting and responding to possible fraud in the course of public company audits by audit clients or by employees, officers or directors of audit clients.

117. To ensure the independence of the Independent Consultant, BDO: (1) shall not have the authority to terminate the Independent Consultant or substitute another independent compliance consultant for the initial Independent Consultant, without the prior written approval of the Commission staff; and (2) shall compensate the Independent Consultant and persons engaged to assist the Independent Consultant for services rendered pursuant to this Order at their reasonable and customary rates.

118. BDO shall require the Independent Consultant to enter into an agreement that provides that, for the period of engagement and for a period of two years from completion of the engagement, the Independent Consultant shall not enter into any employment, consultant, attorney-client, auditing or other professional relationship with BDO, or any of its present or former affiliates, directors, officers, employees, or agents acting in their capacity as such. The agreement shall also provide that the Independent Consultant will require that any firm with which he/she is affiliated or of which he/she is a member, and any person engaged to assist the Independent Consultant in performance of his/her duties under this Order shall not, without prior written consent of the Division of Enforcement, enter into any employment, consultant, attorney-client, auditing or other professional relationship with BDO, or any of its present or former affiliates, directors, officers, employees, or agents acting in their capacity as such for the period of the engagement and for a period of two years after the engagement.

119. BDO shall not be in, and shall not have an attorney-client relationship with the Independent Consultant and shall not seek to invoke the attorney-client privilege or any other doctrine or privilege to prevent the Independent Consultant from transmitting any information, reports, or documents to Commission staff.

120. BDO shall inform its audit professionals of the terms of the Order within ten business days after entry of the Order.

121. By December 31, 2016, BDO's CEO shall certify, in writing, compliance with the undertakings set forth in paragraphs 116 and 120. The certification shall identify the undertakings, provide written evidence of compliance in the form of a narrative, and be supported by exhibits sufficient to demonstrate compliance. The Commission staff may make reasonable requests for further evidence of compliance, and BDO agrees to provide such evidence.

122. <u>Annual Certifications.</u> With respect to each of the calendar year periods 2017 and 2018, BDO's chief compliance officer ("CCO") shall certify that BDO has assessed whether BDO's Policies are adequate and sufficient to provide reasonable assurance of compliance with all relevant Commission regulations and PCAOB standards and rules by, among other things, testing the firm's implementation of BDO's Policies during the twelve (12) months preceding the certification ("Annual Certification"). The Annual Certification shall describe the nature and

scope of BDO's testing. The Annual Certification shall represent that the CCO has reviewed and evaluated the firm's assessment and testing process and that, based on belief and after reasonable inquiry, the CCO believes that BDO's Policies are adequate and sufficient to provide reasonable assurance of compliance with all relevant Commission regulations and PCAOB standards and rules. If the CCO cannot represent that BDO's Policies are adequate and sufficient, then the CCO shall describe in reasonable detail the reasons for the inability to so certify. The CCO shall provide the Annual Certifications to the Commission's staff within sixty days of the end of the annual period. BDO shall preserve and retain all documentation regarding the CCO's Annual Certification for seven (7) years and will make it available to the staffs of the Commission or the PCAOB upon request.

123. All reports and certifications mentioned in these undertakings shall be submitted to Wendy Tepperman, Assistant Regional Director, Division of Enforcement, Securities and Exchange Commission, 200 Vesey Street, New York, NY 10281, with a copy to the Office of Chief Counsel of the Enforcement Division.

124. For good cause shown, the Commission staff may extend any of the procedural dates relating to the undertakings. Deadlines for procedural dates shall be counted in calendar days, except that if the last day falls on a weekend or federal holiday, the next business day shall be considered to be the last day.

125. In determining whether to accept BDO's Offer, the Commission has considered these undertakings. BDO agrees that if the Division of Enforcement believes that BDO has not satisfied these undertakings, it may petition the Commission to reopen the matter to determine whether additional sanctions are appropriate.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in the Respondent's Offer.

Accordingly, it is hereby ORDERED that:

A. Pursuant to Section 21C of the Exchange Act, BDO shall cease and desist from committing or causing any violations and any future violations of Sections 10A and 13(a) of the Exchange Act and Rule 13a-1 thereunder.

B. BDO is censured.

C. BDO shall comply with the undertakings enumerated in Section III.J. above.

D. BDO shall within 14 days of the entry of this Order, pay disgorgement of \$536,000 and prejudgment interest of \$76,000, to the Commission for transfer to the general fund of the United States Treasury in accordance with Exchange Act Section 21F(g)(3). If timely payment is not made, additional interest shall accrue pursuant to SEC Rule of Practice 600.

E. BDO shall within 14 days of the entry of this Order, pay a civil money penalty of $1,500,000 to the Commission for transfer to the general fund of the United States Treasury in accordance with Exchange Act Section 21F(g)(3). If timely payment is not made additional interest shall accrue pursuant to 31 U.S.C. § 3717.

F. Payments ordered in paragraphs D and E above must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying BDO as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Timothy Casey, New York Regional Office, Securities and Exchange Commission, 200 Vesey Street, New York, NY 10281-1022.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. § 523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or other amounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. § 523(a)(19).

By the Commission.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75868 / September 9, 2015

Admin. Proc. File No. 3-16209

In the Matter of the Application of

WD CLEARING, LLC, a Nevada limited liability company; WDMC TRUST d/t/d SEPTEMBER 18, 2013; WDJJ TRUST d/t/d SEPTEMBER 18, 2013; WDCHUM TRUST d/t/d SEPTEMBER 18, 2013; and WDPOP TRUST d/t/d SEPTEMBER 18, 2013

For Review of Action Taken by

Financial Industry Regulatory Authority

ORDER DISMISSING APPLICATION FOR REVIEW

WD Clearing, LLC, et al. ("WD Clearing")[1] requests that we review the September 17, 2014 decision of FINRA member Wilson-Davis & Co., Inc. ("Wilson-Davis" or the "Firm")[2] to withdraw its continuing membership application ("CMA") requesting approval of the Firm's change in ownership, pursuant to which Wilson-Davis would be owned by WD Clearing. WD Clearing asserts that Wilson-Davis's email withdrawing its CMA was a "*de facto* denial of the CMA" by FINRA because Wilson-Davis's email apparently was precipitated by FINRA's warning to Wilson-Davis of a potential impediment to FINRA's approval of the CMA.

WD Clearing contends that FINRA's actions denied it membership, prohibited or limited its access to FINRA's services, and barred it from associating with a FINRA-member firm within the meaning of Section 19(d) of the Securities Exchange Act of 1934.[3] It also contends that it has standing to challenge FINRA's actions as a "person aggrieved" within the meaning of Exchange

---

1 Petitioners include WD Clearing, Inc., WDMC Trust d/t/d September 18, 2013, WDJJ Trust d/t/d September 18, 2013, WDCHUM Trust d/t/d September 18, 2013, and WDPOP Trust d/t/d September 13, 2013.

2 Wilson-Davis became a FINRA member firm in 1968. The Firm is headquartered in Salt Lake City, Utah, and conducts a general securities business.

3 *See* 15 U.S.C. § 78s(d)(1).

Act Section 19(d)(2) because it had entered into a securities purchase agreement with Wilson-Davis to purchase the firm, contingent on FINRA's approval of the CMA.[4] We conclude that we lack jurisdiction to entertain this challenge because Wilson-Davis withdrew its CMA before FINRA issued a final decision on the matter. As a result, there is no FINRA action for us to review. We thus dismiss WD Clearing's application and find it unnecessary to address whether WD Clearing has standing under Section 19(d)(2).

I. Background

A. FINRA rules require a member firm to file an application requesting approval of a change in its ownership or control prior to any such change.

Before a member firm may effect a change in ownership or control, it must file a CMA with FINRA seeking approval of the change.[5] An applicant for a change in ownership or control bears the burden of establishing the merits of its application—specifically, that it and its "Associated Persons" will continue to meet each of the fourteen standards for membership set forth in NASD Rule 1014(a) upon approval of the application.[6] During its review, FINRA may place interim restrictions on the applicant based upon those standards, including an interim restriction that prohibits the deal from closing.[7]

B. Wilson-Davis granted nonmember WD Clearing the right to purchase its outstanding stock in exchange for financing and agreed to seek approval from FINRA of the change in ownership.

In April 2013, to satisfy short-term cash requirements, Wilson-Davis borrowed $4 million from John Hurry, a director of Alpine Securities Corporation and Scottsdale Capital Advisors,[8]

4 *See id.* § 78s(d)(2).

5 NASD Rule 1017(a).

6 *See id.* (h)(1)(a); *see also* NASD Rule 1014(a).

7 NASD Rule 1017(c)(1); *see also* NASD Membership Application Rules, 2002 WL 1966444, at *4 n.2 (Aug. 15, 2002) ("As with other Rule 1017 applications, Rule 1017(c)(1) allows NASD to place interim restrictions on any asset transfer if NASD believes that the application does not meet Rule 1014 standards. These interim restrictions are meant for the protection of investors and ordinarily would not prevent a transaction from moving forward. However, there may be some instances where the protection of investors will require that interim restrictions will prohibit or delay a transaction from closing."); FINRA, Filing a Change in Membership Application at 3, *available at* http://www.finra.org/sites/default/files/Education/p018711.pdf ("[T]he firm can make the ownership change any time after the 30 days has passed—so long as the firm isn't under an interim restriction that prohibits the deal closing prior to FINRA approval.").

8 The Hurry Family Revocable Trust owns Alpine Securities and Scottsdale Capital, two FINRA member firms.

pursuant to a financing agreement which granted Hurry, or his assignees, the right to purchase the Firm's outstanding stock. On December 2, 2013, Wilson-Davis and Hurry's assignees (known collectively as WD Clearing)[9] entered into an agreement to effectuate the purchase. The securities purchase agreement required Wilson-Davis to seek approval from FINRA of the anticipated change in ownership by submitting a CMA in accordance with NASD Rule 1017.

C. Wilson-Davis filed an application with FINRA requesting approval of its change in ownership, pursuant to which Wilson-Davis would be owned by WD Clearing.

On February 24, 2014, FINRA accepted Wilson-Davis's CMA requesting approval of the Firm's change in ownership.[10] The CMA indicated that Hurry, as manager of WD Clearing, would become associated with Wilson-Davis as an owner. The CMA further stated that Hurry, through the Hurry Family Revocable Trust, was the source of funding for the purchase of Wilson-Davis, and that Hurry could and would provide any additional funding necessary to meet the Firm's net capital requirements.

D. FINRA discovered information indicating Hurry might not be capable of complying with federal securities laws, the rules and regulations thereunder, or NASD Rules.

In a letter dated February 25, 2014, FINRA notified Wilson-Davis that, pursuant to NASD Rule 1017(c), interim restrictions would be placed on the Firm to ensure that investors were protected during the pendency of the CMA review process. The letter provided that "effective immediately," the Firm was prohibited from:

- Effecting any portion of the aforementioned ownership change transaction, including unapproved individuals or entities acting in any capacity that would suggest that they are approved direct and/or indirect owners of the Firm, and
- Permitting any trustee, grantor, or beneficiary of the trusts—including, but not limited to, Mr. Hurry—to act in any principal, supervisory or control capacity.

FINRA attributed the restrictions to its ongoing investigation into whether the Firm would continue to meet the standards in NASD Rule 1014 if the change in ownership was approved. In particular, the letter alerted the Firm that FINRA had "identified an article relating to an investigation involving Scottsdale Capital and Alpine Securities, which are controlled by Mr. Hurry." Accordingly, FINRA explained that it was deepening its review into whether the proposed new owner-trusts affiliated with John Hurry "are capable of complying with the federal

---

9 WD Clearing, as defined above (*see supra* note 1), is composed of a series of trusts affiliated with Hurry, and WD Clearing, LLC, a Nevada limited liability company formed for the purpose of holding the Hurry Family Revocable Trust's investment in Wilson-Davis. Hurry, through the Hurry Family Revocable Trust, was the source of capital for WD Clearing, LLC, et al.

10 The firm submitted an initial CMA on January 22, 2014, which FINRA deemed substantially incomplete. After the Firm provided additional information on February 24, 2014, FINRA accepted the CMA as substantially complete.

securities laws, the rules and regulations thereunder, and FINRA Rules, including observing high standards of commercial honor and just and equitable principles of trade"[11] and whether the Firm, under the new ownership proposed, "may circumvent, evade or otherwise avoid compliance with the federal securities laws, the rules and regulations thereunder, and FINRA Rules."[12]

On September 12, 2014, FINRA notified Hurry and his firm, Scottsdale Capital, through a Wells Notice, that FINRA had preliminarily determined that it would bring disciplinary action against Hurry and Scottsdale Capital. Specifically, FINRA alleged that Hurry and Scottsdale Capital sold securities in potential violation of FINRA Rule 2010 and Section 5 of the Securities Act of 1933, and that Hurry, as an owner of Scottsdale Capital, aided and abetted or caused the alleged violation.

E. Wilson-Davis withdrew its application for change in ownership after learning of potential impediments to approval.

On September 15, 2014, Wilson-Davis, in a conversation with FINRA staff overseeing the Firm's CMA, learned about the Wells Notice that had been sent to Hurry. On September 17, 2014, Wilson-Davis, through counsel, sent an email to FINRA staff withdrawing its CMA. The email stated that the Firm understood that "the issues associated with the Wells [N]otice would ultimately cause FINRA to deny the CMA," and that FINRA staff had "requested that Wilson-Davis withdraw the CMA application."[13] On September 17, 2014, FINRA acknowledged the withdrawal in an email stating: "Thank you for your email. This is to confirm receipt of your request; the CMA is hereby withdrawn."

F. WD Clearing filed applications for review with the Commission.

On October 14, 2014, WD Clearing filed an application with us requesting review. Wilson-Davis did not join the application. In a letter dated October 22, 2014, we stated that the matter was "not ripe for Commission review" and rejected the application because FINRA had not entered a final decision.

On November 10, 2014, WD Clearing submitted a second application for review, which Wilson-Davis likewise did not join. On November 20, 2014, we acknowledged the application for review but stated that acceptance of the application did not "constitute a Commission

---

11 *See* NASD Rule 1014(a)(3) ("The Applicant and its Associated Persons are capable of complying with the federal securities laws, the rules and regulations thereunder, and NASD Rules, including observing high standards of commercial honor and just and equitable principles of trade.").

12 *See id.* (a)(13) ("FINRA does not possess any information indicating that the Applicant may circumvent, evade, or otherwise avoid compliance with the federal securities laws, the rules and regulations thereunder, or NASD Rules.").

13 The details of any discussions between FINRA staff members and Wilson-Davis's counsel are not in the record.

determination as to the proper statutory basis" for the application or "a prejudgment . . . pertaining to the Commission's jurisdiction to consider the matter."[14]

II. Analysis

For the reasons explained below, we conclude that FINRA's actions associated with the withdrawal of Wilson-Davis's CMA do not constitute a reviewable limitation or prohibition of access to services, and we accordingly dismiss WD Clearing's application for review.[15] We thus do not address whether WD Clearing is a person aggrieved with standing to challenge those actions.

A. The Commission lacks jurisdiction to review FINRA's preliminary consideration of Wilson-Davis's CMA.

Action by a self-regulatory organization ("SRO"), such as FINRA, "is not reviewable merely because it adversely affects the applicant."[16] Rather, there must be a statutory basis for us to exercise jurisdiction. Section 19(d) of the Exchange Act authorizes us to review an SRO action only if that action: (1) imposes a final disciplinary sanction; (2) denies membership or participation to any applicant; (3) prohibits or limits any person in respect to access to services offered by such organization or member thereof; or (4) bars any person from becoming associated with a member.[17]

WD Clearing argues that "three of these four statutory bases" provide us with jurisdiction to review FINRA's action in considering Wilson-Davis's application.[18] Because Wilson-Davis voluntarily withdrew its application before FINRA had an opportunity to complete its

---

14 Notwithstanding this cautionary language, WD Clearing incorrectly claims in its brief before us that we "agreed to consider the Petition."

15 *See Matthew Brian Proman*, Exchange Act Release No. 57740, 93 SEC 300, 2008 WL 1902072, at *1 (Apr. 30, 2008) ("If we find that we do not have jurisdiction, we must dismiss the proceeding.").

16 *Id.* at *2 (quoting *Sky Capital LLC*, Exchange Act Release No. 55828, 90 SEC 1942, 2007 WL 1559228, at *3 (May 30, 2007)).

17 15 U.S.C. § 78s(d)(1), (2). "The grounds for Commission jurisdiction enumerated in Rule 420(a) are the same as those described in Section 19(d)(1) of the Exchange Act." *Lawrence Gage*, Exchange Act Release No. 54600, 89 SEC 289, 2006 WL 2987058, at *3 (Oct. 13, 2006).

18 WD Clearing contends that FINRA denied it access to membership, limited its access to services, and barred it from associating with a FINRA-member firm. We address these contentions below. WD Clearing does not assert, nor do we find, that FINRA imposed a "final disciplinary sanction" as a basis for jurisdiction under Exchange Act Section 19(d), which occurs when an SRO imposes "a punishment or sanction" following a "determination of wrongdoing," *Morgan Stanley & Co., Inc.*, Exchange Act Release No. 39459, 53 SEC 379, 1997 WL 802072, at *2 (Dec. 17, 1997).

investigation and reach a final decision on the merits, we find that none of FINRA's actions in considering Wilson-Davis's CMA—whether viewed individually or collectively—fall within the categories subject to our review.

1. FINRA did not deny membership or participation to WD Clearing.

FINRA did not take any action regarding Wilson-Davis's CMA that qualifies as a denial of membership or participation under Exchange Act Section 19(d). This jurisdictional basis for review is directed at SRO decisions actually denying applications for membership or imposing restrictions on business activities as a condition of membership.[19] In this case, FINRA did not render any decision on the CMA or render a decision that denied, altered, or otherwise affected membership. Wilson-Davis continues to be a FINRA member, notwithstanding the withdrawal of its CMA; and WD Clearing—which has never applied for FINRA membership—remains a nonmember.[20] Even if Wilson-Davis withdrew its application in response to a request from a FINRA staff member, an informal staff request does not constitute a final decision or an official FINRA action. FINRA staff cannot force an applicant to withdraw a CMA and there is no evidence that it did so in this case. Wilson-Davis was free to decline a request to withdraw and proceed with its application process.

Nor can FINRA's actions in reviewing the CMA pursuant to its authority under NASD Rule 1017—including its imposition of interim restrictions on Wilson-Davis to address specific concerns about whether the Firm, under the proposed change in ownership, would satisfy the membership standards set forth in NASD Rule 1014(a)—be construed as a reviewable condition placed upon Wilson-Davis's membership. As we have previously held, "the requirement that SRO members comply with SRO rules does not constitute a condition on membership providing a basis for jurisdiction."[21]

NASD Rule 1014 sets forth minimum requirements that a firm, and its associated persons, must meet to qualify for FINRA membership. These standards are largely intended to ensure that

---

19 *See id.* at *3.

20 In *Beatrice J. Feins*, we addressed our jurisdiction over an appeal from a final decision of the American Stock Exchange ("Amex") prohibiting a member from transferring his Amex membership to his grandmother. Exchange Act Release No. 33374, 51 SEC 918, 1993 WL 538913, at *2 (Dec. 23, 1993). We dismissed the member's appeal for lack of jurisdiction because the member, like Wilson-Davis, had "retained his membership and all the privileges thereto." *Id.* Because "Amex treats a transferee of an existing membership as an applicant for new membership," we found that the grandmother had applied for and was denied SRO membership within the meaning of Exchange Act Section 19(d), and we accepted jurisdiction on that ground. *Id.* In contrast, WD Clearing has neither applied for nor been denied FINRA membership, and WD Clearing does not claim that FINRA treats an application for a change in ownership as a new application for membership.

21 *Gage*, 2006 WL 2987058, at *3 (rejecting argument that PHLX's rule change imposed a condition on membership).

any firm that presents itself to the investing public as a FINRA member can and will comply with the federal securities laws, the rules and regulations thereunder, and NASD Rules, "including observing the high standards of commercial honor and just and equitable principles of trade."[22] NASD Rule 1017 provides that "[i]n rendering a decision on an application for approval of a change in ownership or control, . . . [FINRA] shall determine if the Applicant would continue to meet the standards in Rule 1014(a) upon approval of the application."[23] To that end, the Rule authorizes FINRA to "place new interim restrictions on the member based on the standards in Rule 1014, pending final Department action."[24] The February 25, 2014 letter, which imposed the interim restrictions, identified specific concerns pursuant to NASD Rule 1014 that necessitated the restrictions.[25] This was a proper exercise of FINRA's authority under its rules. WD Clearing's desire for relief from the operation of the rules is not a valid jurisdictional ground for our review.[26]

2. FINRA did not prohibit or limit WD Clearing's access to services.

WD Clearing contends that FINRA "prohibited and limited" WD Clearing "from having access to services offered by FINRA" by imposing the interim restrictions on Wilson-Davis during the pendency of the CMA review process. Specifically, WD Clearing argues that "[b]ut for FINRA's unlawful 'interim restrictions,' ownership of Wilson-Davis would have been transferred to [WD Clearing] on or around April 9, 2014," and WD Clearing, "as the owners of Wilson-Davis,

---

22 NASD Rule 1014(a)(3); *see also id.* (a)(10) ("The Applicant has a supervisory system, including written supervisory procedures, internal operating procedures (including operational and internal controls), and compliance procedures designed to prevent and detect, to the extent practicable, violations of the federal securities laws, the rules and regulations thereunder, and NASD Rules."); *id.* (a)(13) ("FINRA does not possess any information indicating that the Applicant may circumvent, evade, or otherwise avoid compliance with the federal securities laws, the rules and regulations thereunder, or NASD Rules."); *id.* (a)(14) ("The application and all supporting documents are consistent with the federal securities laws, the rules and regulations thereunder, and NASD Rules.").

23 NASD Rule 1017(h)(1)(A).

24 *Id.*(c)(1); *see supra* note 7.

25 In general, the standards set forth in Rule 1014(a) are intended to ensure that members under new ownership will continue to be capable of satisfying all relevant regulatory requirements for the protection of the investing public, the securities markets, the firm, and other member firms.

26 *Gage*, 2006 WL 2987058, at *4 ("The operation of [FINRA's] rule[s] did not impose a condition on the firm's membership establishing a basis for jurisdiction because '[t]he membership of every [FINRA] member is conditioned on the member's continued compliance with [FINRA] rules.'" (quoting *Joseph Dillon & Co.*, Exchange Act Release No. 43523, 73 SEC 1662, 2000 WL 1664016, at *3 (Nov. 6, 2000))); *see also Morgan Stanley*, 1997 WL 802072, at *3 ("We conclude that the NASD's action does not constitute a denial of membership. . . . [Petitioner] is seeking relief from the operation of the rule, not from any condition imposed on its membership by the NASD.").

would then have been entitled to access services offered by FINRA, at the very least, until FINRA denied the CMA."[27]

We find that neither the interim restrictions nor any other FINRA action in considering Wilson-Davis's CMA "prohibited" or "limited" WD Clearing or Wilson-Davis within the meaning of Section 19(d).[28] The "interim restrictions" FINRA imposed on Wilson-Davis did not constitute a final disposition but were rather, as the name conveys, temporary and provisional. Those restrictions applied exclusively while the CMA was pending. Indeed, FINRA did not actually deny or reach any final disposition on the CMA because Wilson-Davis voluntarily withdrew its application from FINRA's consideration before it had the opportunity to do so, terminating both the interim restrictions and FINRA's review.[29] Given the information FINRA had discovered about Hurry and Scottsdale Capital, Wilson-Davis may have believed that its pending application would not be granted. But believing that an application will not be granted is not the same as receiving a denial. Nothing in the record suggests that FINRA required Wilson-Davis to withdraw its application. When Wilson-Davis voluntarily decided to withdraw its CMA from consideration—whatever its reasons—FINRA had not yet taken any action to limit or prohibit access to its services.[30]

---

27 In other words, WD Clearing argues that Wilson-Davis's CMA automatically entitled it to "at the very least" temporary FINRA membership irrespective of whether it, or its associated persons, could satisfy the membership criteria articulated in Rule 1014(a). Nothing in FINRA's rules entitled WD Clearing to enjoy an unregulated trial period.

28 To determine whether FINRA's actions prohibited or limited access to services under the meaning of Section 19(d), we consider whether FINRA has "denied or limited the applicant's ability to utilize one of the fundamentally important services offered by the SRO," and whether the "services at issue were not merely important to the applicant but were central to the function of the SRO." *Sky Capital*, 2007 WL 1559228, at *4 (quoting *Morgan Stanley*, 1997 WL 802072, at *3); *accord Securities Indus. and Fin. Markets Assn.*, Exchange Act Release No. 72182, 2014 WL 1998525, at *9 (May 16, 2014); *see, e.g.*, *Proman*, 2008 WL 1902072, at *2 (finding that relevant standard was not satisfied when Proman failed to identify any services "'central to the function of the SRO,' such as access to an exchange trading floor or registration as a market maker" to which he had been denied access); *Sky Capital*, 2007 WL 1559228, at *4 (finding that *Morgan Stanley* test was not met when applicant failed to show that NASD "Office of the Ombudsman provide[d] a 'fundamentally important service' that [wa]s central to the function of NASD"); *Morgan Stanley*, 1997 WL 802072, at *3 (finding that application for review did not allege a denial of access where applicant merely sought "relief from the automatic operation of [an SRO] prohibition, which its employee's actions triggered").

29 15 U.S.C. § 78s(d)(1) (applicable only where a "*self-regulatory organization* . . . prohibits or limits any person in respect to access to services offered by such organization or member thereof" (emphasis added)).

30 *Cf. William J. Higgins*, Exchange Act Release No. 24429, 48 SEC 713, 1987 WL 757509, at *1 (May 6, 1987) (finding reviewable SRO action under Section 19(d) where Exchange members "requested the NYSE's permission to install telephones" and "[t]hese requests were

3. FINRA did not bar WD Clearing from associating with all FINRA members.

WD Clearing contends that the interim restrictions in place during the CMA review process "effectively barred" WD Clearing's representatives from association with a FINRA member. But FINRA did not bar WD Clearing or its representatives from associating with Wilson-Davis or any other FINRA-member firm, let alone all FINRA-member firms, as would be required for us to assume jurisdiction on this ground.[31] FINRA did not render a decision on the CMA, and the interim restrictions—which were only *interim* and not final—are no longer in effect. WD Clearing remains free to apply for FINRA membership or encourage Wilson-Davis to file a new CMA requesting the change in ownership. But even if FINRA had barred WD Clearing from associating with Wilson-Davis, we would have no jurisdiction on this ground because WD Clearing and its representatives would still have remained free to associate with other FINRA-member firms.[32] Indeed, as WD Clearing concedes, Hurry is currently associated with at least two FINRA members, Alpine Securities and Scottsdale Capital.

B. We also decline review because Wilson-Davis failed to exhaust FINRA's administrative remedies.

We decline review for the additional reason that Wilson-Davis's decision to withdraw its application foreclosed the possibility of its seeking review by FINRA —a predicate to meaningful Commission review. If we were to assume that FINRA would have rejected Wilson-Davis's application based on the incomplete record before us, we would divest FINRA of its "self-regulatory function" because FINRA did not have the opportunity to decide the issue for itself or review its own decision through its internal appellate process prior to Commission review.[33] Requiring Wilson-Davis to file a CMA, FINRA to address it, and Wilson-Davis to exhaust all internal FINRA appeals[34] helps ensure that there is an actual dispute[35] and a

---

denied by the NYSE"), *aff'd*, 380 F.3d 611 (2d Cir. 2004); *Scattered Corp.*, Exchange Act Release No. 37249, 52 SEC 812, 1996 WL 284622, at *2 (May 29, 1996) (finding that the Chicago Stock Exchange, Inc.'s "determination not to process Scattered's application for registration as a market maker limits the firm's access to the CHX's services"). There is no allegation here, nor does the record reflect, that FINRA refused to process an application by Wilson-Davis. Instead, Wilson-Davis withdrew its application from review.

31 *Joseph Dillon*, 2000 WL 1664016, at *3 (rejecting jurisdictional basis because, unlike "NASD actions having the effect of barring an individual from association with all NASD members," petitioner's representatives "remain free to associate with other firms").

32 *Id.*

33 *See MFS Sec. Corp. v. SEC*, 380 F.3d 611, 621 (2d Cir. 2004), *affirming MFS Sec. Corp.*, Exchange Act Release No. 47626, 56 SEC 380, 2003 WL 1751581, at *5-6 (Apr. 3, 2003) (refusing to consider applicant's denial of access to services claim because applicant failed to exhaust NYSE procedures).

34 *Cf. Gerald J. Lodovico*, Exchange Act Release No. 73748, 2014 WL 6808366, at *2 (Dec. 4, 2014) ("[W]e will not consider an application for review if the applicant failed to exhaust [the

fully-developed record for us to review.[36] Because WD Clearing filed its application for review before FINRA entered a final decision on Wilson-Davis's CMA, we lack the end result of a complete review process and the associated record.[37]

Accordingly, for the reasons set forth above, IT IS ORDERED that the application for review filed by WD Clearing is DISMISSED.[38]

By the Commission.

Lynn M. Powalski

Brent J. Fields
Secretary

SRO's] procedures." (citing *Caryl Trewyn Lenahan*, Exchange Act Release No. 73146, 2014 WL 4656403, at *2 n.5 (Sept. 19, 2014))); *cf. also MFS Sec. Corp.*, 2003 WL 1751581, at *5 & n.29 (emphasizing that it is "clearly proper to require that a statutory right to review be exercised in an orderly fashion, and to specify procedural steps which must be observed as a condition to securing review" (quoting *Royal Sec. Corp.*, Exchange Act Release No. 5171, 36 SEC 275, 1955 WL 43159, at *2 (May 20, 1955))).

35 We note that Wilson-Davis took no further action on its application with FINRA following its withdrawal, did not file or join in WD Clearing's application for review, and may lack the economic incentive to consummate the transaction with WD Clearing at this time. *Cf. Texas v. United States*, 523 U.S. 296, 300 (1998) ("A claim is not ripe for adjudication if it rests upon contingent future events that may not occur as anticipated, or indeed may not occur at all." (quotation and citation omitted)). Indeed, the record reveals an underlying dispute between WD Clearing and Wilson-Davis over Wilson-Davis's obligation to consummate the securities purchase agreement. For example, WD Clearing has apparently brought a civil action against Wilson-Davis in Utah for breach of contract. Whatever the nature of this private conflict, we do not have the authority to resolve it.

36 *See MFS Sec. Corp.*, 380 F.3d at 621 (requiring applicant to exhaust administrative remedies "promotes the development of a record in a forum particularly suited to create it, upon which the Commission and, subsequently, the courts can more effectively conduct their review").

37 We note that national securities associations are required to "provide a fair procedure" for denials and limitations. Exchange Act Section 15A(b)(8), 15 U.S.C. § 78o-3(b)(8). They are required to keep a record and to provide notice, an opportunity to be heard, and a "statement setting forth the specific grounds" on which the limitation or prohibition is based. Exchange Act Section 15A(h)(2), 15 U.S.C. § 78o-3(h)(2). This process "also provides SROs with the opportunity to correct their own errors prior to review by the Commission." *MFS Sec. Corp.*, 380 F.3d at 621.

38 We have considered all the arguments advanced by the parties. We need not reach FINRA's arguments for dismissal not addressed above or the parties' preliminary discussion of the merits. We reject or sustain the parties' remaining arguments to the extent that they are inconsistent or in accord with the views expressed herein.

Before the
SECURITIES AND EXCHANGE COMMISSION

SECURITIES EXCHANGE ACT OF 1934
Release No. 76057 / September 30, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16876

In the Matter of **EFIM AKSANOV,** **Respondent.**	**ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS PURSUANT TO SECTION 15(b) OF THE SECURITIES EXCHANGE ACT OF 1934 AND NOTICE OF HEARING**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative proceedings be, and hereby are, instituted pursuant to Section 15(b) of the Securities Exchange Act of 1934 ("Exchange Act") against Efim Aksanov ("Aksanov" or "Respondent").

II.

After an investigation, the Division of Enforcement alleges that:

A. <u>RESPONDENT</u>

1. From in or about 2012 through at least March 2013, Aksanov was a principal of Stock News Info LLC, an entity that purportedly introduced issuers to individuals and entities that provide internet and other electronic promotions. During that time, Aksanov participated in an offering of Face Up Entertainment Group, Inc. ("Face Up") stock, which is a penny stock. Aksanov is 41 years old and resides in Sunny Isles, Florida.

B. RESPONDENT'S CRIMINAL CONVICTION

2. October 21, 2014, Aksanov pled guilty to one count of conspiracy to commit securities fraud in violation of Title 18 United States Code, Section 371 before the United States District Court for the Southern District of New York, in *United States v. Efim Aksanov,* 13 Cr. 410 (NRB). On March 30, 2015, a judgment of conviction was entered against Aksanov. He was sentenced to 21 months imprisonment, three years of supervised release, and was ordered to forfeit $21,750.

3. The count of the indictment to which Aksanov pled guilty alleged, among other things, that from at least in or about 2012 through on or about March 27, 2013, Aksanov and others conspired to commit securities fraud. In connection with his guilty plea, Aksanov admitted, among other things, that he was involved in a scheme to manipulate the price of Face Up stock so the individuals involved in the scheme would profit.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate in the public interest that public administrative proceedings be instituted to determine:

A. Whether the allegations set forth in Section II hereof are true and, in connection therewith, to afford Respondent an opportunity to establish any defenses to such allegations;

B. Whether, pursuant to Section 15(b)(6) of the Exchange Act, it is appropriate and in the public interest to bar Aksanov from participating in any offering of penny stock, including: acting as a promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer or issuer for purposes of the issuance or trading in any penny stock; or inducing or attempting to induce the purchase or sale of any penny stock.

IV.

IT IS ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice, 17 C.F.R. § 201.110.

IT IS FURTHER ORDERED that Respondent shall file an Answer to the allegations contained in this Order within twenty (20) days after service of this Order, as provided by Rule 220 of the Commission's Rules of Practice, 17 C.F.R. § 201.220.

If Respondent fails to file the directed answer, or fails to appear at a hearing after being duly notified, the Respondent may be deemed in default and the proceedings may be determined against him upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f) and 310 of the Commission's Rules of Practice, 17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f) and 201.310.

This Order shall be served forthwith upon Respondent as provided for in the Commission's Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 210 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice.

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

ADMINISTRATIVE PROCEEDING
File No. 3-15874

In the Matter of MICHAEL H. JOHNSON	ORDER DENYING MOTION TO MODIFY SETTLED BAR ORDER

Michael H. Johnson, the former Senior Vice President of Penson Worldwide, Inc.'s ("PWI") Securities Lending Department, requests that we modify a May 2014 settled bar order to allow him to apply for reentry into the securities industry after one year instead of five years. He claims that "an error in the [Commission] staff's factual analysis of the case and, presumably, in the Commission's analysis of the appropriateness of the terms of [his] settlement" warrants such relief. The Division of Enforcement ("Division") opposes Johnson's motion. For the reasons set forth below, we find that Johnson has not demonstrated "compelling circumstances" that would justify modifying the bar order. Accordingly, the request is denied.

I. Background

A. In May 2014, Johnson consented to a bar based on allegations that he aided and abetted Penson's Regulation SHO violations and failed reasonably to supervise his subordinates.

This proceeding arose out of securities lending practices at PWI's broker-dealer subsidiary, Penson Financial Services, Inc. ("Penson"),[1] that resulted in systematic violations of the close-out requirements of Regulation SHO under the Securities Exchange Act of 1934.[2] On May 19, 2014,

1 PWI and its subsidiaries filed for bankruptcy in 2013 and are no longer in business.

2 17 C.F.R. § 242.204 (requiring broker-dealers and clearing firms to take action to close out a failure to deliver position in an equity security within specified time frames).

42 of 147

we charged Johnson for his role in Penson's violations, and Johnson simultaneously agreed to settle the allegations against him.[3] Pursuant to his offer of settlement, we found, *inter alia*, that from October 2008 to November 2011, Johnson implemented procedures at Penson that he "knew or was reckless in not knowing" did not comply with Regulation SHO, and that he "willfully aided, abetted, and caused" Penson's violations of Regulation SHO.[4] We also found that Johnson failed reasonably to supervise his subordinates and that he "fostered and encouraged their misconduct by participating in it with them."[5] But we did not find that Penson or Johnson profited as a result of the Regulation SHO violations nor did we address Johnson's possible motives for his misconduct. Without admitting or denying our findings, except as to our jurisdiction over him and the subject matter of this proceeding, which were admitted, Johnson consented to be barred from the securities industry with a right to apply for reentry after five years and to pay a $125,000 civil money penalty. Johnson subsequently paid the penalty and left the industry.

B. Less than a year later, Johnson sought modification of the bar based on a factual error in the calculation of Penson's profit from the Regulation SHO violations.

In a letter dated April 3, 2015, Johnson sought modification of the bar based on a factual error in the calculation of Penson's profit from the Regulation SHO violations.[6] Specifically, Johnson pointed to a calculation error by the Division's expert in a separate, litigated proceeding against Penson's former president and chief compliance officer in connection with the Regulation SHO violations.[7] In that proceeding, the Division offered an expert's report and testimony to establish that the profit to Penson from the Regulation SHO violations was approximately $6.2 million, but when the expert testified at the hearing he acknowledged that the $6.2 million figure resulted from a calculation error.[8] The Division subsequently conceded that the total profit to Penson as a result of the Regulation SHO violations was $59,000.[9]

6 Johnson did not seek modification of the penalty.

7 *See Thomas R. Delaney II*, Initial Decision No. 755, 2015 WL 1223971, at *1 (Mar. 18, 2015) (finding that Penson's president did not fail reasonably to supervise subordinates but that its chief compliance officer was a cause of Penson's Rule 204 violations and imposing a cease-and-desist order and a $20,000 civil money penalty), *declared final*, Exchange Act Release No. 74843, 2015 WL 1939410 (Apr. 29, 2015). A fourth Penson officer agreed to settle charges that he caused Penson's Regulation SHO violations and consented to a censure and cease-and-desist order. *See Lindsey A. Wetzig*, Exchange Act Release No. 72187, 2014 WL 2038879, at *1 (May 19, 2014).

8 *See Delaney*, 2015 WL 1223971, at *25.

9 *Id.*

According to Johnson, during the Wells process and settlement discussions in his case, Division staff took the position that Penson profited by some $6 million from the Regulation SHO violations, that those violations were the result of intentional conduct by Penson employees, and that Johnson's misconduct was "particularly egregious," given his motive to profit both Penson and himself, and merited significant sanctions. While Johnson maintained throughout the parties' settlement discussions that there was "virtually no profit to Penson and absolutely none to himself" as a result of the Regulation SHO violations, he asserts that he "did not have available to him either the trading data or the resources to analyze it in order to prove to the staff that profit could not have been a motive." Johnson states that, as a result, he could not counter the staff's position and "agreed to settle the matter on the terms demanded by the staff as he was not in the position to litigate the matter."

By order dated May 29, 2015, we construed Johnson's letter as a motion to modify the terms of the bar and directed the parties to file opposing and reply briefs.[10] In its opposition brief, the Division argued that Johnson failed to demonstrate "compelling circumstances" that would support modification of the bar. According to the Division, the erroneous profit calculation had "no bearing" on Johnson's case because that calculation did not exist at the time the Commission issued the settled bar order as to Johnson. The Division and Johnson negotiated the terms of a settlement between August and December 2013, and Johnson submitted an offer of settlement, including a bar with a right to reapply after five years, in December 2013. The Commission accepted Johnson's offer and entered the bar in May 2014. Meanwhile, Penson's successor firm did not begin producing the data necessary for the expert's profit calculation until February 2014—after Johnson had submitted his offer of settlement—and did not finish production until July 2014, after the bar was imposed. The expert did not complete his calculation and provide it to the staff until September 2014. Thus, the Division argued, the expert's profit calculation did not and could not have played any role in the parties' settlement negotiations or the Commission's consideration of an appropriate sanction.

The Division also argued that the settled order contained extensive findings that Johnson engaged in "conscious misbehavior—that is, he knew what he was doing was wrong and did it anyway, irrespective of whether it benefitted him directly." Consequently, proof of motive was not required to establish Johnson's aiding and abetting liability.[11] The Division further argued that Johnson's motive was not "solely limited to potential profits to Penson," but also included a desire to "avoid or reduce the costs of compliance" with Regulation SHO.

[11] *Cf. Donald L. Koch*, Exchange Act Release No. 72179, 2014 WL 1998524, at *14 (May 16, 2014) (stating that "proof of motive is not required where there is direct evidence of manipulative intent; it is only where direct evidence of scienter is lacking that circumstantial evidence of intent, such as motive, becomes critical"), *petition denied in part and granted in part on other grounds*, 793 F.3d 147 (D.C. Cir. July 14, 2015).

In his reply, Johnson asserted that he "did not intend to start a battle with the Division over the facts found in the settled order, which are not in dispute," and that he "did not, in fact, desire an adversarial process at all." Rather, Johnson asserted, he "asks for nothing more than for the Commission to simply review its records to determine whether it was working with incorrect facts and, if so, determine whether a modification of [the] bar is appropriate."

II. Analysis

We have stated that, in reviewing motions to lift or modify administrative bar orders, we will determine whether, "under all the facts and circumstances presented, it is consistent with the public interest and investor protection to permit the petitioner to function in the industry without the safeguards provided by the bar."[12] Our longstanding approach to administrative bar orders has been that they will "remain in place in the usual case and be removed only in compelling circumstances."[13] "Preserving the status quo ensures that the Commission, in furtherance of the public interest and investor protection, retains its continuing control over such barred individuals' activities."[14]

Consideration of a range of factors guides the public interest and investor protection inquiry. Those factors include the nature of the misconduct at issue in the underlying matter; the time that has passed since issuance of the administrative bar; the compliance record of the petitioner since issuance of the administrative bar; the age and securities industry experience of the petitioner, and the extent to which the Commission has granted prior relief from the administrative bar; whether the petitioner has identified verifiable, unanticipated consequences of the bar; the position and persuasiveness of the Division's response to the request for relief; and whether there exists any other circumstance that would cause the requested relief to be inconsistent with the public interest or the protection of investors.[15] We have indicated that "[n]ot all of these factors will be relevant in determining the appropriateness of relief in a particular case, and no one factor is dispositive."[16]

A. Johnson presents no compelling circumstances that would justify modifying the bar.

Based on our consideration of all the facts and circumstances, we find no compelling circumstances that would justify modifying the bar and eliminating the protections it affords. The

settled order found serious violations of the federal securities laws. Only sixteen months have passed since entry of the bar. "That is hardly enough time to conclude that its continuation is no longer required in the public interest."[17] While it appears that Johnson has had no disciplinary record subsequent to the bar, we have said that "a clean disciplinary record is not determinative in our consideration of sanctions."[18] We also have said that "[w]e generally first grant incremental relief in our cases vacating bars."[19] Johnson has not sought prior incremental relief from the bar. As a result, we do not have a sufficient basis for concluding that modification of the bar would be consistent with the public interest. Finally, Johnson has not identified verifiable, unanticipated consequences of the bar or provided additional factors that would support the requested relief from the bar.[20]

Johnson argues that modification of the bar would make his sanction consistent with the sanctions imposed in other Regulation SHO cases.[21] But it is well-established that whether a particular sanction is excessive cannot be determined by comparison with the sanctions imposed on respondents in other cases.[22] Johnson also argues that modification would be appropriate

19 *Jesse M. Townsley, Jr.*, Exchange Act Release No. 52161, 2005 WL 1963783, at *2 (July 29, 2005) (denying in part petition to vacate bar order) (citing *Salim B. Lewis*, Exchange Act Release No. 51817, 2005 WL 1384087, at *4 (June 10, 2005)).

20 Johnson argues that the bar has placed "unique and severe difficulties" on him and his family. He states that he "was forced out of the industry nearly two years ago as a result of receiving the staff's Wells notice"; that he "sold his home, relocated from St. Louis to Dallas, and moved his family into a smaller, more affordable home"; that he suffers from Parkinson's disease; and that he has "lost his ability to properly care for the medical conditions both he and his wife endure." While we are sympathetic, Johnson's stated difficulties do not render the settled order inequitable. Rather, they are among a range of natural and foreseeable consequences that flow from a bar on employment in the securities industry as a result of the settled order. *See Pike*, 1994 WL 389872, at *2.

21 For support, Johnson cites to settled orders in *Peter J. Bottini*, Exchange Act Release No. 66814, 2012 WL 1264509 (Apr. 16, 2012); *Gary S. Bell*, Exchange Act Release No. 65941, 2011 WL 6184476 (Dec. 13, 2011); *Jeffrey A. 22 *See, e.g., Butz v. Glover Lifestock Comm'n Co.*, 411 U.S. 182, 187 (1973) (stating that "[t]he

(continued . . .)

because he "went above and beyond in cooperating with the staff during its investigation," he "acknowledged his mistakes" in connection with Penson's securities lending practices, and he "has learned valuable lessons as a result." We have previously considered and rejected a respondent's assertion that he cooperated with Commission staff when raised in mitigation of the violations or sanctions, and we see no basis for crediting that assertion here.[23] Moreover, even if we were to credit Johnson's assertion of remorse, that assertion does not alter our conclusion that modification would be inconsistent with the public interest and investor protection.

B. Johnson forfeited any claim that the Commission was working with incorrect facts when he consented to the bar.

We have a "strong interest" in the finality of our settlement orders.[24] "Public policy considerations favor the expeditious disposition of litigation, and a respondent cannot be permitted to [follow] one course of action and, upon an unfavorable [result], to try another course of action."[25] "If sanctioned parties easily are able to reopen consent decrees years later, the SEC would have little incentive to enter into such agreements. There would always remain open the possibility of litigation on the merits at some time in the distant future when memories have faded and records have been destroyed."[26]

Moreover, Rule 240 of our Rules of Practice provides that a settling respondent waives all hearings, the filing of proposed findings of fact and conclusions of law, proceedings before and an

---

(. . . continued)
employment of a sanction within the authority of an administrative agency is . . . not rendered invalid in a particular case because it is more severe than sanctions imposed in other cases"); *Geiger v. SEC*, 363 F.3d 481, 488 (D.C. Cir. 2004) (stating that, because "[t]he Commission is not obligated to make its sanctions uniform," court would not compare sanction imposed in case to those imposed in previous cases); *Lewis*, 2005 WL 1384087, at *4 n.42 (rejecting respondent's argument to vacate bar because lesser sanctions were imposed in similar cases and citing *Butz*).

23 *See, e.g.*, *Montford & Co., Inc.*, Advisers Act Release No. 3829, 2014 WL 1744130, at *19 & 20 (May 2, 2014) (rejecting respondent's cooperation with the Division in mitigation of sanctions and according considerable weight to law judge's finding that respondent's expressions of remorse were not credible because they stemmed from "the results to him personally and professionally" and "not from any genuine regret for his wrongdoing"), *petition denied*, 793 F.3d 76 (D.C. Cir. July 10, 2015).

24 *Haver*, 2006 WL 3421789, at *3 (substitutions in original) (quoting *Putnam Inv. Mgmt*, LLC, Exchange Act Release No. 50039, 2004 WL 1619113, at *2 (July 20, 2004)).

initial decision by a hearing officer, all post-hearing procedures, and judicial review by a court.[27] "The Rule requires each offer of settlement to recite or incorporate as part of the offer the [waiver] provisions of paragraphs (c)(4) and (5)."[28]

Johnson does not dispute that his offer of settlement waived all post-hearing procedures, as required by Rule 240, nor does he suggest that his consent to the bar was "not voluntary, knowing, or informed."[29] Johnson admits that he "elected to settle the matter and did not develop the matter further."[30] Consequently, Johnson "forfeited the opportunity to adduce" evidence of the calculation error,[31] and he "may not now complain that the record is inaccurate or incomplete."[32]

For the foregoing reasons, we find that the public interest and investor protection will not be served if Johnson is permitted to function in the industry without the safeguards provided by the bar order. We therefore decline to modify the settled bar order to allow Johnson to apply for reentry to the securities industry after one year instead of five years.

Accordingly, IT IS ORDERED that the motion of Michael H. Johnson to modify the bar imposed on him on May 19, 2014, be, and it hereby is, DENIED.

By the Commission.

UNITED STATES OF AMERICA
Before the
SECURITIES AND EXCHANGE COMMISSION

SECURITIES EXCHANGE ACT OF 1934
Release No. 75877 / September 10, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-15098

In the Matter of Credit Suisse Securities USA (LLC); DLJ Mortgage Capital, Inc.; Credit Suisse First Boston Mortgage Acceptance Corp.; Credit Suisse First Boston Mortgage Securities Corp.; and Asset Backed Securities Corporation Respondents.	ORDER ESTABLISHING FAIR FUND AND APPROVING PLAN OF DISTRIBUTION FIRST PAYMENT DEFAULT PRACTICE

I.

On November 16, 2012, the Securities and Exchange Commission ("Commission") issued an Order Instituting Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933 and Section 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing a Cease-and-Desist Order ("Order") against Credit Suisse Securities (USA) LLC ("Credit Suisse Securities"), DLJ Mortgage Capital, Inc., Credit Suisse First Boston Mortgage Acceptance Corp., Credit Suisse First Boston Mortgage Securities Corp., and Asset Backed Securities Corporation (collectively, "Credit Suisse" or "Respondents").[1] In the Order, the Commission found that the Respondents engaged in misconduct including misrepresentations or omissions in the offer or sale of residential mortgage backed securities ("RMBS") relating to

[1] Securities Act Rel. No. 9368 (Nov. 16, 2012), available at http:///sec.gov/litigation/admin/2012/33-9368.pdf.

two undisclosed business practices that violated Sections 17(a)(2) and (3) of the Securities Act of 1933 (the "Securities Act"). 15 U.S.C. § 77q(a)(2) and (3).[2] The Commission ordered the payment of separate monetary sanctions for each set of business practices. The Order indicated that, pursuant to Section 308(a) of the Sarbanes-Oxley Act of 2002, as amended, the Commission may create two separate Fair Funds, one for each group of investors harmed by the relevant sets of business practices.

This order pertains to one of those practices, the first payment default practice ("FPD Practice"). For the FPD Practice conduct, the Commission ordered Respondents Credit Suisse Securities and Asset Backed Securities Corporation to pay, jointly and severally, a total of $18,256,561 in disgorgement, prejudgment interest and civil money penalties. All payments required by the Order have been made.

As set out in the Order, the Commission's findings with respect to the FPD Practice relate to two RMBS offerings underwritten by Credit Suisse Securities in late 2006. The two RMBS offerings were collateralized by approximately $1.9 billion of subprime mortgages (the "November 2006 securitizations").

Structure of the November 26 Securitizations. The RMBS collateral consisting of residential mortgage loans was acquired by Credit Suisse and deposited into two trusts, one for each offering ("RMBS Trusts"). The trusts then issued numerous classes or "tranches" of debt securities (commonly referred to as "certificates") backed by the RMBS collateral. Credit Suisse marketed and sold these certificates to investors using various offering documents. Each tranche of certificates held different rights to the mortgage payments and other defined funds ("cash

[2] The Commission also found that one respondent, Asset Backed Securities Corp., violated Section 15(d) of the Exchange Act, 15 U.S.C. § 78o(d), and Rules 12b-20, 15d-1, and 15d-14(d) thereunder, 17 C.F.R. §§ 240.12b-20, 15d-1, and 15d-14(d), as a result of materially misleading statements in certifications that had been attached to reports filed with the Commission.

flows") going to the RMBS Trust, *e.g.*, to the principal and interest payments made on the underlying mortgages. In broad terms, the "senior tranches" of certificates held the first rights to cash flows to the RMBS Trust, and as a result paid a lower interest rate to investors; the "junior tranches" paid higher interest rates to investors and their cash flow rights were subordinated to the senior tranches. This cash-flow priority structure is commonly referred to as a "waterfall."

The FPD Practice. In the offer and sale of the November 2006 securitizations, Credit Suisse informed potential investors about the protections afforded by a First Payment Default covenant ("FPD covenant") and a First Payment Default backstop ("FPD backstop"). The FPD covenant required the mortgage originator (*i.e.*, the entity from which Credit Suisse purchased the mortgage collateral prior to securitization) to, among other things, repurchase certain delinquent loans held by the RMBS Trust. If the mortgage originator failed to repurchase the delinquent loans, the FPD backstop required Credit Suisse to step into the originator's shoes and repurchase the mortgage from the RMBS Trust.

In marketing materials used in connection with the November 2006 securitizations, Credit Suisse promoted the FPD covenant and backstop provisions, stating that: 1) "all First Payment Default Risk" was removed from the securitizations, 2) it "enforced" the FPD covenant in order to "mitigate the effect" of fraudulent mortgages, and 3) its interests were aligned with investors' interests.

In the Order, the Commission found that the FPD covenant and the FPD backstop were material to investors. The Commission also found that, in breach of the FPD covenant, Credit Suisse failed to put back to the mortgage originator more than 100 delinquent mortgages, and failed to disclose to the RMBS Trusts' trustee or investors that these mortgages remained in the collateral pool for the November 2006 securitizations. The Commission found that Credit Suisse misled investors because, among other things, it should have known at the time of the offering that all loans that breached the FPD covenant would not be put back to the mortgage originator. Credit Suisse further misled investors by representing that its interests were aligned with investors' interests by virtue of the FPD covenant. Credit Suisse was also found to have obtained money from underwriting fees on the November 2006 securitizations, and, on the closing date of the securitizations, through the sales of the mortgages to the trust that would hold the RMBS. The Order also found that Credit Suisse's failure to put back to the mortgage originator the mortgages that were in breach of the FPD covenant caused losses of approximately $10 million to the November 2006 securitizations.[3] These losses reflect an aggregate loss to the RMBS Trusts, which cannot be traced directly to the specific losses, if any, borne by individual investors who held RMBS Trust certificates.[4]

The Order stated that funds paid into each Fair Fund would be distributed pursuant to a distribution plan to be administered in accordance with the Commission's Rules of Practice governing Fair Fund and Disgorgement Plans (the "Commission's Rules"). On August 14, 2014, pursuant to the Order and Rule 1103 of the Commission's Rules, 17 C.F.R. § 201.1103, the Commission proposed the plan[5] ("Proposed FPD Plan" or "Proposed Plan") and issued a notice

[3] The $10 million of losses were calculated by comparing the performance of the FPD mortgages that should have been removed from the collateral pool (the "FPD mortgages") to the performance of the balance of the mortgages held by the RMBS Trusts for the November 2006 securitizations. The FPD mortgages defaulted at a higher rate than the other mortgages held by the RMBS Trust, which contributed to approximately $10 million of losses over the life of the securitizations.

[4] While the losses incurred can be reasonably calculated in the aggregate by comparing the performance of the FPD mortgages to the balance of the mortgages in the collateral pool over a period of months or years, it is impossible to determine in hindsight precisely when a default of an FPD mortgage contributed to a direct loss to an investor, due to, among other things, the lack of regular pricing data for the RMBS certificates.

[5] Available at http://www.sec.gov.litigation/admin/34-72851-ppd-first-payment.pdf.

of the Proposed Plan and opportunity for comment (the "Notice").[6] According to the Proposed Plan, the "purpose of this distribution is to compensate investors in the RMBS Trusts harmed by Credit Suisse's misrepresentations and omissions in its offering materials regarding the FPD Practice." (¶ 4.)[7]

The proposed distribution methodology allocates the Net Fair Fund among the RMBS Trusts based on the proportion of the mortgage collateral in each RMBS Trust that was originated by the Originator. (¶ 54.) The funds for each trust are then allocated[8] to each trust's Eligible Claimants[9] on a *pro rata* basis determined by the Eligible Claimant's investment in the specific trust divided by the sum of all Eligible Claimant's investments in that trust. (¶ 55.)

The Commission received one comment on the Plan. This order addresses that comment.

After careful consideration, the Commission has determined to order a Fair Fund for the amounts paid by Respondents relating to the FPD Practice conduct (the "FPD Fair Fund"), and, for the reasons explained in this order, that the Proposed FPD Plan should be approved with technical modifications (hereinafter the "FPD Plan" or "Plan").[10]

---

[6] Exchange Act Rel. No. 72851 (Aug. 14, 2014), available at http://www.sec.gov/litigation/admin/2014/34-72851.pdf. The Notice provided all interested persons thirty days to submit written comments on the Proposed Plan. The Notice advised such persons that they could obtain a copy of the Proposed Plan from the Commission's website or by submitting a written request to the Commission. The notice stated that all persons who desired to comment on the Proposed Plan could submit their comments no later than September 15, 2014.

[7] Paragraph references in this order denoted by the symbol "¶" refer to the numbered paragraphs in the Proposed FPD Plan.

[8] As explained in the Proposed FPD Plan, a preliminary allocation is made and any Eligible Claimant whose preliminary calculation is less than a *de minimis* amount is removed from the pool of Eligible Claimants. (¶ 56.) In the event that a particular Trust is undersubscribed such that a small number of Eligible Claimants would stand to receive disproportionately large recovery, the Fund Administrator, with agreement of the Commission staff, may use discretion in determining the final amount of the recovery. (¶ 58.)

[9] The Proposed Plan defines "Eligible Claimants" as persons (other than Excluded Parties) who purchased Eligible Securities on Eligible Purchase dates. The Proposed Plan also defines the capitalized terms in the definition of Eligible Claimant.

[10] The FPD Plan contains minor technical modifications to its Proposed FPD Plan. The technical modifications are: (i) the last sentence of ¶ 2 has been restated to more accurately reflect the Commission's finding of loss stated in the Order; (ii) in ¶ 58, word changes were made to eliminate an undefined term, "Eligible Claim;" (iii) the modifier

II.

A. **Public Comments on the FPD Plan**

Chris Katopis, Executive Director, Association of Mortgage Investors Letter

Chris Katopis, the Executive Director of the Association of Mortgage Investors ("AMI"), submitted a comment (the "AMI Comment")[11] that stated three concerns with the Proposed Plan: 1) that the Proposed Plan's *pro rata* allocation "improperly override[s] the recognized payment priority or 'waterfall' established by the governing documents of the RMBS trust . . . thereby favoring senior certificate-holders, who may not in fact suffer losses, over more junior classes of certificate-holders"; 2) that the Proposed Plan arbitrarily excludes nearly all subsequent purchasers, potentially undermining the secondary market for RMBS; and 3) that by paying investors directly rather than paying the RMBS trustees, "the Proposed Plan fails to take advantage of [the RMBS waterfall,] a method of distribution that is more efficient, fair, and consistent with investor expectations." The Commission has considered the AMI Comment and, for the reasons discussed below, is approving the Proposed FPD Plan with only technical modifications.[12]

"proposed" is deleted wherever it appeared in the FPD Plan because the Plan when adopted by the Commission is no longer "proposed;" and (iv) ¶ 85 was deleted because the FPD Plan when adopted by the Commission will not be published for further Notice and Comment. These technical modifications are minor. No substantive changes have been made to the methodology for calculating distributions or to the definition or eligibility criteria for Eligible Claimants. Commission staff does not deem these changes to be substantial or to require republication pursuant to Commission Rule 1103. Moreover, under Rule 1104, the Commission has complete discretion when considering whether to republish a plan for notice and comment, and the Commission is not required by Rule 1104 to republish a plan *even if* the Commission substantially modifies it prior to adoption.

[11] The three concerns raised in the AMI Comment have also been raised for the Commission's distribution plan for the previously noted other undisclosed Credit Suisse business practice, the Bulk Settlement practice ("Bulk Settlement Practice"). Although these practices involved different conduct, the portion of this order responding to the AMI Comment and the corresponding portion of the order approving the distribution plan for Bulk Settlement Practice are nearly identical because the analysis of the concerns is the same for both plans.

[12] *See* fn. 10, *supra*.

First, AMI's contention that a *pro rata* allocation overrides the RMBS Trusts' waterfall, thereby favoring senior certificate-holders "who may not in fact [have] suffer[ed] losses," indicates that the harm that is the focus of AMI's concern is limited to the *investment losses* that flowed from the *eventual performance* of certificates held by investors. Subsequent investment performance losses, however, are distinct from the harm to investors addressed in the FPD Plan. A proportionate harm accrued to *all* investors *at the time of the initial offering* when, as a result of the misrepresentations and omissions in the offering documents and marketing materials, investors were deprived of the benefit of their bargain with Credit Suisse. The FPD Plan's purpose and design for addressing investor harm flow directly from the violations at issue in the Order. As noted in the Plan, the "purpose of this distribution is to compensate investors harmed by Credit Suisse's misrepresentations and omissions *in its offering materials* regarding the FPD Practice." (¶ 4, emphasis added.) The Order found that Credit Suisse violated Sections 17(a)(2) and 17(a)(3) of the Securities Act because of material misstatements and omissions "in the offer or sale of securities." The misleading statements and omissions at issue in the Order were made in the securitizations' offering documents and in other materials Credit Suisse used to market the offering to potential investors. In those documents and materials, Credit Suisse misled investors by falsely asserting that 1) its interests were aligned with investors' interests with respect to FPD mortgages, and 2) all FPD mortgages would be removed from the collateral pool. Credit Suisse's misconduct was material to investors' decisions whether to invest in the November 2006 securitizations.

Had Credit Suisse disclosed *to potential initial investors* that its interests were not aligned with theirs, and that at its discretion, some as-yet-indeterminate number of FPD mortgages would remain in the collateral pool, it stands to reason that *all initial* investors would have considered the information in their investment decisions. Investors may have decided to invest in different securities or demanded to be compensated (*e.g.*, to receive a higher interest rate) before assuming the as-yet-unquantifiable FPD-related risks. For that reason, even if there had been no losses from the failure of the mortgages underlying the November 2006 securitizations, there still would have been harm to *all initial* investors caused by the Respondents' conduct. Unlike an investment performance harm, the harm in the offer and sale affected senior and junior certificate-holders alike. It is this harm that the Commission's Plan seeks to address through a *pro rata* distribution. The Plan is reasonably designed to compensate investors for such harm.

The Commission's objective is to distribute the FPD Fair Fund in a fair and reasonable manner, taking into account the relevant facts and circumstances.[13] In light of the factual and legal bases for Respondents' liability, the Commission exercises its discretion to distribute funds *pro rata* to all investors who purchased certificates in the RMBS Trusts' offerings or near the time of the offerings.

Closely related to AMI's first concern is AMI's third concern that the Proposed Plan fails to take advantage of the efficiencies, fairness and consistency with investor expectations associated with the waterfall priority of distributions. AMI's contention, however, that the Commission has "overlook[ed] the possibility that simply distributing proceeds through the trusts to flow through established waterfalls is a more fair and efficient means to compensate investors" is incorrect. The Commission staff carefully considered whether to distribute funds

[13] *See Official Committee of Unsecured Creditors of WorldCom, Inc. v. SEC*, 467 F.3d 73, 82 (2d Cir. 2006) ("So long as the district court is satisfied that 'in the aggregate, the plan is equitable and reasonable,' the SEC may engage in the 'kind of line-drawing [that] inevitably leaves out some potential claimants'"), citing *SEC v. Wang*, 944 F.2d 80, 88 (2d Cir. 1991).

directly to the trustees for the RMBS Trusts as well as the significance of the RMBS Trusts' waterfalls. There are significant legal and practical barriers to a waterfall distribution, and the proceeds cannot be "simply" distributed through the RMBS Trusts. First, an RMBS Trust's waterfall generally determines the prioritization of defined cash flows from the collateral owned by the Trusts. However, AMI does not contend that the funds held by the Fair Fund - which consist of ill-gotten gains obtained by certain Respondents, civil money penalties, and prejudgment interest - constitute such a defined cash flow. If funds held by the Fair Fund were paid to an RMBS Trust, the Trusts' waterfall would not necessarily determine how such funds would be allocated. Second, assuming that, as noted by AMI, the governing documents of the RMBS trust "provide for the allocation of the losses on a mortgage pool," this fact does not necessarily determine how a Fair Fund payment would be allocated. As noted above, the funds placed in the FPD Fair Fund were ill-gotten gains obtained by certain Respondents, civil money penalties, and prejudgment interest, not payments for investor damages or restitution. Thus, the Commission concludes that, rather than being a "simple solution," distributing funds directly to the RMBS trusts would inject a great deal of uncertainty and complexity regarding how RMBS trustees would allocate funds to current or former investors in the RMBS Trusts due to the complex nature of the trusts and their waterfalls. The Commission's Plan avoids these uncertainties.

AMI's remaining concern is with the Proposed Plan's distribution of funds to investors who purchased securities at or near the time of the initial offerings, rather than investors who purchased certificates on the secondary market long after the initial offerings. This feature of the Proposed Plan is also derived from the factual and legal bases for Respondents' liability. Again, the Commission's Order found that the Respondents' liability stemmed from their conduct in the "*offer or sale of securities*." All initial investors in the RMBS Trusts experienced harm caused by Respondents' material misrepresentations and omissions and other fraudulent acts depriving investors of the benefit of their bargain, including whether to decline to participate in the offering or to negotiate a more favorable purchase price. For that reason, the Proposed Plan distributes the FPD Fair Fund to investors who purchased certificates at or near the time of the initial offering.

The Commission staff is not aware of extant records that would allow the Fund Administrator unambiguously to identify investors who bought directly from Respondents in the offering. In the absence of such records, the Plan treats investors who purchased certificates within 30 days of the offering as "initial investors." The 30-day cutoff reasonably ensures that distributions are made to those investors most likely to have been directly harmed by the conduct at issue in the Order. Investors whose purchases fall outside the 30-day cutoff ("secondary investors") were more likely to have had access to extensive additional information about the RMBS collateral that was unavailable to initial investors at the time of the offering. Beginning approximately 30 days after the offering, and continuing each month thereafter, the RMBS trustee issued reports that provided updated performance data for the RMBS collateral. So, for example, a secondary investor who purchased several months after the offering would have typically had access to multiple trustee reports when making an investment decision. The trustee reports would have shown how the mortgages in the collateral pool performed during that time (*e.g.*, how many mortgages were 30, 60, or 90 days delinquent, how many were in foreclosure, etc.). As a result, relative to an initial investor, a secondary investor was *less dependent* on Credit Suisse's representations in the offering because the secondary investor had access to a larger data set of actual performance history. Therefore, by limiting distributions to initial investors, the Proposed FPD Plan is reasonably designed to distribute funds to those investors whose harm is most closely linked to Respondents' misrepresentations and omissions *in the offering* itself.

B. <u>Establishment of the FPD Fair Fund</u>

The Proposed FPD Plan compensates investors using, in addition to the $12,256,561 in disgorgement and prejudgment interest monies collected from Credit Suisse and Asset Backed Securities Corp., the $6 million penalty also collected for the FPD Practice conduct. Under Section 308(a) of the Sarbanes-Oxley Act, as amended, a penalty ordered in an administrative action "shall, . . . at the direction of the Commission, be added to and become part of a disgorgement fund or other fund established for the benefit of [investor] victims." 15 U.S.C. § 7246(a). The Commission, in its discretion, concludes that the circumstances here justify the addition of the penalty money to other funds collected to create a Fair Fund for the FPD Practice.

Accordingly, IT IS HEREBY ORDERED that:

A. Pursuant to Section 308(a) of the Sarbanes-Oxley Act of 2002, as amended, the FPD Fair Fund is established; and

B. Pursuant to Rule 1104 of the Commission's Rules, 17 C.F.R. § 201.1104, the FPD Plan is approved.

By the Commission.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75878 / September 10, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-15098

In the Matter of Credit Suisse Securities USA (LLC); DLJ Mortgage Capital, Inc.; Credit Suisse First Boston Mortgage Acceptance Corp.; Credit Suisse First Boston Mortgage Securities Corp.; and Asset Backed Securities Corporation, Respondents.	ORDER ESTABLISHING FAIR FUND AND APPROVING PLAN OF DISTRIBUTION BULK SETTLEMENT PRACTICE

I.

On November 16, 2012, the Securities and Exchange Commission ("Commission") issued an Order Instituting Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933 and Section 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing a Cease-and-Desist Order ("Order") against Credit Suisse Securities (USA) LLC ("Credit Suisse Securities"), DLJ Mortgage Capital, Inc., Credit Suisse First Boston Mortgage Acceptance Corp., Credit Suisse First Boston Mortgage Securities Corp., and Asset Backed Securities Corporation (collectively, "Credit Suisse" or "Respondents").[1] In the Order, the Commission found that the Respondents engaged in misconduct including misrepresentations or omissions in the offer or sale of residential mortgage backed securities ("RMBS") relating to

[1] Securities Act Rel. No. 9368 (Nov. 16, 2012), available at http:///sec.gov/litigation/admin/2012/33-9368.pdf.

two undisclosed business practices that violated Sections 17(a)(2) and (3) of the Securities Act of 1933 (the "Securities Act"). 15 U.S.C. § 77q(a)(2) and (3)[2]. The Commission ordered the payment of separate monetary sanctions for each set of business practices. The Order indicated that, pursuant to Section 308(a) of the Sarbanes-Oxley Act of 2002, as amended, the Commission may create two separate Fair Funds, one for each group of investors harmed by the relevant business practices.

This order pertains to one of those practices, the bulk settlement practice ("Bulk Settlement Practice"). For the Bulk Settlement Practice conduct, the Commission ordered Respondents to pay, jointly and severally, a total of $101,747,769 in disgorgement, prejudgment interest, and civil money penalties. All payments required by the Order have been made.

As set out in the Order, the Commission's findings involving the Bulk Settlement Practice relate to 75 RMBS offerings underwritten by Credit Suisse from 2005 to 2007.

Structure of the RMBS Offerings. Each of the 75 RMBS offerings involved the securitization of collateral, consisting of residential mortgage loans, many of which had been previously purchased by Credit Suisse. Credit Suisse created separate trusts for each offering and deposited residential mortgage loans into each trust ("RMBS Trusts"). The RMBS Trusts then issued numerous classes or "tranches" of debt securities (commonly referred to as "certificates") backed by the RMBS collateral. Credit Suisse marketed and sold these certificates to investors using various offering documents. Each tranche of certificates held different rights to the mortgage payments and other defined funds ("cash flows") going to the RMBS Trust, *e.g.*, to the principal and interest payments made on the underlying mortgages. In broad terms, the

[2] The Commission also found that one respondent, Asset Backed Securities Corp., violated Section 15(d) of the Securities Exchange Act of 1934 ("Exchange Act"), 15 U.S.C. § 78o(d), and Rules 12b-20, 15d-1, and 15d-14(d) thereunder, 17 C.F.R. §§ 240.12b-20, 15d-1, and 15d-14(d), as a result of materially misleading statements in certifications that had been attached to reports filed with the Commission.

"senior tranches" of certificates held the first rights to cash flows to the RMBS Trust, and as a result paid a lower interest rate to investors; the "junior tranches" paid higher interest rates to investors, and their cash flow rights were subordinated to the senior tranches. This cash-flow priority structure is commonly referred to as a "waterfall."

The Bulk Settlement Practice. In general, when preparing for an RMBS offering, Credit Suisse purchased mortgage loans from entities that originated the loans ("originators"). The purchase agreements in these transactions typically contained provisions committing the originator to repurchase a loan if the originator breached various representations and warranties or if a borrower missed one of the first three payments due following Credit Suisse's purchase of the loan. The failure to make such a payment is referred to in the Order as an early payment default ("EPD"). When Credit Suisse discovered that a loan suffered an EPD or otherwise breached an originator's representation or warranty, Credit Suisse often demanded that the originator repurchase the loan. If an originator agreed to repurchase such a loan, and Credit Suisse had sold the loan to an RMBS Trust, Credit Suisse repurchased it from the Trust. However, as noted in the Order, Credit Suisse often settled repurchase claims against originators for loans sold to an RMBS Trust by accepting, and keeping for itself, cash payments from the originator in lieu of a repurchase while leaving the EPD loans underlying the settlements in an RMBS Trust. The Order describes such settlements as "bulk settlements" because they often involved cash payments for many different loans. Between 2005 and 2010, Credit Suisse entered into approximately 110 bulk settlements with originators related to loans previously sold to the 75 RMBS Trusts. As a result of its Bulk Settlement Practice, Credit Suisse improperly obtained approximately $55.7 million, including approximately $28.1 million in settlement proceeds and losses avoided of approximately $27.6 million.

In connection with its Bulk Settlement Practice, Credit Suisse made untrue statements of material fact and omitted to state material facts necessary in order to make statements made, in light of the circumstances under which they were made, not misleading. As described in the Order, Credit Suisse made various statements in the relevant offering materials about its obligations to repurchase loans from RMBS Trusts that materially breached any representations and warranties to repurchase loans that Credit Suisse made to the RMBS Trusts, and other information relevant to the origination of the loans. For example, Credit Suisse represented that it would repurchase loans from the RMBS Trusts whenever it discovered or was notified of a material breach of one of its representations or warranties to the RMBS Trusts. Additionally, for some RMBS offerings, Credit Suisse expressly represented in offering documents that it would repurchase certain early defaulting loans from the RMBS Trust. Offering documents for all of the 75 RMBS offerings represented that certain Credit Suisse Securities affiliates transferred all "right, title and interest" to the loans, as well as all "proceeds" from the loans, into the trusts. Because Credit Suisse failed to disclose its Bulk Settlement Practice and, for some RMBS offerings failed to comply with offering document provisions that required it to repurchase early defaulting loans, these statements were materially misleading or omitted material information necessary to make the statements not misleading. For example, notwithstanding its representations about when it would repurchase loans from the RMBS Trusts, Credit Suisse did not disclose that at times it also enforced EPD rights without repurchasing loans or that it retained the proceeds from bulk settlements entered into in such situations.

In addition, the Bulk Settlement Practice operated as a fraud or deceit on investors purchasing certificates in the RMBS offerings. The relevant conduct included, but was not limited to: (1) the settling of repurchase claims against originators, and keeping the consideration received, when Credit Suisse had sold the underlying loans to RMBS Trusts; (2) the collection of settlement proceeds for securitizations where Credit Suisse had passed through certain rights to an RMBS Trust or had itself promised to repurchase certain EPD loans; (3) the application of different quality review procedures for loans that Credit Suisse sought to put back to originators and the practice of not repurchasing such loans from trusts unless the originators had agreed to repurchase them; (4) the failure to disclose the bulk settlement practice when answering investor questions about EPDs; and (5) the failure to notify trustees or investors about the benefits Credit Suisse retained related to securitized loans, despite knowing that investors were unaware of the bulk settlement practice.

The Order stated that funds paid into each Fair Fund would be distributed pursuant to a distribution plan to be administered in accordance with the Commission's Rules of Practice governing Fair Fund and Disgorgement Plans (the "Commission's Rules"). On August 14, 2014, pursuant to the Order and Rule 1103 of the Commission's Rules, 17 C.F.R. § 201.1103, the Commission proposed the plan[3] ("Proposed Bulk Settlement Plan" or "Proposed Plan") and issued a notice of the Proposed Plan and opportunity for comment (the "Notice").[4] According to the Proposed Plan, the "purpose of this distribution is to compensate investors harmed by Credit Suisse's misrepresentations and omissions in its offering materials regarding the Bulk Settlement Practice." (¶ 5.)[5]

[3] Available at http://www.sec.gov/litigation/admin/2014/34-72850-ppd.pdf.

[4] Exchange Act Rel. No. 72850 (Aug. 14, 2014), available at https://www.sec.gov/litigation/admin/2014/34-72850.pdf. The Notice provided all interested persons thirty days to submit written comments on the Proposed Plan. The Notice advised such persons that they could obtain a copy of the Proposed Plan from the Commission's website or by submitting a written request to the Commission. The notice stated that all persons who desired to comment on the Proposed Plan could submit their comments no later than September 15, 2014.

[5] Paragraph references in this order denoted by the symbol "¶" refer to the numbered paragraphs in the Proposed Bulk Settlement Plan.

The proposed distribution methodology allocates the Net Fair Fund among the RMBS Trusts based on the proportion of the disgorgement paid by Respondents for each trust relative to the total disgorgement paid by Respondents. (¶ 55.) The funds for each trust are then allocated[6] to each trust's Eligible Claimants[7] on a *pro rata* basis determined by the Eligible Claimant's investment in the specific trust divided by the sum of all Eligible Claimants' investments in that trust. (¶ 56.)

The Commission received two comments on the Proposed Plan. This order addresses those comments.

After careful consideration, the Commission has determined to order a Fair Fund for the amounts paid by Respondents relating to the Bulk Settlement Practice conduct (the "Bulk Settlement Fair Fund"), and, for the reasons explained in this order, that the Proposed Bulk Settlement Plan should be approved with technical modifications (hereinafter the "Bulk Settlement Plan" or "Plan").[8]

---

[6] As explained in the Proposed Bulk Settlement Plan, a preliminary allocation is made and any Eligible Claimant whose preliminary calculation is less than a *de minimis* amount is removed from the pool of Eligible Claimants. (¶ 57.) In the event that a particular Trust is undersubscribed such that a small number of Eligible Claimants would stand to receive a disproportionately large recovery, the Fund Administrator, with agreement of the Commission staff, may use discretion in determining the final amount of the recovery. (¶ 59.)

[7] The Proposed Plan defines "Eligible Claimants" as persons (other than Excluded Parties) who purchased Eligible Securities on Eligible Purchase dates. The Proposed Plan also defines the capitalized terms in the definition of Eligible Claimant.

[8] The Bulk Settlement Plan contains minor technical modifications to its Proposed Bulk Settlement Plan. The technical modifications are: (i) in ¶ 59, wording changes were made to eliminate an undefined term, "Eligible Claim;" (ii) the modifier "proposed" is deleted wherever it appeared in the Proposed Bulk Settlement Plan because the Bulk Settlement Plan when adopted by the Commission is no longer "proposed;" and (iii) ¶ 85 is deleted because the Bulk Settlement Plan when adopted will not be published for further Notice and Comment. These technical modifications are minor. No substantive changes have been made to the methodology for calculating distributions or to the definition or eligibility criteria for Eligible Claimants. Commission staff does not deem these changes to be substantial or to require republication pursuant to Commission Rule 1103. Moreover, under Rule 1104, the Commission has complete discretion when considering whether to republish a plan for notice and comment, and the Commission is not required by Rule 1104 to republish a plan *even if* the Commission substantially modifies it prior to adoption.

II.

A. Public Comments on the Bulk Settlement Plan

1. Chris Katopis, Executive Director, Association of Mortgage Investors Letter

Chris Katopis, the Executive Director of the Association of Mortgage Investors ("AMI"), submitted a comment (the "AMI Comment")[9] that stated three concerns with the Proposed Plan: 1) that the Proposed Plan's *pro rata* allocation "improperly override[s] the recognized payment priority or 'waterfall' established by the governing documents of the RMBS trust . . . thereby favoring senior certificate-holders, who may not in fact suffer losses, over more junior classes of certificate-holders"; 2) that the Proposed Plan arbitrarily excludes nearly all subsequent purchasers, potentially undermining the secondary market for RMBS; and 3) that by paying investors directly rather than paying the RMBS trustees, "the Proposed Plan fails to take advantage of [the RMBS waterfall,] a method of distribution that is more efficient, fair, and consistent with investor expectations." The Commission has considered the AMI Comment and, for the reasons discussed below, is approving the Proposed Bulk Settlement Plan with only technical modifications.[10]

First, AMI's contention that a *pro rata* allocation overrides the RMBS Trusts' waterfall, thereby favoring senior certificate-holders "who may not in fact [have] suffer[ed] losses," indicates that the harm that is the focus of AMI's concern is limited to the *investment losses* that flowed from the *eventual performance* of certificates held by investors. Subsequent investment performance losses, however, are distinct from the harm to investors addressed in the

---

[9]The three concerns raised in the AMI Comment have also been raised for the Commission's distribution plan for the previously noted other undisclosed Credit Suisse business practice, the first payment default practice ("FPD Practice"). Although these practices involved different conduct, the portion of this order responding to the AMI Comment and the corresponding portion of the order approving the distribution plan for FPD Practice are nearly identical because the analysis of the concerns is the same for both plans.

[10] *See* fn. 7, *supra*.

Bulk Settlement Plan. A proportionate harm accrued to *all* investors *at the time of the initial offering* when, as a result of Credit Suisse's misconduct including its misrepresentations and omissions in the offering documents and marketing materials, investors were deprived of the benefit of their bargain with Credit Suisse. The Bulk Settlement Plan's purpose and design for addressing investor harm flow directly from the violations at issue in the Order. As noted in the Plan, the "purpose of this distribution is to compensate investors in RMBS Trusts harmed by Credit Suisse's misrepresentations and omissions *in its offering materials* regarding the Bulk Settlement Practice." (¶ 5, emphasis added.) The Order found that Credit Suisse violated Sections 17(a)(2) and 17(a)(3) of the Securities Act because of material misstatements and omissions, and other acts that operated as a fraud or deceit on RMBS investors, "in the offer or sale of securities." The misleading statements and omissions at issue in the Order were made in the securitizations' offering documents and in other materials Credit Suisse used to market the offering to potential investors. In those documents and materials, Credit Suisse misled investors through various statements, noted above and in the Order, while failing to disclose the Bulk Settlement Practice, and with respect to certain RMBS transactions, by its failure to comply with offering document provisions that required Credit Suisse to repurchase certain loans. As noted in the Commission's Order, Credit Suisse's Bulk Settlement Practice would have been material to investors' decisions whether to invest with Credit Suisse in these RMBS offerings had investors known about this practice.

Had Credit Suisse disclosed *to potential initial investors* the operation of its Bulk Settlement Practice, it stands to reason that *all initial* investors would have considered the information in their investment decisions. Investors may have decided to invest in different securities or demanded to be compensated (*e.g.*, to receive a higher interest rate) based on their knowledge of the Bulk Settlement Practice. For that reason, even if there had been no losses from the failure of the mortgages underlying the 75 securitizations, there still would have been harm to *all initial* investors caused by the Respondents' conduct. Unlike investment performance harm, the harm in the offer and sale affected senior and junior certificate-holders alike. It is this harm that the Commission's Plan seeks to address through a *pro rata* distribution. The Plan is reasonably designed to compensate investors for such harm.

The Commission's objective is to distribute the Bulk Settlement Practice Fair Fund in a fair and reasonable manner, taking into account the relevant facts and circumstances.[11] In light of the factual and legal bases for Respondents' liability, the Commission exercises its discretion to distribute funds *pro rata* to all investors who purchased certificates in the RMBS Trusts' offerings or near the time of the offerings.

Closely related to AMI's first concern is AMI's third concern that the Proposed Plan fails to take advantage of the efficiencies, fairness and consistency with investor expectations associated with the waterfall priority of distributions. AMI's contention, however, that the Commission has "overlook[ed] the possibility that simply distributing proceeds through the trusts to flow through established waterfalls is a more fair and efficient means to compensate investors" is incorrect. The Commission staff carefully considered whether to distribute funds directly to the trustees for the RMBS Trusts as well as the significance of the RMBS Trusts' waterfalls. There are significant legal and practical barriers to a waterfall distribution, and the proceeds cannot be "simply" distributed through the RMBS Trusts. First, an RMBS Trust's waterfall generally determines the prioritization of defined cash flows from the collateral owned

---

[11] *See Official Committee of Unsecured Creditors of WorldCom, Inc. v. SEC*, 467 F.3d 73, 82 (2d Cir. 2006) ("So long as the district court is satisfied that 'in the aggregate, the plan is equitable and reasonable,' the SEC may engage in the 'kind of line-drawing [that] inevitably leaves out some potential claimants'"), citing *SEC v. Wang,* 944 F.2d 80, 88 (2d Cir. 1991).

by the Trusts. However, AMI does not contend that the funds held by the Fair Fund - which consist of ill-gotten gains obtained by certain Respondents, civil money penalties, and prejudgment interest - constitute such a defined cash flow. If funds held by the Fair Fund were paid to an RMBS Trust, the Trust's waterfall would not necessarily determine how such funds would be allocated. Second, assuming that, as noted by AMI, the governing documents of the RMBS Trust "provide for the allocation of the losses on a mortgage pool," this fact does not necessarily determine how a Fair Fund payment would be allocated. As noted above, the funds placed in the Bulk Settlement Practice Fair Fund were ill-gotten gains obtained by certain Respondents, civil money penalties, and prejudgment interest, not payments for investor damages or restitution. Thus, the Commission concludes that, rather than being a "simple solution," distributing funds directly to the RMBS Trusts would inject a great deal of uncertainty and complexity regarding how RMBS trustees would allocate funds to current or former investors in the RMBS Trusts due to the complex nature of the trusts and their waterfalls. The Commission's Plan avoids these uncertainties.

AMI's remaining concern is with the Proposed Plan's distribution of funds to investors who purchased securities at or near the time of the initial offerings, rather than investors who purchased certificates on the secondary market long after the initial offerings. This feature of the Proposed Plan is also derived from the factual and legal bases for Respondents' liability. Again, the Commission's Order found that the Respondents' liability stemmed from their conduct in the "*offer or sale of securities*." All initial investors in the RMBS Trusts experienced harm caused by Respondents' material misrepresentations and omissions and other fraudulent acts depriving investors of the benefit of their bargain, including whether to decline to participate in the offering or to negotiate a more favorable purchase price. For that reason, the Proposed Plan distributes the Bulk Settlement Practice Fair Fund to investors who purchased certificates at or near the time of the initial offering.

The Commission staff is not aware of extant records that would allow the Fund Administrator unambiguously to identify investors who bought directly from Respondents in the offering. In the absence of such records, the Plan treats investors who purchased certificates within 30 days of the offering as "initial investors." The 30-day cutoff reasonably ensures that distributions are made to those investors most likely to have been directly harmed by the conduct at issue in the Order. Investors whose purchases fall outside the 30-day cutoff ("secondary investors") were more likely to have had access to additional information about the RMBS collateral that was unavailable to initial investors at the time of the offering. Beginning approximately 30 days after the offering, and continuing each month thereafter, the RMBS trustee issued reports that provided updated performance data for the RMBS collateral. So, for example, a secondary investor who purchased several months after the offering would have typically had access to multiple trustee reports when making an investment decision. The trustee reports would have shown how the mortgages in the collateral pool performed during that time (*e.g.*, how many mortgages were 30, 60, or 90 days delinquent, how many were in foreclosure, etc.). As a result, relative to an initial investor, a secondary investor was *less dependent* on Credit Suisse's representations in the offerings because the secondary investor had access to a larger data set of actual performance history. Therefore, by limiting distributions to initial investors, the Proposed Bulk Settlement Plan is reasonably designed to distribute funds to those investors whose harm is most closely linked to Respondents' misrepresentations and omissions *in the offering* itself.

2. Erik Haas, Patterson Belknap Webb & Tyler, LLP, Representing MBIA Insurance Corporation

Counsel for MBIA Insurance Corporation ("MBIA") submitted a comment letter ("MBIA Comment") requesting that the Commission revise the Bulk Settlement Plan with respect to one of the 75 RMBS offerings, the Home Equity Mortgage Trust, Series 2007-2 (HEMT 2007-2). Specifically, MBIA requests the Proposed Plan be revised "to clarify MBIA's entitlement to the reimbursement of its claim payments" relating to HEMT 2007-02. In support of its request, MBIA indicates that it has issued an insurance policy to guarantee payments to HEMT 2007-02 to cover amounts due to certificate holders ("Policy") and has made over $390 million in Policy payments to HEMT 2007-02. MBIA claims that as a result of its Policy and its related payments "MBIA owns any claims of certificate holders – including securities law claims – to the extent of the claim payments made" based on the principles of subrogation. In support of its position, MBIA asserts that the Respondents' disgorgement payment pursuant to the Order "represents funds that belong to the Trusts, including HEMT 2007-02." MBIA cites the Order for the proposition that keeping the proceeds of bulk settlements was "contrary to Respondents' obligation to transfer 'right, title and interest' to the loans, and all 'proceeds' from the loans, to the securitization Trusts." As a result, MBIA takes the position that funds to be distributed by the Plan "must be distributed in accordance with the 'waterfall'" which in turn requires, according to MBIA, that "after senior certificate holders are paid their monthly distribution, all remaining funds [be] distributed to MBIA to reimburse it for prior draws on the Policy and for any amounts owed to it under [its] [i]nsurance [a]greement."

The Commission has considered the MBIA Comment and, for the reasons discussed below, declines to substantively modify the Proposed Plan as requested by MBIA and, instead, is approving the Proposed Bulk Settlement Plan with only technical modifications.[12]

MBIA's request that the Proposed Plan be revised to "clarify MBIA's entitlement to reimbursement" would require the Commission to adjudicate a potential claim that MBIA may have based on a contractual insurance arrangement. It is not appropriate for the Commission, in essence, to adjudicate claims unrelated to the federal securities laws in the context of a Fair Fund distribution, such as whether MBIA has a contractual claim or subrogation right against purchasers or holders of HEMT 2007-02 certificates.

Moreover, even if it were appropriate for the Commission to consider such a claim, the findings in the Order cited by MBIA in support of its entitlement claim to Fair Fund proceeds misconstrue those portions of the Order. The statement in the Order that "[o]ffering documents . . . represented that [Credit Suisse] transferred all 'right, title and interest' to the loans, as well as all 'proceeds' from the loans to the trusts" is a finding limited to what *representations* were made to investors in the offering documents. This finding does not establish or purport to establish who owned, or was entitled receive, the bulk settlement proceeds.

Similarly, the Commission's findings related to Credit Suisse's ill-gotten gains and order of disgorgement establish only that Credit Suisse obtained funds causally connected to violations of the federal securities laws and, as a result, that Credit Suisse was not entitled to retain those funds. Contrary to the implication in MBIA's Comment, findings of ill-gotten gain and a

[12] *See* fn. 7, *supra.*

disgorgement order do not address whether any particular third person has or might have a claim for damages for the same amount.[13]

The Bulk Settlement Plan's purpose is to compensate investors harmed by Respondents' misrepresentations and omissions in Credit Suisse's offering materials. The Plan establishes a process for identifying those harmed investors, calculating the amount of individual distributions, and distributing funds. The process of formulating a Fair Fund distribution plan is not the proper time or place to resolve potential claims by third parties to funds proposed to be allocated to investors under the Plan. To the extent that claims exist, they should be asserted in an appropriate forum.

Like AMI's comment, MBIA's comment that Fair Fund funds "must be distributed in accordance with the waterfall" is premised on an assumption that investors were harmed because the bulk settlement funds were owed to the trusts. However, as noted above, harm accrued to *all* investors *at the time of the initial offering* when, as a result of the misrepresentations and omissions in the offering documents and marketing materials, these initial investors were deprived of the benefit of their bargain with Credit Suisse. Moreover, the Commission's Order did not make findings related to the trusts' rights to the proceeds of the Bulk Settlement Practice. The Commission's Order found that Respondents violated Sections 17(a)(2) and 17(a)(3) of the Securities Act based on the impact of the Respondents' undisclosed Bulk Settlement Practice on the relevant offers or sales of securities to investors. For reasons discussed more fully above, the

[13] *Cf. SEC v. Fischbach Corp.*, 133 F.3d 170 (2d Cir. 1997) ("Although disgorged funds may often go to compensate securities fraud victims for their losses, such compensation is a distinctly secondary goal."); *SEC v. Whitmore*, 659 F.3d 1, 11 n.2 (D.C. Cir. 2001) (stating, in response to an argument about apportioning among wrongdoers, that "this court has emphasized that the purpose of disgorgement is not to compensate for losses but to deprive the wrongdoer of his ill-gotten gain").

Commission finds that a *pro rata* distribution to investors is fair and reasonable in light of the legal and factual bases for Respondents' liability.

B. Establishment of Bulk Settlement Fair Fund

The Proposed Bulk Settlement Plan compensates investors using, in addition to the $68,747,769 in disgorgement and prejudgment interest monies collected from Respondents, the $33 million penalty also collected for the Bulk Settlement Practice conduct. Under Section 308(a) of the Sarbanes-Oxley Act, as amended, a penalty ordered in an administrative action "shall, . . . at the direction of the Commission, be added to and become part of a disgorgement fund or other fund established for the benefit of [investor] victims." 15 U.S.C. § 7246(a). The Commission, in its discretion, concludes that the circumstances here justify the addition of the penalty money to other funds collected to create a Fair Fund for the Bulk Settlement Practice.

Accordingly, IT IS HEREBY ORDERED that:

A. Pursuant to Section 308(a) of the Sarbanes-Oxley Act of 2002, as amended, the Bulk Settlement Fair Fund is established; and

B. Pursuant to Rule 1104 of the Commission's Rules, 17 C.F.R. § 201.1104, the Bulk Settlement Plan is approved.

By the Commission.

SECURITIES AND EXCHANGE COMMISSION

SECURITIES EXCHANGE ACT OF 1934
Release No. 75879 / September 10, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16802

In the Matter of **Bala Cynwyd Corp.,** **Digital Lighthouse Corp.,** **Great Idea Corp.,** **Green Carbon Technologies Corp.,** **Riverside Parkway, Inc.,** **Southern Community Bancshares, Inc.,** **SubMicron Technologies, Inc., and** **United eSystems, Inc.,** **Respondents.**	**ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS AND NOTICE OF HEARING PURSUANT TO SECTION 12(j) OF THE SECURITIES EXCHANGE ACT OF 1934**

I.

The Securities and Exchange Commission ("Commission") deems it necessary and appropriate for the protection of investors that public administrative proceedings be, and hereby are, instituted pursuant to Section 12(j) of the Securities Exchange Act of 1934 ("Exchange Act") against the Respondents named in the caption.

II.

After an investigation, the Division of Enforcement alleges that:

A. RESPONDENTS[1]

1. Bala Cynwyd Corp. ("BLCY") (CIK No. 52813) is a revoked New Jersey corporation located in Bala Cynwyd, Pennsylvania with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). BLCY is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-QSB for the

[1] In cases where the short form of the issuer's name is in all capital letters, the short form is also its stock symbol.

period ended July 31, 2001. As of April 29, 2015, the common stock of BLCY was not publicly quoted or traded.

2. Digital Lighthouse Corp. ("DGLHQ") (CIK No. 1022191) is a void Delaware corporation located in Englewood, Colorado with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). DGLHQ is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended March 31, 2001, which reported a net loss of $4,317,000 for the prior three months.On July 16, 2001 filed a Chapter 11 petition in the U.S. Bankruptcy Court for the District of Colorado, which was closed on September 27, 2011. As of April 29, 2015, the common stock of DGLHQ was not publicly quoted or traded.

3. Great Idea Corp. ("Great Idea") (CIK No. 1547389) is a revoked Nevada corporation located in Las Vegas, Nevada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Great Idea is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form S-1-A on January 30, 2013, which reported a net loss of $11,090 for the period from November 4, 2011 to September 30, 2012. As of April 29, 2015, the common stock of Great Idea was not publicly quoted or traded.

4. Green Carbon Technologies Corp. ("Green Carbon") (CIK No. 1467233) is a revoked Nevada corporation located in Carson City, Nevada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Green Carbon is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended March 31, 2011, which reported a net loss of $12,694 for the prior nine months. As of April 29, 2015, the common stock of Green Carbon was not publicly quoted or traded.

5. Riverside Parkway, Inc. ("Riverside") (CIK No. 1024189) is a suspended Oklahoma corporation located in Cleveland, Oklahoma with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Riverside is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-SB on October 15, 1996, which reported a net loss of $95,422 for the six months ended June 30, 1996. As of January 26, 2015, the common stock of Riverside was not publicly quoted or traded.

6. Southern Community Bancshares, Inc. ("SNCBQ") (CIK No. 1171017) is a dissolved Georgia corporation located in Fayetteville, Georgia with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). SNCBQ is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2008, which reported a net loss of $9,609,996 for the prior nine months.On September 1, 2009 filed a Chapter 7 petition in the U.S. Bankruptcy Court for the Northern District of Georgia, which was closed on October 24, 2013. As of January 26, 2015, the common stock of SNCBQ was not publicly quoted or traded.

7. SubMicron Technologies, Inc. ("SubMicron") (CIK No. 1392486) is a delinquent Colorado corporation located in Dallas, Texas with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). SubMicron is delinquent in its periodic

filings with the Commission, having not filed any periodic reports since it filed a Form 10-K for the period ended December 31, 2011, which reported a net loss of $10,577 for the prior year. As of January 26, 2015, the common stock of SubMicron was not publicly quoted or traded.

8. United eSystems, Inc. ("UESY") (CIK No. 1171357) is a Nevada corporation located in Covington, Louisiana with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). UESY is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2011, which reported a net loss of $660,638 for the prior nine months. As of January 26, 2015, the common stock of UESY was not publicly quoted or traded.

B. DELINQUENT PERIODIC FILINGS

9. As discussed in more detail above, all of the Respondents are delinquent in their periodic filings with the Commission, have repeatedly failed to meet their obligations to file timely periodic reports, and failed to heed delinquency letters sent to them by the Division of Corporation Finance requesting compliance with their periodic filing obligations or, through their failure to maintain a valid address on file with the Commission as required by Commission rules, did not receive such letters.

10. Exchange Act Section 13(a) and the rules promulgated thereunder require issuers of securities registered pursuant to Exchange Act Section 12 to file with the Commission current and accurate information in periodic reports, even if the registration is voluntary under Section 12(g). Specifically, Rule 13a-1 requires issuers to file annual reports, and Rule 13a-13 requires domestic issuers to file quarterly reports.

11. As a result of the foregoing, Respondents failed to comply with Exchange Act Section 13(a) and Rules 13a-1 and/or 13a-13 thereunder.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate for the protection of investors that public administrative proceedings be instituted to determine:

A. Whether the allegations contained in Section II hereof are true and, in connection therewith, to afford the Respondents an opportunity to establish any defenses to such allegations; and,

B. Whether it is necessary and appropriate for the protection of investors to suspend for a period not exceeding twelve months, or revoke the registration of each class of securities registered pursuant to Section 12 of the Exchange Act of the Respondents identified in Section II hereof, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents.

IV.

IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice [17 C.F.R. § 201.110].

IT IS HEREBY FURTHER ORDERED that Respondents shall file an Answer to the allegations contained in this Order within ten (10) days after service of this Order, as provided by Rule 220(b) of the Commission's Rules of Practice [17 C.F.R. § 201.220(b)].

If Respondents fail to file the directed Answers, or fail to appear at a hearing after being duly notified, the Respondents, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents, may be deemed in default and the proceedings may be determined against it upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f), and 310 of the Commission's Rules of Practice [17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f), and 201.310].

This Order shall be served forthwith upon Respondents personally or by certified, registered, or Express Mail, or by other means permitted by the Commission Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 120 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice [17 C.F.R. § 201.360(a)(2)].

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

By the Commission.

September 10, 2015

Securities Exchange Act of 1934
Release No. 75886 / September 10, 2015

In the Matter of **The Options Clearing Corporation**	)	**Order Discontinuing the Automatic Stay**

This matter comes before the Commission on the Options Clearing Corporation's ("OCC") motion to lift the automatic stay of the approval, through delegated authority, of OCC's plan for raising additional capital ("Capital Plan") to support its function as a systemically important financial market utility. On January 26, 2015, the Commission issued a notice of filing of the proposed rule change regarding the Capital Plan.[1] After consideration of the record in the proposed rule change, the Division of Trading and Markets, for the Commission pursuant to delegated authority, issued an order approving ("Approval Order") the Capital Plan on March 6, 2015.[2]

BATS Global Markets, Inc. ("BATS"), BOX Options Exchange LLC ("BOX"), KCG Holdings, Inc. ("KCG"), Miami International Securities Exchange, LLC ("MIAX"), and Susquehanna International Group, LLP ("SIG") (collectively "Petitioners") each filed petitions for review of the Approval Order, challenging the action taken by delegated authority. The filing of the petitions automatically stayed the Approval Order pursuant to Commission Rule of Practice 431(e).[3] The Commission has entered a separate Order Granting the Petitions for

1 Securities Exchange Act Release No. 74136 (January 26, 2015), 80 FR 5171 (January 30, 2015) (SR-OCC-2015-02).

2 Order Approving Proposed Rule Change Concerning a Proposed Capital Plan for Raising Additional Capital That Would Support the Options Clearing Corporation's Function as a Systemically Important Financial Market Utility, Securities Exchange Act Release No. 74452 (March 6, 2015), 80 FR 13058 (March 12, 2015) (SR-OCC-2015-02). The Capital Plan was previously filed as an advance notice pursuant to Section 806(e)(1) of the Payment, Clearing, and Settlement Supervision Act of 2010. *See* 12 U.S.C. § 5465(e)(1). The Commission issued a notice of no objection to the advance notice on February 26, 2015. *See* Securities Exchange Act Release No. 74387 (February 26, 2015), 80 FR 12215 (March 6, 2015) (SR-OCC-2014-813).

3 17 CFR 201.431(e).

Review and Scheduling Filing of Statements.[4]

In response to the automatic stay imposed by the filing of the petitions to review the Approval Order, OCC filed a Motion to Lift the Stay on April 2, 2015, citing the public policy reasons for implementing the Capital Plan. The Petitioners responded, arguing that continuing the automatic stay is appropriate in light of the important policy and competition issues raised by the Approval Order.

The Commission finds that it is in the public interest to lift the stay during the pendency of the Commission's review. Under the circumstances of this case, the Commission believes, on balance, that strengthening the capitalization of a systemically important clearing agency, such as OCC, is a compelling public interest. The Commission also believes that the concerns raised by the Petitioners regarding potential monetary and competitive harm do not currently justify maintaining the stay during the pendency of the Commission's review. Nor does the Commission believe that lifting the stay precludes meaningful review of the Approval Order.

For the reasons stated above, it is hereby:

ORDERED that the that the automatic stay of delegated action pursuant to Commission Rule of Practice 431(e)[5] is hereby discontinued, and that OCC's Motion to Lift Stay of the staff's action in approving by delegated authority File No. SR-OCC-2015-02[6] is GRANTED.

The order approving such proposed rule change shall remain in effect.

By the Commission.

Robert W. Errett

MATTHEW D. SAMPLE

OPINION OF THE COMMISSION

APPLICATION FOR CONSENT TO ASSOCIATE

Denial of Rule 193 Application

Applicant, who was barred in a settled follow-on proceeding based on an antifraud injunction, applied for consent to associate with a registered investment adviser. The Director of the Division of Enforcement denied the application pursuant to delegated authority. *Held*, denial of the application is affirmed because Applicant failed to show that the proposed association is consistent with the public interest.

APPEARANCES:

Edwin J. Tomko, of Dykema Cox Smith, for Matthew D. Sample.

Joseph Brenner, Sam Waldon, Kenneth H. Hall, and *Carolyn Morris*, for the Division of Enforcement.

Appeal filed: February 18, 2015
Last brief received: July 7, 2015

Matthew D. Sample, a former associated person of Kingsroad Financial Insurance Services, Inc. ("Kingsroad"), d/b/a Measured Risk Portfolios, a Commission-registered investment adviser, appeals from action taken by the Director of the Division of Enforcement ("Division") pursuant to delegated authority.[1] The Division Director denied his application for consent to associate with Kingsroad and its related broker-dealer, Independent Financial Group, LLC ("IFG"),[2] under Rule 193 of the Commission's Rules of Practice.[3] The Division opposes Sample's appeal. For the reasons set forth below, we conclude that Sample has failed to show that the proposed association would be consistent with the public interest. Accordingly, we affirm the action taken by delegated authority.

I. Background

A. Sample consented to be permanently enjoined from violating antifraud provisions of the federal securities laws.

On April 4, 2014, we filed a complaint against Sample in the United States District Court for the Northern District of Texas, alleging that, from October 2009 to June 2012 ("Relevant Period"), he raised almost $1 million from five investors based on representations that he would use the money to trade on the investors' behalf.[4] Instead, the complaint alleged, Sample fraudulently diverted approximately one-third of the money for his personal use and to make payments to other investors. The complaint further alleged that during the Relevant Period Sample was associated with broker-dealer and investment adviser firms, including Kingsroad.[5]

According to the complaint, Sample raised the money from investors in New Mexico and elsewhere through his unregistered hedge fund, The Lobo Volatility Fund, LLC. Sample told investors he would take a monthly management fee of 1/12 of 1% of the hedge fund's net asset value, 20% of trading profits, and limited expenses. But almost immediately after receiving the investors' funds, Sample diverted significant amounts for his own personal use. When his trading strategy failed, resulting in the loss of all remaining investor funds, Sample provided investors

---

1 *See* 17 C.F.R. § 200.30-4(a)(5) (granting the Division Director delegated authority to grant or deny applications made pursuant to Rule 193).

2 IFG is registered with the Commission as a broker-dealer and investment adviser. The exact relationship between Kingsroad and IFG is unclear.

3 17 C.F.R. § 201.193.

4 *SEC v. Sample*, Civil Action No. 3:14-CV-01218-B (N.D. Tex. Apr. 4, 2014), ECF No. 1.

5 Between August 2007 and July 2010, Sample was employed by VTrader Pro, LLC, a registered broker-dealer. Between April 1, 2012 and April 23, 2014, Sample was employed by Kingsroad. Sample represents that the fraudulent activity that overlapped with his employment at Kingsroad involved the preparation and transmittal of a false monthly account statement of one investor.

with false documents that made it look like his trading had been successful. Additionally, Sample raised at least $50,000 from a new investor under false pretenses and then used those funds to make partial payment to prior investors who had demanded a refund.

On April 7, 2014, without admitting or denying the allegations in the complaint, Sample consented to the district court's entry of a final judgment permanently enjoining him from violating Section 17(a) of the Securities Act of 1933, Section 10(b) of the Securities Exchange Act of 1934 and Exchange Act Rule 10b-5, and Sections 206(1), 206(2), and 206(4) of the Investment Advisers Act of 1940 and Advisers Act Rule 206(4)-8,[6] and from directly or indirectly soliciting or accepting funds from any person or entity for any unregistered offering of securities.[7]

B. Sample consented to be barred from the securities industry based on the antifraud injunction.

On April 22, 2014, following the entry of the injunction, we instituted and simultaneously settled administrative proceedings against Sample ("Settled Order").[8] In the Settled Order, we found that Sample had been permanently enjoined from violating the aforementioned provisions of the securities laws based on allegations that he managed an unregistered hedge fund that raised $1 million from five investors, misrepresented his intended use of investor funds, misappropriated investor funds for his personal use and to repay prior investors, and intentionally concealed trading losses from investors.[9]

Without admitting or denying the findings therein, except as to the Commission's jurisdiction and the fact that he had been permanently enjoined as a result of the April 7, 2014 judgment, Sample consented to the entry of a bar prohibiting him from associating with a broker, dealer, investment adviser, municipal securities dealer, municipal advisor, transfer agent, or nationally recognized statistical rating organization, and from participating in a penny stock offering, including acting as a promoter, finder, consultant, agent, or other person who engages in activities with a broker, dealer, or issuer for purposes of the issuance or trading in a penny stock, or inducing or attempting to induce the purchase or sale of a penny stock.[10] The bar from association was unqualified because it did not contain a provision indicating that after the expiration of a

[9] *Id.* at *1.

[10] *Id.* at *2.

specified time Sample could apply to re-enter the securities industry.[11]

C. Sample filed a Rule 193 application seeking consent to associate with Kingsroad.

On June 5, 2014, Sample filed a Rule 193 application with the Commission, subsequently supplemented, seeking a "limited lifting" of the bar to permit him to associate with Kingsroad as a wholesaler to "market [the] firm's managed account strategy to financial advisors at broker-dealers with whom [the firm] has [selling] agreements." In the application, Sample asserts that his "primary goal" is to make "full restitution" to defrauded investors. To this end, Sample represents that a friend has offered to lend him $200,000, to be placed in an escrow account for the benefit of defrauded investors and to be repaid from his earnings after he obtains consent to associate. Sample also represents that he will deposit all of his after-tax, annual income in excess of $60,000 into the escrow account for the repayment of defrauded investors, and that he will make defrauded investors the beneficiaries of his $2 million, 15-year term life insurance policy.[12]

Sample further represents that he will be directly supervised by Kingsroad's principals and will have no contact with retail customers or access to investor funds. A written statement dated May 16, 2014, from Kingsroad principal Lawrence Kriesmer[13] describes the proposed supervision to be exercised over Sample:[14]

> [Sample] would be a solicitor of our firm and would call exclusively on other [registered investment advisers] as well as broker dealers and their investment advisor representatives in order to explain our money management strategy and try to secure solicitation or sub-advisory arrangements. [Sample] would work strictly with advisors and not with the general public. Our firm will have other employees who will be able to

---

[11] See Letter to: National Association of Securities Dealers, Inc., New York Stock Exchange, Inc., and American Stock Exchange Re: Unqualified Bar Orders, Exchange Act Release No. 34720, 1994 WL 544424, at *1 (Sept. 26, 1994) (stating that unqualified bars "do not contain any proviso for re-application . . . after the expiration of a specified period").

[12] The application represents, without elaboration or support, that if Sample is not permitted to associate with Kingsroad, he "mostly likely" will be prosecuted by the U.S. Attorney's Office in Albuquerque, New Mexico.

[13] The written statement is attached to Sample's brief as "Exhibit 2."

[14] *See* 17 C.F.R. § 201.193(b)(4) (requiring the written statement of the proposed employer to describe: "(i) the terms and conditions of employment and supervision to be exercised over such applicant and, where applicable, by such applicant; (ii) the qualifications, experience, and disciplinary records of the proposed supervisor(s) of the applicant; (iii) the compliance and disciplinary history, during the two years preceding the filing of the application, of the office in which the applicant will be employed; and (iv) the names of any other associated persons in the same office who have previously been barred by the Commission, and whether they are to be supervised by the applicant").

> host or attend events where the general public will be present. [Sample] will not have access to client accounts and will play no role in the day to day operations or trading decisions in our firm. He will be located in our office so that we are able to overhear his conversations with other advisors. His email will be monitored. My business partner or I will periodically make joint visits with [Sample] or follow up calls to outside advisors to insure that [Sample's] communications are consistent with our strategies.

The written statement indicates that Kingsroad has not had any disciplinary events during the past two years, other than the proceedings against Sample discussed above, that no other associated persons are subject to bars, and that Kriesmer has no disciplinary history.

D. The Director of the Division of Enforcement, acting pursuant to delegated authority, denied the Rule 193 application.

On October 23, 2014, the Division's Office of Chief Counsel provided Sample with a formal statement setting forth the reasons for its proposed recommendation that the application be denied, and on November 21, 2014, Sample submitted a response.[15] On February 4, 2015, the Division Director, acting pursuant to delegated authority, denied the application.[16] This appeal followed.

II. Analysis

Rule 193 provides a process by which barred individuals can apply to the Commission for consent to become associated with an entity that is not a member of an SRO, *e.g.*, an investment adviser, an investment company, or a transfer agent.[17] Rule 193 states that applicants "shall make

---

[15] *See* 17 C.F.R. § 201.193(e) (requiring applicant to be advised of any adverse recommendation proposed by the staff and provided with a written statement of reasons, after which the applicant has thirty days to submit a written response).

[16] *Matthew D. Sample*, Advisers Act Release No. 4021, 2015 WL 456508, at *3 (Feb. 4, 2015).

[17] 17 C.F.R. § 201.193(a) (providing that an application for consent to associate may be made "where a Commission order bars an individual from association with a registered entity and: (1) [s]uch barred individual seeks to become associated with an entity that is not a member of a self-regulatory organization; or (2) [t]he order contains a proviso that application may be made to the Commission after a specified period of time").

In "Attachment A" to his brief, Sample requests that we "modify" the bar to allow him to associate with Kingsroad. But Rule 193 does not provide for modification of bars, which remain in effect even after consent to associate is granted, *see Applications by Barred Individuals for Consent to Associate with a Registered Broker, Dealer, Municipal Securities Dealer, Investment Adviser or Investment Company*, Exchange Act Release No. 20783, 1984 WL 547096, at *2 (Mar. 16, 1984) (stating that "Commission approval of an application for consent to associate [under the

(continued. . .)

a showing satisfactory to the Commission that the proposed association would be consistent with the public interest."[18] Rule 193 requires an applicant to address the manner and extent of the supervision to be exercised over the applicant and the capacity or position in which the applicant proposes to be associated. The Preliminary Note to the Rule states:

> The nature of the supervision that an applicant will receive or exercise as an associated person with a registered entity is an important matter bearing upon the public interest. In meeting the burden of showing that the proposed association is consistent with the public interest, the application and supporting documentation must demonstrate that the proposed supervision, procedures, or terms and conditions of employment are reasonably designed to prevent a recurrence of the conduct that led to the imposition of the bar.[19]

Rule 193 further requires an applicant to address the passage of time since the imposition of the bar, any restitution or similar action taken to recompense persons injured by the misconduct that resulted in the bar, the applicant's compliance with the order imposing the bar, the applicant's employment following the imposition of the bar, any relevant courses, seminars, or examinations completed after the bar to prepare for a return to the securities business, and any other information material to the application.[20] Finally, the Preliminary Note to Rule 193 states that the Commission "will consider the nature of the findings that resulted in the bar when making its determination as to whether the proposed association is consistent with the public interest."[21]

As discussed below, Sample has not met his burden of demonstrating that the proposed association is consistent with the public interest. He provides no support for his assertion that the proposed supervisory procedures are reasonably designed to prevent a recurrence of the misconduct, and the events that have occurred in the short time since the imposition of the bar do

---

(...continued)
predecessor version of Rule 193] . . . does not modify or vacate the Commission order nor does it remove or lift the bar; the order and bar remain in effect"), and Sample's petition is for review of the Division Director's denial of his Rule 193 application. As a result, the request for modification of the bar is not properly before us. *Cf. Victor Teicher*, Exchange Act Release No. 56744, 2007 WL 3254806, at *2 (Nov. 5, 2007) (rejecting request to modify bar order that sought relief under Rule 193 where respondent had not filed a Rule 193 application or complied with its requirements).

18 17 C.F.R. § 201.193(c).

19 *Id.* (Preliminary Note).

20 17 C.F.R. § 201.193(d).

21 *Id.* (Preliminary Note). The Note emphasizes that the Commission "will not consider any application that attempts to reargue or collaterally attack the findings that resulted in the Commission's bar order." In "Attachment 7A" to his brief, Sample states that he is "in no way attempting to reargue or rehash the conditions that led to the bar."

not support his application. Further, the nature of the findings that resulted in the bar does not support his proposed association.

A. Sample has not demonstrated that his proposed supervision, procedures, and terms and conditions of employment are reasonably designed to prevent a recurrence of the conduct that led to the bar.

Sample represents that he will be subject to "enhanced" supervisory procedures,[22] but he fails to demonstrate that the procedures are "reasonably designed to prevent a recurrence" of the misconduct that led to the bar—his outside business activities in managing an unregistered hedge fund and raising money from investors.[23] Sample's failure to make this showing is a deficiency that, standing alone, is a sufficient basis for us to deny his application as inconsistent with the public interest. Moreover, even if Sample, as an outside salesperson, "would be operating in a different area of [Kingsroad's] business and could not repeat the precise violations that led to his bar, [that would be] of little moment. Fraud and other misconduct can be committed in any area."[24]

---

22 In "Attachment B" to his brief, Sample sets forth the proposed enhanced procedures, *i.e.*, his contact would be limited to registered investment advisers and registered representatives, he would have no access to the public or to client information, he would be subject to "advanced email and cell phone monitoring," his schedule would be monitored and approved and "all meetings/recap logged weekly," he would be subject to "[r]andom follow up with [his] contacts from prospective advisers, he would be subject to "[c]ompany monitored cell phone with spyware," his correspondence would be subject to approval, his telephone calls would be "recorded and catalogued," and he would be subject to "[w]eekly compliance meetings."

23 Sample argues that, because the bar will remain in place, he will be prohibited from engaging in the misconduct that led to the bar. But the bar does not relieve Sample of his burden under Rule 193 of showing that the supervision to be exercised over him is "reasonably designed" to prevent a recurrence of the misconduct.

24 *Sidney I. Shupak*, Advisers Act Release No. 1061, 1987 WL 757575, at *4 (Mar. 23, 1987) (denying application under former Rule 29, now Rule 193, for consent to associate with registered investment adviser, and stating that applicant, who was barred from associating with any investment adviser based on antifraud, proxy, and other securities law violations, failed to show that such association would be consistent with the public interest in light of his record, including a false statement made in his original application, and the lack of effective supervision to be exercised over him).

B. The relatively short time since the bar was imposed and events that have occurred in the meantime do not support Sample's application or the public interest in the proposed association.

Sample filed his application less than two months after the imposition of the bar, and it has been approximately 16 months since the bar was imposed.[25] In *Stephanie J. Hibler*,[26] we reviewed an application by NASD, now FINRA, for an order granting consent for Hibler, a person subject to statutory disqualification based on a criminal conviction and unqualified bar, to associate with two NASD member firms. Fourteen months after we imposed the bar, NASD notified us that it had proposed to permit the association.[27] On review, we found that we were unable to conclude that the proposed association would be in the public interest given the seriousness of Hibler's prior misconduct and sanction and the short period of time that had passed since imposition of the bar.[28] In so finding, we stated that "[w] are concerned that this application does not accord sufficient deference to the sanction imposed on Hibler by our previous decision."[29] Similarly, here, the bar is relatively recent.[30] To permit Sample to associate so soon after the imposition of the bar would be inconsistent with our determination to exclude him from the securities industry and would run counter to the remedial goals of deterrence.[31]

Sample asserts that he has complied with the bar order, is no longer associated with Kingsroad, and is "currently unemployed."[32] He has taken no action to recompense defrauded

---

25 Sample's application and supporting documentation acknowledge that "very little time has passed since the imposition of the bar."

26 Exchange Act Release No. 22067, 1985 WL 548465 (May 23, 1985).

Pike*, Investment Company Act Release No. 20417, 1994 WL 389872, at *2 (July 20, 1994) (denying motion to vacate settled order entered "a little more than two years" before the motion; stating that this time period "is hardly enough time to conclude that its continuation is no longer required in the public interest"), *petition denied*, 52 F.3d 1122 (D.C. Cir. 1995) (per curiam).

31 *See*, *e.g.*, *Mark S. Parnass*, Exchange Act Release No. 65261, 2011 WL 4101087, at *3 (Sept. 2, 2011) (denying in part petition to vacate bar and stating that the function of a bar "is not limited to merely preventing future identical violations, but is more broadly designed to achieve the goals of deterrence, both specific and general, to address the risks of allowing a respondent to remain in the industry, to serve as a 'legitimate prophylactic remedy consistent with [our] statutory obligations,' and, above all, to 'protect[] investors and the integrity of the markets'") (quoting *Don Warner Reinhard*, Exchange Act Release No. 63720, 2011 WL 121451, at *8 (Jan. 14, 2011)).

32 Sample argues that the opportunity to earn the amount of money needed to repay defrauded investors "is not likely in an alternative field where I have no background. My entire career has

(continued. . .)

investors; nor has he completed any courses, seminars, or examinations subsequent to the imposition of the bar to prepare for his return to the securities business.[33] His submissions from friends and family attesting to his good character and employment performance highlight his laudable efforts to better himself and others, but they "do not negate the serious misconduct engaged in by [Sample] or provide any justification for permitting [his] re-entry into the securities industry so soon after" the bar.[34]

C. The proposed association is inconsistent with the public interest in light of the nature of the findings that resulted in the bar.

The nature of the findings that resulted in Sample's bar also lead us to conclude that the proposed association would be inconsistent with the public interest. Sample engaged in serious misconduct when he violated antifraud provisions of the securities laws.[35] The fraud, which occurred over a three-year period, resulted in significant financial loss to investors and evidenced a high degree of scienter. Sample compounded the fraud by providing false documents to investors to make it appear as if the trading had been successful, and by raising additional funds from a new investor under false pretenses and using those funds to reimburse prior investors. For this misconduct, we imposed an unqualified bar—a particularly severe sanction reserved for egregious cases.[36]

(...continued)
been spent in the financial services sector and it is the only job which I am qualified for." While we are not unsympathetic to his plight, Sample has no "absolute right" to engage in the securities industry. *Nicholas S. Savva*, Exchange Act Release No. 72485, 2014 WL 2887272, at *15 & n.90 (June 26, 2014).

33 Sample represents that he has "investigated and will take FINRA courses on Ethics."

34 *Hibler*, 1985 WL 548465, at *2.

35 *See, e.g., Peter Siris*, Exchange Act Release No. 71068, 2013 WL 6528874, at *6 (Dec. 12, 2013) (reiterating that "conduct that violates the antifraud provisions of the securities laws is especially serious and subject to the severest of sanctions") (internal quotations and citation omitted), *petition denied*, 773 F.3d 89 (D.C. Cir. 2014). In "Attachment A" to his brief, Sample acknowledges that his misconduct was "serious" and involved the "improper taking" of investor funds.

36 *Unqualified Bar Orders*, 1994 WL 544424, at *1 (stating that "[a]n unqualified bar is a particularly severe sanction and is reserved for egregious cases"). Sample argues that his misconduct "should be evaluated by comparison to the behavior of other offenders and not based upon the sanctions to which he consented." But Rule 193 does not require that we draw such comparisons in considering an application for consent to associate. And, in any event, we conclude—as we did when we imposed the bar order—that the unqualified bar is an appropriate remedial sanction for his egregious misconduct.

Sample argues that his misconduct was not so egregious because he was not required to make admissions as a condition of his settlement and his fraud involved only five investors. But whether an admission is required as part of a settlement is a matter within our discretion.[37] And the fact that he defrauded five investors and not more does not lessen the egregiousness of his misconduct.[38]

In light of Sample's failure to show that the proposed supervisory procedures would prevent a recurrence of the misconduct, the relative recency of the bar, and the findings that led to the bar, we conclude that Sample has not demonstrated that the proposed association would be consistent with the public interest.

D. Sample presents no "extraordinary circumstances" that would render the proposed association consistent with the public interest.

We have said, in the analogous context of a request to modify a bar order, that "when an unqualified bar has been imposed, . . . this 'evidences [our] conclusion that the public interest is served by *permanently* excluding the barred person from the securities industry, . . . [and that] absent extraordinary circumstances, a person subject to an unqualified bar will be unable to establish that it is in the public interest to permit reentry to the securities industry."[39] Sample argues that this case presents "exceptional circumstances" which establish that his return to the securities industry is consistent with the public interest, including that: (1) he misunderstood the scope of the bar order; (2) he has a standing offer of employment; (3) he has an offer of a loan from a friend to repay investors; (4) two of the five defrauded investors support his application; and (5) he will be unable to make restitution if he is denied consent to associate. We find that none of these arguments demonstrates "extraordinary circumstances" that would render the proposed association consistent with the public interest.[40]

---

37 *Cf. Shawmut Ass'n v. SEC*, 146 F.2d 791, 796 (1st Cir. 1945) (stating that Commission has "wide discretion in the choice of what 'terms' it shall impose for the protection of investors, and ordinarily a court should not undertake to substitute its judgment of what would be appropriate terms for the administrative judgment").

38 *See Michael J. Fee*, Exchange Act Release No. 31070, 1992 WL 213847, at *3 (Aug. 24, 1992) (rejecting respondent's argument that his sanctions should not be increased because only two customers testified against him, and stating that "[h]is conduct cannot be condoned because he only defrauded a small number of investors"), *aff'd*, 998 F.2d 1002 (3d Cir. 1993) (Table).

39 *Victor Teicher*, Exchange Act Release No. 58789, 2008 WL 4587535, at *2 (Oct. 15, 2008) (quoting *Unqualified Bar Orders*, 1994 WL 544424, at *1 (emphasis in original)).

40 *Accord Hibler*, 1985 WL 548465, at *2 (stating that "the record in this case does not disclose any extraordinary or changed circumstances which might justify permitting a person who was barred, unqualifiedly, from the securities industry based on serious misconduct in violation of the federal securities laws to re-enter the business as a salesperson so soon after the imposition of that bar").

First, Sample argues that he misunderstood the scope of the bar order and believed that he would be able to continue working for Kingsroad as an independent contractor. In Sample's view, it was a "radical change of circumstances" when counsel for Kingsroad's related broker-dealer IFG told him that he would not be able to keep his job. Sample argues that, had he known that the bar would preclude his continued association at Kingsroad, he would have negotiated for a more limited bar. But Sample, who at all times was represented by counsel, acknowledges that his consent to the bar (and antifraud injunction) was voluntary. As a result, we find that Sample has waived any claim of errors or inaccuracies in the bar order.[41]

Second, Sample argues that he has a standing offer of employment from Kingsroad. The offer letter states, in relevant part, that, "[w]ith stipulations, we are willing to offer you a position" at the firm.[42] It continues:

> As you are aware, we have significant hurdles to overcome before the offer will become valid. Namely: a. The SEC must agree to grant your return to our industry in such terms that allow us to offer a reasonable explanation for your rehire to our current solicitors and clients. b. In our current role as a branch office of Independent Financial Group, LLC, they retain the final say in allowing us to operate as an outside business activity. Therefore, IFG must approve your rehire.

Kingsroad's offer is predicated on a series of events that may or may not occur, and, as discussed above, Sample has not demonstrated that the proposed supervisory procedures that would be in place during his employment with Kingsroad are reasonably designed to prevent a recurrence of the misconduct. As a result, Sample has not shown that the offer constitutes "extraordinary circumstances" affecting his application.

Third, Sample argues that a friend has offered to loan him money to repay defrauded investors. As an initial matter, we note that the loan amount—$200,000 in two installments of $100,000 each—is less than the $1 million that Sample raised from investors. In addition, the loan offer, like the employment offer, depends on Sample satisfying several conditions, all of which make it highly unlikely that he would be able to obtain the loan.[43] And there are other

---

41 *Edward I. Frankel*, Exchange Act Release No. 38379, 1997 WL 103785, at *2 n.5 (Mar. 10, 1997) (stating that Respondent "elected to settle the matter [bar order] and did not develop the record further" and therefore "cannot now complain that the record is inaccurate or incomplete"). Moreover, we note that Sample has offered no basis for his belief that the bar would have limited application. There is nothing in the language of the order, which broadly prohibits Sample "from association . . . with any investment advisor," that could be read as consistent with that belief.

42 The letter is attached as "Exhibit 3" to Sample's brief.

43 A November 19, 2014 letter from the putative lender, attached to Sample's brief as "Exhibit 5," sets forth four conditions: "(1) The SEC modifying the bar to allow his limited reassociation; (2) Upon successful rehire by Kingsroad Financial and its B-D Independent Financial Group; (3) Upon successful negotiation of a non-prosecution or deferred prosecution agreement with the U.S.

(continued. . .)

uncertainties associated with the loan, such as the amount of interest to be paid, the time frame for repayment, and, above all, whether Sample stands a realistic chance of acquiring the ability to repay defrauded investors, the loan, and any future judgment requiring disgorgement of ill-gotten gains or a civil penalty.[44]

Fourth, Sample argues that two of five defrauded investors have submitted letters in support of the application. But the number of victims who support his application is irrelevant. When assessing the public interest, we "evaluate the 'welfare of investors as a class' and not the interests of a particular set of investors."[45] Moreover, the letters hardly give Sample an unqualified endorsement. Rather, the letters indicate that the investors support the application because it is their only hope of recovering their losses and being made whole.[46]

Fifth, Sample argues that he will be unable to repay defrauded investors if he is not granted consent to associate. But even assuming Sample would be more likely to be in a position to repay the investors he defrauded if his application were granted, we conclude for the reasons discussed

(...continued)
Attorney in Albuquerque; [and] (4) The loan would be paid back concurrently in equal shares with the Restitution to investors from [Sample's] excess post tax earnings above $60,000/year."

44 *See supra* note 7.

45 *See Jeffrey L. Gibson*, Exchange Act Release No. 57266, 2008 WL 294717, at *4 (Feb 4, 2008) ("While many of [the] investors executed declarations in support of Gibson, several of those investors apparently did not do so, and their opinions are unknown. In any event, we do not believe that the views of the investors who executed the Investor Declarations should be determinative. As we have held, we look beyond the interests of particular investors, in assessing the need for sanctions, to the protection of investors generally") (footnote omitted), *petition denied*, 561 F.3d 548 (6th Cir. 2009).

46 One investor letter, attached as "Exhibit 7" to Sample's brief, states that "the loss in the fund is extremely painful both financially and emotionally. I am angry at Mr. Sample and emotionally drained by the events surrounding [the fund]....However, despite the loss and my feelings toward Mr. Sample, I support his request because it would appear this is the only possible way of receiving my money." Another investor letter, attached as "Exhibit 8," states that "we support [Sample's] request for re-association, for the sole reason that we believe it to be the only way we may ever see restitution from his conduct."

above that doing so would be inconsistent with the broader public interest we are charged with protecting. Sample's remaining arguments are likewise unavailing and do not change our view that there are no "extraordinary circumstances" which would render the proposed association consistent with the public interest.[47]

An appropriate order will issue.[48]

By the Commission (Chair WHITE and Commissioners AGUILAR, GALLAGHER, STEIN, and PIWOWAR).

Secretary

---

[47] For example, Sample argues that he has had a "spotless record" in the thirteen years before, and two years after, the bar; that he was under extreme emotional and financial distress during the events at issue; and that "[a] single violation over a limited period of time to a limited number of victims does not demand a 'life sentence' of exclusion" from the industry. We have considered and rejected such arguments when raised in mitigation of a respondent's violations or sanctions—and we see no basis for crediting them here. *See, e.g., Daniel Imperato*, Exchange Act Release No. 74596, 2015 WL 1389046, *7 (Mar. 27, 2015) (stating that a respondent failed to show mitigating factors when he argued that imposition of a bar was unfair because it "ties [his] hands in involuntary servitude for the rest of [his] life" and destroys his "income, reputation, and the abilities for the shareholders to ever receive their well-deserved rewards and recover their investments"); *Anthony Fields, CPA*, Exchange Act Release No. 74344, 2015 WL 728005, at *22 (Feb. 20, 2015) (stating that "[h]ow a respondent might in other respects suffer as a result of his or her misconduct or the sanctions that follow—*e.g.*, loss of money, unemployment, or harm to reputation—is not a mitigating factor"); *Gary M. Kornman*, Exchange Act Release No. 59403, 2009 WL 367635, at *9 (Feb. 13, 2009) (stating that we do not view respondent's age or lack of disciplinary history as mitigating for sanctions).

[48] We have considered all of the parties' contentions. We have rejected or sustained them to the extent that they are inconsistent or in accord with the views expressed in this opinion. We deny Sample's motion for oral argument, which the Division has opposed. Rule 451(a) provides that oral argument will be allowed only if we determine that that it will significantly aid the decisional process. 17 C.F.R § 201.451(a). It appears that oral argument will not aid the decisional process because the issues raised in the petition can be determined on the basis of the papers filed by the parties without the Commission hearing oral argument.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75883 / September 10, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16804

In the Matter of Empire Gold, Inc., GMS Capital Corp., Greater China Acquisition Corp., IC2E International Inc., Intelliservices, Inc., S.F.H. Holdings I, Inc., S.F.H. Holdings II, Inc., and Sowa Jisho International Inc., Respondents.	ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS AND NOTICE OF HEARING PURSUANT TO SECTION 12(j) OF THE SECURITIES EXCHANGE ACT OF 1934

I.

The Securities and Exchange Commission ("Commission") deems it necessary and appropriate for the protection of investors that public administrative proceedings be, and hereby are, instituted pursuant to Section 12(j) of the Securities Exchange Act of 1934 ("Exchange Act") against the Respondents named in the caption.

II.

After an investigation, the Division of Enforcement alleges that:

A. RESPONDENTS[1]

1. Empire Gold, Inc. ("EGIT") (CIK No. 70202) is a dissolved Indiana corporation located in Vancouver, British Columbia, Canada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). EGIT is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-KSB for the

[1]In cases where the short form of the issuer's name is in all capital letters, the short form is also its stock symbol.

period ended December 31, 2000, which reported a net loss of $75,188 for the prior year. As of April 29, 2015, the common stock of EGIT was not publicly quoted or traded.

2. GMS Capital Corp. ("GMCP") (CIK No. 1434830) is a Florida corporation located in Montreal, Quebec, Canada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). GMCP is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2012, which reported a net loss applicable to common shares of $280,455 for the prior nine months. As of April 29, 2015, the common stock of GMCP was not publicly quoted or traded.

3. Greater China Acquisition Corp. ("GRCH") (CIK No. 1386938) is a Delaware corporation located in London, England with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). GRCH is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-QSB for the period ended September 30, 2007, which reported a net loss of $3,134 for the period from inception on January 9, 2007 through September 30, 2007. As of April 29, 2015, the common stock of GRCH was not publicly quoted or traded.

4. IC2E International, Inc. ("IC2E International") (CIK No. 1136465) is a delinquent Colorado corporation located in Calgary, Alberta, Canada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). IC2E International is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-KSB for the period ended June 30, 2007, which reported a net loss of $146,382 for the prior year. Although IC2E International filed a Form 10-K for the period ended June 30, 2007, it failed to file a Form 10-Q for the period ended March 31, 2007. As of April 29, 2015, the common stock of IC2E International was not publicly quoted or traded.

5. Intelliservices, Inc. ("Intelliservices") (CIK No. 1303662) is a void Delaware corporation located in Carlsbad, California with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Intelliservices is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-QSB for the period ended March 31, 2005, which reported a net loss of $500 for the prior seven months. As of April 29, 2015, the common stock of Intelliservices was not publicly quoted or traded.

6. S.F.H. Holdings I, Inc. ("S.F.H. Holdings I") (CIK No. 1117403) is a permanently revoked Nevada corporation located in Las Vegas, Nevada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). S.F.H. Holdings I is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-SB12G on June 28, 2000, which reported no assets, liabilites, expenses, or revenues as of April 13, 2000. As of January 26, 2015, the common stock of S.F.H. Holdings I was not publicly quoted or traded.

7. S.F.H. Holdings II, Inc. ("S.F.H. Holdings II") (CIK No. 1117404) is a permanently revoked Nevada corporation located in Las Vegas, Nevada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). S.F.H. Holdings II is

delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-SB12G on July 5, 2000, which reported no assets, liabilities, expenses, or income as of April 13, 2000. As of January 26, 2015, the common stock of S.F.H. Holdings II was not publicly quoted or traded.

8. Sowa Jisho International Inc. ("Sowa Jisho") (CIK No. 1497919) is a forfeited Delaware corporation located in Foster City, California with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Sowa Jisho is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended September 30, 2012, which reported a net loss of $6,000 for the prior six months. As of January 26, 2015, the common stock of Sowa Jisho was not publicly quoted or traded.

B. DELINQUENT PERIODIC FILINGS

9. As discussed in more detail above, all of the Respondents are delinquent in their periodic filings with the Commission, have repeatedly failed to meet their obligations to file timely periodic reports, and failed to heed delinquency letters sent to them by the Division of Corporation Finance requesting compliance with their periodic filing obligations or, through their failure to maintain a valid address on file with the Commission as required by Commission rules, did not receive such letters.

10. Exchange Act Section 13(a) and the rules promulgated thereunder require issuers of securities registered pursuant to Exchange Act Section 12 to file with the Commission current and accurate information in periodic reports, even if the registration is voluntary under Section 12(g). Specifically, Rule 13a-1 requires issuers to file annual reports, and Rule 13a-13 requires domestic issuers to file quarterly reports.

11. As a result of the foregoing, Respondents failed to comply with Exchange Act Section 13(a) and Rules 13a-1 and/or 13a-13 thereunder.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate for the protection of investors that public administrative proceedings be instituted to determine:

A. Whether the allegations contained in Section II hereof are true and, in connection therewith, to afford the Respondents an opportunity to establish any defenses to such allegations; and,

B. Whether it is necessary and appropriate for the protection of investors to suspend for a period not exceeding twelve months, or revoke the registration of each class of securities registered pursuant to Section 12 of the Exchange Act of the Respondents identified in Section II hereof, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents.

IV.

IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice [17 C.F.R. § 201.110].

IT IS HEREBY FURTHER ORDERED that Respondents shall file an Answer to the allegations contained in this Order within ten (10) days after service of this Order, as provided by Rule 220(b) of the Commission's Rules of Practice [17 C.F.R. § 201.220(b)].

If Respondents fail to file the directed Answers, or fail to appear at a hearing after being duly notified, the Respondents, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents, may be deemed in default and the proceedings may be determined against it upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f), and 310 of the Commission's Rules of Practice [17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f), and 201.310].

This Order shall be served forthwith upon Respondents personally or by certified, registered, or Express Mail, or by other means permitted by the Commission Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 120 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice [17 C.F.R. § 201.360(a)(2)].

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75897 / September 11, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16806

In the Matter of **MSGI Technology Solutions, Inc. (a/k/a MSGI Security Solutions, Inc.),** **NMI Health, Inc.,** **PlushZone, Inc., and** **ProsorCons Sports & Entertainment Co.,** **Respondents.**	**ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS AND NOTICE OF HEARING PURSUANT TO SECTION 12(j) OF THE SECURITIES EXCHANGE ACT OF 1934**

I.

The Securities and Exchange Commission ("Commission") deems it necessary and appropriate for the protection of investors that public administrative proceedings be, and hereby are, instituted pursuant to Section 12(j) of the Securities Exchange Act of 1934 ("Exchange Act") against Respondents MSGI Technology Solutions, Inc. (a/k/a MSGI Security Solutions, Inc.), NMI Health, Inc., PlushZone, Inc., and ProsorCons Sports & Entertainment Co.

II.

After an investigation, the Division of Enforcement alleges that:

A. RESPONDENTS

1. MSGI Technology Solutions, Inc. (a/k/a MSGI Security Solutions, Inc.) (CIK No. 14280) is a revoked Nevada corporation located in New York, New York with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). MSGI is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended December 31, 2010, which reported a net loss of over $1.4 million for the prior three months. As of September 1, 2015, the company's stock (symbol "MSGI") was traded on the over-the-counter markets.

2. NMI Health, Inc. (CIK No. 1088213) is a Nevada corporation located in Reno, Nevada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). NMI Health is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-K for the period ended December 31, 2013, which reported a net loss of $425,930 for the prior twelve months. As of September 1, 2015, NMI Health's stock (symbol "NANM") was quoted on OTC Link (formerly, "Pink Sheets") operated by OTC Markets Group, Inc., had six market makers, and was eligible for the "piggyback" exception of Exchange Act Rule 15c2-11(f)(3).

3. PlushZone, Inc. (CIK No. 1143086) is a void Delaware corporation located in East Farmingdale, New York with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). PlushZone is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 8-A registration statement on November 18, 2002.

4. ProsorCons Sports & Entertainment Co. (CIK No. 1132092) is a void Delaware corporation located in New York, New York with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). ProsorCons is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10 registration statement on March 2, 2001.

B. DELINQUENT PERIODIC FILINGS

5. As discussed in more detail above, all of the Respondents are delinquent in their periodic filings with the Commission, have repeatedly failed to meet their obligations to file timely periodic reports, and failed to heed delinquency letters sent to them by the Division of Corporation Finance requesting compliance with their periodic filing obligations or, through their failure to maintain a valid address on file with the Commission as required by Commission rules, did not receive such letters.

6. Exchange Act Section 13(a) and the rules promulgated thereunder require issuers of securities registered pursuant to Exchange Act Section 12 to file with the Commission current and accurate information in periodic reports, even if the registration is voluntary under Section 12(g). Specifically, Rule 13a-1 requires issuers to file annual reports, and Rule 13a-13 requires domestic issuers to file quarterly reports.

7. As a result of the foregoing, Respondents failed to comply with Exchange Act Section 13(a) and Rules 13a-1 and/or 13a-13 thereunder.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate for the protection of investors that public administrative proceedings be instituted to determine:

A. Whether the allegations contained in Section II hereof are true and, in connection therewith, to afford the Respondents an opportunity to establish any defenses to such allegations; and,

B. Whether it is necessary and appropriate for the protection of investors to suspend for a period not exceeding twelve months, or revoke the registration of each class of securities registered pursuant to Section 12 of the Exchange Act of the Respondents identified in Section II hereof, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents.

IV.

IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice [17 C.F.R. § 201.110].

IT IS HEREBY FURTHER ORDERED that Respondents shall file an Answer to the allegations contained in this Order within ten (10) days after service of this Order, as provided by Rule 220(b) of the Commission's Rules of Practice [17 C.F.R. § 201.220(b)].

If Respondents fail to file the directed Answers, or fail to appear at a hearing after being duly notified, the Respondents, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents, may be deemed in default and the proceedings may be determined against them upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f), and 310 of the Commission's Rules of Practice [17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f), and 201.310].

This Order shall be served forthwith upon Respondents personally or by certified, registered, or Express Mail, or by other means permitted by the Commission Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 120 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice [17 C.F.R. § 201.360(a)(2)].

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

SECURITIES AND EXCHANGE COMMISSION

SECURITIES EXCHANGE ACT OF 1934
Release No. 75898 / September 11, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16807

In the Matter of **Charles Booth, Inc., and Chatsworth Acquisitions I, Inc.,** **Respondents.**	**ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS AND NOTICE OF HEARING PURSUANT TO SECTION 12(j) OF THE SECURITIES EXCHANGE ACT OF 1934**

I.

The Securities and Exchange Commission ("Commission") deems it necessary and appropriate for the protection of investors that public administrative proceedings be, and hereby are, instituted pursuant to Section 12(j) of the Securities Exchange Act of 1934 ("Exchange Act") against Respondents Charles Booth, Inc. and Chatsworth Acquisitions I, Inc.

II.

After an investigation, the Division of Enforcement alleges that:

A. RESPONDENTS

1. Charles Booth, Inc. (CIK No. 1103153) is a permanently revoked Nevada corporation located in Florence, Colorado with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Charles Booth, Inc. is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-QSB for the period ended September 30, 2003, which reported a net loss of $129,226 from the company's February 22, 1996 inception to September 30, 2003.

2. Chatsworth Acquisition I, Inc. (CIK No. 1372605) is a Delaware corporation located in Denver, Colorado with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Chatsworth Acquisitions I, Inc. is delinquent in its periodic filings with the Commission, having not filed any periodic

reports since it filed a Form 10-Q for the period ended September 30, 2012, which reported a net loss of $96,764 from the company's July 22, 2005 inception to September 30, 2012.

B. DELINQUENT PERIODIC FILINGS

3. As discussed in more detail above, all of the Respondents are delinquent in their periodic filings with the Commission, have repeatedly failed to meet their obligations to file timely periodic reports, and failed to heed delinquency letters sent to them by the Division of Corporation Finance requesting compliance with their periodic filing obligations or, through their failure to maintain a valid address on file with the Commission as required by Commission rules, did not receive such letters.

4. Exchange Act Section 13(a) and the rules promulgated thereunder require issuers of securities registered pursuant to Exchange Act Section 12 to file with the Commission current and accurate information in periodic reports, even if the registration is voluntary under Section 12(g). Specifically, Rule 13a-1 requires issuers to file annual reports, and Rule 13a-13 requires domestic issuers to file quarterly reports.

5. As a result of the foregoing, Respondents failed to comply with Exchange Act Section 13(a) and Rules 13a-1 and/or 13a-13 thereunder.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate for the protection of investors that public administrative proceedings be instituted to determine:

A. Whether the allegations contained in Section II hereof are true and, in connection therewith, to afford the Respondents an opportunity to establish any defenses to such allegations; and,

B. Whether it is necessary and appropriate for the protection of investors to suspend for a period not exceeding twelve months, or revoke the registration of each class of securities registered pursuant to Section 12 of the Exchange Act of the Respondents identified in Section II hereof, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents.

IV.

IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice [17 C.F.R. § 201.110].

IT IS HEREBY FURTHER ORDERED that Respondents shall file an Answer to the allegations contained in this Order within ten (10) days after service of this Order, as provided by Rule 220(b) of the Commission's Rules of Practice [17 C.F.R. § 201.220(b)].

If Respondents fail to file the directed Answers, or fail to appear at a hearing after being duly notified, the Respondents, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents, may be deemed in default and the proceedings may be determined against them upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f), and 310 of the Commission's Rules of Practice [17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f), and 201.310].

This Order shall be served forthwith upon Respondents personally or by certified, registered, or Express Mail, or by other means permitted by the Commission Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 120 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice [17 C.F.R. § 201.360(a)(2)].

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

SECURITIES AND EXCHANGE COMMISSION
(Release No. 34-75899; File No. SR-NSCC-2015-803)

September 11, 2015

Self-Regulatory Organizations; National Securities Clearing Corporation; Notice of Filing of Advance Notice to Enhance NSCC's Margining Methodology as Applied to Family-Issued Securities of Certain NSCC Members

Pursuant to Section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act entitled the Payment, Clearing, and Settlement Supervision Act of 2010[1] ("Clearing Supervision Act") and Rule 19b-4(n)(1)(i)[2] under the Securities Exchange Act of 1934 ("Act"), notice is hereby given that on August 14, 2015, National Securities Clearing Corporation ("NSCC") filed with the Securities and Exchange Commission ("Commission") the advance notice SR-NSCC-2015-803 ("Advance Notice") as described in Items I and II below, which Items have been prepared by NSCC.[3] The Commission is publishing this notice to solicit comments on the Advance Notice from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Advance Notice

This Advance Notice consists of amendments to NSCC's Rules & Procedures ("Rules") in order to enhance NSCC's margining methodology as applied to family-

---

1 12 U.S.C. 5465(e)(1).

2 17 CFR 240.19b-4(n)(1)(i).

3 On August 14, 2015, NSCC filed this Advance Notice as a proposed rule change (SR-NSCC-2015-003) with the Commission pursuant to Section 19(b)(1) of the Act, 15 U.S.C. 78s(b)(1), and Rule 19b-4, 17 CFR 240.19b-4. A copy of the proposed rule change is available at http://www.dtcc.com/legal/sec-rule-filings.aspx.

from the volatility component, or "VaR" charge, and then charging an amount calculated by multiplying the absolute value of the long net unsettled positions in that Member's family-issued securities by a percentage that is no less than 40%. The haircut rate to be charged would be determined based on the Member's rating on the credit risk rating matrix and the type of family-issued security submitted to NSCC. Fixed income securities that are family-issued securities would be charged a haircut rate of no less than 80% for firms that are rated 6 or 7 on the credit risk rating matrix, and no less than 40% for firms that are rated 5 on the credit risk rating matrix; and equity securities that are family-issued securities would be charged a haircut rate of 100% for firms that are rated 6 or 7 on the credit risk rating matrix, and no less than 50% for firms that are rated 5 on the credit risk rating matrix. NSCC would have the authority to adjust these haircut rates from time to time within these parameters as described in Procedure XV of NSCC's Rules without filing a proposed rule change with the Commission pursuant to Section 19(b)(1) of the Act,[6] and the rules thereunder, or an advance notice with the Commission pursuant to Section 806(e)(1) of the Clearing Supervision Act,[7] and the rules thereunder.

---

5 As part of its ongoing monitoring of its membership, NSCC utilizes an internal credit risk rating matrix to rate its risk exposures to its Members based on a scale from 1 (the strongest) to 7 (the weakest). Members that fall within the higher risk rating categories (i.e. 5, 6, and 7) are considered on NSCC's "Watch List", and may be subject to enhanced surveillance or additional margin charges, as permitted under NSCC's Rules. See Section 4 of Rule 2B and Section I(B)(1) of Procedure XV of NSCC's Rules, supra Note 1 [sic].

6 15 U.S.C. 78s(b)(1).

7 12 U.S.C. 5465(e)(1).

Therefore, the overall impact of NSCC's proposal, as described above, on risks presented by NSCC would be to reduce NSCC's exposure to this type of wrong-way risk by enhancing its margin methodology as applied to the family-issued securities of its Members that are on its Watch List, and present a heightened credit risk to the clearing agency or have demonstrated higher risk related to their ability to meet settlement. NSCC believes a reduction in its exposures to wrong-way risk through a margining methodology that more effectively capture [sic] the risk characteristics of these positions would contribute to the goal of maintaining financial stability in the event of a Member default and reduce systemic risk overall. Because NSCC Members that are on its Watch List present a heightened credit risk to the clearing agency or have demonstrated higher risk related to their ability to meet settlement, NSCC believes that this charge would more effectively capture the risk characteristics of these positions and can help mitigate NSCC's exposure to wrong-way risk.

NSCC will continue to evaluate its exposures to wrong-way risk, specifically wrong-way risk presented by family-issued securities, including by reviewing the impact of expanding the application of the proposed margining methodology to the family-issued securities of those Members that are not on the Watch List. NSCC is proposing to apply the enhanced margining methodology to the family-issued securities of Members that are on the Watch List at this time because, as stated above, these Members present a heightened credit risk to the clearing agency or have demonstrated higher risk related to their ability to meet settlement. As such, there is a clear and more urgent need to address NSCC's exposure to wrong-way risk presented by these firms' family-issued securities. However, any future change to the margining methodology as applied to the family-normal market conditions. By more closely capturing the risk characteristics of these positions, the proposed enhancement to the margining methodology would also assist NSCC in its continuous efforts to ensure the reliability and effectiveness of its risk-based margining methodology. In this way, the proposal would help NSCC, as a central counterparty, maintain effective risk controls, contributing to the goal of maintaining financial stability in the event of a Member default. Therefore, NSCC believes the proposal is consistent with the requirements of Section 805(b)(1) of the Clearing Supervision Act and Rule 17Ad-22(b)(1) and (2), promulgated under the Act, cited above.

III. Date of Effectiveness of the Advance Notice, and Timing for Commission Action

The proposed change may be implemented if the Commission does not object to the proposed change within 60 days of the later of (i) the date that the proposed change was filed with the Commission or (ii) the date that any additional information requested by the Commission is received. NSCC shall not implement the proposed change if the Commission has any objection to the proposed change.

The Commission may extend the period for review by an additional 60 days if the proposed change raises novel or complex issues, subject to the Commission providing NSCC with prompt written notice of the extension. The proposed change may be implemented in less than 60 days from the date the Advance Notice is filed, or the date further information requested by the Commission is received, if the Commission notifies NSCC in writing that it does not object to the proposed change and authorizes NSCC to implement the proposed change on an earlier date, subject to any conditions imposed by the Commission.

the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street, NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of NSCC and on DTCC's website (http://dtcc.com/legal/sec-rule-filings.aspx). All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NSCC-2015-803 and should be submitted on or before [insert date 21 days from publication in the Federal Register].

SECURITIES AND EXCHANGE COMMISSION

SECURITIES EXCHANGE ACT OF 1934
Release No. 75905 / September 11, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16586

In the Matter of JASON MATTHEW PENNINGTON, Respondent.	ORDER MAKING FINDINGS AND IMPOSING REMEDIAL SANCTIONS PURSUANT TO SECTION 15(b) OF THE SECURITIES EXCHANGE ACT OF 1934

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest to accept the Offer of Settlement submitted by Jason Matthew Pennington ("Respondent") pursuant to Rule 240(a) of the Rules of Practice of the Commission, 17 C.F.R. § 201.240(a), for the purpose of settlement of these proceedings initiated against Respondent on June 9, 2015, pursuant to Section 15(b) of the Securities Exchange Act of 1934 ("Exchange Act").

II.

Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or in which the Commission is a party, and prior to a hearing pursuant to the Commission's Rules of Practice, 17 C.F.R. § 201.100 *et seq.*, Respondent consents to the entry of an Order Making Findings and Imposing Remedial Sanctions Pursuant to Section 15(b) of the Exchange Act ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds that:

1. From April 2000 to June 2010, Pennington was associated with a registered broker-dealer. Pennington, age 43, is a resident of El Reno, Oklahoma.

2. On August 5, 2014, Pennington pled guilty to, among other things, a count of wire fraud in violation of 18 U.S.C. §§ 1343 and 1349, a felony, before the United States District Court, District of Kansas, in U.S. v. Jason Matthew Pennington, Case No. 13-10031-01-JTM. On January 12, 2015, a judgment in the criminal case was entered against Pennington. Pennington was sentenced to serve 42 months of incarceration.

3. In his plea agreement, Pennington agreed that in September 2009, he forged a request to a life insurance company to withdraw $278,250 on a policy owned by another individual and then obtained control over those funds.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondent's Offer.

Accordingly, it is hereby ORDERED pursuant to Section 15(b)(6) of the Exchange Act, that Respondent be, and hereby is:

> barred from association with any broker, dealer, investment adviser, municipal securities dealer, or transfer agent; and
>
> barred from participating in any offering of a penny stock, including: acting as a promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer or issuer for purposes of the issuance or trading in any penny stock, or inducing or attempting to induce the purchase or sale of any penny stock.

Any reapplication for association by the Respondent will be subject to the applicable laws and regulations governing the reentry process, and reentry may be conditioned upon a number of factors, including, but not limited to, the satisfaction of any or all of the following: (a) any disgorgement ordered against the Respondent, whether or not the Commission has fully or partially waived payment of such disgorgement; (b) any arbitration award related to the conduct that served as the basis for the Commission order; (c) any self-regulatory organization arbitration award to a customer, whether or not related to the conduct that served as the basis for the Commission order; and (d) any restitution order by a self-regulatory organization, whether or not related to the conduct that served as the basis for the Commission order.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75906 / September 11, 2015

INVESTMENT COMPANY ACT OF 1940
Release No. 31821 / September 11, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16543

In the Matter of **Richard Krill,** **Respondent.**	**ORDER MAKING FINDINGS AND IMPOSING REMEDIAL SANCTIONS PURSUANT TO SECTIONS 21B AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934 AND SECTION 9(d) OF THE INVESTMENT COMPANY ACT OF 1940**

I.

On May 19, 2015, the Securities and Exchange Commission ("Commission"), deeming it appropriate and in the public interest, instituted these public administrative proceedings pursuant to Sections 15(b) and 21C of the Securities Exchange Act of 1934 ("Exchange Act") and Section 9(b) of the Investment Company Act of 1940 ("Investment Company Act").

II.

Respondent has submitted an Offer of Settlement ("Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, Respondent consents to the entry of this Order Making Findings and Imposing Remedial Sanctions pursuant to Sections 21B and 21C of the Securities Exchange Act of 1934 and Section 9(d) of the Investment Company Act of 1940 ("Order"), as set forth below.

III.

The Commission's public official files disclose that, at all relevant times, Lighthouse Financial Group, LLC ("Lighthouse" or "the firm") was registered with the Commission as a broker-dealer.

IV.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

1. Richard Krill, age 57, of Whitehouse Station, New Jersey, was the Financial and Operations Principal ("FinOp") and Chief Financial Officer of Lighthouse from November 2007 to August 2010. At all relevant times, and currently, Krill has held a Series 27 license.

2. Lighthouse was registered with the Commission as a broker-dealer from August 2, 2000 until October 23, 2010. In December 2010, Lighthouse filed a petition for liquidation under the U.S. Bankruptcy Code. At all relevant times, Lighthouse's principal place of business was New York, New York. During the relevant period Lighthouse acted as an introducing broker for retail and institutional customers, engaged in proprietary trading and market-making, and acted as an underwriter or placement agent for equity and bond issuances.

3. On May 19, 2015, the Commission issued an Order Instituting Administrative and Cease-and-Desist Proceedings Pursuant to Sections 15(b) and 21C of the Securities Exchange of 1934 and Section 9(b) of the Investment Company Act of 1940, Making Findings, Imposing Remedial Sanctions and a Cease-and-Desist Order, and Notice of Hearing (*In the Matter of Richard Krill*, Exchange Act Rel. No. 74994 (May 19, 2015) (AP File No. 3-16543), or the "May 19, 2015 Order").

4. The May 19, 2015 Order alleged that Lighthouse failed to make and keep certain accurate records pertaining to its net capital computations and failed to file accurate financial and operational information on Form X-17A-5 (Financial and Operational Combined Uniform Single Reports ("FOCUS reports")) for the months of December 2009 and January, February, and May 2010, and also failed to file an accurate annual audited report for the year ended December 31, 2009. The May 19, 2015 Order further alleged that Respondent, as Lighthouse's FinOp, failed to meet his responsibility for the accuracy of Lighthouse's FOCUS reports and annual audited report. The May 19, 2015 Order alleged that, in preparing Lighthouse's financial statements for the year ended December 31, 2009 and calculating Lighthouse's net capital as of that date, Respondent made several errors in calculating the firm's securities inventory – as a result of failing to exercise due care – that caused the firm's reported net capital to be overstated by nearly \$5 million, or approximately 350%. The May 19, 2015 Order also alleged that Respondent was

---

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

negligent in his calculation of percentage deductions from the firm's net capital, based on classes of securities held in Lighthouse's inventory and the deductions from their market value required by Exchange Act Rule 15c3-1 [17 CFR 24015c3-1], or financial "haircut" deductions. The May 19, 2015 Order alleged that Respondent was negligent in calculating the firm's required haircut deductions for foreign currency holdings and positions in foreign-denominated securities, which resulted in Lighthouse filing materially inaccurate FOCUS reports for the months of January, February, and May 2010.

5. As a result of the conduct alleged above, the May 19, 2015 Order alleged that Respondent caused Lighthouse's violations of Section 17 of the Exchange Act and Rules 17a-3(a) and 17a-5(a) thereunder because he willfully made, or caused Lighthouse to make, material misstatements in reports required to be filed with the Commission and thus committed acts enumerated in Exchange Act Section 15(b)(4)(A).

6. Pursuant to the May 19, 2015 Order, and Sections 15(b) and 21C of the Exchange Act and Section 9(b) of the Investment Company Act, Respondent was ordered to cease and desist from committing or causing any violations and any future violations of Section 17 of the Exchange Act and Rules 17a-3(a) and 17a-5(a) thereunder and was suspended from association with any broker, dealer, investment adviser, municipal securities dealer, municipal advisor, transfer agent, or nationally recognized statistical rating organization; and prohibited from serving or acting as an employee, officer, director, member of an advisory board, investment adviser or depositor of, or principal underwriter for, a registered investment company or affiliated person of such investment adviser, depositor, or principal underwriter for a period of 12 months, effective on the second Monday following the entry of the May 19, 2015 Order.

V.

In view of the foregoing, the Commission deems it appropriate, in the public interest and for the protection of investors to impose the sanctions agreed to in Respondent's Offer.

Accordingly, pursuant to Sections 21B and 21C of the Exchange Act and Section 9(d) of the Investment Company Act, it is hereby ORDERED that:

Respondent shall pay disgorgement of $20,833, prejudgment interest of $3,783, and civil penalties of $25,384 to the Commission. Payment shall be made in the following installments: (1) $25,000 within 10 days of the entry of this Order and (2) the balance of $25,000, and therefore the full $50,000, within twelve months of the entry of this Order. If timely payment is not made, additional interest shall accrue pursuant to Commission's Rule of Practice 600. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Richard Krill as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Andrew M. Calamari, Regional Director, New York Regional Office, Securities and Exchange Commission, Brookfield Place, 200 Vesey Street, Suite 400, New York, NY 10281.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75907 / September 11, 2015

ACCOUNTING AND AUDITING ENFORCEMENT
Release No. 3693 / September 11, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16808

In the Matter of **STEVEN M. DOMBROWSKI, CPA** **Respondent.**	**ORDER OF SUSPENSION PURSUANT TO RULE 102(e)(2) OF THE COMMISSION'S RULES OF PRACTICE**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate to issue an order of forthwith suspension of Steven M. Dombrowski ("Respondent" or "Dombrowski") pursuant to Rule 102(e)(2) of the Commission's Rules of Practice [17 C.F.R. § 201.102(e)(2)].[1]

II.

The Commission finds that:

1. Dombrowski, age 50, resides in Chicago, Illinois. Dombrowski received a Certified Public Accountant ("CPA") certificate in the State of Illinois. After 2006, Dombrowski continued to hold himself out as a CPA despite not being licensed or registered as a CPA with the State of Illinois.

2. On July 15, 2015, a judgment of conviction was entered against Dombrowski in *United States v. Steven M. Dombrowski*, case no. 1:14-CR-00041 in the United States District Court for the Northern District of Illinois, finding him guilty of one count of securities fraud by insider trading in the securities of Dombrowski's former employer, Allscripts Healthcare

[1] Rule 102(e)(2) provides in relevant part that "any person who has been convicted of a felony or a misdemeanor involving moral turpitude shall be forthwith suspended from appearing or practicing before the Commission."

Solutions, Inc., in violation of Title 15, U.S.C. Sections 78j(b) and 78ff(a), and Title 17 C.F.R. Section 240.10b-5.

3. As a result of this conviction, Dombrowski was sentenced to 12 months and 1 day imprisonment, to be followed by two years of supervised release, and ordered to forfeit $286,211 as proceeds of his crime.

III.

In view of the foregoing, the Commission finds that Dombrowski has been convicted of a felony within the meaning of Rule 102(e)(2) of the Commission's Rules of Practice.

Accordingly, it is ORDERED, that Steven M. Dombrowski is forthwith suspended from appearing or practicing before the Commission pursuant to Rule 102(e)(2) of the Commission's Rules of Practice.

By the Commission.

[1] On May 31, 2012, the Commission approved the Plan, as modified by Amendment No. 1. See Securities Exchange Act Release No. 67091, 77 FR 33498 (Jun. 6, 2012) (File No. 4-631). On February 26, 2013, the Commission published for immediate effectiveness the Second Amendment to the Plan. See Securities Exchange Act Release No. 68953 (Feb. 20, 2013), 78 FR 13113. On April 3, 2013, the Commission approved the Third Amendment to the Plan. See Securities Exchange Act Release No. 69287, 78 FR 21483 (Apr. 10, 2013). On September 3, 2013, the Commission published for immediate effectiveness the Fourth Amendment to the Plan. See Securities Exchange Act Release No. 70273 (Aug. 27, 2013), 78 FR 54321 (Fourth Amendment). On September 26, 2013, the Commission approved the Fifth Amendment to the Plan. See Securities Exchange Act Release No. 70530, 78 FR 60937 (Oct. 2, 2013). On January 13, 2014, the Commission published for immediate effective the Sixth Amendment to the Plan. See Securities Exchange Act Release No. 71247 (Jan. 7, 2014), 79 FR 2204 (Sixth Amendment). On April 3, 2014, the Commission approved the Seventh Amendment to the Plan. See Securities Exchange Act Release No. 71851, 79 FR 19687 (Apr. 9, 2014). On February 19, 2015, the Commission approved the Eight Amendment to the Plan. See Securities Exchange Act Release No. 74323, 80 FR 10169 (Feb. 25, 2015).

filed with the Securities and Exchange Commission ("Commission") pursuant to Section 11A of the Securities Exchange Act of 1934 ("Act")[2] and Rule 608 thereunder,[3] a proposal to amend the Plan.[4] The proposal reflects changes unanimously approved by the Participants. The Amendment to the Plan proposes to extend the pilot period of the Plan from October 23, 2015 to April 22, 2016. A copy of the Plan, as proposed to be amended is attached as Exhibit A hereto. The Commission is publishing this notice to solicit comments from interested persons on the Amendment to the Plan.[5]

II. Description of the Plan

Set forth in this Section II is the statement of the purpose and summary of the Amendment, along with the information required by Rule 608(a)(4) and (5) under the Exchange Act,[6] prepared and submitted by the Participants to the Commission.[7]

A. Statement of Purpose and Summary of the Plan Amendment

The Participants filed the Plan on April 5, 2011, to create a market-wide limit up-limit down mechanism intended to address extraordinary market volatility in NMS Stocks, as defined in Rule 600(b)(47) of Regulation NMS under the Exchange Act. The Plan sets forth procedures that provide for market-wide limit up-limit down requirements that would prevent trades in individual NMS Stocks from occurring outside of the specified price bands. These limit up-limit down requirements are coupled with Trading Pauses, as defined in Section I(Y) of the Plan, to

2 15 U.S.C. 78k-1.

6 See 17 CFR 242.608(a)(4) and (a)(5).

7 See Transmittal Letter, supra note 3.

accommodate more fundamental price moves. In particular, the Participants adopted this Plan to address the type of sudden price movements that the market experienced on the afternoon of May 6, 2010.

As set forth in more detail in the Plan, all trading centers in NMS Stocks, including both those operated by Participants and those operated by members of Participants, shall establish, maintain, and enforce written policies and procedures that are reasonably designed to comply with the limit up-limit down requirements specified in the Plan. More specifically, the single plan processor responsible for consolidation of information for an NMS Stock pursuant to Rule 603(b) of Regulation NMS under the Exchange Act will be responsible for calculating and disseminating a lower price band and upper price band, as provided for in Section V of the Plan. Section VI of the Plan sets forth the limit up-limit down requirements of the Plan, and in particular, that all trading centers in NMS Stocks, including both those operated by Participants and those operated by members of Participants, shall establish, maintain, and enforce written policies and procedures that are reasonably designed to prevent trades at prices that are below the lower price band or above the upper price band for an NMS Stock, consistent with the Plan.

The Plan was initially approved for a one-year pilot period, which began on April 8, 2013.[8] Accordingly, the pilot period was scheduled to end on April 8, 2014. As initially contemplated, the Plan would have been fully implemented across all NMS Stocks within six months of initial Plan operations, which meant there would have been full implementation of the Plan for six months before the end of the pilot period. However, pursuant to the fourth amendment to the Plan,[9] the Participants modified the implementation schedule of Phase II of the Plan to extend the time period as to when the Plan would fully apply to all NMS Stocks.

8 See Section VIII of the Plan.

9 See Fourth Amendment, supra note 1.

Accordingly, the Plan was not implemented across all NMS Stocks until December 8, 2013. Pursuant to the sixth amendment to the Plan,[10] which further modified the implementation schedule of Phase II of the Plan, the date for full implementation of the Plan was moved to February 24, 2014.

In addition, pursuant to the seventh amendment to the Plan,[11] the pilot period was extended from April 8, 2014 to February 20, 2015, and submission of the assessment of the Plan operations was accordingly extended to September 30, 2014. Without such extension, the Plan would have been in effect for the full trading day for less than two months before the end of the pilot period. The Participants believed that this short period of full implementation of the Plan would have provided insufficient time for both the Participants and the Commission to assess the impact of the Plan and determine whether the Plan should be modified prior to approval on a permanent basis.

On September 29, 2014, the Participants submitted a Participant Impact Assessment,[12] which provided the Commission with the Participants' initial observations in each area required to be addressed under Appendix B to the Plan. On May 28, 2015, the Participants submitted a Supplemental Joint Assessment, in which the Participants recommended that the Plan be adopted as permanent with certain modifications, and discussed the areas of analysis set forth in Appendix B to the Plan.[13] These areas are intended to capture the key measures necessary to assess the impact of the Plan and to support recommendations relating to the calibration of the

---

10 See Sixth Amendment, supra note 1.

11 See Securities Exchange Act Release No. 71851 (April 3, 2014), 79 FR 19687 (April 9, 2014).

12 See Joint SROs letter to Brent J. Fields, Secretary, SEC, dated September 29, 2014 ("Participant Impact Assessment").

13 See Letter from Christopher B. Stone, Vice President, FINRA, to Brent J. Fields, Secretary, SEC, dated May 28, 2015.

Percentage Parameters to help ensure that the stated objectives of the Plan are achieved – particularly: liquidity when approaching price bands; clearly erroneous trades; the appropriateness of the percentage parameters; the attributes of limit states; the impact of limit states on the options markets; whether process adjustments are needed when entering/exiting a limit state; and the length of trading pauses.

The Participants propose to amend Section VIII(C) of the Plan to extend the pilot period through April 22, 2016, to allow the Participants to conduct, and the Commission to consider, further analysis of data in support of the recommendations made in the Supplemental Joint Assessment, including around the attributes of limit states; the length of trading pauses; the use of an alternative reference price at the open of trading; and the alignment of the percentage parameters with the Clearly Erroneous Execution (CEE) thresholds (with the goal of largely eliminating the Participants' CEE authority). Thus, an extension of the pilot period would allow the Participants to finalize and file with the Commission any proposed amendments to the Plan resulting from such recommendations and further analysis. The Participants believe that extending the pilot period is appropriate in the public interest, for the protection of investors and the maintenance of a fair and orderly market because it provides Participants with additional time to perform further analysis on the appropriateness of current Plan components and parameters, and to finalize and propose recommended modifications to the Plan.

The Participants believe that the proposed amendment is consistent with Section 11A of the Securities Exchange Act of 1934 and Rule 608, of Regulation NMS thereunder,[14] which authorizes the Participants to act jointly in preparing, filing and implementing national market system plans. The Participants further believe that extending the pilot period will be beneficial

[14] 17 CFR 242.608.

in that it allows "the public, the Participants, and the Commission to assess the operation of the Plan and whether the Plan should be modified prior to approval on a permanent basis."[15]

The Participants note that the amended version of the Plan also includes the revised Appendix A – Schedule 1, which was updated for trading beginning July 1, 2015. As set forth in Appendix A – Percentage Parameters, the Primary Listing Exchange updates Schedule 1 to Appendix A semi-annually based on the fiscal year, and such updates do not require a Plan amendment.

1. Chicago Board Options Exchange, Incorporated Withdrawal

On March 30, 2015, CBOE provided written notice to Participants of CBOE's intent to withdraw from the Plan. Notice of withdrawal was made pursuant to Section IX of the Plan.

CBOE became a Participant due to the operation of the CBOE Stock Exchange, LLC ("CBSX"), a facility of the CBOE. CBSX engaged in NMS stock transactions. The last day of trading on CBSX was April 30, 2014. Because CBOE no longer operates a facility engaged in NMS stock transactions, CBOE would have no additional NMS stock data to provide nor any reason to avail itself of any further right under the Plan. Accordingly, CBOE proposes to be removed from the Plan.

B. Governing or Constituent Documents

The governing documents of the Processor, as defined in Section I(P) of the Plan, will not be affected by the Plan, but once the Plan is implemented, the Processor's obligations will change, as set forth in detail in the Plan.

C. Implementation of Plan

The initial date of the Plan operations was April 8, 2013.

---

15 See Securities Exchange Act Release No. 67091 (May 31, 2012), 77 FR 33498, 33508 (June 6, 2012).

D. Development and Implementation Phases

The Plan was initially implemented as a one-year pilot program in two Phases, consistent with Section VIII of the Plan: Phase I of Plan implementation began on April 8, 2013 and was completed on May 3, 2013. Implementation of Phase II of the Plan began on August 5, 2013 and was completed on February 24, 2014. Pursuant to this proposed amendment, the Participants propose to extend the pilot period so that it is set to end April 22, 2016.

E. Analysis of Impact on Competition

The proposed amendment to the Plan does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act. The Participants do not believe that the proposed Plan introduces terms that are unreasonably discriminatory for the purposes of Section 11A(c)(1)(D) of the Exchange Act.

F. Written Understanding or Agreements relating to Interpretation of, or Participation in the Plan

The Participants have no written understandings or agreements relating to interpretation of the Plan. Section II(C) of the Plan sets forth how any entity registered as a national securities exchange or national securities association may become a Participant.

G. Approval of Amendment of the Plan

Each of the Plan's Participants has executed a written amended Plan.

H. Terms and Conditions of Access

Section II(C) of the Plan provides that any entity registered as a national securities exchange or national securities association under the Exchange Act may become a Participant by: (1) becoming a participant in the applicable Market Data Plans, as defined in Section I(F) of the Plan; (2) executing a copy of the Plan, as then in effect; (3) providing each then-current

Participant with a copy of such executed Plan; and (4) effecting an amendment to the Plan as specified in Section III(B) of the Plan.

I. Method of Determination and Imposition, and Amount of, Fees and Charges

Not applicable.

J. Method and Frequency of Processor Evaluation

Not applicable.

K. Dispute Resolution

Section III(C) of the Plan provides for each Participant to designate an individual to represent the Participant as a member of an Operating Committee. No later than the initial date of the Plan, the Operating Committee shall designate one member of the Operating Committee to act as the Chair of the Operating Committee. Any recommendation for an amendment to the Plan from the Operating Committee that receives an affirmative vote of at least two-thirds of the Participants, but is less than unanimous, shall be submitted to the Commission as a request for an amendment to the Plan initiated by the Commission under Rule 608.

On July 30, 2015, the Operating Committee, duly constituted and chaired by Ms. Karen Lorentz of the NYSE, on behalf of Committee Chairman Mr. Christopher B. Stone of FINRA, met and voted unanimously to amend the Plan as set forth herein in accordance with Section III(C) of the Plan. The Plan Advisory Committee was notified in connection with the Ninth Amendment and was in favor.

III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed Ninth Amendment is consistent with the Act.

Comments may be submitted by any of the following methods:

Electronic comments:

- Use the Commission's Internet comment form (http://www.sec.gov/rules/sro.shtml); or
- Send an e-mail to rule-comments@sec.gov. Please include File Number 4-631 on the subject line.

Paper comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549-1090.

All submissions should refer to File Number 4-631. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet website (http://www.sec.gov/rules/sro.shtml). Copies of the submission, all subsequent amendments, all written statements with respect to the Plan that are filed with the Commission, and all written communications relating to the Plan between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street, NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the Participants' principal offices. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number 4-631 and should be submitted on or before [insert date 21 days from publication in the Federal Register].

By the Commission.

SECURITIES AND EXCHANGE COMMISSION
Release No. 34-75919

September 15, 2015

ORDER PURSUANT TO SECTIONS 15F(b)(6) AND 36 OF THE SECURITIES EXCHANGE ACT OF 1934 EXTENDING CERTAIN TEMPORARY EXEMPTIONS AND A TEMPORARY AND LIMITED EXCEPTION RELATED TO SECURITY-BASED SWAPS

I. Introduction

On June 15, 2011, the Securities and Exchange Commission ("Commission") issued an order granting temporary exemptions and exceptions from compliance with certain provisions of the Securities Exchange Act of 1934 ("Exchange Act")[1] applicable to security-based swaps ("SB swaps"), that were amended or added by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act").[2] The Temporary Exemptions Order provided, among other things, a temporary exemption from Section 3E(f) of the Exchange Act for security-based swap dealers and major security-based swap participants (together, "SBS Entities"), a temporary and limited exception from Section 15F(b)(6) of the Exchange Act with respect to persons then currently associated with SBS Entities, and temporary exemptions from Section 29(b) of the Exchange Act with respect to violations of Sections 3E(f) and 15F(b)(6) in connection with SB swap contracts entered into on or after July 16, 2011. The Commission is extending the exemption from Section 3E(f) and exception from Section 15F(b)(6) until the compliance date of rules we have adopted to establish a process by which SBS Entities can

---

1 15 U.S.C. 78a *et seq.*

2 *See* Temporary Exemptions and Other Temporary Relief, Together With Information on Compliance Dates for New Provisions of the Securities Exchange Act of 1934 Applicable to Security-Based Swaps, Exchange Act Release No. 64678 (June 15, 2011), 76 FR 36287 (June 22, 2011) ("Temporary Exemptions Order").

register (and withdraw from registration) with the Commission.[3] In addition, the Commission is specifying when the related exemption for Section 29(b) with respect to SB swap contracts that involve violations of Sections 3E(f) or 15F(b)(6) will expire.

II. Background

Title VII of the Dodd-Frank Act amended the Exchange Act to establish a new regulatory framework for the security-based swap markets. The provisions of Title VII generally were effective as of July 16, 2011, unless a rulemaking or other Commission action is required. The Temporary Exemptions Order provided guidance with respect to the compliance dates of Exchange Act provisions added by Title VII. It also identified those provisions with which compliance was required by the effective date of the Title VII amendments to the Exchange Act and those with which compliance is triggered by registration, adoption of final rules, or other action by the Commission.[4] Where compliance was required by the effective date of Title VII, the Temporary Exemptions Order granted certain temporary exemptions and exceptions where necessary or appropriate in the public interest, and consistent with the protection of investors.[5] The Temporary Exemptions Order included temporary exemptions from Sections 3E(f) and 29(b), and a temporary and limited exception from Section 15F(b)(6).[6]

---

[3] *See* Registration Process for Security-Based Swap Dealers and Major Security-Based Swap Participants, Exchange Act Release No. 75611 (Aug. 5, 2015), 80 FR 48964 (Aug.14, 2015) ("Registration Adopting Release").

[4] *See* Temporary Exemptions Order.

[5] *See id.*

[6] Section 36(c) of the Exchange Act, 15 U.S.C. 78mm(c), limits the Commission's exemptive authority with respect to certain provisions of the Exchange Act added by Title VII, including Section 15F. However, Section 15F(b)(6) expressly authorizes the Commission to establish exceptions to this provision by rule, regulation, or order.

Section 3E of the Exchange Act, added by Section 763(d) of the Dodd-Frank Act, regulates the collection and handling of collateral for SB swaps, and sets out certain rights of the counterparties who deliver such collateral.[7] Section 3E(f) requires SBS Entities to segregate initial margin amounts delivered by their counterparties in uncleared SB swap transactions if requested to do so by such counterparties.[8] The statutory compliance date for Section 3E(f) was July 16, 2011. As explained in the Temporary Exemptions Order, the segregation required under Section 3E(f) will require expenditures of resources and time, such as the establishment of accounts and the adoption of policies and procedures setting forth the proper collection and maintenance of collateral. The Commission found that a temporary exemption from Section 3E(f) for SBS Entities was necessary or appropriate in the public interest, and was consistent with the protection of investors because it would allow persons to register as an SBS Entity in accordance with the applicable registration requirements, once established, prior to expending resources to comply with the provisions of Section 3E(f), and because it would give SBS Entities additional time to establish the necessary accounts and adopt the policies and procedures required by Section 3E(f).[9] Under the Temporary Exemption Order, the temporary exemption from Section 3E(f) would expire on the date upon which the rules adopted by the Commission to register SBS Entities become effective.

---

7 15 U.S.C. 78c-5.

8 15 U.S.C. 78c-5(f).

9 *See* Temporary Exemptions Order n. 98 (providing that, "Notwithstanding the exemption granted, market participants in uncleared SB swaps may continue to voluntarily negotiate for and receive similar protections to those provided in section 3E(f) of the Exchange Act, 15 U.S.C. 78c-5(f), until compliance with such section 3E(f) is required.").

Section 15F of the Exchange Act, added by Section 764(a) of the Dodd-Frank Act, establishes the regulatory framework for SBS Entities.[10] Section 15F(b)(6) provides that "except to the extent otherwise provided by rule, regulation or order of the Commission," it shall be unlawful for an SBS Entity to permit an associated person who is subject to a statutory disqualification to effect or be involved in effecting security-based swaps on its behalf, if the SBS Entity knew or should have known of the statutory disqualification.[11] In the Temporary Exemptions Order, the Commission exercised its authority under Section 15F(b)(6) to provide a temporary and limited exception for SBS Entities from the application of the prohibition in that section. Specifically, the Temporary Exemptions Order provides that persons subject to a statutory disqualification who were, as of July 16, 2011, associated with an SBS Entity and who effected or were involved in effecting security-based swaps on behalf of such SBS Entity could continue to be associated with an SBS Entity until the date upon which rules adopted by the Commission to register SBS Entities become effective. In providing this exception, the Commission explained that it intended to separately consider issues related to how an associated person that is subject to a statutory disqualification may be involved in the security-based swap business of the SBS Entity.[12] The Commission also noted that existing business relationships and market activity could be unnecessarily disrupted if market participants were required to comply with Section 15F(b)(6) before the Commission considers, through notice and comment rulemaking, whether to adopt a procedure for potential modifications of the effect of statutory

10 15 U.S.C. 78o-10.

11 15 U.S.C. 78o-10(b)(6).

12 *See* Temporary Exemptions Order at 36301.

disqualifications under Title VII of the Dodd-Frank Act for SBS Entities and what any such procedure would require.[13]

Section 29(b) of the Exchange Act generally provides that contracts made in violation of any provision of the Exchange Act, or the rules thereunder, shall be void "(1) as regards the rights of any person who, in violation of any such provision, . . . shall have made or engaged in the performance of any such contract, and (2) as regards the rights of any person who, not being a party to such contracts, shall have acquired any right thereunder with actual knowledge of the facts by reason of which the making or performance of such contracts in violation of any such provision . . . ."[14] In the Temporary Exemptions Order, the Commission temporarily exempted any SB swap contract entered into on or after July 16, 2011 from being void or considered voidable by reason of Section 29(b) because any person that is a party to a contract violated a provision of the Exchange Act that was amended or added by Title VII of Dodd-Frank and for which the Commission has taken the view that compliance will be triggered by registration of a person or by adoption of final rules by the Commission, or has provided an exception or exemption in the Temporary Exemptions Order, until such date as the Commission specifies. The temporary exemption from Section 29(b) applies to contracts that would otherwise involve violations of, among other provisions, Sections 3E(f) or 15F(b)(6) of the Exchange Act.

The Commission received several comments in response to the Temporary Exemptions Order.[15] Although none of the commenters specifically referred to Sections 3E(f), 15F(b)(6), or

29(b), one commenter noted that the Temporary Exemptions Order was, in general, reasonable in terms of its scope and duration.[16] In particular, the commenter stated that the exemption from specific requirements under the Dodd-Frank Act was appropriate where the Commission had not completed "other steps, such as finalizing rules, setting up the registration regime, or establishing infrastructure."[17] Another commenter urged the Commission "to align the implementation of the self-operative provisions with the provisions that are dependent on rulemaking to ensure a coherent realization of the new swaps regulatory regime."[18]

III. Discussion

In August, 2015, the Commission adopted rules to establish a process by which SBS Entities can register (and withdraw from registration) with the Commission ("Registration Rules").[19] These rules will become effective October 13, 2015, but compliance with the Registration Rules will not be required until the later of: six months after the date of publication in the Federal Register of final rules establishing capital, margin and segregation requirements

for SBS Entities;[20] the compliance date of final rules establishing recordkeeping and reporting requirements for SBS Entities;[21] the compliance date of final rules establishing business conduct requirements under Sections 15F(h) and 15F(k) of the Exchange Act;[22] or the compliance date for final rules establishing a process for a registered SBS Entity to make an application to the Commission to allow an associated person who is subject to a statutory disqualification to effect or be involved in effecting security-based swaps on the SBS Entity's behalf ("Registration Compliance Date"). At the same time, the Commission also proposed rules that would, if adopted, establish a process for an SBS Entity to make an application to the Commission to allow an associated person subject to statutory disqualification to effect or be involved in effecting security-based swaps on behalf of the SBS Entity.[23]

Under the terms of the Temporary Exemptions Order, the temporary exemption from Section 3E(f) of the Exchange Act and exception from Section 15F(b)(6) of the Exchange Act

---

20 The Commission previously has proposed rules to establish capital, margin and segregation requirements for SBS Entities. *See* Capital, Margin, and Segregation Requirements for Security-Based Swap Dealers and Major Security-Based Swap Participants and Capital Requirements for Broker-Dealers, Exchange Act Release No. 68071 (Oct. 18, 2012), 77 FR 70213 (Nov. 23, 2012).

21 The Commission previously has proposed rules to establish recordkeeping and reporting requirements for SBS Entities. *See* Recordkeeping and Reporting Requirements for Security-Based Swap Dealers, Major Security-Based Swap Participants, and Broker-Dealers; Capital Rule for Certain Security-Based Swap Dealers, Exchange Act Release No. 71958 (Apr. 17, 2014), 79 FR 25193 (May 2, 2014).

22 The Commission previously has proposed rules to establish business conduct standards for SBS Entities. *See* Business Conduct Standards for Security-Based Swap Dealers and Major Security-Based Swap Participants, Exchange Act Release No. 64766 (June 29, 2011), 76 FR 42395 (July 18, 2011).

23 Applications by Security-Based Swap Dealers or Major Security-Based Swap Participants for Consent for Associated Persons to Effect or Be Involved in Effecting Security-Based Swaps, Exchange Act Release No. 75612 (Aug. 5, 2105), 80 FR 51683 (Aug. 25, 2015) (proposing new Rule of Practice 194).

will expire when rules adopted by the Commission to register SBS Entities become effective. Accordingly, absent an extension, the temporary exemption from the segregation requirements in Section 3E(f) and exception from the prohibition in Section 15F(b)(6) in the Temporary Exemptions Order will expire upon the effective date of the Registration Rules, even though SBS Entities would not be required to register until the Registration Compliance Date. As stated in the Temporary Exemptions Order, the Commission continues to believe that persons should be able to register in accordance with the applicable registration requirements prior to expending resources to comply with Section 3E(f). Therefore, the Commission is extending the temporary exemption from the requirements of Section 3E(f) until the Registration Compliance Date.[24]

The Commission also continues to believe that existing business relationships and market activity may be unnecessarily disrupted if market participants were required to comply with Section 15F(b)(6) of the Exchange Act before the Commission considered, through notice and comment rulemaking, whether to adopt a procedure for potential modifications of the effect of statutory disqualifications under Title VII for SBS Entities, and what any such procedure would require.[25] As noted above, the Commission has proposed rules relating to the requirements of

---

24 The Commission also notes that this extension will allow persons to have the ability to review the final capital, margin and segregation rules before being required to comply with the requirements of Section 3E(f), as the compliance date of the Registration Rules will occur no earlier than six months after the date of publication in the Federal Register of final rules establishing capital, margin and segregation requirements for SBS Entities.

25 *See supra* note 23. The Commission has provided guidance in the Registration Adopting Release regarding the dates on which SBS Entities will become subject to registration requirements based on their status as either a SBS Dealer or Major SBS Participant. *See* Registration Adopting Release, 80 FR at 48988. In accordance with this guidance, we do not believe that any entity will have the status of an SBS Entity prior to the Registration Compliance Date. However, for the avoidance of doubt and possible legal uncertainty, the Commission is extending the previously granted temporary exemption from Section 3E(f) and the temporary and limited exception from Section 15F(b)(6) until the Registration Compliance Date.

Section 15F(b)(6). The Registration Compliance Date will occur no earlier than final rules establishing a process for a registered SBS Entity to make an application to the Commission to allow an associated person who is subject to a statutory disqualification to effect or be involved in effecting security-based swaps on the SBS Entity's behalf. Accordingly, the Commission is extending the temporary and limited exception from the requirements of Section 15F(b)(6) until the Registration Compliance Date.

As discussed in the Temporary Exemptions Order, the Commission does not believe that Section 29(b) of the Exchange Act would apply to the provisions of Title VII for which the Commission has taken the view that compliance will either be triggered by registration of a person or by adoption of final rules by the Commission, or for which the Commission has provided an exception or exemption in that order. For the avoidance of doubt and to avoid possible legal uncertainty or market disruption, the Temporary Exemptions Order granted a temporary exemption from Section 29(b) until such date as the Commission specifies.[26] The Commission believes that the exemption from Section 29(b) provided under the Temporary Exemptions Order with respect to Sections 3E(f) and 15F(b)(6) of the Exchange Act will continue to apply during the period of time covered by the extensions in this Order. However, to avoid any doubt or possible legal uncertainty regarding the continuing availability of the temporary exemption from Section 29(b) with respect to Sections 3E(f) and 15(b)(6), the Commission is exercising its authority under Section 36 of the Exchange Act to continue the exemption from Section 29(b) with respect to Sections 3E(f) and 15(b)(6) until the Registration Compliance Date.

---

26 *See* Temporary Exemptions Order at 36305-06.

IV. Conclusion

IT IS HEREBY ORDERED, pursuant to Section 36 of the Exchange Act, that SBS Entities are exempt from the requirements of Section 3E(f) of the Exchange Act until the Registration Compliance Date.

IT IS HEREBY FURTHER ORDERED, pursuant to Section 15F(b)(6) of the Exchange Act, that SBS Entities are temporarily excepted from the prohibition of Section 15F(b)(6) with respect to persons subject to a statutory disqualification who were associated with an SBS Entity as of July 16, 2011, and who effect or are involved in effecting SB swaps on behalf of such SBS Entity until the Registration Compliance Date.

IT IS HEREBY FURTHER ORDERED, pursuant to Section 36 of the Exchange Act, that no SB swap contract entered into on or after July 16, 2011 shall be void or considered voidable by reason of Section 29(b) of the Exchange Act because any person that is a party to the contract violated Section 3E(f) of the Exchange Act prior to the Registration Compliance Date.

IT IS HEREBY FURTHER ORDERED, pursuant to Section 36 of the Exchange Act, that no SB swap contract entered into on or after July 16, 2011 shall be void or considered voidable by reason of Section 29(b) of the Exchange Act because any person that is a party to the contract violated Section 15F(b)(6) of the Exchange Act prior to the Registration Compliance Date.

By the Commission.

ADMINISTRATIVE PROCEEDING
File No. 3-16813

In the Matter of **Jeffrey B. Rubin,** **Respondent.**	**ORDER INSTITUTING ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933, SECTION 15(b) OF THE SECURITES EXCHANGE ACT OF 1934, SECTIONS 203(f) AND 203(k) OF THE INVESTMENT ADVISERS ACT OF 1940, AND SECTION 9(b) OF THE INVESTMENT COMPANY ACT OF 1940, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative and cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 8A of the Securities Act of 1933 ("Securities Act"), Section 15(b) of the Exchange Act of 1934 ("Exchange Act"), Sections 203(f) and 203(k) of the Investment Advisers Act of 1940 ("Advisers Act"), and Section 9(b) of the Investment Company Act of 1940 ("Investment Company Act") against Jeffrey B. Rubin ("Respondent" or "Rubin").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Instituting Administrative and Cease-and-Desist Proceedings Pursuant to Section 8A of the Securities Act of 1933, Section 15(b) of the Securities Exchange Act of 1934, Sections 203(f) and 203(k) of the Investment Advisers Act of 1940, and Section 9(b) of the Investment Company Act, Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds that:

Summary

1. From early 2008 through March 2011 (the "relevant time period"), Jeffrey B. Rubin, the president of Pro Sports Financial, Inc. ("Pro Sports"), failed to disclose to his clients the personal expenses he was reimbursed out of the proceeds of a securities offering in which he advised them to invest. In 2007, Rubin, a close friend to many professional athletes, started Pro Sports Financial, Inc. ("Pro Sports") to assist professional athletes with their various day-to-day personal needs. Rubin also served as the investment adviser to his Pro Sports clients ("Pro Sports Clients").

2. During the relevant time period, at least thirty Pro Sports Clients, either at the recommendation of Rubin or an Alabama businessman (the "Project Developer"), invested a total of approximately $40 million in the development of an entertainment complex and casino in Dothan, Alabama called Country Crossings (the "Country Crossings Offering"). Pursuant to a private placement memorandum ("PPM"), Rubin's Pro Sports Clients invested in Country Crossings by purchasing promissory notes to help secure the land for the project. In addition, as a note holder, investors received unit interests in Country Crossings. As stated in the PPM, Rubin had an equity interest in the success of Country Crossings.

3. Rubin also spearheaded the marketing of Country Crossings to all prospective investors. Rubin sought and received from the Project Developer reimbursement of approximately $600,000 out of the offering proceeds for purported marketing expense reimbursements when, in fact, Rubin had incurred the expenses not for Country Crossing marketing purposes but rather to fund his lavish lifestyle, including for the mortgage on a multi-million dollar home, the lease payments on a Lamborghini Gallardo Spyder, cruise vacations, designer handbags and spa services for friends, and a stake in a Florida nightclub. Rubin did not

disclose to his Pro Sports Clients that he had been reimbursed for these personal expenses from the offering proceeds.

Respondent

4. **Jeffrey B. Rubin**, age 41, is a resident of Denver, Colorado. He is the founder and former president of Pro Sports Financial, Inc. From July 2006 through February 2011, Rubin was a registered representative with two SEC-registered broker-dealers. From April 2008 through February 2010, he was associated with Alterna Wealth Management, LLC ("Alterna"), now known as Socius Family Office, LLC. During the period of Rubin's association with the firm, Alterna was registered as an investment adviser with the state of Florida and, as of October 5, 2009, also with Texas. Rubin previously held Series 6, 7, 24, and 63 licenses. In March 2013, FINRA permanently barred Rubin from the securities industry based upon similar conduct at issue here. Rubin has also been named as a defendant in several private lawsuits in both federal and state court, and has been a respondent in at least two FINRA arbitrations.

Other Relevant Entities

5. **Pro Sports Financial, Inc.** was formed in 2007 and until September 2012 was a Florida corporation with its principal place of business in Fort Lauderdale, Florida. Pro Sports provided its professional athlete clients with "concierge" services such as paying monthly bills, obtaining life insurance policies, booking travel, handling tax returns, and setting up trusts for family members. Pro Sports has never been registered with the Commission in any capacity.

6. **Socius Family Office, LLC ("Socius")**, a Florida limited liability company with its principal place of business in Boca Raton, Florida, was formed in 2012. From 2007 until 2012, Socius was known first as Alterna Wealth Management, Inc. and then later as Alterna Wealth Management, LLC. From 2007 through June 2010, Alterna was registered as an investment adviser with the state of Florida. Alterna was also registered as an investment adviser with Texas as of October 5, 2009, and with New York as of March 22, 2010. On June 22, 2010, Alterna (as Socius) filed a partial Form ADV-W withdrawing its state registrations as an investment adviser in favor of SEC registration. According to its most recent Form ADV filed with the Commission on March 31, 2015, Socius has assets under management of approximately $168 million.

Background

7. In 2007, Rubin formed Pro Sports to serve as a "concierge" service for professional athletes, largely current and former NFL players with whom Rubin shared a long-term friendship. At the time, Rubin had already been working in the securities industry as a registered representative with an SEC-registered broker-dealer.

8. Rubin set up Pro Sports to serve as a one-stop-shop for a professional athlete's day-to-day personal needs such as, among other things, facilitating online monthly bill payments,

securing life insurance policies, arranging travel, vacations, and relocations, running errands, event planning, and handling car and mortgage payments.

The Country Crossings Offering

9. In or around January 2008, at least two Pro Sports Clients learned about an investment opportunity through the Project Developer. At a meeting with Pro Sports Clients, and not in Rubin's presence, the Project Developer touted the financial prospects of the Country Crossings Offering.

10. In or around March 2008, the Project Developer approached a Florida-based law firm (the "FL Law Firm") that regularly provided legal services to Pro Sports Clients to provide the legal services needed for the Country Crossings Offering, including drafting the PPM, subscription agreements, and other offering related documents (the "Offering Documents").

11. Word of the Country Crossings Offering began to spread throughout NFL locker rooms as a promising investment. As a result, Rubin began receiving numerous phone calls from his Pro Sports Clients inquiring about the prospective financial investment.

12. Shortly thereafter, a partner at the FL Law Firm contacted Rubin about the Country Crossings Offering and encouraged him to attend a meeting at the firm, along with many Pro Sports Clients. Given his clients' interest and the potential opportunity presented, Rubin decided to attend the meeting.

13. At the meeting, the Project Developer presented the Country Crossings Offering, including a discussion of the casino. According to the Project Developer, the casino would include electronic bingo, a casino game that he represented was legal in the State of Alabama. He compared Country Crossings to Branson, Missouri, stating that it would be the next "destination spot."

14. Everyone at the meeting, including Rubin and his Pro Sports Clients, was enthusiastic about the financial opportunity presented. Shortly thereafter, the FL Law Firm, without any involvement from Rubin, began drafting the Offering Documents to facilitate the Country Crossings Offering.

15. Specifically, investments made in Country Crossings were effectuated by purchasing promissory notes from Ronnie Gilley Properties, LLC, an Alabama limited liability company and the entity securing the land for Country Crossings. In addition, as a note holder, investors received unit interests in Country Crossings LLC, Resorts & Entertainment Group, II, LLC, and Resorts Development Group II, LLC. Resorts & Entertainment Group II, LLC and Resorts Development Group II, LLC, both Alabama limited liability companies, were the operating and development companies of Country Crossings, respectively.

16. Ultimately, during the relevant time period, at least thirty Pro Sports Clients invested a total of approximately $40 million in the Country Crossings Offering. Rubin recommended the Country Crossings investment to his advisory clients, including the Pro Sports Clients. The Pro Sports Clients viewed Rubin as their investment adviser with respect to all financial matters, including the Country Crossings Offering.

17. Rubin had a 4% equity interest in Country Crossings, as disclosed in the Offering Materials. His equity interest came in the form of unit interests in Country Crossings which he received at the outset, before he started marketing the project. His equity interest was not contingent upon the success of his marketing efforts or the offering. Rubin orally informed at least some of the Pro Sports Clients about his stake in the project.

Rubin Receives Investor Proceeds Under the Guise of Reimbursement for Legitimate <u>Marketing Expenses</u>

18. In or around March 2008 through as late as March 2011, Rubin marketed the Country Crossings Offering by traveling around the country to meet with prospective investors, all of whom were his friends or Pro Sports Clients. Rubin also tried to generate interest in the project by pitching celebrities to serve as spokespeople or performers for the grand opening of Country Crossings.

19. Rubin was reimbursed by the Project Developer to market the Country Crossings Offering. The majority of his Pro Sports Clients knew about this financial arrangement, and they often capitalized on the reimbursable lavish meals and swank entertainment when Rubin pitched the investment to them.

20. During the relevant period, Rubin each month charged tens of thousands of dollars in costs associated with marketing the Country Crossings Offering to his credit cards.

21. The Project Developer without asking questions approved and reimbursed any expenses that Rubin submitted to him.

22. From August 2008 through at least July 2010, the Project Developer reimbursed Rubin for the expenses Rubin incurred in marketing the Country Crossings Offering. Rubin would then apply the funds to reduce his credit card balances.

23. During that same time period, apart from other reimbursements, the Project Developer also made numerous wire transfers purportedly to reimburse Rubin for additional legitimate marketing expenses totaling approximately $600,000 from a bank account (the "Bank Account") to an account at a different bank held in the name of Pankas Holdings, LLC (the "Pankas Account"). The Bank Account was the same account Pro Sports Clients used, as set forth in the subscription agreement, to wire funds to invest in the Country Crossings Offering. Rubin was the sole beneficiary of the Pankas Account.

24. Instead, these expenses totaling approximately $600,000 were false expenses Rubin submitted to the Project Developer under the guise of legitimate marketing expenses. Rubin used approximately $600,000 of investor proceeds reimbursed to him by the Project Developer to fund his lavish lifestyle to pay for a mortgage on a multi-million dollar home, the lease payments on a Lamborghini Gallardo Spyder, and a stake in a Florida nightclub, and to pay for personal credit card charges he incurred for cruise vacations, designer handbags and spa services for friends, and numerous outings to South Beach nightclubs.

25. In January 2010, Alabama law enforcement shut down the Country Crossings casino due to state issues related to the legality of electronic bingo. The Project Developer and Rubin continued to solicit investor proceeds to reopen Country Crossings. The casino never reopened.

26. In April 2011, the Project Developer pled guilty to, among other things, bribery and money laundering related to buying and selling votes on proposed gambling legislation designed to protect gambling facilities like Country Crossings. The Project Developer is currently serving an 80 month sentence.

27. In March 2013, FINRA permanently barred Rubin for the same conduct.

Violations

28. As a result of the conduct described above, Respondent willfully violated Sections 17(a)(1) and 17(a)(3) of the Securities Act, which prohibits fraudulent conduct in the offer or sale of securities.

29. As a result of the conduct described above, Respondent willfully violated Section 206(1) of the Advisers Act, which prohibits any investment adviser from employing any device, scheme, or artifice to defraud any client or prospective client.

30. As a result of the conduct described above, Respondent willfully violated Section 206(2) of the Advisers Act, which prohibits an investment adviser from, directly or indirectly, engaging in any transaction, practice, or course of business which operates as a fraud or deceit upon any client or prospective client.

Disgorgement

31. Respondent has submitted a sworn Statement of Financial Condition dated May 12, 2015, and other evidence and has asserted his inability to pay disgorgement plus prejudgment interest.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondent's Offer.

Accordingly, pursuant to Section 8A of the Securities Act, Section 15(b) of the Exchange Act, Sections 203(f) and 203(k) of the Advisers Act, and Section 9(b) of the Investment Company Act, it is hereby ORDERED that:

A. Respondent shall cease and desist from committing or causing any violations and any future violations of Sections 17(a)(1) and 17(a)(3) of the Securities Act and Sections 206(1) and 206(2) of the Advisers Act.

B. Respondent be, and hereby is:

barred from association with any broker, dealer, investment adviser, municipal securities dealer, municipal advisor, transfer agent, or nationally recognized statistical rating organization;

barred from participating in any offering of a penny stock, including: acting as a promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer or issuer for purposes of the issuance or trading in any penny stock, or inducing or attempting to induce the purchase or sale of any penny stock; and

prohibited from serving or acting as an employee, officer, director, member of an advisory board, investment adviser or depositor of, or principal underwriter for, a registered investment company or affiliated person of such investment adviser, depositor, or principal underwriter.

C. Any reapplication for association by Respondent will be subject to the applicable laws and regulations governing the reentry process, and reentry may be conditioned upon a number of factors, including, but not limited to, the satisfaction of any or all of the following: (a) any disgorgement ordered against Respondent, whether or not the Commission has fully or partially waived payment of such disgorgement; (b) any arbitration award related to the conduct that served as the basis for the Commission order; (c) any self-regulatory organization arbitration award to a customer, whether or not related to the conduct that served as the basis for the Commission order; and (d) any restitution order by a self-regulatory organization, whether or not related to the conduct that served as the basis for the Commission order.

D. Respondent shall pay a civil money penalty of $250,000 to the Securities and Exchange Commission for transfer to the general fund of the United States Treasury in accordance with Exchange Act Section 21F(g)(3). Within 10 days of the entry of this Order, Respondent shall pay $100,000, and the remaining balance shall be paid in equal installments of $50,000 within 120, 240, and 360 days of the entry of the Order. If any payment is not made by the date the payment is required by this Order, the entire outstanding balance of civil penalties, plus any additional interest accrued pursuant to 31 U.S.C. 3717, shall be due and payable immediately, without further application. Payment must be made in one of the following ways:

(1) Respondent may transmit payment electronically to the Commission, which will provide detailed ACH transfer/Fedwire instructions upon request;

(2) Respondent may make direct payment from a bank account via Pay.gov through the SEC website at http://www.sec.gov/about/offices/ofm.htm; or

(3) Respondent may pay by certified check, bank cashier's check, or United States postal money order, made payable to the Securities and Exchange Commission and hand-delivered or mailed to:

Enterprise Services Center
Accounts Receivable Branch
HQ Bldg., Room 181, AMZ-341
6500 South MacArthur Boulevard
Oklahoma City, OK 73169

Payments by check or money order must be accompanied by a cover letter identifying Jeffrey B. Rubin as a Respondent in these proceedings, and the file number of these proceedings; a copy of the cover letter and check or money order must be sent to Julie Riewe, Co-Chief, Asset Management Unit, Division of Enforcement, Securities and Exchange Commission, 100 F. St., NE, Washington, DC 20549.

V.

It is further Ordered that, solely for purposes of exceptions to discharge set forth in Section 523 of the Bankruptcy Code, 11 U.S.C. §523, the findings in this Order are true and admitted by Respondent, and further, any debt for disgorgement, prejudgment interest, civil penalty or otheramounts due by Respondent under this Order or any other judgment, order, consent order, decree or settlement agreement entered in connection with this proceeding, is a debt for the violation by Respondent of the federal securities laws or any regulation or order issued under such laws, as set forth in Section 523(a)(19) of the Bankruptcy Code, 11 U.S.C. §523(a)(19).

In the Matter of **WILFRED ROBERT SUTCLIFFE,** **Respondent.**	ORDER INSTITUTING PUBLIC ADMINISTRATIVE PROCEEDINGS PURSUANT TO RULE 102(e) OF THE COMMISSIONS RULES OF PRACTICE, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative proceedings be, and hereby are, instituted against Wilfred Robert Sutcliffe ("Respondent" or "Sutcliffe") pursuant to Rule 102(e)(3)(i) of the Commission's Rules of Practice.[1]

[1] Rule 102(e)(3)(i) provides, in relevant part, that:

> The Commission, with due regard to the public interest and without preliminary hearing, may, by order, . . . suspend from appearing or practicing before it any . . . accountant . . . who has been by name . . . permanently enjoined by any court of competent jurisdiction, by reason of his or her misconduct in an action brought by the Commission, from violating or aiding and abetting the violation of any provision of the Federal securities laws or of the rules and regulations thereunder.

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, and the findings contained in Section III.3 below, which are admitted, Respondent consents to the entry of this Order Instituting Administrative Proceedings Pursuant to Rule 102(e) of the Commission's Rules of Practice, Making Findings, and Imposing Remedial Sanctions ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds that:

1. Wilfred Robert Sutcliffe, age 52, is a citizen and resident of the United Kingdom. From April 2004 until May 2012, Sutcliffe was the Finance Director for Computer Sciences Corporation (CSC)'s multi-billion-dollar contract with the United Kingdom's National Health Service ("the NHS Contract"), to build and deploy an electronic patient records system across the UK. Sutcliffe studied accounting and business finance at Manchester University. He is a fellow of the Charted Institute of Management Accountants (CIMA) in the United Kingdom.

2. CSC, a Nevada corporation headquartered in Falls Church, Virginia, sells information technology services. At all relevant times, CSC's common stock traded on the New York Stock Exchange.

3. On June 5, 2015, the Commission filed a complaint in the United States District Court for the Southern District of New York against Sutcliffe in <u>Securities and Exchange Commission v. Wilfred Robert Sutcliffe</u>, Civil Action Number 15-cv-4340 (RJS). On September 9, 2015, the court entered an order permanently enjoining Sutcliffe, by consent, from future violations of Section 17(a) of the Securities Act of 1933 (the "Securities Act") and Sections 10(b) and 13(b)(5) of the Securities Exchange Act of 1934 (the "Exchange Act") and Rules 10b-5(a) and (c) and 13b2-1 promulgated thereunder, and from aiding and abetting violations of Exchange Act Sections 13(a), 13(b)(2)(A), and 13(b)(2)(B) and Rules 13a-1 and 13a-13 promulgated thereunder. Sutcliffe was also barred from acting as an officer or director of any public company pursuant to Section 20(e) of the Securities Act and Section 21(d)(2) of the Exchange Act and ordered to pay $6,003.33 in disgorgement and $1,060.62 in prejudgment interest.

4. The Commission's complaint alleged that, in September 2009, Sutcliffe manipulated CSC's accounting model for the NHS Contract to maintain a 16% profit margin after learning that the contract was likely to generate a loss. This allowed CSC to report $221 million in operating profit in Q2FY2010. But for Sutcliffe's fraudulent acts, the company

would have reported a materially lower amount for that quarter, and for fiscal year 2010.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanction agreed to in Respondent Sutcliffe's Offer.

Accordingly, it is hereby ORDERED, effective immediately, that:

A. Sutcliffe is suspended from appearing or practicing before the Commission as an accountant.

By the Commission.

ADMINISTRATIVE PROCEEDING
File No. 3-16810

In the Matter of **Edward Parker, CA,** **Respondent.**	**ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS PURSUANT TO RULE 102(e) OF THE COMMISSION'S RULES OF PRACTICE, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative proceedings be, and hereby are, instituted against Edward Parker ("Respondent" or "Parker") pursuant to Rule 102(e)(3)(i) of the Commission's Rules of Practice.[1]

[1] Rule 102(e)(3)(i) provides, in relevant part, that:

> The Commission, with due regard to the public interest and without preliminary hearing, may, by order, . . . suspend from appearing or practicing before it any . . . accountant . . . who has been by name . . . permanently enjoined by any court of competent jurisdiction, by reason of his or her misconduct in an action brought by the Commission, from violating or aiding and abetting the violation of any provision of the Federal securities laws or of the rules and regulations thereunder.

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, and the findings contained in Section III.3 below, which are admitted, Respondent consents to the entry of this Order Instituting Administrative Proceedings Pursuant to Rule 102(e) of the Commission's Rules of Practice, Making Findings, and Imposing Remedial Sanctions ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds that:

1. Edward Parker, 42, a citizen and resident of Australia, was Controller of Computer Sciences Corporation's Australian subsidiary from 2007 until the company suspended him in August 2011. He left the company in October 2012. Parker has been a licensed Chartered Accountant in Australia since 1994.

2. Computer Sciences Corporation ("CSC"), a Nevada corporation headquartered in Falls Church, Virginia, sells information technology services. At all relevant times, CSC's common stock traded on the New York Stock Exchange.

3. On June 5, 2015, the Commission filed a complaint in the United States District Court for the Southern District of New York against Parker in Securities and Exchange Commission v. Edward Parker, Civil Action Number 15-cv-4341 (ER). On September 9, 2015, the court entered an order permanently enjoining Parker, by consent, from future violations of Section 17(a) of the Securities Act of 1933 (the "Securities Act") and Sections 10(b) and 13(b)(5) of the Securities Exchange Act of 1934 (the "Exchange Act") and Rules 10b-5(a) and (c) and 13b2-1 promulgated thereunder, and from aiding and abetting violations of Exchange Act Sections 13(a), 13(b)(2)(A), and 13(b)(2)(B) and Rules 13a-1 and 13a-13 promulgated thereunder. Parker was also barred from acting as an officer or director of any public company pursuant to Section 20(e) of the Securities Act and Section 21(d)(2) of the Exchange Act for a period of five years and ordered to pay $2,800 in disgorgement of ill-gotten gains and $750 in prejudgment interest.

4. The Commission's complaint alleged that Parker fraudulently inflated CSC's earnings in its first quarter of fiscal year 2009. Parker manipulated the company's earnings by using a series of improper "cookie jar" reserves and by failing to record expenses as required. Parker's actions fraudulently overstated CSC's consolidated pretax income by over 5%. But for Parker's misconduct, CSC would have missed analysts' earnings targets for the first quarter of fiscal year 2009.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanction agreed to in Respondent Parker's Offer.

Accordingly, it is hereby ORDERED, effective immediately, that:

A. Parker is suspended from appearing or practicing before the Commission as an accountant.

B. After five years from the date of this order, Respondent may request that the Commission consider his reinstatement by submitting an application (attention: Office of the Chief Accountant) to resume appearing or practicing before the Commission as:

1. a preparer or reviewer, or a person responsible for the preparation or review, of any public company's financial statements that are filed with the Commission. Such an application must satisfy the Commission that Respondent's work in his practice before the Commission will be reviewed either by the independent audit committee of the public company for which he works or in some other acceptable manner, as long as he practices before the Commission in this capacity; and/or

2. an independent accountant. Such an application must satisfy the Commission that:

(a) Respondent, or the public accounting firm with which he is associated, is registered with the Public Company Accounting Oversight Board ("Board") in accordance with the Sarbanes-Oxley Act of 2002, and such registration continues to be effective;

(b) Respondent, or the registered public accounting firm with which he is associated, has been inspected by the Board and that inspection did not identify any criticisms of or potential defects in the respondent's or the firm's quality control system that would indicate that the respondent will not receive appropriate supervision;

(c) Respondent has resolved all disciplinary issues with the Board, and has complied with all terms and conditions of any sanctions imposed by the Board (other than reinstatement by the Commission); and

(d) Respondent acknowledges his responsibility, as long as Respondent appears or practices before the Commission as an independent accountant, to comply with all requirements of the Commission and the Board, including, but not limited to, all requirements relating to registration, inspections, concurring partner reviews and quality control standards.

C. The Commission will consider an application by Respondent to resume appearing or practicing before the Commission provided that his practicing license is current and he has resolved all other disciplinary issues with Chartered Accountants Australia and

New Zealand. However, if licensure is dependent on reinstatement by the Commission, the Commission will consider an application on its other merits. The Commission's review may include consideration of, in addition to the matters referenced above, any other matters relating to Respondent's character, integrity, professional conduct, or qualifications to appear or practice before the Commission.

By the Commission.

SECURITIES AND EXCHANGE COMMISSION

SECURITIES EXCHANGE ACT OF 1934
Release No. 75926 / September 15, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16811

In the Matter of **AgriBioTech Inc.,** **Condor Capital, Inc., and** **Tuffnell Ltd.,** **Respondents.**	**ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS AND NOTICE OF HEARING PURSUANT TO SECTION 12(j) OF THE SECURITIES EXCHANGE ACT OF 1934**

I.

The Securities and Exchange Commission ("Commission") deems it necessary and appropriate for the protection of investors that public administrative proceedings be, and hereby are, instituted pursuant to Section 12(j) of the Securities Exchange Act of 1934 ("Exchange Act") against Respondents AgriBioTech Inc., Condor Capital, Inc., and Tuffnell Ltd.

II.

After an investigation, the Division of Enforcement alleges that:

A. RESPONDENTS

1. AgriBio Tech Inc. (CIK No. 876320) is a permanently revoked Nevada corporation located in Henderson, Nevada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). AgriBio Tech is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-Q for the period ended December 31, 1999, which reported a net loss of $23,149,625 for the prior six months.

2. Condor Capital, Inc. (CIK No. 831375) is a permanently revoked Nevada corporation located in Las Vegas, Nevada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Condor Capital is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a

Form 10-QSB for the period ended June 30, 2001, which reported a net loss of $4,009,902 from October 1, 1990 through June 30, 2001.

3. Tuffnell Ltd. (CIK No. 1450551) is a dissolved Nevada corporation located in Phoenix, Arizona with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Tuffnell is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-K for the period ended September 30, 2012, which reported a net loss of $263,499 for the prior twelve months.

B. DELINQUENT PERIODIC FILINGS

4. As discussed in more detail above, all of the Respondents are delinquent in their periodic filings with the Commission, have repeatedly failed to meet their obligations to file timely periodic reports, and failed to heed delinquency letters sent to them by the Division of Corporation Finance requesting compliance with their periodic filing obligations or, through their failure to maintain a valid address on file with the Commission as required by Commission rules, did not receive such letters.

5. Exchange Act Section 13(a) and the rules promulgated thereunder require issuers of securities registered pursuant to Exchange Act Section 12 to file with the Commission current and accurate information in periodic reports, even if the registration is voluntary under Section 12(g). Specifically, Rule 13a-1 requires issuers to file annual reports, and Rule 13a-13 requires domestic issuers to file quarterly reports.

6. As a result of the foregoing, Respondents failed to comply with Exchange Act Section 13(a) and Rules 13a-1 and/or 13a-13 thereunder.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate for the protection of investors that public administrative proceedings be instituted to determine:

A. Whether the allegations contained in Section II hereof are true and, in connection therewith, to afford the Respondents an opportunity to establish any defenses to such allegations; and,

B. Whether it is necessary and appropriate for the protection of investors to suspend for a period not exceeding twelve months, or revoke the registration of each class of securities registered pursuant to Section 12 of the Exchange Act of the Respondents identified in Section II hereof, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents.

IV.

IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice [17 C.F.R. § 201.110].

IT IS HEREBY FURTHER ORDERED that Respondents shall file an Answer to the allegations contained in this Order within ten (10) days after service of this Order, as provided by Rule 220(b) of the Commission's Rules of Practice [17 C.F.R. § 201.220(b)].

If Respondents fail to file the directed Answers, or fail to appear at a hearing after being duly notified, the Respondents, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents, may be deemed in default and the proceedings may be determined against them upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f), and 310 of the Commission's Rules of Practice [17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f), and 201.310].

This Order shall be served forthwith upon Respondents personally or by certified, registered, or Express Mail, or by other means permitted by the Commission's Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 120 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice [17 C.F.R. § 201.360(a)(2)].

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of Section 551 of the Administrative Procedure Act, it is not deemed subject to the provisions of Section 553 delaying the effective date of any final Commission action.

By the Commission.

Release No. 75927 / September 15, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16812

In the Matter of **Aim Safety Co., Inc.** **(a/k/a AimGlobal Technologies Co., Inc.),** **Determination, Inc.,** **Franklyn Resources II, Inc.,** **Red Oak Mining Corp.** **(a/k/a Austin Developments Corp.,** **f/k/a Universal Wing Technologies Inc.),** **and** **travelbyus, Inc.** **(f/k/a Aviation Group, Inc.),** **Respondents.**	**ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS AND NOTICE OF HEARING PURSUANT TO SECTION 12(j) OF THE SECURITIES EXCHANGE ACT OF 1934**

I.

The Securities and Exchange Commission ("Commission") deems it necessary and appropriate for the protection of investors that public administrative proceedings be, and hereby are, instituted pursuant to Section 12(j) of the Securities Exchange Act of 1934 ("Exchange Act") against Respondents Aim Safety Co., Inc. (a/k/a AimGlobal Technologies Co., Inc.), Determination, Inc., Franklyn Resources II, Inc., Red Oak Mining Corp. (a/k/a Austin Developments Corp., f/k/a Universal Wing Technologies Inc.), and travelbyus, Inc. (f/k/a Aviation Group, Inc.).

II.

After an investigation, the Division of Enforcement alleges that:

A. RESPONDENTS

1. Aim Safety Co., Inc. (a/k/a AimGlobal Technologies Co., Inc.) (CIK No. 1000028) is a dissolved British Columbia corporation located in Delta, British Columbia, Canada with a class of securities registered with the Commission pursuant to Exchange

Act Section 12(g). Aim Safety is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 20-FR on December 29, 1995, which it amended on November 27, 1998.

2. Determination, Inc. (CIK No. 1120814) is a dissolved Colorado corporation located in Colorado Springs, Colorado with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Determination is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-SB12G registration statement on August 4, 2000.

3. Franklyn Resources II, Inc. (CIK No. 1101226) is a permanently revoked Nevada corporation located in Glendale, Colorado with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Franklyn Resources II is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-QSB for the period ended June 30, 2008, which reported a net loss of $93,179 from the company's March 3, 1999 inception through June 30, 2008.

4. Red Oak Mining Corp. (a/k/a Austin Developments Corp., f/k/a Universal Wing Technologies Inc.) (CIK No. 1245108) is a British Columbia corporation located in Vancouver, British Columbia, Canada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). Red Oak Mining is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 20-FR12G registration statement on June 30, 2003. As of September 15, 2015, the company's stock (symbol "UNIGF") was traded on the over-the-counter markets.

5. travelbyus, Inc. (CIK No. 355906) is a forfeited Texas corporation located in White Rock, British Columbia, Canada with a class of securities registered with the Commission pursuant to Exchange Act Section 12(g). travelbyus is delinquent in its periodic filings with the Commission, having not filed any periodic reports since it filed a Form 10-QSB for the period ended June 30, 2001, which reported a net loss of $54,991 for the prior nine months.

B. DELINQUENT PERIODIC FILINGS

6. As discussed in more detail above, all of the Respondents are delinquent in their periodic filings with the Commission, have repeatedly failed to meet their obligations to file timely periodic reports, and failed to heed delinquency letters sent to them by the Division of Corporation Finance requesting compliance with their periodic filing obligations or, through their failure to maintain a valid address on file with the Commission as required by Commission rules, did not receive such letters.

7. Exchange Act Section 13(a) and the rules promulgated thereunder require issuers of securities registered pursuant to Exchange Act Section 12 to file with the Commission current and accurate information in periodic reports, even if the registration is voluntary under Section 12(g). Specifically, Rule 13a-1 requires issuers to file annual reports, and Rule 13a-13 requires domestic issuers to file quarterly reports.

8. As a result of the foregoing, Respondents failed to comply with Exchange Act Section 13(a) and Rules 13a-1 and/or 13a-13 thereunder.

III.

In view of the allegations made by the Division of Enforcement, the Commission deems it necessary and appropriate for the protection of investors that public administrative proceedings be instituted to determine:

A. Whether the allegations contained in Section II hereof are true and, in connection therewith, to afford the Respondents an opportunity to establish any defenses to such allegations; and,

B. Whether it is necessary and appropriate for the protection of investors to suspend for a period not exceeding twelve months, or revoke the registration of each class of securities registered pursuant to Section 12 of the Exchange Act of the Respondents identified in Section II hereof, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents.

IV.

IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in Section III hereof shall be convened at a time and place to be fixed, and before an Administrative Law Judge to be designated by further order as provided by Rule 110 of the Commission's Rules of Practice [17 C.F.R. § 201.110].

IT IS HEREBY FURTHER ORDERED that Respondents shall file an Answer to the allegations contained in this Order within ten (10) days after service of this Order, as provided by Rule 220(b) of the Commission's Rules of Practice [17 C.F.R. § 201.220(b)].

If Respondents fail to file the directed Answers, or fail to appear at a hearing after being duly notified, the Respondents, and any successor under Exchange Act Rules 12b-2 or 12g-3, and any new corporate names of any Respondents, may be deemed in default and the proceedings may be determined against them upon consideration of this Order, the allegations of which may be deemed to be true as provided by Rules 155(a), 220(f), 221(f), and 310 of the Commission's Rules of Practice [17 C.F.R. §§ 201.155(a), 201.220(f), 201.221(f), and 201.310].

This Order shall be served forthwith upon Respondents personally or by certified, registered, or Express Mail, or by other means permitted by the Commission's Rules of Practice.

IT IS FURTHER ORDERED that the Administrative Law Judge shall issue an initial decision no later than 120 days from the date of service of this Order, pursuant to Rule 360(a)(2) of the Commission's Rules of Practice [17 C.F.R. § 201.360(a)(2)].

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision of this matter, except as witness or counsel in proceedings held pursuant to notice. In the Matter of Joseph F. Apuzzo, CPA Respondent.	ORDER INSTITUTING PUBLIC ADMINISTRATIVE PROCEEDINGS PURSUANT TO RULE 102(e) OF THE COMMISSION'S RULES OF PRACTICE, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative proceedings be, and hereby are, instituted against Joseph F. Apuzzo ("Respondent" or "Apuzzo") pursuant to Rule 102(e)(3)(i) of the Commission's Rules of Practice.[1]

---

1 Rule 102(e)(3)(i) provides, in pertinent part, that:

> The Commission, with due regard to the public interest and without preliminary hearing, may, by order, . . . suspend from appearing or practicing before it any . . . accountant . . . who has been by name . . . permanently enjoined by any court of competent jurisdiction, by reason of his or her misconduct in an action brought by the Commission, from violating or aiding and abetting the violation of any provision of the Federal securities laws or of the rules and regulations thereunder.

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, and the findings contained in Section III.3 below, which are admitted, Respondent consents to the entry of this Order Instituting Public Administrative Proceedings Pursuant to Rule 102(e) of the Commission's Rules of Practice, Making Findings, and Imposing Remedial Sanctions ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds that:

1. Apuzzo, age 59, was licensed as a certified public accountant in the State of New York beginning in 1986 until he allowed his license to lapse in 1995. He served as Vice President of Finance of Terex Corporation ("Terex") from 1995 to 1996, Comptroller of Terex from 1996 to 1998, and Chief Financial Officer of Terex from October 1998 until September 2002, when he became President of Terex Financial Services. He resigned from Terex in August 2005.

2. Terex was, at all relevant times, a Delaware corporation with its principal place of business in Westport, Connecticut. Terex is a diversified global manufacturer of a broad range of equipment primarily for construction, infrastructure and surface to mining industries. At all relevant times, Terex's common stock was registered with the Commission pursuant to Section 12(b) of the Securities Exchange Act of 1934 ("Exchange Act"), and trades on the New York Stock Exchange.

3. On December 27, 2007, the Commission filed a complaint against Apuzzo in SEC v. Joseph F. Apuzzo (Civil Action No. 3:07-cv-01910-AWT). On September 8, 2015, the court entered an order permanently enjoining Apuzzo, by consent, from violation of Sections 10(b) and 13(b)(5) of the Exchange Act and Rules 10b-5 and 13b2-1 thereunder, and from aiding and abetting violation of Sections 13(a) and13(b)(2)(A) of the Exchange Act and Rule 13a-1 thereunder. Apuzzo was also ordered to pay a civil money penalty in the amount of $100,000.

4. The Commission's complaint alleged, among other things, that Apuzzo knowingly and substantially aided and abetted former officers of United Rentals, Inc. ("URI") with URI's violations of the antifraud, reporting, and books and records provisions of the federal securities laws, by among other things, improperly recognizing revenue from two fraudulent sale-leaseback transactions between URI and Terex. In both transactions, URI sold used equipment to a financing company, General Electric Capital Corporation ("GECC"), and then leased it back for an 8-month period. The complaint alleges that URI also arranged, through Apuzzo, for Terex to remarket the equipment at the end of the lease period and to provide GECC

with a residual value guarantee under which Terex guaranteed that GECC would receive not less than 96 percent of the purchase price that it had paid URI for the used equipment. For one of the transactions, URI and Terex also entered into a "backup" remarketing agreement, signed by Apuzzo, under which URI effectively assumed Terex's remarketing obligations and guarantees to GECC and agreed to cover, through guaranteed future purchases, any losses to Terex over the amount of a $5 million advance payments made by URI. As a result of this fraudulent accounting, the complaint alleges that the financial statements and results that URI incorporated into its periodic filings and other materials disseminated to the investing public were materially false and misleading. The Complaint alleges that Apuzzo knowingly provided substantial assistance to URI in perpetrating the fraud by helping to conceal URI's assumption of the risks and obligations of the transactions from URI's auditors. The Complaint alleges that Apuzzo also knew that the price of the equipment being paid by GECC to URI was inflated above fair market value and would therefore cause Terex to suffer a loss.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondent Apuzzo's Offer.

Accordingly, it is hereby ORDERED, effective immediately, that:

A. Apuzzo is suspended from appearing or practicing before the Commission as an accountant.

B. After five years from the date of this order, Respondent may request that the Commission consider his reinstatement by submitting an application (attention: Office of the Chief Accountant) to resume appearing or practicing before the Commission as:

1. a preparer or reviewer, or a person responsible for the preparation or review, of any public company's financial statements that are filed with the Commission. Such an application must satisfy the Commission that Respondent's work in his practice before the Commission will be reviewed either by the independent audit committee of the public company for which he works or in some other acceptable manner, as long as he practices before the Commission in this capacity; and/or

2. an independent accountant. Such an application must satisfy the Commission that:

(a) Respondent, or the public accounting firm with which he is associated, is registered with the Public Company Accounting Oversight Board ("Board") in accordance with the Sarbanes-Oxley Act of 2002, and such registration continues to be effective;

(b) Respondent, or the registered public accounting firm with which he is associated, has been inspected by the Board and that inspection did not identify any criticisms of or potential defects in the respondent's or the firm's quality control system that would indicate that the respondent will not receive appropriate supervision;

(c) Respondent has resolved all disciplinary issues with the Board, and has complied with all terms and conditions of any sanctions imposed by the Board (other than reinstatement by the Commission); and

(d) Respondent acknowledges his responsibility, as long as Respondent appears or practices before the Commission as an independent accountant, to comply with all requirements of the Commission and the Board, including, but not limited to, all requirements relating to registration, inspections, concurring partner reviews and quality control standards.

C. The Commission will consider an application by Respondent to resume appearing or practicing before the Commission provided that his state CPA license is current and he has resolved all other disciplinary issues with the applicable state boards of accountancy. However, if state licensure is dependent on reinstatement by the Commission, the Commission will consider an application on its other merits. The Commission's review may include consideration of, in addition to the matters referenced above, any other matters relating to Respondent's character, integrity, professional conduct, or qualifications to appear or practice before the Commission.

By the Commission.

Release No. IC-31828; File No. S7-07-11

RIN 3235-AL02

Removal of Certain References to Credit Ratings and Amendment to the Issuer Diversification Requirement in the Money Market Fund Rule

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission ("Commission") is adopting certain amendments, initially proposed in March 2011 and re-proposed in July 2014, related to the removal of credit rating references in rule 2a-7, the principal rule that governs money market funds, and Form N-MFP, the form that money market funds use to report information to the Commission each month about their portfolio holdings, under the Investment Company Act of 1940 ("Investment Company Act" or "Act"). The amendments will implement provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act"). In addition, the Commission is adopting amendments to rule 2a-7's issuer diversification provisions to eliminate an exclusion from these provisions that is currently available for securities subject to a guarantee issued by a non-controlled person.

DATES: Effective Date: [insert date 30 days after date of publication in the Federal Register]; Compliance Date: October 14, 2016.

FOR FURTHER INFORMATION CONTACT: Adam Bolter, Senior Counsel; Erin C. Loomis, Senior Counsel; Amanda Hollander Wagner, Senior Counsel; Thoreau Bartmann, Branch Chief; or Sarah G. ten Siethoff, Assistant Director, Investment Company

Rulemaking Office, at (202) 551–6792, Division of Investment Management, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–8549.

I. BACKGROUND

A. Credit Rating References

Section 939A of the Dodd-Frank Act requires each federal agency, including the Commission, to "review any regulation issued by such agency that requires the use of an assessment of the credit-worthiness of a security or money market instrument and any references to or requirements in such regulations regarding credit ratings."[1] That section further provides that each such agency shall "modify any such regulations identified by the review . . . to remove any reference to or requirement of reliance on credit ratings and to substitute in such regulations such standard of credit-worthiness as each respective agency shall determine as appropriate for such regulations."[2]

As a step toward implementing these mandates, and as a complement to similar initiatives by other federal agencies,[3] in March 2011 the Commission proposed to replace references to credit ratings issued by nationally recognized statistical rating organizations ("NRSROs") in two rules and four forms under the Securities Act of 1933 ("Securities Act") and the Investment Company Act, including rule 2a-7 and Form N-MFP under the Investment Company Act.[4] We

---

1 Pub. Law 111-203, Sec. 939A(a)(1)-(2). Section 939A of the Dodd-Frank Act applies to all federal agencies.

2 Pub. Law 111-203, Sec. 939A(b). Section 939A of the Dodd Frank Act provides that agencies shall seek to establish, to the extent feasible, uniform standards of creditworthiness, taking into account the entities the agencies regulate and the purposes for which those entities would rely on such standards.

3 A number of other federal agencies have also taken action to implement Section 939A of the Dodd-Frank Act, as discussed in Removal of Certain References to Credit Ratings and Amendment to the Issuer Diversification Requirement in the Money Market Fund Rule, Investment Company Act Release No. 31184 (Jul. 23, 2014) [79 FR 47986 (Aug. 14, 2014)] ("2014 Proposing Release" or "Proposing Release").

4 *See* References to Credit Ratings in Certain Investment Company Act Rules and Forms, Investment Company Act Release No. 29592 (Mar. 3, 2011) [76 FR 12896 (Mar. 9, 2011)] ("2011 Proposing Release").

subsequently adopted certain of the rule provisions proposed in 2011: namely, amendments to rule 5b-3 under the Investment Company Act, new rule 6a-5 under the Investment Company Act, and amendments to Forms N-1A, N-2, and N-3 under the Securities Act and the Investment Company Act.[5] But in light of comments received on the 2011 proposed amendments to rule 2a-7 and Form N-MFP, and in conjunction with the wider money market fund reforms that the Commission adopted in July 2014 (the "2014 money market fund reforms"),[6] we decided to re-propose the amendments to rule 2a-7 and Form N-MFP instead of adopting them directly following the 2011 proposal.[7] Specifically, the 2014 re-proposed amendments to rule 2a-7 and Form N-MFP (the "2014 Proposing Release," "Proposing Release," or "proposal"[8]) responded to concerns that commenters raised with respect to the 2011 proposal.

We received 16 comment letters on the 2014 proposal.[9] The majority of commenters generally supported the proposed amendments to varying degrees.[10] However, many

---

5 In December 2013, we adopted amendments removing references to credit ratings in rule 5b-3 and eliminating the required use of credit ratings in Forms N-1A, N-2, and N-3. *See* Removal of Certain References to Credit Ratings under the Investment Company Act, Investment Company Act Release No. 30847 (Dec. 27, 2013) [79 FR 1316 (Jan. 8, 2014)] ("2013 Ratings Removal Adopting Release"). We adopted new rule 6a-5 on November 19, 2012. *See* Purchase of Certain Debt Securities by Business and Industrial Development Companies Relying on an Investment Company Act Exemption, Investment Company Act Release No. 30268 (Nov. 19, 2012) [77 FR 70117 (Nov. 23, 2012)].

6 *See* Money Market Fund Reform; Amendments to Form PF, Investment Company Act Release No. 31166 (Jul. 23, 2014) [79 FR 47736 (Aug. 14, 2014)] ("2014 Money Market Fund Adopting Release").

7 *See* 2014 Proposing Release, *supra* note 3.

8 For clarity and because the re-proposal issued in July 2014 functions as the proposal for this adopting release, we refer to the re-proposal simply as the proposal throughout.

9 The comment letters on the Proposing Release (File No. S7-07-11) are available at http://www.sec.gov/comments/s7-07-11/s70711.shtml. The Commission received 18 comment letters on the Proposing Release, but 2 of these letters did not discuss amendments to remove NRSRO credit ratings references from rule 2a-7 and Form N-MFP.

10 Comment Letter of Chris Barnard (Aug. 23, 2014) ("Barnard Comment Letter"); Comment Letter of Michael Mark-Berger (Jul. 28, 2014) ("Berger Comment Letter"); Comment Letter of

commenters expressed concern about the proposed "exceptionally strong" standard to replace credit ratings references in the requirements of rule 2a-7 for those securities eligible to be purchased by money market funds.[11] These commenters suggested that the proposed "exceptionally strong" standard could lead to interpretive confusion in light of the similar existing "minimal credit risk" requirement, and might potentially change the kinds of securities that funds could purchase, contrary to the intent of the proposal to retain a similar degree of credit quality standards as under current rule 2a-7.[12]

In adopting final amendments to rule 2a-7 and Form N-MFP to implement Section 939A of the Dodd-Frank Act, we have carefully considered the comments received, and the final amendments include certain modifications intended to respond to commenters' concerns. As proposed, we are adopting amendments to rule 2a-7 that would remove references to ratings and adopt a uniform standard to define an eligible security to be a security that has been determined

(Oct. 14, 2014) ("Schwab Comment Letter").

11 We proposed to replace the reference to NRSRO credit ratings in rule 2a-7's definition of "eligible security" with a required finding that each security's issuer "has an exceptionally strong capacity to meet its short-term financial obligations." *See* 2014 Proposing Release, *supra* note 3, at section II.A.1. Many commenters expressed concern about this proposed standard. *See* Comment Letter of Better Markets, Inc. (Oct. 14, 2014) ("Better Markets Comment Letter"); Comment Letter of the Consumer Federation of America (Oct. 14, 2014) ("CFA Comment Letter"); Comment Letter of the Dreyfus Corporation (Oct. 14, 2014) ("Dreyfus Comment Letter"); Comment Letter of Fidelity Investments (Oct. 14, 2014) ("Fidelity Comment Letter"); ICI Comment Letter; Comment Letter of the Committee on Investment Management Regulation of the New York City Bar (Oct. 14, 2014) ("NYC Bar Comment Letter"); Schwab Comment Letter; Comment Letter of the Securities Industry and Financial Markets Association (Oct. 14, 2014) ("SIFMA Comment Letter"); Comment Letter of Vanguard (Oct. 14, 2014) ("Vanguard Comment Letter"); *see also infra* section II.A.

12 *See, e.g.,* Dreyfus Comment Letter; Fidelity Comment Letter.

to present minimal credit risks. However, we have eliminated the proposed "exceptionally strong capacity" standard from this determination, and as a substitute for this finding, the final rule amendments require that a minimal credit risk determination include, to the extent appropriate, an analysis of the guidance factors discussed in the preamble of the Proposing Release.[13] We believe that this approach will better fulfill the original goals of the rulemaking by replacing credit ratings references with a new standard that includes objective factors, which is designed to retain a similar degree of credit quality in money market fund portfolios as under the current rule.

For these reasons, we are also adopting a similar approach for funds to determine whether a long-term security subject to a conditional demand feature is an eligible security.[14] Finally, we are also adopting other amendments to rule 2a-7 and Form N-MFP, including the requirement that funds engage in ongoing monitoring of their portfolio securities and perform stress testing for a credit deterioration rather than specifically for a ratings downgrade, substantially as they were proposed, with certain changes as discussed below.

B. Exclusion from the Issuer Diversification Requirement

Rule 2a-7's risk limiting conditions require a money market fund's portfolio to be diversified, both as to the issuers of the securities it acquires and providers of guarantees and demand features related to those securities.[15] When we proposed the amendments to rule 2a-7 that were adopted as part of the 2014 money market fund reforms, we discussed and sought comment on alternatives to the rule's diversification provisions that we had considered to

[15] *See* rule 2a-7(d)(3).

appropriately limit money market funds' risk exposure.[16] Some of the comments we received in response prompted us to re-evaluate the current exclusion to the issuer diversification requirement for securities subject to a guarantee issued by a non-controlled person.[17] In consideration of these comments, and consistent with our reform goal of limiting concentrated exposure of money market funds to particular economic enterprises, as part of the 2014 proposal we proposed an amendment that would eliminate this exclusion from rule 2a-7's issuer diversification requirement.[18]

We received 8 comment letters discussing the proposed issuer diversification amendment,[19] with most of these commenters opposing the proposed amendment.[20] After carefully considering the comments we received, as well as the staff's updated analysis of relevant data, the Commission is adopting the proposed diversification amendments as proposed.[21] We believe that, on balance, adopting the proposed issuer diversification amendment

16 *See* Money Market Fund Reform; Amendments to Form PF, Investment Company Act Release No. 30551 (Jun. 5, 2013) [78 FR 36834 (Jun. 19, 2013)] ("2013 Money Market Fund Proposing Release").

17 *See, e.g.,* 2014 Money Market Fund Adopting Release, *supra* note 6, at n.1612 and accompanying text. Current rule 2a-7's risk limiting conditions generally require that money market funds limit their investments in the securities of any one issuer of a first tier security (other than government securities) to no more than 5 percent of total assets. Money market funds must also generally limit their investments in securities subject to a demand feature or a guarantee to no more than 10 percent of total assets from any one provider. Notwithstanding these conditions, a money market fund is not required to be diversified with respect to issuers of securities that are subject to a guarantee issued by a non-controlled person. *See* current rule 2a-7(d)(3); *see also infra* section II.F (detailed discussion of current issuer diversification requirements).

18 *See* Proposing Release, *supra* note 3, at section II.C.

21 *See* rule 2a-7(d)(3).

will help increase the resiliency of money market funds, and thereby better protect their investors, by limiting their ability to have concentrated exposure to any particular issuer. We are also adopting several technical amendments to Form N-MFP and the portfolio diversification provisions of rule 2a-7.[22]

II. DISCUSSION

A. Eligible Securities

Under current rule 2a-7, money market funds must limit their portfolio investments to securities that are both "eligible securities" and have been determined by fund boards to pose minimal credit risks to the fund.[23] Currently, rule 2a-7 defines "eligible securities" largely by reference to NRSRO ratings, and generally requires that 97% of a fund's portfolio securities be rated in the top short-term credit quality category by an NRSRO[24] (known as "first tier" securities).[25]

The proposal would have eliminated the rule's reference to NRSRO ratings in the eligible security definition, and consolidated the minimal credit risk standard into a single new standard under rule 2a-7's definition of eligible security.[26] As a substitute for NRSRO ratings in the eligible security definition, the proposed new standard would have required an eligible security

---

[22] *See infra* sections II.E. and II.F.

[23] Current rule 2a-7(d)(2)(i).

[24] Rule 2a-7 limits a money market fund's portfolio investments to "eligible securities," or securities that have received credit ratings from the "requisite NRSROs" in one of the two highest short-term rating categories or comparable unrated securities. A requisite NRSRO is an NRSRO that a money market fund's board of directors has designated for use (a "designated NRSRO") and that issues credit ratings that the board determines, at least annually, are sufficiently reliable for the fund to use in determining the eligibility of portfolio securities. *See* current rule 2a-7(a)(11), (a)(24).

[25] Current rule 2a-7(a)(12). The rule currently also permits up to 3% of a fund's portfolio to be invested in so called "second tier" securities, or securities which are rated in the second highest short-term credit quality category by an NRSRO. Current rule 2a-7(d)(2)(ii).

[26] *See* proposed rule 2a-7(a)(11).

to be a security with a remaining maturity of 397 calendar days or less that the fund's board of directors (or its delegate[27]) determined presents minimal credit risks, which determination would have included a finding that the security's issuer has an exceptionally strong capacity to meet its short-term financial obligations. Thus, under our proposal, a money market fund would have been limited to investing in securities that the fund's board (or its delegate) had determined present minimal credit risks, notwithstanding any rating the security may have received. To assist funds in their minimal credit risk determination under the revised standard, the proposal also included as guidance a number of factors that funds should consider, to the extent appropriate,a s part of that process.[28] These credit analysis factors were presented in both a primary list of factors generally applicable to all securities, and a secondary list of factors applicable to specific asset classes. In addition, under the proposal, fund boards would no longer have been required to designate NRSROs or to use their ratings to determine first or second tier status.[29] Accordingly, the proposal would have eliminated the distinction between first and second tier securities, and would have removed the prohibition on funds investing more than

27 *See* current rule 2a-7(j) (permitting a money market fund's board to delegate to the fund's investment adviser or officers a number of the determinations required to be made by the fund's board under the rule, including minimal credit risk determinations).

28 Proposing Release, *supra* note 3, at 47991-47993. The proposal also requested comment on these factors and whether codifying these factors would further ensure that funds use objective factors and market data in making credit quality determinations and thereby promote uniformity in making minimal credit risk determinations and/or assist money market fund managers in understanding their obligations pertaining to portfolio quality under rule 2a-7.

29 *See* proposed rule 2a-7(a)(11); 2a-7(d)(2); current rule 2a-7(d)(2)(ii). In conforming changes, the proposal would have moved the requirement currently in the definition of eligible security that the issuer of a demand feature or guarantee promptly notify the holder of the security in the event the demand feature or guarantee is substituted with another demand feature or guarantee (if such substitution is permissible) to the paragraphs of the rule that address securities subject to guarantees and conditional demand features. *Compare* current rule 2a-7(a)(12)(iii)(B) *with* proposed rule 2a-7(d)(2)(ii) and 2a-7(d)(2)(iii)(D). We are adopting these amendments as proposed.

3 percent of their portfolios in second tier securities.[30] The intent of these proposed amendments was to remove references to NRSRO ratings from rule 2a-7 while retaining a degree of credit risk similar to that permitted under the current rule.

Most of the commenters who discussed the proposed definition of "eligible security" generally supported it,[31] although, as described below, many of these commenters expressed certain reservations about details of the Commission's approach and various aspects of the proposed definition. Two commenters supported the elimination of the first and second tier distinction.[32] However, two other commenters expressed concern that removal of the distinction and the limit on second tier securities could lead to funds purchasing more risky securities.[33] Some of the commenters who supported the amendment stated that the Commission's proposed definition of eligible security would provide an appropriate substitute standard of creditworthiness in rule 2a-7.[34] Other commenters who opposed the definition,[35] and even some that generally supported the Commission's approach,[36] cautioned that the lack of objective criteria in the proposed definition could make it more likely that money market funds would increase their exposure to riskier securities. Specifically, some commenters argued that the

---

30 Money market funds also are currently limited from investing more than 0.5% of their assets in second tier securities of a single issuer and 2.5% of their portfolios in second tier securities issued, guaranteed or subject to a demand feature issued by the same entity. *See* current rule 2a-7(d)(3)(i)(C) and 2a-7(d)(3)(iii)(C). These limits also would be eliminated under the final rule.

35 CFA Comment Letter; Vanguard Comment Letter.

36 BlackRock Comment Letter; CFA Institute Comment Letter.

proposed definition would produce an incentive for money market funds to reach for yield.[37] A number of commenters also contended that the proposed definition might decrease uniformity among funds in evaluating credit risk, which could cause certain funds to present significantly greater risks to investors than others.[38]

Some commenters who acknowledged that the removal of credit ratings from rule 2a-7 could create incentives for funds to invest in riskier securities also suggested that certain countervailing factors would alleviate this concern. These commenters stated that revising the definition of eligible security should mitigate concerns about increased credit risk and decreased uniformity by creating a single standard for identifying eligible securities, particularly when viewed in conjunction with the proposed Form N-MFP disclosure requirements and new disclosure requirements that were adopted as part of the 2014 money market fund reforms (which we expect would help to expose the increased volatility and other risks that could accompany greater investment in riskier portfolio holdings).[39]

While generally supporting the overall approach of incorporating the eligible security definition into the general minimal credit risk determination, multiple commenters expressed concerns about the proposed secondary "exceptionally strong capacity" standard incorporated in the proposed definition of eligible security. They suggested that the Commission should reconsider or clarify this standard for a number of reasons. Several commenters argued that the word "exceptional" implies something unusual or extraordinary, which could be read as not including a large number of money market securities of very high credit quality that comprise a

---

[39] *See* CFA Institute Comment Letter; Invesco Comment Letter; Schwab Comment Letter; SIFMA Comment Letter.

portion of money market fund portfolios today.[40] Commenters also argued that the word "exceptional" is not commonly used with gradations, yet rule 2a-7 was designed to allow different gradations of high quality securities.[41] Accordingly, these commenters argued that the proposed standard might have the effect of restricting the universe of securities which money market funds could purchase, contrary to the stated goal of the proposal of seeking to retain a similar degree of credit quality in fund portfolios as under the current rule.[42]

Some commenters also contended that the "exceptionally strong capacity" language adds an unnecessary standard to a money market fund's minimal credit risk analysis and imposes burdens on advisers without any corresponding benefit to investors.[43] Specifically, these commenters argued that money market funds' minimal credit risk determinations already provide the framework for making a definitive finding of creditworthiness, and previously provided staff guidance regarding minimal credit risk factors has enhanced clarity and consistency in the application of this standard across the industry.[44] Commenters argued that the "exceptionally strong capacity" standard would result in confusion for the industry[45] and operational and

43 Dreyfus Comment Letter; Fidelity Comment Letter; SIFMA Comment Letter.

44 Dreyfus Comment Letter; Fidelity Comment Letter; SIFMA Comment Letter. In addition to presenting updated guidance on credit analysis factors, *see supra* note 28, the Proposing Release noted that Commission staff has previously provided guidance on specific factors that a board could consider in making minimal credit risk determinations under rule 2a-7. *See* Letter to Registrants from Kathryn McGrath, Director, Division of Investment Management, SEC (May 8, 1990) ("1990 Staff Letter"); *see also* Letter to Matthew Fink, President, Investment Company Institute from Kathryn McGrath, Director, Division of Investment Management, SEC (Dec. 6, 1989) ("1989 Staff Letter").

45 Dreyfus Comment Letter; Fidelity Comment Letter.

procedural burdens[46] that money market funds' current minimal credit risk analysis does not entail. Commenters raising these concerns advocated for a modified approach that restricts money market fund investments to those that the fund's board (or the board's delegate) determines present minimal credit risks, but this determination would not involve an additional finding that the security's issuer has an exceptionally strong capacity to meet its short-term financial obligations (or any similar finding).[47] In addition, some commenters argued that the difference between the "exceptionally strong" and "very strong" (the proposed new standard relating to conditional demand features discussed below) standards is not readily apparent, and argued that a consistent credit risk standard should apply equally to eligible securities and securities subject to a conditional demand feature, as discussed below.[48]

Numerous commenters expressed support for the guidance factors included in the Proposing Release.[49] One commenter, however, objected to the inclusion of the asset-specific factors, suggesting that they could become stale and outdated.[50] Commenters who supported the use of these factors stated that the factors were consistent with best practices and appropriately tailored.[51] Some commenters presented technical recommendations about specific guidance factors.[52] One commenter suggested including additional guidance factors regarding

The first commenter provided suggestions regarding guidance on two of the asset-specific credit factors, asset-backed securities and repurchase agreements. These suggestions have been adopted in this release, as discussed below. The second commenter suggested that the phrase "worst case scenario" should be removed from

counterparty relationships and the effects of rising interest rates on credit risk.[53]

Commenters' opinions varied on whether the guidance factors should be codified. Multiple commenters expressed support for preserving the factors as guidance, rather than codifying them, in order to provide funds with flexibility and the ability to respond to changing market conditions, financing terms, laws, and regulations.[54] Conversely, some commenters urged the Commission to codify the guidance factors as part of rule 2a-7.[55] One commenter argued that codification of the factors would enhance investor protections.[56] Another commenter stated that the inclusion of the factors in rule 2a-7 would promote uniform credit quality standards in the absence of specific NRSRO ratings requirements, and would facilitate inspections by Commission staff to aid in maintaining those standards.[57] The commenters who specifically mentioned the secondary list of asset-specific factors mostly supported them.[58] Two of these commenters believed that the asset-specific factors should be incorporated into the rule,[59] but others opposed codification of any of the factors, including the asset-specific ones.[60]

---

the list of general factors. Because the phrase limited the situations that might be analyzed under this factor, we are not including this phrase in the final rule. *See* rule 2a-7(a)(11)(i)(C).

One commenter opposed the inclusion of the asset-specific factors even as guidance, stating that the dynamic nature of the marketplace could cause such specific guidance to become stale and outdated.[61]

1. Revised "Eligible Security" Definition

After review of comments received, we are today adopting a revised standard for eligible securities under rule 2a-7 that does not require an "exceptionally strong capacity" fund board finding, but instead requires a single uniform minimal credit risk finding, based on the capacity of the issuer or guarantor of a security to meet its financial obligations.[62] As a complement to this uniform minimal credit risk standard, we are also today codifying the general credit analysis factors into rule 2a-7, the use of which should assist fund boards by serving as objective and verifiable tools to rely on in the absence of NRSRO ratings and which should help to achieve our goal of maintaining a similar degree of credit risk as in current money market fund portfolios.[63]

We have been persuaded by the commenters that suggested that the "exceptionally strong

---

comprised of only the primary factors with two suggested additions, though it did not discuss possible codification).

61 ICI Comment Letter.

62 Rule 2a-7(a)(11). We are also adopting as proposed the elimination of the following defined terms from the rule: "designated NRSRO," "first tier security," "rated security," "requisite NRSROs," "second tier security," and "unrated security." We are also making final several proposed revisions of provisions in the rule that currently reference these terms. *See* current rule 2a-7(a)(12) (eligible security); rule 2a-7(d)(2) (portfolio quality); rule 2a-7(d)(3)(i)(A)(1) and (C) (portfolio diversification); rule 2a-7(d)(3)(iii)(C) (portfolio diversification); rule 2a-7(f)(1) (downgrades); rule 2a-7(h)(3) (record keeping and reporting); rule 2a-7(j) (delegation). In addition, fund boards will no longer have to designate NRSROs, disclose them in the statement of additional information or use their ratings to determine first or second tier status. Finally, we are also adopting as proposed a conforming change to the recordkeeping requirements under the rule to reflect that funds must retain a written record of the determination that a portfolio security is an eligible security, including the determination that it presents minimal credit risks.

63 The codified factors only include the general factors that were discussed in the Proposing Release. Proposing Release, *supra* note 3, at 47991-47992. The asset-specific factors are not codified, but revised as discussed in section II.A.2 below, and continue to be included as guidance.

capacity" determination could create an unclear standard for determining eligible securities that might change the current credit quality profile of money market funds. Variations in how this language may be understood could lead to some funds only purchasing the lowest risk securities possible, creating a risk profile even more stringent than the current standard. Others might interpret the standard differently and not limit their securities purchases in the same way,which might thereby create significant disparities between money market funds. Such different interpretations might also lead to difficulties in our inspection staff's review of compliance with the proposed standard. We also appreciate commenters' concerns that it may be difficult to determine the difference between "exceptionally strong" and other similar standards such as "very strong" credit quality. Accordingly, the Commission has decided that adopting a uniform standard based on the well-developed existing requirement that a security present minimal credit risks, in conjunction with codifying the general factors to be considered, as discussed below, will more effectively achieve the goals of the proposal.

The requirement that a security present minimal credit risks to a money market fund has been part of rule 2a-7 since it was adopted in 1983.[64] The minimal credit risk determination was meant to provide an independent assurance of safety above and beyond the existence of a "high quality" rating by an NRSRO, as explained in the original adopting release:

> [T]he mere fact that an instrument has or would receive a high quality rating may not be sufficient to ensure stability. The Commission believes that the instrument must be evaluated for the credit risk that it presents *to the particular fund* at that time in light of the risks attendant to the use of amortized cost valuation or penny-rounding (emphasis added).[65]

64 Valuation of Debt Instruments and Computation of Current Price Per Share by Certain Open-End Investment Companies, Investment Company Act Release No. 13380 (Jul. 11, 1983) [48 FR 32555 (Jul. 18, 1983).]

65 *Id.* at 32560.

Under this existing standard, a board (or its delegate) should determine that a security presents minimal credit risks not just in isolation, but also in the context of the fund as a whole. The 2014 Proposing Release made clear that the removal of NRSRO ratings is not intended to change the current risk profile of money market funds, or their evaluation of minimal credit risks.[66] In determining whether a security presents minimal credit risks, therefore, a board (or its delegate) should consider not just the individual risks of the security, but also the overall impact of adding that security to the fund in light of the fund's other holdings.[67] Such consideration might include an examination of correlation of risk among the securities held or purchased, the credit risks associated with market-wide stresses, or specific security credit or liquidity disruptions. Based on comments received, we are persuaded that this existing requirement to evaluate the minimal credit risk of portfolio securities on the fund as a whole (not just on a security-by-security basis) will help mitigate potential risks that money market funds might change their current credit risk profile after our removal of NRSRO ratings references from the rule as part of the final amendments.

2. Codified Factors

Although we believe that the minimal credit risk standard should serve as an effective limitation on credit risk in money market fund portfolios even without the proposed secondary "exceptionally strong" finding, we appreciate commenters' concerns that eliminating the "floor" provided by NRSRO ratings in the rule without a replacement might lead to fund managers

---

66 *See, e.g.*, Proposing Release, *supra* note 3, at 47989.

67 In order to clarify that the requirements of the minimal credit risks analysis have not changed from the original requirements as described in the 1983 release, the phrase "to the fund" has been added to the final rule definition of eligible security. Rule 2a-7(a)(11). This phrase is intended to indicate that, unlike a security's NRSRO rating that measures only the security's risks in isolation, the minimal credit risk determination must consider any credit risk introduced by the security to the entire fund.

taking on additional credit risk if the rule does not provide objective and verifiable standards. As discussed above, several commenters suggested that codifying the general factors would enhance investor protections and promote uniform credit quality standards in the absence of specific NRSRO ratings requirements. We agree.

Accordingly, the final rule amendments now include, as part of the analysis of minimal credit risks, a requirement to consider, to the extent appropriate, the general credit analysis factors from the Proposing Release.[68] As noted in the Proposing Release, our staff has had opportunities to observe how money market fund advisers evaluate minimal credit risk, and although staff has noted a range in the quality and breadth of credit risk analyses among the money market funds examined, staff has also observed that most of the advisers to these funds evaluate some common factors that bear on the ability of an issuer or guarantor to meet its short-term financial obligations. Based on staff observations in examinations and prior staff guidance, we understand that most money market fund managers already generally take these factors into account, as appropriate, when they determine whether a portfolio security presents minimal credit risks. We believe that codifying the general factors will help provide a uniform and objective check on credit risk that can be verified by our examiners. We also believe that incorporating these factors into the rule text will further promote effective and uniform application of the risk standard. Although multiple commenters expressed support for preserving the factors as guidance, rather than codifying them,[69] the Commission believes that codification

68 Rule 2a-7(a)(11)(i). The Proposing Release included a second list of asset-specific factors that staff had observed funds making use of for credit analysis of specific types of securities which will be retained as guidance as discussed further below. Proposing Release, *supra* note 3, at 47992-47993.

69 ICI Comment Letter; IDC Comment Letter; Schwab Comment Letter. Similarly, some commenters suggested that the Commission reiterate that the list of factors is not meant to be exhaustive. *See* IDC Comment Letter; MFDF Comment Letter; SIFMA Comment Letter. As

of these factors is justified by the need for verifiable credit quality determinations in the absence of required references to NRSRO ratings. In addition, the Commission believes that the changes to the proposed standard made in this final rule should reduce the likelihood of increased credit risk because funds will have to perform a rigorous analysis using the codified factors and consider how each security affects the aggregate risk of the portfolio.

As discussed above, commenters disagreed over the proposed elimination of the first and second tier distinction,[70] with two commenters expressing concern that removing the distinction and the limit on second tier securities could lead to funds purchasing more risky securities.[71] However, we believe that the codification of the credit analysis factors in the final rule, combined with the increased transparency gained through our amendments to Form N-MFP disclosures (both adopted today, as well as the amendments adopted as part of the 2014 money market fund reforms[72]), should mitigate this concern. The codified credit factors should establish a minimum baseline that should help guard against the risk that funds' approach to credit analysis will become less uniform, or that some funds would substantially increase the riskiness of their portfolios by increasing their investments in second tier securities. Such changes would not likely be consistent with a minimal credit risk analysis using the factors we are codifying today.

Therefore, the final rule requires a money market fund's board (or its delegate) to

---

noted below, we state that the list of factors in the rule and the additional factors discussed in this release as guidance are not meant to be exhaustive, and there may be additional factors that could be relevant depending on the type of security analyzed.

70 *See* Fidelity Comment Letter; MFDF Comment Letter; Better Markets Comment Letter; CFA Comment Letter.

71 *See* Better Markets Comment Letter; CFA Comment Letter.

72 For example, the 2014 money market fund reforms eliminated the 60-day delay in making public the information filed on Form N-MFP.

consider, in making its minimal credit risk determinations, the capacity of each security's issuer, guarantor, or provider of a demand feature, to meet its financial obligations, and in doing so, consider, to the extent appropriate, the following factors: (1) financial condition; (2) sources of liquidity; (3) ability to react to future market-wide and issuer- or guarantor-specific events, including ability to repay debt in a highly adverse situation; and (4) strength of the issuer or guarantor's industry within the economy and relative to economic trends, and issuer or guarantor's competitive position within its industry.[73] In incorporating the credit analysis factors into the rule, we have revised them to make them as generally applicable as possible to all money market funds. As we discussed in the Proposing Release, and as reflected in a number of comments received, we understand that the majority of the industry already typically considers these factors when making minimal credit risk determinations.[74] One commenter's recommendation suggested that we include as a codified factor an analysis of the existence, nature, and magnitude of any counterparty relationships.[75] However, in its observations of how money market funds evaluate minimal credit risk, our staff has not identified this factor as one of the common factors that bear on the ability of an issuer or guarantor to meet its short-term financial obligations and we are not aware of other information that suggests that many money market funds are currently performing (or have the information readily available to perform) this type of analysis. Accordingly, we are not including as a codified factor an analysis of counterparty relationships, although we believe that, to the extent that funds have such

---

[73] As explained in the Proposing Release, many of these considerations have been included in staff guidance as well as in best practices for determining minimal credit risk set forth in Appendix I of the Report of the Money Market Working Group submitted to the Board of Governors of the Investment Company Institute in 2009. *See also* 1990 Staff Letter and 1989 Staff Letter, *supra* note 44.

[74] *See* Proposing Release, *supra* note 3, section II.A.1, at nn.53-57 and accompanying text.

[75] CFA Institute Comment Letter.

information available, analyzing counterparty relationships should assist funds in making minimal credit risk determinations.

As discussed in the Proposing Release, the financial condition factor generally should include examination of recent financial statements, including consideration of trends relating to cash flow, revenue, expenses, profitability, short-term and total debt service coverage, and leverage (including financial and operating leverage). The second factor, sources of liquidity, generally should include consideration of bank lines of credit and alternative sources of liquidity. The third factor, involving market-wide events, generally should include analysis of risk from various scenarios, including changes to the yield curve or spreads, especially in a changing interest rate environment. The fourth factor, the competitive position of the firm and its industry, generally should include consideration of diversification of sources of revenue, if applicable.[76] As explained in the proposal, in addition to the codified factors used to evaluate the issuer or guarantor of a security, a minimal credit risk evaluation may also include consideration of whether the price and/or yield of the security itself is similar to that of other securities in the fund's portfolio.[77]

The Commission is not codifying the asset-specific factors into the final rule text. As one commenter pointed out,[78] overly specific and numerous factors could over time become dated. Consistent with the concern raised by this commenter, the Commission is mindful of the pitfalls

---

76 *See* Proposing Release, *supra* note 3, section II.A.1, at 47991-47992.

77 *See* 2014 Proposing Release, *supra* note 3. This consideration is not being incorporated into the rule text because it does not relate to the overall strength of a security's issuer or guarantor, as do the codified factors. We therefore believe that it would be more useful for a fund's manager to evaluate a security's price and/or yield (as compared with other similar portfolio securities) as a way to quickly assess the appropriateness of a given security, and hence is provided only as guidance.

78 ICI Comment Letter.

that may result from codifying too many factors, and/or factors that are not sufficiently broad and yet relevant enough to withstand changing markets over time. The Commission believes that keeping these asset-specific factors as guidance may help avoid any unintended burden while providing funds with additional and potentially relevant considerations that may be useful when making minimal credit risk determinations in the absence of required references to NRSRO ratings. Accordingly, we are limiting the factors we are codifying into the rule itself to the list of general factors that we believe are sufficiently universal and tested enough to avoid this problem, but that will form the basis of a rigorous analysis. Nonetheless, where relevant, funds may wish to consider whether the asset-specific factors should also be evaluated in making minimal credit risk determinations, especially if they make significant investment in such asset classes. In addition, we have included a cross reference in the rule text to the guidance regarding the asset specific factors, to better inform readers of the applicability of the asset specific factor guidance discussed here.[79]

Accordingly, to the extent applicable, fund advisers may wish to consider the following asset-specific factors:

- For municipal securities: (i) sources of repayment; (ii) issuer demographics (favorable or unfavorable);[80] (iii) the issuer's autonomy in raising taxes and revenue; (iv) the issuer's reliance on outside revenue sources, such as revenue from a state or federal government entity; and (v) the strength and stability of the supporting economy.[81]

---

79 We have also incorporated technical recommendations from two commenters on the assets specific factor guidance. ICI Comment Letter; Fidelity Comment Letter. We have (1) combined the two bullets on repurchase agreements into one; (2) altered language in the guidance on repurchase agreements, reflecting increased standardization of the market; and (3) removed the reference to analyzing underlying assets in the asset-backed securities bullet.

80 Demographics could include considerations such as the type, size, diversity and growth or decline of the local government's tax base, including income levels of residents, and magnitude of economic activity.

81 *See* 1989 Staff Letter, *supra* note 44 (additional factors such as sources of repayment, autonomy

- For conduit securities under rule 2a-7:[82] analysis of the underlying obligor for all securities except asset-backed securities (including asset-backed commercial paper).[83]
- For asset-backed securities, such as asset-backed commercial paper: (i) analysis of the terms of any liquidity or other support provided; and (ii) legal and structural analyses to determine that the particular asset-backed security involves no more than minimal credit risks for the money market fund.[84]
- For other structured securities, such as variable rate demand notes,[85] tender option

---

in raising taxes and revenue, reliance on outside revenue sources and strength and stability of the supporting economy should be considered with respect to tax-exempt securities); *see also* Guidance on Due Diligence Requirements in Determining Whether Securities are Eligible for Investment, Office of the Comptroller of the Currency, Docket ID OCC-2012-0006 [77 FR 35259 (Jun. 13, 2012)] ("OCC Guidance") (matrix of examples of factors for national banks and federal savings associations to consider as part of a robust credit risk assessment framework ("OCC credit risk factors") for certain investment securities includes capacity to pay and assess operating and financial performance levels and trends).

82 Under rule 2a-7, a "conduit security" means a security issued by a municipal issuer involving an arrangement or agreement entered into, directly or indirectly, with a person other than a municipal issuer, which arrangement or agreement provides for or secures repayment of the security. Rule 2a-7(a)(7). A "municipal issuer" is defined under the rule to mean a state or territory of the United States (including the District of Columbia), or any political subdivision or public instrumentality of a state or territory of the United States. *Id.* A conduit security does not include a security that is: (i) fully and unconditionally guaranteed by a municipal issuer; (ii) payable from the general revenues of the municipal issuer or other municipal issuers (other than those revenues derived from an agreement or arrangement with a person who is not a municipal issuer that provides for or secures repayment of the security issued by the municipal issuer); (iii) related to a project owned and operated by a municipal issuer; or (iv) related to a facility leased to and under the control of an industrial or commercial enterprise that is part of a public project which, as a whole, is owned and under the control of a municipal issuer. *Id.*

83 *See* OCC Guidance, *supra* note 81 (OCC credit risk factors for revenue bonds include consideration of the obligor's financial condition and reserve levels).

84 *See* Money Market Fund Reform, Investment Company Act Release No. 29132 (Feb. 23, 2010) [75 FR 10060 (Mar. 4, 2010)] ("2010 Money Market Fund Adopting Release") at section II.A.3 (citing Revisions to Rules Regulating Money Market Funds, Investment Company Act Release No. 21837 (Mar. 21, 1996) [61 FR 13956 (Mar. 28, 1996)] ("1996 Money Market Fund Adopting Release") at section II.E.4).

85 A variable rate demand obligation ("VRDO") (which includes variable rate demand notes) is a security for which the interest rate resets on a periodic basis and holders are able to liquidate their security through a "put" or "tender" feature, at par. To ensure that the securities are able to be "put" or "tendered" by a holder in the event that a remarketing agent is unable to remarket the security, a VRDO typically operates with a liquidity facility – a Letter of Credit or Standby Bond Purchase Agreement – that ensures that an investor is able to liquidate its position. *See* Electronic Municipal Market Access, Understanding Variable Rate Demand Obligations, *available at* http://emma.msrb.org/EducationCenter/UnderstandingVRDOs.aspx.

bonds,[86] extendible bonds[87] or "step up" securities,[88] or other structures: in addition to analysis of the issuer or obligor's financial condition, analysis of the protections for the money market fund provided by the legal structure of the security.[89]

- For repurchase agreements under rule 2a-7: a financial analysis and assessment of the minimal credit risk of the counterparty, an assessment as to whether the haircut level is appropriate for the particular type of collateral based upon price volatility in the market for such collateral type, and a legal analysis of the protections for the money market fund provided by the terms of the repurchase agreements.

The list of factors in the rule and the additional factors discussed in this release as guidance are not meant to be exhaustive, and there may be additional factors that could be relevant depending on the type of security analyzed. We recognize that the range and type of specific factors appropriate for consideration could vary depending on the category of issuer and particular security or credit enhancement under consideration, and that the board (or its delegate) therefore may determine to include other factors in its credit assessment.[90] We also recognize

---

86 A tender option bond is an obligation that grants the bondholder the right to require the issuer or specified third party acting as agent for the issuer (*e.g.*, a tender agent) to purchase the bonds, usually at par, at a certain time or times prior to maturity or upon the occurrence of specified events or conditions. *See* Municipal Securities Rulemaking Board, Glossary of Municipal Securities Terms, Tender Option Bond, *available at* http://www.msrb.org/glossary/definition/tender-option-bond.aspx. Tender option bonds are synthetically created by a bond dealer or other owner of a long-term municipal obligation purchased in either the primary or secondary markets, or already in a portfolio.

87 An extendible bond is a long-term debt security with an embedded option for either the investor or the issuer to extend its maturity date. To qualify as an eligible security under rule 2a-7, the issuer must not have the right to extend the maturity of the bond so that it is more than 397 days to maturity at any time. Typically, if an extendible bond is of the type that qualifies as an eligible security under rule 2a-7, a money market fund will have the option to either extend the maturity of the bond to no more than 397 days in the future, or elect not to extend, in which case the bond's maturity must be no longer than 397 days at that time.

88 A "step up" security pays an initial interest rate for the first period, and then a higher rate for the following periods.

89 *See* OCC Guidance, *supra* note 81 (OCC credit risk factors for structured securities include evaluation and understanding of specific aspects of the legal structure including loss allocation rules, potential impact of performance and market value triggers, support provided by credit and liquidity enhancements, and adequacy of structural subordination).

90 As discussed in the 2014 Proposing Release, *supra* note 3, money market fund boards of directors

that specific purchases may require more or less analysis depending on the security's risk characteristics. As discussed in greater detail below, amended rule 2a-7 will also require that the written record of the minimal credit risk determination address any factors considered and the analysis of those factors.[91]

B. Conditional Demand Features

Rule 2a-7 limits money market funds to investing in securities with remaining maturities of no more than 397 days.[92] A long-term security subject to a conditional demand feature[93] ("underlying security"), however, may be determined under the current rule to be an eligible security (or a first tier security) if among other conditions: (i) the conditional demand feature is an eligible security or a first tier security; and (ii) the underlying security (or its guarantee) has received either a short-term rating or a long-term rating, as the case may be, within the highest two categories from the requisite NRSROs or is a comparable unrated security.[94] The rule currently requires this analysis of both the short-term and long-term credit aspects of the demand instrument because a security subject to a conditional demand feature combines both short-term

typically delegate minimal credit risk determinations to the fund's adviser, as provided for in rule 2a-7(j).

91 *See infra* section II.C.; rule 2a-7(h)(3).

92 *See* current rule 2a-7(a)(12).

93 A conditional demand feature is a demand feature that a fund may be precluded from exercising because of the occurrence of a condition. *See* rule 2a-7(a)(6) (defining "conditional demand feature" as a demand feature that is not an unconditional demand feature); rule 2a-7(a)(30) and proposed rule 2a-7(a)(25) (defining "unconditional demand feature" as a demand feature that by its terms would be readily exercisable in the event of a default in payment of principal or interest on the underlying security). For purposes of rule 2a-7, a demand feature allows the security holder to receive, upon exercise, the approximate amortized cost of the security, plus accrued interest, if any, at the later of the time of exercise or the settlement of the transaction, paid within 397 calendar days of exercise. Current rule 2a-7(a)(9).

94 Current rule 2a-7(d)(2)(iv). Although underlying securities are generally long-term securities when issued originally, they become short-term securities when the remaining time to maturity is 397 days or less.

and long-term credit risks.[95]

The Commission's proposal would have required a similar analysis, but consistent with Section 939A of the Dodd-Frank Act, it would have removed the requirement in the rule that the fund board (or its delegate) consider credit ratings of underlying securities.[96] Under the proposal, a fund would have had to determine, as with any short-term security, that the conditional demand feature is an eligible security.[97] In addition, a fund's board of directors (or its delegate) would have had to evaluate the long-term risk of the underlying security and determine that it (or its

---

95 The quality of a conditional demand instrument depends both on the ability of the issuer of the underlying security to meet scheduled payments of principal and interest and upon the availability of sufficient liquidity to allow a holder of the instrument to recover the principal amount and accrued interest upon exercise of the demand feature. *See* Acquisition and Valuation of Certain Portfolio Instruments by Registered Investment Companies, Investment Company Act Release No. 14607 (Jul. 1, 1985) [50 FR 27982 (Jul. 9, 1985)], at n.33. The current rule permits the determination of whether a security subject to an unconditional demand feature is an eligible or first tier security to be based solely on whether the unconditional demand feature is an eligible or first tier security because credit and liquidity support will be provided even in the event of default of the underlying security. *See* current rule 2a-7(d)(2)(iii).

96 In a conforming change, the Commission proposed to remove two provisions in current rule 2a-7 that reference credit ratings in connection with securities subject to a demand feature or guarantee of the same issuer that are second tier securities: rule 2a-7(d)(3)(i)(C) (limiting a fund's investments in securities subject to a demand feature or guarantee of the same issuer that are second tier securities to 2.5% of the fund's total assets); rule 2a-7(f)(1)(iii) (providing that if, as a result of a downgrade, more than 2.5% of a fund's total assets are invested in securities issued by or subject to demand features from a single institution that are second tier securities, a fund must reduce its investments in these securities to no more than 2.5% of total assets by exercising the demand feature at the next succeeding exercise date(s)). In other conforming changes, the Commission proposed to amend two rules under the Act that reference the definition of "demand feature" and "guarantee" under rule 2a-7, which references would have changed under the proposed amendments. Specifically, the Commission proposed to amend: (i) rule 12d3-1(d)(7)(v), to replace the references to "rule 2a-7(a)(8)" and "rule 2a-7(a)(15)" with "§ 270.2a-7(a)(9)" and "§ 270.2a-7(a)(16)"; and (ii) rule 31a-1(b)(1), to replace the phrase "(as defined in § 270.2a-7(a)(8) or § 270.2a-7(a)(15) respectively)" with "(as defined in § 270.2a-7(a)(9) or § 270.2a-7(a)(16) respectively.)" We are adopting these changes as proposed.

97 *See* proposed rule 2a-7(d)(2)(iii)(A). The Proposing Release also reiterated the existing monitoring and substitutability requirements for conditional demand features in rule 2a-7, and noted that the Commission believed it would be prudent for a money market fund to avoid investing in securities whose eligibility as portfolio securities depended on a conditional demand feature that may be terminated if the underlying portfolio security is downgraded a single ratings category. *See* Proposing Release, *supra* note 3, at n.90 and accompanying and preceding text.

guarantor) "has a very strong capacity for payment of its financial commitments."[98] We proposed this standard because it was similar to those articulated by credit rating agencies for long-term securities assigned the second highest rating.[99] Because the conditional demand feature could be terminated by a ratings downgrade, we believed that the underlying security should present only limited credit risk.[100]

The commenters who addressed this section generally opposed the proposed approach of requiring a different "very strong" standard for conditional demand features as compared to the proposed "exceptionally strong" standard for all other eligible securities. Instead, most commenters that addressed this issue suggested that the Commission adopt a single uniform standard for both eligible securities and conditional demand features as such a uniform standard would eliminate any potential inconsistences and confusion. We agree, and therefore the final amendments do not include the proposed "very strong" standard for conditional demand features, but instead apply the single uniform minimal credit risk standard (including an analysis of relevant factors) for all eligible security determinations, including conditional demand features.

Most commenters' discussion of the credit analysis of securities subject to conditional demand features focused on aligning the credit quality standard for these securities with the standard used to identify eligible securities generally.[101] One commenter stated that employing the same standard would minimize confusion among investors.[102] Another commenter argued

---

98 Proposed rule 2a-7(d)(2)(iii)(C). An underlying security that is a short-term security (because its remaining maturity is less than 397 days, although its original maturity may have been longer) also would have had to meet the proposed standard.

99 *See* Proposing Release, *supra* note 3, at n.83 and accompanying text.

100 *Id*, at n.89 and accompanying text.

101 Dreyfus Comment Letter; ICI Comment Letter; IDC Comment Letter; Schwab Comment Letter.

102 IDC Comment Letter.

that the termination of a conditional demand feature has much the same effect as a default on other securities, and thus the degree of risk permitted with respect to the termination of a conditional demand feature should be equivalent to the risk of default with respect to other eligible securities.[103] Commenters were split in their opinions about what uniform standard to use, if the same credit quality standard were to be employed for eligible securities and securities subject to a conditional demand feature. Some argued that the "very strong" capacity standard should be used in both contexts.[104] Commenters who advised that the minimal credit risk standard should stand alone, without an additional "exceptionally strong capacity" finding (or similar finding), maintained that this stand-alone minimal credit risk standard should apply equally to eligible securities and securities subject to a conditional demand feature.[105]

We agree with these commenters' concerns and are adopting the rule amendments without the proposed "very strong capacity" standard.[106] Instead, the final amendments require application of a single uniform "minimal credit risk" standard that will apply to all securities purchased by money market funds, pursuant to the revised eligible security definition as discussed above.[107] We agree with commenters' reasoning that a uniform credit quality standard would be appropriate given the similar degree of risk presented by the termination of a conditional demand feature and the default of a portfolio security. We also agree with commenters that the difference between the terms "very strong" and "exceptionally strong" is not readily apparent and that a uniform minimal credit risk standard will thus reduce confusion,

104 ICI Comment Letter; Schwab Comment Letter.

105 Dreyfus Comment Letter; Fidelity Comment Letter.

106 Rule 2a-7(d)(2)(iii).

107 Rule 2a-7(a)(11).

and still preserve a similar degree of credit quality to that currently present in fund portfolios. Therefore, under the uniform standard that we are adopting today for conditional demand features, a fund's board (or its delegate) must determine that both the conditional demand feature and the underlying security (or guarantee) are eligible securities.[108]

As noted in the Proposing Release and reiterated here, we do not believe that securities that are rated by NRSROs in the third-highest category for long-term ratings (or comparable unrated securities) would satisfy the standard that underlying securities present minimal credit risks to the fund. We also note that funds currently can invest exclusively in underlying securities rated in the second-highest category if the instrument meets the other conditions for eligibility.[109] We estimate that most underlying securities held by money market funds (77 percent) are rated in the second-highest long-term category, and a smaller portion (23 percent) are rated in the highest long-term category.[110] For these reasons, we do not currently anticipate that funds are likely to increase the portion of their underlying securities that are rated in the second-highest long-term category as a result of the adopted amendments (since these funds do not currently invest in these securities to the extent permitted under existing rules).

C. Monitoring Minimal Credit Risks

Currently, rule 2a-7 requires a money market fund board (or its delegate) to promptly reassess whether a security that has been downgraded by an NRSRO continues to present

---

108 The credit risk standard that is being adopted for conditional demand features aligns the credit quality standard for these securities with the standard used to identify eligible securities by requiring the fund's board (or its delegate) to determine that these securities are eligible securities. We note that such a determination, by expressly incorporating the definition of eligible securities, will also incorporate the requirement of a fund to consider, to the extent appropriate, the general credit analysis factors discussed above. Rule 2a-7(a)(11); *see supra* section II.A.2 ("Codified Factors").

109 Current rule 2a-7(d)(2)(iv).

110 *See infra* note 258 and accompanying text.

minimal credit risks, and to take such action as it determines is in the best interests of the fund and its shareholders.[111] In the Proposing Release, the Commission proposed to eliminate this requirement and instead require each money market fund to adopt written procedures that would require the fund adviser to provide an ongoing review of the credit quality of each portfolio security to determine that the security continues to present minimal credit risks.[112]

As discussed in the Proposing Release, such ongoing monitoring of minimal credit risks would include the determination of whether the issuer of the portfolio security, and the guarantor or provider of a demand feature, to the extent relied upon by the fund to determine portfolio quality, maturity or liquidity, continues to have the capacity to repay its financial obligations such that the security presents minimal credit risks. The review would typically update the information that was used to make the initial minimal credit risk determination and would have to be based on, among other things, financial data of the issuer or provider of the guarantee or demand feature.[113] The Commission noted that funds could continue to consider external factors, including credit ratings, as part of the ongoing monitoring process.[114]

All of the commenters who addressed the ongoing monitoring provision supported the

---

[111] Rule 2a-7(f)(1)(i)(A). This current reassessment is not required, however, if the downgraded security is disposed of or matures within five business days of the specified event and in the case of certain events (specified in rule 2a-7(f)(1)(i)(B)), the board is subsequently notified of the adviser's actions. Rule 2a-7(f)(1)(ii). In addition, rule 2a-7 requires ongoing review of the minimal credit risks associated with securities for which maturity is determined by reference to a demand feature. Rule 2a-7(g)(3).

[112] Proposing Release, *supra* note 3, at 47994-47996; proposed rule 2a-7(g)(3). The Commission proposed to remove current rule 2a-7(f)(1)(i) (downgrades) and 2a-7(g)(3) (securities for which maturity is determined by reference to demand features). Proposed rule 2a-7 included a new paragraph (g)(3), which would contain the required procedures for the ongoing review of credit risks.

[113] *See* proposed rule 2a-7(g)(3)(ii).

[114] We note that a fund adviser's obligation to monitor risks to which the fund is exposed will, as a practical matter, require the adviser to monitor for downgrades by relevant credit rating agencies because such a downgrade would likely affect the security's market value.

proposed requirement.[115] Commenters agreed with the Commission's belief that most fund advisers currently engage in similar types of ongoing monitoring and that an explicit monitoring requirement would not significantly change current fund practices,[116] nor would it impose significant extra costs.[117] Commenters also stated that the ongoing monitoring requirement would assist funds to better position themselves to quickly identify potential risks of credit events that could impact portfolio security prices.[118] Accordingly, as discussed in more detail below, we are now adopting these amendments as proposed.[119]

1. Frequency of Monitoring

Three commenters requested more specificity regarding the frequency of the monitoring requirement.[120] One of these commenters requested that the Commission adopt a specific periodic basis for the ongoing review, so that the process would occur with a minimum frequency.[121] The other two commenters requested that the Commission make clear that "ongoing" monitoring does not necessarily mean a constant or daily evaluation.

We are not specifying a periodic basis for the ongoing monitoring requirement adopted

115 *See* Barnard Comment Letter; BlackRock Comment Letter; CFA Institute Comment Letter; Dreyfus Comment Letter; Fidelity Comment Letter; ICI Comment Letter; IDC Comment Letter; Invesco Comment Letter; Schwab Comment Letter; Vanguard Comment Letter.

116 All commenters that specifically addressed this issue agreed with the Commission's understanding of current practices. *See* BlackRock Comment Letter; Fidelity Comment Letter; Barnard Comment Letter; Schwab Comment Letter. Although the NYC Bar Comment Letter did not specifically answer this question, it suggested that the Proposing Release had not presented a sufficiently detailed description of those current practices. This comment is discussed further below.

117 The only commenter to address the question about costs stated that it did not believe that most funds would experience additional costs beyond the initial adoption and implementation. *See* Schwab Comment Letter.

118 Fidelity Comment Letter; Schwab Comment Letter; Barnard Comment Letter.

119 Rule 2a-7(g)(3).

120 Better Markets Comment Letter; NYC Bar Comment Letter; SIFMA Comment Letter.

121 Better Markets Comment Letter.

today. As a preliminary matter, doing so would conflict with the intent of an explicit ongoing monitoring requirement. Specifying a periodic frequency for monitoring might suggest that regular awareness of the credit profile of portfolio securities is not required, and might also interfere with the discretion of fund managers to react to changing market conditions. In addition, as discussed above, specifying the frequency of monitoring would be inconsistent with our understanding of how a majority of the industry currently evaluates minimal credit risk.[122]

Although we are not codifying a specific frequency upon which monitoring must occur, we expect that for purposes of the rule, ongoing monitoring would mean that monitoring efforts should occur on a regular and frequent basis. We understand that many funds today engage in daily monitoring of changes in the markets or conditions relating to issuers that may affect their credit evaluation of portfolio holdings, and do so even on an hourly basis if there are rapidly changing events. We believe that this type of monitoring is consistent with the ongoing monitoring requirement adopted today.

One commenter who requested a specific periodic basis for minimal credit risk evaluations also suggested that the Commission require that the fund's board be notified when a portfolio security no longer meets the minimal credit risk standard (and thus, the definition of an eligible security).[123] As a general matter, the Commission expects, as explained in the Proposing Release, that a fund board generally will establish procedures for the adviser to notify the board when a security no longer meets the minimal credit risk standard,a nd thus expect that a board

---

122 Similarly, in response to the Commission's query as to whether the rule should include specific objective events that would require a reevaluation of minimal credit risks, the only commenter to address the question stated that such a change might cause fund managers to limit their reviews to those triggering events, rather than truly evaluating risk on an ongoing basis. Schwab Comment Letter. We agree, and are not requiring specific events that would trigger a reevaluation.

123 Better Markets Comment Letter.

would be notified as the commenter suggested. We also note that under current rule 2a-7 and the final rule, a fund must dispose of a security that is no longer an eligible security, unless the board makes a finding that it would not be in the interests of the fund to do so.[124] Therefore, if a fund chooses not to dispose of a security that is no longer an "eligible security," the fund's board will already have had the notice sought by this commenter, and thus we do not believe that further specific notification requirements are necessary.

2. Recordkeeping

Today, funds are required to retain a written record of the determination that a portfolio security is an eligible security, including the determination that it presents minimal credit risks. If the proposed requirement to conduct an ongoing review of the credit quality of a fund's portfolio securities were adopted, rule 2a-7's current recordkeeping requirement could have been understood to require the fund to provide for an ongoing documentation of the adviser's ongoing review, which could prove burdensome. Accordingly, we had proposed to make conforming amendments to the recordkeeping provision,re quiring the fund to maintain and preserve a written record of the determination that a portfolio security presents minimal credit risks at the time the fund acquires the security, or at such later times (or upon such events) that the board of directors determines that the investment adviser must reassess whether the security presents minimal credit risks.[125]

One commenter objected to the way the recordkeeping provision was phrased, stating that the rule was not clear as to the extent of the monitoring and whether and when

124 Current rule 2a-7(f)(2)(ii).

125 *See* proposed rule 2a-7(h)(3).

recordkeeping was required.[126] However, another commenter expressed support for how the Commission proposed the new recordkeeping requirement.[127] We are adopting the amendments as proposed and reiterate that the recordkeeping amendments require recordkeeping of the minimal credit risk determination only when the security is first acquired or during periodic or event-driven reassessments, as determined by the board (or its delegate).

3. Other Issues

Three commenters objected to the nature of the standard to be applied in determining minimal credit risks through ongoing monitoring.[128] Two of these commenters objected to the need to determine on an ongoing basis that the capacity to repay short-term financial obligations is "exceptionally strong." The other commenter requested that the standard be made clearer and stronger by inclusion of the specific factors to be considered in determining whether a security presents minimal credit risks. We note that the final amended definition of "eligible security" addresses these comments by eliminating the "exceptionally strong" standard and also codifying general credit analysis factors.[129]

The proposed amendments specified that government securities would not be subject to the initial minimal credit risk determination or the ongoing monitoring requirement. One commenter suggested that money market funds held in the fund's portfolio, which also would not be subject to the initial minimal credit risk determination, should be treated the same and carved out of the ongoing monitoring requirement as well.[130] We are not making such a change

---

126 NYC Bar Comment Letter.

127 ICI Comment Letter.

128 Dreyfus Comment Letter; BlackRock Comment Letter; Better Markets Comment Letter.

129 Rule 2a-7(a)(11). *See supra* section II.A.

130 ICI Comment Letter. (The Vanguard Comment Letter expressed support for the ICI comments.)

to the rule because we believe there are significant differences between the risk profile of government securities and shares of money market funds, as was evident in the recent financial crisis, that make ongoing monitoring prudent for shares of money market funds.[131] Nonetheless, the difference in risk profiles between shares of money market funds and other portfolio securities may influence the specific written ongoing monitoring procedures adopted by the board pursuant to this final rule.[132]

We believe that explicitly requiring that funds perform ongoing monitoring of credit risks will help to ensure that funds are better positioned to quickly identify potential risks of credit events that could impact portfolio security prices and ultimately, for certain funds, the ability of the fund to maintain its stable net asset value.[133] Accordingly, we are adopting these amendments largely as proposed.

The ICI Comment Letter also suggested two technical corrections to the ongoing monitoring provision, which the Commission is adopting. First, the language of clause (i) of 2a-7(g)(3) has been made consistent with the language of clause (ii) and now includes reference to the financial data of a provider of a guarantee or demand feature in addition to the financial data of an issuer of a security. Also, an erroneous citation in 2a-7(g)(3)(ii) has been corrected.

[131] For example, in the 2014 Money Market Fund Adopting Release, we discussed how investor money flowed out of institutional prime money market funds and into government money market funds (and government securities) during the financial crisis following the Reserve Primary Fund's "breaking the buck." See 2014 Money Market Fund Adopting Release, *supra* note 6, at sections II.B and D.

[132] For example, a fund may decide to use different outside sources to assist it in evaluating the ongoing credit quality of portfolio securities it determines present a heightened credit risk profile (as compared with other portfolio securities held by the fund).

[133] As under the current rule and discussed in the proposal, the process undertaken by the fund's board (or adviser) for establishing credit quality and the records documenting that process would be subject to review in regulatory examinations by Commission staff. *See* 2014 Proposing Release, *supra* note 3. In the context of such an examination, a fund should be able to support each minimal credit risk determination it makes with appropriate documentation to reflect that process and determination. A fund that acquires portfolio securities without having adopted, maintained, or implemented written policies and procedures reasonably designed to assess minimal credit risk, as required under rules 2a-7 and 38a-1, could be subject to disciplinary action for failure to comply with those rules. *See id.* *See also* Ambassador Capital Management LLC, *et al.,* Investment Company Act Release No. 30809 (Nov. 26, 2013).

D. Stress Testing

Money market funds currently must adopt written procedures for stress testing their portfolios and perform stress tests according to these procedures on a periodic basis.[134] These required tests include consideration of certain hypothetical events, including the downgrade of particular portfolio security positions.[135] In the Proposing Release, the Commission proposed to replace this reference to ratings downgrades in the stress testing requirement with a hypothetical event that is designed to have a similar impact on a money market fund's portfolio, namely an "event indicating or evidencing credit deterioration" of particular portfolio security positions.[136] Thus, under the proposed amendments, funds could continue to test their portfolios against a potential downgrade or default in addition to any other indication or evidence of credit deterioration they determine appropriate.

All commenters addressing the stress testing amendment supported it.[137] One commenter suggested that allowing a choice of hypothetical events to be used would improve disclosure by increasing variation in the testing.[138] Another commenter stated that it would prefer retaining the original reference to a downgrade, but that the proposed change was appropriate.[139] We continue to believe that amending the stress testing provision as proposed will continue to promote

139 MFDF Comment Letter.

effective stress testing while implementing Section 939A of the Dodd-Frank Act. Accordingly, we are adopting the amendment as proposed.

E. Form N-MFP

As part of the money market fund reforms adopted in 2010, money market funds must provide to the Commission a monthly electronic filing of portfolio holdings information on Form N-MFP.[140] The information that money market funds must disclose with respect to each portfolio security (and any guarantee, demand feature, or other enhancement associated with the portfolio security) includes the name of each designated NRSRO for the portfolio security and the rating assigned to the security.[141] Our staff, however, issued a no-action letter in response to the passage of Section 939A of the Dodd-Frank Act indicating that, among other things, they would not object if a fund did not "designate NRSROs and [did] not make related disclosures in its statement of additional information before the Commission has completed the review of rule 2a-7 required by the [Dodd-Frank Act] and has made any modifications to the rule."[142] Notwithstanding the staff's position, many funds are already reporting this information on Form N-MFP.

Instead of disclosure of designated NRSRO ratings, the Commission's Proposing Release

---

140 *See* rule 30b1-7; *see also* 2010 Money Market Fund Adopting Release, *supra* note 84, at 10082-10086.

141 *See* current Form N-MFP Items 34 (requiring disclosure of each designated NRSRO for a portfolio security and the credit rating given by the designated NRSRO for each portfolio security); 37b-c (requiring disclosure of each designated NRSRO and the credit rating given by the designated NRSRO for each portfolio security demand feature); 38b-c (requiring disclosure of each designated NRSRO and the credit rating given by the designated NRSRO for each portfolio security guarantee); and 39c-d (requiring disclosure of each designated NRSRO and the credit rating given by the designated NRSRO for each portfolio security enhancement).

142 Letter to Karrie McMillan, General Counsel, Investment Company Institute from Robert E. Plaze, Associate Director, Division of Investment Management, SEC (Aug. 19, 2010). Because the requirements of today's rule supersede the staff letter, the letter is withdrawn as of the compliance date of this rule.

would have required that each money market fund disclose, for each portfolio security, (i) each rating assigned by any NRSRO if the fund or its adviser subscribes to that NRSRO's services, as well as the name of the agency providing the rating, and (ii) any other NRSRO rating that the fund's board of directors (or its delegate) considered in making its minimal credit risk determination, as well as the name of the agency providing the rating.[143]

Most commenters addressing the proposed provision supported the Commission's proposal to require disclosure of NRSRO ratings, though many commenters suggested changes, in particular related to the subscription requirements, as discussed below.[144] As suggested by commenters, we are not adopting the proposed requirement that a fund disclose the ratings of the NRSROs to which it subscribes. We are, however, adopting as proposed, a requirement that funds disclose those NRSRO ratings that the fund's board of directors (or its delegate) considered, if any, in making its minimal credit risk determination for a given security, along with the name of the agency that provided the rating.

1. Use of Subscriptions

Many commenters stated that requiring funds to disclose each rating assigned by any NRSRO that a fund or its adviser subscribes to would create unnecessary cost burdens for money market funds, as well as cause other problems.[145] These commenters explained that funds do not consider every rating of every NRSRO they subscribe to when determining the credit profile of a

143 *See* proposed Form N-MFP Item C.10. In a conforming change, the proposal would have also amended Form N-MFP Item C.9 to require disclosure of whether the portfolio security is an eligible security. We did not receive any comments on this provision. This conforming change is now adopted in the final rule.

144 *See* Consumer Federation of America Comment Letter; Better Markets Comment Letter; MFDF Comment Letter; BlackRock Comment Letter; Schwab Comment Letter.

145 MFDF Comment Letter; BlackRock Comment Letter; ICI Comment Letter; Vanguard Comment Letter; SIFMA Comment Letter; Fidelity Comment Letter.

given security. They stated that subscriptions are often used for many other reasons, such as evaluating pricing levels, monitoring market activity and context, and assessing other securities. These commenters also suggested that such disclosures would be unhelpful or even misleading to investors, since the ratings disclosed would often be unrelated to the determinations of minimal credit risks. One commenter stated that the required disclosure of every rating of a portfolio security for which the fund has a subscription would discourage subscriptions, and potentially interfere with the NRSRO market.[146] Another commenter suggested that any usefulness of receiving this information on Form N-MFP for purposes of Commission monitoring was minimal because the information is readily available elsewhere.[147] In addition, one commenter suggested that NRSROs may decide that inclusion of ratings information on Form N-MFP constitutes publication of the ratings and therefore assess extra fees associated with publication.[148] In regard to the general requirement of disclosing any NRSRO ratings on Form N-MFP, one commenter objected that the proposed provision conflicts with Section 939A of the Dodd-Frank Act.[149]

After considering the comments received, we are persuaded by those commenters who argued, as discussed above, that requiring disclosure of each rating assigned by any NRSRO if the fund or its adviser subscribes to that NRSRO's services, as well as the name of the agency providing the rating, is unnecessary and potentially misleading. Except as discussed elsewhere in the section, these commenters did not oppose general disclosure of ratings information on

---

146 ICI Comment Letter.

147 SIFMA Comment Letter.

148 Schwab Comment Letter.

149 SIFMA Comment Letter.

Form N-MFP, provided the requirement is not based on subscribing to an NRSRO's service.[150] Consequently, the final rule requires that funds disclose on Form N-MFP any NRSRO rating that the fund's board of directors (or its delegate) considered in making its minimal credit risk determination for that particular security, as well as the name of the agency providing the rating. This requirement will provide meaningful and concise information to investors and the SEC regarding the process by which a fund evaluates its securities. If a fund's adviser has considered more than one NRSRO rating in making a minimal credit risk determination for a particular portfolio security, the Form N-MFP disclosure will need to reflect each rating considered. We believe this information on ratings will be useful both to the Commission and to investors to monitor credit ratings that funds use in evaluating the credit quality of portfolio securities and to evaluate risks that fund managers take. Moreover, we believe this requirement is consistent with many funds' current Form N-MFP disclosure practices.[151] Disclosures of individual portfolio securities ratings will provide investors, Commission staff, and others with a snapshot of potential trends in a fund's overall risk profile, which can in turn impose discipline on the industry to continually research and evaluate whether that profile is changing.

In regard to the comment that requiring disclosure might trigger the charging of publication fees by the NRSROs, numerous money market funds currently voluntarily report ratings on Form N-MFP, and we are not aware of the imposition of such fees on funds. In regard to the comment suggesting that requiring disclosure of ratings on Form N-MFP conflicts with Section 939A of the Dodd-Frank Act, we believe that requiring disclosure of the NRSRO ratings

---

150 Commenters did not specifically object to our proposed disclosure requirement based on a fund board's (or its delegate's) "consideration" of such ratings in making minimal credit risk determinations.

151 *See* Proposing Release, *supra* note 3, at section II.B.

considered satisfies the requirements of Section 939A. We do not believe that requiring disclosure of credit ratings considered by funds as part of their minimal credit risk determinations conflicts with Section 939A, which requires federal agencies to "remove any reference to or requirement of *reliance* on credit ratings...."

2. Other Issues

Some commenters suggested that fund website disclosure of NRSRO ratings would be more useful and effective than disclosure on Form N-MFP.[152] These commenters stated that such website disclosure could be made clearer and more understandable for investors than the proposed disclosure. Although we appreciate the benefits associated with website disclosure, we expect that the ready public availability of the information on Form N-MFP should achieve many of the same benefits. We also note that the 2014 money market reforms eliminated the 60-day delay on public availability of the information filed on Form N-MFP (making such information public immediately upon filing). Accordingly, we are not adopting a fund website disclosure requirement for NRSRO ratings at this time. We note, however, that nothing in our final rule prohibits money market funds from making such disclosure on fund websites.

One commenter suggested another approach that we did not propose, namely that the Commission require disclosure on Form N-MFP of the factors that a fund considers when determining whether a security presents minimal credit risks and the details of that determination.[153] The commenter stated that this expanded disclosure would enhance investors' and regulators' understanding of risks in money market fund portfolios. We believe that expanding disclosures in this way is unlikely to provide additional useful information because all

---

[152] Schwab Comment Letter; ICI Comment Letter; Fidelity Comment Letter.

[153] Better Markets Comment Letter.

funds will be required to use the codified general factors that we had initially proposed as guidance. All funds will now have to apply the specific factors the Commission is requiring in the rule and retain records of the specifics of the determination made for possible review by the Commission. Although public disclosure of the details of the reasoning behind the funds evaluation of each factor and overall minimal credit risk determination would provide additional information to investors, we currently do not believe that many investors would be likely to benefit from this potentially voluminous disclosure for each security held. Such a disclosure requirement would also effectively require funds to publicly disclose their entire credit risk evaluation process, which may include proprietary data. On balance, it is not clear that the potential benefits of this particular disclosure would justify the potentially significant costs. Therefore, we are not adopting such a disclosure requirement at this time.

Finally, one commenter stated that government money market funds should not have to disclose ratings information.[154] We note that no money market funds, including government money market funds, are required by the final rule to disclose ratings information if that information is not considered in evaluating a particular security. Accordingly, to the extent that government money market funds do not consider ratings in selecting portfolio securities, any burden should be minimal.

3. Technical Amendments

In addition to the substantive amendments to Form N-MFP, the Commission is also making a technical change to one of the definitions of "money market fund" on Form N-MFP.[155]

---

[154] ICI Comment Letter.

[155] The definition in the heading of the Instructions did not match the version in the Definitions section. For consistency and clarity, we are now adopting the heading definition in both places, as well as on Form N-1A.

We are also making a technical change to the definition of "collateralized fully" in rule 2a-7.[156]

F. Exclusion from the Issuer Diversification Requirement

We are amending the rule 2a-7 diversification provision as proposed.[157] Under the current rule, in addition to the provisions regarding credit quality discussed above, rule 2a-7's risk limiting conditions require a money market fund's portfolio to be diversified, both as to the issuers of the securities it acquires and providers of guarantees (and demand features)[158] related to those securities.[159] These diversification provisions were designed to diversify the risks to which money market funds may be exposed and thereby reduce the impact of any single issuer's or guarantor's (or demand feature provider's) financial distress on a fund.[160] Generally, money

---

156 *See* rule 2a-7(a)(5). We are eliminating from the definition of "collateralized fully" in rule 2a-7(a)(5) an erroneous cross reference to rule 5b-3(c)(1)(iv)(D) (which has since been removed). See 2013 Ratings Removal Adopting Release, *supra* note 5.

157 We are also adopting several technical amendments to the portfolio diversification provisions of rule 2a-7, as described below in this section.

158 A "demand feature" means a feature permitting the holder of a security to sell the security at an exercise price equal to the approximate amortized cost of the security plus accrued interest, if any, at the later of the time of exercise or the settlement of the transaction, paid within 397 calendar days of exercise. Rule 2a-7(a)(9) (definition of demand feature). A "guarantee" as defined in rule 2a-7 includes an unconditional demand feature. *See* rule 2a-7(a)(18) (definition of guarantee). An "unconditional demand feature" means a demand feature that by its terms would be readily exercisable in the event of a default in payment of principal or interest on the underlying security or securities. Rule 2a-7(a)(30) (definition of unconditional demand feature).

159 *See* current rule 2a-7(d)(3). The diversification requirements of rule 2a-7 differ in significant respects from the requirements for diversified management investment companies under section 5(b)(1) of the Investment Company Act. A money market fund that satisfies the applicable diversification requirements of paragraphs (d)(3) and (e) of rule 2a-7 is deemed to have satisfied the requirements of section 5(b)(1). Rule 2a-7(d)(3)(v). Subchapter M of the Internal Revenue Code contains other diversification requirements for a money market fund to be a "regulated investment company" for federal income tax purposes. 26 U.S.C. 851 *et seq.*

160 *See* Money Market Fund Reform, Investment Company Act Release No 28807 (Jun. 30, 2009) [74 FR 32688 (Jul. 8, 2009)] ("2009 Money Market Fund Proposing Release") at n.220 and accompanying text; Revisions to Rules Regulating Money Market Funds, Investment Company Act Release No. 17589 (Jul. 17, 1990) [55 FR 30239 (Jul. 25, 1990)], at text accompanying n.23 ("Diversification limits investment risk to a fund by spreading the risk of loss among a number of securities.").

market funds must today limit their investments in the securities of any one issuer of a first tier security to no more than 5 percent of total assets, other than with respect to government securities and securities subject to a guarantee by a non-controlled person.[161] A single state money market fund, however, may also currently invest up to 25 percent of its total assets in the securities of any single issuer.[162] In addition to the issuer diversification provisions, money market funds must generally limit their investments in securities subject to a guarantee (or demand feature) to no more than 10 percent of total assets from any one provider.[163] A money market fund is permitted to take on greater indirect exposure to a guarantor because rather than looking solely to the issuer, the money market fund would have two potential sources of repayment—the issuer whose securities are subject to the guarantees and the providers of those guarantees if the issuer defaults. Most recently, the Commission adopted amendments to certain provisions of these diversification requirements as part of the 2014 money market fund reforms.[164]

---

161 Current rule 2a-7(d)(3)(i)(A) and (B). A fund also may invest no more than 0.5 percent of fund assets in any one issuer of a second tier security. Current rule 2a-7(d)(3)(i)(C). The rule provides a safe harbor under which a taxable or national tax-exempt fund may invest up to 25 percent of its total assets in the first tier securities of a single issuer for a period of up to three business days after acquisition (but a fund may use this exception for only one issuer at a time). Current rule 2a-7(d)(3)(i)(A). Because the amendments we are adopting today eliminate the distinction between first and second tier securities, the issuer diversification requirements and the safe harbor, as amended, will not refer to or rely on a portfolio security's rating.

162 Current rule 2a-7(d)(3)(i)(B).

163 Rule 2a-7 also provides a "fifteen percent basket" for tax-exempt (including single state) money market funds, under which as much as 15 percent of the value of securities held in a tax-exempt fund's portfolio may be subject to guarantees or demand features from a single institution. *See* rule 2a-7(d)(3)(iii)(B). The tax-exempt fund, however, may only use the 15 percent basket to invest in demand features or guarantees issued by non-controlled persons that are first tier securities. *See* rule 2a-7(d)(3)(iii). Under the amendments we are adopting today, the 15 percent basket will be available with respect to any demand feature or guarantee issued by a non-controlled person without regard to the rating of the security, guarantee or demand feature.

164 *See* 2014 Money Market Fund Adopting Release, *supra* note 6. Among other things, the 2014 money market fund amendments require that money market funds treat certain entities that are

Notwithstanding the 5 percent issuer diversification provision, rule 2a-7 currently does not require a money market fund to be diversified with respect to issuers of securities that are subject to a guarantee by a non-controlled person.[165] This exclusion could allow, for example, a fund to invest a significant portion or all of the value of its portfolio in securities issued by the same entity if the securities were guaranteed by different non-controlled person guarantors and none of the guaranteed securities had a value exceeding 10 percent of the fund's total assets. We continue to be concerned that a fund that relies on this issuer diversification exclusion could have a highly concentrated portfolio and would be subject to substantial risk if the single issuer in whose securities it had such a significant investment were to come under stress or default.

The diversification amendments that we adopt today will remove the current exclusion to the issuer diversification requirement for securities subject to a guarantee issued by a non-controlled person. That is, under today's amendment, each money market fund that invests in securities subject to a guarantee (whether or not the guarantor is a non-controlled person) will have to comply with both the 10 percent diversification requirement for the guarantor as well as the 5 percent diversification requirement for the issuer.[166]

---

affiliated with each other as single issuers when applying the 5 percent issuer diversification provision of rule 2a-7 and treat the sponsors of asset-backed securities as guarantors subject to the 10 percent diversification provision of rule 2a-7 applicable to guarantees and demand features, unless the fund's board makes certain findings. These amendments were intended to increase the resiliency of and reduce risk in money market funds by limiting their ability to concentrate investments in a single economic enterprise.

165 *See* current rule 2a-7(d)(3). A guarantee issued by a non-controlled person means a guarantee issued by a person that, directly or indirectly, does not control, and is not controlled by or under common control with the issuer of the security subject to the guarantee (*control* means "control" as defined in section 2(a)(9) of the Act) (15 U.S.C. 80a-2(a)(9)), or a sponsor of a special purpose entity ("SPE") with respect to an asset-backed security. Rule 2a-7(a)(17).

166 *But see* rule 2a-7(e). If the fund's board of directors has determined that the fund is not relying on a guarantee to determine the quality, maturity or liquidity of a portfolio security and maintains a record of this determination, then the fund need not comply with the 10 percent guarantor diversification requirement with respect to such guarantee.

One commenter supported the proposed issuer diversification amendment.[167] Another commenter did not specifically oppose the proposal but questioned the additive value of the proposed amendment.[168] The majority of commenters, however, that discussed the diversification proposal opposed it, for a variety of reasons as further discussed below.[169]

1. Credit Quality of the Guarantor and Two Sources of Repayment

In cases where a money market fund invests in a security subject to a guarantee, the guarantor assumes the credit risks presented by a particular issuer by agreeing to provide principal and interest payments in the event the issuer of the underlying security is unable to do so. Accordingly, rule 2a-7 allows a money market fund to look to the credit quality of the guarantor as opposed to the issuer to meet rule 2a-7's portfolio quality provisions.[170] Several commenters emphasized a money market fund's ability to rely on the credit quality of the guarantor in this case, arguing that it is appropriate to direct the minimal credit risk determination to the guarantor as opposed to refocusing the analysis on issuer concentration risk.[171] One of these commenters also suggested that securities subject to a guarantee in many cases trade on the basis of the credit quality of the provider of that guarantee, and thus exposure to the underlying security issuer may not be relevant to a money market fund's ability to

167 *See* Better Markets Comment Letter. This commenter also opined that there was no rationale for setting a more generous limit for guarantors of the securities than for issuers and that accordingly, the Commission should strengthen the diversification requirements by preventing any one guarantor from guaranteeing more than 5 percent of a fund's assets as opposed to 10 percent.

168 *See* Schwab Comment Letter.

169 *See* BlackRock Comment Letter; Dreyfus Comment Letter; ICI Comment Letter; SFIG Comment Letter; SIFMA Comment Letter; Vanguard Comment Letter.

170 *See* rule 2a-7(d)(2)(iii).

171 *See* Dreyfus Comment Letter; Schwab Comment Letter; SIFMA Comment Letter.

maintain a stable net asset value in these cases.[172] Another commenter suggested that complying with the proposed requirement for guaranteed securities could be construed to require the manager to also conduct a credit review and on-going monitoring of the issuer.[173] We are not amending the provision in rule 2a-7 that permits money market funds to look to the credit quality of the guarantor as opposed to the issuer to meet rule 2a-7's portfolio quality provisions.

As we discussed in the Proposing Release, by permitting money market funds a higher 10 percent limit on their indirect exposures to a single provider of a guarantee than the 5 percent limit on direct investments in any one issuer, rule 2a-7 permits a money market fund to take on greater indirect exposures to providers of guarantees. As we previously discussed, and as acknowledged by commenters, a money market fund is permitted to take on greater indirect exposure because,ra ther than looking solely to the issuer, the money market fund would have two potential sources of repayment—the issuer whose securities are subject to the guarantees and the providers of those guarantees if the issuer defaults.[174] Both the issuer and the guarantor would have to default at the same time for the money market fund to suffer a loss. And if a guarantor were to come under stress, the issuer may be able to obtain a replacement.[175]

By diversifying solely against the guarantor, as is the case under the current issuer diversification exclusion, a fund could rely on the guarantors' credit quality or repayment ability, not the issuer's. Thus, in addition to looking to the credit quality of the guarantor as opposed to

---

173 *See* Schwab Comment Letter.

174 *See* BlackRock Comment Letter; SFIG Comment Letter.

175 *See, e.g.*, Revisions to Rules Regulating Money Market Funds, Investment Company Act Release No.19959 (Dec. 17, 1993) [58 FR 68585 (Dec. 28, 1993)] at n.83 and accompanying text (observing that, if the guarantor of one of the money market fund's securities comes under stress, "issuers or investors generally can either put the instrument back on short notice or persuade the issuer to obtain a substitute for the downgraded institution").

the issuer to meet rule 2a-7's portfolio quality provisions, the fund would also effectively substitute the credit of the guarantor for that of the issuer for diversification purposes, without imposing the tighter 5 percent requirement that rule 2a-7 generally applies for issuer diversification. This means that a fund could have a highly concentrated portfolio and could be subject to substantial risk if it has a significant investment in securities of a single issuer, and such issuer were to come under stress or default. As we stated in the Proposing Release, we are concerned that a money market fund relying on the exclusion from the issuer diversification provision need only comply with the 10 percent guarantor diversification requirement, notwithstanding the credit substitution discussed above. In consideration of our reform goal of limiting concentrated exposure of money market funds to particular economic enterprises, we continue to believe that ignoring a fund's exposure to the issuer in these circumstances is not appropriate.[176]

In the Proposing Release, we requested comment as to whether commenters agreed with our proposed approach to treat securities subject to a guarantee by a non-controlled person similar to other securities with a guarantee under rule 2a-7, or whether we should instead require that a guarantor be treated as the issuer and subject to a 5 percent diversification requirement when a money market fund is relying exclusively on the credit quality of the guarantor or when the security need not meet the issuer diversification requirements. We also asked in the 2013 Money Market Fund Proposing Release more generally whether we should continue to distinguish between a fund's exposure to guarantors and issuers by providing different

176 *See* 2014 Money Market Fund Adopting Release, *supra* note 6, at text following n.1600 and accompanying n.1601. The exclusion from the 5 percent issuer diversification requirement for certain guaranteed securities was adopted in the 1996 money market fund amendments to provide flexibility in municipal investments, and was premised on the ability of a money market fund to rely on the guarantee if an issuer became distressed. *See* 1996 Money Market Fund Adopting Release, *supra* note 84.

diversification requirements for these exposures.[177] We explained that rule 2a-7 permits a money market fund, when determining if a security subject to a guarantee satisfies the credit quality standards, to rely exclusively on the credit quality of the guarantor.[178] As in the Proposing Release, we also specifically asked whether the guarantor should be treated as the issuer and subject to a 5 percent diversification requirement whenever the money market fund is relying exclusively on the credit quality of the guarantor. Although most commenters did not specifically address this issue, one commenter argued that guarantors and demand feature providers should generally be subject to the same 5 percent issuer diversification requirements instead of a higher 10 percent limit.[179] We continue to believe, however, that the approach we are adopting today is preferable to making both the guarantor and issuer subject to a 5 percent diversification requirement because, among other things, the approach we are adopting today would treat securities subject to a guarantee by a non-controlled person similarly to other securities with a guarantee under rule 2a-7.

As discussed further in the economic analysis section below, we believe that the potential costs of requiring both the guarantor and issuer to be subject to a 5 percent diversification requirement would likely be more significant than the costs of the amendment we are adopting today. As of the end of April 2015, we estimate that approximately 110 (of 214) prime money market funds had total exposure to a single entity (including directly issued, asset-backed

---

177 *See* 2013 Money Market Fund Proposing Release, *supra* note 16, at sections III.J.1 – 2.

178 Rule 2a-7(d)(2)(iii). As noted above, a money market fund is permitted to take on greater indirect exposure because the fund has two potential sources of repayment. However, the fact that a money market fund has both the issuer and guarantor as sources of repayment may not fully reduce the risks of the investment in all cases because in the event that both the issuer and guarantor default at the same time the fund could suffer a loss. Additionally, the issuer of the guaranteed securities need not satisfy rule 2a-7's credit quality requirements.

179 *See* Better Markets Comment Letter.

commercial paper sponsorship, and provision of guarantees and demand features) in excess of 5 percent. If we adopted an amendment that both the guarantor and issuer are subject to a 5 percent diversification requirement, any fund that had exposure to an entity greater than 5 percent when those assets matured would have to reinvest the proceeds of the securities creating that exposure in different securities or securities with a different guarantor. Those changes may or may not require those funds to invest in alternative securities, and those securities might present greater risk if they offered lower yields, lower liquidity, or lower credit quality. In addition, we believe the approach we take today is preferable to making both the guarantor and issuer subject to a 5 percent diversification requirement because unlike a security that is not subject to a guarantee, a security that is subject to a guarantee would continue to have two sources of repayment.

Another commenter stated that the Commission has provided for the higher 10 percent limit on indirect exposure of money market funds to guarantors in part because of the "double-barreled" protection, as discussed above, and suggested that the same logic should apply in imposing an issuer diversification limit on guaranteed securities.[180] This commenter recommended that a 10 percent issuer diversification limit be applied under the rule for securities of an issuer that are guaranteed by a non-controlled person.[181] Rather than subject these issuers to a unique 10 percent requirement, however, we continue to believe that a better approach would be to restrict risk exposures to all issuers of securities subject to a guarantee or demand feature under rule 2a-7 in the same way. As noted above, a money market fund is permitted to take on greater exposure to guarantees because rather than solely looking to the issuer, the

[180] *See* SFIG Comment Letter.

[181] *See id.*

money market fund would have two sources of repayment. We believe that this rationale applies to all securities equally (whether the security is subject to a guarantee by a controlled person or a non-controlled person), and that if a money market fund is permitted to take on a greater exposure to a guarantor, then it must also comply with the underlying 5 percent issuer diversification provision. Therefore, under today's amendments, each money market fund that invests in securities subject to a guarantee (whether or not the guarantor is a non-controlled person) will have to comply with both the 10 percent diversification requirement for the guarantor as well as the 5 percent diversification requirement for the issuer. As a result, except for the special provisions regarding single state money market funds, no money market fund non-government portfolio security would be excluded from rule 2a-7's limits on issuer concentration.[182]

2. Tax-Exempt Funds

Several commenters argued that the proposed issuer diversification amendment should not be applied to tax-exempt money market funds in particular.[183] A couple of these commenters stated that the Commission has previously recognized that tax-exempt money market funds should have unique treatment in certain instances due to the particular characteristics of tax-exempt money market funds, including the more constrained supply of investable securities as opposed to other types of money market funds.[184] Several commenters argued that removing the issuer diversification exclusion would cause greater supply challenges, particularly in the tax-

182 *See* rule 2a-7(d)(3)(i)(B) (issuer diversification requirements for single state money market funds).

183 *See* Dreyfus Comment Letter; Fidelity Comment Letter; ICI Comment Letter.

184 *See* ICI Comment Letter; Fidelity Comment Letter.

exempt market.[185] One of these commenters stated that the proposed amendment would be particularly difficult for single state money market funds due to the limited supply of eligible securities, but these commenters did not acknowledge that the 5 percent issuer diversification limit for single state funds applies to only 75 percent of a single state fund's total assets.[186] Another commenter stated that the proposal assumes a ready supply of securities supported by the same guarantor with different issuers so that a fund could comply with the issuer diversification requirement without reducing its holdings of the guarantor's securities, but that this is not the case, particularly in the tax-exempt market.[187]

One commenter suggested that tax-exempt money market funds regularly rely on the exclusion for securities guaranteed by non-controlled persons to exceed the 5 percent diversification limit.[188] In the Proposing Release, staff believed that based on an analysis of February 2014 Form N-MFP data, only 8 out of 559 money market funds, the majority of which were tax-exempt money market funds, held securities with a guarantee issued by a non-controlled person that exceeded the 5 percent diversification requirement for issuers. A couple commenters suggested that Commission staff review a broader sample of data from Form N-MFP to determine the magnitude of funds that rely on the issuer diversification exclusion.[189] One of these commenters also suggested that Commission staff confirm that for any given fund the staff are aggregating an issuer's securities subject to guarantees by non-controlled persons with the issuer's securities subject to guarantees by control persons and the issuer's securities

185 *See* Dreyfus Comment Letter; Fidelity Comment Letter; ICI Comment Letter.

187 *See* ICI Comment Letter.

188 *See id.*

189 *See* Dreyfus Comment Letter; ICI Comment Letter.

that are not guaranteed, in order to determine whether a fund is potentially relying on the issuer diversification exclusion by exceeding the 5 percent issuer diversification limit.[190]

In order to obtain a greater sample, and in response to commenters, the staff supplemented its analysis using October 2014 and April 2015 Form N-MFP data to review the number of funds that exceeded the 5 percent issuer diversification limit, which would indicate that such funds were potentially relying on the 5 percent issuer diversification exclusion.[191] As discussed further in the economic analysis section below, the staff's analysis shows that for October 2014, 60 money market funds out of 553 total money market funds, or approximately 10.8 percent of all money market funds, were potentially relying on the 5 percent issuer diversification exclusion. In addition, staff analysis shows that as of October 2014, only 0.0482 percent of total money market fund assets were above the 5 percent issuer diversification threshold.[192] For April 2015, staff analysis shows that 63 money market funds out of 542 total money market funds, or approximately 11.6 percent of all money market funds, were potentially relying on the 5 percent issuer diversification exclusion. In addition, staff analysis shows that as of April 2015, only 0.0624 percent of total money market fund assets were above the 5 percent issuer diversification threshold.[193]

Based on their updated analysis, Commission staff believes that only tax-exempt money

---

190 *See* ICI Comment Letter.

191 In calculating funds' issuer concentrations, staff made assumptions about the relationships among issuers. Such assumptions may have caused the number of funds that appear to be relying on the 5 percent issuer diversification exclusion to be overstated. To be conservative, staff assumed, for example, that a position in a tender option bond that is over 5 percent of the fund's assets is exposure to a single issuer, even though tender option bond trusts may have more than one issuer as the underlying obligor. We expect that funds' analysts, portfolio managers and counsel can make these determinations based on specific facts that were not available to the staff.

192 This percentage amount corresponds to $1,447,300,000 in assets.

193 This percentage amount corresponds to $1,833,000,000 in assets.

market funds appeared to be relying on the 5 percent issuer diversification exclusion. For October 2014, staff analysis shows that 16 national tax-exempt money market funds out of 72 total national tax-exempt money market funds were potentially relying on the 5 percent issuer diversification exclusion. In addition, staff analysis shows that as of October 2014, only 0.1 percent of national tax-exempt money market fund assets were above the 5 percent issuer diversification threshold.[194] For April 2015, staff analysis shows that 25 national tax-exempt money market funds out of 71 total national tax-exempt money market funds were potentially relying on the 5 percent issuer diversification exclusion. In addition, staff analysis shows that as of April 2015, only 0.5 percent of national tax-exempt money market fund assets were above the 5 percent issuer diversification threshold.[195]

One commenter argued that the proposed amendment would particularly affect single state money market funds.[196] In response to this commenter, and because a single state fund may currently invest up to 25 percent of its total assets in the first tier securities of any single issuer, Commission staff also separately identified the number of single state money market funds that appear to be relying on the issuer diversification exclusion. For October 2014, staff analysis shows that 44 single state money market funds out of 97 total single state money market funds were potentially relying on the 5 percent issuer diversification exclusion. In addition, staff analysis shows that as of October 2014, only 1.7 percent of single state money market fund assets were above the 5 percent issuer diversification threshold (while taking into account the 25

---

194 This percentage amount corresponds to $198,500,000 in assets.

195 This percentage amount corresponds to $893,400,000 in assets.

196 *See* Dreyfus Comment Letter.

percent issuer diversification basket).[197] For April 2015, staff analysis shows that 38 single state money market funds out of 90 total single state money market funds were potentially relying on the 5 percent issuer diversification exclusion. In addition, staff analysis shows that as of April 2015, only 1.3 percent of single state money market fund assets were above the 5 percent issuer diversification threshold (while taking into account the 25 percent issuer diversification basket).[198]

These updated analyses confirm the Commission's initial assumption that overall, few money market funds would be affected by the issuer diversification amendment. As indicated by the staff's analysis above, and as discussed further in the economic analysis section below, we continue to believe a small number of all money market funds rely on the 5 percent issuer diversification exclusion and therefore believe the amendment's effect on funds, including the available supply of investable securities, would be minimal. We recognize that although overall few money market funds are relying on the 5 percent issuer exclusion, the amendment to remove such exclusion would disproportionately affect tax-exempt money market funds and single state money market funds. However, we believe that our staff's analysis of the percentage of assets in excess of the 5 percent issuer diversification threshold provides an accurate reflection of the potential impact that the elimination of the 5 percent issuer diversification exclusion would have on money market funds. We also believe that looking to the percentage of assets in addition to the number of funds (which shows only absolute numbers), comprehensively shows the corresponding level of assets that will need to be reinvested. The above data shows that for October 2014 and April 2015, approximately 99.95 percent and 99.94 percent, respectively, of

[197] This percentage amount corresponds to $1,248,800,000 in assets.

[198] This percentage amount corresponds to $939,600,000 in assets.

total money market fund assets are not above the 5 percent issuer diversification threshold. Thus, because most money market funds are not using the exclusion and because a very high percentage of money market fund assets are not above the threshold, we continue to believe any negative effects for money market funds will generally be minimal.

We also note that money market funds will not be required to sell any of their portfolio securities as a result of our diversification amendment because rule 2a-7's diversification limits are measured at acquisition, and they may therefore retain these assets until they mature. Although we understand that national tax-exempt money market funds and single state money market funds may have made greater use of the 5 percent issuer exclusion in the past (and might do so in the future if we retained the 5 percent issuer diversification exclusion), we remain concerned that funds were previously exposed to concentrated risks inconsistent with the purposes of rule 2a-7's diversification requirements. As discussed above, we also continue to believe that restricting risk exposures to all issuers of securities subject to a guarantee or demand feature in the same way will appropriately limit the concentration of exposure that a money market fund could otherwise have to a particular issuer. Accordingly, we continue to believe that removing the exclusion to the 5 percent issuer diversification provision furthers our reform goal of limiting concentrated exposure of money market funds to particular economic enterprises.

3. Technical Amendments

The Commission is also making technical amendments to certain diversification provisions in rule 2a-7.[199] First, the Commission is amending rule 2a-7(d)(3)(i)(A)(*2*) to clarify

[199] *See* rule 2a-7(d)(3)(i) (issuer diversification) and rule 2a-7(d)(3)(iii) (diversification rules for demand features and guarantees).

that a tax-exempt fund (other than a single state fund) is required to comply with rule 2a-7(d)(3)(i)(A)(*2*) with respect to only 85 percent of its total assets.[200]

Second, the Commission is clarifying the use of the three-day safe harbor as it pertains to issuer diversification. The current three-day safe harbor provides that a money market fund may invest up to 25 percent of its total assets in first tier securities of a single issuer for a period of three business days after the acquisition thereof.[201] Specifically, rule 2a-7(d)(3)(i)(A)(*1*) generally prohibits a money market fund (other than a single state fund) from investing more than 5 percent of its total assets in an issuer's first tier securities, provided that such a fund may invest up to 25 percent of its total assets in the first tier securities of a single issuer for a period of up to three business days after the acquisition thereof. In addition, rule 2a-7(d)(3)(i)(A)(*2*) prohibits, at the time of any acquisition, investment of more than ten percent of a money market fund's total assets in securities issued by *or* subject to demand features or guarantees from the institution that issued the demand feature or guarantee, without making reference to the three-day safe harbor. Because the three-day safe harbor is referenced solely in subparagraph (*1*) of rule 2a-7(d)(3)(i)(A) and not in subparagraph (*2*) of rule 2a-7(d)(3)(i)(A), it may have been unclear as to whether a money market fund (other than a single state fund) could invest up to 25 percent of its total assets in a single issuer's securities for a period of up to three business days if some of

200 *See* rule 2a-7(d)(3)(i)(A)(*2*). Current rule 2a-7(d)(3)(i)(A)(*2*) could be read to suggest that a tax-exempt money market fund must not invest more than 10 percent of its total assets in securities issued by or subject to demand features or guarantees from the institution that issued the demand feature or guarantee. However, the 2014 money market fund reform amendments provided that as much as 15 percent of the value of securities held in a tax-exempt money market fund's portfolio may be subject to guarantees or demand features from a single institution. The technical amendment incorporates and reflects these 2014 money market fund reform amendments and clarifies that a tax-exempt fund need only comply with this provision with respect to 85 percent of its total assets, and not with respect to all of its total assets.

201 *See supra* note 161. In the amendments we are adopting today, the three-day safe harbor will not refer to investments in first-tier securities.

the money market fund's securities were subject to guarantees or demand features provided by such issuer. In order to clarify that a money market fund (other than a single state fund) can invest up to 25 percent of its total assets in a single issuer's securities for a period of up to three business days if some of the money market fund's securities are subject to guarantees or demand features provided by such issuer, the Commission is amending rule 2a-7(d)(3)(i)(A) to clarify that the three-day safe harbor for issuer diversification should be read to apply to both subparagraphs (*1*) and (*2*).[202]

Last, the Commission is amending rule 2a-7(d)(3)(i)(B)(*2*) to clarify that a single state fund is required to comply with the diversification limitations of rule 2a-7(d)(3)(i)(B)(*2*) with respect to only 75 percent of its total assets, so long as not more than 15 percent of its total assets are invested in securities subject to guarantees or demand features provided by an institution as provided for in rule 2a-7(d)(iii)(B).[203] These amendments are intended only to clarify the diversification amendments that the Commission adopted as part of the 2014 money market reform.

III. COMPLIANCE PERIOD FOR THE FINAL RULE AND FORM AMENDMENTS

In the Proposing Release, we proposed a compliance date for the final amendments to rule 2a-7 and Form N-MFP that would coordinate compliance with the rule 2a-7 amendments

---

[202] *See* rule 2a-7(d)(3)(i)(A).

[203] *See* rule 2a-7(d)(3)(i)(B)(*2*). Current rule 2a-7(d)(3)(i)(B)(*2*) could be read to suggest that a single state fund must not invest more than 10 percent of its total assets in securities issued by or subject to demand features or guarantees from the institution that issued the demand feature or guarantee. However, a single state fund may invest up to 25 percent of its total assets in securities of any single issuer. In addition, the 2014 money market fund reform amendments provided that as much as 15 percent of the value of securities held in a single state fund's portfolio may be subject to guarantees or demand features from a single institution. The technical amendment incorporates and reflects these provisions and clarifies that a single state fund need only comply with this provision with respect to 75 percent of its total assets, and not with respect to all of its total assets.

relating to diversification, stress testing, and Form N-MFP, adopted in the 2014 Money Market Fund Adopting Release. We solicited comments on this compliance period in the Proposing Release, and one commenter addressed the issue, suggesting that the date be pushed back so that funds will have at least one full year to comply.[204]

In response to this comment, we are now adopting October 14, 2016 as the compliance date for this final rule. This date will give funds more than a full year to comply, which we agree is appropriate, and will also coordinate with the floating net asset value, liquidity fee,a nd redemption gate provisions in the 2014 Money Market Fund Adopting Release. We believe that this compliance date will provide an adequate period of time for money market funds to review and revise their policies and procedures for complying with amended rule 2a-7.[205] Although this compliance date will not coincide with the compliance date for the rule 2a-7 amendments relating to diversification, stress testing, and Form N-MFP adopted in the 2014 Money Market Fund Adopting Release, we believe that coordinating the compliance date of today's amendments with the compliance date of the floating net asset value amendments adopted in the 2014 Money Market Fund Adopting Release should reduce costs by consolidating changes to be made to a fund's policies and procedures at that time, while also providing more than a year for implementation of today's amendments.

IV. PAPERWORK REDUCTION ACT ANALYSIS

Certain provisions of this final rule contain "collections of information" within the meaning of the Paperwork Reduction Act of 1995 ("PRA").[206] An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays

[204] Schwab Comment Letter.

[205] *See infra* section V.A.2.v.

[206] 44 U.S.C. 3501-3520.

a currently valid control number. The titles and control numbers for the existing collections of information that are affected by the rule amendments are: (1) "Rule 2a-7 under the Investment Company Act of 1940, Money market funds" (OMB Control No. 3235-0268); (2) "Rule 30b1-7 under the Investment Company Act of 1940, Monthly report for money market funds" (OMB Control No. 3235-0657); and (3) "Form N-MFP under the Investment Company Act of 1940, Monthly schedule of portfolio holdings of money market funds" (OMB Control No. 3235-0657). This final rule contains no new collections of information not present in the proposed rule. The Commission published notice soliciting comments on the collection of information requirements in the Proposing Release and submitted the proposed collections of information to the Office of Management and Budget ("OMB") for review in accordance with 44 U.S.C. 3507(d) and 5 CFR 1320.11. We did not receive any comments on the collection of information requirements.

A. Rule 2a-7

As discussed above, we are removing references to credit ratings in rule 2a-7, which affect five elements of the rule: (i) determination of whether a security is an eligible security; (ii) determination of whether a security is a first tier security; (iii) credit quality standards for securities with a conditional demand feature; (iv) requirements for monitoring securities for ratings downgrades and other credit events; and (v) stress testing. These amendments involve collections of information, and the respondents to the collections of information are money market funds. This collection of information will be mandatory for money market funds that rely on rule 2a-7, and to the extent that the Commission receives confidential information pursuant to the collection of information, such information will be kept confidential, subject to the provisions of applicable law.[207]

---

[207] *See, e.g.*, 5 U.S.C. 552 (Exemption 4 of the Freedom of Information Act provides an exemption

1. <u>Eligible Security Determinations for Money Market Fund Portfolio Securities, Including Securities That Are Subject to a Conditional Demand Feature</u>

Rule 2a-7 limits a money market fund's portfolio investments to "eligible securities," which are currently defined as securities that have received credit ratings from a requisite NRSRO in one of the two highest short-term rating categories, or comparable unrated securities.[208] The rule also restricts money market fund investments to securities that the fund's board, or its delegate, determines present minimal credit risks, and requires a fund to adopt policies and procedures regarding minimal credit risk determinations.[209] As discussed above, we are adopting amendments to rule 2a-7 that will remove any reference to, or requirement of reliance on, credit ratings in rule 2a-7 and modify the credit quality standard to be used in determining the eligibility of a money market fund's portfolio securities, including securities that are subject to a conditional demand feature. Specifically, the amendments will eliminate the current requirement that an eligible security be rated in one of the two highest short-term rating categories by an NRSRO or be of comparable quality, and will combine the current "first tier" and "second tier" credit risk categories into a single standard, which will be included as part of rule 2a-7's definition of eligible security. A security will be an eligible security only if the money market fund's board of directors (or its delegate) determines that it presents minimal credit risks, which determination will involve consideration of specified credit analysis factors

---

for "trade secrets and commercial or financial information obtained from a person and privileged or confidential." 5 U.S.C. 552(b)(4). Exemption 8 of the Freedom of Information Act provides an exemption for matters that are "contained in or related to examination, operating, or condition reports prepared by, or on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions." 5 U.S.C. 552(b)(8)).

208 *See* current rule 2a-7(a)(12).

209 *See* rules 2a-7(d)(2)(i); 2a-7(j)(1); 38a-1.

that are listed in the rule.[210] The amendments also require that, with respect to a security (or its guarantee) subject to a conditional demand feature, the underlying security (or its guarantee) must meet the same minimal credit risks standard.[211]

Money market funds are required to have written policies and procedures regarding minimal credit risk determinations.[212] Thus, each money market fund complex will incur one-time costs to comply with these amendments. Specifically, each fund complex will incur costs to review the amended provisions of rule 2a-7 and, as it determines appropriate in light of the amendments, revise its policies and procedures to incorporate the amended credit quality standards to be used in determining the eligibility of a money market fund's portfolio securities. As discussed below, we anticipate that many funds are likely to retain their investment policies as currently required under rule 2a-7, which incorporate NRSRO ratings and which will be permitted under the rule amendments.[213] Some funds, on the other hand, may choose to revise their investment policies to remove references to NRSRO ratings and to incorporate the standards provided in the rule. Even if funds choose to eliminate references to ratings in their investment policies, funds' investment policies may not change substantially, as funds are already required to assess credit quality apart from ratings as part of their minimal credit risk

---

210 Rule 2a-7(a)(11); *see supra* section II.A.

211 Rule 2a-7(d)(2)(iii)(C); *see supra* section II.B. The proposal included a further finding that the issuer of the demand feature would have a very strong capacity for payment of its financial commitments. See proposed rule 2a-7(d)(2)(iii)(C). As discussed below, because the minimal credit risk standard, as proposed, remains in the amendments we are adopting today, and, because the strong capacity standard, as commenters noted, would be generally superfluous and subsumed by the overriding minimal credit risk determination, we are not revising our burden estimate from the proposal.

212 *See* rule 2a-7(j)(1).

213 *See infra* section V.A.

determinations.[214] As we noted in the discussion above, based on staff observations in examinations and prior staff guidance, we believe that most money market fund managers currently take the codified credit analysis factors into account, as appropriate, when they determine that a portfolio security presents minimal credit risks.

The Proposing Release provided the credit analysis factors as guidance, rather than in rule text, and required that the fund make a finding that the issuer of a security had an "exceptionally strong capacity" to meet its short-term financial obligations.[215] Because the final rule is merely codifying the analysis that staff believes money market fund managers currently take into account, we do not believe that the burden associated with the final rule will be different from that estimated for the proposed rule. The estimates associated with the analysis for the proposal assumed use of the credit analysis factors presented as guidance, thus providing the fund sufficient information to make the minimal credit risk and "exceptionally strong capacity" findings. Therefore, we believe that codifying the factors and eliminating the "exceptionally strong capacity" finding will have no effect on the burden estimates, because use of the factors was already assumed in those estimates and the "exceptionally strong capacity" finding was assumed to be built into that analysis, creating no additional burden. Similarly, the proposal included a further finding that the issuer of a conditional demand feature would have a "very strong capacity" for payment of its financial commitments.[216] As with the "exceptionally strong capacity" finding, this "very strong capacity" finding was assumed to be built into the credit analysis, and we do not believe that removal of this finding will change the estimated

214 *See* current rule 2a-7(d)(2)(i).

215 *See* proposed rule 2a-7(a)(11).

216 *See* proposed rule 2a-7(d)(2)(iii)(C).

burden associated with this requirement.

While we cannot predict with precision the extent to which funds may revise their policies and procedures for determining minimal credit risk, we estimate that each money market fund complex on average will incur a one-time burden of 9 hours,[217] at a cost of $2,838,[218] to review and revise, as appropriate, its policies and procedures. Using an estimate of 103 money market fund complexes,[219] we estimate that money market funds would incur, in aggregate, a total one-time burden of 927 hours,[220] at a cost of $292,314,[221] to comply with the amended provisions of rule 2a-7 modifying the credit quality standard to be used in determining the eligibility of a fund's portfolio securities. Amortizing these hourly and cost burdens over three years results in an average annual increased burden for all money market fund complexes of 309

---

217 We estimate that the lower range of the one-time hour burden for a money market fund complex to review and revise, as appropriate, its policies and procedures for determining minimal credit risk would be 6 hours (4 hours by a compliance manager, and 2 hours by an attorney). We estimate that the upper range of the one-time hour burden for a money market fund complex to review and revise, as appropriate, its policies and procedures for determining minimal credit risk would be 12 hours (8 hours by a compliance manager, and 4 hours by an attorney). For purposes of our estimates for the PRA analysis, we have taken the mid-point of this range (mid-point of 6 hours and 12 hours = 9 hours (6 hours by a compliance manager, and 3 hours by an attorney)).

218 This estimate is based on the following calculation: (6 hours (mid-point of 4 hours and 8 hours incurred by a compliance manager) x $283 (rate for a compliance manager) = $1,698) + (3 hours (mid-point of 2 hours and 4 hours incurred by an attorney) x $380 (rate for an attorney) = $1,140) = $2,838. All estimated wage figures discussed here and throughout this release are based on published rates that have been taken from SIFMA's Management & Professional Earnings in the Securities Industry 2013, *available at* http://www.sifma.org/research/item.aspx?id=8589940603, modified by Commission staff to account for an 1800 hour work-year and multiplied by 5.35 to account for bonuses, firm size, employee benefits, and overhead.

219 Based on data from Form N-MFP and iMoneyNet as of April 30, 2015. The Proposing Release PRA statement was based on data as of February 28, 2014. We have updated the estimates used in this final PRA to reflect more current data as of April 30, 2015.

220 This estimate is based on the following calculation: 9 hours x 103 money market fund complexes = 927 hours.

221 This estimate is based on the following calculation: $2,838 x 103 money market fund complexes = $292,314.

hours[222] at a cost of $97,438.[223] We do not believe that funds would newly implement or change any annual review of policies and procedures that they currently perform as a result of the adopted amendments. There will be no external costs associated with this collection of information.

2. Monitoring Minimal Credit Risks

Rule 2a-7 currently requires a money market fund board (or its delegate) to promptly reassess whether a security that has been downgraded by an NRSRO continues to present minimal credit risks.[224] As discussed above, we are adopting as proposed amendments to rule 2a-7 that will eliminate the current use of credit ratings in the rule's downgrade and default provisions. Rule 2a-7 instead will require a money market fund to adopt written procedures requiring the fund adviser, or any person to whom the fund's board of directors has delegated portfolio management responsibilities, to provide ongoing review of each portfolio security to determine that the issuer continues to present minimal credit risks.[225] To comply with these amendments, a fund complex will incur one-time costs to review the amended provisions of rule 2a-7 and adopt policies and procedures providing for ongoing review to determine whether a money market fund's portfolio securities continue to present minimal credit risks. Money market funds are not currently required to maintain policies and procedures that specifically address ongoing minimal credit risk monitoring. Although we understand, based on staff experience, that most money market funds currently monitor portfolio securities for minimal

222 This estimate is based on the following calculation: 927 hours ÷ 3 years = 309 hours.

223 This estimate is based on the following calculation: $292,314 ÷ 3 years = $97,438.

224 *See* current rule 2a-7(f)(1)(i).

225 Rule 2a-7(g)(3); *see supra* section II.C.

credit risk on an ongoing basis,[226] we are assuming that all money market fund complexes would need to adopt new written policies and procedures to provide for this ongoing review in order to comply with the amended provisions of rule 2a-7.

We estimate that each money market fund complex on average would incur a one-time burden of 5 hours,[227] at a cost of $3,619,[228] to adopt policies and procedures for ongoing review of minimal credit risks. Using an estimate of 103 money market fund complexes,[229] we estimate that money market funds will incur, in aggregate, a total one-time burden of 515 hours,[230] at a

---

226 *See supra* note 116 and accompanying text.

227 These hour estimates assume that the process of adopting written policies and procedures will consist primarily of transcribing and reviewing any existing policies and procedures that funds currently use when monitoring minimal credit risk on an ongoing basis. Because we cannot predict the extent to which funds may need to develop these policies and procedures to comply with the amended provisions of rule 2a-7, or may need to transcribe and review any existing policies and procedures, we have taken, as an estimated average burden, the mid-point of a range of hour estimates discussed below in the following paragraph for purposes of our PRA analysis.

We estimate that the lower range of the one-time hour burden for a money market fund complex to adopt policies and procedures for ongoing review to determine whether a money market fund's portfolio securities continue to present minimal credit risks would be 3.5 hours (2 hours by a compliance manager and 1 hour by an attorney to develop and review policies and procedures (or transcribe and review pre-existing policies and procedures) + 0.5 hours for the fund's board to adopt the policies and procedures). We estimate that the upper range of the one-time hour burden for a money market fund complex to adopt such policies and procedures would be 6.5 hours (4 hours by a compliance manager and 2 hours by an attorney to develop and review policies and procedures (or transcribe and review pre-existing policies and procedures) + 0.5 hours for the fund's board to adopt the policies and procedures). The mid-point of the lower range estimate and the upper range estimate is 5 hours.

228 This estimate is based on the following calculation: (3 hours (mid-point of 2 hours and 4 hours incurred by a compliance manager) x $283 (rate for a compliance manager) = $849) + (1.5 hours (mid-point of 1 hour and 2 hours incurred by an attorney) x $380 (rate for an attorney) = $570) + (0.5 hours x $4,400 per hour for a board of 8 directors = $2,200)= $3,619. The staff previously estimated in 2009 that the average cost of board of director time was $4,000 per hour for the board as a whole, based on information received from funds and their counsel. Adjusting for inflation, the staff estimates that the current average cost of board of director time is approximately $4,400 per hour.

229 Based on data from Form N-MFP and iMoneyNet as of April 30, 2015. The Proposing Release PRA statement was based on data as of February 28, 2014. We have updated the estimates used in this final PRA to reflect more current data as of April 30, 2015.

230 This estimate is based on the following calculation: 5 hours x 103 money market fund complexes

cost of $372,757,[231] to comply with the amended provisions of rule 2a-7. Amortizing these hourly and cost burdens over three years results in an average annual increased burden for all money market fund complexes of 172 hours[232] at a cost of $124,252.[233] There will be no external costs associated with this collection of information.

3. Stress Testing

Rule 2a-7 currently requires money market funds to adopt written stress testing procedures and to perform stress tests according to these procedures on a periodic basis.[234] We are adopting as proposed amendments to rule 2a-7 that would replace the reference to ratings downgrades in the rule's stress testing provisions with a hypothetical event that is designed to have a similar impact on a money market fund's portfolio.[235] The amendment is designed to retain a similar standard for stress testing as under current rule 2a-7. Specifically, while rule 2a-7 currently requires a fund to stress test its portfolio based on certain hypothetical events, including a downgrade of portfolio securities, the adopted amendment will require a fund to stress test for an event indicating or evidencing credit deterioration in a portfolio security, and will include a downgrade or default as examples of that type of event. As discussed below, we recognize that a money market fund could use its current policies and procedures to comply with the amendment, and could continue to use credit quality evaluations prepared by outside sources,

---

= 515 hours.

231 This estimate is based on the following calculation: $3,619 x 103 money market fund complexes = $372,757.

232 This estimate is based on the following calculation: 515 hours ÷ 3 years = 172 hours.

233 This estimate is based on the following calculation: $372,757 ÷ 3 years = $124,252.

234 *See* current rule 2a-7(g)(8).

235 Rule 2a-7(g)(8)(i)(B); *see supra* section II.D.

including NRSRO downgrades, in stress tests.[236] Because the rule currently requires testing for a downgrade as a hypothetical event, we do not believe that funds will take any additional time to review and revise their policies and procedures with respect to the continued use of downgrades in stress testing. Accordingly, we do not expect the amendments will significantly change current collection of information burden estimates for rule 2a-7.[237]

Total Burden for Rule 2a-7. The current approved collection of information for rule 2a-7 is 632,244 annual aggregate hours. The aggregate additional burden hours associated with the adopted amendments to rule 2a-7 increase the burden estimate to 632,725 hours annually for all funds.[238]

B. Rule 30b1-7 and Form N-MFP

Rule 30b1-7 requires money market funds to file a monthly report electronically on Form N-MFP within five business days after the end of each month. The information required by the form must be data-tagged in XML format and filed through EDGAR. Preparing Form N-MFP is a collection of information under the PRA.[239] The respondents to this collection of information are money market funds. A fund must comply with the requirement to prepare Form N-MFP in order to hold itself out to investors as a money market fund or the equivalent of a money market fund in reliance on rule 2a-7. This collection of information is mandatory for money market funds that rely on rule 2a-7, and responses to the disclosure requirements of

---

236 *See infra* text surrounding note 288.

237 *See id.*

238 This estimate is based on the following calculation: 632,244 hours (current approved burden) + 309 hours (eligible security determinations for money market fund portfolio securities, including securities that are subject to a conditional demand feature) + 172 hours (monitoring minimal credit risks) = 632,725 hours.

239 For purposes of the PRA analysis, the current burden associated with the requirements of rule 30b1-7 is included in the collection of information requirements of Form N-MFP.

Form N-MFP are not kept confidential.

Money market funds are currently required to disclose on Form N-MFP, with respect to each portfolio security, whether the security is a first or second tier security or is unrated, as well as the "designated NRSROs" for each security (and for each demand feature, guarantee, or credit enhancement).[240] As discussed above, the adopted amendments will require that each money market fund disclose on Form N-MFP, for each portfolio security, any rating assigned by an NRSRO that the fund's board of directors (or its delegate) considered in determining that the security presents minimal credit risks (together with the name of the assigning NRSRO).[241] Because we believe that the majority of funds will continue to refer to credit ratings in making minimal credit risk determinations, we do not believe the amendments to Form N-MFP will result in material changes to the ongoing burden for most funds.[242] However, we believe that funds will incur one-time costs to re-program their filing software to reflect the new requirements of Form N-MFP.

We estimate that each fund will incur a one-time burden of 3 hours,[243] at a cost of $943 per fund,[244] to comply with the amended disclosure requirements of Form N-MFP. Using an

---

[240] *See* Form N-MFP Items C.9, C.10, C.14.b-c, C.15.b-c, C.16.c-d.

[241] *See* Form N-MFP Items C.9, C.10, C.14.e, C.15.c, C.16.d; *supra* section II.E.T he proposal also would have required disclosure of any rating assigned by an NRSRO to whose services the fund or its adviser subscribes (together with the name of the assigning NRSRO). Because the estimated burden assigned to the form amendments is only the one-time re-programming cost, which will not be affected by the change from the proposal to the adopting release, the burden estimate above has not been reduced to reflect the removal of this requirement.

[242] *See supra* note 114.

[243] We estimate that the one-time hour burden for a money market fund to re-program its Form N-MFP filing software to reflect the new requirements of Form N-MFP would be 3 hours (1 hour by a senior systems analyst, 1 hour by a senior programmer, and 1 hour by an attorney).

[244] This estimate is based on the following calculation: (1 hour x $260 (rate for a senior systems analyst) = $260) + (1 hour x $303 (rate for a senior programmer) = $303) + (1 hour x $380 (rate for an attorney) = $380) = $943.

estimate of 537 money market funds that are required to file reports on Form N-MFP,[245] we estimate that money market funds will incur, in the aggregate, a total one-time burden of 1,611 hours,[246] at a cost of $506,391,[247] to comply with the amended disclosure requirements of Form N-MFP. Amortizing these hourly and cost burdens over three years results in an average annual increased burden for all money market funds of 537 hours[248] at a cost of $168,797.[249] There will be no external costs associated with complying with the amended disclosure requirements of Form N-MFP.[250]

The current approved collection of information for Form N-MFP is 83,412 annual aggregate hours and $4,780,736 in external costs. The aggregate additional hours associated with the amendments to Form N-MFP increase the burden estimate to 83,949 hours annually for

---

245 This estimate is based on a review of reports on Form N-MFP filed with the Commission for the month ended April 30, 2015. The Proposing Release PRA statement was based on data as of February 28, 2014. We have updated the estimates used in this final PRA to reflect more current data as of April 30, 2015.

246 This estimate is based on the following calculation: 3 hours x 537 money market funds = 1,611 hours.

247 This estimate is based on the following calculation: $943 x 537 money market funds = $506,391.

248 This estimate is based on the following calculation: 1,611 hours ÷ 3 years = 537 hours.

249 This estimate is based on the following calculation: $506,391 ÷ 3 years = $168,797.

250 We understand that a certain percentage of money market funds that report information on Form N-MFP license a software solution from a third party that is used to assist the funds to prepare and file the required information, and that a certain percentage of money market funds retain the services of a third party to provide data aggregation and validation services as part of the preparation and filing of reports on Form N-MFP. *See* 2014 Money Market Fund Adopting Release, *supra* note 6, at text accompanying nn.2334-2336.

We recognize that, in general, software service providers that modify their software may incur additional external costs, which they may pass on to money market funds in the form of higher annual licensing fees. *See id.* at text accompanying n. 2340. However, on account of the relatively low per-fund one-time hour burden that we estimate in connection with the amended disclosure requirements of Form N-MFP, we expect that any increase in licensing fees will be insignificant, and thus we estimate that there are no external costs associated with the amended Form N-MFP disclosure requirements.

all funds.[251] Because we estimate no external costs associated with complying with the amended Form N-MFP disclosure requirements, the annual external costs associated with the Form N-MFP collection of information would remain $4,780,736.

V. ECONOMIC ANALYSIS

As discussed above, we are adopting amendments to rule 2a-7 and Form N-MFP under the Investment Company Act to implement Section 939A of the Dodd-Frank Act, which requires the Commission, to "review any regulation issued by [the Commission] that requires the use of an assessment of the credit-worthiness of a security or money market instrument; and any references to or requirements in such regulations regarding credit ratings."[252] That section further provides that the Commission shall "modify any such regulations identified by the review . . . to remove any reference to or requirement of reliance on credit ratings and to substitute in such regulations such standard of credit-worthiness as [the Commission] shall determine as appropriate for such regulations."[253]

We are also amending rule 2a-7 to eliminate the exclusion to the issuer diversification requirement for securities subject to a guarantee issued by a non-controlled person. As a result, most non-government securities subject to a guarantee (including an asset-backed security with a presumed sponsor guarantee) will have to comply with both the 5 percent diversification requirement for issuers (including SPE issuers) and the 10 percent diversification requirement for

---

[251] This estimate is based on the following calculation: 83,412 hours (current approved burden) + 537 hours = 83,949 hours.

[252] Pub. Law 111-203, Sec. 939A(a)(1)-(2). Section 939A of the Dodd-Frank Act applies to all federal agencies.

[253] Pub. Law 111-203, Sec. 939A(b). Section 939A of the Dodd Frank Act provides that agencies shall seek to establish, to the extent feasible, uniform standards of creditworthiness, taking into account the entities the agencies regulate and the purposes for which those entities would rely on such standards.

guarantors and providers of demand features.[254]

The economic baseline for our economic analysis is the regulatory framework as it exists immediately before the adoption of these amendments, that is, the regulatory framework after the amendments to rule 2a-7 were adopted in the 2014 Money Market Fund Adopting Release. As discussed in more detail below, that release makes material changes to rule 2a-7 that we believe may result in material changes to the money market fund industry. Because there is an extended compliance period for those amendments, and we are not aware of any funds that are already complying with all of the amendments, we do not know how market participants, including money market fund managers selecting portfolio securities, may react as a result. Thus, we are not able to provide quantitative estimates for the incremental effects of this rule's amendments. For example, under the baseline, institutional prime money market funds have floating NAVs and maintain the distinction between first and second tier securities. We are unable to estimate how institutional prime funds will choose to allocate their portfolios among first and second tier securities under our amendments when they have floating NAVs and no commenters provided any estimates. We discuss potential economic effects of complying with the amendments to the rule, but without knowing how fund portfolio allocations may change we cannot quantify these potential effects. For the remainder of our economic analysis, we discuss separately the rule 2a-7 amendments to remove and replace ratings references, Form N-MFP amendments, and the amendments to rule 2a-7's issuer diversification provision.

A. Rule 2a-7: Ratings Removal and Related Amendments

[254] As discussed above, the asset-backed security presumed guarantee is counted toward the 10% limitation on guarantees and demand features provided by the same institution. Up to 15% of the value of securities held in a tax-exempt money market fund's portfolio may be subject to guarantees or demand features from a single institution, and up to 25% of the value of securities held in a single state money market fund portfolio may be issued by any single issuer. *See supra* section II.F.

The amendments to rule 2a-7 will affect five elements of the current rule. These are: (i) determination of whether a security is an eligible security; (ii) determination of whether a security is a first tier security; (iii) credit quality standards for securities with a conditional demand feature; (iv) requirements for monitoring securities for ratings downgrades and other credit events; and (v) stress testing.[255] The amendments are designed to remove any requirement of reliance on credit ratings and to substitute standards of creditworthiness that we believe are appropriate.

1. Economic Baseline

As discussed above, the current credit risk limitations in rule 2a-7 require that money market funds undertake a two-step analysis before acquiring a portfolio security.[256] First, funds must determine whether a security has received credit ratings from the "requisite NRSROs" in one of the two highest short-term rating categories or, if the security is unrated, determine that it is of comparable quality. A money market fund must currently invest at least 97 percent of its portfolio in first tier securities, which are eligible securities that have received a rating from the requisite NRSROs in the highest short-term rating category for debt obligations, or unrated securities of comparable quality. Second, the fund's board of directors (or its delegate) must determine that the security presents minimal credit risks, based on factors pertaining to credit quality in addition to any rating assigned to such securities by a designated NRSRO. In addition, under current rule 2a-7, a security subject to a conditional demand feature may be determined to

---

[255] The final rule will also make conforming amendments to rule 2a-7's recordkeeping and reporting requirements. *See* rule 2a-7(h)(3).

[256] *See supra* note 25 and accompanying and preceding text. The credit risk limitations of current rule 2a-7, as well as the other specific provisions of current rule 2a-7 that reference credit ratings, were not changed by the adoption of the amendments discussed in the 2014 Money Market Fund Adopting Release.

be an eligible security or a first tier security if, among other conditions: (i) the conditional demand feature is an eligible security or a first tier security, and (ii) the underlying security (or its guarantee) has received either a short-term rating or a long-term rating,as the case may be, within the highest two categories from the requisite NRSROs or is a comparable unrated security.

Based on Form N-MFP filings from April 30, 2015, the Commission estimates that 98.26 percent of aggregate money market fund assets are in first tier securities, 0.14 percent of aggregate money market fund assets are in second tier securities, and 1.6 percent of aggregate money market fund assets are in unrated securities. Among the 537 funds that filed Form N-MFP that month, 412 funds reported that they held only first tier securities, 477 funds reported that they held no second tier securities, and 447 funds reported that they held no unrated securities. In addition, less than 4 percent of all money market funds held the maximum amount of second tier securities permitted under current rule 2a-7. Using additional data from the Federal Reserve Board, we estimate that money market fund holdings of second tier commercial paper represent 0.9 percent of the outstanding issues of second tier commercial paper.[257]

Securities subject to a conditional demand feature are typically variable rate demand notes issued by municipalities that have a conditional demand feature issued by a bank. Based on Form N-MFP filings as of April 30, 2015, the Commission estimates that 9.3 percent of money market fund assets are invested in securities with a demand feature. We estimate further that securities with conditional demand features represent 3.9 percent of securities with demand

[257] This data is based on the Federal Reserve Board's statistics on outstanding volume of commercial paper as of April 30, 2015. *See* Commercial Paper Outstanding by special categories,*a vailable at* http://www.federalreserve.gov/releases/cp/outstanding.htm. The Proposing Release used earlier data from this website. We have updated the figures used in this final rule analysis to reflect more current data as of April 30, 2015.

features and 0.4 percent of all securities held by money market funds. We further estimate that 77 percent of those underlying securities (or their issuers or guarantors) have received an NRSRO rating in the second-highest long-term rating category, while 23 percent have received an NRSRO rating in the highest long-term category.[258]

Rule 2a-7 currently requires a money market fund board (or its delegate) to promptly reassess whether a security that has been downgraded by an NRSRO continues to present minimal credit risks.[259] We understand that downgrades are rare among money market fund portfolio securities.[260] As discussed above, we believe, based on staff experience, that most, if not all, money market funds currently monitor portfolio securities for minimal credit risk on an ongoing basis.[261] We assume for purposes of this analysis, however, that these funds do not have written policies and procedures that specifically address ongoing minimal credit risk monitoring.

Finally, rule 2a-7 currently requires money market funds to stress test their portfolios.[262] Under the rule, a money market fund's board of directors must adopt written procedures to test the ability of a fund to maintain at least 10 percent of its total assets in weekly liquid assets and minimize principal volatility (and, in the case of a money market fund using the amortized cost

---

258 An underlying long-term security would become a short-term security when its remaining time to maturity is less than 397 days. *See supra* note 94. These estimates are based on a random sample of 10% of the securities that have demand features that were reported in April 2015 Form N-MFP filings.

259 *See supra* note 111 and accompanying text.

260 *See, e.g.*, Response to Questions Posed by Commissioners Aguilar, Paredes, and Gallagher, a report by staff of the Division of Risk, Strategy, and Financial Innovation (Nov. 30, 2012), *available at* http://www.sec.gov/news/studies/2012/money-market-funds-memo-2012.pdf, at 14-16 (discussing events such as credit rating downgrades that have led money market fund sponsors to choose to provide support to the fund or to seek staff no-action assurances permitting such support). Staff continues to monitor credit rating downgrades among portfolio securities and other issues concerning money market funds through the monthly information provided on Form N-MFP.

261 *See supra* note 116 and accompanying text.

262 Current rule 2a-7(g)(8).

method of valuation or penny rounding method of pricing, the fund's ability to maintain a stable price per share) based on certain hypothetical events, including a downgrade or default of particular portfolio security positions, each representing various portions of the fund's portfolio. We believe that funds stress test at least monthly.[263]

2. Economic Analysis

The amendments to rule 2a-7 will assist in further implementing Section 939A of the Dodd-Frank Act. They are designed to establish credit quality standards similar to those currently in the rule. By replacing references to credit ratings, the amendments will, particularly when considered together with other amendments the Commission has adopted that remove credit ratings references in other rules and forms under the federal securities laws, contribute to the Dodd-Frank Act goals of reducing perceived government endorsement of NRSROs and over-reliance on credit ratings by market participants.[264]

i. Eligible securities

Under the final rule, a money market fund board (or its delegate) will be required to determine minimal credit risk by applying certain credit quality factors. Because the application of these factors may differ among fund boards and their advisers, the possible range of securities available for investment may differ from that under the current rule. However, inclusion of the credit analysis factors in the rule, as opposed to the more subjective standard in the proposed rule, should limit this range by helping to make compliance more uniform across money market funds. The final rule also clarifies that, when making minimal credit risk determinations, the fund's board (or its delegate) should consider the contribution of the security to aggregate credit

---

263 *See* 2014 Money Market Fund Adopting Release, *supra* note 6, at section IV.A.5.

264 *See* 2014 Money Market Fund Adopting Release, *supra* note 6, at n.202 and accompanying text.

risks and not just evaluate the security in isolation. In particular, a potential addition to the portfolio that has low risk by itself might increase portfolio risk to unacceptable levels if it is sufficiently correlated with the overall portfolio. For example, a security that has a very low probability of default might be inappropriate for the fund if that security is likely to default at the same time as other securities in the fund's portfolio.

In addition, we believe that fund managers are generally unlikely to increase exposure of their funds to riskier second tier securities in light of both current market practices and amendments to rule 2a-7 adopted in the 2014 Money Market Fund Adopting Release.[265] First, we anticipate that many money market funds, particularly those that are themselves rated, are likely to retain their current investment policies, which incorporate NRSRO ratings and would be permitted under the rule amendments. Indeed, we understand that many funds today have investment policies that are more restrictive than rule 2a-7 requires, including policies that, for example, limit investments to first tier securities.[266] As a result, we do not expect that these

---

265 *See, e.g.,* 2010 Money Market Fund Adopting Release, *supra* note 84, at section II.A.1 (discussing tradeoff between risk and yield for second tier securities). We do not believe fund managers are likely to invest in securities rated below the second highest short-term rating category of an NRSRO (or comparable unrated securities) because those securities would not satisfy the standard for eligible securities that the security present minimal credit risks to the fund. See discussion *infra* section V.2.ii.

266 As of February 2014, 179 money market funds, representing approximately 59% of all money market fund assets (88% of all institutional money market fund assets) were themselves rated by credit rating agencies, and approximately 98% of rated money market funds were rated in the top credit quality category by an NRSRO. For a money market fund to receive this top rating, credit rating agencies generally require the fund to limit its portfolio securities to first tier securities. *See, e.g.*, FitchRatings, Global Money Market Fund Rating Criteria (Mar. 26, 2013),*a vailable at* http://www.fitchratings.com/creditdesk/reports/report_frame.cfm?rpt_id=704145 (registration required) (stating that its "AAAmmf" top rating requires that a money market fund have 100% of its portfolio securities rated first tier ("F1+" or "F1")); Standard & Poor's, Methodology: Principal Stability Fund Ratings (Jun. 8, 2011), *available at* https://www.sbafla.com/prime/portals/8/RiskMan_Oversight/FundProfile/201106_SPPrincipalStabilityFundRatingsMethodology.pdf (stating that "[i]n order for a fund to be eligible for an investment-grade rating, all investments should carry a Standard & Poor's short-term rating of 'A-1+' or 'A-1' (or SP-1+ or SP-1), or Standard & Poor's will consider all of the investments to be

money market funds will change current policies and procedures they have adopted that limit their investments to those assigned the highest NRSRO ratings. We also noted above that according to Form N-MFP filings from April 30, 2015, fund assets in second tier securities represented 0.14 percent of total money market fund assets and that 18 funds (out of a total of 537) currently hold the maximum amount of second tier securities permissible under current rule 2a-7. We do not anticipate that money market funds representing the significant majority of assets under management are likely to increase substantially their investments in riskier securities as a result of our rule because these funds do not currently invest in second tier securities to the extent permitted now.

Second, as discussed above, the 2014 amendments to rule 2a-7 should reduce the potential that funds will invest in riskier securities. Under the 2014 reforms, money market funds other than government money market funds are allowed to impose fees and gates, while institutional prime money market funds will be required to transact at a floating NAV.[267] We believe that those reforms may encourage non-government funds to more closely monitor fund liquidity and hold more liquid securities to increase the level of daily and weekly liquid assets in the fund to lessen the likelihood of needing to impose a fee or gate. These newly adopted money market fund reforms also require each fund to disclose daily its market value rounded to four decimal points (or an equivalent level of accuracy for a fund using a share price other than $1.0000[268]) and to depict historical information about its daily NAV for the previous six months. These disclosures may increase informational efficiency by allowing investors to see variations

of equivalent credit quality").

267 Rule 2a-7(a)(14) defines a government money market fund as a money market fund that invests 99.5% or more of its total assets in cash, government securities, and/or repurchase agreements that are collateralized fully.

268 Rule 2a-7(h)(10)(iii).

in share value that are not apparent in the current share price and compare the volatility of share values among funds over time. As a result, to the extent that institutional investors continue to value price stability and can see these variations in share value, we believe that institutional prime funds will endeavor to reduce NAV fluctuations.

Third, under the final rule funds are permitted to refer to credit ratings while making their minimal credit risk determinations. A credit rating in the top short-term credit quality category by an NRSRO might help support the fund's determination that the security is an eligible security, while a credit rating in a lower category might not support the same determination. Thus, fund managers may have to perform additional credit research and analysis on the issuers of second tier securities in order to determine whether the investment is permitted under the adopted amendments. We believe that many fund managers may not wish to invest in the additional resources necessary to make this assessment with respect to second tier securities unless the fund believes that the expected risk-adjusted return of doing so would be greater than the expected costs. Thus, the demand for securities rated second tier will likely be lower.

The final rule would eliminate the current limitations on fund investments in second tier securities.[269] As a result, funds may increase their holdings of second tier securities despite the considerations discussed above. Commenters on the 2014 Proposing Release were mixed in their opinions as to whether the proposed changes would have this effect. Some believed that the standard proposed would appropriately limit funds' purchases of riskier securities,[270] while others thought that it would not.[271] The Commission believes that the changes to the proposed standard

269 *See supra* note 30 and accompanying text and note 62.

270 *See, e.g.,* Invesco Comment Letter; MFDF Comment Letter.

271 *See, e.g.,* BlackRock Comment Letter; CFA Comment Letter; Vanguard Comment Letter.

made in this final rule should reduce the likelihood of increased credit risk because funds will have to perform a rigorous analysis using the codified factors and consider a security's potential addition to the aggregate risk of the portfolio. We also believe that, to the extent money market funds increase investments in riskier securities, institutional prime funds are more likely than stable-NAV funds to do so because stable-NAV funds will need to maintain stability to avoid falling below $1 per share. Although some shareholders may continue to value price stability more than yield from institutional prime funds, if enough shareholders value yield more than price stability, institutional prime funds will be incentivized to increase their investments in second tier securities. Allocative efficiency may improve if such preferences result in relatively riskier securities moving from the portfolios of stable NAV funds to the portfolios of institutional prime funds, allowing money market fund shareholders to choose funds that better match their preferences for risk and return. We do not, however, know whether institutional prime funds with floating NAVs, which will have to compete with other money market funds, including stable-NAV government funds, will focus on maintaining comparatively stable NAVs or on generating comparatively high yields.

If we were to assume that money market funds increase their relative holdings of second tier securities with the adoption of the amendments, the effects on competition and capital formation would depend, in part, on whether the increased demand for second tier investments comes from new assets that investors bring to money market funds, which are then disproportionately invested in second tier securities, or whether the increased second tier investments would come from a shift of existing money market fund assets from first tier securities to second tier securities. If the former, the effects on competition between issuers of first and second tier securities might be small, and capital formation might improve in the second tier market as the size of the new investment increases. If the latter, an increase in capital formation from issuers of second tier securities may result in a corresponding decrease in capital formation from issuers of first tier securities, which, in turn, may lead to increased competition between issuers of first and second tier securities. We are unable to estimate these effects because we do not know how shareholders and funds will respond to the elimination of the current limitation on fund investments in second tier securities and no commenters provided any estimates.

The amendments to Form N-MFP, which are discussed in more detail below, may make it easier for fund shareholders and other third parties to monitor the level of credit risk borne by funds that use credit ratings. As a result, this increased transparency may reduce the likelihood that fund boards (or managers) increase significantly fund investments in second tier securities. We are requiring each money market fund to disclose on Form N-MFP those NRSRO ratings the fund's board (or its delegate) has considered, if any, in determining whether a security presents minimal credit risks.[272] The disclosure to investors of these ratings may have the effect of reducing the demand for funds that assume a level of risk that is different from that which is desired by their shareholders.

As discussed above, the vast majority of money market funds held no second tier securities on April 30, 2015, and few funds held the maximum permissible 3 percent. We therefore believe that a reduction or even elimination of second tier securities from the money market fund industry's aggregate portfolio will not likely have a material effect on issuers of

[272] Because the fund may only choose to consider one or two ratings, the specific rating or ratings disclosed by a fund on Form N-MFP may not always be indicative of the overall universe of ratings for that security. However, investors who wish to have a larger sample may choose to subscribe to other ratings themselves.

either first or second tier securities. However, removing second tier securities from the portfolios of individual money market funds may negatively affect yields in certain funds, especially during periods when second tier securities offer substantially higher yields than the yields offered by first tier securities.

We believe that most money market funds are not likely to change their current investment policies in response to the adopted amendments. Nevertheless, we recognize that some fund boards might choose not to consider NRSRO ratings in their credit assessments or as noted above, fewer securities may be rated. If, as a result, the demand for NRSRO ratings were significantly reduced, NRSROs might invest less in producing quality ratings. The importance attached to NRSRO ratings currently as a result of the history of their use in regulatory requirements may impart franchise value to the NRSRO rating business. By eliminating references to NRSRO ratings in federal regulations, Section 939A of the Dodd-Frank Act could reduce these franchise values and reduce NRSROs' incentives to produce credible and reliable ratings. If the quality and accuracy of NRSRO ratings were adversely affected, yet the ratings continued to be used by enough other parties, the capital allocation process and economic efficiency might be impaired as investors make investment decisions using lower-quality information.

Conversely, the removal of ratings requirements in Commission rules may enhance incentives for NRSROs to produce credible and reliable ratings, in order to remain competitive, maintain revenue, and protect franchise value. In addition, certain industry commenters on the 2014 Proposing Release expressed support for the continued use of ratings as a tool in determining creditworthiness.[273] Thus, we believe that a large majority of institutional money

[273] *See* IDC Comment Letter; Invesco Comment Letter; MFDF Comment Letter.

market funds will continue to consider credit ratings in their evaluation of securities, at least as a screening measure, and will continue to be rated themselves. To the extent that funds continue to use ratings, which we believe most will, investors would be able to determine the ratings, and the extent to which funds are considering those ratings, of fund portfolio securities from the disclosures required under the amendments to Form N-MFP. Consequently, we believe it is unlikely that the capital allocation process and economic efficiency will be materially impaired.

The Proposing Release provided the credit analysis factors as guidance, rather than in rule text, and required that the fund make a finding that the issuer of a security had an "exceptionally strong capacity" to meet its short-term financial obligations.[274] Because the final rule is largely codifying the analysis that the staff believes money market fund managers currently take into account, as discussed above,[275] the economic analysis for this final rule is similar to that of the proposed rule. In this adopting release, we have incorporated into the rule credit analysis factors, as well as providing asset-specific factors as guidance. As we noted in the discussion above, based on staff observations in examinations and prior staff guidance, we believe that most money market fund managers currently take these factors into account, as appropriate, when they determine that a portfolio security presents minimal credit risks. Moreover, the factors listed in the rule are to be considered "to the extent appropriate"[276] and are not intended to rigidly define the parameters of an appropriate credit quality assessment; that is for the fund's board and its adviser to determine with respect to each particular security and the fund's overall risk profile. Thus, we do not anticipate that the rule's inclusion of factors that a

---

274 *See* proposed rule 2a-7(a)(11).

275 *See supra* section IV.A.1.

276 Rule 2a-7(a)(11).

fund manager should consider will significantly change the process for evaluating credit quality or that consideration of the factors listed in the rule and discussed in the release will significantly affect the holdings in money market fund portfolios. For these reasons, we continue to believe that the factors will not have a material effect on efficiency, competition, or capital formation. Funds may, however, consider whether their policies and procedures for credit quality assessment should be revised in light of the factors as codified, and, as a result, may need to update them.

Finally, we note that Commission staff engages in ongoing monitoring of money market fund risks and operations, through review of Form N-MFP filings, examinations, and other outreach efforts, and provides regular updates to the Commission about relevant issues. As part of these ongoing monitoring efforts, the staff also will undertake to study and report to the Commission no later than 3 years following the adoption of these amendments to rule 2a-7 and Form N-MFP the impact of these amendments on capital formation and investor protection. The study will include, but not be limited to, a review of any changes in the risk profile of money market fund portfolio security investments during the period studied and whether any additional measures, including further investor protections, may be necessary.

ii. Conditional Demand Feature

The final rule provides the same credit quality standard for securities with a conditional demand feature as for other portfolio securities. The fund's board (or its delegate) must determine that a security with a conditional demand feature presents minimal credit risks to the fund. We do not believe that fund managers will likely interpret this standard in a manner that results in funds increasing the risk profiles of their underlying securities. First, as discussed above, we do not believe that securities that are rated by NRSROs in the third-highest category for long-term ratings (or comparable unrated securities) would satisfy the standard that underlying securities present minimal credit risks to the fund. We also note that funds currently can invest exclusively in underlying securities rated in the second-highest category if the instrument meets the other conditions for eligibility.[277] We estimate that most underlying securities held by money market funds (77 percent) are rated in the second-highest long-term category, and a smaller portion (23 percent) are rated in the highest long-term category.[278] For these reasons, we do not currently anticipate that funds are likely to increase the portion of their underlying securities that are rated in the second-highest long-term category as a result of the adopted amendments since these funds do not currently invest in these securities to the extent permitted under existing rules.

For the reasons explained above, and because the minimal credit risk standard is largely the same as what we understand that many funds apply now, and also the same as will be required for all eligible portfolio securities, we believe that our rule will result in only small changes to the practices of funds with respect to investments in securities with conditional demand features. In addition, the elimination of the "very strong capacity" standard presented in the proposal should result in little or no change to this analysis, as discussed above.[279] Thus, we continue to believe that the conditional demand feature provision will result in little or no effect on efficiency, competition, or capital formation for either funds or issuers.

As discussed above, we believe that the amendments to rule 2a-7 will cause money market fund complexes to incur certain costs in reviewing and updating their policies and

---

277 Current rule 2a-7(d)(2)(iv).

278 *See supra* note 258 and accompanying text.

279 *See supra* section IV.A.1.

procedures. Specifically, each complex is likely to review the amendments to the credit quality standards in rule 2a-7 and, as it determines appropriate in light of the amendments, revise its policies and procedures to incorporate the amended credit quality evaluation method to be used in determining the eligibility of a money market fund's portfolio securities, including securities that are subject to a conditional demand feature.

iii. Ongoing Monitoring of Minimal Credit Risk

The Commission is adopting the ongoing monitoring provision as proposed. As discussed above, we believe that the requirement that each money market fund adopt written policies and procedures for ongoing monitoring of minimal credit risks for each portfolio security essentially codifies the current practices of fund managers.[280] Although based on staff experience we believe that most, if not all, money market funds currently monitor portfolio securities for minimal credit risk on an ongoing basis (as rule 2a-7 requires[281]), we note that money market funds are not currently required to maintain written policies and procedures that specifically address monitoring. We believe that to the extent that some money market funds may not have written procedures to regularly monitor minimal credit risks, our provision to require such procedures is designed to ensure that funds are better positioned to identify quickly potential risks of credit impairment that could impact portfolio security prices. The costs associated with the minimal credit risk monitoring requirement, as discussed above, will vary based on the extent to which funds' existing procedures need to be transcribed and reviewed.[282] We continue to believe that the requirement for written procedures in the final rule will not materially affect efficiency, competition, or capital formation because we expect no material

280 *See supra* section II.C.

281 *See id.*

282 *See supra* note 226 and accompanying text.

changes in how funds invest.

iv. Stress Testing

The Commission is adopting the stress testing provision as proposed. As discussed above, the amendments are designed to retain similar standards for stress testing as under current rule 2a-7. Specifically, the amendments will remove the current reference to ratings downgrades in the rule 2a-7 stress testing requirement, and instead require funds to test for an event indicating or evidencing credit deterioration of particular portfolio security positions, with a downgrade or default provided as examples of such an event. Consequently, we recognize that a money market fund could use its current policies and procedures for stress testing, including testing for a downgrade, to comply with the amendments. We believe that funds will do so because a downgrade by a relevant NRSRO may impact the price of a portfolio security.[283] Commenters on the stress testing provision of the Proposing Release were uniformly supportive of this approach,[284] and one specifically stated that the amendments would not significantly change the substance of current stress tests.[285] We believe this provision thus provides a clear benefit by reducing any perceived endorsement of NRSRO ratings. Because we believe that funds will not change their stress testing policies and procedures in response to these amendments, we also believe there will be little or no costs associated with them.[286] Thus we do not anticipate that these amendments are likely to affect efficiency, competition, or capital formation.

285 *See* MFDF Comment Letter.

286 *See supra* note 236 and accompanying text.

v. Policies and Procedures

As discussed above, money market funds have written policies and procedures for complying with rule 2a-7, including policies and procedures for determining and reassessing minimal credit risk and for stress testing the portfolio.[287] Although our final rule should not require changes to these policies and procedures for most money market funds, we anticipate that funds will likely review them and may revise them in consideration of the uniform credit quality standard provided in the rule. We also anticipate that after such a review, many fund boards and advisers will retain investment policies that reference NRSRO ratings.[288] Although we cannot predict the number of funds that will review and revise their policies and procedures or the extent to which funds may do so, we estimate that each fund will incur, at a minimum, the collection of information costs discussed in the Paperwork Reduction Act section for a total average one-time cost of approximately $2,838 per fund complex.[289] These minimum costs assume that a fund will review its policies and procedures in consideration of the amendments and make minor changes to conform with the revised rule text, but will not change significantly the policies and procedures relating to the fund's credit quality assessments, monitoring for minimal credit risk or stress testing, which currently include consideration of NRSRO ratings.

As noted above, we believe that while funds currently monitor for minimal credit risks on

287 *See* rule 38a-1(a); rule 2a-7.

288 *See supra* note 213 and accompanying text. We also note that most commenters on the 2011 proposal supported permitting funds to continue to use ratings, and some asked us to clarify that ratings continue to be a permissible factor for boards or their delegates to consider in making credit quality determinations. *See, e.g.*,2 011 Comment Letter of BlackRock Inc. (Apr. 25, 2011) ("2011 BlackRock Comment Letter"); Comment Letter of the Independent Directors' Council (Apr. 25, 2011). Commenters on the 2014 proposal continued to stress the usefulness of credit ratings. *See* IDC Comment Letter; Invesco Comment Letter; MFDF Comment Letter. Our amendments to Form N-MFP, discussed above, reflect our clarification that ratings continue to be a permissible tool to use in making credit quality determinations.

289 *See supra* note 218.

an ongoing basis, we assume that funds do not have written policies and procedures to address monitoring.[290] We estimate the average one-time costs to adopt those written policies will be $3,619 per fund.[291] Because we anticipate that our rule is not likely to change these fund policies significantly, we believe it is not likely to have a significant impact on efficiency, competition, or capital formation.

3. Alternatives

The Commission chose not to adopt certain credit quality standards and requirements from the Proposing Release. First, the proposed rule would have required that a portfolio security not only present minimal credit risks, but also that its issuer has an "exceptionally strong capacity" to meet its short-term financial obligations.[292] As many commenters suggested,[293] we now believe that this determination could create an unclear standard for determining eligible securities that might change the current credit quality profile of money market funds, possibly creating risk profiles in money market funds that are even more stringent than the current rule provides for, as the discussion above details.[294] We believe that the rulemaking goal associated with this aspect of the proposal of ensuring that only very high quality securities are purchased by money market funds is more effectively carried out instead by the second change we have made from the proposed rule, the codification of the general credit analysis factors.[295]

The Proposing Release provided two lists of credit analysis factors for use in determining

---

290 *See supra* notes 116 and 226 and accompanying text.

291 *See supra* note 228.

292 Proposed rule 2a-7(a)(11).

294 *See supra* section II.A.

295 Rule 2a-7(a)(11).

whether a security presented only minimal credit risks to a fund.[296] The first was a list of general factors for use with any security, and the second was an asset-specific list. The final rule incorporates the list of general factors into the rule text, and we discuss in this release the asset-specific list as guidance.[297] As discussed above,[298] we believe that codifying the general factors will help provide a uniform and objective check on credit risk that can be verified by our examiners. We also believe that incorporating these factors into the rule text will further promote effective and uniform application of the risk standard. These two changes together, elimination of the "exceptionally strong capacity" language and codification of the factors, should help to ensure that the rule will maintain the current risk characteristics of money market funds and thus is not likely to have a significant effect on efficiency, competition, or capital formation.

In addition to the changes to the primary risk standard, the final rule also changed the risk standard for securities with conditional demand features.[299] The proposed rule would have required that the issuer of the underlying security or the provider of a conditional demand feature have a "very strong" capacity to meet its financial obligations.[300] As with the proposed "exceptionally strong capacity" standard, some commenters felt that this standard could be interpreted very differently by different funds.[301] In order to reduce confusion and preserve a

---

296 Proposing Release, *supra* note 3, at 47991-47993.

297 The general factors have also been amended based on comments received, with one new factor added. *See* rule 2a-7(a)(11). We chose not to codify the asset-specific factors. *See supra* section II.A.2.

298 *See supra* section II.A.2.

299 *See* rule 2a-7(d)(2)(iii).

300 *See* proposed rule 2a-7(d)(2)(iii).

301 *See, e.g.,* Dreyfus Comment Letter; Fidelity Comment Letter. Some commenters also felt that the need to apply two different standards would add to compliance costs without providing benefits

similar degree of credit quality to that currently present in fund portfolios, the Commission determined instead to require that the issuer of the underlying security and the provider of the conditional demand feature meet the same "minimal credit risks" standard.

In developing this final rule, we also considered changes consistent with the amendments we proposed in 2011. The 2011 proposal would have required fund boards first to determine whether securities are eligible securities based on minimal credit risks, and second to distinguish between first and second tier securities based on subjective standards similar to those the ratings agencies have developed to describe their ratings. However,we were persuaded by the concerns some commenters expressed on the 2011 proposal,[302] and did not adopt these alternatives. In particular, as several commenters noted, a two-tier approach could be confusing without reference to objective standards, and fund advisers are likely to make many of the same considerations in evaluating first and second tier securities.[303] In addition, we believe that the adopted single standard will better reflect the risk limitation in the current rule. The 2011 proposal described the standard for second tier securities in language similar to the descriptions NRSROs use for second tier securities, which fund managers might interpret as permitting funds to invest in riskier second tier securities to a greater extent than under our final rule, which is designed to limit investments to very high quality second tier securities. Such increased investments in riskier second tier securities would have had the potential to increase the risk profile of money market funds.

The two industry commenters on the 2014 proposal who discussed the elimination of the

---

in improving credit quality. *See, e.g.,* Dreyfus Comment Letter; ICI Comment Letter; IDC Comment Letter.

302 *See* Proposing Release, *supra* note 3, at 47988-47989.

303 *See id.*

first and second tier distinction supported it.[304] However, two other commenters expressed concern that removal of the distinction and the limit on second tier securities could lead to funds purchasing more risky securities.[305] As discussed above,[306] we believe that the codification of the credit analysis factors in the final rule, combined with market discipline and staff oversight of required N-MFP disclosures, should reduce this possibility.

The two-tier approach discussed above could have had different effects on competition and capital formation than the effects on competition and capital formation stemming from the adopted approach, as a result of ensuing increased or decreased investments in second tier securities. However, we are unable to estimate the relative effects on competition or capital formation because we do not know how shareholders and funds would respond to this approach as compared to the final rule, and no commenters provided any estimates.

With respect to replacing the reference to ratings in determining the eligibility of underlying securities (*i.e.,* those that are subject to a conditional demand feature), we considered a qualitative standard that NRSROs use to articulate long-term securities in the highest rating category. We note generally that few issuers or guarantors have received long-term ratings in the highest category.[307] Moreover, issuers assigned a short-term credit rating in the top category by an NRSRO may have received a long-term rating in the second-highest (or lower) category.[308]

---

304 *See* Fidelity Comment Letter; MFDF Comment Letter.

305 *See* Better Markets Comment Letter; CFA Comment Letter.

306 *See supra* section II.A.2.

307 *See* Vipal Monga & Mike Cherney, *CFO Journal: Lose your Triple-A Rating? Who Cares?,* WALL ST. J. (Apr. 29, 2014) (noting the decline in companies with triple A long-term ratings).

308 *See* Moody's Investors Service, Rating Symbols and Definitions, Apr. 2014, https://www.moodys.com/researchdocumentcontentpage.aspx?docid=PBC_79004, at 6 (showing the linkage between short-term and long-term ratings when such long-term ratings exist and indicating that long-term ratings of "A3" or higher are compatible with the highest short-term rating of "P-1"); Standard &Poor's, About Credit Ratings (2012),

Because of the limited NRSRO assignments of the highest long-term ratings to issuers, managers might have interpreted this alternative to preclude fund investments in a security subject to a conditional demand feature (that is itself an eligible security) if the underlying security's issuer or guarantor is rated in the second-highest category. Such an interpretation could significantly deviate from the credit quality standards in the current rule, which was not our intent. It also would likely reduce money market fund investments in these securities.

In choosing to eliminate the current reference to ratings downgrades in the monitoring standard of rule 2a-7, we considered the rule 2a-7 amendments that we proposed in 2011.[309] These proposed amendments would have required that, in the event the money market fund adviser (or any person to whom the board has delegated portfolio management responsibilities) becomes aware of any credible information about a portfolio security or an issuer of a portfolio security that suggests that the security is no longer a first tier security or a second tier security, as the case may be, the board or its delegate would have to promptly reassess whether the security continues to present minimal credit risks.[310] Most of those who commented on this proposed amendment objected to it as an inefficient method of notifying funds if a portfolio security is potentially impaired. We were persuaded by these commenters' concerns.[311]

---

http://www.standardandpoors.com/aboutcreditratings/RatingsManual_PrintGuide.html (each short-term rating corresponds to a band of long-term ratings. "For instance, the A-1 short-term rating generally corresponds to the long-term ratings of 'A+,' 'A,' and 'A-'."); FitchRatings, Ratings Definitions (2014), https://www.fitchratings.com/jsp/general/RatingsDefinitions.faces?context=5&detail=507&context_ln=5&detail_ln=500 (indicating the relationship between short-term and long-term ratings with a table and acknowledging that "lower relative short-term default risk, perhaps through factors that lend the issuer's profile temporary support, may coexist with higher medium-or longer term default risk").

309 *See* 2011 Proposing Release, *supra* note 4, at section II.A.3.

310 *Id.*

311 *See* 2014 Proposing Release, *supra* note 3, at section II.A.3.

Finally, we also considered removing the current reference to ratings downgrades in the stress testing provisions of rule 2a-7 and replacing this reference with the requirement that money market funds stress test their portfolios for an adverse change in the ability of a portfolio security issuer to meet its short-term credit obligations. We had proposed this alternative in 2011, and commenters on the 2011 proposal who addressed this issue uniformly advocated against removing the reference to a downgrade in the stress testing conditions.[312] We believe that the 2011 proposed standard, as compared to the standard we are adopting today, was less clear and that it would lead to more burdensome monitoring and greater inefficiencies in developing hypothetical events for stress testing. In light of these commenters' concerns, we thus decided to adopt stress testing provisions in rule 2a-7 that would permit funds to continue to test their portfolios against a potential downgrade or default, as discussed in more detail above.[313] As also discussed above, commenters uniformly supported this provision.[314]

Form N-MFP

The final rule's amendments to Form N-MFP will require money market funds to disclose NRSRO ratings that they use in their evaluations of portfolio securities. Specifically, a fund will have to disclose for each portfolio security any NRSRO rating that the fund's board of directors (or its delegate) considered in making its minimal credit risk determination, as well as the name of the agency providing the rating. NRSRO ratings provide one indicator of credit risk of a fund's portfolio securities and, as discussed above, we anticipate that they will continue to be considered by many money market fund managers in performing credit quality assessments.

---

312 We had proposed this alternative in 2011 and received comments on it at that time. *See id,* section II.A.4.

313 *See supra* section V.A.2.iv.

314 *See supra* notes 284-285 and accompanying text.

We believe this ratings information will be useful to the Commission, to investors, and to various third parties as they monitor and evaluate the risks that fund managers take in both stable-NAV and institutional prime funds.

1. Economic Baseline

Under the economic baseline outlined above, money market funds are required to disclose in Form N-MFP the credit ratings for each portfolio security.[315] More specifically, funds are currently required to identify whether a portfolio security is a first or second tier security or is unrated, and to identify the "designated NRSROs" for each security (and for each demand feature, guarantee, or other credit enhancement). This disclosure requirement was not changed by the 2014 Money Market Fund Adopting Release.

As noted above, based on Form N-MFP filings from April 30, 2015, the Commission estimates that 98.26 percent of aggregate money market fund assets are invested in first tier securities, 0.14 percent of aggregate money market fund assets are invested in second tier securities, and 1.6 percent of aggregate money market fund assets are invested in unrated securities. Among the 537 funds that filed that month, 412 funds reported that they held only first tier securities, 477 funds reported that they held no second tier securities, and 447 funds reported that they held no unrated securities.

2. Economic Analysis

We anticipate that our amendments are likely to have two primary benefits. First, they should reduce perceived government endorsement of NRSROs, particularly when considered together with other amendments the Commission has adopted that remove credit ratings

[315] Although some money market funds voluntarily disclose security credit ratings, money market funds often rely on a staff no-action letter in not disclosing security credit ratings and "designated NRSROs." *See supra* note 142 and accompanying text.

references in today's rule and other rules and forms under the federal securities laws. Second, they will provide transparency on whether or not specific funds use credit ratings when making investment decisions, and might make it easier, if ratings are used, for shareholders and other interested parties to also use those ratings as part of their own risk assessments.

We anticipate that our amendments are likely to have two primary costs. First, they may impose administrative costs on funds that need to re-program their Form N-MFP filing software.[316] Second, because only funds that choose to consider credit ratings in assessing minimal credit risk will be permitted to disclose NRSRO ratings on Form N-MFP, our final rule may reduce transparency into one measure of the credit risk associated with securities purchased by funds that do not choose to consider credit ratings. This loss of transparency could create additional servicing costs for such funds if shareholders demanded new communications regarding the credit quality of the portfolio,[317] though this problem may be mitigated by the fact that sophisticated shareholders will often be aware of the ratings and other measures of credit risk, even if they are not disclosed on Form N-MFP.

The net effect of the amendments to Form N-MFP is that funds will not be required or permitted to disclose credit ratings if credit ratings are not considered in determining whether a security is eligible for the portfolio. However, as discussed above, we believe that our amendments will not result in any material changes for the majority of funds because they will, we believe, continue to refer to credit ratings. We believe, therefore, that the amendments'

---

316 *See supra* notes 243-244 and accompanying text (discussion of re-programming costs in PRA analysis).

317 *See* Comment Letter of the Dreyfus Corporation (Apr. 25, 2011) ("2011 Dreyfus Comment Letter") (opposing the elimination of credit ratings disclosures in Form N-MFP because of the potential that the fund would bear increased shareholder servicing costs to provide additional communications regarding the credit quality of the portfolio).

effects on efficiency, competition, and capital formation will likely be negligible. To the extent that money market funds continue to consider NRSRO ratings in making their minimal credit risk determinations, the amendments to Form N-MFP may reduce the potential that fund managers will increase significantly fund investments in riskier second tier securities; a fund will be required to disclose ratings considered in those credit determinations, and the ratings will reflect that increased risk. As a result, the disclosure to investors of these risk indicators may have the effect of penalizing funds that assume more risk.

Although this final rule reflects a change from the proposal by not requiring disclosure of every rating that a fund subscribes to, we believe that it will have a negligible impact on the overall costs and benefits of these amendments to Form N-MFP. Just as in the proposed rule, funds will still have to report the ratings they considered, and adjust their compliance programs to ensure such reporting. The extra reporting that would have been required under the proposed rule would likely only have caused a very small burden on funds because funds would incur the same reprogramming costs under either approach.

3. Alternatives

In the 2014 Proposing Release, the Commission presented an alternative to the now adopted amendments to Form N-MFP that would have required greater disclosure of credit ratings. Specifically, a fund would have had to disclose not only the ratings that it considered in evaluating a security and the name of the NRSRO providing the rating, but also each rating assigned by any NRSRO if the fund or its adviser subscribed to that NRSRO's services, and the name of that NRSRO. Several commenters on the proposed rule objected strongly to this requirement, stating that it would be costly, onerous and that mere subscription to an NRSRO's services was not a good indication that a particular rating was part of the evaluation of a particular security.[318] In developing this final rule, we were persuaded by these commenters and now believe that requiring this level of disclosure is unnecessary. In addition, as noted by commenters, requiring disclosure based on subscription might have increased costs and therefore created a financial disincentive to the use of ratings subscriptions by funds. As a result, this alternative might have decreased the amount of information used by fund managers to monitor risk in the market. For all of these reasons, we believe that the alternative chosen in the final rule is less likely than the other alternatives to impair efficiency, competition, and capital formation.

In developing this final rule, we also considered the 2011 proposal to completely eliminate the following two form items: the item that requires a fund to identify whether a portfolio security is a first tier security, a second tier security, or an unrated security; and the item that requires the fund to identify the "requisite NRSROs" for each security (and for each demand feature, guarantee, or other credit enhancement). Although we have eliminated the terminology "requisite NRSRO", we did not adopt this alternative because we now believe that completely eliminating such disclosure requirements masks not only the credit ratings but also information on whether or not the fund uses credit ratings when making its investment decisions.

We also considered not removing the current disclosure requirement as recommended by several commenters to the 2011 Proposing Release.[319] We elected not to leave the current disclosure requirements as is, but instead to adopt the required disclosure of NRSRO ratings only in certain circumstances, with the final rule narrowing those circumstances to situations where the fund actually uses the rating in its evaluation of credit quality. We believe these final

318 *See, e.g.,* SIFMA Comment Letter; BlackRock Comment Letter.

319 *See* 2011 BlackRock Comment Letter; 2011 Dreyfus Comment Letter; Comment Letter of Federated Investors, Inc. (Apr. 25, 2011); Comment Letter of the Securities Industry and Financial Markets Association (Apr. 18, 2011).

amendments are more in keeping with Congressional intent underlying Section 939A of the Dodd-Frank Act to reduce perceived government endorsement of credit ratings.

B. Exclusion from the Issuer Diversification Requirement

1. Economic Baseline

As discussed above, most money market fund portfolio securities that are subject to a guarantee by a non-controlled person are currently subject to a 10 percent diversification requirement on guarantors but no diversification requirement on issuers, while non-government securities with guarantors that do not qualify as non-controlled persons are generally subject to both a 5 percent diversification requirement with respect to issuers and a 10 percent diversification requirement with respect to guarantors.[320] In July 2014, we adopted amendments to rule 2a-7 that deem sponsors of asset-backed securities to be guarantors of the asset-backed security (unless the fund's board rebuts the presumption).[321] As a result, under rule 2a-7's definition of a guarantee issued by a non-controlled person, both non-asset-backed securities and asset-backed securities subject to such a guarantee (including asset-backed securities with a presumed sponsor guarantee) are excluded from the rule's issuer diversification requirement. That is, non-asset-backed securities and asset-backed securities subject to a guarantee by a non-controlled person are subject to a 10 percent diversification requirement on guarantors, but they are not subject to a 5 percent issuer diversification requirement on the issuer.[322] This forms the

[320] We note that single state funds may invest up to 25 percent of fund assets in securities of any single issuer, and tax-exempt funds may have as much as 15 percent of the value of portfolio securities invested in securities subject to guarantees or demand features issued by a single provider that is a non-controlled person. Rule 2a-7(d)(3)(i)(B); rule 2a-7(d)(3)(iii)(B).

[321] We also adopted an amendment to rule 2a-7's diversification provisions to provide that money market funds limit their exposure to affiliated groups, rather than to discrete issuers. *See* rule 2a-7(d)(3)(ii)(F).

[322] *See* current rule 2a-7(a)(18) (definition of guarantee); current rule 2a-7(a)(19) (definition of

economic baseline for the new diversification amendments that we are adopting today.

2. Economic Analysis

We believe that a small number of money market funds rely on the issuer diversification exclusion for securities subject to a guarantee by a non-controlled person. In the Proposing Release, staff's analysis of February 2014 Form N-MFP data showed that only 8 out of 559 money market funds held securities with a guarantee by a non-controlled person that exceeded the 5 percent diversification requirement for issuers. We stated in the Proposing Release that we believed that these funds in February 2014 relied on the exclusion from the 5 percent issuer diversification requirement with respect to issuers of securities that are subject to a guarantee issued by a non-controlled person.

In response to commenters, staff supplemented its analysis using October 2014 and April 2015 Form N-MFP data to review the number of funds that exceeded the 5 percent diversification limit.[323] Staff found, as discussed above, that as of October 2014 and April 2015, only 0.0482 percent and 0.0624 percent, respectively, of total money market fund assets were above the 5 percent issuer diversification threshold. As noted above, Commission staff found that only tax-exempt money market funds appeared to be relying on the 5 percent issuer diversification exclusion in October 2014 and April 2015. For October 2014 and April 2015, staff found that only 0.1 percent and 0.5 percent, respectively, of national tax-exempt money market fund assets were exposed to issuers above the 5 percent threshold.

Commission staff also separately analyzed the number of single state money market

---

guarantee issued by a non-controlled person); current rule 2a-7(d)(3)(i) (issuer diversification).

323 *See supra* note 191 and accompanying text.

funds that appear to be relying on the issuer diversification exclusion.[324] Because single state funds have a 25 percent issuer diversification basket, staff analyzed issuer exposure above this 25 percent limit, which would suggest that the fund may be relying on the 5 percent issuer diversification exclusion in order to obtain additional issuer exposure. In their analysis, staff recognized that a single state money market fund could be relying on the issuer diversification exclusion even when a fund's exposure to a single issuer is below 25 percent. For example, using the 25 percent issuer basket, a single state fund technically could have a 10 percent exposure to Issuer A and a 15 percent exposure to Issuer B, while having an additional 7 percent exposure to Issuer B using the 5 percent issuer diversification exclusion. In this scenario the total amount of exposure to Issuer B is less than 25 percent, but the money market fund is nonetheless relying on the issuer diversification exclusion. Staff analysis suggests that for October 2014, 44 single state money market funds out of 97 total single state money market funds were potentially relying on the 5 percent issuer diversification exclusion, and for April 2015, 38 single state money market funds out of 90 total single state money market funds were potentially relying on the 5 percent issuer diversification exclusion. However, for October 2014 and April 2015, staff found that only 1.7 percent and 1.3 percent, respectively, of single state money market fund assets were above the 5 percent issuer diversification threshold (while taking into account the 25 percent issuer diversification basket). Therefore, while a number of single state money market funds may be affected by the amended rule, a very small portion of their assets will be affected.

We recognize that changes in fund assets could mask which funds rely on the issuer

[324] As noted above, rule 2a-7 currently permits a single state fund to invest up to 25 percent of its assets in any single issuer. *See supra* note 161 and accompanying text.

diversification exclusion at acquisition: a fund might be above the 5 percent limit today solely due to a decline in fund assets after acquisition, and a fund might be below the 5 percent limit today solely due to an increase in fund assets after acquisition.[325] Whatever the cause, a money market fund that has invested more than 5 percent of its assets in an issuer of securities subject to a guarantee issued by a non-controlled person in reliance on the exclusion under current rule 2a-7 would, when those investments mature, have to reinvest the proceeds over 5 percent elsewhere. Based on the additional analysis of Form N-MFP filings, we believe that a small percentage of all money market funds (including a higher proportion of single state funds) would have to make changes to their portfolios to bring them into compliance with the amendments. These changes may or may not require the funds to invest in alternative securities, and the alternative securities may or may not be inferior because they offer, for example, lower yields, lower liquidity, or lower credit quality.

In response to commenters' suggestion that the Commission consider a broader sample of data, as discussed above, and to assess the amendment's effect on yield, our staff examined whether the 7-day gross yields of funds that use the 5 percent issuer diversification exclusion were higher than the 7-day gross yields for funds that do not. Our staff found: (i) for national tax-exempt money market funds in October 2014, the average yield for funds using the 5 percent issuer diversification exclusion was 0.10 percent as compared to the average yield for funds that did not use the 5 percent issuer diversification exclusion of 0.08 percent; (ii) for national tax-exempt money market funds in April 2015, the average yield for funds using the 5 percent issuer

[325] All of rule 2a-7's diversification limits are applied at the time of acquisition. For example, a fund may not invest in a particular issuer if, after acquisition, the fund's aggregate investments in the issuer would exceed 5 percent of fund assets. But if the fund's aggregate exposure after making the investment was less than 5 percent, the fund would not be required to later sell the securities if the fund's assets decreased and the fund's investment in the issuer came to represent more than 5 percent of the fund's assets.

diversification exclusion was 0.12 percent as compared to the average yield for funds that did not use the 5 percent issuer exclusion of 0.11 percent; (iii) for single state money market funds in October 2014, the average yield for funds using the 5 percent issuer diversification exclusion was 0.10 percent as compared to the average yield for funds that did not use the 5 percent issuer exclusion of 0.08 percent; and (iv) for single state money market funds in April 2015, the average yield for funds using the 5 percent issuer diversification exclusion was 0.12 percent as compared to the average yield for funds that did not use the 5 percent issuer exclusion of 0.07 percent. Although we do not believe the above differences in yield are material, we do recognize that funds that appear to be relying on the exclusion have, on average, a higher yield than money market funds that do not rely on the exclusion. In addition, we acknowledge that the current low-interest rate environment may cause the yield spread in each comparison above to be less than if we were measuring the yield spreads in a higher interest rate environment.

It appears that the elimination of the exclusion would affect the 63 money market funds out of a total of 542 money market funds (or approximately 11.6 percent of all money market funds) that exceeded the 5 percent issuer diversification limit as of April 2015, and would affect the 0.0624 percent of total money market fund assets that were above the 5 percent issuer diversification threshold, such that when those investments mature, the affected funds would have to reinvest the proceeds over 5 percent elsewhere. Because of the minimal amount of money market fund assets that would be affected by our amendment, we believe that the potential lower yields, less liquidity or increased risks associated with the amendment will be small for the affected funds.[326]

[326] Consider, for example, how reducing a position from 7 percent to 5 percent might affect fund yields. The effect could be as small as 0 percent if the 2 percent of assets are reinvested in securities that offer the same yield as the original 7 percent of assets. On the other hand, the

A couple commenters expressed concern regarding the amendment's impact on the supply of available securities for all money market funds.[327] One of these commenters suggested that imposing further diversification limits could artificially lower the supply of available issuers.[328] The second commenter suggested that the amendment would unnecessarily restrict the amount of asset-backed securities, and particularly asset-backed commercial paper, available for purchase by money market funds.[329] In addition, a couple of commenters argued that the proposed amendment would cause certain issuers to experience decreased demand and increased financing costs.[330] Another commenter argued that removing the issuer diversification exclusion may increase the number of guarantors held in a fund's portfolio, some of which may present marginally greater credit risks.[331] This commenter further argued that repealing the exclusion to increase diversification may actually diminish the percentage of the portfolio subject to credit enhancement as well as the overall credit quality of the guarantors.[332]

---

portfolio change could decrease fund yields by as much as approximately 29 percent if all of the portfolio yield came from the 7 percent security. We believe that funds will choose alternative securities that have similar yields as the securities replaced.

327 As discussed above, some commenters also voiced supply concerns specifically with respect to tax-exempt money market funds.

328 *See* BlackRock Comment Letter. This commenter suggested that many changes to the money market fund market may occur as a result of both the 2014 money market fund amendments and the 2014 proposed amendments relating to NRSRO ratings removal and suggested that the Commission wait to see the effects of those amendments before adopting additional diversification amendments.

329 *See* SFIG Comment Letter. SFIG stated that, as of June 30, 2014, money market funds held over $89 billion of asset-backed commercial paper, representing approximately 36 percent of the overall asset-backed commercial paper market. SFIG also argued that the creditworthiness of any single obligor of an asset-backed security would be less significant if that security was guaranteed and suggested that an obligor of an asset-backed security only be treated as an issuer of that security if its obligations constitute 20 percent of the obligations of that security rather than apply the 10 percent obligor provision under rule 2a-7(d)(3)(B).

330 *See* Fidelity Comment Letter; SIFMA Comment Letter.

331 *See* ICI Comment Letter.

332 *See id.*

We recognize that the removal of the issuer diversification exclusion and tightening of issuer diversification requirements for securities subject to a guarantee by a non-controlled person may impact issuers of these securities and the fund's risk profile. We also recognize that the amendment may occasionally prevent some issuers from selling securities to a money market fund that would otherwise invest in the issuer's securities above the 5 percent diversification requirement, but we believe, as discussed below, that the effect on such issuers would be negligible. In addition, while we recognize that removing the exclusion may cause some money market funds to invest in securities with higher credit risk, we note that a money market fund's portfolio securities must meet certain credit quality requirements, such as posing minimal credit risks, as discussed above.[333] We therefore continue to believe that the substantial risk limiting provisions of rule 2a-7 would mitigate the potential that these money market funds would significantly increase their investments in securities with higher credit risk. We also continue to believe that eliminating this exclusion would more appropriately limit money market fund risk exposures by limiting the concentration of exposure that a money market fund could have otherwise had to a particular issuer. We assume that all funds will incur costs associated with updating their systems to reflect the amendment, as well as the associated compliance costs, if their systems already incorporate this issuer diversification exclusion. We requested comment on operational costs that funds would incur in connection with the amendment. No commenters specifically addressed operational costs associated with the amendment. Accordingly, we continue to believe that these costs will be small for all funds because we believe that all funds currently have the ability to monitor issuer diversification to comply with rule 2a-7's limits on issuer concentration.

---

[333] *See* rule 2a-7(d)(2) (portfolio quality); *see supra* section II.A.

Our diversification amendment offers two primary benefits. First, by requiring greater issuer diversification for those funds that rely on the exclusion, the amendment will reduce concentration risk in those funds and may make it easier for funds to maintain or generate liquidity during periods when they impose fees and/or gates. Second, the amendment simplifies rule 2a-7's diversification requirements by eliminating the exclusion for securities with a guarantee issued by a non-controlled person, which should lower certain compliance and operational costs to the extent that funds no longer have to keep track of the securities that have such guarantees and would be eligible for the exclusion.

Because we believe that the universe of affected funds and issuers is small, we continue to believe that our amendment will have only negligible effects on efficiency, competition, and capital formation. Although we recognize that this amendment may constrain more funds (and issuers) in the future that otherwise would have less issuer diversification, we estimate, based on our staff's analysis of data from April 2015, that it will affect 63 funds, or approximately 11.6 percent of all money market funds today. Based on our staff's analysis we also estimate that, as of April 2015, our amendment will affect the 0.0624 percent of total money market fund assets that were above the 5 percent issuer diversification threshold. Based on staff analysis of Form N-MFP data and the amount of high quality securities available to tax-exempt money market funds, we continue to believe that the affected funds will find comparable alternative securities for the amount that exceeds 5 percent, and we believe that the affected issuers, to the extent applicable, will find other investors willing to buy the amount that exceeds the 5 percent for a comparable price.

3. Alternatives

As an alternative to eliminating the exclusion from issuer diversification for securities with a guarantee issued by a non-controlled person, at the proposal stage we considered requiring money market funds to be more diversified by lowering a fund's permitted exposure to any guarantor or provider of a demand feature from 10 percent to 5 percent of total assets. We discussed potential benefits and costs of this alternative approach, and we requested comment on it in the 2013 Money Market Fund Proposing Release.[334] As discussed in more detail above, we decided that the current requirements for diversification of guarantors and providers of demand features together with the issuer diversification requirement if applied generally to all securities, as under the adopted amendment, appropriately address our concerns relating to money market fund risk exposures.[335] We also believe that the potential costs of this alternative approach would likely be more significant than the costs of our adopted amendment. As of the end of April 2015, we estimate that approximately 110 (of 214) prime money market funds had total exposure to a single entity (including directly issued, asset-backed commercial paper sponsorship, and provision of guarantees and demand features) in excess of 5 percent. Under the alternative, any fund that had exposure to an entity greater than 5 percent when those assets matured would have to reinvest the proceeds of the securities creating that exposure in different securities or securities with a different guarantor. Those changes may or may not require those funds to invest in alternative securities, and those securities might present greater risk if they offered lower yields, lower liquidity, or lower credit quality. The alternative approach would appear to affect many more funds than would the amendment we are adopting today. As a result, we continue to

334 *See* 2013 Money Market Fund Proposing Release, *supra* note 16, at section III.J.4. We received no comments on this alternative approach. We also requested comment in 2009 on whether to reduce rule 2a-7's current diversification limits. *See* 2009 Money Market Fund Proposing Release, *supra* note 160, at section II.D. Most commenters opposed these reforms because, among other reasons, the reductions could increase risks to funds by requiring the funds to invest in relatively lower quality securities. *See id.* at n.909.

335 *See supra* text preceding and accompanying note 182.

believe that a better approach to achieving our reform goal would be to restrict risk exposures to all non-government issuers of securities subject to a guarantee in the same way, and to require money market funds (other than tax-exempt and single state funds as described above) that invest in non-government securities subject to a guarantee to comply with the 5 percent issuer diversification requirement and the 10 percent diversification requirement on guarantors.

4. Technical Amendments

As discussed above, we are making technical amendments to certain diversification provisions in rule 2a-7. Due to the nature of these amendments, we believe that the amendments will have no effect on efficiency, competition, or capital formation.

VI. REGULATORY FLEXIBILITY ACT CERTIFICATION

The Commission certified, pursuant to section 605(b) of the Regulatory Flexibility Act of 1980[336] that the proposed amendments to rule 2a-7 and form N-MFP under the Investment Company Act, if adopted, would not have a significant economic impact on a substantial number of small entities.[337] We included this certification in Section VI of the Proposing Release. Although we encouraged written comments regarding this certification, no commenters responded to this request.

STATUTORY AUTHORITY

The Commission is adopting amendments to rule 2a-7 under the authority set forth in sections 6(c) and 38(a) of the Investment Company Act [15 U.S.C. 80a-6(c), 80a-37(a)] and Section 939A of the Dodd-Frank Act. The Commission is adopting amendments to Form

336 5 U.S.C. 603(b).

337 Under the Investment Company Act, an investment company is considered a small business or small organization if, together with other investment companies in the same group of related investment companies, it has net assets of $50 million or less as of the end of its most recent fiscal year. *See* 17 CFR 270.0–10.

N-MFP under the authority set forth in sections 8(b), 30(b), 31(a) and 38(a) of the Investment Company Act [15 U.S.C. 80a-8(b), 80a-29(b), 80a-30(a) and 80a-37(a)] and Section 939A of the Dodd-Frank Act.

List of Subjects in 17 CFR Parts 270 and 274

Investment companies, Reporting and recordkeeping requirements, Securities.

TEXT OF RULE AND FORM AMENDMENTS

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is amended as follows:

PART 270--RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

1. The authority citation for part 270 continues to read as follows:

Authority: 15 U.S.C. 80a-1 *et seq.*, 80a-34(d), 80a-37, 80a-39, and Pub. L. No. 111-203, sec. 939A, 124 Stat. 1376 (2010), unless otherwise noted.

* * * * *

2. Section 270.2a-7 is amended by:

a. In paragraph (a)(5), removing the words "and (D)";

b. Removing paragraph (a)(11);

c. Redesignating paragraphs (a)(12) and (a)(13) as (a)(11) and (a)(12);

d. Revising newly designated paragraph (a)(11);

e.Re moving paragraph (a)(14);

f. Redesignating paragraphs (a)(15) through (a)(21) as (a)(13) through (a)(19);

g. In newly designated paragraph (a)(16)(ii), removing the references "(a)(12)(iii)" and "(d)(2)(iii)" and adding in their places "(a)(11)" and "(d)(2)(ii)", respectively.

h. Removing paragraph (a)(22);

i. Redesignating paragraph (a)(23) as paragraph (a)(20);

j. Removing paragraph (a)(24);

k. Redesignating paragraph (a)(25) as paragraph (a)(21);

l. Removing paragraph (a)(26);

m.Re designating paragraphs (a)(27) through (a)(31) as paragraphs (a)(22) through (a)(26);

n. Removing paragraph (a)(32);

o. Redesignating paragraphs (a)(33) and (a)(34) as paragraphs (a)(27) and (a)(28);

p.I n paragraph (c)(2)(i) removing the reference to "(c)(i)(A)" and adding in its place "(c)(2)(i)(A)".

q. Revising paragraph (d)(2);

r. Revising paragraph (d)(3)(i);

s.I n paragraph (d)(3)(iii), removing the words "paragraphs (d)(3)(iii) and (d)(3)(iv)" and adding in their place "paragraphs (d)(3)(i), (d)(3)(iii) and (d)(3)(iv)";

t.I n paragraph (d)(3)(iii)(A), removing the words "paragraphs (d)(3)(iii)(B) and (d)(3)(iii)(C)" and adding in their place "paragraphs (d)(3)(i) and (d)(3)(iii)(B)";

u. Removing paragraph (d)(3)(iii)(C);

v. Revising paragraph (f);

w. Revising paragraph (g)(3);

x. In paragraph (g)(8)(i)(B), at the beginning of the paragraph removing the word "A" and adding in its place "An event indicating or evidencing credit deterioration, such as a";

y.Re vising paragraph (h)(3); and

z. Revising paragraph (j).

The revisions read as follows:

§ 270.2a-7 Money market funds.

(a) * * *

(11) *Eligible security* means a security:

(i) With a remaining maturity of 397 calendar days or less that the fund's board of directors determines presents minimal credit risks to the fund, which determination must include an analysis of the capacity of the security's issuer or guarantor (including for this paragraph the provider of a conditional demand feature, when applicable) to meet its financial obligations, and such analysis must include, to the extent appropriate, consideration of the following factors with respect to the security's issuer or guarantor:

(A) Financial condition;

(B) Sources of liquidity;

(C) Ability to react to future market-wide and issuer- or guarantor-specific events, including ability to repay debt in a highly adverse situation; and

(D) Strength of the issuer or guarantor's industry within the economy and relative to economic trends, and issuer or guarantor's competitive position within its industry.

(ii) That is issued by a registered investment company that is a money market fund; or

(iii) That is a government security.

NOTE to paragraph (a)(11): For a discussion of additional factors that may be relevant in evaluating certain specific asset types see Investment Company Act Release No. IC-31828 (9/16/15).

*   *   *   *   *

(d) * * *

(2) *Portfolio quality.*

(i) *General.* The money market fund must limit its portfolio investments to those United States dollar-denominated securities that at the time of acquisition are eligible securities.

(ii) *Securities subject to guarantees*. A security that is subject to a guarantee may be determined to be an eligible security based solely on whether the guarantee is an eligible security, provided however, that the issuer of the guarantee, or another institution, has undertaken to promptly notify the holder of the security in the event the guarantee is substituted with another guarantee (if such substitution is permissible under the terms of the guarantee).

(iii) *Securities subject to conditional demand features.* A security that is subject to a conditional demand feature ("underlying security") may be determined to be an eligible security only if:

(A) The conditional demand feature is an eligible security;

(B) The underlying security or any guarantee of such security is an eligible security, except that the underlying security or guarantee may have a remaining maturity of more than 397 calendar days.

(C) At the time of the acquisition of the underlying security, the money market fund's board of directors has determined that there is minimal risk that the circumstances that would result in the conditional demand feature not being exercisable will occur; and

(1) The conditions limiting exercise either can be monitored readily by the fund or relate to the taxability, under federal, state or local law, of the interest payments on the security; or

(2) The terms of the conditional demand feature require that the fund will receive notice of the occurrence of the condition and the opportunity to exercise the demand feature in accordance with its terms; and

(D) The issuer of the conditional demand feature, or another institution, has undertaken to promptly notify the holder of the security in the event the conditional demand feature is substituted with another conditional demand feature (if such substitution is permissible under the terms of the conditional demand feature).

(3) * * *

(i) *Issuer diversification.* The money market fund must be diversified with respect to issuers of securities acquired by the fund as provided in paragraphs (d)(3)(i) and (d)(3)(ii) of this section, other than with respect to government securities.

(A) *Taxable and national funds.* Immediately after the acquisition of any security, a money market fund other than a single state fund must not have invested more than:

(1) Five percent of its total assets in securities issued by the issuer of the security, provided, however, that with respect to paragraph (d)(3)(i)(A) of this section, such a fund may invest up to twenty-five percent of its total assets in the securities of a single issuer for a period of up to three business days after the acquisition thereof; provided, further, that the fund may not invest in the securities of more than one issuer in accordance with the foregoing proviso in this paragraph at any time; and

(2) Ten percent of its total assets in securities issued by or subject to demand features or guarantees from the institution that issued the demand feature or guarantee, provided, however, that a tax exempt fund need only comply with this paragraph with respect to eighty-five percent of its total assets, subject to paragraph (d)(3)(iii) of this section.

(B) *Single state funds.* Immediately after the acquisition of any security, a single state fund must not have invested:

(1) With respect to seventy-five percent of its total assets, more than five percent of its total assets in securities issued by the issuer of the security; and

(2) With respect to seventy-five percent of its total assets, more than ten percent of its total assets in securities issued by or subject to demand features or guarantees from the

institution that issued the demand feature or guarantee, subject to paragraph (d)(3)(iii) of this section.

* * * * *

(f) *Defaults and other events.*

(1) *Adverse events.* Upon the occurrence of any of the events specified in paragraphs (f)(1)(i) through (iii) of this section with respect to a portfolio security, the money market fund shall dispose of such security as soon as practicable consistent with achieving an orderly disposition of the security, by sale, exercise of any demand feature or otherwise, absent a finding by the board of directors that disposal of the portfolio security would not be in the best interests of the money market fund (which determination may take into account, among other factors, market conditions that could affect the orderly disposition of the portfolio security):

(i) The default with respect to a portfolio security (other than an immaterial default unrelated to the financial condition of the issuer);

(ii) A portfolio security ceases to be an eligible security (*e.g.,* no longer presents minimal credit risks); or

(iii) An event of insolvency occurs with respect to the issuer of a portfolio security or the provider of any demand feature or guarantee.

(2) *Notice to the Commission.* The money market fund must notify the Commission of the occurrence of certain material events, as specified in Form N-CR (§ 274.222 of this chapter).

(3) *Defaults for purposes of paragraphs (f)(1) and (2) of this section.* For purposes of paragraphs (f)(1) and (2) of this section, an instrument subject to a demand feature or guarantee shall not be deemed to be in default (and an event of insolvency with respect to the security shall not be deemed to have occurred) if:

(i) In the case of an instrument subject to a demand feature, the demand feature has been exercised and the fund has recovered either the principal amount or the amortized cost of the instrument, plus accrued interest;

(ii) The provider of the guarantee is continuing, without protest, to make payments as due on the instrument; or

(iii) The provider of a guarantee with respect to an asset-backed security pursuant to paragraph (a)(16)(ii) of this section is continuing, without protest, to provide credit, liquidity or other support as necessary to permit the asset-backed security to make payments as due.

(g) * * *

(3) *Ongoing Review of Credit Risks.* The written procedures must require the adviser to provide ongoing review of whether each security (other than a government security) continues to present minimal credit risks. The review must:

(i) Include an assessment of each security's credit quality, including the capacity of the issuer or guarantor (including conditional demand feature provider, when applicable) to meet its financial obligations; and

(ii) Be based on, among other things, financial data of the issuer of the portfolio security or provider of the guarantee or demand feature, as the case may be, and in the case of a security subject to a conditional demand feature, the issuer of the security whose financial condition must be monitored under paragraph (d)(2)(iii) of this section, whether such data is publicly available or provided under the terms of the security's governing documents.

*   *   *   *   *

(h) * * *

(3) *Credit risk analysis.* For a period of not less than three years from the date that the

credit risks of a portfolio security were most recently reviewed, a written record must be maintained and preserved in an easily accessible place of the determination that a portfolio security is an eligible security, including the determination that it presents minimal credit risks at the time the fund acquires the security, or at such later times (or upon such events) that the board of directors determines that the investment adviser must reassess whether the security presents minimal credit risks.

*   *   *   *   *

(j) *Delegation.* The money market fund's board of directors may delegate to the fund's investment adviser or officers the responsibility to make any determination required to be made by the board of directors under this section other than the determinations required by paragraphs (c)(1) (board findings), (c)(2)(i) and (ii) (determinations related to liquidity fees and temporary suspensions of redemptions), (f)(1) (adverse events), (g)(1) and (g)(2) (amortized cost and penny rounding procedures), and (g)(8) (stress testing procedures) of this section.

(1) *Written guidelines.* The board of directors must establish and periodically review written guidelines (including guidelines for determining whether securities present minimal credit risks as required in paragraphs (d)(2) and (g)(3) of this section) and procedures under which the delegate makes such determinations.

(2) *Oversight.* The board of directors must take any measures reasonably necessary (through periodic reviews of fund investments and the delegate's procedures in connection with investment decisions and prompt review of the adviser's actions in the event of the default of a security or event of insolvency with respect to the issuer of the security or any guarantee or demand feature to which it is subject that requires notification of the Commission under paragraph (f)(2) of this section by reference to Form N-CR (§ 274.222 of this chapter)) to assure that the guidelines and procedures are being followed.

*   *   *   *   *

3. Section 270.12d3-1(d)(7)(v) is amended by removing the reference to "270.2a-7(a)(18)" and adding in its place the phrase "270.2a-7(a)(16)";

4. Section 270.31a-1(b)(1) is amended by removing the phrase "(as defined in § 270.2a-7(a)(9) or § 270.2a-7(a)(18) respectively)" and adding in its place the phrase "(as defined in § 270.2a-7(a)(9) or "§ 270.2a-7(a)(16) respectively)".

PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940

5. The authority citation for part 274 continues to read in part as follows:

Authority: 15 U.S.C. 77f, 77g, 77h, 77j, 77s, 78c(b), 78l, 78m, 78n, 78o(d), 80a-8, 80a-24, 80a-26, 80a-29, and Pub. L. No. 111-203, sec. 939A, 124 Stat. 1376 (2010), unless otherwise noted.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75938 / September 17, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16816

In the Matter of RUDOLFO DELASIERRA Respondent.	ORDER INSTITUTING ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS, PURSUANT TO SECTIONS 15(b) AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative and cease-and-desist proceedings be, and hereby are, instituted pursuant to Sections 15(b), and 21C of the Securities Exchange Act of 1934 ("Exchange Act"), against Rudolfo DeLaSierra ("DeLaSierra" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Instituting Administrative and Cease-and-Desist Proceedings Pursuant to Sections 15(b) and 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

Summary

This proceeding arises out of securities lending practices at Penson Financial Services, Inc. ("Penson"), a former registered broker-dealer, that resulted in its systematic violations of Rule 204 of Regulation SHO.[2] From October 2008 through November 2011, DeLaSierra and other individuals in the Securities Lending Department implemented procedures that they knew, or were reckless in not knowing, did not comply with Rule 204 of Regulation SHO. In so doing, DeLaSierra willfully aided and abetted and caused Penson's violations.

Respondent

1. DeLaSierra, 39, of Dallas, Texas, was a Vice President of Penson from at least October 2008 until June 2012. In that position, DeLaSierra was responsible for securities lending activities at Penson. DeLaSierra was associated with Penson between March 2000 and August 2012. DeLaSierra holds Series 7, 63, and 24 licenses.

Other Relevant Entity

2. Penson was a registered broker-dealer incorporated in North Carolina with a principal place of business in Dallas, Texas. From at least 2010 to 2012, Penson was the second-largest clearing firm in the United States as measured by the number of correspondent broker-dealers for which it cleared. Penson was a wholly-owned subsidiary of SAI Holdings, Inc., which in turn was a wholly-owned subsidiary of Penson Worldwide Inc. ("PWI"). Penson filed a Form BDW, which became effective in October 2012, and then declared bankruptcy in January 2013. A bankruptcy plan implementing Penson's liquidation was approved in July 2013.

Background

3. In September 2008, the Commission implemented Rule 204T of Regulation SHO, which required, among other things, clearing firms such as Penson to close out Continuous Net Settlement ("CNS") failures to deliver in all sales of equity securities that they cleared. In July 2009, the Commission made those requirements permanent in adopting Rule 204 of Regulation

---

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

[2] Rule 204 was initially implemented as a temporary rule, Rule 204T. Generally, Rule 204T and Rule 204 will be collectively referred to as Rule 204.

SHO. The Commission adopted Rule 204 of Regulation SHO to address, among other things, abusive "naked" short selling and failures to deliver.

4. Rule 204(a) requires participants of a registered clearing agency (generally, clearing firms) to deliver equity securities to a registered clearing agency when delivery is due, i.e., by settlement date, or close out fails to deliver resulting from long or short sales within certain timeframes. Settlement date is generally three days after the trade date ("T+3"). For short sales, if the clearing firm has a failure-to-deliver position at the clearing agency, it must close out the CNS failure-to-deliver position by purchasing or borrowing securities of like kind and quantity by no later than the beginning of regular trading hours (i.e., market open) on the settlement day following the settlement date ("T+4"). For long sales, if the clearing firm has a failure-to-deliver position at the clearing agency, it must close out the CNS failure-to-deliver position by purchasing or borrowing securities of like kind and quantity by no later than the beginning of regular trading hours on the third day following the settlement date ("T+6").

Penson Violated Rule 204 of Regulation SHO

5. At all relevant times, Penson was a clearing firm and a member of the National Securities Clearing Corporation ("NSCC"), a clearing agency registered with the Commission that clears and settles the majority of United States transactions in equities. From October 2008 through November 2011, Penson systematically failed to close out CNS failures to deliver resulting from certain long sales by market open T+6. The relevant long sales originated with securities held in customer margin accounts. Under the Commission's customer protection rule, Penson was permitted, subject to certain conditions and limitations, to re-hypothecate margin securities to third parties.[3] Penson re-hypothecated margin securities according to the terms of the Master Securities Lending Agreement ("MSLA") developed by the Securities Industry and Financial Markets Association ("SIFMA"). The Securities Lending Department generated revenue and helped to finance Penson's operations by loaning out shares held in customer margin accounts.[4]

6. When a margin customer sold the hypothecated securities that were out on loan, Penson issued account-level recalls to the borrowers on T+3, i.e., three business days after execution of the margin customer's sale order. If the borrowers did not return the shares by the close of business T+3 and Penson did not otherwise have enough shares of the relevant security to meet its CNS delivery obligations, Penson incurred a CNS failure to deliver in the relevant

---

[3] Re-hypothecation involves a broker-dealer's use of customer margin securities as collateral for its own securities lending activities.

[4] The circumstances in which margin customers sold securities that were on loan will be referred to as "long sales of loaned securities." This proceeding focuses solely on Penson's close-out practices and neither this proceeding nor the related, settled proceedings (*Michael H. Johnson*, Exch. Act Rel. No. 72186 (May 19, 2014) and *Lindsey Alan Wetzig*, Exch. Act Rel. No. 72187 (May 29, 2014), should be interpreted as finding that the sale transactions were properly marked as "long" sales under Rule 200 of Regulation SHO.

security. When the open stock loan continued to cause a CNS failure to deliver as of market open T+6, it was Penson's procedure not to purchase or borrow shares by market open sufficient to close out its failure to deliver position. Instead, Penson systematically violated Rule 204(a) by allowing its CNS failure to deliver position to persist beyond market open T+6.

The Securities Lending Department Adopted Procedures for Long Sales of Loaned Securities that Violated Rule 204(a)

7. At all relevant times, the Securities Lending Department was included on the organizational charts of PWI, the parent company, rather than within Penson, which was then a registered broker-dealer. However, the policies and procedures of Penson treated the Securities Lending Department as part of the broker-dealer and the employees of the Securities Lending Department as associated persons of the broker-dealer. Securities Lending Department personnel had direct access to Penson's account with NSCC and conducted all securities lending activity on behalf of Penson. The Securities Lending Department had primary responsibility at Penson for effecting Rule 204(a) close-outs of Penson's CNS failures to deliver resulting from long sales of loaned securities.

8. In September 2008, the Securities Lending Department initially attempted to comply with Rule 204 for long sales of loaned securities by (1) continuing to use its existing systems that were programmed to issue recall notices to borrowing counterparties on T+3; and (2) attempting to buy in the counterparties at market open T+6 if they had not yet returned the borrowed shares. However, this approach did not result in compliance because the counterparties refused to accept the buy ins. Under the MSLA applicable to the loans, the borrowing counterparties had three full business days from the T+3, account-level recall – i.e., until close of business T+6 – to return the shares. Because the MSLA provided for three full business days for the borrowing counterparties to return the shares, those counterparties often resisted Penson's attempted market open T+6 buy ins.

9. DeLaSierra notified his supervisor, the head of the Securities Lending Department, about the counterparty resistance to market open T+6 buy ins. After discussing the matter with the compliance department, DeLaSierra's supervisor decided to continue issuing recall notices on T+3 and to have DeLaSierra and other employees do their best to convince counterparties to return the loaned securities before market open T+6. However, if the counterparties did not return the loaned securities by market open T+6, Penson would not fulfill its Rule 204 obligations by purchasing or borrowing securities. Under these procedures, Penson would sometimes allow the relevant CNS failures to deliver to persist beyond close-of-business on T+6. DeLaSierra discussed these issues with his supervisor and, after hearing his supervisor discuss the counterparty resistance with Penson's Chief Compliance Officer, agreed to follow these procedures.

10. DeLaSierra knew or was reckless in not knowing that these procedures would cause Penson to violate Rule 204. Nevertheless, from October 2008 until November 2011, DeLaSierra and other employees of the Securities Lending Department followed the procedures. As a result, Penson violated Rule 204 at least 1,500 times.

Violations

As a result of the conduct described above, DeLaSierra willfully aided and abetted and caused Penson's violations of Rules 204(a) of Regulation SHO, which requires registered participants of clearing agencies to close out CNS failures to deliver resulting from long sales by market open T+6 and to close out CNS failures to deliver resulting from short sales by market open T+4.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondent's Offer.

Accordingly, pursuant to Sections 15(b) and 21C of the Exchange Act, it is hereby ORDERED that:

A. Respondent DeLaSierra shall cease and desist from committing or causing any violations and any future violations of Rule 204(a) of Regulation SHO.

B. Respondent DeLaSierra is censured.

C. Respondent acknowledges that the Commission is not imposing a civil penalty based upon his cooperation in a Commission investigation and related enforcement proceeding. If at any time following the entry of the Order, the Division of Enforcement ("Division") obtains information indicating that Respondent knowingly provided materially false or misleading information or materials to the Commission or in a related proceeding, the Division may, at its sole discretion and with prior notice to the Respondent, petition the Commission to reopen this matter and seek an order directing that the Respondent pay a civil money penalty. Respondent may contest by way of defense in any resulting administrative proceeding whether he knowingly provided materially false or misleading information, but may not: (1) contest the findings in the Order; or (2) assert any defense to liability or remedy, including, but not limited to, any statute of limitations defense.

By the Commission.

(Release No. 34-75935; File No. PCAOB-2015-01)

September 17, 2015

Public Company Accounting Oversight Board; Order Granting Approval of Proposed Rules to Implement the Reorganization of PCAOB Auditing Standards and Related Changes to PCAOB Rules and Attestation, Quality Control, and Ethics and Independence Standards

I. Introduction

On June 17, 2015, the Public Company Accounting Oversight Board (the "Board" or the "PCAOB") filed with the Securities and Exchange Commission (the "Commission"), pursuant to Section 107(b)[1] of the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act") and Section 19(b)[2] of the Securities Exchange Act of 1934 (the "Exchange Act"), proposed rules to adopt amendments to implement the reorganization of PCAOB auditing standards and related changes to PCAOB rules and attestation, quality control, and ethics and independence standards (collectively, the "Proposed Rules" or "Proposed Reorganization").[3] The Proposed Rules were published for comment in the Federal Register on June 25, 2015.[4] At the time the notice was issued, the Commission designated a longer period to act on the Proposed Rules, until September 23, 2015.[5] The Commission received four comment letters in response to the

[2] 15 U.S.C. 78s(b).

[3] The Board originally proposed in March 2013 ("Original Proposal") what became the Proposed Rules. See PCAOB Release No. 2013-002 (March, 26, 2013). The Board also issued a supplemental request for comment in May 2014 ("Supplemental Request"). See PCAOB Release No. 2014-001 (May 7, 2014).

[4] See Release No. 34-75251 (June 19, 2015), 80 FR 36602 (June 25, 2015).

[5] Ibid.

notice.[6] This order approves the Proposed Rules.

II. Description of the Proposed Rules

In April 2003, the Board adopted, on an interim, transitional basis, generally accepted auditing standards ("GAAS") that were in existence on April 16, 2003. When the Board adopted those auditing standards, it continued to use the topical organization and reference numbers ("AU sections") in the Auditing Standards Board ("ASB") of the American Institute of Certified Public Accountants' ("AICPA") then-existing codification of its standards. Auditing standards issued by the Board ("AS standards") have not been codified or otherwise organized by topic, and are numbered in sequential order based upon when they were issued. As a result, the Board's auditing standards are organized using two separate numbering systems: (1) the numbering system used by the ASB when the Board adopted the interim standards; and (2) the numbering system used by the Board for the standards it has issued.

1. Proposed Reorganization

Under the Proposed Reorganization, the individual standards will be grouped into the following topical categories:

- General Auditing Standards (AS 1000s)—standards on broad auditing principles, concepts, activities, and communications;
- Audit Procedures (AS 2000s)—standards for planning and performing audit procedures and for obtaining audit evidence;
- Auditor Reporting (AS 3000s)—standards for auditors' reports;

[6] See Comment letters from Suzanne H. Shatto, June 27, 2015, Deloitte & Touche LLP, July 8, 2015, Michael McMurtry, July 28, 2015, and Stephen G. Wills, August 17, 2015, available at http://www.sec.gov/comments/pcaob-2015-01/pcaob201501.shtml.

- Matters Related to Filings Under Federal Securities Laws (AS 4000s)—standards on certain auditor responsibilities relating to U.S. Securities and Exchange Commission filings for securities offerings and reviews of interim financial information; and
- Other Matters Associated with Audits (AS 6000s)—standards for other work performed in conjunction with an audit of an issuer or of a broker or dealer.

Within each category are subcategories to further organize similar topics, such as standards related to auditor communications in the "General Auditing Standards" category. The integrated reference system uses an "AS" prefix to identify the auditing standard and each standard is assigned a unique section number, based on a four-digit numbering system.

2. Changes to PCAOB Standards and Rules

The amendments to PCAOB standards and rules include changes rescinding certain interim auditing standards that the Board believes are no longer necessary, eliminating inoperative language in auditing standards, references, and interpretations, and eliminating inoperative references to AICPA standards or rules.

a. Changes to the PCAOB Standards

The amendments primarily update section numbers, update cross-references among standards using the numbering system in the adopted reorganization, and change the titles of certain standards. Other amendments rescind certain interim standards and remove or update certain terms and phrases in the standards.

Interim Standards to be Rescinded

The following interim standards are being rescinded because they contain requirements that have been superseded or duplicated by other PCAOB standards, and as such, are considered unnecessary:

- AU sec. 150, Generally Accepted Auditing Standards
- AU sec. 201, Nature of the General Standards
- AU sec. 410, Adherence to Generally Accepted Accounting Principles
- AU sec. 532, Restricting the Use of an Auditor's Report
- AU sec. 901, Public Warehouses—Controls and Auditing Procedures for Goods Held.

Interpretive Publications

Almost all[7] of the AICPA auditing interpretations are being retained and presented separately from the auditing standards. The Proposed Reorganization retains the existing requirement for the auditor to be aware of and consider the applicable auditing interpretations.

The Proposed Reorganization retains the majority[8] of the appendices to the interim auditing standards and to continue presenting those appendices together with their related auditing standards in the same manner that appendices to PCAOB-issued standards are presented. Additionally, the Proposed Reorganization removes references to AICPA Audit and Accounting Guides and AICPA auditing Statements of Position because the guides referenced in PCAOB standards are outdated.[9]

Other Changes to PCAOB Standards

---

[7] The Proposed Reorganization will rescind two auditing interpretations related to AU sec. 410 and AU sec. 534 and interpretation 16 of AU sec. 508 because they are either duplicative or unrelated to the preparation or issuance of any audit report for an issuer, broker, or dealer, and thus unnecessary.

[8] The Proposed Reorganization will delete duplicative and thus unnecessary appendices that contain paragraphs .86 and .87 of AU sec. 316.

[9] AICPA Audit and Accounting Guides and auditing Statements of Position referenced in PCAOB standards are the editions of those publications as in existence on April 16, 2003.

The Proposed Reorganization includes amendments to replace references to GAAS throughout the auditing standards with references to the standards of the PCAOB or PCAOB auditing standards, and accordingly, to supersede Auditing Standard No. 1 ("AS 1"), References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board.[10] The Proposed Reorganization also includes amendments to preserve the requirement from AS 1 for the auditor's report to include the city and state, (or city and country), of the auditor. Finally, as AS 1 applied to the PCAOB's attestation standards, amendments to update references to PCAOB standards and to include the city and state (or city and country) have been applied to the attestation standards.

As a result of these changes, the amendments also include updates to the illustrative auditor's reports included throughout the auditing standards. In addition to illustrating the two changes described above, the updates to the reports include changing the title to "Report of Independent Registered Public Accounting Firm."[11]

b. Changes to PCAOB Rules

The Proposed Reorganization amends PCAOB Rule 3200T to remove (1) the reference to AU sec. 150, which, as discussed above, is rescinded, and (2) terms such as "interim auditing standards" and "generally accepted auditing standards." These terms are no longer relevant under the Proposed Reorganization. Additionally, the Proposed Reorganization makes the rule

[10] In 2004, the Commission published interpretive guidance to explain that references in Commission rules and staff guidance to GAAS or specific standards of GAAS, as they relate to issuers, should be understood to mean the standards of the PCAOB plus any applicable rules of the Commission. See Release No. 34-49708, FR-73 (May 14, 2004).

[11] In the Board's final rule release, it notes that the amendments would not preclude an unregistered firm that applies PCAOB standards, when appropriate, from omitting "Registered" from the title of the report. See PCAOB Release No. 2015-002 at fn. 26 (March 31, 2015).

permanent, rather than temporary, and therefore removes the word "Interim" from its title.

3. Applicability and Effective Date

The PCAOB has proposed application of its Proposed Rules to audits of all issuers, including audits of emerging growth companies ("EGCs"),[12] as discussed in Section IV. below. The Proposed Rules also would apply to audits of SEC-registered brokers and dealers.[13]

The Proposed Rules would be effective as of December 15, 2016. However, auditors and others are not precluded from using and referencing the standards as reorganized pursuant to the Proposed Rules before the effective date because the amendments do not substantively change the standards' requirements.[14]

III. Comment Letters

As noted above, the Commission received four comment letters concerning the Proposed Rules. Three commenters expressed support for the Proposed Rules,[15] and the other commenter provided suggestions discussed further below.[16]

One commenter stated that the new organizational structure will improve the usability of the PCAOB's auditing standards, including helping users navigate the standards more easily.[17] Another commenter suggested adopting a similar structure used by the ASB and IAASB and

[12] The term "emerging growth company" is defined in Section 3(a)(80) of the Exchange Act. 15 U.S.C. 78c(a)(80).

[13] On July 30, 2013, the Commission adopted amendments to Rule 17a-5 under the Exchange Act to require, among other things, that audits of brokers' and dealers' financial statements be performed in accordance with the standards of the PCAOB for fiscal years ending on or after June 1, 2014. 17 CFR 240.17a-5. See *Broker–Dealer Reports*, Release No. 34–70073, (July 30, 2013), 78 FR 51910 (August 21, 2013), available at http://www.sec.gov/rules/final/2013/34-70073.pdf.

[14] See PCAOB Release No. 2015-002 at 21.

[15] See Shatto Letter, Deloitte Letter and McMurtry Letter.

[16] See Wills Letter.

[17] See Deloitte Letter.

reorganizing the PCAOB's attestation, quality control, and ethics and independence standards. This same commenter expressed concern regarding the rescission of AU sec. 532 and removal of references to non-authoritative other guidance in the Proposed Reorganization.[18] Finally, one commenter suggested enhancements to improve the usability of the Proposed Reorganization, including a suggestion to embed PCAOB standards in the FASB's Accounting Standards Codification.[19] The PCAOB addressed many of these comments in its Original Proposal, Supplemental Request, and final rule release. The Commission does not find the PCAOB's responses to be unreasonable. The comment on embedding PCAOB standards in the FASB's Accounting Standards Codification is outside the scope of the Proposed Rules.

IV. The PCAOB's EGC Request

Section 103(a)(3)(C) of the Sarbanes-Oxley Act provides that any additional rules adopted by the PCAOB subsequent to April 5, 2012 do not apply to the audits of EGCs, unless the Commission determines that the application of such additional requirements is necessary or appropriate in the public interest, after considering the protection of investors and whether the action will promote efficiency, competition, and capital formation.[20] Having considered those factors, and as explained further herein, the Commission finds that applying the Proposed Rules to audits of EGCs is necessary or appropriate in the public interest.

In proposing application of the Proposed Rules to audits of all issuers, including EGCs, the PCAOB requested that the Commission make the determination required by Section 103(a)(3)(C). To assist the Commission in making its determination, the PCAOB prepared and

[18] See McMurtry Letter.

[19] See Wills Letter.

[20] Section 103(a)(3)(C) of the Sarbanes-Oxley Act, as amended by Section 104 of the JOBS Act.

submitted to the Commission its own EGC analysis. The PCAOB's EGC analysis includes discussions of characteristics of self-identified EGCs and economic considerations pertaining to audits of EGCs, including efficiency, competition, and capital formation. In its analysis, the Board states the reorganization of PCAOB auditing standards would involve amendments that do not impose additional requirements on auditors or change substantively the requirements of PCAOB standards. Thus, the reorganization, including the amendments, is not expected to affect the manner in which audits are performed and reported under PCAOB standards, including audits of EGCs. Additionally, reorganizing the PCAOB standards into a single, integrated organizational structure should make it easier for auditors and others to navigate, use, and apply the standards.

The PCAOB's EGC analysis was included in the Commission's public notice soliciting comment on the Proposed Rules. Based on the analysis submitted, we believe the information in the record is sufficient for the Commission to make the requested EGC determination in relation to the Proposed Rules.

V. Conclusion

The Commission has carefully reviewed and considered the Proposed Rules and the information submitted therewith by the PCAOB, including the PCAOB's EGC analysis, and the comment letters received. In connection with the PCAOB's filing and the Commission's review,

A. The Commission finds that the Proposed Rules are consistent with the requirements of the Sarbanes-Oxley Act and the securities laws and are necessary or appropriate in the public interest or for the protection of investors; and

B. Separately, the Commission finds that the application of the Proposed Rules to

EGC audits is necessary or appropriate in the public interest, after considering the protection of investors and whether the action will promote efficiency, competition, and capital formation.

IT IS THEREFORE ORDERED, pursuant to Section 107 of the Sarbanes-Oxley Act and Section 19(b)(2) of the Exchange Act, that the Proposed Rules (File No. PCAOB-2015-01) be and hereby are approved.

By the Commission.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75939 / September 17, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16817

In the Matter of

BRIAN DAVID HALL

Respondent.

ORDER INSTITUTING ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS, PURSUANT TO SECTIONS 15(b) AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative and cease-and-desist proceedings be, and hereby are, instituted pursuant to Sections 15(b), and 21C of the Securities Exchange Act of 1934 ("Exchange Act"), against Brian David Hall ("Hall" or "Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Instituting Administrative and Cease-and-Desist Proceedings Pursuant to Sections 15(b) and 21C of the Securities Exchange Act of 1934, Making Findings, and Imposing Remedial Sanctions and a Cease-and-Desist Order ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds[1] that:

Summary

This proceeding arises out of securities lending practices at Penson Financial Services, Inc. ("Penson"), a former registered broker-dealer, that resulted in its systematic violations of Rule 204 of Regulation SHO.[2] From October 2008 through November 2011, Hall and other individuals in the Securities Lending Department implemented procedures that they knew, or were reckless in not knowing, did not comply with Rule 204 of Regulation SHO. In so doing, Hall willfully aided and abetted and caused Penson's violations.

Respondent

1. Hall, 40, of Pantego, Texas, was a Vice President of Penson from at least October 2008 until June 2012. In that position, Hall was responsible for securities lending activities at Penson. Hall was associated with Penson between June 2001 and June 2012. Hall holds Series 7 and 63 licenses.

Other Relevant Entity

2. Penson was a registered broker-dealer incorporated in North Carolina with a principal place of business in Dallas, Texas. From at least 2010 to 2012, Penson was the second-largest clearing firm in the United States as measured by the number of correspondent broker-dealers for which it cleared. Penson was a wholly-owned subsidiary of SAI Holdings, Inc., which in turn was a wholly-owned subsidiary of Penson Worldwide Inc. ("PWI"). Penson filed a Form BDW, which became effective in October 2012, and then declared bankruptcy in January 2013. A bankruptcy plan implementing Penson's liquidation was approved in July 2013.

Background

3. In September 2008, the Commission implemented Rule 204T of Regulation SHO, which required, among other things, clearing firms such as Penson to close out Continuous Net Settlement ("CNS") failures to deliver in all sales of equity securities that they cleared. In July 2009, the Commission made those requirements permanent in adopting Rule 204 of Regulation

---

[1] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

[2] Rule 204 was initially implemented as a temporary rule, Rule 204T. Generally, Rule 204T and Rule 204 will be collectively referred to as Rule 204.

SHO. The Commission adopted Rule 204 of Regulation SHO to address, among other things, abusive "naked" short selling and failures to deliver.[3]

4. Rule 204(a) requires participants of a registered clearing agency (generally, clearing firms) to deliver equity securities to a registered clearing agency when delivery is due, i.e., by settlement date, or close out fails to deliver resulting from long or short sales within certain timeframes. Settlement date is generally three days after the trade date ("T+3"). For short sales, if the clearing firm has a failure-to-deliver position at the clearing agency, it must close out the CNS failure-to-deliver position by purchasing or borrowing securities of like kind and quantity by no later than the beginning of regular trading hours (i.e., market open) on the settlement day following the settlement date ("T+4"). For long sales, if the clearing firm has a failure-to-deliver position at the clearing agency, it must close out the CNS failure-to-deliver position by purchasing or borrowing securities of like kind and quantity by no later than the beginning of regular trading hours on the third day following the settlement date ("T+6").

Penson Violated Rule 204 of Regulation SHO

5. At all relevant times, Penson was a clearing firm and a member of the National Securities Clearing Corporation ("NSCC"), a clearing agency registered with the Commission that clears and settles the majority of United States transactions in equities. From October 2008 through November 2011, Penson systematically failed to close out CNS failures to deliver resulting from certain long sales by market open T+6. The relevant long sales originated with securities held in customer margin accounts. Under the Commission's customer protection rule, Penson was permitted, subject to certain conditions and limitations, to re-hypothecate margin securities to third parties.[4] Penson re-hypothecated margin securities according to the terms of the Master Securities Lending Agreement ("MSLA") developed by the Securities Industry and Financial Markets Association ("SIFMA"). The Securities Lending Department generated revenue and helped to finance Penson's operations by loaning out shares held in customer margin accounts.[5]

6. When a margin customer sold the hypothecated securities that were out on loan, Penson issued account-level recalls to the borrowers on T+3, i.e., three business days after execution of the margin customer's sale order. If the borrowers did not return the shares by the

---

[3] Rule 204T and Rule 204 will be collectively referred to as Rule 204.

[4] Re-hypothecation involves a broker-dealer's use of customer margin securities as collateral for its own securities lending activities.

[5] The circumstances in which margin customers sold securities that were on loan will be referred to as "long sales of loaned securities." This proceeding focuses solely on Penson's close-out practices and neither this proceeding nor the related, settled proceedings (*Michael H. Johnson,* Exch. Act Rel. No. 72186 (May 19, 2014) and *Lindsey Alan Wetzig,* Exch. Act Rel. No. 72187 (May 29, 2014)) should be interpreted as finding that the sale transactions were properly marked as "long" sales under Rule 200 of Regulation SHO.

close of business T+3 and Penson did not otherwise have enough shares of the relevant security to meet its CNS delivery obligations, Penson incurred a CNS failure to deliver in the relevant security. When the open stock loan continued to cause a CNS failure to deliver as of market open T+6, it was Penson's procedure not to purchase or borrow shares by market open sufficient to close out its failure to deliver position. Instead, Penson systematically violated Rule 204(a) by allowing its CNS failure to deliver position to persist beyond market open T+6.

The Securities Lending Department Adopted Procedures for Long Sales of Loaned Securities that Violated Rule 204(a)

7. At all relevant times, the Securities Lending Department was included on the organizational charts of PWI, the parent company, rather than within Penson, which was then a registered broker-dealer. However, the policies and procedures of Penson treated the Securities Lending Department as part of the broker-dealer and the employees of the Securities Lending Department as associated persons of the broker-dealer. Securities Lending Department personnel had direct access to Penson's account with NSCC and conducted all securities lending activity on behalf of Penson. The Securities Lending Department had primary responsibility at Penson for effecting Rule 204(a) close-outs of Penson's CNS failures to deliver resulting from long sales of loaned securities.

8. In September 2008, the Securities Lending Department initially attempted to comply with Rule 204 for long sales of loaned securities by (1) continuing to use its existing systems that were programmed to issue recall notices to borrowing counterparties on T+3; and (2) attempting to buy in the counterparties at market open T+6 if they had not yet returned the borrowed shares. . However, this approach did not result in compliance because the counterparties refused to accept the buy ins. Under the MSLA applicable to the loans, the borrowing counterparties had three full business days from the T+3, account-level recall – i.e., until close of business T+6 – to return the shares. Because the MSLA provided for three full business days for the borrowing counterparties to return the shares, those counterparties often resisted Penson's attempted market open T+6 buy ins.

9. After discussing the matter with the compliance department, Hall's supervisor decided to continue issuing recall notices on T+3 and to have Securities Lending personnel do their best to convince counterparties to return the loaned securities before market open T+6. However, if the counterparties did not return the loaned securities by market open T+6, Penson would not fulfill its Rule 204 obligations by purchasing or borrowing securities. Under these procedures, Penson would sometimes allow the relevant CNS failures to deliver to persist beyond close-of-business on T+6. Hall discussed these issues with his supervisor and agreed with these procedures.

10. Hall knew or was reckless in not knowing that these procedures would cause Penson to violate Rule 204. Nevertheless, from October 2008 until November 2011, Hall and other employees of the Securities Lending Department followed the procedures. As a result, Penson violated Rule 204 at least 1,500 times.

11. Hall played a significant role in bringing the violations to the attention of regulators. Penson failed to disclose the non-compliant procedures over the course of more than two years even though examiners from the Commission's Office of Compliance Inspections and Examinations and the Financial Industry Regulatory Authority ("FINRA") were continuously reviewing Penson's Rule 204 practices from November 2008 through the end of 2010. Penson finally disclosed the non-compliant procedures to FINRA in a March 2011 letter responding to FINRA examination findings. Early drafts of the letter prepared by Penson personnel other than Hall did not disclose the non-compliant procedures. Mid-way through the drafting process, Hall took over responsibility for drafting the relevant portion of Penson's response, and drafted the language disclosing Penson's non-compliant procedures.

Violations

As a result of the conduct described above, Hall willfully aided and abetted and caused Penson's violations of Rules 204(a) of Regulation SHO, which requires registered participants of clearing agencies to close out CNS failures to deliver resulting from long sales by market open T+6 and to close out CNS failures to deliver resulting from short sales by market open T+4.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondent's Offer.

Accordingly, pursuant to Sections 15(b) and 21C of the Exchange Act, it is hereby ORDERED that:

A. Respondent Hall shall cease and desist from committing or causing any violations and any future violations of Rule 204(a) of Regulation SHO.

B. Respondent Hall is censured.

C. Respondent acknowledges that the Commission is not imposing a civil penalty based upon his cooperation in a Commission investigation and related enforcement proceeding. If at any time following the entry of the Order, the Division of Enforcement ("Division") obtains information indicating that Respondent knowingly provided materially false or misleading information or materials to the Commission or in a related proceeding, the Division may, at its sole discretion and with prior notice to the Respondent, petition the Commission to reopen this matter and seek an order directing that the Respondent pay a civil money penalty. Respondent may contest by way of defense in any resulting administrative proceeding whether he knowingly provided materially false or misleading information, but may not: (1) contest the findings in the

Order; or (2) assert any defense to liability or remedy, including, but not limited to, any statute of limitations defense.

SECURITIES EXCHANGE ACT OF 1934
Release No. 75940 / September 17, 2015

ADMINISTRATIVE PROCEEDING
File No. 3-16818

In the Matter of

TIMOTHY J. MCGEE,

Respondent.

ORDER INSTITUTING ADMINISTRATIVE PROCEEDINGS PURSUANT TO SECTION 15(b) OF THE SECURITIES EXCHANGE ACT OF 1934, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS

I.

The Securities and Exchange Commission ("Commission") deems it appropriate and in the public interest that public administrative proceedings be, and hereby are, instituted pursuant to Section 15(b) of the Securities Exchange Act of 1934 ("Exchange Act") against Timothy J. McGee ("Respondent").

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, Respondent admits the Commission's jurisdiction over him and the subject matter of these proceedings, and the findings contained in Sections III.2 and III.3 below, and consents to the entry of this Order Instituting Administrative Proceedings Pursuant to Section 15(b) of the Securities Exchange Act of 1934, Making Findings, and Imposing Remedial Sanctions ("Order"), as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds that

1. McGee, age 51, lives in Wayne, Pennsylvania. From April 27, 1988 to March 22, 2012, McGee was a registered representative with Ameriprise Financial Services, Inc., a registered broker-dealer. McGee held Series 7 and 63 licenses and was a Certified Financial Planner.

2. On November 15, 2012, a jury found McGee guilty of one count of securities fraud, in violation of 15 U.S.C. §§ 78j(b) and 78(ff), and Securities and Exchange Commission ("SEC") Rules 10b-5 and 10b5-2(b)(2), based on his July 2008 insider trading in the stock of Philadelphia Consolidated Holding Company ("PHLY"); and one count of perjury, in violation of 18 U.S.C. § 1621, based on his false testimony before the Commission. *United States v. McGee*, Crim. No. 12-236 (E.D. Pa. 2012). McGee was sentenced to six months imprisonment and ordered to pay a $100,000 fine. His conviction was subsequently affirmed. *United States v. McGee*, 763 F.3d 304 (3d Cir. 2014).

3. On July 15, 2015, a Judgment Order was entered by consent against McGee, permanently enjoining him from future violations of Section 10(b) of the Exchange Act and Rule 10b-5 thereunder, in the civil action entitled *Securities and Exchange Commission v. Timothy J. McGee, et al.*, Civil Action Number 12-CV-01296 (TJS), in the United States District Court for the Eastern District of Pennsylvania.

4. The Commission's amended complaint alleged that McGee engaged in unlawful insider trading by purchasing the common stock of PHLY in advance of the company's July 23, 2008 public announcement of its sale to Tokio Marine Holdings, Inc., after he misappropriated material nonpublic information from a senior executive of PHLY with whom he had a relationship of trust and confidence. The amended complaint alleged further that McGee purchased a substantial amount of PHLY stock for himself, ultimately earning over $292,000 in ill-gotten gains. The amended complaint also alleged that McGee tipped his good friend and colleague, Michael W. Zirinsky, about the PHLY acquisition. Zirinsky bought PHLY stock for himself and on behalf of numerous family members.

IV.

In view of the foregoing, the Commission deems it appropriate and in the public interest to impose the sanctions agreed to in Respondent McGee's Offer.

Accordingly, it is hereby ORDERED pursuant to Section 15(b)(6) of the Exchange Act, that Respondent McGee be, and hereby is barred from association with any broker, dealer, investment adviser, municipal securities dealer, or transfer agent; and pursuant to Section 15(b)(6) of the Exchange Act Respondent McGee be, and hereby is barred from participating in any offering of a penny stock, including: acting as a promoter, finder, consultant, agent or other person who engages in activities with a broker, dealer or issuer for purposes of the issuance or trading in any penny stock, or inducing or attempting to induce the purchase or sale of any penny stock.

Any reapplication for association by the Respondent will be subject to the applicable laws and regulations governing the reentry process, and reentry may be conditioned upon a number of factors, including, but not limited to, the satisfaction of any or all of the following: (a) any disgorgement ordered against the Respondent, whether or not the Commission has fully or partially waived payment of such disgorgement; (b) any arbitration award related to the conduct that served as the basis for the Commission order; (c) any self-regulatory organization arbitration award to a customer, whether or not related to the conduct that served as the basis for the Commission order; and (d) any restitution order by a self-regulatory organization, whether or not related to the conduct that served as the basis for the Commission order.

By the Commission.

ADMINISTRATIVE PROCEEDING
File No. 3-16820

In the Matter of **TERRY L. JOHNSON, CPA,** **Respondent.**	**ORDER INSTITUTING PUBLIC ADMINISTRATIVE AND CEASE-AND-DESIST PROCEEDINGS PURSUANT TO SECTION 8A OF THE SECURITIES ACT OF 1933, SECTIONS 4C AND 21C OF THE SECURITIES EXCHANGE ACT OF 1934, AND RULE 102(e) OF THE COMMISSION'S RULES OF PRACTICE, MAKING FINDINGS, AND IMPOSING REMEDIAL SANCTIONS AND A CEASE-AND-DESIST ORDER**

I.

The Securities and Exchange Commission ("Commission") deems it appropriate that public administrative and cease-and-desist proceedings be, and hereby are, instituted pursuant to Section 8A of the Securities Act of 1933 ("Securities Act"), Sections 4C[1] and 21C of the Securities Exchange Act of 1934 ("Exchange Act"), and Rule 102(e)(1)(ii) and (iii) of the

[1] Section 4C provides, in relevant part, that:

> The Commission may censure any person, or deny, temporarily or permanently, to any person the privilege of appearing or practicing before the Commission in any way, if that person is found . . . (1) not to possess the requisite qualifications to represent others . . . (2) to be lacking in character or integrity, or to have engaged in unethical or improper professional conduct; or (3) to have willfully violated, or willfully aided and abetted the violation of, any provision of the securities laws or the rules and regulations thereunder.

Commission's Rules of Practice against Respondent Terry L. Johnson, CPA ("Johnson" or "Respondent").[2]

II.

In anticipation of the institution of these proceedings, Respondent has submitted an Offer of Settlement (the "Offer") which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission, or to which the Commission is a party, and without admitting or denying the findings herein, except as to the Commission's jurisdiction over him and the subject matter of these proceedings, which are admitted, and except as provided herein in Section V, Respondent consents to the entry of this Order Making Findings And Imposing Remedial Sanctions Pursuant to Section 8A of the Securities Act of 1933, Sections 4C and 21C of the Securities Exchange Act of 1934, and Rules 102(e) of the Commission's Rules of Practice and a Cease-and-Desist Order, as set forth below.

III.

On the basis of this Order and Respondent's Offer, the Commission finds that:[3]

A. <u>SUMMARY</u>

1. Respondent, Terry L. Johnson, a Casselberry, Florida-based certified public accountant, who performed highly deficient and fraudulent audits and quarterly reviews of the financial statements of at least eight issuer clients and issued audit reports containing materially false statements on these annual financial statements. These audit reports were included in the issuers' filings under the Exchange Act or in registration statements under the Securities Act. Specifically, Johnson issued audit reports with unqualified opinions on the December 31, 2012 and 2013 fiscal year-end financial statements included in the Form 10-K annual reports of six clients, including Boreal Water Collection, Inc., Monster Arts, Inc., Primco Management, Inc.,

---

[2] Rule 102(e)(1)(ii) provides, in pertinent part, that:

> The Commission may . . . deny, temporarily or permanently, the privilege of appearing or practicing before it . . . to any person who is found . . . to have engaged in unethical or improper professional conduct.

Rule 102(e)(1)(iii) provides, in pertinent part, that:

> The Commission may . . . deny, temporarily or permanently, the privilege of appearing or practicing before it . . . to any person who is found...to have willfully violated, or willfully aided and abetted the violation of any provision of the Federal securities laws or the rules and regulations thereunder.

[3] The findings herein are made pursuant to Respondent's Offer of Settlement and are not binding on any other person or entity in this or any other proceeding.

Puissant Industries, Inc., UMED Holdings, Inc., and Valley High Mining Company, and for inclusion in Form S-1 registration statements of two clients, including ADM Endeavors, Inc. and Legendary Ventures Inc. (collectively the "Eight Issuers").

2. Johnson's numerous audit deficiencies included, among other things, the failure to obtain engagement quality reviews, properly plan audits, obtain sufficient appropriate audit evidence, and maintain audit documentation. Johnson's audits were so deficient that they amounted to no audits at all and could not be relied upon as having afforded him with a reasonable basis for his opinions regarding the financial statements that he audited. Moreover, Johnson falsely stated in audit reports that he conducted his audits "in accordance with the standards of the Public Company Accounting Oversight Board [PCAOB]," when, in fact, his conduct of the audits did not conform with and violated numerous PCAOB auditing standards.

3. Johnson also created, or caused to be created, back-dated, artificial audit documentation for certain audit clients, which he produced to the Commission staff in response to document subpoenas as a contemporaneous work paper[4]. In reality, the work papers did not exist at the time of the actual audits, but were created after Johnson was requested to produce work papers in connection with the Commission staff's investigation.

B. RESPONDENT

4. **Terry L. Johnson**, age 56, a resident of Casselberry, Florida operates a self-named sole-proprietorship accounting firm in Casselberry, Florida. Johnson is a Florida-licensed CPA. Johnson's accounting firm, "Terry L. Johnson, CPA, had its PCAOB registration withdrawn as of July 7, 2015.[5] Johnson audited and issued audit reports, purportedly in accordance with PCAOB standards, for the December 31, 2012 and 2013 year-end financial statements of the Eight Issuers.

C. RELEVANT ENTITIES

5. **ADM Endeavors, Inc. ("ADM")** is a Nevada corporation with its principal place of business in Bismarck, North Dakota. ADM has common stock registered pursuant to Section 12(g) of the Exchange Act and files periodic reports with the Commission pursuant to Section 13 of the Exchange Act. ADM has filed a Form S-1 registration statement, which became effective on May 14, 2015.

6. **Boreal Water Collection, Inc. ("Boreal")** is a Nevada corporation with its principal place of business in Kiamesha Lake, New York. Boreal has common stock registered

---

[4] The term "work paper" is used in this memorandum interchangeably with, and has the same meaning as, the term "audit documentation."

[5] On December 17, 2013, Johnson's accounting firm became a PCAOB-registered firm. On May 14, 2015, Johnson requested the withdrawal of his firm's PCAOB registration.

pursuant to Section 12(g) of the Exchange Act and files periodic reports with the Commission pursuant to Section 13 of the Exchange Act. Boreal's common stock trades on OTC Link.

7. **Legendary Ventures, Inc. ("Legendary")** is a Nevada corporation with its principal place of business in Mississauga, Ontario, Canada. Legendary has filed a Form S-1 registration statement that is currently being reviewed by the Division of Corporation Finance.

8. **Monster Arts, Inc. ("Monster")** is a Nevada corporation with its principal place of business in San Clemente, California. Monster's common stock is registered pursuant to Section 12(g) and files periodic reports with the Commission pursuant to Section 13 of the Exchange Act. Monster is delinquent in its Exchange Act reporting obligations, having failed to file its Form 10-K for the fiscal year ended December 31, 2014 and Form 10-Q for the quarter ending March 31, 2015. Monster's common stock trades on OTC Link.

9. **Primco Management, Inc. ("Primco")** is a Delaware corporation with its principal place of business in Seattle, Washington. Primco has common stock registered pursuant to Section 12(g) of the Exchange Act and files periodic reports with the Commission pursuant to Section 13 of the Exchange Act. Primco is delinquent in its Exchange Act reporting obligations, having failed to file its Form 10-Q for the quarter ending March 31, 2015. Primco's common stock trades on OTC Link.

10. **Puissant Industries, Inc. ("Puissant")** is a Florida corporation with its principal place of business in London, Kentucky. Puissant filed periodic reports with the Commission pursuant to Section 13 and 15(d) of the Exchange Act through December 31, 2014. On December 31, 2014, Puissant filed a Form 15 to terminate or suspend its duty to file reports with the Commission. Puissant's common stock trades on OTC Link.

11. **UMED Holdings, Inc. ("UMED")** is a Texas corporation with its principal place of business in Fort Worth, Texas. UMED has common stock registered pursuant to Section 12(g) of the Exchange Act and files periodic reports with the Commission pursuant to Section 13 of the Exchange Act. UMED's common stock trades on OTC Link.

12. **Valley High Mining Company ("Valley High")** is a Nevada corporation with its principal place of business in Silverdale, Washington. Valley High has common stock registered pursuant to Section 12(g) of the Exchange Act and files periodic reports with the Commission pursuant to Section 13 of the Exchange Act. Valley High's common stock trades on OTC Link.

D. FACTS

13. Johnson was first registered with the PCAOB on December 17, 2013. Within two months of becoming registered, Johnson acquired eighteen new issuer audit clients. The vast majority of these audit clients were previously audited by an auditor who was censured and barred from being an associated person of a registered public accounting firm by the PCAOB in March 2014. Once the predecessor auditor's registration was revoked by the PCAOB, Johnson, who had previously worked for the predecessor auditor, became the new auditor for audit clients of the predecessor auditor. Out of the eighteen audit clients, at least two were previously audited

by a second predecessor auditor, who was also previously sanctioned by the PCAOB in November 2013. Johnson had no prior experience in serving as an engagement partner for Commission registrants prior to the numerous engagements that he picked up after the predecessor auditors were barred by the PCAOB.

14. For the audits of the Eight Issuers, Johnson falsely stated that he had conducted his audits in accordance with the standards of the PCAOB. Johnson's audits were grossly deficient, evidencing numerous and repeated violations of auditing standards and, among other things, lacked audit planning, engagement quality reviews, audit documentation, and sufficient appropriate audit evidence.

1. <u>Failure to Obtain Engagement Quality Reviews</u>

15. PCAOB Auditing Standard No. 7, Engagement Quality Review, requires an engagement quality review ("EQR") and concurring approval of issuance for each audit engagement and each engagement to review interim financial information. Auditing Standard No. 7, ¶ 1. To maintain objectivity, the engagement quality reviewer should not make decisions on behalf of the engagement team or assume any of the responsibilities of the engagement team. Auditing Standard No. 7, ¶ 7. Johnson repeatedly failed to comply with PCAOB Auditing Standard No. 7.

16. Auditing Standard No. 7 allows firms, including sole practitioners such as Johnson, to engage qualified individuals from outside the firm to serve as the engagement quality reviewer. Auditing Standard No. 7, ¶ 3. Johnson knew that each of his audit engagements required an EQR, but failed to obtain an EQR for the December 31, 2012 and 2013 audits of the financial statements of the Eight Issuers.

17. Johnson also failed to obtain engagement quality reviews of the March 31 and June 30, 2014 quarterly reviews of ADM, Boreal Water, Monster, Primco, Puissant, UMED and Valley High; the March 31, 2014 quarterly review of Legendary.

2. <u>Lack of Audit Work Papers</u>

18. Johnson repeatedly violated PCAOB Auditing Standard No. 3, *Audit Documentation*, which requires that audit documentation contain sufficient information to enable an experienced auditor, having no previous connection with the engagement (a) to understand the nature, timing, extent, and results of the procedures performed, evidence obtained, and conclusions reached, and (b) to determine who performed the work and the date such work was completed. Auditing Standard No. 3, ¶ 6, *Audit Documentation*. If, after the documentation completion date, an auditor becomes aware, as a result of a lack of documentation or otherwise, that audit procedures may not have been performed, evidence may not have been obtained, or appropriate conclusions may not have been reached, the auditor must determine, and if so demonstrate that, sufficient procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached with respect to the relevant financial statement assertions. To accomplish this, the auditor must have persuasive other evidence, and oral explanations alone does not constitute persuasive other evidence. Auditing Standard No. 3, ¶ 9, *Audit Documentation*.

19. Johnson's audit work papers related to the December 31, 2012 and 2013 year-end audits of the Eight Issuers were grossly deficient. The audits consistently failed to include evidence of the procedures performed, evidence obtained, and conclusions reached with respect to relevant financial statement assertions.

a. <u>2012 Audits</u>

20. Johnson was engaged to perform a re-audit of the December 31, 2012 year-end financial statements of six audit clients, including, ADM, Boreal, Legendary, Monster, Puissant, and UMED, as a result of the PCAOB revoking the registration of the predecessor auditor. Johnson was required to take full responsibility for the 2012 audits and perform his own audit work that provided a basis for his opinion on the financial statements.[6] Johnson, however, relied on the predecessor auditor's audit work to afford a basis for his 2012 audit opinions, without performing an independent audit.

21. Johnson's re-audits of the December 31, 2012 financial statements amounted to no audits at all, and the information he obtained from any review of the predecessor auditor's work papers was insufficient to afford a basis for expressing an opinion on the financial statements. Significant categories of work papers were either completely absent from the audit file or consisted of a schedule prepared by the client that detailed the particular account balance, but contained no other documentation from Johnson such as the procedures performed, evidence obtained, or conclusions reached. For example, virtually no work papers existed for the Boreal and Puissant audits. The majority of work papers for the Monster audit only contained a notation from Johnson indicating that he "traced to w/p in prior auditor file, reviewed procedures."

22. Johnson's 2012 audits of Primco and Valley High (which were not audited by the predecessor auditor), were lacking in work paper documentation, evidence obtained, or evidence that he performed audit procedures to reach conclusions with respect to the relevant financial statement assertions.

b. <u>2013 Audits</u>

23. Johnson's audit work papers related to the December 31, 2013 year-end audits of the Eight Issuers were grossly deficient. The audits failed to include evidence of the procedures performed, evidence obtained, and conclusions reached with respect to relevant financial statement assertions. For example, for all Eight Issuers, Johnson's files contained no work papers related to significant categories of financial statement line items and transactions including cost of sales, operating expenses, and equity transactions.

---

[6] If the successor auditor accepts the re-audit engagement, he or she may consider the information obtained from inquiries of the predecessor auditor and review of the predecessor auditor's report and working papers in planning the re-audit. However, the information obtained from those inquiries and any review of the predecessor auditor's report and working papers is not sufficient to afford a basis for expressing an opinion. The nature, timing, and extent of the audit work performed and the conclusions reached in the re-audit are solely the responsibility of the successor auditor performing the re-audit. AU 315 ¶ 15, *Communication Between Predecessor and Successor Auditors*. The successor auditor should plan and perform the re-audit in accordance with PCAOB standards. AU 315 ¶ 16.

c. **Financial Statements and Other Information**

24. In his audits of the December 31, 2012 and 2013 year-end financial statements of the Eight Issuers, Johnson failed to include work papers that demonstrated that he reconciled underlying accounting records to the issuers' financial statements.[7] No documentation existed evidencing procedures performed to obtain audit evidence for the financial statement footnotes or reconciling the footnotes to supporting documentation. Further, no documentation existed within the audit files evidencing that Johnson read and considered any of the other information in the annual audit reports of Boreal, Monster, Primco, Puissant, UMED and Valley High that were filed with the Commission.[8]

25. For the audit of Primco, for example, Johnson had no copy of the issuer's Form 10-K (or subsequent amended 10-Ks) in his work papers. Primco subsequently restated its Form 10-K because it later came to Johnson's attention that the issuer "inadvertently" included among other things, approximately $1,496,000 in assets on the balance sheet that should not have been recorded in the company's books and records. Significantly, as a result of the restatement, certain amounts reflected in Primco's original tax footnote should have changed in the restated filing but were not. Johnson, however, did not review the tax footnote.

26. In other instances, for the audits of Puissant, UMED and Valley High, Johnson had a copy of the Commission filing in his work papers which contained no notations or any other evidence that he reviewed the financial statements contained within those filings. Further, for the audits of Monster and Boreal, for example, the work papers included a printout of the issuers' filings with a header containing the SEC EDGAR internet address, demonstrating that that the filings were printed from the SEC EDGAR website and inserted in the work papers <u>after</u> they were filed with the Commission. Therefore, no evidence existed in the work papers indicating that Johnson reviewed the financial statements or read and considered the other information contained in those documents before they were filed with the Commission.

27. Two other clients, ADM and Legendary, had filed a series of amended Form S-1s with the Commission. The work papers do not contain evidence that Johnson reviewed the financial statements contained within these filings in order to reconcile them with the underlying accounting records. The ADM work papers merely contained a copy of the last amended Form S-1, but no copies of the previous three amended Form S-1s that included his opinions. The Legendary work papers contained a copy of the first Form S-1 filed, but none of the subsequent

---

[7] The auditor's substantive procedures must include reconciling the financial statements with the underlying accounting records. AS No. 13 ¶ 41, *The Auditor's Responses to the Risks of Material Misstatement.*

[8] Other information in a document may be relevant to an audit performed by an independent auditor or to the continuing propriety of his report. The auditor's responsibility with respect to information in a document does not extend beyond the financial information identified in his report, and the auditor has no obligation to perform any procedures to corroborate other information contained in a document. However, he should read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements. AU 550 ¶ 04, *Other Information in Documents Containing Audited Financial Statements.*

amended Form S-1 filings. Legendary's second amended Form S-1 contained a restatement of previously issued financial statements and the inclusion of the financial statements of an additional interim period, but a copy of which was not included in the work papers.

3. <u>Inappropriate Addition of Documents to Work Papers</u>

28. PCAOB Auditing Standard No. 3, *Audit Documentation* requires that prior to the report release date, the auditor must have completed all necessary auditing procedures and obtained sufficient evidence to support the representations in the auditor's report. A complete and final set of audit documentation should be assembled for retention as of a date not more than 45 days after the report release date (*documentation completion date)*. Auditing Standard No. 3, ¶ 15, *Audit Documentation*. Circumstances may require additions to audit documentation after the report release date. Audit documentation must not be deleted or discarded after the documentation completion date; however, information may be added. Any documentation added must indicate the date the information was added, the name of the person who prepared the additional documentation, and the reason for adding it. Auditing Standard No. 3, ¶ 16, *Audit Documentation*. Johnson repeatedly failed to comply with PCAOB Auditing Standard No. 3.

29. Johnson failed to document the addition of several documents to the work papers after the documentation completion date for the Puissant and Primco engagements, as required by Auditing Standard No. 3, *Audit Documentation*. To the contrary, Johnson, after receiving a request for work papers by Commission staff, engaged in a scheme with several of his audit clients to draft back-dated, fraudulent work papers and create the appearance of having proper contemporaneous work papers.

30. For the Puissant audit, the report release date for Johnson's audit of the company's December 31, 2013 year-end financial statements was April 14, 2014.[9] In a September 23, 2014 email from Johnson to the CEO of Puissant, following the staff's request for documents, Johnson sent a "management inquiries" work paper and a "SAS 99 fraud questionnaire" work paper—critical parts of an audit—and asked "can you get these back to me as soon as possible." Puissant's CEO, on that same day, responded "signed documents..." and attached completed copies of the "management inquiries" and "SAS 99 fraud questionnaire" work papers. Johnson sent another email to Puissant's CEO on September 23, 2014 in which he attached a management representation letter and asked the CEO "can you copy this on to your letter head and sign and date April 12, 2014."

31. For the Primco audit, the report release date for Johnson's audit of Primco's December 31, 2013 year-end financial statements was April 15, 2014.[10] In another September 23, 2014 email from Johnson to the CEO of Primco, Johnson wrote, "Could you please fill out these and get back to me today. I need these for my audit files." Attached to this email were

---

[9] No report release date is documented in the work papers. In fact, April 14, 2014 represents the date Puissant's Form 10-K was filed with the Commission. Johnson's audit opinion is also dated April 14, 2014.

[10] No report release date is documented in the work papers. April 15, 2014 represents the date Primco's Form 10-K was filed with the Commission.

blank copies of two documents, a "management inquiries" work paper and a "SAS 99 fraud questionnaire" work paper, which were to be completed by Primco's CEO. In another instance, Primco's CFO and Johnson worked together to create or alter Johnson's work papers in connection with responding to the Commission staff's document requests. An email dated September 17, 2014 from Primco's CFO to its CEO states "...over the last 10 days we have been in Florida helping Terry [Johnson] with the pcaob review, one of the accounts picked was the 12312013 primco file...so we have been working on this and several other accounts they want to see...unfortunately when the SEC calls everything else comes to a halt..."

4. <u>Lack of Sufficient Appropriate Audit Evidence</u>

32. Johnson repeatedly violated PCAOB Auditing Standard No. 15, *Audit Evidence*, which requires that the auditor must plan and perform audit procedures to obtain sufficient appropriate audit evidence to provide a reasonable basis for his or her opinion. Auditing Standard No. 15, ¶ 4, *Audit Evidence*. Sufficiency is the measure of the quantity of audit evidence. Appropriateness is the measure of the quality of audit evidence, *i.e.,* its relevance and reliability. To be appropriate, audit evidence must be both relevant and reliable in providing support for the conclusions on which the auditor's opinion is based. Auditing Standard No. 15, ¶ 5-6, *Audit Evidence*. Johnson repeatedly failed to comply with Auditing Standard No. 15.

33. In those instances which Johnson prepared audit work papers, they were perfunctory and did not contain sufficient and appropriate audit evidence to provide a reasonable basis for his opinions. The lack of sufficient and appropriate audit evidence is pervasive throughout the audits for the Eight Issuers.

a. <u>Valley High – "Mineral Rights"</u>

34. For the audit of Valley High, Johnson prepared a work paper related to "mineral rights," the company's principal asset, representing 80% and 98% of its total assets at December 31, 2013 and 2012, respectively. The mineral rights represented monies paid by Valley High to a newly formed joint venture that was going to operate and develop mineral properties in Peru. In 2013, the joint venture was terminated because Valley High could not access the mining property. Johnson included a note on the relevant work paper stating that "per agreement all payments made by VHMC [Valley High] will be returned one year after y/e 12/31/13." Johnson, however, failed to obtain any evidence on whether the monies paid by Valley High and included on the balance sheet would be recovered or returned. Further, once the joint venture was terminated, the amounts due to Valley High should have been classified as a receivable due to Valley High. However, Johnson knew that the amount was still misclassified as "mineral rights" in Valley High's December 31, 2013 financial statements.

35. In an email dated September 10, 2014 from Johnson to the CEO of Valley High, Johnson stated "Also, I need backup for the mineral rights property at 12/31/13..." and "the mineral rights should have been written off at 12/31/13."[11] This email was sent approximately

[11] The email was sent by Johnson to his client shortly after Johnson received the first document request from the Commission staff on August 26, 2014.

six months after Valley High's December 31, 2013 Form 10-K was filed with the Commission. Johnson knew that, by September, Valley High believed that it would not recover the monies and, thus, would have to write-off the amount in the third quarter of 2014. Valley High's September 30, 2014 Form 10-Q, the company's most recent filing, however, still included the non-existent asset on its balance sheet.

b. UMED Audit - "Tea Farm"

36. In 2012, UMED acquired a tea bush farm located in Hawaii for consideration of 5.5 million restricted shares and $278,000 in cash. At December 31, 2012 and 2013, UMED valued the tea bushes at $750,000, and this item constituted the second largest asset recorded on the books and records of the company. Notwithstanding its significance, only two work papers addressed this transaction, including: (1) a "property, plant and equipment" work paper, which listed the tea bushes as a single line item and included the notation, "traced to original agreement," next to this line item; and (2) an undated two sentence memo which stated "Traveled to Wood Valley to observe existence of ranch. Attached find pictures of the farm as well as documents that were found online regarding the farm." The audit evidence Johnson obtained with respect to financial statement assertions associated with this asset was wholly inadequate and do not indicate that Johnson did any inspection of or confirmation of the existence of the tea farm, its tea bushes, facilities and equipment.

c. Multiple Issuers -- Derivative Liability

37. For the Monster, Primco and Valley High engagements, Johnson failed to obtain "sufficient appropriate" evidence concerning the recording of "derivative liabilities," which generally arise when certain features of convertible debt are required to be accounted for separately as a derivative financial instrument. Johnson performed no analyses to determine whether the issuers' convertible notes, including the potential for recording a related derivative liability, were appropriately accounted for under Generally Accepted Accounting Principles ("GAAP"). Nor did Johnson obtain evidence to determine whether the derivative liabilities were valued correctly or should have even been recorded in the first place.

38. Monster, for example, recorded an implausibly large derivative liability in the amount of $21,876,947 on its December 31, 2013 balance sheet that pertained to only $261,000 in outstanding convertible notes. The derivative liability work papers contained implausible assumptions, including, for example, a risk-free rate, used to calculate the derivative liability.[12] During the relevant time, the risk-free rate would have been less than 1%, but the rate documented in the work papers and used in calculating the liability was 10%. Had Johnson reviewed the company's footnotes, he would have noted the company disclosed that it was using risk-free rates of less than 1% in its calculations for valuing stock options. Johnson testified that he did not understand the risk-free rate assumption used to value the derivative. Thus, the audit evidence Johnson obtained with respect to financial statement assertions associated with these liabilities was completely deficient.

[12] The risk-free rate generally represents the discount rate on short term U.S. Government Treasury Bills.

d. Multiple Issuers – Revenue

39. Johnson consistently failed to obtain sufficient appropriate audit evidence with respect to his audits of the revenue reported by various issuers. In the Monster 2013 year-end audit, for example, Johnson did not test revenue because it was "under materiality" even though it was above the materiality threshold Johnson had calculated for that audit and was in fact material.[13]

40. For the UMED audit, revenue "testing" consisted of Johnson including a notation next to the revenue balance on the income statement simply stating that revenue recorded was the result of the purchase of another entity. The only procedure Johnson performed with respect to revenue was to trace a sample of individual sales transactions to an "invoice," "contract" or "customer file." The work papers did not provide any information pertaining to how the sample was determined or the basis for selecting items to "test." In addition, the work papers did not provide any details concerning the invoice, contract or file that was examined. Johnson did not obtain sufficient appropriate evidence pertaining to whether fundamental revenue recognition criteria had been met. Further, Johnson did not test whether the sales were realized or recorded in the appropriate period.

41. For all Eight Issuers, Johnson glossed over the audit testing of revenue and failed to obtain sufficient appropriate evidence that reported sales did in fact occur. The grossly deficient audits of revenue combined with the non-existent audits of cost of sales and operating expenses, resulted in essentially "non-audits" of the Eight Issuers income statements. Accordingly, based on the foregoing, Johnson failed to comply with PCAOB Auditing Standard No. 15 for the audits of the Eight Issuers.

5. Failure to Properly Plan Audits

42. Johnson repeatedly violated PCAOB Auditing Standard No. 9, *Audit Planning*, which requires that planning the audit includes establishing the overall audit strategy for the engagement and developing an audit plan, which includes, in particular, planned risk assessment procedures and planned responses to the risks of material misstatement. Auditing Standard No. 9, ¶ 5, *Audit Planning*. The auditor should develop and document an audit plan that includes a description of: the planned nature, timing, and extent of the risk assessment procedures; the planned nature, timing, and extent of tests of controls and substantive procedures; and other planned audit procedures required to be performed so that the engagement complies with PCAOB standards. Auditing Standard No. 9, ¶ 10, *Audit Planning*. The purpose and objective of planning the audit are the same for an initial audit or a recurring audit engagement. However, for an initial audit, the auditor should determine the additional planning activities necessary to establish an appropriate audit strategy and audit plan, including determining the audit procedures necessary to obtain sufficient appropriate audit evidence regarding the opening balances. Auditing Standard No. 9, ¶ 19, *Audit Planning*. Johnson's audits of the financial statements of the Eight Issuers violated PCAOB Auditing Standard No. 9.

---

[13] 2013 revenues amounted to $32,568. The materiality threshold Johnson had calculated for this audit was $25,000.
