Rule 11.11. Routing to Away Trading Centers

Unless the terms of the order direct the Exchange not to route such order away, if a Market Order or marketable Limit Order has not been executed in its entirety pursuant to 11.10(a)(4) above, the order shall be eligible for routing away pursuant to one or more of the routing options listed under paragraph (g) below.

(a) Regulation SHO. Unless a User selects the Post to Away, RDOT[, RDOX, INET], or ROOC routing options set forth under paragraph (g) of this Rule, an order that includes a Short Sale instruction when a Short Sale Circuit Breaker pursuant to Rule 201 of Regulation SHO is in effect is not eligible for routing by the Exchange. If an order is ineligible for routing due to a Short Sale Circuit Breaker being in effect and such order contains a Time-in-Force of IOC, then the order will be cancelled. For any other order ineligible for routing due to a Short Sale Circuit Breaker being in effect, the Exchange will post the unfilled balance of the order to the EDGX Book, treat the order as if it included a Book Only or Post Only instruction, and subject it to the Re-Pricing Instructions to Comply with Rule 201 of Regulation SHO, as described in Rule 11.6(l)(2), unless the User has elected the order Cancel Back as described in Rule 11.6(b).

(b)-(f) No change.

(g) Routing Options. The System provides a variety of routing options. Routing options may be combined with all available order types and Times-in-Force instruction, with the exception of order types and Times-in-Force instruction whose terms are inconsistent with the terms of a particular routing option. The System will consider the quotations only of accessible Trading Centers. The term "System routing table" refers to the proprietary process for determining the specific trading venues to which the System routes orders and the order in which it routes them. The Exchange reserves the right to route orders simultaneously or sequentially, maintain a different System routing table for different routing options and to modify the System routing table at any time without notice. The System routing options are:

(1)-(3) No change.

(4) [INET. INET is a routing option under which an order checks the System for available shares and then is sent to Nasdaq. If shares remain unexecuted after routing, they are posted on the Nasdaq book, unless otherwise instructed by the User.] Reserved.

(5) No change.

(6) [RDOX. RDOX is a routing option under which an order checks the System for available shares, is then sent to the NYSE and can be re-routed by the NYSE. If shares remain unexecuted after routing, they are posted on the NYSE book, unless otherwise instructed by the User.] Reserved.

(7)-(13) No change.

(h)-(i) No change.
